Site Name:	LEGACY AUTO TECH
Violation Date:	09-10-2014
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes:	Returned to compliance on 03/02/2015. Facility needs to submit HMBP online.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	130192
Site Name:	LEGACY AUTO TECH
Violation Date:	04-16-2021
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	OBSERVED: Paper filters are marked with an accumulation start date 5/1/18. They have exceeded accumulation time limits. REQUIRED ACTION: Have paper filters properly removed from the site by the comply by date. Note metal filters are due for pickup on 5/11/21. Note: If generating less than 27 gallons of waste in a calendar month, the

LEGACY AUTO TECH (Continued) **S121742449**

	county VSQG drop off may be used. Consult with your waste hauler to determine the best option for the business that will allow the facility to stay within the accumulation time limit. For example keeping only one drum of mixed HAZARDOUS WASTE filters which is managed at the point of generation called "satellite accumulation" allows the generator to store it up to 365 days maximum.

Violation Date:	10-02-2018
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 10/02/2018. OBSERVATION: Some oil has been spilled on the shop floor near the drums of hazardous waste. During the inspection, the employee used a shop rag to wipe up the spilled oil. CORRECTIVE ACTION: Continue to ensure that any spills are properly managed.

LEGACY AUTO TECH (Continued) **S121742449**

Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 05/14/2018. The owner had indicated that the hauler hasn't contacted him as to when the filters will be picked up. At the time of inspection it was observed that the used oil filters were more than 3 months overdue for a pick up. -mj Going forward it is required that you separate your metal oil filters from your paper oil filters and store them separately in approved containers.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: INTER CITY CLEANERS
Violation Date: 02-20-2020
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 10/01/2020. There was no employee training records for 2019. Please conduct and document employee training within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 124506
Site Name: INTER CITY CLEANERS
Violation Date: 03-21-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 03/21/2016. 4 drums of liquid dry cleaning hazardous waste solvent were left open without the drum lids being secured. Secure all of these containers as soon as possible to prevent spill, release, or exposure. Send proof of corrective action to Dan at drompf@smcgov.org or can text or email photos to 650 339 0327.

Violation Date:	02-20-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/18/2020. 1.Update the federal hazard categories for all the chemicals. 2.Since the facility switched to a new vendor a year ago, please go through the chemical inventory and update chemical inventory. Please change the chemical name and common name of the waste generated to petroleum/naphtha, to be consistent with the new product. 3.The waste petroleum sludge and the filters need to have their individual entry in the chemical inventory section of the HMBP. Resubmit the HMBP within 30 days to reflect the above three issues have been corrected/updated.

Violation Date:	10-15-2013
Citation:	19 CCR 4 2729.5 - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.5
Violation Description:	Failure to submit inventory reports (Activities, Owner/Operator, Hazardous Materials Descriptions and Map pages, if required. Documentation must be resubmitted (for facilities which exceed EPCRA

INTER CITY CLEANERS (Continued) **S121741428**

thresholds) or re-certified (for facilities which do not exceed EPCRA thresholds) by March 1.
Violation Notes: Returned to compliance on 03/11/2015.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 124506
Site Name: INTER CITY CLEANERS
Violation Date: 04-25-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 05/25/2018. Containers must be securely closed unless adding and removing waste. There are at least five 15 gallon containers containing petroleum waste with lids not being secured. Containers must be secured ASAP but no later than 30 days.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 10/01/2020. Obtain signed copies of manifest #006694784 SKS and #006979459 SKS within 30 days. There were 2 waste pick up episodes in 2019 (based on the manifest), 4 waste pick up episodes in 2018. Please contact safety-kleen or Clean Harbour to find out the number of waste disposal in 2019 and obtain the missing manifest within 30 days.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GREYHOUND EXPOSITION SERVICES (Continued) **U001594780**

Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	01-23-2019
Citation:	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description:	Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes:	Returned to compliance on 05/29/2019. A sample property owner notification letter will be provided along with this inspection report. Fill out the notification letter and provide a copy to the property owner, keep a copy on site, and provide a copy to SMCUPA within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	01-23-2019
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 03/20/2019. A sample emergency procedures document will be provided along with this inspection report. Fill out the posting, post at the facility and provide evidence to SMCUPA within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	01-23-2019
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 05/20/2019. ensure all employees are trained prior to the facility going into operation. Currently the labels on the hazardous waste drums indicate that employees have not been properly trained on waste segregation. Provide documentation of training to SMCUPA within 30 days.

GREYHOUND EXPOSITION SERVICES (Continued) **U001594780**

Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/29/2019. Current Hazardous waste labels are missing the facility address and phone number. Additionally, contents should be expanded upon. Instead of just "flammable liquids" include some of the most common items that are contained within that drum. Update labels and provide documentation to SMCUPA within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	01-23-2019
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 02/24/2019. Complete the HMBP and submit a copy to SMCUPA within 30 days since Hazmat is already on site at the facility. Include all chemicals that are planned to be on site, including e-waste if it will be over 500 lbs.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	08-05-2021
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Improve the process of waste determination. SMCEH recommend re train all staff and ensure line workers have proper training to identify hazards and secure them in a bin for future waste determination or ask a manager for help in identifying specific hazards until the determinations can be made.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	514161
Site Name:	Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date:	01-23-2019
Citation:	40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description:	Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes:	Returned to compliance on 10/09/2019.
Violation Division:	San Mateo County Environmental Health

GREYHOUND EXPOSITION SERVICES (Continued) **U001594780**

Violation Program: HW
Violation Source: CERS,

Site ID: 514161
Site Name: Goodwill Industries of San Francisco, San Mateo, & Marin (SSF)
Violation Date: 01-23-2019
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 10/09/2019. Waste determination needs improvement. Currently there is one drum for all "cleaners" and the hazard is listed as "corrosive". Corrosive waste can be either acidic or basic. Acids and bases are not compatible and must be separated for storage and disposal. Provide separate drums for acids, bases and evaluate other waste streams. There should also be a specific container for waste pharmaceuticals. Many wastes can be disposed of as medical waste pharmaceuticals, however, some medications are listed RCRA hazardous waste and must be labeled and disposed of as such. Work with your vendor to make waste determinations and provide documentation that there are containers for each unique waste stream within 30 days.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-23-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Initial inspection of new facility. Waste generated: Household waste from public donating HHW that cannot be resold. Facility is not in operation yet, but will be similar in operations to the Burlingame warehouse. Some of the products received as donations (soaps, makeup, cleaners, etc) that can still be used are being sold to resellers. Management also is considering reusing some of the products within the facilities, or opening up the warehouse to give these items away to the public that can be reused in an effort to reduce the amount of Hazardous Waste leaving the facility.

Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 11/01/2012
Comments: Union Pacific submitted to DTSC all previous environmental reports associated with the Site. DTSC reviewed these reports, provided comments, and made recommendations for future site investigations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Plan
Completed Date: 10/17/2014
Comments: The Groundwater Monitoring Plan describes the data quality objectives, sampling procedures, analytical methods, and frequency of groundwater monitoring activities for the Site. The October 17, 2014 Addendum to the Groundwater Monitoring Plan adds that during the first monitoring event, groundwater will also be analyzed for CAM-17 metals.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 09/11/2014
Comments: The Revised Addendum to the Revised Final Sampling and Analysis Work Plan describes the proposed scope of work and procedures for conducting an additional investigation at the site. The investigation will include collecting groundwater samples and subslab vapor samples.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 08/25/2016
Comments: In 2014 additional site investigation was performed in accordance with the Revised Addendum to the Revised Final Sampling and Analysis

UNION PACIFIC - SITE ADJACENT TO 69 S. LINDEN AVENUE (Continued) **S111464702**

Work Plan. The Updated Site Investigation and Conceptual Site Model (Report) incorporates the results from the 2014 investigation to provide an updated conceptual site model.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/12/2015
Comments: This report provides a summary of the quarterly groundwater monitoring activities performed in December 2014.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 07/02/2015
Comments: The Indoor Air Sampling Work Plan describes proposed indoor air sampling activities at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/22/2015
Comments: This report provides the results from the March 2015 quarterly groundwater monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/18/2015
Comments: This document reports the quarterly groundwater monitoring results for June 2015.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/23/2017
Comments: The December 2015 Quarterly Groundwater Monitoring Report describes the quarterly groundwater sampling that took place in December 2015. DTSC has reviewed and approves the report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 08/30/2012
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 08/30/2012
Comments: Oversight Cost Estimate included as an Exhibit in the VCA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/05/2013
Comments: This letter transmits DTSC’s oversight cost estimate for the Union

UNION PACIFIC - SITE ADJACENT TO 69 S. LINDEN AVENUE (Continued) **S111464702**

Pacific Site Adjacent to 69 S Linden Avenue for the fiscal year starting July 1, 2013 and ending June 30, 2014.

Violation Date: 05-20-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job

PENSKE TRUCK LEASING CO., LP (Continued) **S121774954**

description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 06/10/2019. OBSERVATION: Documented training of personnel was not available at the time of inspection. CORRECTIVE ACTION: Locate training documentation or conduct training with applicable personnel and document it. Submit a copy of the training documentation to the CUPA. Jose Ortiz needs to perform the annual training.

Site Name:	SUPERIOR AUTO REPAIR
Violation Date:	10-23-2020
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	Returned to compliance on 10/23/2020. OBSERVATION: The HMBP was submitted 07/07/2020, 04/20/2020, 03/25/2019, 03/08/2019, and 03/22/2018. The 4-20-20 HMBP submittal was not submitted within 12 months of the 3-25-19 HMBP submittal. CORRECTIVE ACTION: On an ongoing basis, continue to electronically submit and certify the business plan annually on or before the annual due date (within 12 months of the previous submittal).

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 10/05/2018. OBSERVATION: The facility demonstrated that the most recent hazardous waste and hazardous material management training occurred on 1-2-14. CORRECTIVE ACTION: Ensure that the facility employees receive hazardous material management training annually and document it. Submit documentation to the unified program agency demonstrating appropriate personnel have received initial training and maintain ongoing annual training records for a minimum of three years. Within 30 days submit a copy of the 2018 employees hazardous material management training to the SMC CUPA.

Eval Notes:	Received the following message: Hi Aris I updated the HMBP based on your comment. Will submit a revised certified plan early next week after I review the rest of the document. Thanks, Chris Christopher J. Gibson Group Environmental Manager - South Group Recology | 1675 Rogers Avenue | San Jose, CA 95112 T: 408.961.1242 | C: 415.286.3523 cgibson@recology.com HMBP submittal reviewed and not accepted with the following comment: HHW Loadcheck Waste (solids) volume should be changed to pounds . So if the physical state is solid, then volume of unit must be pounds. If physical state is liquid, then volume of unit must be gallons. Please update and resubmit. Thank you.

Eval Notes:	Met with Mike Salvato to conduct facility inspection using modified procedures. Scope: Auto repair shop and small outdoor area where waste is stored. Hazardous waste generator status: Small quantity generator (less than 270 gallons or 2200 lbs per month) Waste generated: 3x55 gallon used oil approx. 2-4 times per year. 2x5 gallon containers for used antifreeze. Material is re-used until determined to be waste. Metal filters (55 gal) drum on site. No waste container for paper filters or 6-gallon oil bags. Provide waste determination. We discussed proper management of these materials as hazardous waste. Hydrophobic mop used for oil clean-up. Universal waste generator status: CESQUWG. Small quantities of universal waste generated (lamps, batteries, electronics, aerosols).

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FOUR STAR AUTOMOTIVE (Continued) **1000351865**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

ATLAS METAL SPINNING CO INC (Continued) **1000157548**

corrective action activities required under RCRA.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/12/2020. Within 30 days label all drums that area not properly labeled. Drum labeling: please mark the accumulation date on the waste filter drum. The waste absorbent drum needs to be labeled with a full on hazardous waste label. One of the three 55 gallon drums containing used oil has a faded label, please complete a new hazardous waste label and place on this 55 gallon used oil drum.

Violation Date:	09-28-2020
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/12/2020. Dispose the used oil within 30 days. The last disposal was in February of 2019. The waste needs to be picked up every 6 months. The disposal frequency is independent of how much used oil that is generated.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 548816
Site Name: ACUTECH AUTO
Violation Date: 02-19-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/19/2020. Facility recently obtained an extra set of oxygen and acetylene cylinders. Because of the new addition of acetylene cylinder, Acetylene must be reported in the Hazardous Materials Business Plan within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 548816
Site Name: ACUTECH AUTO
Violation Date: 05-09-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/09/2018. The hazardous waste label for the used oil tank is illegible. A new label was completed during inspection. The hazardous waste label for the waste antifreeze contains information for the old location. A new label was completed during inspection.
Violation Division: San Mateo County Environmental Health

Site ID: 548816
Site Name: ACUTECH AUTO
Violation Date: 02-19-2020
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Every container holding hazardous waste must be properly labeled with

ACUTECH AUTO (Continued) **S124441116**

appropriate and completed labels (i.e. Hazardous waste label, filter). The hazardous waste label on the used oil tank is illegible, the accumulation dates on the waste antifreeze drum have not been updated. There was a 50 gallon red drum and a 15 gallon drum used to temporarily hold filters, until they are punched. These 2 drums also need to be labeled Drain used oil filters . The roll around carboy either needs to have a complete hazardous waste label or facility can choose to empty the content on a daily basis. If facility empty the content of the carboy on a daily basis, then have a label Empty Daily affixed to the carboy. Complete the labeling requirement for all the above referenced containers within 30 days.

Violation Source: CERS,

Site ID: 559035
Site Name: PRIMEFLIGHT AVIATION SERVICES
Violation Date: 08-30-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/01/2019. There is a hazardous waste label hung on the post for the used oil tank. This label had accumulation start dates filled in but the facility information, physical properties and hazard were left blank. The waste antifreeze tank and the 55 gallon used filters drums had no hazardous waste labels. Please make sure all containers containing hazardous waste with hazardous waste labels within 30 days.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Address:	1245 MONTGOMERY AVENUE
City,State,Zip:	SAN BRUNO, CA 94066
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000011034
Global Id:	T10000011034
Latitude:	37.64016
Longitude:	-122.41265
Status:	Completed - Case Closed
Status Date:	11/04/2019
Case Worker:	PF
RB Case Number:	41-1244
Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	Not reported
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Diesel, Gasoline
Site History:	A 3,000 gallon UST was removed from the site on November 18, 1999. TPHd, TPHg, and benzene were found in soil,and subsequent investigation in 2001 discovered TPHd and benzene in groundwater. Dual phase extraction was conducted in 2011; 2015 groundwater data

1245 MONTGOMERY AVE (WELCH-UST) (Continued) **S121307864**

confirmed water quality objectives were achieved for all petroleum related parameters except benzene. Remaining benzene concentrations in groundwater are limited and stable. 2018 Soil vapor and indoor air monitoring data indicate soil vapor has been impacted by benzene with highest concentrations in the northeast corner of the vacant warehouse; indoor air concentrations do not exceed commercial 8-hour exposure ESLs; outdoor air benzene concentrations are nearly double the indoor air values. No further corrective actions are required for UST site. Closure package completed and distributed to RP in November 2019.

PHASE II CORP (Continued) **1000379055**

RB Case Number: 41S0155
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Other Solvent or Non-Petroleum Hydrocarbon, Trichloroethylene (TCE)
Site History: The site is a vacant, 20-foot high warehouse building constructed in 1963. From 1963 to 1972, the warehouse was leased to a wood cabinet maker. In 1972, the site was leased to San Bruno Auto Center, a towing and auto repair facility, which installed and operated a 3,000-gallon underground fuel storage tank (UST) and equipment for its tow trucks. Since 1971 Phase II Corporation (Phase II), a printed circuit board manufacturer, leased the adjacent property and in 1983, leased the site itself. Phase II operated a plating and etching facility at the site.The operation used hazardous materials and generated hazardous waste during its operation, treating and discharging approximately 500,000 gallons/month of process water to the sewer. The site was abandoned in 1998 when the company went bankrupt. In 1998, the San Mateo County Health Services Agency notified the property owner that the facility must be decommissioned, decontaminated, and closed.The facility was closed until 1999 and the warehouse was leased to a garment cutting business, Juan s Cutting Service, and then to an automobile towing company, Aaces Towing. A TCE/DCE/VC/benzene plume extends offsite under adjacent buildings and under Montgomery Ave. Two on-site source areas associated with past operations: SW of the building and beneath the former storage area in front part of building.San Bruno does use some groundwater to supplement the water supplied via the Hetch Hetchy/SFPUC. This site is not impacting the groundwater used for drinking water, although the cleanup will require achieving drinking water standards.

Violation Notes:	Returned to compliance on 04/19/2017. Facility map is missing required elements.. Please update within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	67942
Site Name:	SILVESTRI
Violation Date:	06-11-2019
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 07/02/2019. OBSERVATION: The business did not provide one or more of the following: initial employee training, adequate employee training, annual employee training and/or maintain records of employee training. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response quipment. Maintain records of training available for 3 years. Please provide Hazardous Materials Busness Plan training within 30 days. Notifiy me when it is complete.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	67942
Site Name:	SILVESTRI
Violation Date:	06-24-2021
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

SILVESTRI (Continued) **S121790347**

Violation Notes:	Returned to compliance on 07/08/2021. OBSERVATION: Facility was unable to demonstrate that the two drums of hazardous waste had been disposed of within the last year. REQUIRED ACTION: Schedule a pick up with a registered hazardous waste transporter for all hazardous waste and provide a copy of the manifest to the Inspector within 30 days. If waste has been disposed of within the last year, submit copies of the manifests showing this instead. Ensure that hazardous waste is disposed of within 180 days of accumulation start date.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	67942
Site Name:	SILVESTRI

Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 07/15/2021. OBSERVATION: The hmbp submittal from 9/16/20 was not accepted, and revisions have not been submitted. REQUIRED ACTION: Re-submit your business plan only in the County Portal and address the following comments from your previous inspector "Please complete the Safety and First Aid and Spill Control portions of the Emergency Equipment Section of Consolidated Emergency Response/Contingency Plan segment of the HMBP"
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	67942
Site Name:	SILVESTRI
Violation Date:	06-11-2019
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that

SILVESTRI (Continued) **S121790347**

requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 07/02/2019. OBSERVATION: The business failed to update business plan within 30 days when one of the following occurs: a 100 percent or more increase in the quantity of a previously disclosed material; any handling of a previously undisclosed hazardous material; a change of business address, business ownership, or business name; or a substantial change in the handler's operations that requires modification to any portion of the business plan. CORRECTIVE ACTION: Update all submittal elements effected by the change(s) and electronically submit the update within 30 days. Update the chemical inventory. 1. Propane - update the largest container amount. 2. Remove the chemicals you no longer use. 3. Update the methanol maximum daily amount to 165 gal instead of 55 gallons. And incease the average daily amount. 4. Add R-215 reducer and Polyplex? (Ask Tony)

File Location: Not reported
Local Case Number: 550117
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Arsenic, Stoddard solvent / Mineral Spriits / Distillates
Site History: Extracted from URS documents San Mateo County does not take responsibility for the accuracy of the statements made or any professional interpretations made in the referenced reports. The former DuPont plant in South San Francisco was an active paint manufacturing operation from 1934 through 1982. Peak production at the plant occurred in 1955, when employment reached 250 workers. In 1982, operations were reduced, and from 1982 until September 2000 the facility was used mainly for warehousing paints and quality control testing of bulk paints that were shipped to the NUMMI plant in Fremont, California. In 1985, DuPont sold one of its parcels (150 South Linden Avenue) to Bay Cities Building Materials. In September 2000, Intrinsic Ventures LLC of Menlo Park, California, purchased the remaining parcel (160 South Linden Avenue) from DuPont. The Site is

DUPONT (Continued) **1000925659**

currently being used for commercial occupancy. The Site is located on a bay plain about 1.5 miles west of San Francisco Bay. The Site is located at an elevation of about 20 feet above sea level and slopes gently northwestward. A map prepared by the U.S. Geological Survey shows that old marshlands, that have been covered with man-made fill, begin about 500 feet northeast of the site and extend to the edge of San Francisco Bay. On the U.S. Geological Survey map the Site is shown as being underlain by the Quaternary age Colma Formation, which is composed of sand, sandy clay, and silty sand. Toward San Francisco Bay, younger alluvium and bay mud overlie the Colma Formation. Depth to groundwater at the Site during the latest monitoring event on June 14, 2007 ranged from 5.38 to 8.57 feet bgs. The average direction of groundwater flow for that date was to the northeast at an average gradient of 0.013 feet per foot. The entire area from the Site eastward to San Francisco Bay is developed as industrial and commercial properties. Industrial and commercial properties also extend north, west, and south from the Site. There are no residential properties in the vicinity of the Site. Several investigations have been conducted at the Site to characterize its soil, groundwater quality, and hydrogeologic conditions. In general, these investigations were designed to evaluate the extent of impacted soils and groundwater beneath the Site and to assess the hydrogeologic conditions. Groundwater monitoring is ongoing at the Site. DuPont Environmental Remediation Services (DERS) performed a limited Environmental Assessment of the Site in 1991. Eleven soil borings were advanced at locations selected after a review of historical site activities. Soil samples were collected from each boring. The soil analytical results from this investigation showed the presence of impacted soils in the area of the former tank farm. Soils were impacted with BTEX and other volatile organic compounds (VOCs), including acetone, 2-butanone, hexanone, methylene chloride, and di-nbutylphthlate. In October 1998, URS Greiner Woodward-Clyde performed a Phase II Environmental Site Assessment (ESA) at the Site. Eleven more soil borings were advanced at locations based on the results of the DERS investigation and a historical review of Site activities. Soil and groundwater samples were collected at each boring. In addition, shallow soil samples were collected at five other locations. Toluene, ethylbenzene, xylenes, TPH-gas, and total petroleum hydrocarbons as diesel (TPH-diesel) were detected in over half of the soil samples. Benzo(a)pyrene, di-n-butylphthalate, and naphthalene were detected in soil samples from the tank farm area. BTEX, acetone, 2-butanone, 1,2-dichloroethane, and several semi-volatile organic compounds (SVOCs) were detected in Site groundwater samples. Site Specific Target Levels (SSTLs) were prepared for several future use scenarios in response to a County request and submitted with the Phase II ESA Report. URS performed a remedial investigation at the Site in July 1999. Among other tasks, the remedial investigation included collection and analysis of groundwater samples from the former tank farm area. The remedial investigation results indicated a potential hydrocarbon plume (TPH-mineral spirits, toluene, ethylbenzene, and xylenes) in groundwater that extended from the former tank farm area to South Linden Avenue. DuPont conducted a soil removal action in May-July 2000 under the direction of the County. URS submitted a remedial action report on July 26, 2000 that detailed the source removal activities performed as part of this action. The excavations were backfilled with imported clean bank-run fill material. In August

DUPONT (Continued) **1000925659**

2000, four monitoring wells were installed in accordance with the work plan. Three monitoring wells were installed along the centerline of the plume and are being sampled in accordance with the groundwater monitoring and reporting plan. The fourth well was installed at an upgradient location and serves as a background well. Five quarters of groundwater monitoring were performed from December 2000 through December 2001 to investigate plume stability at the Site. Because the sampling results indicated a stable plume, the County approved a change to semiannual monitoring beginning in June 2002. In December 2002, URS performed an off-site groundwater investigation to evaluate possible off-site groundwater impacts of the former DuPont Automotive Products facility, in response to the San Mateo County Health Services Agency request for investigation. The investigation activities included sampling and analysis of shallow groundwater in two areas. The first area of investigation was along the border between the former DuPont Automotive Products facility and the adjacent Bay Cities Building Materials site. The second area of investigation occurred in the roadway on South Linden Avenue. Six soil borings were advanced and groundwater was collected from the temporary wells installed in the borings. Analytical results showed that the risk-based screening levels (RBSLs), based on exposure to vapor emissions from groundwater in indoor environment, were not exceeded at the sampled locations. Hence, it was concluded that the former DuPont Automotive Products facility was not causing human health concerns at the adjacent Bay Cities Building Materials site or in the roadway of South Linden Avenue. In a letter dated July 28, 2003, the County approved the elimination of groundwater analysis for TPH-gas, total petroleum hydrocarbons as mineral spirits (TPH-mineral spirits), and equipment blanks based on the submitted groundwater monitoring data. In 2003, the County notified DuPont by letter that the Site would need to be remediated to a residential standard unless a new, separate deed restriction was recorded for the Site. In a letter dated September 14, 2005, the County requested that DuPont compare historical Site soil and groundwater data with San Francisco Bay Region Water Quality Control Board Environmental Screening Levels (ESLs) for a hypothetical future residential land use of residential slab-ongrade construction. In response to the County s request, DuPont submitted the Current Conditions Report on March 31, 2006. On June 8, 2006, the County requested that a Work Plan be submitted to establish cleanup goals and either propose additional Site characterization based on the residential land use criteria or evaluate several remedial alternatives. As a result of previous investigations and removal actions, concentrations and distributions of constituents of concern are well understood over much of the Site. However, as stated in DuPont s July 3, 2006, recommendations for further characterization in the Amendment to the Current Conditions Report, additional groundwater sampling was needed to address data gaps pertinent to an assumed future residential use with slab-on-grade construction. In a letter dated July 18, 2006, the County provided comments and requested that additional groundwater data be collected as part of the Work Plan to assess plume stability. On August 10, 2006, DuPont submitted the Site Characterization Work Plan for Potential Future Residential Use, which presented the proposed work scope to further characterize and evaluate on-site soil, groundwater and soil gas based on a future hypothetical residential land use scenario, assuming slab-on-grade construction. The Work Plan was prepared in response to the County s letters of

DUPONT (Continued) **1000925659**

June 8 and July 18, 2006. The Work Plan also presented a proposed scope of work to further evaluate and characterize the stability of the groundwater plume, both on-site and off-site, in response to the County s letter of July 18, 2006. In a letter dated September 6, 2006, the County indicated acceptance of the work plan with modifications including analysis for hexavalent chromium in soil, evaluation of soil ecotoxicity screening levels, unsuitability of GeoprobeTM methods for geotechnical sampling, and collecting samples from the adjacent downgradient property location. In a letter dated November 22, 2006, the County indicated that it had received verification of the commercial deed restriction cosigned by San Mateo County, and that the deed restriction may decrease the scope of, but not necessarily eliminate, the Work Plan submitted on August 10, 2006. In a meeting with URS on December 5, 2006, the County agreed to a modification of the scope of work in the work plan to include only characterization of the on-site and off-site stability of the toluene plume in groundwater. The revised scope of work was summarized in a letter from URS to the County dated December 22, 2006. A subsurface investigation to characterize the groundwater toluene plume stability on-site and off-site was performed on January 31 and February 1 and 2, 2007. Fourteen grab groundwater samples were collected and analyzed for BTEX, acetone, 2-butanone (MEK), 4-methyl-2-pentanone (MIBK), 1,2-dichloroethane (DCA), and naphthalene. The data show that constituent levels exceeded RWQCB ESLs for groundwater as a potential drinking water resource at several sample locations on the Site and the adjacent property at 150 South Linden Avenue. None of the groundwater sample results exceed the Site-Specific Target Levels (SSTLs) developed for the Dupont facility or the RWQCB ESLs for indoor air impact in a commercial/industrial land use scenario with highly permeable soils. DuPont submitted the Site Groundwater Plume Stability Characterization Report on April 25, 2007, and concluded in the report that upgradient and crossgradient extents of the main contaminant plume in shallow groundwater had been substantially delineated. The report also concluded that the downgradient offsite extent of the main contaminant plume in shallow groundwater had not been fully delineated; however, the plume appeared to narrow substantially to the east beyond the west margin of South Linden Avenue. The June 14, 2007 groundwater monitoring results showed benzene, toluene, ethylbenzene, xylenes, acetone, 2-butanone (MEK) and 4-methyl-2-pentanone (MIBK) in monitoring well MW-1 at concentrations of 170 micrograms per liter (g/L), 150,000 g/L, 4,700 g/L, 23,000 g/L, 8,200 g/L, 110 g/L and 790 g/L respectively (URS 2007b). Well MW-1 is the well closest to the former source area and is upgradient to the Central Concrete Supply Company (former Bay Cities Building Materials) site. In the July 1999 remedial investigation, two borings, A1 and A2, were advanced at the property boundary between the former DuPont site and the Bay Cities Building Materials site, and three borings, B1, B2, and B3, were advanced in South Linden Avenue roadway, adjacent to the two sites. In July 1999, BTEX was detected at both borings advanced at the property boundary, A1 and A2. Benzene was detected at concentrations of 100 g/L at boring A1 and 200 g/L at boring A2. Toluene was detected at concentrations of 45,000 g/L at boring A1 and 110,000 g/L at boring A2. Ethylbenzene was detected at concentrations of 3,000 g/L at boring A1 and 3,500 g/L at boring A2. Total xylenes were detected at concentrations of 13,000 g/L at boring A1 and 16,000 g/L at boring A2. TPH-gas was detected at concentrations of 130 mg/L at boring A1

DUPONT (Continued) **1000925659**

and 190 mg/L at boring A2. TPH-diesel was found at concentrations of 4.2 mg/L at boring A1 and 3.9 mg/L at boring A2. In July 1999, BTEX was also present in all three borings advanced in the South Linden Avenue roadway, B1, B2, and B3. The concentrations ranged from 0.3 g/L (data qualified with a J) to 50 g/L for benzene, 180 g/L to 12,000 g/L for toluene, 8 g/L to 390 g/L for ethylbenzene, and 39 g/L to 2,000 g/L for total xylenes. TPH-gas was detected at concentrations ranging from 0.38 mg/L to 28 mg/L, and TPH-diesel was found at concentrations ranging from 0.67 mg/L to 1.5 mg/L. These results were obtained before the May-June 2000 soil removal action in the vicinity of the former tank farm area of the site, and therefore represent a range of concentrations that might be expected off-site.

Background Info:	The Site is located in an industrial area. There is a one-story building and a warehouse on the Site, which is used for automotive storage. A portion of the Site is leased to a wood pallet company and another portion is used for storage of inactive AT&T vehicles. From 1935 to 2000, DuPont de Nemours (DuPont) owned the Site. DuPont manufactured automotive paints and varnishes until 1982, and warehoused and distributed their products until 1990. Deerfield Realty Corporation acquired the Site in September 2000 and plans to develop it as a Class A office park.

Site Name:	SFO AIRPORTER INC
Violation Date:	12-08-2017
Citation:	HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Description:	Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.
Violation Notes:	Returned to compliance on 08/08/2018. The latest SPCC plan was executed on 9/2/1017. The 5 year review is overdue. Please complete the 5 year review within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	APSA
Violation Source:	CERS,

Site ID:	152691
Site Name:	SFO AIRPORTER INC
Violation Date:	04-13-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 05/11/2018. There were numerous 55 gallon drums either had illegible labels or the paper and metal oil filter drums were incorrectly labeled (paper filter drums need the hazardous waste labels, while the metal filter drums only need the simplified Oil Filter labels). All containers/ drums holding hazardous waste need to have complete hazardous waste label affixed to it. Unless the facility can ensure the content of such container is emptied on a daily basis, in such case, a hazardous waste label marked "Empty Daily" is sufficient. Please correct the issue ASAP.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.
Violation Notes:	Label the used oil tank with hazardous waste label within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	152691
Site Name:	SFO AIRPORTER INC
Violation Date:	04-13-2018
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 05/11/2018. There was severe evidence of used oil dripping around the used oil tank. House keeping in the waste storage area must be maintained daily to avoid the hazardous waste leaving the site and negatively impacting the environment.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	152691
Site Name:	SFO AIRPORTER INC
Violation Date:	10-17-2019
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 11/15/2019. The secondary containment for the 55 gallon drum holding diesel hose dripping is full of liquid. Pump out the liquid and keep the secondary containment dry at all time. It is designed to hold accidental discharge from the drum but not unidentified liquid. This is a repeat violation. Correct the violation within 30 days. Also there are bus parts that scattered across the yard especially near the swale. Cover or remove items that could cause liquid draining to the storm drain during a rain event.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Every container containing hazardous waste needs to be labeled with hazardous waste labels; which include the above tank used to store used oil, the 55 gallon drum storing waste absorbent, the one 55 gallon drum by the above ground diesel tank, the two 55 gallon drums storing used oil. Please place the hazardous waste labels on all the containers and tank within 30 days. When you obtain 55 gallon drums for the used filters and waste antifreeze, please remember to label them as well. One of the 55 gallon used oil drum was marked Empty , but in reality it is not. Only label a drum that is truly empty empty because such mislabeling may cause confusion for the first responder if for some reason they need to be called upon. Any container that is marked empty daily has to be empty on a daily basis. The 55 gallon drum sitting next to the diesel tank needs to be closed with bung when not in use or you have the option to use the same drum or a smaller container for [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:

Name:	RALPH KING FURNITURE & CABINETRY, INC.
Address:	100 S LINDEN AVE
City,State,Zip:	SOUTH SAN FRANCISCO, CA 94080
Site ID:	437388
CERS ID:	10762297
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	437388
Site Name:	Ralph King Furniture & Cabinetry, Inc.
Violation Date:	09-21-2021
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

RALPH KING FURNITURE & CABINETRY, INC. (Continued) **S122492556**

Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 09/21/2021. OBSERVATION: The container of hazardous waste solvent in the work area was not closed at the time of the inspection. This was corrected during the inspection and a cap was put on. In the future ensure that all containers of hazardous waste are completely closed except when adding or removing waste. This can be accomplished by using the cap as done during the inspection, or by using a funnel that latches shut and maintains the container vapor tight.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	437388
Site Name:	Ralph King Furniture & Cabinetry, Inc.
Violation Date:	09-21-2021
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	OBSERVATION: EPA ID number expired on 6/30/20. REQUIRED ACTION: Re-activate EPA ID number by using one of the two options found at https://dtsc.ca.gov/reactivate-epa-id-number/
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,
Site ID:	437388
Site Name:	Ralph King Furniture & Cabinetry, Inc.
Violation Date:	09-21-2021
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 09/21/2021. OBSERVATION: The four 5 gallon buckets of hazardous waste were not labeled at the time of the inspection. This was corrected during the inspection. In the future ensure that as soon as hazardous waste begins accumulating in a container that it is properly labeled with the following requirements: "Hazardous Waste", name and address of the generator, composition and physical state, hazardous properties, and the accumulation start date.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	569567
Site Name:	FANG'S AUTO
Violation Date:	10-16-2020
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 10/19/2020. OBSERVATION: The business did not demonstrate that records of employee training have been maintained. CORRECTIVE ACTION: Provide all employees with required training that includes: safe handling hazardous materials, emergency response procedures, and proper use of response equipment. Maintain records of training available for 3 years. Within 30 days, submit a copy of the employee training log to this office.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HMRRP

Site ID:	569567
Site Name:	FANG'S AUTO
Violation Date:	10-16-2020
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste",

FANG'S AUTO (Continued) **S113105015**

name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 10/16/2020. OBSERVATION: The partially full white used oil caddie was not labeled. The 2 partially full 55 gallon metal drums of used oil were not labeled. The one partially full poly white 55 gallon drum of used oil was not labeled. The partially full black 55 gallon metal drum of paper used oil filters was not labeled. During the inspection, the provided labels were completed and affixed to the containers. CORRECTIVE ACTION: Continue to ensure that all containers of HW are properly labeled.
Violation Division: San Mateo County Environmental Health

Violation Date: 10-16-2020
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 10/16/2020. OBSERVATION: The partially full black 55 gallon metal drum of drained metal used oil filters was not labeled. During the inspection, the provided label was completed and affixed to this container. CORRECTIVE ACTION: Continue to ensure that all containers of drained metal used oil filters are properly labeled.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 569567
Site Name: FANG'S AUTO
Violation Date: 10-16-2020
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 10/16/2020. OBSERVATION: The one partially full poly white 55 gallon drum of used oil was left open. The partially full black 55 gallon metal drum of paper used oil filters was left open. During the inspection, the container of filters was closed and a used filter and funnel were placed at the opening to drain the oil into the used oil container. CORRECTIVE ACTION: Continue to ensure that all containers of hazardous waste are kept closed unless adding or removing hazardous waste.

Violation Source: CERS,

Site ID: 35556
Site Name: HARRIS BROTHERS AUTO BODY WORKS
Violation Date: 09-30-2021
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: OBSERVATION: Both the 5 gallon container and 55 gallon of waste solvent/paint were open at the time of the inspection. REQUIRED ACTION: Close all containers of hazardous waste except when adding or removing waste. For the small container you can either remove the funnel and cap the container when not in use or replace the funnel with one that latches shut and is vapor tight. The drum needs to be closed, bolted shut and properly capped except when adding or removing waste. Submit photos to the inspector showing that this has been accomplished.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	You would be eligible to be removed from this regulatory program if you can reduce hazardous material storage for individual chemicals to below 200 cubic feet for gases, 55 gallons for liquids, and 500 lbs for solids. Switching to smaller containers for the waste thinner, and removing the 55 gallon drum of new oil would accomplish this for you. Contact your inspector if you intend to do this, otherwise please address all cited violations on this report within the time frame stated.

Site Name: Penske Truck Leasing Co., LP
Violation Date: 05-14-2019
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 06/13/2019. The line leak detector for the regular gasoline failed the test. Please make necessary repair or replacement, then retest and forward me the report within 30 days. Tanknology called in the failed LLD test and the maintenance company will respond.

PENSKE TRUCK LEASING CO., LP (Continued) **S121788059**

Site ID:	56073
Site Name:	Penske Truck Leasing Co., LP
Violation Date:	09-04-2020
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 09/05/2020. The trough used to hold used oil either needs to be closed (in this case impossible) and labeled with a hazardous waste label or empty the used oil on a daily basis and affix a label marked EMPTY DAILY . Correct this within 30 days and please take a photo can send it to me so I can close out the violation. The facility information portion of the hazardous waste label on the used antifreeze drum has faded. Either refresh the existing label or complete a new label which was provided during the inspection. Please complete this ASAP and no later than 30 days.

Violation Program:	HW
Violation Source:	CERS,

Site ID:	56073
Site Name:	Penske Truck Leasing Co., LP
Violation Date:	05-27-2021
Citation:	HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description:	Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes:	Date on the antifreeze drum reflects December, there are no records of disposal for this year. Provide disposal record for the last antifreeze pickup. If it has been over 90 days, schedule a pickup. If the facility does not generate much waste antifreeze, it is suggested they reduce the tank size to a 55 gallon container (drum) in order to use the satellite accumulation rule (and also so the facility will not need to get a waste tank assessment)

Citation:	HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description:	Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes:	Returned to compliance on 07/31/2018. Regular gasoline tank had water intrusion. High water warning was noted on the 11/17 DO report. The high water warning became constant starting 1/2018 and was noted on every DO report for 2018 (even on the 5/8/2018 DO report). Facility representative (Kirk Blanz) stated they stopped using the gasoline tank due to water in the tank. Kirk stated repairs have been completed. However, at time of 2018 UST inspection, such repair report was not available. Facility needs to summarize all actions taken to address the high-water issue in the regular gasoline tank within 10 days and if repair has been done, a report needs to be submitted within 30 days. It is unclear at this time whether a permit should have been obtained from San Mateo County Health Services due to lack of information at the time of inspection. Mr. Rick Roybal seemed to be theb individual authorizing and signing for repair work order. Mr. Roybal is out of the office until 5/27/2018.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/27/2021. The hazardous waste label must be on the used oil tank itself, posting it on the wall is not sufficient. The information on the hazardous waste label on the waste coolant drum was not readable. Place a new hazardous waste label on the drum. Use the labels provided. After you have places a new hazardous waste labels on the used oil tank and waste coolant drum please take a photo of each and email them to me to show compliance. Do so ASAP but no later then 30 days

Violation Date:	06-27-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 07/19/2018. The used oil filters 55 gallon drum full and the lid could not be secured this is considered to be an open container. There was one 5 gallon containers, 2 oil pans and one square metal container all are holding oil filters. None of these containers are closed and have no hazardous waste labels. Owner called World Oil during inspection and World Oil stated they will pick up the filters in 3 days. In the future all containers holding waste, such as used oil, antifreeze and filters need to be closed and be properly labeled. The 15 gallon container holding used oil from filter crushing needs to be closed and labeled unless it can be either retrofitted so that it can be properly closed or empty right away.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Alternate Address:	120 SOUTH LINDEN
Alternate City,St,Zip:	S SAN FRANCISCO, CA 94080
Background Info:	The Site is bounded to the north by Victory Avenue, to the south by Tanforan Avenue, to the east by railroad tracks, and to the west by South Maple Avenue. The site is comprised of a building and a warehouse, which is used for automotive storage. Areas around the buildings are paved or landscaped. The site is located in an industrial area and is adjacent to a tire company. Joseph W. Welch & Investors purchased the site in 1984. The site is now zoned for light industrial use. The property is currently occupied by a number of different tenants, including music studios, auto repair shops and restoration facilities. The Reichold Chemical site is a registered historical landmark by San Mateo County. From 1937 to 1984, Reichhold Chemicals Inc. owned and operated the site. Reichold manufactured paint products using emulsion, phenol, alkyd, and urea resins.
Comments Date:	01161981
Comments:	Facility drive-by. No evidence of waste.
Comments Date:	02092003
Comments:	Site screening conducted which confirmed that no further action
Comments Date:	02092003
Comments:	is needed at the site. According to the Hazardous Waste
Comments Date:	02092003
Comments:	Management Operation Plan prepared in 1983, the waste generated
Comments Date:	02092003
Comments:	at the facility, including paint resin and thinner was placed in
Comments Date:	02092003
Comments:	55-gallon drums, for shipment to Class I or II landfills. At
Comments Date:	02092003
Comments:	the time of closure, all hazardous wastes were transported
Comments Date:	02092003
Comments:	offsite for disposal at facilities in Benicia and Kettleman
Comments Date:	02092003
Comments:	Hills, California. The tanks and containers were decontaminated
Comments Date:	02092003
Comments:	before shipment. In April 1984, composite wipe samples were
Comments Date:	02092003
Comments:	collected in the drum storage area and analyzed for
Comments Date:	02092003
Comments:	polychlorinated biphenyls (PCBs), acids, and base compounds.
Comments Date:	02092003
Comments:	PCBs were found at a concentration less than 0.01 milligram/100
Comments Date:	02092003
Comments:	square centimeters, which is less than the 0.1 milligram/100

Waste Description: MERCURY

Waste Code: U182
Waste Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

Waste Code: U187
Waste Description: ACETAMIDE, N-(4-ETHOXYPHENYL)- (OR) PHENACETIN

COSTCO WHOLESALE NO 422 (Continued) **1004677951**

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U237
Waste Description: 2,4-(1H,3H)-PYRIMIDINEDIONE, 5-[BIS(2-CHLOROETHYL)AMINO]- (OR) URACIL MUSTARD

Waste Code: U279
Waste Description: U279
