Los Angeles, California 90025

**Subject: Phase I Environmental Site Assessment (Assessment)**

**Site: Midway Rising  
Portions of Assessor's Parcel Number (APN) 441-590-04  
3220, 3240, 3250, 3350, and 3500 Sports Arena Boulevard, San Diego, CA 92110**

Dear Mr. Gemigniani:

SCS Engineers (SCS) is pleased to present this report (Report) of the Assessment of the above-described Site. This Report summarizes the results of the Assessment that was conducted in order to evaluate the Site's current environmental conditions. The work described in this Report was performed by SCS pursuant from the Consulting Contract between SCS and Midway Rising, LLC (Client).

Because your full understanding of the Assessment is important to us, SCS recommends that you read the Report in its entirety. However, if time does not allow you a complete reading, summaries may be found in text boxes at the end of each section (pages 37, 63, and 75), and our conclusions and recommendations may be found on page 77. A glossary of terms commonly used in environmental assessments is also provided in the Appendices to this Report.

SCS enjoyed working with you on this project. Providing economical environmental solutions to meet your needs is more than our goal—it is our mission and the measure of our success. If we may assist you in any way, now or in the future, please call our office at (858) 571-5500.

Sincerely,

Allison O'Neal

Résumés

# 1 BACKGROUND

Based on conversations with Midway Rising, LLC (Client) and a review of in-house databases, SCS Engineers (SCS) understands that the Sports Arena entertainment complex (currently known as Pechanga Arena) and vicinity, including 3220, 3240, 3250, 3350, and 3500 Sports Arena Boulevard, San Diego, California 92110 (Site), consists of the central and eastern portions of Assessor's Parcel Number (APN) 441-590-04, comprising approximately 48-acres of land (Figure 1). The Site is currently developed with Pechanga Arena, a gasoline service station, restaurants, and various commercial/retail businesses. The Client is planning to redevelop the Site into an entertainment-anchored mixed-use development that includes new residential, office, and retail uses, as well as a new arena.

The following information in connection with the Site is based on a review of the in-house ParcelQuest database of information from the San Diego County Assessor's Office and a project parcel map provided by the Client (Figure 2).

APN	Exhibit Parcel	Address	Area	Description
Central and eastern portions 441-590-04	A	3500 Sports Arena Blvd	33.58 acres	Sports Arena
	B	3500 Sports Arena Blvd	5.0 acres	Sports Arena Square-Commercial/Retail
	C	3350 Sports Arena Blvd	4.92 acres	Commercial/Retail
	D	3250 Sports Arena Blvd	3.8 acres	Dixieline Lumber
	E	3240 Sports Arena Blvd	0.59 acre	Salvation Army Thrift Store
	F	3220 Sports Arena Blvd	0.623 acre	Alpha Project Shelter

# 2 STANDARDS BACKGROUND

This Assessment was conducted in general accordance with the following:

- U.S. Environmental Protection Agency (EPA), 40 Code of Federal Regulations (CFR) 312, Standards and Practices for All Appropriate Inquiries; Final Rule (AAI)
- American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessment Process E1527-13
- The scope, conditions, and limitations of Exhibit 07

The Client understands that the above-referenced EPA and ASTM standards were not developed to identify all environmental risk to property. The standards were developed to allow a user (Client) to qualify for the innocent purchaser defense, bona fide prospective purchaser defense, and contiguous property owner defense to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, a.k.a. Superfund) liability. This Assessment is intended to constitute an appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice, as part of the due diligence process required by CERCLA, the Superfund Amendments and Reauthorization Act of 1986, and the Small Business Liability Relief and Brownfields Revitalization Act of 2002 (collectively, Acts).

While this Assessment may initially qualify the Client for a CERCLA defense, after purchase, there may be continuing obligations that must be implemented in order to preserve this defense through the term of property ownership. There may be additional requirements under state law that also apply. The Client should contact qualified legal counsel regarding matters of liability, interpretation of the Acts, and potential continuing obligations. Although it is outside the scope of this Assessment, SCS would be pleased to work with the Client's legal counsel to develop and implement a strategy to preserve the Client's CERCLA liability defenses through the term of its ownership.

This Assessment focused on potential sources of hazardous substances and petroleum products that could be considered either a recognized environmental condition,<sup>1</sup> controlled recognized environmental condition,<sup>2</sup> or historical recognized environmental condition,<sup>3</sup> and potentially a liability due to their presence in significant concentrations (e.g., above acceptable limits set by the federal, state, or local government) or due to the potential for exposure and risk due to contaminant migration and complete exposure pathways (e.g., soil vapor inhalation or groundwater ingestion). Materials that contain substances that are not currently deemed hazardous by the EPA or the California Environmental Protection Agency were not considered as part of this Assessment.

Unless specifically included in SCS' scope of services, building materials such as asbestos, lead-based paint, urea formaldehyde, and pressure-treated lumber, as well as lead in drinking water, are not considered in this Assessment, nor are building issues such as fire safety, indoor air quality (with the possible exception of vapor intrusion), mold, or similar matters. SCS did not evaluate the Site for compliance with land use, zoning, wetlands, or similar laws. This Assessment also excludes regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, and high-voltage power lines. This Assessment is not intended to be an environmental compliance audit.

Hazardous substances occurring naturally in plants, soils, and rocks (e.g., heavy metals, naturally occurring asbestos, and radon) are not typically considered in these investigations. Similarly, construction debris (e.g., discarded concrete, asphalt) is not considered, unless obvious indications suggest that hazardous substances are likely to be present in significant concentrations or likely to migrate.

- 
- <sup>1</sup> *Recognized environmental conditions*, as defined by ASTM, include the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. However, the term is not intended to include *de minimis* conditions (a condition that generally does not present a threat to human health or the environment and that generally would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies). A condition considered *de minimis* is not a recognized environmental condition.
  - <sup>2</sup> *Controlled recognized environmental condition*, as defined by ASTM, is a *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity use limitations, institutional controls, or engineering controls).
  - <sup>3</sup> *Historical recognized environmental condition*, as defined by ASTM, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An evaluation of business environmental risk associated with a parcel of commercial real estate may necessitate investigation beyond that included herein.

### **3 OBJECTIVE**

The objective of the scope of services was to assess the likelihood that recognized environmental conditions are present at the Site as a result of the current or historical Site land use or from a known and reported off-Site source.

### **4 SCOPE OF SERVICES**

The scope of services designed and conducted to meet the objective was as follows:

- Site Reconnaissance, Site Research, Interviews, and User Requirements
- Topography, Geology, Hydrogeology, and Water Quality Survey
- Site Vicinity Reconnaissance and Off-Site Source Survey
- Historical Site and Site Vicinity Land Use Review
- Identification of Data Gaps
- Data Evaluation, Figure Preparation, and Assessment Report Preparation

### **SITE RECONNAISSANCE**

On February 6, 7, and 9, 2023 and March 23 and 24, 2023, SCS personnel conducted a Site reconnaissance to observe and document existing Site conditions.<sup>i</sup> The general Site location is shown in Figure 1, and a Site and Site Vicinity Plans are shown in Figures 2, 3, 4, 5, 6, and 7. Selected color photographs of the Site and Site vicinity are presented as Figures 2a – 2e, 3a – 3e, 4a – 4h, 5a – 5n, 6a – 6g, and 7a – 7h.

The interiors of the Site buildings were observed, and the Site grounds and Site perimeter were systematically traversed on foot during the Site reconnaissance. Mr. Ralph Bedoe, Penchanga Arena Chief Engineer for 39 years; Mr. Jason Suchil, Lead Monitor for 2 years with The Alpha Project Shelter; Mr. Conor Murphy, Chili's Restaurant General Manager for 5 years; Mr. Gary Xander, Dixieline Lumber Yard Manager for 1 year; and Mr. Ali Tannir, Assistant Real Estate Manager, Intersection, accompanied SCS personnel, provided access to the observed features, and answered questions posed by SCS personnel. Limited information was provided by the Summit Gasoline and Sports Arena Car Wash manager during the site reconnaissance.

Access was not granted to the office and storage area within the convenience store at Summit Gasoline in Parcel B. Given the nature of the property use as a gasoline service station, this data gap is considered significant due to the possible presence of features of concern (clarifiers, sumps, hazardous materials storage areas) typical for gasoline service stations.

Access to unit 3350-J in Parcel C was not available at the time of any Site visit. The unit appeared to be occupied by tenant Kite Country, a kite retail store. Based on the nature of the use, this access limitation is not considered a significant data gap.

Access to Parcel E was limited to the retail area at the time of the Site visits. The Area appeared to be occupied by tenant Salvation Army Thrift Store, a retail store. Based on the nature of the use, this access limitation is not considered a significant data gap.

Access to storage units and a shipping container located in the parking area of Parcel F was not provided at the time the Site visits. The area and storage appeared to be used by Modern Times restaurant and is not considered a significant data gap based on the reported use of the storage units and shipping container for restaurant storage and the availability of other relevant information.

Access to storage units on the far west side of Parcel A was not granted at the time of the Site visit. These are presumed to be associated with Kobey's Swap Meet and is not considered a significant data gap based on the nature of the use.

Access was not granted to a grass area along the northeast central portion of the Site, as well as storage sheds to the southwest of this small arena. The sheds are reportedly used by sports teams affiliated with the Sports Arena, therefore, based on the nature of the use the access limitation is not considered significant data gap. Several shipping containers used for storage were also not accessible, as well as cellular equipment sites. At least one of the shipping containers may be used to store additional maintenance materials and thus may contain hazardous substances. No evidence of any significant releases or spills was observed, therefore this limitation is not considered a significant data gap.

A portion of the storage area to the north of the Sports Arena is leased by Top Grade Engineering and was not accessible during the Site visit. Hazardous materials and petroleum products may be stored in this area; therefore, the access limitation is considered significant.

Within the Sports Arena, portions of the San Diego Gull's locker room facility, as well as most of the food concessions and several offices, were not accessible. Based on the nature of the use, this access limitation is not considered a significant data gap.

## General Information

The following table summarizes general information in connection with the Site.

<b>APN</b>	Central and eastern portions of APN 441-590-04
<b>Addresses</b>	3220, 3240, 3250, 3350 and 3500 Sports Arena Boulevard, San Diego, CA 92110
<b>Area</b>	Approximately 48 acres
<b>Site Land Use</b>	Various commercial uses

<b>Occupants and Figure Reference</b>	<b>Parcel A</b> 3500 Sports Arena Blvd: Pechanga Arena and parking lot <i>Figures 5a through 5n</i>
	<b>Parcel B</b> 3494 Sports Arena Blvd: Chili's Restaurant 3570 Sports Arena Blvd: Chick-Fil-A Restaurant 3580 Sports Arena Blvd: Summit Gasoline & Sports Arena Car Wash <i>Figures 3a through 3e and 4a through 4h</i>
	<b>Parcel C</b> 3340 Sports Arena Blvd: Sports Arena Square-Commercial/Retail 3350 Sports Arena Blvd: Two vacant units, Crack in the Wall Picture Frames, Kite Country, The Arena Gym, Soma Concert Venue 3360 Sports Arena Blvd: Rock and Roll San Diego Music School, The Arena Gym, and Kobey's Swap Meet <i>Figures 6a through 6g</i>
	<b>Parcel D</b> 3250 Sports Arena Blvd: Dixieline Lumber <i>Figures 7a through 7h</i>
	<b>Parcel E</b> 3240 Sports Arena Blvd: Salvation Army Thrift Store <i>Figures 7a through 7h</i>
	<b>Parcel F</b> 3220 Sports Arena Blvd: The Alpha Project Shelter and parking area <i>Figures 7a through 7h</i>

## Site Buildings and Site Grounds

The following table summarizes information in connection with the Site buildings.

<b>Number of Buildings</b>	13 buildings and approximately 5 sheds
<b>Interpreted Construction Date</b>	Circa 1966 for parcels A, D, E and F Circa 1979 for parcel C Circa 1970*/2003 for parcel B
<b>Number of Stories</b>	Various, 1 to 3
<b>Construction Types</b>	Various: pre-cast concrete, masonry block, and wood frame construction types. Concrete slab-on-grade foundations
<b>Figure Reference</b>	Figures 2a – 2b, 3a – 3c, 4a, 4e, 5a, 6a, and 7a, 7b, and 7e.

Note:

\* A group of structures interpreted to be a gasoline service station are present in a 1970 aerial photograph in the approximate location of the current gasoline service station in Parcel B. This station was not present in the 1979 or subsequent aerial photographs.

## **Summit Gasoline Service Station & Sports Arena Car Wash: Parcel B, 3580 Sports Arena Blvd**

Summit Gasoline Service Station and Sports Arena Car Wash, or the western portion of Parcel B, on Site is developed with two one-story buildings (Figure 3). The building on the central portion of the Area is occupied by Summit gasoline service station and food mart (Figure 3a-1). The building on the eastern portion of this Area is occupied by Sports Arena Car Wash (Figure 3c-1). The Site's current and historical use as a gasoline service station and car wash and the associated features of environmental concern (petroleum products/wastes, underground storage tanks [USTs], fuel dispensers, and sumps/clarifiers) are discussed in the "Department of Environmental Health and Quality (DEHQ) File Review" section below.

A property representative was not available to provide answers to all questions posed by SCS during the site reconnaissance at the car wash. Based on observations made during the Site reconnaissance and our interpretations, the car wash on Site consists of a drive through car wash equipped with a five-stage clarifier system for reclaiming wash water (Figure 3b-1).

The gasoline service station consists of eight multiple product dispensers on eight dispenser islands, with a total of sixteen fueling stations located underneath a fuel canopy, dispensing up to three grades of gasoline fuel (premium, plus, and regular unleaded) and diesel fuel. According to the current manager, there are a total of four USTs on Site (Figure 2):

- Three unleaded gasoline USTs, 10,000-, 12,000-, and 40,000-gallons, are located near of the western edge of the fuel canopy (Figure 3);
- One 10,000-gallon diesel UST located near of the western edge of the fuel canopy (Figure 3);

A printout from the monitoring system was requested, which would have confirmed the UST volumes, however the printout was not provided.

At the time of the site reconnaissance, three USTs were observed east of the convenience store and west of the car wash (Figure 3b). No information was provided by the gas station manager regarding the USTs.

The food mart consists of retail space, office space, and a storage area. A three-stage clarifier/grease trap was observed on the western exterior of the building and appears to be used by the food mart (Figure 3). Retail-size containers of motor oil and other automotive maintenance materials were observed in the food mart. The containers appeared to be properly stored and do not represent an environmental concern.

The Summit Gasoline & Sports Arena Car Wash grounds were observed to be developed with asphalt-paved parking areas, concrete-paved sidewalks (at the southern edge of the Site perimeter), and limited landscaping.

A fuel system vapor recovery system, including a clean air separation system tank, was observed west of the fuel dispensers (Figure 3).

Propane cages storing 20-pound cylinders for sale were observed along the northern and eastern areas of the gas station building.

An outdoor storage and trash/waste disposal area was observed along the eastern side of the gas station building. Two shipping containers storing retail products, electric landscaping equipment, a 5-

gallon gasoline can, and small retail quantities of pesticides and cleaning supplies were observed in this area (Figure 3d-1 and 3e-1). Two additional shipping containers were observed and are reportedly used for ice making equipment (Figure 3a-2). Two 55-gallon petroleum hydrocarbon waste drums were also observed. The drums appeared to be properly stored on plastic secondary containment pallets with no signs of significant spills or leaks. (Figure 3d-2).

Two clarifiers were observed in this area of the Site (Figures 3 and 3b-1):

- One five-stage clarifier/reclaimed water system associated with the car wash located in the eastern portion of this area of the Site;
- One food grade three-stage clarifier/grease trap associated with the food mart.

The interior of the clarifiers were not inspected at the time of the site assessment. The environmental concerns associated with the clarifiers are further discussed in the “Clarifier Systems/Ice Pits” section below. Please see the “Hazardous Materials/Petroleum Products” and “Hazardous Wastes” sections below for more details.

### **Chick-fil-A**

The Chick-fil-A building is a one-story fast-food establishment. Minor amounts of janitorial and maintenance supplies were present. No conditions of environmental concern were identified within the Chick-fil-A building (Figures 4 and 4e).

The building is surrounded by asphalt-paved parking areas, concrete sidewalks, and landscaping (Figures 4 and 4e). A grease trap and a grease container were observed in the parking lot to the west of the building. Given the use of the grease trap and container solely for food waste, they are not considered an environmental concern. Transformers were observed, which are discussed below (Figure 4).

### **Chili's**

Chili's is a one-story restaurant and bar. Minor amounts of janitorial and maintenance supplies were present. No conditions of environmental concern were observed within the Chili's building (Figures 4c-1 through 4d-2).

The restaurant is surrounded by asphalt paved parking, concrete sidewalks, and landscaping (Figures 4a-1 and 4b-2). A grease trap was observed in the parking lot to the north of the building (Figure 4a-2). Given the use of the grease trap solely for food waste, it is not considered an environmental concern. One transformer was observed, which is discussed below (Figure 4a-2).

What appeared to be patched soil borings were observed near the northwest and southeast corners of the building. These soil borings appear to coincide with locations of soil borings discussed the “Department of Environmental Health and Quality (DEHQ) File Review” section below.

### **Pechanga Arena**

The Pechanga Arena is a sports and entertainment venue. Mr. Ralph Bedoe, chief engineer, accompanied SCS during the arena site reconnaissance. A concourse with various concessions and eight restrooms surrounds the arena. Numerous concessions stands were inaccessible. Given the food service nature of these portions of the Site, this limitation is not expected to alter the findings of

this assessment and is not considered significant. Three grease traps are reportedly present within various food vendors' facilities, one of which was observed. The grease traps are discussed further below.

Administrative offices and a box office are present on the ground floor of the north side of the building. Cleaning supplies are stored in a janitor's closet within the administrative offices (Figure 5d-1). The supplies were stored in small retail quantities and appeared to be in good condition with no evidence of significant spills or leaks. The box office was not observed during this site assessment. Given the administrative nature of this portion of the Site, this limitation is not expected to alter the findings of this assessment and is not considered significant.

On the arena floor level, storage areas are present on the west and south sides of the building (Figure 5f-2). The storage areas contained chairs, flooring, and maintenance supplies as well as items for the various sports teams occupying the arena, including the San Diego Gulls, San Diego Sockers, and the San Diego Seals. Two kitchens are present at the southeast corner. A grease trap was observed adjacent to one of the kitchens, and a sewer sump pump was present in the other (Figure 5f-1). The sewer sump pumps on Site are serviced by an outside vendor every six months. To the south of the southernmost kitchen is an electric room with a dry transformer. A green room/catering room/dining room is also present in the southeast corner, as well as a press room. Five dressing rooms are present on the southeast side of the building. Multiple offices were present throughout the arena floor level.

A First Aid office was observed on the Concourse level, and a small sharps container was present. Given the small volume and good condition, the container is not considered an environmental concern.

A carpenter's shop is present to the north of the dressing rooms on the east side of the building. Within the carpenter's shop two dry transformers were observed, as well as typical maintenance and cleaning supplies. The containers were observed to be in good condition with no evidence of significant spills or leaks.

The San Diego Gulls locker room facility is present at the east side of the arena floor level. The facility consists of showers, locker rooms, storage, restrooms, and a laundry room; however, many of the rooms were locked and inaccessible. Based on the nature of the use as a sports facility, this limitation is not considered significant.

A storage room containing janitorial supplies and laundry facilities is present to the north of the Gull's facility. Cleaning products were observed in containers of 1-gallon or less and appeared to be in good condition with no evidence of significant spills or leaks. An additional sewer sump pump was observed at the east end of the room.

The Zamboni parking area is present in the northeast corner of the building. A large drain to capture melting ice was observed. The drain is connected to the municipal sewer system. According to Mr. Bedoe, sludge is cleaned from the drain approximately every six months by an outside vendor. No hazardous materials were observed to be stored near the drain.

The main electrical room is present at the northeast corner of the building. Within the electrical room is a diesel generator (Figure 5c-1). The generator reportedly holds 30 gallons of diesel fuel. The generator appeared to be in good condition, and no signs of spills or leaks were observed in the vicinity. One battery was observed next to the generator. A dry transformer was also present in the electrical room.

The mechanical room is occupied by various equipment and serves as storage for typical maintenance and paint supplies (Figure 5a-2). The original electric chiller, installed in 1966, is present in the southeast corner of the room. The chiller utilizes approximately 34,000 gallons of a water and ethylene glycol mixture. Periodically the chiller is serviced and ethylene glycol is drained into drums, then replaced back into the system. Numerous empty drums for this purpose are stored in the parking lot and are discussed further below.

A boiler for heating the building is present in the northeast portion of the mechanical room. The boiler is reportedly powered by natural gas.

Two additional electric-powered chillers are present in the northwest portion of the mechanical room.

A paint storage room was present on the exterior of the building along the north side of the mechanical room. Multiple 1- and 5-gallon containers of paint and other smaller volumes of paint supplies were present. The containers were observed to be in good condition with no signs of significant spills or leaks (Figure 5b-2).

A total of four flammables cabinets were observed in the mechanical room. Materials stored in the cabinets are discussed further below. One cabinet was inaccessible.

Additional maintenance supplies were stored throughout the mechanical room and are discussed further below. Materials were generally observed to be in good condition with no significant staining or other evidence of spills or releases. Therefore, the maintenance supplies are not considered a significant environmental concern.

The arena floor is equipped with two ice pits at either end. Each pit is 5 feet wide by 35 feet long and 5 feet deep. Ice drains into the pits as it melts and is later pumped out with a portable pump. According to Mr. Bedoe, sludge and paint from the arena floor accumulates in the pits. The pits were reportedly cleaned out once by an outside service.

A fenced storage area was present on the north side of the building exterior. A hydraulic recycling trash compactor was present. The hydraulic hoses appeared to be in good condition and no signs of significant leaks were observed. Near the compactor were multiple blue plastic 55-gallon drums and a 55-gallon metal drum labeled Dowthemr SR-1, which contains ethylene glycol for use as a heat transfer fluid. Small containers of diesel fuel and gasoline for an ice edger were observed, as well as propane cylinders. Three 20-gallon containers of biocides and inhibitors for the cooling system were also observed (Figure 5h-2). All of the containers appeared to be in relatively good condition with no signs of significant spills or leaks. Multiple CO<sub>2</sub> cylinders for soft drinks were also observed in this area.

Two grease traps are present on the southeast side of the Arena. The grease traps are used for the food concessions and are discussed further below. Given the nature of the use for food grade wastes, the grease traps are not considered an environmental concern.

Six cellular equipment sites are located on the exterior of the Arena. The cellular equipment areas were inaccessible. One of the cell sites, located on the southeast corner of the building, is equipped with a backup diesel generator. Mr. Bedoe did not have any information pertaining to hazardous substances or petroleum products associated with cellular equipment. Generators at cell sites typically have above ground storage tanks. No evidence of a significant spill or release was observed within the vicinity of the cellular equipment. In addition, the 55-gallon diesel AST associated with the generator is regularly inspected by the HMMD, and no violations indicating a significant release or

incident was identified in DEH records. Therefore, the diesel tank does not represent a significant environmental concern (Figure 5c-1).

Food service offices are present on the northeast side of the exterior of the Arena building. The offices were inaccessible at the time of our site reconnaissance. Given the presumed administrative nature of the offices, this limitation is not considered significant.

### **Pechanga Arena Site Grounds**

The Arena is surrounded by a large asphalt-paved parking lot. Typical minor staining was observed throughout the parking lot and is considered *de minimis*.

The western portion of the parking lot is occupied by Kobey's Swap Meet on Fridays, Saturdays, and Sundays. Although the majority of the area was unoccupied at the time of the Site reconnaissance, several structures related to the Swap Meet were present, including two food vendors, three shipping containers, five storage containers, and portable restrooms. None of the features were accessed during the site reconnaissance. However, there were no signs of any significant spills or releases in the vicinity of the storage structures. According to Mr. Bedoe, the storage containers are rented to swap meet vendors for storage. Given the presumed retail and food service nature of the structures, the access limitations are not expected to alter the findings of this report and are not considered significant. One plastic tote containing an unidentified, tar-like substance was observed along the western fence (Figure 5n). No signs of leaks or spills were observed in the vicinity of the tote. SCS recommends that the substance be properly characterized and disposed of prior to redevelopment.

To the northeast of the Arena are several storage areas and a grass-covered outdoor arena. The outdoor arena is located within a locked, fenced area and was not accessible. Several storage sheds were present and could not be accessed. However, given the use of the arena for sports training, this limitation is not considered significant.

To the north of the outdoor arena is a gated storage area used by Kobey's Swap Meet (Figures 5m-2 and 5n-1). The area was partially dirt-covered and staining was observed. Trash was present throughout the area, as well as numerous empty blue plastic 55-gallon drums. A trash compactor was present on the north side of the area. No evidence of significant leaks was observed near the hydraulic lines. Therefore, there is a low likelihood that the trash compactor represents an environmental concern. Discarded tires were observed in the northeast corner of the storage area. Several buckets and containers 5 gallons or less in volume appeared to be discarded in this area and included possible paint and motor oil. Given the staining observed in this area and the potential for hazardous waste to be present, the waste is considered a recognized environmental condition. SCS recommends evaluating this area during a Phase II environmental site assessment. A pole-mounted transformer was observed in this area and is discussed further below.

South of the outdoor arena is the "Boneyard", a storage area for the Sports Arena (Figure 5k-2). Within the Boneyard was a shed which was inaccessible and is reportedly used to store paint. It is possible that a significant amount of paint is stored in the shed. In addition, numerous 1- and 5-gallon paint buckets were present, as well as multiple plastic blue 55-gallon drums. These items are discussed further below. No evidence of significant releases or spills was observed. Three shipping containers used for storage were present, one of which was inaccessible.

East of the boneyard are several additional storage areas. The first was a fenced area with multiple storage containers reportedly used by the San Diego Gulls. The area was inaccessible. Several plastic totes, were observed in this area, some of which contained small amounts of unidentified

liquid. Given that the storage area is used by a sports team, it is unlikely that significant volumes of hazardous substances are stored in the area. Further east was an equipment storage for the arena. No hazardous substances or petroleum products were observed.

The following eastward area is leased by Top Grade General Engineering and was observed to store construction equipment and supplies. The area was locked and only partially visible through the fence. A portable diesel tank was observed in a truck bed, and several unidentified blue plastic drums were observed. The surface of the area was obscured with vehicles and supplies (Figure 5I-2). Given the nature of the business and the features observed, it is possible that hazardous substances and petroleum products are present in the area. Therefore, this limitation is considered significant. SCS recommends accessing the Top Grade General Engineering storage area for Site reconnaissance by an environmental professional at a later date once access is granted.

The easternmost storage area is occupied by Kobey’s Swap Meet (Figure 5m-1). In addition to storage, the area is used for employee parking. Several vehicles, trailers, and supplies were observed.

**Sports Arena Square: Parcel C, 3340, 3350, and 3360 Sports Arena Blvd**

Sports Arena Square, or Parcel C, consists of two commercial retail buildings, parking areas, and limited landscaping (Figures 6, 6a-1, and 6a-2). The tenants that occupy the buildings are summarized in the table below.

Tenant	Tenant representative, familiar with the company
The Arena Gym	Mr. Ken Dutkiewicz, since 2005
Crack in the Wall Picture Frames	Mr. Mickey Maynard, since 1978
Soma Theater	Mr. Len Paul, since 2002
Kite Country	Tenant not available during visit, unit occupied since 2000
Rock and Roll Music School	Ms. Shannon Woods, since 2010
Kobey’s Swap Meet	Mr. Chris Haesloop, since 1992

The tenant representatives in Parcel C stated that, to their knowledge, and with the possible exceptions of infrequent oil changes at Kobey’s Swap Meet, and cleaning and maintenance supplies, hazardous materials and petroleum products were not used or stored at the Site and that hazardous wastes were not generated at the Site. Also, to their knowledge, there have been no releases of hazardous materials, petroleum products, and hazardous waste at the Site. Please see the “Hazardous Materials/Petroleum Products” section below for details on the specific materials stored in each business (Figure 6g-1).

Units 3550-A and 3550-H3 were observed to be vacant (Figures 6b-1 and 6c-2).

The Arena Gym was observed to occupy several units in Parcel C, 3350-B, -C, -D, F, -H, -H2, -K, -K2, -L, 3360-G and -F. Boxing rings and martial art training areas are located in the central portion of the southern building, including one unit used as a film studio and offices, storage areas, and an employee break room. A circuit training facility is present in the farthest east unit of the southern

building, and a wrestling studio is present in the western central portion of the northern building (Figure 6b-2).

Crack in the Wall Picture Frame is located in the central portion of the southern building of Parcel C and consists of a retail space, frame construction and assembly areas, storage areas, an employee break area, and a restroom (Figure 6c-1). Mr. Maynard has been familiar with Parcel C on Site since 1978 and reported that a historical furniture stripping business was located in the unit currently occupied by Rock and Roll Music school, a print shop historically occupied the Kobey's Swap Meet unit, and a silk screening business occupied the location currently occupied by Mr. Maynard's business. Please see the "Historical Site Land Use" section below for more details on these historical site land uses. Mr. Maynard also reported a fire destroyed the central units of the southern building circa 1993 and they were subsequently rebuilt.

SOMA San Diego concert venue is a two-story unit located in the northwest corner of the southern building of Parcel C, consisting of a concessions area, main theater venue with stage, a side stage, storage areas, and restrooms on the ground floor; and offices, lounges, and dressing rooms on the second floor (Figure 6d-1). Mr. Paul reported that SOMA rents a sky jack when they need to move large concert equipment.

Rock and Roll San Diego Music School is located in the eastern and central portions of the northern building of Parcel C, consisting of a reception area, twenty-six rehearsal rooms, a recording studio, a lounge with stage, an instrument repair shop, storage areas, and restrooms (Figure 6d-2). Ms. Woods reports that some of their rehearsal rooms are leased to clients and one office in the business is leased to Pacific Records.

Kobey's Swap Meet is located in the far west unit of the northern building of Parcel C and consists of a maintenance area, hazardous materials storage area, office area, and tool work area (Figures 6e-1 through 6f-2). Mr. Haesloop reported that oil changes are completed in the unit about once or twice a year on the gas-powered carts parked in the unit. The used oil and waste oil filters are immediately taken to O'Reilly Auto Parts for proper disposal. Based on the reported infrequent oil changes, the maintenance on the gas-powered carts is not considered to represent a significant environmental concern.

#### **Dixieline Lumber: Parcel D, 3250 Sports Arena Blvd**

Dixieline Lumber, or Parcel D, consists of a two-story retail and corporate office building in the southern portion and a one-story retail product overstock storage building, a two-story lumber mill, and five single-story retail sheds that encompass a lumber yard in the central and northern portions of this area on Site (Figures 7, 7a-1 through 7b-2). Overstock lumber storage and a parking area were located in the northwest portion. This portion of the Site is enclosed by a 10-foot cinderblock-wall along the northern, western, and eastern perimeters.

Home improvement goods, such as lumber, electrical, plumbing, gardening, tools, and paint, were sold and stored on Site (Figures 7a-2 and 7b-1). Part of Dixieline's retail product was observed to be hazardous materials, such as paint and pesticides, which were in small retail quantities and located in the retail and overstock storage buildings (Figures 7 and 7c-1). Please see the "Hazardous Materials/Petroleum Products" section below for more details. Mr. Xander reported that rarely a can of paint or other hazardous material product is accidentally spilled on Site, no more than 5-gallons at a time, and when that happens they schedule a local waste removal company to come and properly dispose of the material.

Dixieline's corporate offices are located on Site on the second floor of the retail building.

The lumberyard was observed to consist of stacked lumber in the central area with an electric band saw surrounded by sheds and a lumber mill. The sheds surrounding the lumberyard stored additional home improvement retail products like cement, fixtures, and additional lumber. Mr. Xander reported that preserved chemically treated wood is stored but not treated or cut on Site. Additionally, according to aerial photographs, this area of storage and the lumberyard appears to have always been paved since Dixieline has occupied this area of the Site. Overstock storage for the lumber was observed along the northwestern edge of Parcel D. The lumber mill was observed on the northeastern side of the lumber yard and consisted of several electric saws and wood processing equipment, including a hopper (Figures 7d-1). Mr. Xander reported that the dust from the mill is properly collected and disposed of to the trash.

Historically Dixieline had fuel dispensers and underground fuel tanks for their delivery trucks (Figures 7 and 7c-2). Mr. Xander reported that currently Dixieline's trucks are not serviced or fueled on Site. Please see the "Site Research" section below for details on the historical fuel use in this portion of the Site. The delivery trucks park in the lumber yard or in the northwestern parking area. Also, five propane powered mini-forklifts are used and stored in the lumberyard. A generally square area was observed near the central gate out to Kurtz Street. This area had asphalt that was noticeably different than the surrounding asphalt covering the yard area of this facility. This area is in the general area records indicate a UST was located (see DEHQ records, below).

A back-up power diesel generator in good condition was observed on the western side of the overflow storage building (Figures 7 and 7d-2).

#### **Salvation Army Thrift Store: Parcel E, 3240 Sports Arena Blvd**

The Salvation Army Thrift Store or Parcel E, consists of one two-story retail building with a front loading dock, parking area, and limited landscaping (Figure 7 and 7e-1). Clothing, furniture, and home décor items were sold and stored on Site. The first floor of the building was observed to consist of retail space, with the northwest portion consisting of a loading dock and storage area. No hazardous materials or wastes were observed in Parcel E.

#### **The Alpha Project Shelter: Parcel F 3220 Sports Arena Blvd**

Parcel F was observed to consist of one commercial building and associated parking lot in the southern portion and a parking area with storage units and a shipping container in the northern portion (Figure 7). The building on this portion of the Site was observed to be used as a shelter for the Alpha Project, which consisted of a sleeping area with about 30 beds, a storage area, restrooms, and office space (Figures 7g-1 through 7h-1). The shelter parking lot contained portable showers in the southern area, portable restrooms and a recreation area with tables and a canopy in the eastern area, individual storage bins for each tenant and a shipping container with furniture in the northern portion (Figures 7e-2 through 7f-2). A six-foot tall chain link fence is along the entrance to the shelter building parking lot as well as separating the northern and southern parking areas. The northern parking area is accessible from Kurtz Street and has storage units and a shipping container along the dividing fence (Figure 7h-2). Cleaning supplies were the only hazardous materials observed in Parcel F and are detailed in "Hazardous Materials/Petroleum Products" section below. No hazardous wastes were observed in Parcel F on Site.

## Clarifier Systems/Ice Pits

Six inground wastewater clarifiers were observed on Site, one associated with the Sports Arena car wash (5-stage) and the other five are food grade grease traps associated with the Sports Arena food service, the Summit Gasoline Station convenience store, Chick-fil-A, and Chili's. According to Mr. Bedoe, two grease traps are present within the concourse of the Sports Arena, two are present on the exterior of the Arena (inground), and one is present on the arena floor level. All of the grease traps are associated with food service. The grease traps associated with the arena are cleaned out approximately every six months by Ecogrease.

In addition, according to Mr. Bedoe, sludge and paint from the arena floor accumulates in the two ice pits located on either end of the Sport Arena floor, however according to Mr. Bedoe the pits have only been cleaned out once by an outside company.

Based on our experience, inground wastewater clarifiers and ice pits have the potential to release (e.g., through cracks or degradation of the concrete from poorly fitting or degraded piping) wastewater containing petroleum products, solvents, and hazardous wastes into the subsurface. This potential is exacerbated with time as the clarifier/ice pit systems age. In our experience, it becomes increasingly likely that systems more than 10 years old will experience a release.

Mr. Bedoe stated that the pits were constructed of 10-inch thick concrete which had been poured in place, and, to his knowledge, no cracks were present. Given the presence of sludge and paint, as well as the age of the structure (approximately 56 years) the ice pits are an environmental concern. SCS recommend an environmental consultant observe the removal of the pits and collect soil samples beneath the pits to be analyzed for volatile organic compounds (VOCs) and petroleum hydrocarbons.

The car wash wastewater clarifier has been used on Site for approximately 20 years or more. Due to the potential presence of petroleum hydrocarbons, metals, and VOCs associated with the clarifier use and the length of time the car wash clarifier has been present (more than 20 years), the potential for subsurface impacts beneath car wash clarifier cannot be ruled out. Therefore, the car wash clarifier is considered an environmental concern. SCS recommends oversight and confirmation soil sampling by an environmental professional upon removal of the car wash clarifier unit during redevelopment activities.

The grease traps associated with food operations are not considered a concern based on the collection of food grade wastes in these units.

## Hazardous Materials/Petroleum Products

Hazardous materials and petroleum products observed to be used or stored at the Site are summarized in the table below.

Hazardous Materials / Petroleum Products	Storage Location	Approximate Amount
<b>Summit Gasoline &amp; Sports Arena Car Wash: western portion of Parcel B, 3580 Sports Arena Blvd</b>		
Unleaded gasoline	USTs in western portion of the facility	10,000, 12,000, and 40,000 gallon USTs

Hazardous Materials / Petroleum Products	Storage Location	Approximate Amount
Diesel fuel	UST in western portion of the facility	10,000 gallon UST
Glass cleaner, all purpose cleaner with bleach, multi-service degreaser, windshield cleaning fluid, CLR, dawn soap, bleach, hand sanitizer, WD-40, Goo Gone, paint remover	Food mart	SRQs: liter or 1-gallon containers
Propane	Propane cage exchange	One hundred and forty-eight 20-pound cylinders
Ultraflex Lustra soaps, blue detergent and sealants	Car wash	5 to 20 gallons
<b>Pechanga Arena: Parcel A, 3350 Sports Arena Blvd</b>		
Diesel fuel	Generator in electrical room	30 gallons
Diesel fuel	Storage area on north side of building exterior	Small retail volumes
Diesel fuel	Cellular equipment, southeast side of arena	55-gallon AST
Diesel fuel	Portable diesel tank, storage area, east of arena	Unknown
Ethylene glycol/water mixture	Mechanical room	34,000 gallons in system
Biocides & inhibitors	North side of building exterior, near cooling equipment	Three 20-gallon containers
Propane	Fenced area, north side of building exterior; and on forklift	approximately 96 gallons
Gasoline	Fenced area, north side of building exterior	Small retail volumes
CO <sub>2</sub> cylinders	Cooling equipment enclosure	39 cylinders of unknown volume
CO <sub>2</sub> cylinders	Concourse food service	Unknown volumes and number of cylinders
Various refrigerants	Throughout mechanical room	Various sizes
Paint	Paint storage room	Approximately 66 1-gallon, four 5-gallon, two 2-gallon containers

Hazardous Materials / Petroleum Products	Storage Location	Approximate Amount
Maintenance and paint supplies (xylene, paint, paint remover, paint thinner, gasoline, sewer solvent, propylene glycol, orange solv, sodium hydroxide, acetone, panel adhesive, roof coating, spray paint, cleaners, motor oil, expansion joint material, nitrogen for leak tests and to charge refrigeration systems, canisters for recovering refrigerant)	Mechanical room, paint storage room	SRQs
Used refrigerator oil	Mechanical room	55-gallon drum
Maintenance supplies (acoustical ceiling tile adhesive, wood glue, wood floor cleaner, 40-minute mud, cleaners)	Carpenter's shop	SRQs
Maintenance supplies	Conversion office	SRQs
Paint	Boneyard, northeast of arena	Approximately 40 5-gallon and 60 1-gallon containers
Cleaning Supplies	Sports Arena administrative office, Sports Arena concourse; storage room on arena level; Gull's shower rooms; food vendors	SRQs
<b>Chick-Fil-A: Parcel B, 3570 Sports Arena Blvd</b>		
Cleaning Supplies	Under sink, storage area, and dining room.	SRQs
CO <sub>2</sub> cylinder	Back area	One cylinder, unknown volume
<b>Chili's: Parcel B, 3494 Sports Arena Blvd</b>		
Cleaning Supplies	Janitor's closets	SRQs
<b>The Arena Gym: Parcel C, 3350 Sports Arena Blvd</b>		
Paint, sealant, spray paint, various cleaners and disinfectants	Remodeled unit and storage area in the northern buildings	SRQs: liter, 1-gallon, or 5-gallon containers.
<b>Crack in the Wall Picture Frame: Parcel C, 3350 Sports Arena Blvd</b>		

Hazardous Materials / Petroleum Products	Storage Location	Approximate Amount
Paint, sealant, spray paint, comet, bleach, Drain-o, motor oil, denatured alcohol, turpentine, WD-40, solvents	Work and storage areas	SRQs: liter, 1-gallon, or 5-gallon containers.
<b>SOMA San Diego: Parcel C, 3350 Sports Arena Blvd</b>		
Spray paint, bleach, Drain-o, insecticide, various cleaners	Storage areas	SRQs: liter containers.
<b>Rock and Roll Music School: Parcel C, 3360 Sports Arena Blvd</b>		
Paint, wood stain, hand sanitizer, bleach, Ajax, various cleaners	Storage areas	SRQs: liter, 1-gallon, or 5-gallon containers.
<b>Kobey's Swap Meet: Parcel C, 3360 Sports Arena Blvd</b>		
Paint, Round-up, spray paint, motor oil, power steering fluid, Brake fluid, antifreeze, gasoline, hand sanitizer, bleach, various cleaners	Storage areas	SRQs: liter, 1-gallon, or 5-gallon containers.
<b>Dixieline Lumber: Parcel D, 3250 Sports Arena Blvd</b>		
Paint, paint thinner, primer, varnish, sealant, oil wood finish, wood and stain sealer, glues/adhesives, kerosene, Goo Gone, adhesive removers, acetone, silicon lubricant, shellac, WD-40, Simple Green cleaner, soaps, mold control, glass cleaner, CLR cleaner, Spray-nine cleaner, Round-up, pesticides and insecticides, fertilizer, homes pest control	Retail store and overstock storage	SRQs: liter, 1-gallon, or 5-gallon containers.
Propane	Lumberyard	Twenty 20-pound and five 33.5-pound cylinders
Diesel generator	Adjacent to overstock storage building	Undetermined, although estimated to be 50-gallons
<b>Alpha Project Shelter: Parcel F, 3220 Sports Arena Blvd</b>		
Cleaning Supplies	Storage area	SRQs

**Note:**

SRQs = Small retail quantities; i.e., quantities of hazardous materials in containers of 5 gallons or less, and less than 50 gallons in aggregate.

With the exception of petroleum storage at the gasoline service station that is further discussed in the “Department of Environmental Health and Quality (DEHQ) File Review” section below, the hazardous materials and petroleum products were observed to be stored in their original containers with no obvious evidence of spills or releases. Therefore, there is a low likelihood that the observed hazardous materials, with the exception of the gasoline service station area, represent a recognized environmental condition to the Site.

## Hazardous Wastes

Hazardous wastes observed to be generated at the Site are summarized in the table below.

Hazardous Waste	Location	Approximate Amount
<b>Summit Gasoline &amp; Sports Arena Car Wash: western portion of Parcel B, 3580 Sports Arena Blvd</b>		
Presumed petroleum hydrocarbon waste	Trash enclosure	Two 55-gallon drums
<b>Kobey’s Swap Meet: Parcel A, 3500 Sports Arena Blvd, north side of the Site, west of the Clean Harbors property</b>		
Motor oil and paint	North side of the Site, west of the Clean Harbors property	Small retail quantities
<b>Kobey’s Swap Meet: Parcel C, 3360 Sports Arena Blvd, far west unit</b>		
Used oil and oil filters	Maintenance unit, removed to O’Reilly Auto Parts immediately following removal	5-gallons

With the exception of Kobey’s waste/storage area discussed in the “Indications of Releases of Hazardous Materials/Wastes or Petroleum Products” section below, the hazardous wastes listed in the table above were observed to be stored in appropriate containers with no obvious evidence of spills or releases. In addition, no obvious indications of the generation of hazardous wastes were observed in Parcel A, D, E, and F at the Site during the Site reconnaissance. Therefore, there is a low likelihood that the observed hazardous wastes, with the exception of Kobey’s waste/storage area, are represent a recognized environmental condition to the Site.

## Indications of Releases of Hazardous Materials/Wastes or Petroleum Products

Staining observed in the Kobey’s waste/storage area on the north side of the Site, west of the Clean Harbors property, may be associated with spills of petroleum products and/or hazardous substances. Given the apparent use of the area for minor waste storage, as well as the presumed length of time that this area may have been used to store wastes (more than 35 years, based on aerial photograph review), this area has a low to moderate likelihood of representing a recognized environmental condition.

With regard to other areas of the Site, with the exception of minor surficial staining (interpreted to be from automotive lubricants) observed at various locations on the asphalt-paved parking areas, and a minor release from a quart-sized oil container, no obvious indications were observed that a release of hazardous materials/wastes or petroleum products had occurred at the Site. The minor surficial

releases identified above on paved surfaces are considered likely to be *de minimis* as defined by ASTM.

## On-Site Utilities

<b>Gas and Electricity</b>	Reported to be San Diego Gas and Electric (SDG&E)
<b>High-power Transmission Lines</b>	None observed at or adjacent to the Site
<b>Storm Drains</b>	Various storm drain inlets were observed along Sports Arena Boulevard and the southern perimeter of the Site. One storm drain inlet was observed at the northwest area of the parking area; one drain was observed near the southeast corner of the building.
<b>Source of Heating and Cooling</b>	Reported to be SDG&E
<b>Potable Water Source</b>	Reported to be supplied by the City of San Diego Public Utilities, Water Department
<b>Wastewater Conveyance</b>	Reported to be operated by the City of San Diego Public Utilities, Wastewater Department

Eleven SDG&E transformers were observed to be located at the Site. SDG&E has been contacted regarding the possibility of polychlorinated biphenyls (PCBs) being present in its transformers. SDG&E reported that it has never specified PCBs in their transformers. A copy of a letter from SDG&E explaining this and its PCB testing policy is included in the Appendices. In addition, no obvious indications of leaks, such as stained concrete, were noted near the transformers.

With the possible exception of clarifiers, ice pits, and USTs, described in the “Site Buildings and Site Grounds” section above, no obvious indications of wells, cisterns, pits, sumps, dry wells, or bulk storage tanks were observed at the Site.

## SITE RESEARCH

Attempts were made to research every address, current and historical, that is associated with the Site but due to its extensive area, it is possible that not all were searched from each regulatory agency. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.

## Department of Environmental Health and Quality (DEHQ) File Review

The DEH was contacted<sup>ii</sup> and the files for the Site were reviewed. The DEHQ files for the Site include Compliance Inspection Reports (CIRs) and/or UST Removal/Install reports for the period from 1989 through 2022. In addition, the September 2010 DEH HE-17 database of facilities storing hazardous materials, generating hazardous wastes, and discharging unauthorized releases was reviewed. The following table summarizes information obtained from review of CIRs, the in-house HE-17 database, and the EDR Radius Map Report regarding hazardous materials and petroleum products reported to be used and stored at the Site, hazardous wastes reported to be generated at the Site, and violations of the hazardous waste control law.

Year(s)	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
<b>H211563, San Diego Sports Arena (3500 Sports Arena Blvd)</b>		
2009 to 2014	Paint Sludge (60 gallons) Waste and mixed oil (25 gallons) Propane (432 cubic feet) Oxygen, nitrogen and acetylene gas (200 to 800 cubic foot cylinders) Dowterm SR-1: cooling tower chemicals (55 gallons) Used oil (5 gallons) Diesel generator Fluorescent light tubes Paint (fifty 5-gallon buckets)	Waste containers not closed Incomplete records Inadequate training Inadequate waste inspections Missing labels Waste accumulated greater than time allowed Missing EPA number Missing Hazardous Materials Business Plan
2015 to 2021	Oxygen, nitrogen and acetylene gas (200 to 800 cubic feet) Propane (1,944 cubic feet) Ethylene glycol (55 gallons) Lead acid batteries Diesel fuel Fluorescent light tubes	Inadequate training Missing labels Missing records
<b>Kobey's Swap Meet (3500 Sports Arena Blvd)</b>		
2005 to 2006	Unspecified solvent mixture Waste & mixed oil Oil water separation sludge (SCS did not observe an oil water separator on sight during our Site visit, this record maybe associated with the infrequent oil changes conducted at the Kobey's Swap Meet Unit in Parcel C described in the "Site Buildings and Site Grounds" section above). At the time of publication of this report, additional information was not available in regards to the oil separator sludge from Kobey's Swap Meet. Additional research or inspection of this data gap regarding oil water separator sludge is recommended.	None listed
<b>H201381, Arena Fuels/Arco AM-PM/Summit Gasoline Service Station (3580 Sports Arena Blvd)</b>		

Year(s)	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2004 to 2010	Regular unleaded gas (one 10,000-gal UST and one 20,000-gal UST) Premium unleaded gas (one 12,000-gal UST) Organics solids (220 pounds)	Missing secondary containment test Pump shut down/stop flow (2006) Response plan incomplete Monitoring procedures unavailable Inadequate records Line leak detector not installed/not functional (2007) Missing labels Water in sump UST system not product tight (2008) Containers not closed
2011 to 2014	Regular unleaded gas (one 10,000-gal UST and one 20,000-gal UST) Premium unleaded gas (one 12,000-gal UST) Car wash chemicals	None
2015 to 2019	Regular unleaded gas (one 10,000-gal UST and one 20,000-gal UST) Premium unleaded gas (one 12,000-gal UST) Car wash chemicals/soaps (55 gallons) Waste absorbent, fuel contaminated solids Sump/fuel-contaminated water	Spill bucket in poor condition Chemical inventory incomplete Inadequate records Liquid in sumps Inadequate inspections
2020 to 2021	Regular unleaded gasoline (one 10,000-gal UST and one 40,000-gal UST installed February 2020) Premium unleaded gasoline (one 20,000-gal UST) Diesel fuel (one 12,000-gal UST) Car wash chemicals/soaps (55 gallons) Waste absorbent, fuel contaminated solids Sump/fuel-contaminated water	Correct the contents and product piping in records Inadequate spill container Inadequate test leak detection

Year(s)	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2022	Regular unleaded gasoline (one 10,000-gal UST and one 40,000-gal UST installed February 2020) Premium unleaded gasoline (one 20,000-gal UST) Diesel fuel (one 12,000-gal UST) Car wash chemicals/soaps (55 gallons) Waste absorbent, fuel contaminated solids Sump/fuel-contaminated water	Small leak in sump, not enough to trigger alarm was cleaned Inadequate inspections Missing records Correct the contents and product piping in records Inadequate spill container Inadequate test leak detection
<b>H203017/121169, Dixieline Lumber (3250 Sports Arena Blvd)</b>		
1989	The DEHQ proposed action to remove one existing 1,000-gal regular leaded gasoline UST and one 1,000-gal diesel UST and install one double-walled 675-gal unleaded gasoline UST and one double walled 1,000-gal diesel UST. During this transition, no observations of an unauthorized release were observed; no staining or odors were present and the USTs were in good condition. Confirmation sampling in the excavation indicated no detections above the laboratory reporting limit for total petroleum hydrocarbons (TPH).	None
1991 to 1999	Organic solids (10 pounds) Gasoline pump dispensers One 675-gal unleaded gasoline UST One 1,000-gal diesel UST	Inadequate records Inadequate UST monitoring methods/records Missing hazardous materials business plan
2002	Organic solids (10 pounds) Gasoline pump dispensers One 675-gal unleaded gasoline UST One 1,000-gal diesel UST	None

Year(s)	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2003	One 1,000-gal diesel UST and one 675-gal regular unleaded gasoline UST were removed from the Site. USTs were observed to be in excellent condition and confirmation samples in the UST excavation areas indicated TPH and VOCs were not detected above laboratory reporting limits.	None
2004 to 2021	Paint/stain (1 gallon) Propane (176 to 184 gallons) Waste caulking Oily absorbent Waste paint/stain/varnishes Liquids with halogenated organic compounds Other inorganic waste	Incomplete records Inadequate training Missing labels Accumulated waste too long
<b>H201737, Verizon Wireless (3500 Sports Arena Blvd)</b>		
2002 to 2019	Sulfuric acid 30% battery electrolyte (88 gallons) Diesel generator (55 gallon aboveground storage tank [AST])	None
<b>H207348, TL Spa &amp; Wellness (3740 Sports Arena Blvd)</b>		
2006 to 2017	Sharps medical waste	None
<b>H001012, AT&amp;T Mobility (3500 Sports Arena Blvd)</b>		
2016 to 2018	Lead acid batteries (78.8 gallons)	None
<b>H135404, Air Touch Cellular (3500 Sports Arena Blvd)</b>		
1995 to 2003	Lead acid batteries (78.8 gallons)	None
<b>Bumper Medic (3350 Sports Arena Blvd)</b>		
2002 to 2003	Unspecified solvent mixture (15 gallons)	None
<b>The Strip Shop (3360 Sports Arena Blvd)</b>		
1986 to 1988	Paint sludge (1.2 tons)	None

Year(s)	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1990	Total organic hydrocarbon gases (4 tons) Reactive organic gases (1 ton)	None

## Gasoline Service/Fueling Stations

The Site has reportedly been developed with the following petroleum fueling stations:

- Dixieline Lumber including fueling stations at 3520 Sports Arena Boulevard (Parcel D, Figure 7) since approximately 1970 (53 years),
- A gasoline service station identified as Arena Fuels/Arco AM-PM/Summit Gasoline Service Station at 3580 Sports Arena Boulevard (Parcel B, Figure 3) since 2003 (20 years), and
- A historical gasoline service station identified as Union Oil/76 at 3494, 3580 or 3640 Sports Arena Boulevard (Parcel B, Figure 4) from at least 1966 to 1974 (8 years).

Gasoline service/fueling stations are associated with features of environmental concern (petroleum products/wastes, underground storage tanks [USTs], fuel dispensers, and clarifier/sumps).

According to the DEHQ records, soil sampling was conducted at Dixieline Lumber in 1989 and 2003 with the removal of Dixieline's USTs and fueling systems, in which these confirmation soil sampling events in the excavation areas, during both removals, indicated no detectable constituents of concern (CoCs), TPH and VOCs. No UST or fueling systems currently occupy this Area D on Site.

The DEHQ file H98431 regarding borings drilled at the Site during the Sports Arena Development in 2001 was reviewed. In September 1999, two borings were drilled near the southern perimeter of the Site, opposite Kemper Street approximately where Summit Gasoline is currently. The DEHQ file map indicated 'Union Oil Company of California', which could be affiliated with a former Union Oil/Union76/Unocal/76 Gasoline Station at this location of the Site. Mr. Ralph Bedoe, Chief Engineer for the Pechanga Arena since 1984, reported that he heard that there was a historical gas station on Site around the early 1970s in the area where the Chili's restaurant is currently. Two patched borings were observed in the Chili's parking lot during Site reconnaissance; although, one historical aerial photograph from 1970 shows a possible gasoline service station located where Summit gasoline station is currently. The DEHQ records indicate the borings were drilled opposite Kemper Street, the location of the existing station. In addition, the EDR Radius Map report indicates a Union Oil/Sports Arena Union gasoline service station at 3640 Sports Arena Blvd from 1970 to 1974 which is closer to the Summit Gas Station at 3580 Sports Arena Blvd. DEH, HE-17, and the response from the San Diego Fire Department (SDFD) indicated no other records are maintained for 3640 Sports Arena Blvd. No additional information such as laboratory analytical data for any soil or groundwater samples that may have been collected regarding the two patched borings observed in the Chili's parking lot were found in the provided records.

Based on the available information, it appears likely that the borings were located where the gas station is currently instead of the Chili's restaurant. From the DEHQ report, the borings were advanced to 52 feet below ground surface (bgs) and 91.5 feet bgs. Groundwater was encountered at 8.5 and 10 feet bgs. TPH (gasoline and diesel) and VOCs (methy-tert-butly-ether [MTBE], benzene,

toluene, ethylbenzene, and xylenes) were not detected above laboratory reporting limits in any of the soil or groundwater samples analyzed. In addition, the boring logs indicated that this location was a “historic dump site (circa 1900)”. For more information of the Site being used historically as a dumpsite, please see the “Burn Ash and Refuse Dumps” section below.

DEHQ records report the existing gasoline service station at 3580 Sports Arena Boulevard, USTs and system was installed in 2003, including a split regular unleaded gasoline 10,000-gallon and diesel fuel 12,000-gallon USTs, and one premium unleaded 20,000-gallon UST. In February 2020, one additional regular unleaded gasoline 40,000-gallon UST was added to this system. These four USTs and associated fueling system are currently in place. At the time of the site reconnaissance, three USTs were observed east of the convenience store and west of the car wash (Figure 3b). No information was provided by the gas station manager regarding the USTs.

No unauthorized releases of petroleum hydrocarbons were reported in the DEHQ files for the existing gas station. Minor violations were reported, however none were indicative of a significant spill or release and do not represent an environmental concern. Based on an absence of disposal violations, and the lack of known and reported releases, there does not appear to be a recognized environmental condition associated with the current use of this portion of the Site as a gas station. However, based on our experience, it is likely that surficial spills at the gas station have occurred, as the well possible vapor phase releases as a result of piping systems that were not historically vapor “tight.” Given the proposed redevelopment plans for the Site into a mixed use development with commercial/retail and residential uses along with the sports arena complex, these possible releases are considered recognized environmental conditions.

Information regarding removal of USTs from the historical service station are unavailable. Therefore, based on the lack of records pertaining to the condition of the subsurface following UST removal, this historical gas station is considered a recognized environmental condition and requires further research or investigation.

Subsurface investigation (geophysical survey, soil and soil vapor sampling) is recommended, in particular due to the proposed change in land use to include residential properties in the area of the current and historical gas stations.

Consultation with the DEHQ is recommended to address potential petroleum hydrocarbon impacts during the removal of the fuel systems and clarifiers on Site, and proper permits pertaining to the UST removal/replacement should be obtained from the DEHQ and City of San Diego Fire-Rescue department prior to redevelopment. Additional soil and soil vapor sampling, as recommended above, will also serve to update the prior investigations based on current regulatory standards. Also, the additional focused soil vapor sampling at the Site is recommended to assess possible impacts from the following (which are further discussed in the “Additional SCS Research” and “Historical Land Use Review” sections below):

- Research of nearby automotive repair, gas station, leaking underground storage tank (LUST) cases, and dry cleaning facilities to assess whether they have resulted in impacts.
- Historical agricultural, burn ash/refuse dumps, print shop, furniture stripping, and heating oil land use and to assess whether they have resulted in impacts.

## Fire Department Records Review

The City of San Diego Fire Department (SDFD) was contacted regarding hazardous materials/waste or UST records for the current and historical Site addresses of 3550, 3220, 3240, 3250, 3340,

3350, 3360, 3494, 3530, 3550, 3570, 3580, and 3640 Sports Arena Boulevard; 3464, 3280 Kurtz Street San Diego; and for 3640 Frontier Street, the likely historical address of the former gasoline service station. (Historical addresses were on Frontier Street and minor cross-streets of the Frontier district, named for colleges, war planes, and defense contractors [Holyoke Street, Liberator Street, Fleet Street, etc.]),<sup>iii</sup>

The following table summarizes the SDFD records provided to date for the Site. Copies of the records and correspondence are included in the Appendices.

Year	Description	Reported Owner
1989	Remove one 1,000-gal regular leaded gasoline UST and one 1,000-gal diesel UST and install one new 675-gal unleaded gasoline UST and one 1,000-gal diesel UST	Dixieline Lumber Company, 3250 Sports Arena Blvd
2003	Remove one 1,000-gal diesel UST and one 675-gal regular unleaded gasoline UST	Dixieline Lumber Company, 3250 Sports Arena Blvd
2003	Install new gasoline USTs, one 20,000-gal and one split 10,000-gal and 12,000-gal	Arena Fuels, 3500 (3580) Sports Arena Blvd
2009	Install gas vapors system	Arena Fuels, 3580 Sports Arena Blvd
2015	Install new 350 pound air compressor	Valley View Casino Center, 3500 Sports Arena Blvd
2019	Connect new double wall flex product piping and fiberglass vapor line from existing dispenser sump to new double wall dispenser sumps	Arco AM/PM, 3580 Sports Arena Blvd
2019	Install new 40,000-gal unleaded gasoline UST	Arena Fuels, 3580 Sports Arena Blvd
2018 - 2020	Fire Company Inspections found no violations	Chili's Grill & Bar, 3494 Sports Arena Blvd Salvation Army Thrift Store, 3240 Sports Arena Blvd Chick-fil-a, 3570 Sports Arena Blvd Rock and Roll Music School, 3360 Sports Arena Blvd Soma Concert Venue, 3350 Sports Arena Blvd
2023	Fire Company inspection found missing flame retardant certification on drapery; corrected	Soma Concert Venue, 3350 Sports Arena Blvd

Please see the “Department of Environmental Health and Quality (DEHQ) Records Review” section above regarding a further discussion of current and former USTs at the Site.

## Building Department Records Review

San Diego Development Services Department (DSD) building records were reviewed for the current and historical Site addresses of 3500, 3530, 3570, 3580, and 3640 Sports Arena Boulevard and are summarized in the table below. A response for additional historical Site DSD records has not yet been received at the time of publishing this report. Copies of the DSD records and correspondence for the Site are included in the Appendices<sup>iv</sup>.

Year	Description	Reported Applicant/Owner
1983	Tenant improvement, electrical	Office, 3500 Sports Arena Blvd.
1985	Permit to add to the Sports Arena	SD Entertainment, 3500 Sports Arena Blvd.
1993	Tenant improvements, new partitions	3550 Sports Arena Blvd.
1998	Temporary power pole	Commercial, 3535 Sports Arena Blvd.
1998	Permit to demolish Oshman's Store	3535 Sports Arena Blvd., Oshman's Retail
2001	Existing concession stand remodel	3500 Sports Arena Blvd.
2001	Permit to construct 3,990 square foot bakery	Kerr Project, 3570 Sports Arena Blvd.
2001	Sign installation	Krispy Kreme, 3570 Sports Arena Blvd.
2002	Temporary power pole	Krispy Kreme, 3570 Sports Arena Blvd.
2002	Permit to install gas utility lines	Great Circle Family Foods, 3570 Sports Arena Blvd.
2002	Permit to construct storage racks	Krispy Kreme, 3570 Sports Arena Blvd.
2003	Permit to construct new gas station	3580 Sports Arena Blvd., Mark Glover
2003	Permit to construct Chili's Restaurant	3530 Sports Arena Blvd.

## San Diego Air Pollution Control District (SDAPCD) Records Review

The SDAPCD was contacted<sup>v</sup> regarding records for the Site. Ms. Atifa Said of the SDAPCD reported records were available for addresses 3250, 3340, and 3580 Sports Arena Boulevard, which are summarized in the table below. Ms. Said reported that no SDAPCD records are available for 3550, 3220, 3240, 3350, 3360, 3494, 3530, 3550, 3570, and 3640 Sports Arena Boulevard and that to keep in mind that there may be limited or no records available for some retired sites and/or permits due to SDAPCD's retention schedule.

Year	Description	Reported Applicant/Owner
<b>Dixieline Lumber (3250 Sports Arena Blvd)</b>		
2001	Application to register natural gas-powered emergency generator.	Dixieline lumber
2001 to 2023	Emergency generator inspection, natural gas fuel, no violations and certificate of registration to operate	Dixieline lumber
2016	Water heaters sold in store do not meet code and were removed from sale	Dixieline lumber
<b>Arena Fuels/Arco AM-PM/Summit Gasoline Service Station (3580 Sports Arena Blvd)</b>		
2003 to 2024	Permit to operate gasoline dispensing facility with a vapor control system for each gasoline storage tank	Arena Fuels/Arco AM-PM
2008	Permit to construct a new vapor recovery system	Arena Fuels
2011	CalEPA complaint received that the dispensers do not shut off when the purchase is completed, and gas spills down the side of the vehicle onto the ground. The service station attendant was notified but nothing was done and the complaint reported that it is an ongoing issue. APCD inspection reported that interlock mechanisms at fueling points #5, #6, and #13 failed.	Arco AM-PM
2013 2014	Vapor recover inspection passed	Arena Fuels/Arco AM-PM
2014	Missing maintenance records	Arena Fuels/Arco AM-PM
2015	Ullage pressure leak test warning alarms were cleared without records of certified technicians completing the repairs. Corrected.	Arco AM-PM
2015	Failed insertion interlock on #16 dispenser nozzle, replaced.	Arena Fuels/Arco AM-PM
2016	Failed to pass all required annual tests	Arena Fuels/Arco AM-PM
2019	Application to add one 40,000 gallons UST and convert one UST to renewable diesel fuel	Summit Gasoline
2021	Permit to change processor from gas to arid permeator	Summit Gasoline
2022	Application to remodel with four additional dispenser with the addition of 8 dispenser nozzles	Arco
<b>Sports Arena Square (3340 Sports Arena Blvd)</b>		

Year	Description	Reported Applicant/Owner
2016	Permit to remove 300 square feet floor tile containing asbestos, no violations during inspection	Sports Arena Square

## San Diego Industrial Wastewater Program (IWP) Records Review

The IWP was contacted<sup>vi</sup> regarding records for the Site. According to the City of San Diego, no IWP records are maintained for the Site.

## Regional Water Quality Control Board (RWQCB) Records Review

The San Diego RWQCB was contacted for records for the current and historical Site addresses of 3550, 3220, 3240, 3250, 3340, 3350, 3360, 3494, 3530, 3550, 3570, 3580, and 3640 Sports Arena Boulevard, San Diego, CA 92110 (Historical addresses were on Frontier Street and little cross-streets of the Frontier district, named for colleges and war planes and defense contractors [Holyoke Street, Liberator Street, Fleet Street, etc.]. These addresses were not researched, as they were present prior to regulatory oversight).<sup>vii</sup> The RWQCB reported that no records are maintained for the Site and a copy of the correspondence is included in the Appendices.

## INTERVIEWS

The previously referenced EPA and ASTM standards require that attempts be made to conduct interviews with past and present owners and occupants of the Site to obtain information indicating recognized environmental conditions in connection with the Site. As part of this Assessment, the following contacts were either interviewed or attempts were made to conduct interviews.

Contact	Affiliation to Site	Description	Interview Date
Ms. Penny Maus	Current Site owner representative	Discussed below	April 21, 2023

Ms. Penny Maus, Director, Department of Real Estate and Airport Management of the City of San Diego since 2021, Site owner's representative, reported that the City has owned the Site since approximately 1956. Ms. Maus reported that the Sports Arena building was built in 1965 and the buildings on the retail pads may have been built circa 2002. She provided the lease history for the Sports Arena from 1963 to 2021 and noted that there was an operation sublease established for Krispy Kreme (currently Chick-Fil-A), Chili's and Arco in 2002. She reported that the gas station at 3500 Sports Arena Boulevard is a sub-tenant of the existing tenant, and that the City is not a party to their agreement and does not have any specific knowledge as to the petroleum products and USTs associated with the use of this property.

Ms. Maus stated that, to her knowledge, and with the possible exception of typical gas station related activities, it was unknown if hazardous materials and petroleum products were used or stored at the Site and that it was unknown if hazardous wastes were generated at the Site. Also, to her knowledge, it was unknown if there have been releases of hazardous materials, petroleum products, and/or hazardous waste at the Site. She was also not aware of fill soils at the Site.

Ms. Maus stated that she was not aware of environmental cleanup liens or activity and use limitations (e.g., engineering controls, deed restrictions) that have been recorded for the Site. She was not aware of pending or threatened litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site. She was not aware of notices from governmental entities regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site.

Please see the “Site Reconnaissance” section above for information provided by current Site tenants.

## USER REQUIREMENTS

In order to qualify for one of the landowner liability protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (discussed in the “Background” section), 40 CFR 312 requires that the user (Client) provide the following information to the environmental professional. Shelby Jordan II, Project Director with Midway Rising LLC, completed the User Questionnaire on April 11, 2023. The following table summarizes the responses by the Client.

Question	Response
Have environmental cleanup liens been filed or recorded against the Site?	No
Are activity or land use limitations in place at the Site, or have they been filed or recorded in the registry?	No
Does the user have specialized knowledge or experience in connection with the Site?	Yes*
Does the purchase price being paid for the Site reasonably reflect the fair market value of the Site?	NA*
Is the Client aware of commonly known or reasonably ascertainable information about the Site that would indicate releases or threatened releases?	No
Are there obvious indications that point to the presence of contamination at the Site?	Yes*

\*Mr. Jordan reported that their specialized knowledge of the Site is that they are aware of the Site’s arena operations use. He also reported that the ground lease has not yet been negotiated, therefore the purchase price being fair market value is not applicable at this time. Last, he reported that he was aware of the gas station use on the Site and its potential as a possible source of contamination at the Site.

## DATA GAPS IN CONNECTION WITH CURRENT SITE LAND USE

Based on observations and research, and with the possible exceptions discussed below, there are no obvious indications of data gaps in connection with the current Site land use:

- SCS was unable to find contact information for previous Site owners or tenants via online searches. Therefore, interviews were not conducted with the previous Site owners or tenants. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.

- Access was not provided to portions of the Summit Gasoline service station. This represents a significant data gap due to the possible presence of features of concern (clarifiers, sumps, hazardous materials storage areas) typical for gasoline service stations. SCS recommends accessing the entire Summit Gas facility with a person who has knowledge of the facility once access is granted.
- At the time of publication of this Report, additional records have not been received from the DSD. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.
- Attempts were made to access all areas of the Site, although access was limited in some portions of Areas A, C, and F. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.
- Access was not provided to the Top Grade General Engineering storage area located on the Pechanga Arena Site grounds. SCS recommends accessing the Top Grade General Engineering storage area for Site reconnaissance by an environmental professional at a later date once access is granted.
- Attempts were made to research every address, current and historical, that is associated with the Site but due to its extensive area, it is possible that not all were searched from each regulatory agency. This data gap is not a significant data gap in our opinion based on the availability of other relevant information.
- At the time of publication of this report, additional information was not available in regards to the oil separator sludge from Kobey's Swap Meet. Additional research or inspection of this data gap regarding oil water separator sludge is recommended.

### Findings and Opinions—Current Site Land Use

Based on observations and research and with the exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of the current Site land use.

#### Clarifier Systems/Ice Pits

Six inground wastewater clarifiers were observed on Site, one was associated with the Sports Arena car wash (5-stage) and the other five are food grade grease traps associated with the Sports Arena food service, the Summit Gasoline Station convenience store, Chick-fil-A, and Chili's. According to Mr. Bedoe, two grease traps are present within the concourse of the Sports Arena, two are present on the exterior of the Arena (inground), and one is present on the arena floor level. All of the grease traps are associated with food service. The grease traps associated with the arena are cleaned out approximately every six months by Ecogrease.

In addition, according to Mr. Bedoe, sludge and paint from the arena floor accumulates in the two ice pits located on either end of the Sport Arena floor. The pits have reportedly been cleaned once in the life of the sports arena.

Based on our experience, inground wastewater clarifiers and ice pits have the potential to release (e.g., through cracks or degradation of the concrete from poorly fitting or degraded piping) wastewater containing petroleum products, solvents, and hazardous wastes into the subsurface. This potential is exacerbated with time as the clarifier/ice pit systems age. In our experience, it

## Findings and Opinions—Current Site Land Use

becomes increasingly likely that systems more than 10 years old will experience a release. Based on their age (approximately 20 years or more), there is a low to moderate likelihood that a recognized environmental condition (REC) exists at the Site from the car wash clarifier located in Parcel B. Due to the potential presence of metals and VOCs associated with the sludge and the length of time the pits have been present (more than 50 years), the potential for subsurface impacts beneath the pits cannot be ruled out. Therefore, the ice pits are considered an environmental concern. SCS recommends oversight by an environmental professional upon removal of the ice pits during redevelopment activities.

The grease traps associated with food operations are not considered a concern due to the collection of food grade waste within these units.

### Indications of Releases of Hazardous Materials/Wastes or Petroleum Products

Staining observed in the Kobey's waste/storage area on the north side of the Site, west of the Clean Harbors property, may be associated with spills of petroleum products and/or hazardous substances. Given the apparent use of the area for minor waste storage, as well as the presumed length of time that this area may have been used to store wastes (more than 35 years, based on aerial photograph review), this area has a low to moderate likelihood of representing a recognized environmental condition.

### On-Site Gasoline Service/Fueling Stations

The Site has been developed with Dixieline Lumber including fueling stations at 3520 Sports Arena Boulevard (Parcel D, Figure 7) since approximately 1970 (53 years), a gasoline service station identified as Arena Fuels/Arco AM-PM/Summit Gasoline Service Station at 3580 Sports Arena Boulevard (Parcel , Figure 3) since 2003 (20 years), and a historical gasoline service station Union Oil/76 at 3494, 3580, or 3640 Sports Arena Boulevard (Parcel B, Figure 2) from approximately 1966 to 1974 (8 years). Gasoline service/fueling stations are associated with features of environmental concern (petroleum products/wastes, underground storage tanks [USTs], fuel dispensers, and clarifier/sumps).

DEHQ records indicate the USTs and fueling systems at Dixieline have been removed and soil confirmation samples taken in the excavation areas indicated CoCs were not detected above laboratory reporting limits.

DEHQ and EDR records indicate that a historical gasoline service station occupied the area where Summit Gasoline is currently, or possibly, where Chili's is currently according information obtained through interviews with the tenant, circa late 1960s to early 1970s. Soil and groundwater samples taken on Site in geotechnical borings in the area opposite Kemper Street indicated CoCs were not detected above laboratory reporting limits.

DEHQ records report the existing gasoline service station at 3580 Sports Arena Boulevard, USTs and system was installed in 2003, including a split regular unleaded gasoline 10,000-gallon and diesel fuel 12,000-gallon USTs, and one premium unleaded 20,000-gallon UST. In February 2020, one additional regular unleaded gasoline 40,000-gallon UST was added to this system. These four USTs and associated fueling system are currently in place. At the time of the site reconnaissance,

### Findings and Opinions—Current Site Land Use

three USTs were observed east of the convenience store and west of the car wash (Figure 3b). No information was provided by the gas station manager regarding the USTs.

No unauthorized releases of petroleum hydrocarbons and minor violations were reported in the DEHQ files the existing gas station. Based on an absence of disposal violations, and the lack of known and reported releases, there does not appear to be a recognized environmental condition associated with the current use of this portion of the Site as a gas station. However, based on our experience, there are likely surface release(s) spills at the gas station that have occurred, as the well possible vapor phase releases as a result of piping systems that were not historically vapor “tight.” Also the lack of information regarding the three USTs observed east of the convenience store and west of the car wash. Combined with the proposed redevelopment plans for the Site into a mixed use development with commercial/retail and residential uses along with the sports arena complex, these possible releases are considered potential recognized environmental conditions.

Information regarding removal of USTs from the historical service station are unavailable. Therefore, based on the lack of records pertaining to the condition of the subsurface following UST removal, this historical gas station is considered a recognized environmental condition and requires further research or investigation.

Subsurface investigation (geophysical survey, soil and soil vapor sampling) is recommended, in particular due to the proposed change in land use to include residential properties in the area of the current and historical gas stations.

Consultation with the DEHQ is recommended to address potential petroleum hydrocarbon impacts during the removal of the fuel systems and clarifiers on Site, and proper permits pertaining to the UST removal/replacement should be obtained from the DEHQ and City of San Diego Fire-Rescue department prior to redevelopment. Additional soil and soil vapor sampling, as recommended above, will also serve to update the prior investigations based on current regulatory standards.

#### Potential Historical Burn Dump

A review of DEHQ file H98431 regarding two borings drilled at the Site in 2001 in the location opposite Kemper Street at the existing gas station, found that the boring logs in the file indicated this location was a “historic dump site (circa 1900)”. For more information of the Site being used historically as a dumpsite, please see the “Burn Ash and Refuse Dumps” section below.

## TOPOGRAPHY, GEOLOGY, HYDROGEOLOGY, AND WATER QUALITY SURVEY

### Topography

A topographic map for the Site vicinity was reviewed and is summarized in the following table.

<b>Reported Elevation</b>	Approximately 5 feet above mean sea level
<b>Reported Slope Direction</b>	Slopes down to the west

<b>Source</b>	United States Geological Survey 7.5 Minute Topographic Map, La Jolla Quadrangle, California – San Diego County, 2018
---------------	--

## Geology

A geological map for the Site vicinity was reviewed and is summarized in the following table.

<b>Reported Formation</b>	Artificial fill (af), Urban land, placed historically
<b>Reported Description</b>	Urban land and deposits of fill resulting from human construction, mining, or quarrying activities; includes compacted engineered and non-compacted, non-engineered fill.
<b>Source</b>	Kennedy, Michael P., and Siang S. Tan, <i>Geologic Map of the San Diego 30' x 60' Quadrangle, California</i> , California Geological Survey, 2008; and United States Department of Agriculture Web Soil Survey, <a href="https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx">https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx</a>

Possible concerns from artificial fill at the Site are further discussed in the “Historical Site Land Use” section below.

## Hydrogeology

Data regarding depth to groundwater and flow direction for the Site were available from the currently ongoing Phase II ESA being conducted at the Site by SCS for the Client. The following table summarizes the results of from the Phase II ESA.

<b>Property Location</b>	Parcels A and B on Site
<b>Reported Depth to Groundwater</b>	8 to 10 feet below grade
<b>Reported Groundwater Flow Direction</b>	Estimated to flow to the west/northwest but variable
<b>Source</b>	<i>Phase II ESA</i> , SCS Engineers in the process of being completed March 2023

Many variables influence depth to groundwater and flow direction and the actual depth to groundwater and flow direction at the Site may be different than presented in this section.

## Water Quality Survey

The following table summarizes the reported water quality in the Site vicinity.

<b>Reported Hydrologic Subarea</b>	Mission San Diego (907.11)
<b>Reported Hydrologic Area</b>	Lower San Diego (907.10)
<b>Reported Hydrologic Unit</b>	San Diego (907.00)

<b>Reported Beneficial Use</b>	None. Due to the Site's location west of the easterly boundary of the Interstate 5 right-of-way, the Site is excepted from the sources of drinking water policy.
<b>Source</b>	California RWQCB, San Diego Region, <i>Water Quality Control Plan for the San Diego Basin</i> , September 8, 1994, with amendments effective prior to May 17, 2016

## SITE VICINITY RECONNAISSANCE AND OFF-SITE SOURCE SURVEY

### Current Site Vicinity Conditions

The following table summarizes land use and observations in the immediate Site vicinity.<sup>viii</sup> For the purpose of this Report, the immediate Site vicinity includes those properties judged to be adjacent<sup>4</sup> to the Site.

Direction	Land Use	Comments
Northeast	San Diego Tattoo (3780 Hancock Street) <b>Autohaus Munich, SC Welding and Metal Works, and Torque Spec Garage (3770 Hancock Street)</b> <b>Cylinder Head Services (3760 Hancock Street)</b> Modern Times Restaurant (3612 Kurtz Street) Consignment Classics (3602 Kurtz Street)	Hazardous materials/wastes or petroleum products use, storage, or generation were observed and are discussed in the "Additional SCS Research" section below.

<sup>4</sup> *Adjacent* is defined by ASTM E1527-13 as any real property or properties the border of which is contiguous or partially contiguous with that of the Site or that would be contiguous or partially contiguous with that of the Site but for a street, road, or other public thoroughfare separating them.

Direction	Land Use	Comments
Northeast continued	<p><b>Quality Towing and Truck Repair (3550 Kurtz Street)</b> Wind n Sea Towing (3540 Kurtz Street)</p> <p><b>SS Building Pacific Petroleum Equipment (3520 Kurtz Street)</b> <b>Clean Harbors Environmental, MAT Parcel Express (3495 Kurtz Street)</b> MP3 Your Car Cardtronic ATM (3487 Kurtz Street)</p> <p><b>US Battery, Campfire Customs, Livin' Metal (3486 Kurtz Street)</b> Wilkin Corporation (3479 Kurtz Street)</p> <p>Keco Inc. Home Goods (3467 Kurtz Street)</p> <p>Multi-tenant Office Building (3469-3479 Kurtz Street)</p> <p>Sunglass and Optical Warehouse, Streetnoyz Car Stereo, Textile 2000 LLC (3450 Kurtz Street)</p> <p>Orion Woodcraft Closet Works (3440 Kurtz Street)</p> <p>Seacoast Cabinets (3430 Kurtz Street)</p> <p>San Diego Ice Company (3412 Kurtz Street)</p> <p>TCE Constructors (3420 Kurtz Street)</p> <p>Roel Construction, Dan Clark Audio (3366 Kurtz Street)</p> <p>Chris Ruddy Surfboards (3344 Kurtz Street)</p> <p>Paradies Shops – San Diego (3312 Kurtz Street)</p> <p>The Dinghy Doctor (3710 Greenwood Street)</p> <p>Custom Modular Exhibits (3280 Kurtz Street)</p>	<p>Hazardous materials/wastes or petroleum products use, storage, or generation were observed and are discussed in the "Additional SCS Research" section below.</p>

Direction	Land Use	Comments
Southeast	EOS Fitness, Vibrant Eats (3156 Sports Arena Blvd) (Figure 2e-1) Rosecrans Plaza Parking lot (APN 441-650-15) Menchie's Frozen Yogurt (3225 Sports Arena Blvd) Key Korner Sports Arena (3241 Sports Arena Blvd) Union Bank (3261 Sports Arena Blvd) Pieology Pizzeria (3455 Sports Arena Blvd) Petco (3495 Sports Arena Blvd) (Figure 2c-2)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.
Southwest	Wells Fargo Bank (3505 Sports Arena Blvd) Parking lots (APNs 441-650-14, -17, & -18) Batters Box (3601 Sports Arena Blvd) <b>Evan Tire &amp; Service Centers (3655 Sports Arena Blvd)</b> San Diego Bay Animal Hospital (3681 Sports Arena Blvd) (Figure 2c-1)	Hazardous materials/wastes or petroleum products use, storage, or generation were observed and are discussed in the "Additional SCS Research" section below.
Northwest	Men's Fashion Depot and Phil's Event Center (3730 and 3740 Sports Arena Blvd) (Figure 2d-2) Vacant office building (4035 Hancock Street) CSRA Inc (4045 Hancock Street) Booz Allen Hamilton (4055 Hancock Street) SAIC Manufacturing (4065 Hancock Street)	No obvious indications of the use, storage, or generation of hazardous materials/wastes or petroleum products were observed.

## Environmental Regulatory Database Report

An environmental regulatory database report (Radius Map™ report<sup>ix</sup>) was prepared by EDR for the Site. Local, state, and federal regulatory databases were reviewed for the Site and for those facilities within up to 1 mile of the Site. The Radius Map™ report was reported to have been prepared in general accordance with the ASTM standard for the regulatory database review for Phase I Environmental Site Assessments. The locations of the referenced facilities relative to the Site are shown on the overview maps, included in the Radius Map™ report. A description of the various

databases, as well as the date each database was most recently updated, is included in the Radius Map™ report. The Radius Map™ report is included in the Appendices to this Report.

Based on a review of the Radius Map™ report, the following table summarizes the facilities within the selected search radii and whether the Site or a facility that was interpreted to be adjacent to the Site was listed on each database.

Federal or State Government Database	Search Radius	Number of Reported Facilities	On Site	Adjacent to the Site
National Priorities List (NPL)	1.00 mile	0	No	No
NPL Delisted	1.00 mile	0	No	No
Superfund Enterprise Management System (SEMS)	0.50 mile	0	No	No
No Further Remedial Action Planned (NFRAP)	0.50 mile	5	No	Yes
Resource Conservation and Recovery Act– Corrective Action (RCRA COR ACT)	1.00 mile	0	No	No
RCRA Treatment and Disposal Facilities (RCRA TSD)	0.50 mile	0	No	No
RCRA Generators (RCRA GEN)	0.25 mile	36	Yes	Yes
Federal Engineering and Institutional Controls (IC/EC)	0.50 mile	0	No	No
Emergency Response Notification System (ERNS)	0.12 mile	0	No	No
State/Tribal-Equivalent NPL	1.00 mile	3	No	No
State/Tribal-Equivalent CERCLIS (ENVIROSTOR)	1.00 mile	23	No	Yes
State/Tribal Solid Waste List (SWL)	0.50 mile	2	No	No
State/Tribal Leaking Underground Storage Tanks (LUST, San Diego County Site Assessment and Mitigation [SAM], Spills, Leaks, Investigation, and Cleanup [SLIC])	0.50 mile	119	No	Yes
State/Tribal Underground/Aboveground Storage Tanks (USTs/ASTs)	0.25 mile	18	Yes	Yes
State/Tribal Voluntary Cleanup Program (VCP)	0.50 mile	0	No	No
Federal Brownfields	0.50 mile	0	No	No
Local Lists of Landfill/Solid Waste Disposal Sites	Various	0	No	No

Federal or State Government Database	Search Radius	Number of Reported Facilities	On Site	Adjacent to the Site
Local Lists of Hazardous Waste/Contaminated Sites (San Diego HMMD, CERS Haz Waste)	Site only to 0.050 mile	64	Yes	Yes
Local Lists of Registered Storage Tanks (Statewide Environmental Evaluation and Planning System [SWEEPS UST], Historic UST, CA Facility Inventory Database [FID] UST)	0.25 mile	62	Yes	No
Local Land Records (DEED)	0.50 mile	0	No	No
Records of Emergency Release Reports	0.001 mile	0	No	No
Other (RCRA NonGen, HAZNET, FINDS, ECHO, EMI, CIWQS, CERS, and HWTS)	Various	256	Yes	Yes
EDR High Risk Historical Records (Historic Auto, Historic Cleaner, Manufactured Gas Plant [MGP])	0.125 mile	33	Yes	Yes
Exclusive Recovered Government Archives	0.001 mile	0	No	No

The Site was listed on the following databases:

- Emissions Inventory Data (EMI) as The Strip Shop
- UST, HWTS, San Diego County HMMD, CERS Haz Waste, CERS TANKS, HAZNET, CERS, CIWQS, databases as Summit Gasoline of San Diego
- San Diego County HMMD, CERS Haz Waste, CERS as Verizon Wireless
- HWTS and HAZNET databases as Bumper Medic
- HWTS and HAZNET databases as Kobey's Swap Meet
- San Diego County HMMD, CERS Haz Waste, FINDS, HWTS, HAZNET, and CERS databases as San Diego Sports Arena
- EDR Historic Auto, FINDS, RCRA Non-generator, and ECHO database as Arena Fuels LLC/Sports Arena Fuels
- HWTS, San Diego County HMMD, CERS Haz Waste, FINDS, ECHO, UST, SWEEPS UST, HIST UST, Haznet, CIWQS, and CERS databases as Dixieline Lumber
- FINDS database as Arco AM/PM

Regulatory agency files were requested for the Site are discussed in the "Site Research" section above.

Off-Site facilities listed in the Radius Map™ report were evaluated as to their potential to impact the Site. The databases included in the Radius Map™ report can be grouped into two general categories: databases reporting unauthorized releases of hazardous substances or petroleum products (e.g., LUSTs, RCRA COR ACT facilities, National Priorities List [a.k.a. Superfund] sites) and databases reporting permitted hazardous materials users and hazardous waste generators for which a release has not been reported to, and recorded by, the regulatory agency.

SCS evaluated each of the off-Site facilities listed in the Radius Map™ report as to their potential to impact the Site, based on the following factors:

- Reported distance of the facility from the Site<sup>5</sup>
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed UST test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction and depth to groundwater (discussed in the “Hydrogeology” section of this Report)

Based on one or more of the factors listed above, and with possible exceptions discussed in the “Additional SCS Research” section below, there is a low likelihood that the off-Site facilities listed in the Radius Map™ report represent a recognized environmental condition in connection with the Site.

EDR listed ten facilities as being “orphans,” which are facilities for which EDR does not have sufficient information to accurately locate them on a map. Based on a review of the orphans, it is interpreted that only one of the ten facilities is within the requisite search radii for their reported database listings, and no additional RECs were identified.

## Additional SCS Research

### 3502 Kurtz Street

Due to the listing in the EDR Hist Cleaner database as The Launderette in 1961, SCS submitted a request for records to the DEHQ. No records were identified in the DEHQ files for this facility. The facility is located at least 75 feet to the northeast of the Site, across Kurtz Street, and according to

---

<sup>5</sup> Based on “Technical Justification for Groundwater Media-Specific Criteria,” (Groundwater Study) (March 2012) developed to support the state of California “Low Threat Closure Policy” (adopted May 2012), “plume length studies recognize that petroleum plumes stabilize in length due to natural attenuation.” The Groundwater Study goes on to cite Shih et al., 2004, that a peer-reviewed study of plume lengths at 500 petroleum UST sites in the Los Angeles area is widely accepted as representative of plume lengths at California UST sites. Shih et al. reports methyl tertiary butyl ether (MTBE), with 90th percentile maximum plume lengths of 540 feet. Therefore, the detailed review radius for open groundwater cases has been conservatively established by SCS at 0.20 mile (approximately 1,000 feet). For non-release cases (e.g., permitted facilities), only those facilities that were judged to be immediately adjacent to the Site were interpreted to have the potential to represent a recognized environmental condition.

ASTM guidelines is not located on an adjoining property. The property has since been redeveloped. The facility does not appear on any databases indicating an unauthorized release has been documented; however, this facility was present prior to the time of regulatory oversight; therefore we cannot assess whether this facility represents a recognized environmental condition to the Site. Subsurface assessment is recommended to assess whether operations at this facility have resulted in impacts to the subsurface at the Site.

### **3496 Kurtz Street**

Due to the listing in the EDR Hist Cleaner database as Triles in 1948, SCS submitted a request for records to the DEHQ. No records were identified in the DEHQ files for the site. The facility is interpreted to have been located approximately 200 feet to the northeast of the Site. The property has since been redeveloped. The site does not appear on any databases indicating an unauthorized release has been documented; however, this facility was present prior to the time of regulatory oversight; therefore we cannot assess whether this facility represents a recognized environmental condition to the Site. Subsurface assessment is recommended to assess whether operations at this facility have resulted in impacts to the subsurface at the Site.

### **3462 Kurtz Street**

Due to the listing in the EDR Historical Auto database as Quality Foreign, SCS submitted a request for records to the DEHQ. No records were identified in the DEHQ files for the site. The site is located at least 75 feet to the northeast on an adjoining property across Kurtz Street. The site does not appear on any databases indicating an unauthorized release has been identified. Therefore, based on distance and lack of documented releases, the facility is not considered a significant environmental concern, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

### **3740 Greenwood Street**

Due to the listing in the EDR Historical Auto database as Araki Automotive, SCS submitted a request for records to the DEHQ. No records were identified in the DEHQ files for the site. The facility is located approximately 200 feet northeast of the Site and is not located on an adjoining property. The facility does not appear on any databases indicating an unauthorized release has been identified. Therefore, based on distance and lack of documented releases, the facility is not considered a significant environmental concern, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

### **3780 Greenwood Street**

Due to the listing in the EDR Historical database as Dick Gibson Automotive, SCS submitted a request for records to the DEHQ. No records were identified in the DEHQ files for the site. The facility is located approximately 200 feet northeast of the Site and is not located on an adjoining property. The facility does not appear on any databases indicating an unauthorized release has been identified. Therefore, based on distance and lack of documented releases, the facility is not considered a significant environmental concern, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

### 3464 Kurtz Street

Due to the listing in the EDR Historical Auto database as Shoupe and Celeste, SCS submitted a request for records to the DEHQ. The DEHQ reported that no records are maintained for this property.

According to the EDR database report, the facility was an automotive repair shop from 1969 through 1985. The former auto repair shop was likely located at least 120 feet to the north-northwest, across Kurtz Street. The facility was not listed on any databases indicating an unauthorized release has occurred, and does not appear on any of the UST databases. Therefore, based on a lack of documented releases, as well as distance, the facility is not expected to have impacted the Site, therefore there is a low likelihood that this facility represents a recognized environmental condition to the Site.

### H202102, R&M Auto Repair & Fleet Services, 3550 Kurtz Street

Due to the listing in the SWEEPS UST and Hist UST databases as National Car Rental, and on the RCRA NonGen/NLR database as Quality Auto and Truck, SCS submitted a request for records to the DEHQ. The following DEHQ records were reviewed by SCS.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2003	Waste oil (AST), used oil filters, antifreeze	Waste containers improperly labeled, corrected during site visit; fuel filters and non-empty aerosol cans were found in trash can, corrected during site visit; lack of EPA ID number; inadequate training program; used absorbent observed around tank and inspection area. Corrected by October 29, 2003.
2006	Used oil filters, waste antifreeze	Wastes improperly labeled, corrected during site visit.

The facility is located approximately 50 feet northeast of the Site, across Kurtz Street. The facility does not appear on any databases indicating an unauthorized release has occurred. According to the database report, the facility is listed as a non-generator/historical generator with no violations or evaluations on file. The facility does not appear on any databases indicating an unauthorized release has been identified. However, the facility is listed on the SWEEPS UST and Hist UST databases. Three USTs have reportedly been present at the Site, including two 12,000- gallon

gasoline USTs and one 500-gallon waste oil UST. No UST inspection or removal records were provided by DEHQ; however, records discussed below for 3520 Kurtz Street indicate that the USTs permitted under that address were actually located at 3550 Kurtz Street. UST removal documentation is discussed below, under the 3520 Kurtz Street HMMMD summary.

### H04438, Cloud 9 Shuttle, 3520 Kurtz Street

Based on its listing on the UST and San Diego Co. HMMMD databases and its proximity to the Site (adjacent to the northeast), the DEHQ file for this facility was requested. SCS reviewed the following records.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1996	Two 12,000-gallon gasoline USTs, one 500-gallon waste oil UST, antifreeze,	None
1996	Tank integrity test	None
1998	New 20,000-gallon motor vehicle fuel, double-wall fiberglass UST	N/A
1998	Waste antifreeze (two 55-gallon drums); unidentified drum; waste solvent, used oil, used oil filters	Incomplete hazardous waste label; missing label; missing documents
1998	New fuel UST permit	Complaint/Prop 65 Disclosure Report – “Shoddy UST work”, tanks not buried properly due to high groundwater. DEHQ and SDFD issued stop work notice.
1998	UST removal permit (two 12,000-gallon steel gasoline USTs; one 500-gallon waste oil UST)	None
1999	UST (equipment inspected)	None
1999	Three 55-gallon drums of antifreeze; 500-gallon AST for used oil	Improper labeling
2001	Antifreeze, hazardous waste (not specified), USTs (not specified)	Improper labeling
2002	Hazardous materials, hazardous waste, USTs (not specified)	Improper labeling

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2003	USTs (not specified), hazardous waste (not specified); used batteries	Oil and water pooled in the under dispenser containment; fill sump contained liquid; monitoring equipment improperly installed; testing and maintenance records not available; permit expired; improper labeling; monitoring plan not submitted. Most violations corrected by October 29, 2003
2004	UST (monitoring system certification and secondary containment testing, 87 fuel UST)	None
2004	USTs, hazardous waste, hazardous materials	Improper labeling; secondary containment with fluid; training records unavailable
2005	USTs (secondary containment testing certification, 20,000-gallon gasoline UST)	Several failures noted
2005	20,000-gallon gasoline UST (repairs conducted on secondary containment, retested and passed)	Improper labeling; alarm duration too short (corrected)
2006	Waste antifreeze (55-gallon drum); used oil (three 55-gallon drums); universal waste (fluorescent lamps, batteries); USTs	Improper labeling
2007	Diesel USTs (tank monitoring system certification and spill bucket testing); AST (not specified)	None
2007	UST (not specified); mixed hazardous waste	Liquid in UST fill sump (corrected during inspection); CUPA form not available
2008	Fuel UST	Failure to complete UST permit; failure to register UST system; failure to submit various UST documentation
2008	Diesel fuel UST (annual monitoring certification, secondary containment testing)	DSL secondary failed; repairs conducted, retested and passed

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2009	UST	UST documentation deficient

According to DEHQ records, three USTs were installed in 1978, including one 500-gallon waste oil UST, and two 12,000-gallon unleaded fuel USTs. The tanks were placed in temporary closure in 1996, and were removed in 1998. The dispenser island was located approximately 100 feet northeast of the Site and the USTs were located approximately 150 feet to the northeast. Upon removal, one of the 12,000-gallon USTs cracked in half; however, no obvious signs of a release were observed. Eight soil samples were collected from the fuel UST excavation and analyzed for total petroleum hydrocarbons as gasoline (TPHg) and as diesel (TPHd). Two samples were collected from the waste oil UST excavation and analyzed for total recoverable petroleum hydrocarbons (TRPH). TPHd was detected in one sample at a concentration of 54 mg/kg. TPHg, TPHd, and TRPH were not detected above laboratory reporting limits in any other samples analyzed. The UST closure was completed with no further action required. The fuel USTs were replaced with a 20,000-gallon UST.

Cloud 9 Shuttle vacated the facility in October 2007, according to a letter dated November 15, 2007. The letter further notes that the Hazmat and UST permits were for activities conducted at 3550 Kurtz Street.

In December, 2007, ten soil borings were advanced to a maximum depth of 15 feet bgs in the vicinity of the USTs, dispenser islands, hoists, and known waste storage areas. Soil and groundwater samples were collected from each boring and submitted for laboratory analyses. VOCs and petroleum hydrocarbons were not detected above laboratory reporting limits in any of the groundwater samples analyzed, with the exception of methyl tertiary butyl ether (MTBE), which was detected at a maximum concentration of 12 micrograms per liter ( $\mu\text{g/L}$ ), and TRPH, which was detected at a concentration of 2.6  $\mu\text{g/L}$ . VOCs were not detected above laboratory reporting limits in any of the soil samples analyzed. TPHg was detected in soil at a maximum concentration of 8 milligrams per kilogram (mg/kg). TRPH, TPHg, and for total petroleum hydrocarbons as oil (TPHo) were not detected above laboratory reporting limits in any soil samples. Based on the results of the investigation, DEHQ determined that a LUST case would not be opened for the facility.

The 20,000-gallon UST, associated piping, and dispensers, as well as the used oil AST, were removed in July 2009. Soil samples were collected and analyzed for TPHg and TPHd, which were not detected above laboratory reporting limits. One sample was analyzed for benzene, toluene, ethylbenzene, and xylenes (collectively, BTEX) and fuel oxygenates, which were not detected above laboratory reporting limits.

Depth to groundwater was reported to be approximately 10 feet bgs.

Based on distance and the lack of evidence of a significant release from each generation of USTs, the reported release at the adjoining Cloud 9 Shuttle site is not expected to have impacted the Site and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

### **H21153-1, Clean Harbors, 3495 Kurtz Street**

Based on its listing on the LUST database and its proximity to the Site (adjacent to the east/northeast), the DEHQ file for this facility was reviewed.

The Clean Harbors facility is located on an adjoining property to the northeast and is listed in the LUST and MWMP databases. Therefore, SCS submitted a request for public records to DEHQ. According to records provided by DEHQ, one 10,000-gallon steel diesel UST was removed from the property in 1986. No holes were observed; however, moderate corrosion was present. No indications of a release were reported, such as stained soil or odor. Water was observed in the tank pit at approximately 8 feet bgs.

According to the *Supplemental Assessment, Former Underground Fuel Tank, Central Freight Lines Terminal, 3495 Kurtz Street, San Diego, California 92110, APN 441-339-01*, prepared by Bryant GeoEnvironmental, Inc. (BGI) and dated May 19, 2001, the property was used as a truck terminal for at least 30 years. A diesel fueling center was installed in 1963 and operated until the diesel tank was removed in 1986. At the time of removal, confirmation soil sampling was not routinely conducted. No evidence of significant hydrocarbon impacts was observed in soil or groundwater during tank removal activities, as noted above. The report further notes that a previous, 4,000-gallon oil-storage UST had existed onsite in 1963, but was reportedly removed in 1991. No records of removal were identified, although permits were typically required for tank removals in 1991. A geophysical survey was conducted to identify any remaining buried tanks. An anomaly was observed in an area where the 4,000-gallon tank may have been located; however, it was not indicative of a tank; rather, BGI speculated that it may have been a concrete slab with rebar or remnants of a crushed tank. Refusal was met at 10.5 feet bgs during subsequent soil sampling activities.

The results of the initial Limited Phase II investigation indicated that TPHg and benzene were present in the groundwater sample collected at the location of the presumed former 4,000-gallon UST at concentrations of 2,400 µg/L and 5,200 µg/L, respectively; however, it was noted that no free product was observed. TPHg and TPHd were not detected above laboratory reporting limits in any of the soil samples analyzed, and BTEX was not detected in the other two groundwater samples collected. One soil sample was analyzed for TRPH, which was not detected above laboratory reporting limits. Additional assessment was recommended; therefore, one groundwater monitoring well was installed downgradient from the presumed 4,000-gallon tank location and two additional soil borings were drilled in the presumed upgradient and downgradient directions. Soil and groundwater samples were collected from each boring and analyzed for TPHg, BTEX and MTBE. Two groundwater samples were additionally analyzed for VOCs. Groundwater stabilized at a depth of approximately 8.3 feet bgs following monitoring well installation.

Analytical results indicated that shallow soils did not appear to be impacted by fuel-related hydrocarbons in the vicinity of the former (presumed) UST. Soil samples from each of the three soil borings and groundwater samples collected from BH-5 and BH-6 were submitted for analysis. TPHg and BTEX were not detected in soil or groundwater samples. MTBE was detected at a maximum concentration of 1.9 µg/L in groundwater. A groundwater sample was collected following development of MW-1. Although the chain of custody indicates that TPHg analysis was requested, only the results for BTEX were found in the laboratory analytical report. BTEX were not detected in groundwater above laboratory reporting limits, and BGI reported that TPHg also was not detected.

It should be noted that, although the fuel reported to be present at the former freight terminal was diesel, soil and groundwater appear to only have been analyzed for TPH as gasoline during the supplemental site assessment.

BGI concluded that petroleum hydrocarbon impacts were limited in extent and no further investigation was deemed warranted. Closure was granted by DEHQ in October, 2001.

Although closure was granted by the regulatory agency, due to the limited nature of the previous assessments and close proximity and upgradient location of the former freight terminal, the property remains an environmental concern and there is a moderate likelihood that reported release(s) from this facility represents a recognized environmental condition to the Site. Therefore, SCS recommends subsurface assessment at the Site (i.e., soil, soil vapor, and/or groundwater sampling) adjacent to the Clean Harbors property.

### HUPFP-002071 Clean Harbors, 3495 Kurtz Street

In addition to the LUST records, the HMMD file for this adjacent facility was reviewed. The DEHQ file includes CIRs for the period from 2015 through 2019. In addition, the September 2010 DEHQ HE-17 database of facilities storing hazardous materials, generating hazardous wastes, and discharging unauthorized releases was reviewed. The following table summarizes information obtained from review of CIRs database regarding hazardous materials and petroleum products reported to be used and stored, hazardous wastes reported to be generated, and violations of the hazardous waste control law.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2015	Propane (five tanks for forklift); hazardous waste (10-day storage)	No permit for propane; no hazardous materials business plan. Corrected on April 29, 2015.
2017	Propane (50 gallons); no hazardous waste generated at the time of the site visit.	HMBP not certified annually; corrected on October 6, 2017.
2019	Propane (50 gallons); no hazardous waste generated at the time of the site visit.	None

No violations were identified indicating an unauthorized release had occurred at the Clean Harbors facility. Therefore, although an environmental concern exists in connection with the previous USTs further described above, the current Clean Harbors operations (i.e., circa 2015 to present) are not considered to represent a recognized environmental condition to the Site.

### HUPFP-123526, British and Italian Automotive, 3770 Hancock Street

Based on its listing on the HMMD database and proximity to the Site, the DEHQ records for this adjacent facility were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1996	Used oil and oil filters.	Faded labels on hazardous waste; training not reviewed every 12 months.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1997	Used oil.	Labels faded on hazardous waste; training records unavailable.
1999	Used oil (two 55-gallon drums)	Incomplete hazardous waste label.
2000	Hazardous waste, hazardous materials	Training records unavailable
2001	Hazardous waste (not specified; values not reported)	None
2002	None identified	None
2007	Used oil, used oil filters, used batteries, degreaser, carb cleaner	None
2008	Used oil, used oil filters, universal waste	None
2010	Hazardous waste (not specified)	None
2016	Business no longer operating at the property.	None

Based on the lack of significant violations and documented releases, the adjoining facility is not expected to have significantly impacted the Site, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

#### **HUPFP-133479, Autohaus Munich, 3770 Hancock Street, Unit E**

Based on its listing on the HMMD database and proximity to the Site, the DEHQ records for this adjacent facility were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1996	Used oil, antifreeze	None
1999	Used oil, waste coolant	Training records unavailable; minor oil spillage near waste oil drum.
2000	Hazardous waste (not specified)	Training records unavailable
2000	Hazardous waste, hazardous materials	Training records unavailable
2001	Waste oil	Minor oil spillage on shop floor near waste oil drum
2003	Not specified	None

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2004	Not specified	None
2006	Used oil, antifreeze	Drums not properly labeled; corrected on December 23, 2006
2008	Waste antifreeze, used oil, universal waste	HMBP not available for review; failure to keep hazardous waste manifests for last 3 years; waste stored onsite longer than 6 months; waste oil accumulated in secondary containment; improper labeling of hazardous waste. Corrected in June and July, 2008.
2010	Waste antifreeze; kerosene (55-gallon drum)	None
2015	Waste antifreeze, used oil	HMBP not submitted, not annually certified; training records not available; failure to keep hazardous waste manifests for 3 years
2016	N/A	Documentation of corrective action not received by DEHQ
2017	N/A (return to compliance on January 23)	N/A
2017	Used oil (110 gallons); waste antifreeze (55 gallons)	None
2018	N/A	Notice: HMBP not completed
2019	Used oil (110 gallons); waste antifreeze (55 gallons)	Training records not available; returned to compliance on August 1, 2019

Based on the lack of significant violations and documented releases, the adjoining facility is not expected to have significantly impacted the Site, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

## HUPFP-001449, Lach Motorsports, 3770 Hancock Street, Unit D

Based on its listing on the HMMD database and proximity to the Site, the DEHQ records for this adjacent facility were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2015	Used oil filters	None
2016	Waste oil (55 gallons)	Training records unavailable
2016	Hazardous waste (not specified)	Training records unavailable; returned to compliance on October 4, 2016
2016	Business no longer present (Lach Motorsports)	None
2018	Waste oil (55-gallon drum) (Business identified as Torque-Spec Garage, Inc., DBA Lach Motorsports)	Training records unavailable
2018	N/A	Notice: Annual HMBP not completed

Based on the lack of significant violations and documented releases, the adjoining facility is not expected to have significantly impacted the Site, and there is a low likelihood that this facility represents a recognized environmental condition to the Site.

## H21151-001 and -002, Former Shorebreak Materials-Butler Property, 3612 Kurtz Street

Based on its listing on the LUST database and its proximity to the Site (adjacent to the northeast), the DEHQ file for this facility was reviewed. The following reports were included in the DEHQ file and reviewed as part of this Assessment:

- *Case Closure Summary, Former Shorebreak Materials-Butler Property, 3612 Kurtz Street San Diego, CA* prepared by the DEHQ and dated January 13, 1998
- *Confirmation Sampling Results and Site Closure Recommendation, 3612 Kurtz Street San Diego, CA* prepared by International Technology Corporation (IT) and dated July 15, 1996
- *Site Assessment – Solvent Storage and Paint Mixing Area at 3612 Kurtz Street, San Diego, CA*, prepared by Applied Consultants and dated June 18, 1992
- *General Incident Information & Record of Meeting, Shorebreak, 3612 Kurtz Street San Diego, CA* prepared by the San Diego County Hazardous Material Management Division and dated February 12 & 18, 1998

In September 1989 contamination of the soil and groundwater was discovered with the removal of two USTs on the property, one 3,000-gallon gasoline UST and one 1,000-gallon diesel UST that had

historically been used since 1969. Phase-separate hydrocarbons (PSH) were observed in the groundwater during excavation.

To remediate the contamination, a product skimming remediation system was used on the property from 1990 to 1992 that removed an estimated 430 gallons of PSH. Then in April 1993 a sparging and vapor/extraction (AS/VE) remediation system was used and was estimated to have removed 20,650 pounds of volatile petroleum hydrocarbons.

Soil and groundwater sampling results are summarized in the table below:

Analyte	Pre-Treatment	March 1995 Highs	January 1996 Highs	Target Levels (# of samples exceeding)	
<b>Soil (in milligrams per kilograms [mg/kg])</b>					
TPH	24,000	Not measured	10,020	1,000 (3)	
<b>Groundwater (in micrograms per liter [ug/L])</b>					
Benzene	(BTEX)	14,500	361.4	1812	40 (3)
Toluene		3,250	317.3	427.7	5,000 (0)
Ethylbenzene		10,000	76.0	1,062	430 (1)
Total Xylenes		20,400	568.2	618.2	3,770 (0)

From confirmation sampling in January 1996, the monitoring well (MW-17) closest to the Site (approximately 10 feet to the northwest) indicated 82.7 ug/L 1,2-Dichloroethane and all other VOCs, as well as TPH and BTEX, were reported to be below the laboratory reporting limits. No PSH was detected. The soil boring B-44 closest to the Site (approximately 50 feet to the northwest) indicated 3,545 mg/kg TPH and 8.31, 5.46, 38.88, and 444.8 mg/kg of BTEX respectively.

In January 1996, IT found that the majority of sampling locations had been reduced below California's maximum contaminant levels (MCLs), extensive free product removal, relatively low residual contaminant levels, lack of remaining sources of contamination, the onset and predicable efficacy of passive bioremediation, and lack of impact and pathways to ecological resources and health, a risk based corrective action (RBCA) closure was recommended.

In November 1997, a vapor risk assessment was completed for benzene of the indoor air located in the small office building on the property and concluded that the results indicated a less than one in one million increased incremental cancer risk.

The DEHQ closed the case in January 1998 noting that corrective action should be reviewed if land use changes.

In addition to the leaking USTs, San Diego County Hazardous Material Management Division (HMMD) observed hazardous wastes and substances stored and used by Shorebreak in 1991 where soil in the solvent storage and paint mixing area (approximately 350 feet to the northeast) had been impacted. According to HE-17 records in 1991 the area stored up to:

- 840-gallons of hydrocarbon solvents,
- 55-gallons of halogenated solvents,
- 20-gallons of photochemical or photo processing waste
- 60-gallons of ink degradant
- 800-gallons of paint
- And 600-gallons of 1,1,1-Trichloroethane

Soil sampling in 1992 by Applied Consultants found low levels of 1,1,1-Trichloroethane (1,1,1-TCA) and Trichloroethene (TCE) in the soil and 1,1,1-TCA and 1,1-Dichloroethene (1,1-DCE) in the groundwater. All other VOCs, TPH, and BTEX indicated non-detect results. Soil boring B3 closest to the Site (approximately 350 feet to the northeast) indicated non-detect for all VOCs and the only groundwater well sampled, MW2 (approximately 340 feet to the northeast), indicated 15 ug/L 1,1-DCE and 12 ug/L 1,1,1-TCA.

Applied Consultants reported that they did not believe there was significant halogenated hydrocarbon contamination in the soil and groundwater and indicated that no further investigation or action was warranted. The HMMMD determined the investigation as a complaint and found no information that warranted opening an unauthorized release case and the complaint was closed in February 1998.

Based on the close proximity of the contaminated areas to the Site and the possible up- gradient location of the contamination with respect to the groundwater flow direction, there is a moderate likelihood that a recognized environmental condition exists at the Site in connection with reported releases from this northeast adjacent facility, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### **H15272, USA Petroleum Corporation/Mobile/Oasis Gas Station, 3229 Sports Arena Boulevard**

Based on its listing on the LUST database, historical use as a gasoline service station, and proximity to the Site (adjacent to the southeast, across Sports Arena Boulevard), the DEHQ file for this facility was reviewed. The following report was included in the DEHQ file and reviewed as part of this Assessment:

- *Site Assessment Case Closure Summary, 3229 Sports Arena Boulevard, San Diego, CA prepared by the DEHQ and dated October 25, 1993*

In February 1989, an unauthorized release of gasoline was discovered during the removal of three 10,000-gallon USTs on the property. Remediation methods included excavation and passive bioremediation/aeration of the soil. Soil and groundwater cleanup levels were established, with the exception of benzene, and the maximum concentrations remaining on property are detailed in the table below:

Analyte	Maximum concentrations remaining on property	Target Levels
<b>Soil (in milligrams per kilogram [mg/kg])</b>		
TPH	863	1,000

Analyte		Maximum concentrations remaining on property	Target Levels
Benzene	(BTEX)	<0.5 – 0.240	--
Toluene		<0.5 – 2.19	--
Ethylbenzene		<0.5 – 49.4	--
Total Xylenes		<0.5 – 0.740	--
Lead		<0.5 – 0.73	--
<b>Groundwater (in milligrams per liter [mg/L])</b>			
TPH		<0.5 – 14	--
Benzene	(BTEX)	<0.005 - 0.650	0.21
Toluene		<0.005 - 0.010	300
Ethylbenzene		<0.005 - 0.930	--
Total Xylenes		<0.005 – 1.0	--
Lead		<0.02	--

Even though benzene concentrations in groundwater exceed the established clean-up levels, the DEHQ closed the case in October 1993, noting that after four years of groundwater monitoring indicating the groundwater contaminant concentrations were stable or decreasing and that the plume is not migrating off property. The DEHQ noted that corrective action should be reviewed if land use changes.

Given that the DEHQ case was closed with limited amounts of CoCs remaining in the soil and groundwater, and it was determined that the groundwater plume was not migrating off the property, there is a low likelihood that a recognized environmental condition exists at the Site in connection with this facility.

### HMD/UST 200896, Evans Tire & Service Centers, 3655 Sports Arena Blvd

Based on its listing on the HMMD, Hazardous Waste Tracking System, CERS Hazardous Waste, and HAZNET databases and proximity to the Site (adjacent to the southwest, across Sports Arena Boulevard), the DEHQ records for this adjacent facility were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2002	None listed	Inadequate training Inadequate records

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
2004	Used oil filters (1,800 pounds) Used batteries (21,000 pounds) Organic liquids with metals (110 gallons) Waste and mixed oil (2,400 gallons) Hydrocarbon solvents (200 gallons) Antifreeze	Hazardous waste tanks without professional assessment Oil filters improperly managed Storage area not inspected weekly Fire/explosion/release not minimized Waste container improperly managed Missing labels Missing records
2007 to 2008	Used oil filters (1,800 pounds) Used batteries (21,000 pounds) Organic liquids with metals (110 gallons) Waste and mixed oil (2,400 gallons) Unspecified aqueous solution (16 gallons)	Missing labels Inadequate records
2010	Used oil filters (1,800 pounds) Used batteries (21,000 pounds) Organic liquids with metals (110 gallons) Waste and mixed oil (2,400 gallons) Unspecified aqueous solution (16 gallons)	Waste accumulation longer than what is allowed Inadequate records Missing labels
2015	Paint Waste antifreeze	None
2016	New oil (550 gallons) Used oil (240 gallons) New antifreeze (55 gallons) Used antifreeze (55 gallons)	Open waste container Inadequate records
2019	New oil (550 gallons) Used oil (220 gallons) New antifreeze (110 gallons) Used antifreeze (55 gallons) Transmission fluid (110 gallons)	Missing permit Inadequate records Open waste container

Based on the lack of significant violations and documented releases, the adjoining facility is not expected to have significantly impacted the Site and does not represent a REC.

#### **HMD/UST 211463 and 131595, Exponents, Inc., 3280 Kurtz Street**

Based on its listing on the Drycleaner, HMMD, NPDES, and CERs databases and proximity to the Site (adjacent to the northeast, across Kurtz Street), the DEHQ records for this adjacent facility were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1994 to 1995	Empty container (1,200 pounds) Water-based adhesive (110 gallons) Propane (1,728 cubic feet) Polychloroprene 40% (1,000 gallons) Trichlorethylene (110 gallons)	Missing labels Inadequate training Inadequate records
2000 to 2001	Unspecified alkaline solution (25 gallons)	None

Although this property does not appear on any databases indicating an unauthorized release has been documented, there is a possibility that Exponents, Inc. performed dry cleaning activities, and since there is a record of the use of chlorinated solvents (trichlorethylene), an unidentified release would have the potential to impact the Site. Therefore, the use of chlorinated solvents at this facility is considered a potential recognized environmental condition to the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

#### HMD 207798/103138 3467-3469 Kurtz Street

Based on its listing on the San Diego County HMMD, and SWEEPS UST databases and proximity to the Site (adjacent to the northeast) a records request was submitted to DEHQ. The following records were reviewed.

Year	Hazardous Materials, Petroleum Products, Hazardous Waste	Violations
1996	(San Diego Testing Engineers) 50 gallons of TCE waste	Hazardous waste stored for longer than allowed time
2007	(Econo Auto Repair) Two 55-gallon steel drums of used oil filters 55 gallons waste antifreeze 55 gallons waste aerosols 55 gallons motor oil 55 gallons used oil Used batteries	Improperly labeled Improper storage Hazardous waste stored for longer than allowed time Oil in secondary containment for used batteries hazardous materials business plan not submitted Failed to keep container closed Failed to conduct weekly inspections

In addition, according to DEHQ records, one 1,000-gallon steel UST was removed from the San Diego Testing Engineers facility in 1988. The tank was noted to be in good condition with no holes, and no odors were present in the excavation.

Although no releases were documented at the facility, based on the former presence of a UST, the reported generation of TCE and petroleum hydrocarbon waste, and the close proximity, there is a moderate to high likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### **Yellow Cab Company of San Diego, 3473 Kurtz Street**

Based on its listing on the RCRA-SQG, Haznet, and HWTS databases and proximity to the Site (adjacent to the northeast) a records request was submitted to DEHQ. The DEHQ responded that no records are on file. Given the presence of a taxi company, it is possible that a UST was present and/or automotive repair operations have occurred. If a previously unidentified release had occurred, there is a moderate likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### **Boyce Industries, 3344 Kurtz Street**

Based on its listing on the EnviroStor, San Diego County HMMD, and Hist Cortese databases and proximity to the Site (adjacent to the northeast, across Kurtz Street), the EnviroStor records for this adjacent facility were reviewed. According to the EnviroStor listing, a preliminary assessment of the facility indicated that it was deleted from Cortese due to a lack of evidence of contamination. The facility was found to only be a distributor of detergents and washer parts. Therefore, there is a low likelihood that the facility represents a recognized environmental condition.

### **Don Pollock Excavating, 3366 and 3370 Kurtz Street**

Based on its listing on the EnviroStor and SEMS-Archive databases and proximity to the Site (adjacent to the northeast, across Kurtz Street), the EnviroStor record for this adjacent facility were reviewed. According to the EnviroStor listing, a preliminary assessment of the facility indicated that there was no evidence that a UST was removed prior to property development, however the case was referred to the local agency. SCS submitted a request for records to the DEHQ and the DEHQ responded that no records are on file for the facility.

In addition, the SEMS database was searched, however no records were on file for the Site. The Site does not appear on any other databases indicating an unauthorized release has occurred; therefore, based on a lack of documented releases and distance, there is a low likelihood that the facility represents a recognized environmental condition.

### **Golden Boy Pies of San Diego, 3465 Hancock Street**

Based on its listing on the LUST, San Diego County SAM, SWEEPS UST, Cortese, Hist Cortese, San Diego County LOP, and CPS SLIC release databases and proximity to the Site (approximately 170 feet north), the GeoTracker record for this up- to cross-gradient facility was reviewed. According to the GeoTracker listing, the facility is listed as having a release of gasoline impacting soil only. The case was closed in 1990. Given the distance, soil-only nature, and closed case status, there is a low likelihood that the facility represents a recognized environmental condition.

### **Jensen Meat Company, 3477 Hancock Street**

Based on its listing on the LUST, San Diego County SAM, SWEEPS UST, Hist Cortese, and CPS SLIC release databases and proximity to the Site (approximately 170 feet north), the GeoTracker record for this up- to cross-gradient facility was reviewed. The facility is listed as Xtermite on Geotracker, and the database indicates that the case was closed in 1986. No documents were available on

GeoTracker, therefore a request for records was submitted to the DEHQ. DEHQ provided records indicating that one 3,000-gallon steel UST which had been used for diesel fuel was removed in 1986. The tank was noted to have corrosion and a hole, and evidence of contamination was observed. Depth to groundwater was noted to be approximately 8 feet bgs. Records pertaining to a 1,000-gallon steel UST containing diesel were also provided in the files. It is unclear if an additional UST was removed from the Site. Although no closure documents were provided, given the distance to the Site, lack of additional assessment mandated by the DEHQ, and closed case status for the property on GeoTracker, there is a low likelihood that the facility represents a recognized environmental condition.

The records provided by DEHQ also included records for 3465 and 3467 Hancock Street, identified as Golden Boy Pies, and 3459 Hancock Street, identified as Sinner Brothers. Golden Boy Pies is discussed above and was listed with a closed case status. Based on review of the records, it appears that the three addresses are related to the release at Golden Boy Pies, discussed above. Therefore, the additional properties do not appear to represent additional releases and are unlikely to represent a recognized environmental condition.

### **Benton Roofing, 3691 Hancock Street**

Based on its listing on the Hist Cortese and San Diego County LOP and proximity to the Site (approximately 350 feet north), the GeoTracker record for this up- to cross-gradient facility was reviewed. According to the GeoTracker listing, the facility is listed as having a release of diesel impacting soil only. The case was closed in 2000. Given the distance, nature of the release (diesel and soil-only), and closed case status, there is a low likelihood that the facility represents a recognized environmental condition.

### **California Geologic Energy Management Division (CalGEM)**

SCS personnel reviewed the CalGEM Well Finder website regarding oil and gas well locations within 1 mile of the Site.<sup>x</sup> There were no wells interpreted to be located within a 1-mile radius of the Site.

## **DATA GAPS IN CONNECTION WITH OFF-SITE SOURCES**

Based on the Site vicinity reconnaissance and off-Site source survey, there are no obvious indications of data gaps in connection with off-Site sources.

### **Findings and Opinions—Off-Site Source Survey**

Based on the off-Site source survey, several facilities in the Site vicinity were reported to have had releases of hazardous materials/waste or petroleum products. With the possible exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of known and reported releases of hazardous materials/wastes or petroleum products from an off-Site source. This judgment is based on one or more of the following: the reported regulatory status (e.g., case closed), the media affected (e.g., soil contamination only), the distance from the Site, the direction from the Site with respect to the reported groundwater flow direction, and information obtained through a review of County of San Diego Department of Environmental Health and Quality files.

## Findings and Opinions—Off-Site Source Survey

### Former Cleaners – 3496 and 3502 Kurtz Street

Due to the listings in the EDR Hist Cleaner database of The Launderette in 1961 located at 3502 Kurtz Street and Triles in 1948 located at 3496 Kurtz Street, SCS submitted requests for records to the DEHQ. No records were identified in the DEHQ files for these facilities. The facilities are located at least 75 or 200 feet, respectively, to the northeast of the Site, across Kurtz Street, and are not technically located on an adjoining property. The properties have since been redeveloped. The facilities do not appear on any databases indicating an unauthorized release has been documented; however, the facilities were present prior to the time of regulatory oversight; therefore we cannot assess whether these facilities represent a recognized environmental condition to the Site. Subsurface assessment is recommended to assess whether operations at these facility have resulted in impacts to the subsurface at the Site.

### H21153-1, Clean Harbors, 3495 Kurtz Street

The Clean Harbors facility is a former truck terminal located on an adjoining property to the northeast of the Site consisting of a diesel fueling station and oil UST circa 1963 to the mid-1980s to early 1990s which impacted groundwater.

Although closure was granted by the regulatory agency, due to the limited nature of the previous assessments and close proximity and upgradient location of the former freight terminal, the property remains an environmental concern and there is a moderate likelihood that reported release(s) from this facility represents a recognized environmental condition to the Site. Therefore, SCS recommends subsurface assessment at the Site (i.e., soil, soil vapor, and/or groundwater sampling) adjacent to the Clean Harbors property.

### H21151-001 and -002, Former Shorebreak Materials-Butler Property, 3612 Kurtz Street

In September 1989 contamination of the soil and groundwater was discovered with the removal of two USTs on this northeast adjacent property and a DEHQ case was opened, in addition hazardous wastes and substances stored and used by Shorebreak in 1991 were observed impacted soil in the solvent storage and paint mixing area (approximately 350 feet to the northeast) as a HMMD complaint.

Based on the close proximity of the contaminated areas to the Site and the possible up- gradient location of the contamination with respect to the groundwater flow direction, there is a moderate likelihood that a recognized environmental condition exists at the Site in connection with reported releases from this northeast adjacent facility, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### HMD/UST 211463 and 131595, Exponents, Inc., 3280 Kurtz Street

Although Exponents, Inc. does not appear on any databases indicating an unauthorized release has been documented, there is a possibility that Exponents, Inc. performed dry cleaning activities, and since there is a record of the use of chlorinated solvents (trichlorethylene), an unidentified release would have the potential to impact the Site. Therefore, the use of chlorinated solvents at

## Findings and Opinions—Off-Site Source Survey

this facility is considered a potential recognized environmental condition to the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### HMD 207798/103138 3467-3469 Kurtz Street

Although no releases were documented at the facility, based on the former presence of a UST, the reported generation of the solvent TCE and petroleum hydrocarbon waste, and the close proximity, there is a moderate to high likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### Yellow Cab Company of San Diego, 3473 Kurtz Street

Given the presence of a taxi company, it is possible that a UST was present and/or automotive repair operations have occurred. If a previously unidentified release had occurred, there is a moderate likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

## HISTORICAL LAND USE REVIEW

In accordance with the ASTM Standard and AAI rule, numerous reasonably ascertainable standard historical information sources were reviewed, and an attempt was made to interpret the historical Site and Site vicinity land use back to the obvious first developed use of the Site. Historical information was reviewed for current and historical Site addresses 3500, 3640, 3530, 3550, 3580, 3570, 3494, 3360, 3350, 3340, 3250, 3240, and 3220 Sports Arena Boulevard, San Diego, CA 92110 (historical addresses were on Frontier Street and little cross-streets of the Frontier district, named for colleges and war planes and defense contractors [Holyoke Street, Liberator Street, Fleet Street, etc.]).

The following table summarizes the historical resources reviewed as part of this Assessment.

Resource	Source	Years Available
Aerial Photographs	EDR Lightbox, NETR Online ( <a href="http://www.historicaerials.com">http://www.historicaerials.com</a> ), and Google Earth	1928, 1949, 1953, 1964, 1966, 1970, 1972, 1979, 1980, 1983, 1986, 1989, 1990, 1993, 1996, 1999, 2002, 2005, 2009, 2010, 2012, 2014, 2016, 2020

## Historical Site Land Use

The following table provides a chronology of the apparent historical Site land uses, as interpreted from a review of information from the sources referenced.

Year	Interpreted Site Tenants	Interpreted Site Use
1903 to 1927	Topographic maps indicate two small structures onsite, one in the northwestern portion and one in the southeastern portion and vacant land	Single-family residential; undeveloped land

Year	Interpreted Site Tenants	Interpreted Site Use
1928	Aerial photo indicates additional structures throughout the Site and agricultural fields observed in the central and eastern portions of the Site	Single-family residential and <b>agricultural</b>
1934 to 1943	Topographic maps indicate several more small structures throughout the Site	Single-family residential
1944 to 1964	Frontier district multi-family housing, single-family residences, and Frontier School in the southwestern portion	Single and multi-family residential and school
1966	Vacant, graded land, and San Diego Sports Arena under construction	None
1966 to 1975	<u>Western and central portions</u> San Diego Sports Arena and associated parking lot (3500 Sports Arena Blvd, area A) <b>Union Oil/76 Gasoline Service Station (3494, 3580, or 3640 Sports Arena Blvd, Area B)</b> <u>Eastern portion:</u> Dixieline Lumber (3250 Sports Arena Blvd, Parcel D) Trend Furniture (3240 Sports Arena Blvd, Parcel E) Pier I Imports (3220 Sports Arena Blvd, Parcel F)	Commercial, industrial, and <b>gasoline service station (3580 or 3640 Sports Arena Blvd, Area L, 1966 and 1970 photographs only)</b>
1977 to 1989	<u>Western and central portions:</u> San Diego Sports Arena and associated parking lot (3500 Sports Arena Blvd, Area A) <u>Eastern portion:</u> Dixieline Lumber (3250 Sports Arena Blvd, Parcel D) Trend Furniture (3240 Sports Arena Blvd, Parcel E) Pier 1 Imports (3220 Sports Arena Blvd, Parcel F) Various commercial and retail tenants: Mann Theaters, restaurants, <b>Sir Speedy Printing (1979 to 1989), Furniture Strip Shop (1979 to 1989) [both 3360 Sports Arena Blvd, Parcel C]</b> , Crack in the Wall Framing (3300 – 3360 Sports Arena Blvd, Parcel C)	Commercial, retail, <b>Print shop and furniture stripping (3360 Sports Arena Blvd, Parcel C)</b>

Year	Interpreted Site Tenants	Interpreted Site Use
1990 to 2000	<p><u>Western and central portions:</u> San Diego Sports Arena, Kobey's Swap Meet, and associated parking lot (3500 Sports Arena Blvd, Parcel A)</p> <p><u>Eastern portion:</u> Dixieline Lumber (3250 Sports Arena Blvd, Parcel D) Trend Furniture (3240 Sports Arena Blvd, Parcel E) Pier 1 Imports (3220 Sports Arena Blvd, Parcel F) Various tenants: Mann Theaters, restaurants, Tap Lighting, Crack in the Wall Framing, silk screen business (3300 – 3360 Sports Arena Blvd, Parcel C)</p>	Commercial and industrial

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site uses listed above may have been earlier or later than indicated.

With the possible exceptions of the gasoline service stations and car wash described in the "Site Reconnaissance" and "Site Research" sections above and the heating oil, lead based

paint/pesticides/termiticides, agricultural, printing and furniture stripping facilities described below, no obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed.

### **Lead-Based Paint, Pesticides and Termiticides**

The Site was interpreted to have been occupied by various buildings from circa 1903 to the present. Based on SCS's experience, there is a potential for the presence of elevated concentrations of lead in the shallow soil due to the potential former usage of lead-based paint at the Site, and/or detectable concentrations of organochlorine pesticides (OCPs) to be present in the soil due to the historical use of pesticides and/or termiticides.

Regarding the former potential usage of lead-based paint at the Site, based on SCS' experience with older structures that have historically used lead-based paint, there is the potential that shallow soils at the perimeter of the structures are impacted with lead from the accumulated weathering, scraping, flaking, and dissolution of lead-based paints.

Regarding the potential presence of OCPs, based on our experience and a review of available literature, OCPs such as chlordane were commonly applied as termiticides around residential and commercial structures until approximately 1988. According to a study conducted on residential properties by the California Department of Toxic Substances Control (DTSC) in California, the most commonly detected OCPs in surface soil samples (0 to 0.5 foot below grade) at residential properties were chlordane, dichlorodiphenyltrichloroethane (DDT), dichlorodiphenyldichloroethylene (DDE), and dieldrin. These OCPs were found to exist at concentrations exceeding applicable health risk criteria, even at properties that were historically used solely for residential purposes (i.e., no historical agricultural, commercial, or industrial land use)<sup>xi</sup>.

Residue from lead-based paint, as well as OCPs, are known to have the potential to remain detectable in the subsurface soil for extended periods of time. Based on the interpreted land use, SCS's experience with residential and commercial properties, and a review of the available literature, it is our judgment that it is likely that detectable concentrations of lead and/or trace concentrations of OCPs are present in the soil at the Site as a result of the potential historical usage of lead-based paint and/or termiticide and/or pesticide application.

If lead-based paint and/or pesticides or termiticides were historically applied at the Site, there is a low to moderate likelihood that residual concentrations of lead and OCPs are present in the shallow surface soil beneath the Site. The enforcement actions requiring the remediation of elevated concentrations of lead and/or OCPs at a property due to historical termiticide and/or pesticide application are typically driven by redevelopment, excavation, and/or soil export, as well as potential exposure concerns, if present.

Based on our experience, if elevated concentrations of lead, pesticides, or termiticides are present in soil, the likelihood of an enforced remediation is low as long as the soil remains undisturbed. The Site was observed to be covered with various improvements; therefore, there is a low likelihood of open routes of exposure to these soils and a corresponding low likelihood of a recognized environmental condition.

However, it is SCS' understanding that the Site is to be redeveloped in the future. If the soil at the Site is disturbed, excavated, or exposed in connection with future Site redevelopment, we recommend that limited soil sampling be conducted as a precautionary measure to ensure that

future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of lead and/or OCPs, if present. In addition, if any soil at the Site will not be covered by hardscape or landscape, the soil should be assessed for lead and OCP concentrations to ensure there is no human health risk to future Site occupants.

### **Historical Agricultural Land Use**

A review of aerial photographs revealed that some type of agricultural activity took place at the Site and Site vicinity, circa 1928. The presence of agricultural fields at the Site is evident in the 1928 aerial photograph.

If the Site was, in fact, used as agricultural fields circa 1928, there is a low to moderate likelihood that residual concentrations of arsenical pesticides are present in the shallow surface soil beneath the Site. A review of 35 proposed school sites along with the historical background of OCP use in California indicates that sites with agricultural usage ending prior to 1950 do not need to be evaluated for OCPs. Organochlorine pesticides were first introduced into California agriculture in 1944 and reached peak usage in the 1960's. In 1974 the use of the OCP DDT was banned for agricultural purposes, and the elimination of remaining OCPs in California agriculture quickly followed. Data from 35 proposed school sites where agricultural use ended prior to 1950 indicates that OCPs were not identified as chemicals of potential concern. In those cases where OCPs were identified, the source appears to have been the application to structures on the property, and not the agricultural crops grown prior to 1950. It is recommended that former agricultural properties that terminated operation prior to 1950 not be evaluated for agriculturally related OCPs. Arsenic should still be evaluated as a chemical of potential concern (COPC) since its use as arsenical pesticides and herbicides predates 1950.

The Site is currently developed and was observed to be covered with several buildings, asphalt pavement, and landscaping. If the soil did contain arsenical pesticides, SCS judges that under normal circumstances (i.e., no excavation), there is a low likelihood that a complete exposure pathway exists. Assuming the legal and permitted application of these pesticides, and assuming existing Site use remains the same, this common occurrence is, in SCS' experience, unlikely to lead to an enforcement action and is therefore likely to be considered de minimis, as defined by ASTM.

However, based on the Site's redeveloped plans (including extensive grading, soil excavation and export, and proposed residential use), if the Client desires further confidence as to whether arsenic residues are present and in order to be conservative, SCS recommends that limited soil sampling be conducted for arsenic as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of CoCs. In addition, if soil is to be transported off Site, soil sampling should be conducted to assess whether the soil contains concentrations of CoCs that would cause the soil to be classified as a hazardous or regulated waste.

### **Historical Printing and Furniture Stripping**

Based on review of historical sources, 3360 Sports Arena Blvd, the northern building in Area C (now Rock & Roll Music School) was historically utilized as a printing and furniture stripping facility (from approximately 1977 to 1989) and 3350 Sports Arena Blvd, the central portion of the southern building in Area C, was historically utilized as a silk screening business (1990 to 2000). Based on our experience assessing printing and furniture stripping facilities, printing inks, solvents utilized to clean printing and painting equipment, and solvents used to strip paint from furniture, typically contain VOCs, particularly chlorinated VOCs. VOCs are known to penetrate concrete floors due to the

porous nature of the concrete or due to thin cracks and joints that may be present, resulting in VOC impacts to the subsurface. HE-17 records indicate 165-gallons of halogenated solvents were used in this portion of the Site in 1992. Based on the length of time this portion of the Site was utilized for printing and furniture stripping, the amount of VOCs typically associated with these uses, and the proposed redevelopment plans for the Site, there is a moderate likelihood that a recognized environmental condition exists at the Site as a result of the historical operations at this facility. Focused soil vapor sampling at the Site in Area C is recommended to assess possible impacts from the historical printing and furniture stripping use in this area.

### **Historical Heating Oil**

Based on review of historical sources, the Site was initially developed in the early 1940s as multi-family housing (Frontier Housing) for personnel supporting the war effort and who were working in the area. This housing included many “barrack”-type structures. The development at this time also included a large “L”-shaped structure that was the former Frontier School. Our review of historical aerial photographs shows that this school structure overlapped the current Sports Arena structure. In our experience with military housing, and with areas not connected to natural or “manufactured” gas, heating may have relied on heating oil as a fuel source. Based on the types of historical structures that appear on the property in historical photos, it heating oil (similar to diesel fuel) was used, it would typically be stored in underground storage tanks near the structures and fueled the heating system for the buildings. As there appears to be in excess of 100 such historic “barrack”-type structures on Site and the vicinity, possible leaks from numerous former heating fuel underground tanks, if present, are considered a recognized environmental condition for the property.

### **Undocumented Fill Soil**

Based on the review of historical sources, as well as published geologic maps covering the Site, the Site is interpreted to be underlain by fill soil. Because the history or “pedigree” of the fill material is not known, there is a potential that the fill material is impacted with CoCs, such as petroleum products, volatile organic compounds, pesticides, semi-volatile organic compounds, PCBs, or metals (e.g., if the fill came from a contaminated property). Based on the unknown origin of the fill, we cannot assess the likelihood that a recognized environmental condition exists at the Site in connection with fill material.

SCS recommends soil sampling to attempt to assess the potential for CoCs to be present in the fill material located at the Site. This recommendation is based on the fact that the Site is proposed to be redeveloped for residential use, and as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, to address the possibility that the fill material may need to be removed or exported from the Site for geotechnical purposes (i.e., if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes).

### **Burn Ash and Refuse Dumps**

The Site was historically developed with a residential land use as early as 1903 to approximately 1964, and a commercial and industrial land use from approximately 1966 to the present. Based on our experience with properties in older neighborhoods of San Diego, there is the potential for burned or incinerated ash from “backyard” incinerators or “burn pits” to be present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aurally deposited lead, paint from historical structures). Burn ash and/or fill materials may contain high concentrations of CoCs, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

The *City of San Diego Report on Refuse Dumps* (City Planning Commission, City of San Diego, California, Report of Refuse Dumps, Document Number 306491, dated January 1938) was reviewed.<sup>xii</sup> The Site was not interpreted to be located in the vicinity of any of the listed facilities. However, this is a limited list of well-documented or major burn dump locations. More typical is the use of vacant and residential properties for this purpose. Based on our limited historical review, the Site was interpreted to consist of vacant land and residences since circa early 1900s. While there were no obvious visual indications of the presence of burn ash or metals-bearing fill material at the Site, it is not possible, in our experience, to accurately assess this condition unless an extensive area of the soil at the Site is exposed (e.g., as a result of demolition/grading/trenching). Furthermore, a previous geotechnical report indicated the potential presence of a former burn dump site, although this has not been confirmed.

The enforcement actions requiring the remediation of burn ash and/or metals-bearing fill at a property are typically driven by redevelopment and/or excavation as well as potential exposure concerns, if present. The Site grounds were observed to be covered with several buildings and hardscape (asphalt and concrete). If the soil beneath the Site did contain burn ash and/or metals-bearing fill, SCS judges that under normal circumstances (i.e., no excavation), there is a low likelihood that a complete exposure pathway exists for direct dermal contact with, or ingestion or inhalation of, burn ash and/or metals-bearing fill (if present).

Based on our experience, if burn ash and/or metals-bearing fill are present, the likelihood of an enforced remediation is low as long as the soil remains undisturbed and covered by hardscape or landscape. If the burn ash and/or metals-bearing fill is present, it would typically be considered a waste management issue if disturbed or, particularly, if the soil was exported. Any such disturbed materials should be handled, possibly as a regulated or hazardous waste, in accordance with appropriate laws and regulations.

Based on the current Site land use (developed), and the absence of exposure pathways (the Site was observed to be covered with a building and hardscape), it is our opinion that there are no recognized environmental conditions at the Site based on the possible presence of burn ash and/or metals-bearing fill at the Site.

If shallow soil (possibly containing burn ash) at the Site will be disturbed, excavated, or exported in connection with Site development, a Phase II investigation or detailed soil observations should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site will not be covered by hardscape or landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

## Historical Site Vicinity Land Use

The following table provides a chronology of the apparent historical Site vicinity land uses as interpreted from a review of information from the sources referenced.

Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
<b>3280 – 3612 Kurtz Street, 3770 – 3780 Hancock Street, and 3710, 3740, &amp; 3780 Greenwood Street (Northeast)</b>		
1903 to 1927	Topographic maps indicate small structures in the area and undeveloped land	Single-family residential; undeveloped
1928	Aerial photo indicates additional small structures and agricultural fields in the area	Single-family residential and <b>agricultural</b>
1934 to 1943	Topographic maps indicate several additional small structures in the area	Single-family residential
1948 to 1953	Frontier District multi-family housing, several single-family residences and a storage yard; Triles Clothes Pressers and Cleaners/Causway Cleaner (3496 Kurtz St)	Single- and multi-family residential and storage, and <b>drycleaning</b>
1960 to 2023	Various commercial and industrial tenants Loyola Trucking/Clean Harbors (3495 Kurtz St) Various auto repair facilities (3770 Hancock St, 3462 & 3464 Kurtz St, 3740 & 3780 Greenwood Street) Shorebreak (3612 Kurtz St, 1992 to 1998) Quality Auto & Truck Repair (3550 Kurtz) Cloud 9 Shuttle (3520 Kurtz St) Various laundries and possible dry cleaners (3502 & 3280 Kurtz Street 1961 & 1987) UST releases (3465, 3477, 3691 Hancock St)	Commercial, industrial, <b>auto repair</b> , and <b>drycleaning</b>
<b>3156, 3281, 3225, 3241, 3261, 3455, &amp; 3495 Sports Arena Blvd. 3281 Kurtz Street, and APN 441-650-15 (Southeast)</b>		
1903 to 1927	Topographic maps indicate vacant land	None
1928	Aerial photo indicates vacant, undeveloped land and agricultural fields in the area	None and <b>agricultural</b>
1934 to 1943	Topographic maps indicate vacant land	None
1948 to 1960	Frontier District housing	Multi-family residential

Years	Interpreted Site Vicinity Tenants	Interpreted Site Vicinity Use
1964 to 1970	Frontier District housing and larger commercial or industrial buildings	Multi-family residential and commercial or industrial
1975 to 2023	Various commercial tenants and associated parking areas Fedmart Auto Repair (3245 Sports Arena Boulevard) Oasis Gas Station (3229 Sports Arena Boulevard)	Commercial, <b>auto repair</b> , and <b>gasoline service station</b>
<b>3505, 3601, 3655, and 3681 Sports Arena Blvd and APNs 441-650-14, -17, &amp; -18 (Southwest)</b>		
1903 to 1943	Topographic maps or aerial photos indicate vacant land	None
1948 to 1960	Frontier District housing	Multi-family residential
1964 to 1970	Frontier District housing and larger commercial or industrial buildings	Multi-family residential and commercial or industrial
1975 to 2023	Various commercial tenants and associated parking areas Evans Tire & Auto Service (3655 SAB)	Commercial and <b>auto repair</b>
<b>3730 &amp; 3740 Sports Arena Blvd and 4035, 4045, 4055, &amp; 4065 Hancock Street (Northwest)</b>		
1903 to 1943	Topographic maps or aerial photos indicate undeveloped land	None
1948 to 1970	Frontier District housing	Multi-family residential
1975 to 2023	Various commercial and light industrial tenants and associated parking areas	Commercial and light industrial

Because many of the dates listed above are based on a limited selection of historical resources, they are considered to be approximations only; the actual beginning/ending dates for many of the Site vicinity uses/development described above may have been earlier or later than indicated.

With the possible exceptions of agriculture land described in the “Historical Site Research” section above and dry cleaning, automotive repair, industrial, and adjacent commercial facilities with underground storage tanks, described in the “Additional SCS Research” section above, no obvious historical facilities, features of concern, or land uses indicative of the use, storage, or generation of hazardous materials/wastes or petroleum products were found in the historical resources reviewed.

## DATA GAPS IN CONNECTION WITH THE HISTORICAL SITE LAND USE

Based on a review of historical sources, and with the possible exceptions below, there are no obvious indications of data gaps in connection with the historical Site and Site vicinity land use.

Readily available historical information was limited, and information was not available that would provide 5-year data intervals between the following years: 1913 and 1920, 1920 and 1927, 1933 and 1943. Based on the corroborating data from the historical information reviewed (i.e., the Site

was interpreted to have been used for agricultural and/or residential purposes in each of these years), SCS judged it likely that the historical Site land use during this time period was not significantly different from the interpretation presented in the table above.

Historical information prior to 1903 was not readily available. Thus, SCS is unable to determine the Site usage from the date of first development as recommended by ASTM. Based on SCS' experience and available historical information, the Site was interpreted to have possibly first been developed for agricultural and residential use.

At the time of publication of this report, additional information was not available in regards to the Site historically used as a dump and regarding the nature or construction of Frontier Housing and the nature/source of heating. Additional research to address these data gaps is recommended.

### **Findings and Opinions—Historical Site and Site Vicinity Land Use**

Based on a review of historical resources and with the possible exceptions below, it is our opinion that there are no recognized environmental conditions at the Site as a result of a release of hazardous materials/wastes or petroleum products from a known or interpreted historical Site or Site vicinity land use.

#### **Lead-Based Paint, Pesticides and Termiticides**

Based on the fact that the Site has been developed with residential buildings as early as 1903, the potential exists for the presence of concentrations of lead and OCPs to be present in the soil due to the historical potential use of lead-based paint, pesticides, and/or termiticides. SCS understands that the Site is currently developed with buildings with hard scape and/or landscaping. Therefore, if termiticides, pesticides, and/or lead-based paint residues were present in the soil at the Site, there is a low likelihood of open routes of exposure to these soils and a corresponding low likelihood of a recognized environmental condition.

However, if redevelopment activities include extensive grading, soil excavation, or soil export, we recommend that limited soil sampling be conducted as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of lead and/or OCPs, if present. In addition, if soil is to be excavated and exported as part of redevelopment activities, soil sampling should be conducted to assess whether the soil contains concentrations of lead and/or OCPs that would cause the soil to be classified as a hazardous or regulated waste.

#### **Historical Agricultural Land Use**

A review of aerial photographs revealed that some type of agricultural activity took place at the Site and Site vicinity, circa 1928. The presence of agricultural fields at the Site is evident in the 1928 aerial photograph.

If the Site was, in fact, used as agricultural fields circa 1928, there is a low to moderate likelihood that residual concentrations of arsenical pesticides are present in the shallow surface soil beneath the Site. If the soil did contain arsenical pesticides, SCS judges that under normal circumstances (i.e., no excavation), there is a low likelihood that a complete exposure pathway exists. Assuming the legal and permitted application of these pesticides, and assuming existing

## Findings and Opinions—Historical Site and Site Vicinity Land Use

Site use remains the same, this common occurrence is, in SCS' experience, unlikely to lead to an enforcement action and is therefore likely to be considered de minimis, as defined by ASTM.

However, based on redevelopment plans for the Site (including extensive grading, soil excavation and export, and proposed residential use), if the Client desires further confidence as to whether arsenic residues are present and in order to be conservative, SCS recommends that limited soil sampling be conducted for arsenic as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of CoCs. In addition, if soil is to be transported off Site, soil sampling should be conducted to assess whether the soil contains concentrations of CoCs that would cause the soil to be classified as a hazardous or regulated waste.

### Historical Printing and Furniture Stripping

Based on review of historical sources, 3360 Sports Arena Blvd, the northern building in Area C (now Rock & Roll Music School) was historically utilized as a printing and furniture stripping facility (from approximately 1977 to 1989) and 3350 Sports Arena Blvd, the central portion of the southern building in Area C, was historically utilized as a silk screening business (1990 to 2000). Based on our experience assessing printing and furniture stripping facilities, printing inks, solvents utilized to clean printing and painting equipment, and solvents used to strip paint from furniture, typically contained VOCs, particularly chlorinated VOCs. VOCs are known to penetrate concrete floors due to the porous nature of the concrete or due to thin cracks and joints that may be present, resulting in VOC impacts to the subsurface. HE-17 records indicate 165-gallons of halogenated solvents were used in this portion of the Site in 1992. Based on the length of time this portion of the Site was utilized for printing and furniture stripping, the amount of VOCs typically associated with these uses, and the proposed redevelopment plans for the Site, there is a moderate likelihood that a recognized environmental condition exists at the Site as a result of the historical operations at this facility. Focused soil vapor sampling at the Site in Area C is recommended to assess possible impacts from the historical printing and furniture stripping use in this area.

### Historical Heating Oil

Based on review of historical sources, the Site was initially developed in the early 1940s as housing (Frontier Housing) for personnel supporting the war effort and who were working in the area. This housing included many "barrack"-type structures. The development at this time also included a large "L"-shaped structure that was the former Frontier School. Our review of historical aerial photographs shows that this school structure overlapped the current Sports Arena structure. In our experience with military housing, and with areas not connected to natural or "manufactured" gas, heating oil may have been used as a fuel source for heating buildings. Based on the types of historical structures that appear on the property in historical photos, if heating oil (similar to diesel fuel) was used, it would typically be stored in underground storage tanks near the structures and fueled the heating system for the buildings. As there appears to be in excess of 100 such historic "barrack"-type structures on Site and the vicinity, possible leaks from numerous former heating fuel underground tanks, if present, are considered a recognized environmental condition.

## Findings and Opinions—Historical Site and Site Vicinity Land Use

### Undocumented Fill Soil

Based on the review of historical sources, as well as published geologic maps covering the Site, the Site is interpreted to be underlain by fill soil. Because the history or “pedigree” of the fill material is not known, there is a potential that the fill material is impacted with CoCs, such as petroleum products, volatile organic compounds, pesticides, semi-volatile organic compounds, PCBs, or metals (e.g., if the fill came from a contaminated property). Based on the unknown origin of the fill, we cannot assess the likelihood that a recognized environmental condition exists at the Site in connection with fill material.

SCS recommends soil sampling to attempt to assess the potential for CoCs to be present in the fill material located at the Site. This recommendation is based on the fact that the Site is proposed to be redeveloped for residential use and as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, to address the possibility that the fill material may need to be removed or exported from the Site for geotechnical purposes (i.e., if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes).

### Burn Ash and Refuse Dumps

The Site has historically been developed with a residential land use as early as 1903 to approximately 1964, and a commercial and industrial land use from approximately 1970 to present. Based on our experience with properties in older neighborhoods of San Diego, there is the potential for burned or incinerated ash from “backyard” incinerators or “burn pits” to be present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aerially deposited lead, paint from historical structures). Burn ash and/or fill materials may contain high concentrations of CoCs, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

If shallow soil (possibly containing burn ash) at the Site will be disturbed, excavated, or exported in connection with Site development, a Phase II investigation or detailed soil observations should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site will not be covered by hardscape or landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

## 5 CONCLUSIONS AND RECOMMENDATIONS

SCS has performed an Assessment of 3220, 3240, 3250, 3340, and 3500 Sports Arena Boulevard, San Diego, CA 92110 (Site), in general conformance with the ASTM Standard Practice for Phase I Environmental Site Assessment Process E 1527-13 and the EPA, 40 CFR 312, Standards and Practices for All Appropriate Inquiries, Final Rule (AAI). Any exceptions to, or deletions from, the ASTM and AAI Scope of Work were previously described in this Report where applicable.

This Assessment has revealed the following evidence of a recognized environmental conditions in connection with the Site.

## Clarifier Systems/Ice Pits

Six inground wastewater clarifiers were observed on Site, one was associated with the Sports Arena car wash (5-stage) and the other five are food grade grease traps associated with the Sports Arena food service, the Summit Gasoline Station convenience store, Chick-fil-A, and Chili's. According to Mr. Bedoe, two grease traps are present within the concourse of the Sports Arena, two are present on the exterior of the Arena (inground), and one is present on the arena floor level. All of the grease traps are associated with food service. The grease traps associated with the arena are cleaned out approximately every six months by Ecogrease.

In addition, according to Mr. Bedoe, sludge and paint from the arena floor accumulates in the two ice pits located on either end of the Sport Arena floor. The pits have reportedly been cleaned once in the life of the sports arena.

Based on our experience, inground wastewater clarifiers and ice pits have the potential to release (e.g., through cracks or degradation of the concrete from poorly fitting or degraded piping) wastewater containing petroleum products, solvents, and hazardous wastes into the subsurface. This potential is exacerbated with time as the clarifier/ice pit systems age. In our experience, it becomes increasingly likely that systems more than 10 years old will experience a release. Based on their age (approximately 20 years or more), there is a low to moderate likelihood that a recognized environmental condition (REC) exists at the Site from the car wash clarifier located in Area B. Due to the potential presence of metals and VOCs associated with the sludge and the length of time the pits have been present (more than 50 years), the potential for subsurface impacts beneath the pits cannot be ruled out. Therefore, the ice pits are considered an environmental concern. SCS recommends oversight by an environmental professional upon removal of the ice pits during redevelopment activities.

The grease traps associated with food operations are not considered a concern due to the collection of food grade waste within these units.

## Indications of Releases of Hazardous Materials/Wastes or Petroleum Products

Staining observed in the Kobey's waste/storage area on the north side of the Site, west of the Clean Harbors property, may be associated with spills of petroleum products and/or hazardous substances. Given the apparent use of the area for minor waste storage, as well as the presumed length of time that this area may have been used to store wastes (more than 35 years, based on aerial photograph review), this area has a low to moderate likelihood of representing a recognized environmental condition.

## On-Site Gasoline Service/Fueling Stations

The Site has been developed with Dixieline Lumber including fueling stations at 3520 Sports Arena Boulevard (Parcel D, Figure 7) since approximately 1970 (53 years), a gasoline service station identified as Arena Fuels/Arco AM-PM/Summit Gasoline Service Station at 3580 Sports Arena Boulevard (Parcel , Figure 3) since 2003 (20 years), and a historical gasoline service station Union Oil/76 at 3494, 3580, or 3640 Sports Arena Boulevard (Parcel B, Figure 2) from approximately 1966 to 1974 (8 years). Gasoline service/fueling stations are associated with features of environmental concern (petroleum products/wastes, underground storage tanks [USTs], fuel dispensers, and clarifier/sumps).

DEHQ records indicate the USTs and fueling systems at Dixieline have been removed and soil confirmation samples taken in the excavation areas indicated CoCs were not detected above laboratory reporting limits.

DEHQ and EDR records indicate that a historical gasoline service station occupied the area where Summit Gasoline is currently, or possibly, where Chili's is currently according information obtained through interviews with the tenant, circa late 1960s to early 1970s. Soil and groundwater samples taken on Site in geotechnical borings in the area opposite Kemper Street indicated CoCs were not detected above laboratory reporting limits.

DEHQ records report the existing gasoline service station at 3580 Sports Arena Boulevard, USTs and system was installed in 2003, including a split regular unleaded gasoline 10,000-gallon and diesel fuel 12,000-gallon USTs, and one premium unleaded 20,000-gallon UST. In February 2020, one additional regular unleaded gasoline 40,000-gallon UST was added to this system. These four USTs and associated fueling system are currently in place. At the time of the site reconnaissance, three USTs were observed east of the convenience store and west of the car wash (Figure 3b). No information was provided by the gas station manager regarding the USTs.

No unauthorized releases of petroleum hydrocarbons and minor violations were reported in the DEHQ files the existing gas station. Based on an absence of disposal violations, and the lack of known and reported releases, there does not appear to be a recognized environmental condition associated with the current use of this portion of the Site as a gas station. However, based on our experience, there are likely surface release(s) spills at the gas station that have occurred, as the well possible vapor phase releases as a result of piping systems that were not historically vapor "tight." Also the lack of information regarding the three USTs observed east of the convenience store and west of the car wash. Combined with the proposed redevelopment plans for the Site into a mixed use development with commercial/retail and residential uses along with the sports arena complex, these possible releases are considered potential recognized environmental conditions.

Information regarding removal of USTs from the historical service station are unavailable. Therefore, based on the lack of records pertaining to the condition of the subsurface following UST removal, this historical gas station is considered a recognized environmental condition and requires further research or investigation.

Subsurface investigation (geophysical survey, soil and soil vapor sampling) is recommended, in particular due to the proposed change in land use to include residential properties in the area of the current and historical gas stations.

Consultation with the DEHQ is recommended to address potential petroleum hydrocarbon impacts during the removal of the fuel systems and clarifiers on Site, and proper permits pertaining to the UST removal/replacement should be obtained from the DEHQ and City of San Diego Fire-Rescue department prior to redevelopment. Additional soil and soil vapor sampling, as recommended above, will also serve to update the prior investigations based on current regulatory standards.

## Offsite Sources

### Former Cleaners – 3496 and 3502 Kurtz Street

Due to the listings in the EDR Hist Cleaner database of The Launderette in 1961 located at 3502 Kurtz Street and Triles in 1948 located at 3496 Kurtz Street, SCS submitted requests for records to the DEHQ. No records were identified in the DEHQ files for these facilities. The facilities are located at least 75 or 200 feet, respectively, to the northeast of the Site, across Kurtz Street, and are not technically located on an adjoining property. The properties have since been redeveloped. The facilities do not appear on any databases indicating an unauthorized release has been documented; however, the facilities were present prior to the time of regulatory oversight; therefore we cannot assess whether these facilities represent a recognized environmental condition to the Site. Subsurface assessment is recommended to assess whether operations at these facility have resulted in impacts to the subsurface at the Site.

### H21153-1, Clean Harbors, 3495 Kurtz Street

The Clean Harbors facility is a former truck terminal located on an adjoining property to the northeast of the Site consisting of a diesel fueling station and oil UST circa 1963 to the mid-1980s to early 1990s which impacted groundwater.

Although closure was granted by the regulatory agency, due to the limited nature of the previous assessments and close proximity and upgradient location of the former freight terminal, the property remains an environmental concern and there is a moderate likelihood that reported release(s) from this facility represents a recognized environmental condition to the Site. Therefore, SCS recommends subsurface assessment at the Site (i.e., soil, soil vapor, and/or groundwater sampling) adjacent to the Clean Harbors property.

### H21151-001 and -002, Former Shorebreak Materials-Butler Property, 3612 Kurtz Street

In September 1989 contamination of the soil and groundwater was discovered with the removal of two USTs on this northeast adjacent property and a DEHQ case was opened, in addition hazardous wastes and substances stored and used by Shorebreak in 1991 were observed impacted soil in the solvent storage and paint mixing area (approximately 350 feet to the northeast) as a HMMD complaint.

Based on the close proximity of the contaminated areas to the Site and the possible up-gradient location of the contamination with respect to the groundwater flow direction, there is a moderate likelihood that a recognized environmental condition exists at the Site in connection with reported releases from this northeast adjacent facility, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### HMD/UST 211463 and 131595, Exponents, Inc., 3280 Kurtz Street

Although Exponents, Inc. does not appear on any databases indicating an unauthorized release has been documented, there is a possibility that Exponents, Inc. performed dry cleaning activities, and since there is a record of the use of chlorinated solvents (trichlorethylene), an unidentified release would have the potential to impact the Site.

Therefore, the use of chlorinated solvents at this facility is considered a potential recognized environmental condition to the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### **HMD 207798/103138 3467-3469 Kurtz Street**

Although no releases were documented at the facility, based on the former presence of a UST, the reported generation of the solvent TCE and petroleum hydrocarbon waste, and the close proximity, there is a moderate to high likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

### **Yellow Cab Company of San Diego, 3473 Kurtz Street**

Given the presence of a taxi company, it is possible that a UST was present and/or automotive repair operations have occurred. If a previously unidentified release had occurred, there is a moderate likelihood that a recognized environmental condition exists for the Site, and subsurface assessment (i.e., soil, soil vapor, and/or groundwater) is recommended.

## **Historical Sources**

### **Lead-Based Paint, Pesticides and Termiticides**

Based on the fact that the Site has been developed with residential buildings as early as 1903, the potential exists for the presence of concentrations of lead and organochlorine pesticides (OCPs) to be present in the soil due to the historical potential use of lead-based paint, pesticides, and/or termiticides. SCS understands that the Site is currently developed with a building with hard scape and/or landscaping. Therefore, if termiticides, pesticides, and/or lead-based paint residues were present in the soil at the Site, there is a low likelihood of open routes of exposure to these soils and a corresponding low likelihood of a recognized environmental condition.

However, if redevelopment activities include extensive grading, soil excavation, or soil export, we recommend that limited soil sampling be conducted as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of lead and/or OCPs, if present. In addition, if soil is to be excavated and exported as part of redevelopment activities, soil sampling should be conducted to assess whether the soil contains concentrations of lead and/or OCPs that would cause the soil to be classified as a hazardous or regulated waste.

### **Historical Agricultural Land Use**

A review of aerial photographs revealed that some type of agricultural activity took place at the Site and Site vicinity, circa 1928. The presence of agricultural fields at the Site is evident in the 1928 aerial photograph.

If the Site was, in fact, used as agricultural fields circa 1928, there is a low to moderate likelihood that residual concentrations of arsenical pesticides are present in the shallow surface soil beneath the Site.

The Site is currently developed and was observed to be covered with several buildings, asphalt pavement, and landscaping. If the soil did contain arsenical pesticides, SCS judges that under normal circumstances (i.e., no excavation), there is a low likelihood that a complete exposure pathway exists. Assuming the legal and permitted application of these pesticides, and assuming existing Site use remains the same, this common occurrence is, in SCS' experience, unlikely to lead to an enforcement action and is therefore likely to be considered de minimis, as defined by ASTM.

However, based on redevelopment plans for the Site (including extensive grading, soil excavation and export, and proposed residential use), if the Client desires further confidence as to whether arsenic residues are present and in order to be conservative, SCS recommends that limited soil sampling be conducted for arsenic as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of CoCs. In addition, if soil is to be transported off Site, soil sampling should be conducted to assess whether the soil contains concentrations of CoCs that would cause the soil to be classified as a hazardous or regulated waste.

### **Historical Printing and Furniture Stripping**

Based on review of historical sources, 3360 Sports Arena Blvd, the northern building in Area C (now Rock & Roll Music School) was historically utilized as a printing and furniture stripping facility (from approximately 1977 to 1989) and 3350 Sports Arena Blvd, the central portion of the southern building in Area C, was historically utilized as a silk screening business (1990 to 2000). Based on our experience assessing printing and furniture stripping facilities, printing inks, solvents utilized to clean printing and painting equipment, and solvents used to strip paint from furniture, typically contain volatile organic compounds (VOCs), particularly chlorinated VOCs. VOCs are known to penetrate concrete floors due to the porous nature of the concrete or due to thin cracks and joints that may be present, resulting in VOC impacts to the subsurface. HE-17 records indicate 165-gallons of halogenated solvents were used in this portion of the Site in 1992. Based on the length of time this portion of the Site was utilized for printing and furniture stripping, the amount of VOCs typically associated with these uses, and the proposed redevelopment plans for the Site, there is a moderate likelihood that a recognized environmental condition exists at the Site as a result of the historical operations at this facility. Focused soil vapor sampling at the Site in Area C is recommended to assess possible impacts from the historical printing and furniture stripping use in this area.

### **Historical Heating Oil**

Based on review of historical sources, the Site was initially developed in the early 1940s as multi-family housing (Frontier Housing) for personnel supporting the war effort and who were working in the area. This housing included many "barrack"-type structures. The development at this time also included a large "L"-shaped structure that was the former Frontier School. Our review of historical aerial photographs shows that this school structure overlapped the current Sports Arena structure. In our experience with military housing, and with areas not connected to natural or "manufactured" gas, heating may have relied on heating oil as a fuel source. Based on the types of historical structures that appear on the property in historical photos, if heating oil (similar to diesel fuel) was used, it would typically be stored in underground storage tanks near the structures and fueled the heating system for the buildings. As there appears to be in excess of 100 such historic "barrack"-type structures on

Site and the vicinity, possible leaks from numerous former heating fuel underground tanks, if present, are considered a recognized environmental condition for the property.

### **Undocumented Fill Soil**

Based on the review of historical sources, as well as published geologic maps covering the Site, the Site is interpreted to be underlain by fill soil. Because the history or “pedigree” of the fill material is not known, there is a potential that the fill material is impacted with CoCs, such as petroleum products, volatile organic compounds, pesticides, semi-volatile organic compounds, PCBs, or metals (e.g., if the fill came from a contaminated property). Based on the unknown origin of the fill, we cannot assess the likelihood that a recognized environmental condition exists at the Site in connection with fill material.

SCS recommends soil sampling to attempt to assess the potential for CoCs to be present in the fill material located at the Site. This recommendation is based on the fact that the Site is proposed to be redeveloped for residential use and as a precautionary measure to ensure that future occupants of Site buildings, construction workers, and others are not exposed to elevated concentrations of hazardous materials/wastes. In addition, to address the possibility that the fill material may need to be removed or exported from the Site for geotechnical purposes (i.e., if the fill material contains CoCs, it may be classified as a waste or hazardous waste for off-Site disposal purposes).

### **Burn Ash and Refuse Dumps**

The Site was historically developed with a residential land use as early as 1903 to approximately 1964, and a commercial and industrial land use from approximately 1966 to the present. Based on our experience with properties in older neighborhoods of San Diego, there is the potential for burned or incinerated ash from “backyard” incinerators or “burn pits” to be present or mixed with the soil. In addition, elevated concentrations of metals may exist in the shallow soil from other sources as well (e.g., imported fill, aerially deposited lead, paint from historical structures). Burn ash and/or fill materials may contain high concentrations of CoCs, notably certain metals (e.g., copper, lead, zinc, mercury, and cadmium).

Based on our experience, if burn ash and/or metals-bearing fill are present, the likelihood of an enforced remediation is low as long as the soil remains undisturbed and covered by hardscape or landscape. If burn ash and/or metals-bearing fill is present, it would typically be considered a waste management issue if disturbed or, particularly, if the soil was exported. Any such disturbed materials should be handled, possibly as a regulated or hazardous waste, in accordance with appropriate laws and regulations.

Based on the current Site land use (developed), and the absence of exposure pathways (the Site was observed to be covered with a building and hardscape), it is our opinion that there are no recognized environmental conditions at the Site based on the possible presence of burn ash and/or metals-bearing fill at the Site.

If shallow soil (possibly containing burn ash) at the Site will be disturbed, excavated, or exported in connection with Site development, a Phase II investigation or detailed soil observations should be conducted. Such assessment would ideally involve trenching and sampling of the shallow subsurface soil at the Site and subsequent analysis for typical burn ash constituents. In addition, if any soil at the Site will not be covered by hardscape or

landscape, the soil should be assessed for burn ash constituents to ensure there is no human health risk to future Site occupants.

This Assessment has been conducted by an environmental professional whose qualifications<sup>6</sup> were made known to the Client. The conclusions and recommendations presented above are based on the review of readily available data obtained as part of this Assessment, current regulatory guidelines, the Site and Site vicinity reconnaissance, and SCS' experience.

## 6 REPORT USAGE AND FUTURE SITE CONDITIONS

This Report is intended for the sole usage of the Client and other parties designated by SCS. The methodology used during this Assessment was in general conformance with the requirements of the Client and the specifications and limitations presented in the Consulting Agreement (Contract) between the Client and SCS. This Report contains information from a variety of public and other sources, and SCS makes no representation or warranty about the accuracy, reliability, suitability, or completeness of the information. Any use of this Report, whether by the Client or by a third party, shall be subject to the provisions of the Contract between the Client and SCS. Any misuse of or reliance upon the Report shall be without risk or liability to SCS.

Assessments are qualitative, not comprehensive, in nature and may not identify all environmental problems or eliminate all risk. For every property, but especially for properties in older downtown or urban areas, it is possible for there to be unknown, unreported recognized environmental conditions, USTs, or other features of concern that might become apparent through demolition, construction, or excavation activities, etc. In addition, the scope of services for this project was limited to those items specifically named in the scope of services for this Report. Environmental issues not specifically addressed in the scope of services for this project are not included in this Report.

Land use, condition of the properties within the Site, and other factors may change over time. The information and conclusions of this Report are judged to have been relevant at the time the work described in this Report was conducted. This Report should not be relied upon to represent future Site conditions unless a qualified consultant familiar with the practice of Phase I Environmental Site Assessments in the County of San Diego is consulted to assess the necessity of updating this Report.

The property owners at the Site are solely responsible for notifying all governmental agencies and the public of the existence, release, or disposal of any hazardous materials/wastes or petroleum products at the Site, whether before, during, or after the performance of SCS' services. SCS assumes no responsibility or liability for any claim, loss of property value, damage, or injury that results from hazardous materials/wastes or petroleum products being present or encountered within the Site.

Although this Assessment has attempted to assess the likelihood that the Site has been impacted by a hazardous material/waste release, potential sources of impact may have escaped detection for reasons that include, but are not limited to, (1) inadequate or inaccurate information rightfully provided to SCS by third parties, such as public agencies and other outside sources; (2) the limited

---

<sup>6</sup> SCS declares that, to the best of its professional knowledge and belief, the reviewer meets the definition of Environmental Professional as defined in section 312.10 of 40 CFR 312 and has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. SCS has developed and performed All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR 312. The qualifications of the report preparers are included in the Appendices.

scope of this Assessment; and (3) the presence of undetected, unknown, or unreported environmental releases.

## 7 LIKELIHOOD STATEMENTS

Statements of “likelihood” have been made in this report. Likelihood statements are based on professional judgments of SCS. The term “likelihood,” as used herein, pertains to the probability of a match between the prediction for an event and its actual occurrence. The likelihood statement assigns a measure for a “degree of belief” for the match between the prediction for the event and the actual occurrence of the event.

The likelihood statements in this Report are made qualitatively (expressed in words). The qualitative terms can be approximately related to quantitative percentages. The term “low likelihood” is used by SCS to approximate a range of 10 to 20 percent; the term “moderate likelihood” refers to an approximate range of 40 to 60 percent; and the term “high likelihood” refers to an approximate range of 80 to 90 percent.

## 8 SPECIAL CONTRACTUAL CONDITIONS BETWEEN USER AND ENVIRONMENTAL PROFESSIONAL

There were no special contractual conditions between the user of this Assessment, the environmental professional, and SCS.

## 9 ENDNOTES

## APPENDICES

---

## GLOSSARY

---

## GLOSSARY

- adjacent property.** Any real property or properties the border of which is contiguous or partially contiguous with that of the Site or that would be contiguous or partially contiguous with that of the Site but for a street, road, or other public thoroughfare separating them.
- aerial photographs.** Photographs taken from an airplane or helicopter of areas encompassing the Site.
- asbestos.** Six naturally occurring fibrous minerals found in certain types of rock formations. Of the six, the minerals chrysotile, amosite, and crocidolite have been the most commonly used in building products. When inhaled in sufficient quantities, asbestos fibers can cause serious health problems.
- asbestos-containing material (ACM).** Any material or product that contains more than 1% asbestos.
- construction debris.** Any concrete, brick, asphalt, and other building materials discarded in the construction of a building or other improvement to property.
- Controlled recognized environmental conditions.** A *recognized environmental condition* resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity use limitations, institutional controls, or engineering controls).
- de minimis condition.** A condition that generally does not present a threat to human health or the environment and that generally would not be subject to an enforcement action if brought to the attention of appropriate governmental agencies). A condition considered *de minimis* is not a *recognized environmental condition*.
- drum.** A container (typically, but not necessarily, holding 55 gallons of liquid) that may be used to store hazardous substances or petroleum products.
- dry well.** Underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (spilled intentionally or not), and for wastewater disposal (often illegal).
- fill dirt.** Dirt, soil, sand, or other earth that is obtained off site and that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.
- fire insurance map.** Maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property.
- hazardous material.** Any material that, because of its quantity, concentration, or physical and chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. Hazardous materials include, but are not limited to, hazardous substances, hazardous waste, and any material which a handler or the administering agency has a reasonable basis for believing would be injurious to the health or safety of persons or harmful to the environment if released into the workplace or the environment.
- hazardous substance.** Pursuant to CERCLA, hazardous substances include the following:

- 1) All toxic pollutants and hazardous substances listed under the Clean Water Act
- 2) Hazardous wastes regulated under RCRA
- 3) Any hazardous air pollutant under the Clean Air Act
- 4) Chemicals designated as “immediately hazardous” under the Toxic Substance Control Act

The EPA is also allowed to designate additional substances as hazardous if they present a substantial danger to the public health or welfare or the environment when released.

**hazardous waste.** A substance defined pursuant to the Solid Waste Disposal Act amended by RCRA, a hazardous waste is a solid waste, or a combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics, may contribute to an increase in mortality or an increase in serious irreversible, or incapacitating illness or pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

**historical recognized environmental condition.** A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

**landfill.** A place or area of land used for the disposal of solid wastes as defined by state solid waste regulations. Synonymous with the term *solid waste disposal site*, a landfill is also known as a garbage dump or trash dump.

**likelihood.** As used in this Report, the term *likelihood* pertains to the probability of a match between the prediction of an event and its actual occurrence. As used by SCS Engineers, the term *low likelihood* approximates a percentage range to 10 to 20 percent; *moderate likelihood* approximates 40 to 60 percent; and *high likelihood* approximates 80 to 90 percent.

**Material Safety Data Sheet (MSDS).** Written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA standards.

**obvious.** That which is plain or evident. The term refers to a condition or fact that could not be ignored or overlooked by a reasonable observer while physically observing the property.

**PCE.** Perchloroethene/perchloroethylene, or “Perc”; also tetrachloroethene/tetrachloroethylene; commonly used as a solvent for dry-cleaning.

**petroleum products.** Petroleum, including crude oil, natural gas, natural gas liquids, liquefied natural gas, synthetic gas usable for fuel, kerosene, diesel oil, jet fuels, motor oil, hydraulic oil, gear oils, and fuel oil.

**recognized environmental conditions (RECs).** Recognized environmental conditions, as defined by the American Society for Testing and Materials (ASTM), include the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. However, the term is

not intended to include *de minimis* conditions.

**retail quantities (RQs).** Quantities of hazardous materials usually less than 50 gallons, 100 pounds, or 200 cubic feet of gas (under the regulatory reporting limits).

**small retail quantities (SRQs).** Quantities of hazardous materials in containers of 5 gallons or less, and less than 50 gallons in aggregate.

**solvent.** A chemical compound that is capable of dissolving another substance and is itself a hazardous substance, such as TCE, TCA, PCE, Stoddard solvent, paint thinner, mineral spirits, and acetone. Solvents are used in a number of manufacturing or industrial processes.

**TCA.** Trichloroethane; also 1,1,1 TCA; a commonly used industrial solvent for degreasing/cleaning.

**underground storage tank (UST).** Any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 percent or more beneath the surface of the ground.

**visually and/or physically observed.** This term refers to observations made by vision during the Site visit while walking through the Site or Site building(s), and observations made by the sense of smell, particularly awareness of noxious or foul odors.

USER and OWNER QUESTIONNAIRES

---

ATTACHMENT A  
USER QUESTIONNAIRE

One of the primary reasons an Environmental Site Assessment or Phase I (ESA) is completed for a real estate transaction is to document due diligence efforts and “all appropriate inquiry,” thereby satisfying certain elements required by CERCLA in order to qualify for a Landowner Liability Protection or LLP.

LLP is the term used to describe the three types of potential defenses to Superfund (CERCLA) liability in EPA’s Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability (“Common Elements” Guide) issued on March 6, 2003.

In order to qualify for one of the LLPs offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), 40 CFR Part 312 requires that the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that the “all appropriate inquiry” is incomplete.

This “Users Questionnaire” is outside the scope of work of the environmental professional completing an ESA for a user. When completed, return the questionnaire either by mail, e-mail, or fax to the environmental professional prior to the site reconnaissance so your responses can be used and incorporated into the final ESA report by the environmental professional as required by 40 CFR Part 312.

**(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25)**

Are you aware of environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?  Yes  No If Yes, please describe:

**(2) Activity and land use limitations (AUL's) that are in place on the site or that have been filled or recorded in a registry (40 CFR 312.26).**

Are you aware of any AUL, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local laws?  Yes  No If Yes, please describe:

**(3) Specialized knowledge or experience of the person seeking to qualify for LLP (40 CFR 312.28)**

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes  No If Yes, please explain:

*Arena operations*

**(4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property?  Yes  No *NA*

*ground lease yet to be negotiated*

If the purchase price is lower than fair market value, do you conclude that is because contamination is known or believed to be present at the property?  Yes  No If Yes, please explain:

*NA*

**(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a) Do you know the past use(s) of the property?  Yes  No If Yes, please describe:

(b) Do you know specific chemicals that are present or once were present at the property?  Yes  No If Yes, please describe:

(c) Do you know of spills or other chemical releases that have taken place at the property?  Yes  No If Yes, please describe:

(d) Do you know of any environmental cleanups that have taken place at the property?  Yes  No If Yes, please describe:

**(6) The degree of obviousness of the presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indications that point to the presence or likely presence of contamination of the property?  Yes  No If Yes, please explain:

Gas station on property

*Please attach additional sheets and additional information as needed to complete this questionnaire.*

## OWNER REPRESENTATIVE QUESTIONNAIRE

For the purposes of this questionnaire, the Property refers to the parcel identified as:

**Midway Rising - 3220, 3240, 3250, 3350, and 3500 Sports Arena Boulevard, San Diego, California 92110**

**Eastern Portion of Assessor's Parcel Number 441-590-04**

Owner (Business Entity) City of San Diego, A Municipal Corporation
Owner (Individual Representative) Penny Maus
Owner Representative: Director, Department of Real Estate and Airport Management
<b>Please answer the following questions in good faith and to the best of your knowledge. Your assistance is appreciated.</b>
How long have you owned the Property (months/years)?
Based on available information it appears this property came into City possession approximately in 1956
When were the current buildings on the Property constructed, if known?
Based on the information available to us the Sports Arena Building was built in 1965 and the buildings on the retail pads may have been built around or after 2002. We do not have any building permits or building plans that would specifically confirm this.
Do you have any knowledge of the history of the Property (e.g., agricultural land, undeveloped land, previous occupants or owners)? If so, please describe and provide years, if known (e.g., pre-1930s to 1940s: Agricultural, 1945 to 1968: occupied by Johnny's Car Wash).
Please see attached brief history document
To your knowledge, are any hazardous materials, chemicals, toxic substances, or petroleum products used or stored at the property? If so, please describe the types of chemicals/substances and their approximate quantities.
Unknown – There is an existing Gas Station located at 3500 Sports Arena Blvd. This Gas Station is a sub-tenant of the existing tenant – The City is not a party to this agreement and does not have any specific knowledge as to the petroleum products associated with the use at this property.
To your knowledge, are any hazardous wastes generated at the property? If so, please describe the types and quantities of hazardous waste generated and how they are disposed.
Unknown
Are you aware of any <i>current or historical</i> spills or releases of hazardous materials, chemicals, toxic substances, petroleum products, or hazardous wastes at the property? If so, please describe the nature of the material spilled, the location, date, and method of cleanup, if known.
Unknown

<p>Are there currently, or were there historically, any underground or aboveground storage tanks on the property? If so, please describe the location, type of tank, installation date, and contents, if known.</p>
<p>Please see information related to existing gas station. City is not aware of the details associated with the any underground storage tanks associated with this use.</p>
<p>Is there currently, or was there historically, a septic system on the Property? If not, who is the supplier of the sanitary sewer services to the Property?</p>
<p>Unknown</p>
<p>Do you have the names and/or contact information for previous owners of the Property that we may interview for our Phase I Environmental Site Assessment? If so, please provide here.</p>
<p>No</p>
<p>Have fill soils been placed at the Property? If so, please describe the origin of the soils, if known.</p>
<p>Unknown</p>
<p>Have any environmental assessments been previously conducted at the Property, such as Phase I Environmental Site Assessments, soil, soil vapor, or groundwater sampling? If so, are copies of these assessments available for review?</p>
<p>No, the Midway Rising team has recently completed or is in process of completing environmental due diligence on the stie. Any of those reports should be obtained from your client.</p>
<p>Are you aware of any environmental cleanup liens or activity and use limitations (e.g., engineering controls, deed restrictions) that have been recorded for the Property?</p>
<p>No</p>
<p>Are you aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Property?</p>
<p>No</p>
<p>Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Property?</p>
<p>No</p>
<p>Thank you for your assistance. Please contact me if you need assistance with this questionnaire. Sincerely.</p> <p>Allison O'Neal Staff Professional SCS Engineers 8799 Balboa Avenue, Suite 290 San Diego, California 921 23 (858) 287-0277 aoneal@scsengineers.com</p>

## Sports Arena History

1956 – Sports Arena Acquisition

1963 – Option Agreement between the City and Robert Breitbard. Subsequently, this agreement was extended, revived amended.

1965 – City creates San Diego Arena Lease Co. (SDALC), which is a California non-profit corporation, to issue construction bonds to finance the construction of the Sports Arena and enters into a 50-year ground lease with SDALC. (Acting in accordance with the terms of the Option Agreement, Breitbard assigned his rights in certain portions of the property covered by the agreement to SDALC.)

1966 – Sports Arena opens with a match between the San Diego Gulls and the Seattle Totems

1967 – First Amendment to Ground Lease revises premises and allows for sublease, which resulted in the S.D. Sports Arena Operating Sublease operated by S.D. Sports Enterprises, Inc. – Robert Breitband and Les Land.

1971 – Second Amendment to Ground Lease corrects legal description and provides for termination of sublease status for a portion of the property. Breitband sells lease to Canadian company Greymont Ltd.

1971 – SDALC entered into a 44-year Operating Sublease (8/6/71) with San Diego Entertainment, Inc. as the Operating Sublessee which would expire November 7, 2015

1987 – Council approves Amendment No. 1 to the Operating Sublease allowing swap meet uses and revises rent structure

1991 – \$6.4M construction bond is paid off, SDALC lease terminates and rights are transferred to City

1992 – Operating Sublease assigned to Arena Group 2000 (AG2)

1993 – Second Amendment to Operating Sublease – extended 2 years to 2017 AG2 gets exclusive naming rights for a new arena and Operating Sublease becomes a direct lease with the operator (AG2)

1997 – Third Amendment to Operating Sublease defers \$700,000 in rent in exchange for maintenance/renovations

2002 – Fourth Amendment to Operating Sublease for naming rights and creates a separate lease (Retail Pads Lease) for Krispy Kreme (currently Chick-Fil-A) Chili's and Arco

2008 – Operating Sublease assigned from Arena Group 2000, L.P. to AEG Management SD, LLC

2010 – Fifth Amendment to Operating Sublease approves naming rights for “Valley View Casino Center” and extends agreement through 5/31/2020.

2021

2021 – Percentage Rent Lease approved with AEG Management, SD LLC for operations, lease and maintenance of Sports Arena. Agreement expires July 31, 2024

## Contreras, Lucy

**To:** Reisch, Kevin <KReisch@sandiego.gov>  
**Subject:** FW: Midway Rising - Due Diligence (SCS Engineers Phase 1 Owner Representative Questionnaire)

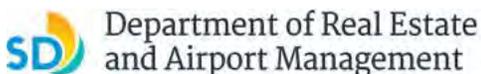

Hi Kevin,

We were asked to fill out this questionnaire for Midway Rising's consultants to do their phase 1 = I have completed the owners questionnaire – is there any issue with how it has been filled out and/or issues with the short-form? This is pretty standard from what I have seen in the past but wanted to confirm I am not missing anything

Mr. Ralph Vasquez  
Environmental Business Solutions  
8799 Balboa Avenue #290  
San Diego, CA 92123

SAN DIEGO GAS & ELECTRIC (SDG&E) PCB TRANSFORMERS

Dear Mr. Vasquez,

This letter is in response to your inquiry on March 5, 2008 regarding the transformers purchased by San Diego Gas & Electric (SDG&E).

SDG&E has never specified PCB transformers for its distribution system. Although only mineral oil transformers were purchased, some older, pre 1980, mineral oil transformers were inadvertently contaminated with PCBs by the manufacturer.

Based on the SDG&E statistical sampling and testing program, it is unlikely that the SDG&E equipment is PCB contaminated. The only way to know with certainty is by testing.

SDG&E is responsible for ensuring that its transformers comply with EPA regulations governing PCBs. However, EPA regulations do not require the testing of individual mineral oil transformers. Therefore, should you wish for that to be done, there will be a charge associated with the testing and if a service interruption is deemed necessary then there will be additional charges for any high voltage line work and associated labor costs.

Please call me at (858) 547-3069 if you need additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "W. Brull", written in a cursive style.

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: AT&T Mobilty - SPORTS ARENA (USID15198)  
 ADDRESS: 3500 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 01/24/2018 PAGE 1 OF 2  
 RECORD ID #: DEH2014-HUPFP-001012  
 TIME START: 2:00 PM END: 2:30 PM  
 SPECIALIST: Chantal Eivaz  
 INSPECTION CONTACT: Paul Weiss  
 TITLE: Environmental Site Manager  
 PHONE: (619) 607-2131  
 E-MAIL: pw2323@att.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Paul Weiss

TITLE: Environmental Site Manager

### INTRODUCTION:

#### ROUTINE INSPECTION

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, HMD implements the Unified Program in the County and regulates facilities that store reportable quantities of hazardous materials, and generate hazardous waste and medical waste.

Today I conducted a routine compliance inspection at **AT&T Mobilty - SPORTS ARENA (USID15198)** to verify compliance with Hazardous Materials Business Plan (HMBP) requirements. Consent to inspect was granted by Paul Weiss, Environmental Site Manager. This facility is an unstaffed cellular/telecommunications site and stores reportable quantities of hazardous materials on-site in the form of batteries containing electrolyte used for powering AT&T cellular equipment. HMBP last certified in the California Environmental Reporting System (CERS) on 08/10/17. CERS ID: 10456183.

#### The following was observed on-site during today's inspection:

-24x12V lead acid batteries (78.8 gallons of electrolyte based on last CERS submittal)

*No violations were observed during today's inspection.*

Employee training logs reviewed during the inspection. Employee training is conducted online via training modules. Annual refresher training is required and training topics California Hazardous Waste Disposal, Hazardous Materials & Waste Management for California, AT&T Emergency Preparedness Training. Online training completed on 12/13/17.

Per Paul Weiss, this site does not currently have an emergency diesel generator.

### INSPECTION REMARKS:

Per California Health and Safety Code section 25508.1:

Within 30 days of any one of the following events, a business subject to this article shall electronically update the information submitted to the statewide information management system via CERS:

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: **01/24/2018** PAGE **2** OF **2**  
RECORD ID #: **DEH2014-HUPFP-001012**

- (a) A 100 percent or more increase in the quantity of a previously disclosed material.
- (b) Any handling of a previously undisclosed hazardous material subject to the inventory requirements of this article.
- (c) Change of business or facility address.
- (d) Change of business ownership.
- (e) Change of business name.
- (f) (1) A substantial change in the handler's operations occurs that requires modification to any portion of the business plan.
- (2) For the purpose of this subdivision, "substantial change" means any change in a facility that would inhibit immediate response during an emergency by either site personnel or emergency response personnel, or that could inhibit the handler's ability to comply with Section 25507, change the operational knowledge of the facility, or impede implementation of the business plan.

*Note: Substantial change also includes the removal of a previously disclosed chemical from the facility because the chemical is no longer handled or stored.*

DEPARTMENT OF ENVIRONMENTAL HEALTH

## Hazardous Materials Business Plan Virtual Inspection

The Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for San Diego County and is responsible for regulating facilities that manage and store hazardous materials. The CUPA is required under California Health and Safety Code (HSC) Section 25511 to inspect your facility at least once every three years to ensure compliance with State laws and regulations related to the storage and management of hazardous materials. HMD records indicate your facility was last inspected on \_\_\_\_\_ and is scheduled for an inspection. A copy of your last inspection report is provided for your convenience.

Due to current Public Health Orders and COVID-19 restrictions, HMD will be conducting a remote virtual inspection (RVI) of your facility in lieu of a physical on-site inspection. After the RVI is completed, HMD will evaluate and determine if a follow-up physical site visit is necessary.

*To facilitate this RVI, please complete and provide to HMD, the following information within 5 business days:*

### Facility Information & RVI Scheduling Information

FACILITY NAME: \_\_\_\_\_  
FACILITY ADDRESS: \_\_\_\_\_

*Provide the contact individual and the preferred appointment date and time the Environmental Health Specialist can conduct the RVI of your facility:*

RVI CONTACT NAME: \_\_\_\_\_  
RVI CONTACT PHONE: \_\_\_\_\_  
RVI PREFERRED DATE: \_\_\_\_\_ TIME: \_\_\_\_\_

### Hazardous Materials Business Plan (HMBP) Information

Have there been any substantial changes to your facility since you last CERS submittal for any of the following?

- Business or facility address
- Business ownership
- Business name
- Chemical inventory

*Please describe:*

How do facility personnel have access to the HMBP?

Is the site map current in CERS? YES  NO

### Containers/Tank Management

Are you able to send photos of your hazardous materials containers, tanks (fixed or portable), and/or totes in their current condition?

YES  NO  *If YES, please attach.*

### Spills/Releases

Have you had any hazardous materials releases or threatened releases since your last inspection?

YES  NO

*If YES, please describe:*

### Employee Training Record

Are you able to send a copy of employee training records? YES  NO

*If YES, please attach records from the last 3 years.*

**Please send completed form and attachments to:**

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: AT&T Mobility - SPORTS ARENA (USID15198)  
 ADDRESS: 3500 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 01/14/2021 PAGE 1 OF 6  
 RECORD ID #: DEH2014-HUPFP-001012  
 TIME START: 8:27 AM END: 8:36 AM  
 SPECIALIST: Maria Martinez  
 INSPECTION CONTACT: Brian Prophet  
 TITLE: Environmental Site Manager  
 PHONE: 858-336-0833  
 E-MAIL: bp2714@att.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Brian Prophet TITLE: Environmental Site Manager

### INTRODUCTION:

#### REMOTE VIRTUAL INSPECTION (RVI):

Due to current Public Health Orders and COVID-19 restrictions, County of San Diego Certified Unified Program Agency (CUPA) inspectors are not able to be physically present in order to conduct on-site compliance inspections. Therefore, on 01/14/2021, I, Maria I. Martinez - Environmental Health Specialist conducted a live remote interview with Brian Prophet, AT&T Environmental Site Manager, and reviewed electronic documents provided by AT&T to determine compliance with the CUPA Program requirements that can be verified remotely.

On 01/14/2021, consent to conduct the Live Microsoft Teams interview and review documents, was provided by Brian Prophet over Microsoft Teams. **AT&T Mobility - SPORTS ARENA (USID15198)** is an telecommunications cellular site storing lead acid batteries containing electrolyte used for powering cellular equipment for AT&T.

This Compliance Inspection Report includes items specific only to Hazardous Materials Business Plan (HMBP) requirements that can be verified remotely. The check boxes marked above, are based upon conducting a HMBP inspection only, check boxes pertaining to other CUPA programs were left intentionally blank to indicate CUPA programs that were not inspected during this inspection.

According to the information the business submitted in the California Environmental Reporting System (CERS) on 06/16/2020 by AT&T, this facility is subject to the following CUPA Programs: Hazardous Materials Business Plan. This facility is a telecommunications cellular site that is subject to Hazardous Materials Business Plan requirements for handling a hazardous material at, or above, reportable thresholds for battery electrolyte (101 gallons of electrolyte in the lead acid batteries). The scope of this virtual inspection was limited to HMBP requirements. Compliance with any HMBP items that require an on-site inspection will be evaluated during a later inspection.

For reference: Facility CERS ID Number: 10456183 (last full HMBP submittal date before this inspection: 06/16/2020)

### INSPECTION REMARKS:

#### RVI REMARKS

Per Brian Prophet, no substantial changes have occurred to the facility or to the HMBP since the last CERS submittal dated 06/16/2020. Brian Prophet indicated the HMBP is accessible to facility personnel through CERS and a printed copy is maintained on-site. Photographs of the hazardous materials containers were not provided to me due to the RVI conducted live via Microsoft Teams video call on 01/14/2021. No spills or releases were reported or observed for this site at the time of inspection. Per Brian

Prophet, AT&T has a vendor to remove or replace batteries (universal waste) as needed.

The following was observed on-site during today's live Microsoft Teams video call RVI:

- 32x12V lead acid batteries (101 gallons of electrolyte based on last CERS submittal)

The following documents were provided by Brian Prophet via email and/or the California Environmental Reporting System (CERS) and reviewed during the virtual inspection:

- Hazardous Materials Business Plan (HMBP): reviewed and confirmed all elements are up to date
- Employee training records documenting HMBP training were provided and reviewed.
- Employee training conducted on: 2018, 2019, and February 2020 for Steve Kobayasha

### ADDITIONAL REMARKS

This report was reviewed with Brian Prophet during a live Microsoft Teams video call and was not signed due to current Public Health Orders and COVID-19 restrictions.

Thank you for your cooperation with our remote virtual inspection process during this challenging period. Although I could not make a site visit, I am still available to answer any questions or concerns you may have. Please do not hesitate to contact me and I will be happy to assist you.

Local information and updates about COVID-19 are available online at: <https://www.sandiegocounty.gov/coronavirus.html> (<https://www.sandiegocounty.gov/coronavirus.html>) To receive text messages with COVID-19 information and updates, send "COSD COVID-19" to the number 468-311 on your mobile phone.

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 01/14/2021 PAGE 6 OF 6  
 RECORD ID #: DEH2014-HUPFP-001012

### Hazardous Materials and Hazardous Waste (continued)

- 3030058 Failed to mark date on empty container larger than 5 gallons &/or manage it within one year. 22 CCR 66261.7(f)
- 3030060 Failure of the owner or operator managing laboratory hazardous waste in a laboratory accumulation area to comply with the accumulation, storage, management, training, and/or record-keeping requirements. HSC 25200.3.1(b) and/or (c)

### UNIVERSAL WASTE HANDLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010004	Failed to obtain a California ID Number from DTSC or federal ID Number from USEPA prior to accumulating 5,000 kgs or more of Universal Waste. 22 CCR 66273.32(a-b)
<input type="checkbox"/> HMD0151	Failed to maintain universal waste handler training records for 3 years. 22 CCR 66273.36(c),(d)
<input type="checkbox"/> 3020003	Failed to properly train handlers of universal waste in universal waste management and response procedures. 22 CCR 66273.36(a),(b)
<input type="checkbox"/> 3030008	Failed to properly label or mark Universal Waste container, package, or pallet (excluding CESQUWG) 22 CCR 66273.34
<input type="checkbox"/> 3030011	Failed to properly dispose of Universal Waste within one year. 22 CCR 66273.35(a) &/or (b)
<input type="checkbox"/> HMD0147	Failed to keep records of offsite Universal Waste shipment(s) available for inspection for 3 years. 22 CCR 66273.39(c),(d)(2)
<input type="checkbox"/> 3030051	Failed to meet accumulation, labeling, marking, &/or containment standards for Universal Waste aerosol containers. HSC 25201.16(f)
<input type="checkbox"/> 3040004	Failed to manage universal waste in a manner to prevent release(s) to the environment. 22 CCR 66273.33; 66273.33.5
<input type="checkbox"/> HMD0307	Disposal of universal waste (UW) to an unauthorized point. HSC 25189.5(a); 22 CCR 66273.31(a), 66273.8(b)
<input type="checkbox"/> 3010005	Failure of a universal handler of electronic devices or CRTs from an offsite source to notify DTSC 30 days prior to acceptance. 22 CCR 66273.32(c)
<input type="checkbox"/> 3010020	Failure of a universal waste handler to submit an annual report that includes all required information to DTSC by February 1 of every year . 22 CCR 66273.32(d)
<input type="checkbox"/> 3010006	Failure of the universal waste handler who sends electronic devices or CRTs to any foreign destination to notify DTSC 60 days prior to export and send a copy to the CUPA. 22 CCR 66273.40(a)(3)

### CERTIFIED APPLIANCE RECYCLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010033	Failure to obtain Certified Appliance Recycler certification (CAR) from DTSC. HSC 25211.4
<input type="checkbox"/> 3010034	Failure of certified appliance recycler (CAR) to provide documentation that all materials that require special handling (MRSH) have been properly removed and managed. HSC 25211.2, 25211.3
<input type="checkbox"/> 3030055	Failure of certified appliance recycler (CAR) to properly remove and dispose of all materials that require special handling (MRSH). HSC 25211.3, 25212 (a), (b), and/or (c)

ROUTINE INSPECTION

MAR 27 2003

Health Permit: Posted, Current & Valid

Business Plan: on site

\* Add Diesel Fuel to Inventory, new generator and tank on site \*

Inspected with Joe Navalesi, JNB Telecom

\* No Violations Observed \*

This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

### UNIFIED PROGRAM FACILITY/HEALTH PERMIT APPLICATION

- This business or service is required to obtain a Unified Program Facility/Health Permit from the San Diego County Department of Environmental Health. I answered "yes" to one or more of the questions on the "Business Activities" form.
- I have determined that this business or service does not require a Unified Program Facility/Health Permit from the San Diego County Department of Environmental Health.

I declare under penalty of perjury that to the best of my knowledge and belief the statements made herein are correct and true. I consent to all necessary inspections allowed by law and incidental to the issuance of required permit(s) and the operation of this business.

Signature: Melinda Hsu Title: Specialist - Regulatory

Printed Name: Melinda Hsu Date: May 1, 2002

Phone: (949) 286-8713 Type of Business: Wireless Telecommunications Facility

**Please complete the business information on the following page and return this application to the San Diego County Department of Environmental Health at:**

SAN DIEGO COUNTY  
DEPARTMENT OF ENVIRONMENTAL HEALTH  
HAZARDOUS MATERIALS DIVISION  
P.O. BOX 129261  
SAN DIEGO CA 92112-9261

If a San Diego County Unified Program Facility/Health Permit is required for your business or service a representative of this Department will contact your business. Permit fees will be determined from the contact and a billing statement will be mailed.

**NOTE:** If you do not use hazardous materials, generate hazardous waste, or have underground storage tanks you are still required to return this form.

A representative of the San Diego County Department of Environmental Health may contact you to verify the information provided on this application.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Verizon Wireless: Sports Arena  
 ADDRESS: 3500 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 09/24/2015 PAGE 1 OF 4  
 RECORD ID #: DEH2003-HUPFP-201737  
 TIME START: 10:10 AM END: 10:30 AM  
 SPECIALIST: Khan, Steven  
 INSPECTION CONTACT: Antonio Perez  
 TITLE: Site Tech  
 PHONE: (619) 417-8333  
 E-MAIL: Myrna.allende@verizonwireless.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Antonio Perez

TITLE: Site Tech

### INTRODUCTION:

Routine Cell Site inspection:

Onsite with Antonio Perez/ Site Tech to conduct the following:

-Routine cell site inspection.

Observations:

-Verified quantities of the following inventory items disclosed via CERS:

\*Battery electrolyte ( 88 gallons)

\*DSL generator (55 gallons)

-Facility is accessible, clean and well maintained.

-No other Hazardous Materials above reportable threshold onsite.

-No Hazardous Wastes reported /maintained/observed/ onsite.

-CERS reviewed.

 INSPECTION CONTACT: Larry " Jim " Hull  
 TITLE: Engineer III Spec - Network Field Assurance  
 PHONE: 619-787-4697  
 E-MAIL: Larry.Hull@verizonwireless.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Larry " Jim " Hull

TITLE: Engineer III Spec - Network Field

### INTRODUCTION:

#### INTRODUCTION:

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, HMD implements the Unified Program in the County and regulates facilities that store reportable quantities of hazardous materials, and generate hazardous waste and medical waste. A routine compliance inspection was conducted today to verify compliance with Hazardous Material Business Plan requirements. . This facility is a cell site and stores reportable quantities of hazardous materials on-site in the form of diesel and batteries containing electrolyte used for powering cellular equipment. HMBP last certified in the California Environmental Reporting System (CERS) on 11/09/2018 CERS ID: 10164883.

### OBSERVATIONS:

The following was observed on-site during today's inspection:

55 gallon diesel generator (reported 55 gallons in CERS)

24 X 2 V batteries (81.36 gallons reported in CERS)

Annual recertification of HMBP in CERS due by 11/09/19 unless changes to HMBP required earlier submittal.

Employee training documentation verified.

No Violations observed at this time.

### INSPECTION REMARKS:

Per California Health and Safety Code section 25508.1:

Within 30 days of any one of the following events, a business subject to this article shall electronically update the information submitted to the statewide information management system via CERS:

- (a) A 100 percent or more increase in the quantity of a previously disclosed material.
- (b) Any handling of a previously undisclosed hazardous material subject to the inventory requirements of this article.
- (c) Change of business or facility address.
- (d) Change of business ownership.
- (e) Change of business name.
- (f) (1) A substantial change in the handler's operations occurs that requires modification to any portion of the business plan.
- (2) For the purpose of this subdivision, "substantial change" means any change in a facility that would inhibit immediate

response during an emergency by either site personnel or emergency response personnel, or that could inhibit the handler's ability to comply with Section 25507, change the operational knowledge of the facility, or impede implementation of the business plan.

Note: Substantial change also includes the removal of a previously disclosed chemical from the facility because the chemical is no longer handled or stored.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC and the San Diego County Code of Regulatory Ordinances (SDCC). In accordance with the H&SC and the SDCC, a facility, business or property owner in San Diego County that handles, stores or disposes of hazardous substances, including medical wastes, or owns or operates an underground storage tank, must obtain a COUNTY OF SAN DIEGO UNIFIED PROGRAM FACILITY PERMIT on an annual basis. You are currently in violation of the law for not obtaining a Unified Program Facility Permit and may be subject to further legal action.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

- Viol#** **The facility above does not have a valid Unified Program Facility Permit for: (UPFP)**
- V0131 Generating, handling or storing a hazardous waste. SDCC 68.905, 65.102 & 65.104.
  - V1001 Handling or storing reportable quantities of a hazardous material. SDCC 68.905, 65.102 & 65.104.
  - V3101 Owning or operating an underground hazardous substance storage tank. SDCC 68.905, 65.102, 65.104, 68.1003, 68.1005, 68.1009. H&SC 25284.
  - V4201 Generating medical waste. SDCC 68.905, 65.102 & 65.104. H&SC 117705.

**Non-Notification Fee:**  Per SDCC 68.907.1, a non-notification fee will be assessed if this box is checked.

**OBSERVATIONS:** THE UPFP FOR THIS FACILITY EXPIRED MARCH 2014.

THE FACILITY STILL CONTAINS HAZARDOUS MATERIALS IN DISCLOSABLE QUANTITIES (IE COMPRESSED GASES GREATER THAN 200 CUBIC FEET). THE LAST INVOICE FOR THE UPFP WAS SENT 4/16/2014.

FEE CAN BE PAID ONLINE AT WWW.DEHPAY.COM. HMD INVOICE/BILLING UNIT CAN BE CONTACTED AT 858-505-6930

**CORRECTIVE ACTION(S):**

- Pay all applicable Unified Program Facility Permit fees and penalties to the County of San Diego, Hazardous Materials Division within ten (10) calendar days of receipt of this Notice of Violation. Contact an Office Assistant at (858) 505-6661 to confirm the amount of permit fees and penalties to be paid. [Specialist: Use this corrective action for expired permits.]
- Complete, sign and submit a Unified Program Facility Permit application within ten (10) calendar days of receipt of this Notice of Violation. [Specialist: Use this corrective action if a UPFP application is not on file.]
- Pay all applicable Unified Program Facility Permit fees and penalties within ten (10) calendar days of receipt of an invoice from the County of San Diego, Hazardous Materials Division. [Specialist: Use this corrective action for new permits.]

A Unified Program Facility Permit will only be issued after the corrective actions marked above are complete. **BE ADVISED THAT FAILURE TO OBTAIN A UNIFIED PROGRAM FACILITY PERMIT MAY RESULT IN FURTHER LEGAL ACTION.** Any person who violates the Unified Program Facility Permit requirement specified above is guilty of a misdemeanor. Every day this violation occurs constitutes a separate offense.

Specialist should verify the identification of facility representative using a standard form of ID (e.g., CDL#, CA ID# or DOB).

Consent to inspect granted by:  Inspection Contact  Other: \_\_\_\_\_

### ROUTINE INSPECTION

This was a compliance inspection for hazardous materials/waste management conducted on 2/4/2015. Mr. Thomas gave consent for the inspection, records review and photographs (if needed). The previous name of the facility was San Diego Sports Arena.

2. **Violation: Failed to properly label hazardous waste container. Observation:** A single 5-gallon bucket for used oil was observed onsite. The bucket was closed but not labeled with appropriate hazardous waste labeling. Mr. Thomas stated the facility only generates maybe 2 gallons of used oil a year. **Corrective Action:** Label the container with approved labeling or immediately take the used oil to Krageen or other used oil collection facility and submit proof of correction to me within 30 days.
3. **Violation: Business Plan not certified annually in CERS. Observation:** No CERS submittal has been completed for this facility. Business plans must now be certified in CERS annually. **Corrective Action:** Complete your CERS submittal within 30 days. Today at inspection I assisted the business in creating a CERS account and preparing the submittal.

Questions or comments for this report should be directed to:  
 Benjamin McLernon, Environmental Health Specialist II  
 County of San Diego, Department of Environmental Health, Hazardous Materials Division  
 Cell:(619) 804-2128  
 Email: benjamin.mclernon@sdcounty.ca.gov

**The Hazardous Materials Business Plan (inventory & site map, emergency contacts, emergency response plan, and employee training plan) is required by law to be certified online through the California Environmental Reporting System (CERS). For additional information about hazardous materials business plans and CERS, go to: <http://www.sdcounty.ca.gov/deh/hazmat/hmd-cers-info.html>**

**Subject:** RE: haz mat

In my 30 years here there has been no oil left in the parking lot knock on wood if it does happen we would take to Kragen for recycling. As far as the chillers we have a contractor do the annuals and they dispose of haz. Material generated.

Quality lift trucks disposes of the used forklift motor oil when they do the maintenance on them.

I will consult with our painter on how they clean the used painting equipment and get Back to you on it.

Thank you and have a great day,

**From:** McLernon, Benjamin [<mailto:Benjamin.McLernon@sdcounty.ca.gov>]  
**Sent:** Thursday, February 05, 2015 3:39 PM  
**To:** Ralph Bedoe  
**Subject:** RE: haz mat

Ralph, the question has been asked what happens to abandoned haz waste (like motor oil) that may be left in the parking lot. Do you guys collect that? Also, maintenance on the pumps and chillers, etc. does that generate hazardous waste? As a business you cannot dispose of paint washout in a sink, unless you can somehow show it is not hazardous or have a sewer discharge permit for it. How do you guys clean paint tools?

Please get back to me on these questions. Thank you.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC and the San Diego County Code of Regulatory Ordinances (SDCC). In accordance with the H&SC and the SDCC, a facility, businesses or property owner in San Diego County that handles, stores or disposes of hazardous substances, including medical wastes, or owns or operates an underground storage tank, must obtain a COUNTY OF SAN DIEGO UNIFIED PROGRAM FACILITY PERMIT on an annual basis. You are currently in violation of the law for not obtaining a Unified Program Facility Permit and may be subject to further legal action.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

Viol# 2 V0131 Generating, handling or storing a hazardous waste. SDCC 68.905, 65.102 & 65.104.
V1001 Handling or storing reportable quantities of a hazardous material. SDCC 68.905, 65.102 & 65.104.
V3101 Owning or operating an underground hazardous substance storage tank. SDCC 68.905, 65.102, 65.104, 68.1003, 68.1005, 68.1009. H&SC 25284.
V4201 Generating medical waste. SDCC 68.905, 65.102 & 65.104. H&SC 117705.

RECEIVED JAN 05 2010

Non-Notification Fee: Per SDCC 68.907.1, a non-notification fee will be assessed if this box is checked.

OBSERVATIONS:

This facility has been operating without a UPF permit despite having hazardous materials in disclosable quantities and generating, handling and storing hazardous waste onsite. Hazardous materials in quantities greater than 55gal, 200ft3, or 500lbs observed onsite include: propane (at least 12 cylinders for the forklift observed 36ft3/gal); Oxygen & acetylene for welding (800ft3 & 200ft3), Nitrogen (834ft3), at least 50-15gal containers of paint, a 55gal black steel drum of "Dowtherm SR-1" (about 1/2 full) (engine room), & cooling tower chemicals (several including 1-55gal full blue plastic drum with no label). The following hazardous waste was observed onsite: used oil (abandoned containers 5gal full) & paint waste (from renovations, abandoned, old paint products that are unusable). Refer to corrective actions below; photos taken today will be provided.

CORRECTIVE ACTION(S):

- Pay all applicable Unified Program Facility Permit fees and penalties to the County of San Diego, Hazardous Materials Division within ten (10) calendar days of receipt of this Notice of Violation.
Complete, sign and submit a Unified Program Facility Permit application within ten (10) calendar days of receipt of this Notice of Violation.
Pay all applicable Unified Program Facility Permit fees and penalties within ten (10) calendar days of receipt of an invoice from the County of San Diego, Hazardous Materials Division.

A Unified Program Facility Permit will only be issued after the corrective actions marked above are complete. BE ADVISED THAT FAILURE TO OBTAIN A UNIFIED PROGRAM FACILITY PERMIT MAY RESULT IN FURTHER LEGAL ACTION. Any person who violates the Unified Program Facility Permit requirement specified above is guilty of a misdemeanor. Every day this violation occurs constitutes a separate offense.

Specialist should verify the identification of the facility representative using a standard form of identification (e.g., CDL#, CA ID# or DOB).

BUSINESS NAME San Diego Sports Arena  
 ADDRESS 3500 Sports Arena Blvd.  
 CITY/ZIP San Diego / 92110

On the above date, the County inspected your business under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

- Y\* N/A\* NOTE: **Reinspection fees will be charged if additional inspections are required to determine compliance.**

Consent to inspect granted by:  Inspection Contact  Other: Gary Thomas

Permission was granted today to conduct a new permit inspection by Gary Thomas, Operations Manager at San Diego Sports Arena. Ralph Bedoe will be the main inspection contact, however was not present for today's inspection. The following areas were inspected today: Engine Room, paint storage area, backup generator/electrical room, dumpster areas, abandoned waste storage area, concessions, carpenter shop, janitorial services, nurses station, brooding tower.

RECEIVED JAN 05 2010

- Observations/Violations/Notice to Comply:
- Hazardous Materials Business Plan (HMBP) not established/implemented. Your facility must have an HMBP (Emergency Response Plan, Employee Training Plan and Site map) onsite and must submit a current copy with certification to HMD. Any changes made must be resubmitted to HMD within 30 days of the changes made and recertified. Refer to NOV issued today for inventory observed.  
 \* Corrective actions: Within 30 days, submit an HMBP with certification to HMD. Keep a copy onsite available for review for future inspections.
  - Failed to have an Emergency Response Contingency Plan by the phone. As a generator of Hazardous Waste, you are required to have a contingency plan posted.

This is an annual certification that the Hazardous Materials Business Plan (inventory & site map, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored. COUNTY OF SAN DIEGO

SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

PERMIT # 211503

DATE 12.3.09

PAGE 2 OF 6

BUSINESS ADDRESS: 3500 Sports arena Blvd.

ZIP CODE: 92110

Corrective Action: Sample and blank contingency Plan were provided by HMD today (pg 22 & 30 respectively). Within 30 days provide proof to HMD that a contingency Plan has been completed, posted by the phone, & employees trained on where to locate it and when to reference the phone/contact list.

3) Failed to obtain & maintain a valid EPA ID number. It appears that this facility is a consistent generator of hazardous waste including paint related waste, used oil (equipment maintenance, zambonis, generator, etc.), & other expired/unusable items generated. This facility has obtained temporary EPA ID numbers in the past, but consistent generators must have an active, permanent EPA ID number.

Corrective actions: Contact the Department of Toxic Substances Control (DTSC) at (800)-61-TOXIC to obtain a valid EPA ID number. Contact HMD within 30 days with your facility's valid number. This number will be used on hazardous manifests/tracking documents that the registered hazardous waste hauler transports hazardous waste off site when.

4) Copies of hazardous waste manifests/receipts for 3 years were not available for review. Hazardous waste can only be accumulated on site for a time limit of 180 days (6 months), therefore as a generator of hazardous waste tracking documents should be available for review to prove that the hazardous waste generated has been properly managed.

Corrective actions: Provide any copies of manifests/receipts to prove proper management of hazardous waste and Universal Waste (UW; fluorescent light tubes, non-empty aerosol cans, batteries, electronics, etc.) for the last 3 years. Keep copies on site available for review during future inspections. Be advised that you must have the TSD signed copy on site (Treatment Storage & Disposal Facility; signed at bottom of manifest) and you must mail a generator signed copy (the initial copy the transporter provides) to DTSC within 30 days of transport.

COUNTY OF SAN DIEGO

SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

PERMIT # 2115023

DATE 12/3/09

PAGE 3 OF 6

BUSINESS ADDRESS: 3500 Sports Arena Blvd.

ZIP CODE: 92110

Failed to label hazmat material containers within 10 days or less. A 55 gal blue plastic drum in the cooling tower chemical storage area appeared to be full and was missing a legible label. Be advised that all containers of hazmat/waste must be clearly labeled at all times so the contents are adequately reflected.

Corrective Action: Immediately properly label all hazmat & waste containers. Send proof to HMD within 30 days proving this has been completed. Empty containers larger than 5 gal should be marked as empty with the date emptied and properly managed within a year.

Failed to properly label and date hazardous waste containers.

Accumulated hazardous waste beyond time limit of 180 days

Failed to keep containers closed

Failed to conduct weekly inspections

Employee training program not adequate

Weekly inspections should be conducted to ensure compliance with hazmat/waste regulations. A proper waste determination should be made immediately for any abandoned waste (like the used oil 5 gal open full containers by the North end of the parking lot with the open top, paint waste 5 gal full open container next to it, many other containers of paint (& other) waste observed in the fenced in "hazwaste/abandoned waste" storage area (same area), etc. All waste determined to be hazardous must have a hazardous waste label. No waste observed onsite had hazardous waste labels. The employee training program is insufficient due to many non-compliant issues observed today and described in this report. Refer to photos (copies taken today will be provided by HMD) for references.

Corrective actions: Provide proof to HMD within 30 days that these violations have been addressed and corrected.

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

PERMIT # 211503

DATE 12/3/09

PAGE 4 OF ~~7~~ 6

BUSINESS ADDRESS: 3500 Sports Arena Blvd.

ZIP CODE: 92110

### Observations/Remarks:

A) IF medical waste (red bag/sharps) is generated in the nurses station, this must be disclosed to HMD & included on your permit inventory. Complete a medical waste management plan (MUMP), keep tracking documents for 2 years, label containers with generator information, etc. Red, biohazard bags were observed today, but no medical waste was observed.

B) A Notice of Violation (NOV) was issued today with this report for failure to obtain a UPF permit. A non-notification fee will be assessed.

C) Be sure to submit the permit application to HMD within 10 days. Blank application provided by HMD today.

D) A diesel generator was observed onsite, but the capacity was not verified. Provide this data to HMD with other submitted, disclosable inventory to HMD within 30 days. In house staff conducts routine maintenance on the generator and maintains an inspection log. Be advised that ~~the~~ used oil from routine maintenance of the generator should be managed as hazardous waste; ~~maintain~~ keep copies proving proper management for 3 years.

E) Food oils/grease must be properly managed and must be in tightly closed containers to prevent accidental spillage (at least 2-3/4 full containers were observed to be open, in the dumpster area being stored).

F) Many fluorescent light tubes were observed to be accumulating onsite (recent renovations). Several were on the ground and were not contained in rigid containers to prevent breakage (and unauthorized release of mercury vapors). All universal waste must be properly contained and labeled as Universal Waste with an accumulation start date. Maintain records to prove proper management.

7/19/2010

Sonja,

The glycol noted in the engine room has been added to our system and is no longer being stored in 55 gallon container and the container labeled empty. The blue container in the cooling tower area was diesel fuel left behind from one of our shows and had been removed and the container labeled empty. The oil from maintenance is being stored in a 5 gallon bucket and will be picked up no more than 180 after accumulation. The only hazard labeled on the site map will be the propane which is used for our forklifts, burnishers and catering.

Thank you,

Ralph Bedoe

February 14, 2014

ATTN: Owner or Operator  
3500 SPORTS ARENA BL  
SAN DIEGO, CA 92110  
CERS ID#: 10384258  
Facility ID#: 37-000-211563

As of January 1, 2013 all regulated businesses are required by Assembly Bill 2286 to submit their regulatory reports and business information electronically through the California Environmental Reporting System (CERS). This includes information related to:

- Unified Program Facility Permit
- Hazardous Materials Business Plan (HMBP)
- Hazardous Waste
- Hazardous Waste Onsite Treatment
- Hazardous Waste Tank Closures
- Remote Waste Consolidation
- Recyclable Materials Reports
- Underground Storage Tanks (UST)
- Aboveground petroleum storage over 1,320 gallons (APSA/SPCC)
- Medical Waste\*

### What is CERS?

CERS is a statewide web-based system developed by the California Environmental Protection Agency (Cal/EPA) to collect and report hazardous materials related data. \* In San Diego County, medical waste is also regulated by the County of San Diego and is required to be reported through CERS.

### What do I need to do?

For your convenience, HMD and Cal/EPA have pre-populated your facility information into CERS. It is now your responsibility to review this information for accuracy, make necessary changes and submit for review as required by the state law. *In order to comply, please complete, sign and submit the enclosed CERS Access/I.D. Request Form to HMD within 30 calendar days of receipt of this letter to the address listed in the above letterhead.*

Please note, the form may only be signed by the business owner or main operator. We recommend at least two lead users in case one person leaves or loses their username/password. Lead users will receive a confirmation e-mail inviting them to create a username and password for CERS when this process is complete. Once lead users have been granted access, they will be responsible for adding additional users to the account; the County of San Diego will no longer be able to grant user access.

In order to gain access to your facility information in CERS, you must have the following:

- An active e-mail account
- Internet Access, with one of the following browsers: Internet Explorer 8 or 9, Safari (current version), Chrome (current version), Firefox 3.6 or later

Note: CERS does not support Internet Explorer 7 or earlier versions.

**Where can I get help?**

Our CERS Information website provides detailed instructions, comprehensive user guides, video tutorials, resource weblinks, and the latest updates regarding CERS: [www.sdcounty.ca.gov/deh/hazmat/hmd-cers-info.html](http://www.sdcounty.ca.gov/deh/hazmat/hmd-cers-info.html)  
 Additional information is available from the following resources:

- Your county hazardous materials inspector
- The Hazardous Materials Division Duty Desk at (858) 505-6880, [hmdutyeh@sdcounty.ca.gov](mailto:hmdutyeh@sdcounty.ca.gov).
- A list of required forms and submission requirements:  
[http://www.sdcounty.ca.gov/deh/hazmat/hmd\\_forms.html](http://www.sdcounty.ca.gov/deh/hazmat/hmd_forms.html)
- The CERS web portal: <http://cers.calepa.ca.gov/>

**What if I don't have access to a computer?**

Computer kiosks are available for CERS submittals at our office locations.

- 5500 Overland Ave., San Diego, CA 92123
- 151 E. Carmel St., San Marcos, CA 92078

Counter services are available from 8 a.m. to 4 p.m.

**CERS Training Workshops:**

To assist your business in completing this requirement, we will be hosting several CERS Training Workshops in the upcoming months. The exact dates, times and location will be posted online as they become available. Please check our CERS Information website for upcoming workshops: [www.sdcounty.ca.gov/deh/hazmat/hmd-cers-info.html](http://www.sdcounty.ca.gov/deh/hazmat/hmd-cers-info.html)

**What if I don't comply?**

Failure to comply with the CERS submittal requirements is a violation of the California Health & Safety Code section 25404 (e)(4) and may lead to issuance of a Notice of Violation and further enforcement action.

Compliance with laws and regulations is a condition of your permit to operate.

Please disregard this letter if you have already signed up with CERS, your business has an organizational account with Cal/EPA and/or your business has made other arrangements.

Sincerely,

Michelle Price  
 Supervising Environmental Health Specialist  
 Hazardous Materials Division

SAN DIEGO SPORTS ARENA  
3500 SPORTS ARENA BLVD  
SAN DIEGO, CA 92110

According to our records, documentation or other evidence of corrective action has not been received or is incomplete for violations cited during the Unified Program facility inspection performed on 2/4/2015 at:

SAN DIEGO SPORTS ARENA  
3500 SPORTS ARENA BLVD  
SAN DIEGO, CA 92110  
Record ID: DEH2009-HUPFP-211563  
CERS ID:

The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, the HMD implements the Unified Program in the County and regulates businesses that manage hazardous materials, hazardous wastes, medical wastes, aboveground petroleum storage tanks, and underground storage tanks.

On 2/4/2015, Benjamin McLernon of the HMD inspected your business at 3500 SPORTS ARENA BLVD, SAN DIEGO, CA 92110. Our records indicate that the HMD has not received evidence of correction and/or certification of return to compliance as required by the California Health and Safety Code (H&SC) for the violations observed during the inspection. A copy of this inspection is enclosed.

Uncorrected violations from the 2/4/2015 inspection of your business are listed on the reverse of this page. Submit a written response indicating how these violations were corrected, along with any applicable supporting documentation within ten (10) business days (by 11/9/2015). You may use the enclosed Corrective Action Form to show return to compliance as long as you also submit adequate supporting documentation.

If a re-inspection is required to determine compliance, you will be charged a re-inspection fee of \$228. The HMD may initiate formal enforcement actions, including the imposition of substantial penalties, for any significant violations. Violations that are not promptly corrected will result in liability for additional days in violation and additional penalties. Any failure to provide the information requested will also be a factor in determining penalties. For these purposes, "significant violations" include violations that represent a significant threat to human health or safety or the environment, chronic violations, violations committed by a recalcitrant violator, and Class I hazardous waste violations (California Code of Regulations (CCR) 66260.10 and H&SC 25110.8.5).

<b>Violation #</b>	<b>Description of Violation</b>
1010009	Failure to review, revise, and recertify the business plan annually; HSC 6.95 25505.
3030007	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.; 22 CCR 12 66262.34(f).

Mail your response to: County of San Diego  
Department of Environmental Health  
Hazardous Materials Division  
P.O. Box 129261  
San Diego, CA 92112-9261

For additional information, contact specialist Benjamin McLernon at Benjamin.McLernon@sdcounty.ca.gov or (619) 804-2128, or the Hazardous Materials Duty Desk at (858) 505-6880.

Sincerely,

Maryam Sedghi, Chief  
Hazardous Materials Division

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC and the San Diego County Code of Regulatory Ordinances (SDCC). In accordance with the H&SC and the SDCC, a facility, business or property owner in San Diego County that handles, stores or disposes of hazardous substances, including medical wastes, or owns or operates an underground storage tank, must obtain a COUNTY OF SAN DIEGO UNIFIED PROGRAM FACILITY PERMIT on an annual basis. You are currently in violation of the law for not obtaining a Unified Program Facility Permit and may be subject to further legal action.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

- Viol#** **The facility above does not have a valid Unified Program Facility Permit for: (UPFP)**
- V0131 Generating, handling or storing a hazardous waste. SDCC 68.905, 65.102 & 65.104.
  - V1001 Handling or storing reportable quantities of a hazardous material. SDCC 68.905, 65.102 & 65.104.
  - V3101 Owning or operating an underground hazardous substance storage tank. SDCC 68.905, 65.102, 65.104, 68.1003, 68.1005, 68.1009. H&SC 25284.
  - V4201 Generating medical waste. SDCC 68.905, 65.102 & 65.104. H&SC 117705.

**Non-Notification Fee:**  Per SDCC 68.907.1, a non-notification fee will be assessed if this box is checked.

**OBSERVATIONS:** THE UPFP FOR THIS FACILITY EXPIRED MARCH 2014.  
THE FACILITY STILL CONTAINS HAZARDOUS MATERIALS IN  
DISCLOSABLE QUANTITIES (IE COMPRESSED GASES GREATER THAN  
200 CUBIC FEET). THE LAST INVOICE FOR THE UPFP WAS  
SENT 4/16/2014.

FEE CAN BE PAID ONLINE AT WWW.DEPAY.COM - HMD  
INVOICE/BILLING UNIT CAN BE CONTACTED AT 858-505-6930

**CORRECTIVE ACTION(S):**

- Pay all applicable Unified Program Facility Permit fees and penalties to the County of San Diego, Hazardous Materials Division within ten (10) calendar days of receipt of this Notice of Violation. Contact an Office Assistant at (858) 505-6661 to confirm the amount of permit fees and penalties to be paid. [Specialist: Use this corrective action for expired permits.]
- Complete, sign and submit a Unified Program Facility Permit application within ten (10) calendar days of receipt of this Notice of Violation. [Specialist: Use this corrective action if a UPFP application is not on file.]
- Pay all applicable Unified Program Facility Permit fees and penalties within ten (10) calendar days of receipt of an invoice from the County of San Diego, Hazardous Materials Division. [Specialist: Use this corrective action for new permits.]

A Unified Program Facility Permit will only be issued after the corrective actions marked above are complete. **BE ADVISED THAT FAILURE TO OBTAIN A UNIFIED PROGRAM FACILITY PERMIT MAY RESULT IN FURTHER LEGAL ACTION.** Any person who violates the Unified Program Facility Permit requirement specified above is guilty of a misdemeanor. Every day this violation occurs constitutes a separate offense.

Specialist should verify the identification of facility representative using a standard form of ID (e.g., CDL#, CA ID# or DOB).

CITY/ZIP **SAN DIEGO / 92110**

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

Consent to inspect granted by:  Inspection Contact  Other: \_\_\_\_\_

### ROUTINE INSPECTION

This was a compliance inspection for hazardous materials/waste management conducted on 2/4/2015. Mr. Thomas gave consent for the inspection, records review and photographs (if needed). The previous name of the facility was San Diego Sports Arena.

- 2. **Violation: Failed to properly label hazardous waste container. Observation:** A single 5-gallon bucket for used oil was observed onsite. The bucket was closed but not labeled with appropriate hazardous waste labeling. Mr. Thomas stated the facility only generates maybe 2 gallons of used oil a year. **Corrective Action:** Label the container with approved labeling or immediately take the used oil to Kragen or other used oil collection facility and submit proof of correction to me within 30 days.
- 3. **Violation: Business Plan not certified annually in CERS. Observation:** No CERS submittal has been completed for this facility. Business plans must now be certified in CERS annually. **Corrective Action:** Complete your CERS submittal within 30 days. Today at inspection I assisted the business in creating a CERS account and preparing the submittal.

Questions or comments for this report should be directed to:  
 Benjamin McLernon, Environmental Health Specialist II  
 County of San Diego, Department of Environmental Health, Hazardous Materials Division  
 Cell:(619) 804-2128

 E-MAIL: rbedoe@thevalleyviewcc.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: RALPH BEDOE

TITLE: Chief Engineer

### INTRODUCTION:

Inspection conducted on 2/11/2016 with Ralph Bedoe, Chief Engineer who gave me permission to conduct the inspection. This site does not generate hazardous waste at this time. They are currently subject to the Hazardous Materials Business Plan requirements due to reportable amounts of ethylene glycol, oxygen, acetylene and propane. The reportable amount is 55 gallons for hazardous liquids and 200 cubic feet for compressed gases. California Environmental Reporting System (CERS) submittals have been accepted.

The following hazardous materials in reportable threshold quantities were observed on-site today:

- 800 cubic feet of compressed oxygen
- 200 cubic feet of acetylene
- 1944 cubic feet of propane
- 55 gallons of ethylene glycol

### VIOLATION # 1

1020002 Initial and/or annual employee training not conducted for hazardous materials management and/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4)

Classification: Minor

### Observations:

This facility has the capacity to store reportable amounts of hazardous materials or hazardous waste (55 gal, 500 lbs., or 200 cuft) and failed to maintain records of an adequate employee training program for the size of the facility and the nature of the hazardous materials handled. The training program shall, at a minimum, include methods for safe handling of hazardous materials; procedures for coordination with local emergency response organizations; use of emergency response equipment; and emergency response procedures for a release or threatened release of hazardous materials.

Corrective Action Due By: 03/12/2016

Within 30 days, implement an employee training plan and send the corrective action form to this department.

 E-MAIL: rbedoe@thevalleyviewcc.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Ralph Bedoe

TITLE: Chief Engineer

### INTRODUCTION:

Inspection conducted for hazardous materials/waste on 2/14/2018 with Ralph Bedoe, Chief Engineer who gave me permission to conduct the inspection. This site is a sports arena and does not generate hazardous waste at this time. They are currently subject to the Hazardous Materials Business Plan requirements. The reportable amount is 55 gallons for hazardous liquids, 500 pounds for hazardous solids and 200 cubic feet for compressed gases. California Environmental Reporting System (CERS) submittals have been accepted on 2/14/2018.

The following hazardous materials in reportable threshold quantities were observed on-site today:

- 800 cubic feet of compressed oxygen
- 1944 cubic feet of propane
- 55 gallons of ethylene glycol.

### VIOLATION # 1

1020002 Initial &/or annual employee training not conducted in safety procedures for a hazardous material release or threatened release &/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4); 19 CCR 2659(b)

Classification: Class II

### Observations:

This facility has the capacity to store reportable amounts of hazardous materials or hazardous waste (55 gal, 500 lbs., or 200 cuft) and failed to maintain records of an adequate employee training program for the size of the facility and the nature of the hazardous materials handled. The training program shall, at a minimum, include methods for safe handling of hazardous materials; procedures for coordination with local emergency response organizations; use of emergency response equipment; and emergency response procedures for a release or threatened release of hazardous materials. Observed Ralph Bedoe, Chief Engineer was un able to locate the most recent employee training documentation.

Corrective Action Due By: 03/16/2018

Within 30 days, conduct employee training on hazardous materials and emergency response. Send the corrective action form to this department within 30 days.

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Pechanga Arena San Diego  
 ADDRESS: 3500 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 02/19/2021 PAGE 1 OF 8  
 RECORD ID #: DEH2009-HUPFP-211563  
 TIME START: 9:45 AM END: 12:00 PM  
 SPECIALIST: Zana Zmily  
 INSPECTION CONTACT: Ralph Bedoe  
 TITLE: Chief Engineer  
 PHONE: 619-224-4171  
 E-MAIL: rbedoe@pechangaarenasd.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Ralph Bedoe TITLE: Chief Engineer

### INTRODUCTION:

On 2/19/2021 I conducted a routine inspection of Pechanga Arena San Diego to verify compliance with Hazardous Materials Business Plan (HMBP) requirements and hazardous waste generator requirements. Today's inspection was conducted with facility representative, Ralph Bedoe, Chief Engineer.

Pechanga Arena San Diego is a venue for live events, including entertainment, sports, etc. Per Ralph Bedoe, the facility has been closed for indoor events for the majority of the last year due to the current Public Health Emergency.

This facility is subject to Hazardous Materials Business Plan (HMBP) requirements for storing hazardous materials/hazardous waste in reportable quantities (55 gallons, 500 pounds, 200 cubic feet) and hazardous waste generator requirements. Per Ralph Bedoe, this facility does not routinely generate hazardous waste, however, the facility reports as a hazardous waste generator in the California Environmental Reporting System (CERS).

Consent to conduct the inspection and take photographs was granted to Zana Zmily by Ralph Bedoe.

### VIOLATION # 1

1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25507(a); 25508.1(a-b); 19 CCR 2654 (a) or (d)

Classification: Class II

### Observations:

The facility stores approximately 3,487 cubic feet of R134a, approximately 2,767 cubic feet of R123a and approximately 3,120 cubic feet of R-11 refrigerant gases in the chiller systems. The chiller systems storing R134a, 123a, and R-11 have been in place for several years.

### Corrective Action Completed During Inspection:

During the inspection, CERS assistance was provided to add the refrigerants stored over 1,000 cubic feet in the inventory and was re-submitted for review.

### VIOLATION # 2

1020002 Initial &/or annual employee training not conducted in safety procedures for a hazardous material release or threatened release &/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4); 19 CCR 2659(b)

Classification: Minor

### Observations:

This facility has the capacity to store reportable amounts of hazardous materials or hazardous waste (55 gallons, 500 pounds, 200 cubic feet) and failed to maintain records of an adequate employee training program for the size of the facility and the nature of the hazardous materials handled. The training program shall, at a minimum, include methods for safe handling of hazardous materials; procedures for coordination with local emergency response organizations; use of emergency response equipment; and emergency response procedures for a release or threatened release of hazardous materials.

Per Ralph Bedoe, the facility was periodically shutdown in 2020 due to the public health emergency (around March and again around November 2020), however, some staff have been working on-site with alternating days which has made it difficult to conduct training. The last HMBP employee training record provided was dated 6/4/2019.

### Corrective Action Due By:03/23/2021

Conduct and document HMBP employee training. Within 30 days, provide documentation of corrective action to me via e-mail at zanalee.zmily@sdcounty.ca.gov. You may use the corrective action form located at the end of this report.

HMBP employee training is not required to be conducted in person and the facility may utilize creative technologies to meet the requirement via teleconference call, video conferencing, etc. Please contact your inspector if HMBP employee training cannot be conducted safely within 30 days.

### INSPECTION REMARKS:

The following minor violation was corrected at the time of inspection: The facility last submitted their annual HMBP certification through CERS on 6/5/2019. During the inspection, the HMBP was updated and re-submitted in CERS. Ensure the HMBP is re-certified annually and re-submitted within 30 days of significant changes.

I observed approximately 30 small carbon dioxide cylinders that are used for beverage carbonation. Be advised, the reportable quantity for carbon dioxide gas used solely for beverage carbonation is 6,000 cubic feet. If the facility stores 6,000 cubic feet or more of carbon dioxide gas for beverage carbonation, report CO2 in the inventory in CERS.

I observed 1 x 200 cubic foot cylinder of oxygen gas used with acetylene gas for welding. The cylinder storing acetylene gas had a sticker indicating the cylinder stores 103 cubic feet. Be advised, the reportable quantity for acetylene gas is 200 cubic feet.

I observed approximately 18 x 55 gallon blue poly drums within the gated parking area. Per Ralph Bedoe, the drums are empty and are used for storing ethylene glycol when needed for tube cleaning of the chiller system. Some of the drums appeared to be missing caps and may have accumulated rain water. Ensure proper waste determinations are made on any liquid waste inside the drums. It is recommended to keep the drums closed since they are exposed to the elements.

Per Ralph Bedoe, the facility does not routinely generate hazardous waste. Ralph Bedoe stated that maintenance on the chillers and zamboni's are conducted by a third-party and used oil generated during routine maintenance is managed by the third-party. The facility has a paint department, however, Ralph Bedoe stated he does not believe any waste is generated from the paint department. Be advised, it is the generator's responsibility to conduct a hazardous waste determination on any wastes and hazardous waste must be properly managed and disposed of through a registered hazardous waste transporter.

I observed 1 x 30 gallon poly drum that was full near the propane cage. Per Ralph Bedoe, the drum may contain diesel fuel from the emergency generator, however the full drum has been on-site since around 1992. Within 30 days, determine the contents of

the 30 gallon drum. If the contents are determined to be a "waste", conduct a hazardous waste determination. Provide a written statement to me via e-mail with your findings.

I observed a 5 gallon container (full) near the propane cage. The label on the container was faded. The 5 gallon container was next to a one gallon container labeled as acetone. Be advised, unlabeled chemical containers must be labeled within 10 days of discovery. If the container is not labeled, the materials will become a waste, and a hazardous waste determination will be needed. Within 10 days, determine the contents of the five gallon container and properly label the container. Within 30 days, provide a written statement to me via e-mail with your findings and any actions taken.

I observed 1 x 55 gallon drum (full) at the entrance of the cooling tower area. Per Ralph Bedoe, the drum was storing grease from food service. The drum did not have any labeling to identify the contents. Label the container with its contents.

I observed several fluorescent light tubes stored in various containers in the chiller area (see photograph #1 and #2). Some of the light tubes were stored in cardboard boxes that appear to have deteriorated. Per Ralph Bedoe, the fluorescent light tubes are waste and have been on-site since 2018/2019. Fluorescent light tubes contain mercury and can release mercury if broken. Fluorescent light tubes cannot be disposed of to the trash. Ensure the fluorescent light tubes are stored in a manner that prevent a release. I also observed a five gallon container storing waste batteries, including spent batteries from metal detector wands. Based on statements made by Ralph Bedoe, it appears the facility is currently a conditionally exempt small quantity universal waste generator.

Per the Department of Toxic Substances Control's (DTSC) Hazardous Waste Tracking System, the facility's California ID number, CAL000352701, expired on 6/30/2017. All hazardous waste generators in California must obtain and maintain an active ID number. The facility reports it generates hazardous waste, however, per Ralph Bedoe, the facility does not routinely generate hazardous waste. If the facility generates hazardous waste, re-activate the facility's hazardous waste ID number by submitting DTSC Form 1358 to DTSC and provide a written statement to me via e-mail that this has been completed.

The facility has a small diesel emergency generator. Per Ralph Bedoe, the diesel fuel capacity of the generator is no more than 30 gallons. If the 30 gallon drum is determined to be storing new diesel fuel, the total quantity of diesel fuel may exceed 55 gallons. Be advised, if the facility stores 55 gallons or more of diesel fuel on-site, the diesel fuel must be reported in CERS within 30 days.

Eligible unused architectural paint may be recycled through the Paint Care Program. For more information, visit: <https://www.paintcare.org/paintcare-states/california/#/everyone>

I observed an SQG contingency plan available in the facility's records, but was not posted. During the inspection, Ralph Bedoe posted the contingency plan.

Per Ralph Bedoe, personal items that are not allowed to be brought into a live event are either discarded in the trash or a customer will return it to their vehicle or store it in a locker if available. Ralph Bedoe stated he is unsure what happens to personal items that are found and are not claimed by a customer. Be advised, waste determinations must be made on wastes that are not able to be returned to a customer prior to being discarded as solid waste. If a waste is a listed hazardous waste or is a hazardous waste due to its characteristics (ignitability, corrosivity, reactivity or toxicity), then the waste must be properly managed by the facility and cannot be discarded in the trash.

Additional guidance on "Defining Hazardous Waste" can be found here - <https://dtsc.ca.gov/defining-hazardous-waste/>

Per Ralph Bedoe, the nurses station is operated by an independent contractor, "First Aid Services of San Diego, Inc." If the independent contractor provides medical services and generates medical waste, they may require registration with the County of San Diego Hazardous Materials Division and may be eligible for the small quantity medical waste generator registration program. For more information, visit - [https://www.sandiegocounty.gov/content/sdc/deh/hazmat/med\\_waste/sqmwg\\_registrationprogram.html](https://www.sandiegocounty.gov/content/sdc/deh/hazmat/med_waste/sqmwg_registrationprogram.html)

This report was not signed due to current Public Health Orders and COVID-19 restrictions. The contents of the report was reviewed with Ralph Bedoe and a summary of violations was provided via e-mail on 2/19/21. The final report was issued on 2/22/2021.

### HAZARDOUS WASTE TANK SYSTEMS FOR SQGS ONLY

# VIOLATION DESCRIPTION

HM-923 (10-18)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 02/19/2021 PAGE 7 OF 8  
 RECORD ID #: DEH2009-HUPFP-211563

### Hazardous Materials and Hazardous Waste (continued)

- 3030024 Failed to operate uncovered tank to ensure at least 2 ft. of freeboard to prevent overtopping, unless the tank is equipped with a containment structure, a drainage control system, or a diversion structure with a capacity that equals or exceeds the volume of the top 2 ft. of the tank. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(c)
- 3030025 Failed to provide an overflow protection device on continuously fed hazardous waste tank(s). 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(4)
- 3030027 Failed to conduct daily tank inspection of discharge control system, monitoring equipment and waste level. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(1-3), 262.34(d)(3)
- 3030028 Failed to conduct weekly hazardous waste tank inspection(s) to detect signs of leakage and ensure that the construction materials, fixtures and surrounding areas of the tank are in good condition. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(4 & 5), 262.34(d)(3)
- 3050007 Failed to properly remove all waste upon closure, decontaminate, and document the closure of a hazardous waste tank system. 22 CCR 67383.3; 40 CFR 262.34(d)(3), 265.201(f)
- HMD1612 Hazardous waste improperly stored in a tank system causing leaks, corrosion, or failure. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)
- HMD1614 Failed to pre-notify the CUPA in writing prior to closing a hazardous waste tank system. 22 CCR 67383.3(a)(1)
- HMD1615 Failed to properly accumulate ignitable or reactive waste in a tank system. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(g)

## OFFICIAL NOTICE

February 1, 2023

Record ID: DEH2009-HUPFP-211563, CERS ID: 10384258

Dear Sir/Madam:

### RE: Annual Hazardous Materials Business Plan Certification Not Completed

The Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) in San Diego County. The HMD, as the CUPA, regulates the hazardous materials business plan statute and regulations.

State law requires that a facility that handles or stores hazardous material(s) at or above reporting levels must annually certify their business plan. The business plan certification is important because up to date chemical inventory information is useful to emergency responders and public health officials in case of a spill or other emergencies.

The entire business plan is required to be certified annually, pursuant to California Health and Safety Code (HSC) Chapter 6.95 section 25508.2. The submittal must be completed using the online California Environmental Reporting System (CERS): <https://cers.calepa.ca.gov>. Facilities not subject to the Aboveground Petroleum Storage Act (APSA) or Emergency Planning Community Right-to-Know Act (EPCRA) may certify their HMBP in CERS using the "Certify" Button. The business plan certification consists of several components: Facility Information, Hazardous Materials Inventory, Site Map, Emergency Response Plan, and Training Plan. Failure to submit the business plan in CERS, as required, may result in administrative, civil, or criminal penalties.

The dates of your last submitted/certified business plan from CERS are listed below:

Facility information:	2/19/2021
Hazardous Materials Inventory (& Site Map):	2/19/2021
Emergency Response & Training Plans:	2/19/2021

**Within 30 days of receipt of this Official Notice, please log into CERS, ensure information is current, and complete a submittal to certify your Hazardous Materials Business Plan.**

#### Progressive Enforcement Plan:

1. Official Notice mailed to facilities requiring HMBP certification.
2. Failure to submit or re-certify HMBP within 30 days of receipt of this notice will result in a mailed Notice to Comply (NTC) with a Class II Violation cited.
3. Failure to submit or re-certify HMBP following 30 days of the NTC will result in an on-site verification inspection and issuance of a Class I Violation on a Notice of Violation (NOV).
4. Failure to submit or re-certify within 30 days of the NOV will result in a Unilateral Order and can result in financial penalties of up to \$5,000 per day of violation (HSC 25515.2).

If you need assistance or believe you have received this notice in error, please contact the **CERS Help Desk at (858) 505-6990**.

To make a phone or in-office appointment to get one-on-one help, visit HMD's CERS information website at:

[https://www.sandiegocounty.gov/content/sdc/deh/hazmat/hmd\\_cers.html](https://www.sandiegocounty.gov/content/sdc/deh/hazmat/hmd_cers.html)

Sincerely,  
Michael Mnatsakanian, Chief  
Hazardous Materials Division

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS:

Submit three (3) copies of this application package, including plan drawings, with the required fee to the Department of Health Services, Hazardous Materials Management Unit, Room 311, 1700 Pacific Highway, San Diego, CA 92101. Checks should be made payable to the County of San Diego.

A permit will be issued by the Department of Health Services (DHS) upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in this application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit has been issued.

Once the permit has been issued, it is the permittee's responsibility to notify the DHS at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III and IV).

IMPORTANT: CONTACT THE DEPT. OF HEALTH SERVICES AT 236-2222 AT LEAST TWO WORKING DAYS BEFORE STARTING CONSTRUCTION TO SCHEDULE THE FIRST REQUIRED FIELD INSPECTION. 7/24/89

F. Indicate the Company/Person you wish to have our plan check comments directed to by circling the appropriate section letter above or if different enter below.

G. PROJECT WORK TO BE COMPLETED: Check Applicable Box	COMPLETE APPLICATION PARTS	FEE CODE (TABLE H.)	CODES FOR OFFICE USE ONLY

UNDERGROUND HAZARDOUS MATERIALS STORAGE TANK FACILITY

PART III

APPLICATION FOR PERMIT TO ABANDON

Complete all sections of Part III. If information is not known or applicable please indicate on application.

- A. Total number of tanks to be abandoned 2
- B. Tank Information - Complete the following information for each tank to be abandoned. Attach additional sheets as necessary.

(Label tanks on plot plan to correspond to application)		1	2	3	4
Tank Capacity (gallons)		1,000	1,000 500		
Date Tank Installed		UNKNOWN	UNKNOWN		
Tank Composition (Steel, Fiberglass, Fiberglass Coated Steel, Concrete, etc.)		Steel	Steel		
Tank Manufacturer		UNKNOWN	UNKNOWN		
Tank Presently in Use? (Yes-No)		Yes	Yes		
Materials Stored in Tank	Material: dates: -----	Diesel to Present	Regular Gasoline to Present	to	to
	Material: dates: -----	to	to	to	to
Has Tank System Leaked? (Yes, No, Not Known)	Tank Piping	NO	NO		
		NO	NO		
Basis of determination (Inventory records, tank system testing/monitoring, environmental monitoring)		Precision Testing	Precision Testing		
Is any part of the system cathodically protected? (Yes-No-Not Known)					
Tank		NO	NO		
Piping Lines		NO	NO		
Piping materials		Steel	Steel		

C. PREVIOUS OWNERS AND OPERATORS OF THE TANK(S):

Dates

Owner/Operator

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

D. Approximate depth to groundwater: 13'

Basis of Determination: Past Experience in the Area

E. Proposed method of abandonment:  Removal  Destruction in place

NOTE: Removal of the tank(s) is the preferred method of abandonment. Destruction of the tank in place, for example, by filling with an inert substance, will only be considered in special cases upon submittal of additional information to determine the risks and hazards of contamination. Additional information required includes recent tank testing results, soils data, special site characteristics and approval from the local Fire Department.

F. Future use/disposal site of tank: DISPOSE AS SCRAP

G. ATTACH A PLOT PLAN ON 8-1/2" x 11" paper showing the following:

1. Property Lines, Site Address, Scale, North Arrow
2. Location of 100 year flood plain, if applicable
3. Location of all existing and proposed structures
4. Location of all existing and proposed underground storage tank facilities
5. Location of underground tank(s) to be abandoned (number tanks to correspond to application)
6. Location of underground utility lines and vaults

H. REQUIRED INSPECTION - PERMIT TO ABANDON

A representative of the Department of Health Services (DHS) must be on site at the time the tank(s) is removed from the ground to evaluate the condition of the tank and the surrounding soil and/or groundwater. Any evidence of an unauthorized release of a hazardous material from the tank will require the submittal of additional information by the permittee to the DHS.

When a permit has been issued by the DHS to destroy a tank in place, the DHS will inspect to verify that the tank has been properly emptied and purged of all hazardous materials immediately prior to filling with an approved inert substance.

I. I declare that to the best of my knowledge and belief the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Department of Health Services.

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for future development (e.g., soil compaction testing) are in addition to the requirements of the Department of Health Services.

I will notify the Department of Health Services at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

UNDERGROUND HAZARDOUS MATERIALS STORAGE TANK FACILITY

PART II

APPLICATION FOR A PERMIT TO CONSTRUCT

A. Total number of tanks to be installed 2

B. Type of primary containers:

Tank #	Manufacturer	Composition	Capacity	Double or Single Wall	Material to be Stored
1 N	TRUSCO	PRIM. STEEL SEC. FRP	1,000	DOUBLE	DIESEL
2 N	TRUSCO	✓	675	✓	UNL. GASOLINE
3					
4					

Attach additional sheets as needed for primary containers.

C. Type of secondary containment:

- Double Wall Tanks       Flexible Liner (liner thickness) \_\_\_\_\_  
 Vault                               Other \_\_\_\_\_

Manufacturer TRUSCO SUPERTANK

If other than Double Wall Tanks, will all tanks be in the same secondary containment enclosure? Explain \_\_\_\_\_

Will a system be installed to de-water the containment area? Explain NO

D. Tank leak detection/monitoring system:

- Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.

Manufacturer MSA

- Daily manual monitoring of the space between the primary and secondary containers using "dip stick" readings or visual determination.

Please specify: \_\_\_\_\_

- Daily Inventory Control/Records reconciliation (for motor vehicle fuels only)

NOTE: If daily gauging and records reconciliation is to be used as the monitoring system, a letter from the property owner must be provided to this Department outlining the frequency and method of monitoring the space between the primary and secondary containers, as well as a statement that the tanks will be tested using an approved testing method every year.

- Other. Explain \_\_\_\_\_

E. Piping Materials and Construction:

Primary Containment GALV CASOLINE  
BLK STEEL DIESEL Manufacturer/Model \_\_\_\_\_  
Secondary Containment CIBA 3" FIBERGLASS Manufacturer/Model CIBA  
(if applicable)

F. Type of product delivery system (i.e., pressurized, suction) SUCTION

G. Piping leak detection/monitoring system:

- Leak detector on pressurized line (for motor vehicle fuels only)  
Manufacturer \_\_\_\_\_
- Continuous monitoring device within the secondary containment, connected to an audible/visual alarm system.  
Manufacturer MSA
- Daily manual monitoring of the space between the primary and secondary containers using "dip stick" readings or visual determinations.  
Please specify \_\_\_\_\_
- Other \_\_\_\_\_

H. Describe the tank overfill protection system you plan to use. Check all that apply.

- Product level sensing device equipped with high level alarm and/or automatic shut off device. Specify type: \_\_\_\_\_
- Ball float valve on vent and vapor lines
- Other. Explain \_\_\_\_\_

I. Indicate type/manufacturer of vapor recovery system to be used:

PHASE II VAPOR ONLY

NOTE: Those systems with product flow thru the vapor lines during normal operation require secondary containment of these lines.

J. What is the approximate depth to ground water? 13'

Basis of determination PAST EXPERIENCE IN THE AREA

K. Attach a certification from the manufacturer, or his authorized representative, of the tank and piping materials as to the capability of the tank and piping materials to store the proposed hazardous substances.

L. Attach three copies of Plans showing:

1. Location of all existing and proposed structures
2. Location of all existing underground tanks and piping (indicate if tanks are to be removed or abandoned)
3. Location of all proposed tanks and piping and their secondary containment
4. Cross section of tank and piping system including secondary containment, overfill protection equipment, monitor ports and equipment, extension of all pipes and ports to finish grade

5. Location and detail of monitoring/leak detection systems
6. Location of underground utility lines and vaults
7. Site address, property lines, scale, north arrow
8. Surface elevation and location of 100 year flood plain, if applicable
9. Equipment summary

M. Required Inspections - New Tank Installations

Each new tank installation must be inspected by the DHS at each of the following stages:

1. installation of secondary containment (liner) system, where applicable
2. delivery and test of tank on site; excavation complete; placement of tank in excavation
3. product line and associated piping - pressure test on lines and tank; overfill protection devices installed
4. monitoring system installed; monitor ports brought to surface

Projects involving repiping only will normally require just one inspection (at the line pressure-test stage).

Please refer to "Underground Tank Inspection Record - New Tank Installation" (DHS:HW-914) for additional details, or call 236-2222.

- N. I declare that to the best of my knowledge and belief the statements and information provided above are correct and true. I understand that information in addition to that provided above may be needed in order to obtain a permit from the Department of Health Services (DHS) and that no work is to begin on this project until the permit is issued.

I understand that any changes in design, materials or equipment will void my permit to construct if prior approval is not obtained.

I understand that a permit to operate the underground storage tank system must be obtained from the Department within 60 days of putting the system into use. This is the responsibility of the tank owner. Conditions of the permit to operate include an acceptable tank monitoring and testing schedule, submittal of an annual report form, and regular inspection by the DHS.

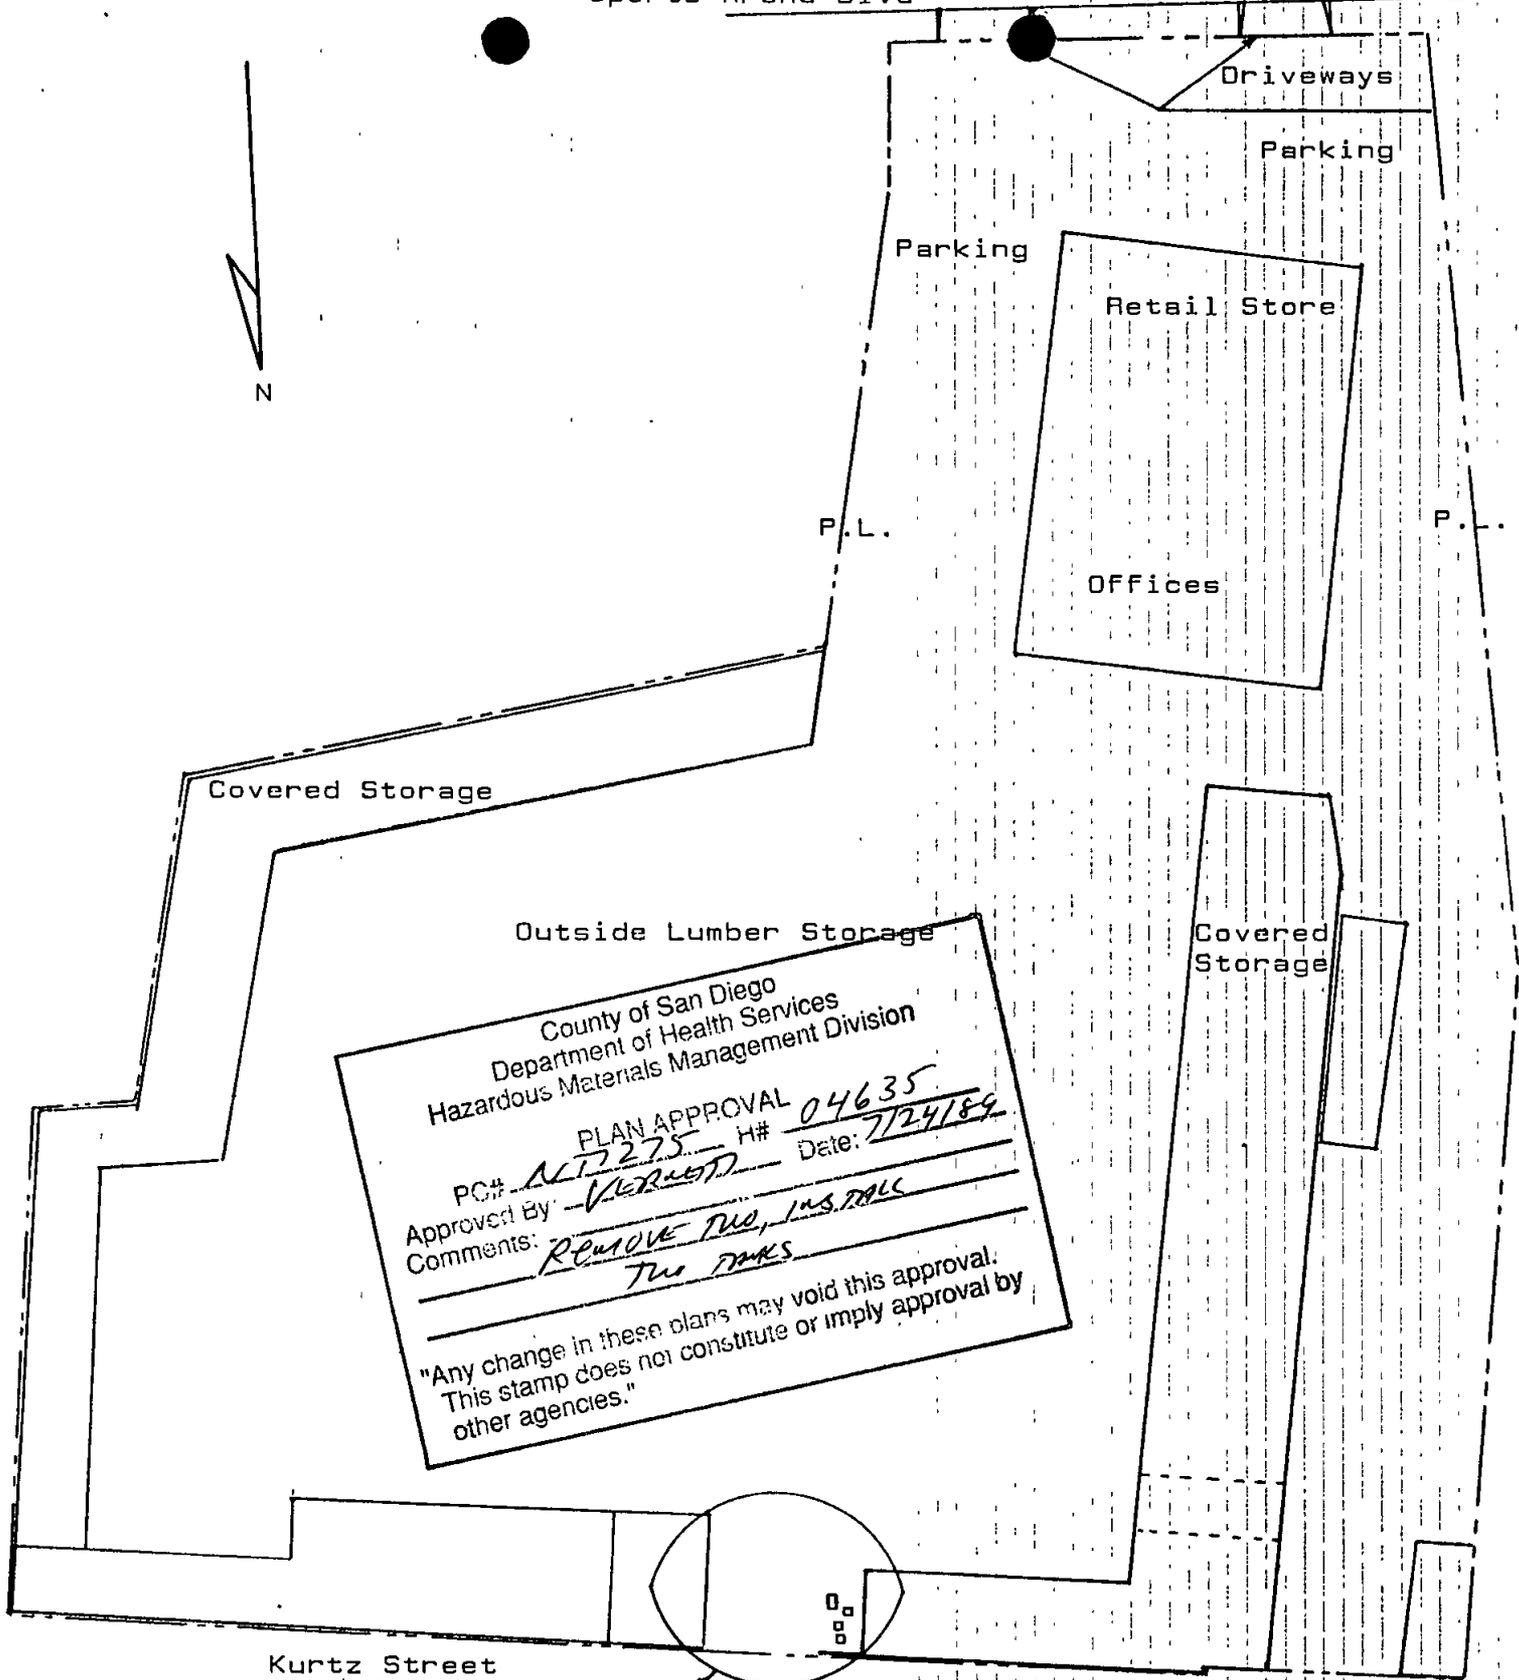

I will notify the Department of Health Services at least two working days (48 hours) in advance to schedule each required inspection. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared nor assumed by the County of San Diego.

 Expiration Date: August 13, 2004

### Permit for Underground Storage Tank Construction/Closure

SITE NAME: Dixieline Lumber Company  
 SITE ADDRESS: 3250 Sports Arena Blvd, San Diego, CA 92110  
 OWNER NAME: Dixieline Lumber Company  
 OWNER ADDRESS: 3250 Sports Arena Blvd, San Diego, CA 92110

DESCRIPTION OF PROPOSED WORK: Remove two (2) underground storage tanks and all associated piping

In accordance with SDCC Ordinance Title 6, Chapter 10, Section 68.1004 (b), USTs must be removed within 180 days of permit approval. The deadline to remove USTs is February 13, 2004.

PERMIT CONDITIONS: For tank systems that are to be removed, the excavation shall be exposed prior to the scheduled inspection and sampling points identified by the DEH inspector. Sampling is required for both tank(s) and piping. The tank(s) and piping must remain in the excavation until the DEH inspector approves the removal.

- 1) All piping and underground storage tanks must be removed at the same time. Failure to do so will result in a re-inspection and \$350.00 re-inspection fee.
- 2) A least one sample must be analyzed for MTBE and related oxygenates (DIPE, TAME, ETBE, TBA) using EPA Method 8260B
- 3) Certificate of Disposal/manifests required for tank

**Please be advised:**

All underground storage tanks that are to be removed **must be cleaned** and properly inerted prior to the removal

- 1) The tanks are visually free from all product, sludge, rinsate and debris. Residual staining caused by soil and waste consisting of light shadows, slight streaks, or minor discolorations, and soil and waste in cracks, crevices and pits may be present.
- 2) Tanks that held a Hazardous material or hazardous waste that had the potential to generate flammable vapors, must be properly inerted. A combustible gas indicator (CGI), which is properly calibrated, shall be used to measure the concentration of flammable vapor at the top, center and bottom of the underground storage tank. The concentration of flammable vapor must be below twenty percent of the Lower Explosive Limit (LEL) for the material that was contained in the tank(s) and the oxygen concentration shall be the same as that of ambient air, approximately 20.8%. The underground storage tank(s) must inerted with dry ice using a minimum of 15 pounds for every 1000 gallons of tank capacity.
- 3) Failure to have the tank properly cleaned prior to the time of the removal will result in the cancellation of the removal and will require a re-inspection and \$350.00 re-inspection fee.

This office must be given at least 48 hours notice for all required Underground Storage Tank Activity.

Please call at (619) 338-2214 to schedule an appointment. For cancellations, please call (619) 237- 8451.

E. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS

Submit one (1) original and two (2) copies of this application package, including plan drawings with the required fee to the Department of Environmental Health (DEH), Land and Water Quality Division, 1255 Imperial Avenue, San Diego, CA 92101. or mail to P.O. Box 129261, San Diego, CA 92112-9261. Checks should be made payable to the County of San Diego.

A permit will be issued by DEH upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in the application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit is issued.

Once the permit has been issued, it is the responsibility of the permittee to notify DEH at least two (2) working days in advance to schedule each required inspection.

Construction stages at which inspections are required are indicated in each subpart of this application form (i.e., Part II, III, IV, & V)

PERMIT APPLICATION  
PART III

APPLICATION FOR PERMIT TO CLOSE UNDERGROUND STORAGE TANK SYSTEM

A. TOTAL NUMBER OF TANK SYSTEMS TO BE CLOSED

NOTE: UST SYSTEMS INCLUDE TANK AND ALL ASSOCIATED PIPING.

B. DESCRIPTION OF TANKS TO BE CLOSED:

TANK NO.	CAPACITY	DATE INSTALLED	TANK COMPOSITION	TANK PRESENTLY IN USE?	MATERIALS STORED IN TANK
1	1000	N/A	GLAS Steel	YES	DIESEL
2	675	N/A	GLS steel	YES	GASOLINE

C. HAS THE TANK SYSTEM EVER FAILED OR LEAKED?

YES

NO

UNKNOWN

D. REASON FOR TANKS TO BE CLOSED:

Meet current state/federal requirements

Replacement of existing tanks

Tank system failure, briefly describe \_\_\_\_\_

Other, briefly describe \_\_\_\_\_

DEH USE ONLY:
Project Manager: _____
Type: _____
Status: _____

E. PREVIOUS OWNERS AND OPERATORS OF THE TANKS:

Dates	Owner/Operator
_____	_____
_____	_____
_____	_____
_____	_____

F. PROPOSED METHOD OF CLOSURE:  REMOVAL  CLOSURE IN PLACE

SAMPLING PROTOCOL Tank owner/authorized representative responsible for all sampling analyses and associated costs.

- For tank systems that are to be removed. The excavation shall be exposed prior to the scheduled inspection and sampling points identified by the Department of Environmental Health (DEH) inspector. Sampling is required for both tank and piping. The tank and piping must remain in the excavation until the SAM inspector approves the removal.
- Tank systems to be closed in place. Submit an alternate plan which must include soil sampling, reason for closing the tank system in place and type of material to be used to fill the tank. Soil sampling and/or hydrostatic testing is also required for piping closures. Tank system closure in place will only be considered after evaluating the risks and hazards if the tank

G. DISPOSAL SITE OF TANK: SCYAP - PACIFIC COAST RECYCLING - 3055 COMMERCIAL ST SD CA 92113

Note: You must inform DEH of the address of where the tank and piping is to be disposed. Plans will be disapproved without this information.

H. ATTACH THREE COPIES OF PLANS SHOWING THE FOLLOWING:

1. Property lines, site address, scale, north arrow.
2. Location of all existing structures.
3. Location of all existing underground storage tank facilities.
4. Location of underground storage tanks and piping to be closed.
5. Location of underground utility lines and vaults.

I. REQUIRED INSPECTION-PERMIT TO CLOSE

A representative from DEH must be on site at the time the tank(s) are closed.

1. TANK SYSTEM CLOSURE BY REMOVAL:

- The excavation shall be exposed prior to the scheduled inspection. The tank owner/authorized representative on site must submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. A combustible gas instrument and soil sampling equipment must be on site. The DEH inspector will identify sampling points. The tank and piping must remain in the excavation until DEH approves the removal.

2. TANK SYSTEM CLOSURE IN PLACE:

- Soil sampling for tank(s) and piping.
- After approval of the alternate plan, the tank owner/authorized representative on site shall submit a uniform hazardous waste manifest demonstrating that the tank has been properly decontaminated. The DEH inspector shall verify that the tank system has been properly emptied and will witness the filling with an approved inert substance. Piping must be closed at the same time as the tank.

J. DECLARATION

I declare that to the best of my knowledge and belief, the statements and information provided are correct and true. I understand that information in addition to that provided above may be needed in order to obtain final approval by the Department of Environmental Health (DEH).

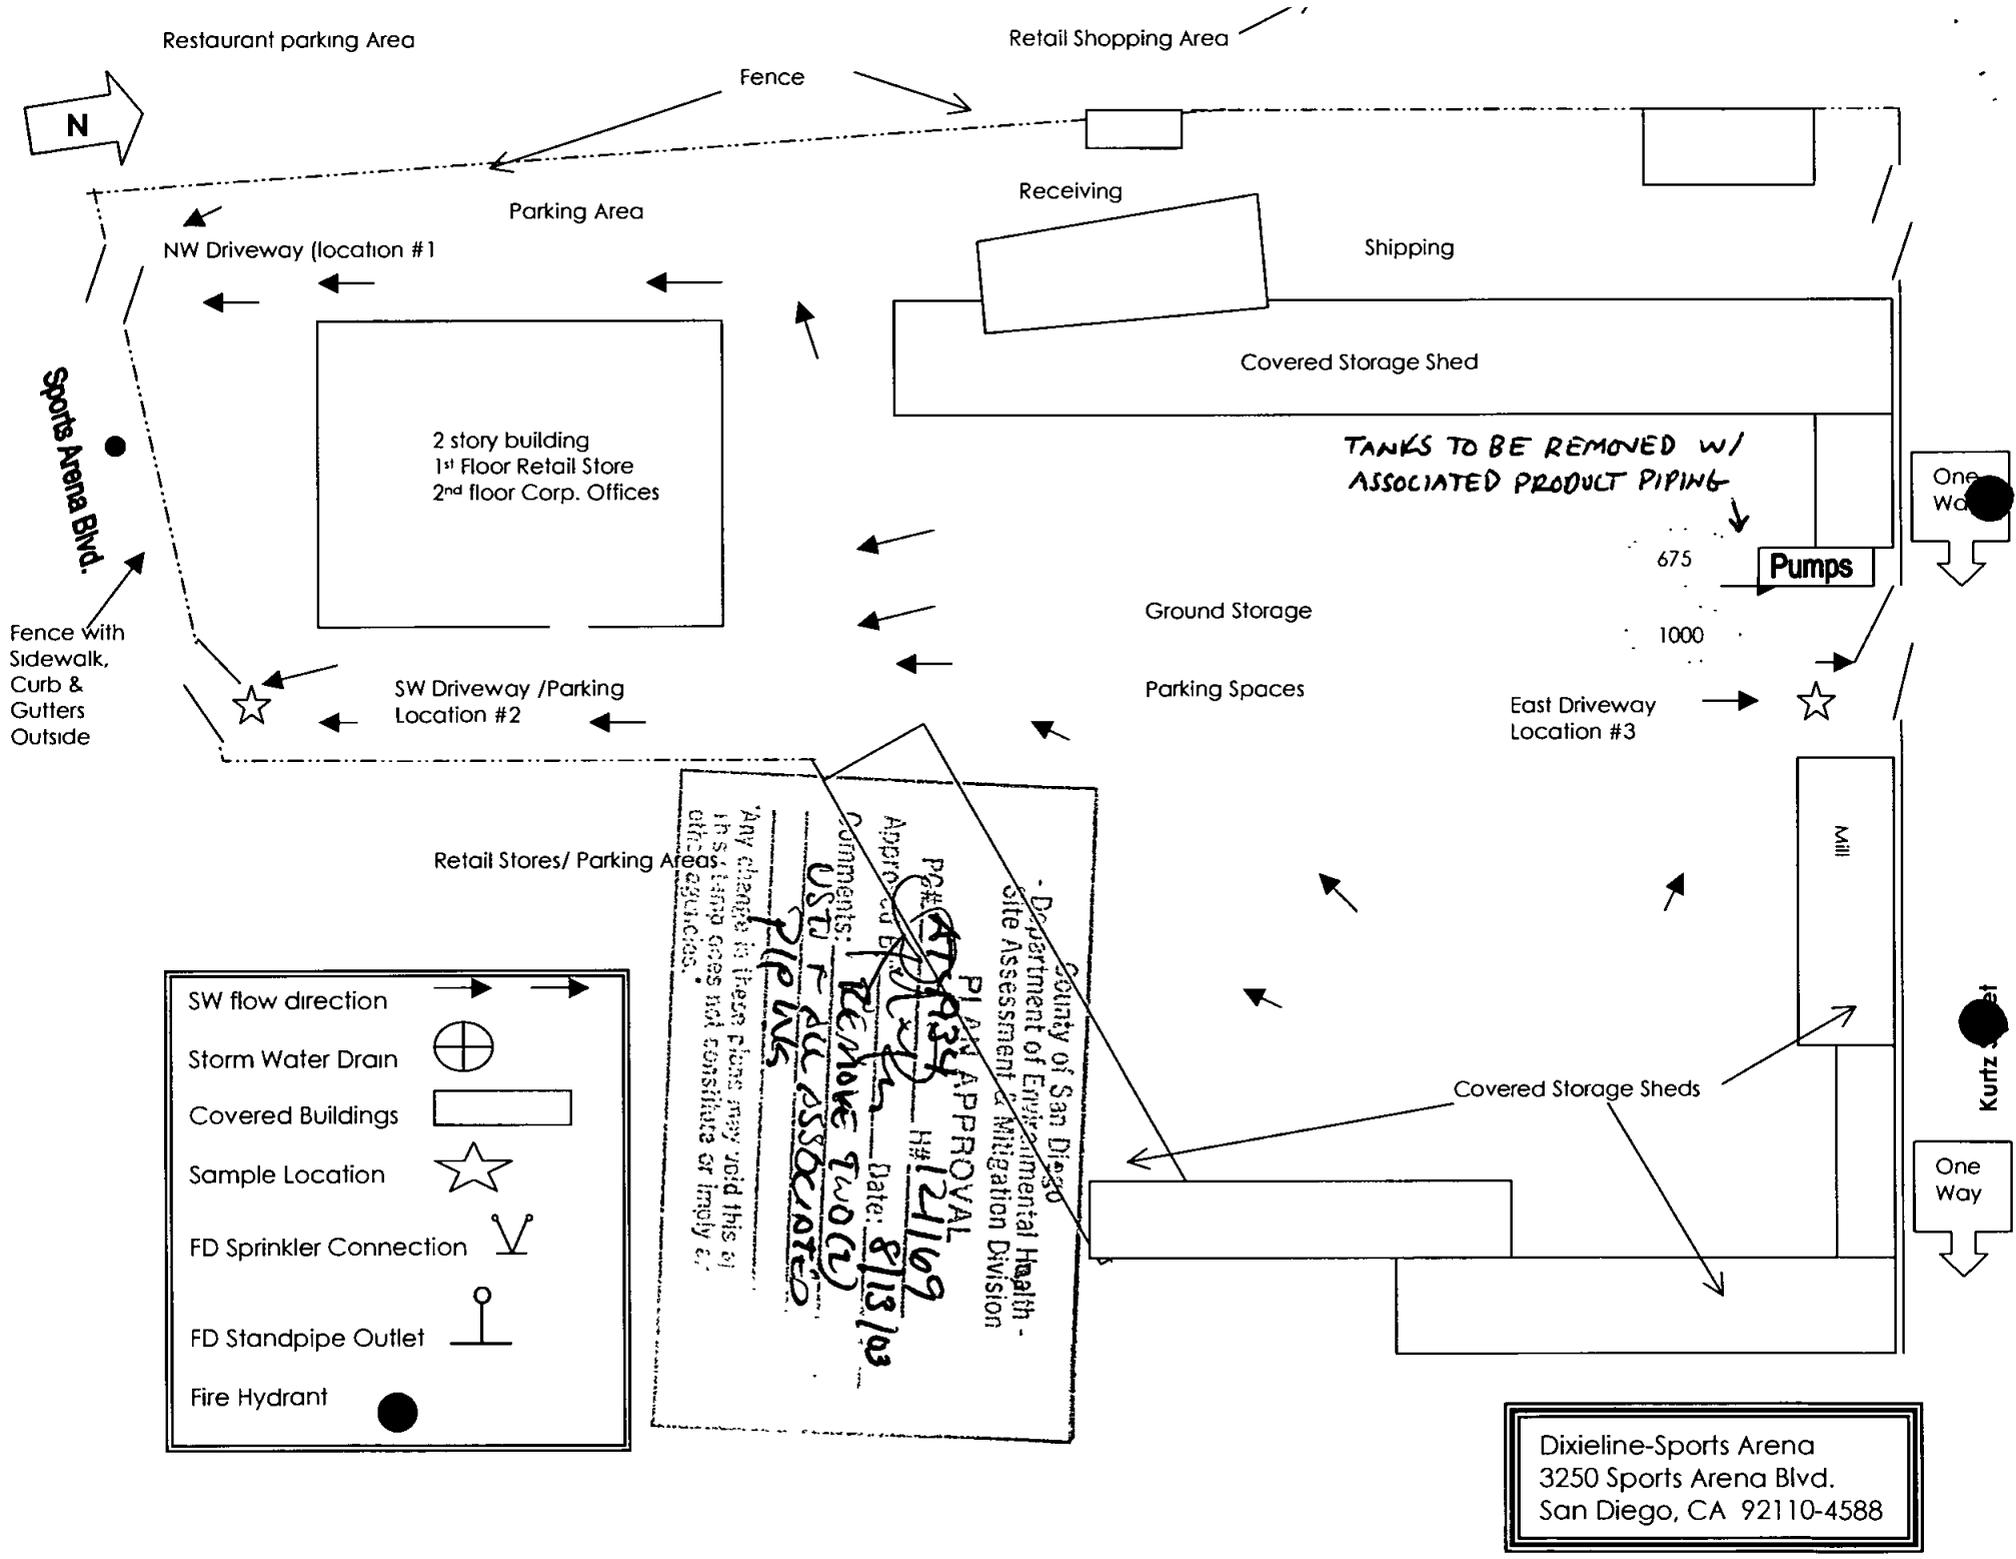

I understand that tests and procedures that may be required by other departments and agencies to demonstrate adequate site safety or suitability for further development (e.g. soil compaction testing) are in addition to the requirements of the Department of Environmental Health (DEH).

I will notify the Department of Environmental Health (DEH) at least two working days (48 hours) before work is to begin in order to schedule the required inspections. I understand that site and worker safety are solely the responsibility of the property owner or his agent and that this responsibility is not shared or assumed by the County of San Diego.

WORKPLAN  
FOR  
UNDERGROUND STORAGE TANK CLOSURE

1. Site Name DIXIELINE LUMBER CO

2. Site Address 3250 SPORTS ARENA BLVD  
SAN DIEGO

3. Describe the existing land use in the surrounding area (residential, commercial, schools). Describe the locations of nearest receptors and the prevailing wind.

COMMERCIAL

4. Explain how the excavation will be secured. Describe fencing/site security and other methods that ensure public safety.

CAUTION TAPE WITH BARRICADES WILL SECURE EXCAVATION DURING TANK REMOVAL. SITE HAS LOCKED FENCE TO ENSURE PUBLIC SAFETY.

5. If soil is to be stockpiled, describe the location on the Plan Check map. Describe method of soil containment (berming/covers, run-off control).

UPON COMPLETED ANALYTICAL RESULTS FROM SOIL SAMPLES, STOCKPILE WILL BE PLACED BACK INTO EXCAVATION.

6. Do you plan to conduct site assessment or remedial work beyond what is necessary to remove the underground storage tank(s) and perform the mandatory soil sampling required by the Site Assessment and Mitigation Division (SAM) of the Department of Environmental Health?

Yes  No

If Yes, a Workplan for Post-Tank Removal Investigation must be completed under the direction of a registered professional.

NOTICE: You are hereby notified that on 9/30/03, an Environmental Health Specialist conducted an inspection for the closure of 2 hazardous substance underground storage tank(s). A summary of the conditions follows:

- An unauthorized release of a hazardous substance has been observed by the Environmental Health Specialist. You are hereby required to initiate Corrective Action measures (See Page 4 for details).
- A determination of this site's status is pending the Site Assessment and Mitigation (SAM) Program's receipt and review of analytical results for the samples taken from the tank and/or piping closure site. A laboratory report must be submitted to SAM within 30 days. Please request that the laboratory send a copy of the analytical report directly to Cen fax 10/1/03 at the address provided below.

The SAM Program has completed its review of the analytical results for samples collected at the tank closure site and has determined the following:

- TANK CLOSURE COMPLETE - NO FURTHER ACTION REQUIRED
- INITIATE CORRECTIVE ACTION MEASURES (See enclosed information)

COMPLIANCE INSPECTION REPORT

BUSINESS NAME Dixline Lumber  
ADDRESS 3250 Sports Arena Blvd  
CITY/ZIP San Diego 92110

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

MAY 09 1996

MAY 09 1996 P:6/11/96

Office Use Only

Routine Inspection:  
\*The permit is current.  
Health  
\*The Hazardous Materials Business Plan is on  
side. Business Plan updates have been  
submitted for approval.  
\*The underground storage tank monitoring  
system is certified on an annual basis -  
documentation is on site.  
\*Employee Training is conducted on a annual  
basis.  
• Within 30 days, submit test results  
for the testing & certification of the line leak  
detector on the underground tank system to  
the Department. Attn: John Kels

COMPLIANCE INSPECTION REPORT

BUSINESS ADDRESS: 3250 Sports Arcnd Bl. 92110

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.905
No EPA Identification Number 66262.12
Waste Manifests/Receipts not on-site for 3 years 66262.40
Manifest not properly completed 66262.23
Manifest copy not sent to CAL-EPA 66262.23
TSDF signed-manifest not on-site 66262.40
Biennial report not sent to CAL-EPA 66262.41
LDR Documentation not available 66268.7
Exception Rpt. not filed with CAL-EPA 66262.42
Operating TSDF without authorization 25201

STORAGE AND HANDLING

- Waste stored longer than 90 days 66262.34
Waste container missing/improperly labeled 66262.34
Haz Materials not properly labeled 25124
Waste container not kept closed 66265.173
Waste container in poor condition 66265.171
Waste container(s) not properly managed 66265.173
Damaged container not repackaged 66265.171
Container incompatible with waste 66265.172
Incompatibles in the same container 66265.177
Incompatibles not stored separately 66265.177
Ignitable Wastes less than 50 feet 66265.176
Ignitable Wastes not grounded 66265.31
Storage area not inspected weekly 66265.174

DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to 25189.5
Waste determination not made 66262.11
Unlawful transport of haz. waste 25163
Waste transported without manifest 66262.20
No Extremely Haz. Waste Permit 67430.1

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.18
Training program not adequate 66265.16
Facility not designed to minimize release 66265.31
Spill control equip not available 66265.32
Aisle space is obstructed 66265.35
Contingency plan not prepared and/or on file 66265.51, 66265.53

MISCELLANEOUS

- Waste oil contaminated 25250.7
Used oil filters improperly managed 66266.130
Damaged batteries improperly managed 66266.81

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284
Repair/modify/close permit not obtained 68.1005
UST Permit Application not submitted 25286(a)
Operating permit conditions violated 2712
Failed to notify HMMD of changes 25284
No owner/operator agreement 25293
No records of financial coverage 25292.2
No main/monit/calib records available 2712(b), 2641i

MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643
Annual integrity test not conducted 25292
Copy of tank test not submitted to HMMD within 30 days 2643
Manual tank gauging (<2000 gal) not done properly 2645
Reconciliation not done properly 2646
Reconciliation not approved for facility 2646
Dispenser meter(s) not calib annually 2646
Improper liquid measurements 2646
Stick in poor condition 2646
Improper monthly reconciliation 2646
Failed to report excessive variation 2646
Pressurized Product Piping Leak Device not tested annually 25292

MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632
No written monitoring procedure 2632
Written response plan not available 2632
Spill/Overfill equip. not maintained or installed 2635

RELEASE REPORTING

- Failure to report an unauthorized release 25295
Release record log not available 2651, 2650
No leak report/investigation/action 2652

CLOSURE

- Temporary closure req. not completed 2671
Abandoned tank not properly closed 25298
Permanent closure req. not completed 2672

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.1105
Business Plan not established/implemented 25503.5
Business Plan not submitted to HMMD 25505
Business Plan not amended 25505
Personnel Training Records not available 2732

RELEASE REPORTING

- Failure to report a release/threatened release 25507

BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504
Emergency Contacts not provided/current 25509
Personnel Training Program inadequate 25504
Inventory is incomplete 25504
Site Map is not sufficient 25509
Acutely Haz. Mat. not registered 25533

An inspection/summary report will be mailed shortly. All violations must be corrected. Please call (619) 338-2222 if you have any questions.

## COMPLIANCE INSPECTION REPORT

DATE 8/7/97

PAGE 2 OF 2

BUSINESS ADDRESS: 3250 Sports Arena Blvd. San Diego 92116-4528

**VIOLATION REPORT:** The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

### I HAZARDOUS WASTE REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68.905 **V0108 W**
- No EPA Identification Number 66262.12 **V0105 W**
- Waste Manifests/Receipts not on-site for 3 years 66262.40 **V0118 W**
- Manifest not properly completed 66262.23 **V0120 W**
- Manifest copy not sent to DTSC 66262.23 **V0115 W**
- TSDF signed-manifest not on-site 66262.40 **V0121 W**
- Biennial report not sent to DTSC 66262.41 **V0122 W**
- LDR Documentation not available 66268.7 **V0123 W**
- Exception Rpt. not filed with DTSC 66262.42 **V0116 W**
- Operating TSDF without authorization 25201 **V0124 W**

#### STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262.34 **V0221 W**
- Failure to clean up haz waste off of floor surface 66262.10b **V0313 W**
- Waste container missing/improperly labeled 66262.34 **V0222 W**
- Haz Materials not properly labeled 25124 **V0223 W**
- Waste container not kept closed 66265.173 **V0202 W**
- Waste container in poor condition 66265.171 **V0205 W**
- Waste container(s) not properly managed 66265.173 **V0210 W**
- Damaged container not repackaged 66265.171 **V0226 W**
- Container incompatible with waste 66265.172 **V0207 W**
- Incompatibles in the same container 66265.177 **V0224 W**
- Incompatibles not stored separately 66265.177 **V0213 W**
- Ignitable Waste less than 50 feet 66265.176 **V0214 W**
- Ignitable Waste not grounded 66265.31 **V0215 W**
- Storage area not inspected weekly 66265.174 **V0216 W**

#### DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to 25189.5 **V0313 W**
- Waste determination not made 66262.11 **V0319 W**
- Unlawful transport of haz. waste 25163 **V0315 W**
- Waste transported without manifest 66262.20 **V0316 W**
- Extremely Haz Waste Permit not obtained 25205.7 **V0317 W**

#### TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.16 **V0405 W**
- Training program not adequate 66265.16 **V0406 W**
- Facility not designed to minimize release 66265.31 **V0501 W**
- Spill control equip not available 66265.32 **V0508 W**
- Aisle space is obstructed 66265.35 **V0509 W**
- Contingency plan not prepared and/or on file 66265.51, 66265.53 **V0609 W**

#### MISCELLANEOUS

- Waste oil contaminated 25250.7 **V0225 W**
- Used oil filters improperly managed 66266.130 **V0701 W**
- Damaged batteries improperly managed 66266.81 **V0702 W**
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) **V0125 W**
- Onsite treatment of waste without authorization 25201 **V0125 W**

### II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

#### GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284 **V3002 T**
- Repair/modify/close permit not obtained 68.1005 **V3007 T**
- UST Permit Application not submitted 25286(a) **V3010 T**
- Operating permit conditions violated 2712 **V3011 T**
- Failed to notify HMMD of changes 25284 **V3012 T**
- No owner/operator agreement 25284 **V3005 T**
- No records of financial coverage 25292.2 **V3013 T**
- No maint/monit/calib records available 2712(b), 2641(j) **V3001 T**
- Monitoring Equip. not tested annually 2630, 2641 **V3003 T**

#### MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643 **V3014 T**
- Integrity test not conducted 25292 **V3015 T**
- Copy of tank test not submitted to HMMD within 30 days 2643 **V3016 T**
- Manual tank gauging (<2000 gal) 2645 not done properly **V3017 T**
- Reconciliation not done properly 2646 **V3018 T**
- Reconciliation not approved for facility 2646 **V3019 T**
- Dispenser meter(s) not calib annually 2646 **V3020 T**
- Improper liquid measurements 2646 **V3021 T**
- Stick in poor condition 2646 **V3022 T**
- Improper monthly reconciliation 2646 **V3023 T**

### I HAZARDOUS WASTE REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68 905 **V0108 W** \_\_\_\_\_
- No EPA Identification Number 66262 12 **V0105 W** \_\_\_\_\_
- Waste Manifests/Receipts not on-site for 3 years 66262.40 **V0118 W** \_\_\_\_\_
- Manifest not properly completed 66262 23 **V0120 W** \_\_\_\_\_
- Manifest copy not sent to DTSC 66262 23 **V0115 W** \_\_\_\_\_
- TSDF signed-manifest not on-site 66262 40 **V0121 W** \_\_\_\_\_
- Biennial report not sent to DTSC 66262.41 **V0122 W** \_\_\_\_\_
- LDR Documentation not available 66268.7 **V0123 W** \_\_\_\_\_
- Exception Rpt. not filed with DTSC 66262 42 **V0116 W** \_\_\_\_\_
- Operating TSDF without authorization 25201 **V0124 W** \_\_\_\_\_

#### STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262 34 **V0221 W** \_\_\_\_\_
- Failure to clean up hazwaste off of floor surface 66262 10b **V0313 W** \_\_\_\_\_
- Waste container missing/improperly labeled 66262 34 **V0222 W** \_\_\_\_\_
- Haz Materials not properly labeled 25124 **V0223 W** \_\_\_\_\_
- Waste container not kept closed 66265 173 **V0202 W** \_\_\_\_\_
- Waste container in poor condition 66265.171 **V0205 W** \_\_\_\_\_
- Waste container(s) not properly managed 66265.173 **V0210 W** \_\_\_\_\_
- Damaged container not repackaged 66265.171 **V0226 W** \_\_\_\_\_
- Container incompatible with waste 66265.172 **V0207 W** \_\_\_\_\_
- Incompatibles in the same container 66265 177 **V0224 W** \_\_\_\_\_
- Incompatibles not stored separately 66265.177 **V0213 W** \_\_\_\_\_
- Ignitable Waste less than 50 feet 66265.176 **V0214 W** \_\_\_\_\_
- Ignitable Waste not grounded 66265 31 **V0215 W** \_\_\_\_\_
- Storage area not inspected weekly 66265.174 **V0216 W** \_\_\_\_\_

#### DISPOSAL AND TRANSPORTATION

- Unauth disposal of waste to \_\_\_\_\_ 25189.5 **V0313 W** \_\_\_\_\_
- Waste determination not made 66262 11 **V0319 W** \_\_\_\_\_
- Unlawful transport of haz. waste 25163 **V0315 W** \_\_\_\_\_
- Waste transported without manifest 66262.20 **V0316 W** \_\_\_\_\_
- Extremely Haz Waste Permit not obtained 25205.7 **V0317 W** \_\_\_\_\_

#### TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265 16 **V0405 W** \_\_\_\_\_
- Training program not adequate 66265 16 **V0406 W** \_\_\_\_\_
- Facility not designed to minimize release 66265.31 **V0501 W** \_\_\_\_\_
- Spill control equip not available 66265.32 **V0508 W** \_\_\_\_\_
- Aisle space is obstructed 66265 35 **V0509 W** \_\_\_\_\_
- Contingency plan not prepared and/or on file 66265.51, 66265.53 **V0609 W** \_\_\_\_\_

#### MISCELLANEOUS

- Waste oil contaminated 25250.7 **V0225 W** \_\_\_\_\_
- Used oil filters improperly managed 66266.130 **V0701 W** \_\_\_\_\_
- Damaged batteries improperly managed 66266.81 **V0702 W** \_\_\_\_\_
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) **V0125 W** \_\_\_\_\_
- Onsite treatment of waste without authorization 25201 **V0125 W** \_\_\_\_\_

### II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

#### GENERAL UST REQUIREMENTS

- Health Permit not obtained 68 1005, 25284 **V3002 T** \_\_\_\_\_
- Repair/modify/close permit not obtained 68.1005 **V3007 T** \_\_\_\_\_
- UST Permit Application not submitted 25286(a) **V3010 T** \_\_\_\_\_
- Operating permit conditions violated 2712 **V3011 T** \_\_\_\_\_
- Failed to notify HMMD of changes 25284 **V3012 T** \_\_\_\_\_
- No owner/operator agreement 25284 **V3005 T** \_\_\_\_\_
- No records of financial coverage 25292.2 **V3013 T** \_\_\_\_\_
- No maint/monit/calib records available 2712(b), 2641(j) **V3001 T** \_\_\_\_\_
- Monitoring Equip not tested annually 2630, 2641 **V3003 T** \_\_\_\_\_

#### MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643 **V3014 T** \_\_\_\_\_
- Integrity test not conducted 25292 **V3015 T** \_\_\_\_\_
- Copy of tank test not submitted to HMMD within 30 days 2643 **V3016 T** \_\_\_\_\_
- Manual tank gauging (<2000 gal) 2645 not done properly **V3017 T** \_\_\_\_\_
- Reconciliation not done properly 2646 **V3018 T** \_\_\_\_\_
- Reconciliation not approved for facility 2646 **V3019 T** \_\_\_\_\_
- Dispenser meter(s) not calib annually 2646 **V3020 T** \_\_\_\_\_
- Improper liquid measurements 2646 **V3021 T** \_\_\_\_\_
- Stick in poor condition 2646 **V3022 T** \_\_\_\_\_
- Improper monthly reconciliation 2646 **V3023 T** \_\_\_\_\_
- Failed to report excessive variation 2646 **V3024 T** \_\_\_\_\_
- Pressurized Product Piping Leak Device not tested annually 25292 **V3025 T** \_\_\_\_\_
- No written monitoring procedure 2641 **V3027 T** \_\_\_\_\_
- No written emergency response plan 2641 **V3027 T** \_\_\_\_\_
- SIR reporting incorrectly done 2646 1 **V3004 T** \_\_\_\_\_

#### MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632 **V3026 T** \_\_\_\_\_
- No written monitoring procedure 2632 **V3027 T** \_\_\_\_\_
- Written emergency response plan not available 2632 **V3028 T** \_\_\_\_\_
- Spill/Overfill equip not maintained or installed 2635 **V3029 T** \_\_\_\_\_

#### RELEASE REPORTING

- Failure to report an unauthorized release 25295 **V3009 T** \_\_\_\_\_
- Release record log not available 2651, 2650 **V3030 T** \_\_\_\_\_
- No leak report/investigation/action 2652 **V3031 T** \_\_\_\_\_

#### CLOSURE

- Temporary closure req not completed 2671 **V3006 T** \_\_\_\_\_
- Unused tank not properly closed 25298 **V3032 T** \_\_\_\_\_
- Permanent closure req. not completed 2672 **V3033 T** \_\_\_\_\_
- Failed to apply for temporary closure 25298 **V3008 T** \_\_\_\_\_

### III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

#### RECORD KEEPING

- Health Permit not obtained SDCC 68 1105 **V2001 W** \_\_\_\_\_
- Business Plan not established/implemented 25503 5 **V2002 W** \_\_\_\_\_
- Business Plan not submitted to HMMD 25505 **V2007 W** \_\_\_\_\_
- Business Plan not amended 25505 **V2003 W** \_\_\_\_\_
- Personnel Training Records not available 19 CCR 2732 **V2302 W** \_\_\_\_\_

#### RELEASE REPORTING

- Failure to report a release/threatened release 25507 **V2008 W** \_\_\_\_\_

#### BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504 **V2201 W** \_\_\_\_\_
- Emergency Contacts not provided/current 25509 **V2203 W** \_\_\_\_\_
- Personnel Training Program inadequate 25504 **V2301 W** \_\_\_\_\_
- Inventory is incomplete 25504 **V2005 W** \_\_\_\_\_
- Site Map is not sufficient 25509 **V2202 W** \_\_\_\_\_
- Acutely Haz. Mat. not registered 25533 **V2009 W** \_\_\_\_\_

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

### UNIFIED PROGRAM FACILITY PERMIT APPLICATION

This business or service is required to obtain a Unified Program Facility Permit from the San Diego County Department of Environmental Health. I answered "yes" to one or more of the questions on the "Business Activities" form.

Date assumed business ownership at this location: 8 / 18 / 03

I have determined that this business or service does not require a Unified Program Facility Permit from the San Diego County Department of Environmental Health.

I declare under penalty of perjury that to the best of my knowledge and belief the statements made herein are correct and true. I consent to all necessary inspections allowed by law and incidental to the issuance of required permit(s) and the operation of this business.

Signature: *Cheryl Berman* Title: Risk Manager

Type of Business: Building Materials Supplier Phone #: (619) 224-4120  
Area Code

**Please complete the business information on the following page and return this application to the San Diego County Department of Environmental Health at:**

SAN DIEGO COUNTY  
DEPARTMENT OF ENVIRONMENTAL HEALTH  
HAZARDOUS MATERIALS DIVISION  
P.O. BOX 129261  
SAN DIEGO CA 92112-9261

If a San Diego County Unified Program Facility Permit is required for your business or service a representative of this Department will contact your business. Permit fees will be determined from the contact and a billing statement will be mailed.

**NOTE:** If you do not use hazardous materials, generate hazardous waste, or have underground storage tanks you are still required to return this form.

A representative of the San Diego County Department of Environmental Health may contact you to verify the information provided on this application.

Routine Inspection

RECEIVED APR 11 2006

Inspection conducted with Lenny Leseman, Risk and Safety Coordinator.

### Remarks:

A site walk through was conducted to verify hazardous materials on-site. Hazardous materials business plan was reviewed.

Received copy of site map.

No violations observed during this inspection.

Per Lenny Leseman, any damaged items in store are kept in a receiving area and sent back to vendor.

This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

A routine inspection was conducted today with Lenny Leseman, ~~Risk Manager~~ Safety Coordinator of Dixieline Lumber Co.

RECEIVED APR 10 2008

Observations/Remarks:

- Be advised that hazardous materials are disclosable to HMD if stored in amounts greater than or equal to 55 gallons of a liquid, 200 cuft. of a compressed gas or 500 lbs of a solid.
- Enviroserv handles/properly disposes of all universal waste; manifests available.
- Be advised that if treated wood is ever cut at your facility, a proper waste determination should be made of the sawdust. The dust may contain hazardous solvents (or other materials) that should not go into the regular trash.
- Damaged products that arrive damaged are sealed and sent back to the distributor for a replacement/refund. If a container of hazardous materials is severely damaged, it would be picked up by Safety Kleen. This has not occurred recently, so no manifests for transportation were generated.

This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored. On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

Consent to inspect granted by:  Inspection Contact  Other:

Permission was granted today to conduct a routine CLUPA inspection by Cheryl Berman, Risk Manager for ProBuild Co. LLC.

RECEIVED MAY 26 2010

Observations/Remarks: (TW)

A) Some treated wood was observed onsite. Be sure to include in your annual employee training that if TW is ever cut onsite and sawdust/cuttings are generated, this should be managed as hazardous waste (ie, properly contained, used, labeled, transported by a registered hauler, manifested, etc.).

B) Ms. Berman stated today that small amounts of used oil is generated onsite and is transported by the employees who service them, back to the facility at 1400 W. 28th St. Be advised that other hazardous wastes should not be self transported nor accumulated at the other facility. If hazardous products/expired are unusable, are spilled and cleaned up, then your facility should obtain an EPA ID number and manage it as hazardous waste through a registered hauler. Notify HMD within 30 days to update your waste inventory if this occurs. A used oil waste stream will be added to your facility inventory by HMD.

This is an annual certification that the Hazardous Materials Business Plan (inventory & site map, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

COUNTY OF SAN DIEGO

SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

PERMIT # 203017

DATE 5/14/10

PAGE 2 OF 2

BUSINESS ADDRESS: Pro Build Co. LLC

ZIP CODE: 92110

C) This business recently changed with another company and changed the name from Dixieline Lumber Company to Pro Build Co. LLC. The permit name will be changed today upon processing of this inspection report. Be sure to submit an updated Hazardous Materials Business Plan (HMBP) with a recertification form within 30 days of changes made. An HMBP was observed onsite today, however it has not yet been updated.

D) Spent Fluorescent tubes were observed to be accumulating onsite. Be sure to accumulate these in a rigid container labeled as "universal waste" with an accumulation start date and properly manage them within 1 year. Keep records (logs/receipts) to prove proper management.

Dear Sir or Madam:

Dixieline Lumber Company merged with a sister company. The new company name is ProBuild Company LLC. We retain the right to do business under the Dixieline Lumber name. Please advise as to what actions are required on our part to document this merger.

Thank you in advance for your time and I hope to hear from you soon.

Very truly yours,

Cheryl Berman

CITY/ZIP San Diego, CA 92110

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Mike Solomon

TITLE: General Manager

### INTRODUCTION:

Change of owner inspection conducted on 5/16/2016 with Mike Solomon, General Manager who gave me permission to conduct the inspection. This site does not generate hazardous waste at this time. They are currently subject to the Hazardous Materials Business Plan requirements due to reportable amounts of propane. The reportable amount is 55 gallons for hazardous liquids and 200 cubic feet for compressed gases. California Environmental Reporting System (CERS) submittals have been accepted.

The following hazardous materials in reportable threshold quantities were observed on-site today:  
 - 106 gallons of propane.

### VIOLATION # 1

1020002 Initial and/or annual employee training not conducted for hazardous materials management and/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4)

Classification: Minor

### Observations:

This facility has the capacity to store reportable amounts of hazardous materials or hazardous waste (55 gal, 500 lbs., or 200 cuft) and failed to maintain records of an adequate employee training program for the size of the facility and the nature of the hazardous materials handled. The training program shall, at a minimum, include methods for safe handling of hazardous materials; procedures for coordination with local emergency response organizations; use of emergency response equipment; and emergency response procedures for a release or threatened release of hazardous materials.

### Corrective Action Due By: 06/15/2016

Within 30 days, implement an employee training plan and send the corrective action form to this department. Observed the employee training on hazardous materials is scheduled for May 2016.

Hi Troy,

A one-time 30 day extension is granted for submitting corrective action documentation for the violations cited on May 1, 2018 at Builders First Source located at 3250 Sports Arena Blvd, San Diego 92110.

Submit corrective action documentation for the violations cited as soon as possible, but no later than June 30, 2018.

I am available most of June, however please note I will be on vacation from June 18 – June 22.

If you have any questions, feel free to contact me via e-mail or at (858) 568-8799.

Sincerely,

Zana Zmily, Environmental Health Specialist

**Subject:** Hazardous Materials Division Inspection

Dear Zana,

It was a pleasure meeting with you last Friday and appreciate all of your guidance and for taking the time to help me and our locations. Per our conversation, I would ask for a 30 day extension to get

our Hazardous Materials Plan implemented and to make all corrections to violations stated in your reports. I have updated the Emergency Contact information for the Sports Arena location in CERS and am currently working with Clean Harbors on profiles for each location for proper storage of hazardous Waste and/or Recycling of materials.

Attached is a "rough draft" of new procedures for relieving "usable" paints, stains and any other products "not" considered hazardous waste (although worded "Hazardous Waste" in attached Power Point). This will be revised. We will also contain all key shavings in a labeled can at each of the key cutting machines. Per our conversation, we will have to have shavings tested for proper handling.

I will be re-activating EPA ID's with the DTSC form 1358 as well as updating the locations Hazardous Chemical Inventory.

As I mentioned, I will be out of town until next Thursday, June 7<sup>th</sup>, but would like to schedule time to meet with you to help me with proper recording of Hazardous Inventory coding in CERS.

Thanks again for working with me and the locations to stay compliant. We all appreciate it very much!

Regards,

Troy Staufenbeil

Dear Ted Teran:

On 05/01/2018, an inspection was conducted at Builders First Source by the County of San Diego Hazardous Materials Division (HMD). Attached is the inspection report, which you should keep for your records, and any corrective action follow-up. If violations were cited during the inspection, the final page entitled Return to Compliance, should be completed, signed and returned to HMD within 30 calendar days.

Please feel free to contact your inspector, or the HMD Desk at [hmdutyeh@sdcounty.ca.gov](mailto:hmdutyeh@sdcounty.ca.gov), or by calling 858-505-6880.

Thank you for your time and compliance.

Respectfully,  
Your County of San Diego Hazardous Materials Division

***Troy Staufenbeil***  
***Regional Safety and Loss Prevention Manager***

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Ted Teran

TITLE: General Manager

### INTRODUCTION:

Today I conducted a routine inspection of Builders First Source to verify compliance with Hazardous Materials Business Plan (HMBP) requirements and hazardous waste generator requirements. This facility is a retail store that sells hardware, tools, lumber, paints, and other building-related materials to contractors and the public and is equipped with a mill works/shop, paint mixing area, and lumber yard. Today's inspection was conducted with facility representatives, Ted Teran, General Manager and Judy Ellias, Inside Hardware Manager.

This facility is subject to Hazardous Materials Business Plan (HMBP) requirements for storing hazardous materials in reportable quantities (55 gallons, 500 pounds, 200 cubic feet) and hazardous waste generator requirements. At the time of inspection, based on comments made by Ted Teran, this facility appears to be a conditionally exempt small quantity generator (CESQG) of hazardous waste.

### I observed the following during today's inspection:

- 22 x 8 gallon cylinders propane spares for the forklifts (18 full/4 empty)
- 1 x 1 gallon container (1/2 full) of stain/tint paint waste

Consent to conduct today's inspection and take photographs was granted by Ted Teran.

### VIOLATION # 1

HMD0152 Failed to report &/or update the required inventory information for hazardous waste(s) generated at the facility in CERS. SDCC 68.904(a)(2)

Classification: Class II

### Observations:

I observed 1 x 1 gallon container (1/2 full) of stain/tint paint waste in the paint mixing area. Per Judy Ellias, the stain/tint paint waste is generated from the paint mixing machine and will be managed as hazardous waste. Stain/tint paint waste was not reported to the Hazardous Materials Division through the California Environmental Reporting System (CERS) at the beginning of today's inspection.

Corrective Action Due By: 05/31/2018

Mark "Yes" on the Business Activities question regarding generation of hazardous waste in CERS, add the facility's EPA ID

number and report stain/tint paint waste in the inventory. Report any other hazardous waste(s) generated at the facility in the inventory in CERS. Within 30 days, provide documentation of corrective action to me at [zanalee.zmily@sdcounty.ca.gov](mailto:zanalee.zmily@sdcounty.ca.gov). You may use the corrective action form located at the end of this report.

For assistance with CERS, either contact me at (858) 568-8799 or our CERS Help Desk at (858) 505-6990.

### VIOLATION # 2

3010002 Failed to obtain &/or maintain an active EPA ID Number. 22 CCR 66262.12(a)

**Classification:** Minor

#### Observations:

This facility generates hazardous waste (stain/tint paint waste) and does not have an active EPA ID number, issued either by the US EPA (US EPA ID Number), or by the Department of Toxic Substances Control (DTSC) (California ID Number). All facilities that generate hazardous waste must obtain and maintain an active ID Number.

Per DTSC's Hazardous Waste Tracking System (HWTS), the facility's EPA ID, CAL000387644, was inactive as of 6/30/2016.

#### Corrective Action Due By: 05/31/2018

Re-activate the facility's EPA ID number by submitting DTSC Form 1358 to DTSC. Ensure the EPA ID number is re-activated by checking the HWTS at [hwts.dtsc.ca.gov](http://hwts.dtsc.ca.gov). Within 30 days, provide documentation of corrective action to me at [zanalee.zmily@sdcounty.ca.gov](mailto:zanalee.zmily@sdcounty.ca.gov). You may use the corrective action form located at the end of this report.

### VIOLATION # 3

HMD1005 Emergency contact not provided or current in CERS. HSC 25508.1(f); SDCC 68.904(b)

**Classification:** Minor

#### Observations:

The primary emergency contact reported in the Facility Information in CERS (last submitted on 2/24/2018) is Mike Soloman. Per Ted Teran, Mike Soloman has not worked at this location for approximately seven (7) months and is now the general manager for a different Builders First Source store.

#### Corrective Action Due By: 05/31/2018

Update the primary emergency contact in CERS and re-submit for review. Within 30 days, provide documentation of corrective action to me at [zanalee.zmily@sdcounty.ca.gov](mailto:zanalee.zmily@sdcounty.ca.gov). You may use the corrective action form located at the end of this report.

For assistance with CERS, either contact me at (858) 568-8799 or our CERS Help Desk at (858) 505-6990.

### INSPECTION REMARKS:

The following minor violation was corrected on-site during the inspection: I observed 1 x 1 gallon container of stain/tint paint waste in the paint mixing area. Per Judy Ellias, the stain/tint paint waste will be managed as hazardous waste. The container was not properly labeled as hazardous waste. During the inspection, a hazardous waste label was provided, completed and affixed to the container. **Be advised, containers storing hazardous waste must be labeled with the following: The words "Hazardous Waste", the name and address of the generator, the composition and physical state of the waste, the hazardous properties of the waste, and the accumulation start date.**

I observed a five gallon container for paint contaminated rags in the paint mixing area and 1 x 5 gallon container for oily rags in the mill works shop. Ted Teran stated he is unsure of how the contaminated rags are currently being managed.

I observed a 5 gallon container of new oil in the mill works shop. Per Ted Teran, the oil is for the pipe threader and the oil may be changed approximately every six (6) months. However, per Ted Teran, he is unsure of how the used oil is currently being managed.

I observed sand beneath the pipe threader in the event of an oil spill/release. Per Ted Teran, oil contaminated sand will be managed as hazardous waste, but he is unsure of how it is currently being managed.

Within 30 days, provide a written statement to me at [zanalee.zmily@sdcounty.ca.gov](mailto:zanalee.zmily@sdcounty.ca.gov) as to how the contaminated rags, used oil and saturated absorbent and any other potentially hazardous waste(s) (i.e. waste caulking, non-empty aerosols, etc.) are being managed, who they are being transported by and where they are being disposed of.

I observed an open plastic container storing tint in the paint mixing area. Per Judy Ellias, a few drops of tint are purged from the paint mixing machine daily and the purged tint is mixed into "Oops Paint"/mis-tinted paints and sold at a discounted price.

Be advised, the facility is required to conduct a waste determination at the point of generation for all waste(s) generated and to properly manage the waste(s) accordingly.

No hazardous waste manifests were available for inspection. Per Ted Teran, to the best of his knowledge, the facility has not had any disposals of hazardous waste within the last three (3) years. Be advised, the facility must maintain uniform hazardous waste manifests, consolidated manifests and bills of lading available for inspection for three (3) years.

This facility's Hazardous Materials Business Plan (HMBP) was last submitted through the California Environmental Reporting System (CERS) on 2/24/2018, but will be "Not Accepted" until the CERS corrections are made (*see violations #1 and #3*). Be advised, the facility's HMBP must be re-certified/re-submitted at least annually and within 30 days of significant changes.

The site map submitted in CERS on 2/24/2018 is missing the locations of emergency response equipment stored on-site. **Within 30 days, update the site map to include the locations of emergency response equipment stored on-site (including fire extinguishers, spill kits, etc.) and re-submit for review.**

HMBP employee training records were available and reviewed. Fire extinguisher/evacuation procedure trainings were last conducted on 2/23/2018 and hazard communication training was last conducted on 3/27/2018. Ensure initial and annual HMBP employee trainings are conducted/documented and maintain training documentation available for inspection for three (3) years. An HMBP employee training documentation template was provided.

The facility has a natural gas powered electric back up generator. Per Ted Teran, forklift maintenance is conducted either by Hawthorne or Toyota, depending on the forklift.

**\*\*\*Be advised, the facility's Unified Program Facility Permit expires on 5/31/18. Pay all applicable fees to the Hazardous Materials Division prior to the expiration date.\*\*\***

Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. Incorporated provisions of Title 40 of the Code of Federal Regulations (CFR) are noted for reference. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions. HMBP = Hazardous Materials Business Plan; CUPA = Certified Unified Program Agency; CERS = California Environmental Reporting System; SQG = Small Quantity Hazardous Waste Generator; LQG = Large Quantity Hazardous Waste Generator

### HAZARDOUS MATERIALS REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 1010001	Failed to establish and implement a HMBP. HSC 25505(a) and 25507(a)
<input type="checkbox"/> 1010002	HMBP not submitted to the CUPA in CERS. HSC 25508(a)(1)(A); 27 CCR 15188(a),(b),(d)
<input type="checkbox"/> 1010003	Business Activities &/or Business Owner/Operator page not completed in CERS. 19 CCR 2652(a)(1); SDCC 68.904(b); HSC 25508(a)(1)(A)
<input type="checkbox"/> 1010004	Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25507(a); 25508.1(a-b); 19 CCR 2654 (a) or (d)
<input type="checkbox"/> 1010005	Site map not submitted in CERS or not sufficient. HSC 25505(a)(2); 25508.1(f); 19 CCR 2652(a)(3)
<input type="checkbox"/> 1010006	Failed to update HMBP in CERS within 30 days of a substantial change to any portion of the HMBP, including inventory changes or facility information. HSC 25508.1(a-f); 19 CCR 2654(d); SDCC 68.904(c)(6)
<input type="checkbox"/> 1010008	HMBP not certified annually as complete and accurate in CERS. HSC 25508(a)(1)(A), 25508.2, 19 CCR 2654(b)
<input type="checkbox"/> 1010010	Emergency response plan and procedures to mitigate a release or threatened release not adequate, not established or not submitted in CERS. HSC 25505(a)(3), 25508(a)(1)(A); 19 CCR 2658
<input type="checkbox"/> 1010011	Failure to notify property owner in writing that the business is subject to the HMBP program. HSC 25505.1
<input type="checkbox"/> 1010012	Failure to provide a copy of HMBP to the property owner within five working days upon request from property owner. HSC 25505.1
<input type="checkbox"/> 1010014	Failure to submit emergency response plan in CERS, when not meeting agricultural handler exemption. HSC 25507.1(a) and 25508(a)(1)(A); 19 CCR 2670, 2671
<input type="checkbox"/> 1010015	Failure to submit employee training plan in CERS, when not meeting agricultural handler exemption. HSC 25507.1(a) and 25508(a)(1)(A)
<input type="checkbox"/> 1010016	HMBP not established or submitted in CERS, when not meeting the remote site exemption. HSC 25507.2 and 25508(a)(1)(A)
<input type="checkbox"/> 1020001	Employee training and/or plan for safety procedures in the event of a release or threatened release of a hazardous material not adequate, not established or not submitted in CERS. HSC 25505(a)(4) and 25508(a)(1)(A); 19 CCR 2659(a)
<input type="checkbox"/> 1020002	Initial &/or annual employee training not conducted in safety procedures for a hazardous material release or threatened release &/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4); 19 CCR 2659(b)
<input type="checkbox"/> 1040001	Hazardous materials release or threatened release not immediately reported to the CUPA and OES upon discovery. HSC 25510(a); 19 CCR 2631(a)
<input type="checkbox"/> HMD1001	Unified Program Facility permit not obtained for hazardous materials. SDCC 68.905; 68.906, 68.907
3 <input checked="" type="checkbox"/> HMD1005	Emergency contact not provided or current in CERS. HSC 25508.1(f); SDCC 68.904(b)
<input type="checkbox"/> HMD1007	Highly toxic gas (TLV<10 ppm) not disclosed in CERS. SDCC 68.1113(a)
<input type="checkbox"/> HMD1008	Annual carcinogen/reproductive toxin list not submitted in CERS. SDCC 68.1113(b)
<input type="checkbox"/> 1010017	HMBP not readily available to facility personnel or the CUPA. HSC 25505(c)

### HAZARDOUS WASTE REQUIREMENTS FOR SQGS ONLY

#	VIOLATION DESCRIPTION
<input type="checkbox"/> HMD0226	Did not accumulate waste in a container or tank. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2)
<input type="checkbox"/> 3030007	Failed to properly label/date hazardous waste container &/or tank. 22 CCR 66262.34(f)
<input type="checkbox"/> 3030010	Accumulated waste too long (>180 or 270 days) or (>90 days). HSC 25201(a), 25123.3(h)(1); 22 CCR 66262.34(d); 40 CFR 262.34(e) and/or (f)
<input type="checkbox"/> 3030013	Failed to accumulate hazardous waste in a container that is in good condition. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.171
<input type="checkbox"/> 3030015	Failed to accumulate or store hazardous waste in a lined &/or compatible container. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.172
<input type="checkbox"/> 3030017	Failed to properly close hazardous waste container(s). 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.173
<input type="checkbox"/> 3030019	Failed to inspect hazardous waste storage area at least weekly. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.174
<input type="checkbox"/> 3030022	Failed to properly separate incompatible waste. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.177
<input type="checkbox"/> 3030030	Failed to maintain &/or operate facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(4), 265.31
<input type="checkbox"/> 3030036	Failed to maintain adequate aisle space. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(4), 265.35
<input type="checkbox"/> 3010022	Failed to post, next to the telephone, emergency information containing the location of emergency equipment, contact names and phone numbers. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(5)(ii)
<input type="checkbox"/> 3020001	Failure to ensure employees are thoroughly familiar with proper waste handling and emergency procedures during normal facility operations and emergencies. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(5)(iii)
<input type="checkbox"/> 3030032	Failed to maintain the following emergency response equipment or equivalent: 1) An internal communication or alarm system; 2) A communication device, such as a telephone; 3) Portable fire extinguishers, fire/spill control equipment and decontamination equipment; and 4) Water at adequate volume and pressure. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(4), 265.32
<input type="checkbox"/> 3030039	Failed to have an emergency coordinator on the premises or on call, and available during an emergency. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(5)(i)
<input type="checkbox"/> HMD0412	Failed to implement and/or coordinate emergency response measures during an emergency, spill/release. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(5)(iv)

### HAZARDOUS WASTE TANK SYSTEMS FOR SQGS ONLY

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3030024	Failed to operate uncovered tank to ensure at least 2 ft. of freeboard to prevent overtopping, unless the tank is equipped with a containment structure, a drainage control system, or a diversion structure with a capacity that equals or exceeds the volume of the top 2 ft. of the tank. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(c)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 05/01/2018 PAGE 8 OF 9  
 RECORD ID #: DEH2004-HUPFP-203017

### Hazardous Materials and Hazardous Waste (continued)

- 3030025 Failed to provide an overfill protection device on continuously fed hazardous waste tank(s). 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(4)
- 3030027 Failed to conduct daily tank inspection of discharge control system, monitoring equipment and waste level. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(1-3), 262.34(d)(3)
- 3030028 Failed to conduct weekly hazardous waste tank inspection(s) to detect signs of leakage and ensure that the construction materials, fixtures and surrounding areas of the tank are in good condition. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(4 & 5), 262.34(d)(3)
- 3050007 Failed to properly remove all waste upon closure, decontaminate, and document the closure of a hazardous waste tank system. 22 CCR 67383.3; 40 CFR 262.34(d)(3), 265.201(f)
- HMD1612 Hazardous waste improperly stored in a tank system causing leaks, corrosion, or failure. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)
- HMD1614 Failed to pre-notify the CUPA in writing prior to closing a hazardous waste tank system. 22 CCR 67383.3(a)(1)
- HMD1615 Failed to properly accumulate ignitable or reactive waste in a tank system. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(g)

### HAZARDOUS WASTE REQUIREMENTS FOR SQGS AND LOGS

#### RECORD KEEPING/OPERATIONAL REQUIREMENTS

- | #   | <u>VIOLATION DESCRIPTION</u>   |

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: Builders First Source  
 ADDRESS: 3250 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 05/07/2021 PAGE 1 OF 5  
 RECORD ID #: DEH2004-HUPFP-203017  
 TIME START: 11:45 AM END: 1:45 PM  
 SPECIALIST: Mike Burke  
 INSPECTION CONTACT: Judith Elias  
 TITLE: Inside Sales Manager  
 PHONE: 619-224-4161  
 E-MAIL: judith.elias@dixieline.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Judith Elias

TITLE: Inside Sales Manager

**INTRODUCTION:**

Routine Inspection

Inspection conducted for hazardous materials/waste on 5/7/2021 with Judith Elias, Inside Sales Manager who gave me permission to conduct the inspection. This site is a small quantity generator of hazardous waste at this time. They are currently subject to the Hazardous Materials Business Plan requirements due to reportable amounts of propane. The reportable amount is 55 gallons for hazardous liquids, 500 pounds of hazardous solids and 200 cubic feet for compressed gases. California Environmental Reporting System (CERS) submittals have been accepted on 3/11/2021.

The following hazardous materials in reportable threshold quantities were observed on-site today:

- 184 gallons of propane.

**VIOLATION # 1**

3030007 Failed to properly label/date hazardous waste container &/or tank. 22 CCR 66262.34(f)

Classification: Minor

**Observations:**

Observed 38 x 5 gallon buckets that were not properly labeled as hazardous waste. The containers were missing the generator and accumulation start date information. Hazardous waste containers must be labeled with the following: The words "Hazardous Waste", the name and address of the generator, the composition and physical state of the waste, the hazardous properties of the waste, and the accumulation start date.

Corrective Action Due By: 06/06/2021

Immediately begin labeling the containers with the required labeling. Within 30 days, submit documentation to the HMD that this violation was corrected. Send the corrective action form to this department within 30 days.

**VIOLATION # 2**

3030010 Accumulated waste too long (>180 or 270 days) or (>90 days). HSC 25201(a), 25123.3(h)(1); 22 CCR 66262.34 (b), 66262.34(d); 40 CFR 262.34(e) and/or (f)

Classification: Class II

**Observations:**

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 05/07/2021 PAGE 2 OF 5  
RECORD ID #: DEH2004-HUPFP-203017

This facility was observed to be storing hazardous waste in exceedance of hazardous waste generator requirements. Observed 38 x 5 gallon buckets of hazardous waste stored on site. Judith Elias, Inside Sales Manager stated that she has not disposed of hazardous waste in the last 3 years.

### Corrective Action Due By: 06/06/2021

Dispose of the hazardous waste properly within 30 days with a registered hazardous waste hauler. Send a copy of the disposal manifest and the corrective action form to this department within 30 days.

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 05/07/2021 PAGE 5 OF 5  
 RECORD ID #: DEH2004-HUPFP-203017

### Hazardous Materials and Hazardous Waste (continued)

- 3030058 Failed to mark date on empty container larger than 5 gallons &/or manage it within one year. 22 CCR 66261.7(f)
- 3030060 Failure of the owner or operator managing laboratory hazardous waste in a laboratory accumulation area to comply with the accumulation, storage, management, training, and/or record-keeping requirements. HSC 25200.3.1(b) and/or (c)

### UNIVERSAL WASTE HANDLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010004	Failed to obtain a California ID Number from DTSC or federal ID Number from USEPA prior to accumulating 5,000 kgs or more of Universal Waste. 22 CCR 66273.32(a-b)
<input type="checkbox"/> HMD0151	Failed to maintain universal waste handler training records for 3 years. 22 CCR 66273.36(c),(d)
<input type="checkbox"/> 3020003	Failed to properly train handlers of universal waste in universal waste management and response procedures. 22 CCR 66273.36(a),(b)
<input type="checkbox"/> 3030008	Failed to properly label or mark Universal Waste container, package, or pallet (excluding CESQUWG) 22 CCR 66273.34
<input type="checkbox"/> 3030011	Failed to properly dispose of Universal Waste within one year. 22 CCR 66273.35(a) &/or (b)
<input type="checkbox"/> HMD0147	Failed to keep records of offsite Universal Waste shipment(s) available for inspection for 3 years. 22 CCR 66273.39(c),(d)(2)
<input type="checkbox"/> 3030051	Failed to meet accumulation, labeling, marking, &/or containment standards for Universal Waste aerosol containers. HSC 25201.16(f)
<input type="checkbox"/> 3040004	Failed to manage universal waste in a manner to prevent release(s) to the environment. 22 CCR 66273.33; 66273.33.5
<input type="checkbox"/> HMD0307	Disposal of universal waste (UW) to an unauthorized point. HSC 25189.5(a); 22 CCR 66273.31(a), 66273.8(b)
<input type="checkbox"/> 3010005	Failure of a universal handler of electronic devices or CRTs from an offsite source to notify DTSC 30 days prior to acceptance. 22 CCR 66273.32(c)
<input type="checkbox"/> 3010020	Failure of a universal waste handler to submit an annual report that includes all required information to DTSC by February 1 of every year . 22 CCR 66273.32(d)
<input type="checkbox"/> 3010006	Failure of the universal waste handler who sends electronic devices or CRTs to any foreign destination to notify DTSC 60 days prior to export and send a copy to the CUPA. 22 CCR 66273.40(a)(3)

### CERTIFIED APPLIANCE RECYCLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010033	Failure to obtain Certified Appliance Recycler certification (CAR) from DTSC. HSC 25211.4
<input type="checkbox"/> 3010034	Failure of certified appliance recycler (CAR) to provide documentation that all materials that require special handling (MRSH) have been properly removed and managed. HSC 25211.2, 25211.3
<input type="checkbox"/> 3030055	Failure of certified appliance recycler (CAR) to properly remove and dispose of all materials that require special handling (MRSH). HSC 25211.3, 25212 (a), (b), and/or (c)

## COMPLIANCE INSPECTION REPORT

FACILITY NAME: ARCO AM/PM NO. 82096  
 ADDRESS: 3500 SPORTS ARENA BLVD  
 CITY/ZIP: SAN DIEGO /92110

INSPECTION DATE: 06/08/2016 PAGE 1 OF 8  
 RECORD ID #: DEH2003-HUPFP-201381  
 TIME START: 12:30 PM END: 5:00 PM  
 SPECIALIST: Michael Kiener  
 INSPECTION CONTACT: Sridhar Namburi  
 TITLE: President  
 PHONE: 858 699 8455  
 E-MAIL: srimharim@yahoo.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Chara Poe

TITLE: Manager

### INTRODUCTION:

Facility is a fueling station with 3 underground storage tanks (UST) and associated hazardous wastes.

### VIOLATION # 1

1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25506; 25507; and 25508(a)(1)(A)

Classification: Minor

### Observations:

Facility failed to disclose generation and storage of hazardous waste (solids contaminated with fuels). Hazardous waste storage area contained two 55 gallon open head steel drums. One of which contained fuel filters, pump hoses and other solids. This inventory item was not disclosed in CERS inventory element.

Corrective Action Due By: 07/08/2016

Submit complete and accurate information on all hazardous wastes and material through the CERS system on or before corrective action date above.

### VIOLATION # 2

2010007 Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance. HSC 25292.2, 25299.30-25299.34; 23 CCR 2711; 2808.1, 2809-2809.2

Underground Storage Tanks: 31518,31517,31516

Classification: Minor

### Observations:

Current CFO letter not submitted via CERS. CFO letter must be reviewed and submitted via CERS annually.

Corrective Action Due By: 07/08/2016

Submit current and accurate documentation on or before above corrective action due date.

### VIOLATION # 3

3030007 Failed to properly label/date hazardous waste container and/or tank. 22 CCR 66262.34(f)

**Classification:** Minor

**Observations:**

Neither hazardous waste container was labeled upon arrival.

**Corrective Action Completed During Inspection:**

Both drums labeled by technicians during inspection.

**INSPECTION REMARKS:**

Monitoring elements tested and certified; fail safe/sensor out, 14 liquid sensors (208), 2 annular sensors (301), 3 ATGs with A/V alarms, 4 spill buckets and 2 electronic line leak detectors.

CERS has never obtained complete in acceptance and requires updates and corrections. SEE VIOLATIONS ABOVE. During inspection data previously provided via CERS were reviewed and numerous inaccuracies were observed pertaining to UST system construction and elements. Ensure all information submitted via CERS is accurate to avoid further violations and possible enforcement actions.

Facility UST operating permit expires on 12-9-2017.

Secondary containment due on or before 7-14-2018.

## COMPLIANCE INSPECTION REPORT

### Underground Storage Tank (UST) Program

INSPECTION DATE: 06/08/2016  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 6 OF 8

*VIOLATION REPORT: Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.*

#### GENERAL PROGRAM REQUIREMENTS

##### UST System – File Records

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 2030064 Failure to notify CUPA 48 hours prior to testing. 23 CCR 2637(f), 2638(e), 2643(g), 2644.1(a)(4)   |
| <input type="checkbox"/> | 2030021 Failure to obtain and maintain a valid operation permit from the CUPA. HSC 25284; 23 CCR 2712(i)   |
| <input type="checkbox"/> | 2030039 Failure to comply with one or more of the operating permit conditions. 23 CCR 2712; HSC 25299  |
| <input type="checkbox"/> | 2060001 Failure to submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application. 23 CCR 2635(c)(8), 2711(a)(8)  |
| <input type="checkbox"/> | 2010010 Failure to prepare, maintain, and submit accurate CUPA UST Operating Permit Application for Facility information and/or Tank information. HSC 25286(a); 23 CCR 2711  |

## COMPLIANCE INSPECTION REPORT

### UST PROGRAM (continued)

#### UST Tank (DW/SW) Requirements

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030001 | (RD) Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions. 23 CCR 2632, 2634  |
| <input type="checkbox"/> 2030059 | Failure to maintain UST system in accordance with exclusion/exemption status. HSC 25281.6, 25283.5  |
| <input type="checkbox"/> 2060003 | Failure to inspect at the installation site using an electric resistance holiday detector and repair if necessary before installation. 23 CCR 2635(a)(2)(B)   |
| <input type="checkbox"/> 2060005 | Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment. HSC 29291(b)  |
| <input type="checkbox"/> 2060006 | Failure of secondary containment piping to slope back to the collection sump. 23 CCR 2636   |
| <input type="checkbox"/> 2060007 | Failure of non-integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry core or engineering standard. 23 CCR 2631(d)   |
| <input type="checkbox"/> 2060010 | (RD) Failure of the UST storing a hazardous substance to have secondary containment. HSC 25291  |
| <input type="checkbox"/> 2060019 | Failure of the spill bucket to have a minimum capacity of five gallons. 23 CCR 2635(b), 2665  |
| <input type="checkbox"/> 2030007 | Failure to submit and maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(j)  |
| <input type="checkbox"/> 2030036 | (RP) Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity; and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 23 CCR 2635(b)(2), 2665 |
| <input type="checkbox"/> 2060020 | (RP) Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion. 23 CCR 2635(b), 2665   |
| <input type="checkbox"/> 2030008 | Failure to maintain under dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. HSC 25290.1, 25290.2, 25291  |
| <input type="checkbox"/> 2060015 | (RD) Failure of sensor to be located in the proper position/location. 23 CCR 2630(d), 2641(a)   |
| <input type="checkbox"/> 2030016 | (RD) Failure to continuously monitor the interstitial space of the tank, piping and/or sumps such that the leak detection activates an audible/visual alarm when a leak is detected. 23 CCR 2631(g), 2632(c)(2)(A)&(B), 2633(c), 2636(f)  |
| <input type="checkbox"/> 2030017 | Failure to maintain all product piping outside the dispenser to be fail-safe & shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment. 23 CCR 2636(f)(5)  |
| <input type="checkbox"/> 2030019 | Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> 2030022 | Failure to conduct groundwater and/or vadose zone monitoring as required. 23 CCR 2647, 2648   |
| <input type="checkbox"/> 2030028 | Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. 23 CCR 2663  |
| <input type="checkbox"/> 2030029 | (RP) Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. 23 CCR 2663   |
| <input type="checkbox"/> 2060024 | UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1   |
| <input type="checkbox"/> 2030040 | (RD) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)  |

#### UST Tank (DW/SW) Requirements (continued)

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030060 | Failure to maintain entry fitting such that it properly seals to the containment. 23 CCR 2630, 2635(d), 2636(c), 2666  |
| <input type="checkbox"/> 2030055 | Failure to test the spill bucket annually. HSC 25284.2   |
| <input type="checkbox"/> 2060022 | Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d) |
| <input type="checkbox"/> 2030065 | (RD) Failure to maintain the interstitial space under constant vacuum, pressure, or hydrostatic such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment. (Product Tight) HSC 25290.1(e)   |
| <input type="checkbox"/> 2060023 | Failure of a UST system installed on or after July 1, 2004 to be designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d)   |

#### UST Tank (SW) Requirements

- |                                  |  |
|----------------------------------|--|
| <input type="checkbox"/> 2030005 | (RD) Option 1: Failure to conduct the 0.2 gallon per hour continuous in tank leak detection test. 23 CCR 2643(b)(5)  |
| <input type="checkbox"/> 2030006 | (RD) Option 1: Failure to conduct the monthly 0.2 gallon per hour automatic tank gauging test on a single wall tank and/or failure of the automatic tank gauge to generate and print a hard copy of the monthly 0.2 gallons per hour test. 23 CCR 2643(b)(1)   |
| <input type="checkbox"/> 2030056 | Option 2: Failure to submit the annual statistical inventory reconciliation (SIR) Report to the CUPA. 23 CCR 2646.1(j)   |
| <input type="checkbox"/> 2030057 | (RD) Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)                    |
| <input type="checkbox"/> 2030058 | (RD) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated monthly, capable of detecting a 0.2 gallon per hour release, conduct a tank integrity test every two years, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. CCR 2646.1 |
| <input type="checkbox"/> 2030030 | (RD) Option 3: Weekly gauging not being performed in according to the required specifications. 23 CCR 2645   |
| <input type="checkbox"/> 2030004 | (RD) Option 4: Failure of the automatic tank gauge to test the tank at least once per month when the product level in the tank is at least three feet and shall be capable of detecting a release of 0.1 gallons per hour. 23 CCR 2643(b)(2)   |

## COMPLIANCE INSPECTION REPORT

### UST PROGRAM (continued)

#### UST Pressurized Piping (DW) Requirements

- | #                        | <u>VIOLATION DESCRIPTION</u>  |
|--------------------------|---|
| <input type="checkbox"/> | 2030018 (RD) Failure of the double wall pressurized piping in the turbine sump to be continuously monitored with a system that activates an audible and visual alarm or restricts or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> | 2030025 (RD) Failure of the pressurized piping to meet one or more of the following requirements: monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour, and will restrict the flow or product through the piping or trigger an alarm when a release occurs. 23 CCR 2636(f)(2) |
| <input type="checkbox"/> | 2030026 Failure of line leak detector to detect a leak and/or failure of audible and visual alarm. 23 CCR 2636(f)(2)  |
| <input type="checkbox"/> | 2060014 Failure to install leak detection equipment correct for the type of system. HSC 25290.1; 23 CCR 2638  |
| <input type="checkbox"/> | 2060012 (RD) Failure to install line leak detector on pressurized piping system. HSC 25290.1(h), 25290.2(g), 25291(f), 2529   |
| <input type="checkbox"/> | 2030042 (RD) Option 1: Failure to perform and/or pass the annual line integrity test for pressurized piping that does not utilize fail safe or shut down. 23 CCR 2636(f)(4)   |
| <input type="checkbox"/> | 2030020 (RD) Option 3: Failure to conduct daily visual inspections each time the tank is operated, but not less than monthly, and maintain a log of inspection results for review of the CUPA. HSC 25281.5(b)(3)  |

#### UST Pressurized Piping (SW) Requirements

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2060018 (RP) Failure to demonstrate that existing single wall pressurized pipe containing motor vehicle fuel is constructed of glass fiber reinforced plastic, cathodically protected steel, or steel clad with glass reinforced plastic. HSC 25292(e)(2); 23 CCR 2666(b)   |
| <input type="checkbox"/> | 2030027 (RD) Failure of pump shut down when a leak is detected or when line leak detector is disconnected. 23 CCR 2666(c)   |
| <input type="checkbox"/> | 2060017 Failure to install an automatic line leak detector capable of shutting off the pump when a release occurs, fails, or is disconnected. 23 CCR 2666(c)  |
| <input type="checkbox"/> | 2030052 (RD) Option 3: Failure to monitor pressurized pipe containing motor vehicle fuel at least hourly at any pressure and either perform 0.2 gallon per hour monthly line integrity test or perform 0.1 gallon per hour annual line integrity test. 23 CCR 2641(a), 2643   |
| <input type="checkbox"/> | 2030053 (RD) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b) |

#### UST Piping (SW) Requirements – Conventional Suction

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030050 (RD) Failure to conduct 0.1 gallon per hour piping integrity test every three years. 23 CCR 2643(d) |
| <input type="checkbox"/> | 2030049 Failure to conduct daily monitoring for air in the pipe and log results. 23 CCR 2643(d)             |

#### UST Piping (SW) Requirements – Gravity

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030051 Failure to conduct piping integrity test or overflow integrity test every two years. 23 CCR 2643(e) |
|--------------------------|---|

HM-928 UST (02-15)

#### UST System – Cathodic Protection Requirements

- | #                        | <u>VIOLATION DESCRIPTION</u>   |
|--------------------------|--|
| <input type="checkbox"/> | 2030009 (RP) Failure to inspect the impressed-current system every 60 calendar days and/or failure to have corrosion protection equipment turned on and functioning properly and/or failure to inspect the impressed-current system within six months of installation and at least every three years thereafter and/or failure to test sacrificial anodes once every three years in accordance with the manufacturer's instructions. 23 CCR 2635 |
| <input type="checkbox"/> | 2060004 (RP) Failure to install corrosion protection for USTs and/or failure of the field-installed cathodic protection system to meet the consensus standards. 23 CCR 2635(a)(2)(A)   |

#### UST System – Closure

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030063 (RD) Failure to comply with temporary closure requirements. HSC 25298; 23 CCR 2670, 2671  |
| <input type="checkbox"/> | 2030038 UST system was abandoned or not properly closed, or failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670, 2672 |

 E-MAIL: sriharim@yahoo.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Chana Poe

TITLE: Manager

### INTRODUCTION:

The purpose of this reinspection was to determine the level of compliance of the facility after violations were issued at their last inspection. The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, the HMD implements the Unified Program in the County and regulates businesses that manage hazardous materials, hazardous wastes, aboveground petroleum storage tanks, and underground storage tanks (UST). Additional information on the CUPA program can be found here: [http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html).

Ms. Chana Poe, Store manager, gave consent for inspection, documents review, photographs, and copying as needed. The scope of this inspection included a walk through of the facility to determine correct amounts and locations of hazardous wastes and materials. Mr. Lemont Preston (Detail Manager) accompanied Ms. Poe and I on the walk through

### VIOLATION # 1

1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25506; 25507; and 25508(a)(1)(A)

Classification: Class II

### Observations:

Inventory continues to be inaccurately disclosed in CERS. Waste solids are reported as; Average = 5 pounds, Max = 10 pounds and Largest container = 10 pounds. The one 55 gallon steel drum observed and photographed at last inspection should be reported as Average = 220 pounds, Max = 440 pounds and Largest container as 440 pounds (based on an average weight of 4 pounds of weight per one gallon unit of volume). Water and fuel mixture was reported as 110 gallons and was observed at a maximum and largest container size of 55 gallons. No wax was observed in reportable quantities but one 55 gallon poly drum of soap was observed in the carwash equipment room. VIOLATION ELEVATED FROM MINOR TO CLASS II DUE TO CONTINUED NON-COMPLIANCE.

Corrective Action Due By: 11/11/2016

Use information provided above to make corrections to CERS and resubmit for review.

### VIOLATION # 2

1010005 Site map not submitted in CERS or not sufficient. HSC 25505(a)(2) and 25508(a)(1)(A)

Classification: Minor

### Observations:

Site map does not annotate both waste streams in storage adjacent to dumpster or provide hazard category information for material.

ADD STANDARD COMMENTS

### Corrective Action Due By: 11/11/2016

Update and upload to CERS for submission and review a site map that annotates all reportable materials and wastes using the correct annotations and two letter code to indicate hazard category.

ADD STANDARD COMMENTS

### INSPECTION REMARKS:

CERS reporting errors continued to be observed during walk through.

"Kitty litter" reported by Mr. Vidakovich was observed in a small container in the storeroom at entrance to walk in. The absorbent was incorrectly disclosed as a waste. Per Ms. Poe the container was full of material to be used for future spills and was not labeled as a hazardous waste. Non-hazardous materials and hazardous material below reporting thresholds do not need to be reported.

In the storage area adjacent to the dumpster, two 55 gallon steel drums were observed. Both were labeled as hazardous waste, one as solids and the other as liquid. Both drums contents were checked and found to agree with labeling. Labeling was fading and it is recommended that labels be checked for completeness and legibility.

In the car wash equipment room only one material was found in a reportable volume. One 55 gallon poly drum was observed with a red liquid. Mr. Preston stated the drum contained soap. All other detergents and waxes were observed in 15 gallon containers with no more than 2 containers of any one material.

 E-MAIL: sriharim@yahoo.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Srihari Mapparaju

TITLE: Chairman

### INTRODUCTION:

This was a routine annual compliance inspection for underground storage tanks, hazardous materials and hazardous waste. The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, the HMD implements the Unified Program in the County and regulates businesses that manage hazardous materials, hazardous wastes, aboveground petroleum storage tanks, and underground storage tanks (UST). Additional information on the CUPA program can be found here: [http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html).

Mr. Mapparaju, chairman, gave consent for inspection, documents review, photographs, and copying as needed. The scope of this inspection included witnessing annual UST monitoring system certification performed by Jesse Kirk III with PCET (ICC# 5317304 Exp. 07/07/2017), hazardous waste generation and hazardous materials business plan (HMBP).

Sports Arena Fuel Inc is a retail gas with three (3) underground storage tanks (1 split with 2 compartments) and generates fuel contaminated solids and water/fuel as their hazardous wastes. In addition to the fuel being stored in the USTs, other disclosable hazardous materials include car wash detergents.

### VIOLATION # 1

2030008 Failure to maintain under dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. HSC 25290.1, 25290.2, 25291

Underground Storage Tanks: 31516,31518

Classification: Class II

### Observations:

Liquid found in both 87 STP sumps. Main with liquid on opposite side of tank form sensor, sufficient to trigger alarm. Auxillary with water on sensor side insufficient to trigger alarm. Liquid was also found on opposite of 91 fill sensor in volumes sufficient to trigger alarm.

### Corrective Action Completed During Inspection:

All liquid removed during inspection. Ensure all liquid is removed when clearing an alarm not just the liquid on the sensor side.

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: **06/08/2017** PAGE **2** OF **7**  
RECORD ID #: **DEH2003-HUPFP-201381**

### INSPECTION REMARKS:

Monitoring elements tested and certified: failsafe/sensor out, 14 liquid sensors (208), 2 annular sensors (301), 3 automatic tank gauges (ATG) with A/V alarms, 2 electronic line leak detector and 4 spill buckets. System software operating during this inspection was 323.03.

UST operating permit valid through 12/9/2017.

Secondary containment testing (SCT) due on or before 7/14/2018.

All CERS elements accepted next annual review and certification due on or before 8/25/2017. Corrections to tank construction needed. Vent and vapor lines are double walled fiberglass and UDC sensors do not shut down dispensers. Ensure all documents are up to date and do not include superfluous information or are represented as County of San Diego documents. Failure to do so will result in violation class elevation and possible enforcement action.

EPA ID valid per website and BOE number provided by facility.

Compliance binder and monthly DO reports available and reviewed.

Both waste drums full and to be disposed of within 30 days. Maintain manifest on site for review during inspections.

## COMPLIANCE INSPECTION REPORT Handlers of Hazardous Materials and Small and Large Quantity Generators of Hazardous Waste

INSPECTION DATE: 06/08/2017  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 3 OF 7

FACILITY NAME: \* Sports Arena Fuel Inc

ADDRESS: \* 3500 SPORTS ARENA BLVD

CITY/ZIP: \* SAN DIEGO

92110

Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. Incorporated provisions of Title 40 of the Code of Federal Regulations (CFR) are noted for reference. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions. HMBP = Hazardous Materials Business Plan; CUPA = Certified Unified Program Agency; CERS = California Environmental Reporting System; SQG = Small Quantity Hazardous Waste Generator; LQG = Large Quantity Hazardous Waste Generator

### Hazardous Materials Requirements

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 1010001 HMBP not established/ implemented. HSC 25505(a) and 25507(a)   |
| <input type="checkbox"/> | 1010002 HMBP not submitted to the CUPA in CERS. HSC 25508(a)(1)(A); HSC 25404(e)(4); 27 CCR 15188(a), (d)  |
| <input type="checkbox"/> | 1010003 Business Activities and/or Business Owner/Operator Identification not completed in CERS. 19 CCR 2729.2(a)(1); HSC 25404(e)(4)  |
| <input type="checkbox"/> | 1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25506; 25507; and 25508(a)(1)(A)  |
| <input type="checkbox"/> | 1010005 Site map not submitted in CERS or not sufficient. HSC 25505(a)(2) and 25508(a)(1)(A)   |
| <input type="checkbox"/> | 1010006 HMBP not updated to reflect inventory changes or facility information. HSC 25508.1(a-e)  |
| <input type="checkbox"/> | 1010007 HMBP not updated to reflect substantial change to the handler's operations. HSC 25508.1(f)   |
| <input type="checkbox"/> | 1010008 HMBP not certified annually as complete and accurate in CERS. HSC 25508.2  |
| <input type="checkbox"/> | 1010010 Emergency response procedures to mitigate a release or threatened release not adequate, not established or not submitted in CERS. HSC 25505(a)(3) and 25508(a)(1)(A)                   |
| <input type="checkbox"/> | 1010011 Failure to notify property owner in writing that the business is subject to the HMBP program. HSC 25505.1  |
| <input type="checkbox"/> | 1010012 Failure to provide a copy of HMBP to the property owner within five working days upon request from property owner. HSC 25505.1   |
| <input type="checkbox"/> | 1010014 Failure to submit emergency response plan in CERS, when not meeting agricultural handler exemption. HSC 25507.1(a) and 25508(a)(1)(A)  |
| <input type="checkbox"/> | 1010015 Failure to submit employee training plan in CERS, when not meeting agricultural handler exemption. HSC 25507.1(a) and 25508(a)(1)(A)   |
| <input type="checkbox"/> | 1010016 HMBP not established or submitted in CERS, when not meeting the remote site exemption. HSC 25507.2 and 25508(a)(1)(A)  |
| <input type="checkbox"/> | 1020001 Employee training plan for hazardous materials management not adequate, not established or not submitted in CERS. HSC 25505(a)(4) and 25508(a)(1)(A)                                   |
| <input type="checkbox"/> | 1020002 Initial and/or annual employee training not conducted for hazardous materials management and/or employee training records not available or not maintained for 3 years. HSC 25505(a)(4) |
| <input type="checkbox"/> | 1040001 Hazardous materials release or threatened release not reported to the CUPA and OES immediately upon discovery. HSC 25510(a)  |
| <input type="checkbox"/> | 4010001 Failed to prepare and implement a written Spill Prevention Control and Countermeasures (SPCC) Plan in accordance with 40 CFR 112 (sec. 112.3). HSC 25270.4.5(a)                        |
| <input type="checkbox"/> | HMD 1001 Unified Program Facility permit not obtained for hazardous materials. SDCC 68.905   |
| <input type="checkbox"/> | HMD 1005 Emergency contact not provided or current. HSC 25508.1(f)   |
| <input type="checkbox"/> | HMD 1007 Highly toxic gas (TLV<10 ppm) not disclosed. SDCC 68.1113(b)  |
| <input type="checkbox"/> | HMD 1008 Annual carcinogen/reproductive toxin list not submitted. SDCC 68.1113(c)  |
| <input type="checkbox"/> | HMD 1013 HMBP not readily available for review. HSC 25505(c)   |

### Hazardous Waste Requirements for SQGs ONLY

- |                          |  |
|--------------------------|--|
| <input type="checkbox"/> | HMD 0226 Did not accumulate waste in a container or tank. (40 CFR 262.34(d)(2), 22 CCR 66262.34(d)(2))                                     |
| <input type="checkbox"/> | HMD 0412 Failed to have an emergency coordinator on call or available during an emergency. (40 CFR 262.34(d)(5)(i).) 22 CCR 66262.34(d)(2) |

HM-923 (03-15)

### Hazardous Waste Requirements for SQGs ONLY (continued)

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 3030007 Failed to properly label/date hazardous waste container and/or tank. 22 CCR 66262.34(f)  |
| <input type="checkbox"/> | 3030010 Accumulated waste too long (>180 or 270 days) (>90 days for an acutely hazardous waste). (40 CFR 262.34(e) and (f).) HSC 25201(a); 22 CCR 66262.34(d)  |
| <input type="checkbox"/> | 3030013 Failed to accumulate hazardous waste in a container that is in good condition. (40 CFR 262.34(d)(2); 265.171.) 22 CCR 66262.34(d)(2)   |
| <input type="checkbox"/> | 3030015 Failed to accumulate or store hazardous waste in a lined/compatible container. (40 CFR 262.34(d)(2); 265.172) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3030017 Failed to properly close hazardous waste container(s). (40 CFR 262.34(d)(2); 265.173.) 22 CCR 66262.34(d)(2)   |
| <input type="checkbox"/> | 3030019 Failed to inspect hazardous waste storage area at least weekly. (40 CFR 262.34(d)(2); 265.174.) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3030022 Failed to properly separate incompatible waste. (40 CFR 262.34(d)(2); 265.177.) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3030030 Failed to maintain and/or operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents. (40 CFR 262.34(d)(4), 265.31.) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3030036 Failed to maintain adequate aisle space. (40 CFR 262.34(d)(4); 265.35.) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3010022 Failed to post, next to the telephone, emergency information containing the location of emergency equipment, contact names, and numbers. (40 CFR 262.34(d)(5)(ii).) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3020001 Failed to ensure employees are trained for hazardous waste handling, compliance with regulations, and emergency response procedures. (40 CFR 262.34(d)(5)(iii).) 22 CCR 66262.34(d)(2)   |
| <input type="checkbox"/> | 3030032 Failed to maintain or have emergency equipment, supplies, or equivalents. 1) An internal communication or alarm system; 2) A device, such as a telephone; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure (40 CFR 262.34(d)(4); 265.32) 22 CCR 66262.34(d)(2) |
| <input type="checkbox"/> | 3030039 Failed to implement contingency plan during an emergency, spill/ release. (40 CFR 262.34(d)(5)(iv).) 22 CCR 66262.34(d)(2)   |

### Hazardous Waste Tank Systems for SQGs ONLY

- |                          |  |
|--------------------------|--|
| <input type="checkbox"/> | 3030024 Failed to maintain sufficient freeboard of 2 ft in uncovered tanks to prevent overtopping unless the tank is equipped with a containment structure, a drainage control system or a diversion structure with a capacity that equals or exceeds the volume of the top 2 ft of the tank. (40 CFR 62.34(d)(3); 265.201(b)(c).) 22 CCR 66262.34(d)(2) |
| <input type="checkbox"/> | 3030025 Failed to provide an overflow protection device on continuously fed hazardous waste tank. (40 CFR 262.34(d)(3); 265.201(b)(4).) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3030027 Failed to conduct daily tank inspection of the discharge system, monitoring equipment, and tank level. (40 CFR 265.201(c)(1), 265.201(c)(2), 265.201(c)(3), 262.34(d)(3).) 22 CCR 66262.34(d)(2)   |
| <input type="checkbox"/> | 3030028 Failed to conduct weekly inspections of the construction materials, fixtures, and surrounding areas of the hazardous waste tank. (40 CFR 265.201(c)(4); 265.201(c)(5); 262.34(d)(3).) 22 CCR 66262.34(d)(2)  |
| <input type="checkbox"/> | 3050007 Failed to properly decontaminate and document closure of a hazardous waste tank system. (40 CFR 265.201(f).) 22 CCR 67383.3  |
| <input type="checkbox"/> | HMD 1612 Hazardous waste improperly stored in a tank system causing leaks, corrosion, or failure. (40 CFR 265.201(b).) 22 CCR 66262.34(d)  |
| <input type="checkbox"/> | HMD 1614 Failed to pre-notify the CUPA in writing prior to closing a hazardous waste tank system. 22 CCR 67383.3(a)(1)   |
| <input type="checkbox"/> | HMD 1615 Failed to properly accumulate ignitable or reactive waste in a tank system. (40 CFR 265.201(g).) 22 CCR 66262.34(d)(2)  |

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### Hazardous Materials and Hazardous Waste (continued)

#### Hazardous Waste Requirements for SQGs and LOQs RECORD KEEPING/OPERATIONAL REQUIREMENTS

- | #                        | VIOLATION DESCRIPTION   |
|--------------------------|---|
| <input type="checkbox"/> | 3010001 Unified Program Facility (UPF) permit not obtained for the generation of hazardous waste. HSC 25404.1; SDCC 68.905  |
| <input type="checkbox"/> | 3010029 The facility has not submitted complete and accurate facility information in CERS. HSC 25404(e)(4); 27 CCR 15188(b)   |
| <input type="checkbox"/> | 3010002 Failed to obtain and/or maintain an active EPA ID. 22 CCR 66262.12  |
| <input type="checkbox"/> | 3010008 Failed to properly complete a uniform hazardous waste manifest. 22 CCR 66262.23(a)  |
| <input type="checkbox"/> | 3010009 Failed to complete the hazardous waste manifest Exception Requirement. 22 CCR 66262.42  |
| <input type="checkbox"/> | 3010010 Failed to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for 3 years. HSC 25160.2(b)(3), 25185(a)(4); 22 CCR 66262.40(a)   |
| <input type="checkbox"/> | 3010011 Failed to send hazardous waste manifest copies to the Department of Toxic Substances Control (DTSC). 22 CCR 66262.23(a)(4)  |
| <input type="checkbox"/> | 3010013 Failed to meet the consolidated manifesting requirements for waste shipment. HSC 25160.2; 22 CCR 66262.40(a)  |
| <input type="checkbox"/> | 3010014 Failed to retain disposal records of spent lead batteries for 3 years. 22 CCR 66266.81(a)(4)(B)   |
| <input type="checkbox"/> | 3030006 Failed to determine if a hazardous waste is restricted or prohibited from land disposal. 22 CCR 66268.7(a)  |
| <input type="checkbox"/> | 3010016 Failure of recycler who recycles more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption to provide and submit in CERS the required information. HSC 25143.10(a), (c), and/or (d) |
| <input type="checkbox"/> | HMD 0149 Failed to keep disposal receipts for drained used oil filters and/or drained fuel filters for 3 years. HSC 25250.22; 22 CCR 66266.130  |
| <input type="checkbox"/> | HMD 0148 Failed to have copies of analytical records, waste analysis records, and/or waste determination results for 3 years. 22 CCR 66262.40(c)  |
| <input type="checkbox"/> | HMD 0140 Failed to have Land Disposal Restriction documentation onsite for 3 years. 22 CCR 66268.7(a)(8)  |
| <input type="checkbox"/> | 3250005 Failed to obtain a Treatment, Storage and Disposal Facility (TSDF) permit or authorization to store/treat/dispose of hazardous waste. HSC 25201(a)  |
| <input type="checkbox"/> | 3050005 Failed to have adequate records demonstrating claim of exemption for Excluded Recyclable Materials. HSC 25143.2(f); 22 CCR 66261.2(g)   |
| <input type="checkbox"/> | 3210001 Failed to notify the CUPA in CERS for onsite hazardous waste treatment/tiered permitting. HSC 25201(a)  |
| <input type="checkbox"/> | HMD 0138 Manifest signed by the TSDF not available for inspection. 22 CCR 66262.40(a)   |

#### Hazardous Waste Requirements for SQGs and LOQs DISPOSAL AND TRANSPORTATION

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 3010007 Failed to prepare a hazardous waste manifest for the transport of a waste for off-site transfer, treatment, storage, or disposal. HSC 25160(b)(1) or (2), 25160.2(b)(9); 22 CCR 66262.20(a) |
| <input type="checkbox"/> | 3030005 Failed to make a proper waste determination. 22 CCR 66262.11, 66262.40(c)   |
| <input type="checkbox"/> | 3050001 Failed to use a California registered hazardous waste transporter to transport hazardous waste. HSC 25163(a); 22 CCR 66263.41   |
| <input type="checkbox"/> | 3050002 Failed to properly dispose of hazardous waste at an authorized facility. HSC 25189.5(a); 25189(c),(d); 25189.2(c)   |
| <input type="checkbox"/> | 3130002 Impermissible dilution of hazardous waste. 22 CCR 66268.3(a)  |
| <input type="checkbox"/> | HMD 0305 Disposed of used oil illegally. HSC 25250.5(a); 25189.5(a); 25189(c),(d); 25189.2(c)   |
| <input type="checkbox"/> | HMD 0306 Disposed of hazardous waste latex paint improperly. HSC 25217.1  |

HM-923 (03-15)

#### Hazardous Waste Requirements for SQGs and LOQs STORAGE AND HANDLING

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 3030001 Failed to meet requirements, when handling, and storing spent lead acid batteries. 22 CCR 66266.81(a)(1)   |
| <input type="checkbox"/> | 3030003 Failed to properly manage 'damaged' spent lead acid batteries. 22 CCR 66266.81(b)  |
| <input type="checkbox"/> | 3030004 Failed to properly manage, store, label, and/or recycle used oil filters and/or used fuel filters. HSC 25250.22; 22 CCR 66266.130  |
| <input type="checkbox"/> | 3050004 Failed to properly manage contaminated used oil as a hazardous waste. HSC 25250.7(a), (c)  |
| <input type="checkbox"/> | HMD 0222 Failed to properly label Excluded Recyclable Materials (ERM). HSC 25143.9(a).   |
| <input type="checkbox"/> | HMD 0216 Failed to label hazardous material container within 10 days after the container was discovered to be mislabeled or inadequately labeled. HSC 25124(b)(3)(A); 22 CCR 66262.34(f) |
| <input type="checkbox"/> | HMD 0217 Failed to repackage damaged/deteriorated hazardous material container within 96 hours. HSC 25124(b)(3)(B); 22 CCR 66262.34(f)   |
| <input type="checkbox"/> | HMD 0219 Failed to properly segregate used oil &/or fuel drained from filters. HSC 25250.22(b)(4); 22 CCR 66266.130(c)(6)  |
| <input type="checkbox"/> | HMD 0221 Failed to comply with hazardous waste satellite container regulation. 22 CCR 66262.34(e)  |
| <input type="checkbox"/> | HMD 0223 Failed to properly empty container, failed to manage non-empty container, or inner liner removed from a container. 22 CCR 66261.7(b), (d) and/or (r); 66262.34(f)               |
| <input type="checkbox"/> | HMD 0224 Failed to mark date on empty container larger than 5 gallons and/or manage it within one year. 22 CCR 66261.7(e),(f)  |

#### Universal Waste Handler Requirements

- |                          |  |
|--------------------------|--|
| <input type="checkbox"/> | 3010004 Failed to obtain an EPA ID number from DTSC or US EPA prior to storing 5,000 kg or more of universal waste. 22 CCR 66273.32(a),(b)               |
| <input type="checkbox"/> | 3020002 Failed to maintain universal waste handler training records for 3 years. 22 CCR 66273.36(c),(d)  |
| <input type="checkbox"/> | 3020003 Failed to properly train handlers of universal waste in universal waste management and response procedures. 22 CCR 66273.36(a),(b)               |
| <input type="checkbox"/> | 3030008 Failed to properly label or mark a universal waste (non-Conditionally Exempt Small Quantity Universal Waste Generator). 22 CCR 66273.34          |
| <input type="checkbox"/> | 3030011 Failed to properly dispose of universal waste within one year. 22 CCR 66273.35(a) and/or (b)   |
| <input type="checkbox"/> | 3030046 Failed to keep records of offsite universal waste (UW) shipment(s) available for inspection for 3 years. HSC 25185(a); 22 CCR 66273.39(c),(d)(2) |
| <input type="checkbox"/> | 3030051 Failed to meet the accumulation standards for universal waste aerosol containers and waste handling. HSC 25201.16(f)                             |
| <input type="checkbox"/> | 3040004 Failed to manage universal waste in a manner to prevent release(s) to the environment. 22 CCR 66273.33; 66273.33.5                               |
| <input type="checkbox"/> | 3050003 Disposal of universal waste (UW) to an unauthorized point. HSC 25189.5(a), 25189(c),(d); 25189.2(c); 22 CCR 66273.31(a)                          |

## COMPLIANCE INSPECTION REPORT

### Underground Storage Tank (UST) Program

INSPECTION DATE: 06/08/2017

PAGE 5 OF 7

RECORD ID #: DEH2003-HUPFP-201381

*VIOLATION REPORT: Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.*

#### GENERAL PROGRAM REQUIREMENTS

##### UST System – File Records

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 2030064 Failure to notify CUPA 48 hours prior to testing. 23 CCR 2637(f), 2638(e), 2643(g), 2644.1(a)(4)   |
| <input type="checkbox"/> | 2030021 Failure to obtain and maintain a valid operation permit from the CUPA. HSC 25284; 23 CCR 2712(i)   |
| <input type="checkbox"/> | 2030039 Failure to comply with one or more of the operating permit conditions. 23 CCR 2712; HSC 25299  |
| <input type="checkbox"/> | 2060001 Failure to submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application. 23 CCR 2635(c)(8), 2711(a)(8)  |
| <input type="checkbox"/> | 2010010 Failure to prepare, maintain, and submit accurate CUPA UST Operating Permit Application for Facility information and/or Tank information. HSC 25286(a); 23 CCR 2711  |
| <input type="checkbox"/> | 2010001 Failure to obtain and maintain a valid Board of Equalization account number. HSC 25286   |
| <input type="checkbox"/> | 2010007 Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance. HSC 25292.2, 25299.30-25299.34; 23 CCR 2711; 2808.1, 2809-2809.2  |

## COMPLIANCE INSPECTION REPORT

### UST PROGRAM (continued)

#### UST Tank (DW/SW) Requirements

- | #                        | VIOLATION DESCRIPTION   |
|--------------------------|---|
| <input type="checkbox"/> | 2030001 (RD) Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions. 23 CCR 2632, 2634  |
| <input type="checkbox"/> | 2030059 Failure to maintain UST system in accordance with exclusion/exemption status. HSC 25281.6, 25283.5  |
| <input type="checkbox"/> | 2060003 Failure to inspect at the installation site using an electric resistance holiday detector and repair if necessary before installation. 23 CCR 2635(a)(2)(B)   |
| <input type="checkbox"/> | 2060005 Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment. HSC 29291(b)  |
| <input type="checkbox"/> | 2060006 Failure of secondary containment piping to slope back to the collection sump. 23 CCR 2636   |
| <input type="checkbox"/> | 2060007 Failure of non-integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry core or engineering standard. 23 CCR 2631(d)   |
| <input type="checkbox"/> | 2060010 (RD) Failure of the UST storing a hazardous substance to have secondary containment. HSC 25291  |
| <input type="checkbox"/> | 2060019 Failure of the spill bucket to have a minimum capacity of five gallons. 23 CCR 2635(b), 2665  |
| <input type="checkbox"/> | 2030007 Failure to submit and maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(j)  |
| <input type="checkbox"/> | 2030036 (RP) Failure of the overflow prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity; and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 23 CCR 2635(b)(2), 2665 |
| <input type="checkbox"/> | 2060020 (RP) Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion. 23 CCR 2635(b), 2665   |
| 1                        | <input checked="" type="checkbox"/> 2030008 Failure to maintain under dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. HSC 25290.1, 25290.2, 25291  |
| <input type="checkbox"/> | 2060015 (RD) Failure of sensor to be located in the proper position/location. 23 CCR 2630(d), 2641(a)   |
| <input type="checkbox"/> | 2030016 (RD) Failure to continuously monitor the interstitial space of the tank, piping and/or sumps such that the leak detection activates an audible/visual alarm when a leak is detected. 23 CCR 2631(g), 2632(c)(2)(A)&(B), 2633(c), 2636(f)  |
| <input type="checkbox"/> | 2030017 Failure to maintain all product piping outside the dispenser to be fail-safe & shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment. 23 CCR 2636(f)(5)  |
| <input type="checkbox"/> | 2030019 Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> | 2030022 Failure to conduct groundwater and/or vadose zone monitoring as required. 23 CCR 2647, 2648   |
| <input type="checkbox"/> | 2030028 Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. 23 CCR 2663  |
| <input type="checkbox"/> | 2030029 (RP) Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. 23 CCR 2663   |
| <input type="checkbox"/> | 2060024 UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1   |
| <input type="checkbox"/> | 2030040 (RD) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)  |

#### UST Tank (DW/SW) Requirements (continued)

- | #                        | VIOLATION DESCRIPTION  |
|--------------------------|--|
| <input type="checkbox"/> | 2030060 Failure to maintain entry fitting such that it properly seals to the containment. 23 CCR 2630, 2635(d), 2636(c), 2666  |
| <input type="checkbox"/> | 2030055 Failure to test the spill bucket annually. HSC 25284.2   |
| <input type="checkbox"/> | 2060022 Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d) |
| <input type="checkbox"/> | 2030065 (RD) Failure to maintain the interstitial space under constant vacuum, pressure, or hydrostatic such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment. (Product Tight) HSC 25290.1(e)   |
| <input type="checkbox"/> | 2060023 Failure of a UST system installed on or after July 1, 2004 to be designed and constructed so as to detect the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d)   |

#### UST Tank (SW) Requirements

- |                          |  |
|--------------------------|--|
| <input type="checkbox"/> | 2030005 (RD) Option 1: Failure to conduct the 0.2 gallon per hour continuous in tank leak detection test. 23 CCR 2643(b)(5)  |
| <input type="checkbox"/> | 2030006 (RD) Option 1: Failure to conduct the monthly 0.2 gallon per hour automatic tank gauging test on a single wall tank and/or failure of the automatic tank gauge to generate and print a hard copy of the monthly 0.2 gallons per hour test. 23 CCR 2643(b)(1)   |
| <input type="checkbox"/> | 2030056 Option 2: Failure to submit the annual statistical inventory reconciliation (SIR) Report to the CUPA. 23 CCR 2646.1(j)   |
| <input type="checkbox"/> | 2030057 (RD) Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)                    |
| <input type="checkbox"/> | 2030058 (RD) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated monthly, capable of detecting a 0.2 gallon per hour release, conduct a tank integrity test every two years, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. CCR 2646.1 |
| <input type="checkbox"/> | 2030030 (RD) Option 3: Weekly gauging not being performed in according to the required specifications. 23 CCR 2645   |
| <input type="checkbox"/> | 2030004 (RD) Option 4: Failure of the automatic tank gauge to test the tank at least once per month when the product level in the tank is at least three feet and shall be capable of detecting a release of 0.1 gallons per hour. 23 CCR 2643(b)(2)   |

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### UST PROGRAM (continued)

#### UST Pressurized Piping (DW) Requirements

- | #                        | <u>VIOLATION DESCRIPTION</u>  |
|--------------------------|---|
| <input type="checkbox"/> | 2030018 (RD) Failure of the double wall pressurized piping in the turbine sump to be continuously monitored with a system that activates an audible and visual alarm or restricts or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> | 2030025 (RD) Failure of the pressurized piping to meet one or more of the following requirements: monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour, and will restrict the flow or product through the piping or trigger an alarm when a release occurs. 23 CCR 2636(f)(2) |
| <input type="checkbox"/> | 2030026 Failure of line leak detector to detect a leak and/or failure of audible and visual alarm. 23 CCR 2636(f)(2)  |
| <input type="checkbox"/> | 2060014 Failure to install leak detection equipment correct for the type of system. HSC 25290.1; 23 CCR 2638  |
| <input type="checkbox"/> | 2060012 (RD) Failure to install line leak detector on pressurized piping system. HSC 25290.1(h), 25290.2(g), 25291(f), 2529   |
| <input type="checkbox"/> | 2030042 (RD) Option 1: Failure to perform and/or pass the annual line integrity test for pressurized piping that does not utilize fail safe or shut down. 23 CCR 2636(f)(4)   |
| <input type="checkbox"/> | 2030020 (RD) Option 3: Failure to conduct daily visual inspections each time the tank is operated, but not less than monthly, and maintain a log of inspection results for review of the CUPA. HSC 25281.5(b)(3)  |

#### UST Pressurized Piping (SW) Requirements

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2060018 (RP) Failure to demonstrate that existing single wall pressurized pipe containing motor vehicle fuel is constructed of glass fiber reinforced plastic, cathodically protected steel, or steel clad with glass reinforced plastic. HSC 25292(e)(2); 23 CCR 2666(b)   |
| <input type="checkbox"/> | 2030027 (RD) Failure of pump shut down when a leak is detected or when line leak detector is disconnected. 23 CCR 2666(c)   |
| <input type="checkbox"/> | 2060017 Failure to install an automatic line leak detector capable of shutting off the pump when a release occurs, fails, or is disconnected. 23 CCR 2666(c)  |
| <input type="checkbox"/> | 2030052 (RD) Option 3: Failure to monitor pressurized pipe containing motor vehicle fuel at least hourly at any pressure and either perform 0.2 gallon per hour monthly line integrity test or perform 0.1 gallon per hour annual line integrity test. 23 CCR 2641(a), 2643   |
| <input type="checkbox"/> | 2030053 (RD) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b) |

#### UST Piping (SW) Requirements – Conventional Suction

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030050 (RD) Failure to conduct 0.1 gallon per hour piping integrity test every three years. 23 CCR 2643(d) |
| <input type="checkbox"/> | 2030049 Failure to conduct daily monitoring for air in the pipe and log results. 23 CCR 2643(d)             |

#### UST Piping (SW) Requirements – Gravity

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030051 Failure to conduct piping integrity test or overflow integrity test every two years. 23 CCR 2643(e) |
|--------------------------|---|

HM-928 UST (02-15)

#### UST System – Cathodic Protection Requirements

- | #                        | <u>VIOLATION DESCRIPTION</u>   |
|--------------------------|--|
| <input type="checkbox"/> | 2030009 (RP) Failure to inspect the impressed-current system every 60 calendar days and/or failure to have corrosion protection equipment turned on and functioning properly and/or failure to inspect the impressed-current system within six months of installation and at least every three years thereafter and/or failure to test sacrificial anodes once every three years in accordance with the manufacturer's instructions. 23 CCR 2635 |
| <input type="checkbox"/> | 2060004 (RP) Failure to install corrosion protection for USTs and/or failure of the field-installed cathodic protection system to meet the consensus standards. 23 CCR 2635(a)(2)(A)   |

#### UST System – Closure

- |                          |   |
|--------------------------|---|
| <input type="checkbox"/> | 2030063 (RD) Failure to comply with temporary closure requirements. HSC 25298; 23 CCR 2670, 2671  |
| <input type="checkbox"/> | 2030038 UST system was abandoned or not properly closed, or failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670, 2672 |

 E-MAIL: sriharim@yahoo.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Srihari Mapparaju

TITLE: Owner

### INTRODUCTION:

This was a routine annual compliance inspection for underground storage tanks, hazardous materials and hazardous waste. The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, the HMD implements the Unified Program in the County and regulates businesses that manage hazardous materials, hazardous wastes, aboveground petroleum storage tanks, and underground storage tanks (UST). Additional information on the CUPA program can be found here: [http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html).

Srihari Mapparaju, Owner, gave consent for inspection, documents review, and photographs, as needed. The scope of this inspection included witnessing annual UST monitoring system certification and spill bucket testing performed by John Babcock of PCET (ICC, Veeder Root, Vmi certifications verified as current). The 36 month periodic Secondary Containment Test (SCT) was also conducted by PCET today. In addition, a full facility inspection including Hazardous Materials Business Plan (HMBP) and hazardous waste scopes was completed today.

Sports Arena Fuel Inc. is a retail gas station with three underground storage tanks, and manages disclosable quantities of hazardous materials (car wash soap), and generates the following hazardous wastes: 1) waste absorbent, fuel-contaminated solids; 2) sump/fuel-contaminated water.

The following UST system monitoring components/devices were tested & certified during this inspection:

- 3 DWFG tanks, 4 DW flex product piping: Regular (main) - 20K gal, Regular (slave) - 10K gal, Premium - 12K gal (split tank with shared annular)
- Liquid sensors: 3 Fill: 3 x VR-208; 3 STP: VR-208, 2 Annular: 3 x VR-301; 8 UDC: VR-208
- 2 Electronic Pressure Line Leak Detectors (PLLD)
- Overfill Prevention -3 x VR-109 ATG probes, external audible & visual alarms; ball floats. No flappers
- 4 x Spill buckets
- Fail Safe, Sensor Out

### VIOLATION # 1

2030013 Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2), 2715(c)

Underground Storage Tanks: 31516

Classification: Class II

### Observations:

Upon review of Alarm History, there was a Fuel Alarm that registered on 7/2/17 at 9:40 PM for L8: 87 [Slave] STP sump, but there appeared to be no acknowledgment of this in the DO Monthly Inspection Report for July 2017. I was unable to locate any work orders, or any other records or details regarding what caused this alarm and how it was responded to by anyone at this facility.

### Corrective Action Due By: 07/04/2018

Within 30 days, please update DO Monthly Inspection Report for July 2017 with any information regarding what caused the L8 alarm specified above, and how the alarm was cleared. If there are any other supporting documents such as work orders, please obtain them and file them in the compliance binder for future reference. Please email or call me once this is done for return to compliance verification.

### INSPECTION REMARKS:

The following minor violation was corrected during inspection:

- This facility's EPA ID# CAL000355401 was inactivated by the Department of Toxic Substances Control (DTSC) on 6/30/17. I contacted Paul Vidakovich of PCET to alert him of this. He completed and submitted Form 1358 to reactivate this EPA ID#
- PCET obtained 4 additional 55 gal drums to store waste test water generated from today's SCT
- UST Operating Permit expires 12/9/2022
- BOE # 44042199 is valid at this time
- CERS ID# 10384024 last submittal dated 5/15/18 was accepted - please review and recertify information in CERS at least once every 12 months
- The next periodic 36 month SCT is due by 7/2021
- I reviewed the following documents on-site: UST/CUPA forms:
  - Monitoring Plan, Monitoring Plot Plan, ER Plan, UST Response Plan, and Facility & Tank Information Pages
  - Certification of Financial Responsibility appears to be valid; Letter from CFO certified on 4/11/18
  - Monthly Designated Operator visual inspection reports are available for review
  - Employee UST training documented and current - last DO (Paul Vidakovich of PCET) led employee training conducted on 5/14/18
  - UST Owner/Operator Written Agreement
  - Owner Statement of Designated UST Operator Compliance form
  - Previous 3 years' UST system monitoring certification reports, previous 2 SCT results

\*Please send the UST Annual Monitoring Certification and Spill Bucket Test report, in addition to completed Corrective Action Form (final page of this report) to my attention within 30 days

## COMPLIANCE INSPECTION REPORT

### Underground Storage Tank (UST) Program

INSPECTION DATE: 06/04/2018  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 7 OF 9

*VIOLATION REPORT: Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.*

- | #                                     | <u>VIOLATION DESCRIPTION</u>   |
|---------------------------------------|--|
| <input type="checkbox"/>              | HMD3101 Unified Program Facility Permit not obtained &/or maintained for UST. HSC 25284(a); SDCC 68.905; 68.906, 68.907, 68.1003(a), 68.1005   |
| <input type="checkbox"/>              | HMD3103 UST repair/modify/closure permit not obtained from HMD. SDCC 68.1004, 68.1005, 68.1009.5   |
| <input type="checkbox"/>              | 2030064 Failure to notify CUPA 48 hours prior to testing. 23 CCR 2637(f), 2638(e), 2643(g), 2644.1(a)(4)   |
| <input type="checkbox"/>              | 2030021 Failure to obtain a valid operation permit from the CUPA including but not limited to unpaid permit fees. HSC 25284(a)(1); 23 CCR 2711(c); SDCC 68.1003  |
| <input type="checkbox"/>              | 2030078 Failure to retain a copy of the permit to operate at the facility. 23 CCR 2712(i)  |

| <input type="checkbox"/>              | 2060001 Failure to submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application. 23 CCR 2635(c)(8)  |
| <input type="checkbox"/>              | 2010010 Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit. 23 CCR 2711; HSC 6.7 25284 (c), 25286(c)  |
| <input type="checkbox"/>              | 2010007 Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance. HSC 25292.2(a), 25299.30-34; 23 CCR 2711(a)(11), 2808.1, 2809-2809.2  |
| <input type="checkbox"/>              | 2030037 Failure to implement or maintain a written agreement between the UST owner and operator. 23 CCR 2620(b); HSC 6.7 25284(a)(3)(A-B)  |
| <input type="checkbox"/>              | 2010012 Failure to maintain UST records of monitoring, testing, repairing, and closure in sufficient detail to enable the CUPA to determine whether the UST systems are in compliance. HSC 6.7 25293   |
| <input type="checkbox"/>              | 2010013 Failure to have an approved UST Monitoring Plan. 23 CCR 2632(d)(1), 2634(d), 2641(h)   |
| <input type="checkbox"/>              | 2010014 Failure to have an approved UST Response Plan. 23 CCR 2632(d)(2), 2634(e), 2641(h)   |
| <input type="checkbox"/>              | 2010015 Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the CUPA. 23 CCR 2715(f)(3)   |
| <input type="checkbox"/>              | 2030033 Failure to have a current UST Monitoring Plan available on site. 23 CCR 2712(i)  |
| <input type="checkbox"/>              | 2030046 Failure to submit a current UST Response Plan available on site. 23 CCR 16 2712(i), 2632(d)(2), 2634(e), 2641(h)   |
| <input type="checkbox"/>              | 2030041 Failure to submit or maintain a current facility plot plan. 23 CCR 2632(d)(1)(C), 2641(h), 2711(a)(8)  |
| <input type="checkbox"/>              | 2030002 (RD) Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.). 23 CCR 2638(a)(b), 2651(j), 2715(i).   |
| <input type="checkbox"/>              | 2030074 Failure to submit the Annual Monitoring System Certification Form to the CUPA within 30 days of completion of the test. 23 CCR 16 2638(d)  |
| <input type="checkbox"/>              | 2030003 (RD) Failure of the leak detection equipment to have an audible and visual alarm as required. 22 CCR 2632(c)(2)(B), 2634(d)(1)(a), 2636(f)(1)  |
| <input type="checkbox"/>              | 2060002 (RD) Failure to outfit the single-walled UST system with a monitoring system capable of detecting a leak. HSC 25292(a); 23 CCR 2643(b)(1)  |
| <input type="checkbox"/>              | 2010003 The owner/operator has failed to designate an UST operator or to inform the CUPA of any change in the designated UST operator(s) within 30 days after a change. 23 CCR 2715(a)   |
| <input type="checkbox"/>              | 2010009 Failure to submit a copy of the secondary containment test results to the CUPA within 30 days after the test. 23 CCR 2637(e)   |
| <input type="checkbox"/>              | 2030048 Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester. 23 CCR 2637(a)(c)(d)   |
| <input type="checkbox"/>              | 2030034 Failure to properly affix tag/sticker on monitoring equipment being certified, repaired, or replaced. 23 CCR 2638(f)   |
| <input type="checkbox"/>              | 2030044 Owner/operator deposited or allowed deposit of petroleum into a UST that has a red tag affixed to the fill pipe. 23 CCR 2717.1(f)  |
| <input type="checkbox"/>              | 2030047 Failure to maintain secondary containment (e.g. failure of secondary containment testing). HSC 25290.1(c)(2), 25290.2(c)(2), 25291(a), 25291(e)  |
| <input type="checkbox"/>              | 2030077 (RD) Failure to notify the CUPA within 24 hours upon discovery of a reportable unauthorized release or failure to prepare a report within five working days. HSC 6.7 25295(a)(1); 23 CCR 2650(e), 2652(b)  |
| <input type="checkbox"/>              | 2030061 (RD) Failure to record any unauthorized release from the primary containment. HSC 6.7 25294  |
| <input type="checkbox"/>              | 2010005 Failure to submit enhanced leak detection testing results to the board and the CUPA within 60 days of completion of the test. 23 CCR 2644.1(a)(5)  |
| <input type="checkbox"/>              | 2030068 Failure to conduct the required initial or periodic enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(a), 25292.5(a); 23 CCR 2640(e), 2644.1(a)  |
| <input type="checkbox"/>              | 2060008 Failure to perform enhanced leak detection testing before the tank is placed in use. HSC 25290.1(j)  |
| <input type="checkbox"/>              | 2010008 (RD) Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the UST. 23 CCR 2712(b)  |
| <input type="checkbox"/>              | 2030062 (RD) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)  |
| <input type="checkbox"/>              | 2010006 Owner/operator made false statements, representation, or certification on an application, record, or other document. HSC 25299(a)(8), 25299(b)(7)(f)   |
| <input type="checkbox"/>              | 2030043 (RD) Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly. 23 CCR 2638(a), 2641(j)  |
| <input type="checkbox"/>              | 2010004 The owner/operator has failed to comply with one or more of the following: to maintain a copy of the designated operator monthly inspections for the last 12 months and/or maintain a list of trained employees on-site or off-site at a readily available location, if approved by the CUPA. 23 CCR 2715(e)   |
| <input type="checkbox"/>              | 2030012 Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). 23 CCR 2715(f)(2)   |
| 1 <input checked="" type="checkbox"/> | 2030013 Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2), 2715(c) |
| <input type="checkbox"/>              | 2030015 Failure to demonstrate to the CUPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f). 23 CCR 16 2630(d), 2643(f), 2644.1(a)(2)   |
| <input type="checkbox"/>              | 2030066 Failure to take appropriate action to repair and retest any leaking UST component which is discovered from an enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(d), 25292.5(c)   |

### UST TANK (DW/SW) - REQUIREMENT

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/04/2018 PAGE 8 OF 9  
 RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

- | #                                | <u>VIOLATION DESCRIPTION</u>  |
|----------------------------------|---|
| <input type="checkbox"/> 2030001 | (RD) Failure to maintain monitoring and maintenance records and/or maintain records of appropriate follow-up actions. 23 CCR 2712(b)  |
| <input type="checkbox"/> 2030059 | Failure to meet the conditions required to exempt an emergency generator tank system in a below-grade structure from UST regulations. HSC 25281.6(a)  |
| <input type="checkbox"/> 2060005 | Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. HSC 25291(b)  |
| <input type="checkbox"/> 2060007 | Failure of primary or integral secondary containment to be approved for use by an independent testing organization or failure of non integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry code or engineering standard. 23 CCR 2631(b), 2631(d)  |
| <input type="checkbox"/> 2030007 | Failure to submit and/or maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(j), 2631.1(b)  |
| <input type="checkbox"/> 2030036 | (RP) Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity; and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 23 CCR 2635(b)(2), 2665 |
| <input type="checkbox"/> 2060020 | (RP) Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket, have a minimum capacity of 5 gallons, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion. 23 CCR 2635(b), 2665  |
| <input type="checkbox"/> 2030008 | Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003. HSC 25290.1(c)(3), 25290.2(c)(3)  |
| <input type="checkbox"/> 2060015 | (RD) Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity. 23 CCR 2630(d), 2641(a)   |
| <input type="checkbox"/> 2030016 | (RD) Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system. 23 CCR 2631(g), 2632(c)(2) (A-B)   |
| <input type="checkbox"/> 2030017 | Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC). 23 CCR 2636(f)(5)   |
| <input type="checkbox"/> 2030022 | Failure to conduct groundwater and/or vadose zone monitoring as required. 23 CCR 2647(a), 2648(a)   |
| <input type="checkbox"/> 2030028 | Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. 23 CCR 2663 (h)(1-8); HSC 23296 (a)(4)   |
| <input type="checkbox"/> 2030029 | (RP) Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. 23 CCR 2663(h)  |
| <input type="checkbox"/> 2060024 | UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1, 2660(m); HSC 25290.1(c)(1), 25290.2(c)(1), 25291(a)(1)   |
| <input type="checkbox"/> 2030040 | (RD) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)  |
| <input type="checkbox"/> 2030055 | Failure to test the spill bucket annually. HSC 25284.2  |
| <input type="checkbox"/> 2060022 | Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d); 23 CCR 2630(d)  |
| <input type="checkbox"/> 2030065 | (RD) Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring. HSC 25290.1(e); 23 CCR 2630(d)   |
| <input type="checkbox"/> 2060023 | Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d); 23 CCR 2630(d)  |

### UST TANK (SW) REQUIREMENTS

- | #                                | <u>VIOLATION DESCRIPTION</u>   |
|----------------------------------|--|
| <input type="checkbox"/> 2030005 | (RD) Option 1: Failure to conduct the 0.2 gallon per hour continuous in tank leak detection test. 23 CCR 2643(b)(5)  |
| <input type="checkbox"/> 2030006 | (RD) Option 1: Failure of the automatic tank gauging (ATG) system to perform valid monthly 0.2 gallon-per-hour leak tests or generate hard-copy test reports. 23 CCR 2643(b)(1)  |
| <input type="checkbox"/> 2030056 | Option 2: Failure to submit the annual statistical inventory reconciliation (SIR) Report to the CUPA. 23 CCR 2646.1(j)   |
| <input type="checkbox"/> 2030057 | (RD) Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)                            |
| <input type="checkbox"/> 2030058 | (RD) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated monthly, capable of detecting a 0.2 gallon per hour release, conduct a tank integrity test every two years, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. 23 CCR 2646.1(a-f) |
| <input type="checkbox"/> 2030030 | (RD) Option 3: Weekly gauging not being performed in according to the required specifications. 23 CCR 2645(a-e)  |
| <input type="checkbox"/> 2030004 | (RD) Option 4: Failure of the automatic tank gauge (ATG) to test the tank at least once per month when the product level in the tank is at least three feet and shall be capable of detecting a release of 0.1 gallons per hour. 23 CCR 2643(b)(2)   |

### UST PRESSURIZED PIPING (DW) REQUIREMENTS

- | #                                | <u>VIOLATION DESCRIPTION</u>   |
|----------------------------------|--|
| <input type="checkbox"/> 2030018 | (RD) Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> 2030025 | (RD) Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly, with the capability of detecting a release of 3.0 gallons per hour leak at 10 p.s.i.g. and restrict or shut off the flow of product through the piping when a leak is detected. 23 CCR 2636(f)(2) |
| <input type="checkbox"/> 2030075 | Failure to meet one or more of the following requirements in lieu of a line leak detector (LLD) for emergency generator tank systems: Continuous monitoring system activates an audible and visual alarm. Monitoring system is checked daily. A log of daily checks is available for the CUPA to review. 23 CCR 2636(f)(6)                                 |
| <input type="checkbox"/> 2030076 | Failure to meet the conditions required to exempt a tank system located in a below-grade structure from UST regulations. HSC 6.7 25283.5(a)  |
| <input type="checkbox"/> 2060012 | (RD) Failure to install a line leak detector (LLD). 23 CCR 2636(f)(2); HSC 25290.1(h), 25290.2(g), 25291(f), 25292(e)  |

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/04/2018 PAGE 9 OF 9  
 RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

- 2030042 (RD) Option 1: Failure to perform an annual line integrity test for pressurized double-walled piping that does not utilize fail safe or shut down. 23 CCR 2636(f)(4); HSC 25290.2(g), 25291(f), 25292(e)
- 2030020 (RD) Option 3: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated but no less than monthly and maintains a log of inspection results for review by the CUPA HSC 6.7 25281.5(b)(3)

### UST PRESSURIZED PIPING (SW) REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030027 | (RD) Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to shut down the pump when a leak is detected or when the LLD fails or is disconnected. 23 CCR 2666(c)   |
| <input type="checkbox"/> 2030052 | (RD) Option 3: Failure of the line leak detector (LLD) on single-walled pressurized pipe to do one or more of the following: Detect a 3 gallon per hour release. Restrict or shut off the flow of product. Trigger a visual and audible alarm. Perform a 0.2 gallon per hour monthly test. Perform a 0.1 gallon per hour annual test. HSC 25292(e)(2); 23 CCR 2643(c) |
| <input type="checkbox"/> 2030053 | (RD) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b)                               |

### UST PIPING (SW) REQUIREMENTS - CONVENTIONAL SUCTION

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030050 | (RD) Failure to conduct 0.1 gallon per hour piping integrity test every three years. 23 CCR 2643(d) |
| <input type="checkbox"/> 2030049 | Failure to conduct daily monitoring and maintain written records. 23 CCR 16 2643(d)                 |

### UST PIPING (SW) REQUIREMENTS - GRAVITY

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030051 | Failure to conduct 0.1 gallon per hour piping integrity test or overfill integrity test every two years. 23 CCR 16 2643(e) |

### UST SYSTEM - CATHODIC PROTECTION REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030009 | (RP) Failure to comply with one or more of the following requirements for the cathodic protection system: Have corrosion protection equipment turned on and functioning properly.  E-MAIL: finn@hrcfuel.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Finn Moller

TITLE: Managing Director

### INTRODUCTION:

The Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for the County of San Diego, regulating businesses that manage hazardous waste, hazardous materials, aboveground petroleum storage tanks, and underground storage tanks (USTs). The HMD also acts as the local enforcement agency for the Medical Waste Management Act (MWMA). Additional information on the CUPA program can be found here: [http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html).

A CUPA compliance inspection was conducted at dba Sports Arena Fuel for the on-site management of underground storage tanks (USTs), hazardous materials and wastes. This included witnessing the annual UST Monitoring System Certification and Spill Container Test performed by John Babcock of PCET (required certifications reviewed as current). Consent to inspect the premises, to review any required facility documents, and to take any photographs as necessary was granted by Finn Moller, Managing Director.

Summit Gasoline of San Diego #10 is a retail gas station with three underground storage tanks (installed 9/1/2003), and manages disclosable quantities of hazardous materials (refrigerated carbon dioxide for beverage dispensing), and generates the following hazardous wastes: 1) waste absorbent, fuel-contaminated solids; 2) sump/fuel-contaminated water. In addition, currently the car wash is not operating and will be upgraded/remodeled; per Finn Moller, they are in the process of obtaining necessary permits to complete upgrades. Estimated date of completion is late 2019- early 2020. Mr. Moller has elected to maintain reportable quantities of car wash soaps (55 gal max currently) in CERS, as they work to complete car wash facility upgrade; however, I did not observe reportable quantities of car wash soap on-site at this time. *Please update true maximum quantities of car wash soaps in CERS within 30 days of that amount being stored on-site; also, please update facility site map within 30 days of applicable changes.*

The following UST system monitoring components/devices were tested during this inspection:

- Veeder Root TLS-350, Software v. 323.03
- 3 DWFG tanks, 4 DW flex product piping; DWFG vent/VR piping: Regular (main) - 20K gal, Regular (slave) - 10K gal, Premium - 12K gal (split tank with shared annular)
- Liquid sensors: 3 Fill: 3 x VR-208; 3 STP: 3 x VR-208, 2 Annular: 2 x VR-301; 8 UDC: VR-208
- 2 Electronic Pressure Line Leak Detectors (PLLD)
- Overfill Prevention -3 x VR-109 ATG probes, external audible & visual alarms at 90% tank capacity verified

- 4 x Phil Tite Spill Containers pass lake test\*
- Fail Safe, Sensor Out

### VIOLATION # 1

2030013 (TCR 12) Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR, 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days. 23CCR 2716 (a-e)

Underground Storage Tanks: 31516,31517,31518

Classification: Class II

### Observations:

This facility went through a change of ownership on 4/1/2019; currently, the owner is Summit Gasoline of San Diego. During the transition period there was a miscommunication as the Summit Gasoline of San Diego had not decided on who would be contracted to perform Designated Operator (DO) inspections for the station. Therefore, no DO inspection took place for the month of April 2019. Around mid-May 2019, Summit Gasoline of San Diego agreed to have Paul Vidakovich of PCET resume DO Monthly inspections, and the latest one took place on 5/21/19. In addition, there were more than 30 days between monthly DO inspections between the months of November and December, 2018 (11/8/18 and 12/31/18) performed by Paul Vidakovich.

### Corrective Action Completed During Inspection:

Please ensure that monthly DO inspections are performed at least once every 30 days. I spoke with both Finn Moller and Paul Vidakovich regarding this topic during the inspection.

### INSPECTION REMARKS:

- \* Although the 87 and 91 Phil Tite spill containers passed 1 hour hydrostatic lake test, John Babcock noticed the gaskets were damaged and replaced them during inspection
- All 8 dispensers will be replaced with new Gilbarco dispensers under plan check permit with the CUPA by the end of the year; also a new 40,000 gal storage tank is planned to be installed under permit within the year, according to Finn Moller
- Approx. half a gallon of water, likely from recent rain, was removed from UDC 5/6 by PCET during inspection
- UST Operating Permit expires 12/9/2022
- BOE # 44042199
- EPA ID# CAL000355401 is currently active - please ensure that current owner info information is updated with DTSC; last HW removal was made by World Oil Environmental Services on 6/4/19. There are 3 x 55 gal empty poly drums on-site. Approx. 15 gallons of spill bucket water from today's test was deemed by facility as non-hazardous and deposited in car wash clarifier
- CERS ID# 10384024 last HMBP submittal dated 5/29/19 was accepted - please review and recertify information in CERS at least once every 12 months; however, UST element was not accepted as corrections are required for vent/vapor recovery piping and primary method of overfill prevention are required. I phoned Paul Vidakovich, DO and CERS Lead User, and he made changes before end of inspection
- The last 36 month Secondary Containment Test (SCT) was performed by PCET on 6/4/18, with all components passing; next periodic 36 month SCT is due by 7/2021
- The next Overfill Prevention Equipment inspection is due by 10/2021
- I reviewed the following documents on-site: UST/CUPA forms:
  - Monitoring Plan, Monitoring Plot Plan, ER Plan, UST Response Plan, and Facility & Tank Information Pages
  - Certification of Financial Responsibility appears to be valid (State UST Cleanup Fund); Letter from CFO certified on 5/28/19

- Employee UST training documented and current - last DO (Paul Vidakovich of PCET) led employee training conducted on 5/28/19
- UST Owner/Operator Written Agreement
- Owner Statement of Designated UST Operator Compliance form
- Previous 3 years' UST system monitoring certification reports, previous SCT results

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/06/2019 PAGE 8 OF 11  
 RECORD ID #: DEH2003-HUPFP-201381

### Hazardous Materials and Hazardous Waste (continued)

- 3030058 Failed to mark date on empty container larger than 5 gallons &/or manage it within one year. 22 CCR 66261.7(f)
- 3030060 Failure of the owner or operator managing laboratory hazardous waste in a laboratory accumulation area to comply with the accumulation, storage, management, training, and/or record-keeping requirements. HSC 25200.3.1(b) and/or (c)

### UNIVERSAL WASTE HANDLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010004	Failed to obtain a California ID Number from DTSC or federal ID Number from USEPA prior to accumulating 5,000 kgs or more of Universal Waste. 22 CCR 66273.32(a-b)
<input type="checkbox"/> HMD0151	Failed to maintain universal waste handler training records for 3 years. 22 CCR 66273.36(c),(d)
<input type="checkbox"/> 3020003	Failed to properly train handlers of universal waste in universal waste management and response procedures. 22 CCR 66273.36(a),(b)
<input type="checkbox"/> 3030008	Failed to properly label or mark Universal Waste container, package, or pallet (excluding CESQUWG) 22 CCR 66273.34
<input type="checkbox"/> 3030011	Failed to properly dispose of Universal Waste within one year. 22 CCR 66273.35(a) &/or (b)
<input type="checkbox"/> HMD0147	Failed to keep records of offsite Universal Waste shipment(s) available for inspection for 3 years. 22 CCR 66273.39(c),(d)(2)
<input type="checkbox"/> 3030051	Failed to meet accumulation, labeling, marking, &/or containment standards for Universal Waste aerosol containers. HSC 25201.16(f)
<input type="checkbox"/> 3040004	Failed to manage universal waste in a manner to prevent release(s) to the environment. 22 CCR 66273.33; 66273.33.5
<input type="checkbox"/> HMD0307	Disposal of universal waste (UW) to an unauthorized point. HSC 25189.5(a); 22 CCR 66273.31(a), 66273.8(b)
<input type="checkbox"/> 3010005	Failure of a universal handler of electronic devices or CRTs from an offsite source to notify DTSC 30 days prior to acceptance. 22 CCR 66273.32(c)
<input type="checkbox"/> 3010020	Failure of a universal waste handler to submit an annual report that includes all required information to DTSC by February 1 of every year . 22 CCR 66273.32(d)
<input type="checkbox"/> 3010006	Failure of the universal waste handler who sends electronic devices or CRTs to any foreign destination to notify DTSC 60 days prior to export and send a copy to the CUPA. 22 CCR 66273.40(a)(3)

### CERTIFIED APPLIANCE RECYCLER REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 3010033	Failure to obtain Certified Appliance Recycler certification (CAR) from DTSC. HSC 25211.4
<input type="checkbox"/> 3010034	Failure of certified appliance recycler (CAR) to provide documentation that all materials that require special handling (MRSH) have been properly removed and managed. HSC 25211.2, 25211.3
<input type="checkbox"/> 3030055	Failure of certified appliance recycler (CAR) to properly remove and dispose of all materials that require special handling (MRSH). HSC 25211.3, 25212 (a), (b), and/or (c)

## COMPLIANCE INSPECTION REPORT

### Underground Storage Tank (UST) Program

INSPECTION DATE: 06/06/2019  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 9 OF 11

*VIOLATION REPORT: Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.*

#	VIOLATION DESCRIPTION
<input type="checkbox"/> HMD3101	Unified Program Facility Permit not obtained &/or maintained for UST. HSC 25284(a); SDCC 68.905; 68.906, 68.907, 68.1003(a), 68.1005
<input type="checkbox"/> HMD3103	UST repair/modify/closure permit not obtained from HMD. SDCC 68.1004, 68.1005, 68.1009.5
<input type="checkbox"/> 2030064	Failure to notify the CUPA 48 hours prior to testing or inspection of overfill prevention equipment. 23 CCR 2637(g), 2637.1(f), 2637.2(f), 2638(e), 2643(g), 2644.1(a)(4)
<input type="checkbox"/> 2030021	Failure to obtain a valid operation permit from the CUPA including but not limited to unpaid permit fees. HSC 25284(a)(1); 23 CCR 2711(d); SDCC 68.1003
<input type="checkbox"/> 2030078	Failure to retain a copy of the permit to operate at the facility. 23 CCR 2712(i)
<input type="checkbox"/> 2030039	Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system. 23 CCR 2712(a)(b)(f)(i)(j)(k)
<input type="checkbox"/> 2060001	Failure to submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application. 23 CCR 2635(e)(8)
<input type="checkbox"/> 2010010	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit. 23 CCR 2711; HSC 6.7 25284 (c), 25286(c)
<input type="checkbox"/> 2010007	(TCR 11) Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance. HSC 25292.2(a), 25299.30-34; 23 CCR 2711(a)(11), 2808.1, 2809-2809.2
<input type="checkbox"/> 2030037	Failure to implement or maintain a written agreement between the UST owner and operator. 23 CCR 2620(b); HSC 6.7 25284(a)(3)(A-B)
<input type="checkbox"/> 2010012	Failure to maintain UST records in sufficient detail to enable the CUPA to determine whether the UST systems are in compliance. HSC 25293
<input type="checkbox"/> 2010013	Failure to have an approved UST Monitoring Plan. 23 CCR 2632(d)(1), 2634(d), 2641(h)
<input type="checkbox"/> 2010014	Failure to have an approved UST Response Plan. 23 CCR 2632(d)(2), 2634(e), 2641(h)
<input type="checkbox"/> 2010015	Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the CUPA. for training that occurs on or after October 1, 2018, failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the CUPA. 23 CCR 2715(C)(3-4)
<input type="checkbox"/> 2010016	(TCR 10) Failure to submit the "Underground Storage Tank Statement of Understanding and Compliance Form." 23 CCR 2715(a)(1)(A), 2715(a)(2)
<input type="checkbox"/> 2010017	Failure to submit a copy of the spill containment test results on the "Spill Container Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637.1(d), 2637.1(e)
<input type="checkbox"/> 2010018	Failure to submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the CUPA within 30 days after the inspection. 23 CCR 2637.2(d-e), 2665(a-b)
<input type="checkbox"/> 2030033	Failure to have a current UST Monitoring Plan available on site. 23 CCR 2712(i)
<input type="checkbox"/> 2030046	Failure to submit a current UST Response Plan available on site. 23 CCR 2712(i), 2632(d)(2), 2634(e), 2641(h)
<input type="checkbox"/> 2030041	Failure to submit or maintain a current facility plot plan. 23 CCR 2632(d)(1)(C), 2641(h), 2711(a)(8)
<input type="checkbox"/> 2030002	(TCR 9d) Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.). 23 CCR 2638(a)(b), 2651(j), 2715(f).
<input type="checkbox"/> 2030074	Failure to submit the "Monitoring System Certification Form" to the CUPA within 30 days of completion of the test. 23 CCR 2638(c-d)
<input type="checkbox"/> 2030003	Failure of the leak detection equipment to have an audible and visual alarm as required. 22 CCR 2632(c)(2)(B), 2634(d)(1)(a), 2636(f)(1)
<input type="checkbox"/> 2060002	(TCR 9d) Failure to outfit the single-walled UST system with a monitoring system capable of detecting a leak. HSC 25292(a); 23 CCR 2641(e)
<input type="checkbox"/> 2010003	(TCR 10) Failure to submit the "Designated Underground Storage Tank Operator Identification Form" within 30 days of installing a UST system or within 30 days of a change in DO. 23 CCR 2715(a)(1)(B), 2715(a)(3)
<input type="checkbox"/> 2010009	Failure to submit a copy of the secondary containment test results on the "Secondary Containment Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637(e-f)
<input type="checkbox"/> 2030048	(TCR 9d) Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation, and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months. 23 CCR 2637(a)(c)(d), 2637(b-d), 2712(b)(1)(F)
<input type="checkbox"/> 2030034	Failure to properly affix tag/sticker on monitoring equipment being certified, repaired, or replaced. 23 CCR 2638(f)
<input type="checkbox"/> 2030044	Owner/operator deposited or allowed deposit of petroleum into a UST that has a red tag affixed to the fill pipe. 23 CCR 2717.1(f)
<input type="checkbox"/> 2030047	Failure to maintain secondary containment (e.g. failure of secondary containment testing). HSC 25290.1(c)(2), 25290.2(c)(2), 25291(a), 25291(e)
<input type="checkbox"/> 2030077	(TCR 9d) Failure to notify the CUPA within 24 hours upon discovery of a reportable unauthorized release or failure to prepare a report within five working days. HSC 6.7 25295(a)(1); 23 CCR 2650(e), 2652(b)
<input type="checkbox"/> 2030061	Failure to record any unauthorized release from the primary containment. HSC 6.7 25294
<input type="checkbox"/> 2010005	Failure to submit enhanced leak detection testing results to the board and the CUPA within 60 days of completion of the test. 23 CCR 2644.1(a)(5)
<input type="checkbox"/> 2030068	Failure to conduct the required initial or periodic enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(a), 25292.5(a); 23 CCR 2640(e), 2644.1(a)
<input type="checkbox"/> 2060008	Failure to perform enhanced leak detection testing before the tank is placed in use. HSC 25290.1(j)
<input type="checkbox"/> 2010008	Failure to maintain records of repairs and upgrades on site, or off site if approved by the CUPA, for the life of the UST. 23 CCR 2712(b)
<input type="checkbox"/> 2030062	(TCR 9d) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)
<input type="checkbox"/> 2010006	Owner/operator made false statements, representation, or certification on an application, record, or other document. HSC 25299(a)(8), 25299(b)(7)(f)
<input type="checkbox"/> 2030043	(TCR 9d) Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly. 23 CCR 2638(a), 2641(j)
<input type="checkbox"/> 2010004	(TCR 12) Failure to maintain on-site, or off-site at a readily available location if approved by the CUPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection. 23 CCR 2716(f)
<input type="checkbox"/> 2030012	Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). 23 CCR 2715(c)(2)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/06/2019 PAGE 10 OF 11  
 RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

- 1  2030013 (TCR 12) Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR, 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days. 23CCR 2716 (a-e)
- 2030015 Failure to demonstrate to the CUPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f). 23 CCR 16 2630(d), 2643(f), 2644.1(a)(2)
- 2030035 Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills. HSC 25292.1(a)
- 2030073 Failure to implement the corrections specified in the inspection report within 30 days of receiving an inspection report from either the CUPA or special inspector. 23 CCR 16 2712(f)
- 2030066 Failure to take appropriate action to repair and retest any leaking UST component which is discovered from an enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(d), 25292.5(c)

### UST TANK (DW/SW) - REQUIREMENT

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030001	(TCR 9d) Failure to maintain monitoring and maintenance records for release detection and/or maintain records of appropriate follow-up actions. 23 CCR 2712(b)(1-2)
<input type="checkbox"/> 2030059	Failure to meet the conditions required to exempt an emergency generator tank system in a below-grade structure from UST regulations. HSC 25281.6(a)
<input type="checkbox"/> 2060005	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. HSC 25291(b)
<input type="checkbox"/> 2060007	Failure of primary or integral secondary containment to be approved for use by an independent testing organization or failure of non integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry code or engineering standard. 23 CCR 2631(b), 2631(d), 2666(b)(2), 2666(e)(2)
<input type="checkbox"/> 2030007	Failure to submit and/or maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(j), 2631.1(b)
<input type="checkbox"/> 2030036	(TCR 9b) Failure to comply with one or more of the following overflow prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/ retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overflow prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overflow prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)
<input type="checkbox"/> 2060020	(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2
<input type="checkbox"/> 2030008	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003. HSC 25290.1(c)(3), 25290.2(c)(3)
<input type="checkbox"/> 2060015	(TCR 9d) Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity. 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2030016	(TCR 9d) Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system. 23 CCR 2631(g), 2632(c)(2)(A-B)
<input type="checkbox"/> 2030017	(TCR 9d) Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC). 23 CCR 2636(f)
<input type="checkbox"/> 2030022	(TCR 9d) Failure to conduct groundwater and/or vadose zone monitoring or maintain site assessment as required. 23 CCR 2647(a), 2648(a), 2712(b)(4)
<input type="checkbox"/> 2030029	(TCR 9c) Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. Maintain records for the life of the tank. 23 CCR 2663, 2712(b)(6).
<input type="checkbox"/> 2060024	UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1, 2660(m); HSC 25290.1(c)(1), 25290.2(c)(1), 25291(a)(1)
<input type="checkbox"/> 2030040	(TCR 9d) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2060022	Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d); 23 CCR 2630(d)
<input type="checkbox"/> 2030065	(RD) Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring. HSC 25290.1(e); 23 CCR 2630(d)
<input type="checkbox"/> 2060023	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d); 23 CCR 2630(d)
<input type="checkbox"/> 2060029	Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required. 23 CCR 2666(b)(2)

### UST TANK (SW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030005	(TCR 9d) Option 1: Failure of the continuous in-tank leak detection (CITLD) system to perform a 0.2 gallon-per-hour leak test that determines the leak status of the tank at least once every 30 days. 23CCR 2643(b)(3)
<input type="checkbox"/> 2030006	(TCR 9d) Option 1: Failure of the automatic tank gauging (ATG) system to perform valid 0.2 gallon-per-hour leak tests or generate hard-copy test reports at least once every 30 days. 23 CCR 2643(b)(1)
<input type="checkbox"/> 2030056	Option 2: Failure to submit the statistical inventory reconciliation (SIR) Report every 12 months to the CUPA. 23 CCR 2646.1(j)

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/06/2019 PAGE 11 OF 11  
 RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

- 2030057 Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)
- 2030058 (TCR 9d) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated every 30 days, capable of detecting a 0.2 gallon per hour release, report a quantitative leak rate using a threshold value that does not exceed one-half the minimum detectible leak rate, conduct a tank integrity test every 24 months, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. 23 CCR 2643(b)(2), 2646.1(a-h) (j-k)

### UST PRESSURIZED PIPING (DW) REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030018 | (TCR 9d) Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> 2030025 | (TCR 9d) Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly, with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected. 23 CCR 2636(f)(2) |
| <input type="checkbox"/> 2030075 | (TCR 9d) Failure of the functional line leak detector (LLD) to monitor at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping or triggers a visual and audible alarm. 23 CCR 2636(f), 2666(c) and (f)  |
| <input type="checkbox"/> 2030076 | Failure to meet the conditions required to exempt a tank system located in a below-grade structure from UST regulations. HSC 6.7 25283.5(a)  |
| <input type="checkbox"/> 2060012 | (TCR 9d) Failure to install a line leak detector (LLD). 23 CCR 2636(f)(2), 2636(f)(5)(B), 2643(c)(1), 2666(f); HSC 25290.1(h), 25290.2(g), 25291(f), 25292(e)  |
| <input type="checkbox"/> 2030042 | (TCR 9d) Option 1: Failure to perform one of the following line integrity test: A 12 month test for pressurized double-walled piping that does not utilize fail safe or positive shut down. Within 30 days of the date of the completion of a repair to the primary piping. 23 CCR 2636(f)(4)(3); 2643(c)(3); HSC 25290.2(g), 25291(f), 25292(e)                             |
| <input type="checkbox"/> 2030020 | Option 3: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated but no less than monthly and maintains a log of inspection results for review by the CUPA HSC 6.7 25281.5(b)(3)   |

### UST PRESSURIZED PIPING (SW) REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030027 | (TCR 9d) Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to meet the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and shut down the pump when a leak is detected or when the LLD fails or is disconnected. 23 CCR 2666(c), 2643(c)(1)         |
| <input type="checkbox"/> 2030052 | (TCR 9d) Option 3: Failure to perform one or more of the following on a single-walled pressurized piping system: A 0.1 gallons per hour test at least once every 12 months unless a 0.2 gallons per hour test is performed every 30 days. A 0.1 gallons per hour test within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(c)(2-3), 2661(f); HSC 25292(e)(2) |
| <input type="checkbox"/> 2030053 | (TCR 9d) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b)   |

### UST PIPING (SW) REQUIREMENTS - CONVENTIONAL SUCTION

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030050 | (TCR 9d) Failure to conduct 0.1 gallon per hour piping integrity test at any of the following times: Every 36 months. Within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(d), 2661(f) |
| <input type="checkbox"/> 2030049 | (TCR 9d) Failure to conduct monitoring and maintain written records. 23 CCR 2643(d)   |

### UST PIPING (SW) REQUIREMENTS - GRAVITY

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030051 | (TCR 9d) Failure to conduct 0.1 gallon per hour line piping integrity test at any one of the following times: Every 24 months. Within 30 days of the date of completion of a repair of the piping. 23 CCR 2643(e), 2661(f) |

### UST SYSTEM - CATHODIC PROTECTION REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030009 | (TCR 9c) Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly and inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer's instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the CUPA. 23 CCR 2635(a)(2), 2636(b), 2662(c)(1)(B), 2712(b)(3) |

### UST SYSTEM - CLOSURE

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030063 | Failure to comply with temporary closure requirements. HSC 25298; 23 CCR 2670(b)(d-j), 2671(a-e)  |
| <input type="checkbox"/> 2030038 | Failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670(c-j), 2672(a-e) |

 E-MAIL: finn@hrcfuel.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

### INTRODUCTION:

#### ROUTINE VIRTUAL INSPECTION

On 6/30/2020 I performed a virtual CUPA Underground Storage Tank (UST) inspection for Summit Gasoline of San Diego. The scope of this inspection covers UST requirements per HSC Chapter 6.7 and CCR Title 23, Chapter 16. Compliance with Hazardous Materials Business Plan (HMBP) & hazardous waste (HW) requirements will be evaluated at a later inspection.

On 10/14/2019, UST Plan Check permit 1753 was approved for the installation of 1 UST and associated underground piping, a full re-pipe of the existing piping, and the installation of 8 new under dispenser containments (UDC). The 12000-gal tank which formerly contained 91 grade gasoline would get converted to diesel, and the 20000-gal tank containing 87 grade gasoline would get converted to 91 grade gasoline. At time of this report, the final Plan Check monitoring certification inspection for the new components has not yet been scheduled with the Hazardous Materials Division (HMD).

#### UST records reviewed in CERS / HMD records:

- UST Facility Operating Permit Application
- Tank Information page / UST Monitoring Plan
- Monitoring Plot plan & Emergency Response Plan
- Letter from the Chief Financial Officer, dated 5/28/2019
- Statement of Understanding and Compliance Form
- Designated UST Operator Identification Form
- Monitor certifications for the last 3 years
- Spill bucket test reports for the last 3 years
- Secondary Containment Test Report, dated 6/4/2018
- UST Operating Permit expires on 12/9/2022

*Documents NOT reviewed: Designated Operator monthly Inspection reports, UST facility employee training certificate, maintenance records and any other applicable documents required to be stored at the facility.*

*Although I am not on-site, please know I am still available to address any questions or concerns you have, especially during this public health emergency. Thank you for your continued cooperation and flexibility during this challenging period.*

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/30/2020  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 2 OF 7

For local information and updates on Covid-19, please visit:

<https://www.sandiegocounty.gov/coronavirus.html>

To receive updates via text, send COSD COVID-19 to 468-311

### VIOLATION # 1

2030002 (TCR 9d) Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.). 23 CCR 2638(a)(b), 2651(j), 2715(f).

Underground Storage Tanks: 31516,31517,31518

Classification: Class II

### Observations:

According to available records, the last monitoring certification for the existing UST system was on 6/6/2019, performed by John Babcock of PCET, and witnessed by HMD inspector Daniel LaPel. UST leak detection system components are required to be tested every 12 months by a licensed UST service technician. Today (6/30/2020) is the due date for completing such testing. However, to date, HMD has not received any notification for testing the existing components in the month of June 2020. On 6/22/2020, I contacted Mark Kunze (Southwest Contracting) to let him know of this issue, but I have received no response to date.

**Corrective Action Due By: 07/30/2020**

Schedule the monitoring certification and send notification to HMD at least 48 hours prior to testing.

NOTE: The next monitoring certification will be due by June 2021.

### VIOLATION # 2

2060020 (TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

Underground Storage Tanks: 31516,31517,31518

Classification: Class II

### Observations:

According to available records, the last spill bucket testing for the existing USTs on site was on 6/6/2019, performed by John Babcock of PCET, and witnessed by HMD inspector Daniel LaPel. UST spill containers are required to be tested every 12 months by a licensed UST service technician. Today (6/30/2020) is the due date for completing such testing. However, to date, HMD has not received any notification for testing the existing spill containers in the month of June 2020. On 6/22/2020, I contacted Mark Kunze (Southwest Contracting) to let him know of this issue, but I have received no response to date.

**Corrective Action Due By: 07/30/2020**

Schedule the spill container testing and send notification to HMD at least 48 hours prior to testing.

NOTE: The spill containers will next be due for testing by June 2021.

### INSPECTION REMARKS:

**The following components require attention in CERS before your submittal can be accepted:**

- (a) The full Hazardous Materials Business Plan (HMBP) must be submitted and in acceptable status prior to scheduling the final plan check inspection. Currently, the Emergency Response & Training Plans section is missing from the 6/28/2020 submittal.
- (b) The Hazardous Materials Inventory does not accurately reflect the number of tanks & grades of fuel to be onsite.
- (c) The UST Site Plan is dated 2012, and does not accurately reflect the number of tanks to be onsite.
- (d) There is no Certificate of Financial Responsibility (CFR) document uploaded. The PDF file in this section is a Chief Financial Officer (CFO) letter for a different site. Please upload a correct CFR document naming the intended financial responsibility mechanism(s).
- (e) The CFO letter uploaded is dated 5/28/2019 by P. Moller. This document requires annual update.
- (f) The UST Permit Application names the same tank owner & operator entities, but there is an Owner/Operator agreement uploaded, dated 11/13/2016.
- (g) The new tank (#31519) does not have any dispenser information listed.
- (h) A new Statement of Understanding & Compliance is required for the new tank installation.

### ADDITIONAL NOTES:

According to available records, the secondary containment testing (SCT) history at this location is as follows:

- 02/23/2004 (initial)
- 03/28/2006 (with failures retested on 8/3/2006)
- 07/01/2009
- 06/26/2012 (with failures retested on 8/24/2012)
- 07/14/2015
- 06/04/2018

To maintain timeliness, the next 36-month SCT for the non-VPH components shall be due for inspection by March 2021.

Additionally, because the audible-visual overfill alarm has been tested in previous AMCs, the next Overfill Prevention Equipment Inspection shall be done by October 2021 and submitted on the form from the State Water Resources Control Board.

<input type="checkbox"/> 2010008	Failure to maintain records of repairs and upgrades on site, or off site if approved by the CUPA, for the life of the UST. 23 CCR 16 2712(b)(6)
<input type="checkbox"/> 2030062	(TCR 9d) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)
<input type="checkbox"/> 2010006	Owner/operator made false statements, representation, or certification on an application, record, or other document. HSC 25299(a)(8), 25299(b)(7)(f)
<input type="checkbox"/> 2030043	(TCR 9d) Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly. 23 CCR 2638(a), 2641(j)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### UST Program (continued)

- 2010004 (TCR 12) Failure to maintain on-site, or off-site at a readily available location if approved by the CUPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection. 23 CCR 2716(f)
- 2030012 Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). 23 CCR 2715(c)(2)
- 2030013 (TCR 12) Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR, 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days. 23CCR 2716 (a-e)
- 2030015 Failure to demonstrate to the CUPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f). 23 CCR 16 2630(d), 2643(f), 2644.1(a)(2)
- 2030035 Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills. HSC 25292.1(a)
- 2030073 Failure to implement the corrections specified in the inspection report within 30 days of receiving an inspection report from either the CUPA or special inspector. 23 CCR 16 2712(f)
- 2030066 Failure to take appropriate action to repair and retest any leaking UST component which is discovered from an enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(d), 25292.5(c)

### UST TANK (DW/SW) - REQUIREMENT

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030001	(TCR 9d) Failure to maintain monitoring and maintenance records for release detection and/or maintain records of appropriate follow-up actions. 23 CCR 2712(b)(1-2)
<input type="checkbox"/> 2030059	Failure to meet the conditions required to exempt an emergency generator tank system in a below-grade structure from UST regulations. HSC 25281.6(a)
<input type="checkbox"/> 2060005	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. HSC 25291(b)
<input type="checkbox"/> 2060007	Failure of primary or integral secondary containment to be approved for use by an independent testing organization or failure of non integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry code or engineering standard. 23 CCR 2631(b), 2631(d), 2666(b)(2), 2666(e)(2)
<input type="checkbox"/> 2030007	Failure to submit and/or maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(j), 2631.1(b)
<input type="checkbox"/> 2030036	(TCR 9b) Failure to comply with one or more of the following overflow prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/ retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overflow prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overflow prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)
2 <input checked="" type="checkbox"/> 2060020	(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2
<input type="checkbox"/> 2030008	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003. HSC 25290.1(c)(3), 25290.2(c)(3)
<input type="checkbox"/> 2060015	(TCR 9d) Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity. 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2030016	(TCR 9d) Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system. 23 CCR 2631(g), 2632(c)(2)(A-B)
<input type="checkbox"/> 2030017	(TCR 9d) Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC). 23 CCR 2636(f)
<input type="checkbox"/> 2030022	(TCR 9d) Failure to conduct groundwater and/or vadose zone monitoring or maintain site assessment as required. 23 CCR 2647(a), 2648(a), 2712(b)(4)
<input type="checkbox"/> 2030029	(TCR 9c) Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. Maintain records for the life of the tank. 23 CCR 2663, 2712(b)(6).
<input type="checkbox"/> 2060024	UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1, 2660(m); HSC 25290.1(c)(1), 25290.2(c)(1), 25291(a)(1)
<input type="checkbox"/> 2030040	(TCR 9d) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2060022	Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d); 23 CCR 2630(d)
<input type="checkbox"/> 2030065	(RD) Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring. HSC 25290.1(e); 23 CCR 2630(d)
<input type="checkbox"/> 2060023	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d); 23 CCR 2630(d)
<input type="checkbox"/> 2060029	Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required. 23 CCR 2666(b)(2)

### UST TANK (SW) REQUIREMENTS

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/30/2020 PAGE 7 OF 7  
 RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030005	(TCR 9d) Option 1: Failure of the continuous in-tank leak detection (CITLD) system to perform a 0.2 gallon-per-hour leak test that determines the leak status of the tank at least once every 30 days. 23CCR 2643(b)(3)
<input type="checkbox"/> 2030006	(TCR 9d) Option 1: Failure of the automatic tank gauging (ATG) system to perform valid 0.2 gallon-per-hour leak tests or generate hard-copy test reports at least once every 30 days. 23 CCR 2643(b)(1)
<input type="checkbox"/> 2030056	Option 2: Failure to submit the statistical inventory reconciliation (SIR) Report every 12 months to the CUPA. 23 CCR 2646.1(j)
<input type="checkbox"/> 2030057	Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)
<input type="checkbox"/> 2030058	(TCR 9d) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated every 30 days, capable of detecting a 0.2 gallon per hour release, report a quantitative leak rate using a threshold value that does not exceed one-half the minimum detectable leak rate, conduct a tank integrity test every 24 months, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. 23 CCR 2643(b)(2), 2646.1(a-h) (j-k)

### UST PRESSURIZED PIPING (DW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030018	(TCR 9d) Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)
<input type="checkbox"/> 2030025	(TCR 9d) Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly. with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected. 23 CCR 2636(f)(2)
<input type="checkbox"/> 2030075	(TCR 9d) Failure of the functional line leak detector (LLD) to monitor at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping or triggers a visual and audible alarm. 23 CCR 2636(f), 2666(c) and (f)
<input type="checkbox"/> 2030076	Failure to meet the conditions required to exempt a tank system located in a below-grade structure from UST regulations. HSC 6.7 25283.5(a)
<input type="checkbox"/> 2060012	(TCR 9d) Failure to install a line leak detector (LLD). 23 CCR 2636(f)(2), 2636(f)(5)(B), 2643(c)(1), 2666(f); HSC 25290.1(h), 25290.2(g), 25291(f), 25292(e)
<input type="checkbox"/> 2030042	(TCR 9d) Option 1: Failure to perform one of the following line integrity test: A 12 month test for pressurized double-walled piping that does not utilize fail safe or positive shut down. Within 30 days of the date of the completion of a repair to the primary piping. 23 CCR 2636(f)(4)(3); 2643(c)(3); HSC 25290.2(g), 25291(f), 25292(e)
<input type="checkbox"/> 2030020	Option 3: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated but no less than monthly and maintains a log of inspection results for review by the CUPA HSC 6.7 25281.5(b)(3)

### UST PRESSURIZED PIPING (SW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030027	(TCR 9d) Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to meet the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and shut down the pump when a leak is detected or when the LLD fails or is disconnected. 23 CCR 2666(c), 2643(c)(1)
<input type="checkbox"/> 2030052	(TCR 9d) Option 3: Failure to perform one or more of the following on a single-walled pressurized piping system: A 0.1 gallons per hour test at least once every 12 months unless a 0.2 gallons per hour test is performed every 30 days. A 0.1 gallons per hour test within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(c)(2-3), 2661(f); HSC 25292(e)(2)
<input type="checkbox"/> 2030053	(TCR 9d) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b)

### UST PIPING (SW) REQUIREMENTS - CONVENTIONAL SUCTION

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030050	(TCR 9d) Failure to conduct 0.1 gallon per hour piping integrity test at any of the following times: Every 36 months. Within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(d), 2661(f)
<input type="checkbox"/> 2030049	(TCR 9d) Failure to conduct monitoring and maintain written records. 23 CCR 2643(d)

### UST PIPING (SW) REQUIREMENTS - GRAVITY

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030051	(TCR 9d) Failure to conduct 0.1 gallon per hour line piping integrity test at any one of the following times: Every 24 months. Within 30 days of the date of completion of a repair of the piping. 23 CCR 2643(e) , 2661(f)

### UST SYSTEM - CATHODIC PROTECTION REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030009	(TCR 9c) Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly and inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer's instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the CUPA. 23 CCR 2635(a)(2), 2636(b), 2662(c)(1)(B), 2712(b)(3)

### UST SYSTEM - CLOSURE

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030063	Failure to comply with temporary closure requirements. HSC 25298; 23 CCR 2670(b)(d-j), 2671(a-e)
<input type="checkbox"/> 2030038	Failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670(c-j) , 2672(a-e)

### RECORD COMMENT:

7/7/20: AMC/SB testing & PC 1753 FINAL (inspection 8 of 8)--passed. Inspection marked as reinspection (no reinspection fee). On-site with Tim Montijo (ECS) & Jason Sandoval (Co-Owner). All elements of testing passed (violations from 6/30/20 now corrected). The following docs were received today in person: ELD results (Verdugo), as-builts, and Xerxes installation checklist (fwd to Steve Camba). Certification of Tank System Installation was uploaded to CERS on 7/5/20 by Mark Kunze, but additional corrections are needed in CERS before acceptance. Currently, tank contents, product piping, and site plan is still incorrect.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

### INTRODUCTION:

#### ANNUAL MONITORING CERTIFICATION/PLAN CHECK FINAL INSPECTION #1753

The Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for the County of San Diego.

[http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html)

California Environmental Reporting System (CERS): <http://cers.calepa.ca.gov/>

On 7/7/2020, I performed a CUPA Underground Storage Tank (UST) inspection at Summit Gasoline of San Diego and witnessed the annual monitoring certification (AMC) and spill bucket testing of the USTs located here. On site for inspection: Jason Sandoval (Co-Owner), Tim Montijo (UST Technician for ECS Testing), and Scott Gorney (Deputy Fire Marshal for the City of San Diego). Consent to inspect was granted by Jason Sandoval. This site is a retail gas station with convenience store & car wash.

This inspection report is also serving as the final inspection for UST Plan Check Permit #1753, which incorporates the following site changes: installation of 1 UST and associated piping, full re-pipe of the product/vapor/vent lines, installation of 8 new under dispenser containments (UDCs), and tank content changes (91 12,000-gal tank to diesel, and 87 20,000-gal tank to 91). The overseeing contractor for this project is Mark Kunze of Southwest Contracting (not present for today's inspection).

The scope of this inspection covers UST requirements per HSC Chapter 6.7 and CCR Title 23, Chapter 16. Compliance with Hazardous Materials Business Plan (HMBP) & hazardous waste (HW) requirements will be evaluated at a later inspection.

### UST REMARKS:

AMC performed by Tim Montijo of ECS Testing: ICC #1047782, Exp. 12/23/2021 | VMI #3569, Exp. 7/16/2020 | Veeder Root #A28033, Exp. 4/15/2021

### Tanks on site, as currently reported in CERS (submittal date 7/5/2020):

- Tank #31516, Capacity: 20000 gallons, Contents: regular unleaded gasoline (87) -- observed as containing 91
- Tank #31517, Capacity: 12000 gallons, Contents: premium unleaded gasoline (91) -- split tank -- observed as containing diesel
- Tank #31518, Capacity: 10000 gallons, Contents: regular unleaded gasoline (87) -- split tank -- currently programmed as 87 master tank
- Tank #31519, Capacity: 40000 gallons, Contents: regular unleaded gasoline (87) -- NEW; INSTALLED 2/27/2020 -- pumps fuel

directly to the 10000-gal 87 tank.

Note: UST annular spaces are brine-monitored. The turbine sump of the 10000-gal 87 UST is double-walled (DW) and brine-monitored, while the turbine sump of the 12000-gal diesel UST is single-walled.

### Monitoring Components Tested & Passed:

Liquid Sensors for turbine sumps, fill sumps, annular spaces, and 8 UDCs; brine sensors; ELLDs; vacuum sensors for piping; lake test for spill buckets; fail safe; sensor out. UDC & turbine sump sensors initiate positive shut-off.

Tank Overfill: automatic tank gauges set off audible/visual alarm at 90%

### Documents reviewed on site:

Overfill Prevention Equipment Inspection Report, dated 6/6/2019

Designated UST Operator Employee Training Record, dated 5/14/2020

Designated UST Operator 30-day inspection records

### **INSPECTION REMARKS:**

#### **The following is needed before issuance of the new UST Operating Permit:**

- Correct the tank contents & product piping material in CERS (currently shows old contents & flex piping material)
- UST Monitoring Site Plan still shows incorrect tank contents--please amend
- Certification of Tank System Installation (to be entered in CERS)
- Monitoring Certification Report
- Spill Container Test Report
- Overfill Prevention Equipment Inspection Report
- 6-month post-construction Secondary Containment Test report
- Line Integrity Test results
- As-builts
- Enhanced Leak Detection results
- Tank Manufacturer's Installation Checklist

Note: The next AMC & spill bucket testing shall be done by June 2021.

*Due to current HMD inspection guidance, facility representative signature will not be collected for this report.*

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). The following statements describe significant violations. This notice requires a formal written response and corrective action within the times specified.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Martha Sealy TITLE: Manager

### INTRODUCTION:

This was a routine annual compliance inspection for underground storage tanks, hazardous materials and hazardous waste. The Hazardous Materials Division (HMD) of the Department of Environmental Health is the Certified Unified Program Agency (CUPA) for the County of San Diego. As the local CUPA, the HMD implements the Unified Program in the County and regulates businesses that manage hazardous materials, hazardous wastes, aboveground petroleum storage tanks, and underground storage tanks (UST) . Additional information on the CUPA program can be found here: [http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html).

Ms. Martha Sealy, Store manager, gave consent for inspection, documents review, photographs, and copying as needed. The scope of this inspection included witnessing annual UST monitoring system certification performed by Tim Montijo of ECS: ICC #1047782, Exp. 12/23/2021 | VMI #3569, Exp. 7/23/2022 | Veeder Root #A28033, Exp. 3/30/2023, hazardous waste generation and hazardous materials business plan (HMBP).

Summit Gasoline of San Diego is a retail gas with four (4) underground storage tanks and generates fuel contaminated solids and water/fuel as their hazardous wastes.

### VIOLATION # 1

2030062 (TCR 9d) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)

**Underground Storage Tanks: 31516**

**Classification:** Class I

### Observations:

87 STP sump 208 sensor found restrained by hanger up the tank curve. The sump is equipped with a sensor sleeve at sump low point. Liquid was observed below the sleeve with the sensor located touching the tank top but above the liquid. The sensor was returned to the sleeve and immediately alarmed. The liquid was tested with Gasolia fuel paste with a positive result for the presence of fuel. DO report stated that Tom Fysh responded to the last fuel alarm in the sump (2 to 1 installed for fuel and brine sensors) on 2/19/2021. The invoice stated 2 gallons of fuel was pumped out. Alarm history indicates a L8 low liquid alarm on 2/21/2021 with no service record available. Manager, Martha Sealy, stated that she would request that service technicians allow for staff to view sensor placement before sumps are closed going forward.

### Corrective Action Completed During Inspection:

Fuel was remove and placed in hazardous waste drum and certified sensor was returned to sleeve at sump low point. Ensure all leak detection is properly located to allow for alarm at the earliest possible time.

You must submit a written response within 30 days (or as specified) addressing all violations noted. The written response must demonstrate all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. The County may initiate formal enforcement action including the imposition of substantial penalties for any significant violations addressed in this notice. Any violations that are not promptly corrected will result in liability for additional days in violation and additional penalties. Any failure to provide the information requested will also be a factor in determining penalties. For these purposes, "significant violations" include violations that represent a significant threat to human health or safety or the environment, chronic violations, violations committed by a recalcitrant violator and Class I hazardous waste violations (CCR 66260.10 and H&SC 25110.8.5).

CONSENT TO CONDUCT INSPECTION GRANTED BY: Martha Sealy TITLE: Manager

### VIOLATION # 2

2030013 (TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)

Underground Storage Tanks: 31516

Classification: Class II

### Observations:

DO failed to address/document technician response to 2/21/2021 brine low liquid alarm and/or secure documentation of certified technician response or document sump inspection to verify sump condition and proper sensor placement. 3/9/2021 DO report acknowledges low liquid alarm on 2/21 and indicates the alarm was clear at DO inspection. I spoke with the DO (Tim Montijo) who stated he called Mr. Fysh who indicated the alarm was addressed but no documentation of a response to the 2/21/2021 liquid alarm could be locate during this inspection. Mr. Monitjo stated he would adjust his inspection procedures/reports to ensure follow up and receipt of documentation for service going forward.

### Corrective Action Completed During Inspection:

Ensure all alarm responses by certified technicians are documented and documentation is available at inspection. If no such documentation is obtainable ensure the DO inspects the location of the alarm to verify containment condition and sensor location.

### INSPECTION REMARKS:

Monitoring elements tested and certified: failsafe/sensor out, 16 liquid sensors (208), 3 annular sensors (301), 3 brine sensors (304) at some sumps, 6 "S" sensors for liquid and vacuum, 0 automatic tank gauges (ATG) with A/V alarms (SW V&V no flappers), 3 electronic line leak detectors and 4 spill buckets. System running software version 335.00 during this inspection.

# COUNTY OF SAN DIEGO

## SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

UST operating permit valid through 12/09/2022.

Secondary containment testing (SCT) conducted on 6/4/2018, ensure testing is preformed within required time frames. SCT due this month. If testing is conducted after June a violation for late testing maybe issued. Ensure testing anniversary remains in June if conducted late. System is a hybrid system with newer elements monitored by VPH.

Overfill inspection conducted on 7/7/2020 with next inspection due on or before 36 month anniversary of inspection date.

All CERS elements in accepted status with next annual review and certification due on or before 7/3/2021.

**\*\*Submit Monitoring Certification Report to the Hazardous Materials Division within 30 days.\*\***  
Be sure to maintain a copy on site.

EPA ID valid per DTSC website and BOE number provided by facility in CERS. Ensure your EPA ID is verified annually. You can visit the DTSC website at <https://evq.dtsc.ca.gov/Home.aspx> to check the status of your number.

Compliance binder and monthly DO reports available and reviewed.

## COMPLIANCE INSPECTION REPORT Underground Storage Tank (UST) Program

INSPECTION DATE: 06/29/2021  
RECORD ID #: DEH2003-HUPFP-201381

PAGE 6 OF 8

FACILITY NAME: \*Summit Gasoline of San Diego

ADDRESS: \* 3580 SPORTS ARENA BLVD

CITY/ZIP: \*SAN DIEGO

92110

VIOLATION REPORT: Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or the San Diego County Code (SDCC) indicated in italics. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.

#	VIOLATION DESCRIPTION
<input type="checkbox"/> HMD3101	Unified Program Facility Permit not obtained &/or maintained for UST. HSC 25284(a), SDCC 68.904; 68.905; 68.906; 68.907; 68.907.1; 68.1003(a); 68.1005

<input type="checkbox"/> 2030064	Failure to notify the CUPA 48 hours prior to testing or inspection of overfill prevention equipment. 23 CCR 2637(g), 2637.1(f), 2637.2(f), 2638(e), 2643(g), 2644.1(a)(4)
<input type="checkbox"/> 2030021	Failure to obtain a valid operation permit from the CUPA including but not limited to unpaid permit fees. HSC 25284(a)(1); 23 CCR 2711(d); SDCC 68.1003
<input type="checkbox"/> 2030078	Failure to retain a paper or electronic copy of the permit to operate at the facility. 23 CCR 2712(i)
<input type="checkbox"/> 2030039	Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system. 23 CCR 2712(a)(b)(f)(i)(j)(k)
<input type="checkbox"/> 2060001	Failure to submit as-built plans for the location and orientation of the tanks and appurtenant piping systems for new installations and/or with the permit application. 23 CCR 2635(e)(8)
<input type="checkbox"/> 2010010	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit. 23 CCR 2711; HSC 6.7 25284 (c), 25286(c)
<input type="checkbox"/> 2010007	(TCR 11) Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance. HSC 25292.2(a), 25299.30-34; 23 CCR 2711(a)(11), 2808.1, 2809-2809.2
<input type="checkbox"/> 2030037	Failure to implement or maintain a written agreement between the UST owner and operator. 23 CCR 2620(b); HSC 6.7 25284(a)(3)(A-B)
<input type="checkbox"/> 2010012	Failure to maintain UST records in sufficient detail to enable the CUPA to determine whether the UST systems are in compliance. HSC 25293
<input type="checkbox"/> 2010013	Failure to have an approved UST Monitoring Plan. 23 CCR 2632(d)(1), 2634(d), 2641(h)
<input type="checkbox"/> 2010014	Failure to have an approved UST Response Plan. 23 CCR 2632(d)(2), 2634(e), 2641(h)
<input type="checkbox"/> 2010015	Failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the CUPA. 23 CCR 2715(C)(3-4)
<input type="checkbox"/> 2010016	(TCR 10) Failure to submit the "Underground Storage Tank Statement of Understanding and Compliance Form." 23 CCR 2715(a)(1)(A), 2715(a)(2)
<input type="checkbox"/> 2010017	Failure to submit a copy of the spill containment test results on the "Spill Container Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637.1(d), 2637.1(e)
<input type="checkbox"/> 2010018	Failure to submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the CUPA within 30 days after the inspection. 23 CCR 2637.2(d-e), 2665(a-b)
<input type="checkbox"/> 2030033	Failure to have current UST Monitoring Plan available readily accessible at the facility. 23 CCR 2712(i)
<input type="checkbox"/> 2030046	Failure to submit a current UST Response Plan available on site. 23 CCR 2712(i), 2632(d)(2), 2634(e), 2641(h)
<input type="checkbox"/> 2030041	Failure to submit or maintain a current facility plot plan. 23 CCR 2632(d)(1)(C), 2641(h)
<input type="checkbox"/> 2030002	(TCR 9d) Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vacuum, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.). 23 CCR 2638(a)(b), 2641(j), 2715(f).
<input type="checkbox"/> 2030074	Failure to submit the "Monitoring System Certification Form" to the CUPA within 30 days of completion of the test. 23 CCR 2638(c-d)
<input type="checkbox"/> 2030003	Failure of the leak detection equipment to have an audible and visual alarm as required. 22 CCR 2632(c)(2)(B), 2634(d)(1)(A), 2636(f)(1)
<input type="checkbox"/> 2060002	(TCR 9d) Failure to outfit the single-walled UST system with a monitoring system capable of detecting a leak. HSC 25292(a); 23 CCR 2641(e)
<input type="checkbox"/> 2010003	(TCR 10) Failure to submit the "Designated Underground Storage Tank Operator Identification Form" within 30 days of installing a UST system or within 30 days of a change in DO. 23 CCR 2715(a)(1)(B), 2715(a)(3)
<input type="checkbox"/> 2010009	Failure to submit a copy of the secondary containment test results on the "Secondary Containment Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637(e-f)
<input type="checkbox"/> 2030048	(TCR 9d) Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation, and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months. 23 CCR 2637(a)(c)(d), 2637(b-d), 2712(b)(1)(F)
<input type="checkbox"/> 2030034	Failure to properly affix tag/sticker on each piece of monitoring equipment being certified, repaired, or replaced. 23 CCR 2638(f)
<input type="checkbox"/> 2030044	Owner/operator deposited or allowed deposit of petroleum or a hazardous substance into a UST that has a red tag affixed to the fill pipe. 23 CCR 16 2717.1(f), HSC 6.7 25292.3(c)
<input type="checkbox"/> 2030047	Failure to maintain secondary containment (e.g. failure of secondary containment testing). HSC 25290.1(c)(2), 25290.2(c)(2), 25291(a), 25291(e)
<input type="checkbox"/> 2030079	Owner/Operator allowed dispensing of petroleum or a hazardous substance from a UST that has a red tag affixed to the fill pipe. HSC 6.7 25292.3(c)(1)(C)
<input type="checkbox"/> 2030077	(TCR 9d) Failure to notify the CUPA within 24 hours upon discovery of a reportable unauthorized release or failure to prepare a report within five working days. HSC 6.7 25295(a)(1); 23 CCR 2650(e), 2652(b)
<input type="checkbox"/> 2030061	Failure to record any unauthorized release from the primary containment. HSC 6.7 25294
<input type="checkbox"/> 2010005	Failure to submit enhanced leak detection testing results to the board and the CUPA within 60 days of completion of the test. 23 CCR 2644.1(a)(5)
<input type="checkbox"/> 2030068	Failure to conduct the required initial or periodic enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(a), 25292.5(a); 23 CCR 2640(e), 2644.1(a)
<input type="checkbox"/> 2060008	Failure to perform enhanced leak detection testing before the tank is placed in use. HSC 25290.1(j)
<input type="checkbox"/> 2010008	Failure to maintain records of repairs, linings, and upgrades on site, or off site if approved by the CUPA, for the life of the UST. 23 CCR 16 2712(b)(6)
1 <input checked="" type="checkbox"/> 2030062	(TCR 9d) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)
<input type="checkbox"/> 2010006	Owner/operator made false statements, representation, or certification on an application, record, or other document. HSC 25299(a)(8), 25299(b)(7)(f)
<input type="checkbox"/> 2030043	(TCR 9d) Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained in accordance with manufacturer's instructions. 23 CCR 2638(a), 2641(j)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### UST Program (continued)

- 2010004 (TCR 12) Failure to maintain on-site, or off-site at a readily available location if approved by the CUPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection. 23 CCR 2716(f)
- 2030012 Failure to comply with one or more of the following: Provide initial training before the individual performs the duties of a facility employee. Train facility employees in the proper operation and maintenance of the underground storage tank system at least once every 12 months. Have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). 23 CCR 2715(c), 2715(c)(1), 2715(c)(2)
- 2  2030013 (TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)
- 2030015 Failure to demonstrate to the CUPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f). 23 CCR 16 2630(d), 2643(f), 2644.1(a)(2)
- 2030035 Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills. HSC 25292.1(a)
- 2030073 Failure to implement the corrections specified in the inspection report within 30 days of receiving an inspection report from either the CUPA or special inspector. 23 CCR 16 2712(f)
- 2030066 Failure to take appropriate action to repair and retest any leaking UST component which is discovered from an enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(d), 25292.5(c)

### UST TANK (DW/SW) - REQUIREMENT

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030001	(TCR 9d) Failure to maintain monitoring and maintenance records for 36 months and records pertaining to the release detection system, such as written performance claims, calibration, and maintenance records for at least 60 months. 23 CCR 2712(b)(1-2)
<input type="checkbox"/> 2030059	Failure to meet the conditions required to exempt an emergency generator tank system in a below-grade structure from UST regulations. HSC 25281.6(a)
<input type="checkbox"/> 2060005	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. HSC 25291(b)
<input type="checkbox"/> 2060007	Failure of primary or integral secondary containment to be approved for use by an independent testing organization or failure of non integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry code or engineering standard. 23 CCR 2631(b), 2631(d), 2666(b)(2), 2666(e)(2)
<input type="checkbox"/> 2030007	Failure to submit and/or maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(l), 2631(j), 2631.1(b), 2640.1, 2711(c), 2712(b)(5)
<input type="checkbox"/> 2030036	(TCR 9b) Failure to comply with one or more of the following overflow prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/ retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overflow prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overflow prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(g)
<input type="checkbox"/> 2060020	(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2
<input type="checkbox"/> 2030008	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003. HSC 25290.1(c)(3), 25290.2(c)(3)
<input type="checkbox"/> 2060015	(TCR 9d) Failure of leak detection equipment to be installed, maintained and located such that the equipment is capable of detecting a leak at the earliest possible opportunity. 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2030016	(TCR 9d) Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system. 23 CCR 2631(g), 2632(c)(2)(A-B)
<input type="checkbox"/> 2030017	(TCR 9d) Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC). 23 CCR 2636(f)
<input type="checkbox"/> 2030022	(TCR 9d) Failure to conduct groundwater and/or vadose zone monitoring or maintain site assessment as required. 23 CCR 2647(a), 2648(a), 2712(b)(4)
<input type="checkbox"/> 2030029	(TCR 9c) Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. Maintain records for the life of the tank. 23 CCR 2663, 2712(b)(6).
<input type="checkbox"/> 2060024	UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1, 2660(m); HSC 25290.1(c)(1), 25290.2(c)(1), 25291(a)(1)
<input type="checkbox"/> 2030040	(TCR 9d) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2060022	Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d); 23 CCR 2630(d)
<input type="checkbox"/> 2030065	(TCR9d) Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vacuum, pressure, hydrostatic (VPH) monitoring. HSC 25290.1(e); 23 CCR 2630(d)
<input type="checkbox"/> 2060023	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d); 23 CCR 2630(d)
<input type="checkbox"/> 2060029	Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required. 23 CCR 2666(b)(2)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### UST Program (continued)

#### UST TANK (SW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030005	(TCR 9d) Option 1: Failure of the continuous in-tank leak detection (CITLD) system to perform a 0.2 gallon-per-hour leak test that determines the leak status of the tank at least once every 30 days. 23CCR 2643(b)(3)
<input type="checkbox"/> 2030006	(TCR 9d) Option 1: Failure of the automatic tank gauging (ATG) system to perform valid 0.2 gallon-per-hour leak tests or generate hard-copy test reports at least once every 30 days. 23 CCR 2643(b)(1)
<input type="checkbox"/> 2030056	Option 2: Failure to submit the statistical inventory reconciliation (SIR) Report every 12 months to the CUPA. 23 CCR 2646.1(j)
<input type="checkbox"/> 2030057	Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)
<input type="checkbox"/> 2030058	(TCR 9d) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated every 30 days, capable of detecting a 0.2 gallon per hour release, report a quantitative leak rate using a threshold value that does not exceed one-half the minimum detectable leak rate, conduct a tank integrity test every 24 months, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters annually. 23 CCR 2643(b)(2), 2646.1(a-h) (j-k)

#### UST PRESSURIZED PIPING (DW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030018	(TCR 9d) Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)
<input type="checkbox"/> 2030025	(TCR 9d) Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly, with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected. 23 CCR 2636(f)(2)
<input type="checkbox"/> 2030075	(TCR 9d) Failure of the functional line leak detector (LLD) to monitor at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping or triggers a visual and audible alarm. 23 CCR 2636(f), 2666(c) and (f)
<input type="checkbox"/> 2030076	Failure to meet the conditions required to exempt a tank system located in a below-grade structure from UST regulations. HSC 6.7 25283.5(a)
<input type="checkbox"/> 2060012	(TCR 9d) Failure to install a line leak detector (LLD). 23 CCR 2636(f)(2), 2636(f)(5)(B), 2643(c)(1), 2666(f); HSC 25290.1(h), 25290.2(g), 25291(f), 25292(e)
<input type="checkbox"/> 2030042	(TCR 9d) Option 1: Failure to perform one of the following line integrity test: A 12 month test for pressurized double-walled piping that does not utilize fail safe or positive shut down. Within 30 days of the date of the completion of a repair to the primary piping. 23 CCR 2636(f)(4)(3); 2643(c)(3); HSC 25290.2(g), 25291(f), 25292(e)
<input type="checkbox"/> 2030020	Option 3: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated but no less than monthly and maintains a log of inspection results for review by the CUPA HSC 6.7 25281.5(b)(3)

#### UST PRESSURIZED PIPING (SW) REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030027	(TCR 9d) Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to meet the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and shut down the pump when a leak is detected or when the LLD fails or is disconnected. 23 CCR 2666(c), 2643(c)(1)
<input type="checkbox"/> 2030052	(TCR 9d) Option 3: Failure to perform one or more of the following on a single-walled pressurized piping system: A 0.1 gallons per hour test at least once every 12 months unless a 0.2 gallons per hour test is performed every 30 days. A 0.1 gallons per hour test within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(c)(2-3), 2661(f); HSC 25292(e)(2)
<input type="checkbox"/> 2030053	(TCR 9d) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b)

#### UST PIPING (SW) REQUIREMENTS - CONVENTIONAL SUCTION

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030050	(TCR 9d) Failure to conduct 0.1 gallon per hour piping integrity test at any of the following times: Every 36 months. Within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(d), 2661(f)
<input type="checkbox"/> 2030049	(TCR 9d) Failure to conduct monitoring and maintain written records. 23 CCR 2643(d)

#### UST PIPING (SW) REQUIREMENTS - GRAVITY

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030051	(TCR 9d) Failure to conduct 0.1 gallon per hour line piping integrity test at any one of the following times: Every 24 months. Within 30 days of the date of completion of a repair of the piping. 23 CCR 2643(e), 2661(f)

#### UST SYSTEM - CATHODIC PROTECTION REQUIREMENTS

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030009	(TCR 9c) Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly and inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer's instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the CUPA. 23 CCR 2635(a)(2), 2636(b), 2662(c)(1)(B), 2712(b)(3)

#### UST SYSTEM - CLOSURE

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030063	Failure to comply with temporary closure requirements. HSC 25298; 23 CCR 2670(b)(d-j), 2671(a-e)
<input type="checkbox"/> 2030038	Failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670(c-j), 2672(a-e)

 TIME START: 12:45 PM END: 5:30 PM  
 SPECIALIST: Elaine Villena  
 INSPECTION CONTACT: Martha Sealy  
 TITLE: Manager  
 PHONE: (310) 440-3820  
 E-MAIL: martha@hrcfuel.com

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6. This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

**NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

CONSENT TO CONDUCT INSPECTION GRANTED BY: Martha Sealy TITLE: Manager

### INTRODUCTION:

#### ROUTINE INSPECTION/ANNUAL MONITORING CERTIFICATION

The Hazardous Materials Division (HMD) is the Certified Unified Program Agency (CUPA) for the County of San Diego.

[http://www.sandiegocounty.gov/deh/hazmat/hmd\\_cupa.html](http://www.sandiegocounty.gov/deh/hazmat/hmd_cupa.html)

California Environmental Reporting System (CERS): <http://cers.calepa.ca.gov/> | CERS ID: 10384024

On 6/7/2022, I performed a CUPA inspection at Summit Gasoline of San Diego and witnessed the annual monitoring certification (AMC) and spill bucket testing of the underground storage tanks (USTs) located here. Consent to inspect and to take photographs was granted by Martha Sealy (Manager). Also on site for inspection: Finn Moller (Founder). This site is a retail gas station with a convenience store and car wash.

Note: Due to current HMD Inspection Guidelines, facility representative signature will not be collected for this report.

#### At time of inspection, this facility appears subject to the following requirements:

- UST regulations, per Title 23 CCR, Chapter 16
- Hazardous Materials Business Plan (HMBP) for storing/handling hazardous materials in reportable quantities. HSC §25507
- Requirements as a Small Quantity Generator (SQG) that generates 0-100 kg/mo of hazardous wastes (HW). 40 CFR §260.10

#### HMBP/HW REMARKS:

HM/HW observed during inspection (aside from USTs):

Liquid carbon dioxide: 1 dewar about 6 ft tall  
 Waste test water mixed with gasoline: 2 x 55-gal drums  
 Waste gasoline-contaminated solids: 2 x 55-gal drums  
 Carwash detergents: 6 x 10-gal containers

1. Most recent full HMBP submittal in CERS is dated 6/6/2022 (pending further updates).
2. Training for HM/HW management reviewed. Last training session occurred on 6/2/22 and 6/6/22.
3. Hazardous waste manifests reviewed. Last available manifests were from 2019.

### UST REMARKS:

AMC performed by Tim Montijo of ECS (licenses current).

UST Operating Permit expires on 12/9/2022.

Site has 4 total USTs and 8 total dispensers with under dispenser containment (UDC). Fuel grades stored: 87 main, 87 siphon (vacuum/pressure/hydrostatically [VPH] monitored), 91, and B20. All sumps/UDCs monitored with VR-208 sensors. The 87 main tank is split with diesel and has a double-walled (DW) brine sump for the turbine sump. 87 piping is monitored under vacuum. Piping is monitored with electronic line leak detectors (ELLD). Tank annulars are monitored with brine. Monitoring Panel: Veeder-Root TLS-350, software version 335.00.

### Monitoring Components Tested & Passed:

Liquid Sensors for turbine sumps, fill sumps, annular spaces, and UDCs; brine sensors for 87 main turbine sump and 87 siphon sumps; vacuum sensors for 87 piping; ELLDs\*; lake test for spill buckets; fail safe; sensor out. UDC & turbine sump sensors initiate positive shut-off.

*\*See Remarks section for further actions needed for 87 ELLD.*

### UST records reviewed in CERS and on-site:

Facility and Tank Information page, UST Monitoring Plan, Monitoring Plot plan, Emergency Response Plan SB 989 (Secondary containment testing) reports (most recent routine test dated 7/13/2021; late) Overfill prevention testing records (most recent test dated 7/7/2020). Methods tested: audible-visual alarm Certification of Financial Responsibility, dated 5/15/2020

Letter from the Chief Financial Officer, dated 6/2/2022

Designated UST Operator (DUSTO) notification, 30-day reports, & employee training (last training performed on 6/2/22 and 6/6/22, provided by DUSTO Tim Montijo)

Maintenance/Repair Records, Alarm logs

### **VIOLATION # 1**

2030035 Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills. HSC 25292.1(a)

**Underground Storage Tanks:** 31519

**Classification:** Class II

### **Observations:**

The VPH-monitored 87 siphon tank was observed to have a small leak from one of the plugs at the top of the turbine. About 0.5 gallons of gasoline was pumped from the bottom of the sump (not enough to trigger alarm).

### **Corrective Action Completed During Inspection:**

The plug was tightened, which stopped the leak.

### VIOLATION # 2

2030048 (TCR 9d) Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation, and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months. 23 CCR 2637(a-d), 2712(b)(1)(F)

Underground Storage Tanks: 31516,31517,31518

Classification: Class II

#### Observations:

Per previous secondary containment test (SCT) dates and historically late testing, the routine SCT was due by March 2021 (outlined in the 6/30/2020 Compliance Inspection Report). The previous routine test date before that date was 6/4/2018.

As part of Plan Check #1753, a post-construction SCT was conducted on 8/4/2020, which omitted all of the non-VPH fill sumps.

ECS Testing performed a routine SCT on 7/13/2021, in which all non-VPH components passed testing. This test was done 4 months after March 2021. The fill sumps had not been tested since 37 months prior.

#### Corrective Action Completed During Inspection:

This violation is marked as corrected because the required testing has already been completed. Late testing does not reset the 36-month frequency. The next SCT shall be performed by March 2024 or earlier. Note: You may choose to perform tests more frequently than 36 months, but each routine test shall not exceed 36 months in between.

### VIOLATION # 3

3030007 Failed to properly label/date hazardous waste container &/or tank. 22 CCR 66262.34(f)

Classification: Minor

#### Observations:

See Photos 1-2 at the end of this report. I observed a total of 6 x 55-gal drums in the dumpster enclosure of this facility. 2 of them were empty, but the other 4 felt full of contents, and had illegible labels.

#### Corrective Action Due By:07/07/2022

All hazardous wastes must be labeled with the following information:

- The words: "HAZARDOUS WASTE"
- Name and address of the facility generating the waste
- Waste accumulation start date
- Physical state
- Composition (i.e. contents)
- Hazard Classification (e.g. flammable, toxic, corrosive, reactive, etc.)

Within 30 days, provide photographs demonstrating that all identified hazardous waste containers have been labeled appropriately.

### VIOLATION # 4

3030010 Failed to properly dispose of hazardous waste within 180 days (or 270 days if waste is transported over 200 miles). 22 CCR 66262.34(d); HSC 6.5 25123.3(h)(1)

Classification: Class II

### Observations:

See Photos 3-4 at the end of this report. The last hazardous waste manifests available were from 6/4/2019 and 6/5/2019. Per Martha Sealy (Manager), there were no other manifests available for review. During inspection, I observed 4 x 55-gal drums that were all almost full. It appears that this facility has exceeded the storage time limit of 180 days.

Reminder: At least 20 gal of test water is generated during annual testing. Additional test water is generated during the triennial secondary containment testing.

### Corrective Action Due By: 07/07/2022

As soon as possible, contact your licensed hazardous waste hauler to schedule a pick up of the hazardous wastes on site. Within 30 days, send a copy of the resulting hazardous waste manifest to my attention at Elaine.Villena@sdcounty.ca.gov.

Ensure that you provide your hauler with the correct EPA ID number.

### VIOLATION # 5

3030019 Failed to inspect hazardous waste storage area at least weekly. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(2), 265.174

Classification: Minor

### Observations:

Per the observations made in Violations 3-4 above (inadequate HW labeling, and exceedance of HW storage times), it does not appear that the facility personnel is adequately inspecting the hazardous waste storage area on a weekly basis.

### Corrective Action Due By: 07/07/2022

Immediately start inspecting the hazardous waste storage area on a weekly basis.

You may utilize the following chart to aid with performing weekly inspections:

[https://www.sandiegocounty.gov/content/dam/sdc/deh/hmd/pdf/HM-9322%20\(08-10\).pdf](https://www.sandiegocounty.gov/content/dam/sdc/deh/hmd/pdf/HM-9322%20(08-10).pdf)

Within 30 days, send proof of completion to my attention at Elaine.Villena@sdcounty.ca.gov.

### VIOLATION # 6

1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25507(a); 25508.1(a-b); 19 CCR 2654 (a) or (d)

Classification: Class II

### Observations:

See Photo #5 at the end of this report. I observed a liquid carbon dioxide dewar for beverage carbonation, about 6 feet tall. This dewar appears to exceed the hazardous material reporting threshold of 3500 cubic feet.

### Corrective Action Due By: 07/07/2022

Within 30 days, add liquid carbon dioxide to the Inventory. Contact your supplier for the exact capacity of your unit. REMINDER: Liquid carbon dioxide must be reported in gallons.

Additionally, in the Inventory, please make the following changes:

- SOAP (CAR WASH): the largest container observed was 10 gallons in capacity (total of 6 containers)
- DIESEL NO. 2: Martha Sealy (Manager) confirmed that B20 is stored on site

### INSPECTION REMARKS:

#### Minor violation corrected on site:

2030013 Failure of the owner/operator to sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)

None of the Designated Operator (DO) reports from the last 12 months have been signed by an owner/operator. Martha Sealy

(Manager) signed the most recent DO report, dated 5/11/2022. She verbally acknowledged that a facility representative will sign future DO reports within 72 hours of receipt.

### ACTION ITEMS & OTHER REMARKS

(a) The following updates are required in CERS within 30 days (in addition to the changes needed in Violation #5):

- The EPA ID number is currently reported as CAL000355401, which is inactive. The Hazardous Waste Tracking System (HWTS) shows an active number for this address as CAL000468887. Please update this in the "Business Activities" section.
- Site map (under the Hazardous Materials Inventory section) needs to reflect the correct placement of the fuel grades.
- Per Martha Sealy (Manager), this site had been dispensing B20 all along, and had the mistaken branding & stickering updated in December 2021 (previously diesel #2). Please update tank #31517 to reflect the tank contents as B20 ("B6-B99"). Please also ensure that the Plot Plan is updated.

(b) Per Technician Tim Montijo, the 87 ELLD was unable to be tested due to an electrical issue that could not be fixed today. **This component must be tested by a licensed UST technician by the end of the month (June 2022). Notify HMD 48 hours prior to retesting.**

(c) Test water from spill buckets (20 gal) and rain water from sumps were managed as hazardous waste and left on-site in designated container.

(d) Be advised, if the facility generates any amount of hazardous waste from damaged, spilled, returned, or otherwise unsaleable products, the wastes must be reported in CERS and properly managed as hazardous waste.

(e) Send results of today's testing to my attention within 30 days.

(f) Next routine secondary containment testing (SCT) of the non-VPH components is due no later than March 2024. Next routine overfill prevention equipment inspection of the audible-visual alarms is due no later than July 2023.

(g) Please be advised, if the violations cited are not corrected within 30 days, or in a timely manner if approved by HMD, minor violations can be escalated to Class II violations, and Class II violations can be escalated to Class I violations. A formal Notice of Violation (NOV) will be issued for all Class I violations. NOV's are subject to enforcement and fines.

<input type="checkbox"/> 2010015	Failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the CUPA. 23 CCR 2715(C)(3-4)
<input type="checkbox"/> 2010016	(TCR 10) Failure to submit the "Underground Storage Tank Statement of Understanding and Compliance Form." 23 CCR 2715(a)(1)(A), 2715(a)(2)
<input type="checkbox"/> 2010017	Failure to submit a copy of the spill containment test results on the "Spill Container Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637.1(d), 2637.1(e)
<input type="checkbox"/> 2010018	Failure to submit a copy of the overfill prevention equipment inspection results on the "Overfill Prevention Equipment Inspection Report Form" to the CUPA within 30 days after the inspection. 23 CCR 2637.2(d-e), 2665(a-b)
<input type="checkbox"/> 2030033	Failure to have current UST Monitoring Plan readily accessible at the facility. 23 CCR 2712(i)
<input type="checkbox"/> 2030046	Failure to submit a current UST Response Plan or make readily accessible at the facility. 23 CCR 2712(i), 2632(d)(2), 2634(e), 2641(h)
<input type="checkbox"/> 2030041	Failure to submit or maintain a current facility plot plan. 23 CCR 2632(d)(1)(C), 2641(h)
<input type="checkbox"/> 2030002	(TCR 9d) Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vacuum, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.). 23 CCR 2638(a)(b), 2641(j), 2715(f).
<input type="checkbox"/> 2030074	Failure to submit the "Monitoring System Certification Form" to the CUPA within 30 days of completion of the test. 23 CCR 2638(c-d)
<input type="checkbox"/> 2030003	Failure of the leak detection equipment to have an audible and visual alarm as required. 22 CCR 2632(c)(2)(B), 2634(d)(1)(A), 2636(f)(1)
<input type="checkbox"/> 2060002	(TCR 9d) Failure to outfit the single-walled UST system with a monitoring system capable of detecting a leak. HSC 25292(a); 23 CCR 2641(e)
<input type="checkbox"/> 2010003	(TCR 10) Failure to submit the "Designated Underground Storage Tank Operator Identification Form" within 30 days of installing a UST system or within 30 days of a change in DO. 23 CCR 2715(a)(1)(B), 2715(a)(3)
<input type="checkbox"/> 2010009	Failure to submit a copy of the secondary containment test results on the "Secondary Containment Testing Report Form" to the CUPA within 30 days after the test. 23 CCR 2637(e-f)
2 <input checked="" type="checkbox"/> 2030048	(TCR 9d) Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation, and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months. 23 CCR 2637(a-d), 2712(b)(1)(F)
<input type="checkbox"/> 2030034	Failure to properly affix tag/sticker on each piece of monitoring equipment being certified, repaired, or replaced. 23 CCR 2638(f)
<input type="checkbox"/> 2030044	Owner/operator deposited or allowed deposit of petroleum or a hazardous substance into a UST that has a red tag affixed to the fill pipe. 23 CCR 16 2717.1(f), HSC 6.7 25292.3(c)
<input type="checkbox"/> 2030047	Failure to maintain secondary containment (e.g. failure of secondary containment testing). HSC 25290.1(c)(2), 25290.2(c)(2), 25291(a), 25291(e)
<input type="checkbox"/> 2030079	Owner/Operator allowed dispensing of petroleum or a hazardous substance from a UST that has a red tag affixed to the fill pipe. HSC 6.7 25292.3(c)(1)(C)
<input type="checkbox"/> 2030077	(TCR 9d) Failure to notify the CUPA within 24 hours upon discovery of a reportable unauthorized release or failure to prepare a report within five working days. HSC 6.7 25295(a)(1); 23 CCR 2650(e), 2652(b)
<input type="checkbox"/> 2030061	Failure to record any unauthorized release from the primary containment. HSC 6.7 25294
<input type="checkbox"/> 2010005	Failure to submit enhanced leak detection testing results to the board and the CUPA within 60 days of completion of the test. 23 CCR 2644.1(a)(5)
<input type="checkbox"/> 2030068	Failure to conduct the required initial or periodic enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(a), 25292.5(a); 23 CCR 2640(e), 2644.1(a)
<input type="checkbox"/> 2060008	Failure to perform enhanced leak detection testing before the tank is placed in use. HSC 25290.1(j)
<input type="checkbox"/> 2010008	Failure to maintain records of repairs, linings, and upgrades on site, or off site if approved by the CUPA, for the life of the UST. 23 CCR 16 2712(b)(6)
<input type="checkbox"/> 2030062	(TCR 9d) Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. HSC 25299(a)(9); 23 CCR 2630(d)
<input type="checkbox"/> 2010006	Owner/operator made false statements, representation, or certification on an application, record, or other document. HSC 25299(a)(8), 25299(b)(7)
<input type="checkbox"/> 2030043	(TCR 9d) Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained in accordance with manufacturer's instructions. 23 CCR 2638(a), 2641(j)
<input type="checkbox"/> 2010004	(TCR 12) Failure to maintain on-site, or off-site at a readily available location if approved by the CUPA, copies of Designated Operator inspection records as follows: Designated operator monthly inspection records for inspections performed before October 1, 2018 must be kept for 12 months from the month of inspection. For inspections performed on or after October 1, 2018, copies of the "Designated Underground Storage Tank Operator Visual Inspection Report" must be kept for 36 months from the month of inspection. 23 CCR 2716(f)

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

### UST Program (continued)

- 2030012 Failure to comply with one or more of the following: Provide initial training before the individual performs the duties of a facility employee. Train facility employees in the proper operation and maintenance of the underground storage tank system at least once every 12 months. Have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO). 23 CCR 2715(c), 2715(c)(1), 2715(c)(2)
- 2030013 (TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)
- 2030015 Failure to demonstrate to the CUPA that the equipment and methods used to monitor the UST system are certified by an independent third-party as complying with the standards set forth in 23 CCR 2643(f). 23 CCR 16 2630(d), 2643(f), 2644.1(a)(2)
- 1  2030035 Failure to operate the UST system to prevent unauthorized releases including leaks, spills, and/or overfills. HSC 25292.1(a)
- 2030073 Failure to implement the corrections specified in the inspection report within 30 days of receiving an inspection report from either the CUPA or special inspector. 23 CCR 16 2712(f)
- 2030066 Failure to take appropriate action to repair and retest any leaking UST component which is discovered from an enhanced leak detection (ELD) test for UST systems located within 1,000 feet of a public drinking water well. HSC 25292.4(d), 25292.5(c)
- 2030032 Failure to meet one or more of the following requirements for exclusion of unburied fuel delivery piping at a marina: Conduct daily inspections of the piping and maintains a log of inspection results for review by the UPA. HSC 6.7 25281.5(b)(2)

### UST TANK (DW/SW) - REQUIREMENT

#	VIOLATION DESCRIPTION
<input type="checkbox"/> 2030001	(TCR 9d) Failure to maintain monitoring and maintenance records for 36 months and records pertaining to the release detection system, such as written performance claims, calibration, and maintenance records for at least 60 months. 23 CCR 2712(b)(1-2)
<input type="checkbox"/> 2030059	Failure to meet the conditions required to exempt an emergency generator tank system in a below-grade structure from UST regulations. HSC 25281.6(a)
<input type="checkbox"/> 2060005	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. HSC 25291(b)
<input type="checkbox"/> 2060007	Failure of primary or integral secondary containment to be approved for use by an independent testing organization or failure of non integral secondary containment to be designed and constructed to an engineering specification approved by a registered professional engineer or in accordance with a nationally recognized industry code or engineering standard. 23 CCR 2631(b), 2631(d), 2666(b)(2), 2666(e)(2)
<input type="checkbox"/> 2030007	Failure to submit and/or maintain documentation regarding positive statement of compatibility for UST system components. 23 CCR 2631(i), 2631(j), 2631.1(b), 2640.1, 2711(c), 2712(b)(5)
<input type="checkbox"/> 2030036	(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/ retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G)
<input type="checkbox"/> 2060020	(TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2
<input type="checkbox"/> 2030008	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003. HSC 25290.1(c)(3), 25290.2(c)(3)
<input type="checkbox"/> 2060015	(TCR 9d) Failure of leak detection equipment to be installed, maintained and located such that the equipment is capable of detecting a leak at the earliest possible opportunity. 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2030016	(TCR 9d) Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system. 23 CCR 2631(g), 2632(c)(2)(A-B)
<input type="checkbox"/> 2030017	(TCR 9d) Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC). 23 CCR 2636(f)
<input type="checkbox"/> 2030022	(TCR 9d) Failure to conduct groundwater and/or vadose zone monitoring or maintain site assessment as required. 23 CCR 2647(a), 2648(a), 2712(b)(4)
<input type="checkbox"/> 2030029	(TCR 9c) Failure to complete one or more of the requirements of tank lining, including but not limited to: submit proper written tank lining certification to the CUPA within 30 days of completion of the inspection, perform tank integrity test and/or vacuum test following lining, employ proper coatings expert and/or special inspector. Failure to inspect a steel tank which has been lined or repaired using the interior lining method within 10 years of lining and every 5 years after. Maintain records for the life of the tank. 23 CCR 2663, 2712(b)(6).
<input type="checkbox"/> 2060024	UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system. 23 CCR 2631.1, 2660(m); HSC 25290.1(c)(1), 25290.2(c)(1), 25291(a)(1)
<input type="checkbox"/> 2030040	(TCR 9d) Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling). 23 CCR 2630(d), 2641(a)
<input type="checkbox"/> 2060022	Failure of UST system installed on or after July 1, 2003 and before July 1, 2004 to comply with one or more of the following: be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment and/or capable of detecting water intrusion into the secondary containment. HSC 25290.2(d); 23 CCR 2630(d)
<input type="checkbox"/> 2030065	(TCR9d) Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vacuum, pressure, hydrostatic (VPH) monitoring. HSC 25290.1(e); 23 CCR 2630(d)
<input type="checkbox"/> 2060023	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment. HSC 25290.1(d); 23 CCR 2630(d)
<input type="checkbox"/> 2060029	Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required. 23 CCR 2666(b)(2)

### UST TANK (SW) REQUIREMENTS

#	VIOLATION DESCRIPTION
---	-----------------------

# COUNTY OF SAN DIEGO

## COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 06/07/2022 PAGE 14 OF 14  
RECORD ID #: DEH2003-HUPFP-201381

### UST Program (continued)

- 2030005 (TCR 9d) Option 1: Failure of the continuous in-tank leak detection (CITLD) system to perform a 0.2 gallon-per-hour leak test that determines the leak status of the tank at least once every 30 days. 23CCR 2643(b)(3)
- 2030006 (TCR 9d) Option 1: Failure of the automatic tank gauging (ATG) system to perform valid 0.2 gallon-per-hour leak tests or generate hard-copy test reports at least once every 30 days. 23 CCR 2643(b)(1)
- 2030056 Option 2: Failure to submit the statistical inventory reconciliation (SIR) Report every 12 months to the CUPA. 23 CCR 2646.1(j)
- 2030057 Option 2: When statistical inventory reconciliation results indicate failure or inconclusive, owner/operator failed to complete one or more of the following: notify CUPA of a possible release within 24 hours; submit copy of the report to the CUPA within 10 days; inspect records for errors and physically inspect the UST system within 24 hours; have meters recalibrated within 48 hours of receipt of report. 23 CCR 2646.1(d)
- 2030058 (TCR 9d) Option 2: Failure to meet one or more of the requirements of SIR, including but not limited to: measurements taken daily, calculated every 30 days, capable of detecting a 0.2 gallon per hour release, report a quantitative leak rate using a threshold value that does not exceed one-half the minimum detectable leak rate, conduct a tank integrity test every 24 months, conduct piping and or tank test within 15 days of receipt of two successive SIR reports which are inconclusive or which indicate a possible release and/or calibrate dispenser meters. 23 CCR 2643(b)(2), 2646.1(a-h) (j-k)

### UST PRESSURIZED PIPING (DW) REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030018 | (TCR 9d) Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at dispenser when a leak is detected. 23 CCR 2636(f)(1)   |
| <input type="checkbox"/> 2030025 | (TCR 9d) Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch within an hour and restrict or shut off the flow of product through the piping when a leak is detected. 23 CCR 2636(f)(2) |
| <input type="checkbox"/> 2030075 | (TCR 9d) Failure of the functional line leak detector (LLD) for emergency generator tank systems to monitor with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch within an hour and restrict or shut off the flow of product through the piping or triggers a visual and audible alarm. 23 CCR 2636(f), 2666(c) and (f)    |
| <input type="checkbox"/> 2030076 | Failure to meet the conditions required to exempt a tank system located in a below-grade structure from UST regulations. HSC 6.7 25283.5(a)  |
| <input type="checkbox"/> 2060012 | (TCR 9d) Failure to install a line leak detector (LLD). 23 CCR 2636(f)(2), 2636(f)(5)(B), 2643(c)(1), 2666(f); HSC 25290.1(h), 25290.2(g), 25291(f), 25292(e)  |
| <input type="checkbox"/> 2030042 | (TCR 9d) Option 1: Failure to perform one of the following line integrity test(s): A 12 month test for pressurized double-walled piping that does not utilize fail safe and positive shut down or within 30 days of the date of the completion of a repair to the primary piping. 23 CCR 2636(f)(4)(3); 2643(c)(3); HSC 25290.2(g), 25291(f), 25292(e)                     |
| <input type="checkbox"/> 2030020 | Option 3: Failure to meet one or more exemption requirements for emergency generator tank system unburied fuel piping: Conduct daily visual inspections each time the tank is operated but no less than monthly and maintains a log of inspection results for review by the CUPA HSC 6.7 25281.5(b)(3)   |

### UST PRESSURIZED PIPING (SW) REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030027 | (TCR 9d) Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to meet the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and shut down the pump when a leak is detected or when the LLD fails or is disconnected. 23 CCR 2666(c), 2643(c)(1)         |
| <input type="checkbox"/> 2030052 | (TCR 9d) Option 3: Failure to perform one or more of the following on a single-walled pressurized piping system: A 0.1 gallons per hour test at least once every 12 months unless a 0.2 gallons per hour test is performed every 30 days. A 0.1 gallons per hour test within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(c)(2-3), 2661(f); HSC 25292(e)(2) |
| <input type="checkbox"/> 2030053 | (TCR 9d) Option 3: Piping fails to meet one or more of the following requirements: below grade piping sloped to drain back into storage tank if the suction is released, only one check valve on the piping located directly below the suction pump, and inspection method which readily demonstrates compliance. 23 CCR 2636(a)(3) 2641(b)   |

### UST PIPING (SW) REQUIREMENTS - CONVENTIONAL SUCTION

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030050 | (TCR 9d) Failure to conduct 0.1 gallon per hour piping integrity test at any of the following times: Every 36 months. Within 30 days of the date of the completion of a repair to the piping. 23 CCR 2643(d), 2661(f) |
| <input type="checkbox"/> 2030049 | (TCR 9d) Failure to conduct monitoring and maintain written records. 23 CCR 2643(d)   |

### UST PIPING (SW) REQUIREMENTS - GRAVITY

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030051 | (TCR 9d) Failure to conduct 0.1 gallon per hour line piping integrity test at any one of the following times: Every 24 months. Within 30 days of the date of completion of a repair of the piping. 23 CCR 2643(e), 2661(f) |

### UST SYSTEM - CATHODIC PROTECTION REQUIREMENTS

- | #                                | VIOLATION DESCRIPTION   |
|----------------------------------|---|
| <input type="checkbox"/> 2030009 | (TCR 9c) Failure to comply with one or more of the following requirements for the cathodic protection system: Install corrosion protection for USTs and/or the field-installed cathodic protection system to meet the consensus standards. For impressed current: Have corrosion protection equipment turned on and functioning properly and inspect the impressed-current system every 60 days. Test the impressed-current system within six months of installation or repair and at least every 36 months thereafter. For sacrificial anodes: Check sacrificial anodes within six months of installation or repair and at least once every 36 months thereafter in accordance with the manufacturer's instructions. For all corrosion protection systems: Maintain records for 78 months on-site or off-site at a readily available location if approved by the CUPA. 23 CCR 2635(a)(2), 2636(b), 2662(c)(1)(B), 2712(b)(3) |

### UST SYSTEM - CLOSURE

- | #                                | VIOLATION DESCRIPTION  |
|----------------------------------|--|
| <input type="checkbox"/> 2030038 | Failure to comply with all permanent closure requirements. HSC 25298(c); 23 CCR 2670(c-j), 2672(a-e) |
| <input type="checkbox"/> 2030038 | Failure to comply with all permanent closure requirements. HSC 25298; 23 CCR 2670(c-j), 2672(a-e)    |

### 02. Released

All responsive documents have been released pursuant to the California Public Records Act.

April 10, 2023, 2:32pm by Ginger Rodriguez, Public Records Administration Coordinator

### External Message

Requester + Staff

Good afternoon,

After a diligent search and reasonable inquiry the City has identified no additional documents responsive to any portion of your request #23-1408. This concludes our response to your request.

Kind regards.

April 10, 2023, 2:32pm by Ginger Rodriguez, Public Records Administration Coordinator (Staff)

### External Message

Requester + Staff

Greetings Allison,

Re: CPRA Request No. 23-1408

The City has identified records responsive to your request. Attached please find a portion of records that are responsive to your Public Records Act request.

Please note that we are still in the process of reviewing other potentially responsive

documents and will continue providing disclosable records on a rolling basis as soon as they become available. We expect to provide you with an update on or before Tuesday, April 11, 2023. We reserve the right to withhold and/or redact any records or information that may be exempt from disclosure under the Public Records Act, and/or other applicable legal privileges including, but not limited to, attorney work product and attorney client privileges.

Kind regards.

March 28, 2023, 12:16pm by Stephanie Hoover (Staff)

## External Message

Requester + Staff

Good afternoon,

We have received your Public Records Act request. Pursuant to California Government Code section 7922.535, the City needs to consult with others, which may include

multiple departments of the City or other entities who have a substantial interest in the subject matter. Therefore, the City is taking a 14-day extension in which to conduct this consultation. We will notify you on or before April 11 whether the City has responsive records.

Kind regards.

March 27, 2023, 4:23pm by Ginger Rodriguez, Public Records Administration Coordinator (Staff)

### Department Assignment

Public

Removed: Fire-Rescue.

March 24, 2023, 7:22am by Stephanie Hoover

### Department Assignment

Public

Added: Fire-Rescue, Public Utilities.

March 20, 2023, 6:13am by Angela Laurita, Public Records Administration Manager

### External Message

Requester + Staff

Please be advised that City staff have received your CPRA request. Within the next 10 days, we will determine whether your request seeks copies of disclosable records in the City's possession or whether the City will require an extension. If your request is submitted on a Saturday, Sunday, or City

holiday, the City considers the request received on the following business day.

Re: Re-Inspection - Fire and Life Safety on March 02 2023

The San Diego Fire-Rescue Department has completed the fire and life safety inspection. No fire or building code violations were observed at this time.

Inspection and permit fees will not be collected by fire inspection personnel. You will receive by mail an invoice from the City Treasurer for the inspection costs and permit fees as applicable.

The City of San Diego Fire Department would like to thank you for making fire and life safety a priority in your place of business.

Inspection Notes:

2/15/2023 I met with individuals at each of the affected suites (e.g. Joe Nomma, Mike Liera, Victor Heredia, Michael Maynard) and found a few fire code violations in each one (noted herein). Please resolve these issues prior to the next reinspection date on or after 3/1/2023. Some of these issues can be resolved by emailing me a photo of the fixed item (e.g. photo of new fire extinguisher tags, photo of cleared stairwell, photo of opened exit doors, etc), others can be resolved by letting me know when fire contractors have uploaded their reports to The Compliance Engine (e.g. fire alarm report), others can be resolved by sending me documentation (e.g. certificate from CA State Fire Marshal for flame resistant drapery), and others may require me to visit the property again. Please let me know if you have any questions regarding these items.

2/28/2023 Len Paul (SOMA, Suite I) emailed me documentation for fire alarm, standpipe system, and fire extinguisher. The only pending violation for SOMA is an updated drapery flame retardant certification. I removed the other violations. I have not heard back from other tenants yet.

3/1/2023 I received a flame retardant certification (expiring 6/30/2023) for SOMA (Suite I) as well as a standpipe report. I received an email with photo documentation from Victor that cleared all of his violations (Suite J). Those violations have been cleared. We are waiting for responses from Mike Liera and Michael Maynard on a few of their remaining discrepancies. The next reinspection date will be on or after 3/16/2023.

3/2/2023 The final discrepancies have been addressed per my prior inspection of the properties. No further violations. Inspection complete.

## Request

I would like to request UST records for a gas station historically located at 3640 Frontier Street in San Diego. The gas station in question was present in the late 1960's through the early 1970's. The street is now Sports Arena Boulevard, but I believe the USTs would have been installed when the road was still known as Frontier Street.

 State License No. 534732 License Class B City Business Tax No. \_\_\_\_\_

Licensed Contractor's Declaration: I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of the Business and Professions Code, and my license is in full force and effect.

Signature [Signature] Title [Signature] Date 12/10/02

7. Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:

a. I have and will maintain a certificate of consent to self-insure for workers' compensation as provided by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

b. I have and will maintain workers' compensation, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:  
 Insurance Company State Fund Policy No. 11280-2002 Expiration Date 1/1/03

(This section need not be completed if the permit is for one hundred dollars (\$100) or less).

c. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions

Signature [Signature] Date 12/10/02

Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

8. Owner-Builder Declaration: I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for such permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvement is not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for sale.)

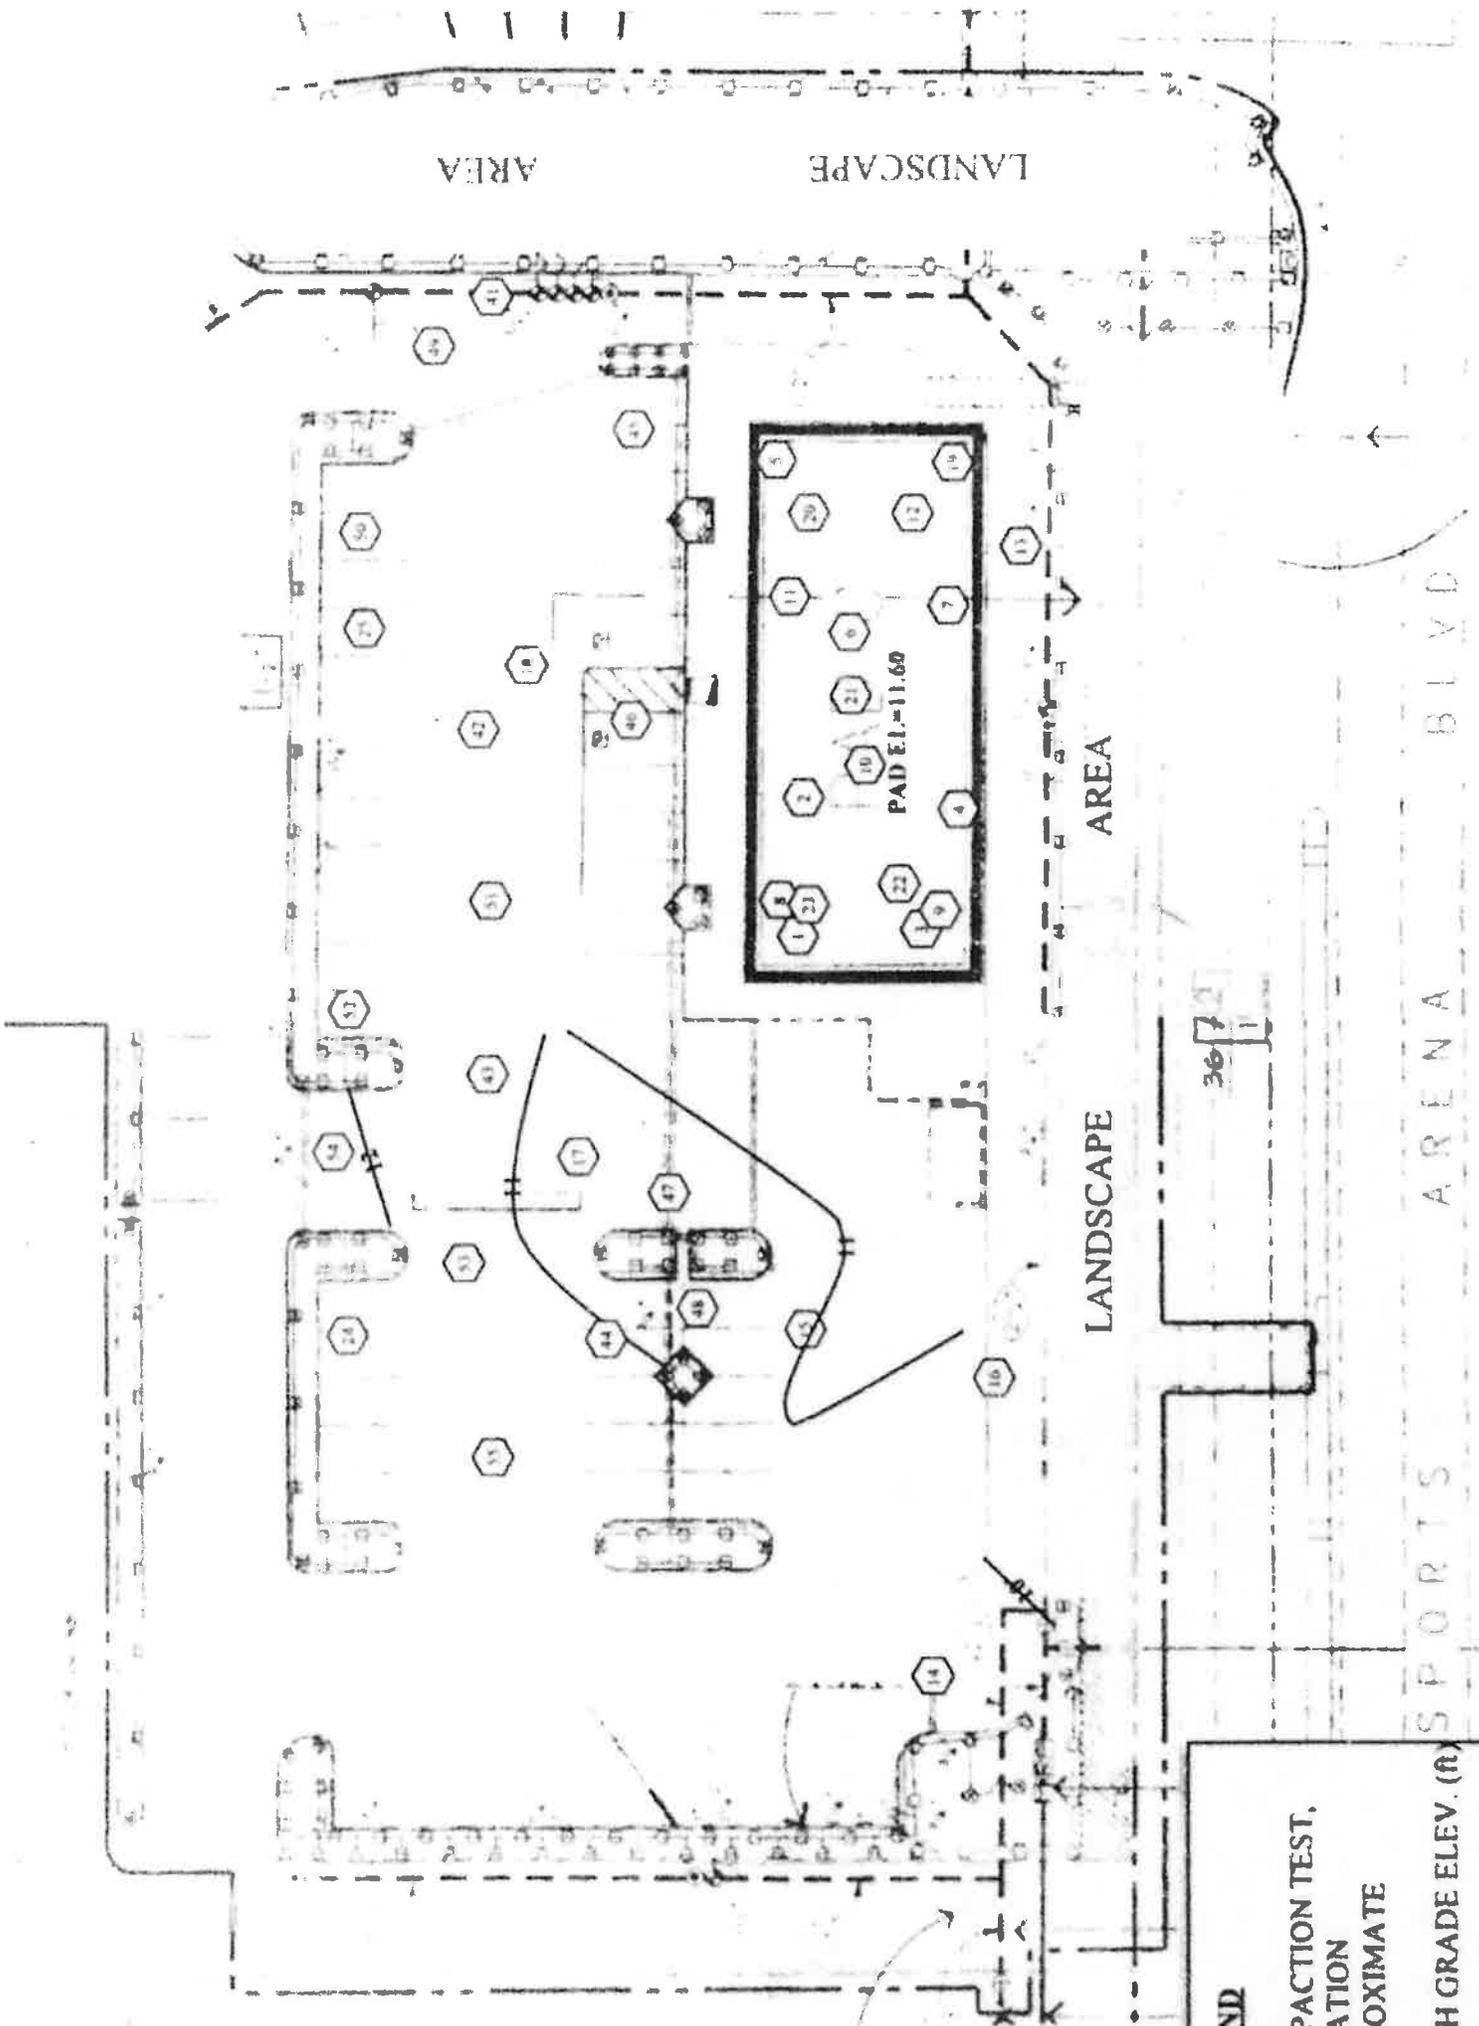

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Section \_\_\_\_\_ B.&P.C. for this reason:  
 Signature \_\_\_\_\_ Date \_\_\_\_\_

9. Construction Lending Agency: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Address 14551 Andel Dr. City Fontana State Ca Zip Code 92335 Telephone 909 574-1400

State License No. 687160 License Class C10 City Business Tax No. 87012168

Licensed Contractor's Declaration: I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Signature [Signature] Title Agent Date 9/30/03

5. Workers' Compensation Declaration: I hereby affirm under penalty of perjury one of the following declarations:

a. I have and will maintain a certificate of consent to self-insure for workers' compensation as provided by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

b. I have and will maintain workers' compensation, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:  
 Insurance Co. Travelers Policy No. TR508419721003 Expiration Date 5-1-04

(This section need not be completed if the permit is for one hundred dollars (\$100) or less)

c. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Signature [Signature] Date 9-30-03  
 Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees

6. Owner-Builder Declaration: I hereby affirm that I am exempt from the Contractor's License Law for the following reason [Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the all exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law).

I am exempt under Section \_\_\_\_\_ B.&P.C. for this reason:  
 Signature \_\_\_\_\_ Date \_\_\_\_\_

7. Construction Lending Agency: I hereby affirm that there is a construction lending agency for the performance of the work for which this permit issued (Sec. 3097, Civ. C).

Lender's Name \_\_\_\_\_ Lender's Address \_\_\_\_\_

8. Applicant's Signature: I certify that I have read this application and state that the above information is correct, and that I am the owner or the duly authorized agent of the owner. I agree to comply with all city and state laws relating to building construction. I hereby authorize representatives of the City of San Diego to enter upon the above-mentioned property for inspection purposes. If, after making the Certificate of Exemption from the Workers' Compensation provisions of the Labor Code I should become subject to such provisions, I will forthwith comply. In the event I do not comply with the Workers' Compensation Law, this permit shall be deemed revoked.

Warning: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars (\$100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

8. **Owner-Builder Declaration:** I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code) or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code). The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and contracts for such projects with contractor(s) licensed pursuant to the Contractor's License Law.

I am exempt under Section \_\_\_\_\_, B.P.C. for this reason:  
 Signature Date

9. **Construction Lending Agency:** I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C).  
 Lender's Name Lender's Address

10. **Applicant's Signature:** I certify that I have read this application and state that the above information is correct, and that I am the owner or the duly authorized agent of the owner. I agree to comply with all city and state laws relating to building construction. I hereby authorize representatives of the City of San Diego to enter upon the above mentioned property for inspection purposes. If, after making the Certificate of Exemption from the Workers' Compensation provisions of the Labor Code I should become subject to such provisions, I will comply with them. In the event I do not comply with the Workers' Compensation Law, this permit shall be deemed revoked.

## II. Reason for Application:

Register New Equipment  
 Register Permitted Equipment (New)

Register Existing Equipment  
 Register Permitted Equipment (Existing)

To register an emergency engine.

## III. Equipment Description

Emergency Engine: Ford, Model CSG 649I6005F, natural gas fired, 82 BHP, S/N 263731-0498, driving an electric generator.

## IV. Conclusions and Recommendations

Date: 1/19/07

The application to register this unit has been reviewed. This unit is eligible for registration under Rule 12 and is expected to comply with all applicable District Rules and Regulations.

It is recommended that the unit be approved for operation as a registered unit with BEC No. 10929.

  
Engineer's Signature

**V. Rule Evaluation Results (Attach detailed rule compliance analysis)**

<u>Applicable Rule</u>	<u>Emission Standard</u>	<u>Actual Emissions or Control Level</u>
12(d)(1)	52 hours/yr maintenance for emergency units	compliance expected
12(d)(2)	Less than 100 lb/day NOx for (a)(1)(ii)	does not apply
	Less than 100 lb/day PM10 for (a)(1)(ii)	does not apply
	Less than 100 lb/day VOC for (a)(1)(ii)	does not apply
	Less than 100 lb/day SOx for (a)(1)(ii)	does not apply
	Less than 100 lb/day CO for (a)(1)(ii)	does not apply
	Less than 3 lb/day Lead for (a)(1)(ii)	does not apply
12(d)(3)	Temperature of asphalt tanks below 525°F	does not apply
12(d)(4)	Water injection for dust control of rock drill	does not apply
12(d)(5)	Less than 750 hours/yr for aircraft power unit	does not apply
12(d)(6)	Less than 100 hours/yr for aircraft start units	does not apply
50	Visible emissions less than 20% opacity	compliance expected
51	Shall not cause or contribute to a nuisance	compliance expected
62	Less than 0.5% Sulfur by weight in liquid fuel	compliance expected
	Less than 10 grains sulfur per 100 dry CF gaseous fuel

## APPLICATION INSTRUCTIONS

### GENERAL

1. The owner or designated agent must complete and sign this multi-copy form and file it with one copy of all attachments, required supplementary forms, drawings and the appropriate fee.
2. The appropriate fee (payable to "County of San Diego APCD") shall be forwarded with this Permit/Registration Application. Application processing will not begin until the full required fee has been received. Excess fees will be refunded upon completion of the application process. If you do not know the appropriate fee or need to discuss the information required, please contact the District at (619) 694-3307 and ask for the Engineering Division.

### REASON FOR SUBMITTAL OF APPLICATION

1. New Installation - check if you are installing equipment that does not currently have a District Permit to Operate.
2. Existing Unpermitted Equipment or Rule 11 Change - check if applying for installed existing equipment that is currently unpermitted or equipment that is now subject to District Rules due to Rule 11 changes.
3. Modification of Existing Permitted Equipment - check if you are making a change to equipment with a current District Permit to Operate. (List affected PO #(s) on line 12)
4. Amendment to Existing Authority to Construct or Permit/Registration Application - check this line if you are amending a previously submitted application form or if amending a current Authority to Construct. (List affected Application #(s) on line 12)
5. Change of Equipment Location - check if you are moving non-portable equipment with a current District Permit to Operate. (List affected PO #(s) on line 12)
6. Change of Equipment Ownership - check if you are now the owner of equipment with a current District Permit to Operate under a different owner. (List affected PO #(s) on line 12)
7. Change of Permit Conditions - check if equipment with a current Permit to Operate requires changes to the existing operating conditions. (List affected PO #(s) on line 12)
8. Change Permit to Operate Status to Inactive - check if you wish to maintain your current Permit to Operate but are not going to operate the equipment. (List affected PO #(s) on line 12)
9. Banking Emissions - check if you are retiring equipment with a current District Permit to Operate and wish to bank the emissions for future credits. (List affected PO #(s) on line 12)
10. Registration of Portable Equipment - check this line if you are applying for registration of portable equipment.
11. Other - check for any action not covered by #(s) 1 thru 10.
12. List affected AP/PO#(s) - if you checked #'s 3 or 5-9, list current Permit to Operate Number(s) affected or if you checked #4, list existing Application number whether or not an Authority to Construct has been issued.

### APPLICANT INFORMATION

13 thru 17 are self-explanatory.

18 thru 27 are self-explanatory, complete Items B, C, and D only if different from Item A.

### EQUIPMENT/PROCESS INFORMATION

Check Stationary (e.g. gasoline service site, dry cleaning facility, etc.) or Portable (abrasive blast pot, roofing kettle, etc.) depending upon the type of equipment for which you are filing an application. Also check Yes if the equipment is portable and will operate more than 180 consecutive days at a single site. Otherwise, check No.

28 thru 36 are self-explanatory.

EMERGENCY ENGINE: **FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)**

Equipment Type  
**[34W] Registered Engine (Rule 12)**

Reason for Inspection:

## Authority to Operate (Rule 10) Review:

- Equipment (including controls) manufacturer, model & serial number matches permit/certificate/application?  Yes  No
- Permit/certificate current and posted/readily available?  Yes  No  

<small>Expiration Status</small> Active	<small>Expiration Date</small> 12/31/2023
--	--
- Ownership verified?  Yes  No  

<small>Equipment Owner</small>
--------------------------------
- Engine running during inspection?  Yes  No  
 If yes, is visible emissions standard met? [Rule 50]  UTV  Yes  No

## FUEL & HOUR METER

- Fuel(s):  CARB diesel  Natural gas  Propane  Gasoline  Biodiesel  Other \_\_\_\_\_  
 If CARB diesel, is documentation maintained identifying fuels as such? [17 CCR § 93115.10(f)(1)(H)1.]  Yes  No
- Engine equipped with a properly working hour meter? [17 CCR § 93115.10(d)(1) / R12(d)(3) / R69.4.1(e)(3)]  Yes  No
- Facility changed out the hour meter since the last inspection?  Yes  No  
 If yes, did the Facility notify Compliance Division of the change?  UTV  Yes  No

## RECORDS REVIEW & OPERATING HOURS

- Records of engine operation properly maintained?  Yes  No

Engine Hours Reading Date	1/31/2023	1/1/2022	12/28/2021
FIRST reading of year	909.3	876.7	844
LAST reading of year	911.6	909.3	876.7
Total usage (LAST-FIRST)	2.3	32.6	32.7
Emergency Use	0	1.5	6.6
Other usage (e.g. valid breakdowns)	0	0	0
Testing & Maintenance (T&M)	2.3	31.1	26.1
T&M limit in permit	52	52	52
Hour reading on inspection date	911.6	875.6	875.6

- Engine operated less than T&M limit?  Yes  No
- Engine operated only for authorized uses?  UTV  Yes  No
- If subject to NESHAP ZZZZ, is idle time minimized during startup and startup time minimized (i.e. non-loaded T&M runs less than or equal to 30 min)?  N/A  Yes  No
- Facility enrolled in a demand response program? [See 17 CCR 93115.6(c)]  Yes  No

## CONTROL EQUIPMENT

- Control equipment properly operated, maintained and documented? [R69.4.1(f) / R12(d)(4)]  N/A  Yes  No

**NEAR/ON SCHOOL PROVISIONS (for diesel engines not equipped with DPF)**

14. Exhaust stack located within 500 feet of a school or on school grounds (not boarding schools)?<sup>1</sup>  N/A  Yes  No
15. If yes, is engine operated for non-emergency purposes: [17 CCR § 93115.6(a)(1) / (b)(2) / (c)(2)(A)]
- A. Before 7:30 AM and after 3:30 PM, if school in session (engines within 500 feet of school)  UTV  Yes  No
- B. Outside of school-sponsored activities (engines on school grounds)  UTV  Yes  No

**MAINTENANCE**

16. Periodic maintenance performed on engine/DPF at least once per calendar year? [R69.4.1(f)]  N/A  Yes  No
17. Records of periodic maintenance/owner's manual maintained on site readily available? [R69.4.1(g)(1)(iv)]  N/A  Yes  No
18. Did facility comply with NESHAP ZZZZ maintenance requirements? If so, how?  N/A  Yes  No
- Every 500 operating hours or annually, whichever is first:
- A. Oil & filter (3 ways to comply):
- Oil & filter changed
- Oil tested<sup>2</sup> and passed
- Oil tested<sup>2</sup> and failed, but oil changed within 2 business days (of receiving results or operating)
- Did not comply
- B. Hoses & Belts inspected, replaced if needed:  Yes  No
- Every 1000 operating hours or annually, whichever is first:
- C. Air Cleaner inspected, replaced if needed:  Yes  No
- D. Spark plugs inspected, replaced if needed (non-diesel only):  N/A  Yes  No

**ENFORCEMENT DOCUMENTS & NOTES**

19. Site advised of permit/certificate conditions & applicable rules including maintenance, logs, etc?  Yes  No
20. Facility in compliance with all permit conditions not addressed above?  Yes  No
21. Permit/certificate conditions reviewed (current/enforceable)?  Yes  No
- If changes needed, permit condition change request submitted?  N/A  Yes  No
22. Any enforcement documents issued?  None  CAR  NTC  NOV

## Notes

Secondary contact: Steve Hearn; 619-251-9650

Third contact: Mike Will; 949-279-2728

Fourth contact: Dominic Finetti; 619-224-4161

This is a natural gas engine. Engine is located outside/lumber area.

Log book kept in the manager's office.

Calculate unloaded and loaded hour meter for cumulative hour meter.

Annual maintenance conducted by Bay City.

12/30/2021.

12/26/2022.

<sup>1</sup> 17 CCR 93115.4(a)(67): "School" or "School Grounds" means any public or private school used for purposes of the education of more than 12 children in kindergarten or any of grades 1 to 12, inclusive, but does not include any private school in which education is primarily conducted in a private home(s). "School" or "School Grounds" includes any building or structure, playground, athletic field, or other areas of school property but does not include unimproved school property.

<sup>2</sup> Oil analysis fails and oil must be replaced if any of the following are true:

- 1) Total base number (TBN) is less than 30 percent of TBN of the oil when new;
- 2) Viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new;
- 3) Percent water content by volume is greater than 0.5.

## FUEL & HOUR METER

- Fuel(s):  CARB diesel  Natural gas  Propane  Gasoline  Biodiesel  Other \_\_\_\_\_  
 If CARB diesel, is documentation maintained identifying fuels as such? [17 CCR § 93115.10(f)(1)(H)1.]  Yes  No
- Engine equipped with a properly working hour meter? [17 CCR § 93115.10(d)(1) / R12(d)(3) / R69.4.1(e)(3)]  Yes  No
- Facility changed out the hour meter since the last inspection?  Yes  No  
 If yes, did the Facility notify Compliance Division of the change?  UTV  Yes  No

## RECORDS REVIEW & OPERATING HOURS

- Records of engine operation properly maintained?  Yes  No

Engine Hours Reading Date	10/23/2020	12/31/2019	
FIRST reading of year	803.1	768.2	
LAST reading of year	837.8	803.1	
Total usage (LAST-FIRST)	34.7	34.9	
Emergency Use	0	0	
Other usage (e.g. valid breakdowns)	0	0	
Testing & Maintenance (T&M)	34.7	34.9	
T&M limit in permit	52	52	
Hour reading on inspection date	837.8		

- Engine operated less than T&M limit?  Yes  No
- Engine operated only for authorized uses?  UTV  Yes  No
- If subject to NESHAP ZZZZ, is idle time minimized during startup and startup time minimized (i.e. non-loaded T&M runs less than or equal to 30 min)?  N/A  Yes  No
- Facility enrolled in a demand response program? [See 17 CCR 93115.6(c)]  Yes  No

## CONTROL EQUIPMENT

- Control equipment properly operated, maintained and documented? [R69.4.1(f) / R12(d)(4)]  N/A  Yes  No

**NEAR/ON SCHOOL PROVISIONS (for diesel engines not equipped with DPF)**

14. Exhaust stack located within 500 feet of a school or on school grounds (not boarding schools)?<sup>1</sup>  N/A  Yes  No
15. If yes, is engine operated for non-emergency purposes: [17 CCR § 93115.6(a)(1) / (b)(2) / (c)(2)(A)]
- A. Before 7:30 AM and after 3:30 PM, if school in session (engines within 500 feet of school)  UTV  Yes  No
- B. Outside of school-sponsored activities (engines on school grounds)  UTV  Yes  No

**MAINTENANCE**

16. Periodic maintenance performed on engine/DPF at least once per calendar year? [R69.4.1(f)]  N/A  Yes  No
17. Records of periodic maintenance/owner's manual maintained on site readily available? [R69.4.1(g)(1)(iv)]  N/A  Yes  No
18. Did facility comply with NESHAP ZZZZ maintenance requirements? If so, how?  N/A  Yes  No
- Every 500 operating hours or annually, whichever is first:
- A. Oil & filter (3 ways to comply):
- Oil & filter changed
  - Oil tested<sup>2</sup> and passed
  - Oil tested<sup>2</sup> and failed, but oil changed within 2 business days (of receiving results or operating)
  - Did not comply
- B. Hoses & Belts inspected, replaced if needed:  Yes  No
- Every 1000 operating hours or annually, whichever is first:
- C. Air Cleaner inspected, replaced if needed:  Yes  No
- D. Spark plugs inspected, replaced if needed (non-diesel only):  N/A  Yes  No

**ENFORCEMENT DOCUMENTS & NOTES**

19. Site advised of permit/certificate conditions & applicable rules including maintenance, logs, etc?  Yes  No
20. Facility in compliance with all permit conditions not addressed above?  Yes  No
21. Permit/certificate conditions reviewed (current/enforceable)?  Yes  No
- If changes needed, permit condition change request submitted?  N/A  Yes  No
22. Any enforcement documents issued?  None  CAR  NTC  NOV

Notes

**Generator housing is locked, contact Dennis (who works upstairs at ProBuild) for access to the generator. Email is dmccomb@dixieline.com, phone number listed above. Office is located up the stairs to the left of the store entrance, past the registers.**

**Engine hours recorded in loaded (120.9) and unloaded (716.9). Major PM conducted on 04/01/20 by BCEW.**

<sup>1</sup> 17 CCR 93115.4(a)(67): "School" or "School Grounds" means any public or private school used for purposes of the education of more than 12 children in kindergarten or any of grades 1 to 12, inclusive, but does not include any private school in which education is primarily conducted in a private home(s). "School" or "School Grounds" includes any building or structure, playground, athletic field, or other areas of school property but does not include unimproved school property.

<sup>2</sup> Oil analysis fails and oil must be replaced if any of the following are true:

- 1) Total base number (TBN) is less than 30 percent of TBN of the oil when new;
- 2) Viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new;
- 3) Percent water content by volume is greater than 0.5.

EMERGENCY ENGINE: **FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)**

Equipment Type  
**[34W] Registered Engine (Rule 12)**

Reason for Inspection:

## Authority to Operate (Rule 10) Review:

- Equipment (including controls) manufacturer, model & serial number matches permit/certificate/application?  Yes  No
- Permit/certificate current and posted/readily available?  Yes  No  

<small>Expiration Status</small> Active	<small>Expiration Date</small> 12/31/2022
--	--
- Ownership verified?  Yes  No  

<small>Equipment Owner</small>
--------------------------------
- Engine running during inspection?  Yes  No  
 If yes, is visible emissions standard met? [Rule 50]  UTV  Yes  No

## FUEL & HOUR METER

- Fuel(s):  CARB diesel  Natural gas  Propane  Gasoline  Biodiesel  Other \_\_\_\_\_  
 If CARB diesel, is documentation maintained identifying fuels as such? [17 CCR § 93115.10(f)(1)(H)1.]  Yes  No
- Engine equipped with a properly working hour meter? [17 CCR § 93115.10(d)(1) / R12(d)(3) / R69.4.1(e)(3)]  Yes  No
- Facility changed out the hour meter since the last inspection?  Yes  No  
 If yes, did the Facility notify Compliance Division of the change?  UTV  Yes  No

## RECORDS REVIEW & OPERATING HOURS

- Records of engine operation properly maintained?  Yes  No

Engine Hours Reading Date	12/28/2021	10/23/2020	12/31/2019
FIRST reading of year	844	803.1	768.2
LAST reading of year	875.6	844	803.1
Total usage (LAST-FIRST)	31.6	40.9	34.9
Emergency Use	1.5	6.6	0
Other usage (e.g. valid breakdowns)	0	0	0
Testing & Maintenance (T&M)	30.1	34.3	34.9
T&M limit in permit	52	52	52
Hour reading on inspection date	875.6	837.8	

- Engine operated less than T&M limit?  Yes  No
- Engine operated only for authorized uses?  UTV  Yes  No
- If subject to NESHAP ZZZZ, is idle time minimized during startup and startup time minimized (i.e. non-loaded T&M runs less than or equal to 30 min)?  N/A  Yes  No
- Facility enrolled in a demand response program? [See 17 CCR 93115.6(c)]  Yes  No

## CONTROL EQUIPMENT

- Control equipment properly operated, maintained and documented? [R69.4.1(f) / R12(d)(4)]  N/A  Yes  No

**NEAR/ON SCHOOL PROVISIONS (for diesel engines not equipped with DPF)**

- 14. Exhaust stack located within 500 feet of a school or on school grounds (not boarding schools)?<sup>1</sup>  N/A  Yes  No
- 15. If yes, is engine operated for non-emergency purposes: [17 CCR § 93115.6(a)(1) / (b)(2) / (c)(2)(A)]
  - A. Before 7:30 AM and after 3:30 PM, if school in session (engines within 500 feet of school)  UTV  Yes  No
  - B. Outside of school-sponsored activities (engines on school grounds)  UTV  Yes  No

**MAINTENANCE**

- 16. Periodic maintenance performed on engine/DPF at least once per calendar year? [R69.4.1(f)]  N/A  Yes  No
- 17. Records of periodic maintenance/owner's manual maintained on site readily available? [R69.4.1(g)(1)(iv)]  N/A  Yes  No
- 18. Did facility comply with NESHAP ZZZZ maintenance requirements? If so, how?  N/A  Yes  No
  - Every 500 operating hours or annually, whichever is first:
    - A. Oil & filter (3 ways to comply):
      - Oil & filter changed
      - Oil tested<sup>2</sup> and passed
      - Oil tested<sup>2</sup> and failed, but oil changed within 2 business days (of receiving results or operating)
      - Did not comply
    - B. Hoses & Belts inspected, replaced if needed:  Yes  No
  - Every 1000 operating hours or annually, whichever is first:
    - C. Air Cleaner inspected, replaced if needed:  Yes  No
    - D. Spark plugs inspected, replaced if needed (non-diesel only):  N/A  Yes  No

**ENFORCEMENT DOCUMENTS & NOTES**

- 19. Site advised of permit/certificate conditions & applicable rules including maintenance, logs, etc?  Yes  No
- 20. Facility in compliance with all permit conditions not addressed above?  Yes  No
- 21. Permit/certificate conditions reviewed (current/enforceable)?  Yes  No
  - If changes needed, permit condition change request submitted?  N/A  Yes  No
- 22. Any enforcement documents issued?  None  CAR  NTC  NOV

Notes

**This is a natural gas engine. Engine is located outside/lumber area.**

**Log book kept in manager's office.**  
**Calculate unloaded and loaded hour meter for cumulative hour reading.**

**Outages-**  
**2020: 8/14 (1.3 hours), 9/5 (2.7 hours), 9/24 (2.6 hours).**  
**2021: 4/30 (1.5 hours).**

**Annual maintenance conducted by Bay City.**  
**4/1/2020.**  
**2021 has not occurred yet. Engine had a service call/repair on 2/14/2021 but oil was not changed. Ms. Hill was informed that the maintenance requirement is by calendar year. Verify if 2021 maintenance occurred in time next annual inspection.**

<sup>1</sup> 17 CCR 93115.4(a)(67): "School" or "School Grounds" means any public or private school used for purposes of the education of more than 12 children in kindergarten or any of grades 1 to 12, inclusive, but does not include any private school in which education is primarily conducted in a private home(s). "School" or "School Grounds" includes any building or structure, playground, athletic field, or other areas of school property but does not include unimproved school property.

<sup>2</sup> Oil analysis fails and oil must be replaced if any of the following are true:  
 1) Total base number (TBN) is less than 30 percent of TBN of the oil when new;  
 2) Viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new;  
 3) Percent water content by volume is greater than 0.5.

## CERTIFICATE OF REGISTRATION

**EXPIRES: December 31, 2023**

This Certificate is not valid until required fees are received by the District.

The above is hereby granted a Certificate of Registration for the article, machine, equipment or contrivance described below. This Certificate of Registration is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Certificate of Registration or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

**EQUIPMENT OWNER**

**EQUIPMENT DESCRIPTION**

EMERGENCY ENGINE: FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 2, 12/12.1, 40, 50, 51.

Fee Schedules: 1 [34W] Registered Engine (Rule 12)

BEC: APCD2021-CON-001798

**FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES**

1. The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2. This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115.4(a)(65). (Rule 12, or Rule 69.4.1)
3. This internal combustion engine shall not exceed 52 hours of operation per calendar year for non-emergency purposes (testing and maintenance).
4. Gaseous fuel engines shall use only gaseous fuel which contains no more than 10 grains of sulfur compounds,

## CERTIFICATE OF REGISTRATION

**EXPIRES: December 31, 2023**

calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)

5. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7. This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
  - (a) old meter's hour reading,
  - (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
  - (c) copy of receipt of new meter or of installation work order.A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
9. The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following:
  - 1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j);
  - 2) Inspect and clean air filters, replacing as necessary;
  - 3) Inspect all hoses and belts, replacing as necessary; and
  - 4) Inspect spark plugs, if equipped, replacing as necessary..Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine.  
(Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ).

## CERTIFICATE OF REGISTRATION

**EXPIRES: December 31, 2023**

10. The owner or operator of the engine shall maintain the manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer on site for at least the same period of time as the engine is located at the site.  
This manual shall be made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
11. The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following:
  - (a) dates and elapsed times of every instance of engine operation based on actual readings of the engine hour meter; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency;
  - (b) for a total external power outage, documentation from the serving utility of an outage in the area where the engine is located; for an internal power outage, a description of what caused the failure and receipts and/or work orders for the necessary repairs; for a partial external power outage, including a low-voltage or electrical transient incident in which the external power voltage is low enough to trigger the operation of an emergency standby engine, a description of the incident;
  - (c) total cumulative hours of operation per calendar year;
  - (d) records of annual engine maintenance shall include the date the maintenance was performed and the nature of the maintenance; and
  - (e) hours of operation for all uses other than those specified above and identification of the nature of that use.  
(Rule 12, Rule 69.4.1, 17 CCR 93115, 40 CFR 60 Subpart IIII, 40 CFR 63 Subpart ZZZZ)
12. All records required by this permit shall be maintained on site and readily available for District inspection for a minimum of 36 months from their date of creation unless otherwise indicated by the conditions of this permit. (Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ)
13. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
14. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.
15. The permittee shall, upon determination of applicability and written notification by the District, comply with all applicable requirements of the Air Toxics "Hot Spots" Information and Assessment Act (California Health and Safety Code Section 44300 et seq.)

## CERTIFICATE OF REGISTRATION

EXPIRES: December 31, 2016

This Certificate is not valid until required fees are received by the District.

The above is hereby granted a Certificate of Registration for the article, machine, equipment or contrivance described below. This Certificate of Registration is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Certificate of Registration or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

### EQUIPMENT OWNER

### EQUIPMENT DESCRIPTION

EMERGENCY ENGINE: FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 2, 12/12.1, 40, 50, 51.

Fee Schedules: 1 [34W] Registered Engine (Rule 12)

BEC: APCD2016-CON-001157

### FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES

1. The engine shall be operated exclusively during emergencies as defined in Rule 69.4.1 or Rule 12 or 17CCR93115 as applicable, or for maintenance and testing.
2. This engine shall not be used as a part of a non-emergency Demand Response Program (DRP). This condition shall not apply to engines operating pursuant to the rolling blackout reduction program as defined in 17 CCR 93115.4(a)(65). (Rule 12, or Rule 69.4.1)
3. This internal combustion engine shall not exceed 52 hours of operation per calendar year for non-emergency purposes (testing and maintenance).
4. Gaseous fuel engines shall use only gaseous fuel which contains no more than 10 grains of sulfur compounds,

calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)

5. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7. This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
  - (a) old meter's hour reading,
  - (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
  - (c) copy of receipt of new meter or of installation work order.A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
9. The owner or operator of this engine shall, at their discretion, either:
  - a) operate and maintain a certified engine and any control device according to the manufacturer's emission-related written instructions, or
  - b) operate and maintain the engine in a manner consistent with good air pollution control practice for minimizing emissions.The periodic maintenance shall be conducted at least once each calendar year.  
(40 CFR 60 Subpart JJJJ, or Rule 12, or Rule 69.4.1)
10. The owner or operator of the engine shall maintain the manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer on site for at least the same period of time as the engine is located at the site.  
This manual shall be made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
11. The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following:
  - (a) dates and times of engine operation; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency, if known;
  - (b) records of periodic engine maintenance shall include the date and a description of the maintenance that was performed; and

dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquified petroleum gas (LPG), and butane. Gasoline engines shall use only California reformulated gasoline.

5. A non-resettable engine hour meter shall be maintained in good working order and used for recording operating hours. The District's Compliance Division shall be notified prior to replacement of the hour meter.
6. The owner or operator shall conduct periodic maintenance of each engine and add-on control equipment as recommended by the engine and control equipment manufacturers or as specified by any other maintenance procedure approved in advance, in writing, by the District.
7. The owner or operator of this engine shall keep the following records: applicable fuel certification; manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing, in advance, by the District. These records shall be kept on site for at least the same period of time as the engine to which the records apply is located at the site. These records shall be made available to the District upon request.
8. The owner or operator of this engine shall maintain an operating log containing, at a minimum, the following: dates and times of engine operation, indicating whether the operation was for non-emergency purposes or during an emergency situation and the nature of the emergency, if available (these records are not required if the total engine operation for any purpose, including emergency situation, do not exceed 52 hours in a calendar year); total cumulative hours of operation per calendar year, based on actual readings of engine hour or fuel meter; records of periodic maintenance including dates maintenance was performed.
9. All operational and maintenance logs required by this permit shall be kept a minimum of 3 years unless otherwise indicated by the conditions of this permit, and these records shall be made available to the Air Pollution Control District upon request.
10. Access, facilities, utilities and any necessary safety equipment for source testing and inspection shall be provided upon request of the Air Pollution Control District.
11. This Air Pollution Control District Permit does not relieve the holder from obtaining permits or authorizations required by other governmental agencies.

INTERNAL COMBUSTION EMERGENCY STANDBY ENGINE

Certificate Holder (DBA): DIXIE LINE LUMBER CO.  
Legal Owner (if different from DBA): \_\_\_\_\_  
Equipment Location: 3250 SPORTS ARENA BLVD. S.D. CA 92110  
Equipment Description: Manufacturer: FORD  
Model No.: CSG 649I6005F Serial No.: 263731-0498  
HP Rating: 82 Type of Fuel: NATURAL GAS  
Emission Control, if any: \_\_\_\_\_

I, CHRIS A. MADDEN, certify that I will be in compliance with all applicable District Rules  
(Print or type name)  
and Regulations and the following conditions:

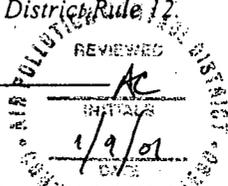

1. The internal combustion emergency standby engine described above shall be operated only during emergency situations and for not more than 52 hours per calendar year for non-emergency purposes.
2. Rule 62 - Limits on sulfur content of fuels: gaseous fuels - 10 grains of sulfur compounds per 100 cubic feet of dry gaseous fuel at standard conditions; liquid or solid fuels - 0.5% sulfur by weight.
3. Rule 50 - Visible emission limits: air contaminant emissions shall not be more dense than 20% (or number 1 on Ringelmann Chart) for more than three (3) minutes in any consecutive 60 minute period. Crankcase smoke shall also be in compliance with Rule 50.
4. Rule 51 - Public Nuisance: equipment shall not cause or contribute to public nuisance.
5. Maintain the following records: (1) Dates, hours/day and cumulative monthly hours of operation; (2) Whether each operation was for emergency or non-emergency purposes and the nature of each emergency; (3) Type and source of fuels; and, (4) Sulfur content of any liquid fuels. Records shall be retained on site for two years and made available to the District upon request.
6. The registrant shall provide access, facilities, utilities and any necessary safety equipment for source testing and inspection upon request of the Air Pollution Control Officer.

Signature: Chris A. Madden Date: 1-3-01  
Title: SERVICE COORDINATOR Affiliation: CONTRACTOR

**CERTIFICATE OF REGISTRATION (FIRST YEAR)**

A copy of this registration certificate must be kept with the equipment and presented upon request to the Air Pollution Control District. Every person who operates this equipment is required to comply with all Air Pollution Control District Rules and Regulations, including Rule 12. Any person who violates a rule or regulation of the Air Pollution Control District or any of the conditions listed above is guilty of a misdemeanor and may be subject to civil and criminal penalties. To remain valid, this certificate must be renewed annually in accordance with District Rule 12.

AND ADD-ON CONTROL EQUIPMENT AS RECOMMENDED BY THE ENGINE AND CONTROL EQUIPMENT MANUFACTURERS OR AS SPECIFIED BY ANY OTHER MAINTENANCE PROCEDURE APPROVED IN ADVANCE, IN WRITING, BY THE DISTRICT.

7. THE OWNER OR OPERATOR OF THE ENGINE SHALL KEEP THE FOLLOWING RECORDS: CALIFORNIA DIESEL FUEL CERTIFICATION, MANUAL OF RECOMMENDED MAINTENANCE PROVIDED BY THE MANUFACTURER, OR OTHER MAINTENANCE PROCEDURES AS APPROVED IN WRITING, IN ADVANCE, BY THE DISTRICT. THESE RECORDS SHALL BE KEPT ON SITE FOR AT LEAST THE SAME PERIOD OF TIME, AS THE ENGINE TO WHICH THE RECORDS APPLY IS LOCATED AT THE SITE, AND SHALL BE MADE AVAILABLE TO THE AIR POLLUTION CONTROL DISTRICT UPON REQUEST.
8. THE OWNER OR OPERATOR OF THIS ENGINE SHALL MAINTAIN AN OPERATING LOG CONTAINING, AT A MINIMUM, THE FOLLOWING: DATES AND TIMES OF ENGINE OPERATION, INDICATING WHETHER THE OPERATION WAS FOR NON-EMERGENCY PURPOSES OR DURING AN EMERGENCY SITUATION AND THE NATURE OF THE EMERGENCY, IF AVAILABLE (THESE RECORDS ARE NOT REQUIRED IF THE TOTAL ENGINE OPERATION FOR ANY PURPOSE, INCLUDING EMERGENCY SITUATION, DO NOT EXCEED 52 HOURS IN A CALENDAR YEAR); TOTAL CUMULATIVE HOURS OF OPERATION PER CALENDAR YEAR, BASED ON ACTUAL READINGS OF ENGINE HOUR OR FUEL METER; RECORDS OF PERIODIC MAINTENANCE INCLUDING DATES MAINTENANCE WAS PERFORMED.
9. ALL OPERATIONAL AND MAINTENANCE LOGS REQUIRED BY THIS PERMIT SHALL BE KEPT A MINIMUM OF 3 YEARS UNLESS OTHERWISE INDICATED BY THE CONDITIONS OF THIS PERMIT, AND THESE RECORDS SHALL BE MADE AVAILABLE TO THE AIR POLLUTION CONTROL DISTRICT UPON REQUEST.
10. ACCESS, FACILITIES, UTILITIES AND ANY NECESSARY SAFETY EQUIPMENT FOR SOURCE TESTING AND INSPECTION SHALL BE PROVIDED UPON REQUEST OF THE AIR POLLUTION CONTROL DISTRICT.
11. THIS AIR POLLUTION CONTROL DISTRICT CERTIFICATE OF REGISTRATION DOES NOT RELIEVE THE HOLDER FROM OBTAINING PERMITS OR AUTHORIZATIONS REQUIRED BY OTHER GOVERNMENTAL AGENCIES.
12. THE PERMITTEE SHALL, UPON DETERMINATION OF APPLICABILITY AND WRITTEN NOTIFICATION BY THE DISTRICT, COMPLY WITH ALL APPLICABLE REQUIREMENTS OF THE AIR TOXICS 'HOT SPOTS' INFORMATION AND ASSESSMENT ACT (CALIFORNIA HEALTH AND SAFETY CODE SECTION 44300 ET. SEQ.)

**PERMIT TO OPERATE**  
**EXPIRES: December 31, 2015**

This permit is not valid until required fees have been paid.

The above is hereby granted a Permit To Operate the article, machine, equipment or contrivance described below. This permit is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Permit To Operate or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

**EQUIPMENT DESCRIPTION**

EMERGENCY ENGINE: FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 10, 20, 40, 50, 51.

Fee Schedules: 1 [34W] Registered Engine (Rule 12)

BEC: APCD2009-CON-000065

**FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES**

1. The engine shall be operated only during emergency situations and for not more than 52 hours per calendar year for non-emergency purposes.
2. Visible emissions including crank case smoke shall comply with Rule 50. (Rule 50)
3. Rule 51-public nuisance: equipment shall not cause or contribute to public nuisance.
4. Diesel engines shall use only California diesel fuel. Gaseous fuel engines shall use only gaseous fuel which contains no more than 10 grains of sulfur compounds, calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquified petroleum gas (LPG), and butane. Gasoline engines shall use only California reformulated gasoline.
5. A non-resettable engine hour meter shall be maintained in good working order and used for recording operating hours. The District's Compliance Division shall be notified prior to replacement of the hour meter.
6. The owner or operator shall conduct periodic maintenance of each engine and add-on control equipment as recommended by the engine and control equipment manufacturers or as specified by any other maintenance procedure approved in advance, in writing, by the District.
7. The owner or operator of this engine shall keep the following records: applicable fuel certification; manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing, in advance, by the District. These records shall be kept on site for at least the same period of time as the engine to which the records apply is located at the site. These records shall be made available to the District upon request.

## CERTIFICATE OF REGISTRATION

**EXPIRES: December 31, 2016**

This Certificate is not valid until required fees are received by the District.

The above is hereby granted a Certificate of Registration for the article, machine, equipment or contrivance described below. This Certificate of Registration is not transferable to a new owner nor is it valid for operation of the equipment at another location except as specified. This Certificate of Registration or copy must be posted on or within 25 feet of the equipment, or readily available on the operating premises.

**EQUIPMENT OWNER**

**EQUIPMENT DESCRIPTION**

EMERGENCY ENGINE: FORD, MODEL CSG 649I6005F, NATURAL GAS FIRED, 82 BHP, S/N 263731-0498, DRIVING AN ELECTRIC GENERATOR. (975914 ALC 01/01)

Every person who owns or operates this equipment is required to comply with the conditions listed below and all applicable requirements and District rules, including but not limited to Rules 2, 12/12.1, 40, 50, 51.

Fee Schedules: 1 [34W] Registered Engine (Rule 12)

BEC: APCD2009-CON-000065

**FAILURE TO OPERATE IN COMPLIANCE IS A MISDEMEANOR SUBJECT TO CIVIL AND CRIMINAL PENALTIES**

1. The engine shall be operated only during emergency situations and for not more than 52 hours per calendar year for non-emergency purposes.
2. Visible emissions including crank case smoke shall comply with Rule 50. (Rule 50)
3. Rule 51-public nuisance: equipment shall not cause or contribute to public nuisance.
4. Diesel engines shall use only California diesel fuel. Gaseous fuel engines shall use only gaseous fuel which contains no more than 10 grains of sulfur compounds, calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquified petroleum gas (LPG), and butane. Gasoline engines shall use only California reformulated gasoline.

calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)

5. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7. This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
  - (a) old meter's hour reading,
  - (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
  - (c) copy of receipt of new meter or of installation work order.A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
9. The owner or operator of this engine shall, at their discretion, either:
  - a) operate and maintain a certified engine and any control device according to the manufacturer's emission-related written instructions, or
  - b) operate and maintain the engine in a manner consistent with good air pollution control practice for minimizing emissions.The periodic maintenance shall be conducted at least once each calendar year.  
(40 CFR 60 Subpart JJJJ, or Rule 12, or Rule 69.4.1)
10. The owner or operator of the engine shall maintain the manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer on site for at least the same period of time as the engine is located at the site.  
This manual shall be made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
11. The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following:
  - (a) dates and times of engine operation; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency, if known;
  - (b) records of periodic engine maintenance shall include the date and a description of the maintenance that was performed; and

calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)

5. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7. This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
  - (a) old meter's hour reading,
  - (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
  - (c) copy of receipt of new meter or of installation work order.A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
9. The owner or operator of this engine shall, at their discretion, either:
  - a) operate and maintain a certified engine and any control device according to the manufacturer's emission-related written instructions, or
  - b) operate and maintain the engine in a manner consistent with good air pollution control practice for minimizing emissions.The periodic maintenance shall be conducted at least once each calendar year.  
(40 CFR 60 Subpart JJJJ, or Rule 12, or Rule 69.4.1)
10. The owner or operator of the engine shall maintain the manual of recommended maintenance provided by the manufacturer, or other maintenance procedure as approved in writing by the Air Pollution Control Officer on site for at least the same period of time as the engine is located at the site.  
This manual shall be made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
11. The owner or operator of this engine shall maintain a monthly operating log containing, at a minimum, the following:
  - (a) dates and times of engine operation; whether the operation was for maintenance and testing purposes or emergency use; and the nature of the emergency, if known;
  - (b) records of periodic engine maintenance shall include the date and a description of the maintenance that was performed; and

calculated as hydrogen sulfide, per 100 cubic feet of dry gaseous fuel at standard conditions. Gaseous fuels include natural gas, propane, liquefied petroleum gas (LPG), butane. Gasoline engines shall use only California reformulated gasoline. (Rule 62)

5. Visible emissions including crank case smoke shall comply with Air Pollution Control District Rule 50. (Rule 50)
6. The equipment described above shall not cause or contribute to a public nuisance. (Rule 51)
7. This engine is located at an area source that is a Commercial, Institutional, or Residential facility as defined in 40 CFR 63.6675. If this location no longer qualifies as a Commercial, Institutional, or Residential facility, then an application for permit modification to include applicable NESHAP requirements shall be submitted to the Air Pollution Control District. (40 CFR 63 Subpart ZZZZ)
8. A non-resettable engine hour meter shall be installed on this engine, maintained in good working order, and used for recording engine operation hours. If a meter is replaced, the Air Pollution Control District's Compliance Division shall be notified in writing within 10 calendar days. The written notification shall include the following information:
  - (a) old meter's hour reading,
  - (b) replacement meter's manufacturer name, model and serial number if available and current hour reading on replacement meter, and
  - (c) copy of receipt of new meter or of installation work order.A copy of the meter replacement notification shall be maintained onsite and made available to the Air Pollution Control District upon request.  
(Rule 12, Rule 69.4.1, 40 CFR 60 Subpart JJJJ, 40 CFR 63 Subpart ZZZZ)
9. The owner or operator of this engine shall conduct periodic maintenance of the engine and add-on control equipment, if any, as recommended by the engine and control equipment manufacturers or as specified by the engine servicing company's maintenance procedures. Maintenance shall be conducted at least once each calendar year, and shall include, but is not limited to, the following:
  - 1) Change oil and filter, or test in accordance with the requirements of 40 CFR §63.6625(i) or (j);
  - 2) Inspect and clean air filters, replacing as necessary;
  - 3) Inspect all hoses and belts, replacing as necessary; and
  - 4) Inspect spark plugs, if equipped, replacing as necessary..Documentation of oil and filter changes or copies of the oil test analysis shall be kept on site and made available upon request. If testing in accordance with 40 CFR §63.6625(i) or (j), the oil analysis program must analyze the Total Base Number, viscosity and percent water content (for compression ignition engines) and the Total Acid Number, viscosity and percent water content (for spark ignited engines). If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine.  
(Rule 12, Rule 69.4.1, 40 CFR 63 Subpart ZZZZ).

Good morning Mr. Zechman,

Thank you for working with me and Dixieline on this issue and allowing me to share correspondence regarding the violations we received.

Below is the email that our merchant sent to all of our locations instructing them to remove all displays as well as inventory and this email was also posted at our sales counters and breakrooms for all employees to acknowledge. I have also attached a photo of what the locations were required to do with inventory prior to the vendor picking up and removing the inventory from the locations.

Thanks again for your time and attention to this matter. I look forward to hearing back from you at your convenience.

Sincerely,

Troy Staufenbeil

Hello Mr. Zechman,

Per our conversation a couple of weeks ago, you requested correspondence between Dixieline and our supplier to expedite removal of our non-compliant water heaters.

Here is one email (please read below), and I will forward you a couple more.

Please call me with any questions. (619) 787-0520

Sincerely,

Troy Staufenbeil

Gentlemen,

As you know, we had to jump through hoops to pull all of the ( San Diego ) non-compliant water heaters from the Dixieline stores.

They were not only fined for having them on the floor, but they were also fined for still having them in the back room palletized to go back.

Needless to say we quickly got them out of their stores and back to Hurricane. Out of box displays included. Todd is getting a count of how many displays there are.

Do you want me to contact the vendor to remove, or re-box? I have been dealing with Mark Sweat. Let me know.

Thank you,

Jerry Schwabl

Jerry,

We are unloading the trailer of water heaters from Dixieline and are finding heaters out of the box. We can not resell them so they will be deducted from the credit.

Best,  
Todd

Good morning Mr. Zechman,

Thank you for working with me and Dixieline on this issue and allowing me to share correspondence regarding the violations we received.

Below is the email that our merchant sent to all of our locations instructing them to remove all displays as well as inventory and this email was also posted at our sales counters and breakrooms for all employees to acknowledge. I have also attached a photo of what the locations were required to do with inventory prior to the vendor picking up and removing the inventory from the locations.

Thanks again for your time and attention to this matter. I look forward to hearing back from you at your convenience.

Sincerely,

Troy Staufenbeil

**SAN DIEGO AIR POLLUTION CONTROL DISTRICT  
INSPECTOR'S NARRATIVE**

- Inspector' Report Only
- Notice of Violation
- Complaint
- Other:

<b>Company or Source:</b> Dixieline	<b>Page:</b> 1	<b>Number:</b> 226881
<b>Location or Address:</b> 8372 Center Dr., La Mesa, CA 91942	<b>Date:</b> 7/8/2016	<b>Time:</b> 1600
<b>Person(s) Involved:</b> Troy Staufenbeil, Risk Manager	<b>Sector:</b>	<b>I.D. Number:</b>
	<b>Permit to Operate #:</b>	

The APCD received a citizen complaint alleging that new water heaters which were not compliant with Rule 69.5.1 were being sold at stores in San Diego. My investigation of this complaint involved visiting a number of different stores.

APCD Rule 69.5.1 was adopted 6/24/2015 and became effective 7/1/2016. After adoption of the rule, advisories were sent to various businesses that could be affected. The rule applies to new water heaters operated with natural gas and with a rated heat input capacity of less than 75,000 BTU per hour. The rule prohibits selling or offering for sale for use in San Diego County new water heaters that do not meet the emission standard of 10 nanograms of nitrogen oxides per joule of heat output.

On 7/7/2016 I went to the Dixieline store at 8372 Center Drive and found four models of water heaters available for sale to which the current rule applied but which did not meet the standards of the rule (see pictures attached).

I issued Notice of Violation (NOV) #226881 to Dixieline and sent it by certified mail along with a Fact Sheet. I spoke with Dixieline Risk Manager, Troy Staufenbeil, to advise him of the violation and the response requirements, which he indicated he understood.

## WHAT A "NOTICE OF VIOLATION" MEANS

You have just received a NOTICE OF VIOLATION from the San Diego County Air Pollution Control District, a government agency responsible for air pollution control in San Diego County. A Notice of Violation is the District's claim that someone has violated the District's rules and/or state laws applying to air pollution. The District is authorized by state law to seek penalties for violations.

## WHAT TO DO IF YOU RECEIVE A NOTICE OF VIOLATION

If you receive a Notice of Violation, take **IMMEDIATE** action to prevent the violation from recurring. Each additional day of non-compliance may be considered an additional violation.

ADVISE THE DISTRICT IN WRITING OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION OR THE REASON(S) YOU THINK THE VIOLATION DID NOT OCCUR. SUBMIT YOUR RESPONSE WITHIN TEN DAYS OF THE DATE THE NOTICE OF VIOLATION IS ISSUED. MAIL YOUR RESPONSE TO: AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649; OR FAX IT TO (858) 586-2651, ATTENTION: COMPLIANCE DIVISION.

If you need to continue using the equipment that is allegedly causing the violation, you may petition the Hearing Board for a **VARIANCE**. A variance allows you to legally operate the equipment causing the violation while you are working to correct the problem. The District does not grant variances, but it can tell you how to apply for a variance. Contact the District's Compliance Division at (858) 586-2650 if you wish to obtain this information. If you believe the equipment is not causing a violation and you continue to operate without a variance, penalties may be assessed for each day the District determines the equipment caused a violation.

## HOW THE NOTICE OF VIOLATION WILL BE RESOLVED

The District will review the information submitted in your written response to determine how to handle the alleged violation. If the District determines that a violation did not occur, the Notice of Violation will be dismissed. Where a violation is found to have occurred, the Notice of Violation is usually handled through the District's "Violation Settlement Program." A Notice of Violation could also result in civil or criminal prosecution.

### **VIOLATION SETTLEMENT PROGRAM**

If the District determines that a Notice of Violation should be handled through this program, a letter will be sent offering to settle the Notice of Violation. If there is no response within 14 days, the violation may be referred for civil or criminal prosecution. The letter sent will usually require the payment of a penalty.

### **CIVIL PROSECUTION**

A Notice of Violation which is not resolved through the Violation Settlement Program may be referred for civil prosecution. If so, a lawsuit will be filed against you, seeking maximum penalties for the violation. The maximum penalties established by the California Health and Safety Code range between \$1,000 and \$1,000,000 per day of violation, depending on the nature of the violation.

### **CRIMINAL PROSECUTION**

In serious cases, a Notice of Violation may be referred for criminal prosecution. The maximum penalty established by the California Health and Safety Code is \$1,000 - \$1,000,000 per day of violation or up to one year in jail, or both.

**PLEASE SUBMIT ALL CORRESPONDENCE TO THE DISTRICT AT THE ADDRESS SHOWN ON THE FRONT OF THIS FORM. YOU MAY CALL (858) 586-2650 SHOULD YOU WISH TO CHECK THE STATUS OF YOUR VIOLATION.**

**REVISED SETTLEMENT OFFER**

Via Email Only

TROY STAUFENBEIL  
DIXIELINE LUMBER  
3250 SPORTS ARENA BLVD  
SAN DIEGO CA 92110

**RE: NOTICE OF VIOLATION NUMBERS 226881 & 226883**

Location of Violations: 8372 Center Dr., La Mesa CA 91942  
4888 Convoy St., San Diego CA 92111  
Rule/Section Violated: 67.5.1(d)(1)(i)

Dear Mr. Staufenbeil:

Thank you for the additional information provided regarding Dixieline's efforts to stop sales of the non-compliant water heaters after the first notice of violation was issued on July 8, 2016.

When our inspector went to the Dixieline store at 4888 Convoy Street on July 21<sup>st</sup>, he saw at least six water heater boxes that were not marked "noncompliant" or "do not sell" or something similar. Given the July 11<sup>th</sup> email from Bob Koenig, it appears that this may have been an oversight at the Convoy Street store.

Based on this additional information provided, the Air Pollution Control District (District) revises its prior offer to settle Notice of Violation Numbers 226881 and 226883 as follows:

1. Payment of a civil penalty in the amount of \$3500 (reduced from \$5000).
2. Upon receipt of the payment, Dixieline shall be released from any and all claims by the District for civil or criminal penalties arising out of the violations of District Rules and air quality laws referred to in the Notice of Violation. However, such release does not relieve Dixieline from complying with the regulations of other government agencies, and it does not address or resolve violations of regulations which may be enforced by any other agency.
3. Settlement of this matter shall not constitute an admission of liability in any administrative or judicial proceeding, nor shall evidence of the settlement be admissible in any such proceeding.
4. However, the District reserves the right to prove the alleged violations in connection with any petition for a variance, permit revocation, or abatement order before the District Hearing Board, or to rely on the alleged violations in connection with the determination of the appropriate penalty in the event similar Notices of Violation are issued in the future. Similarly, at any such time you may raise any defenses or contrary proof you may have concerning the facts of the alleged violations.

This revised offer to settle is good until December 2, 2016. Please write the reference number, 2016-NOV-000498/545, on your check and mail it to: San Diego County Air Pollution Control District, 10124 Old Grove Rd., San Diego CA 92131. If you would like to pay by American Express or Discover card, please call (858) 586-2600, ask for the accounting division and reference 2016-NOV-000498/545.

**RE: NOTICE OF VIOLATION NUMBERS 226881 AND 226883**

Location of Violation: 8372 Center Dr. & 4888 Convoy St. (92111), La Mesa, CA 91942  
Rule/Section Violated: 67.5.1(d)(1)(i)

Dear Mr. Koenig:

Air Pollution Control District inspections on July 8 and 21, 2016 found that Dixieline Lumber & Home Centers was offering for sale at two different stores several models of new water heaters that did not comply with the standards for nitrogen oxide emissions in District Rule 69.5.1.

As a result, staff from the San Diego Air Pollution Control District (District) issued Notice of Violation Nos. 226881, 226883 (copies enclosed) to Dixieline Lumber Co.

Penalties for such violations are determined according to the California Health & Safety Code and can include civil penalties of up to \$10,000, for each day of each violation. The amount of the Air Pollution Control District's settlement offer specified below takes into account the magnitude and severity of the violation, as well as the prior history of violations of a similar nature. The District also considers, if relevant, how well equipment was maintained, whether control equipment was unproven or innovative, and any action taken to mitigate the violation (including any quick cleanup or construction). For more information on the District's Violation Settlement Program, please see

[http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation\\_Information.html](http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation_Information.html)

The District would like to settle this matter without going to court. Based on currently available information, I am authorized to settle this matter as follows:

1. Payment of a civil penalty in the amount of \$5,000.
2. Upon receipt of the payment, Dixieline Lumber Co shall be released from any and all claims by the District for civil or criminal penalties arising out of the violations of District Rules and air quality laws referred to in the Notice of Violation. However, such release does not relieve the Dixieline Lumber Co from complying with the regulations of other government agencies, and it does not address or resolve violations of regulations which may be enforced by any other agency.
3. Settlement of this matter shall not constitute an admission of liability in any administrative or judicial proceeding, nor shall evidence of the settlement be admissible in any such proceeding.
4. However, the District reserves the right to prove the alleged violation in connection with any petition for a variance, permit revocation, or abatement order before the District Hearing Board, or to rely on the alleged violation in connection with the determination of the appropriate penalty in the event similar Notices of Violation are issued in the future. Similarly, at any such time you could present information you have regarding the alleged violations.

**NOTE TO APPLICANT:**

Before acting on an application for Authority to Construct or Permit to Operate, the District may require further information, plans, or specifications. Forms with insufficient information may be returned to the applicant for completion, which will cause a delay in application processing and may increase processing fees. The applicant should correspond with equipment and material manufacturers to obtain the information requested on this supplemental form.

# NOTICE OF VIOLATION

Date(s) of Violation 10/2/14, 10/19/14, 11/10/14 Date of Report 2/2/15  
 Name Sports Arena AM PM Phone 619 270 9456  
 Address 3580 Sports Arena Bl. City SD CA 92110  
 (Zip Code)  
 Violation Location Same as above City \_\_\_\_\_  
 (Zip Code)

Specifically, the following violation(s) of the San Diego Air Pollution Control District rules and/or laws of the State of California has occurred: (abbreviations: H&S = Cal. Health & Safety Code; CCR = Cal. Code of Regulations; R = Rule)

Section	Description of Violation
R21#21 R61.4.1(d)(3)(iii) VR202	On 10/2/14, 10/19/14, and 11/10/14 weekly ullage pressure leak test warning alarms were cleared. Only certified technicians shall manually clear ISD alarm conditions. Following 10/2/14 and 10/19/14 the same alarm occurred in the next assessment period. Alarms shall not be cleared unless all repairs and testing is conducted. No information was available to indicate the required certified personnel cleared the alarms and no logs of repairs or test results were available.
R21#19 R61.4.1 VR202	On 10/19/14 dispensing was disabled following weekly ullage pressure leak test failure at 0000. At 0113 on 10/19/14 the alarm was cleared, and it <del>recurred</del> <sup>recurred</sup> next assessment with no testing or repairs.

Pursuant to California Health And Safety Code section 42400 et seq., any person who violates any Order, Rule, or Regulation of the State Board or of an Air Pollution Control District is guilty of a MISDEMEANOR. Each day a violation occurs constitutes a separate offense.

**YOU MUST ADVISE THE DISTRICT IN WRITING, WITHIN TEN DAYS, OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION(S) OR THE REASON(S) YOU BELIEVE THE VIOLATION(S) DID NOT OCCUR. PLEASE MAIL YOUR RESPONSE TO THE AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649.**

 Signature D Angelo K (Print name) Date 02/02/2015

(See reverse side for more information)

## WHAT A "NOTICE OF VIOLATION" MEANS

You have just received a NOTICE OF VIOLATION from the San Diego County Air Pollution Control District, a government agency responsible for air pollution control in San Diego County. A Notice of Violation is the District's claim that someone has violated the District's rules and/or state laws applying to air pollution. The District is authorized by state law to seek penalties for violations.

## WHAT TO DO IF YOU RECEIVE A NOTICE OF VIOLATION

If you receive a Notice of Violation, take **IMMEDIATE** action to prevent the violation from recurring. Each additional day of non-compliance may be considered an additional violation.

ADVISE THE DISTRICT IN WRITING OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION OR THE REASON(S) YOU THINK THE VIOLATION DID NOT OCCUR. SUBMIT YOUR RESPONSE WITHIN TEN DAYS OF THE DATE THE NOTICE OF VIOLATION IS ISSUED. MAIL YOUR RESPONSE TO: AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649; OR FAX IT TO (858) 586-2651, ATTENTION: COMPLIANCE DIVISION.

If you need to continue using the equipment that is allegedly causing the violation, you may petition the Hearing Board for a **VARIANCE**. A variance allows you to legally operate the equipment causing the violation while you are working to correct the problem. The District does not grant variances, but it can tell you how to apply for a variance. Contact the District's Compliance Division at (858) 586-2650 if you wish to obtain this information. If you believe the equipment is not causing a violation and you continue to operate without a variance, penalties may be assessed for each day the District determines the equipment caused a violation.

## HOW THE NOTICE OF VIOLATION WILL BE RESOLVED

The District will review the information submitted in your written response to determine how to handle the alleged violation. If the District determines that a violation did not occur, the Notice of Violation will be dismissed. Where a violation is found to have occurred, the Notice of Violation is usually handled through the District's "Violation Settlement Program." A Notice of Violation could also result in civil or criminal prosecution.

### **VIOLATION SETTLEMENT PROGRAM**

If the District determines that a Notice of Violation should be handled through this program, a letter will be sent offering to settle the Notice of Violation. If there is no response within 14 days, the violation may be referred for civil or criminal prosecution. The letter sent will usually require the payment of a penalty.

### **CIVIL PROSECUTION**

A Notice of Violation which is not resolved through the Violation Settlement Program may be referred for civil prosecution. If so, a lawsuit will be filed against you, seeking maximum penalties for the violation. The maximum penalties established by the California Health and Safety Code range between \$1,000 and \$1,000,000 per day of violation, depending on the nature of the violation.

### **CRIMINAL PROSECUTION**

In serious cases, a Notice of Violation may be referred for criminal prosecution. The maximum penalty established by the California Health and Safety Code is \$1,000 - \$1,000,000 per day of violation or up to one year in jail, or both.

**PLEASE SUBMIT ALL CORRESPONDENCE TO THE DISTRICT AT THE ADDRESS SHOWN ON THE FRONT OF THIS FORM. YOU MAY CALL (858) 586-2650 SHOULD YOU WISH TO CHECK THE STATUS OF YOUR VIOLATION.**

NOTICE OF VIOLATION  
AIR POLLUTION CONTROL DISTRICT  
COUNTY OF SAN DIEGO  
10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649  
4000007 - NOV - 2002009  
558282

**WHAT A "NOTICE OF VIOLATION" MEANS**

You have just received a NOTICE OF VIOLATION from the San Diego County Air Pollution Control District, a government agency responsible for air pollution control in San Diego County. A Notice of Violation is the District's claim that someone has violated the District's rules and/or state laws applying to air pollution. The District is authorized by state law to seek penalties for violations.

**WHAT TO DO IF YOU RECEIVE A NOTICE OF VIOLATION**

If you receive a Notice of Violation, take **IMMEDIATE** action to prevent the violation from recurring. Each additional day of non-compliance may be considered an additional violation.

**ADVISE THE DISTRICT IN WRITING OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION OR THE REASON(S) YOU THINK THE VIOLATION DID NOT OCCUR. SUBMIT YOUR RESPONSE WITHIN TEN DAYS OF THE DATE THE NOTICE OF VIOLATION IS ISSUED. MAIL YOUR RESPONSE TO: AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649; OR FAX IT TO (858) 586-2651, ATTENTION: COMPLIANCE DIVISION.**

If you need to continue using the equipment that is allegedly causing the violation, you may petition the Hearing Board for a **VARIANCE**. A variance allows you to legally operate the equipment causing the violation while you are working to correct the problem. The District does not grant variances, but it can tell you how to apply for a variance. Contact the District's Compliance Division at (858) 586-2650 if you wish to obtain this information. If you believe the equipment is not causing a violation and you continue to operate without a variance, penalties may be assessed for each day the District determines the equipment caused a violation.

**HOW THE NOTICE OF VIOLATION WILL BE RESOLVED**

The District will review the information submitted in your written response to determine how to handle the alleged violation. If the District determines that a violation did not occur, the Notice of Violation will be dismissed. Where a violation is found to have occurred, the Notice of Violation is usually handled through the District's "Violation Settlement Program." A Notice of Violation could also result in civil or criminal prosecution.

**VIOLATION SETTLEMENT PROGRAM**

If the District determines that a Notice of Violation should be handled through this program, a letter will be sent offering to settle the Notice of Violation. If there is no response within 14 days, the violation may be referred for civil or criminal prosecution. The letter sent will usually require the payment of a penalty.

**CIVIL PROSECUTION**

A Notice of Violation which is not resolved through the Violation Settlement Program may be referred for civil prosecution. If so, a lawsuit will be filed against you, seeking maximum penalties for the violation. The maximum penalties established by the California Health and Safety Code range between \$1,000 and \$1,000,000 per day of violation, depending on the nature of the violation.

**CRIMINAL PROSECUTION**

In serious cases, a Notice of Violation may be referred for criminal prosecution. The maximum penalty established by the California Health and Safety Code is \$1,000 - \$1,000,000 per day of violation or up to one year in jail, or both.

**PLEASE SUBMIT ALL CORRESPONDENCE TO THE DISTRICT AT THE ADDRESS SHOWN ON THE FRONT OF THIS FORM. YOU MAY CALL (858) 586-2650 SHOULD YOU WISH TO CHECK THE STATUS OF YOUR VIOLATION.**

RE: NOV 227095

To Who It May Concern,

In regards to Notice of Violation 227095 dated 10/7/2016 for the Arco site located at 3850 Sports Arena Blvd, San Diego, CA 92110, the following information is pertinent to resolving this matter.

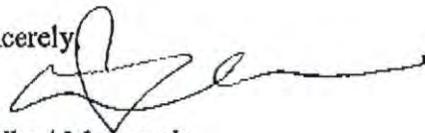

First we conducted the Compliance pretest on 2/1/2016, all components Passed. PCET recent notification in for 2/8/16 Final but my site had an unexpected ISD alarm so we could not test that day. PCET the testing company was swamped so next available day was 3/15/16 and since in past we have test during permit month I did not think this was an issue. I asked the testing company if APCD sent a notification out regarding this new requirement and they said No.

In summary, if I have to take the compliance class to get this NOV removed or reduced I will.

Please factor in the harm, duration, frequency, and financial burden as relevant factors as I can Not control ISD alarms. All our compliance paperwork was in order.

Please call me to discuss ~~858-689-6949~~ 858-699-8455

Sincerely,

Shrihari Mupparaju  
Sports Arena Arco

Good morning Mr. Zechman,

Thank you for working with me and Dixieline on this issue and allowing me to share correspondence regarding the violations we received.

Below is the email that our merchant sent to all of our locations instructing them to remove all displays as well as inventory and this email was also posted at our sales counters and breakrooms for all employees to acknowledge. I have also attached a photo of what the locations were required to do with inventory prior to the vendor picking up and removing the inventory from the locations.

Thanks again for your time and attention to this matter. I look forward to hearing back from you at your convenience.

Sincerely,

Troy Staufenbeil

Hello Mr. Zechman,

Per our conversation a couple of weeks ago, you requested correspondence between Dixieline and our supplier to expedite removal of our non-compliant water heaters.

Here is one email (please read below), and I will forward you a couple more.

Please call me with any questions. (619) 787-0520

Sincerely,

Troy Staufenbeil

Gentlemen,

As you know, we had to jump through hoops to pull all of the ( San Diego ) non-compliant water heaters from the Dixieline stores.

They were not only fined for having them on the floor, but they were also fined for still having them in the back room palletized to go back.

Needless to say we quickly got them out of their stores and back to Hurricane. Out of box displays included. Todd is getting a count of how many displays there are.

Do you want me to contact the vendor to remove, or re-box? I have been dealing with Mark Sweat. Let me know.

Thank you,

Jerry Schwabl

Good morning Mr. Zechman,

Thank you for working with me and Dixieline on this issue and allowing me to share correspondence regarding the violations we received.

Below is the email that our merchant sent to all of our locations instructing them to remove all displays as well as inventory and this email was also posted at our sales counters and breakrooms for all employees to acknowledge. I have also attached a photo of what the locations were required to do with inventory prior to the vendor picking up and removing the inventory from the locations.

Thanks again for your time and attention to this matter. I look forward to hearing back from you at your convenience.

Sincerely,

Troy Staufenbeil

## Important Message. It needs you immediate attention!

We have been notified by the San Diego Air Resource board that the water heaters that we stock do not meet the July 1<sup>st</sup> code requirement. We cannot sell them. Please pull all your displays off the floor. We are looking to Orgill to find the replacement immediately.

SETTLEMENT OFFER

BOB KOENIG  
DIXIELINE LUMBER CO  
3250 SPORTS ARENA BLVD.  
SAN DIEGO CA 92110

**RE: NOTICE OF VIOLATION NUMBERS 226881 AND 226883**

Location of Violation: 8372 Center Dr. & 4888 Convoy St. (92111), La Mesa, CA 91942  
Rule/Section Violated: 67.5.1(d)(1)(i)

Dear Mr. Koenig:

Air Pollution Control District inspections on July 8 and 21, 2016 found that Dixieline Lumber & Home Centers was offering for sale at two different stores several models of new water heaters that did not comply with the standards for nitrogen oxide emissions in District Rule 69.5.1.

As a result, staff from the San Diego Air Pollution Control District (District) issued Notice of Violation Nos. 226881, 226883 (copies enclosed) to Dixieline Lumber Co.

Penalties for such violations are determined according to the California Health & Safety Code and can include civil penalties of up to \$10,000, for each day of each violation. The amount of the Air Pollution Control District's settlement offer specified below takes into account the magnitude and severity of the violation, as well as the prior history of violations of a similar nature. The District also considers, if relevant, how well equipment was maintained, whether control equipment was unproven or innovative, and any action taken to mitigate the violation (including any quick cleanup or construction). For more information on the District's Violation Settlement Program, please see [http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation\\_Information.html](http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation_Information.html)

The District would like to settle this matter without going to court. Based on currently available information, I am authorized to settle this matter as follows:

1. Payment of a civil penalty in the amount of \$5,000.
2. Upon receipt of the payment, Dixieline Lumber Co shall be released from any and all claims by the District for civil or criminal penalties arising out of the violations of District Rules and air quality laws referred to in the Notice of Violation. However, such release does not relieve the Dixieline Lumber Co from complying with the regulations of other government agencies, and it does not address or resolve violations of regulations which may be enforced by any other agency.
3. Settlement of this matter shall not constitute an admission of liability in any administrative or judicial proceeding, nor shall evidence of the settlement be admissible in any such proceeding.
4. However, the District reserves the right to prove the alleged violation in connection with any petition for a variance, permit revocation, or abatement order before the District Hearing Board, or to rely on the alleged violation in connection with the determination of the appropriate penalty in the event similar Notices of Violation are issued in the future. Similarly, at any such time you could present information you have regarding the alleged violations.

I.D. Number:

Person(s) Involved: Troy Staufenbeil, Risk Manager

Permit to Operate #:

The APCD received a citizen complaint alleging that new water heaters which were not compliant with Rule 69.5.1 were being sold at stores in San Diego. My investigation of this complaint involved visiting a number of different stores.

APCD Rule 69.5.1 was adopted 6/24/2015 and became effective 7/1/2016. After adoption of the rule, advisories were sent to various businesses that could be affected. The rule applies to new water heaters operated with natural gas and with a rated heat input capacity of less than 75,000 BTU per hour. The rule prohibits selling or offering for sale for use in San Diego County new water heaters that do not meet the emission standard of 10 nanograms of nitrogen oxides per joule of heat output.

On 7/21/2016 as part of a follow-up inspection I went to the Dixieline store at 4888 Convoy Street and found five models of water heaters available for sale to which the current rule applied but which did not meet the standards of the rule (see pictures attached).

I issued Notice of Violation (NOV) #226883 to Dixieline and sent it by certified mail along with a Fact Sheet. I spoke with Dixieline Risk Manager, Troy Staufenbeil, to advise him of the violation and the response requirements, which he indicated he understood.

NOTICE OF VIOLATION

Date(s) of Violation 7/21/2016
Name Dixieline
Address 3250 Sports Arena Blvd
Violation Location 4888 Convoy St.

Date of Report 7/21/2016
Phone 619-224-4120
City San Diego 92110
City San Diego 92111

Specifically, the following violation(s) of the San Diego Air Pollution Control District rules and/or laws of the State of California has occurred: (abbreviations: H&S = Cal. Health & Safety Code; CCR = Cal. Code of Regulations; R = Rule)

Table with 2 columns: Section, Description of Violation. Handwritten entry: R-69.5.1 (d)(1)(i) offering for sale for use in San Diego County water heaters which do not meet the nitrogen oxides standard of 10 nanograms nitrogen oxides per joule of heat output. Specifically, Reliance water heaters model numbers 1250 GXRT 300, 950 NKRT 400, 650 NOCT 400, 630 NOCT 400, 640 NOCT 400, were available for sale in the store and did not meet the required standards.

Pursuant to California Health And Safety Code section 42400 et seq., any person who violates any Order, Rule, or Regulation of the State Board or of an Air Pollution Control District is guilty of a MISDEMEANOR. Each day a violation occurs constitutes a separate offense.

YOU MUST ADVISE THE DISTRICT IN WRITING, WITHIN TEN DAYS, OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION(S) OR THE REASON(S) YOU BELIEVE THE VIOLATION(S) DID NOT OCCUR. PLEASE MAIL YOUR RESPONSE TO THE AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649.

REC'D JUL 21 2016

Mail Cert #7015 0640 003 5341 7091 7/21/16 st

## WHAT A "NOTICE OF VIOLATION" MEANS

You have just received a NOTICE OF VIOLATION from the San Diego County Air Pollution Control District, a government agency responsible for air pollution control in San Diego County. A Notice of Violation is the District's claim that someone has violated the District's rules and/or state laws applying to air pollution. The District is authorized by state law to seek penalties for violations.

## WHAT TO DO IF YOU RECEIVE A NOTICE OF VIOLATION

If you receive a Notice of Violation, take **IMMEDIATE** action to prevent the violation from recurring. Each additional day of non-compliance may be considered an additional violation.

ADVISE THE DISTRICT IN WRITING OF THE ACTION TAKEN TO CORRECT THE ALLEGED VIOLATION OR THE REASON(S) YOU THINK THE VIOLATION DID NOT OCCUR. SUBMIT YOUR RESPONSE WITHIN TEN DAYS OF THE DATE THE NOTICE OF VIOLATION IS ISSUED. MAIL YOUR RESPONSE TO: AIR POLLUTION CONTROL DISTRICT, ATTENTION: COMPLIANCE DIVISION, 10124 OLD GROVE RD., SAN DIEGO, CALIFORNIA 92131-1649; OR FAX IT TO (858) 586-2651, ATTENTION: COMPLIANCE DIVISION.

If you need to continue using the equipment that is allegedly causing the violation, you may petition the Hearing Board for a **VARIANCE**. A variance allows you to legally operate the equipment causing the violation while you are working to correct the problem. The District does not grant variances, but it can tell you how to apply for a variance. Contact the District's Compliance Division at (858) 586-2650 if you wish to obtain this information. If you believe the equipment is not causing a violation and you continue to operate without a variance, penalties may be assessed for each day the District determines the equipment caused a violation.

## HOW THE NOTICE OF VIOLATION WILL BE RESOLVED

The District will review the information submitted in your written response to determine how to handle the alleged violation. If the District determines that a violation did not occur, the Notice of Violation will be dismissed. Where a violation is found to have occurred, the Notice of Violation is usually handled through the District's "Violation Settlement Program." A Notice of Violation could also result in civil or criminal prosecution.

### **VIOLATION SETTLEMENT PROGRAM**

If the District determines that a Notice of Violation should be handled through this program, a letter will be sent offering to settle the Notice of Violation. If there is no response within 14 days, the violation may be referred for civil or criminal prosecution. The letter sent will usually require the payment of a penalty.

### **CIVIL PROSECUTION**

A Notice of Violation which is not resolved through the Violation Settlement Program may be referred for civil prosecution. If so, a lawsuit will be filed against you, seeking maximum penalties for the violation. The maximum penalties established by the California Health and Safety Code range between \$1,000 and \$1,000,000 per day of violation, depending on the nature of the violation.

### **CRIMINAL PROSECUTION**

In serious cases, a Notice of Violation may be referred for criminal prosecution. The maximum penalty established by the California Health and Safety Code is \$1,000 - \$1,000,000 per day of violation or up to one year in jail, or both.

**PLEASE SUBMIT ALL CORRESPONDENCE TO THE DISTRICT AT THE ADDRESS SHOWN ON THE FRONT OF THIS FORM. YOU MAY CALL (858) 586-2650 SHOULD YOU WISH TO CHECK THE STATUS OF YOUR VIOLATION.**

TROY STAUFENBEIL  
DIXIELINE LUMBER  
3250 SPORTS ARENA BLVD  
SAN DIEGO CA 92110

**RE: NOTICE OF VIOLATION NUMBERS 226881 & 226883**

Location of Violations: 8372 Center Dr., La Mesa CA 91942  
4888 Convoy St., San Diego CA 92111  
Rule/Section Violated: 67.5.1(d)(1)(i)

Dear Mr. Staufenbeil:

Thank you for the additional information provided regarding Dixieline's efforts to stop sales of the non-compliant water heaters after the first notice of violation was issued on July 8, 2016.

When our inspector went to the Dixieline store at 4888 Convoy Street on July 21<sup>st</sup>, he saw at least six water heater boxes that were not marked "noncompliant" or "do not sell" or something similar. Given the July 11<sup>th</sup> email from Bob Koenig, it appears that this may have been an oversight at the Convoy Street store.

Based on this additional information provided, the Air Pollution Control District (District) revises its prior offer to settle Notice of Violation Numbers 226881 and 226883 as follows:

1. Payment of a civil penalty in the amount of \$3500 (reduced from \$5000).
2. Upon receipt of the payment, Dixieline shall be released from any and all claims by the District for civil or criminal penalties arising out of the violations of District Rules and air quality laws referred to in the Notice of Violation. However, such release does not relieve Dixieline from complying with the regulations of other government agencies, and it does not address or resolve violations of regulations which may be enforced by any other agency.
3. Settlement of this matter shall not constitute an admission of liability in any administrative or judicial proceeding, nor shall evidence of the settlement be admissible in any such proceeding.
4. However, the District reserves the right to prove the alleged violations in connection with any petition for a variance, permit revocation, or abatement order before the District Hearing Board, or to rely on the alleged violations in connection with the determination of the appropriate penalty in the event similar Notices of Violation are issued in the future. Similarly, at any such time you may raise any defenses or contrary proof you may have concerning the facts of the alleged violations.

This revised offer to settle is good until December 2, 2016. Please write the reference number, 2016-NOV-000498/545, on your check and mail it to: San Diego County Air Pollution Control District, 10124 Old Grove Rd., San Diego CA 92131. If you would like to pay by American Express or Discover card, please call (858) 586-2600, ask for the accounting division and reference 2016-NOV-000498/545.

10124 Old Grove Rd. – San Diego - California 92131 – (858) 586-2600

FAX (858) 586-2651 – Smoking Vehicle Hotline – 1-800-28-SMOKE

If you have any questions, please contact me at (858) 586-2658 or at [joseph.zechman@sdcounty.ca.gov](mailto:joseph.zechman@sdcounty.ca.gov).

Sincerely,

SAN DIEGO CA 92110

**RE: NOTICE OF VIOLATION NUMBERS 226881 AND 226883**

Location of Violation: 8372 Center Dr. & 4888 Convoy St. (92111), La Mesa, CA 91942  
Rule/Section Violated: 67.5.1(d)(1)(i)

Dear Mr. Koenig:

Air Pollution Control District inspections on July 8 and 21, 2016 found that Dixieline Lumber & Home Centers was offering for sale at two different stores several models of new water heaters that did not comply with the standards for nitrogen oxide emissions in District Rule 69.5.1.

As a result, staff from the San Diego Air Pollution Control District (District) issued Notice of Violation Nos. 226881, 226883 (copies enclosed) to Dixieline Lumber Co.

Penalties for such violations are determined according to the California Health & Safety Code and can include civil penalties of up to \$10,000, for each day of each violation. The amount of the Air Pollution Control District's settlement offer specified below takes into account the magnitude and severity of the violation, as well as the prior history of violations of a similar nature. The District also considers, if relevant, how well equipment was maintained, whether control equipment was unproven or innovative, and any action taken to mitigate the violation (including any quick cleanup or construction). For more information on the District's Violation Settlement Program, please see

[http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation\\_Information.html](http://www.sdapcd.org/content/sdc/apcd/en/compliance-programs/Violation_Information.html)

The District would like to settle this matter without going to court. Based on currently available information, I am authorized to settle this matter as follows:

1. Payment of a civil penalty in the amount of \$5,000.
2. Upon receipt of the payment, Dixieline Lumber Co shall be released from any and all claims by the District for civil or criminal penalties arising out of the violations of District Rules and air quality laws referred to in the Notice of Violation. However, such release does not relieve the Dixieline Lumber Co from complying with the regulations of other government agencies, and it does not address or resolve violations of regulations which may be enforced by any other agency.
3. Settlement of this matter shall not constitute an admission of liability in any administrative or judicial proceeding, nor shall evidence of the settlement be admissible in any such proceeding.
4. However, the District reserves the right to prove the alleged violation in connection with any petition for a variance, permit revocation, or abatement order before the District Hearing Board, or to rely on the alleged violation in connection with the determination of the appropriate penalty in the event similar Notices of Violation are issued in the future. Similarly, at any such time you could present information you have regarding the alleged violations.

Dear Allison,

The San Diego Water Board received your Public Records Act request. I searched the following databases: the Board's Electronic Content Management (ECM) filing system, California Integrated Water Quality System (CIWQS), Stormwater Multiple Application and Report Tracking System (SMARTS), and GeoTracker. Based on the information you provided, my search did not return any records related to your request. Feel free to email me back if you have any further questions.

Thank you,

Regina

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 33 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: CAD073346413

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

## EXECUTIVE SUMMARY

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 23 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

Case Number: 9UT1101

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 44 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 23 CPS-SLIC sites within approximately 0.5 miles of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Hazardous waste / Contaminated Sites**

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there

## EXECUTIVE SUMMARY

is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 31 SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 140 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

AQUEOUS FOAM NRC: The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

A review of the AQUEOUS FOAM NRC list, as provided by EDR, and dated 02/23/2022 has revealed that there is 1 AQUEOUS FOAM NRC site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

Cleanup Status: COMPLETED - CASE CLOSED

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 4 DRYCLEANERS sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

Facility Status: Historical

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 26 EDR Hist Auto sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 7 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Code: 2030013 (TCR 12) Failure to comply with one or more of the following Designated Operator (DO) inspection requirements: Conduct the DO visual inspection at least once every 30 days. Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). The owner/operator sign and date the Designated Underground Storage Tank Operator Visual Inspection Report within 72 hours of being provided a signed copy. 23 CCR 2716 (a-e)
