Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	RP states that a tank overflowed due to mechanical issues and eventually released 1500 gal of "Processed Liquor" containing a total 1.17 lbs of arsenic onto the ground. Release is contained and cleanup is complete and the soil will be excavated and no waterways were impacted. Per NRC#1076264 "CALLER STATED THAT THEY HAD A DISCHARGE OF PROCESSED LIQUOR OF 1,500 GALLONS ONTO THE SOIL. THE REASON FOR THE REPORT IS FOR THE REPORTABLE QUANTITY OF ARSENIC. THE CAUSE OF THE DISCHARGE IS FROM THE NEW HIGH LOW SENSORS THAT WERE INSTALLED. THE OPERATOR WAS UNABLE TO DETERMINE WHEN THE TANK WAS AT THE FULL CAPACITY AND A DISCHARGE OCCURRED AS A RESULT. THE TANK OVERFLOWED INTO ANOTHER TANK AND THEN INTO THE DITCH ON SITE. REMEDIAL ACTIONS: ON SITE VAC TRUCK WAS USED."

Description:	CALLER IS REPORTING A SPILL OF TAILINGS AFFLUENT TO THE GROUND DUE TO A MECHANICAL FAILURE ON A FACILITY TRANSFER PIPELINE. CALLER STATED THE EIGHT INCH PVC PIPELINE IS USED TO TRANSFER MATERIALS BETWEEN PONDS. CALLER STATED SAMPLES WERE TAKEN TO CHECK FOR ARSENIC AND THE AREA HAS BEEN CORDON OFF. A VACUUM TRUCK WAS USED TO RETURN 1800 GALLONS OF THE MATERIALS TO THE POND.

Fatals:	No
Comments:	Not reported
Description:	Per the caller a demolition salvage operation was on going and picked up a transformer with a forklift puncturing the transformer. A Cermaic valve was broken onto pavement and nearby soil was used as absorbent. Impacted soil and oil will be cleaned up and placed into two 55 gallon drums. A 2009 analytical test showed no PCB's in the oil.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
TSCA SUBMITTER
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
OSHA ESTABLISHMENT
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US Emissions & Generation Resource Database (EGRID) contains data on emissions and resource mix for virtually every power plant and company that generates electricity in the United States.
ELECTRIC GENERATOR
AIR MAJOR
STATE MASTER
CASWIS (California Solid Waste Integrating System). California's solid waste facility list that contains information on solid waste facilities, operations, and open and closed disposal sites throughout the state.
GREENHOUSE GAS REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

U. S. BORAX, BORON OPERATIONS (Continued) **1016994602**

that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.
US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Description:	Caller states substance leaked from the hydraulic hose on a haul truck due to equipment failure. All of the release is on soil within the pit perimeter. 50 gallons of the substance pooled below the haul truck and 25 gallons sprayed out onto soil. An outside contractor will vacuum up the pooled substance and a dozer will scrape off impacted soil which will be contained and shipped out.

Waste Description: TRICHLORETHYLENE

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P106

US BORAX INC (Continued) **1015732641**

Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Waste Code: U114
Waste Description: CARBAMODITHIOIC ACID, 1,2-ETHANEDIYLBIS-, SALTS & ESTERS (OR) ETHYLENEBISDITHIOCARBAMIC ACID, SALTS & ESTERS

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility

US BORAX INC (Continued) **1015732641**

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.
GREENHOUSE GAS REPORTER
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Incident Date:	11/26/2007 12:00:00 AM
Admin Agency:	Kern Co. Environmental Health Services Dept
Amount:	Not reported
Contained:	Yes
Site Type:	Refinery
E Date:	Not reported
Substance:	Boric Acid effluent
Gallons:	351,000
Unknown:	0
Substance #2:	Not reported
Substance #3:	Not reported
Evacuations:	0
Number of Injuries:	0
Number of Fatalities:	0
#1 Pipeline:	Not reported
#2 Pipeline:	Not reported
#3 Pipeline:	Not reported
#1 Vessel >= 300 Tons:	Not reported
#2 Vessel >= 300 Tons:	Not reported
#3 Vessel >= 300 Tons:	Not reported
Evacs:	Not reported
Injuries:	Not reported

US BORAX PLANT (Continued) **S105193265**

Fatals:	Not reported
Comments:	Not reported
Description:	Release occurred due to breakage in the pipeline that transfers the boric acid effluent. Pipeline has been shut-down and excavation will be done tomorrow.
Name:	Not reported
Address:	14486 BORAX ROAD
City,State,Zip:	BORON, CA 93516
OES Incident Number:	3-0138
OES notification:	01/08/2003

Description:	Caller states: A major thunderstorm led to excess storm water onsite and took out the electricity of the area; all of the storm water went into sump. They were unable to pump due to lack of power and the sump overflowed causing the release to a catchment. The release was contained within the system. The catchment is on-line.

Description:	Per the caller there was a 5,000 gallon spill of tailings, which included 5.9 pounds of arsenic. The spill occured about 0300 this morning in an 8" above ground pipe, the pipe is HTPE and there was a break at a fitting where two sections come together. The spill was onto an unpaved area, there are no bodies of water and no public access. There is a vacuum truck that recovered about 95% of the spill and they will be scraping some of the dirt.

WMUDS/SWAT:
Edit Date: 19951026
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.
Primary Waste: PROCES
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Base Meridian: SB
NPID: Not reported
Tonnage: 0
Regional Board ID: Not reported
Municipal Solid Waste: False
Superorder: False
Open To Public: False

Description:	A pipeline broke, causing the release of material. Caller describes the release as a leak. This occurred at a mining facility. It is estimated the leak occurred from 0500 hours to 0800 hours. The caller states normal operating procedure is to test the material. The material tested for arsenic 2.15 lbs. This amount is greater than the reportable quantity of 1 lb. Caller is making appropriate notifications. The material impacted a dirt road. Caller states the material did not impact water, evaporation ponds, surface water, or ground water. The release is contained and the reporting party is actively working to clean up the material. Caller states they vacuumed up the material and will excavate the affected earth on Monday.

Comments:	Not reported
Description:	RP states that a mechanical failure resulted in the release of approx 5000 gal of Processed Liquor which contains approx 2.69 lbs of arsenic. The release was onto the slab on the ground, into a ditch and onto a roadway. The release is contained, cleanup is complete, and no waterways were impacted.

WDS:

Name:	BORON MINE FACILITY
Address:	14486 BORAX RD
City:	BORON
Facility ID:	South Lahontan 152004001
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	0
Facility Telephone:	7607627000
Facility Contact:	DAVE WEISS
Agency Name:	US BORAX INC
Agency Address:	14486 BORAX RD
Agency City,St,Zip:	BORON 935162000
Agency Contact:	DAVE WEISS
Agency Telephone:	7607627000
Agency Type:	Private
SIC Code:	1474
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	PROCES
Waste Type2:	Not reported
Waste2:	Process Waste (Waste produced as part of the industrial/manufacturing

US BORAX BORON OPERATIONS (Continued) **S101612518**

process)
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 3
Baseline Flow: 2
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Name: GANGUE/OVERBURDEN/REF WASTE
Address: 14486 BORAX RD
City: BORON
Facility ID: South Lahontan 152004002
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

SIC Code: 1474
SIC Code 2: Not reported
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Primary Waste: SLDWST
Waste Type2: Not reported
Waste2: Solid Wastes
Primary Waste Type: Nonhazardous Solid Wastes/Influent or Solid Wastes that contain

US BORAX BORON OPERATIONS (Continued) **S101612518**

nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Violation Date: 09-26-2018
Citation: 22 CCR 15 66265.192(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(a)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service. The written assessment shall state that, the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed to meet the regulation.
Violation Notes: Returned to compliance on 10/24/2018. Facility lacking a current hazardous waste tank assessment for the two poly tanks holding waste oil. As per facility representative, the tanks were installed in 2007. Please provide the hazardous waste tank assessment to trulovej@kerncounty.com

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Not reported
Eval Division: Kern County Env Health Services Department
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: During the visit to CHC Cal City, it was determined that the facility is not currently storing any hazardous materials on site. A phone call was made to Bradley Miller who stated that equipment and hazardous materials were stolen from this site. Theft occurred on 09/13/19 which caused the site to cease operations. The intent is to get this site up and running in the near future. Please be advised that this facility will be required to submit Emergency response Contingency plan when operations commence. A re-inspection will be conducted at a later date to inspect the facility.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Status: Completed - Case Closed
Status Date: 01/22/2019
Case Worker: BDG
RB Case Number: 6B3600681T
Local Agency: Not reported
File Location: Regional Board
Local Case Number: 95057
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History: One 2,000-gallon gasoline tank removed 9/27/1995. Two 10,000-gallon gasoline tanks were abandoned in by backfilling with a cement grout due to their location beneath the dispenser islands and overhead canopy.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Description:	Caller states that there is a soapy metallic smell in the air that burns the eyes. Caller states he asked various people if they smelled the odor and everyone he spoke to also smelled it. Caller states that the smell is in about a 75 mile radius of his residence. Caller states this seems to occur after a rain or a large fire. Caller states the odor seems get closer to the ground surface in the evenings. Caller states this started on Wednesday. Caller states this is a reoccurring problem. Caller made the same complaint May 9th 2013 Spill report 13-2800 and again 22 July 2013 Spill Update 13-2800.

Description:	NRC report: Caller is reporting that natural gas released from a meter set due to unknown causes. The caller stated that he believes when a carport awning fell on the set it ignited the release. A structure fire has also ignited and 2 mobile homes burned down possibly exceeding the $50,000 damages threshold. There has been some evacuations at a mobile home park. (head count is unknown). The gas was contained at 2235 hours.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CERS:
Name: CALIF CITY WASTEWATER TREATMENT PLA
Address: 10835 NELSON DR
City,State,Zip: CALIFORNIA CITY, CA 93505
Site ID: 15147
CERS ID: 10234927
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 15147
Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 10-21-2016
Citation: 19 CCR 4.5 2760.1(d)(2) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.1(d)(2)
Violation Description: Failure to document that equipment complies with recognized and generally accepted good engineering practices.
Violation Notes: Returned to compliance on 03/26/2019. The chlorine system needs to follow best engineering practices. The regulators should be attached to the chlorine cylinders and have the ability to auto shut off if the alarm system activates.
Violation Division: Kern County Env Health Services Department
Violation Program: CalARP
Violation Source: CERS

Site ID: 15147
Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 10-12-2017
Citation: 19 CCR 4.5 2760.3(c) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.3(c)
Violation Description: Failure to review operating procedures as often as necessary to assure that they reflect current operating practice, including changes that result from changes in process chemicals, technology, and equipment, and changes to stationary sources.
Violation Notes: Returned to compliance on 03/26/2019. Review and remove any operating procedures that are no longer in use. At the time of the inspection an SOP was found for a peace of equipment that is no longer in service (Mechanical Mixer Submersible).
Violation Division: Kern County Env Health Services Department
Violation Program: CalARP
Violation Source: CERS

Site ID: 15147
Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 12-26-2014
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

CALIFORNIA CITY WASTEWATER TREATMENT PLANT (Continued) **S118231924**

Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 02/25/2015. Site map is inadequate for intended use. Enlarge Plot Plan for ease of use in Emergency Response. Add a map of the Chemical Storage Building to diagram the interior.
Violation Division:	Kern County Env Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	15147
Site Name:	CALIF CITY WASTEWATER TREATMENT PLA
Violation Date:	01-16-2014
Citation:	19 CCR 4.5 2760.3(a)(2) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.3(a)(2)
Violation Description:	Failure to develop and implement written operating procedures that address at least the following elements: 1. Consequences of deviation; and, 2. Steps required to correct or avoid deviation.
Violation Notes:	Returned to compliance on 02/25/2015. Operating procedures must cite the consequence of deviation from established SOPs.
Violation Division:	Kern County Env Health Services Department
Violation Program:	CalARP
Violation Source:	CERS
Site ID:	15147
Site Name:	CALIF CITY WASTEWATER TREATMENT PLA
Violation Date:	10-12-2017
Citation:	19 CCR 4.5 2760.1(a)(d)(1) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.1(a)(d)(1)
Violation Description:	Failure to compile written process safety information pertaining to the equipment in the process that includes the following: 1. Materials of construction; 2. Piping and instrument diagrams (P&IDs); 3. Electrical classification; 4. Relief system design and design basis: ? Ventilation system design; 5. Design codes and standards employed; 6. Material and energy balances for processes built after June 21, 1999; 7. Safety systems (e.g., interlocks, detection, or suppression systems).
Violation Notes:	Returned to compliance on 03/26/2019. At the time of the inspection the following violations were observed under Recognized and Generally Accepted Good Engineering Practices (RAGAGEP). 1. Eye was station on the south end of the chlorine storage building was missing the shower portion of the device. All safety equipment must be unmodified and fully functional. 2. Eye was station on the East end of the chlorine storage building was completely disconnected form the water source. All safety equipment must be unmodified and fully functional. 3. Labels outside the chlorine storage building need to be legible and clear. 4. All piping process piping must be properly labeled with its contents and the direction of flow. 5. The door going into the chlorine storage room opens in the wrong direction. The door needs to open outward from the process and have panic hardware.

CALIFORNIA CITY WASTEWATER TREATMENT PLANT (Continued) **S118231924**

Chapter 4.5, Section(s) 2760.4(c)
Violation Description: Failure to prepare a training record which contains: 1. Identity of the Employee; 2. Date of training; 3. Means used to verify that the employee understand the training.
Violation Notes: Returned to compliance on 07/09/2015. Training of employees is not sufficiently documented. Documentation does not identify the job task requirements and means used to verify understanding of training.
Violation Division: Kern County Env Health Services Department
Violation Program: CalARP
Violation Source: CERS

Site ID: 15147
Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 12-26-2014
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 02/25/2015. Training program in CERS is insufficient. Use the template located in Kern County Environmental Health web page and upload in CERS.
Violation Division: Kern County Env Health Services Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 15147
Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 10-12-2017
Citation: 19 CCR 4.5 2760.12(c) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.12(c)
Violation Description: Failure to periodically evaluate the performance of the contract owner or operator in fulfilling the following: 1. Each contract employee is trained in the work practices necessary to safely perform his or her job. 2. Each contract employee is instructed in the known potential fire, explosion, or toxic release hazards related to his or her job and the process, and the applicable provisions of the emergency action plan. 3. Document that each contract employee has received and understood the training required by this section. 4. Prepare a record which contains Training record contains the identity of the contract employee, date of training, and the means used to verify that the employee understood the training. 5. Each contract employee follows the safety rules of the stationary source including the safe work practices required by Section 2760.3(d) (operating procedures). 6. Advise the owner or operator of any unique hazards presented by the contract owner or operatorG s work, or of any hazards found by the contract owner or operatorG s work.
Violation Notes: Returned to compliance on 03/26/2019. Perform a contractor evaluation on the chlorine supply company. At the time of the inspection a contractor qualification review had not been conducted for the chlorine supplier.
Violation Division: Kern County Env Health Services Department
Violation Program: CalARP
Violation Source: CERS

CALIFORNIA CITY WASTEWATER TREATMENT PLANT (Continued) **S118231924**

Citation: 19 CCR 4.5 2760.2(e) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.2(e)
Violation Description: Failure to address the following in the Process Hazard Analysis: 1. Establish a system to promptly address the team's findings and recommendations; 2. Assure that the recommendations are resolved in a timely manner and that the resolution is documented; 3. Document what actions are to be taken; 4. Complete actions as soon as possible; 5. Develop a written schedule of when these actions are to be completed; 6. Actions are communicated to operating, maintenance and other employees whose work assignments are in the process and who may be affected by the recommendations or actions.
Violation Notes: Returned to compliance on 07/09/2015. Recommendations identified in the PHA have not been addressed. Document a response to the recommendations.

Site Name: CALIF CITY WASTEWATER TREATMENT PLA
Violation Date: 03-30-2021
Citation: 19 CCR 4.5 2765.2(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2765.2(a)
Violation Description: Failure to develop, implement, and maintain at the stationary source an emergency response program that includes the following elements: 1. Procedures for informing and interfacing with the public and local emergency response agencies about accidental releases, emergency planning, and emergency response. 2. Documentation of proper first-aid and emergency medical treatment necessary to treat accidental human exposures. 3. Procedures and measures for emergency response after an accidental release of a regulated substance. 4. Procedures for the use of emergency response equipment and for its inspection, testing, and maintenance are developed by the stationary source. 5. Training for all employees in relevant procedures and relevant aspects of the Incident Command System. 6. Procedures to review and update the emergency response plan to reflect changes at the stationary source are developed and employees are informed of these changes.
Violation Notes: 1. Emergency response action guide #1 section VI and action guide #2 section XV does not provide information KCEH (CUPA) or Cal OES. The CUPA and Cal OES must be notified for all chlorine releases or chemical spills. 2. Agency notification information for the CUPA on page 22 of the emergency response plan is incorrect. The correct information is listed below. KCEH (CUPA) 24 Hr. Primary 661-549-9927 24 Hr. Secondary 661-549-9885

Eval Notes: The facility currently has two repeat violations from the previous year. Both violations have been upgraded to a Class 1 violation. I was informed by Greg Fielding that the facility is looking at possibly getting rid of the chlorine gas and using a less hazardous water treatment chemical. In order to prevent the department from pursuing enforcement action the facility needs to either address the violations or establish a time frame for the chlorine removal. Please contact me at (661) 862-8730 if you have any questions or comments.

CITY OF CALIFORNIA CITY WWTP (Continued) **1011819382**

Is facility covered by OSHA PSM: T
Is facility covered by EPCRA 302: F
Is fac. covered by CAA Title V 112(2): F
Clean air op. permit/State ID: Not reported
Last safety insp. dat: 2014-01-16 00:00:00
Inspected by: State environmental agency
Is it OSHA approved with star/merit ranking: False
Will RMP involve predictive filing: False
Submission type: Resubmission
RMP description: Not reported
Facility has no accident hist. recs: False
Foreign owner's address: Not reported
Foreign owner's zip: Not reported
Foreign owner's country: Not reported
Claim # of employees as CBI: False
Date RMP accepted by EPA: 2019-02-01 00:00:00
Date of error Report: Not reported
Date RMP received: 2019-02-01 00:00:00
Does RMP contain graphics files: False
Does RMP contain attachments: False
Was certification letter received: True
RMP submission method: RMP*eSubmit
Does RMP contain CBI substantiation: False
Does RMP contain electronic waiver: False
Date RMP postmarked: 2019-02-01 00:00:00
Is RMP complete: True
Date of de-registration: Not reported
Date de-registration is effective: Not reported
Aniversary date: 2024-02-01 00:00:00
Does RMP contain CBI data: False
Does RMP contain unsanitized CBI version: False
RMP version #: 1.0

Case Worker:	KO
RB Case Number:	6B1500443T
Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as overseen by the Lahontan Regional Water Quality Control Board. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab.

WDS:

Name:	BORON REST FACILITY
Address:	HWY 58 W OF BORON
City:	BORON
Facility ID:	South Lahontan 150801002
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	0
Facility Telephone:	7608723021
Facility Contact:	DAN HOLLAND
Agency Name:	CALTRANS DIST 9
Agency Address:	PO BOX 847
Agency City,St,Zip:	BISHOP 93514
Agency Contact:	DAN HOLLAND
Agency Telephone:	7608723021
Agency Type:	State
SIC Code:	4952
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	DOMEST
Waste Type2:	Not reported
Waste2:	Domestic Sewage
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	A pipeline valve was left open at the open pit mine due to unknown reasons. The incident resulted in a effluent release to a designated containment area within BAT #3 (name of area on property). The release is on-going. No exposures or injuries were reported. A sampling of the release has been taken and results are pending. A contractor is on-site and will be handling the cleanup. No public grounds were impacted by this release.

Quarterly Update: NASA Jet Propulsion Lab (JPL) was a research facility located at Edwards Air Force Base. A hazardous waste facility permit application for one OBOD unit was submitted October 26, 1990. No permit was issued. A closure verification was issued on November 26, 1997. The entire facility has closed. Corrective action for JPL is linked to Edwards Air Force Base by the Federal Facility Agreement (FFA) and RCRA Facility Assessment (RFA). The FFA applies jointly to Edwards Air Force Base and its tenant properties, including JPL. For purposes of the RFA, Edwards Air Force Base was divided into ten Operable Units (OU), which define separate land areas. JPL was designated in the RFA as OU 5.

Fiscal Year:	2013
Federal Facility ID:	CA9799F5374
RAB:	Not reported
NPL Status:	Not Listed
Description:	The site comprised 829.94 acres, off of U.S. Highway 395, approximately 10 miles northeast of Boron and 35 miles northwest of Barstow, San Bernardino County, California. The area was developed as the Boron Air Force Station, with a mission of providing long-range coverage for the Los Angeles Air Defense Sector as a radar station. Boron Air Force Station was declared excess to the requirement of DoD and reported to GSA for disposal on 30 April 1975. 640 acres were quit claimed to the State of California, Department of Fish and Game, on 6 July 1978. The license for 7 acres was terminated and 182.94 acres were transferred to the Department of Justice, Bureau of Prisons, on 30 January 1979.
History:	The site was an air station that provided long-range coverage. The Boron Air Force Station Z-59 was acquired by the Air Force in various transactions from 1950 - 1952. Part of the site is now being used as a federal prison camp under jurisdiction of the U.S. Department of Justice, and part is owned by the California State Department of Fish and Game. The radar tower, generator building, entry road from the highway, and associated support equipment were transferred to the

BORON AIR FORCE STATION Z-59 (Continued) **1024903487**

Federal Aviation Administration for their use, The 640-acre portion of land to the southeast was temporarily transferred, in 1963, to the U.S. Army Reserve for use as an outdoor training site (DERP Project No. J09CA066400). The land reverted back to the Air Force in 1967. The California State Department of Fish and Game later acquired the 640-acre tract for use as a wildlife refuge in 1978.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name:	Boron Shell
Violation Date:	03-27-2018
Citation:	HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description:	Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes:	Returned to compliance on 06/14/2018. Observed brine sensor (L14) in vent box to be lifted and flipped to avoid alarm and brine reservoir to be detached and cut. As per alarm log in the on-site UST book, L14 went into alarm 2-9-17, 3-30-17, 5-5-17, 6-3-17 and 2-28-18. The alarm was noted on the 3-23-18 DO report. Spoke with the UST contractor (both Craig and Ross McClaren) and they had stated that they came out to fix last week (ross will get me the exact date) and found that a permit will be needed for repair. They will send a technician out tomorrow to re-attach and refill the brine reservoir in the vent box and then he will apply for a modification permit to properly repair the leak in the brine system. Once system has been repaired please retest and then send retest results to trulovej@kerncounty.com

Violation Date:	02-20-2019
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/22/2019. Designated operator failed to open sumps that had an alarm during the monthly DO inspection. Ensure that the Designated Operator is able to open all sumps as needed during the monthly inspection

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

SIC Code:	4952
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	DOMEST
Waste Type2:	Not reported
Waste2:	Domestic Sewage
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

MUROC JT UNIF SCHL DIST TRANSPORT (Continued) **1004677076**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
