SIGNATURE AND ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1. EXECUTIVE SUMMARY

Ramboll Americas Engineering Solutions, Inc. (Ramboll) was retained by ARE-San Francisco No 94 Holding LLC, ARE-San Francisco No 95 Holding LLC, and ARE-San Francisco No 96 Holding LLC ("ARE" or the "client") to perform a Phase I Environmental Site Assessment (ESA) of the site located at 1122-1198 El Camino Real and 300 Tanforan Park in San Bruno, California (herein referred to as the "site," or the "facility", see Figures 1 and 2). Ramboll's assessment was conducted in connection with the redevelopment process.

The objective of the Phase I ESA, which was conducted in conformance with the scope and limitations of ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E1527-21 (the "ASTM Standard"), was to identify Recognized Environmental Conditions (RECs), as defined in the ASTM Standard (see Section 8).

The scope of work for the Phase I ESA was expanded to include a screening-level evaluation of the following additional considerations that are not included within the ASTM Standard:[1] asbestos-containing materials (ACMs), lead-based paint (LBP), water intrusion/mold, and radon.

1.1 Site Summary

The site is comprised of six parcels totaling approximately 43.8 acres developed with a regional shopping mall and an adjoining parcel. The mall structures comprise approximately one million square feet and include the central shops and a food court plus BJs Restaurant, Target, Cinemark Theaters, and Barnes & Noble in the center portion of the site; a JC Penney department store on the south portion of the site; and a Hyundai Dealership sales facility and automotive service center on the north portion of the site. In addition, there are parking structures on the southeast, east and north portions of the mall. The structures are surrounded by paved parking lots and accessways with small, interspersed landscaped areas. The adjoining site parcel is an approximately 1.4-acre paved, vacant and fenced lot located across the street north of the mall. Site access to the shopping mall is provided from several driveways off the surrounding streets including El Camino Real along the western perimeter, Sneath Lane along the northern perimeter, and Huntington Avenue along the eastern perimeter. Access to the adjoining site parcel is from El Camino Real along its western perimeter (see Figure 2).

The site was developed as a portion of the larger Tanforan Racetrack for horse racing in 1899 that operated intermittently until 1964. The racetrack was also used for auto racing and for United States military purposes including training (twice from 1914 to 1918 and from 1941 to 1950) and as an internment camp in 1942. Structures associated with the racetrack were destroyed in a 1964 fire, the site was zoned for its current use in 1966, and construction of the Tanforan Mall was completed from 1969 to 1972 including two Tire, Batteries, and Accessories (TBA) buildings with filling stations operated by JC Penney/Firestone and Sears. The mall was renovated from 2004 to 2006 and included demolition of the JC Penney/Firestone TBA building and expansion of retail and parking areas. The last expansion was the addition of a parking garage with cinemas in 2007-2008. The Sears TBA building remains, although the filling station ceased operation in the 1980s, and is currently occupied by Hyundai automotive services. The site has been under the current ownership (ARE-San Francisco No 94 Holding LLC, ARE-San Francisco No 95 Holding LLC, and ARE-San Francisco No 96 Holding LLC "ARE") since 2021-2022.

[1] The ASTM Standard refers to these matters as "non-scope considerations."

1.2 Phase I ESA Conclusions

Ramboll performed a Phase I ESA of the site in conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 7.2 of this report. The assessment has revealed a REC in connection with the site (see Section 1.2.1). Several additional findings that are not considered RECs or Controlled RECs (CRECs) were identified by this assessment as summarized in Section 7.1.

1.2.1 Recognized Environmental Conditions

This assessment has identified the following REC in connection with the site:

- **On-Site Groundwater and Soil Contamination Related to Historical Operations at Site.** Sears formerly operated an Automotive Center (1178 El Camino Real) on the northeast portion of the site (currently operated by Hyundai Automotive) that included seven underground storage tanks (USTs) for the storage of gasoline (two 12,000-gallon and two 6,000-gallon), motor oil (two 530-gallon), and used oil (500-gallon). Following removal of the USTs between 1985 and 1987, investigations commenced to evaluate and delineate the extent of petroleum hydrocarbons in soil and groundwater beneath the site. Under the oversight of the San Mateo County Department of Environmental Health (SMCDEH), investigations continued into the 2000s and have included soil, groundwater, and soil vapor sampling, and the installation and periodic sampling of groundwater monitoring wells. In a letter dated March 15, 2013, SCMDEH stated that active remediation was not warranted for the former gasoline and oil USTs and the agency has not requested additional investigation of this area of the site since approximately that time.

  In 2001, a 100-gallon UST (unknown contents) was discovered in an excavation at a depth of approximately 16 feet below ground surface (bgs) during construction of the San Bruno Police Station adjoining the southeast side of the site (owned by BART [Bay Area Rapid Transit]) in 2001. This area is referred to as Anomaly E in correspondence and reports and appears to be a source area for subsurface petroleum and benzene impacts (see Figures 3 and 4). SMCDEH named BART as an additional responsible party in 2013, and BART has performed investigation and remediation of the area since that time. Based on a September 22, 2021 letter, the SMCDEH requested an additional post-remedial groundwater monitoring event (inclusive of all wells on the site and in the vicinity of Anomaly E), and indicated that if results demonstrated a sustained reduction in groundwater contaminants, further remedial effort may not be necessary, and the site may qualify for closure under the State Water Resource Control Board (SWRCB) Low-Threat Underground Storage Tank Case Closure Policy (LTCP). In response, a final groundwater sampling event was completed in December 2021 with groundwater results documented in a 2022 Report. Results of the event indicated that concentrations of benzene and ethylbenzene were detected above the San Francisco Bay Regional Water Quality Control Board (RWQCB) environmental screening levels (ESLs) for commercial/industrial land use and total petroleum hydrocarbons as gasoline (TPHg) exceeded the United States Environmental Protection Agency (USEPA) maximum contaminant level (MCL) for drinking water. In an April 2023 letter, the SMCDEH indicated that the site met LTCP conditions and concluded all appropriate response actions appear complete and further investigation, remedial/removal actions, or monitoring of the release does not appear warranted. However, the case closure summary stated the following: "An unknown amount of hydrocarbon-affected soil and groundwater remain in the subsurface at the site. The City of San Bruno Building Department has been notified that should excavation or development of the property be proposed that may encountered impacted soil or groundwater, SMCDEH must be notified." In a July 2023 letter, the SMCDEH stated the RWQCB had approved SMCDEH's recommended case closure and case closure will be granted when all of the wells are destroyed and all associated remediation

equipment, if any, are removed. A well destruction workplan was requested. As of the date of this report, a workplan or other documentation evidencing well destruction had not been provided to the SMCDEH. The current status for the site is listed as "Eligible for Case Closure" pending closure of groundwater monitoring wells.

The open case status and presence of groundwater contaminants above commercial/industrial ESLs represents a REC (this issue would be a CREC when case closure is issued). It is not expected that site redevelopment will be inhibited in a significant manner by residual subsurface impacts. Irrespective of case status with the oversight agency, residual impacts present at this site are likely to be managed as part of redevelopment and construction, continued coordination with the agency, and the implementation of a soil management plan.

1.3 Additional Considerations

Ramboll conducted a screening-level review of certain additional considerations that are not considered part of the ASTM Standard, as discussed in Section 5.3. Ramboll's key findings from its review of additional considerations includes the following:

- **Asbestos-Containing Materials (ACMs).** The majority of the buildings were constructed prior and during 1972, except for the parking garage/Cinemark Theater building, which is prior to the time that asbestos was generally phased out of use in many building material applications during the mid-1980s. A limited screening survey was conducted at the site in 2021 that identified a total of 13 predominant suspect ACMs throughout the mall structures of which seven were sampled. None of the sampled materials were found to contain asbestos. Eight additional suspect ACMs were identified that were not sampled. The report concluded the following materials were assumed to contain asbestos: drywall and joint compound, roofing systems, and carpet/flooring adhesives generally throughout the structures; ceramic floor tile systems in the central shops and JC Penney; floor tile system in Target; and ceiling tile systems in Target and JC Penney. A 2022 Asbestos O&M Program was prepared to assist ARE with managing ACMs.
- **Lead-Based Paint.** Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the early 1970s. In 1978, the Consumer Products Safety Commission banned paint and other surfacing coating materials that are lead-containing paint. Based on the construction date of the buildings in 1969 and 1972, it is likely that LBP was used on facility structures. Facility personnel were not aware of the presence of any LBP on structures at the facility, and Ramboll observed the paint to be in good condition.
- **Water Intrusion/Mold.** Ramboll did not perform a mold survey at the site. Facility personnel reported that there had not been any past water intrusion events with the exception of roof leaks at the Sears department store that were immediately repaired, same day. No other information was available.
- **Radon.** Based on information included in the environmental database report, the site is located in an area categorized as Zone 2, which has average indoor basement radon levels between 2 and 4 picoCuries per liter (pCi/L). The USEPA's continuous exposure limit, which is the limit at which further testing or remedial action is suggested, is 4.0 pCi/L. This USEPA continuous exposure limit applies to residential, not commercial, properties. According to the California Radon database, out of 45 sites surveyed in San Mateo County, three sites were over 4 pCi/L. A USEPA survey conducted in the same zip code as the site found that the average radon level of a first-floor room at two sites was 0.100 pCi/L.

2. INTRODUCTION

2.1 Scope of Work

Ramboll conducted a Phase I ESA of the site, relying on the sources of information noted below. The date on which the information was obtained/reviewed is also indicated in the table below.

Sources of Information Relied on for the Phase I ESA		
Resource	**Description**	**Date**
Site Reconnaissance		
Site visit	Ramboll representative: Jodi Vanneman (photographs from the site visit are provided in Appendix A)	January 17, 2025
Interviews		
Site Representatives (year first associated with the site)	Linda Larson, CBRE Inc., The Shops at Tanforan General Manager (2012)	January 17, 2025
Site Owner Representative	Same as above	Not applicable
Governmental Agencies	In lieu of interviewing regulatory authorities, Ramboll submitted written information requests and reviewed responsive information (if provided) in accordance with procedures established by the regulatory authorities (see below).	See below
Records Review		
Environmental Database Search	Environmental Data Resources, Inc (EDR) database report (Appendix B)	January 10, 2025
Governmental and Other Online Resources	USEPA EnviroFacts and Enforcement and Compliance History Online (ECHO) databases California Department of Toxic Substances Control (DTSC) EnviroStor and Hazardous Waste Tracking System (HWTS) databases California Water Resources Control Board (WRCB) GeoTracker website WRCB Storm Water Multiple Applications and Report Tracking System (SMARTS) California Environmental Protection Agency (CalEPA) Regulated Site Portal United States Department of Transportation, National Pipeline Mapping System (NPMS) online California Department of Conservation, Geologic Energy Management Division (CalGEM) Well Finder San Bruno City Building Department Online-Permits and eTrakit websites	January 2025

Sources of Information Relied on for the Phase I ESA		
Resource	**Description**	**Date**
Regulatory Agency Records	Ramboll reviewed site-related information available from the Bay Area Air Quality Management District (BAAQMD). Ramboll also requested information from the San Bruno City Fire Department and the SMCDEH; however, as of the date of this report, a response to Ramboll's requests had not yet been received. Additionally, building records for the site were viewed via EDR Lightbox.	January 13-21, 2025
Historical Sources	Aerial photographs, topographic maps, city directory listings, Sanborn maps (as available), obtained from EDR (Appendix C).	January 10-17, 2025
Physical Setting Sources	Current USGS 7.5-minute topographic map for the site and surrounding area. Geologic, hydrogeologic, and hydrologic information provided in the EDR report and prior site assessment reports noted below.	January 2025
Prior Environmental Reports and Site-Related Information	Prior environmental reports and other key documentation reviewed by Ramboll (Appendix D) include: • *Site Conceptual Model and Additional Screening Indoor Air Quality Monitoring Workplan, 1178 El Camino Real, San Bruno, California*, prepared by SCS Engineers, dated December 7, 2011 (the "2011 Site Conceptual Model and Air Quality Workplan"); • *2018 First Semi-Annual Groundwater Monitoring Report, Sears Automotive Service Center (No. 1478), 1178 El Camino Real, San Bruno, California*, prepared by AECOM, dated May 21, 2018 (the 2018 Groundwater Report"); • *Corrective Plan Implementation Report, Sears Automotive Service Center (No. 1478), Separate Source of Hydrocarbons in the Vicinity of the San Bruno Police Station, 1178 El Camino Real, San Bruno California*, prepared by AECOM, dated April 28, 2020 (the "2020 Corrective Plan Implementation Report"); • *Phase I Environmental Site Assessment, JC Penney Company Inc., 1122 El Camino Real*, San Bruno, California, prepared by Ramboll US Consulting, Inc., dated December 2020 (the "2020 Phase I ESA report"); • *Separate Source of Hydrocarbons in the Vicinity of the San Bruno Police Station, Sears Automotive Center #1478, 1178 El Camino Real, San Bruno, California*, prepared by SMCDEH, dated September 22, 2021 (the "2021 SMCDEH Letter"); • *Phase I Environmental Site Assessment*, 1122 El Camino Real, San Bruno, California, prepared by Ramboll US Consulting, Inc., dated July 2021 (the "July 2021 Phase I ESA report"); • *Phase I Environmental Site Assessment, 1150 and 1178 El Camino Real*, San Bruno, California, prepared by Ramboll US Consulting, Inc., dated October 2021 (the "October 2021 Phase I ESA report");	January 2025

Sources of Information Relied on for the Phase I ESA		
Resource	**Description**	**Date**
Prior Environmental Reports and Site-Related Information *(Continued)*	• *Limited Asbestos Screening-Level Survey, The Shops at Tanforan, 1150 El Camino Real, San Bruno, California*, prepared by Terracon Consultants, Inc., dated November 11, 2021 (the "2021 Asbestos Screening Report"); • *Asbestos Operations and Maintenance Program, 300 Tanforan Way and 1122, 1150, and 1178 El Camino Real, San Bruno, California*, by Ramboll US Consulting, Inc., dated July 2022 (the "2022 Asbestos O&M Program"); • *2022 Groundwater Monitoring Report, Sears Automotive Service Center (No. 1478), 1178 El Camino Real, San Bruno, California*, prepared by AECOM, dated February 11, 2022 (the "2021 Groundwater Report"); • *San Mateo County Groundwater Protection Program (GPP) Case Closure Memorandum and Case Closure Summary Sears Automotive Center #1478 and Separate Source in Vicinity of San Bruno Police Station, 1178 El Camino Real, San Bruno, California,* prepared by GPP Staff, dated April 18, 2023 (the "2023 Case Closure Memorandum and Case Closure Summary"), and • *San Mateo County Groundwater Protection Program Separate Source in Vicinity of San Bruno Police Station, Sears Automotive Center #1478, 1178 El Camino Real, San Bruno, California,* prepared by GPP Staff, dated July 3, 2023, (the "SMCDEH 2023 Letter"). In addition, Ramboll requested and reviewed the environmental documents identified in Section 10.8 of the ASTM Standard. Reviewed documents included a tenant list, site plan, and future development plans.	
Environmental Lien (EL)/Activity and Use Limitations (AUL)	EL/AUL search report obtained from EDR (Appendix E)	January 14, 2025
User-Provided Information		
User-provided Information	Information from the user of this assessment, consistent with the User Questionnaire in the ASTM Standard and other information identified in Section 10.8 and Section 10.9 of the ASTM Standard, was obtained during initial project scoping discussions.	N/A
Notes: Ramboll interviewed representatives of the site (i.e., "facility personnel") identified by the client as having good knowledge of the uses, physical characteristics, and operations of the site (i.e., "key site manager" as defined by the ASTM Standard), including information identified in Section 10.8 and Section 10.9 of the ASTM Standard. Certain follow-up discussions and communication may have been completed following the date of the initial interview. Database searches were completed for those databases required by the ASTM Standard, as well as other readily available sources. Where specified, the radius searched for each database was selected in accordance with the ASTM Standard.		

This Phase I ESA was conducted in accordance with the methodology specified in the ASTM Standard, as agreed upon by Ramboll and its client in the proposal for this assignment.

The scope of work for this assignment was expanded to include an evaluation of certain additional considerations that are not included in the ASTM Standard, including a screening-level review of ACM[2] in site buildings, radon, water intrusion/mold, and LBP. The review of additional considerations was conducted based on available information and documentation; no samples of any media were collected as part of this assignment unless explicitly stated otherwise. Any other areas referred to as non-scope considerations by the ASTM Standard not listed above were outside the scope of this assessment.

2.2 Significant Assumptions

In conducting this review, Ramboll made no significant assumptions.

2.3 Reliance and General Limitations

This report has been prepared for the exclusive use of the ARE and its affiliated entities and may not be relied upon by any other person or entity without Ramboll's prior express written permission.

This report is considered current if the site visit, interviews, and regulatory database search were all performed within 180 days prior to the anticipated transaction. The conclusions presented in this report represent Ramboll's professional judgment based upon the information available and conditions existing as of the date of this report. In performing its assignment, Ramboll must rely upon publicly available information, information provided by the client, and information provided by third parties. Accordingly, the conclusions in this report are valid only to the extent that the information provided to Ramboll was accurate and complete. This review is not intended as legal advice, nor is it an exhaustive review of site conditions. Ramboll makes no representations or warranties, express or implied, about the conditions of the site.

Ramboll's scope of work for this assignment did not include collecting samples of any environmental media. As such, this review cannot rule out the existence of latent conditions including contamination not identified and defined by the data and information available for Ramboll's review; however, this report is intended, consistent with normal standards of practice and care, to assist the client in identifying the risks of such latent conditions.

Ramboll's limited review of ACMs in site structures did not include a formal asbestos survey or inspection. According to federal OSHA regulations (29 CFR § 1910.1001) and the Model Accreditation Plan (MAP; 40 CFR Part 763, Subpart E, Appendix C), the inspection, testing, evaluation, and/or sampling of suspect ACMs must be conducted by an accredited inspector; these activities were not performed as part of this environmental review. Comments in this report regarding the condition of building materials at the site, including known or suspect ACMs, represent only Ramboll's observations at the time of the site visit and are not intended to be consistent with definitions regarding ACMs condition in the Asbestos Hazard Emergency Response Act (AHERA) or in other federal or state asbestos regulations or industry standards.

On May 8, 2024, the USEPA formally published in the Federal Register (89 Fed. Reg. 39124) its final rule designating perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), together with

[2] Ramboll's review of ACM in building materials did not include a formal asbestos survey in conformance with established protocols (as outlined in 40 CFR §763), applicable state or local regulations, or industry standards, and any comments in this report regarding the condition of building materials represent only Ramboll's observations at the time of the site visit and are not intended to be consistent with definitions regarding ACM condition in the Asbestos Hazard Emergency Response Act (AHERA) or in other federal or state asbestos regulations or industry standards.

their salts and structural isomers, as CERCLA hazardous substances. The rule was effective July 8, 2024. Therefore, Ramboll's assessment included consideration that PFOA, PFOS, and their salts and structural isomers are CERCLA hazardous substances. Ramboll's assessment also included review of other per- and polyfluoroalkyl substances (PFAS), to the extent identified, even if not a CERCLA hazardous substance (and thus outside the scope of the ASTM Standard). Ramboll's review is intended to provide guidance about possible current and/or historical uses of PFAS at the site based on the information available at the time of our assessment, recognizing that knowledge regarding the current and historical uses of these substances continues to evolve.[3]

[3] Ramboll's review of PFAS risks excludes certain PFAS-containing refrigerants that may be contained in on-site equipment and are gases at standard temperature and pressure (e.g., R-410A, R-134a), on the assumption that they are not expected to pose a significant site contamination risk.

3. SITE DESCRIPTION

3.1 Site Setting

The site is generally located northeast of the intersection of El Camino Real and the Interstate 380 freeway, and is approximately 10 miles south of San Francisco, California (Figure 1).

The site is comprised of six parcels totaling approximately 43.8 acres developed with a regional shopping mall and an adjoining parcel (see Figure 2). The mall structures comprise approximately one million square feet and include the central shops and a food court plus BJs Restaurant, Target, Cinemark Theaters, and Barnes & Noble in the center portion of the site; a JC Penney department store on the south portion of the site; and a Hyundai Dealership sales facility and automotive service center on the north portion of the site. In addition, there are parking structures on the southeast, east and north portions of the mall. The structures are surrounded by paved parking lots and accessways with small, interspersed landscaped areas. The adjoining site parcel is an approximately 1.4-acre paved, vacant and fenced lot located across the street north of the mall.

Site access to the shopping mall is provided from several driveways off the surrounding streets including El Camino Real along the western perimeter, Sneath Lane along the northern perimeter, and Huntington Avenue along the eastern perimeter. Access to the adjoining site parcel is from Sneath Lane along its southern perimeter. The table below provides an overview of physical setting information for the site.

Physical Setting Information	
Conditions	**Description**
Site Information	
Property Owner	ARE-San Francisco No 94 Holding LLC, ARE-San Francisco No 95 Holding LLC, and ARE-San Francisco No 96 Holding LLC
Size	Approximately 43.8 acres
Assessor Parcel Numbers (APNs)	APNs: 014-316-300, 014-316-310, 014-316-330, 014-316-360, 014-316-080, and 014-311-060
Topography, Geology, and Hydrology	
Topography	Site: Site elevation ranges from approximately 58 feet above mean sea level (AMSL) on the southwest perimeter of the site down to approximately 37 feet on the northeast perimeter of the site. The site exhibits an overall downslope to the northeast. Region: Regionally, the ground slopes downward to the northeast.
Nearest Surface Water Body to the Site	On-Site: There are no on-site surface water bodies. Off-Site: The San Bruno Canal is located approximately 0.5 mile northeast of the site. The canal flows east to discharge into the San Francisco Bay located approximately 1.2 miles east-northeast of the site.
Direction of Shallow Groundwater Flow	According to the 2022 Groundwater Monitoring Report and 2023 Case Closure Memorandum that includes numerous monitoring wells placed on and adjacent to the northeast portion of the site, the predominant direction of groundwater flow is to the northeast.

Physical Setting Information	
Conditions	**Description**
Depth to Groundwater	According to the 2022 Groundwater Monitoring Report and 2023 Case Closure Memorandum, groundwater was encountered at depth of approximately 3 to 21 feet bgs.
Geologic Conditions	According to the 2023 Case Closure Memorandum, the northeast portion of the site is underlain by fine and coarse-grained sediments. Gravelly and sandy fill is locally present just below the surface to approximately 3 to 5 feet bgs. The fill is underlain by clay/silt to a depth of approximately 12 to 15 feet bgs. The clay/silt unit is underlain by a laterally continuous silty sand to sand, with local gravel lenses, to a depth of least 50 feet bgs. The EDR report characterized the overall site soils as Urban land that are manmade or highly disturbed, compacted soil with a variable composition.
Flood Plain	Facility personnel reported no known occurrences of flooding at the site. The site is located in an area of minimal flood hazard, which are the areas outside the 500-year flood zone.
Wetlands	According to the wetlands information provided by the National Wetland Inventory (NWI) (as obtained from the EDR database report), there are no on-site federally designated wetlands.
Nearby Groundwater Supply Wells	According to well database information provided in the database search report, there is one federally-registered public water well located over one-half mile southeast (cross-gradient) and more than 400 state-registered wells within a one-mile radius of the site, the majority of which are observation and monitoring wells. Four of the state-registered wells are listed as public or water supply wells and are all located at least one-eighth mile southeast and southwest of the site.
Notes: Information in this table was obtained through visual observations during the site visit; a review of USGS topographic maps, Google Earth imagery, information contained in the database search report, prior environmental assessment reports, and local agency sources (noted in Section 2), and information provided by site representatives.	

3.2 Current Use of the Site

The site is currently operated as The Shops at Tanforan regional shopping center. The anchor tenants include JC Penney, Target, Planet Fitness, Barnes & Noble, Century Theaters, a Hyundai Dealership and automotive services ("Hyundai"), Petco, and BJ's Restaurant & Brewery ("BJ's"). There are approximately 30 smaller tenants that include several stores and salons, food service and smaller restaurant tenants, dance studios, a Bounce House, a military recruitment office, and a dental office (see Tenant List in Appendix D). Numerous units in the central building are vacant. Operations on the site do not involve manufacturing or fabrication activities.

Site representatives stated janitorial services and maintenance services are primarily conducted by third-party vendors and related supplies are not stored on the site. Further, tenant improvements are conducted by their third-party contractors/vendors and not by on-site management and several of the anchor tenants maintain their own building systems. Facility personnel knew of no current use of chlorinated solvents or per- and PFAS at the site, and the use of such chemicals would not be expected based on the nature of current site operations. Foam-based fire suppression systems are not present at the site. Other operations conducted at the site include the following:

- Operation of cooling towers, chillers, boilers, air compressors, packaged rooftop units and related systems for comfort air conditioning.
- Operation of fuel and hydraulic equipment including two box balers (JC Penney and Target buildings); approximately 15 hydraulic elevators and seven trash compactors throughout the site; one natural gas-fired emergency generator (Target); two diesel-powered emergency generators (JC Penney and Central Shops buildings); and one diesel-powered emergency fire pump with associated 175-gallon diesel aboveground storage tank (AST; mechanical building adjoining the north side of the cinema parking garage).
- Operation and maintenance of inground and aboveground grease interceptors associated with the food service kitchens in the central food court, cinema, BJ's, and in the Target building including the grocery department and their interior Starbucks coffee shop.
- Limited building and facility maintenance (not otherwise completed by third-party vendors) including the operation of power tools and small gasoline and diesel-powered equipment (e.g., floor washers, leaf blowers, sweepers), an electric Cushman cart, and an electric scissor lift.
- The Hyundai Dealership operates on the northeast portion of the site using a former department store building for automotive sales and administrative activities and using the existing automotive building (formerly occupied by Sears Automotive) for automotive services. The automotive building is equipped with 10 double-bay doors and several single bays. Hyundai operates an automotive repair and tire shop, which involves undercar repair and maintenance, including engine repair, fluid changes, tire replacements, parts replacement, battery replacement, and motor vehicle air conditioner (MVAC) servicing. Chemicals used in automotive servicing operations include motor oils, antifreeze, windshield washer fluid, automatic transmission fluid, non-chlorinated aerosol brake cleaners, and other automotive fluids. The Company operates approximately 15 interior hydraulic car lifts, all of which are aboveground that are inspected by a third-party annually and by staff daily for any signs of leakage or equipment failure. Several concrete patches were located throughout the building evidencing former underground hydraulic lift reservoirs associated with the previous building occupant, Sears Automotive. In addition, a parts washer unit using an enzyme-based solvent, is infrequently used to clean small automotive parts and equipment. At least two floor drains are located in the building including one identified near the center of the service bays, and one identified in a car wash bay. Hyundai representatives were unclear where these floor drains discharged; however, two metal grates in the exterior paved area south of the building suggest the drains may discharge into an oil/water separator (OWS). A basement is present in the building in which one floor drain, a sewage lift station sump, and a groundwater sump, were identified. An operating air compressor is located in the basement; otherwise, the basement is used solely for storage. Condensate from the air compressor discharges to the concrete floor but only minor staining beneath the air compressor is present.

At the time of the site visit, Ramboll did not note strong odors in interior or exterior areas at the site associated with site operations. No evidence of hazardous substance releases related to air emissions from site operations other than combustion products from the periodic operation of natural gas and diesel emergency generators was observed. Limited and relatively minor staining on the concrete floor was observed in areas underlying/adjacent to the air compressors in the mechanical air handling equipment room of the JC Penney building and basement of the Hyundai automotive services building that were limited to the immediate area inside the buildings. Various small areas of pooled oil and limited staining were also identified in the Hyundai automotive services building that are confined to the building. As these releases appeared to be confined to paved areas inside the buildings, this staining is not considered to represent a significant concern to the site.

4. RECORDS REVIEW

4.1 Historical Site Use and Local Agency Information

The site was developed as a portion of the larger Tanforan Racetrack for horse racing in 1899 that operated intermittently to 1964. The racetrack was also used for auto racing and for United States military purposes including training (twice from 1914 to 1918 and from 1941 to 1950) and as an internment camp in 1942. Structures associated with the racetrack were destroyed in a 1964 fire, the site was zoned for its current use in 1966, and construction of the Tanforan Mall was completed from 1969 to 1972 including two TBA buildings with filling stations operated by JC Penney/Firestone and Sears. The mall was renovated from 2004 to 2006 and included demolition of the JC Penney/Firestone TBA building and expansion of retail and parking areas. The last expansion was the addition of a parking garage with cinemas in 2007-2008. The Sears TBA building remains, although the filling station ceased operation in the 1980s, and is currently occupied by Hyundai automotive services. The site has been under the current ownership (ARE-San Francisco No 94 Holding LLC, ARE-San Francisco No 95 Holding LLC, and ARE-San Francisco No 96 Holding LLC) since 2021-2022.

The table below provides a summary of key information obtained by Ramboll from a review of available historical resources and information obtained from local governmental agencies and regulatory bodies.

Summary of Historical Resources and Local Agency Information for the Site

Historical Resource	Key Observations Regarding Site History
Historical Resources	
Sanborn Maps (1925, 1949 and 1953)	1925: The site is occupied primarily by the Tanforan Race Course, labeled as provided water from the South San Francisco City System. Along the east-northeast portion of the site are stalls, a small office structure and a tavern. Horse stalls are present along the southeastern portion of the site. A club house and grandstand are on the western portion of the site. The rest of the site is occupied by the dirt horse racetrack and its inner field. 1949 and 1953: The horse track remains and several small lakes are shown within the inner field along with grandstands, jockey's quarters, administration building and paddocks on the western portion; portion of a warehouse extending onto the southeast portion; and a tavern and stables on the north-northeast portion. In addition, the water line serving the site is labeled as the Navy Water System.
Aerial Photographs (1943, 1946, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2006, 2009, 2012, 2016 and 2020) Satellite Imagery (1993 to 2024)	1943: The horse track remains with several barrack-style structures present on the inner field and along the northwest boundary of the site. Grandstand and horse stall structures are present on the west-southwest and southeast portions of the site, respectively. 1946: The outline of the horse track is apparent and horse stalls and grandstand structures are present on the northeast and west-southwest portions of the site, respectively. The barrack-style buildings are no longer present, and it appeared the racetrack was being restored. 1956 and 1963: The horse track is present with lakes on the inner field, and grandstands, a warehouse and horse stalls on the west-southwest, southeast and northeast portions of the site, respectively.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
Aerial Photographs (1943, 1946, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2006, 2009, 2012, 2016 and 2020) Satellite Imagery (1993 to 2024) *(Continued)*	1968: The racetrack features and structures are no longer present and the site is vacant. The current streets along the northwest and southeast (Sneath Lane and Huntington Avenue) are present separating the northern parcel from the rest of the site. 1974: The original central mall structure at the center, the current store and automotive services buildings (formerly Sears and Sears Automotive) on the northern portion, and the current JC Penney and associated automotive services buildings on the southern portion of the site are present and surrounded by parking except for a building expansion that appeared underway on the west side of the central shops structure. The northern parcel is developed as a portion of a larger, paved parking lot. 1982-1993: The western expansion of the central shop structure is complete and a stand-alone commercial building has been added to the western portion of the site. 1998: Similar except two small structures (or large storage containers) are present on the northern parcel. 2004: The central portion of the mall appears to be undergoing renovation with the western addition to the central building, the stand-alone building on the western portion, and the former JC Penney automotive services building on the southeast portion removed and construction equipment present. The northern parcel is a paved and vacant lot. 2005: Similar to 2004 except stockpiled soil is stored on the northern parcel and tire tracks suggest the soil is associated with development of the parking structure on the northeast portion of the mall that was underway. 2006: The western entrance to the mall has been reconfigured and building additions are apparent on the west and northeast sides of the central mall structure. In addition, development of the parking structure is complete. The northern parcel is an undeveloped, vacant lot. 2007: A parking structure had been added to the southern portion of the site. 2009-2024: The site is present in its current configuration and the northern parcel is a paved, vacant lot.
Topographic Maps (1896 to 2022)	1896 and 1899: No development is depicted on the site. 1915: No development is depicted except for a railroad track extending across the northern site parcel. 1939: A racetrack with a few buildings along the southwest, southeast and northeast portions is present. The railroad tracks are no longer located on the site. 1947 and 1956: The racetrack and structures are still present along with small ponds on the inner field and the site is labeled the Tanforan Racetrack. 1968: No development is depicted on the site. 1973 and 1980: A large structure occupies the center of the site with smaller buildings on the northeast and southeast portions. 1995 and 1996: The site is shaded to indicate dense urban development without showing specific structures. Inner roads, similar to the current mall accessways, are also shown. 2012-2022: There is no shading and only the inner roads are shown in the 2012 map, no roads are shown in the later maps. It is noted these later map versions typically only depict topographic features and roadways.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
City Directory Abstracts (1953, 1970, and 1976 to 2020 at approximate five-year intervals)	One occupant was listed prior to the mall development and includes Coral Reef Restaurant at 1180 El Camino Real in 1953. Past/present occupants of the Tanforan Shopping Center/The Shops at Tanforan include the following: • 201-401 Tanforan Shopping Center/Tanforan Park Shopping: Various shops, restaurants, dental center, banks, photo shops, travel agency, Emporium, J C Penney, and cinemas (1976-2017), One Hour Photo (1986), Tanforan Dry Cleaner (at #302A, only 1986), and Tanforan Shopping Center (2020). • 96-412 Tanforan Mall/Park: Various shops, restaurants, dental center, banks, photo shops and Tanforan Park Cinemas (1992-2017), Emporium (1992), and Tanforan Cleaners/Tanforan Cleaners & Shoe Repair (at 402 Tanforan, 1992 and 1995). • 1110 El Camino Real: Firestone (1986-1995). • 1122 El Camino Real: J C Penney (1986-2017), J F Ardly OD (1995), and San Bruno Police Association (2005). • 1140 El Camino Real: Bank (1981-1995), The Shops at Tanforan (2005), and various stores and restaurants (2010-2017). • 1150 El Camino Real: Vacant (1981), stores and restaurants (1986-2005), dental offices (1995, 2005), Tanforan Park Shopping Center (1995), Shops at Tanforan and various shops, dental office(s), and Target and restaurants (2010-2017). • 1178 El Camino Real: Various offices (1976-2005), Sears (1976-2017), USA Petroleum (1981), Sears Auto Center (2010), and Budget (2017).
San Bruno City Online Library	According to a 2024 Chronicle article, the Tanforan Mall area was part of the Mexican land grant Rancho Buri Buri. Governor Jose Castro gave the land to Jose Antonio Sanchez in 1837. His land was divided among his children, one of whom was Toribio Tanforan, whose land became the Tanforan Racetrack from 1899 to 1970. When horse racing became illegal in 1908, the track hosted alternative events, including auto racing. During World War I, the racetrack was used as an Army training camp for a volunteer regiment of the 144th Field Artillery of the U.S. Army. Horse racing was legalized again in 1923 and horse racing returned. For seven months in 1942, the Tanforan Racetrack was used as a temporary detention center for Japanese Americans during World War II and then the racetrack use continued until 1964, when the grandstands caught fire and the racetrack was demolished. In 1970, the Hapsmith Corporation developed the Tanforan Shopping Center.
Prior Phase I Reports	Both the 2020 and 2021 Phase I ESA reports stated portions of the site were developed with the Tanforan Racetrack in 1899 and was used as U.S. military training center from 1914 to 1918 and from 1941 to 1950, and as an internment camp in 1942. The track burned down in 1964 and the mall was developed in 1972. The JC Penney automotive shop was demolished in 2005.
Site Representative(s)	Site representatives stated the mall was previously the Tanforan Racetrack and was developed with the original mall in 1970 and renovated in the mid-2000s. Site representatives were not aware of any prior dry cleaner businesses having operated on the site.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
Database Search Report	The EDR Historical Cleaner city directory database listed Tanforan Cleaners & Shoe at 302 Tanforan Park A in a 1991 directory, and at 402 Tanforan Park in 1992 through 1998 directories as a drycleaning plant (except rugs; 302 and 402 Tanforan Park are historical addresses associated with the site).
Local Agency Information	
San Mateo County Assessor	The site APNs identified by the San Mateo County Assessor and readily available data, where provided, include the following: • 014-316-300: approximately 15.3 acres, Use Type -shopping centers; addressed as 1122 El Camino Real • 014-316-310: approximately 2.2 acres, Use Type – Shopping Centers, Improvements - 81,284 square feet of building space built in 2008; addressed as 1188 El Camino Real • 014-316-330: approximately 11.45 acres, Use Type – Shopping Center, Improvements – only year built of 1971 provided; addressed as 1178 El Camino Real • 014-316-360: approximately 11.98 acres, Use Type – Shopping Center; addressed as 1150 El Camino Real • 014-316-080: approximately 1.5 acres, Use Type – Shopping Center, Improvements – 194,172 square feet of building space built in 1972; addressed as 300 Tanforan Shopping Center • 014-311-060: approximately 1.4 acres, Use Type – parking lot; no situs address.
EL and AUL Search Report	The site APN ownership provided in the EL and AUL Search Report includes the following: • In September 2021, ARE-San Francisco No 94 Holding LLC acquired APN 014-316-300 from CTL PropCo I LLC • In November 2021, ARE-San Francisco No. 95 Holding LLC acquired APNs 014-316-310 and 014-316-330 from Seritage SRC Finance LLC • In January 2022, ARE-San Francisco No. 96 Holding LLC acquired APNs 014-311-060, 014-316-080 and 014-316-310, and only the improvements (not the land) of APN 014-316-310 from Shops at Tanforan Associates LLC There are no liens or AULs associated with the site dating back to the dates these vestings were recorded in 2021 and 2022.
Online-Permits and eTrakit websites	Records were reviewed for 300 Tanforan, and 1110, 1122, 1150, 1178, and 1188 El Camino Real. In addition, other addresses formerly or currently associated with the site including 302 and 402 Tanforan Park, and 1140 and 1198 El Camino Real were reviewed. • 300 Tanforan/Tanforan Park/Tanforan Shopping Center: Records are dated 1996 to 1998 and include permits for general improvements for Target. • 302 Tanforan Park: Records dated 1995 included improvements for The Designers Center.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
Online-Permits and eTrakit websites *(Continued)*	• 402 Tanforan Park: Records dated 1991 were identified to remodel Unit 402 for Tanforan Cleaners including a floor plan that did not depict the presence of an on-site dry cleaning unit; rather, sewing machines, shoe repair, clothing racks and a fitting room were shown. • 1110 El Camino Real: A 1990 permit was identified to remove an exterior 550-gallon waste oil UST located along the east side of the Firestone auto services building adjacent to a dumpster enclosure. No records were provided to evidence its removal. • 1122 El Camino Real: Records were dated from 1970 to 2022 including construction of J C Penney store and TBA building in 1970. Site plans dated 1984 and 2003 of the shopping center depicted a Firestone TBA building and a Sears TBA building on the southeast and northeast portions of the site, respectively. Other records dated up to 2022 refer primarily to general improvements associated with the JC Penney Store and construction of a parking garage in 2005. In addition, permits were issued various years to the San Bruno Police Association and others for a seasonal fireworks stand. • 1140 El Camino Real: Permits are dated 1975 to 2016 that refer to development of a bank building in 1975 and demolishing the bank building in 2003 and permits issued 2010 to 2021 for various improvements at stores and restaurants including Target, CVS and BJs Brewery. • 1150 El Camino Real: Permits were issued from 1950 to 1960 for a barn, horse stables, offices, restrooms, pro-shop, and an addition to a grandstand for the Tanforan Racetrack owned by Tanforan Co LTD. Permits were issued for shopping center buildings from 1970 to 2022. The shopping center was developed under the ownership of Hapsmith Company. Permits were notably issued from 2003 to 2006 for a major mall renovation including a permit for "underground tank removal" issued in 2005 (no specific tank information or location provided). • 1178 El Camino Real: The original permit for the Sears store and TBA building was issued in 1969. Other records dated up to 2023 refer primarily to improvements for the Sears store and TBA/auto services building and for Hyundai of San Bruno dated 2022. In addition, a permit was issued in 2022 for installation of an aboveground storage tank (owner/operator not listed but was likely for Hyundai). • 1188 El Camino Real: Permits are dated 2004 to 2023 and refer to cinemas, a parking structure and stores. • 1198 El Camino Real: Permits are dated 2005 to 2024 for various building improvements including a 2005 plan check to add Avis to the Sears Tire Center, a 2011 Hazardous Materials Fire Operations Permit (related business not provided), 2006 and 2015 sign permits for Avis/Budget, and a 2024 business compliance permit for Tanforan Smog Check.
EDR Building Permit Report	The EDR Building Permit Report listed dozens of permits that appeared to be generally similar to the more-recent permit history previously referenced above. Additional permits identified include a 2005 aboveground fuel AST for 1150 El Camino Real, and a 2001 AST permit for 1178 El Camino Real.
San Bruno City Zoning Records	Based on a review of the Rome/Floyd County Planning Department, GIS Maps Online website, the Spears property is zoned "L-I" (Light Industrial), as is the area to the south.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
BAAQMD	In response to an information request, the BAAQMD provided the following site records: • 1110 El Camino Real: permit for Firestone to operate a gasoline station with convenience store, the facility status stated "demolished 1/23/1985." The permit history listed JC Penney in 1983. • 1122 El Camino Real: permit for JC Penney to operate an emergency backup generator beginning in 2004 with an expiration date of December 1, 2025. • 1150 El Camino Real: Three permits are on record for this address as follows: 1) permit for Target to operate an emergency generator beginning in 2004 with an expiration date of May 1, 2025; 2) permit for The Shops at Tanforan to operate an emergency generator beginning in 2005 listed as a "merged facility" as of 2012 with no permit expiration data provided; and 3) permit issued to Burger King in 2010 (equipment type not provided). • 1178 El Camino Real: permit for Sears to operate an emergency generator in 2005 that expired in 2020. • 1188 El Camino Real: voided permit for The Shops at Tanforan to operate a new diesel fire pump issued in 2006 and expired in 2018.
CalEPA Regulated Site Portal	The following entries were identified for the site on the CalEPA Regulated Site Portal: • 1110 El Camino Real: permit for Firestone to operate a gasoline station with convenience store, the facility status stated "demolished 1/23/1985." The permit history listed JC Penney in 1983. • 1122 El Camino Real: JC Penney is listed as an air emissions, chemical storage and hazardous waste generator facility. JC Penney submitted a chemical and waste inventory on February 26, 2024 that listed diesel fuel stored up to 59 gallons, and four waste types (corrosives, flammable, aerosols and lab pack). • 1150 El Camino Real: Petco is listed as a hazardous waste generator facility. No chemical or waste inventory was listed. • 1150 El Camino Real: Panda Express is listed as a chemical storage facility for the storage of up to 2,599 cubic feet of carbon dioxide as reported on February 19, 2024. • 1150 El Camino Real: Chipotle Mexican Grill is listed as a chemical storage facility for the storage of up to 59 gallons of carbon dioxide as reported on January 30, 2024. • 1150 El Camino Real: Target is listed as an air emissions, chemical storage and hazardous waste generator facility. Target submitted a chemical and waste inventory on June 28, 2024 that listed hydraulic oil, floor finish, carbon dioxide, electrolyte and propane stored up to 119 gallons each, R-404a (a refrigerant) stored up to 2,500 cubic feet, and six retail waste types (corrosives bases, corrosive acids, flammable/toxic, aerosols, oxidizer and California designated waste) in addition to the storage of number Consumer Products that may meet hazardous designations (for retail sales). • 1178 El Camino Real: Hyundai of San Bruno is listed as a chemical storage and
CalEPA Regulated Site Portal *(Continued)*	• hazardous waste generator facility. Hyundai submitted a chemical and waste inventory on January 1, 2024 that listed various automotive wastes (i.e., oil, oily absorbent, fuel, ethylene glycol) and product oil stored up to 1,199 gallons or 499 pounds each.

Summary of Historical Resources and Local Agency Information for the Site	
Historical Resource	**Key Observations Regarding Site History**
	• 1178 El Camino Real: Sears is listed as a Leaking UST Cleanup Site (see further discussion in Sections 4.2 and 4.4). • 1188 El Camino Real: The Shops at Tanforan is listed as an air emissions facility. • 1188 El Camino Real: Century Theaters Tanforan is listed as a chemical storage facility for the storage of up to 15,598 cubic feet of carbon dioxide as reported on May 9, 2023. Hazardous waste management is further discussed in Section 5.1.3.
Notes: In addition to aerial photographs provided by the third-party provider, Ramboll viewed historical satellite imagery available on Google Earth. Printed copies were not obtained, and imagery dates were not independently verified.	

4.2 Environmental Regulatory Database Review for the Site

Ramboll reviewed the results of the state and federal environmental database searches performed by the third-party database search provider (Appendix B) and reviewed information available on the EnviroStor, SMARTS, HWTS, GeoTracker, NPMS and CalGEM websites. The site is listed on several environmental databases related to site conditions, as discussed in the table below.

Summary of Environmental Database Listings for the Site	
Summary of Information Contained in Database	**Ramboll's Comments**
Camp Tanforan, a military facility that formerly included the site, is on the Federally Used Defense Sites (FUDS) and EnviroStor databases. The EnviroStor database identifies this listing as a military evaluation property under FUDS with a status of "No Department of Defense Action Indicated (NDAI)" status as of September 13, 2012.	A January 2011 letter from the Department of the Army (Army) stated that the former approximately 118-acre Tanforan Racetrack property was utilized by the Army as an assembly center for people of Japanese ancestry in 1942 and Department of the Navy for troop housing from 1943 to 1946. Improvements included barracks, mess halls, recreation buildings, and other support buildings. During the U.S. Navy use, a boiler house, rifle range building, incinerator, and paint mixing and storage building(s) were constructed. The military-constructed buildings were removed and the site was reverted back to a racetrack after 1946 and subsequently as a shopping mall in 1970. In a 1991 Inventory Project Report, it was reported that the site was initially used by the Navy before it was transferred to the Army; information regarding actual Navy use was not identified and no records were found during research supporting that the Navy acquired the site prior to the Army. Records indicated the War Department acquired the land directly from the Tanforan Company, Ltd. for use as a Japanese assembly center in 1942. Historical accounts indicated that the land was briefly used by the Navy around 1911 as an airfield and later as a military training center during World War I. However, between World War I

Summary of Environmental Database Listings for the Site	
Summary of Information Contained in Database	**Ramboll's Comments**
	and World War II, the site reverted back to use as a racetrack. No evidence of any Department of Defense uses remained at the site in 2011, and the site had been redeveloped into a shopping center. This listing does not represent a significant environmental concern to the site; prior racetrack and military uses are further discussed in Section 7.
Sears (Sears Automotive and related business names), a former occupant at 1178 El Camino Real, is listed in on the Historical Underground Storage Tank (Hist UST), Leaking Underground Storage Tank (LUST), Hazardous Waste and Substances List (Cortese)/Historical Cortese, UST Finder Release, Recovered Government Archive LUST (RGA LUST), GeoTracker, and California Environmental Reporting System (CERS) databases related to the prior operation of USTs and an unauthorized release that impacted soil and groundwater. The HIST UST database listed the following five USTs: two 5,000-gallon gasoline, two 12,000-gallon gasoline, and one 500-gallon waste oil installed in 1970. A leak was reported in 1985, and the current LUST status is "Open – Eligible for Closure" as of April 18, 2023. Sears is also listed on the Resource Conservation and Recovery Act Small Quantity Generator (RCRA-SQG), RCRA-Large Quantity Generator (RCRA-LQG), Facility and Manifest Data (Haznet)and HWTS databases for generation of hazardous waste circa 1987 to 2020. Wastes included waste oil and mixed oil, oil/water separation sludge, other organic solids, unspecified organic liquid mixture, latex, alkaline solution, unspecified solvent mixture, off-spec/ aged/surplus organics, and polychlorinated biphenyls (PCBs), among others. These wastes were generated from automotive services and retail activities as of off-spec/damaged/returned merchandise (e.g., cosmetics, cleaners, paint) that exhibits hazardous waste characteristics is required to be managed as hazardous waste.	Sears formerly operated seven USTs that were removed between 1985 and 1987 followed by investigations to evaluate and delineate the extent of petroleum hydrocarbons in soil and groundwater beneath the site. Under the oversight of the SMCDEH, investigations continued into the 2000s and have included soil, groundwater, and soil vapor sampling, and the installation and periodic sampling of groundwater monitoring wells. In a letter dated March 15, 2013, SCMDEH stated that active remediation was not warranted for the former gasoline and oil USTs. In 2001, a 100-gallon UST (of untype type and contents) was discovered in an excavation at a depth of 16 feet bgs during construction of the San Bruno Police Station adjoining the southeast side of the site (owned by BART) in 2001. This area is referred to as Anomaly E in correspondence and reports and appears to be a source area for subsurface petroleum and benzene impacts. SMCDEH named BART as an additional responsible party in 2013, and BART has performed investigation and remediation of the area since that time. Based on a September 22, 2021 letter, the SMCDEH requested an additional post-remedial groundwater monitoring event (inclusive of all wells on the site and in the vicinity of Anomaly E), and indicated that if results demonstrated a sustained reduction in groundwater contaminants, further remedial effort may not be necessary, and the site may qualify for closure under the SWRCB Low-Threat Underground Storage Tank Case Closure Policy. In response, this sampling was completed with groundwater results indicating case closure could be pursued. The current status states the site is "Eligible for Case Closure" pending closure of groundwater monitoring wells. This matter is further discussed in Sections 4.4 and 7.

Summary of Environmental Database Listings for the Site	
Summary of Information Contained in Database	**Ramboll's Comments**
JC Penney at 1122 El Camino Real is listed in the HWTS and Facility and Manifest Data (Haznet) databases as a generator of asbestos-containing waste, PCBs, aged or surplus organics, unspecified solvent mixtures, other inorganic solid waste, and laboratory waste chemicals, among others. The asbestos, PCB and other wastes were likely generated as a result of facility renovations. In addition, wastes are generated from retail activities as of off-spec/damaged/returned merchandise (e.g., cosmetics, cleaners, paint) that exhibits hazardous waste characteristics is required to be managed as hazardous waste.	The listings do not suggest a contamination concern to the site. Wastes generated at the site are further discussed in Section 5.1.3.
Firestone is listed at 1122 El Camino Real on the HIST UST database. The facility type is listed as a gas station and four USTs installed in 1972 included three 10,000-gallon gasoline USTs and one 500-gallon waste oil tank. JC Penney at 1122 El Camino Real is also listed in the HIST UST database. The facility type is listed as auto repair, and one 500-gallon waste UST was installed in 1972. This appears to be a duplicate listing to the Firestone waste oil tank reported above.	As previously referenced in Section 4.1, a 1990 permit was issued to remove an exterior 550-gallon waste oil UST located along the east side of the Firestone auto services building. It is not clear if this is the same waste oil UST listed on the HIST UST database or an additional tank. No records were provided to evidence removal of the 550-gallon UST or other tanks. Facility personnel indicate there are no active USTs on-site but were unaware of the closure process prior or during the demolition of the automotive operations building in 2005. It is unclear whether the tanks were removed from the ground or if leaks were discovered upon closure of the tanks. This matter is further discussed in Section 7.
Firestone listed at 1110 El Camino Real is listed in the HIST UST, Statewide Environmental Evaluation and Planning System UST (SWEEPS UST), California Facility Inventory Database UST (CA FID UST), and San Mateo Co. Business Inventory (San Mateo Co. BI) databases. The SWEEPS database lists one waste oil UST (size not provided); HIST UST database lists one 550-gallon waste oil UST, and FID UST database lists only listed the site as an active UST facility. These three UST databases are historical and have not been updated since the 1990s. The facility is listed as an inactive UST site on the San Mateo BI database.	A former building was located on the southeast portion of the site that is separate from the current JC Penney Store building. Both buildings were historically operated by JC Penney, addressed 1110 and 1122 El Camino Real, and known to have been used for the automotive building. Therefore, the UST listings for 1110 and 1122 El Camino Real appear to be duplicate listings.
JC Penney and Firestone Tires are listed at 1178 El Camino Real on the RGA LUST, HWTS and Haznet databases. The RGA LUST date is 1992. No other data is provided on this database. The waste activity is dated from 1984 to 1986 and the waste type only included a one-time removal of tank bottom waste.	The address of 1178 El Camino Real appears to be an error as JC Penney/Firestone operated an automotive services building on the southeast portion of the site addressed as 1110 and 1122 El Camino Real, as discussed above.

Summary of Environmental Database Listings for the Site	
Summary of Information Contained in Database	**Ramboll's Comments**
Tanforan Cleaners & Shoe at 302 and 402 Tanforan Park are listed in the EDR Historical Cleaners (EDR Hist Cleaner) database, which is an EDR proprietary database listing businesses from directories that provided dry cleaning services. This business was listed at 302 Tanforan Park in 1991, and at 402 Tanforan Park from 1992 to 1998.	This EDR proprietary database is derived from business names as opposed to records or permits indicating dry cleaning was actually performed at the location. According to Ramboll's previous 2021 Phase I ESA, site representatives stated one of these unit location corresponded to the current dental office in the central shops buildings. It is possible the cleaner only operated at 402 Tanforan Park with 302 being an error. As referenced in Section 4.1, building permit records dated 1991 were identified to remodel Unit 402 for Tanforan Cleaners. These records included a floor plan that did not depict the presence of an on-site dry cleaning unit; rather, sewing machines, shoe repair, clothing racks and a fitting room were shown. This information suggests a dry cleaning unit was not likely operated at the site and only drop-off/pick-up services were provided. As such, this matter is not further discussed.
The Picture People, LensCrafters, Kiddie Kandids, Express Stop Photo, Expressly Portraits, and PDQ One Hour Photo, former tenants at 1150 El Camino Real or 210-D Tanforan Park, and Tanforan Dental Group, a current tenant at 1150 El Camino Real, are listed on the RCRA-SQG and/or Haznet databases for the generation of RCRA-regulated and/or non-RCRA wastes related to photo or x-ray developing activities that primarily generated silver waste.	The generation of hazardous wastes, by itself, does not suggest a known release or contamination at the site. Wastes generated at the site are further discussed in Section 5.
CVS Pharmacy, a former tenant, is listed at 1150 El Camino Real on the RCRA-SQG database for the generation of RCRA-regulated wastes. The waste types include various metals, ignitable, corrosive, pesticides and chlorinated materials among others, and were likely components of off-spec/damaged/returned merchandise (e.g., cleaners, cosmetics, pesticides) that exhibited hazardous waste characteristics and was therefore managed as hazardous waste.	
Target Store, a current tenant, is listed at 1150 El Camino Real on the RCRA-LQG and RCRA-SQG database for the generation of RCRA-regulated wastes. The waste types include various metals, ignitable, corrosive, pesticides and chlorinated materials among others, and were likely components of off-spec/damaged/returned merchandise (e.g., cleaners, cosmetics, pesticides) that exhibited hazardous waste characteristics and was therefore managed as hazardous waste.	

Summary of Environmental Database Listings for the Site	
Summary of Information Contained in Database	**Ramboll's Comments**
Hyundai of San Bruno is listed at 1178 El Camino Real on the E Manifest for generation of hazardous waste.	
Twenty past/present site tenants including Tanforan Park Shopping Center at 1140, 1150 and 1178 El Camino Real and 300 Tanforan Park not already discussed above are listed on the HWTS and Haznet databases related to hazardous waste activity. These waste activities are associated with the management of off-spec/damaged/returned merchandise that exhibit hazardous waste characteristics and are therefore managed as hazardous waste.	
Notes: There are also several listings for past and present commercial tenants for the site also listed on the following databases related to regulatory compliance: CERS, CERS Hazardous Waste (CERS Haz Waste), Emissions Inventory (EMI), ECHO, E Manifest, Facility Index System/Facility Registration System (FINDS), Resource Conservation and Recovery Act Non-Generator/No Longer Regulated (RCRA NonGen/NLR), and San Mateo County Business Inventory (San Mateo Co. BI) databases. Listings on these databases, by themselves, are not necessarily indicative of contamination.	

4.3 Prior Operations and Chemical Use

According to facility personnel, operations have remained generally consistent except that JC Penney/Firestone previously operated a filling station and automotive services facility on the southeast portion of the site. In addition, Hyundai began conducting automotive services around 2023 out of the same building in which Sears previously conducted automotive services on the northeast portion of the site.

Facility personnel knew of no past use of chlorinated solvents or PFAS at the site, nor did Ramboll's review of database listings and site documents identify the past use of chlorinated solvents or PFAS at the site. Databases referenced in Section 4.2 indicate off-spec/damaged merchandise that contained chlorinated compounds and was managed as a regulated waste at some of the stores; however, there is no evidence of the use of such chemicals. The site is not listed on any PFAS-related databases searched by EDR (or other provider). Site personnel were not aware of any past fires at the site, or use of firefighting foams for fire training drills.

4.4 Previous Environmental Assessments and Activities

Based on a review of historical site documents and interviews with site representatives, prior environmental assessment, sampling, or remediation activities have been conducted at the site, as summarized below. Pertinent historical and site-related information contained in the prior reports has been incorporated into other sections of this report.

Former Sears Automotive TBA Services Center at 1178 El Camino Real

- **2011 Site Conceptual Model and Air Quality Workplan.** This report was prepared by SCS Engineers for Sears and reported that seven USTs operated by Sears were formerly located at the site including two 12,000-gallon gasoline USTs, two 6,000-gallon gasoline USTs, two 530-gallon bulk motor oil USTs, and one 500-gallon used oil UST. The four gasoline and two motor oil USTs were reportedly removed in 1985, and the 500-gallon used oil UST was reportedly removed in January 1987. All the USTs except the 500-gallon UST were located south of the TBA building. In addition, geophysical surveys performed at the site identified five subsurface anomalies (designated Anomalies A through E) not in proximity to the former USTs but on-site. Elevated concentrations of petroleum hydrocarbons were detected near Anomalies D and E.

  In February 2001, a BART subcontractor discovered a 100-gallon UST at a depth of approximately 16 feet bgs in a construction zone that is now believed to be in the basement area of the adjacent San Bruno Police Station to the southeast of the site (and therefore, not located on the site), near the southwest corner of the BART construction zone during excavation for the police station. The UST was removed by a BART subcontractor in 2010. Field notes completed by BART's environmental consultant indicate that a sheen was present in groundwater in the vicinity of the UST. The tank appeared to be located downgradient of MW-11 and cross-gradient of MW-4, in the vicinity of Anomaly E.

  The report provides on-site areas where several previous subsurface investigations had identified benzene and TPHg in soil. Benzene elevated above ESLs (0.33 mg/kg and 1.4 mg/kg for residential and commercial land uses) appears to be limited to west and southeast portions of the movie theater. TPHg elevated above ESLs (430 mg/kg and 2,000 mg/kg for residential and commercial land uses) appears to be limited to the southeast and west (with a further west to the police station) portions of the movie theater.

- **2013 SMCDEH Letter.** In response to a Feasibility Study and Corrective Action Plan submitted by SCS Engineers on behalf of Sears, the SMCDEH concurred with the proposed approach of a Dual Phase Extraction remedial program to address impacts in the vicinity of Anomaly E, stating that it was the only area where free product was observed, and warranted active remediation. The letter stated that no active remediation was necessary for other areas of the site. The pilot test for the selected remedial approach at Anomaly E was implemented in 2015.

- **2018 Groundwater Report.** In March 2018, AECOM conducted a semi-annual groundwater monitoring event on behalf of Sears. Depth to groundwater ranged from approximately 6 to 16 feet below the top of casing (i.e., top of the well near the ground surface). Groundwater sample results indicated elevated concentrations of TPHg and benzene, toluene, ethylbenzene and xylene (BTEX) that appeared to be localized around the southern portion of the police station (Anomaly E) with one elevated TPHg concentration 50 feet south of the Sears TBA building.

- **2020 Corrective Plan Implementation Report.** AECOM prepared a Corrective Plan Implementation Report on behalf of Sears that stated BART had implemented a DPE remedial program from August 22, 2019 through September 24, 2019 to remediate the source area at Anomaly E. Post-remedial groundwater sample results indicated that benzene concentrations in groundwater monitoring wells were reduced by one to two orders of magnitude but remained above commercial/industrial screening criteria, and the trend of cumulative contaminant mass removal had not reached asymptotic conditions, signifying that the system may have been shut down prematurely.

- **2021 SMCDEH Letter.** In response to the SMCDEH's review of the above 2020 report, the SMCDEH requested BART complete a post-DPE groundwater monitoring event to evaluate current plume conditions. A comprehensive groundwater monitoring event had not been completed since 2018. If future monitoring indicated a sustained reduction in groundwater concentrations, additional secondary source reduction may not be required.
- **2022 Groundwater Report.** AECOM prepared the 2022 report on behalf of Sears. Field activities for the post-DPE groundwater monitoring event included gauging and sampling of nine monitoring wells located south of the Sears TBA building and along the eastern property line in December 2021. The highest dissolved-phase concentrations of TPHg and benzene in groundwater are located in the area near Anomaly E and the Police Station in the general location of the former UST that appeared to be associated with the former racetrack (Figure 3). The benzene plume (greater than 10 µg/L and less than 100 µg/L) appeared to be limited to an area roughly 100 feet in length (Figure 4). Ramboll notes that although the map depicts benzene up to 100 µg/L, the maximum concentration of benzene detected during the event was 54 µg/L. TPHg concentrations were noted as being lower than previous detected values. AECOM concluded that the remedial objectives for low-threat closure, including the reduction of benzene concentrations in the source area to less than 100 µg/L, well below the target low-threat closure criteria of 3,000 µg/L, had been achieved for the Sears Automotive Center and recommended case closure.
- **SMCDEH 2023 Case Closure Memorandum and Case Closure Summary.** SMCDEH stated the site appears to satisfy the SWRCB Low-Threat UST Case Closure Policy, reporting the following notable conditions: the release only consists of petroleum hydrocarbons; the release had been stopped through removal of the USTs; free product has not been observed; the conceptual site model was sufficient to define the contamination and demonstrate LTCP criteria had been met; and the secondary source had been removed to the extent practicable (i.e., excavation of Anomaly E area, application of oxygenating agent, and completion of a DPE event). Further, potential vapor intrusion issues at the San Bruno Police Station were evaluated through multiple rounds of soil gas and indoor sampling and during the most recent indoor air sampling event (2014), benzene was found to slightly exceed the commercial ESL (0.42 micrograms per cubic meter [µg/m^3]) with a maximum of 0.63 µg/m^3 detected but was considered unlikely to represent an unacceptable human health risk due to benzene levels lowered during the 2019 DPE event and further reduction as a result of natural attenuation. SMCDEH concluded all appropriate response actions appear complete and further investigation, remedial/removal actions, or monitoring of the release does not appear warranted. However, the case closure summary stated the following: "An unknown amount of hydrocarbon-affected soil and groundwater remain in the subsurface at the site. The City of San Bruno Building Department has been notified that should excavation or development of the property be proposed that may encountered impacted soil or groundwater, SMCDEH must be notified."
- **SMCDEH 2023 Letter.** The letter stated the RWQCB had approved SMCDEH's recommended case closure and no comments were received during the public comment period. Therefore, case closure will be granted when all of the wells are destroyed and all associated remediation equipment, if any, are removed. A well destruction workplan was requested.

To date, the requested workplan or other documentation to demonstrate well destruction has not been provided and therefore, the case status remains open and eligible for case closure. Ramboll spoke with the SMCDEH case manager, Mr. Brian Gwinn, who confirmed this documentation has not been received and the case status remains open.

Ramboll compared the last groundwater sampling results for petroleum constituents to ESLs for groundwater vapor intrusion human health risk levels for commercial/industrial land use or to the MCL in drinking water where no RWQCB ESLs exist. The following exceedances were found: TPHg exceeded the MCL of 760 µg/L in two wells (MW-22 and MW-13) at concentrations of 1,800 and 2,000 micrograms per liter (µg/L); benzene exceeded the ESL of 1.8 µg/L in four wells (MW-13, MW-19R, MW-22 and MW-23) at concentrations ranging from 3.1 to 54 µg/L; and ethylbenzene exceeded the ESL of 15 µg/L in three wells (MW-13, MW-19, and MW-22) from 72 to 310 µg/L. Isoconcentration contours for benzene and TPH-g in groundwater during the latest sampling event in 2021 are provided on Figures 3 and 4.

Previous Phase I ESA reports

- **2020 Phase I ESA Report**. In 2020, Ramboll conducted a Phase I ESA of the southern portion of the site in the area occupied by JC Penney Store and associated parking areas on behalf of CTL PropCo I LLC and found no RECs in connection with this portion of the site. Notable other findings were identified, including the following: (1) former USTs at the site without closure documentation or soil and groundwater confirmation sample results; (2) past site operations that may have included the use of petroleum products, solvents, and other chemicals; and (3) potential migration of contamination to the JC Penney parcel from Sears and a former dry cleaner at the Tanforan shops on the northern and central portions of the Tanforan Mall, respectively; and (4) given the date of construction, there was a potential for ACMs to be present in building materials.
- **July 2021 Phase I ESA Report.** In 2021, Ramboll conducted a Phase I ESA of the southern portion of the site in the area occupied by JC Penney Store and associated parking areas on behalf of ARE and found no RECs in connection with this portion of the site. One *de minimis* condition was identified that included multiple areas of exterior pavement and interior flooring where oil stains were apparent on pavement that did not appear to reach floor or stormwater drains. Other findings were identified, including the following: (1) former USTs at the site without closure documentation or soil and groundwater confirmation sample results; (2) past site operations that may have included the use of petroleum products, solvents, and other chemicals; and (3) given the date of construction, there was a potential for ACMs and LBP to be present in building materials.
- **October 2021 Phase I ESA Report.** In 2021, Ramboll conducted a Phase I ESA of the northern portion of the site in the area occupied by the former Sears store, Sears TBA automotive building, and associated parking areas on behalf of ARE. The 2021 report identified one REC that included the presence of on-site soil and groundwater contamination above regulatory screening criteria related to the historical operations at the site. Specifically, the contamination is related to operation of seven gasoline and motor oil USTs by Sears that were removed in 1985 and 1987, and a UST that was identified in the basement of the eastern adjoining Police Station building in 2001. The previous investigations, remedial action, and agency correspondence completed through 2021 as referenced above, was reviewed, and the 2021 report stated that following additional post-remedial groundwater monitoring, the site may be eligible for case closure. Notable other findings were identified, including the following: (1) past site operations that may have included the use of petroleum products, solvents, and other chemicals; and (2) potential presence of ACMs and LBP based on the date when the buildings were constructed.
- **2021 Asbestos Screening Report.** Terracon conducted a limited asbestos screening survey at The Shops at Tanforan. A total of 13 predominant suspect ACMs were identified throughout the mall structures of which seven were sampled. None of the sampled materials were found to contain asbestos. Eight additional suspect ACMs were identified that were not sampled. The report

concluded the following materials were assumed to contain asbestos: drywall and joint compound, roofing systems, and carpet/flooring adhesives generally throughout the structures; ceramic floor tile systems in the central shops and JC Penney; floor tile system in Target; and ceiling tile systems in Target and JC Penney.

- **2022 Asbestos O&M Program**. The O&M Program was developed to assist ARE with managing ACMs throughout the mall structures. The assumed ACMs were listed as those identified in the 2021 Asbestos Screening Report.

4.5 User-Provided Information

Because this assessment is being prepared on behalf of the owner of this site, user-provided information (e.g., relating to environmental liens, activity use limitations [AULs], specialized knowledge of the site, property value diminution, chain-of-title, or any other commonly known or obvious indications of site contamination) was obtained through the site reconnaissance and interviews and is referenced in the applicable sections of this report.

5. SITE OBSERVATIONS

5.1 Chemical and Petroleum Storage

5.1.1 Underground Storage Tanks

According to site representatives, there are no current USTs at the site. Ramboll identified pipes in the Hyundai automotive building labeled as fresh and motor oil that are no longer use. This piping was associated with former storage tanks that have been removed.

Several USTs associated with the former JC Penney/Firestone and Sears TBA buildings were formerly operated at the site, as identified in the table below. Only a permit was identified for removal of one of the USTs from the JC Penney/Firestone building in 1990, as previously referenced in Section 4.1. The Sears USTs were removed in 1985 and 1987. A discussion of investigation and remediation activities associated with the Sears USTs is presented in Section 4.4. Sears site is listed on the Leaking Underground Storage Tank (LUST) database.

Underground Storage Tanks

Number and Size (gal.)	Location	Contents	Key Dates	Regulatory Closure Granted	Notes
Removed/Disposition Unknown					
2 x 12,000	Associated with former Sears Automotive services, northeast portion of the site	Gasoline	Removed 1985	No – The associated Leaking UST case has an "Open - Eligible for Closure" as of April 18, 2023	Reports regarding the removal, investigation and remediation related to the former USTs is discussed in Section 4.4. The site is currently on the LUST List related to an authorized release from the former USTs with a current case status of Eligible for Closure as of April 18, 2023. This matter is further discussed in Section 7.
2 x 6,000		Gasoline			
2 x 530		Bulk Oil			
1 x 500		Waste Oil	Removed 1987		
3 x 10,000	Associated with former JC Penney/ Firestone automotive services on the southeast portion of the site	Gasoline	Installed 1972 No record confirming removal	No	Facility personnel indicate there are no active USTs on-site but were unaware of the closure process prior or during the demolition of the automotive operations building in 2005. It is unclear whether the tanks were removed from the ground and if leaks were discovered upon closure of the tanks. Records referenced both a 500 and a 550-gallon waste oil UST that are presumed to be the same tank. A 1990 permit was issued to remove an exterior 550-gallon waste (see Section 4.1) but no records confirmed its removal. This matter is further discussed in Section 7.
1 x 500 (or 550)		Waste oil			

5.1.2 Aboveground Storage Tanks

One 175-gallon, steel elevated diesel tank is located over a concrete floor inside the fire pump room in an ancillary building located along the north side of the parking garage/cinema building. There is no secondary containment provided for this tank. The diesel fuels the fire pump via aboveground piping within the same room. A diesel odor and staining were noted on the concrete around the pump. Facility personnel were aware of the leak and had contacted the fire sprinkler maintenance contractor to repair the leak. The staining was contained to the building. No secondary containment is provided for this tank. This matter is further discussed in Section 7.

5.1.3 Other Chemical and Petroleum Containers

Several dedicated drum and other storage areas for chemicals and petroleum products are maintained at the site:

- Several one and five-gallon containers of paints on shelves and on the concrete floor, and several containers of gasoline and diesel in containers up to three gallons stored within a flammable materials storage cabinets are stored within the mall management shop.
- One parts washing container using a biodegradable solvents and approximately twenty 55-gallon drums of product oil and transmission fluid, automotive-related wastes (used oil filters, used oil, used transmission fluid, and used clay absorbent) and universal wastes (aerosols) and one 350-gallon tote of product oil are located in the Hyundai automotive service bays. The majority of the drums are stored on top of secondary containment pallets.
- Used food grease was observed stored in one 275-gallon tote within the trash compactor enclosure adjoining the parking garage/Century Theater structure, and in an approximately 100-gallon tallow bin within the trash enclosure adjoining BJ's restaurant.
- Approximately twenty five-gallon containers and associated approximately 150-gallon detergent tank are located in the carwash stall of the Hyundai automotive services building.
- A small countertop dental x-ray development machine is operated in the Tanforan Dental Care unit. Silver waste is removed from this unit by a cartridge that is mailed for off-site recovery.
- Several one-gallon containers of oil and lubricants are stored in the fire pump room.
- The restaurant and food service tenants store one or more cylinders of compressed carbon dioxide cylinders associated with the carbonated beverage systems.
- Water treatment chemicals associated with the air handling equipment are stored in a few drums and smaller containers in the mechanical rooms at the JC Penney and Hyundai mechanical spaces.
- Diesel-fueled generators are located in the JC Penney building and outside on the east side of the building with associated fuel reservoirs up to approximately 100 gallons each.
- Numerous 55-gallon drums stored on the concrete floor and approximately 15-gallon lidded, plastic storage bins stored on shelves are used by various stores to manage returned/damaged/off-spec/aged products that exhibit hazardous waste characteristics (e.g., cosmetics, shampoo, perfume, cleaners) and universal wastes (e.g., light bulbs/tubes and batteries) that are removed under manifest procedures for off-site processing. This storage was observed in the warehouse spaces of JC Penney, Target, and Petco.
- A few 55-gallon drums and smaller containers of hydraulic oil are stored by Otis Elevator in a few elevator equipment rooms.

Minor staining and small pools of freshly spilled oil were observed in some areas of the Hyundai automotive services building. Hyundai representatives stated the spilled oil is cleaned up on a daily basis and the used clay absorbent is placed in a drum. Hyundai representatives also stated the floors are not washed down but are swept clean. Otherwise, site representatives knew of no significant spills or releases of materials at drum and container storage areas. While dedicated secondary containment was not provided for all of the drums and containers, Ramboll did not observe other evidence of spills or uncontrolled releases from these storage areas, other than minor staining in some elevator equipment rooms. As the observed stains were observed to be minor in nature and are contained to the concrete floored building areas, this staining does not represent a significant environmental concern.

5.2 Other Site Reconnaissance Observations

During the site visit, Ramboll made observations of interior and exterior portions of the site to look for and identify the features, activities, uses, and conditions specified in Section 9.4 of the ASTM Standard, as discussed in the table below.

Site Reconnaissance Observations	
Conditions	**Description**
Site Utilities and Equipment	
Heating and Cooling Equipment	Natural gas and electric fueled cooling towers, chillers, boilers, air compressors, packaged rooftop units and related systems are operated for comfort heating and air conditioning.
Natural Gas Service	The site is provided with natural gas service.
Use of Fuel Oil for Building Heat	No current or former use of fuel oil for building heat.
Foam-based Fire Suppression System	According to facility personnel, the site is not equipped with a built in foam-based fire suppression system, and there is no indication of a former use of a foam-based firefighting system at the site.
Water Supply and On-site Water Wells	The site receives drinking water from the City of San Bruno water system. No on-site domestic water wells were identified. Although not observed in the areas accessed, groundwater monitoring wells associated with the groundwater investigations completed at the former Sears Automotive facility, as previously discussed in Section 4.4, may remain as documentation confirming their proper abandonment have not been identified.
PCB-containing Equipment	Site representatives were not aware of any on-site equipment that is known to contain PCBs. There are at least five exterior, pad-mounted, oil-filled transformers on the site; the units are owned by Pacific Gas & Electric Company (PG&E). The units are not labeled as to their PCB content. Because the unit may have been installed before the 1979 federal ban on the manufacture of PCBs, it is possible that transformer oils contain PCBs. Site representatives were not aware of spills or leaks from these transformers. Because the building(s) were constructed prior to the 1979 federal ban on the manufacture of PCBs, it is possible that hydraulic or other types of electrical equipment, such as capacitors, contain PCBs.

Site Reconnaissance Observations		
Conditions	**Description**	
PCB-containing Equipment *Continued)*	There are approximately 15 hydraulic elevators throughout the site. Because most of the building areas were constructed prior to the 1979 federal ban on the manufacture of PCBs, it is possible that the hydraulic fluid in the elevator reservoirs contain may PCBs. Facility personnel indicated that the elevators are serviced annually and as needed by OTIS within the main mall structures, and by third-party vendors retained by the larger tenants (e.g., Target and JC Penney). As such, it is likely that hydraulic fluid used in the building elevators in the early 1970s (and potentially containing PCBs) has been replaced and removed from the site. Minor staining confined to the immediate concrete floor area at the equipment reservoir was observed in a few elevator rooms that does not represent a concern based on the confined, small spill and apparent newer oil release (light-colored oil and/or staining). There are approximately 15 newer aboveground hydraulic lifts in the Hyundai automotive service bays that are unlikely to contain PCBs based on the equipment age. Releases were not observed form the hydraulic lifts and facility personnel stated the lifts are routinely inspected and serviced. Several concrete patches were observed in the concrete floor evidencing the presence of prior underground hydraulic reservoirs associated with removed automotive lifts. No information regarding the removal of the prior automotive lifts has been made available to Ramboll. In addition, seven newer hydraulic trash compactors and two box balers were identified at the site that are unlikely to contain PCBs based on the equipment age. Ramboll did not identify staining associated with this hydraulic equipment.	
Waste, Wastewater and Stormwater		
Waste	Hazardous and Universal	Numerous 55-gallon drums stored on the concrete floor and approximately 15-gallon lidded, plastic storage bins stored on shelves are used by various stores to manage returned/damaged/off-spec/aged products that exhibit hazardous waste characteristics (e.g., cosmetics, shampoo, perfume, cleaners) and universal wastes (e.g., light bulbs/tubes and batteries) that are removed by third-party vendors under manifest procedures for off-site processing. This storage was observed in the warehouse spaces of JC Penney, Target, and Petco and no major releases or staining was observed. Approximately six 55-gallon drums of automotive-related wastes (used oil filters, used oil, used transmission fluid, and used clay absorbent) and universal wastes (aerosols) and one 350-gallon tote of product oil are located in the Hyundai automotive service bays. The majority of the drums are stored on top of secondary containment pallets. Minor staining and small pools of freshly spilled oil were observed in the drum storage area. Hyundai representatives stated the spilled oil is cleaned up on a daily basis and the used clay absorbent is placed in a drum. Based on the minor releases and staining observed within the immediate drum area and daily cleanup routine, this staining is unlikely to represent a significant concern.

Site Reconnaissance Observations		
Conditions	**Description**	
Waste *(Continued)*	Nonhazardous	Nonhazardous waste generated at the site includes general debris stored in seven trash compactors and several dumpsters located outside the buildings. The trash is removed by various third-party vendors for off-site processing. Used food grease and associated sludge are periodically removed for off-site processing by third-party vendors from a 275-gallon storage tote within the trash compactor enclosure adjoining the parking garage/Cinemark Theater structure, from the two belowground interceptors, and from several small aboveground, in-line grease interceptors associated with the restaurants and food service facilities.
	Observations	Other than as referenced above, Ramboll observed no evidence of a contamination concern associated with waste storage and management at the site.
Wastewater	Sanitary	Sanitary wastewater from the site is discharged to the municipal sanitary sewer system.
	Process	Wash water generated in the carwash bay at the Hyundai automotive services building is discharged into a floor drain located within the same carwash bay. Standing water of at least a few inches with soap suds was observed present at the time of Ramboll's site visit. According to Hyundai representatives, this wash water is discharged directly to the sanitary sewer system. However, two metal plates were present in the pavement on the south side of the building that may be associated with an oil/water separator. Hyundai began occupying the site in 2023 and stated there has been no clogging or concerns associated with the floor drain system and they have never pumped or serviced the drainage system and did not known the purpose of the two metal covers in the paved area. Regardless, the dilute nature of the car wash water is unlikely to represent a significant environmental concern to the site. The prior automotive activities, including potential operation of an oil/water separator, is further discussed in Section 7. Other operations at the site do not generate process wastewater except for unfiltered air compressor condensate that was observed from three air compressor located in the JC Penney and Hyundai mechanical rooms and in the Hyundai automotive services building basement. Minimal staining was observed on the concrete immediately beneath the air compressors and based on the limited staining that has not extended a foot or more beyond the units, this minimal staining is unlikely to represent a significant concern.
	Septic Systems	No identified current or former septic systems.
	Observations	Ramboll observed no evidence of a contamination concern associated with the current wastewater management at the site.

Site Reconnaissance Observations		
Conditions	**Description**	
Stormwater	Management	Percolates into the ground surface at unpaved areas enters catch basins that discharge to the municipal storm sewer system. One sump pump was observed at the Hyundai building's loading dock to discharge accumulated water to the municipal storm sewer system. Although not observed, it is possible another sump pump is associated with the downward sloping loading dock at the JC Penney building.
	Observations	Ramboll observed no evidence of a contamination concern associated with stormwater management at the site.
Other Interior and Exterior Observations		
Exterior Ponds, Pits, Lagoons and Standing Surface Water	Ramboll observed no exterior ponds, pits, or lagoons.	
On-site Disposal or Fill Material	Ramboll did not observe any areas of the site indicative of on-site waste disposal or placement of fill material.	
Staining and Stressed Vegetation	No stained or stressed vegetation was observed.	
Interior Drains, Sumps, Pits, and Trenches	In addition to the floor drains and presumed oil/water separator observed in the Hyundai automotive service building, and the floor drains and grease interceptors associated with restaurants and food tenants previously discussed above, floor drains were observed in the mechanical rooms housing the air handling equipment in the JC Penney and Hyundai buildings that discharge directly to the sanitary sewer system. These systems receive discharge from the air compressors, boilers, cooling towers and chillers. In addition, sewer lift stations were observed in the basements of the Hyundai retail building and the Hyundai automotive services buildings that discharge to the municipal sewer system. Floor drains are also located in the restrooms, the laundry room of the Central Shops building, and in food service areas that discharge directly to the sanitary sewer system.	
Odors	At the time of the site visit, Ramboll did not note strong odors in interior or exterior areas at the site.	

5.3 Additional Considerations

Ramboll's scope of work also included a review of certain additional considerations that are not included within the scope of the ASTM Standard (i.e., "ASTM non-scope considerations"). A summary of Ramboll's findings for these additional considerations is provided in the table below.

Review of Additional Considerations		
Consideration	**Summary of Review**	**Comments/Findings**
ACM	As previously discussed in Section 4.4, a limited screening survey was conducted at the site in 2021 that identified a total of 13 predominant suspect ACMs throughout the mall structures of which seven were sampled. None of the sampled materials were found to contain asbestos. Eight additional suspect ACMs were identified that were not sampled. The report concluded the following materials were assumed to contain asbestos: drywall and joint compound, roofing systems, and carpet/flooring adhesives generally throughout the structures; ceramic floor tile systems in the central shops and JC Penney; floor tile system in Target; and ceiling tile systems in Target and JC Penney. A 2022 Asbestos O&M Program was prepared, as previously referenced in Section 4.4, to assist ARE with safely managing ACMs.	Based on the age of the majority of the buildings, ACMs may be present. The suspect and presumed ACMs identified were observed to be in good condition and there is an Asbestos O&M Program in place. There are no regulatory requirements to remove ACM or evaluate whether building materials contain asbestos unless the materials are damaged and have the potential to release fibers or the materials have the potential to be disturbed during renovation or demolition activities.
Radon	According to site representatives, no radon surveys have been completed at the site. Based on information included in the environmental database report, the site is located in an area categorized as Zone 2, which has average indoor basement radon levels between 2 and 4 picoCuries per liter (pCi/L). The USEPA□s continuous exposure limit, which is the limit at which further testing or remedial action is suggested, is 4.0 pCi/L. This USEPA continuous exposure limit applies to residential, not commercial, properties. According to the California Radon database, out of 45 sites surveyed in San Mateo County, three sites were over 4 pCi/L. A USEPA survey conducted in the same zip code as the site found that the average radon level of a first-floor room at two sites was 0.100 pCi/L.	No issues identified.
Water Intrusion/Mold	A comprehensive survey for water intrusion/mold was not in Ramboll's scope of work. Site representatives were not aware of water intrusion or apparent mold growth at the site.	No issues identified.
Lead-Based Paint (LBP)	Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the early 1970s. In 1978, the Consumer Products Safety Commission banned paint and other surfacing coating materials that are "lead-containing paint." Based on the construction date of the majority of the site buildings, it is possible that LBP was used historically on the buildings.	Ramboll observed the painted buildings surfaces to generally be in good condition. Based on the age of the site buildings, it is possible that the buildings contain LBP.

Review of Additional Considerations		
Consideration	**Summary of Review**	**Comments/Findings**
Lead-Based Paint *(Continued)*	Ramboll made limited, non-exhaustive observations of painted surfaces at the site. Site representatives indicated that no LBP surveys have been performed at the site. Painted surfaces at the site, both interior and exterior, were generally observed to be in good condition.	
Notes: Ramboll did not conduct a comprehensive survey for any of the issues noted above. Furthermore, Ramboll's observations were inherently limited and included only non-exhaustive visual observations.		

6. SURROUNDING PROPERTIES

The ASTM Phase I Standard requires an evaluation of the potential for migration of contamination onto the site from adjoining and other off-site properties. Ramboll's review of potential contamination risks posed by properties surrounding the site is presented below.

6.1 Current and Past Uses of Adjoining Properties and Surrounding Area

The site is located in a mixed commercial, light industrial and residential land use area, as summarized in the table below. The nearest residences are located approximately 150 feet east of the site.

Current and Past Uses of Adjoining Properties

Uses of Adjoining Properties	Notable Past Uses and Approximate Time Period	Observations Relating to Potential Conditions
North		
Sneath Lane followed by stores and stores, restaurant and a bank to the north-northwest; and by a US Post Office to the direct north.	Portions of the Tanforan Racetrack (1899 to 1964) Sneath Lane followed by undeveloped land (1965s to 1980s) Sneath Lane and commercial development (1980s to present)	Ramboll did not observe conditions on, or identify past uses of, adjacent properties that represent a potential contamination concern to the site.
East		
BART parking garage and light rail station, San Bruno Police Station and Huntington Avenue followed by a residential area along the eastern mall boundary; and a municipal building with storage yard at the east-northeastern boundary.	Portions of the Tanforan Racetrack with a shop/corporate yard structure noted to include gas and oil storage and railroad track followed by undeveloped and residential land (1899 to 1964) Undeveloped land, railroad track and Huntington Avenue followed by residential land and a small storage yard (1965s to 2000s) BART parking garage, light rail station, police station and Huntington Avenue followed by a residential land and a small municipal building (2000s to present)	During construction of the BART Station and Police Station, a UST was discovered that, based on review of fire insurance maps, may have been associated with the Tanforan Racetrack shop. Information regarding investigation and remediation of associated contamination was previously discussed in Section 4.4. Ramboll did not observe conditions on, or identify past uses of, adjacent properties that represent a potential contamination concern to the site.
South		
Interstate 380 followed by residential area.	Portions of the Tanforan Racetrack (1899 to 1964) Undeveloped (1965s to 1970s) Interstate 380 followed by residential area (1975s to present)	Ramboll did not observe conditions on, or identify past uses of, adjacent properties that represent a potential contamination concern to the site.

Current and Past Uses of Adjoining Properties		
Uses of Adjoining Properties	**Notable Past Uses and Approximate Time Period**	**Observations Relating to Potential Conditions**
West		
El Camino Real followed by a gas station (1199 El Camino Real); a veterinarian facility; a bank; a dental office; other general commercial uses; and the National Cemetery.	El Camino Real, undeveloped and residential (<1925 to 1940) El Camino Real, National Cemetery, undeveloped, a gas station, a pet hospital, a hotel, and portion of Camp Tanforan (1940s to 1970s) El Camino Real, National Cemetery, a gas station, a pet hospital, and general commercial (1970s to present)	The gas station is on the Leaking LUST databases and is further discussed in Section 6.2.1. Otherwise, Ramboll did not observe conditions on, or identify past uses of, adjacent properties that represent a potential contamination concern to the site.
Notes: During the site visit, Ramboll walked or drove by the borders of the properties that are adjacent to the site. Ramboll did not enter the neighboring properties.		

6.2 Database Review for Off-Site Properties

6.2.1 Adjoining Properties

Based on a review of the environmental database search report, Ramboll identified the adjoining property listed in the table below on databases relating to known or potential past releases.

Database Listings Relating to Known/Potential Releases at Adjoining Properties[1]		
Listing Name and Relative Location	**Summary of Information Contained in Database**	**Ramboll's Comments**
Shell Station 1199 El Camino Real (adjoining to the west beyond El Camino Real)	This currently operating gas station is identified in the Leaking UST (LUST), Cortese and UST Release Finder databases for a release discovered in 1995 during the closure of a gasoline UST. The matter has open status. The LUST database states a release of gasoline and fuel contaminants to other groundwater was reported in 2002 and the case was issued closure on May 11, 2017.	Based on a 2015 Groundwater Monitoring Report and Case Closure Memorandum, a release was reported in 2002, various phases of investigation were completed, and a groundwater extraction system was operated that reduced groundwater impacts. A methyl tertiary butyl ether (MBTE) plume moved east towards a deep drinking water production well. Sampling and analysis of the production well indicated that the plume stabilized at a distance allowing for closure under the Low-Threat Closure Policy. Seven groundwater monitoring wells were located in the parking lot on the western portion of the mall site. The direction of groundwater flow was reported as variable but shown to be toward the southeast on the northwestern portion of the site. MTBE was sampled in three of these on-site wells in 2015. MTBE was detected in on-site well MW-16 at 240 µg/L below the residential and commercial ESLs set at 450 µg/L and 2,000 µg/L. Wells were previously sampled for TPHg and BTEX 2013 and results were either non-detect or where detected

Database Listings Relating to Known/Potential Releases at Adjoining Properties[1]		
Listing Name and Relative Location	**Summary of Information Contained in Database**	**Ramboll's Comments**
Shell Station 1199 El Camino Real (adjoining to the west beyond El Camino Real) *(Continued)*		were below applicable screening criteria. The property was granted regulatory case closure in May 2017. Since constituents of concern are below applicable screening levels, remedial action was conducted and case closure was granted, this adjoining Shell Station is unlikely to represent an environmental concern to the site.
Notes: Ramboll's analysis of adjoining properties was based on observations made during the site reconnaissance and location information for off-site listings as presented in the database report. Also, for purposes of this analysis, Ramboll considers as "adjoining" properties that are adjacent, even if separated by a road or other physical barrier. Ramboll has not included a discussion of compliance-related databases in this table (e.g., RCRA Generator, UST, AST), as Ramboll considers it unlikely that off-site properties listed on compliance-related databases without indication of a release or chemical mishandling represent a potential risk for contamination to the site.		

6.2.2 Other Surrounding Properties

There are several listings in the environmental database report for non-adjoining off-site facilities within applicable ASTM search radii; however, Ramboll has not identified any properties that are likely to represent a potential contamination concern to the site.[4]

The database report indicates that poor or inadequate address information was available for several properties located in the vicinity of the site; therefore, these properties could not be readily mapped by the third-party provider. Because the location of these properties with respect to the site could not be evaluated, Ramboll is limited in its ability to express an opinion regarding the potential for impact to the site from these properties. It was beyond the scope of this review to accurately locate each of the unmapped properties identified in the database report; however, Ramboll reviewed the list of unmapped properties and verified that none appeared to be adjacent to the site.

[4] Ramboll considers various factors in its determination whether a non-adjoining site represents a likely risk of contaminant migration to the subject site, including (if known) the type of database on which the off-site property is listed, whether and when the listing received regulatory closure, presumed or known groundwater flow direction, available reports and documentation, and distance from the site.

7. FINDINGS, OPINION, AND CONCLUSIONS

7.1 Discussion of Findings

Ramboll's findings, opinions, and conclusions regarding conditions at the site are presented below. The findings of this assessment are classified based on the definitions in the ASTM Standard provided in Section 8 of this report.

This assessment has revealed the following REC in connection with the site:

- **On-Site Groundwater and Soil Contamination Related to Historical Operations at Site.** Sears formerly operated an Automotive Center (1178 El Camino Real) on the northeast portion of the site (currently operated by Hyundai Automotive) that included seven USTs for the storage of gasoline (two 12,000-gallon and two 6,000-gallon), motor oil (two 530-gallon), and used oil (500-gallon). Following removal of the USTs between 1985 and 1987, investigations commenced to evaluate and delineate the extent of petroleum hydrocarbons in soil and groundwater beneath the site. Under the oversight of the SMCDEH, investigations continued into the 2000s and have included soil, groundwater, and soil vapor sampling, and the installation and periodic sampling of groundwater monitoring wells. In a letter dated March 15, 2013, SCMDEH stated that active remediation was not warranted for the former gasoline and oil USTs and the agency has not requested additional investigation of this area of the site since approximately that time.

  In 2001, a 100-gallon UST (unknown contents) was discovered in an excavation at a depth of 16 feet bgs during construction of the San Bruno Police Station adjoining the southeast side of the site (owned by BART) in 2001. This area is referred to as Anomaly E in correspondence and reports and appears to be a source area for subsurface petroleum and benzene impacts (see Figures 3 and 4). SMCDEH named BART as an additional responsible party in 2013, and BART has performed investigation and remediation of the area since that time. Based on a September 22, 2021 letter, the SMCDEH requested an additional post-remedial groundwater monitoring event (inclusive of all wells on the site and in the vicinity of Anomaly E), and indicated that if results demonstrated a sustained reduction in groundwater contaminants, further remedial effort may not be necessary, and the site may qualify for closure under the SWRCB Low-Threat Underground Storage Tank Case Closure Policy (LTCP). In response, a final groundwater sampling event was completed in December 2021 with groundwater results documented in a 2022 Report. Results of the event indicated that concentrations of benzene and ethylbenzene were detected above ESLs for commercial/industrial land use and total petroleum hydrocarbons as gasoline (TPHg) exceeded the MCL for drinking water. In an April 2023 letter, the SMCDEH indicated that the site met LTCP conditions and concluded all appropriate response actions appear complete and further investigation, remedial/removal actions, or monitoring of the release does not appear warranted. However, the case closure summary stated the following: "An unknown amount of hydrocarbon-affected soil and groundwater remain in the subsurface at the site. The City of San Bruno Building Department has been notified that should excavation or development of the property be proposed that may encountered impacted soil or groundwater, SMCDEH must be notified." In a July 2023 letter, the SMCDEH stated the RWQCB had approved SMCDEH's recommended case closure and that case closure will be granted when all of the wells are destroyed and all associated remediation equipment, if any, are removed. A well destruction workplan was requested. As of the date of this report, a workplan or other documentation evidencing well destruction had not been provided to the SMCDEH. The current status for the site is listed as "Eligible for Case Closure" pending closure of groundwater monitoring wells.

The open case status and presence of groundwater contaminants above commercial/industrial ESLs represents a REC (this issue would be a CREC when case closure is issued). It is not expected that site redevelopment will be inhibited in a significant manner by residual subsurface impacts. Irrespective of case status with the oversight agency, residual impacts present at this site are likely to be managed as part of redevelopment and construction, continued coordination with the agency, and the implementation of a soil management plan.

Ramboll identified the following findings that are not considered RECs or Controlled RECs (CRECs).

- **Former USTs without Closure Documentation.** Four USTs were formerly located at the site in association with a former JC Penney/Firestone automotive building on the southeast portion of the site. Three 10,000-gallon gasoline USTs and one 500-gallon UST were installed in 1972. A 1990 permit was issued to remove an exterior 550-gallon waste oil UST located along the east side of the Firestone auto services building. It is not clear if this is the same waste oil UST or an additional tank. No records were provided to evidence removal of the 550-gallon UST or other tanks. Facility personnel indicate there are no active USTs on-site but were unaware of the closure process prior or during the demolition of the automotive operations building in 2005. It is unclear whether the tanks were removed from the ground. Regulatory database search results do not identify any continuing obligations related to the closure of the USTs. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product related to this matter, it is not considered a REC; however, additional information (e.g., confirmatory sample data) would be required to evaluate the potential for subsurface impacts, if any, related to the operation of USTs at the site.
- **Past Operations at the Site**. The site has been used for various purposes since the late 1890s, including as a horse and automotive racetrack (1899-1964), military training and operations (1914-1918, 1941-1950), internment camp operations (1942), automotive shop operations (1970-2020) on the northeast and southeast portions of the site including the operation of inground hydraulic lifts and oil/water separator(s), and retail operations (1972 to present). Several of these former operations may have included the use of petroleum products, solvents, adhesives, paint, metals, acids, caustics, corrosives, explosives, propellants, lead, and other chemicals. Additionally, historical operations conducted between site development and the early 1980s predate the enactment of robust environmental regulations related to the handling, storage, and disposal of hazardous chemicals. With the exception of the open LUST case associated with the former Sears Automotive Center, facility personnel are not aware of any major spills or releases at the site. Because Ramboll's review did not identify documentation of a release, a suspected release, or a potentially material threat of a release of a hazardous substance or petroleum product at the site other than the release associated with the former Sears Automotive services, this matter it is not considered a REC.
- **Limited Pavement and Floor Staining.** Ramboll observed areas of interior pavement where petroleum releases or stains were apparent that include the following: (1) in areas underlying/adjacent to the air compressors in the mechanical air handling equipment rooms of the JC Penney and Hyundai buildings and basement of the Hyundai automotive services building that were limited to the immediate area; (2) an active small release of diesel from piping associated with the emergency fire pump for which site representatives stated their vendor has been contacted to repair the piping; (3) minor staining confined to the immediate area at the equipment reservoir in a few elevator rooms; and (4) minor staining and small pools of freshly spilled oil in some areas of the Hyundai automotive services building for which Hyundai representatives stated

are cleaned up on a daily basis and the used clay absorbent is placed in a drum. These stains and releases are limited in areal extent, the underlying pavement/flooring appeared to be intact, releases are cleaned up and/or in the process of being cleaned up, and are contained to the buildings. As such, Ramboll considers this matter to represent a *de minimis* condition.

7.1.1 Additional Considerations

Ramboll's scope of work was expanded to include the additional considerations identified in Section 1.3. The findings of the review of these additional considerations are summarized as follows:

- **ACMs.** The majority of the buildings were constructed prior and during 1972, except for the parking garage/Cinemark Theater building, which is prior to the time that asbestos was generally phased out of use in many building material applications during the mid-1980s. A limited screening survey was conducted at the site in 2021 that identified a total of 13 predominant suspect ACMs throughout the mall structures of which seven were sampled. None of the sampled materials were found to contain asbestos. Eight additional suspect ACMs were identified that were not sampled. The report concluded the following materials were assumed to contain asbestos: drywall and joint compound, roofing systems, and carpet/flooring adhesives generally throughout the structures; ceramic floor tile systems in the central shops and JC Penney; floor tile system in Target; and ceiling tile systems in Target and JC Penney. A 2022 Asbestos O&M Program was prepared to assist ARE with safely managing ACMs.
- **Lead-Based Paint**. Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the early 1970s. In 1978, the Consumer Products Safety Commission banned paint and other surfacing coating materials that are lead-containing paint. Based on the construction date of the buildings in 1969 and 1972, it is likely that LBP was used on facility structures. Facility personnel were not aware of the presence of any LBP on structures at the facility, and Ramboll observed the paint to be in good condition.
- **Water Intrusion/Mold**. Ramboll did not perform a mold survey at the site. Facility personnel reported that there had not been any past water intrusion events with the exception of roof leaks at the Sears department store that were immediately repaired, same day. No other information was available.
- **Radon**. Based on information included in the environmental database report, the site is located in an area categorized as Zone 2, which has average indoor basement radon levels between 2 and 4 picoCuries per liter (pCi/L). The USEPA's continuous exposure limit, which is the limit at which further testing or remedial action is suggested, is 4.0 pCi/L. This USEPA continuous exposure limit applies to residential, not commercial, properties. According to the California Radon database, out of 45 sites surveyed in San Mateo County, three sites were over 4 pCi/L. A USEPA survey conducted in the same zip code as the site found that the average radon level of a first-floor room at two sites was 0.100 pCi/L.

7.2 Analysis of Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps.

Limiting conditions and deviations to the ASTM Standard for the assessment are discussed below.

- Site representatives did not have current contact information for representatives of former site owners/occupants. Ramboll made reasonable attempts to obtain such information, but it was not otherwise readily available. Thus, Ramboll was unable to interview former owners/occupants about historical operations and site conditions. Due to extended age of the site, it was not possible to interview representatives dating back to the site's first developed use in the late 1800s. However, Ramboll conducted interviews with representatives of ARE with tenure at the site dating back to 2011 and reviewed other historical sources regarding former uses of the site.
- Historical information, such as aerial photographs, was not readily available to characterize the property from the present back to the property's obvious first developed use or 1940, whichever is earlier. The earliest readily available historical source that would indicate specific site uses is a Sanborn Map dated 1899 which shows the site was already developed as a portion of the Tanforan Racetrack.
- Ramboll requested information from the San Bruno City Fire Department and the SMCDEH; however, as of the date of this report, a response to Ramboll's requests had not yet been received.
- Due to the size of the site, Ramboll relied upon site representatives to provide access to areas of the site where petroleum products, hazardous materials, and waste is stored and only a portion of the roof areas were accessed as deemed to safely accessible. In addition, the majority of the commercial areas were observed from public spaces and the exterior areas were assessed from a vehicle. Much of the exterior was also covered by densely parked vehicles. These conditions inherently limited the visual survey.
- Because this assessment is being prepared on behalf of the owner of this site, the information required in the User Questionnaire consistent with Appendix X3 of the ASTM Standard was obtained through the site reconnaissance and interviews. As such, no User Questionnaire was not required to be completed.
- EDR provided an environmental lien and AUL search conducted for the current deed(s) comprising the site; however, the search did not include review of searches for liens and AULs dating to 1980, as required by the 2021 ASTM Standard.

None of the exceptions, deletions, deviations, or site reconnaissance limitations noted above is considered to represent significant data gaps.

8. ASTM DEFINITIONS

The following definitions are presented in the ASTM Standard:

REC - Recognized Environmental Condition:

(1) The presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

CREC - Controlled Recognized Environmental Condition:

A REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

HREC - Historical Recognized Environmental Condition:

A previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

De Minimis Condition:

A condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Data Gap/Significant Data Gap:

A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap that affects the ability of the environmental professional to identify a REC is considered a significant data gap.

Photo 26: Generator providing emergency power to the shops.

APPENDIX B
ENVIRONMENTAL DATABASE REPORT

NOTES ON ENVIRONMENTAL DATABASE REPORT

The third-party provider conducted its searches for the standard environmental record sources and the minimum search distances, as specified by the ASTM Standard. The ASTM Standard uses the terminology "approximate minimum search distance" to refer to the radii searched in the environmental database report.

Because the environmental databases themselves are sometimes not updated by the specific regulatory agencies for periods of up to one year or more (depending on the database and the state), the database search conducted herein will not necessarily list any facility or site for which an environmental investigation/listing has been initiated subsequent to the last update.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/25/2024 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2

CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 25 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to,

identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/22/2024 has revealed that there are 23 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 21 CPS-SLIC sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are

Local Land Records

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 08/22/2024 has revealed that there are 3 DEED sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 116 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

GOLDEN GATE NATIONAL		WSW 1/2 - 1 (0.793 mi.)	680	3207

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/13/2024 has revealed that there are 3 FINDS sites within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 55 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 65 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there are 7 HAZNET sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

CERS HAZ WASTE:

Name:	PETCO #1320
Address:	1150 EL CAMINO REAL STE 167
City,State,Zip:	SAN BRUNO, CA 94066
Site ID:	142672
CERS ID:	10464607
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	142672
Site Name:	Petco #1320
Violation Date:	03-28-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/28/2018. OBSERVATION: 3 partially full containers of hazardous waste lacked the accumulation start dates. During the inspection, the store manager added the accumulation start dates to each container. CORRECTIVE ACTION: Continue to ensure that all containers of hazardous waste are properly labeled.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS,

Site ID:	142672
Site Name:	Petco #1320
Violation Date:	06-14-2021
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 06/15/2021. There are two manifests from 2021. The initial copy of these two manifests were in the waste binder, but the final manifest copy was missing from the binder for both 2021 manifests. Obtain a copy of the "Designated facility to Generator" manifest copy for each of the 2021 manifests and provide documentation to SMCUPA within 30 days. Ensure final copies for all manifests are filed in the compliance binder.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is

SEARS, #1478 (Continued) **1007199969**

used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

BAY AREA AG INC DBA HYUNDAI OF SAN BRUNO (Continued) **1027544787**

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Salts

Waste Code: P081
Waste Description: 1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U279
Waste Description: U279

HYUNDAI OF SAN BRUNO (Continued) **S129058062**

6.95, Section(s) 25505(a)(4)

Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Returned to compliance on 01/30/2023. OBSERVATION: Training records for all applicable employees were not available at the time of the inspection. REQUIRED ACTION: Perform safety training for all employees, at a minimum including emergency response plans and procedures in the event of a release or threatened release of a hazardous material, notification procedures of appropriate parties and emergency response personnel, procedures for mitigation of a release or threatened release, and evacuation plans and procedures for the business site. Submit documentation to the Inspector demonstrating that all employees have received training. Ensure that initial and annual refresher training records for all employees are retained for a minimum of three years.

Violation Division: San Mateo County Environmental Health

Violation Source: CERS,

Site ID: 617645
Site Name: Hyundai of San Bruno
Violation Date: 12-15-2022

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/08/2023. OBSERVATION: The four white samson oil caddys did not have hazardous waste labels. The 5 drums in the hazardous waste accumulation area had labels that were not completely filled out. REQUIRED ACTION: Ensure that all containers holding hazardous waste are labeled with the following requirements: "Hazardous Waste", name and address of the generator, composition and physical state, hazardous properties, and the accumulation start date. Submit photos to your inspector showing this has been accomplished.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name: PANDA EXPRESS #1068
Address: 1150 EL CAMINO REAL STE 196
City,State,Zip: SAN BRUNO, CA 94066
Site ID: 750954
CERS ID: 10939108
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-20-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Onsite for initial routine inspection. Facility has four 50lb CO2 cylinders onsite, Manager stated they were in the process of completing employee training, and had the hmbp binder onsite with most staff signatures for completion of training. No CO2/Oxygen alarms were observed onsite for atmosphere monitoring. These are not required per this permit, but are good best practice safety equipment to have installed. -- No facility representative signature was obtained during the inspection due to lack of internet access.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Date: 09-05-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 09/05/2019. OBSERVATION: Destination signed copy of Uniform Hazardous Waste Manifest 000809514WAS from 3-8-18 was not not available at the time of inspection. During the inspection, a destination signed copy of the manifest was obtained from the DTSC database and emailed to the facility operator. CORRECTIVE ACTION: Continue to maintain a copy of all destination signed copies of manifests.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Violation Date: 07-17-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 09/14/2020. OBSERVATION: The business has not electronically submitted and certified that the business plan is complete, accurate, and in compliance on or before the annual due date. The most recent submittal is from 05/29/2019. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date, within 12 months of the most recent submittal.

Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 02/19/2020. OBSERVATION: The 1-5-20 designated operator (DO) report was not done within 30 days of the 12-3-19 DO report. The 11-4-19 designated operator (DO) report was not done within 30 days of the 10-1-19 DO report. The 8-5-19 designated operator (DO) report was not done within 30 days of the 7-2-19 DO report. The 5-31-19 designated operator (DO) report was not done within 30 days of the 4-30-19 DO report. The July 2019 DO report was not on site. The 7-2-19 designated operator (DO) report was not done within 30 days of the 5-31-19 DO report. DO inspections conducted after 9/30/2018 must be every 30 days and in accordance with sections 2716(a)-(e). CORRECTIVE ACTION: Continue to ensure that DO is complying with all the requirements noted above.

Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: OBSERVATION: UST tank information is not current in CERS. Any change of information must be updated in CERS within 30 days of the change. Tank Install date is listed as 1/1/1984. However tanks are listed as single wall fiberglass. According to Title 23 CH 16 definition: Existing UST: means installed prior to January 1, 1984. Since these tanks were installed on or after this date, they are considered new tanks. According to Title 23 and new tanks were required to be double walled tanks. I have looked back in our records and have only located an install date of 1984, see attached. Please look in your records and see if you have any other documentation that these tanks were installed in 1983 or before. Please take a moment to review all the information and make any necessary changes to the electronic forms as necessary as soon as possible CORRECTIVE ACTION: Within 30 days update the install date of the tanks in CERS and submit for review by the CUPA.

Eval Notes: Onsite to conduct routine inspection during annual monitoring certification. Facility is no longer branded as a Shell station, and according to Station Manager Roberto Gonzalez they have been doing business as The Hangry Planet since Nov 1, 2023. Last documented secondary containment testing was 7/31/23. Last documented Overfill test was 2/21/21. Technicians onsite stated they would be conducting an overfill test today. ATG probes were removed and functionality verified during inspection. -- Documentation onsite indicated that spill buckets were replaced by Service Station Systems 11/29/23. -- Monthly CSLD testing indicated on DO reports. Within last year, only the July 31, 2023 DO report was signed and dated in the owner/operator acknowledgment of section 6. Spoke with station manager about the requirement to sign and date this section within 72 hours of being provided the signed report. -- No facility representative signature was obtained during inspection. -- Please note that ...

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
