Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Potential Contaminants of Concern: Not reported  
 Site History: This Voluntary Assistance Program (VAP) case was opened to evaluate a property based on Phase II results that indicated petroleum and chlorinated hydrocarbons in soil gas. The 1.5-acre Site is identified by County of San Diego Assessors Parcel Number (APN) 450-802-01-00 and consists of two buildings utilized by several commercial operations. Two dry cleaners and a gasoline service station operated at this Site from approximately 1944 through 1986, at which time the Underground Storage Tanks (USTs) were removed under permit concurrent with the demolition and reconstruction of all on-Site buildings. Based on soil vapor probe (SVP) sampling data from a 2016 Phase II, two areas-of-concern (AOCs) were identified. The first AOC was the former gas station area, located on the western portion of the present parking lot, which exceeded screening levels for petroleum volatile organic compounds (VOCs). The second AOC was the former Frontier Dry Cleaners located in the center of the outdoor parking lot, which exceeded screening levels for chlorinated VOCs (CVOCs) such as PCE and TCE. In September 2021, additional SVPs were advanced by Waterstone Environmental (Waterstone) resulting in a total of 27 SVPs. Twelve Exterior SVPs (SG1 to SG5, SG7 to SG9, SG16 and SG20 to SG22) were installed in the parking lot area to evaluate the quantity and distribution of residual contaminants-of-concern (COCs) from the two AOCs, and the remaining 15 Indoor SVPs (SG6, SG10-SG15, SG17-SG19, SG23-SG27) were installed around the perimeter of the on-Site buildings to evaluate potential indoor vapor intrusion. Soil vapor analysis from several Exterior SVPs located at the former gas station area exceeded screening levels petroleum VOCs. In addition, CVOCs exceeded screening levels both in the area of the former Frontier Dry Cleaners and the existing structure to the south. Because of SV exceedances near the structure, Waterstone conducted two indoor air (IA) sampling events, a 24-hour event on December 16, 2020, and an 8-hour event on January 5, 2021, both including outdoor air (OA) sample points. Sample analysis from both events was provided in a February 2022 Results of Indoor Air Sampling Report (RAI) which indicated that all PCE and TCE concentrations were below their

**S124384747**

commercial screening levels (SLs) of 2.0 ug/m<sup>3</sup> and 3.0 ug/m<sup>3</sup>, respectively. Nonetheless, IA concentrations from other VOCs compounds did exceed SLs. The CoCs are discussed below including lines of evidence indicating that the source of said CoCs is not from the subsurface. Benzene Although it was noted above its respective SLs in several IA samples, benzene concentrations, albeit lower, were also detected in OA samples suggesting an outdoor source. Moreover, subsurface benzene soil gas concentrations taken from the Building SVPs were all trace or ND indicating a lack of benzene at the subsurface of the building. As such the IA benzene could not be emanating from the subsurface. Although the exact source is unknown, suggestions for its source include indoor materials such as paints, adhesives, detergents, incense, etc., and outside sources such as car exhaust. Carbon Tetrachloride (CT) Although it exceeded SLs in all IA samples, respective OA samples had similar concentrations, strongly suggesting it was coming from the outside. Furthermore, no levels of CT were noted in any SVP, soil, or groundwater samples, providing additional lines of evidence that, although the source of the CT was unknown, it was clearly not originating from the subsurface. Chloroform Chloroform exceeded SLs in various IA samples but not in any OA samples. However, chloroform was ND or below SLs in all on-Site SV samples, indicating that the chloroform was not originating from the subsurface. Indoor sources would very likely be from water features as chloroform is well known to be a by-product of treated municipal water. Naphthalene Similar to chloroform, naphthalene exceeded SLs in IA samples but was not detected in OA samples. Likewise, it was not noted in SV samples, thus eliminating a subsurface source and suggesting an indoor source, possibly air fresheners or paint. In addition, Waterstone also observed use of incense, a naphthalene source, at the on-Site restaurants. Acrolein - Similar to chloroform and naphthalene, Acrolein exceeded SLs in IA samples, not OA samples, and also was not detected in SV samples, suggesting an indoor source such as smoking, gas stoves, wood-burning fireplaces, or cooking with oils, many of which would be consistent with restaurants located on site. Moreover, observations of incense, another likely source, were also noted. Based on this information, the RAI concludes that the results of IA sample analysis indicate that there are no subsurface vapor intrusion health risks from the dry-cleaning operations or from the former gas station. In 2021, grab groundwater samples were taken from four borings with respective results of up to 11 ug/l, 26 ug/l and 0.7 ug/l for TCE, cis-1,2 DCE, and vinyl chloride, slightly exceeding their respective maximum contaminant levels (MCLs) of 5 ug/l, 6 ug/l and 0.5 ug/l. All other VOCs were below MCLs. In addition, analysis from the on-Site monitoring well MW#16, associated with the nearby leaking underground storage tank (LUST) facility, Parsley-Kennedy (H21162-002), has shown trace or non-detect concentrations for petroleum VOCs since 2008. Furthermore, as groundwater is located within a basin designated as having no beneficial uses, there are no threats to beneficial groundwater uses resulting from on-Site CoCs. Waterstone concludes that there are no health risks from vapor intrusion from the subsurface, and no risks to the environment including beneficial uses of groundwater. DEHQ concurs with these conclusions. Based on these conclusions, Waterstone recommends no further action. However, if Site use changes in the future, additional sampling and/or evaluation may be necessary, and agency notification may be required. DEHQ also concurs with these recommendations. A 30-day

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste Description: METHYL ETHYL KETONE

Waste Code: P001  
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P075  
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Generate Medical Waste: Not reported

Inspection Violation:

Record ID: DEH2002-HUPFP-112451  
Permit Status: Permit Renewed  
Active Permit: Y  
Facility Id Number: 37-000-112451  
Program Element: Underground Storage Tank  
Inspection Type: Routine  
Inspection Number: 6653798  
Return To Compliance Date: 2022-01-11T00:00:00.000  
Nov: No  
Violation Classification: Not reported  
Underground Storage Tank Id: 21434  
Container/Tank Id: Not reported  
Last Update: 2022-10-22T00:00:00.000  
Inspection Date: 2021-05-21T00:00:00.000  
Violation Code: 2060020 (TCR 9a) Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of 5 gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container, tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. 23 CCR 2635(b), 2637.1(a-c), 2665(a-b), 2712(b)(1)(F); HSC 25284.2

construction of residential condominiums. The impacted soil was located near the intersection of Kenyon and Fordham Streets at depths of 6 to 10 feet below ground surface (bgs). Excavation of the impacted soil was performed over an area approximately 40 feet wide by 50 feet long and continued until staining was no longer observed in the sidewalls and floor. Analytical results for four confirmation soil samples collected from the excavation indicated no detection of petroleum hydrocarbons. The consultant (DPRA) estimates that 5,298 cubic yards of petroleum-impacted soil remain in place at depth of 5 to 10 feet bgs due to accessibility issues. The excavated soil was stockpiled onsite pending profiling for offsite disposal. Fourteen hundred gallons of petroleum hydrocarbon-impacted water accumulated in the excavation, which was removed and transported offsite for treatment and disposal. Analysis of a sample of the ponded water indicated a maximum total petroleum hydrocarbon (TPH) as gasoline concentration of 19,000 micrograms per liter (a%g/l) and TPH as diesel of 140,000 a%g/l. Thirty-three samples were collected from the stockpiled soil. Analytical results for the samples indicated maximum concentrations of total petroleum hydrocarbon (TPH) as gasoline of 1,400 milligrams per kilogram (mg/kg) and TPH as diesel of 8,200 mg/kg. Benzene, toluene, and ethylbenzene were not detected in the samples. Xylenes were detected in one sample at a concentration of 5.4 mg/kg. The volume of stockpiled soil transported offsite for disposal was 2,663 tons. Four Strataprobe soundings were advanced at the site in March 2007 for the collection of soil and discrete-depth groundwater samples. An additional four soundings were advanced October 2010 for sample collection. TPH as diesel was detected in one of the six discrete-depth groundwater samples at a concentration of 1,900 micrograms per liter (a%g/l). Benzene, toluene, naphthalene, methyl-tert-butyl ether (MTBE) and volatile organic compounds indicative of degraded gasoline were also detected in one or more of the samples at very low concentrations. Based on removal of the petroleum hydrocarbon-impacted soil, the low concentrations of petroleum hydrocarbons in groundwater, and the lack of beneficial uses for groundwater at the site, DPRA has recommended no further action and case closure. DEH concurs with these recommendations.

 Feature Description: On March 25, 1942, this site was acquired in fee (through a Declaration of Taking) by the Department of the Army as agent for the Defense Plant Corporation. The Defense Plant Corporation furnished all funds necessary for that acquisition. Pursuant to a directive dated 21 February 1942, the site was quitclaimed to the Defense Plant Corporation on 8 September 1943. This site was used for the

manufacture of heavy bombers. In a Declaration of Taking filed 16 June 1955, the Secretary of the Air Force acquired 70.39 acres of land in the vicinity of and adjacent to the site. Careful examination of the Title information for that Taking reveals that the site of the former San Diego Manufacturing Plant was not included in that Air Force action. The site is currently owned by the State of California, Department of Parks and Recreation, and is used for parking areas for Old Town State Park, a UCSD shuttle lot, and Parks Department equipment storage.

 Case Worker: EM  
 RB Case Number: Not reported  
 Local Agency: SAN DIEGO COUNTY LOP  
 File Location: Local Agency  
 Local Case Number: H39735-001  
 Potential Media Affect: Under Investigation  
 Potential Contaminants of Concern: Gasoline  
 Site History:

This Site is currently a 7-Eleven convenience store on the eastern side of the property, and a restaurant on the western side. This case was opened in January 2009 due to elevated soil samples with petroleum hydrocarbons noted during a Phase II site investigation. From June 2010 to July 2012, six groundwater monitoring wells (MWs) were installed, at which time the groundwater plume was delineated with the majority of the groundwater impacts limited to the northeastern portion of the Site and a small portion of West Point Loma Blvd. Figures 3 and 4 from the April 2019 First-Half 2019 Semi-Annual Groundwater Monitoring and Site Progress Report provide the most recent distribution of dissolved contamination levels at the Site. Between 2010 and August 2015, separate-phase hydrocarbons (SPH) were observed periodically in wells MW-2 and/or MW-6. During that time interval, approximately 15 gallons of SPH was removed and disposed off-site. From April to August 2015, as part of trenching activities for storm drain and sewer improvements in Chapman Street and West Point Loma Boulevard, 498 cubic yards of soil and 165 gallons of groundwater was removed and disposed off-site. In addition, 744,240 gallons of treated groundwater, from trench dewatering, was discharged to the sanitary sewer by the developer under a City of San Diego permit. During August and September 2015, a

14-day multi-phase extraction (MPE) remediation event was performed using wells MW-2, MW-4, MW-5, and MW-6 as extraction wells. An estimated 1,919 pounds of vapor-phase gasoline-range organics (GRO) was removed from the subsurface by MPE. An on-site soil vapor assessment in June 2017 revealed no detections of any volatile organic compounds (VOCs). Therefore, there were no excess cancer risks at the Site. Using the detection limit, benzene was calculated to have an excess carcinogenic risk of  $1.1 \times 10^{-8}$  and ethylbenzene was calculated to have an excess carcinogenic risk of  $4.83 \times 10^{-11}$ , which are less than the acceptable  $1.0 \times 10^{-6}$  excess carcinogenic risk. A February 2018 Corrective Action Plan (CAP) and a September 2018 Corrective Action Plan Addendum (CAPA) were submitted for natural attenuation and approved by DEH. The public comment period ended on May 13, 2019. The Site Assessment and Mitigation Program (SAM) received no comments. The consultant proposed natural attenuation because: The plume is stable and decreasing. No SPH has been detected on the groundwater since August 2015. There are no supply wells within 1/2 mile of the site. Groundwater has no designated beneficial uses. There are no health risks based on the June 2017 soil vapor sampling report. A trend analysis estimates that benzene in groundwater will degrade to the Maximum Contaminant Level (MCL) of 1 ug/l by 2024. MtBE has never been detected at the Site. Trenches for utilities, particularly sewer, can be below the groundwater surface, which is an average of 6-feet to 8-feet below grade surface (bgs) at the Site. However, the consultant states that the existing plume only extends a few feet laterally into West Point Loma Boulevard. In addition, the plume is shrinking and it estimated to degrade by 2024. Based on this, utilities would not act as a conduit for plume migration. DEH concurs with the consultants conclusions and approves case closure. Approximately 1,258 cubic yards of soil remain on site with concentrations over 100 mg/kg TPH. This soil is located in the northeastern portion of the property from 3 to 15 feet bgs, per Figures 1, 2 and 3 of the September 2018 CAPA. Permit DEH2019-LMWP-004250 was issued by DEH for destruction of 12 wells, including 6 Soil Vapor Probes associated with the Site. The wells were destroyed on November 26 to December 6, 2019. ANY CONTAMINATED SOIL EXCAVATED AS PART OF SUBSURFACE CONSTRUCTION WORK MUST BE MANAGED IN ACCORDANCE WITH THE LEGAL REQUIREMENTS AT THAT TIME.

**PACIFIC HIGHWAY MAINT. FACILIT (Continued)**

**S105558051**

Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.  
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Site History: On August 18, 1997, DEH opened Local Oversight Program (LOP) case H36108-001 at the former Barnard Elementary School. Based on elevated levels of TPH in soil samples collected during the August 11, 1997 underground storage tank (UST) removal activities. During assessment activities, the consultant demonstrated that impacted soil had been adequately defined and that there were no groundwater impacts. On June 7, 2004, DEH closed the LOP case H36108-001. The Site is currently vacant. The purpose of this Voluntary Assistance Program (VAP) case was to evaluate land use change from an elementary school to residential. On October 16, 2013, four due diligence soil borings (SB-1 through SB-4) were advanced in the vicinity of former UST-1 to determine if residual contaminant concentrations would present a potential human health risk to future residents at the Site. On June 20, 2014, soil excavation along the former product piping run was conducted to remove potentially impacted soil. The excavation measured approximately 40 feet long by 3 feet wide by 2 feet deep. Approximately 9 cubic yards of soil was excavated and stockpiled on-site. Two confirmation soil samples were collected and analyzed in the vicinity of known soil contamination. The consultant reported there were no visual soil stains, odors, or photoionization detector readings during the excavation activities. The excavation was backfilled with clean soil from the Site. According to the property owner, the stockpiled clean soil will be distributed throughout the Site and used during grading activities. The consultant estimates that approximately 30 cubic yards of total petroleum hydrocarbons greater than 100 milligrams per kilogram remains beneath former UST-1 at approximately 10 feet below ground surface. According to the property owner, the impacted soil will not be disturbed by property

improvement activities. Based on the laboratory results from the due diligence soil borings and the confirmation soil samples, the consultant concludes that soil has been adequately defined. The consultant also evaluated potential health risks to the future residents using soil data and the SAM Vapor Risk Model. The calculated risk to human health by naphthalene was  $5.82 \times 10^{-7}$ . The consultant concludes that residual soil contamination does not pose a health risk to the future residents at the Site, and recommends No Further Action. Based on the information submitted, DEH concurs with the consultants conclusions and recommendation.

Potential Media Affected: Not reported  
Potential Contaminants of Concern: Not reported  
Site History: San Diego Gas & Electric (SDG&E) submitted an application to the Voluntary Assistance Program (VAP) and was assigned case H28656-002, for a project to install a new electric transmission line that would connect the newly constructed Otay Mesa Generation Plant (OMGP) with the Sycamore Canyon Substation, and the installation of a second electric transmission line that connects OMGP with the existing Old Town Substation. The Department of Environmental Health (DEH) historical case H28656-001 is located on one specific parcel along the proposed route at 4370 Pacific Highway. The client requested that DEH use this address for the project application. The new project included the construction of both overhead and underground transmission lines. The project was broken up into five different sections or segments with different consultants screening and managing the impacted soil. Potentially impacted soil was identified by pre-construction Phase II investigations which included soil sampling, groundwater sampling, and soil vapor sampling. A Revised Hazardous Substance Control and Emergency Response Plan, prepared by Haley & Aldrich and dated November 10, 2005, was submitted with the VAP application. The plan was prepared to provide SDG&Es construction contractors direction in the event of a spill from their equipment and for the proper segregation and management of impacted soil or groundwater. Soil was proposed to be screened by visual observations of staining or discoloration, petroleum or other chemical odors, presence of other potential impacts such as debris or ash, and field meter photoionization detector (PID) measurements. If dewatering was necessary, groundwater would be removed from excavations and placed in temporary aboveground tanks for characterization prior to disposal. The Department of Environmental Health (DEH) approved the plan on November 21, 2005. Individual soil management reports were submitted to DEH by T N & Associates and Haley & Aldrich in 2007, and Sullivan in 2008 for the five segments for review. These five segments were where the electric transmission line was constructed underground via excavation and back fill of trenches. DEH requested a comprehensive report summarizing the individual reports. In 2014, a comprehensive report was prepared by Onside Total Integrated Enterprises (OTIE), and submitted to DEH. The report states that the handling of soil was in accordance with the Hazardous Substance Control and Emergency Response Plan. The deposition of impacted soil has been summarized as follows: (Cubic Yards) Facility Segment A: Old Town Station to West Vine Street 3/29/06 11/7/06 1,863 soil\* TPS (Haley & Aldrich) Segment B: W. Vine to W. Harbor Drive 4/21/06 8/23/06 440 soil TPS (Sullivan International) 126 burn ash Kettleman Hills Segment 3: Sweetwater River to J Street 3/20/06 9/13/06 288 soil Otay, TPS (TN & Associates) 143 soil^ Kettleman Hills Segment 5A: Harbor Drive to 26th Street 9/27/06 1/18/07 911 soil Otay, TPS (TN & Associates) 1,258 burn ash Kettleman Hills South Bay Power Plant: 7/31/06 8/07/06 \*Included with Segment A totals (Haley & Aldrich) ^ This includes 10 cubic yards of asbestos containing material The report did not mention any disposal of groundwater, so DEH is assuming that this did not occur. No confirmation soil samples were obtained from the bottom of the excavations, nor were they required. There is known soil and groundwater contamination still remaining in the areas where the line is located. Some of the soil sampling locations compiled in the summary tables do not have the laboratory results in the report, such as two sample results for the

South Bay Power Plant (SBBP-01-0725/06). However, the Inspection Reports by Haley & Aldrich during the excavation in the area where the samples were taken state that soil was removed and sent to TPS Recycling. The VAP case was opened for review of soil management, and the manifests indicate that proper handling of impacted soil has been shown. Non- impacted soil was primarily transported to Hansen Aggregates in Mission Valley, SDG&Es Silver Gate backfill project in San Diego or was characterized and used as backfill in designated areas along the trench corridor.

Lead Agency Case Number: H28826-003  
Latitude: 32.7481569806026  
Longitude: -117.199144363403  
Case Type: Cleanup Program Site  
Case Worker: KK  
Local Agency: SAN DIEGO COUNTY LOP  
RB Case Number: 9UT201  
File Location: Local Agency  
Potential Media Affected: Soil Vapor  
Potential Contaminants of Concern: Gasoline  
Site History: The site consists of approximately 1.92 acres in the shape of a wedge located between Sports Arena Boulevard and Pacific Highway, approximately 500 feet northwest of their intersection. Pacifica Companies (now Pacific Groves LTD), entered the Department of Environmental Health (DEH), Voluntary Assistance Program (VAP) in January 2004 in anticipation of site redevelopment activities in areas where soil and groundwater impacts associated with underground storage tank (UST) cases H28826-001 and H28826-002 were known to exist. The VAP application indicated that the property owner intended to conduct a vapor risk evaluation and excavation of hydrocarbon-impacted soil at the site to alleviate any potential vapor risks. The majority of assessment activities related to VAP case H28826-003 were conducted under previous UST cases H28826-001 and H28826-002, which were closed in November 1991 and February 2007, respectively. The primary focus of this VAP case, H28826-003, was to evaluate vapor risk for the site, which had not been conducted in accordance with the Site Assessment and Mitigation Manual under the previous UST cases. Historically, the site was reportedly occupied by two large warehouse/storage facilities and one 550 gallon gasoline UST until the late 1980s. Prior to redevelopment to the existing configuration, the site was utilized as a Park-N-Ride facility with a single story garage. Currently the site is developed as a self storage center with three slab on grade structures and associated parking. Hydrocarbon-impacts observed at the subject site were primarily related to the property to the north, located at 4370 Pacific Highway, identified as unauthorized release case H28656-001. Hydrocarbon impacts, including liquid-phase hydrocarbons (LPH), migrated south impacting the subject site and were subsequently mitigated through excavation and groundwater pump and treat activities. These remedial activities significantly reduced hydrocarbon concentrations based on subsequent investigations, however soil vapor sampling indicated the presence of hydrocarbon impacts beneath the human occupied (office) portion of the existing storage facility. The detection of soil vapor impacts from soil vapor probes installed and sampled in 2005 and several insufficient vapor risk evaluations prompted DEH to request additional vapor risk evaluation be conducted. DEH staff ultimately completed the vapor risk evaluation utilizing default input values with the exception of the appropriate slab attenuation factor of 0.01. Taking a simple average of the most recent (2005) vapor risk data for benzene and ethylbenzene, collected from appropriate locations beneath or in close proximity to the existing human occupied portion of the building, the cumulative risk was calculated to be  $7.73 \times 10^{-7}$ , which is less than the  $1 \times 10^{-6}$  SAM risk threshold. The consultant concluded that the current site use as slab on grade commercial is protective of human health. It is the consultants opinion that no further action is necessary at the site. Based on the provided data, the County of

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Site Screening  
Completed Date: 11/05/1992  
Comments: Site Screening was done by Region 4 staff. Site OT2, Leakin Outdoor PCB Transformers; early 1984, transformers at Bldg 27 were replaced; fluid drained into containers and disposed of at an approved haz. waste landfill in Ca. Gen. Dynamics directed cleanup of soils in 1986 following Cal/OHSA procedures. Site SS6, Used Oil Tank Spill: in 1983, 50 to 100 gals of oil were spilled. Oil was wet vacuumed and use of the tank discontinued. The other spills and leaking tanks were done between 1981 and 1988. Property is being transferred to the Dept. of the Navy.

Background Info: Space and Naval Warfare Systems Center, Old Town Campus (SPAWAR-OTC), an active satellite of SPAWAR Point Loma, is located north of the Marine Corps Recruit Depot and the San Diego International Airport. It encompasses approximately 60 acres and is 95% covered by buildings or pavement. Occupied by Lockheed-Martin and the Navy, the base has been utilized for various aircraft, rocket, and missile assembly and manufacturing. The contamination resulted from past waste handling practices is encountered at various locations inside and outside of the buildings. Known or suspected contaminants in soil and ground-water include heavy metals, polychlorinated biphenyls, volatile and semi-volatile organic compounds, and petroleum products.

Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 05/19/2008  
Comments: According to the Letter Report, lead was not detected in groundwater in any of the groundwater monitoring wells at the Site above the laboratory reporting limit. The Letter Report concluded that it does not appear that the burned waste present at the Site has impacted groundwater. The letter report further recommended that DTSC approves the elimination of the low permeability cap from the slope stabilization project located along the slope in Study Area 2 and that the monitoring wells may be abandoned. Based on review of the Letter Report, groundwater does not appear to have been impacted by lead from burned waste present at the Site. Therefore, DTSC concurred with the conclusions of the Letter Report that the utilization of a low permeability cap may be eliminated from the slope stabilization project located along the slope in Study Area 2 and that the monitoring wells may be abandoned.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 04/03/2007  
Comments: A second round of groundwater sampling was conducted at the three onsite wells.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 05/19/2008  
Comments: According to the Letter Report, lead was not detected in groundwater in any of the groundwater monitoring wells at the Site above the laboratory reporting limit. The Letter Report concluded that it does not appear that the burned waste present at the Site has impacted groundwater. The letter report further recommended that DTSC approves the elimination of the low permeability cap from the slope stabilization project located along the slope in Study Area 2 and that the monitoring wells may be abandoned. Based on review of the Letter Report, groundwater does not appear to have been impacted by lead from burned waste present at the Site. Therefore, DTSC concurred with the conclusions of the Letter Report that the utilization of a low permeability cap may be eliminated from the slope stabilization project located along the slope in Study Area 2 and that the monitoring wells may be abandoned.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/02/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: No Update Planned

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/27/2022  
Date Data Arrived at EDR: 11/01/2022  
Date Made Active in Reports: 11/15/2022

Data Release Frequency: Quarterly

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 08/25/2022  
Date Data Arrived at EDR: 09/06/2022  
Date Made Active in Reports: 12/05/2022  
Number of Days to Update: 90

Source: Environmental Protection Agency  
Telephone: 703-603-8704  
Last EDR Contact: 12/21/2022  
Next Scheduled EDR Contact: 04/10/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/27/2022  
Date Data Arrived at EDR: 11/01/2022  
Date Made Active in Reports: 11/15/2022

Last EDR Contact: 02/02/2023  
Next Scheduled EDR Contact: 04/24/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: 800-424-9346
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 02/02/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/24/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 11/21/2022	Source: EPA
Date Data Arrived at EDR: 11/21/2022	Telephone: 800-424-9346
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/02/2022	Source: Department of the Navy
Date Data Arrived at EDR: 11/08/2022	Telephone: 843-820-7326
Date Made Active in Reports: 01/10/2023	Last EDR Contact: 02/03/2023
Number of Days to Update: 63	Next Scheduled EDR Contact: 05/22/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/16/2022	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 11/16/2022
Number of Days to Update: 85	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/27/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/16/2022	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2023	Last EDR Contact: 11/16/2022
Number of Days to Update: 85	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

Last EDR Contact: 01/24/2023

Number of Days to Update: 80

Next Scheduled EDR Contact: 05/08/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/24/2022

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/24/2022

Telephone: 916-323-3400

## UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases

UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 02/23/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/10/2022	Telephone: 202-566-2777

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Records of Emergency Release Reports

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 09/19/2022	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 09/19/2022	Telephone: 202-366-4555
Date Made Active in Reports: 09/30/2022	Last EDR Contact: 12/14/2022
Number of Days to Update: 11	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 08/02/2022	Source: Office of Emergency Services
Date Data Arrived at EDR: 10/17/2022	Telephone: 916-845-8400
Date Made Active in Reports: 01/04/2023	Last EDR Contact: 01/20/2023
Number of Days to Update: 79	Next Scheduled EDR Contact: 05/01/2023
	Data Release Frequency: Semi-Annually

## LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 08/31/2022	Source: State Water Quality Control Board
Date Data Arrived at EDR: 08/31/2022	Telephone: 866-480-1028
Date Made Active in Reports: 11/17/2022	Last EDR Contact: 12/02/2022
Number of Days to Update: 78	Next Scheduled EDR Contact: 03/20/2023
	Data Release Frequency: Quarterly

## MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 08/31/2022	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/31/2022	Telephone: 866-480-1028
Date Made Active in Reports: 11/17/2022	Last EDR Contact: 12/02/2022
Number of Days to Update: 78	Next Scheduled EDR Contact: 03/20/2023
	Data Release Frequency: Quarterly

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/27/2022	Source: Environmental Protection Agency

	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

## PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Next Scheduled EDR Contact: 05/29/2023  
Data Release Frequency: Quarterly

## HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

Date of Government Version: 10/03/2022  
Date Data Arrived at EDR: 10/03/2022  
Date Made Active in Reports: 12/15/2022  
Number of Days to Update: 73

Source: Department of Toxic Substances Control  
Telephone: 916-440-7145  
Last EDR Contact: 01/04/2023  
Next Scheduled EDR Contact: 04/17/2023  
Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

South Map: 12016554 POINT LOMA, CA  
Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

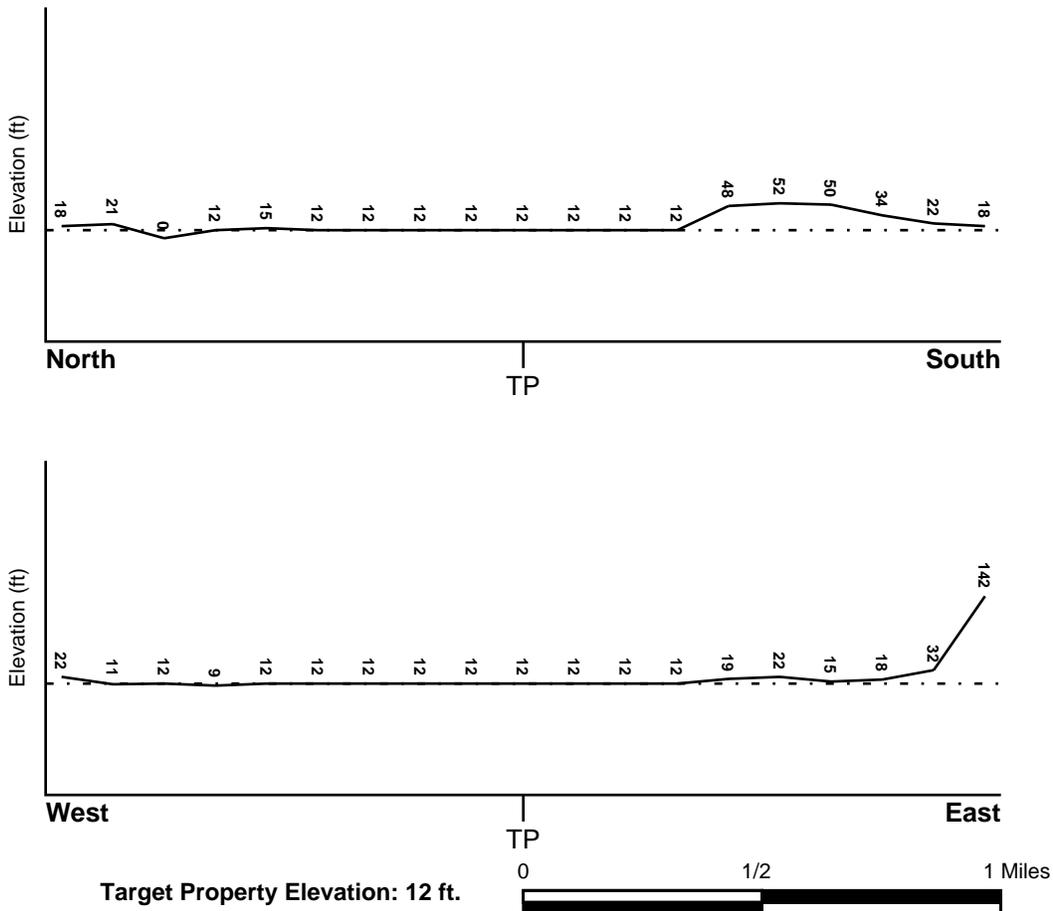

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06073C1614G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06073C1613G	FEMA FIRM Flood data
06073C1880G	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LA JOLLA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Contact: Jennifer Bauer Morton

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by SCS Engineers were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
