Subject: TransMontaigne Martinez Facility – Railroad Spur Project
2801 Waterfront Road
Martinez, California

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Bobde:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Property), located in Martinez, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Property.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 and the American Society for Testing and Materials (ASTM) Practice E1527-21. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-21.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

Jenna Keith

EXECUTIVE SUMMARY

ENGEO conducted a phase I environmental site assessment for the subject property located at 2801 Waterfront Road in Martinez, California (Property). The Property is approximately 31 acres in area and is identified by Assessor's Parcel Numbers (APNs) 159-310-038 and 159-310-036.

The Property is an abandoned railroad spur and active railroad corridor. Review of historical records indicates that the railroad tracks were likely constructed prior to 1896. The TransMontaigne Refinery facility was constructed between the late 1960s and early 1980s. TransMontaigne is currently in the permitting process to remove the existing spur and install three parallel spurs, connected to the railroad tracks along Waterfront Road. Other improvements include installation of a retaining wall between the tracks and the wetland located to the south, and removal of the fence between the tracks and the facility.

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance did not find physical evidence of soil, soil gas, or groundwater impairments associated with the use or past use of the Property. However, a review of regulatory databases maintained by county, state, tribal, and federal agencies found documentation of hazardous materials violations or discharge on the Property and identified contaminated facilities within the appropriate ASTM search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, the following Recognized Environmental Conditions (RECs), historical REC, and controlled REC were identified for the Property.

- **REC: Residual Chemicals Associated with Railroad Tracks**
  - Residual chemicals including heavy metals, pesticides, petroleum hydrocarbons, and polycyclic aromatic hydrocarbons (PAHs) are commonly found in surface and near-surface soil in the alignment of railroad tracks and spurs. The presence of railroad tracks is classified as a REC.

- **REC: Tosco Pipeline – Wickland Releases**
  - At least seven historical releases of total petroleum hydrocarbons (TPH) occurred in the pipeline alignment within the railroad corridor. These releases are documented under Tosco Pipeline – Wickland case (GeoTracker ID SL18360780). Residual TPH constituents may be found in soil. Contaminant maps provided in the most recent cleanup order (Order R2-2008-0019) show that the contaminant plume was located within the wetland in the western area of the Property. The cleanup case related to these releases is eligible for case closure as of November 2017; however, until the case is closed, these releases are classified as a REC. Once this case receives closure, this REC may be reclassified as a historical REC.

DRAFT

- **REC: Nearby Refinery Releases Affecting the Railroad Corridor**
  - TransMontaigne Martinez (GeoTracker ID SL373211178): Numerous releases have occurred in connection with refinery operations at the TransMontaigne Martinez Terminal. Extensive remedial actions have been implemented to achieve cleanup objectives. Most notably, in the southwestern area of the terminal (in the western portion of the Property), a phytoremediation system was installed in 2007 to contain dissolved-phase hydrocarbons and methyl tert-butyl ether (MTBE) and limit potential discharges to the marsh. A groundwater extraction pump was also installed in a monitoring well in this region to contain groundwater while the roots of the phytoremediation system deepened. Residual contamination is managed through the LUC and SMP. The SMP, dated June 17, 2019, provides procedures and protocols for managing residual hydrocarbons in soil throughout the facility. The facility is eligible for closure related to petroleum contamination as of July 19, 2021.
  - TransMontaigne Martinez Terminal (PFAS) (GeoTracker ID L10005962342): While the TransMontaigne facility is eligible for closure pertaining to TPH contamination, recent investigations have been conducted to evaluate the presence of per- and polyfluoroalkyl substances (PFAS), under open cleanup case L10005962342. The case is listed to have long-term management (as of July 19, 2021). PFAS investigation is outside the scope of this ESA.

- **Historical REC: Kinder Morgan Pipeline Release**
  - In December 2000, a petroleum spill from a Kinder Morgan Energy Partners, LP (KMEP) pipeline was discovered on the southern side of Waterfront Road where it crosses Pacheco Creek (the eastern area of the Property), when petroleum hydrocarbons became visible on the ground surface and surface water north of the railroad tracks. The cleanup case is documented under GeoTracker case ID SL1824X1162. Three small leaks were discovered along the bottom of a 14-inch-diameter pipeline. The spill volume was estimated to be 50 barrels. The spill impacted a wetland slough system adjacent to Pacheco Creek and threatened to impact additional waters through further migration. KMEP implemented emergency response protocols to contain the spill and remove impacted soil. The San Francisco Bay Regional Water Quality Control Board (RWQCB) issued a Cleanup and Abatement Order (CAO) on January 25, 2001, in response to the spill. KMEP implemented a wetland mitigation plan and subsequent monitoring report. In July 2013, the CAO was rescinded and the cleanup case was closed.

- **Controlled REC: Covenant and Environmental Restriction on Property**
  - A Covenant and Environmental Restriction on the Property was recorded on March 12, 2020, (dated August 16, 2023, on GeoTracker) and affects the entire TransMontaigne parcel (APN 159-310-038). The covenant indicates that soil and groundwater underlying the Property contains hazardous materials (TPH) due to historical releases from refinery operations. The LUC references the 2019 SMP prepared by Apex Companies, LLC (Apex), which summarizes procedures for the appropriate management of separate-phase hydrocarbons (SPH) and associated petroleum-impacted soil and groundwater during future redevelopment or other on-site maintenance activities at the site.

We have performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-21 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exception to, or deletions from this practice are described in Sections 6 and 8.1 of the report.

DRAFT

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gap was identified.

- At the time of report publication, we did not receive a preliminary title report for the Property.

The data gap identified during this process does not affect the conclusions as to the presence or lack of presence of RECs at the Property. The history of site ownership is well documented, and environmental liens/activity use limitations (AULs) for the Property were identified on GeoTracker, an engineering control (EC) and institutional control (IC) registry.

This assessment has revealed evidence of RECs in connection with the Property. We recommend no further environmental studies pertaining to petroleum contamination within the railroad corridor. However, we recommend the following regarding the railroad spur area in the western area of the Property.

- We recommend collecting near-surface soil samples along the alignment of the railroad spur that is to be redeveloped. Samples should be analyzed for residual constituents associated with lead, arsenic, and polycyclic aromatic hydrocarbons (PAHs) to determine the risk to construction workers and to characterize soil for offhaul, if planned.
- We recommend that a soil management plan (SMP) be prepared prior to construction activities, which outlines soil management procedures and protocols for handling unforeseen environmental conditions if encountered.

Please note, the findings from this report are valid until October 18, 2024, and updates of portions of the assessment may be necessary after April 18, 2024.

DRAFT

1.0 INTRODUCTION

1.1 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

This assessment was performed at the request of TransMontaigne Partners, LP for the purpose of environmental due diligence prior to construction of a new railroad spur at the TransMontaigne Martinez Terminal facility. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Property. As defined in the ASTM Standard Practice E1527-21, an REC is "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

1.2 DETAILED SCOPE OF SERVICES

The scope of services performed included the following.

- A review of previous environmental reports prepared for the Property.
- A review of publicly available and practicably reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practicably reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of the Property to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Written/oral Interviews with owners/occupants and public sector officials.
- Preparation of this report with our findings, opinions, and conclusions.

DRAFT

1.3 SITE LOCATION AND DESCRIPTION

The Property is located at 2801 Waterfront Road in Martinez, California, adjacent to the 138-acre Martinez Terminal site (Figures 1 and 2). The subject of this ESA is an approximately 31-acre railroad corridor identified as APNs 159-310-038 and 159-310-036 (Figure 3).

1.4 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES

The Property is an abandoned railroad track and corridor that is planned to be redeveloped. The Property is located within parcels that are zoned by Contra Costa County for heavy industrial land use. TransMontaigne is currently in the permitting process to remove the existing spur and install three parallel spurs, connected to the railroad tracks along Waterfront Road. Other improvements include installation of a retaining wall between the tracks and the wetland located to the south, and removal of the fence between the tracks and the facility.

Based on a review of current records and our site reconnaissance, the adjoining site uses are summarized below.

TABLE 1.4-1: Adjoining Site Uses

DIRECTION	SITE USE
North	TransMontaigne Martinez Terminal Facility
South	Marshlands and Waterbird Regional Preserve
East	Pacheco Marsh
West	Wetlands and open space

1.5 SITE AND VICINITY CHARACTERISTICS

According to published topographic maps, site grades at the Property range from approximately Elevation 10 feet in the eastern and western directions to approximately Elevation 40 feet in the northern and southern directions. Review of the Geologic Map of the Napa 30’ x 60' quadrangle, California Geologic Map (Wagner and Gutierrez, 2010) found that the Property is underlain by artificial fill placed over Holocene-aged bay mud and the Late Cretaceous-aged Great Valley Sequence. The bay mud consists of estuarine silt, clay, peat, and fine sand deposited at or near sea level in San Pablo Bay. The Great Valley Sequence consists of sandstone, siltstone, shale, and minor conglomerate.

The Geocheck – Physical Setting Source Summary of the Environmental Data Resources, Inc. (EDR) report (Appendix A) indicated that zero federal United States Geological Survey (USGS) and 131 state wells are located within 1 mile of the Property.

We reviewed EnviroStor, a website maintained by the State of California Department of Toxic Substances Control, and GeoTracker, a website maintained by the State of California Water Resources Control Board, for nearby facilities with records that include depth-to-groundwater measurements. A network of over 100 monitoring wells is located at the TransMontaigne Martinez site. Depth-to-water measurements suggest that groundwater is found between 2 and 8 feet below the ground surface (bgs) within the greater Martinez Terminal site.

The site-specific depth to groundwater and direction of groundwater flow were not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors.

We reviewed the Department of Conservation, Geologic Energy Management (CalGEM), website and map database to determine if any historical oil and gas wells were located within the Property. No oil or gas wells were mapped within 1 mile of the Property.

We reviewed the National Pipeline Mapping System (NPMS) public viewer website for information about petroleum, natural gas, or hazardous liquid storage, processing, or transmission facilities in the vicinity of the Property. Several oil transmission pipelines and one natural gas transmission pipeline are located within the greater TransMontaigne property and along the alignment of Waterfront Road. Pipeline release incidents in the vicinity of the Property are discussed in Sections 2.3 and 2.4.

1.6 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Public Health has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 24 tests conducted

DRAFT

within the Property zip code, with three tests exceeding the current EPA action level of 4 picocuries per liter (pCi/L)[1].

In accordance with ASTM E2600-15 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); there are potential petroleum hydrocarbon sources for vapor intrusion within 1/10 mile of the Property and volatile organic compound (VOs) sources within 1/3 mile of the Property arising from previous releases.

2.0 PREVIOUS ENVIRONMENTAL REPORTS

The Martinez Terminal facility has operated as a bulk petroleum storage, transfer, and blending facility, and has been used to store refined and unrefined petroleum products. There are currently two open Site Cleanup Program (SCP) cases within the Martinez Terminal property: TransMontaigne Martinez (SL373211178) and TransMontaigne Martinez Terminal (PFAS) (L10005962342). There are two SCP cases within the railroad alignment adjacent to the terminal: Kinder Morgan Pipeline Release (SL1824X1162) and Tosco Pipeline – Wickland (SL18360780).

2.1 TRANSMONTAIGNE MARTINEZ

The TransMontaigne Martinez facility is listed as an open cleanup case on GeoTracker under case ID SL373211178. According to the Remedial Action Plan Implementation Report (Ash Creek Associates, 2009), the facility was undeveloped prior to its construction between 1974 and 1976. TransMontaigne Operating Company, L.P. assumed ownership and operation of the facility in January 2018. The Facility was previously owned and operated by Plains Products Terminals from November 2005 to January 2018; Shore Terminals from October 1998 to November 2005; Wickland Oil Company from 1991 to 1998; Martinez Terminals Limited from 1987 to 1991; and by Landsea Terminal Incorporated prior to 1987.

The facility is composed of a crude oil tank farm (northwestern area) and a refined products tank farm (central portion). Twenty-five ASTs are located at the site and store and/or have stored various petroleum products and oxygenate liquids such as gasoline, diesel fuel, toluene, jet fuel, asphalt, heavy fuel oil, ethanol, penhex, and methyl tertiary butyl ether (MTBE). The Central Area is currently used as a parking area and a “boneyard” for facility equipment.

Soil and groundwater investigations were performed in the 1980s and 1990s. Twenty-eight groundwater monitoring wells were installed at the site. A total fluid recovery system (TFR system) was installed at the site in October 1992 to removed petroleum product from the subsurface. The TFR system extracts contaminated groundwater from 11 wells that have historically contained product. Fluids extracted are pumped into an oil/water separator and water is treated by a biotreatment system. Effluent is sampled and then disposed to the sanitary sewer system.

Approximately 7,050 gallons of gasoline were released from an above-ground petroleum storage tank in the northeastern Refined Product Tank Farm in September 2007. An emergency response was performed immediately to remove visible product on the ground and in shallow soil. Approximately 6,000 gallons were recovered and/or removed via excavation of impacted soil during initial emergency response actions. In October 2007, an investigation was performed to identify the extent of free-phase and dissolved-phase hydrocarbons in the release area. Results

[1] California Department of Public Health – Radon Program– (https://www.cdph.ca.gov/Programs/CEH/DRSEM/CDPH%20Document%20Library/EMB/Radon/Radon%20Test%20Results.pdf).

DRAFT

of the investigation suggest that significant migration of free-phase or dissolved phase hydrocarbons had not occurred beyond the initial release area. Directly following the investigation, a cutoff trench was installed to limit further migration.

Remedial actions have been employed in different areas of the Property. In the southwestern area of the Property, a phytoremediation system was installed in 2007 to contain dissolved-phase hydrocarbons and MTBE and limit potential discharges to the marsh. A groundwater extraction pump was also installed in a monitoring well in this region to contain groundwater while the roots of the phytoremediation system deepened.

In the central area of the facility, an enhanced bioremediation system was installed in 2004 to address TPH and MTBE. The system included extraction of groundwater in the downgradient portion, removal of hydrocarbon mass from extracted groundwater via a bioreactor, bioaugmentation of the extracted water, and reinjection of augmented water into an infiltration trench. The above-mentioned cutoff trench was also installed following the September 2007 spill. The remedial systems were to operate until Remedial Action Objectives were met.

On behalf of Plains Products Terminals, Apex Companies, LLC (Apex) submitted a Low Threat Case Closure Request (Apex, 2015b). Results from the First Semi Annual Groundwater Monitoring Report 2015 (Apex, 2015a) demonstrated a consistent decreasing trend for contaminants of potential concern (COPCs) at the site. The RWQCB approved the request for conditional closure in the Conditional Closure Concurrence Letter (Concurrence Letter) dated May 9, 2016, which included the requirement for a soil management plan (SMP).

Following the RWQCB approval of conditional closure in October 2016, 130 barrels of crude oil were released from a leaking flange on Tank 501-14 (Tank 14) in the northwestern portion of the facility. The oil was contained within the tank farm's secondary containment. During emergency response efforts, approximately 100 barrels of crude oil were recovered, and visually impacted soil was removed to the extent practicable. Impacted soil remains in areas where removal was not feasible. A report summarizing the release, emergency response, and post-release monitoring was submitted to the RWQCB on May 25, 2018. Apex prepared a SMP dated June 17, 2019, to manage residual hydrocarbons in soil throughout the facility, including in the areas associated with the Tank 14 release and any actions needed for appropriate management. A Covenant and Environmental Restriction was recorded on March 12, 2020 (dated August 16, 2023 on GeoTracker) and affects the entire TransMontaigne parcel (refer to Section 3.1.2). The facility is eligible for closure related to petroleum contamination as of July 19, 2021; however, recent investigations have been conducted to evaluate the presence of per- and polyfluoroalkyl substances (PFAS), under case ID L10005962342 (see below).

2.2 TRANSMONTAIGNE MARTINEZ TERMINAL (PFAS)

TransMontaigne Martinez Terminal (PFAS) is listed as an open cleanup case with long-term management (as of July 19, 2021) under case ID L10005962342. This case pertains only to PFAS investigations at the TransMontaigne Martinez site; cleanup related to petroleum contamination is documented under the TransMontaigne Martinez case.

Remedy Engineering prepared a report summarizing the results of groundwater and stormwater sampling for PFAS at the Property (Remedy Engineering, 2022), as required by the RWQCB and the SWRCB Water Code Section 13267 Order WQ 2021-0006-DWQ (PFAS Order) issued in March 2021. Groundwater samples were collected from three on-site monitoring wells (P-1, P-9, and EX-3) and a stormwater sample was collected downstream of a site truck-loading rack.

DRAFT

PFAS results were compared to the EPA health advisory level (HAL) and the California SWRCB, Division of Drinking Water (DDW) notification level for drinking water. The EPA has established an HAL of 70 nanograms per liter (ng/L) for perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS). In addition, the EPA has established a combined HAL for PFOA and PFOS of 70 ng/L. The California DDW has established NLs of 5.1 ng/L for PFOA, 6.5 ng/L for PFOS, and 500 ng/L for perfluorobutane sulfonic acid (PFBS).

PFAS compounds were detected in the samples as follows.

- PFOA was detected above the DDW NL, but below the EPA HAL, in Wells P-1, P-9, and EX-3, with concentrations ranging from 9.6 ng/L to 18 ng/L.
- PFOS was detected above the DDW NL in Wells P-1, P-9, and EX-3, and above the EPA HAL in Wells P-1 and P-9, with concentrations ranging from 23 ng/L to 240 ng/L.
- PFBS was detected below the DDW NL in Wells P-1, P-9, and EX-3, with concentrations ranging from 1.5 ng/L to 44 ng/L.
- Twelve other PFAS constituents, which do not have established regulatory guidelines, were also detected.
- A total of 12 PFAS constituents, including PFOA, PFOS, and PFBS, were detected in the stormwater sample. None of the concentrations of PFOA and PFOS, individually or combined, exceeded the EPA NAL. Only PFOS exceeded the DDW NL at 10 ng/L.

According to a letter submitted by the RWQCB, dated September 30, 2022, two aqueous film-forming foam (AFFF) release incidents occurred. An incident was reported in 2018 at the former truck-rack location. The second discharge reportedly occurred at the surface impoundment at an unknown date. According to another letter from the RWQCB dated September 1, 2023, two additional AFFF release incidents occurred in 2022. Each incident released approximately 45 gallons of AFFF from a storage drum due to a rupture. No incident reports are available on GeoTracker. A recent work plan has been prepared to assess impacts to soil and groundwater from the releases of PFAS-containing substances.

DRAFT

2.3 KINDER MORGAN PIPELINE RELEASE

In December 2000, a petroleum spill from a Kinder Morgan Energy Partners, LP (KMEP) pipeline was discovered on the southern side of Waterfront Road where it crosses Pacheco Creek (the eastern area of the Property), when petroleum hydrocarbons became visible on the ground surface and surface water north of the railroad tracks. The cleanup case is documented under GeoTracker case ID SL1824X1162. KMEP operated one 14-inch-diameter underground pipeline and two 12-inch-diameter underground pipelines used to transport refined petroleum products. Three small leaks were discovered along the bottom of the 14-inch-diameter pipeline. The spill volume was estimated to be 50 barrels. The spill impacted a wetland slough system adjacent to Pacheco Creek and threatened to impact additional waters through further migration. KMEP constructed two sandbag dams east and west of the release point; placed hard and absorbent booms and pads to collect free-phase hydrocarbons; removed free-phase hydrocarbons using vacuum trucks; and excavated polluted soil in the spill vicinity to depths ranging between 1.5 feet and 20 feet. The RWQCB issued a Cleanup and Abatement Order (CAO) on January 25, 2001, in response to the spill. The CAO required KMEP to investigate the extent of petroleum contamination of soil and groundwater, propose and implement appropriate cleanup actions, and propose and implement a wetland mitigation plan. KMEP complied with the CAO tasks. RWQCB

staff approved the 2001 wetland mitigation plan and subsequent monitoring report, concluding that the plan was successfully implemented. In July 2013, the RWQCB's Executive Officer rescinded the CAO and closed the cleanup case. This release is considered a Historical REC for the Property.

2.4 TOSCO PIPELINE – WICKLAND

Tosco Pipeline – Wickland is an open SCP case (GeoTracker ID SL18360780) pertaining to former pipeline releases in the railroad alignment south of the wetland area. Tosco Refining Company owned a petroleum product pipeline system, which follows an easement through the refining facility. The RWQCB has issued numerous site cleanup requirements orders in connection with the following releases.

- In February 1969, an estimated 172,200 gallons of diesel product was discharged into the pipeline area. Up to 2 inches of oil was visible. Approximately 20 days after the discharge occurred, up to 1½ inches of diesel product was observed in the marsh area. Approximately 46,200 gallons were not recovered.
- In October 1970, Phillips released an unknown volume of fuel oil from a pipeline leak located within 200 feet from the pipeline area.
- In September 1975, approximately 3,000 gallons of gasoline were discharged into the pipeline area. Gasoline impacted vegetation and surface water as far as 800 feet from the leak.
- In March 1977, Tosco released an unknown volume of oil into the pipeline area.
- In May 1977, Tosco released an unknown volume of oil into the pipeline area.
- On January 6, 1978, an 8-inch Tosco pipeline discharged unleaded gasoline into the pipeline area for approximately 1.5 hours. Tosco estimated up to 21,000 gallons of gasoline were released.
- On January 11, 1978, Tosco released an estimated 100 to 420 gallons of gasoline into the pipeline area.

The RWQCB issued Order No. 90-088 in June 1990, which identified significant quantities of free-phase liquid hydrocarbon pools beneath the refinery.

The RWQCB issued Order 92-144 in November 1992, which identified significantly elevated concentrations of TPH, BTEX, and metals in soil and groundwater arising from petroleum spills in July of 1975. The order also identified an area around the Tosco pipeline called Area E, in which groundwater and soil were contaminated with BTEX and TPH constituents.

The RWQCB issued Order 93-062 in June 1993, which rescinded Order 92-144. The order identified additional dischargers.

The RWQCB issued Order R2-2008-0019 in August 2008, which named Pacific Atlantic Terminals LLC as a discharger because it became the current property owner and operator.

Maps provided in the most recent cleanup order show that the contaminant plume was located within the western area of the Property. However, the case is eligible for closure as of November 2017. These historical releases are considered a REC for the Property.

DRAFT

3.0 RECORDS REVIEW

3.1 PROPERTY RECORDS

3.1.1 Title Report/Ownership

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources. ENGEO assumes that any environmental liens, activity use limitations (AUL), and/or institutional controls for the Property are noted in the Preliminary Title Report.

A Preliminary Title Report was not provided for our review. This is considered a data gap for the Property. However, the grant deed listing the transfer of the facility from Plains Products Terminals LLC to TransMontaigne Operating Company LP was provided by the Contra Costa County Department of Conservation and Development (refer to Section 3.4). The grant deed is dated December 14, 2017.

3.1.2 Environmental Liens and Activity Use Limitations

We reviewed two engineering control (EC) and institutional control (IC) registries: EnviroStor, a website maintained by the State of California Department of Toxic Substances Control, and GeoTracker, a website maintained by the State of California Water Resources Control Board, for environmental liens or AULs associated with the Property. A Covenant and Environmental Restriction on Property was recorded on March 12, 2020 (dated August 16, 2023, on GeoTracker) and affects the entire TransMontaigne parcel (APN 159-310-038). The covenant indicates that soil and groundwater underlying the Property contain hazardous materials (TPH) due to historical releases from refinery operations. The releases occurred primarily in two areas: the southwestern area and the central area. The deed restriction applies to all parts of the site.

The LUC summarizes the history of remedial actions implemented to mitigate contamination at the Property and identifies pathways that would be complete without the mitigation measures performed on the Property. The LUC references the 2019 SMP prepared by Apex. The SMP summarizes procedures for the appropriate management of separate-phase hydrocarbons (SPH) and associated petroleum-impacted soil and groundwater during future redevelopment or other on-site maintenance activities at the site.

3.2 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to develop a history of the previous uses or occupancies of the Property and surrounding areas to identify those uses or occupancies that are likely to have led to recognized environmental conditions on the Property.

3.2.1 Historical Topographic Maps/Aerial Photographs/Sanborn Maps

Historical USGS topographic maps and aerial photographs were reviewed to determine if discernible changes pertaining to the Property had been recorded. EDR provided the following maps and photographs, presented in Appendices B and C. A Sanborn fire insurance map search did not identify maps for the Property; the search report is presented in Appendix D.

DRAFT

TABLE 3.2.1-1: Historical Review Summary

HISTORICAL MAP/PHOTOGRAPH	YEARS
Topographic Maps	1896, 1898, 1901, 1902, 1940, 1942, 1947, 1951, 1959, 1968, 1980, 2012, 2015, 2018
Aerial Photographs	1939, 1947, 1952, 1963, 1968, 1982, 1987, 1993, 1998, 2006, 2009, 2012, 2016
Sanborn Maps	N/A

The 1896 topographic map depicts a railroad in its present-day alignment. An tributary of Pacheco Creek extends northwest through the east-central area of the Property. The surrounding areas are undeveloped marshlands of the Carquinez Strait. By the early 1940s, development of the Martinez Refinery began approximately ½ to 1 mile west of the Property along the railroad. Above-ground oil tanks were constructed in this area in the late 1940s. Unpaved roads are visible in the areas north and south of the Property, and Waterfront Road was constructed in its present-day alignment. Interstate 680 and predecessor highways were constructed southwest of the Property between 1952 and 1963.

The TransMontaigne Martinez Terminal facility was constructed between the late 1960s and early 1980s. One structure at the south of the facility, used as a controls room, is located in the railroad corridor boundary. The eastern area of the facility was paved between 1998 and 2006. The facility and the railroad corridor appear to have a similar configuration since that time.

3.2.2 City Directory

City Directories, published since the 18th century for major towns and cities, list the name of the resident or business associated with each address. A city directory search conducted by EDR is located in Appendix E.

TABLE 3.2.2-1: City Directory

YEAR	LISTING(S)
1975	Southern Tank Lines Southern Terminals
1980	Not listed
1985	Not listed
1990	Not listed
1992	Landsea Terminals Martinez Terminals
1995	Wickland Oil Martinez
2000	Not listed
2005	Shore Terminals LLC
2010	Nu Star Plains All American Martinez
2014	Plains All American Martinez
2017	Plains All American Martinez

Other listings in the vicinity of the Property are associated with industrial uses.

DRAFT

3.3 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the Property and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

3.3.1 Environmental Records

3.3.1.1 Property

The Property is listed on the following Environmental Record source databases.

TABLE 3.3.1.1-1: Environmental Database Listings for the Property

The Property is located in a historically and presently industrial area with numerous documented releases. Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is possible that the above-stated database sites and "orphan" properties pose an environmental risk to the Property.

3.4 REGULATORY AGENCY FILES AND RECORDS

The following agencies were contacted pertaining to possible past development and/or activity at the Property.

TABLE 3.4-1: Regulatory Agency Records

NAME OF AGENCY	RECORDS REVIEWED
City of Martinez Building Department	We contacted the City of Martinez Building and Planning Departments via a request to the City Clerk on October 17, 2022, regarding historical building permit records for the Property. The Building and Planning Departments provided several building permit records for the refinery, including permits related to the construction of the refinery tank foundation and other improvements to refinery buildings, and inspection forms. The permits do not pertain to the railroad corridor area.
City of Martinez Fire Department	We contacted the City of Martinez Code Enforcement Department on October 17, 2022, regarding environmental records for the Property. The Code Enforcement Department indicated they have no files pertaining to the Property.
Contra Costa County Department of Environmental Health, Hazardous Materials Division	We contacted the Contra Costa County Department of Environmental Health (CCCDEH) on August 19, 2022, regarding environmental records for the Property. CCCDEH provided numerous documents related to previous environmental investigations and routine inspections at the greater Martinez Terminal facility. Environmental conditions affecting the subject railroad corridor Property have been summarized in Section 2.0.

DRAFT

NAME OF AGENCY	RECORDS REVIEWED
Contra Costa County Department of Conservation and Development	We contacted the Contra Costa County Department of Conservation and Development (CCCDCD) on October 19, 2022, regarding historical building permit records for the Property. The CCCDCD provided the following documents affecting APN 159-310-038. • A land use permit application filed by TransMontaigne Operating Company to construct a 1 ½ mile-long, 16-inch-diameter crude oil pipeline within the Waterbird Way right-of-way, dated March 28, 2016. • Engineering plans showing the design of the pipeline, dated between 2016 and 2019. • Email correspondences indicating that the project was withdrawn.
Contra Costa County Assessor's Office	We reviewed online parcel maps provided by the Contra Costa County Assessor's Office. The property boundary and APNs provided in the EDR radius map report are consistent with the online parcel maps.
California State Water Resources Control Board (SWRCB)	We reviewed GeoTracker, the website maintained by the State Water Resources Control Board, for files pertaining to the Property. The TransMontaigne Martinez (SL373211178), TransMontaigne Martinez Terminal (PFAS) (L10005962342), Kinder Morgan Pipeline Release (SL1824X1162), and Tosco Pipeline – Wickland (SL18360780) cases are summarized in Section 2.0.
Department of Toxic Substances Control (DTSC)	We reviewed EnviroStor, the website maintained by DTSC, for files pertaining to the Property. No listings were found for the Property.

4.0 SITE RECONNAISSANCE

4.1 METHODOLOGY

We conducted a reconnaissance of the Property on May 15, 2023. The reconnaissance was performed by Jenna Keith, a staff engineer of ENGEO. The Property was viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The Property was also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Photographs taken during the site reconnaissance are presented in Figure 4.

4.2 GENERAL SITE SETTING

The western railroad corridor area is accessed from the TransMontaigne Martinez Terminal facility via locked gates. An existing abandoned railroad spur is located in the western area, between the wetland and the TransMontaigne facility. The eastern area is viewable from Waterfront Road.

4.3 EXTERIOR OBSERVATIONS

The following table summarizes our observations during the reconnaissance.

DRAFT

TABLE 4.3-1: Exterior Site Observations

FEATURE TYPE	OBSERVATIONS
Structures	No structures were observed in the western area during the site reconnaissance. Piping and a controls building were observed in the western-central area of the Property.
Hazardous Substances and Petroleum Products in Connection with Identified Uses	Petroleum pipelines were observed within the Property, along the alignment of Waterfront Road, during the site reconnaissance.
Storage Tanks (underground and above-ground)	No above-ground storage tanks or evidence of existing underground storage tanks were observed within the railroad corridor area during the site reconnaissance. Above-ground tanks used for refinery operations are located within the greater Terminal.
Roads	The central and eastern portions of the Property are accessed from Waterfront Road.
Strong, Pungent, or Noxious Odors and Their Sources	No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.
Standing Surface Water and Pools or Sumps Containing Liquids Likely to be Hazardous Substances or Petroleum Products	No pools of potentially hazardous liquid were observed within the Property at the time of our reconnaissance.
Drums, Totes, and Intermediate Bulk Containers	No drums were observed on the Property at the time of the reconnaissance.
Polychlorinated Biphenyls (PCBs) Containing Equipment	Railroad track switches are potential PCB-containing equipment. Railroad track switches are located in the southwestern railroad corridor but are not planned to be disturbed during the proposed railroad spur construction.
Hazardous Substances and Petroleum Product Containers	No hazardous substance or petroleum product containers were observed on the Property at the time of our reconnaissance.
Stains or Corrosion on Floors, Walls, or Ceilings (Except Water Staining)	No stains or corrosion on floors, walls, or ceilings were observed on the Property at the time of our reconnaissance.
Drains and Sumps	No drains or sumps were observed within the Property at the time of our reconnaissance.
Pits, Ponds, and Lagoons	Wetlands are located within the southwestern area of the Property.
Stained Soil/Pavement	No stained soil or pavement were observed within the Property at the time of our reconnaissance.
Stressed Vegetation	No signs of stressed vegetation were observed on the Property at the time of our reconnaissance.
Solid Waste/Debris	No disposal of solid waste was observed at the Property.
Stockpiles/Fill Material	No stockpiles were observed on the Property during the reconnaissance. The railroad tracks are located on aggregate base.
Wastewater	No wastewater conveyance systems were observed at the Property during the reconnaissance.
Wells	No wells were found within the Property during our site reconnaissance.
Septic Systems	No septic systems were found within the Property during our site reconnaissance.

DRAFT

4.4 INTERIOR OBSERVATIONS

A controls building was observed within the central-western area of the Property. The building is not planned to be disturbed as part of railroad corridor improvements.

4.5 ASBESTOS, LEAD, AND PCB-CONTAINING MATERIALS

An asbestos, lead, and PCB-containing building material survey was not conducted as part of this assessment. No structures are planning to be disturbed as part of railroad corridor improvements.

5.0 INTERVIEWS

Mr. Abhi Bobde of TransMontaigne Partners, LP completed a Client-based environmental site questionnaire pertaining to applicable environmental information regarding the Property on December 21, 2022. In the questionnaire, Mr. Bobde indicated that he is aware of contamination at the Property but did not provide details regarding commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. The questionnaire is presented in its entirety in Appendix F.

Mr. J. Douglas Hall, Director of Environmental Compliance at TransMontaigne, reviewed the Key Site Manager-related environmental site questionnaire pertaining to applicable environmental information regarding the Property, and responded in an email on June 15, 2023. In the questionnaire, Mr. Hall indicated that the facility has existed as a petroleum storage/distribution facility for several decades, and environmental sampling of soil and groundwater has been conducted at various times. Impacted soil from accidental releases of petroleum products has been excavated and disposed. Numerous groundwater wells are located on site, and some have been identified as being contaminated by residual petroleum constituents. Mr. Hall also identified the adjacent property to the west as an automobile auction operation.

6.0 FINDINGS AND OPINIONS

Based on the findings of this assessment, the following RECs, historical REC, and controlled REC were identified for the Property.

- **REC: Residual chemicals associated with railroad tracks**
  - Residual chemicals including lead, arsenic, and PAHs are commonly found in near-surface soil in the alignment of railroad tracks and spurs. The presence of railroad tracks is classified as a REC.

- **REC: Tosco Pipeline – Wickland Releases**
  - At least seven historical releases of TPH occurred within the pipeline alignment adjacent to the south of the wetland. These releases are documented under Tosco Pipeline – Wickland case (GeoTracker ID SL18360780). Residual TPH constituents may be found in the wetland. Contaminant maps provided in the most recent cleanup order (Order R2-2008-0019) show that the contaminant plume was located within the wetland. The cleanup case related to these releases is eligible for case closure as of November 2017; however, until the case is closed, these releases are classified as a REC. Once this case receives closure, this REC may be reclassified as a historical REC.

DRAFT

- **REC: Nearby Refinery Releases Affecting the Railroad Corridor**
  - TransMontaigne Martinez (GeoTracker ID SL373211178): Numerous releases have occurred in connection with refinery operations at the TransMontaigne Martinez Terminal. Extensive remedial actions have been implemented to achieve cleanup objectives. Most notably, in the southwestern area of the terminal (in the western portion of the Property), a phytoremediation system was installed in 2007 to contain dissolved-phase hydrocarbons and MTBE and limit potential discharges to the marsh. A groundwater extraction pump was also installed in a monitoring well in this region to contain groundwater while the roots of the phytoremediation system deepened. Residual contamination is managed through the LUC and SMP. The SMP, dated June 17, 2019, provides procedures and protocols for managing residual hydrocarbons in soil throughout the facility. The facility is eligible for closure related to petroleum contamination as of July 19, 2021.
  - TransMontaigne Martinez Terminal (PFAS) (GeoTracker ID L10005962342): While the TransMontaigne facility is eligible for closure pertaining to TPH contamination, recent investigations have been conducted to evaluate the presence of PFAS, under open cleanup case L10005962342. The case is listed to have long-term management (as of July 19, 2021). PFAS investigation is outside the scope of this ESA.

- **Historical REC: Kinder Morgan Pipeline release**
  - In December 2000, a petroleum spill from a KMEP pipeline was discovered on the southern side of Waterfront Road where it crosses Pacheco Creek (the eastern area of the Property), when petroleum hydrocarbons became visible on the ground surface and surface water north of the railroad tracks. The cleanup case is documented under GeoTracker case ID SL1824X1162. Three small leaks were discovered along the bottom of a 14-inch-diameter pipeline. The spill volume was estimated to be 50 barrels. The spill impacted a wetland slough system adjacent to Pacheco Creek and threatened to impact additional waters through further migration. KMEP implemented emergency response protocols to contain the spill and remove impacted soil. The RWQCB issued a CAO on January 25, 2001, in response to the spill. KMEP implemented a wetland mitigation plan and subsequent monitoring report. In July 2013, the CAO was rescinded and the cleanup case was closed.

- **Controlled REC: Covenant and Environmental Restriction on Property**
  - A Covenant and Environmental Restriction on the Property was recorded on March 12, 2020, (dated August 16, 2023, on GeoTracker) and affects the entire TransMontaigne parcel (APN 159-310-038). The covenant indicates that soil and groundwater underlying the Property contain hazardous materials (TPH) due to historical releases from refinery operations. The LUC references the 2019 SMP prepared by Apex, which summarizes procedures for the appropriate management of SPH and associated petroleum-impacted soil and groundwater during future redevelopment or other on-site maintenance activities at the site.

6.1 DATA GAPS

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gap was identified.

- At the time of report publication, we did not receive a preliminary title report for the Property.

DRAFT

The data gap identified during this process does not affect the conclusions as to the presence or lack of presence of RECs at the Property. The history of site ownership is well documented, and environmental liens/AULs for the Property were identified on GeoTracker, an EC/IC registry.

6.2 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE

The following deviation from ASTM Standard Practice E1527-21 occurred during the preparation of this report:

- The report was not completed within 6 months of the date of the earliest following components: records review, site reconnaissance, interviews, and declaration by environmental professional.

7.0 CONCLUSIONS

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC.

We have performed a phase I environmental site assessment for the Property in general conformance with the scope and limitations of ASTM E1527-21 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exception to, or deletions from this practice are described in Sections 6 and 8.1 of the report.

This assessment has revealed evidence of RECs in connection with the Property. We recommend no further environmental studies pertaining to petroleum contamination within the railroad corridor. However, we recommend the following regarding the railroad spur area in the western area of the Property.

- We recommend collecting near-surface soil samples along the alignment of the railroad spur that is to be redeveloped. Samples should be analyzed for residual constituents associated with lead, arsenic, and polycyclic aromatic hydrocarbons (PAHs) to determine the risk to construction workers and to characterize soil for offhaul, if planned.
- We recommend that a soil management plan (SMP) be prepared prior to construction activities, which outlines soil management procedures and protocols for handling unforeseen environmental conditions if encountered.

8.0 LIMITATIONS

8.1 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports, and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction

DRAFT

with our relevant professional experience related to such data interpretation. We assume no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for 1 year after from the earliest date of the following components: records review, site reconnaissance, interviews, declaration by environmental professional. Updates of portions of the assessment may be necessary after a period of 180 days of the earliest date of the four components.

A more extensive assessment that would include a subsurface exploration with laboratory testing of soil, soil gas, and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for the Property and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

8.2 SPECIAL TERMS AND CONDITIONS

We have prepared this report for the exclusive use of our client, TransMontaigne Partners, LP. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the Client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the Client.

This phase I environmental site assessment is not intended to represent a complete soil, soil gas, or groundwater characterization, nor define the depth or extent of soil, soil gas, or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. Laboratory testing of soil, soil gas, or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), or a mold survey. A radon evaluation was not performed.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. We would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Exclusive Recovered Govt. Archives

RGA LF - Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/20/2022 has revealed that there are 7 CORRACTS sites within approximately 1 mile of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

EXECUTIVE SUMMARY

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/25/2022 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Potential Media Affected: Other Groundwater (uses other than drinking water), Sediments, Soil, Surface water
Potential Contaminants of Concern: Diesel
Site History: The 255-acre property is located at 2801 Waterfront Road in the City of Martinez near the south shore of the Carquinez Strait. The Site has operated for bulk petroleum storage, transfer, and blending

TRANSMONTAIGNE-MARTINEZ TERMINAL (Continued) **S103438413**

facility, and has been used to store refined and unrefined petroleum product. Tosco Refining Company owned a petroleum product pipeline system which follows an easement located through the Facility, Numerous petroleum releases occurred at the Facility as documented in the Site Cleanup Requirements Orders. Shore Terminals, LLC owned and operated the Facility from October 8, 1998, through September 30, 2005. In January 2001, Shore Terminals, LLC became a wholly owned subsidiary of Kaneb Pipeline Operating Partnership, L.P. located in Richardson, Texas. On July 1, 2005, Valero L.P. acquired Kaneb Pipeline Operating Partnership, L.P. Wickland Oil Martinez Limited Partnership (Wickland) owned and operated the Facility from August 20, 1991 until October 7, 1998. Martinez Terminals Limited (MTL) owned and operated the Facility from November 18, 1987 to August 20, 1991. The MTL partnership terminated after transferring ownership to Wickland. Landsea Terminal, Incorporated (LTI) owned and operated the Facility prior to November 18, 1987. LTI went into bankruptcy, and the Facility was purchased by MTL at a foreclosure sale on November 18, 1987.

Waste Discharge System:	True
Solid Waste Assessment Test Program:	False
Toxic Pits Cleanup Act Program:	False
Resource Conservation Recovery Act:	False
Department of Defence:	False
Solid Waste Assessment Test Program:	Not reported
Threat to Water Quality:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Sub Chapter 15:	True

TRANSMONTAIGNE-MARTINEZ TERMINAL (Continued) **S103438413**

inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	09-05-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 10/02/2019. OBSERVATION: During the site walk, CCHSHMP observed a 130 gallon tote of X-Cide 320, a biocide that is no listed in the hazardous materials inventory in CERS. In addition, the Spill Prevention, Control, and Countermeasure (SPCC) Plan lists about 382 million gallons of oil capacity, but the hazardous materials inventory lists about 186 million gallons of hazardous materials storage. CORRECTIVE ACTION: By October 5, 2019, update the hazardous materials inventory to report the biocide and ensure the amount reported in the SPCC Plan is consistent with the amount reported in the hazardous materials inventory reported in CERS.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to promptly correct visible discharges and promptly remove any

TRANSMONTAIGNE-MARTINEZ TERMINAL (Continued) **S103438413**

	accumulations of oil in diked areas.
Violation Notes:	Returned to compliance on 10/22/2019. OBSERVATION: The facility has drums for collecting gasoline and diesel from sample bottles on a secondary containment pallet. The secondary containment pallet had liquid in it. CORRECTIVE ACTION: By October 5, 2019, provide documentation to CCHSHMP that demonstrates that the liquid in the secondary containment pallet has been removed and staff are aware of the requirement to promptly remove the accumulation of liquids from secondary containment

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container. For mobile or portable containers, either provide the type of oil and storage capacity, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.
Violation Notes:	Returned to compliance on 11/03/2021. OBSERVATION: The SPCC Plan does not include the portable containers that store petroleum with a capacity of 55 gallons or more in the list of petroleum stored. CORRECTIVE ACTION: Update the SPCC Plan to include mobile or portable containers storing petroleum with a capacity of 55 gallons or more.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes:	Returned to compliance on 10/04/2019. OBSERVATION: The facility monthly inspection template in the SPCC Plan is not consistent with the monthly inspection being conducted. Of the tanks CCHSHMP reviewed

TRANSMONTAIGNE-MARTINEZ TERMINAL (Continued) **S103438413**

inspection documentation, tanks 100-37 is past due for the formal external inspection and tank 501-13 is past due for both formal internal and external inspections. The previous inspection noted issues with integrity testing not being completed in accordance with industry standards. CORRECTIVE ACTION: By October 5, 2019, provide updated monthly inspections that show each aboveground tank is receiving monthly inspections in accordance with the SPCC Plan and provide a schedule for upcoming formal internal and external inspections for all aboveground storage tanks.

Violation Date: 10-06-2021
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: OBSERVATION: Owner/Operator failed to determine if the waste inputs to tank 310 are a hazardous waste. As described in the 9/5/2019 CCHSHMP Hazardous Waste inspection tank 310 previously received a hazardous waste tank assessment, and a new one was due to occur in December 2020. The previous hazardous waste tank inspection identified tank 310 as being hazardous for the following contaminants: Acetone, Methyl-Tertiary Butyl Ether, Benzene, Toluene, Ethylbenzene, Xylenes, Propylbenzene, and Trimethylbenzene. CCHSHMP's understanding as described in the 2019 inspection is that the tank was a hazardous waste tank and facility believed they were exempt from needing a TSDF permit for the granular activated carbon treatment due to 22CCR 66264.1(g)(11). Facility has changed operators and operations since their last tank assessment however and believes that tank 310 may no longer contain hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA indicating you have [Truncated]

Violation Notes:	Returned to compliance on 09/05/2019. OBSERVATION: Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards. Looked at tanks 310, 170-50, 150-41, 501-16. Two of them did not have current external inspections. CORRECTIVE ACTION: Ensure that tanks are inspected and

TRANSMONTAIGNE-MARTINEZ TERMINAL (Continued) **S103438413**

tested by an appropriately qualified person in accordance with industry standards. CCHS HMP is requesting a copy of each tank with installed date, last internal and last external for all tanks on site. A plan will be developed after the list is generated.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Description:	Per the caller they are having a third party company evaluating their property for an replacement of a rail extrension. In the process of taking soil samples they discovered a purple substance coming back on the drill from about 31/2 feet down. The caller feels this is a historical incident because they don't store anything like this on their property. Per the caller this is not impacting groundwater

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Arsenic, Copper, Nickel, Other Metal, Gasoline
Site History:	Construction of the Richmond oil terminal and aboveground storage tanks (ASTs) began around 1949. The site has been used as a bulk fuel

FUEL MARINE & MARKETING LLC (Continued) **S124595996**

storage facility since 1951. 25 ASTs are located at the site and store various petroleum products such as gasoline, diesel fuel, toluene, jet fuel, asphalt, heavy fuel oil, ethanol, penhex, and methyl tertiary butyl ether (MTBE). Soil and groundwater investigations were performed in the 1980s and 1990s. 28 groundwater monitoring wells were installed at the site (however, one well has been abandoned). A total fluid recovery system (TFR system) was installed at the site in October 1992 to removed petroleum product from the subsurface. The TFR system extracts contaminated groundwater from 11 wells that have historically contained product. Fluids extracted are pumped into an oil/water separator and water is treated by a biotreatment system. Effluent is sampled and then disposed to the sanitary sewer system. According to personnel at the facility, the volume of product observed in the oil/water separator is minimal. Overall, there has been a general reduction in amount and extent of product in the groundwater.

Description:	Employees were in process of exposing an abandoned pipe line to remove it, when they discovered remnants of an old spill. In the Payton Slough there are some very small clumps and a small sheen of what appears to be old crude oil. The release is coontained to some potholes in the slough at this time. The reporting party was advised that there had been a spill that occurred at this location years ago.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
GASOLINE AND DIESEL PRODUCERS
US EPA Renewable Fuel Standard (RFS) Program encourages the blending of renewable fuels into our nation's motor vehicle fuel by establishing annual renewable fuel standards, responsibilities of refiners and other fuel producers, a trading system and other compliance mechanisms, and recordkeeping and reporting requirements. In addition to the rule, EPA has published a Regulatory Impact Analysis (RIA), which contains analyses of the economic and environmental impacts of the expanded use of renewable fuels under this program. A renewable fuel is defined as a motor vehicle fuel that is produced from plant or animal products or wastes, as opposed to

PLAINS ALL AMERICAN PIPELINE, L P (Continued) **1014670668**

fossil fuel sources. Renewable fuels include ethanol, biodiesel and other motor vehicle fuels made from renewable sources. Currently, FRS only includes facilities using ethanol fuels from the RFS registered facility list.
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER
ETHANOL FACILITY
ETHANOL FACILITY/GASOLINE AND DIESEL PRODUCERS
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Potential Contaminants of Concern:	Not reported
Site History:	In December 2000, a petroleum spill from a Kinder Morgan Energy Partners, LP (KMEP) was discovered near Waterfront Road where it crosses Pacheco Creek in Martinez, Contra Costa County. The spill volume was estimated to be 50 barrels. The spill impacted a wetland slough system adjacent to Pacheco Creek and threatened to impact additional waters of the state through further migration. KMEP removed polluted soil in the spill vicinity. The Water Boards Executive Officer issued a Cleanup and Abatement Order (CAO) on January 25, 2001, in response to the spill. The CAO required KMEP to investigate the extent of petroleum contamination of soil and groundwater, propose and implement appropriate cleanup actions, and propose and implement a wetland mitigation plan. KMEP complied with the CAO tasks. Water Board staff approved KMEPs 2001wetland mitigation plan and subsequent monitoring report, concluding that the plan was successfully implemented. In July 2013, the Water Board's Executive Officer rescinded the CAO and closed the cleanup case.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

COPART (YD 78) (Continued) **S106101793**

disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date:	01-26-2022
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.
Violation Notes:	Returned to compliance on 02/01/2022. OBSERVATION: Failure to ensure that the two above ground fuel tanks are inspected annually in accordance with industry standards and SPCC tier 1 requirements. Your SPCC plan does not contain information about annual inspections and this needs to be added. The other two tanks are already being inspected by an outside contractor. CORRECTIVE ACTION: Ensure that tanks are inspected annually with all applicable required checklist items. Begin performing annual inspection of the two diesel fuel tanks and provide copy of the work order showing it was performed within 30 days. A sample was provided.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

IT CORPORATION - VINE HILL COMPLEX (Continued) **1010415290**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 11/29/2016
Comments: On 11/29/2016, an Imminent and Substantial Endangerment Determination and Order and Remedial Action Order ("Order") was mailed to identified responsible parties. The Effective Date is 5 days from mailing date (Dec. 5, 2016). The Order provides initial steps and a schedule for responding to the release or threatened release of hazardous substances at the Site. In addition, there will be an informational meeting on January 12, 2017, as stated in the cover letter. The Order was mailed by certified mail from the Office of the Attorney General for DTSC. The renewal of the RCRA Post Closure Permit was not completed and this Site was transferred from RCRA Permitting to Cleanup's under the Legacy Landfills Office for Operation and Maintenance.

Completed Date: 05/02/2017
Comments: On April 28, 2017, ITELT noticed a "bump" in the North Cell Basin appeared contracted. According to ITELT the reason is due to hydraulic changes to the subsurface bay mud and peat deposits resulting from adjacent landfill loads causing uneven movements of the bumps through the continuous dewatering of the bay mud. Expansion and contraction of the bumps have occurred over the years.

Completed Date: 10/11/2017
Comments: Solano county is in an extreme fire situation and the smoke and haze is strong at Panoche and Vine Hill. Therefore, field activities have been temporarily shutdown starting at 11 am on Wednesday (10/11/2017) through Friday (10/13/2017) due to possible impacts to employee health and safety. Office staff will work regular schedules. No adverse impacts are anticipated during the temporary shutdown.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 08/20/2019
Comments: On 8/20/2019, DTSC mails the review of the packet for a Notice of Preparation and Intent to Adopt a Proposed Mitigated Negative Declaration. The letter reiterates some key points and provides the following concerns: 1. DTSC finds it significant that the introductions of the Notice of Preparation and Intent to Adopt a Proposed Mitigated Negative Declaration and CEQA Environmental Checklist Form do not inform the reader that the Proposed Project is located adjacent to and surrounds a closed hazardous waste landfill. 2. In the CEQA environmental Checklist Form, Environmental Issues 9: Hazards and Hazardous Materials, Page 37 of 71: a. The Vine Hill Complex is no longer owned and operated by the former IT Corporation. The Vine Hill Complex is owned by IT Vine Hill LLC and is operated by ITELT. b. The following sentence is misleading as a portion of the Baker site is a closed hazardous waste landfill and is not designated for unrestricted use: The Department of Toxic Substance Control (DTSC) granted the closure of the Baker Site in 1999, and noted that the property had been remediated to levels that allow unrestricted future land use. During closure, the Baker site consisted of about 130 acres where waste from the site s impoundment ponds were removed, solidified, and consolidated into a 30-acre portion of the Baker site that is now designated as the Baker Landfill. The remaining 100 acres was designated as clean closed, allowed unrestricted use, and later sold by IT Corporation, the former owner. c. The following portion of the sentence is incorrect Since the Baker Site as a whole was cleaned and closed to DTSC standards As mentioned in item b. above, the whole Baker site was not clean closed.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History:	The Acme landfill consists of three parcels, the North, South and East parcels. Only the East parcel still receives waste. The East

ACME FILL CORPORATION (Continued) **1000196679**

Parcel is an active unlined Class III solid waste disposal site located near Martinez, Contra Costa County, California. The East Parcel is surrounded by Walnut Creek and Pacheco Creek on the northern and eastern side, IT Vine Hill on the southern side and Waterfront Road on the western side of the parcel. The East Parcel fill occupies approximately 89 acres of a 516 acre landfill owned by the Acme Fill Corporation. The East Parcel fill is located over a marsh area containing deposits of San Francisco Bay mud and peat. It is currently regulated under Waste Discharge Requirements order R2-2001-0042.
