SR-110 Bridge Replacement &
Railing Upgrade Project

**Notice of Availability of Final Initial Study/Environmental Assessment (Final IS/EA) with
Negative Declaration/Finding of No Significant Impact**

The California Department of Transportation (Caltrans) has completed the Final Initial Study/Environmental Assessment (Final IS/EA). The proposed project would improve operations and safety and upgrade assets to current standards on the Arroyo Seco Parkway (SR 110) in the cities of Los Angeles and South Pasadena, California. The Project consists of two alternatives, one "No Build" Alternative and one "Build Alternative" that will replace N110-N5 Connector Sidehill Viaduct (Bridge No. 53-2225G) and upgrade the bridge railing of Avenue 43 Ramp Bridge (Bridge #53-0985S) and the Arroyo Seco Channel Bridge (Bridge #53-0276).

The purpose of this notice of availability is to inform public agencies, private entities, and interested individuals on the Final IS/EA. Alternative 2 has been identified as the Preferred Alternative. This final determination is based on the engineering and environmental technical analysis, the project's impact on the environment, and the comments and concerns expressed during the public review period. The final environmental document was prepared to address all public comments and incorporate any refinements made to the project design, environmental setting and impacts that have been identified since the Draft environmental document was completed.

The Final IS/EA can be accessed through the following link: <https://dot.ca.gov/caltrans-near-me/district-7/district-7-programs/d7-environmental-docs>

Further, electronic versions of the Final IS/EA on digital media are available for review at the following locations:

- Arroyo Seco Library (6145 N Figueroa Street, Los Angeles, CA 90042)
- Los Angeles City Library Chinatown Neighborhood Branch (639 N. Hill St., Los Angeles, CA 90012)
- South Pasadena Public Library (1100 Oxley St., South Pasadena, CA 91030)
