Project Description

A Draft EIR has been prepared by San Francisco Planning in connection with this project as required by the California Environmental Quality Act (CEQA) to study the project's potential physical environmental effects.

The St. Ignatius College Preparatory School campus, located at 2001 37th Avenue in the Outer Sunset neighborhood, occupies approximately 11.4 acres bounded by 37th Avenue, 39th Avenue, Rivera Street, and the West Sunset Soccer Fields. The southern portion of the campus contains the 3.75-acre J.B. Murphy Field, its bleachers which could accommodate up to approximately 2,000 spectators, and the adjacent 0.64-acre upper practice field. Surrounding uses include single-family residences to the south and west, public open space to the north, and Sunset Boulevard to the east.

St. Ignatius proposes to operate lighting at J.B. Murphy Field for up to 150 evenings annually during the school year (approximately August 15–May 31) and to expand evening use of existing lighting at the upper practice field to align with the proposed J.B. Murphy Field lighting operations. The J.B. Murphy Field lighting system consists of four 90-foot-tall light standards constructed in 2021, each equipped with 12 light emitting diode (LED) fixtures, which replaced the portable diesel generator-powered lights previously used on up to 50 evenings annually to extend practices at J.B. Murphy Field. The project also includes continued use of the updated amplified sound/public address system which consists of a bi-directional speaker mounted on each light standard and formalizes operation of an existing Verizon Wireless telecommunications services facility.

Under the proposed project, field lights would operate from dusk until 9:30 p.m. on up to 135 evenings annually, with egress lights turned off by 10 p.m., and from dusk until 10 p.m. on up to 15 evenings annually, with egress lights turned off by 10:45 p.m. Under the proposed field use and lighting program, athletic practices and games could be scheduled later into the evening. No new construction is proposed beyond existing facilities, and the project would not change campus circulation, parking, or student enrollment.

Draft EIR: The Draft EIR finds that implementation of the proposed project would not lead to significant and unavoidable project-level and cumulative impacts related to any environmental topics. The Draft EIR provides a detailed project description and an analysis of the physical environmental effects of the project. Because significant impacts were not identified, there are no mitigation measures; however, alternatives that would avoid or lessen the severity of project impacts were identified and evaluated. The Draft EIR is available for public review and comment on the San Francisco Planning Department's website at sfplanning.org/sfceqadocs and at the San Francisco Permit Center, 49 South Van Ness Avenue, 2nd Floor, San Francisco, CA 94103. Paper copies and electronic copies (on a flash drive) of the draft EIR are available upon request to the project planner. Referenced materials are available through the following Planning Department's web pages: sfplanning.org/sfceqadocs and sfplanning.org/resource/permits-my-neighborhood.

Purpose of Notice

You are not required to take any action. If you wish to comment on the adequacy of the EIR, you may do so in so in writing or verbally at the public hearing. The purpose of the public hearing is for the San Francisco Planning Commission and San Francisco Planning staff to receive comments on the adequacy and accuracy of the Draft EIR. The commission will not respond to any of the comments or take action on the project at this hearing. Certification of the Final EIR will be considered at a later hearing. Environmental review focuses on the physical environmental effects of the project. Comments regarding your like or dislike of the project or if you think officials should approve or disapprove the project will not be addressed in the environmental review document. Instead, we encourage you to provide these comments to the planner assigned to review the project for planning code and

general plan compliance. The current planner for this project is Jeffrey Horn, jeffrey.horn@sfgov.org, 628.652.7366. Additional information may be found on San Francisco Planning's website or by contacting the EIR coordinator listed above.

General Information about Procedures

Members of the public are not required to provide personal identifying information when they communicate with San Francisco Planning Commission or staff. All written or oral communications, including submitted personal contact information, may be made available to the public for inspection and copying upon request and may appear on the department's website or in other public documents. Only commenters on the Draft EIR will be permitted to file an appeal of the certification of the Final EIR to the Board of Supervisors. At the close of the public review period, San Francisco Planning Department will prepare a Responses to Comments document to respond to all comments on the Draft EIR presented at the public hearing and received in writing during the public review period. This Responses to Comments document and all other associated documents will be made available at sfplanning.org/sfceqadocs.
