1.0 EXECUTIVE SUMMARY

This report documents the findings, opinions and conclusions of a Phase I Environmental Site Assessment (ESA). The Site consists of four (4) parcels located south and west of the intersection of the 210 freeway and Irwindale Avenue, Irwindale, California 91706. The Los Angeles County Assessors website and the Client provided maps (Appendix D) describe the Site as the following APN's:

- ***8533-009-026***, POR OF LOTS 9 AND 13
- ***8533-009-027***, POR OF LOTS 2 AND 3
- ***8533-009-028***, LOT 1 AND POR OF LOTS 2 AND 3
- ***8533-009-029***, POR OF LOTS 8 & 9

The main objective of the ESA was to identify the presence or likely presence, use, or release on the Property of hazardous substances or petroleum products as defined in ASTM Practice E1527-21 as a ***recognized environmental condition***.

The Site consists of approximately 150.1 +/- acres of flat land with two large excavated fallow sand and gravel quarries. Access to the Site is 1st Street. The area is dominated by heavy industrial facilities (primarily Pabst brewery, Santa Fe Dam and basin, the 210 freeway and light industrial operations.

Currently, the Site is a support facility for Pabst brewery, access roads, and two (2) fallow sand and gravel quarries, landscaping and some vacant land. Current uses of the nearby properties were observed to be as follows:

North – BNSF (formerly Atchison, Topeka and Santa Fe Railroad) easement, 210 freeway.

South – 1st Street is present. Numerous light industrial, food processing, etc. plants are south of the southern railroad spur

East - Pabst brewery (offsite) is present in the northern half of the site. Irwindale Avenue is present in the southern half of the site.

West – Santa Fe Flood Control Basin is west of the site and is delineated by multiple chain-link fences.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the federal and state agency databases are considered to represent a likely past, present or material threat of release on the Property. Orphan sites were also reviewed but none were identified.

ANACAPA reviewed available aerial photographs of the Property and surrounding areas. Available photographs ranged from 1928 to 2020. The aerial photograph review identified past uses which indicate no recognized environmental conditions at the Site or in the surrounding area.

Anacapa Geoservices performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E 1527-21 and the requirements of our consulting agreement with the Client concerning the subject Property.

The following recognized environmental condition was identified by ANACAPA:

- An older railroad alignment associated with historical rail use is present on site. Rail corridors of this age may have involved activities such as equipment maintenance, fueling, material storage, and right-of-way maintenance, which in some cases have the potential to result in localized soil impacts.

The following non-ASTM environmental conditions were identified by ANACAPA:

- Sparse debris and trash are evident and more will be discoverable during clearing, grubbing, and future operations;
- Unlabeled 55-gallon drums whose contents could not be determined at the time of inspection, and no evidence of leakage or staining was observed.
- The two quarries are slated for reclamation and this effort will require source material, qualified contractors, permitting, oversight and associated costs from RWQCB, Los Angeles County, and the City of Irwindale, (NOTE: currently there are restrictions from the City on scheduling); and
- Water supply for filling the quarries is an issue of major concern. Monitoring wells will be required by the terms of the State permits.

ANACAPA identified no other recognized environmental conditions or other non-ASTM issues associated with the Site.

Based on information collected from the ESA, Anacapa Geoservices recommends the following:

- Depending on the schedule, contact the appropriate agencies regarding plans for the Inert Debris Engineered Fill Operations;
- Legally dispose of the contents of the Hazardous materials storage area; and
- Conduct the required Asbestos Containing Material survey, as appropriate.

Limitations

Anacapa Geoservices prepared this Phase I Environmental Site Assessment using reasonable efforts to identify recognized environmental conditions associated with hazardous substances or petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

This report is not definitive and should not be assumed to be a complete or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions implied by surface observations or historical sources and can be most reliably evaluated through intrusive techniques that were beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes. Anacapa Geoservices makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, Anacapa Geoservices is not responsible for

consequences or conditions arising from facts that were not fully disclosed to Anacapa Geoservices during the assessment and were not otherwise reasonably discernable by Anacapa Geoservices.

An independent data research company provided the government agency database referenced in this report. Surrounding area properties were listed within specific approximate minimum search distances intended to meet the requirements of ASTM Practice E 1527-21. The information in the government agency database was assumed to be correct and complete unless contradicted by Anacapa Geoservices' observations or other credible referenced sources reviewed during the assessment.

Reasonable efforts were made to identify evidence of aboveground and underground storage tanks and ancillary equipment on the Property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These methods may not identify subsurface equipment or evidence hidden from view by things such as, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations based on findings that are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors generally considered inherent in performing an ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report.

Anacapa Geoservices is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the Property in this report, represent a comprehensive definition or precise delineation of Property ownership or boundaries.

This report is for the use and benefit of, and may be relied upon by the Client and its direct affiliates, as well as its lenders, assigns, designees, including the future lessee, as appropriate. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt and/or debt or other securities.

Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the Property that were not discovered within the authorized scope of the assessment.

Anacapa Geoservices makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied. Unless otherwise agreed upon in writing by Anacapa Geoservices and a third party, Anacapa Geoservices liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a maximum of our project fee.

2.0 INTRODUCTION

This report documents the findings, opinions and conclusions of a Phase I Environmental Site Assessment (ESA) of approximately 150 acres of mined and lightly developed land (APN # 8533-009-026 through -029, Irwindale, California 91706.

2.1 Purpose

The purpose of this Phase I Environmental Site Assessment is to identify recognized environmental conditions in connection with the subject Property. The term 'recognized environmental conditions', as defined in ASTM Standard Practice E1527-21, means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, past release or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, groundwater or surface water of the Property. The term includes hazardous substances or petroleum products even under conditions in compliance with environmental laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. This assessment has been performed in a manner which complies with the requirements of the most recently revised version of ASTM Standard Practice E 1527-21.

2.2 Scope

This ESA was conducted in accordance with the ASTM Standard Practice E1527-21, consistent with a level of care and skill ordinarily practiced by the consulting profession currently providing similar services under similar circumstances. We also evaluated potential environmental conditions outside the scope of ASTM Practice E1527-21 in connection with the Property. Those items outside the scope of ASTM E1527-21 include, but are not limited to, asbestos, PFAS, lead-containing paint, mold, drinking water quality, flood zone status, wetlands status, and radon gas.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The Site consists of four (4) parcels located south and west of the intersection of the 210 freeway and Irwindale Avenue, Irwindale, California 91706. The Los Angeles County Assessors website and the Client provided maps (Appendix D) describe the Site as the following APN's:

- ***8533-009-026***, POR OF LOTS 9 AND 13
- ***8533-009-027***, POR OF LOTS 2 AND 3
- ***8533-009-028***, LOT 1 AND POR OF LOTS 2 AND 3; and
- ***8533-009-029***, POR OF LOTS 8 & 9

The total site is bounded by the Santa Fe Flood Control Basin (west), BNSF Railroad (north), Irwindale Avenue (east) and 1st Street (south). A Site Vicinity Map, the Assessor's Parcel Map, a recent aerial photograph, and Site Photographs are provided in Appendix A.

3.2 Site and Vicinity Characteristics

The Site consists of approximately 149.61 +/- acres of flat land with two large excavated fallow sand and gravel quarries. Access to the Site is on 1st Street. The area is dominated by heavy industrial facilities (primarily Pabst brewery, Santa Fe Dam and basin, the 210 freeway and light industrial operations.

Currently, the Site is a support facility for Pabst brewery, access roads, and two (2) fallow sand and gravel quarries, landscaping and some vacant land.

3.4 Environmental Liens

No environmental liens or similar concerns were noted in any of the client provided documents. EDR's lien search (Appendix D) indicates that the lot lines were adjusted from the IBY Property Owner, LLC to IBY Property Owner, LLC in February 2023. No Activity Use Limitations (AUL) were indicated for any of the four parcels.

3.5 Current Uses of Property

The Property consists of reclaimed former quarry land and vacant land, related access roads, security, hazardous materials storage area, solar farm and landscaped future properties. (See Appendix A – Photographs 1-12). Current uses of the nearby properties were observed to be as follows:

North – BNSF (formerly Atchison, Topeka and Santa Fe Railroad) easement, 210 freeway.

South – 1st Street is present. Numerous light industrial, food processing, etc. plants are south of the southern railroad spur

East - Pabst brewery (offsite) is present in the northern half of the site. Irwindale Avenue is present in the southern half of the site.

West – Santa Fe Flood Control Basin is west of the site and is delineated by multiple chain-link fences.

3.6 Site Plan

A recent aerial photograph is included in Appendix A.

4.0 SITE RECONNAISSANCE

Gregory Millikan, Anacapa principal geologist, conducted the site reconnaissance visit on 26 September 2023. The site reconnaissance consisted of visual and/or physical observations of: the Property and improvements; adjoining sites as viewed from the Property; and the surrounding area based on visual observations made during the trip to and from the Property. Unimproved portions of the Property (if any) were observed along the perimeter and in a general random (east to west) pattern, based on accessibility. Building exteriors (if any) were observed along the perimeter from the ground, unless described otherwise. Building interiors (if any) were observed, as they were made safely accessible, unless described otherwise. The following is a summary of visual and/or physical observations of the Property on the day of the site visit. Weather was clear. The reconnaissance visit was accompanied by P. Bruttig to facilitate access. Photographs from the reconnaissance visit are included as Appendix A.

4.1 Interior and Exterior Observations

4.1.1 Interior Observations

There are no fixed structures at the Site, except the security facility. Access to the interior of security was not feasible. What was observable was very well maintained. This does not represent a data gap. The remining temporary structures are slated for removal.

4.1.2 Exterior Observations

The entire Site consists of open land currently being used as a support area adjoining a fallow sand and gravel quarry with associated access roads and some supporting temporary buildings. The Site is generally very well maintained for a site zoned for heavy manufacturing. Sparse amounts of discarded trash and also windblown trash (paper cups, plastic, etc.) were also observed especially along the bordering chain-link fences.

4.2 Hazardous Substances on Premises

Other than fuels in vehicles, ANACAPA observed no storage of hazardous substances on the Property. The hazardous materials storage area is well maintained and secure. Contents of the storage area included discarded fluorescent lamps, a few 17H and 17EH 55-gallon drums (labelled), and no evidence of spills or leaks.

4.3 Hazardous Substance Handling and Storage

ANACAPA observed no handling of hazardous and non-hazardous substances and there were no workers present throughout the site during the reconnaissance visit. No hazardous or non-hazardous substances were observed to be improperly used, staged or disposed.

4.4 Storage Tanks

ANACAPA observed no evidence of a storage tank (aboveground or underground) on the Property. The database search indicates that aboveground storage tanks were permitted for use, but that is an offsite find and is not relevant.

4.5 Polychlorinated Biphenyls (PCBs)

ANACAPA observed no evidence of the use, storage, or disposal of PCB-containing transformers, lifts, or other equipment on the properties. Note there are active power lines along Irwindale Avenue. No pole-mounted transformers were observed.

4.6 Solid Waste Disposal

ANACAPA observed that there are organized locations for disposal of solid waste. These waste bins are collected on a frequent basis and the contents are legally disposed at an offsite location. Small amounts of trash and discarded other wind-blown debris is present throughout the site, especially along fence lines. The hazardous waste storage area is fenced, videoed, locked and labeled. This area is very well maintained.

4.7 Physical Setting Analysis

No evidence exists to suggest that any issues of significant environmental concern exist in the vicinity of the Site. ANACAPA observed no evidence of stained or odorous soil.

4.8 Other Conditions of Potential Concern

- ANACAPA observed an older railroad alignment associated with historical rail use. Rail corridors of this age may have involved activities such as equipment maintenance, fueling, material storage, and right-of-way maintenance, which in some cases have the potential to result in localized soil impacts.
- ANACAPA observed no evidence of sumps, waste pits, ponds, lagoons, or septic systems on the Property. We conclude that storm water exits the Site by percolation into the unpaved portions of the site, by evaporation and by limited curb and gutter;
- ANACAPA observed unlabeled 55-gallon drums. The contents could not be determined at the time of inspection, and no evidence of leakage or staining was observed.
- According to the State of California Radon database (California, 2016) Zip Code 91706 has a very low propensity for elevated concentrations of radon gas;
- The open excavations pose a potential physical risk, however they are fenced, gated and observed by security;

- Vapor Intrusion does not appear to threaten the Site based on the review of the EDR data vapor intrusion methodology.
- The client requested information regarding PFAS. NO evidence of PFAS were noted during this project. This emerging contaminant is described at the following link Per- and Polyfluoroalkyl Substances (PFAS) | US EPA

Therefore, as noted above, ANACAPA observed no other conditions of potential concern.

5.0 PUBLIC RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by Environmental Data Resources of Southport, Connecticut, was reviewed for information regarding reported releases of hazardous substances and petroleum products on or near the Property. Anacapa also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the Property based on the partial street address, city, or zip code. Any unmappable site that was identified by Anacapa as a being within the approximate minimum search distance from the Property based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section.

The following is a summary of the findings of the database review:

SUMMARY OF FEDERAL & STATE AGENCY DATABASE FINDINGS

5.1.1 Federal Agency Database Findings

The following listing(s) with a known or significant potential for release and impact on the Property was identified in the federal agency databases researched:

- None. Note that the Baldwin Park Operable Unit (BPOU) is under oversight by the federal government and the project site is not included as a responsible party

See Appendix B for details on the Federal database search.

5.1.2 State Agency Database Findings

The following listing(s) with a known or significant potential for release and impact on the Property was identified in the state agency databases researched:

- None.

See Appendix B for details on the State database search.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the sites listed in the federal and state agency databases are considered to represent a likely past, present or material threat of release on the Property. Orphan sites were also reviewed but none were identified.

5.1.3 Local Environmental Records Sources

ANACAPA contacted the records sources for the City of Irwindale, the County of Los Angeles, and the Regional Water Quality Control Board (RWQCB). No agencies indicated any environmental concerns.

6.0 HISTORICAL USE ANALYSIS

6.1 Past Uses

6.1.1 Aerial Photographs

ANACAPA reviewed available aerial photographs of the Property and surrounding areas provided by EDR. The aerial photograph review identified no past uses indicating recognized environmental conditions at the Site and in the surrounding area. Copies of the aerial photographs are included in Appendix C. The following are descriptions and interpretations from the aerial photograph review.

AERIAL PHOTOGRAPH SUMMARY		
Year	Scale	Comments

Railroad spurs, AT&SF railroad, 210 fwy north of RR. Increased industrial development in area of 1st Street., Large quarry north of the 210 fwy.

The historical use of the Property does not represent a recognized environmental condition to the Site.

6.1.2 Fire Insurance Maps

Environmental Data Resources, Inc. conducted a search for fire insurance maps for the Property and surrounding area (Appendix C). There was no coverage by Sanborn Fire Insurance maps.

6.1.3 Property Tax Files

Property tax files were not provided for our review. The Los Angeles County Tax Assessor maintains a website which was reviewed. No property tax information at the website mentioned any environmental concerns. Environmental Data Resources, Inc. conducted a search for property tax records for the Property (Appendix C). There was no coverage by the EDR records search.

6.1.4 Recorded Land Title Records

Land title records were not provided for our review. According to the EDR Lien Search (Appendix D), the owner of the Parcels is IBY Property Owner, LLC, a subsidiary of Pabst Brewing Company. The database indicates the last significant change was recorded in late July 2023 as a lot line adjustment.

6.1.5 Topographic Maps

Historic topographic maps (Appendix C) ranging from 1894 through 2018 were reviewed. The site is plotted as the northeast corner of the San Gabriel Wash with the BNSF railroad passing directly north of the site. Future Irwindale Avenue is plotted directly east of the site and is part of the Azusa Dalton Ranch. Sparse dirt roads, two railroad spurs and a few small structures are the first plotted development on the 1925, 1927, 1928 maps. Depression contours indicating active quarrying are first evident on the 1939 map with two areas of activity and newly installed railroad spurs (apparently serving the quarries). The southeastern quarry is plotted as deeper than elevation 375 feet, indicating an excavation at least 150 feet deep. With the normal World War II coverage gap, the next map (1953) indicates removal of some railroad spur lines and an unpaved road along the east side of the north quarry. The Santa Fe Flood Control Basin is plotted on the 1953 map. 1966 mapping indicates that the southwest end of the Irwindale Raceway extends into the area south of the northwest quarry. The northwest quarry is significantly larger and includes more extensive dirt roads some of which are turnarounds (indicating truck traffic). The raceway is still plotted on the 1972 map and the railroad spurs are no longer plotted. 1995 map plots the brewery facility, the removal of the raceway, installation of new railroad spurs and a small reservoir offsite at the northeast portion of the brewery. The more recent maps (2012, 2015, and 2018 are more generic and cannot be used for review. The general topographic trend of the site is downhill to the southwest. With the exception of major quarrying and increased urbanization (especially the brewery), no significant change in site grades or land use was noted on any of the topographic maps.

6.1.6 Local Street Directories

Research regarding the availability of historical city directories was conducted by EDR. City Directories (Appendix C) were searched for the site area. There were multiple listings for the site address. These included Miller-Coors, Can Lines, Bunch, Morse Diesel, and Hass. Presumably the majority of these are affiliated with the offsite portion of the site address. No listings indicated any environmental issues other than those which are normal for large scale quarries and the brewery. There are offsite concerns for facilities to the south but Anacapa notes the general direction of groundwater flow is southerly to southwesterly placing the site upgradient from these potential source areas.

6.1.7 Historic Telephone Directories

Due to the known site use, historic telephone directories were not requested for this project.

6.1.8 Other Sources of Past Tenant / Occupant Information

ANACAPA interviewed the access contacts and others. No responses indicated any environmental concerns other than those normally associated with an abandoned sand and gravel quarry and lands adjacent to the brewery facility.

6.1.9 Building Department Records

No Building Department records were provided for our review. Environmental Data Resources, Inc. conducted a search for Building Permits for the Property and adjacent parcels (Appendix C). There were literally dozens of permits pulled for various improvements and activities at the brewery. The majority were electrical, plumbing, limited grading and building retrofits and new construction. None appear to relate to the project site.

6.1.10 Zoning/ Land Use Records

Zoning records were not provided for our review. According to the City of Irwindale (Appendix D), the Site is zoned M2. This is the zoning for Heavy Manufacturing.

6.1.11 Previous Reports

No previous reports were provided for our review. Reports for adjoining properties are available on the Geotracker database. Excerpts from one of those properties are included in Appendix D as that site summarizes the Baldwin Park Operable Unit.

6.2 Property Summary

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

7.0 ENVIRONMENTAL SAMPLING

7.1 Asbestos-Containing Material (ACM)

Based on the lack of fixed structures (except security) and age of the building(s), no ACM survey was conducted and ACM does not represent an environmental concern to the Site. If the security building is slated for demolition, an asbestos survey will be required as a condition of the demolition permit.

7.2 Mold

Based on the age and use of the fixed structures, no mold survey was conducted and mold does not represent an environmental concern to the Site.

7.3 Lead-Containing Paint (LCP)

Based on the age of fixed structures, no LCP survey was conducted and LCP does not represent an environmental concern to the Site.

7.4 Radon

ANACAPA review of published (State of California, 2016) radon data indicates that the Property is located in a generalized area of extremely low propensity (0% in zip code 91706) with regard to the potential for elevated levels of radon gas. No radon tests were conducted and radon is unlikely to represent an environmental concern to the Site and no additional investigations are recommended.

7.5 Lead in Drinking Water

ANACAPA confirmed with the City of Azusa Light & Water Department that the potable water to be provided to the Site meets or exceeds all drinking water standards. The website suggests that testing for lead in drinking water can be done if concerns exist for this analyte. Based on the fact that the water supplied to the Property will be from the municipality, testing for lead in drinking water was not conducted during this ESA.

8.0 FINDINGS AND CONCLUSIONS

8.1 Findings

Anacapa Geoservices performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E 1527-21 and the requirements of our consulting agreement with CLIENT concerning the subject Property. Any exception to, or deletions from, this practice are described in the Executive Summary Section of this report.

The following recognized environmental condition was identified by ANACAPA:

- The project site includes an older railroad alignment associated with historical rail use. Rail corridors of this age may have involved activities such as equipment maintenance, fueling, material storage, and right-of-way maintenance, which in some cases have the potential to result in localized soil impacts. Based on the age of the railroad line and limited available information regarding historical operational practices, there is a potential for residual constituents in shallow soils beneath or adjacent to the former rail corridor. These constituents may include petroleum-related compounds, metals, or other substances commonly associated with historic railroad operations. While no evidence of known contamination has been identified, the potential presence of impacted soil associated with historical railroad use represents a potential recognized environmental condition for purposes of environmental due diligence. Focused soil sampling may be considered during future site investigation or prior to ground-disturbing activities to further evaluate subsurface conditions, as appropriate.

The following non-ASTM environmental conditions were identified by ANACAPA:

- Sparse debris and trash are evident and more will be discoverable during clearing, grubbing, and future operations;
- The two quarries are slated for reclamation and this effort will require source material, qualified contractors, permitting, oversight and associated costs from RWQCB, Los Angeles County, and the City of Irwindale, (NOTE: currently there are restrictions from the City on scheduling); and
- Water supply for filling the quarries is an issue of major concern. Monitoring wells will be required by the terms of the State permits.
- Unlabeled 55-gallon drums were observed on-site. The contents could not be determined at the time of inspection, and no evidence of leakage or staining was observed.
- Existing wells may be present on the project site. Under typical redevelopment scenarios, on-site wells are subject to abandonment requirements established by the Los Angeles County Department of Public Health, Environmental Health Division. In some cases, existing wells may also be suitable for continued use as monitoring wells in support of an Inert Debris Engineered Fill Operation (IDEFO).

ANACAPA identified no other recognized environmental conditions or other non-ASTM issues associated with the Site.

8.2 Conclusions and Recommendations

This assessment revealed no evidence of recognized environmental conditions in connection with the property. Based on information collected from the ESA, Anacapa Geoservices recommends the following:

- Based on the presence of a historic railroad alignment, a limited, focused soil sampling program is recommended to further evaluate subsurface conditions in areas of planned ground disturbance. The sampling program would be designed to assess shallow soils beneath and immediately adjacent to the former rail corridor for constituents commonly associated with historical railroad operations. It is recommended that soil sampling be conducted by a licensed Geologist prior to or concurrent with site grading and construction activities, and coordinated with project design to target only areas subject to disturbance. The results would be used to confirm soil conditions, support appropriate soil management during construction, and determine whether any additional measures are necessary.
- It is recommended that the drums be evaluated and properly characterized prior to removal or site disturbance, and disposed of in accordance with applicable regulatory requirements.
- It is recommended that any existing wells be evaluated prior to redevelopment to determine appropriate abandonment or continued use. Wells not proposed for monitoring purposes should be properly abandoned in accordance with Los Angeles County Department of Public Health requirements. Where wells are proposed for use as monitoring wells for the IDEFO, well closure may be deferred until regulatory case closure is issued by the Los Angeles Regional Water Quality Control Board (RWQCB), as applicable.
- Depending on the schedule, contact the appropriate agencies regarding plans for the Inert Debris Engineered Fill Operations;
- Legally dispose of the contents of the Hazardous materials storage area; and
- Conduct the required Asbestos Containing Material survey, as appropriate.

ANACAPA identified no other recognized environmental conditions or other non-ASTM issues associated with the Site.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 06/22/2023 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 06/22/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/22/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 07/24/2023 has revealed that there are

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 15 CA ENVIROSTOR sites within approximately 1 mile of the target property.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

RMP: When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

A review of the RMP list, as provided by EDR, and dated 05/09/2023 has revealed that there are 4 RMP sites within approximately 0.001 miles of the target property.

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

EXECUTIVE SUMMARY

PFAS RCRA MANIFEST: To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

A review of the PFAS RCRA MANIFEST list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS RCRA MANIFEST site within approximately 0.25 miles of the target property.

EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there are 14 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there are 6 CA HAZNET sites within approximately 0.001 miles of the target property.

CA LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the CA LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed that there are 3 CA LOS ANGELES CO LF METHANE sites within approximately 0.5 miles of the

target property.

CA CHROME PLATING: This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

A review of the CA CHROME PLATING list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 CA CHROME PLATING sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 2 CA RGA LUST sites within approximately 0.001 miles of the target property.

SAN GABRIEL VALLEY (AREA 2) (Continued) **1000114961**

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 2) is a ground water plume that parallels the San Gabriel River to the west in the San Gabriel ground water basin in the Baldwin Park area of Los Angeles County, California. The plume is about 7.5 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride, according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies containless than 5 parts per billion ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the threeother San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Description:	***POTENTIAL RELEASE*** A boot on the roof for the ammonia system was found "lifted". The caller feels this was due to strong winds in the area, however they have never expereinced a "Boot lift" without a release of ammonia. They are unable to determine if there was a release at this time. The boot was replaced and they recycled the ammonia to another relief valve.

Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 10/20/2022. OBSERVATION: Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. Drums in satellite accumulation area were not labeled at time of inspection CORRECTIVE ACTION: Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7

years within the mining, oil and gas, utilities, and manufacturing sectors.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
THE ENERGY INFORMATION ADMINISTRATION (EIA) IS AN INDEPENDENT AGENCY WITHIN THE U.S. DEPARTMENT OF ENERGY THAT DEVELOPS SURVEYS, COLLECTS ENERGY DATA, AND DOES ANALYTICAL AND MODELING ANALYSES OF ENERGY ISSUES. THE EIA-860 DATABASE SUPPORTS THE ANNUAL ELECTRIC GENERATOR REPORT AND CONTAINS ELECTRIC UTILITY AND NON-UTILITY (INCLUDING INDEPENDENT POWER PRODUCERS, COMBINED HEAT AND POWER PRODUCERS, AND OTHER INDUSTRIALS) GENERATOR-SPECIFIC PLANT DATA, INCLUDING COUNTY AND STATE LOCATION AND OWNERSHIP INFORMATION
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
THE ELECTRONIC GREENHOUSE GAS REPORTING TOOL (E-GGRT) IS ACCESSIBLE THROUGH AN EPA WEB PAGE AND USED TO SUBMIT ANNUAL REPORTS IN SUPPORT OF THE EPA RULE FOR MANDATORY REPORTING OF GREENHOUSE GASES (GHG) FROM LARGE GHG EMISSIONS SOURCES. IMPLEMENTATION OF 40 CFR PART 98 IS REFERRED TO AS THE GREENHOUSE GAS REPORTING PROGRAM (GHGRP). THIS COMPREHENSIVE, NATIONWIDE EMISSIONS DATA WILL PROVIDE A BETTER UNDERSTANDING OF THE SOURCES OF GHGS AND WILL GUIDE DEVELOPMENT OF THE POLICIES AND PROGRAMS TO REDUCE EMISSIONS. THE PUBLICALLY AVAILABLE DATA WILL ALLOW REPORTERS TO TRACK THEIR OWN EMISSIONS, COMPARE THEM TO SIMILAR FACILITIES, AND AID IN IDENTIFYING COST EFFECTIVE OPPORTUNITIES TO REDUCE EMISSIONS IN THE FUTURE.

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. Eval Notes: On October 5, 2022, EH&S Manager came to Health Hazardous Materials Division to discuss the plan for accumulating Class 9 solid hazardous waste at Bin #9 in the roll-off storage area. He stated that the standard operating procedure, SOP DP-23, Processing of Solid Debris into Roll-off Review, was revised and employees were trained on the procedure on September 29, 2022. According to the EH&S Manager, the revised procedure prohibits disposal of filters into the roll-off bin and requires employee to blackout or mark off hazardous waste labels on containers before disposing them into the roll-off bin. EH&S Manager provided a copy of the training record for this procedure. EH&S Manager also stated that management is reviewing the use of a temperature indicator at Bin #9. The temperature indicator would have an interlock to an alarm. The alarm would display at the control room.
