Notes:

DTW = Depth to Water
ft bgs = Feet below grade ground surface
TPHd = Total petroleum hydrocarbons as diesel by EPA Method 8015 with the Dawn Zemo Extraction Method and silica-gel clean up
TPHg = Total petroleum hydrocarbons as gasoline by EPA Method 8015m
Benzene, Toluene, Ethylbenzene, Xylenes by EPA Method 8021
MTBE = Methyl-tert-butyl ether analyzed by EPA Method 8021
<X = Concentration less than laboratory reporting limits

San Carlos, CA 94070

SUBJECT: OLYMPIAN FUELING FACILITY AT 131 TERMINAL COURT SOUTH SAN FRANCISCO, CALIFORNIA

Dear Mr. Bertetta:

Thank you for the *Remedial Action Completion Report,* submitted February 4, 2013 to the Geotracker website, by Conestoga-Rovers & Associates (CRA) for the above referenced site. San Mateo County Groundwater Protection Program (GPP) concurs with the proposed post-remedial sampling plan to collect grab groundwater samples.

You may combine results of wet and dry season sampling into one report. Please notify this office at least two (2) business days prior to conducting any field work and submit a report of post-remedial groundwater sampling no later than **September 20, 2013.**

I can be reached at (650) 372-6298 or by e-mail at jmadden@smcgov.org to answer any questions you may have regarding this letter. Thank you for your cooperation.

Sincerely,

Jacob Madden
Hazardous Materials Specialist
Groundwater Protection Program

FA 51497

 2013 SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS:

An accurate & correct map of existing and proposed well/boring locations **must** be included with the permit application. The well/boring location map **must** include the following.

1. North arrow, existing & historic site features, wells, approximate property lines and any other pertinent existing & historic features and information.
2. Proposed well/boring locations to scale.

A work plan describing the drilling and construction/destruction methodology may be requested by County staff. Upon review of information on this application, and subject to approval noted below, a permit will be issued allowing well/boring owner, driller, and responsible professional to perform the specified work. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. Drilling may begin at the notified date and time whether County staff is present or not.

GENERAL CONDITIONS:

A. Well and boring construction and destruction under this permit is subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by a Health Department representative.

B. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its' officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.

C. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling unless special conditions are approved in writing as part of this permit. Borings lasting longer than 24 hours without a variance are considered wells.

D. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.

E. A copy of the State DWR Form 188, boring logs and well construction details for all borings/wells except geotechnical borings, signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. As-built locations/dimensions **must** be finalized in subsequent report of findings submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction.

F. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.

G. Permit is valid for a mobilization associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an Inspection Cancellation fee of $264 for 2013 if GPP staff attempted to perform an inspection.

H. Wells installed under this permit may not be used for domestic, municipal, commercial, or irrigation water supply.

I. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.

J. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.

K. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.

L. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, and potentially re-permit the work as a new mobilization.

FA51497

 2013 SUBSURFACE DRILLING PERMIT APPLICATION

REQUIREMENTS:

An accurate & correct map of existing and proposed well/boring locations **must** be included with the permit application. The well/boring location map **must** include the following.

1. North arrow, existing & historic site features, wells, approximate property lines and any other pertinent existing & historic features and information.
2. Proposed well/boring locations to scale.

A work plan describing the drilling and construction/destruction methodology may be requested by County staff. Upon review of information on this application, and subject to approval noted below, a permit will be issued allowing well/boring owner, driller, and responsible professional to perform the specified work. The permit is subject to both General and Special Conditions stated below. A copy of the approved Subsurface Drilling Permit **must** be available on site while work related to the permit is being performed. Drilling may begin at the notified date and time whether County staff is present or not.

GENERAL CONDITIONS:

A. Well and boring construction and destruction under this permit is subject to the Standards for the Construction of Wells in San Mateo County, County Groundwater Protection Program (GPP) Guidelines, Policies & Procedures, the State Water Well Standards, and any instructions by a Health Department representative.

B. Well/Boring Owner, Driller, and Responsible Professional assume responsibility for all activities and uses under the permit, including compliance with Workmen's Compensation Laws, and indemnify, defend and save the County of San Mateo, its' officers, agents and employees, free and harmless from any and all expense, cost, or liability in connection with or resulting from work or stopped-work associated with the permit, including, but not limited to, property damage, personal injury, wrongful death, and loss of income.

C. All borings **must** be properly destroyed (grouted/sealed) within 24 hours of drilling unless special conditions are approved in writing as part of this permit. Borings lasting longer than 24 hours without a variance are considered wells.

D. Analytical results of all soil, vapor, and groundwater samples collected during the execution of drilling under this permit **must** be submitted to County GPP staff by the Responsible Professional within 60 days of sample collection. If contamination is discovered during drilling, verbal notification to County GPP by the Responsible Professional is **required** within 72 hours of discovery. Proper storage, labeling & disposal of investigation-derived residual wastes are the responsibility of the consultant unless stated otherwise contractually.

E. A copy of the State DWR Form 188, boring logs and well construction details for all borings/wells except geotechnical borings, signed by a Responsible Professional, **must** be submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction. As-built locations/dimensions **must** be finalized in subsequent report of findings submitted to County GPP by the Responsible Professional within 60 days of drilling/construction/destruction.

F. Permit is valid only for the purpose specified herein. No change in purpose or required procedures, as described on this permit application, in the associated workplan, or in the special conditions below, will be allowed except upon written permission from the County. Construction aspects can be changed based on conditions encountered in the field.

G. Permit is valid for a mobilization associated with originally permitted boring/well locations only, including contingency locations, and is automatically canceled if not exercised, or if an extension is not applied for and granted within 120 days of the original permit issuance date. Failure to notify staff of cancellation or delay in start time will result in the Consultant being billed an Inspection Cancellation fee of $264 for 2013 if GPP staff attempted to perform an inspection.

H. Wells installed under this permit may not be used for domestic, municipal, commercial, or irrigation water supply.

I. All work performed **must** conform to Business and Profession Codes and State Water Well Standards.

J. Top-of-casing elevation of all wells **must** be surveyed to the nearest 0.01-foot relative to Mean Sea Level or NAVD88 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate. Geotechnical wells are exempt from this requirement if a written variance from GPP is obtained prior to drilling.

K. Latitude and longitude of all wells **must** be surveyed with sub-meter accuracy relative to NAD83 and submitted to County GPP within 60 days of drilling, and to State GeoTracker as appropriate.

L. Violation of any requirement or general or special permit condition may result in an order by GPP staff to cease work under this permit, correct the violation, and potentially re-permit the work as a new mobilization.

All target compounds in the Method Blank of this extraction batch were ND less than the method RL with the following exceptions:
NONE

BATCH 75887 SUMMARY

Lab ID	Date Sampled	Date Extracted	Date Analyzed	Lab ID	Date Sampled	Date Extracted	Date Analyzed
1303523-001A	03/19/13 9:00 AM	03/26/13	03/26/13 11:59 PM	1303523-002A	03/19/13 10:25 AM	03/26/13	03/26/13 5:30 PM

MS = Matrix Spike; MSD = Matrix Spike Duplicate; LCS = Laboratory Control Sample; LCSD = Laboratory Control Sample Duplicate; RPD = Relative Percent Deviation.

% Recovery = 100 * (MS-Sample) / (Amount Spiked); RPD = 100 * (MS - MSD) / ((MS + MSD) / 2).

MS / MSD spike recoveries and / or %RPD may fall outside of laboratory acceptance criteria due to one or more of the following reasons: a) the sample is inhomogenous AND contains significant concentrations of analyte relative to the amount spiked, or b) the spiked sample's matrix interferes with the spike recovery.

£ TPH(btex) = sum of BTEX areas from the FID.

cluttered chromatogram; sample peak coelutes with surrogate peak.

N/A = not applicable or not enough sample to perform matrix spike and matrix spike duplicate.

NR = analyte concentration in sample exceeds spike amount for soil matrix or exceeds 2x spike amount for water matrix or sample diluted due to high matrix or analyte content, or different container was used.

WorkOrder: 1307854

August 01, 2013

Dear Dan:

Enclosed within are:

1) The results of the **2** analyzed samples from your project: **#161558-143; Terminal Court,**
2) QC data for the above samples, and
3) A copy of the chain of custody.

All analyses were completed satisfactorily and all QC samples were found to be within our control limits.

If you have any questions or concerns, please feel free to give me a call. Thank you for choosing McCampbell Analytical Laboratories for your analytical needs.

Best regards,

Angela Rydelius
Laboratory Manager
McCampbell Analytical, Inc.

The analytical results relate only to the items tested.

LOW-THREAT UST CASE CLOSURE CHECKLIST

Low-Threat UST Case Closure Policy Checklist

Site: 131 Terminal Court, South San Francisco, CA **Date:** 10/8/2013

Checklist Summary **Yes:** 11 **No:** 0

General Criteria Yes / No

1. ***Is the site located in an area serviced by an existing public water system?*** Yes

2. ***Does the unauthorized release consist only of petroleum?*** Yes
   (crude oil fractions including motor fuels, jet fuels, distillate fuel oils, residual fuel oils, lubricants, petroleum solvents, used oil, and additives and blending agents such as oxygenates)

3. ***Has the unauthorized release been stopped?*** Yes
   (USTs, piping, and dispensers removed, repaired, or replaced)

4. ***Has free product been removed to the maximum extent practicable?*** Yes

5. ***Has a Conceptual Site Model (CSM) been developed?*** Yes
   CSM includes the following:
   - Establishes source and attributes of unauthorized release
   - Describes all affected media
   - Establish the nature, extent, and mobility of the release
   - Describes local geology, hydrogeology and other physical site characteristics
   - Identifies receptors including water supply wells, surface water bodies, nearby structures and their inhabitants

6. ***Has the secondary source been removed to the extent practicable?*** Yes
   Secondary source defined as petroleum-impacted soil and groundwater immediately below point of release from the primary source

   "To the extent practicable" defined as implementing a cost-effective corrective action that removes or destroys-in-place most readily recoverable fraction of source-area mass.

   Additional corrective action not required under policy unless needed to abate threat to human health or groundwater plume does not meet low-threat definition.

7. ***Has soil and groundwater been tested for MTBE?*** Yes
   Not required for sites with only diesel or jet fuel releases

8. ***Nuisance (as defined by Water Code section 13050) does not exist at the site.*** Yes
   A nuisance is defined as anything which meets <u>all</u> of the following:
   1) Is injurious to health, or is indecent or offensive to the senses, or an obstruction to the free use of property, so as to interfere with the comfortable enjoyment of life or property.
   2) Affects at the same time an entire community or neighborhood, or any considerable number of persons, although the extent of the annoyance or damage inflicted upon individuals may be unequal.
   3) Occurs during, or as a result of, the treatment or disposal of wastes.

Low-Threat UST Case Closure Policy Checklist

Media-Specific Criteria - Groundwater Yes / No

9. ***Is the contaminant plume that exceeds WQOs stable or decreasing* in aerial extent, and does it meet all of the additional characteristics in one of the five classes of site listed below, or has groundwater not been impacted?*** Yes

☐ 1 Extent of the plume that exceeds WQOs <100' in length.
No free product.
Nearest water supply well or surface water >250' from plume boundary.

☒ 2 Extent of the plume that exceeds WQOs <250' in length.
No free product.
Nearest water supply well or surface water >1,000' from plume boundary.
Dissolved benzene <3,000 µg/L and dissolved MTBE <1,000 µg/L.

☐ 3 Extent of the plume that exceeds WQOs <250' in length.
Free product has been removed to maximum extent practicable, and is not found offsite.
Plume stable or decreasing for ≥5 years.
Nearest water supply well or surface water >1,000' from plume boundary.
Property owner willing to accept a land use restriction, if required by regulator for case closure.

☐ 4 Extent of the plume that exceeds WQOs <1,000' in length.
No free product.
Nearest water supply well or surface water >1,000' from plume boundary.
Dissolved benzene and MTBE <1,000 µg/L.

☐ 5 The regulatory agency determines , based on an analysis of site-specific conditions that under current and reasonably anticipated near-term future scenarios, the contaminant plume poses a low threat to human health and safety and to the environment and WQOs will be achieved within a reasonable time frame.

* A plume that is "stable or decreasing" is a contaminant mass that has expanded to its maximum extent: the distance from the release where attenuation exceeds migration.

☐ **Sites with Releases That Have Not Affected Groundwater**

Sites with soil that does not contain sufficient mobile constituents [leachate, vapors, or light non-aqueous-phase liquids (LNAPL)] to cause groundwater to exceed the groundwater criteria in this policy shall be considered low-threat sites for the groundwater medium. Provided the general criteria and criteria for other media are also met, those sites are eligible for case closure.
For older releases, the absence of current groundwater impact is often a good indication that residual concentrations present in the soil are not a source for groundwater pollution.

Low-Threat UST Case Closure Policy Checklist

Media-Specific Criteria - Vapor Yes / No

10. ***Does the site meet low-threat vapor-intrusion criteria 1 - 3 as applicable, or criteria 4, or has a site-specific risk assessment for the vapor intrusion pathway demonstrated that human health is protected, or is the is the site an active fueling facility, or have mitigation measures, engineering or institutional controls mitigated the vapor risk?*** Yes

Applies only to sites where the release originated and impacted or potentially impacted adjacent parcels where; existing buildings are occupied or may be reasonably expected to be occupied in future, or buildings for human occupancy are reasonably expected to be constructed in near future.

☐ As a result of controlling exposure through the use of mitigation measures or through the use of institutional or engineering controls, the regulatory agency determines that petroleum vapors migrating from soil or groundwater will have no significant risk of adversely affecting human health.

☐ The site is an active fueling facility and there is no reasonable concern that subsurface contamination poses unacceptable indoor inhalation health risk.

☒ Site-specific HHRA demonstrates no vapor intrusion risk

Criteria 1 and 2 apply to sites with LNAPL in soil and/or groundwater

☐ 1 Depth to groundwater with unweathered LNAPL** is ≥30' below building foundation.
Total TPH (TPHg + TPHd) in soil within 30' below building foundation is <100 mg/kg

☐ 2 Depth to groundwater is >30' below building foundation.
Unweathered LNAPL** in soil is ≥30' from building foundation in all directions.
Total TPH in soil within 30' of building foundation in all directions is <100 mg/kg.

**unweathered LNAPL is comparable to recently dispensed fuel where product has not been subjected to significant volatilization or solubilization

Criteria 3 applies to sites without LNAPL, but has dissolved benzene in groundwater

☐ 3a Depth to groundwater is ≥5' below building foundation.
Dissolved benzene in groundwater is <100 µg/L.
Total TPH in soil within 5' below building foundation is <100 mg/kg
O_2 concentration in soil within 5' below building foundation is <4%, or no O_2 data.

☐ 3b Depth to groundwater is ≥10' below building foundation.
Dissolved benzene in groundwater is <1,000 µg/L.
Total TPH in soil within 10' below building foundation is <100 mg/kg
O_2 concentration in soil within 10' below building foundation is <4%, or no O_2 data.

☐ 3c Depth to groundwater is ≥5' below building foundation.
Dissolved benzene in groundwater is <1,000 µg/L.
Total TPH in soil within 5' below building foundation is <100 mg/kg
O_2 concentration in soil within 5' below building foundation is ≥4%.

Low-Threat UST Case Closure Policy Checklist

Media-Specific Criteria - Vapor (continued) Yes

Criteria 4 applies to direct soil gas sampling, with vapor samples collected 5' below existing building foundation, or 5' below ground surface for future construction

☐ 4a

Screening levels for sites with bioattenuation zone***

	Benzene	Ethylbenzene	Naphthalene
Residential	<85,000 µg/m^3	<1,100,000 µg/m^3	<93,000 µg/m^3
Commercial	<280,000 µg/m^3	<3,600,000 µg/m^3	<310,000 µg/m^3

☐ 4b Screening levels for sites without bioattenuation zone (same as CHHSLs)

	Benzene	Ethylbenzene	Naphthalene
Residential	<85 µg/m^3	<1,100 µg/m^3	<93 µg/m^3
Commercial	<280 µg/m^3	<3,600 µg/m^3	<310 µg/m^3

*** total TPH <100 mg/kg in upper 5' of soil, and ≥4% oxygen in soil at 5' sample depth

Media-Specific Criteria - Direct Contact and Outdoor Air Exposure

11. ***Does the site meet one of the following 3 low-threat direct contact and outdoor air exposure criteria?*** Yes

☒ 1 Concentrations in soil are less than or equal to the following*:

Residential ***(All units are mg/kg)***

Depth (feet)	Benzene mg/kg	Ethylbenzene	Naphthalene	PAHs^
0 - 5	1.9	21	9.7	0.063
5 - 10	2.8	32	9.7	NA

Commercial / Industrial ***(All units are mg/kg)***

Depth (feet)	Benzene	Ethylbenzene	Naphthalene	PAHs^
0 - 5	8.2	89	45	0.068
5 - 10	12	134	45	NA

Utility Worker ***(All units are mg/kg)***

Depth	Benzene	Ethylbenzene	Naphthalene	PAHs^
0 - 10 feet	14	314	219	4.5

* The area of impacted soil where a particular exposure occurs is ≤ 25 by 25 meters.

^ Based on 7 carcinogenic PAHs as benzo(a)pyrene toxicity equivalent, only where soil affected by waste oil and/or Bunker C fuel

☐ 2 Maximum petroleum constituent concentrations in soil are less than levels that a site-specific risk assessment shows there is no significant risk to human health.

☐ 3 Direct contact and outdoor air exposure mitigated through institutional or engineered controls and regulator agrees that no significant risk to human health exists.

Low-Threat UST Case Closure Policy Checklist

If all 11 questions above are answered "YES," then site will be considered eligible for case closure according to the Low-Threat Closure Policy.

Provide comments below for any "No" answers to questions 1 through 11 above.

Provide details on why "No" answer was selected.
Outline the strategy for getting a "Yes" answer for each question answered "No" above.
The resulting strategy should be incorporated into an updated E2E plan for the site.

San Carlos, CA 94070

SUBJECT: CASE CLOSURE, REMEDIAL ACTION OVERSIGHT, FORMER OLYMPIAN FUELING FACILITY AT 131 TERMINAL COURT SOUTH SAN FRANCISCO, CALIFORNIA

Dear Mr. Bertetta:

This letter confirms the completion of a site investigation and corrective action for the underground storage tanks formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the underground storage tanks are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tanks site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Claims for reimbursement of corrective action costs submitted to the Underground Storage Tank Cleanup Fund more than 365 days after the date of this letter or issuance or activation of the Fund's Letter of Commitment, whichever occurs later, will not be reimbursed unless one of the following exceptions applies:

- Claims are submitted pursuant to Section 25299.57, subdivision (k) (reopened UST case); or

- Submission within the timeframe was beyond the claimant's reasonable control, ongoing work is required for closure that will result in the submission of claims beyond that time period, or that under the circumstances of the case, it would be unreasonable or inequitable to impose the 365-day time period.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Heather Forshey, MS, REHS
Environmental Health Director

Jim Kirkman
Chief Building Official
315 Maple Avenue
South San Francisco, CA 94080

SUBJECT: RESIDUAL HYDROCARBONs AT FORMER OLYMPIAN FUELING FACILITY AT 131 TERMINAL COURT, SOUTH SAN FRANCISCO, CALIFORNIA

Dear Mr. Kirkman:

The attached case closure letter was prepared by the San Mateo County Environmental Health Department Groundwater Protection Program (GPP) with the tacit approval of the California Regional Water Quality Control Board (CRWQCB). Although site closure was granted, an amount of hydrocarbon-affected soil and groundwater may exist at the subject site near the former fueling facility (see attached Figure). Although these hydrocarbons do not appear to pose a risk to public health and the environment under existing land use conditions, changes in land use or removal of soil and groundwater from the affected area may create a risk. Therefore, any proposed change in land use or proposed soil or groundwater removal activity at or in close proximity to the subject site must be submitted to the GPP for our review under government code section 65850.2 so we can evaluate whether the residual contaminates will likely pose a risk to public health and the environment if the proposed activities are implemented. The costs to evaluate the potential public health or environmental impacts of the proposed land use or construction activity in relation to the residual contaminants will be billed directly to the entity initiating the activity requiring our review.

Please call me at (650) 372-6298 if you have any questions. Thank you for your cooperation.

Sincerely,

Jacob Madden, PG
Hazardous Materials Specialist
Groundwater Protection Program

II. CASE INFORMATION

Site Name: Olympian Produce Terminal Cardlock (former).
Site Address: 131 Terminal Ct., South San Francisco, APN 015-113-210

RB LUSTIS Case #: 41-4032	*Local Case #:* 550158	LOP Case #: 550158
URF Filing Date: 10/27/1994	*Record ID #:* ~~1397~~ 1695	*Global ID* T0608126439

Responsible Party Information

Olympian JV c/o Janet Heikel

Name	*Address*	*Phone #*
Fred Bertetta Jr. C/O Janet Heikel	1300 Industrial Rd. Suite 2, San Carlos, CA 94070	

Tank Information

Tank #	*Size in Gallons*	*Contents*	*Closed-In Place/ Removed*	*Date*
1	10,000	Diesel	Removed	10/2012
2	10,000	Diesel	Removed	10/2012
3	6,000	Gasoline	Removed	10/2012

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown
Site Characterization Complete? Yes
Date Approved by Oversight Agency: 5/30/2012
Number of Monitoring wells installed: 8 Proper screened interval? Yes
Highest GW depth BGS: 0.38 Lowest GW depth BGS: 5.16
Flow Direction: northeast
Most sensitive current use: Drinking water
Are Drinking Water affected? No Aquifer Name: Westside Basin
Is Surface Water Affected? No Nearest SW name: San Francisco Bay
Off-Site Beneficial use Impacts (Location): None
Report(s) on File? Yes Where is it filed? SMCo and Geotracker

Treatment and Disposal of Affected Material

Material	*Amount (Include units)*	*Action (Treatment or disposal w/destination)*	*Date*
Tanks	3- Tanks 2-10,000 and 6,000 gallon	Removed	10/2012
Piping	unk	Removed	10/2012
Soil	Approx.996 Tons	Disposal	12/2012

Maximum Documented Contaminant Concentrations - Before and After Cleanup

	SOIL (PPM)		**GROUNDWATER (PPB)**	
Contaminant	*Before*	*After*	*Before*	*After*
TPH-gasoline	5000 (B-26 @ 5 ft in 2012)	85 (B-30 @ 7.5 ft in 2012)	69,000	51,000
TPH-diesel	7600 (T-1 @2.5 ft in 1998)	58 (B-30 @ 7.5 ft in 2012)	200,000	4,500
MtBE	<25 (B-26 @ 5 ft in 2012)	<1 (B-30 @ 7.5 ft in 2012)	25000	<500
Benzene	56 (B-26 @ 5 ft in 2012)	0.66 (B-34 @ 5 ft in 2012)	6800	2800
Toluene	220 (B-26 @ 5 ft in 2012)	1.5 (B-30 @ 10 ft in 2012)	6200	7700
Ethylbenzene	80 (B-26 @ 5 ft in 2012)	0.89 (B-30 @ 5 ft in 2012)	2400	1300
Xylenes	410 (B-26 @ 5 ft in 2012)	4 (B-30 @ 10 ft in 2012)	5500	6800

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? *Yes*
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? *Yes*
Does corrective action protect public health for current land use? *Yes*
Site Management Requirements: *Yes, see comment below*
Should corrective action be reviewed if land use changes? *No*
Monitoring Wells to be Decommissioned? *0* Number Decommissioned: 8 Number Retained: 0

List Enforcement Actions Taken: *None*
List Enforcement Action Rescinded: *None*

V. RWQCB Notification

Date Submitted to RB: DEC 5 2013	*RB Response:*
RB Staff: Cheryl Prowell	*Title*: Water Resource Control Engineer

An unknown amount of hydrocarbon impacted soil, as well as impacted groundwater, Figure 1, remains in the subsurface at the site. City of South San Francisco Building Department has been notified that should excavation or development of the property be proposed that may encounter impacted soil or groundwater, San Mateo County Environmental Health Division must be notified as required by Government Code Section 65850.2.

Ulocladium		
Miscellaneous spores**	Very few	Very few
Other comments†	None	None
Background debris or Description††	Light	Moderate
General impression	Mold growth	Mold growth

* See Mold/Fungal Growth Details table on the last page.

** See Miscellaneous Spores table on the last page.

† Some comments may refer to the following: Most surfaces collect a mix of spores which are normally present in the outdoor environment. At times it is possible to note a skewing of the distribution of spore types, and also to note "marker" genera which may indicate indoor mold growth. Marker genera are those spore types which are present normally in very small numbers, but which multiply indoors when conditions are favorable for growth.

†† Background debris is an indication of the amounts of non biological particulate matter present. This background amorphous material is graded and described as scant, light, moderate, heavy, or very heavy. (Very heavy background debris may obscure visibility.)

Fungal types listed without a growth rating or data entry were not detected during the course of the analysis for the respective sample.

Interpretation is left to the company and/or persons who conducted the field work.

‡ A "Version" indicated by -"x" after the Lab ID# with a value greater than 1 indicates a sample with amended data. The revision number is reflected by the value of "x".
The limit of detection is < 1+ when mold growth is detected.

INTRODUCTION

BioMax Environmental, Inc. (BioMax) is pleased to present this Asbestos Survey Summary Report (Report) and attached laboratory results pertaining to our sampling activities conducted for Golden Gate Produce Terminal by BioMax on February 21, 2018. The assessment was performed at Golden Gate Produce Terminal Stalls 40C, 40D, and 40E located 131 Terminal Court, in the city of South San Francisco, CA. This Report provides Golden Gate Produce Terminal with a professional review of all asbestos sample findings associates with BioMax's thorough evaluation (on the date sampled) of representative building materials located within the stalls and areas noted.

The sampling and analysis strategy performed and presented in this report was developed by Mr. Michael A. Polkabla, CIH, REA, of BioMax Environmental, Inc. Mr. Polkabla has extensive professional experience with asbestos containing materials as well as construction exposure evaluations and has been certified in the Comprehensive Practice of Industrial Hygiene by the American Board of Industrial Hygiene and holds the right to the designation "Certified Industrial Hygienist" (CIH) under certification number 7104CP. Mr. Polkabla has also previously been certified by the California Environmental Protection Agency (Cal/EPA) as a Class I Registered Environmental Assessor (REA) under Certification number 05011. As Part of these services, Mr. Michael A. Polkabla reviewed and approved the sampling plan as performed by BioMax's experienced IH Technician, Tara M. McCorkle. Ms. McCorkle holds current certifications with the State of California as a certified Asbestos Contractor/Supervisor, Asbestos Building Inspector, Asbestos Project Designer, and Asbestos Management Planner.

All industrial hygiene asbestos sampling procedures performed and/or provided by BioMax were conducted in accordance with National Institute for Occupational Safety and Health (NIOSH) Analytical Methods 9002 (Asbestos PLM), Cal/OSHA's Asbestos in General Industry Standard T8 CCR 5208, and applicable Certified Industrial Hygiene practices.

SAMPLING AND ANALYTICAL METHODS

Beginning at 0830 on February 21, 2018, BioMax collected a series of bulk samples from representative building materials identified by Golden Gate Produce Terminal and BioMax as suspect Asbestos Containing Material (ACM). In total, 35 samples of suspect ACM were collected from the stalls of 40C, 40D, and 40E. A site map has been attached to this report for further reference. Samples were collected by BioMax's IH Technician using manual extraction methods in order to gain 1 to 10 grams of suspect material in accordance with the referenced NIOSH standards. Golden Gate Produce Terminal employee, Mr. Bill Mathis was in attendance and assisted Ms. McCorkle in the collection of samples. Following collection of samples, the materials were then placed into double layered plastic re-closable bags and were documented, processed, and transported to Environmental Microbiology Laboratories (EMLab) of Phoenix, AZ under standard Chain of Custody (COC) documentation for subsequent analysis. EMLab holds current accreditation from the AIHA Laboratory Accreditation Programs (AIHA-LAP) and Industrial Hygiene Laboratory Accreditation Program (IHLAP) for analysis of bulk asbestos.

Sample Number	Sample Location / Description	Asbestos Percentage (%)
18	40E north concrete wall near stairs	ND
19	40E south concrete wall	ND
20	40E south concrete wall	ND
21	Core sample of sales office wall	ND
22	Core sample of upstairs office 1 wall	<1% Chrysotile
23	9x9 light color grey tile and attached mastic in upstairs office 1	Tile 6% Chrysotile Black Mastic 12% Chrysotile
24	9x9 light color grey tile and attached mastic in upstairs hallway	Tile 6% Chrysotile Black Mastic 12% Chrysotile
25	Baseboard and attached mastic in upstairs office 1	Brown Mastic 2% Chrysotile
26	Upstairs bathroom vinyl floor with attached mastic	ND
27	Baseboard and attached mastic in upstairs bathroom	Brown Mastic 2% Chrysotile
28	Baseboard and attached mastic in upstairs office 3	ND
29	Corkboard with attached mastic in upstairs hallway	ND
30	Upstairs office #1 ceiling tile	ND
31	Upstairs hallway ceiling tile	ND
32	Upstairs office #3 ceiling tile	ND
33	Upstairs office #2 core sample of wall	White texture <1% Chrysotile Off-white joint compound <1% Chrysotile
34	Upstairs office #3 core sample of wall	ND
35	Upstairs equipment room ceiling material	Off-white compound <1% Chrysotile

ND means no detectable amounts of fibers. ACM as defined by Environmental Protections Agency (EPA) and Cal/OSHA is any material **greater than (>) 1%.**

occur if one were to grind, cut, pulverize, drill, or significantly damage in a way that could potentially cause a fiber release either of these materials.

According to Cal/OSHA, if it is anticipated that ACM is to be disturbed in such ways, the ACM shall be contained and abated appropriately by trained and licensed personnel prior to such disturbance following Cal/OSHA, National Emission Standards for Hazardous Air Pollutants (NESHAP) and appropriate Air Quality Management District (AQMD) regulations.

Based on these analytical findings, it is essential that no disturbance of the floor materials located within the upstairs office 1, office 2, hallway, and/or baseboard along the walls of the upstairs areas may be performed until the ACM is appropriately abated (removed) by trained and licensed personnel. Under our current understanding of historical site operations and uses within the areas of concern, it is BioMax's professional opinion that the likelihood of exposure to asbestos containing materials from normal tenant site activities and operations is minimal so long as the materials containing ACM are not aggressively disturbed and/or damaged. However, in the event that such materials are aggressively manipulated, damaged, and/or disturbed, (such as through renovation, remodeling, etc.) appropriate handling and control measures must be utilized in accordance with federal, state and local environmental regulations and ordinances. Further testing should be performed if any other suspect material (not identified within this report) are discovered and/or identified during the course of any future renovations and demolition activities.

BioMax believes that the above findings and conclusions are consistent with current building conditions and asbestos sampling data gathered under applicable asbestos sampling assessment, evaluation, and control practices. BioMax would be happy to provide additional consultation in the interpretation of the findings presented in this summary report upon request. If you have any additional questions, comments, and/or require further assistance, please contact our offices.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Haley & Aldrich, Inc. on Mar 03, 2022.

TARGET PROPERTY

101 Terminal Court
South San Francisco, CA 94080

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2022 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 8 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 25 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 4 SWF/LF sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 26 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 98 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 423043
Site Name: Ahern Rentals, SFO-151
Violation Date: 11-22-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 12/05/2017. Update secondary emergency contact as the service manager at the site has now changed. Please update within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 423043
Site Name: Ahern Rentals, SFO-151
Violation Date: 11-22-2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Release/Leaks/Spills - General
Violation Notes: Returned to compliance on 12/05/2017. Facility had a spill at the parts washer machine and on top of the used oil tank. Absorbent has already been placed on the spill (photo taken). Please correct this and clean up spills as they occur in the shop. Take photo and send to 650-339-0327 or drompf@smcgov.org to correct this issue.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 423043
Site Name: Ahern Rentals, SFO-151
Violation Date: 01-09-2020
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 01/09/2020. Facility had open container of absorbents and oil filters This was corrected during inspection.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	119425
Site Name:	GIANNINI GARDEN ORNAMENTS INC
Violation Date:	07-16-2015
Citation:	22 CCR 15 66265.32 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Returned to compliance on 08/18/2015. No decontamination eye wash for the acids being handled.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	119425
Site Name:	GIANNINI GARDEN ORNAMENTS INC
Violation Date:	09-09-2021
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 09/24/2021. OBSERVATION: Emergency phone numbers and location of emergency equipment not observed to be posted. REQUIRED ACTION: Complete the template provided and post it near phones or in posting area. Submit evidence of completion to Env. Health by the comply by date.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	119425
Site Name:	GIANNINI GARDEN ORNAMENTS INC
Violation Date:	09-09-2021
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 09/21/2021. UNDETERMINED OBSERVATION: The following drums of potential hazardous material were observed and evaluated today. - 200 proof Ethanol added to inventory. - Sika 2110 is likely a higher reporting threshold material with no GHS hazards listed by the manufacturer (approx. 110 gallons max on site,

GIANNINI GARDEN ORNAMENTS INC (Continued) **S113126069**

observed). - Sitka Ae-3 is less than 55 gal. Drum clearly states 51 gallons. - Acid Magic: SDS not available during inspection. REQUIRED ACTION: Submit a copy of the SDS to Env. Health for Acid Magic. If it is stored at over 55-gallons, add a new chemical inventory page for that material to the hazardous materials business plan package and then resubmit. Complete this submission within 30 days.

Eval Notes:	Modified inspection procedures. Met with Pier and Piera Giannini. HMBP Last submitted 2/5/21 and updated during inspection. HMBP copy is available on site in the binder. Emergency contacts verified on site. HMBP training: Observed documented on site. Facility operator and property owner are the same. Note: Facility asked to determine if they required 55 or more gallons of the additional hazardous materials noted today. The current program category (PE) only allows for storage of motor vehicle fuel and waste and facility will be moved into the next higher PE during the next evaluation if the inventory stays the same.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

CORPORATE IDENTITY SYSTEMS (Continued) **1001959935**

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CERS HAZ WASTE:

Name:	CORPORATE IDENTITY SYSTEMS
Address:	1342 SAN MATEO AVE
City,State,Zip:	SOUTH SAN FRANCISCO, CA 94080
Site ID:	21806
CERS ID:	10064776
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	21806
Site Name:	CORPORATE IDENTITY SYSTEMS
Violation Date:	07-20-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 07/20/2017. Open funnel on hazardous waste drum was observed. This was corrected onsite. Keep waste container closed when not in use.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

MCNEVIN CLEANING SPECIALISTS (Continued) **1001023108**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Hazardous Waste Generator

Violations:

Site ID: 142226
Site Name: PENINSULA AUTO BODY
Violation Date: 10-04-2019
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 12/28/2019. Listed as area of concern only, please provide current annual training records for hazardous waste training. These were un-available during the inspection. You can forward to dan at drompf@smcgov.org or send via text message to 650-339-0327. Please ensure training is completed on hazardous waste procedures at least annually. I can also drop by to review the records as well.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 142226
Site Name: PENINSULA AUTO BODY
Violation Date: 10-04-2019
Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Description: Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.
Violation Notes: Returned to compliance on 12/28/2019. Please contact dan to review latest hazardous waste manifest. Last pickup appears to have been on 9/11/19 however the office is locked and documents not available today.
Violation Division: San Mateo County Environmental Health

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 06/04/2021. 2. Within 30 days, contact an analytical laboratory to have the sandblasting dust analyzed to

FOUR STAR AUTOMOTIVE INC./FOUR STAR TRUCK REPAIR (Continued) **1000351864**

determine whether the dust is hazardous. You can use any lab of your choosing. It is not a recommendation, neverthless, some of the facilities use TestAmerica Laboratory (925) 484-1919, or McCampbell Analytical (877) 252-9262. If the analysis indicates the dust is hazardous waste, the dust will need to be properly disposed of as hazardous waste. If the analytical result confirms the waste is not hazardous waste, the dust can be managed as regular trash.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 165267
Site Name: UTAP PRINTING CO., INC
Violation Date: 08-24-2015
Citation: 22 CCR 15 66265.32 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes: Returned to compliance on 07/08/2016. Facility had several blocked fire extinguishers and is missing the eyewash station. Ensure all required emergency equipment is available.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 165267
Site Name: UTAP PRINTING CO., INC
Violation Date: 10-11-2019
Citation: 22 CCR 23 66273.31(a) - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.31(a)
Violation Description: Failure of the universal waste handler to prevent improper disposal of universal waste, or to transfer universal waste to the appropriate destination facility.
Violation Notes: Returned to compliance on 12/30/2019. Universal waste (fluorescent tubes)stored on ground in front of building. Store these in a manner to prevent breakage, label as universal waste, and dispose of as a universal waste. Grainger makes some boxes that have pre-paid shipping for proper dispsoal of light tubes. Here is an example of these boxes, or you can have them picked up by haz waste hauler. https://www.uline.com/Product/Detail/S-14845/Light-Bulbs/Prepaid-Light-Bulb-Recycling-Box-Kit-4-Medium?pricode=WB0862&gadtype=pla&id=S-14845&gclid=Cj0KCQjw0IDtBRC6ARIsAIA5gWvD6jm2NQPK7uuQSLZiwNQCW7Wv49J8Rj8FyU-75e4wqk20rO7eIdoaArWPEALw_wcB&gclsrc=aw.ds

UTAP PRINTING CO., INC (Continued) **S121748881**

Site Name:	UTAP PRINTING CO., INC
Violation Date:	10-11-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 12/30/2019. Observed waste onsite over one year. Accumulation date on drums is 7/2018. Dispose of this waste in the next 30 days and send a receipt for the disposal. There are also multiple plastic totes and 5 gallon buckets that are not properly labeled which need to be placed in the main container, labeled appropriately and disposed of.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GREINER SERVICE STATIONS INC (Continued) **S121750548**

Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 04/27/2021. The triggering mechanism of the overfill device for the Diesel UST failed. Replace overfill prevention device for the diesel system within 30 days.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 04/30/2021. Conduct and document employee training to satisfy the HMBP requirement within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 18356
Site Name: GREINER SERVICE STATIONS INC
Violation Date: 11-17-2020
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes: Returned to compliance on 04/27/2021. All three spill bucket not only would not hold liquid but did not meet the 5 gallon capacity requirements. Two of the spill buckets failed the 5 gallon capacity requirement during last November s annual monitoring certification. A year later nothing has been done. This is a class II violations. Facility must replace all three spill buckets within 30 days.

Violation Description:	Business Plan Program - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 01/07/2020. Facility exceeds 1,320 gallons of petroleum products onsite and therefore subject to APSA SPCC Spill Prevention Control and Countermeasure plan requirements. Inspection revealed secondary containment on tanks and containers however SPCC spill response training, template document, and monthly inspections will need to be implemented within 30 days. Dan will send a copy of the Tier I SPCC template.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS ID:	10340164
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	394073
Site Name:	GRANITE ROCK CO
Violation Date:	08-07-2018
Citation:	HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description:	Failure to amend the SPCC Plan within 6 months: 1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility s discharge potential. AND/OR 2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.
Violation Notes:	Returned to compliance on 10/09/2018. Please update the Plant Operator s information in the SPCC Plan; Frank Garcia is no longer at the facility.
Violation Division:	San Mateo County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,

Site ID:	394073
Site Name:	GRANITE ROCK CO
Violation Date:	09-08-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 03/20/2017. Inventory does not show the compressed gas storage areas under the plant. Only shows 300 cu ft of oxygen and acetylene at the shop area, however there are at least 1000 cubic feet of O2 and acetylene stored under the plant that are not on the inventory or maps. Also ensure the soap is marked on the inventory, 500 gallons (corrosive and irritant)

Violation Date:	08-07-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 10/09/2018. Please update the HMBP to update the largest container size for the petroleum asphalt. Currently, the maximum storage quantity and the size of the largest container is the same. This implies there is only one tank, but facility has 4 tanks. There are 10 acetylene cylinders ranging 130 to 141 cubic feet each. Currently, the HMBP reports largest cylinder size as 280 cubic feet. Please change the maximum container size. Please delete used oil from inventory.

Violations:
Site ID: 533075
Site Name: South San Francisco Road Materials
Violation Date: 02-08-2010
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Various BMP violations.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection

SOUTH SAN FRANCISCO ROAD MATERIALS (Continued) **S121773345**

Eval Date: 07-26-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: This was an asphalt mix plant. Aggregates and crushed recycled asphalt pavement (RAP) were stored in stockpiles. Aggregates were brought in by rail and unloaded to a hopper connected to moveable conveyors. Asphalt and diesel oil were stored in tanks with secondary containment. Aggregate, RAP and asphalt oil were mixed to create the product. Much of the yard was covered by aggregate piles. Hazardous material, such as engine oil, was kept in totes or drums inside the truck shop. The site has four sampling points, two along Lowrie Avenue, one in the yard near the south driveway and one by the truck shop. The locations along Lowrie Avenue were surface flow locations with wattles and gravel across the flow path to control discharge pollutants. The two other sampling points were drop inlets. I observed an inlet with a grate by the asphalt tanks. This inlet was not shown on the map. Roger stated that it might be an oil water separator. Please add this item to the site map and clarify its function and operation in the SWPPP. A street sweeper sweeps the paved areas of the yard not occupied by the aggregate piles. Required Actions and Potential Violations Improve BMPs and housekeeping to reduce suspended solids in stormwater discharge Update the SWPPP and SWPPP maps Prepare and submit the Level 1 Evaluation per Permit section XII.C.1 by October 1, 2018 Prepare and submit the Level 1 ERA Report per Permit section XII.C.2 by January 1, 2019.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	35250
Site Name:	Johnnys Shell
Violation Date:	08-16-2021
Citation:	23 CCR 16 2712(b)(6) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(6)
Violation Description:	Failure to maintain records of repairs and upgrades on site, or off site if approved by the UPA, for the life of the UST.
Violation Notes:	OBSERVATION: Records for the following alarms could not be located on site. The alarm log was only observed to be documented through 6/1/20. - Q3 alarms: Jan. 6, 2021, Jan 24, 2021 ,Dec. 23 2020 (Noted on DO report) - S7 Diesel vent vac 1/7/21 - bS1 87 (high liquid, no vacuum) 10/22/20 - Not noted on DO REQUIRED ACTION: Submit a copy of any work orders or responses to these alarms. Please ensure records associated with the tank replacement are also available on site.
Violation Division:	San Mateo County Environmental Health
Violation Program:	UST
Violation Source:	CERS,

Site ID:	35250
Site Name:	Johnnys Shell
Violation Date:	11-04-2014
Citation:	23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description:	Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions
Violation Notes:	Returned to compliance on 11/14/2014.
Violation Division:	San Mateo County Environmental Health
Violation Program:	UST
Violation Source:	CERS,

Site ID:	35250
Site Name:	Johnnys Shell
Violation Date:	11-01-2017
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	Returned to compliance on 11/01/2017. Sumps for 87-2 turbine sump and 91 turbine sump had 208 sensor fiberglass sleeves in the bottom of the sump which extended all the way to the bottom of the sump, not allowing liquid to be detected at earliest opportunity. Holes were punched in these sleeves and water was released from the sleeves in both sumps. Sensors cannot be placed here and if this is detected again it will be interpreted as tampering with leak detection system.

Violation Date: 11-01-2016
Citation: HSC 6.7 25290.1(c)(3), 25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3), 25290.2(c)(3)
Violation Description: Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003 and before July 1, 2004, or on or after July 1, 2004.
Violation Notes: Returned to compliance on 12/08/2016. OBSERVATION: Owner/Operator did not maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. Approximately 10 gallons of liquid was found in the 87-2 fill sump, approximately five gallons of liquid was found in the 91 fill sump, and approximately one gallon was found in the 87-1 turbine sump. CORRECTIVE ACTION: Maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. Submit a statement to the CUPA on how this violation was corrected.

Violation Division: San Mateo County Environmental Health
Violation Program: UST
Violation Source: CERS,

Site ID: 35250
Site Name: Johnnys Shell
Violation Date: 11-01-2016
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes: Returned to compliance on 12/13/2016. OBSERVATION: The designated operator failed to document all the alarms from the attached alarm history on the designated operator monthly inspection report(s) and failed to check that they were responded to appropriately. The missing alarms include: Q2 91 shut down alarm on 11-16-15, L3 91 fill sump fuel alarm on 11-16-15 and the Q1 87-1 shut down alarm on 10-18-16. During the monthly inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was

HAMPTON'S SERVICE, INC. (Continued) **U001594785**

	documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. CORRECTIVE ACTION: Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports.

Violation Date:	11-01-2016
Citation:	23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description:	Failure to have a UST Monitoring Plan available on site.
Violation Notes:	Returned to compliance on 12/08/2016. OBSERVATION: The monitoring plan on site and in CERS are not current and not approved by the CUPA. The monitoring plan on site and in CERS does not have secondary containment testing marked. The monitoring plan in CERS has mechanical and electronic line leak detectors marked. The monitoring and response plans must be current and approved by the CUPA. CORRECTIVE ACTION: Update the required information in CERS and submit for review by the CUPA.

Citation:	23 CCR 16 2715(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(e)
Violation Description:	Failure to maintain a copy of the designated operator monthly inspections for the last 12 months on-site or off-site at a readily available location, if approved by the UPA.
Violation Notes:	Returned to compliance on 12/13/2016. OBSERVATION: The list of DO trained employees for 12 months is incomplete. The employee Sau Alataua was working alone at the station and DO employee trained documentation does not list her last name nor the date she was hired. Sau stated that she has only been working here for about seven months. CORRECTIVE ACTION: Maintain complete records of trained employees for 12 months. Be sure to include the hire date of employees hired after July 1, 2005.

Violation Date: 11-01-2016
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description: Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes: Returned to compliance on 12/08/2016. OBSERVATION: Approximately 10 gallons of liquid was found in the 87-2 fill sump and the sump sensor appeared dry and was hanging from the electrical conduit near the top of the sump. It would appear that the Owner/Operator has tampered with and disabled the leak detection equipment in a manner that would prevent the monitoring system from detecting and alerting the owner/operator of a leak at the earliest opportunity. CORRECTIVE ACTION: Owner/Operator shall not disable or tamper with monitoring equipment. Immediately position the sensor to detect a leak at the earliest opportunity. Submit a statement of how this violation was corrected to the CUPA by 12-1-16.

Eval Notes:	On-site to conduct the final monitoring certification for new UST tank System at Johnny's Shell 248 S Airport Blvd. New VPH system receieved fuel after final ELD test and today tested all of the monitoring equipment to ensure leak detection equipment and monitoring equipment is functional and programmed for operations. Following Liquid sensor setup with TCC, tested Tank annular hydrostatic sensors, sump annular sensors, and STP turbine sensors for Diesel/Premium Tank and Unleaded Tank. Tested all of the full sumps. **L13 fuel alarm was not functioning properly- L13 goes into alarm however sensor goes into "sensor out mode" and needs to be replaced and re-tested. (This sensor has been replaced and re-tested as of 8/28/20 noted in this modified inspection report.) All UDC annular sensors were tested, including communication hydrostatic, and positive shutdown. Vent boxes tested as well Smart sensor testing took place at all components to ensure positive shutdown on [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Some PLLD alarms are happening at night however it was determined that these are related to ISD systems. They always occur at 12AM, Nik changed test ime to 11:22 so we can verify this testing delay is causing the alarm. No follow up needed on this issue.
Eval Division: San Mateo County Environmental Health
Eval Program: UST

Click Here:

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Quarterly Update:	International Paint Company (IPC) operated as a solvent-based paint manufacturer from 1947-1986. They submitted a Part A on 11/19/1980 and was granted an ISD on 4/6/1981. IPC later requested a reclassification on 1/23/1986 for their facility explaining that their activities classify them as a generator and not a TSDF. Their reclassification was accepted by DTSC on 3/19/1986.

Environmental Interest/Information System:
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	01-16-2020
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 01/16/2020. Spill buckets already had water in them as testing began. There may be a water intrusion here from rain. Recommend covering with mats during rain.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	137810
Site Name:	NEW METHOD FUR DRESSING
Violation Date:	10-02-2020
Citation:	49 CFR 1 172 - U.S. Code of Federal Regulations, Title 49, Chapter 1, Section(s) 172
Violation Description:	Failure of the universal waste handler to transfer universal waste to another universal waste handler, or appropriate destination facility. Failure to package, label, mark and placard shipments and prepare shipping papers for any universal waste that meets the hazardous materials definition in accordance with DOT 49 CFR parts 171-180.
Violation Notes:	Facility stores a large fiber drum of light tubes that are un-protected from breakage. Also some 8 ft light tubes were located outside by the empty drum storage area. Properly store and dispose of these as a universal waste. You can buy boxes on grainegr or other safety company website for this purpose. I will attach a link to these products in the email .

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 05/07/2020. During the 2017 inspection, the inspector requested the 55 gallon storing hazardous waste be included in the chemical inventory. This hazardous waste drum is still not reported in the chemical inventory. Facility does not have 55 gallon drum of acetonitrile or 55 gallon drum of methylene chloride. Remove these two chemicals from the inventory. Facility has four dewars of liquid nitrogen, facility only reported as having only one. Facility need to increase the maximum storage quantity to 244 gallons. Update the HMBP within 30 days. Facility stated they may reduce the dewars to 3 units.
