Terracon Project No. LA227126

Dear Ms. Savant:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. PLA227126, dated May 23, 2022.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

Sast Res

Terracon Consultants, Inc.

Ivy at Mountain Gate Corona, California

October 13, 2022 (Revised: April 25, 2023) Terracon Project No. LA227126

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PLA227126 dated May 23, 2022 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Jennifer S. Van, Environmental Professional. Maria S. Maternowski performed the site reconnaissance on September 27, 2022.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is located at 430 West Foothill Parkway in Corona, Riverside County, California and consists of three contiguous parcels (Riverside County Assessor Parcel Numbers 1140-700-20, 1140-700-21 and 1140-700-22) totaling approximately 5.19-acres. The site consists of primarily vacant land with asphalt-paved areas and utilities. At the time of the site reconnaissance, the site was unoccupied.

Historical Information

Based on a review of historical information, the site consisted of undeveloped and/or vacant land in 1902, and by the early 1930s was developed with the surrounding properties for agricultural use. The site became vacant in the early 1990s and has since remained vacant, with a portion on the southeast of the site paved with the existing asphalt area in the early 2000s.

The properties surrounding the site were similarly undeveloped in the early 1900s, with Chase Drive abutting the site to the north. The property to the north was developed with an apparent agriculture-related structure and agricultural fields to the north, east, and south from the 1930s until the early 1990s. To the north of the site, Chase Drive was redeveloped as West Foothill Boulevard abutting the site to the north by 2002, followed by the existing single-family residential dwellings. The property to the east was redeveloped in the late 1990s with the existing multitenant shopping center with an asphalt-paved parking lot. The property to the west of the site was developed with apparent agriculture-related structures in the 1930s that were converted to commercial and retail use by the early 2000s. The southwestern adjoining property was redeveloped with the existing Dubrina Way followed by single-family residential dwellings. Based on review of historical documentation, recognized environmental conditions (RECs) were not identified in connection with the site.

Ivy at Mountain Gate ■ Corona, California

Historically, the site and surrounding properties has been used for agricultural activities, from at least 1931 through the mid-1990s, which may include the use of pesticides and herbicides. Most currently used agricultural chemicals do not persist for extended periods of time in the environment if applied appropriately; however, some agricultural chemicals persist in the environment, especially if misapplied. In addition, structures indicative of potential mixing of pesticides and/or herbicides were not observed onsite in the historical aerial photographs reviewed. In Terracon's experience, the application of herbicides and pesticides to agricultural fields can leave trace amounts of the compounds in the soil and/or groundwater; however, these residual amounts are generally below risk-based screening levels. Pesticide and/or herbicide misuse or vegetative stress were not observed on the site during the site reconnaissance.

Records Review

Selected state and federal environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site was not identified in the regulatory databases.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Site Reconnaissance

At the time of the site reconnaissance, 20 cubic-yards of trash/debris, former utility boxes and a drain were observed on the site. The aforementioned features do not represent a REC to the site.

Adjoining Properties

The northern adjoining property consists of single-family residential homes (2845-2880 Rosebud Circle and 2865-2895 Olivewood Circle). The eastern adjoining property consists of a multi-tenant retail building consisting of 9Round, Kona Cleaners and Wells Fargo (330 West Foothill Parkway), a multi-tenant retail building consisting of Pizza Hut, Great Clips and Dentist (360 West Foothill Boulevard). The southern adjoining property consists of asphalt-paved parking lot. The western adjoining property consists of single-family homes (503, 510 Panther Drive), The Wood Work Shop (570 West Foothill Parkway). Kona Cleaners (330 West Foothill Parkway), was identified as a drop-off dry-cleaning location, with no dry-cleaning operations performed. RECs were not observed with the adjoining properties.

Additional Services

Per the agreed scope of services specified in the proposal, the following additional services were performed:

- Radon Records Review
- Wetland Records Review

Findings for the additional services are as follows:

Ivy at Mountain Gate
Corona, California

- Based on the published radon risk levels for the county, the site is located in EPA Zone 2, which has a predicted average indoor screening level of between 2 picoCuries of radon per liter of air (pCi/L) and 4 pCi/L. Based on this information, the site is considered to have a moderate potential for elevated indoor concentrations of radon gas.
- Based on a review of the National Wetlands Inventory database, the site is not currently located on federally-designated wetlands.

Significant Data Gaps

Significant data gaps were not identified in connection with the site.

Conclusions

We have performed a Phase I Environmental Site Assessment consistent with the procedures included in ASTM practice E 1527-13 of 430 West Foothill Parkway, Corona, Riverside County, California, the site. Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) were not identified in connection with the site.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs or CRECs. As such, no additional investigation is warranted at this time. However, based on the former agricultural use, if soil is to be disturbed during future construction activities, proper procedures should be followed with respect to worker health and safety, and any affected soil encountered should be properly managed and disposed in accordance with local and state regulations, through the implementation of a soil management plan (SMP).

1.0 INTRODUCTION

1.1 Site Description

| Site Name | Ivy at Mountain Gate |
|-----------------------------|--|
| Site Location/Address | 430 West Foothill Parkway, Corona, Riverside County, California. (Riverside County Assessor Parcel Numbers 1140-700-20, 1140-700-21 and 1140-700-22) |
| Land Area | Approximately 5.19-acres |
| Site Improvements | Site consists of primarily vacant land and asphalt-paved areas. |
| Anticipated Future Site Use | Residential use |
| Reason for the ESA | Redevelopment of the site |

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PLA227126 dated May 23, 2022 and was conducted consistent with the procedures included in ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

Ivy at Mountain Gate
Corona, California

As requested by the client, the following additional services were performed:

- Radon Records Review
- Wetland Records Review

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

Ivy at Mountain Gate Corona, California

At the issuance of this report, responses had not yet been received from Riverside County Land Use or the Riverside County Fire Marshal for records pertaining to the site. Based on the available historical and regulatory information, this does not represent a significant data gap to the site.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Oakmont Management Group LLC and Welltower, Inc. Use or reliance by any other party is prohibited without the written authorization of Oakmont Management Group LLC, and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the site visit, Ms. Carissa Savant, client representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

| Client Questionnaire Item | Client Did Not | | Client's Response | |
|--|----------------|-----|----------------------|--|
| | Respond | Yes | No | |
| Specialized Knowledge or Experience that is material to a REC in connection with the site. | | | Х | |
| Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site. | | | X | |
| Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site. | | | Х | |
| Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site. | | | Х | |
| Obvious Indicators of Contamination at the site. | | | Х | |

Terracon's consideration of the client provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

2.0 PHYSICAL SETTING

| Physica | Setting Information | Source | | | | |
|-----------------------|--|--|--|--|--|--|
| Topography | | | | | | |
| Site Elevation | 1,035 feet above sea level | | | | | |
| Topographic Gradient | Toward the north-northwest | USGS Topographic Map, Corona South Quadrangle, California | | | | |
| Closest Surface Water | Oak Street Creek, approximately 3,600 feet to the west of the site. | dated 2018 (Appendix A) | | | | |
| Soil Characteristics | | | | | | |
| Soil Type | GdC – Garretson gravelly very fine sandy loam 2 to 8 percent slopes | Soil Survey of Riverside Area, California; | | | | |
| Description | 0 to 10 inches: gravelly very fine sandy loam 10 to 53 inches: gravelly loam 53 to 72 inches: loam | United States Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS); issued September 13, 2021. https://websoilsurvey.sc.egov.usda.gov | | | | |
| Geology/Hydrogeology | | | | | | |

Ivy at Mountain Gate ■ Corona, California

| Physica | Setting Information | Source |
|---|--|---|
| Formation | Qoa | |
| Description | Marine and nonmarine sedimentary rocks. Older alluvium, lake, playa, and terrace deposits. | California Geological Survey, dated 2015. |
| Estimated Depth to First Occurrence of Groundwater | Approximately 300 feet bgs, based on 1996 approximation from Soil Remediation and Closure Report for 510 West Foothill Parkway, located to the adjoining west of the site. | Conversation with City of Corona Water Department, Ninyo and Moore, 1996. |
| *Hydrogeologic Not known - may be inferred to be parallel to topographic gradient (progradient to the north-northwest). | | |

^{*} The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps and selected historical aerial photographs (at approximately 10 to 15-year intervals) were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. Sanborn Maps were not available for the site.

Topographic maps:

- Corona, California, 1902 (1:125,000), 1942 (1:31,680) 1947 (1:50,000)
- Corona South, California, 1954, 1967, 1973, 1974, 1982, 1988, 1997,
 2012, 2015 and 2018 (1:24,000)

Aerial photographs:

- FAIR, 1931, (1"=500")
- USDA, 1938, 1953, 1959, 1961, 1967, 1985, 1989 and 1990 (1"=500')
- USGS, 1948 and 1975, (1"=500")
- USGS/DOQQ, 1994 and 2002, (1"=500")
- USDA/NAIP, 2006, 2009, 2012 and 2016 (1"=500")

Historical Maps and Aerial Photographs

| Direction | Description | | |
|-----------|---|--|--|
| Site | Undeveloped and/or vacant land (1902); agricultural land (1931-1994); site vacant with asphalt paving on southeastern portion (2002-2018). | | |
| North | Chase Drive abuts the northwest corner of the site (1902-1997); property developed with a structure and graded for agricultural use (1931-1975); property following Chase Drive reconfigured for agricultural use and a structure added to eastern portion (1985-1989); structure to northeast of site demolished (1994); West Foothill Boulevard developed abutting the site to the north followed by single-family residential dwellings (2002-2018). | | |
| East | Property undeveloped and/or vacant (1902); agricultural land (1931-1994); property redeveloped as multi-tenant shopping center with asphalt-paved parking lot (2002-2018). | | |
| South | Property undeveloped and/or vacant (1902); agricultural land (1931-1990); West Mountain Gate Drive developed abutting the site to the south, property redeveloped with the existing Mountain Gate Park (1994-2018). | | |
| West | Property undeveloped and/or vacant (1902); property developed with several structures as part of larger agricultural parcel (1931-1948); additional commercial buildings developed (1953-1994); southern portion redeveloped with single-family residential dwellings, Dubrina Way developed abutting the southwestern corner of the site, existing agricultural buildings repurposed for multi-tenant commercial and retail use (2002-2018). | | |

Historically, the site and surrounding properties has been used for agricultural activities, from at least 1931 through the mid-1990s, which may include the use of pesticides and herbicides. Most currently used agricultural chemicals do not persist for extended periods of time in the environment if applied appropriately; however, some agricultural chemicals persist in the environment, especially if misapplied. In addition, structures indicative of potential mixing of pesticides and/or herbicides were not observed onsite in the historical aerial photographs reviewed. In Terracon's experience, the application of herbicides and pesticides to agricultural fields can leave trace amounts of the compounds in the soil and/or groundwater; however, these residual amounts are generally below risk-based screening levels. Pesticide and/or herbicide misuse or vegetative stress were not observed on the site during the site reconnaissance.

3.2 Historical City Directories

The Riverside Directory Company, Kaasen Directory Company, Los Angeles Directory Company, Southern California Telephone Company, Pacific Directory Company, Luskey Brothers Publishers, Pacific Bell Yellow Pages, Cole Information Services, Haines & Company, and SBC Pacific Bell city directories used in this study were made available through EDR (selected years reviewed:1921-2017) and were reviewed at approximate five-year intervals, if readily available. Street listings not available prior to 1921. The current street address for the site was not identified.

Historical City Directories

| Direction | Description | | |
|-----------|--|--|--|
| Site | 430 West Foothill Parkway – No listings. | | |
| Site | 430 West Chase Drive - No listings. | | |

| West | 520 West Foothill Parkway – No listings (1921-2003); Promotional Sportswear, The Event Center (2004-2009); No listings (2014-2017). | | |
| | 570 West Foothill Parkway – No listings. | | |
| | 580 West Foothill Parkway – No listings. | | |

Chino Fabricare Center, Boston Cleaners (330 West Foothill Parkway)

The Chino Fabricare Center and Boston Cleaners facilities are listed as having operated to the adjoining northeast of the site from approximately 2001-2014 and are further discussed in Section 4.1.

3.3 Site Ownership

According to the Riverside County Office of the Assessor, the property is currently owned by Corona 1, LLC.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

At the direction of the client, performance of a review of environmental liens and activity and use limitations was not included as part of the scope of services. The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases.

3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

Interviewee

| Interviewer | Name / Phone # | Title | Date/Time |
|-------------|----------------|---------------|-----------------|
| Maria S. | Eli Halavi / | Owner / | October 6, 2022 |
| Maternowski | (310) 963-6878 | Corona 1, LLC | 2:15pm |

Terracon interviewed Mr. Eli Halavi, owner with Corona 1 LLC, subsequent to the site reconnaissance. Mr. Eli Halavi indicated that they have been familiar with the site since 2006, when he purchased it from White Stone Properties and additional entities. Mr. Eli Halavi reported the site has always consisted of vacant land to his knowledge. Mr. Eli Halavi is not aware of petroleum pipelines, water wells, or USTs associated with the site. Mr. Eli Halavi is not aware of pending, threatened and/or past environmental or possible violations of environmental laws, and/or liability. In addition, Mr. Eli Halavi is not aware of environmental concerns with the site or in the site vicinity.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon

Ivy at Mountain Gate Corona, California

October 13, 2022 (Revised: April 25, 2023) Terracon Project No. LA227126

seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

| Database | Description | Distance (miles) | Listings |

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

| Facility Name And Location | Estimated Distance / Direction/Gradient | Database Listings | Is a REC, CREC, or HREC to the Site |

Chino Fabricare Center, Cleaners Club Inc. (330 West Foothill Parkway)

Cleaner's Club Inc. / Chino Fabricare Center, formerly located to the adjoining northeast of the site and in an up-gradient position relative to the site is listed in the EDR Historic Cleaner regulatory database as having operated from approximately 2001-2014. Based on a review of the South Coast Air Quality Management District (SCAQMD) F.I.N.D. online database, Cleaner's Club Inc. / Chino Fabricare Center was not identified with being permitted with any dry-cleaning equipment. Based on a review of the Department of Toxic Substances Control (DTSC) online hazardous waste tracking system (HWTS) online database, Cleaner's Club Inc. / Chino Fabricare Center were not identified. Additionally, at the time of the site reconnaissance, Terracon observed the current dry-cleaning facility at this property shipping clothing off-site for dry-cleaning. Based on facility's regulatory status, visual observations, lack of waste streams and lack of dry-cleaning equipment, Cleaner's Club Inc. / Chino Fabricare Center does not represent a REC to the site.

Ivy at Mountain Gate
Corona, California

Foothill Property, Main Ranch, Temescal Ranch, Wild Rose Ranch (510 West Foothill Parkway / 510 West Chase Drive)

Foothill Property, Main Ranch, Temescal Ranch and Wild Rose Ranch, located down-gradient to the adjoining west of the site, is listed in the Leaking Underground Fuel Tank Report (GEOTRACKER) (LUST), SWEEPS UST Listing (SWEEPS UST), Facility Inventory Database (CA FID UST), "Cortese" Hazardous Waste & Substances Sites List (CORTESE), Hazardous Waste & Substance Site List (HIST CORTESE), and CalEPA Regulated Site Portal Data (CERS) regulatory databases. In a November 1995 document from the County of Riverside Assessor's Office, the Foothill Partners Property at 510 West Foothill Parkway was identified as the former Foothill Ranch facility listed at 510 West Chase Drive and presumably includes the Temescal, Wild Rose, and Main Ranch properties listed at the same historical address with an historic UST.

Based on a review of the LUST case associated with this property, a former 10,000-gallon gasoline fuel tank was identified on this property, located approximately 320 feet to the west of the site. Based on a review of documents for the LUST case, the tank was removed in October of 1995 and the remaining piping associated with the tank was removed in November of 1995. A 0.5-inch diameter hole was observed in the piping approximately 12 feet south of former UST location and soil samples collected below this leak identified contamination. Additional removal of approximately 73 tons of contaminated soil was completed in January of 1996 and 7 samples were taken from the location of the identified leak location. These samples were analyzed for total petroleum hydrocarbons-gasoline (TPH-g), benzene, toluene, ethylbenzene and xylene (BTEX), and methyl tertiary-butyl ether (MTBE) were not detected at limits that meet current applicable environmental screening levels (ESLs) (San Francisco Bay Water Quality Control Board, 2019). The LUST case was granted closure in February of 1996. Based on this information as well as the distance and down-gradient position relative to the site, the former LUST case associated with 510 West Foothill Parkway and 510 West Chase Drive does not represent a REC to the site.

Albertson's (260 West Foothill Parkway)

Albertson's Supermarket, located approximately 110 feet east of the site and in a topographic cross-gradient position relative to the site, is identified in the CERS, CERS HAZ WASTE, HAZNET, HWTS, and RCRA – VSQG regulatory databases. Based on a review of the HWTS listing, this facility was a permitted generator of hazardous waste streams from 2013-2021 including Alkaline Solution (pH>= 12.5) without Metals (2013-2015, 2018-2019), Aqueous Solution (2 < pH < 12.5) Containing Reactive Anions (2013, 2015), Unspecified Solvent Mixture (2013-2017), Pesticides/Pesticide Production Waste (2014-2015, 2018-2019), Pharmaceutical Waste (2013-2020), Off-Spec, Aged, or Surplus Organics (2014-2020), Liquids with pH<=2 (2013-2020). Based on a review of the CERS listing, the facility stores Retail Hazardous Wastes including Refrigerants, Propane, Lead Acid Batteries, and Helium. The listing does not indicate any violations or releases associated with this facility. Based on the facility's regulatory status, waste streams identified and apparent grocery store operations, this facility does not represent a REC to the site.

Ivy at Mountain Gate ■ Corona, California

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed five facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

| Agency Contacted / Contact Method | Response | |
|---|---|--|
| County of Riverside, Department of Environmental Health (DEH) / | According to the Riverside County DEH, no records were found for the site. | |
| Email: DEHRecordsMgmt@rivco.org | | |
| Riverside County Land Use Records / by e-mail: | At the issuance of this report, no response had been received. | |
| landuserecords@rivco.org | | |
| Department of Toxic Substances Control (DTSC) / by e-mail: pubreqact@dtsc.ca.gov | According to Choua Her with the DTSC, no records were found for the site. | |
| Riverside County Fire / by e-mail: | At the issuance of this report, no response had been received. | |
| rrurecords@fire.ca.gov | | |
| Santa Ana Regional Water Quality Control Board (SARWQCB) / by e-mail: | According to the file review desk, the RWQCB does not have files for the site. | |
| FileReview8@waterboards.ca.gov | | |
| South Coast Air Quality Management District (SCAQMD) / by online form: | According to Michelle Card with the AQMD, no records were found for the site. | |
| http://www.aqmd.gov/nav/online-services/public-records | | |
| Riverside County Transportation and Land Management / by email: Records@rivco.org | According to Dan with the County of Riverside TLM Agency, there are no building records for the site's parcels. They also indicated that all building permits prior | |
| Archived records (Pre 1997) / by online form: https://rctlma.org/building/Records-Request | to 1963 have been destroyed. | |
| City of Corona Clerk / by online form: | The city of Corona did not have records pertaining to the site. | |
| https://311.coronaca.gov/public-records-request/ | | |

4.3 Local Area Knowledge

Based on a review of the California Department of Conservation, Geologic Energy Management Division well finder website (<u>CalGEM GIS</u>), the site is not identified within an oil field and there are no active or plugged oil production wells located at the site or adjoining properties.

Terracon researched on-line at the State Resources Water Control Board (SRWCB) GeoTracker database – Land Disposal Sites and landfills were not identified on-site or in the site vicinity.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

| Site Reconnaissance | | |
|---------------------|---|--|
| Field Personnel | Maria S. Maternowski | |
| Reconnaissance Date | September 27, 2022 | |
| Weather Conditions | Mostly Sunny / 85°F | |
| Site Contact/Title | Carissa Savant / Oakmont/Park IV Group, LLC | |
| Site Utilities | | |
| Drinking Water | The City of Corona | |
| Wastewater | The City of Corona | |
| Electric | Southern California Edison | |
| Natural Gas | Southern California Gas | |

5.2 Overview of Current Site Occupants and Operations

At the time of the site reconnaissance, the site was observed to be unoccupied graded land.

5.3 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Site Characteristics

| Category | Item or Feature | Observed or Identified |
|----------|----------------------|---------------------------|
| | Emergency generators | |

Ivy at Mountain Gate Corona, California

| Category | Item or Feature | Observed or Identified |
|---|---|------------------------|
| | Elevators | |
| | Air compressors | |
| | Hydraulic lifts | |
| | Dry cleaning | |
| | Photo processing | |
| | Ventilation hoods and/or incinerators | |
| | Waste treatment systems and/or water treatment systems | |
| | Heating and/or cooling systems | |
| Site Operations, Processes, and | Paint booths | |
| Equipment | Sub-grade mechanic pits | |
| _ | Wash-down areas or carwashes | |
| | Pesticide/herbicide production or storage | |
| | Printing operations | |
| | Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.) | |
| | Salvage operations | |
| | Oil, gas or mineral production | |
| | Other processes or equipment | X |
| Aboveground | Aboveground storage tanks | |
| Chemical or Waste | Drums, barrels and/or containers ≥ 5 gallons | |
| Storage | MSDS or SDS | |
| | Underground storage tanks or ancillary UST equipment | |
| | Sumps, cisterns, French drains, catch basins and/or dry wells | |
| Underground | Grease traps | |
| Chemical or Waste Storage, Drainage or Collection Systems | Septic tanks and/or leach fields | |
| | Oil/water separators, clarifiers, sand traps, triple traps, interceptors | |
| | Pipeline markers | |
| | Interior floor drains | |
| Electrical Transformers/ | Transformers and/or capacitors | |
| PCBs | Other equipment | |

Ivy at Mountain Gate Corona, California

| Category | Item or Feature | Observed or Identified |
|-----------------------------------|--|---------------------------|
| Releases or Potential Releases | Stressed vegetation | |
| | Stained soil | |
| | Stained pavement or similar surface | |
| | Leachate and/or waste seeps | |
| | Trash, debris and/or other waste materials | |
| | Dumping or disposal areas | Х |
| | Construction/demolition debris and/or dumped fill dirt | |
| | Surface water discoloration, odor, sheen, and/or free floating product | |
| | Strong, pungent or noxious odors | |
| | Exterior pipe discharges and/or other effluent discharges | |
| Other Notable Site Features | Surface water bodies | |
| | Quarries or pits | |
| | Wastewater lagoons | |
| | Wells | |

Site Operations, Processes, and Equipment

Other processes or equipment

At the time of the site reconnaissance, two former utility boxes, submerged into the ground and lined with concrete were observed on the southern portion of the site. No evidence of chemical waste disposal, noxious odors, or other releases were observed near the vicinity of the former utility boxes. Based on visual observations, the former utility boxes do not represent a REC to the site.

Releases or Potential Releases

Trash, debris and/or other waste materials

Trash and debris were observed along the eastern portion of the site during the site reconnaissance. Based on visual observation (only of surface materials) approximately 20 cubic yards of debris, which consisted of tires, plastic, wood and plastic bags was observed. Leakage, spills or other releases from these materials were not observed during the visual reconnaissance. The debris materials did not appear to be hazardous in nature.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Ivy at Mountain Gate
Corona, California

October 13, 2022 (Revised: April 25, 2023) Terracon Project No. LA227126

Adjoining Properties

| Direction | Description |
|-----------|---|
| North | The northern adjoining property consists of single-family residential homes (2845-2880 Rosebud Circle and 2865-2895 Olivewood Circle). |
| East | The eastern adjoining property consists of a multi-tenant retail building consisting of 9Round, Kona Cleaners and Wells Fargo (330 West Foothill Parkway), a multi-tenant retail building consisting of Pizza Hut, Great Clips and Dentist (360 West Foothill Boulevard). |
| South | The southern adjoining property consists of asphalt-paved parking lot. |
| West | The western adjoining property consists of single-family homes (503, 510 Panther Drive), The Wood Work Shop (570 West Foothill Parkway). |

RECs were not observed with the adjoining properties.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services (e.g. Radon Records Review and Wetland Records Review) were conducted.

7.1 Radon Records Review

Radon is a naturally occurring radioactive gas produced through the natural decay of uranium to stable lead. It is odorless, tasteless, and invisible. Elevated concentrations of radon can be found in soils and rocks containing uranium, granite, shale, phosphate, and pitchblende. Locations of these materials are highly unpredictable. Elevated levels of radon may also be found in soils containing certain types of industrial wastes, such as the by-products from uranium or phosphate mining. Radon can accumulate inside structures at concentrations that may pose risks to human health. Indoor radon levels are influenced by building construction and the concentration of radon in the underlying soil.

Terracon reviewed the Radon Zone Map prepared by the United States Environmental Protection Agency (US EPA) to identify the site location in terms of potential for average indoor radon concentrations. The study indicated the site is located in EPA Zone 2, which has a predicted average indoor screening level of between 2 picoCuries of radon per liter of air (pCi/L) and 4 pCi/L. The EPA recommends a guideline action level of 4.0 pCi/L for annual average indoor radon concentrations in residential properties. The action level is based on an exposure of 18 hours per day for 40 years. According to a U.S. Department of Energy environmental assessment, radon is much less of a concern in commercial buildings than in residential buildings as these buildings usually have mechanical ventilation and occupants are typically not in the buildings as many hours a week as they are in their homes. No action level has been established for commercial buildings or occupational exposure.

Ivy at Mountain Gate ■ Corona, California

October 13, 2022 (Revised: April 25, 2023) Terracon Project No. LA227126

The average residential radon concentration from the study for Riverside County 0.117 pCi/L, and the maximum identified concentration is 0.45 pCi/L in the first and second floors of homes. The study included tests in 12 homes in Riverside County, 0% of which exceeded the EPA action level.

Based on this information, the site is considered to have a moderate potential for elevated indoor concentrations of radon gas. However, testing would be required to evaluate site-specific concentrations of radon gas.

7.2 Wetland Records Review

The U.S. Army Corps of Engineers (USACE) regulates jurisdictional wetlands and other waters of the U.S. under Section 10 of the Rivers and Harbors Act and Section 404 of the Clean Water Act. Terracon conducted a limited desktop review of the site to identify areas mapped by the resources below as potentially exhibiting characteristics of wetlands and/or other waterbodies that may be subject to regulation under the USACE. This review may not identify state/locally-designated wetlands. This desktop review is not a thorough review of wetlands and may not identify all resources present.

Terracon reviewed the following resources to identify areas mapped as indicating the potential presence of jurisdictional waters of the U.S., including wetlands, on the site:

Topographic Map

The United States Geologic Survey (USGS) 7.5-Minute Topographic Map of the subject site was reviewed to identify drainages or other potential waters of the U.S. within the project site. A portion of the Topographic Quadrangle can be seen as Exhibit 1 in Appendix A. Based on the USGS map, water bodies are not depicted to occur on the site.

National Wetland Inventory Map

National Wetland Inventory (NWI) data for the project site was reviewed to identify potential wetland areas. NWI data for the project site was published by the U.S. Department of the Interior's Fish and Wildlife Service and depicts possible wetland areas based on stereoscopic analysis of high-altitude aerial photographs. The review of the NWI data does not identify potential wetland areas located within the project site. The NWI map data for the project area can be seen as Exhibit 3 in Appendix A.

Terracon's desktop review of the above resources did not identify mapped wetlands or other potentially jurisdictional waters of the U.S. on the site. Please note that there may be wetlands not identified on the resources reviewed. This Limited Wetland Review does not constitute a formal determination and/or delineation of a potentially jurisdictional wetland, which requires (among other procedures) a formal field investigation including hand-dug soil stations with vegetation and hydrologic indicators identification, as set forth in 1987 Corps of Engineers Wetland Delineation

Ivy at Mountain Gate
Corona, California

Manual and further amended by the applicable Regional Supplements to the Corps of Engineers Wetland Delineation Manual.

To obtain a formal determination from the USACE regarding jurisdictional status, a wetland/waters of the U.S. delineation could be conducted by a wetland scientist and submitted to the USACE (or in certain geographies the participating state agency) for a jurisdictional determination. Note that the USACE is not required to respond to determination requests within a particular timeframe unless the submittal also includes a permit application.

Ivy at Mountain Gate Corona, California

8.0 DECLARATION

I, Jennifer S. Van, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jennifer S. Van

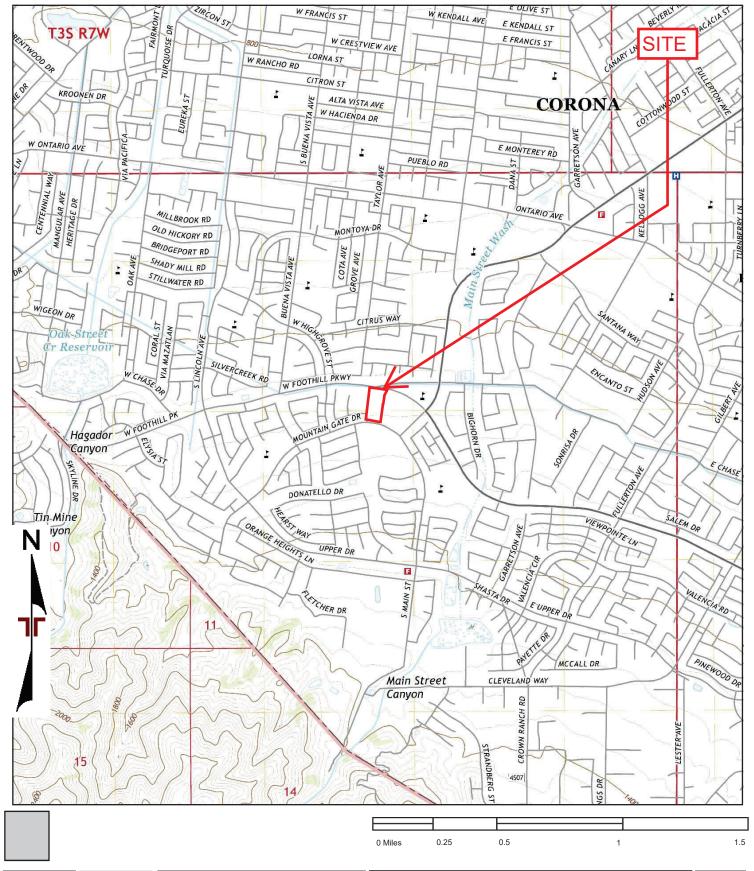

Environmental Group Manager

| In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must respond to the following questions. Failure to provide this information to the environmental professional may result in significant data gaps, which may limit our ability to identify recognized environmental conditions resulting in a determination that "all appropriate inquiry" is not complete. This form represents a type of interview and as such, the user has an obligation to answer all questions in good faith, to the extent of their actual knowledge. 1) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.25)? X No Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.) 2) Did a search of recorded land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state, or local law (40 CFR 312.26)? | | | |
| | and send Terracon a copy of the title records of | • | |
| 3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)? | | | |
| 4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)? | | | |
| 5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? | | | |
| 6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of contamination at the site (40 CFR 312.31)? X NoYes (If yes, explain below) | | | |

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

As ummary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

IVY AT MOUNTAIN GATE 430 WEST FOOTHILL PARKWAY CORONA, CA 92882

TARGET PROPERTY COORDINATES

Latitude (North): 33.844298 - 33⁵⁰ 39.47" Longitude (West): 117.575377 - 117³⁴ 31.36"

Universal Tranverse Mercator: Zone 11 UTM X (Meters): 446766.9 UTM Y (Meters): 3744847.2

Elevation: 1068 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 12015885 CORONA SOUTH, CA

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

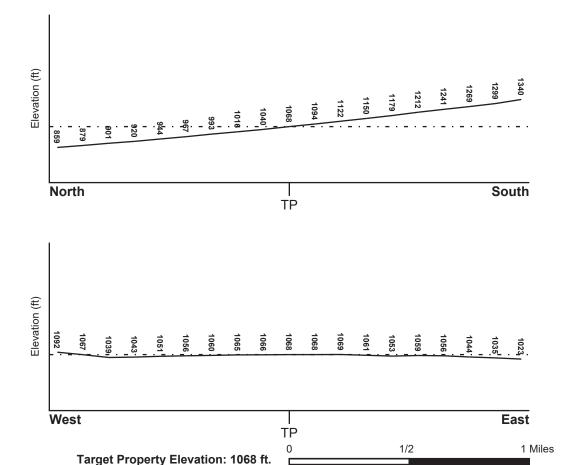

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: GARRETSON

Soil Surface Texture: gravelly very fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| | | | Soil Layer | r Information | | | |

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

CREDENTIALS

Maria, Maternowski

Assistant Scientist

PROFESSIONAL EXPERIENCE

Maria is a assistant scientist in Terracon's Tustin, CA office. In this office, Maria helps prepare Phase I Environmental Site Assessment (ESA) reports and provides geological field work throughout Southern California. These efforts involve field surveys, interviews with property owners, Environmental Data Resource reports, file reviews at local county and city regulatory offices, surveying, drilling, electrical resistivity testing, and more. Each ESA is prepared and finalized in accordance with new ASTM Standards. Her experience ranges from small cell Towers to large scale industrial and commercial properties.

PROJECT EXPERIENCE

Telecommunication Towers - California

Assisted Project Managers on Environmental Site Assessments for telecommunication tower properties.

Vacant Land - California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for vacant land properties.

Undeveloped Land - California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for undeveloped land properties.

Commercial Properties - California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for commercial properties.

Industrial Properties – California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for Industrial properties.

Retail Properties - California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for retail properties.

Jennifer S. Van

Project Manager

PROFESSIONAL EXPERIENCE

Ms. Van is an Environmental Group Manager in Terracon's Orange County, California Office. She has over nine years of experience in Environmental Services; Phase I Environmental Site Assessments (ESAs), Limited Subsurface Investigations (LSIs), Spill Prevention, Control and Countermeasure Plans, and Radon Measurement Provider. In addition, Ms. Van has some experience with regulatory compliance. Ms. Van assists with client and team management.

PROJECT EXPERIENCE

Environmental Site Assessment (ESAs):

Performed and managed hundreds of ESAs in California and several in Hawaii and Alaska for industrial, commercial, residential, and agricultural properties. Managed long-term national accounts for financial institutions (equity and loan portfolios), real estate investment trusts, developers and other real property owners. Understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water and groundwater. Is experienced in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13), and meets the requirements of an Environmental Professional as defined in Section 312.10 of 40 CFR 312.

Radon Assessments

Performed and managed over 10 radon assessments including commercial and residential in California.

Limited Subsurface Investigations (LSIs):

Performed and managed over 10 LSI's in California. Investigated environmental conditions in soils and groundwater as a result of releases from a variety of sources, including service stations, dry cleaners, and a wide range of industrial and manufacturing operations. Specialized in collection and interpretation of data.

Spill Prevention, Control And Countermeasure Plans (SPCCs)

Ms. Van has experience with federal and state requirements for Spill Prevention, Control and Countermeasure Plans for Tier I and II qualified facilities.

EDUCATION

Bachelor of Science, Environmental Sciences: Natural Sciences. Minor: Business Administration

Terracon Consultants, Inc. (Irvine, CA). Staff Scientist August 2011 to 2014

Resumes

Regulatory Compliance, Buena Park and Tipton, California

Project Manager for two regulatory compliance projects in Buena Park and Tipton, California, which included refrigeration and multiple dairy facilities.

Military Base Phase I ESAs and Soil Management Plans - San Diego County, California

Project Manager of ESAs and SMPs of over 100 sites for proposed telecommunication small cell locations within naval bases located within the San Diego County. Findings of the ESAs were utilized in creation of the SMPs, which was implemented at the installation of telecommunications utilities on the various bases.

Automotive Body Shop Portfolio, California

Portfolio assistant manager of environmental consulting services including Phase I ESA. The purpose of the services were to assist a client with a large acquisition of properties.

Clifford Nale, L.G., P.G.

SENIOR PROJECT MANAGER

PROFESSIONAL EXPERIENCE

Mr. Nale is a Senior Project Manager with Terracon's Seattle (Mountlake Terrace) office. His duties include the management of all phases of environmental site assessments (ESAs), business environmental risk reviews, site characterizations, and National Environmental Policy Act (NEPA) compliance assessments for wireless telecommunications providers. He also performs technical review of all environmental service projects in the Seattle office.

Over the course of his 28 years of professional environmental experience, Mr. Nale has performed site characterizations of soil and groundwater for regulatory compliance, and for remediation design projects throughout Washington, Oregon, California, Nevada and Arizona.

PROJECT EXPERIENCE

Environmental Site Assessments (ESAs)

Mr. Nale has managed and performed hundreds of ESAs throughout Washington, Oregon, California, Nevada, and Arizona for industrial, commercial, residential, and agricultural properties. He has managed projects for financial institutions, real estate investment trusts, developers, and other real property owners. Mr. Nale fully understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water, and groundwater. He has extensive experience and expertise in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13) and meets the requirements of an Environmental Professional as defined by this rule.

Limited Subsurface Investigations (LSIs)

Mr. Nale has managed and performed hundreds of LSIs throughout Washington, Oregon, California, and Nevada. He has investigated environmental conditions in soils, soil vapor, and groundwater due to releases from a variety of sources, including gasoline service stations, dry cleaners, and a wide range of industrial and manufacturing facilities.

Remedial Investigation/Remedial Action

Mr. Nale has managed numerous Remedial Investigation (RI) and Remedial Action (RA) projects in Washington State, either through an Independent Remedial Action or in coordination with the Washington State Department of Ecology's Voluntary Cleanup Program (VCP). He has expertise in the collection and interpretation of data to pursue closure through Washington's VCP program. Mr. Nale has provided oversight on RA projects utilizing cleanup remedies, including in-situ chemical oxidation, the installation of granular-activated carbon, and large-scale dig-and-haul methods on a variety of industrial and commercial properties.

APPENDIX F

LIST OF TERMS AND ACRONYMS

| Term/Acronym | Description |
|--------------|--|
| , | Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining). |
| ACM | Regulatory agencies have generally defined ACM as a material containing greater that one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable. |
| | Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply |
| AHERA | Asbestos Hazard Emergency Response Act |
| AST | Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a |
| | case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location. |
| BGS | Below Ground Surface |
| Brownfields | State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments. |
| ВТЕХ | Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release. |
| CERCLA | Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs. |
| CERCLIS | Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103. |
| CESQG CFR | Conditionally Exempt Small Quantity Generators Code of Federal Regulations |
| | |

| Term/Acronym | Description |
|--------------|---|
| | Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as "a recognized environmental condition resulting from a past |
| | release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for |
| | example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory |
| CBGC | authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for |
| | example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the |
| | environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I |
| | Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental |
| | Site Assessment report." |
| DOT | U.S. Department of Transportation |
| EPA | U.S. Environmental Protection Agency |
| | Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and |
| ERNS | hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data- |
| | sharing effort between EPA, DOT, and the National Response Center. |
| ESA | Environmental Site Assessment |
| FRP | Fiberglass Reinforced Plastic |
| | As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, |
| | mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified |
| Подого | under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section |
| Cubetoneo | 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical |
| Substance | substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include |
| | petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through |
| | (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). |
| | This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, |
| פויסליינים | as amended by the Solid Waste Disposal Act of 1980, defines this term as a "solid waste, or combination of solid wastes, which because of its |
| Maste | quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality |
| Vasia | or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health |
| | or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed." |
| | Historical Recognized Environmental Condition is defined in ASTM E1527-13 as "a past release of any hazardous substances or petroleum |
| | products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or |
| | meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for |
| HREC | example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a |
| | historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized |
| | environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the |
| | regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, |
| | the condition shall be included in the conclusions section of the report as a recognized environmental condition. |

| Term/Acronym | Description |
|--------------|--|
| | A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use |
| | restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to |
| IC/EC | contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, |
| | building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or |
| | effect human health. |
| ILP | Innocent Landowner/Operator Program |
| LQG | Large Quantity Generators |
| LUST | Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term. |
| | Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to |
| MC | the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment. |
| NODO | Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical |
| | and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard. |
| NECHAD | National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of |
| | hazardous air pollutants. |
| NFRAP | Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report. |
| | Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body |
| > 0 | indicating a violation of applicable rule or regulations has been identified. |
| NPDES | National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water. |
| IdN | The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions |
| | under the Superfund Program. |
| OSHA | Occupational Safety and Health Administration or Occupational Safety and Health Act |
| PACM | Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been |
| | analyzed to confirm the presence or absence of asbestos. |
| | Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy |
| | solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical |
| DCB | ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, |
| | stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break |
| | down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, |
| | prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today. |
| pCi/L | picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials. |
| PLM | Polarized Light Microscopy (see ACM section of the report, if included in the scope of services) |
| PST | Petroleum Storage Tank. An AST or UST that contains a petroleum product. |

| Term/Acronym | Description |
|--------------------------------|--|
| Radon | A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/I. |
| RCRA | Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave"). 42 U.S.C. 6901 et seq. |
| RCRA Generators | The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste. |
| RCRA CORRACTS/TS Ds | The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility. |
| RCRA Non- CORRACTS/TS Ds | The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required. |
| RCRA Violators List | RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance. |
| RCRIS | Resource Conservation and Recovery Information System, as defined in the Records Review section of this report. Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in. on. or at a property: 1) due to any release to the environment: 2) under conditions indicative of a release to the |
| SCL | environment. De minimis conditions are not recognized environmental conditions." State "CERCLIS" List (see SPL /State Priority List, below). |
| SPCC | Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements. |
| SPL | State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List. |
| SWF/LF | Small Quantity Generator State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner. |
| TPH | Total Petroleum Hydrocarbons Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act. |
