Environmental Interest/Information System:

BILLS TRUCK REPAIR INC (Continued) **1000292124**

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110064125566

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.

CLEAN TECH ENVIRONMENTAL (Continued) **S106767297**

(NOI) Letter on on March 1, 2023. A revised permit renewal application addressing the comments in the NOI must be submitted by April 14, 2023. FACILITY DESCRIPTION/HISTORY Agritec International, Ltd., dba CleanTech Environmental, Inc. (CleanTech) is a California-only hazardous waste used oil recycling facility located at 5820 Martin Road in Irwindale. The 0.98-acre site is near the signaled major cross streets of Irwindale Avenue and 1st Street, approximately 0.5 miles South of the 210 Freeway and 1.4 miles East Southeast of the 605 Freeway. The site is also located within 0.25 miles of the Santa Fe Dam Recreation Area. There are no residences located within 0.75 miles from the site and the closest school is over a mile from the facility. CleanTech is authorized to collect used oil from offsite generators (gas stations, oil changers, auto repair shops, etc.) and consolidate and store the used oil in tanks at the facility. The used oil may then be treated by blending, gravity separation, and/or by adding a chemical reagent if necessary, to remove metals and enhance dehydration, to meet the recycled oil standards in California Law. If the recycled oil standards are met, the treated used oil is certified as recycled oil. CleanTech is also authorized to store waste antifreeze and non-RCRA wastewater in containers and storage/treatment tanks as well as drums of solid waste including: solid waste contaminated with oil; oil/water separation sludge; contaminated soil with oil; contaminated containers, etc. The solid waste may be consolidated in containers or roll-off bins. Once consolidated, the solid waste and any liquid waste in drums are shipped to an authorized offsite recycling, treatment, or disposal facility. Lastly, CleanTech is authorized to store a

Site Name:	CLEAN TECH ENVIRONMENTAL
Violation Date:	05-31-2017
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan the appropriate containment, diversionary structures, or equipment to prevent a discharge, including typical failure mode and most likely quantity of discharge for the following: bulk storage containers, mobile/portable containers, oil-filled equipment, piping and related appurtenances, mobile refuels or non-transportation-related tank cars, and transfer areas, equipment and activities.
Violation Notes:	Returned to compliance on 06/19/2019. OBSERVATION: Failure to discuss the appropriate containment, diversionary structures, or equipment to prevent a discharge, including typical failure mode and most likely quantity of discharge within the SPCC plan. I. Plan discusses, "promptly corrects visible discharges..." in section 19.10 of plan. II. Observed small amount of oil accumulation in containment pallets. CORRECTIVE ACTION: Update SPCC plan to address the containment, diversionary structures, and equipment in use at facility to prevent a discharge, including typical failure mode and most likely quantity of potential discharge. I. Provide a timeframe for "promptly" II. Provide daily/as needed inspections on containment pallets to ensure oil spillage is removed in a timely manner.

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including

CLEAN TECH ENVIRONMENTAL (Continued) **S106767297**

the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fi

Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)
Violation Description: Failure to include all required information in the tank system assessment.
Violation Notes: Returned to compliance on 06/19/2019. OBSERVATION: The written hazardous waste tank system assessment for the hazardoud waste oil tank system did not include the following: Two missing waste oil tanks from the plan and updated tank numbering. CORRECTIVE ACTION: Revise the written hazardous waste tank system assessment for thehazardous waste oil tank system in accordance with 22 CCR 15 66265.192(k) and submit a copy to the CUPA. Include all waste oil tanks/hazardous waste tanks being utilized on site: Tank numbers 4,5,6 are 20,000 gallon tanks and tank 7 is divided (7A-reserved for spills/7B-used coolant/7C-oily water). Properly referrance the tanks observed on site with those in the plan; the tank assessment refers to tank 3 and tank 4.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Reclamation:	Not reported
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

UNIVERSAL METAL PLATING (Continued) **S108757111**

Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Deficient BMP Implementation
Violation Notes:	An unknown powder and minute metal pieces outside the metal plating room. Rusty metal and equipment were observed throughout the facility s outdoor without cover. A wooden cabinet storing solid hazardous waste did not have secondary containment, waste was observed on the ground surface without BMPs, and waste containers were without labels. Pieces of metal strings accumulated at various places throughout the outdoor areas without BMPs Empty containers and containers with liquids were stored outdoors without cover or secondary containment and some container did not have labels. Trash and other debris along the southern and western side of the facility s perimeter. A compressor discharging oily water and oil onto the ground surface without containment.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 575440
Site Name: QUALITY PRECISION CLEANING, INC.
Violation Date: 02-09-2023
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/09/2023. OBSERVATION: The business failed to electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. Inventory for 'Brulin Detergent' on site did not match reported CERS inventory. CORRECTIVE ACTION: Update CERS inventory for 'Brulin Detergent' to observe the quantities noted on site at time of inspection (4 x 55-gallon containers = 220 gallons).
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 575440
Site Name: QUALITY PRECISION CLEANING, INC.
Violation Date: 09-15-2020
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 12/06/2021. OBSERVATION: The generator has not obtained an active EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained an EPA ID number.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110055847375

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	LOS ANGELES RWQCB (REGION 4)
Site History:	The site has a history of use of underground storage tanks. Reichhold s production of alkyds, epoxies and polyesters resulted in various wastes. Reichhold used trichloromethane (TCA) from 1975 to 1984 to clean tanks used in the polyester resin manufacturing process. Handling, storage and disposal of solvents. Soil vapor data from 1991 indicated concentrations of volatile organic compounds (VOCs) in the former sump and clarifier areas including 1,1,1-TCA, tetrachloroethylene (PCE) and trichloroethylene (TCE). Following soil vapor survey work, Regional Board staff considered the investigation as incomplete. In June 1993, the UST oversight program for the facility was transferred from the Los Angeles County Department of Public Works to the Regional Board. In August 1993, the United States Environmental Protection Agency (EPA) notified that it believes Reichhold may be a potentially responsible party for the Site for actual or potential releases of hazardous substances within the San Gabriel Valley Superfund Site, Baldwin Park Operable Unit.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:
Name: INOVATIV INC
Address: 1500 W MCKINLEY ST
City,State,Zip: AZUSA, CA 91702
Site ID: 592744
CERS ID: 10676122
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 592744
Site Name: Inovativ Inc
Violation Date: 08-09-2021
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 04/11/2022. OBSERVATION: Owner/Operator failed to submit the hazardous waste notification electronically to CERS. CORRECTIVE ACTION: Owner/Operator shall submit a notification of hazardous waste generated by the facility in accordance with HSC 25158 electronically to CERS. HSC 25404(e)(4) No later than three years after the statewide information management system is established, each CUPA, PA, and regulated business shall report program data electronically. The secretary shall work with the CUPAs to develop a phased in schedule for the electronic collection and submittal of information to be included in the statewide information management system, giving first priority to information relating to those chemicals determined by the secretary to be of greatest concern. The secretary, in making this determination shall consult with the CUPAs, the California Emergency Management Agency, the State Fire Marshal, and the boards, departments, and offices within the California [Truncated]

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 38698
Site Name: J & A ENGINE REBUILDING INC
Violation Date: 11-26-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 12/12/2019. OBSERVATION: Uniform Hazardous Waste Manifests for Waste oil and par wash waste were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste oil and part wash waste and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 38698
Site Name: J & A ENGINE REBUILDING INC
Violation Date: 09-27-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 12/12/2019. OBSERVATION: A review of CERS, revealed that the facility has not accurately submitted the Hazardous Material Inventory Chemical Description page to the CUPA Observed chemicals unreported in the Hazardous Material Inventory: a) Antifreeze Maximum Daily Amount = 55 gallon, Largest Container = 55 gallons, drum CORRECTIVE ACTION: Go to the California Environmental Reporting System (CERS) internet website (http://cers.calepa.ca.gov/) to provide additions/corrections to the Hazardous Material Inventory Chemical Description page for all materials listed above. Resubmit

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D007

REICHHOLD LLC 2 (Continued) **1001111631**

Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650

REICHHOLD LLC 2 (Continued) **1001111631**

toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Quarterly Update: QUARTERLY UPDATE for October 2021 to December 2021 The facility is continuing its operation of the soil vapor extraction system to remediate tetrachloroethane (PCE) contamination at the site. Additional sampling was conducted to monitor the reduction in contamination. On September 22, 2021, the Department of Toxic Substances Control (DTSC) received the Human Health Risk Assessment for the additional sampling. DTSC is currently reviewing the document for compliance with the regulations. The system is running as proposed and the facility continues to comply with the Soil Vapor Extraction System Work Plan. The Soil Vapor Extraction System Work Plan and other documents related to the facility s closure can be viewed on the Public EnviroStor by clicking the Activities tab above. FACILITY DESCRIPTION/ HISTORY On February 13, 2009 the Department of Toxic Substances Control (DTSC) received a letter from Clean Harbors Environmental Service Inc. (Clean Harbors) informing DTSC that it was closing the Clean Harbors Irwindale facility. Clean Harbors submitted a Facility Closure Work Plan (WP), dated, July 19, 2012 and DTSC approved the closure workplan. Clean Harbors is currently conducting closure activities at the site. Clean Harbors Irwindale had a Series C Standardized Permit (Permit) for the storage of hazardous waste. Clean Harbors Irwindale was permitted to store antifreeze in four 5,000 gallons tanks and up to 1,100 gallons (or twenty [20] drums whichever is greater) of drummed antifreeze. The Permit had an effective date of July 17, 2000 and expired on July 17, 2010. Clean Harbors Irwindale was formerly owned by Romic Environmental Technologies Corp., doing business as, Automotive Environmental Services. The transfer of the facility to Clean Harbors was approved by the DTSC on August 3, 2007.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

PERKINELMER OPTOELECTRONICS SC INC (Continued) **1000246737**

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

PERKINELMER OPTOELECTRONICS SC INC (Continued) **1000246737**

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Comments: FACILITY IDENTIFIED ID FROM ERRIS

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/16/1994
Comments: Site screening conducted. Aerojet Engineering Corporation occupied this site from 1947 until 1966. ORC leased a portion of the site from 1966 until 1977, when they purchased the lot from Aerojet. Aerojet Electrosystems company is presently located adjacent to ORC at 1111 W. 3rd St. RWQCB is overseeing soil and groundwater investig- ation at Aerojet and surrounding lots, including ORC. To avoid duplication of efforts DTSC will take no action at this time.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

NORAC PHARMA (Continued) **1000143907**

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And

NORAC PHARMA (Continued) **1000143907**

Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P016
Waste Description: Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P064
Waste Description: Methane, Isocyanato- (Or) Methyl Isocyanate

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

NORAC PHARMA (Continued) **1000143907**

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U006
Waste Description: Acetyl Chloride (C,R,T)

Waste Code: U007
Waste Description: 2-Propenamide (Or) Acrylamide

Waste Code: U008
Waste Description: 2-Propenoic Acid (I) (Or) Acrylic Acid (I)

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U017
Waste Description: Benzal Chloride (Or) Benzene, (Dichloromethyl)-

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U029
Waste Description: Methane, Bromo- (Or) Methyl Bromide

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U041
Waste Description: Epichlorohydrin (Or) Oxirane, (Chloromethyl)-

Waste Code: U057
Waste Description: Cyclohexanone (I)

Waste Code: U067
Waste Description: Ethane, 1,2-Dibromo- (Or) Ethylene Dibromide

Waste Code: U068
Waste Description: Methane, Dibromo- (Or) Methylene Bromide

Waste Code: U076
Waste Description: Ethane, 1,1-Dichloro- (Or) Ethylidene Dichloride

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U102
Waste Description: 1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate

Waste Code: U103
Waste Description: Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester

NORAC PHARMA (Continued) **1000143907**

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)

Waste Code: U117
Waste Description: Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)

Waste Code: U118
Waste Description: 2-Propenoic Acid, 2-Methyl-, Ethyl Ester (Or) Ethyl Methacrylate

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U123
Waste Description: Formic Acid (C,T)

Waste Code: U133
Waste Description: Hydrazine (R,T)

Waste Code: U135
Waste Description: Hydrogen Sulfide (Or) Hydrogen Sulfide H2s

Waste Code: U144
Waste Description: Acetic Acid, Lead(2+) Salt (Or) Lead Acetate

Waste Code: U147
Waste Description: 2,5-Furandione (Or) Maleic Anhydride

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U159
Waste Description: 2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)

Waste Code: U161
Waste Description: 4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-

Waste Code: U169
Waste Description: Benzene, Nitro- (Or) Nitrobenzene (I,T)

Waste Code: U170
Waste Description: P-Nitrophenol (I,T) (Or) Phenol, 4-Nitro-

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

NORAC PHARMA (Continued) **1000143907**

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U218
Waste Description: Ethanethioamide (Or) Thioacetamide

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U353
Waste Description: Benzenamine, 4-Methyl- (Or) P-Toluidine

Waste Code: U404
Waste Description: U404

Quarterly Update:	Active Facility undergoing Closure and Corrective Action Norac is located at 405 S. Motor Avenue, Azusa, in a generally commercial/industrial area. Norac has manufactured organic peroxides and small quantities of specialty pharmaceuticals since the early 1950

NORAC INC (Continued) **U001568706**

s. In 1983, Norac was issued a Hazardous Waste Facility permit for storage/treatment of hazardous waste in drums and tanks. The permit expired in 1988 and Norac informed DTSC of their intent to close the HWMUs. Since that time, there have been indications that soil and potentially groundwater contamination may have occurred. Norac entered into a Corrective Action Consent Agreement with DTSC in March 2004 to resolve issues related to potential soil contamination. A Closure Plan was approved in March 1994, and a Current Conditions Report and an RFI Work Plan were approved by DTSC in February 2006. 4/30/2018- See the Notice of Decision for Corrective Action Completion dated 06/28/2017. This document states that a Land Use Covenant (LUC) is prepared to restrict the use of the property to industrial commercial use. Therefore, this facility is closed with waste in place.

RWQCB Region:	LOS ANGELES RWQCB (REGION 4)
Site History:	From 1943 to 2001, Aerojet s manufacturing and research/development operations at the Facility have included, among others: testing and production of solid and liquid fuel rockets; torpedo research; manufacture of pressure vessels; development and testing of electro-optical sensing devices and generator simulation systems; and semiconductor research and development. Other activities, in support of these manufacturing and research/development operations, have included operation of: rocket motor and waste propellant burn areas; laboratories; machine shops; solvent storage tanks and drum storage

AEROJET AZUSA (Continued) **1000332998**

areas; vapor degreasers; leach pits and beds; leach fields; industrial wastewater sumps; and waste treatment systems. Aerojet has reported using volatile organic compounds (VOCs), trichloroethylene (TCE), perchloroethylene (PCE), carbon tetrachloride (CTC), 1,1,1-trichloroethane (TCA), trichorofluoromethane (Freon-11), dichlorodifluoromethane (Freon-12), and 1,1,2-trichloro-trifluoroethane (Freon-113). Also of perchlorate, N-nitrosodimethylamine (NDMA), and 1,4-dioxane in development, testing and production of solid fuel rockets.

Quarterly Update: Updated 10/26/07 - Aerojet s Azusa facility occupies 72 acres and conducts testing and assembly of electro-optical sensors and munitions devices. The Hazardous Waste Facility stores lab packs and solvent based wastes. In past years, the facility was used for testing and development of rocket motors and fuels, and perchlorate is a known potential contaminant at the site. In order to determine whether the past operations have caused a release to groundwater, DTSC has required Aerojet s Closure Plan to include ground water, soil, and soil vapor sampling. Site -wide corrective action was conducted under the oversight provided by the lead agency Los Angeles Regional Water Quality Control Board and DTSC is only overseeing closure of a specific RCRA Hazardous Waste Unit within the property. Revision of the closure plan is needed to meet CEQA requirements. DTSC is planning to meet with Aerojet in the first quarter of 2008. Update 6/25/09: DTSC revised the closure plan to meet CEQA requirements. A completeness determination letter was issued on April 7, 2009. DTSC is holding a public comment period from June 23 to August 7, 2009 to receive comments on the draft closure plan. Update 12/15/09 DTSC received no comments on the closure plan and issued final approval on October 12, 2009.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 398398
Site Name: Northrop Grumman Systems Corporation
Violation Date: 09-23-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

AEROJET AZUSA (Continued) **1000332998**

Violation Notes:	Returned to compliance on 10/06/2015. OBSERVATION: A review of CERS, revealed that the facility has not accurately submitted the Hazardous Material Inventory Chemical Description page to the CUPA Observed chemicals unreported in the Hazardous Material Inventory: a) Acetylene add to B116 location. Maximum Daily Amount = 195 cubic feet, Largest Container = 140 cubic feet, cylinder b) Diesel Fuel (emergency generators) add one 69 gallon & one 80 gallon. Provide locations. Observed chemicals incorrectly reported in the Hazardous Material Inventory: a) Diesel Fuel change stated location of 5,000 gallon from B200 pump room to exterior area between Building 200 and 59A b) Acetylene at B183 increase quantity for Maximum Daily Amount from 74 cubic feet to 370 cubic feet c) Propane at B164 increase quantity for Maximum Daily Amount. Each tank is 200 gallon. Each cylinder is 8 gallon. CORRECTIVE ACTION: Go to the California Environmental Reporting System (CERS) internet website [Truncated]

Quarterly Update: Azusa Land Reclamation Co Inc is a landfill that started in the 1930s as a rock and gravel quarry but slowly started accepting different types of wastes. Ownership and the name of the facility has changed a few times over the years. In 1984, an inspection was done on Azusa in response of reports that Azusa had accepted disposal of hazardous waste. The results from the inspection was that some illegal dumping had occurred and were already excavated and the other alleged reports were unconfirmed. Thus, DTSC determined No Further Action at the facility on 3/9/1995. Otherwise, there is no evidence that Azusa ever dealt with hazardous waste or ever had a Hazardous Waste Facility Permit. Hazardous Waste Tracking System (HWTS) contains an error and cannot be used as evidence for the facility's status. It contains data from 1993-2066! Among the information in the HWTS database, it shows that Azusa mostly accepted asbestos waste. In June 1992, the Facility submitted a notification to the Department of Toxic Substances Control that that they would be accepting asbestos containing materials. Azusa disposes of asbestos containing waste under HSC 25143.7 which "allow[s] the disposal of such waste, provided that the wastes are handled and disposed of in accordance with the Toxic Substances Control Act (P.L. 94-469) and all applicable laws and regulations."

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 02/09/2017. OBSERVATION: Observed two 55 gallon containers of waste oil/gas filters without labels (@ the Maintenance Storage area) CORRECTIVE ACTION: Owner/Operator shall immediately comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. The filter containers shall be labeled USED OIL AND GASOLINE FILTERS . Ensure that the label is attached to each container by the compliance date. The operator corrected the violation on site

AZUSA LAND RECLAMATION (Continued) **S113789201**

by attaching a properly filled out label at the time of the inspection.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D006
Waste Description:	Cadmium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D011
Waste Description:	Silver
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F006
Waste Description:	Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon

GEORG FISCHER SIGNET LLC (Continued) **1000133491**

Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070576477

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CHROME PLATING: Chrome Plating Facilities Listing
This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022
Date Data Arrived at EDR: 11/16/2022
Date Made Active in Reports: 02/06/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

South Map:	12015951 BALDWIN PARK, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

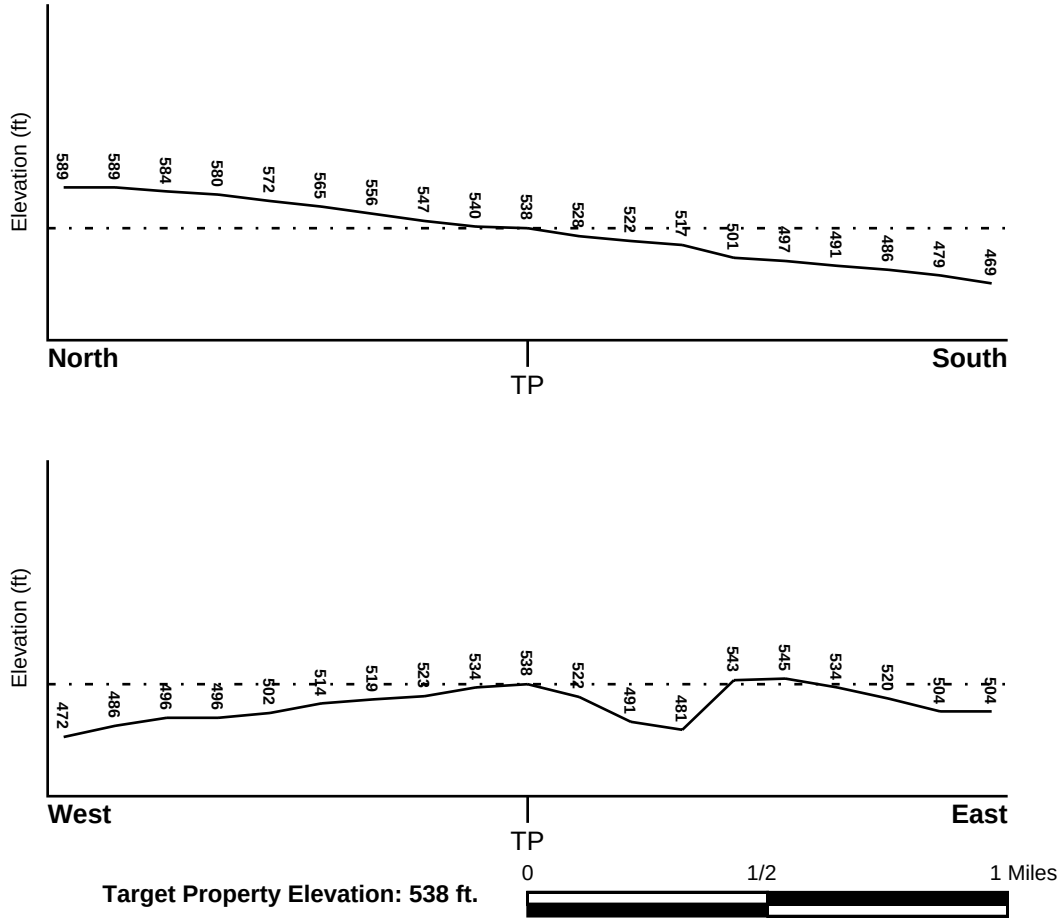
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1700F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1415F	FEMA FIRM Flood data
06037C1420F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

WELL SEARCH DISTANCE INFORMATION

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Anacapa Geoservices were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E1527 - 21 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

QUESTION	YES	NO	UNK	COMMENTS
1. Is the *property* or any *adjoining property* used for an industrial use?	X			
2. To the best of your knowledge, has the *property,* or any *adjoining property* been used for an industrial use in the past?	X			
3. Is the *property* or any *adjoining property,* used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	
4. To the best of your knowledge has the *property,* or any *adjoining property* been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?			X	
5. Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the *property* or at the facility?			X	
6. Are there currently, or to the best of your knowledge have there been previously, any industrial *drums* (typically 55 gal. (208 L)) or sacks of chemicals located on the property or at the facility?			X	
7. Has *fill dirt* been brought onto the property that originated from a contaminated site or that is of an unknown origin?			X	
8. Are there currently, or to the best of your knowledge have there been previously, any *pits, ponds, or lagoons* located on the *property* in connection with waste treatment or waste disposal?			X	
9. Is there currently, or to the best of your knowledge has there been previously, any stained soil on the *property*			X	
10. Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the *property?*			X	
11. Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property* or adjacent to any structure located on the *property.*			X	
12. Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?			X	
13. If the *property* is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?			X	
14. Does the *owner or occupant* of the *property* have any knowledge of *environmental liens* or governmental notification relating to past or recurrent violations of environmental laws with respect to the *property* or any facility located on the *property*			X	
15. Has the *owner or occupant* of the *property* been informed of the past or current existence of *hazardous substances or petroleum products* or environmental violations with respect to the *property* or any facility located on the *property*			X	
16. Does the *owner or occupant* of the *property* have any knowledge of any *environmental site assessment* of the *property or facility* that indicated the presence of *hazardous substances or petroleum products on,* or *contamination of,* the *property* or recommended further assessment of the *property*			X	
17. Does the *owner or occupant* of the *property* know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any *hazardous substance or petroleum products* involving the *property* by any owner or occupant of the *property?*			X	

(continued from page 1)

QUESTION	YES	NO	UNK.	COMMENTS
18. Does the *property* discharge waste water on or adjacent to the *property* other than storm water into a sanitary sewer system?			X	
19. To the best of your knowledge, have any *hazardous substances or petroleum products,* unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the *property?*			X	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?			X

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

LEGAL DESCRIPTION

PROPOSED PARCEL 1

Those portions of Lots 2, 3, 8, 9, 13 and 14 of Map of Subdivision No. 2 Azusa Land and Water Co., in the City of Irwindale, County of Los Angeles, State of California, as per Map recorded in Book 43, page 94 of Miscellaneous Records, in the Office of the County Recorder of said County, more particularly described as follows:

Commencing at southeasterly corner of said Lot 13, being coincident with the intersection of the centerline of Irwindale Avenue, a public right of way 100 feet in width and varying, with the centerline of 1st Street, a public right of way, 80 feet in width, thence northerly along said centerline of 1st Street, North 1°12'15" East 487.00 feet; thence departing said centerline, at right angles thereto, North 88°47'45" West 50.00 feet to the westerly right of way line of said Irwindale Avenue and the True Point of Beginning; thence North 1°11'48" East 1228.63 feet to the beginning of a non-tangent curve concave westerly and having a radius of 292.00 feet, a radial line to which bears South 88°48'23" East; thence northerly 55.84 feet along said curve, through a central angle of 10°57'23"; thence North 88°48'03" West 114.58 feet to the easterly line of a certain Parcel A described as an exception in the deed to Miller Brewing Company, recorded October 27, 1977 as Instrument No. 77-118029 of Official Records in the office of said County Recorder, and the beginning of a non-tangent curve concave easterly and having a radius of 3000.00 feet, a radial line to which bears South 85°27'13" West; thence southerly 99.79 feet along said curve, and said easterly line, through a central angle of 01°54'21"; thence South 06°27'08" East 512.23 feet; thence South 01°11'57" West 350.17 feet to the beginning of a non-tangent curve, concave westerly and having a radius of 744.08 feet, a radial line to which bears South 88°59'17" East; thence southerly 100.09 feet along said curve through a central angle of 7°42'25", to the westerly line of said Parcel A and the beginning of a non-tangent curve, concave westerly and having a radius of 450.00 feet, a radial line to which bears South 81°13'47" East; thence northerly 135.68 feet along said curve and westerly line of Parcel A, through a central angle of

17°16'33"; thence continuing along said westerly line of said parcel, North 08°22'03" West 871.34 feet to the beginning of a tangent curve, concave westerly and having a radius of 3000.00 feet; thence continuing northerly 715.92 feet along said curve and westerly line of said parcel through a central angle of 13°40'23"; thence North 05°18'20" East 110.36 feet to the southerly boundary of the Atchison, Topeka, and Santa Fe railway Company's right of way, being 100 feet wide; thence along said right of way, South 81°24'38" West 928.38 feet to the beginning of a tangent curve concave northerly and having a radius of 2596.64 feet; thence westerly 1459.30 feet along said curve and southerly right of way line through a central angle of 32°12'00"; thence continuing along said southerly right of way line, North 66°23'22" West 372.32 feet; thence departing said southerly right of way line, South 23°36'38" West 26.39 feet; thence South 12°09'27" West 73.78 feet; thence South 89°54'42" East 75.03 feet to the beginning of a non-tangent curve, concave northerly and having a radius of 52.00 feet, a radial line to which bears South 37°10'30" West; thence easterly 36.52 feet along said curve through a central angle of 40°14'33"; thence North 86°55'56" East 25.96 feet; thence South 51°42'07" East 175.75 feet; thence South 47°57'18" East 66.68 feet to the beginning of a curve concave southwesterly and having a radius of 295.00 feet; thence southeasterly 102.66 feet along said curve through a central angle of 19°56'17" to the beginning of a compound curve concave southwesterly and having a radius of 823.22 feet, a radial line to which bears North 61°58'59" East; thence southeasterly 139.48 feet along said curve through a central angle of 9°42'28"; thence South 07°55'47" East 132.23 feet to the beginning of a non-tangent curve concave southeasterly and having a radius of 130.00 feet, a radial line to which bears North 15°55'34" West; thence southwesterly 161.59 feet along said curve through a central angle of 71°13'02";

thence South 02°51'24" West 353.88 feet; thence South 07°51'00" East 763.39 feet; thence North 82°09'00" East 932.83 feet; thence North 72°11'13" East 340.58 feet; thence North 82°13'12" East 126.89 feet; thence North 87°09'58" East 575.47 feet; thence North 88°28'52" East 357.95 feet; thence South 08°22'03" East 311.38 feet to the beginning of a curve concave westerly and having a radius of 600.26 feet; thence southerly 412.31 feet along said curve through a central angle of 39°21'22"; thence South

88°48'12" East 166.55 feet to said westerly right of way line of Irwindale Avenue and the True Point of Beginning.

This legal description is delineated on the accompanying Lot Line Adjustment No. 01-2021, Exhibit "B", is made a part hereof for reference purposes, and is not intended to be used in the conveyance of land in violation of the Subdivision Map Act of the State of California.

(E) EASEMENT TO SOUTHERN CALIFORNIA EDISON COMPANY FOR PUBLIC UTILITIES AND INCIDENTAL PURPOSES RECORDED NOVEMBER 7, 1978 AS INST. NO. 78–1237427, O.R. PLOTTED ON SHEET 3 OF 7.

(F) EASEMENT TO SOUTHERN CALIFORNIA EDISON COMPANY FOR PUBLIC UTILITIES AND INCIDENTAL PURPOSES RECORDED DECEMBER 3, 1979 AS INST. NO. 79–1356778, O.R. PLOTTED ON SHEET 3 OF 7.

(G) EASEMENT TO SOUTHERN CALIFORNIA EDISON COMPANY FOR ANCHORAGE PURPOSES AND INCIDENTAL PURPOSES RECORDED JULY 16, 1998 AS INST. NO. 98–1206913, O.R. PLOTTED ON SHEET 3 OF 7.

(H) EASEMENT TO THE GENERAL TELEPHONE COMPANY OF CALIFORNIA FOR POLES, WIRES, CONDUITS AND INCIDENTAL PURPOSES RECORDED SEPTEMBER 29, 1975 AS INST. NO. 3100, O.R. PLOTTED ON SHEET 3 OF 7.

OFFSITE, UNPLOTTABLE, OR INDETERMINATE EASEMENTS

(I) EASEMENTS FOR PIPES AND INCIDENTAL PURPOSES RECORDED IN BOOK 991, PAGE 140, IN BOOK 998, PAGE 122, IN BOOK 998, PAGE 215, IN BOOK 1006, PAGE 68, ALL OF DEEDS. THE LOCATION OF THE EASEMENT CANNOT BE DETERMINED FROM RECORD INFORMATION. NOT PLOTTABLE.

(J) EASEMENT TO FLUOROCHEM, INCORPORATED FOR STORM DRAIN AND INCIDENTAL PURPOSES IN THE DOCUMENT RECORDED OCTOBER 4, 1973 AS INSTRUMENT NO. 1901, O.R. UNABLE TO DETERMINE EXACT LOCATION.

(K) EASEMENT TO SOUTHERN PACIFIC TRANSPORTATION COMPANY FOR OPERATING AND MAINTAINING A DRAINAGE PUMPING PLANT AND INCIDENTAL PURPOSES IN THE DOCUMENT RECORDED JANUARY 7, 1974 AS INSTRUMENT NO. 1730, O.R. DOES NOT AFFECT SUBJECT PROPERTY.

(L) EASEMENT WITH PRIOR RIGHT, UPON, OVER AND ACROSS THAT PORTION OF LOT 14 IN SAID SUBDIVISION NO. 2, AZUSA LAND AND WATER COMPANY, ACQUIRED BY THE STATE OF CALIFORNIA BY SAID PARCEL 1B OF SAID FINAL DECREE OF CONDEMNATION, AS PROVIDED IN THE DIRECTOR'S DEED RECORDED JANUARY 7, 1974 AS INSTRUMENT NO. 1730, O.R. DOES NOT AFFECT SUBJECT PROPERTY.

(M) THE FACT THAT THE LAND LIES WITHIN THE BOUNDARIES OF THE IRWINDALE CITY INDUSTRIAL REDEVELOPMENT PROJECT AREA, AS DISCLOSED BY THE DOCUMENT RECORDED AUGUST 6, 1976 AS INSTRUMENT NO. 5641, O.R. BLANKET IN NATURE.

(N) EASEMENT TO MILLER BREWING COMPANY FOR PUBLIC HIGHWAY AND STREET AND INCIDENTAL PURPOSES IN THE DOCUMENT RECORDED MARCH 17 1978 AS INSTRUMENT NO. 78–284922, O.R. DOES NOT AFFECT SUBJECT PROPERTY.

(O) COVENANTS CONDITIONS, RESTRICTIONS AND EASEMENTS RECORDED FEBRUARY 26, 1985 AS INSTRUMENT NO. 85–213955, O.R. BLANKET IN NATURE.

(P) INGRESS AND EGRESS EASEMENTS AGREEMENT TO MILLERCOORS, LLC RECORDED DECEMBER 31, 2014 AS INSTRUMENT NO. 20141430217, O.R. DOES NOT AFFECT SUBJECT PROPERTY.

SEMI-ANNUAL GROUNDWATER MONITORING REPORT

April 2012 Sampling Event
Veolia ES Technical Services - Azusa Facility
Azusa, California

Shaw Project No. 143888

June 30, 2012

Prepared for:

VEOLIA
ENVIRONMENTAL SERVICES
107 South Motor Avenue
Azusa, California 91702

Prepared by:

Shaw® a world of Solutions™
Shaw Environmental, Inc.
4 Park Plaza, Suite 600
Irvine, California 92614

1.1 Regulatory and Groundwater History

The groundwater under the facility is designated as part of the larger contaminant plume identified as the Baldwin Park Operable Unit (BPOU). The Veolia facility is located in the vicinity of the northeast edge of the BPOU groundwater plume, downgradient from an apparent contaminant source or sources.

On December 28, 1999, the CRWQCB Los Angeles Region issued a CAO directing Veolia, then Onyx, to monitor groundwater beneath the facility for VOCs and the emergent chemicals perchlorate, 1,4-dioxane (dioxane), and n-nitrosodimethylamine (NDMA) (CRWQCB, 1999). The original CAO was rescinded and reissued on July 13, 2000. The previously known contaminants within the BPOU plume were VOCs; however, emergent chemicals were subsequently recognized as a concern. In response to the general discovery of the emergent chemicals, the CRWQCB required Onyx and other selected potentially responsible parties (PRPs) identified by the U.S. Environmental Protection Agency (EPA) as being within the BPOU to investigate possible contributions of the emergent chemicals from their sites to groundwater (if any). In April 2000, Onyx submitted a draft groundwater monitoring plan (IT Corporation [IT], 2000) to the CRWQCB, proposing two consecutive quarterly monitoring events at Onyx. The groundwater monitoring plan was approved by the CRWQCB on April 18, 2000.

Groundwater sampling was conducted during April and June 2000. A report of the results was prepared and submitted to the CRWQCB using the data collected during the 2000 sampling events and during three previous events in August 1998, February 1999, and August 1999 (IT, 2001). The report indicated that higher concentrations of the target constituents were detected in groundwater samples from off-site, upgradient monitoring wells, and that concentrations of constituents detected in groundwater at the site were essentially the same in upgradient and downgradient monitoring wells. The report concluded that constituents detected in groundwater under the site were consistent with the presence of the regional plume and did not indicate that Onyx was contributing to the degradation of groundwater quality at that time. This sampling completed the requirements of CAO No. 99-125R. Additional groundwater sampling was conducted during May 2001 by Onyx.

A letter dated October 11, 2001, was received by Onyx from the CRWQCB requiring a supplemental work plan, two additional groundwater sampling events, and a semiannual report documenting the results of the sampling. The letter set a schedule for the first groundwater sampling event to be completed by November 7, 2001; the second sampling event to be completed by January 30, 2002; and the semiannual report to be submitted by March 25, 2002. In response, a supplemental groundwater sampling plan was submitted to the CRWQCB (IT, 2002). The first sampling event was completed by November 6, 2001, and the second

sampling event was completed by January 29, 2002. A groundwater report, issued March 2002, summarized the results from the two quarterly monitoring events and concluded that there had been no change since the previous sampling efforts (IT, 2002).

The CRWQCB responded in September 2002 with a letter requiring Onyx to perform additional groundwater sampling and an investigation of the vadose zone for emerging chemicals. Onyx responded with a request for a meeting witb the CRWQCB to discuss the requirements, and suspension of the requirements until the issue was resolved. In the meeting on January 21, 2003, it was decided that the requirements would be suspended until the issue could be evaluated. In support of tbis evaluation, Onyx submitted a technical memorandum in May 2003 requesting abrogation of the vadose zone investigation requirement and the groundwater sampling requirement. Simultaneously, a groundwater sampling event was conducted on May 6, 2003, and the results reported to the CRWQCB on June 27, 2003.

A response to the technical memorandum to abrogate these requirements, dated August 22, 2003, indicated that vadose zone sampling for 1,4-dioxane and perchlorate and groundwater sampling for VOCs, NDMA, 1,4-dioxane, and perchlorate would be required. The basis for the required soil sampling was that, although no records indicated use of perchlorate at the site, there was suspicion that 1,4-dioxane may have been a minor component of the solvents handled at Onyx. The required soil sampling would provide evidence to support the claim that these compounds were not at the site.

In response to the August 22, 2003 letter, a sampling plan to conduct the shallow soils sampling for the emerging chemicals 1,4-dioxane and perchlorate was submitted on September 22, 2003, amended on October 11, 2003, and amended again on November 3, 2003. Soil sampling was implemented on December 2, 2003, and the samples were submitted for analyses of 1,4-dioxane and perchlorate. The results of the investigation were reported December 19, 2003, indicating that 1,4-dioxane and perchlorate were not detected in the vadose zone.

Groundwater sampling, conducted in compliance with CAO 99-125R, was performed from April 6 through April 9, 2004. The results were reported to the CRWQCB (Shaw, 2004b), indicating that VOC and emerging chemical constituents detected in groundwater were consistent with impacts from an off-site upgradient source. Additionally, soil and groundwater results indicated that Onyx was not a source of emerging chemical compounds.

In a letter dated May 6, 2004, CRWQCB modified the groundwater sampling requirements for the Onyx Azusa facility to include only VOCs analysis. Sample collection dates were specified for October 2004 and April 2005; however, increase depth to groundwater made collection of groundwater samples from the existing wells impossible for the October 2004 semi-annual sampling event. CRWQCB was notified of the groundwater level issue in a letter dated

October 6, 2004, which included a request to change the sampling schedule to align with times more likely to have groundwater levels sufficient for sampling. As part of the proposed change, groundwater levels were monitored to evaluate when groundwater sampling might be conducted.

Groundwater levels rebounded sufficiently to conduct planned cleaning of the monitoring wells MW-03, MW-04, and MW-05 on March 9 and 10, 2005, and groundwater sampling on March 29 and March 30, 2005. Results from the March 2005 groundwater level measurements indicated that groundwater flow directions and gradients reflected influence from the surrounding surface water basins recently filled with run-on from unusual amounts of precipitation in the area, causing multiple flow directions across the site, ultimately discharging toward the southeast. Evaluation of analyses of groundwater samples continued to indicate an upgradient off-site source.

The depth to groundwater, measured on September 28, 2005, had begun to increase, and groundwater flow direction was once more toward the west southwest. The depth to groundwater continued to increase through 2006 to March 2008. The analysis of September 2005 groundwater samples, and groundwater elevations, indicate that groundwater continued to be impacted by an off-site up-gradient source. Groundwater elevations in September 2008 through March 2010 continued to be below the bottom of the well screen intervals and consequently no samples could be collected. The depth to groundwater rebounded in June 2010 and then started to fall again to levels encountered in September 2010, with groundwater flow toward the west southwest at a gradient of 0.002 ft/ft. Groundwater levels increased in March 2011 and again in September 2011, when groundwater flow direction shifted temporarily toward the southeast. The more westerly flow returned in April 2011, similarly to that observed previously during times of declining groundwater levels following a seasonal high. The distribution of groundwater impacts in April 2012 is consistent with the main BPOU plume toward the east.

1.2 Scope of Work

Groundwater sampling was conducted in accordance with the groundwater monitoring plan. The scope of work included the following elements:

- Collect depth to groundwater measurements from the existing monitoring wells
- Collect and analyze groundwater samples from the existing monitoring wells
- Conduct laboratory analysis of groundwater samples for VOCs
- Evaluate groundwater elevations and analytical data
- Prepare a monitoring report

2.0 Background

The Veolia - Azusa, California facility provides recycling services for various manufacturing and waste-generating industries in California and other nearby states. Spent recyclable wastes arrive at the site (Figure 1) in containerized or bulk form and are unloaded at a drum storage area or into bulk waste storage/treatment tanks, respectively. Reusable products are reclaimed by means of settling, physical separation, distillation/thin film evaporation, and dewatering activities that produce aqueous and sludge waste byproducts. Recycled materials are sold or exchanged for reuse. Non-recyclable wastes and wastes generated by recycling activities are shipped off site under manifest for use as supplemental fuels, for destructive incineration, or for disposal by other means. A facility site plan is presented in Figure 2.

2.1 Site Location and Description

The Veolia facility is located at 1704 West First Street in Azusa, California. The site lies within the boundaries of the City of Azusa, less than 1 mile from the Foothill Freeway (U.S. Interstate 210) and approximately 20 miles northeast of downtown Los Angeles (Figure 1). The primary approach to the facility is from the Foothill Freeway, south on Irwindale Avenue and west on West First Street. The main facility access gate/visitor entrance is located on the south side of West First Street.

2.2 Physiography and Topography

The Veolia facility is located in the center of the San Gabriel Valley in eastern Los Angeles County. The valley is a large sedimentary basin, the San Gabriel Basin, and is bounded on the north by the San Gabriel Mountains and on the southeast and southwest by the Repetto, Merced, Puente, and San Jose Hills.

The former Onyx facility is situated in an area that slopes from the northeast to the southwest, with elevations ranging from 527.4 to 514.7 feet above mean sea level (msl). The surface of the facility is paved and smooth. Surface drainage from the site flows into the Santa Fe Flood Control Basin to the south-southwest, which forms a physical impoundment for surface-water flows in the San Gabriel River, as well as for local storm-water runoff.

2.3 Geology and Hydrogeology

The sediments within the San Gabriel Basin consist of older alluvial debris and coalescing alluvial fans. In the center of the valley, these sediments are covered with recent alluvium. In the Irwindale area, in which Veolia-Azusa facility is situated, continued deposition from the San Gabriel River, during avulsion, has incised and covered the older alluvial deposits and large Holocene alluvial fan deposits and debris flows. Typical of this depositional setting, grain sizes

range from silt to boulders more than 14 feet in diameter. Because Holocene sediments in the Irwindale area have not been significantly weathered, clay material is not present or, at least, is less abundant (California Department of Water Resources, 1966).

Groundwater in the San Gabriel Basin generally flows from the edges of the basin toward the center, discharging toward the southwest through the Whittier Narrows. The San Gabriel Basin aquifer is reported to be unconfined, although localized areas are semi-confined. Calculated groundwater flow velocity was reported to be from 100 to more than 1,000 feet per year (ft/yr) (CH2M HILL, 1988), albeit much higher velocities have been reported.

The Veolia site is underlain by weakly stratified sandy gravel and gravely sands interbedded with occasional thin beds of fine-grained sand, silt, and clay. The gravels commonly contain a matrix of various grades of sand, and, less commonly, silty or clayey materials. Cobbles and boulders, as large as 14 feet in diameter, are commonly encountered from the ground surface to more than 300 feet below ground surface. A zone of sandier material is present in the 50- to 80-foot depth interval. Below a depth of approximately 200 feet, traces to moderate amounts of clay are more likely to be found in the matrix of some gravels.

Data collected from the five groundwater monitoring wells at the site indicate that the depth to the water table ranges seasonally from 230 feet to over 300 feet below ground surface. The direction of groundwater flow has been reported to vary from southeast to due west; however, the predominant flow direction observed during the sampling events conducted from August 1998 to the present was toward the southwest. Features such as the water recharge basin west of the site, the San Gabriel River, and the nearby recharge zone along the foot of the San Gabriel Mountains are possible factors influencing groundwater flow direction in the area of the Veolia facility. At a nearby site, others have calculated the average linear velocity of groundwater to be between 514 and 734 feet per year (ft/yr) (Meredith/Boli & Associates, Inc. [M/B&A], 1993a). Estimated average linear velocity for the site, using specific capacity data collected from wells MW-03, MW-04, and MW-05 during redevelopment, is in excess of 1,000 ft/yr.

2.4 Summary of Previous Site Investigations

Volatile organic compound (VOC) contamination in groundwater was first detected in the San Gabriel Basin in 1979. Groundwater investigations conducted since that time have revealed widespread VOC contamination covering a total area of approximately 65 square miles. Available evidence suggests that the contamination is the cumulative result of waste-handling practices of numerous industrial/commercial facilities located throughout the San Gabriel Valley (California Environmental Protection Agency [Cal/EPA], 1992).

The Veolia facility in Azusa, California, processes wastes for recycling, as described earlier in Section 2. The facility is also involved in dispatching tank transports by truck and rail to and

from the site for treatment and for storage of wastes and products on site. Some constituents of these products have been identified in soil and groundwater beneath the site. A map showing the facility plan and the sample locations is provided as Figure 2.

Results of sample analyses of soil, soil vapor, and groundwater at the site are documented in a Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) report (M/B&A, 1993b), and in the RFI Addendum (Shaw, 2008). Groundwater monitoring has been conducted periodically since 1992 and data were submitted in separate reports to the regulating agencies.

Earlier reports (M/B&A, 1993a and 1991) detailed the results of the RFI groundwater investigation (Phase IIIa) and deep soil sampling program (Phase IIb), respectively. It was concluded that all major sources of contaminants at Veolia had been identified, but that data were insufficient to determine whether Veolia contributed to groundwater contamination. Analyses of vapor samples from three of seven vapor probes (B-2/B-2R, B-3, and B-5) indicated that VOCs were not present or in very low concentrations (M/B&A, 1991). Analyses indicated the VOCs were present in deep soil vapor samples from the 170- and 190-foot sample intervals in the four other vapor probes (B-1, B-4, B-6, and B-8/B-8R).

A subsurface VOC migration study report (M/B&A, 1994) was prepared to interpret the soil vapor concentrations measured during the RFI deep soil sampling program (Phase IIb). The migration study acknowledged the difficulty of obtaining undisturbed soil samples in a soil matrix of boulders and cobbles. Use of soil vapor samples to compute VOC concentrations in soil was thought to be more representative, although the drilling method used at the time of the investigation was conducive to neither collecting undisturbed samples nor drilling wells deeper than 200 feet below ground surface.

Groundwater monitoring has been conducted at Veolia since 1992. Well construction information for these wells is presented in Table 1. Six VOCs were identified in groundwater at the site: methylene chloride, tetrachloroethene (PCE), trichloroethene (TCE), 1,1,1-trichloroethane (TCA), 1,1-dichloroethene (DCE), and 1,2-dichloroethane (DCA). Three groundwater sampling events (August 1998, February 1999, and August 1999) were conducted prior to the recent monitoring in response to the CRWQCB request for monitoring of emergent chemicals (methyl tert-butyl ether [MTBE], NDMA, 1,4-dioxane, and perchlorate).

Emerging chemicals were not detected in the initial sampling conducted in August 1998. NDMA was detected in upgradient well MW-01 (0.099 µg/L) during sampling in February 1999 and in upgradient well MW-02 (0.022 µg/L) during sampling in August 1999. Dioxane was detected in wells MW-02, MW-03, MW-04, and MW-05 during the February 1999 round of sampling. A maximum dioxane concentration of 69 µg/L was reported in the sample from MW-

04; however, this result appears to be an outlier in that dioxane has never been detected at such an elevated concentration prior to or since in any well at Veolia. These results are discussed further in the previous groundwater monitoring reports (IT, 2001 and 2002). Dioxane was also detected at concentrations below laboratory reporting levels in wells MW-02, MW-04, and MW-05 during sampling in August 1999; the highest concentrations were detected in well MW-05 at 2.4 J and 2.2 J µg/L. Perchlorate was detected only in upgradient well MW-02 (64 µg/L) and downgradient well MW-05 (22 and 23 µg/L) during the August 1999 sampling event.

Groundwater samples were collected under the CAO (99-125R) at the Veolia facility in eighteen sampling events: April 2000, June 2000, May 2001, November 2001, January 2002, May 2003, October 2003, April 2004, March 2005, September 2005, March 2006, September 2006, March 2007, September 2007, March 2008, September 2010, March 2011, September 2011 and this current April 2012 sampling event. Groundwater samples were analyzed for VOCs and emerging chemicals until October 2003, when Veolia (then Onyx) was released from that requirement by the CRWQCB. Groundwater quality varied slightly between sampling events, showing a slight decrease in overall detected concentrations from April 2000 to June 2000 to January 2002. Groundwater levels had declined during the May 2003 sampling event, to a point where it was possible to collect groundwater samples only from well MW-01 and MW-02, which have deeper screened intervals. Groundwater sample collection was resumed in October 2003, when groundwater levels had risen sufficiently, but was suspended again in October 2004, when drought conditions caused another decline in groundwater levels. Groundwater levels recovered in March 2005, and remained relatively consistent through March 2006. Groundwater levels declined steadily from September 2006 through the end of 2009, and finally began to recover in June 2010. Because of the unusually low groundwater levels no samples were collected during the period of time from September 2008 through March 2010.

PCE concentrations measured during the CAO sampling from April 2000 to March 2008 ranged from a maximum of 280 µg/L in the up-gradient wells MW-01 (April 2004) and MW-02 (March 2005), to a minimum of 1.3 µg/L in September 2006, in cross-gradient well MW-03. An exception to this trend was a maximum PCE concentration detected in down-gradient well MW-05 in March 2005 of 400 µg/L; however, since that event concentrations have declined in all wells. Similarly, TCE concentrations ranged from a maximum concentration of 260 µg/L in April 2001, in upgradient well MW-01; however, all TCE concentrations have declined steadily since March 2005. The decreases in concentrations parallel groundwater level movements through a zone approximately between 214 and 216 feet elevation, described in this report and previous groundwater monitoring reports for this site, and are consistent with an upgradient off-site source.

4.0 Evaluation of Groundwater Conditions

This report is focused on analytical and measured results from the April 2012 groundwater sampling event; however, groundwater data reported in the previous groundwater monitoring reports were also used to evaluate groundwater conditions. April 2012 sampling event analytical results are listed in Table 3. The selected historical groundwater sampling results are summarized in Figure 4 and Table 4. PCE and TCE concentrations detected in groundwater are plotted on Figure 5. PCE and TCE are the only VOC constituents detected and PCE is approximately 80% of the mass, consequently Total VOC iso-concentration contours, plotted on Figure 5, largely mirror PCE concentrations.

4.1 Groundwater Elevations and Flow Direction

Groundwater elevations on April 16, 2012 ranged from 236.35 feet above msl in well MW-02 to 235.61 feet above msl in well MW-04. Groundwater flow direction was mapped toward the west south west. Groundwater elevations are recorded in Table 2, and groundwater contours and flow direction are mapped in Figure 3.

Groundwater elevations declined during the April 2012 by approximately 14 feet from groundwater levels measured in September 2011, decreasing from approximately 249.8-feet above msl in September 2011, to approximately 235.9 feet above msl in April 2012. Hydrographs presented in Appendix B show groundwater elevation fluctuation from 1992 through April 2012.

Groundwater flow direction is toward the west southwest, S 75° W, Figure 3, at a mapped average gradient of 0.001 foot/foot, similar to what has been observed over several years. MW-02 is the most upgradient well at the site, and monitoring well MW-04 is the most downgradient well at the site (Figure 3). The groundwater flow direction and the average gradient are within the variation in historical flow directions and gradients measured at the site and represent conditions most often observed at the site during dry seasons.

Hydrographs of the water levels measured in the site monitoring wells indicate that historic groundwater levels have fluctuated through an apparent smear zone extending from about 215 to 245 feet elevation. These hydrographs suggest current water levels are in that zone, and consistent with this observation PCE concentrations appear to be increasing, similar to those changes observed in the past.

4.2 Groundwater Analytical Results

Tetrachloroethene (PCE), and Tricholorethene (TCE) were the only VOC analytes detected in the both the last September 2011 and current April 2012 groundwater samples from Azusa site.

PCE was detected in samples from all five wells, MW-01 through MW-05, but was at concentrations above the Maximum Contaminant Level [(MCL) 5 µg/L] only in the sample collected from wells MW-02 (40 µg/L) and MW-5 (24 µg/L). PCE concentrations in groundwater samples ranged from 0.93 µg/L (sample #2012005, from well MW-03) to the maximum detected concentration 40 µg/L (sample #2012001 from well MW-02) as shown in Table 3.

TCE was also detected in samples from monitoring wells MW-01, MW-02, and MW-05 but was not above the MCL (5 µg/L) in any sample analyzed. TCE concentrations in groundwater samples ranged from 0.91 µg/L (sample #2012002, from well MW-01) to the maximum detected concentration of 2.8 µg/L (sample #2012001 from well MW-02) as shown in Table 3.

Variance between analytical results was calculated by comparing total VOC results reported for samples 2012003 and 2012002, duplicate samples collected from well MW-01. Variance was calculated to be less than 20%, which is acceptable for VOC analyses and the low concentrations reported.

The analytes PCE and TCE together comprise approximately 100 percent of the VOC mass detected, and PCE alone comprised between 79 to 100 percent of the detected mass. The distribution of PCE and TCE in groundwater, April 2012, is shown on Figure 5 along with the isoconcentration plot of Total VOC.

Concentrations of PCE presented in the Hydrographs, Appendix B, indicate that the concentration have been declining through time, as evidenced by the trend lines shown on the hydrographs, and the concentration fluctuations are small and appear to be consistent with the overall trend previously observed during rising or declining groundwater elevations.

4.3 Summary Discussion

PCE and TCE have been consistently detected constituents in the groundwater beneath the Azusa facility and were detected at low concentrations in groundwater during April 2012 sampling event (Figure 4 and 5, and Table 4). PCE was found above the MCL (5 µg/L) in the samples from wells MW-02 and MW-05, at a relatively low concentrations of 40 and 24 µg/L respectively µg/L. These concentrations have fluctuated, declining in concentration through time, and are consistent with previously observed data in similar conditions where water levels fluctuate in elevation within the smear zone.

The detected concentrations are within the range of previously observed post vadose-zone remediation groundwater concentrations (Figure 4 and Table 4), and are consistent with the observed increases in PCE concentrations that occur with groundwater elevation fluctuations (Hydrographs, Appendix B).

The isoconcentration gradient increases toward the east (Figure 5), consistent with Veolia-Azusa facility location on the northwest edge of the larger BPOU plume. This relationship to the regional plume has been observed and reported in previous groundwater monitoring reports for the site, conducted under CAO 99-125R.

5.0 Discussion and Recommendations

Groundwater levels measured in April 2012 at the Veolia-Azusa facility have declined since September 2011. Groundwater flow direction is toward the west southwest and the observed average gradient is 0.001 foot/foot.

VOC concentrations detected in groundwater samples collected at the Veolia-Azusa site increase toward the east/northeast across the site, consistent with the Veolia-Azusa facility location on the northwest edge of the larger BPOU plume. PCE and TCE were the only analytes detected in groundwater. TCE was detected in three sample locations with a maximum detected concentration of 2.8 µg/L. PCE was detected in all five wells but only two wells had concentration greater than its MCL. Concentrations of the target constituents vary historically with variation in groundwater levels and currently appear to be consistent with previously observed concentrations during periods of changing groundwater elevations.

The simplest generalization about groundwater quality at the site during April 2012 sampling event is that VOC groundwater concentrations for detected analytes were observed to be consistent with the low-range concentrations previously observed at the site. A preponderance of evidence indicates that the VOC chemicals in groundwater are from an off-site up-gradient source.
