**BARSTOW, CALIFORNIA**

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that no records exist for the above site description(s).

Records maintained by OFM-HMD date back to mid-1980's. Records searched include:

- facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions;
- logs of permits issued for the removal, installation, and/or modification of underground storage tanks;
- records and databases pertaining to illicit dumping, spill reports and release notifications, and complaints;
- incidents responded to by the hazardous materials emergency response team;
- and sites undergoing remediation for contaminated soil and/or groundwater.

## EXECUTIVE SUMMARY

TRC Environmental Corporation (TRC) was retained by BNSF Railway Company (also known as "BNSF" or "Client" or "User") to perform a Phase I Environmental Site Assessment (ESA) of the Depue, Sandra property which is located at 33326 Delaney Road in Barstow, California 92311 (herein referred to as the "subject property"). TRC conducted the Phase I ESA in connection with the Client's planned purchase of the subject property. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the ASTM International Practice E1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (hereinafter "ASTM Practice E1527-21" or "ASTM Standard"). Limiting conditions and/or deviations from the ASTM Practice E1527-21 standard are described in Sections 1.3 and 7.7 of this report.

The subject property is identified by Assessor's Parcel Number (APN) 0421-071-54-0000 and has been owned by Sandra Depue since January 1, 1984. The subject property is currently zoned for rural living/residential use and improved with one single-story wood-frame residence (Residence #1, primary residence) on a concrete-slab foundation, and three single-story manufactured homes (Residences #2 through #4) located near the center of the property. Residence #1 is the primary residence located near the center of the property, Residence #2 is located north of the primary residence, Residence #3 is west of the primary residence, and Residence #4 is located southwest of the primary residence. In addition to the residential structures, there is an old garage structure (Tool Building), and several chicken coops located west of the primary residence. The subject property is primarily unpaved and currently used as a residential property. It should be noted that a portion of the landing strip transects the western half of the subject property. The landing strip is associated with the Depue Airport, a Restricted-Use private runway for the Depue Ranch. Historical uses associated with the subject property included underground storage tank (UST) fueling operations for vehicles/aircrafts and a plating facility (Diamond Pacific Tool Corporation) that operated from approximately 1984 to 1996.

### Recognized Environmental Conditions

This assessment has revealed evidence of the following recognized environmental conditions (RECs) in connection with the subject property:

- **REC:** Historical documents show that there were at least three historical underground storage tanks (USTs) associated with the Depue Ranch. The three USTs were installed in 1968, 1974, and 1983 and contained regular and unleaded gasoline fuel, however there was no information provided regarding the construction details and/or the location of the USTs. The records review revealed that on April 18, 1986, the San Bernardino Environmental Public Works Agency received a letter from Bob Depue, in which Mr. Depue stated that the three USTs associated with the Depue Ranch had been registered, used for personal use, and removed from the ground. It should be noted that there was no closure documentation presented in the historical review that showed that the USTs were removed and there were no laboratory data or confirmation soil samples collected. TRC conducted an in-person interview with Mr. Gerald Depue, the current property owner's son, who informed TRC that at least two USTs had been historically located on the subject property, and he recalled that at least one of the USTs was removed from the ground while the other UST may have been left on the ground but could not provide any details or date of removal. Based on the information provided, lack of closure

documentation, and lack of confirmation soil sampling, this finding has been identified as a REC for the subject property.

- **R** The subject property operated as a plating facility from approximately 1984 to 1996, during that time it was reported that the facility was discharging an alkaline cleaner (NaOH), which was neutralized to a pH of 7 using a dilute sulfuric acid from the acid dip used in the plating operations. Once the alkaline cleaner was neutralized, the solution was then discharged onto the air strip. Based on the historical review, the plating operations, including the improper disposal of the alkaline cleaner onto the landing strip located on the western half, may pose a threat to shallow soil, this finding has been identified as a REC for the subject property.
- **R** The propane tank along the northern fence line was reported by the owner to have had a leak on to the concrete pad which resulted in the shutdown of the tank. This leak was likely from liquid condensate accumulating at the tank bottom that was formed from the propane gas. The liquid condensate from propane gas would contain various hydrocarbons including propane and is identified as a REC for the subject property.

Although not a REC per the ASTM definition, the following items are noted, and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:

- Historical uses of the subject property included a plating facility that operated on the subject property from approximately 1984 to 1996. According to business plan hazardous materials stored on the facility included: sulfuric acid (maximum 8 4-gallon glass bottles), hydrochloric acid (maximum 6 half-gallon bottles), phosphoric acid (maximum 15 gallons in a polypropylene drum), phosphorous acid (maximum 20 pound in 5 pound glass bottles), hydrogen peroxide (maximum 15 gallons in a polypropylene drum), sodium hydroxide (maximum 20 pounds in a polypropylene pail), nickel sulfate and nickel chloride (maximum 250 gallons in polypropylene tanks).
- The Depue Airport and Depue Ranch operations included USTs for vehicle/aircraft fueling.
- A concrete rubble pile containing soil located near the northwest corner. The rubble pile covers approximately 2,300 square feet (sq. ft.).
- Outdoor equipment storage areas and historical aircraft parking areas located along the eastern perimeter.
- At least three active and one former septic system locations associated with the current residences.
- An active domestic-use water supply well located along the eastern boundary of the subject property.
- According to FEMA's Flood Zone Designations, the subject property is in a Zone D, which represents an area of undetermined flood hazard. Given the area designation, flooding may represent a potential risk.
- Potential asbestos containing material (ACM)/lead-based paint (LBP) in the existing single-story home.
- The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 3.35 miles to the northwest of the subject property (i.e., north of the Mojave

River). Since the PG&E site is >1 mile from the subject property, it is not identified in the EDR Report, and TRC does not consider it to be a REC. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area.

**R□□□□ □ □□d□□□□□□**

The following recommendations are provided:

- Conduct a geophysical survey in the vicinity of the suspected former UST locations and surrounding areas for the purpose of identifying any detectable buried USTs and/or, related piping, conduit, or buried excavations that may be present in the subsurface within the subject property perimeter boundaries.
- Select soil boring locations based on the results of the geophysical survey and advance soil borings for the purpose of collecting soil (and groundwater if encountered) samples for laboratory analytical analysis. Additionally, select soil boring locations based on the current/historical use of the property and areas of concern.
- If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, the potential presence of septic systems associated with the existing structures, and/or buried structures or piping are identified, further evaluations and soil sampling would be recommended.
- A domestic-use water supply well was identified to be associated with the subject property. If it is not planned for future use, the well and/or associated equipment should be properly abandoned in accordance with San Bernardino County regulations for the destruction of water wells.
- The subject property contains a pile of concrete rubble and soil, two piles of green waste/debris, and three propane tanks. The items should be addressed during closing and/or development.

This Executive Summary is part of this complete report; the findings, opinions, or conclusions in this Executive Summary are made in context with the complete report. TRC recommends that the User read the entire report for supporting information related to findings, opinions, and conclusions.

## INTRODUCTION

TRC Environmental Corporation (TRC) has prepared this Phase I Environmental Site Assessment (ESA) for BNSF Railway Company (hereinafter, "BNSF," "Client," or "User"). This report was prepared for and may be relied upon by Client and User for the purposes set forth herein; it may not be relied on by any party other than the Client and User.

## Purpose and Scope of Work

The following Phase I ESA was performed for the Depue, Sandra property located at 33326 Delaney Road, Barstow, California 92311 (hereinafter the "subject property"). The subject property location map is included as Figure 1. TRC prepared this Phase I ESA in accordance with the ASTM International E1527-21 *Standard Practice for Environmental Site Assessments: Phase I ESA Process* (hereinafter "ASTM Practice E1527-21" or "ASTM Standard") and is intended for the sole use of BNSF.

The purpose of this assessment is to identify RECs at the subject property, as defined by ASTM Practice E1527-21. The completion of this Phase I ESA report may be used to satisfy one of the requirements for the User to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser liability protections pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), thereby constituting all appropriate inquiries into the previous ownership and uses of the property consistent with good commercial or customary practice as defined by 42 United States Code §9601(35)(B) of CERCLA.

The Scope of Services for this Phase I ESA included the following tasks:

- Subject property and vicinity reconnaissance;
- Subject property and vicinity description and physical setting;
- Historical sources review and a description of historical subject property and adjoining property conditions;
- Interviews with owners, operators, and/or occupants of the subject property, and/or local officials;
- Review of environmental databases and regulatory agency records;
- Review of previous environmental reports/documentation, as applicable;
- Review of environmental liens, if provided or authorized to obtain by the User; and
- Preparation of a report summarizing findings, opinions, and conclusions.

### Additional Services

Items outside the scope of ASTM Practice E1527-21 are, but are not limited to the following:

- Substances not defined as Hazardous Substances
- Asbestos-containing building materials
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Health and safety
- Ecological resources
- Endangered species
- Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment
- Biological agents
- Mold
- Polychlorinated Biphenyl (PCB)-containing building materials

No additional services were performed outside the scope of ASTM Practice E1527-21.

### Deviations or Deletions

No significant deviations or deletions to the ASTM Standard were made during this Phase I ESA.

## [illegible]

### [illegible]

The subject property location, ownership, and parcel information are included in the following table. A subject property location map is included as [illegible].

[illegible]

| [illegible] | [illegible] |
|---|---|
| Location | 33326 Delaney Road, Barstow, CA 92311 |
| Primary use of surrounding area | Residential/Rural Living |
| Acreage | 4.34-acres |
| Parcel Number | 0421-071-54-0000 |
| Zoning | Residential/Rural Living |
| Owner & Operator | Sandra Depue and Matthew Depue |

### [illegible]

Current subject property improvements are listed in the following table. The subject property layout is shown in [illegible].

[illegible]

| [illegible] | [illegible] |
|---|---|
| Buildings | One single-story wood-frame residence (Residence #1, primary residence) on a concrete-slab foundation, and three single-story manufactured homes (Residences #2 through #4) located near the center of the property. Residence #1 is the primary residence located near the center of the property, Residence #2 is located north of the primary residence, Residence #3 is west of the primary residence, and Residence #4 is located southwest of the primary residence. In addition to the residential structures, there is an old garage structure (Tool Building), and several chicken coops located west of the primary residence. |
| Exterior areas | Residential dirt/gravel road, fencing. |
| On-site roads/rail lines | It should be noted that a portion of the landing strip associated with the Depue Airport transects the property on the western half of the subject property. |
| Potable water supply | One domestic-use water supply well located along the eastern perimeter. |
| Sewage disposal system(s) | At least three active and one former septic system were reported: one former location along the western exterior of Residence #1, one along the eastern exterior of Residence #2, one along the western exterior of the Tool Building, and one along the western exterior of Residence #4. |

| [illegible] | [illegible] |
|---|---|
| Stormwater system | Overland flow. |
| Heating system (supplier) | Residential |
| Cooling system (supplier) | Residential |
| Back-up fuel source(s) | None |
| Electricity supplier(s) | City of Barstow |

[illegible]

### *2.3.1 Current Subject Property Use(s)*

The subject property is currently owned by Sandra and Matthew Depue and is a residential property located at 33326 Delaney Road, Barstow, CA 92311.

### *2.3.2 Previous Owner and Operator Information*

Historical site ownership is summarized below as it is listed in the San Bernardino County Property Information Management System (PIMS). Both current and historical property ownership can be viewed in the PIMS Reports, which are included in [illegible].

[illegible]

| [illegible] | [illegible] | [illegible] | [illegible] |
|---|---|---|---|
| Depue, Sandra; Depue, Matthew | Current Owners | 2/16/2022 | Present |
| Depue Family Revocable Trust 10/20/95 | Previous Owner | 3/4/2020 | 2/15/2022 |
| Depue, Sandra A | Historical Owner | 12/5/2007 | 3/3/2020 |
| Depue, Bobby G | Historical Owner | 8/19/1997 | 12/4/2007 |
| Depue, Bobby G TR; Depue, Sandra A TR | Historical Owners | 1/22/1996 | 8/18/1997 |
| Depue, Bob G; Depue, Sandra A | Historical Owners | Unknown | 1/21/1996 |

[illegible]

According to United States Geological Survey topographic maps reviewed, including the map shown on [illegible], the subject property topographic elevation is approximately 2,309 feet above mean sea level, and local topography is generally to the north-northeast. Groundwater flow direction in the Mojave River Groundwater Basin near the subject property is generally to the north.

The database radius report, supplied by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut, was reviewed to obtain information regarding the dominant soil composition in the vicinity of the subject property. This information is summarized below:

**M D**

| | |
|---|---|
| Hydric Status: | Not hydric |
| Soil Surface Texture: | Not reported |
| Soil Component Name: | Norob (Class C) |
| Deeper Soil Types: | Not reported |

**M D**

| | |
|---|---|
| Hydric Status: | Not hydric |
| Soil Surface Texture: | Not reported |
| Soil Component Name: | Nebona (Class D) |
| Deeper Soil Types: | Not Reported |

Please refer to the Geocheck Physical Setting Source Summary of the EDR report presented in **d** for further information regarding the soil composition in the vicinity of the subject property. Per Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 06071C4507H, dated August 28, 2008, the subject property is located in Zone D. According to FEMA's Flood Zone Designations, Zone D represents an area of undetermined flood hazard. Given the area designation, flooding may represent a potential risk. See **d** for the FEMA map.

## User Provided Information

According to ASTM Practice E1527-21, certain tasks that may help identify the presence of RECs associated with the subject property are generally conducted by the Phase I ESA User. These tasks include providing or authorizing the environmental professional to obtain recorded land title records for environmental liens or activity and use limitations (AULs); providing specialized knowledge related to RECs at the subject property (e.g., information about previous ownership or environmental litigation); providing commonly known or reasonably ascertainable information within the local community about the subject property that is material to RECs in connection with the subject property; and informing the environmental professional if, as believed by the User, the purchase price of the subject property is lower than the fair market value due to contamination. A User questionnaire was not provided.

### Recorded Land Title Records

The User has not provided TRC with information associated with a review of title and judicial records for environmental liens or AULs associated with the subject property and may remain as a User requirement to satisfy All Appropriate Inquiries.

An Environmental Lien Search was provided by EDR for parcel 0421-071-54-0000. No environmental liens or AULs were identified for the parcel. A copy of the environmental lien report is included in Appendix B.

### Reason for Conducting Phase I ESA

TRC understands the User requires a Phase I ESA for their planned purchase of the subject property.

## R RD R

### R r R r

Information regarding subject property and vicinity historical uses was obtained from various publicly available and practically reviewable sources including:

- Aerial photographs dated 1953, 1959, 1964, 1968, 1970, 1978, 1984, 2005, 2009, 2012, 2016, and 2020;
- Topographic maps dated 1932, 1934, 1956, 1971, 1984, 1993, 2012, 2015, 2018, and 2021;
- City directories dated 1964, 1976, 1980, 1986, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2020;
- Local municipal records; and
- An environmental database report.

Aerial photographs, topographic maps, city directories, Sanborn Maps®, and the environmental database report were provided by EDR. Historical research documentation is included in d B.

Historical Sanborn® Fire Insurance Maps (Sanborn Maps®) were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (e.g., building construction, subject property occupants, storage tank locations, and hazardous material storage areas), which can be used as a resource to document land use and structural change over time. EDR researched the availability of Sanborn Maps® in the vicinity of the subject property; however, EDR stated that Sanborn Map® coverage does not exist for the subject property or nearby surrounding area.

### *4.1.1 Subject Property History*

r

r r r r

| r | r r r r r |
|---|---|
| From at least 1932 to 1934 | An unnamed road is shown in the 1932 and 1934 topographic maps, the road cuts across the northern perimeter of the subject property. The subject property address is not listed in the city directories provided by EDR during this period. |
| From at least 1953 to 1964 | By at least 1953, the aerial photography shows one residential structure with perimeter fencing located near the center of the subject property, near the location of the current Residence #1. The residence is first shown in the 1956 topographic map. By at least 1959, the aerial photograph shows increased vegetation/trees surrounding Residence #1 and at least two additional structures appear to have been constructed southwest of Residence #1, near the current Tool Building and Residence #4. The remainder of the subject property is undeveloped, with only an unpaved road leading up to the residences from the northeast corner of the property. The subject property address is not listed in the city directories provided by EDR during this period. |

| [illegible] | [illegible] |
|---|---|
| From at least 1968 to 1971 | By at least 1968, the western half of the property appears to be graded where the current landing strip is located, more trees, vehicles, and additional development is shown south of Residence #1. Two structures are depicted in the 1971 topographic map. The subject property address is not listed in the city directories provided by EDR during this period. |
| From at least 1978 to 1986 | By at least 1978, one additional structure was constructed along the northern boundary where the current Residence #2 is located. The subject property address (33326 Delaney Road) was listed in the 1980 - 1986 city directories provided by EDR under private individual names: Depue, Bob; Depue, Gerald L; Flowers, Kevin (1986 only) and Pinnell, Vernon R. The 1984 aerial photograph shows multiple aircrafts parked along the eastern perimeter of the subject property. |
| From at least 1993 to 2020 | The landing strip associated with the Depue Airport that transects the western half of the subject property is first depicted in the 1993 topographic map. By at least 2005, the aerial photograph shows one additional structure constructed west of the primary residence where the current Residence #3 is located. Three permits were found associated with the subject property: permit to change out the heat pump dated May 25, 2005; one for a retrofit/19551 set down (building single- mobile home) dated October 17, 2007; and one electric to well dated March 19, 2008. By 2009, the aerial photograph shows a white structure along the southwest boundary of the residential area, however by 2012 the structure was removed, and the subject property appears to be in its current configuration The subject property address (33326 Delaney Road) was listed in the city directories provided by EDR for the following years:<br>• 1995, 2000: Depue, Bob<br>• 2005: Depue, Jason K; Trevithick, Lola<br>• 2010: Depue, Bob; Frazier, Sarah; Pinnell, Beth<br>• 2014: Depue, Bobby G; Frazier, Sarah J; Hare, Michael L; Marcum, Beverly A; Pinnell, Beth; Shahal, Elisheva<br>• 2017: Depue, Bobby G; Frazier, Sarah J; Hare, Michael L; Marcum, Beverly A; Pinnell, Beth<br>• 2020: Beverly Marcum, Sandra Depue, Tracy Marcum<br><br>The EDR Historical Aerials, Historical Topographic Maps, City Directory and Building Report are included in [illegible]. |

### *4.1.2 Adjoining Property History*

[illegible]

| [illegible] | [illegible] |
|---|---|
| North | From at least 1953 to 1984, the north adjoining property is shown as vacant, undeveloped land. By 1978, the northeast-southwest trending air strip was installed, the air strip transects the center of the property. The “landing strip” for aircrafts was first identified in the 1993 topographic map provided by EDR and is associated with the Depue Airport. In the 1995 aerial photography, a residential structure with perimeter fencing is shown near the center |

| Direction from Property | Adjoining Property Description |
|---|---|
| | of the property, additionally, storage structures and trees are shown along the southern boundary and scattered throughout the property, respectively. In the 2009 aerial photography, mobile homes are shown north of the residence, however by 2012 the mobile homes appear to have been removed. From 2016 through 2020, the western half of the adjoining property appears to be used for outdoor storage of materials. The adjoining property address (33250 Delaney Road) was listed in the city directories provided by EDR for the following years:<br>- 1986: Depue, Don<br>- 2005: Tyler, Robin N<br>- 2010: Bravo, Leticia<br>- 2020: Barbara Depue; Gerald Depue<br><br>The property address was not listed in the building permit report provided by EDR. |
| East | From at least 1953 to 1970, the adjoining property to the east was vacant, undeveloped desert land. By at least 1978, the aerial photograph shows a building developed near the southwest corner of the property. The 1984 aerial photograph depicts several additional buildings and debris to the northeast and east of the building visible in the 1978 aerial photograph. By at least 1995, the aerial photograph shows a storage warehouse near the center of the property while the remainder of the property appears to be a fenced material and trailer yard with mobile homes scattered throughout the property. An additional residence is depicted along the southern property boundary in the 2005 aerial photograph. The east adjoining property address (33211 Delaney Road) was listed in the city directory provided by EDR under following years:<br>• 2000: Camp, Kenneth W<br>• 2005: Depue, Gerald L<br>• 2010: Depue, Gerald L; Mccay, Winston N<br>• 2014: Depue, Gerald L; Baca, Tiffany A<br>• 2017: Depue, Gerald L; Perkins, Kelsey<br>• 2020: Barbara & Gerald Depue, Bob Wilterding |
| South | From at least 1932 to 1964, the south adjoining property was vacant, undeveloped land. By 1968, there is a series of dots arranged in an apparent grid, possibly for an orchard, as well as a residential building located in the center of the property. In the 1970 aerial photograph, a white structure (possible fuel dispenser island) is depicted, west of the residence. By 1978, a larger building has replaced some of the area formerly occupied by the orchard, the white structure removed, and a portion of the existing landing strip crosses the westernmost extent of the panhandle. The large structure and the landing strip are first depicted in the 1993 topographic. Between 1984 and 2009, there are several airplanes parked along the eastern perimeter and the property appears to be within the footprint of the Depue Airport from 2012 to at least 2021 as depicted in the topographic maps. By 2016, the large structure to the north is no longer shown and a structure appears to have been constructed along with a possible container or other storage structure towards the southern portion of the property. The subject property address (33126 Delaney Road) was listed to Kelly and Robert Depue in the 2020 city directory. |

| Direction | Description |
|---|---|
| West | From at least 1932 to 2005, the west adjoining property was shown as vacant, undeveloped desert land. The building report identified several permits issued from 2005 to 2008 for the construction of a single-family residential building, electrical upgrades, and alterations associated with the north adjoining property. By 2009, the aerial photograph shows that the property was developed with a structure (residence) located near the center of the property, a large warehouse structure located near the northwest corner, and two smaller structures (possible storage sheds) near the southwest corner. By 2012, the area east of the warehouse structure was paved and by 2020 a shipping container is depicted south of the warehouse and the property appears to be in its current configuration. The associated address (33220 Mockingbird Street) for the south adjoining property was listed in the city directory for the following years:<br>• 2010, 2014 – Occupant Unknown<br>• 2017 – Gonzalez, Alfredo M<br>• 2020 – Alfredo Gonzalez and Felipa Gonzalez |

### *4.1.3 Surrounding Property History*

Since at least 1953, the surrounding area was primarily vacant and undeveloped desert. The Riley Airport was first depicted in the 1956 topographic map to the southeast. The airport consisted of two runways, a ramp, and two small buildings on the west side and was located approximately 0.1-mile southeast of the subject property. By 1971, there was no evidence remaining of the Riley Airport runways. By 1995, the surrounding areas were partially developed with a mix of residential and commercial properties in all directions. The subject property is bordered by Delaney Road to the east and Mockingbird Street to the west.

### *4.1.4 PG&E Hinkley Site*

The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 3.35 miles to the northwest of the subject property (i.e., north of the Mojave River). Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information publicly available online. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the subject property. As a result, it does not appear that the PG&E Hinkley site has or would impact the subject property area; however, BNSF should be aware of the proximity of the PG&E site should future plans involve use of groundwater resources. Recent plume maps and information can be reviewed here:

http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/.

### **D R d r R rd R**

A database search report that identifies properties listed on state and federal databases within the ASTM-required radii of the subject property was obtained from EDR. These properties

included those that could be mapped and those that could not (i.e., orphan properties). A copy of the database search report is included in Appendix D. The database search report includes the list of environmental databases/records searched and their corresponding abbreviations.

### *4.2.1 Subject Property*

Information regarding the subject property included in the database search report is summarized in the following table:

| | |
|---|---|
| Property Name and Address | Depue Ranch, 33326 Delaney Road, Barstow, CA 92311 |
| Map ID | A1 |
| Database | HIST UST |
| Database Record ID | Facility ID: 000000031599 |
| Database Record Description | Listed in the HIST UST database for three USTs, with a Facility ID:00000031599. Historical documents show that there were at least three USTs associated with the Depue Ranch. The three USTs were installed in 1968, 1974, and 1983 and contained regular and unleaded gasoline fuel, however there was no information provided regarding the construction details and/or the location of the USTs. The records review revealed that on April 18, 1986, the San Bernardino Environmental Public Works Agency received a letter from Bob Depue, in which Mr. Depue stated that the three USTs associated with the Depue Ranch had been registered, used for personal use, and removed from the ground. It should be noted that there was no closure documentation presented in the historical review that showed that the USTs were removed and there were no laboratory data or confirmation soil samples collected. TRC conducted an in-person interview with Mr. Gerald Depue, the current property owner's son, who informed TRC that at least two USTs had been historically located on the subject property, and he recalled that at least one of the USTs was removed from the ground while the other UST may have been left on the ground but could not provide any details or date of removal. Based on the information provided, lack of closure documentation, and lack of confirmation soil sampling, this finding has been identified as a REC for the subject property. |

| | |
|---|---|
| Property Name and Address | Diamond Pacific Tool Corp, 33326 Delaney Road, Barstow, CA 92311 |
| Map ID | A2 and A3 |
| Database | RCRA-SQG, FINDS, ECHO, HWTS |
| Database Record ID | EPA ID: CAD982506453 |
| Database Record Description | Listed in the RCRA-SQG database for the operation of a Small Quantity Generator (SQG), the Federal Index System (FINDS), and the Enforcement & Compliance History Information (ECHO) databases. On May 14, 2024, |

| | |
|---|---|
| | the Hazardous Materials Division (HMD) responded with records associated with a metal plating business, Diamond Pacific Tool Corp, that operated on the north adjoining property. See summary of the documents provided below:<br>• Hazardous Waste Generator Permit dated April 10, 1984, that lists the following wastes generated at the facility: non-phosphate alkaline cleaner (1/2 gallon) and sulphuric acid (1/4 gallon).<br>• Receipt for hazardous waste generator permit dated October 3, 1984.<br>• Hazardous Waste Generator Permit Renewal dated April 12, 1985, that lists the following wastes generated at the facility: non-phosphate alkaline cleaner (1/2 gallon) and sulphuric acid (1/4 gallon).<br>• Material Safety Data Sheet (MSDS) for nickel sulphate hexahydrate dated July 7, 1985, the disposal method states that it can disposed in sealed containers in an Environmental Protection Agency (EPA) approved landfill, and nickel in solution can be precipitated as the carbonate or hydroxide and reclaimed or disposed as above.<br>• Hazardous Waste Generator Report prepared by the County of San Bernardino; Department of Environmental Health Services dated September 16, 1985. The inspection report has the Main Street address and states that the facility was manufacturing diamond grinding wheels including steel rim electroplated with nickel and diamond particles, no disposal of water-soluble oils or coolants, contains plating tanks (100-gallons), a titanium basket with nickel, and the alkaline cleaner is neutralized using sulfuric acid and disposed of in private runway.<br>• MSDS for phosphoric acid dated November 9, 1985. MSDS for hydrogen peroxide dated November 9, 1985. MSDS for hydrochloric acid. MSDS for nickel chloride.<br>• Tracking sheet for Business Plans dated January 4, 1988.<br>• Business Plan dated January 1, 1989, for nickel plating facility located 33326 Delaney Road. A hazardous material inventory is provided below.<br>o sulfuric acid (maximum eight 4-gallon glass bottles)<br>o hydrochloric acid (maximum six half-gallon glass bottles)<br>o phosphoric acid (maximum 15 gallons in a polypropylene drum)<br>o phosphorous acid (maximum 20 pounds in 5-pound glass bottles)<br>o hydrogen peroxide (maximum 15 gallons in a polypropylene drum)<br>o sodium hydroxide (maximum 20 pounds in a polypropylene pail)<br>o nickel sulfate and nickel chloride (maximum 250 gallons in polypropylene tanks)<br>• Hazardous Waste Generator Report prepared by the County of San Bernardino; Department of Environmental Health Services dated April 4, 1989. The report states that the concentration of nickel becomes too high, so the bath is decanted and deionized water is added, the decanted solution is then allowed to evaporate, and then stored in plastic trash cans. The report also notes that the carbon filters must be treated as waste, and that there are two evaporation polypropylene tanks. The inspection report has a section indicating |

violations however the handwritten notes in this section are unreadable.

- Application for health permit prepared by Bill Depue dated February 19, 1993. The application states that a Porenac brand alkaline cleaner (NaOH) 10lbs. in 40 gallons water is neutralized to pH 7 using dilute sulfuric acid from the acid dip, once neutralized, the solution was then “spread” on the air strip.
- Hazardous Waste Generator Report prepared by the County of San Bernardino; Department of Environmental Health Services dated April 16, 1993. The inspection report states that plating operations occur only on 33326 Delaney Road address.
- Hazardous Waste Generator Report prepared by the County of San Bernardino; Department of Environmental Health Services dated April 19, 1993. The inspection report has handwritten components that are difficult to discern, but the Inspector mentioned that the cleaning solutions are neutralized and dumped on the small airport runway.
- Supplemental Generator Inspection Report prepared by the Department of Environmental Health Services; Hazardous Waste section dated May 19, 1993. The Inspection Reportion summarizes the cleaning, treating, and nickel-plating process. The report determines that the facility is not a generator of hazardous waste, but a handler of hazardous material based on the amount of nickel sulphate (~55-gallons). The report also states that a waste discharge requirement (WDR) may be required by the regional waterboard, and that the facility produces approximately 13-gallons of NaSO4 per month.
- Letter (dated May 26, 1993) from Bill Depue addressed to the Department of Environmental Health Services outlining the nickel-plating process. Enclosed in the letter is the laboratory analysis of the nickel-plating bath. Results from the analysis include the following concentrations: pH is 0.9, nickel sulfate 16.7 oz/gal, nickel chloride 65 oz/gal, and phosphoric acid 3.6 fl. oz/gal. The Material Safety Data Sheet for alkaline cleaner (Porenac) is also enclosed which states that the product may require neutralization to specified pH range before disposing to sewer.
- Hazardous Waste Generator Permits from 1987 through 1996.
- Computer Database Update Authorization dated March 7, 1996, submitted G. Flemming with a comment saying the company had moved to 2620 W. Main Street, Barstow, CA.

The subject property operated as a plating facility from approximately 1984 to 1996, during that time it was reported that the facility was discharging an alkaline cleaner (NaOH), which was neutralized to a pH of 7 using a dilute sulfuric acid from the acid dip used in the plating operations. Once the alkaline cleaner was neutralized, the solution was then discharged onto the air strip. Based on the historical review, the plating operations, including the improper disposal of the alkaline cleaner onto the landing strip located on the western half, may pose a threat to shallow soil, this finding has been identified as a REC for the subject property.

### *4.2.2 Adjoining and Surrounding Property Record Review*

TRC evaluated the following factors to determine whether additional environmental records should be reviewed with respect to the potential for contaminant migration from the adjoining and surrounding properties:

(1) Whether the property is upgradient or downgradient of the subject property related to potential groundwater migration based on the local topography, and the assumed (or known) groundwater depth and shallow groundwater flow direction (refer to Section 2.4 above);

(2) Whether the property is upgradient or downgradient of the subject property related to potential vapor migration based on readily available information pursuant to ASTM Practice E1527-21 including soil and geological characteristics; contaminant characteristics; contaminated plume migration data; and significant conduits that might provide preferential pathways for vapor migration such as major utility corridors, sanitary sewers, storm sewers, and significant natural conduits such as karst terrain (vapor migration may also be influenced by the age and design of infrastructure features associated with these conduits);

(3) Property case status (i.e., whether the state environmental agency or applicable regulatory authority has issued a No Further Action (NFA) letter or other similar closure document);

(4) Type of database and whether the presence of contamination is known; and

(5) The distance between the listed property and the subject property.

Based on this evaluation, TRC limited the review of additional environmental records to the properties listed below because the other properties are considered to have a low potential for contamination to migrate to the subject property.

**Adjoining Properties**

No records/listings were identified for the adjoining properties (those which share a common property boundary with the subject property) in the environmental database report.

**Surrounding Properties**

Information regarding adjoining properties (those within the general vicinity of the subject property) included in the database search report is summarized in the following table:

| | |
|---|---|
| **Property Name and Address** | W&J Lazaro Inc DBA Alexis Trucking, 33265 Delaney Rd. Barstow, CA 92311 |
| **Map ID** | 4 |
| **Direction and Approximate Distance to Release** | 0.038-mile northeast |
| **Current and Historical Gradient** | Cross gradient |

| | |
|---|---|
| D□□□□□□□□□□ | RCRA NonGen / NLR |
| D□□□r□□□□□D□□ □□□□ | 1026493309; CAL000458121 |
| D□□□□□□□R□□□□ □ □□□ □ □r□□ | Listed in the RCRA NonGen / NLR and historic generators databases as a verified non-generator operating under the North American Industry Classification System (NAICS) Code 811111, General Automotive Repair. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste. Based on this information summarized above and lack of violations, TRC does not consider this property to be a REC for the subject property. |

No unmapped orphan sites were identified in the EDR report.

□□□□ □ □□□r□□□d□□ □□R□□□rd□□

An Environmental Lien Search was provided by EDR for the subject property. No environmental liens or AULs were identified for parcel 0421-071-54-0000. A copy of the environmental lien report is included in □□□□□d□□B. The deed for the subject property is vested to Sandra A Depue and Matthew Depue dated 2/16/2022.

□□□□ □ □□□r□□□r□□□ □□□□□R□□□rd□□ □□r□□□□

Per the ASTM Standard, local or additional state records were reviewed to enhance and supplement the ASTM-required federal and state records reviewed and discussed earlier in this report. Local sources that were contacted to obtain this information are discussed throughout this report: All agency records requests and responses and online database screen captures can be found in □□□□□d□□□□:

□□□□□□□□□□□□□□ □□r□□□r□□□ □□□□□R□□□rd□□ □□r□□□□

|---|---|
| □□□□□B□r□□□ □□ □□□□□□□□ □□□□ □□□□□□ | TRC contacted the City of Barstow Office of the City Clerk on May 14, 2024, regarding the availability of files pertaining to the subject property. No records were available for the subject property, and the City directed TRC to contact the County of San Bernardino. |
| □□□□□□□□□□ B□r□□rd□□□D□□□r□□ □□□□ □□□□□d□□ □□□□□r□□□□□□d□ □□□□□□r□□□ | TRC searched records from the County of San Bernardino, Department of Land Use Services and Assessors Office on May 20, 2024, regarding the availability of files pertaining to the subject property. No permits were confirmed for the subject property. An online search identified Depue, Sandra A and Depue, Matthew as the associated owners; however, the search did not return any permits associated with the subject property. |
| □□□B□r□□rd□□□ □□□□□□ □r□D□□□r□□ □□□□ □□□rd□□□M□□r□□□ D□□□□□□□ | TRC contacted the San Bernardino County Fire Department, Hazardous Materials Division (County HMD) on March 11, 2024, regarding records for the subject property. The county HMD is the local agency regulating UST operations and hazardous material generation and handling. The HMD responded with records regarding Depue Ranch and Diamond |

| Regulatory Agency Database | Comments |
|---|---|
| | Pacific Tool Corp associated with the subject property, see for additional details. |
| San Bernardino County Department of Environmental Health Services | TRC contacted the County of San Bernardino, Department of Environmental Health Services on May 14, 2024, regarding records for the subject property. The County Division of EHS is the local agency regulating septic tanks and well installation or abandonment permits of Barstow, CA. The agency responded having found records pertaining to the subject property, and the documents included one redacted Well destruction Permit and one Well Permit and a Well Completion Report, dated February 21, 2008, submitted by Eagle Desert Drilling for the construction of one multi-residence replacement water well (proposed depth of 300 feet below ground surface). The well completion report was submitted Eagle Desert Drilling on March 14, 2008, and provides construction details for the well. |
| Lahontan Regional Water Quality Control Board | The Lahontan RWQCB was not contacted directly regarding records or files for the subject property and parcel number as they have directed TRC to solely use the state GeoTracker database. The GeoTracker database was reviewed, and records for the subject property were not identified. |
| California EPA – Department of Toxic Substances Control | TRC contacted the California EPA – DTSC Cypress and Chatsworth offices regarding records or files for the subject property associated parcel number and address. No records for the property were identified by either the DTSC Cypress and/or Chatsworth offices, and no records for the subject property were identified in the DTSC EnviroStor database. The Chatsworth office directed TRC to the California Hazardous Waste Tracking System (HWTS) database for the subject property, where the subject property is listed as Diamond Pacific Tool Corp, which was also made available in the EDR report (see for a summary of this finding). |
| California Geologic Management Division – Well Finder (WellSTAR) | TRC searched the California Geologic Management Division (CalGEM) Well Finder (WellSTAR) online database search. CalGEM helps in protecting public health, safety, and the environment through its oversight of the oil, natural gas, and geothermal industries. No records were returned through the CalGEM database search. |
| California Department of Water Resources – Statewide Groundwater Elevation Monitoring (CASGEM) | TRC searched the California Department of Water Resources, Statewide Groundwater Elevation Monitoring (CASGEM) online database. The groundwater monitoring program tracks seasonal and long-term groundwater elevation trends in groundwater basins statewide and relies on voluntary information provided by well owners. No records were returned through the CASGEM database. |

The subject property is currently owned by Sandra Depue. The property owner was present during the site reconnaissance, as well as Gerald Depue and Barbara Depue, the property owners son and daughter-in-law. Mrs. Sandra Depue, Mr. Gerald Depue, and Mrs. Barbara Depue reported the following:

- There are three buried septic tanks on the subject property. See □□□r□□□□ and the photolog in □□□□□d□□D for locations.
- The business associated with the subject property, Diamond Pacific Tool Corp, used to be run in the car port area of the subject property, and the area where Residence #2 is currently located is where the office and assembly plant were located.
- Mrs. Barbara Depue was aware of two USTs used for gasoline that were installed on the subject property. One was located underneath what is currently the car port, and another was located in the western area of the subject property, near the landing strip. Ms. Depue reported that the tanks were removed sometime in the 1970s, and she is unaware of a third tank.
- The propane tank along the northern fence line is no longer in use due to a leak onto the concrete pad.
- To the owner's knowledge, there are no historical environmental issues or environmental liens for the subject property. There has been no historical clarifiers, spills/cleanups, or environmental assessments conducted on the subject property.
- TRC conducted an in-person interview with Mr. Gerald Depue, the current property owner's son, who informed TRC that at least two USTs had been historically located on the subject property, and he recalled that at least one of the USTs was removed from the ground while the other UST may have been left on the ground but could not provide any details or a date of removal.

## Site Reconnaissance

### Methodology and Personnel Involved

Olivia Morse, Environmental Engineer, and Charlotte Mourad, Environmental Engineer, conducted a site reconnaissance of accessible areas on and around the subject property on May 7, 2024, for the purpose of identifying potential RECs. Photographs taken during the site reconnaissance are provided in Appendix D. The subject property layout is shown on Figure 2.

### General Site Setting and Observations

Unless otherwise noted, the items listed in the table below appeared in good condition with no visual evidence of staining, deterioration, or a discharge of hazardous materials; and there are no records of a release in these areas. Items where further description is warranted are discussed in the section(s) following the table.

Table 1: General Site Setting and Observations

| Item | Current or Historical Use | Description |
|---|---|---|
| Hazardous material storage or handling areas | Current | At least one 5-gallon drum with racing fuel, small capacity containers of oil (>5-gallons), and two containers of insecticide. |
| Solid and liquid wastes including municipal wastes | Current | A pile of concrete rubble and soil was observed in the northwest corner of the subject property. The property owner reported that the concrete was removed from the front patio area along the eastern property boundary due to a water leak and has been stored in the northwest corner since. Along the western property boundary, a pile of wooden debris (including pallets and twigs and branches from trees) was observed. Miscellaneous metal debris was observed along the eastern property boundary. A pile of wooden logs was observed along the fence line running north-to-south in the western half of the subject property. |
| Underground Storage Tanks (USTs) and associated piping | Historical | The property owner reported that at least two USTs used for gasoline that have been removed- one underneath the carport, and another in the western half of the subject property near the landing strip, see Section 3.3 for additional details. |

| | | |
|---|---|---|
| Aboveground Storage Tanks (ASTs) and associated piping | Current | One active above ground propane tank located outside the western perimeter of the residential area, one inactive propane tank mounted to a concrete pad located along the northern residential fence line, one active propane located along the western perimeter of the residential area. The propane tank along the northern fence line was reported by the owner to have had a leak on to the concrete pad which resulted in the shutdown of the tank. This leak was likely from liquid condensate accumulating at the tank bottom that was formed from the propane gas. The liquid condensate from propane gas would contain various hydrocarbons including propane and is identified as a REC for the subject property. |
| Unlabeled drums and containers (≥5 gallons) | Current | Two empty, unlabeled, steel, 55-gallon drums located along the western exterior of the Tool Building. |
| Strong, pungent, or noxious odors | Not Observed | |
| Pools of liquid, including surface water bodies and sumps (handling hazardous substances or substances likely to be hazardous only) | Not Observed | |
| Known or Likely PCB-containing items (liquid-filled transformers, hydraulic equipment, etc.) | Not Observed | |
| Stains or corrosion | Not Observed | |
| Drains and sumps | Not Observed | |
| Oil water separator | Not Observed | |
| Pits, ponds, and lagoons | Not Observed | |
| Stressed vegetation | Not Observed | |
| Fill material | Not Observed | |
| Wastewater (discharged from or to the subject property) | Not Observed | |
| Stormwater (discharged from or to the subject property) | Not Observed | Stormwater flows over grade where it runs off the property via ditches or pools in low points on the property |

[illegible]

| [illegible] | [illegible] | [illegible] |
|---|---|---|
| Wells (including dry wells, irrigation wells, injection wells, abandoned wells, oil and gas wells, or other wells) | Current | One domestic-use water supply well on a concrete pad was observed along the eastern boundary. The well is active, and the accompanying aboveground water storage tank and pump were observed on the concrete pad. |
| Septic systems or cesspools | Current/Historical | At least three active and one former septic system were reported: one former location along the western exterior of Residence #1, one along the eastern exterior of Residence #2, one along the western exterior of the Tool Building, and one along the western exterior of Residence #4. |
| Storage Areas | Not Observed | |
| Miscellaneous Items | Current | A landing strip runs southwest through the western half of the subject property. A rock tumbler was observed near the southern boundary. |

## [illegible]

### *6.3.1 Adjoining Properties*

During the site reconnaissance, TRC viewed the adjoining properties from the subject property and publicly accessible areas (e.g., public roadways, etc.).

[illegible]

| [illegible] | [illegible] |
|---|---|
| North | Residential property with a single-story residential structure and multiple mobile homes located on the western half of the property. |
| East | Delaney Road, followed by a residential property that is also leased out to a towing company and used for vehicle and miscellaneous storage. The property is improved with a residential/commercial structure located near the southwest corner and a large warehouse structure located near the center of the property. |
| South | A residential property with a garage structure located on the western half, a structure located near the center of the property, and a manufactured home on the eastern half of the property. |

| Direction | Surrounding Property Description |
|---|---|
| West | Mockingbird Street, followed by a residential property with one single-story residential structure located near the center and warehouse structure located along the western perimeter. |

### *6.3.2 Surrounding Properties*

Surrounding properties generally include sparse residential and commercial properties in all directions and undeveloped vacant desert farther to the south. The BNSF railroad Right-of-Way (ROW) is located approximately 0.60-mile to the north of the subject property. There is a landing strip for aircraft that crossed through the subject property. The landing strip is associated with the Depue Airport, a Restricted-Use private runway for the Depue Ranch (the Depue airport is shown on current aviation Nav charts as “PVT” and “R” meaning it is Restricted-use and is not for public use, elevation of 2,313 feet MSL and 1,800 feet long).

## Findings and Conclusions

Potential findings can include RECs, controlled RECs (CRECs), historical RECs (HRECs), and de minimis conditions, pursuant to ASTM Practice E1527-21.

RECs are defined as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment: (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

CRECs are defined as RECs affecting the subject property that have been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls).

HRECs are defined as previous releases of hazardous substances or petroleum products affecting the subject property that have been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria without subjecting the subject property to any controls (for example, property use restrictions, AULs, institutional controls, or engineering controls). An HREC is not a REC.

De minimis conditions are related to a release that generally does not present a threat to human health or the environmental and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs nor CRECs.

Business environmental risks (BERs) are defined as a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

Data gaps are defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the Key Site Manager, regulatory officials, etc.).

TRC has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 at the Depue, Sandra Property identified by APN 0421-071-54-0000 and located at 33326 Delaney Road in Barstow, California 92311. Any exceptions to, or deletions from, this practice are described in Sections 1.3 and 7.7 of this report.

### Results

This assessment has revealed the following REC in connection with the subject property:

- **R** Historical documents show that there were at least three historical USTs associated with the Depue Ranch. The three USTs were installed in 1968, 1974, and 1983 and contained regular and unleaded gasoline fuel, however there was no information provided regarding the construction details and/or the location of the USTs. The records review revealed that on April 18, 1986, the San Bernardino Environmental Public Works Agency received a letter from Bob Depue, in which Mr. Depue stated that the three USTs associated with the Depue Ranch had been registered, used for personal use, and removed from the ground. It should be noted that there was no closure documentation presented in the historical review that showed that the USTs were removed and there were no laboratory data or confirmation soil samples collected. TRC conducted an in-person interview with Mr. Gerald Depue, the current property owner's son, who informed TRC that at least two USTs had been historically located on the subject property, and he recalled that at least one of the USTs was removed from the ground while the other UST may have been left on the ground but could not provide any details or date of removal. Based on the information provided, lack of closure documentation, and lack of confirmation soil sampling, this finding has been identified as a REC for the subject property.
- **R** The subject property operated as a plating facility from approximately 1984 to 1996, during that time it was reported that the facility was discharging an alkaline cleaner (NaOH), which was neutralized to a pH of 7 using a dilute sulfuric acid from the acid dip used in the plating operations. Once the alkaline cleaner was neutralized, the solution was then discharged onto the air strip. Based on the historical review, the plating operations, including the improper disposal of the alkaline cleaner onto the landing strip located on the western half, may pose a threat to shallow soil, this finding has been identified as a REC for the subject property.
- **R** The propane tank along the northern fence line was reported by the owner to have had a leak on to the concrete pad which resulted in the shutdown of the tank. This leak was likely from liquid condensate accumulating at the tank bottom that was formed from the propane gas. The liquid condensate from propane gas would contain various hydrocarbons including propane and is identified as a REC for the subject property.

Although not a REC per the ASTM definition, the following items are noted, and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:

- Historical uses of the subject property included a plating facility that operated on the subject property from approximately 1984 to 1996. According to business plan hazardous materials stored on the facility included: sulfuric acid (maximum 8 4-gallon glass bottles), hydrochloric acid (maximum 6 half-gallon bottles), phosphoric acid (maximum 15 gallons in a polypropylene drum), phosphorous acid (maximum 20 pound in 5 pound glass bottles), hydrogen peroxide (maximum 15 gallons in a polypropylene drum), sodium hydroxide (maximum 20 pounds in a polypropylene pail), nickel sulfate and nickel chloride (maximum 250 gallons in polypropylene tanks).
- The Depue Airport and Depue Ranch operations included USTs for vehicle/aircraft fueling.
- A concrete rubble pile containing soil located near the northwest corner. The rubble pile covers approximately 2,300 sq. ft.

- Outdoor equipment storage areas and historical aircraft parking areas located along the eastern perimeter.
- At least three active and one former septic system locations associated with the current residences.
- An active domestic-use water supply well located along the eastern boundary of the subject property.
- According to FEMA's Flood Zone Designations, the subject property is in a Zone D, which represents an area of undetermined flood hazard. Given the area designation, flooding may represent a potential risk.
- Potential ACM/LBP in the existing single-story home.
- The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 3.35 miles to the northwest of the subject property (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the subject property, it is not identified in the EDR Report, and TRC does not consider it to be a REC. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area.

## CRECs

This assessment has revealed no evidence of CRECs in connection with the subject property.

## HRECs

This assessment has revealed no evidence of HRECs in connection with the subject property.

## De Minimis Conditions

This assessment has revealed no evidence of de minimis conditions in connection with the subject property.

## Recommendations

The following recommendations are provided:

- Conduct a geophysical survey in the vicinity of the suspected former UST locations and surrounding areas for the purpose of identifying any detectable buried USTs and/or, related piping, conduit, or buried excavations that may be present in the subsurface within the subject property perimeter boundaries.
- Select soil boring locations based on the results of the geophysical survey and advance soil borings for the purpose of collecting soil (and groundwater if encountered) samples for laboratory analytical analysis. Additionally, select soil boring locations based on the current/historical use of the property and areas of concern.
- If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, the potential presence of septic systems associated with the existing structures, and/or buried structures or piping are identified, further evaluations and soil sampling would be recommended.

- A domestic-use water supply well was identified to be associated with the subject property. If it is not planned for future use, the well and/or associated equipment should be properly abandoned in accordance with San Bernardino County regulations for the destruction of water wells.
- The subject property contains a pile of concrete rubble and soil, two piles of green waste/debris, and three propane tanks. The items should be addressed during closing and/or development.

**D**

TRC has made an appropriate inquiry into the commonly known and reasonably ascertainable resources concerning the historical ownership and use of the subject property back to the first development per Section 8.3.8 of ASTM Practice E1527-21. Data gaps identified during this assessment include the following:

1. A completed User Questionnaire was not provided by the User of this assessment. See Section 3.0 for additional information.
2. A completed Owner Questionnaire was not provided to TRC by the owner of the subject property. See Section 5.0 for additional information regarding the interview of the owner.

Based on other historical sources reviewed, Data Gaps Number 1 and 2 are not considered significant.

**d** **d** **D**

### *7.7.1 Accuracy and Completeness*

ASTM Practice E1527-21 recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 7.6.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals less than 5 years is not required.

The Client is advised that the Phase I ESA conducted at the subject property is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the subject property. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the subject property is free of RECs or environmental impairment; iii) that the subject property is "clean;" or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM Standard and intended scope of this assessment. Specific limiting conditions identified during the site reconnaissance are described in Section 6.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated

more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's site reconnaissance observations, findings, and conclusions as they existed at the time of the site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are or have been in compliance with applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed subject property conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

### *7.7.2 Warranties and Representations Disclaimer*

TRC prepared this document solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or subject property description; or (4) information

regarding off-site location(s) (with possible impact to the subject property) not published in publicly available records.

### *7.7.3 Continued Validity/User Reliance*

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in ASTM Practice E1527-21, for a period of 180 days from the completion of each component using the dates provided in Section 8, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to ASTM Practice E1527-21, this report is presumed valid if the required components are completed fewer than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

### *7.7.4 Significant Assumptions*

During this Phase I ESA, TRC relied on database information; interviews with subject property representatives, regulatory officials, and other individuals having knowledge of subject property operations; and User-provided information as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. [illegible] Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Copyright 2024 by Environmental Data Resources, LLC. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, LLC, or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

□DD□□□□□□□□□□R□□M□□□□□R□□□RD□

***Local Lists of Hazardous waste / Contaminated Sites***

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/16/2024 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

***Lists of Federal NPL (Superfund) sites***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/20/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/04/2023

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

UST CLOSURE: Proposed Closure of Underground Storage Tank (UST) Cases
UST cases that are being considered for closure by either the State Water Resources Control Board or the Executive Director have been posted for a 60-day public comment period. UST Case Closures being proposed for consideration by the State Water Resources Control Board. These are primarily UST cases that meet closure criteria under the decisional framework in State Water Board Resolution No. 92-49 and other Board orders. UST Case Closures proposed for consideration by the Executive Director pursuant to State Water Board Resolution No. 2012-0061. These are cases that meet the criteria of the Low-Threat UST Case Closure Policy. UST Case Closure Review Denials and Approved Orders.

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

Data Release Frequency: Semi-Annually

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## □□□□R□D□□□B□□□□□□

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

**USGS TOPOGRAPHIC MAP**

| | |
|---|---|
| Target Property Map: | 50004542 HODGE, CA |
| Version Date: | 2021 |
| Southeast Map: | 50005277 BARSTOW SE, CA |
| Version Date: | 2021 |

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

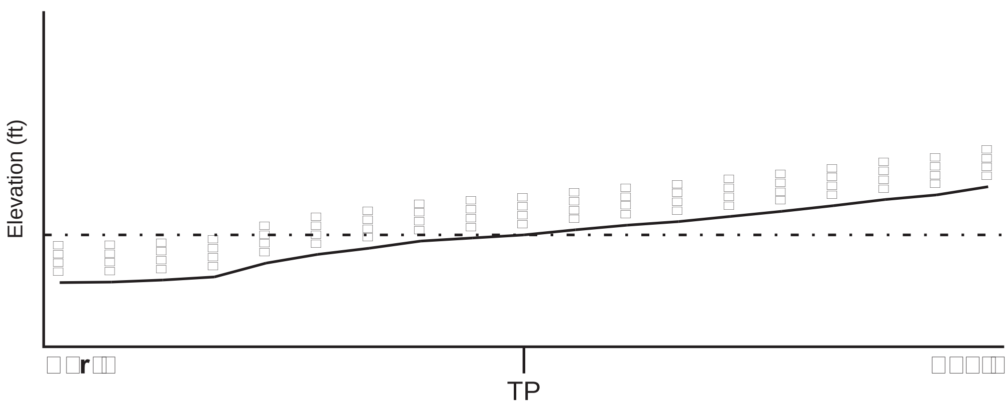

1. Groundwater flow direction, and
2. Groundwater flow velocity.

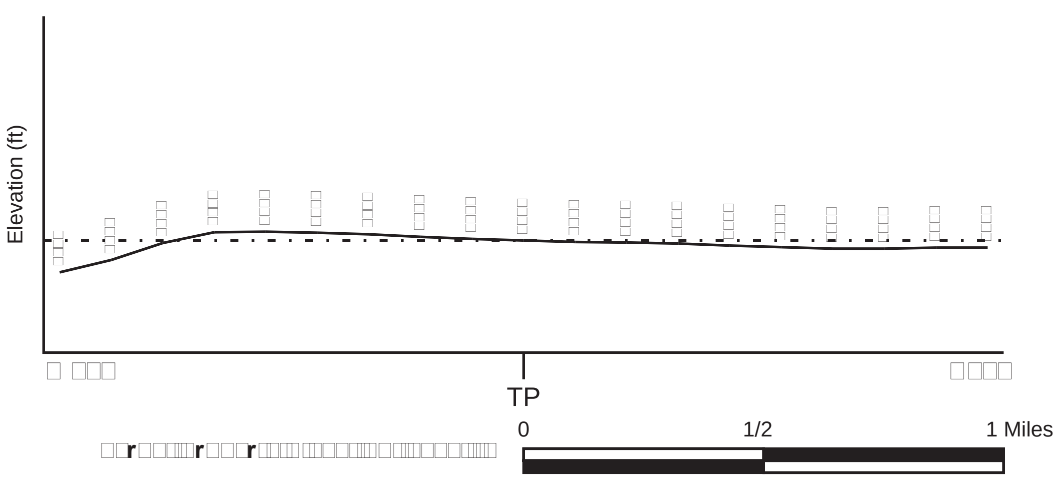

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells.  Groundwater flow velocity is generally impacted by the nature of the geologic strata.

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

General Topographic Gradient: General NNE

Source: Topography has been determined from the USGS 7.5’ Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 06071C4507H | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 06071C4526H | FEMA FIRM Flood data |
| 06071C4509H | FEMA FIRM Flood data |

### NATIONAL WETLAND INVENTORY

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| NOT AVAILABLE | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

Search Radius: 1.25 miles
Status: Not found

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW[R] Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## GEOCHECK® - PHYSICAL SETTING SOURCE RECORDS SEARCHED

### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC Environmental Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

# EXECUTIVE SUMMARY

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

## RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

## RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

# EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

# EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***
Please contact EDR at 1-800-352-0050
with any questions or comments.

# QUIT CLAIM

**Title of Document**

**Pursuant to Senate Bill 2 – Building Homes and Jobs Act (GC Code Section 27388.1), effective January 1, 2018, a fee of seventy-five dollars ($75.00) shall be paid at the time of recording of every real estate instrument, paper, or notice required or permitted by law to be recorded, except those expressly exempted from payment of recording fees, per each single transaction per parcel of real property. The fee imposed by this section shall not exceed two hundred twenty-five dollars ($225.00).**

**Reason for Exemption:**

- ☐ Exempt from fee per GC 27388.1, recorded in connection with a transfer subject to the imposition of documentary transfer tax (DTT), or
- ■ Exempt from fee per GC 27388.1, recorded in connection with a transfer of real property that is a residential dwelling to an owner-occupier, or
- ☐ Exempt from fee per GC 27388.1, recorded in connection with a transfer that was subject to documentary transfer tax which was paid on document recorded previously on _____(date) as document number _____of Official Records. (Cap. $225.00)
- ☐ Exempt from fee per GC 27388.1, fee cap of $225.00 reached, and/or
- ☐ Exempt from fee per GC 27388.1, not related to real property

**Failure to include an exemption reason will result in the imposition of the $75.00 Building Homes and Jobs Act fee. Fees collected are deposited to the State and may not be available for refund.**

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

# GLOSSARY

**General Building Department concepts**

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

# GLOSSARY

**Permit Content Definitions**

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

**Sample Building Permit Data**

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

- Hydrographic Feature

**MAP PANELS**
- Digital Data Available
- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 5/13/2024 at 12:09 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The California Public Records Act (Government Code Section 6250 et seq.) provides California citizens with important rights to obtain access to records held by public agencies in the State. In recent years the City of Barstow has experienced a substantial growth in the volume of requests for public records and the staff time required to respond to such requests, particularly with respect to requests for documents relevant to disputes between private parties. The purpose of this policy is to clarify for the public, attorneys, insurance adjusters and private investigators, the process by which the City will respond to requests for records under the Public Records Act.

1. All requests for public records shall be in writing on a form approved by the City Council, unless the request is to review an agenda or agenda reports of the City or a City Commission or committee, the Municipal Code, the General Plan or the Uniform Building Codes, which are available in the City Clerk's Office.

2. The City Clerk will respond to all requests as soon as possible, but not later than the ten-day period, or extensions thereof, as provided by Government Code Section 6253.

    a. The City Clerk shall review the request and determine whether the request seeks identifiable records and, if not, the City Clerk shall assist the person making the request to identify records and information that are responsive to the request or to the purpose of the request, if stated.

    b. The City Clerk shall request all City Departments which may have the records requested to search their files and report back to the City Clerk on whether the Department has the records and, if so, when the records can be made available to the person seeking them.

    c. The City Clerk shall respond to the person requesting records by advising him or her in writing of the availability of the documents, a description of the information technology and physical location in which the records exist, and whether any of the documents are exempt from disclosure under the provisions of the Public Records Act. To the extent feasible, the City Clerk will provide suggestions for overcoming any practical basis for denying access to the records or information sought in compliance with the Public Records Act.

    d. If a request is made for copies of the records, the City Clerk shall also advise the person requesting copies of the estimated costs of copying the records requested.

    e. The person requesting the copies shall pay the per page charge for copying as set forth by resolution of the City Council for all copies requested. The City Clerk shall not make the requested copies until a deposit in the amount of the estimated costs of copying is received and shall not release the copies until the full cost of copying is paid to the City.

3. In accordance with the Public Records Act, the City will provide only specific identifiable records but will not research City records for particular types of information or analyze information, which may be contained within public records.

4. The City will respond to requests for public records in accordance with the terms of the California Public Records Act as the Act now exists or may hereafter be amended, and nothing in this Policy is intended nor shall it be construed to conflict with the terms of the Public Records Act.

**[NOTICE: THIS IS AN EXTERNAL EMAIL]**

Hi Maribel,

I wanted to follow up to confirm that these parcels are out of the City of Barstow's jurisdiction.

Thanks,

Environmental Engineer

**[NOTICE: THIS IS AN EXTERNAL EMAIL]**

Hi,

I made this records request with Maria Chavez and it looks like she is out of office, are either of you able to help me with this request? I made about 8 requests, let me know if you will be able to and I will forward you the other requests as well.

**SUBJECT: CERTIFIED RECORD SEARCH FINDINGS**
**33326 DELANEY ROAD, BARSTOW, CALIFORNIA**

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search.

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at hazmatrecords@sbcfire.org to arrange an appointment for a file review.

**ACTIVE PERMIT FACILITIES:** (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

No record of active permit facilities identified in this search.

**INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES:** (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).

***personal use. They had all 3 USTs removed and they are not in use. The file does not contain any permits and/or any permits to remove the USTs.***

**HAZARDOUS MATERIAL INCIDENT AND/OR COMPLAINT RESPONSE ACTIVITY:** (other records of spill notifications and/or complaints not listed below may also exist in facility permit files).

No record of hazardous material incident and/or complaint response activity identified in this search.

**SITE REMEDIATION:** (Underground Storage Tank Clean-Up under Local Oversight Program or Voluntary Hazardous Waste Clean-Up activity under Local Jurisdiction) (documents may be included in regular active or inactive permit files listed above).

No record of site remediation identified in this search.

Records searched include permit database systems for facilities with permits as hazardous waste generators, hazardous materials handlers, and/or underground storage tanks, including inactive and/or out of business records; logs of permits issued for the removal and/or installation of underground storage tanks; records and databases pertaining to illicit dumping and releases; records of non-permitted facilities; sites undergoing remediation for contaminated soil and/or groundwater; and incidents responded to by the hazardous materials emergency response team. Records searched date back to the mid-1980's. Please note if a facility has completed a submission in CERS, the most recent submission can be made available for review upon request.

**Records consist of 2 files, approximately 1 ½" thick, combined.** You may contact us at hazmatrecords@sbcfire.org to request and schedule a file review appointment to view the file(s).

REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS

# RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Protection District (SBCFPD) any record relating to contamination or reports of spills at a particular site. An Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by SBCFPD, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, which can be a useful tool in providing a history of compliance or non-compliance.

Once SBCFPD has completed its records search, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be prepared and issued. Such report will detail all SBCFPD records associated with a particular site by type, date, location, and status (where applicable). All files identified in an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.

If the completed records search reveals no SBCFPD record of hazardous material activity at the site, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description. If possible, please attach a map to this request form.

## SITE INFORMATION

| Property Owner or Business Name | Location (Site Address and/or Assessor Parcel No.) | City/Community |
|---|---|---|
| Multiple | Multi. - 3649 W. Main Street / 33326 Delany Road Parcel 0421-082-48 | Barstow |

Please provide your name, the company you represent, and contact information below.

** IMPORTANT – THIS PAGE MUST BE SIGNED PRIOR TO SUBMITTAL **

**DISCLAIMER:** While all attempts are made to provide accurate, current, and reliable information, San Bernardino County Fire Protection District *(further referred to as SBCFPD)* recognizes the possibility of human error. Therefore, SBCFPD, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report and provides an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report "as is" with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall SBCFPD be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. SBCFPD therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

**RELEASE AND INDEMNIFICATION:** In consideration for the issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge SBCFPD, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of SBCFPD, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report.

In further consideration for SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless SBCFPD, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report brought by any third party.

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my **REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.**

**I hereby request an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.**

- I am including payment of the initial fee of $136.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Protection District, or by credit card payment listed over the phone. I understand that **research exceeding one hour will be billed at the rate of $136.00 for each additional hour spent by SBCFPD in completing this request.**

☒ I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

HAZARDOUS WASTE SECTION

**SUPPLEMENTAL GENERATOR INSPECTION REPORT**

TIME:

INSPECTOR: CHARLES C. AUSTIN

FACILITY NAME: DIAMOND PACIFIC TOOL CORP

FACILITY LOCATION: 33326 DELANEY RD BARSTOW 92311

PHONE CALL TO MR DEPUGS.

5/19/93: PLATING PROCESS CONSISTS OF FIRST WASHING THE STEEL PART IN AN ALKALINE SOLUTION WHICH CAN BE KEPT BELOW A PH OF 12.5 WITH NO PROBLEMS. THE STEEL PART IS THEN TREATED IN AN ACID BATH BEFORE IT IS PLACED IN A NICKEL SULPHATE BATH FOR NICKEL PLATING. ANODE BAGS ARE WASHED FREE OF NICKEL SULPHATE AND THE NICKEL SULPHATE GOES BACK INTO THE BATH FOR REUSUAL.

THE NEUTRALIZATION OF THE CHEMICALS.

WEAK ACID BATH

$NaOH + H_2SO_4 \rightleftharpoons NHSO_4 + H_2O$

$NaOH + NHSO_4 \rightleftharpoons NaSO_4 + H_2O$

THE ONLY THING LEFT TO DO NOW IS A REINSPECTION AND IF THE PH IS BETWEEN 2 AND 12.5 THIS FACILITY IS NOT A GENERATOR BUT JUST A HANDLER OF HAZARDOUS MATERIALS BASED ON THE HANDLING OF OVER 55 GALLONS OF NICKEL SULPHATE. A WDR MAY BE REQUIRED BY THE LA HONTAN REGIONAL WATER QUALITY BUT LA HONTAN IS NOT ORDINARILY INTERESTED IN WASTE DISCHARGE OF 13 GALLONS OF $NaSO_4$ A MONTH.

ROUTINE INSPECTION

PRE INSPECTION CONFERENCE AND EXIT REVIEW WITH MR BILL DEPUE AT THE MAIN ST OFFICE.

INSPECTION OF SMALL PLATING SHOP REVEALED 2 100 GALLON CONTAINERS OF NICKEL SULPHATE. ONLY ONE OF THE TANKS IS USED ON A REGULAR BASIS. WASH SOLUTION CONSISTS OF SODA ASH AND ACTIVATED CHARCOAL. THERE IS SOME QUESTION AS TO WHETHER THE WASTE SOLUTIONS ARE HAZARDOUS OR NOT. MR DEPUE STATED THAT HE WILL ASSAY SAMPLES OF THE WASTES AND CALL ME BACK.

(DURING EXIT THE INSPECTION)
THERE IS ALSO AN ACID AND BASE BATH AT THIS FACILITY. MR DEPUE STATES THAT HE NEUTRALIZES ABOUT 13 GALLONS OF ACID AND BASE A MONTH. THEN HE DUMPS THE NEUTRALIZED LIQUID ON A SMALL AIRPORT RUNWAY. A TEST OF THE ACID AND BASE BATH REVEALED THAT THE ACID WAS BELOW 2 AND THE BASE WAS ABOVE 12.5. MR BILL DEPUE STATED THAT HE CAN OPERATE WITH THE ACID AND BASE WITHIN A PH RANGE WHICH IS NOT HAZARDOUS. THEREFORE WHEN HE TREATS THE CHEMICALS HE WOULD NOT BE TREATING HAZARDOUS WASTES.

Dear Mr. Austin:

The steps in our nickel plating process are as follows:

1. Clean steel ring in Porenac non-phosphated alkaline cleaner (The active ingredient is NaOH--the same as Drano.)
2. Rinse in de-ionized water--which is eventually added to the cleaning solution to replace water lost by evaporation.
3. Rinse in hot tap water.
4. Activate steel surface in dilute sulfuric acid.
5. Plate in nickel plating bath. A recent bath analysis is enclosed.
6. Rinse in de-ionized water which is eventually added to the plating bath to replace water lost by evaporation.
7. Rinse in tap water.

I'm enclosing a copy of the MSDS for Porenac for your information.

Sincerely,

Bill E. Depue

| Boiling Point - 760mm Hg | | % Volatile by Volume | 0 |
| Vapor Pressure, mm Hg @ 20° C. | | | |
| Specific Gravity ($H_2O$ = 1) | ~ 1.3 | | |
| Solubility in Water | 2 lb./gal. | | |
| Appearance and Odor | White granular product/no obnoxious odor. | | |

## SECTION IV — FIRE AND EXPLOSION HAZARD DATA

| | | | | | |
|---|---|---|---|---|---|
| FLASH POINT (TEST METHOD) | Not Combustible | AUTOIGNITION TEMPERATURE | | | |
| FLAMMABILITY LIMITS IN AIR — % BY VOLUME | | LOWER | | UPPER | |
| EXTINGUISHING MEDIA | ☐ WATER FOG ☐ FOAM (Type) ☐ $CO_2$ ☐ DRY CHEMICAL ☐ OTHER | | | | |
| SPECIAL FIRE-FIGHTING PROCEDURES | Forms alkaline solutions when mixed with water. Avoid contact. | | | | |
| UNUSUAL FIRE AND EXPLOSION HAZARDS | | | | | |

## EMERGENCY TELEPHONE NUMBER

(313) 281-0930

*This number is available days, nights, weekends, and holidays.*

## SECTION — HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE 3mg/m³ for mixture.

EFFECTS OF OVEREXPOSURE

Corrosive to skin, eyes, and mucous membranes.

If swallowed, may cause severe gastric irritation, including nausea, vomiting, pain, perforation of GI tract.

If inhaled, choking dust, irritation of mucous membranes.

FIRST AID PROCEDURES

| | | |
|---|---|---|
| EYES<br><br>FLUSH WITH FLOWING WATER AT LEAST 15 MINUTES | **POISON CALL A PHYSICIAN**<br>**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Wash clothing before re-use; discard contaminated shoes.<br>If swallowed, dilute by drinking large quantities of water or milk. Do NOT induce vomiting.<br><br>If inhaled, remove to fresh air, if not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. | NEVER GIVE FLUIDS OR INDUCE VOMITING IF PATIENT IS UNCONSCIOUS OR HAVING CONVULSIONS |

## SECTION VI — REACTIVITY DATA

| | | | |
|---|---|---|---|
| STABILITY | UNSTABLE | | CONDITIONS TO AVOID |
| | STABLE | X | |

INCOMPATIBILITY Attacks aluminum violently and liberates hydrogen.

HAZARDOUS DECOMPOSITION PRODUCTS

| | | | |
|---|---|---|---|
| HAZARDOUS POLYMERIZATION | MAY OCCUR | | CONDITIONS TO AVOID |
| | DOES NOT OCCUR | | |

## SECTION VII — SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE OF SPILLS

Sweep up. Dissolve in cool water. Dispose to drain. Rinse affected area with water.

WASTE DISPOSAL METHOD

Alkaline may require neutralization to specified pH range before disposing to sewer. No phosphorus.

*CONSULT LOCAL AND STATE LAWS*

## SECTION VIII — SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION dust mask

| | | |
|---|---|---|
| VENTILATION | LOCAL EXHAUST if dust or mist is generated, or for hot solutions. | SPECIAL |
| | MECHANICAL (General) | OTHER |

PROTECTIVE CLOTHING Rubber or Plastic Gloves EYE PROTECTION Goggles/Face Shield

OTHER Aprons, coveralls, as necessary to prevent skin contact. Safety Shower, Eye bath.

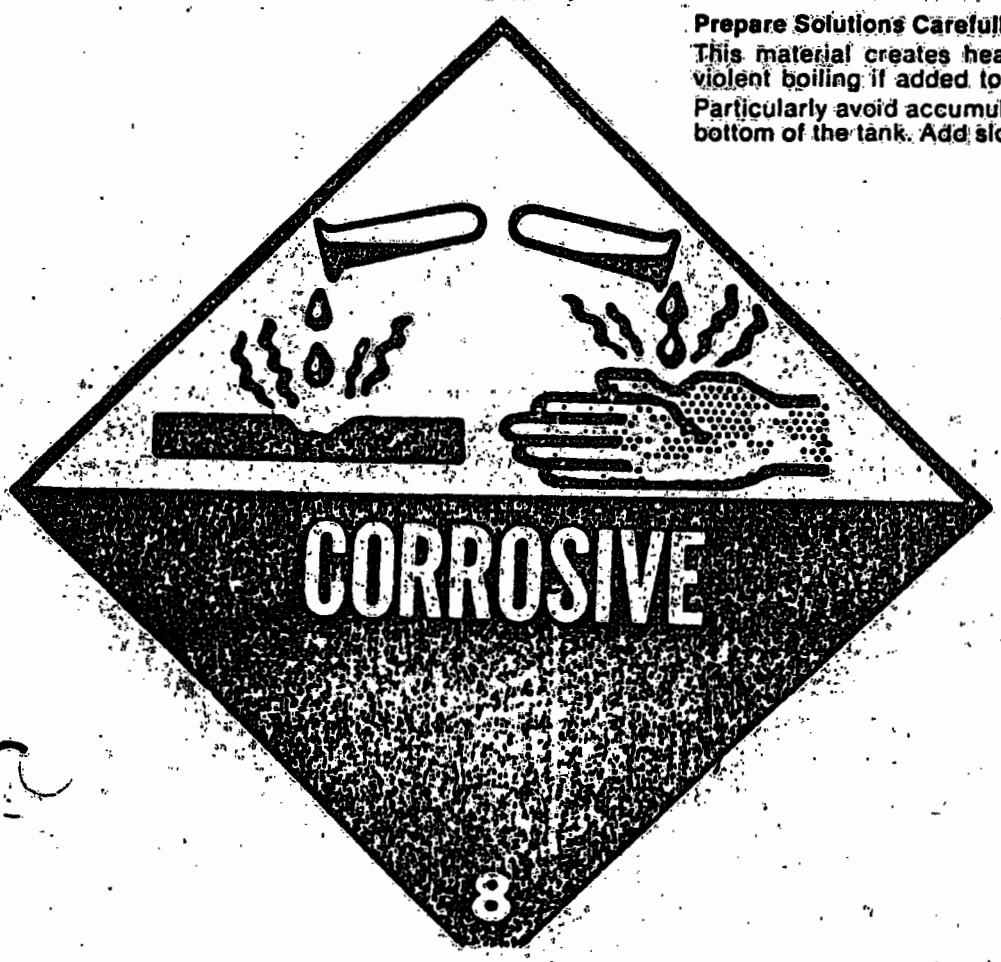

While Wyandotte Division of The Diversey Corporation believes the data set forth herein are accurate as of the date hereof, Wyandotte Division of The Diversey Corporation makes no warranty with respect thereto and expressly disclaims all liability for reliance thereon. Such data are offered solely for your consideration, investigation and verification

## SECTION IX — SPECIAL PRECAUTIONS

| | |
|---|---|
| **PRECAUTIONARY LABELING**<br><br>**PORENAC** | **DANGER: CAUSES SEVERE BURNS. MAY BE FATAL IF SWALLOWED. HARMFUL IF INHALED.**<br>Contains strong alkaline salts.<br>Do not get in eyes, on skin, on clothing. Avoid breathing dust or mist. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling.<br>**PRECAUTION:** When handling, wear goggles or face shield. While making solutions, add slowly to surface of solution to avoid violent spattering.<br>**KEEP OUT OF REACH OF CHILDREN.**<br><br>**POISON — CALL A PHYSICIAN**<br>**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Wash clothing before re-use, discard contaminated shoes.<br>If swallowed, dilute by drinking large quantities of water or milk. Do NOT induce vomiting.<br>Exception: Never give anything by mouth to a victim having convulsions or unconscious.<br>If inhaled, remove to fresh air, if not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. |
| **HANDLING AND STORAGE CONDITIONS** | Keep dry. Do not store with strong acids.<br>Keep away from children. DO NOT INGEST. |

**Prepare Solutions Carefully.**

This material creates heat while dissolving and may cause violent boiling if added too rapidly to hot water or solutions. Particularly avoid accumulation of undissolved material in the bottom of the tank. Add slowly to solution with good agitation.

HAZARDOUS WASTE GENERATOR PRODUCTION PROCESS FLOW CHART

County of San Bernardino - Department of Environmental Health Services

Bill Depue SVS

| List of all Raw Materials Used | Production Process/Final Product (short narrative) | Hazardous Wastes | Amount |
|---|---|---|---|
| 1. Facility has a small nickel plating shop; plating onto | | | |
| 2. cutting tools | | | |
| 3. | | | |
| Alkaline cleaner (20 gallon) → rinse → | → Brighten $H_2SO_4$ (35 gallon) → | Nickel bath (2 × 100 gallon) → static sold → | static bath |
| 5. | | | |
| 6. Mr Depue claims concentration of nickel gets to high so he | | | |
| 7. must decant a portion of the bath and add DI water. | | | |
| 8. Decanted plating solution is evaporated. Then stored in | | | |
| 9. plastic trash cans. Mr Depue, at first, insisted that it was | | | |
| 10. not waste (dried $NiCl/SO_4$). I convinced him that since it was | | | |
| 11. removed as a liquid and he altered the physical state - not to | | | |
| mention allowing contaminants to be introduced (blowing sand | | | |
| 13. etc) that it would be easy to prove legally that it is indeed | | | |
| 14. a waste. | | | |
| 15. I also told him to treat the carbon filters as waste | | | |
| 16. Has 2 evaporation, poly propylene tanks. Told him to get receipts | | | |

**The following violations have been noted and must be corrected as follows:**

Mfr. of diamond grinding wheels
steel rim electroplated with ~~copper~~ nickel
(+ diamond particles)
motors manufactured outside, injection
molding done at
small machine shop - no disposal of
water soluble oils & coolants
VACUUM forming machine to seal
packages
(poly + diamond dust → to set on wheels
plating tanks — 100 gallons —
titanium basket with nickel
pit equipped with $H_2SO_4$, phosphoric acid or
phosphorous acid. 160 lbs IN TANK
tank made of polyethylene plastic
additional 110 gallon tank not in use

**ADDITIONAL COMMENTS:** pumps on tanks shut down when staff not present
- alcaline cleaner, rinse, acid dip ($H_2SO_4$)
in preparation for plating,
alkaline cleaner + sulfuric acid neutralized —
placed on private runway
PERMIT ISSUED.

Nickel Sulfate

## HEALTH HAZARD DATA

**Effects of Overexposure and Primary Entries to Body:**

Primary entry through skin.
Possible skin sensitization resulting in chronic eczema or "nickel itch."

**Emergency and First Aid Procedures:**

Wash skin with soap and water.
Flush eyes with water for at least 15 minutes. If any irritation persists, see a physician.

## REACTIVITY DATA

☒ Stable ☐ Unstable **Conditions to Avoid:**

**Incompatability — Materials to Avoid:**

NA

**Hazardous Decomposition Products:**

NA

**Hazardous Polymerization:**

☐ May Occur ☒ Will Not Occur

## SPILL OR LEAK PROCEDURES

**Spills:**

Collect spilled material in the most convenient and safe manner for reclamation or disposal.

**Waste Disposal Methods:**

Dispose of in sealed containers in an EPA approved landfill. Nickel in solution can be precipitated as the carbonate or hydroxide and reclaimed or disposed as above.

Follow all local, state and federal regulations.

## SPECIAL PROTECTION INFORMATION

**Respirator:** Use only respirators approved by NIOSH or MSHA

**Ventilation:** Mechanical. Sufficient to keep below TLV limit.

| Gloves: | Eye and Face: | Other: |
|---|---|---|
| Rubber | Chemical Goggles | Sufficient to prevent skin contact |

**Handling and Storage:**

Avoid breathing dusts or mists.
Keep containers tightly closed.

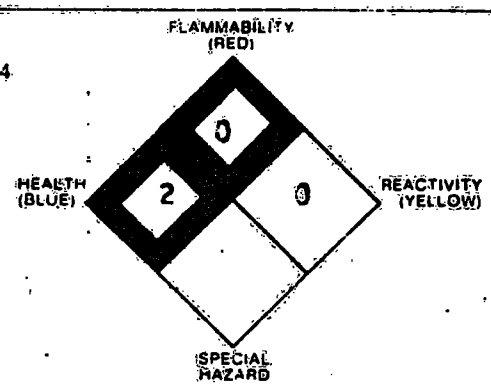

THIS PRODUCT SAFETY DATA SHEET IS OFFERED SOLELY FOR YOUR INFORMATION, CONSIDERATION AND INVESTIGATION.
McGEAN-ROHCO, INC. PROVIDES NO WARRANTIES, EITHER EXPRESS OR IMPLIED, AND ASSUMES NO RESPONSIBILITY FOR ACCURACY OR COMPLETENESS OF THE DATA CONTAINED HEREIN.

## IDENTIFICATION

INFORMATION PROVIDED BY...: FMC CORPORATION
2000 MARKET STREET
PHILADELPHIA PA 19103

## PRODUCT INFORMATION

SYNONYMS.....: ORTHOPHOSPHORIC ACID, MONOPHOSPHORIC ACID
SHIPPING NAME - DOT.....: PHOSPHORIC ACID
IATA.....: PHOSPHORIC ACID
IMCO.....: PHOSPHORIC ACID
FORMULA.....: H3PO4
CHEMICAL FAMILY.....: PHOSPHATE

## PRECAUTIONARY INFORMATION

PRECAUTIONARY STATEMENT..: (PLEASE USE THIS STATEMENT TO SATISFY THE IN-PLANT LABELING REQUIREMENTS OF THE OSHA HAZARD COMMUNICATIONS STANDARD 29CFR 1910.1200)

HEALTH:
LIQUID IS CORROSIVE TO EYES AND SKIN. MIST PRODUCES IRRITATION TO EYES, NOSE, THROAT AND LUNGS.

PHYSICAL: NO SIGNIFICANT HAZARD.

FIRST AID:
IN CASE OF CONTACT, IMMEDIATELY FLUSH EYES WITH PLENTY OF WATER FOR AT LEAST 15 MINUTES. CALL A PHYSICIAN. FLUSH SKIN WITH WATER.

## INGREDIENTS

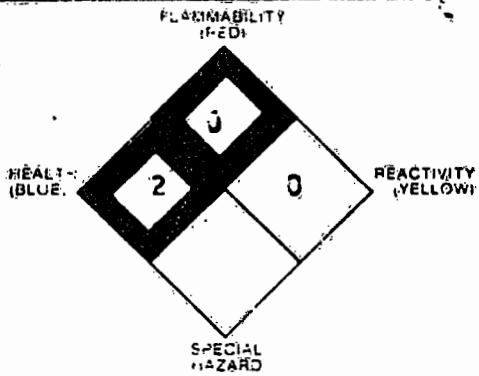

CAS# AND COMPONENT.....:

MATERIAL OR COMPONENT: PHOSPHORIC ACID
PERCENT : 70-85
CAS# : 7664-38-2
HAZARD CLASS : CORROSIVE
MATERIAL OR COMPONENT: WATER

REVISION: J EFFECTIVE: 10/17/85 PRINTED: 11/09/85

## EMERGENCY AND FIRST AID PROCEDURES

NOTES TO PHYSICIAN.....:

MODERATELY CORROSIVE AGENT WHICH MAY BURN ANY EXPOSED TISSUES UPON OTHER THAN VERY BRIEF CONTACT. EYES, SKIN AND MUCOUS MEMBRANES SHOULD BE FLUSHED THOROUGHLY WITH WATER, AND OPHTHALMOLOGIC CONSULTATION SHOULD BE OBTAINED FOR ANY CORNEAL BURNS. IN CASES OF INGESTION, IMMEDIATE DILUTION WITH WATER, MILK OR DEMULCENTS IS WORTHWHILE, BUT ATTEMPTS TO NEUTRALIZE WITH A BASE SHOULD BE AVOIDED BECAUSE OF EXCESSIVE GAS AND HEAT FORMATION, WHICH MAY INCREASE THE THREAT OF ESOPHAGOGASTRIC PERFORATION. VOMITING AND DIARRHEA (LAXATIVE EFFECT OF PHOSPHATES) ARE EXPECTED WITH LARGE DOSES.
PARENTERAL FLUID ADMINISTRATION MAY BE NEEDED IF LOSSES THEREFROM ARE SEVERE, OR IF SHOCK ENSUES. SUPPORTIVE CARE MAY BE NEEDED FOR SUCH OTHER COMPLICATIONS AS GLOTTAL EDEMA, HEMATEMESIS AND PERFORATION (UNLIKELY). INDUCED VOMITING SHOULD BE AVOIDED BECAUSE LOCAL TISSUE INJURY MAY BE AGGRAVATED, BUT THE PATIENT SHOULD BE WATCHED FOR HYPERPHOSPHATEMIA AND HYPOCALCEMIA. MILK OR OTHER DEMULCENTS MAY BE WORTHWHILE FOR GASTRIC IRRITATION.

## SPECIAL PROTECTION

VENTILATION REQUIREMENTS.:

ADEQUATE TO MEET MAXIMUM EXPOSURE LIMIT FOR ACID MIST OF 1 MG/CU. M IN 8 HOURS.

RECOMMENDED PERSONAL.....:
PROTECTIVE EQUIPMENT

PROTECT EYES AND SKIN FROM CONTACT.

RESPIRATORY.....:

FOR SEVERE MIST USE NIOSH/MSHA ACID GAS RESPIRATOR WITH FULL FACE PIECE OR IN SEVERE EXPOSURE USE SELF-CONTAINED BREATHING APPARATUS.

## EFFECTS OF OVEREXPOSURE

ACUTE EXPOSURE.....: IRRITANT, SLIGHTLY TOXIC WHEN INHALED OR INGESTED.

CHRONIC EXPOSURE.....: SLIGHTLY TOXIC WITH REPEATED INHALATION OR INGESTION. CAUSES BURNS TO EXPOSED TISSUE.

## EMERGENCY AND FIRST AID PROCEDURES

EYES.....: FLUSH WITH COPIOUS WATER FOR AT LEAST 15 MINUTES. IF IRRITATION PERSISTS, OBTAIN MEDICAL ATTENTION.

SKIN.....: WASH OFF WITH WATER. IF IRRITATION PERSISTS, OBTAIN MEDICAL ATTENTION.

INHALATION.....: REMOVE FROM EXPOSURE. IF BREATHING IS DIFFICULT OR DISCOMFORT PERSISTS, OBTAIN MEDICAL ATTENTION.

INGESTION.....: RINSE MOUTH WITH WATER; GIVE COPIOUS WATER TO CAUSE DILUTION IN STOMACH. DO NOT CAUSE VOMITING.

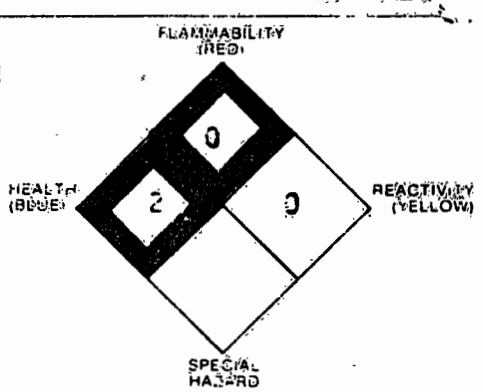

DECONTAMINATION PROCEDURE: WASH WITH COPIOUS WATER.

## FIRE, EXPLOSION AND REACTIVITY DATA

| | |
|---|---|
| DEGREE OF FIRE AND EXPLOSION HAZARD | HYDROGEN PEROXIDE ITSELF IS NONCOMBUSTIBLE. ON DECOMPOSITION, RELEASES OXYGEN WHICH MAY INTENSIFY FIRE. HYDROGEN PEROXIDE VAPORS AND MISTS ARE EXTREMELY IRRITATING TO EYES AND SKIN. |
| STABILITY | UNSTABLE |
| HAZARDOUS POLYMERIZATION | WILL NOT OCCUR |
| CONDITIONS TO AVOID | EXCESSIVE HEAT, CONTAMINATION OF ANY KIND. |
| MAJOR CONTAMINANTS THAT CONTRIBUTE TO INSTABILITY | REDUCING AGENTS. RUST, DIRT, ORGANIC MATERIALS, PH ABOVE 4. |
| INCOMPATIBILITY | IRON AND OTHER HEAVY METALS, GALVANIZED IRON. COPPERS, COPPER ALLOYS, RUST, DIRT, ORGANICS, WOOD, PAPER OR OTHER COMBUSTIBLES. |
| HAZARDOUS DECOMPOSITION PRODUCTS | OXYGEN WHICH SUPPORTS COMBUSTION. |

## EXPOSURE LIMITS

| | SOURCE | DATE |
|---|---|---|
| TLV = 1 PPM (1.5 MG/M3) TWA | ACGIH | 1985-6 |
| PEL = 1 PPM TWA | OSHA 1910 000 | 1985 |

## EFFECTS OF OVEREXPOSURE

**ACUTE EXPOSURE.....:** SEVERE IRRITANT TO EYES. NOSE. THROAT AND LUNGS. MAY CAUSE IRREVERSIBLE TISSUE DAMAGE TO EYES, INCLUDING BLINDNESS.

**CHRONIC EXPOSURE.....:** REPORTED TO BE CARCINOGENIC TO MOUSE DUODENUM WHEN ADMINISTERED AT A LEVEL OF 0.4% IN THE DRINKING WATER CONTINUOUSLY OVER A LIFETIME (108 WEEKS) (IARC 28:155, 1982).
THERE IS "LIMITED EVIDENCE" THAT H202 IS CARCINOGENIC TO EXPERIMENTAL ANIMALS, BASED ON A CHRONIC DRINKING WATER STUDY IN MICE (IARC:36, 1985). MICE EXPOSED TO 0.4% H202 IN DRINKING WATER FOR 108 WEEKS SHOWED AN INCREASED INCIDENCE OF DUODENAL CANCER, COMPARED TO CONTROL MICE. HOWEVER, IT IS IMPROBABLE THAT HUMANS WILL BE EXPOSED TO HIGH ORAL DOSES OF H202 DUE TO THE ACUTE TOXICITY OF CONCENTRATED SOLUTIONS AND THE CORROSIVITY OF H202 TO MUCOUS MEMBRANES. AN INDIVIDUAL WOULD THEORETICALLY HAVE TO DRINK 23 ML OF 35% H202 FOR A LIFETIME TO DEVELOP THE LESIONS SEEN IN MICE. SINCE THIS DOSE IS EXPECTED TO PRECIPITATE ACUTE TOXICITY AFTER ONE EXPOSURE, AS REPORTED FOR ACCIDENT VICTIMS (FED. REG. 48, 52323, 1983), ACCIDENTAL ORAL EXPOSURE TO H202 IS UNLIKELY. H202 IS APPROVED AS GRAS (GENERALLY RECOGNIZED AS SAFE) FOR USE AS A HUMAN FOOD ADDITIVE WITH NO RESIDUES.

## EMERGENCY AND FIRST AID PROCEDURES

**EYES.....:** IMMEDIATELY FLUSH WITH LARGE AMOUNT OF WATER FOR AT LEAST 15 MINUTES. SEE AN OPHTHALMOLOGIST.

**SKIN.....:** WASH WITH WATER.

REVISION: 6 0 EFFECTIVE: 01/06/87 PRINTED: 02/16/87

## EMERGENCY AND FIRST AID PROCEDURES

| | |
|---|---|
| INHALATION..... | REMOVE TO FRESH AIR. CALL A PHYSICIAN. |
| INGESTION..... | IF SWALLOWED, DRINK PLENTY OF WATER IMMEDIATELY TO DILUTE BUT DO NOT ATTEMPT TO INDUCE VOMITING. CALL A PHYSICIAN. |
| DECONTAMINATION PROCEDURE: | WASH AREA WITH LARGE AMOUNT OF WATER. |
| NOTES TO PHYSICIAN..... | HYDROGEN PEROXIDE AT THIS CONCENTRATION IS A STRONG OXIDANT. DIRECT CONTACT WITH THE EYE IS SUFFICIENTLY LIKELY TO CAUSE CORNEAL DAMAGE, ESPECIALLY IF NOT WASED AWAY IMMEDIATELY SO THAT CAREFUL OPHTHALMOLOGIC EVALUATION IS RECOMMENDED AND THE POSSIBILITY OF LOCAL CORTICOSTEROID THERAPY SHOULD BE CONSIDERED. BECAUSE OF THE LIKELIHOOD OF CORROSIVE EFFECTS AND THE UNLIKELIHOOD OF SYSTEMIC EFFECTS, ATTEMPTS AT EVACUATING THE STOMACH VIA EMESIS INDUCTION OR GASTRIC LAVAGE SHOULD BE AVOIDED. THERE IS A REMOTE POSSIBILITY, HOWEVER, THAT A NASOGASTRIC OR OROGASTRIC TUBE MAY BE REQUIRED FOR THE REDUCTION OF SEVERE DISTENSION DUE TO GAS FORMATION. |

## SPECIAL PROTECTION

| | |
|---|---|
| VENTILATION REQUIREMENTS.: | PROVIDE GENERAL AND LOCAL EXHAUST VENTILATION AS NECESSARY. CONTROL MISTS IN WORK AREA AT OR BELOW EXPOSURE GUIDELINES (TLV 1 PPM FOR 8 HRS.) |
| RECOMMENDED PERSONAL.....: PROTECTIVE EQUIPMENT | |
| RESPIRATORY.....: | FOR SEVERE VAPOR OR MIST (CONCENTRATION IN EXCESS OF 10 PPM) USE NIOSH CERTIFIED SELF-CONTAINED BREATHING APPARATUS. DO NOT USE OXIDIZABLE SORBANTS. |
| EYES.....: | CUP TYPE CHEMICAL GOGGLES AND/OR FULL FACE MASK IS RECOMMENDED. |
| GLOVES.....: | LIQUID PROOF RUBBER OR NEOPRENE. |
| SPECIAL CLOTHING..: AND EQUIPMENT | RUBBER FOOTWEAR. POLYESTER OR ACRYLIC FULL COVER CLOTHING. |

## STORAGE AND HANDLING

(PLEASE USE THIS STATEMENT TO SATISTY THE IN-PLANT LABELING REQUIREMENTS OF THE OSHA HAZARD COMMUNICATIONS STANDARD 29CFR 1910.1200)

AVOID EXCESSIVE HEAT. AVOID CONTAMINATION OF ANY KIND. CONTAMINATION MAY CAUSE DECOMPOSITION AND GENERATION OF OXYGEN GAS WHICH COULD RESULT IN HIGH PRESSURES AND POSSIBLE CONTAINER RUPTURE. HYDROGEN PEROXIDE SHOULD NOT BE STORED IN AN UNVENTED CONTAINER AND SHOULD BE TRANSFERRED ONLY IN A PRESCRIBED MANNER (SEE FMC TECHNICAL BULLETINS). NEVER RETURN UNUSED HYDROGEN PEROXIDE TO ORIGINAL CONTAINER. EMPTY DRUMS SHOULD BE RINSED WITH WATER BEFORE DISCARDING. UTENSILS USED FOR HANDLING HYDROGEN PEROXIDE SHOULD BE MADE ONLY OF THE FOLLOWING COMPATIBLE MATERIALS: GLASS, STAINLESS STEEL, ALUMINUM OR PLASTIC. STORAGE SHOULD CONFORM TO CONDITIONS DESCRIBED IN NFPA BULLETIN 43A (CODE FOR THE STORAGE OF LIQUID AND SOLID OXIDIZING MATERIALS). NFPA HAZARD CLASS II OXIDIZER

## DISPOSAL, SPILL OR LEAK PROCEDURES

PROCEDURE FOR RELEASE....: OR SPILL

DILUTE WITH A LARGE VOLUME OF WATER AND HOLD IN A POND OR DIKED AREA UNTIL THE H2O2 DECOMPOSES. DISPOSE OF ACCORDING TO THE METHODS OUTLINED BELOW FOR WASTE DISPOSAL

WASTE DISPOSAL METHOD....:

AN ACCEPTABLE METHOD OF DISPOSAL IS TO DILUTE WITH A LARGE AMOUNT OF WATER AND ALLOW THE HYDROGEN PEROXIDE TO DECOMPOSE FOLLOWED BY DISCHARGE INTO A SUITABLE TREATMENT SYSTEM IN ACCORDANCE WITH ALL LOCAL, STATE AND FEDERAL ENVIRONMENTAL LAWS, RULES REGULATION, STANDARDS AND OTHER REQUIREMENTS BECAUSE ACCEPTABLE METHODS OF DISPOSAL MAY VARY BY LOCATION AND BECAUSE REGULATORY REQUIREMENTS MAY CHANGE, THE APPROPRIATE REGULATORY AGENCIES SHOULD BE CONTACTED PRIOR TO DISPOSAL.

## SECTION I

| | |
|---|---|
| MANUFACTURER'S NAME: E. I. du Pont de Nemours & Co. (Inc.) | EMERGENCY TELEPHONE NO.: (302) 774-7500 |
| ADDRESS (Number, Street, City, State, and ZIP Code): Wilmington, DE 19898 | |
| CHEMICAL NAME AND SYNONYMS: Hydrochloric acid, muriatic acid | TRADE NAME AND SYNONYMS: Hydrochloric Acid Reagent |
| CHEMICAL FAMILY: Mineral Acid | FORMULA: HCl |

## SECTION II HAZARDOUS INGREDIENTS OF MIXTURES

N.A.*

## SECTION III PHYSICAL DATA

| | | | |
|---|---|---|---|
| BOILING POINT (°F) | 123 | SPECIFIC GRAVITY ($H_2O$=1) | 1.19 |
| VAPOR PRESSURE (mm Hg) | 160 | PERCENT VOLATILE BY VOLUME (%) | 100 |
| VAPOR DENSITY (AIR=1) | 1.27 | EVAPORATION RATE (butyl acetate =1) | greater than 1 |
| SOLUBILITY IN WATER | complete | | |
| APPEARANCE AND ODOR | Clear, colorless to light yellow fuming liquid with a pungent odor | | |

## SECTION IV FIRE AND EXPLOSION HAZARD DATA

| | | | |
|---|---|---|---|
| FLASH POINT (Method used): N.A. (non-flammable) | FLAMMABLE LIMITS: N.A. | LEL | UEL |

EXTINGUISHING MEDIA: Water, dry chemical, carbon dioxide, foam

SPECIAL FIRE FIGHTING PROCEDURES: Neutralize with chemically basic substances such as soda ash or slaked lime. Wear full protective clothing. Cool tank with water if exposed to fire.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Contact with common metals produces hydrogen gas which may form explosive mixtures with air.

## SECTION V HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE: 5 ppm (maximum allowable concentration according to ACGIH)

EFFECTS OF OVEREXPOSURE: Causes burns. Inhalation of fumes results in coughing and choking sensation.

EMERGENCY AND FIRST AID PROCEDURES: [illegible] with eyes with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. For inhalation, leave [illegible]. If not breathing, apply artificial respiration.

## SECTION VI REACTIVITY DATA

| STABILITY | | | CONDITIONS TO AVOID |
|---|---|---|---|
| | UNSTABLE | | |
| | STABLE | X | |

INCOMPATIBILITY (Materials to avoid)
Corrosive to most metals with evolution of hydrogen gas.

HAZARDOUS DECOMPOSITION PRODUCTS
Hydrogen chloride vapors, hydrogen

| HAZARDOUS POLYMERIZATION | | | CONDITIONS TO AVOID |
|---|---|---|---|
| | MAY OCCUR | | |
| | WILL NOT OCCUR | X | |

## SECTION VII SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Remove sources of ignition. Stay upwind of spill. If necessary to enter spill area, wear self contained breathing apparatus and full protective clothing including boots.

WASTE DISPOSAL METHOD
Flush thoroughly with water applied to entire spill. Washings should be neutralized with soda ash or lime before discharging to a sewer.

## SECTION VIII SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (Specific Type)
None for normal use

| VENTILATION | LOCAL EXHAUST | SPECIAL |
|---|---|---|
| | Maintain adequate ventilation | Maintain acid vapor air at 10 ppm or less. |
| | MECHANICAL (General) | OTHER |
| | Unknown | |

PROTECTIVE GLOVES Long rubber or plastic coated gloves

EYE PROTECTION Chemical safety goggles or face shield

OTHER PROTECTIVE EQUIPMENT
Rubber gauntlets, rubber apron, rubber boots, hard hat, long sleeve shirt

## SECTION IX SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING
Protect against physical damage. Store in cool, open or well-ventilated places, separated from all oxidizing materials. Keep container closed

OTHER PRECAUTIONS
Wash clothing before re-use. Keep containers out of sun and away from heat. Never use pressure to empty.

## EMERGENCY TELEPHONE NUMBER

(313) 281-0930

*This number is available days, nights, weekends, and holidays*

## SECTION V — HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE 3mg/$m^3$ for mixture.

EFFECTS OF OVEREXPOSURE

Corrosive to skin, eyes, and mucous membranes.

If swallowed, may cause severe gastric irritation, including nausea, vomiting, pain, perforation of GI tract.

If inhaled, choking dust, irritation of mucous membranes.

FIRST AID PROCEDURES

| EYES | POISON — CALL A PHYSICIAN | NEVER GIVE FLUIDS OR INDUCE VOMITING IF PATIENT IS UNCONSCIOUS OR HAVING CONVULSIONS |
|---|---|---|
| FLUSH WITH FLOWING WATER AT LEAST 15 MINUTES | **FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Wash clothing before re-use, discard contaminated shoes. If swallowed, dilute by drinking large quantities of water or milk. Do NOT induce vomiting. If inhaled, remove to fresh air, if not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. | |

## SECTION VI — REACTIVITY DATA

| | | | |
|---|---|---|---|
| STABILITY | UNSTABLE | | CONDITIONS TO AVOID |
| | STABLE | X | |

INCOMPATIBILITY Attacks aluminum violently and liberates hydrogen.

HAZARDOUS DECOMPOSITION PRODUCTS

| | | | |
|---|---|---|---|
| HAZARDOUS POLYMERIZATION | MAY OCCUR | | CONDITIONS TO AVOID |
| | DOES NOT OCCUR | | |

## SECTION VII — SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE OF SPILLS

Sweep up. Dissolve in cool water. Dispose to drain. Rinse affected area with water.

WASTE DISPOSAL METHOD

Alkaline may require neutralization to specified pH range before disposing to sewer. No phosphorus.

*CONSULT LOCAL AND STATE LAWS*

## SECTION VIII — SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION dust mask

| | | |
|---|---|---|
| VENTILATION | LOCAL EXHAUST if dust or mist is generated, or for hot solutions. | SPECIAL |
| | MECHANICAL (General) | OTHER |

PROTECTIVE CLOTHING Rubber or Plastic Gloves EYE PROTECTION Goggles/Face Shield

OTHER Aprons, coveralls, as necessary to prevent skin contact. Safety Shower, Eye bath.

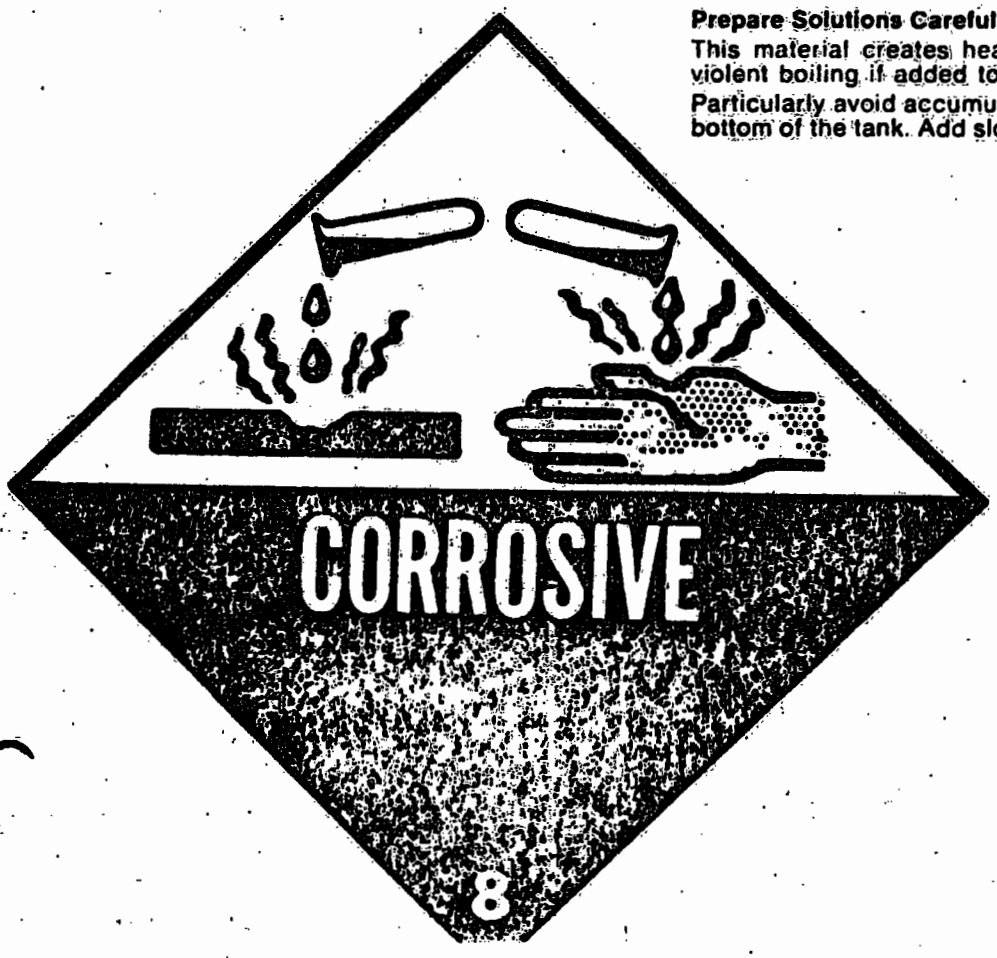

While Wyandotte Division of The Diversey Corporation believes the data set forth herein are accurate as of the date hereof, Wyandotte Division of The Diversey Corporation makes no warranty with respect thereto and expressly disclaims all liability for reliance thereon. ## SECTION IX — SPECIAL PRECAUTIONS

| | |
|---|---|
| PRECAUTIONARY LABELING<br><br>PORENAC | **DANGER: CAUSES SEVERE BURNS. MAY BE FATAL IF SWALLOWED. HARMFUL IF INHALED.**<br>Contains strong alkaline salts.<br>Do not get in eyes, on skin, on clothing. Avoid breathing dust or mist. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling.<br>**PRECAUTION:** When handling, wear goggles or face shield. While making solutions, add slowly to surface of solution to avoid violent spattering.<br>**KEEP OUT OF REACH OF CHILDREN.**<br><br>**POISON CALL A PHYSICIAN**<br>**FIRST AID:** In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes, while removing contaminated clothing and shoes. Wash clothing before re-use, discard contaminated shoes.<br>If swallowed, dilute by drinking large quantities of water or milk. Do NOT induce vomiting.<br>Exception: Never give anything by mouth to a victim having convulsions or unconscious.<br>If inhaled, remove to fresh air, if not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. |
| HANDLING AND STORAGE CONDITIONS | Keep dry. Do not store with strong acids.<br>Keep away from children. DO NOT INGEST. |

**Prepare Solutions Carefully.**

This material creates heat while dissolving and may cause violent boiling if added too rapidly to hot water or solutions. Particularly avoid accumulation of undissolved material in the bottom of the tank. Add slowly to solution with good agitation.

THE HARSHAW CHEMICAL COMPANY
MATERIAL DATA SHEET

DATE 4/19/72 FILE NO. 452-001-16

SUPPLIER THE HARSHAW CHEMICAL COMPANY EMERGENCY PHONE NO. (216) 721-8300

ADDRESS 1945 E.97th ST., CLEVELAND, OHIO 44106

PRODUCT NAME(S) Nickel Chloride

DESCRIPTION Green hydrated crystal. Water soluble. Approx. 10 lbs/gal.

PROTECTIVE EQUIPMENT Liquid proof hand protection. If ventilation control methods are not adequate, Bureau of Mines approved respiratory protection is recommended.

FIRST AID Skin - wash with water.
Eyes - flush with water at least 15 minutes.
Gastric lavage may be indicated for ingestion of soluble salt.

EXPOSURE EFFECTS Skin - causes skin irritation.
There is conflicting evidence on toxicity of soluble nickel compounds by ingestion.

TOXICITY IS TOXIC X Niosh Listing X NOT TOXIC
TLV 1 mg/$M^3$ as Ni LD50 -- LDca* IV 10mg/kg dog

## PHYSICAL DATA

DESCRIPTION: CLEAR, COLORLESS, ODORLESS, OILY LIQUID

BOILING POINT: 559 F (290 C) MELTING POINT: 50 F (10 C)

SPECIFIC GRAVITY: 1.84 VAPOR PRESSURE: 1 MM @ 145.8

SOLUBILITY IN WATER: SOLUBLE VAPOR DENSITY: 3.4

SOLVENT SOLUBILITY: DECOMPOSES IN ALCOHOL

## FIRE AND EXPLOSION DATA

FIRE AND EXPLOSION HAZARD:
NEGLIGIBLE FIRE HAZARD WHEN EXPOSED TO HEAT OR FLAME.

ACIDIC OXIDIZER: MAY CAUSE IGNITION, VIOLENT COMBUSTION OR EXPLOSION WHEN IN CONTACT WITH EASILY OXIDIZABLE SUBSTANCES. IT IS CAPABLE OF IGNITING FINELY DIVIDED COMBUSTIBLE MATERIALS ON CONTACT AND REACTS VIOLENTLY WITH WATER AND ORGANIC MATERIALS WITH EVOLUTION OF HEAT.

FIREFIGHTING MEDIA:
DRY CHEMICAL OR CARBON DIOXIDE
(1984 EMERGENCY RESPONSE GUIDEBOOK, DOT P 5800.3).

FOR LARGER FIRES, FLOOD AREA WITH WATER FROM A DISTANCE
(1984 EMERGENCY RESPONSE GUIDEBOOK, DOT P 5800.3).

FIREFIGHTING:
DO NOT GET SOLID STREAM OF WATER ON SPILLED MATERIAL. MOVE CONTAINERS FROM FIRE AREA IF POSSIBLE. COOL CONTAINERS EXPOSED TO FLAMES WITH WATER FROM SIDE UNTIL WELL AFTER FIRE IS OUT (1984 EMERGENCY RESPONSE GUIDEBOOK, DOT P 5800.3, GUIDE PAGE 39).

USE AGENT SUITABLE FOR TYPE OF FIRE; USE FLOODING AMOUNTS OF WATER AS A FOG. COOL CONTAINERS WITH FLOODING AMOUNTS OF WATER, APPLY FROM AS FAR A DISTANCE AS POSSIBLE. AVOID BREATHING CORROSIVE VAPORS, KEEP UPWIND (BUREAU OF EXPLOSIVES, EMERGENCY HANDLING OF HAZARDOUS MATERIAL IN SURFACE TRANSPORTATION, 1981).

## TRANSPORTATION DATA

DEPARTMENT OF TRANSPORTATION HAZARD CLASSIFICATION 49CFR172.101:
CORROSIVE MATERIAL

DEPARTMENT OF TRANSPORTATION LABELING REQUIREMENTS 49CFR172.101 AND 172.402:
CORROSIVE

## TOXICITY

SULFURIC ACID:
1380 UG EYE-RABBIT SEVERE IRRITATION; 100 MG EYE-RABBIT RINSED SEVERE IRRITATION; 135 MG/KG UNREPORTED-MAN LDLO; 3 MG/M3/24 WEEKS INHALATION-HUMAN TCLO; 2140 MG/KG ORAL-RAT LD50; 510 MG/M3/2 HOURS INHALATION-RAT LC50; 320 MG/M3/2 HOURS INHALATION-MOUSE LC50; 18 MG/M3 INHALATION-GUINEA PIG LC50; TUMORIGENIC DATA (AJEPAS 120(3), 358, 84); CARCINOGEN STATUS: NONE.
SULFURIC ACID IS HIGHLY TOXIC, AND IS A SEVERE SKIN, EYE AND MUCOUS MEMBRANE IRRITANT.

## HEALTH EFFECTS AND FIRST AID

INHALATION:
SULFURIC ACID:

CORROSIVE/HIGHLY TOXIC. 80 MG/M3 IMMEDIATELY DANGEROUS TO LIFE OR HEALTH.
ACUTE EXPOSURE- INHALATION OF VAPORS MAY CAUSE NASAL SECRETION, SNEEZING, A BURNING FEELING IN THE THROAT AND RETROSTERNAL REGION, FOLLOWED BY COUGH, RESPIRATORY DISTRESS, AND POSSIBLE SPASM OF THE VOCAL CORDS. HIGH CONCENTRATIONS MAY PRODUCE BLOODY NASAL SECRETION AND SPUTUM, HEMATEMESIS, GASTRITIS, AND PULMONARY EDEMA. ONE INDIVIDUAL EXPERIENCED DELAYED SYMPTOMS OF PULMONARY FIBROSIS, RESIDUAL BRONCHITIS, AND PULMONARY EMPHYSEMA.
CHRONIC EXPOSURE- REPEATED EXPOSURE TO THE MIST MAY CAUSE DENTAL DISCOLORATION AND EROSION, TRACHEOBRONCHITIS, BRONCHIAL PNEUMONIA, AND GASTROINTESTINAL DISTURBANCES. AN EPIDEMIOLOGICAL STUDY OF WORKERS AT A REFINERY AND CHEMICAL PLANT SUGGESTS AN INCREASED RISK OF LARYNGEAL CANCER FROM EXPOSURE TO HIGH CONCENTRATIONS OF SULFURIC ACID.

FIRST AID: REMOVE FROM EXPOSURE AREA TO FRESH AIR IMMEDIATELY. IF BREATHING HAS STOPPED, GIVE ARTIFICIAL RESPIRATION. MAINTAIN AIRWAY AND BLOOD PRESSURE AND ADMINISTER OXYGEN IF AVAILABLE. KEEP AFFECTED PERSON WARM AND AT REST. ADMINISTRATION OF OXYGEN SHOULD BE PERFORMED BY QUALIFIED PERSONNEL. GET MEDICAL ATTENTION IMMEDIATELY.

SKIN CONTACT:
SULFURIC ACID:
CORROSIVE.
ACUTE EXPOSURE- CONTACT WITH CONCENTRATED SULFURIC ACID MAY CAUSE SEVERE BURNS DUE TO ITS SEVERE DEHYDRATING ACTION. THE RESULTING WOUNDS MAY BE LONG IN HEALING AND MAY CAUSE EXTENSIVE SCARRING. EXPOSURE TO THE MIST MAY CAUSE SEVERE IRRITATION.
CHRONIC EXPOSURE- REPEATED OR PROLONGED EXPOSURE TO THE MIST MAY CAUSE DERMATITIS. REPEATED SKIN CONTACT WITH LOW CONCENTRATIONS OF ACID MAY CAUSE SKIN DESICCATION AND ULCERATION OF THE HANDS, AND PANARIS OR CHRONIC PURULENT INFLAMMATION AROUND THE NAILS.

FIRST AID- REMOVE CONTAMINATED CLOTHING AND SHOES IMMEDIATELY. WASH AFFECTED AREA WITH SOAP OR MILD DETERGENT AND LARGE AMOUNTS OF WATER UNTIL NO EVIDENCE OF CHEMICAL REMAINS (AT LEAST 15-20 MINUTES). IN CASE OF CHEMICAL BURNS, COVER AREA WITH STERILE, DRY DRESSING. BANDAGE SECURELY, BUT NOT TOO TIGHTLY. GET MEDICAL ATTENTION IMMEDIATELY.

EYE CONTACT:
SULFURIC ACID:
CORROSIVE.
ACUTE EXPOSURE- EXPOSURE TO THE VAPORS MAY CAUSE A BURNING SENSATION IN THE EYES WITH LACRIMATION AND CONJUNCTIVAL CONGESTION. SPLASHES OF ACID IN THE EYES MAY PRODUCE DEEP CORNEAL ULCERATION, KERATO-CONJUNCTIVITIS AND PALPEBRAL LESIONS WITH SEVERE SEQUELAE. THE CORNEA MAY SUFFER PERMANENT DAMAGE. CONTACT WITH DILUTED ACID MAY PRODUCE MORE TRANSIENT EFFECTS FROM WHICH RECOVERY MAY BE COMPLETE.
CHRONIC EXPOSURE- PROLONGED OR REPEATED EXPOSURE TO MIST OR VAPORS MAY CAUSE CONJUNCTIVITIS OR DEPENDING ON THE CONCENTRATION, MAY CAUSE SYMPTOMS SIMILAR TO ACUTE EXPOSURE.

FIRST AID- WASH EYES IMMEDIATELY WITH LARGE AMOUNTS OF WATER, OCCASIONALLY LIFTING UPPER AND LOWER LIDS, UNTIL NO EVIDENCE OF CHEMICAL REMAINS (AT LEAST 15-20 MINUTES). IN CASE OF BURNS, APPLY STERILE BANDAGES LOOSELY WITHOUT MEDICATION. GET MEDICAL ATTENTION IMMEDIATELY.

INGESTION:
SULFURIC ACID:
CORROSIVE:
ACUTE EXPOSURE- MAY CAUSE SEVERE, EURNING PAIN IN THE MOUTH, PHARYNX, AND ABDOMEN FOLLOWED BY VOMITING AND DIARRHEA OF DARK PRECIPITATED BLOOD, AND A SHARP DECLINE IN BLOOD PRESSURE. BROWNISH OR YELLOWISH STAINS MAY BE FOUND AROUND OR IN THE MOUTH. ASPHYXIA MAY OCCUR FROM EDEMA OF THE GLOTTIS. SHOCK, COMA AND CONVULSIONS ARE POSSIBLE AND MAY RESULT IN DEATH. AFTER INITIAL RECOVERY, PERFORATION RESULTING IN PERITONITIS, SEVERE NEPHRITIS, AND PNEUMONIA MAY DEVELOP. FORMATION OF SCAR TISSUE MAY PRODUCE STRICTURE OF THE PYLORUS OR ESOPHAGUS.
CHRONIC EXPOSURE- NO DATA AVAILABLE.

FIRST AID- DO NOT USE GASTRIC LAVAGE OR EMESIS. DILUTE THE ACID IMMEDIATELY BY DRINKING LARGE QUANTITIES OF WATER OR MILK. IF VOMITING PERSISTS, ADMINISTER FLUIDS REPEATEDLY. INGESTED ACID MUST BE DILUTED APPROXIMATELY 100 TIMES TO RENDER IT HARMLESS TO TISSUES. (DREISBACH, HANDBOOK OF POISONING, 11TH ED.) GET MEDICAL ATTENTION.

ANTIDOTE:
NO SPECIFIC ANTIDOTE. TREAT SYMPTOMATICALLY AND SUPPCRTIVELY.

---

## REACTIVITY

REACTIVITY:
VIOLENT EXOTHERMIC REACTION WITH WATER AND ORGANIC MATERIALS.

INCOMPATIBILITIES:
SULFURIC ACID:
ACETALDEHYDE: MAY BE VIOLENTLY POLYMERIZED BY CONCENTRATED SULFURIC ACID.
ACETIC ANHYDRIDE: FIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ACETONE CYANHYDRIN: POSSIBLE EXPLOSION.
ACETONE AND NITRIC ACID: ACETONE WILL DECOMPOSE VIOLENTLY WHEN BROUGHT IN CONTACT WITH MIXED SULFURIC-NITRIC ACIDS.
ACETONE AND POTASSIUM DICHROMATE: IGNITION.
ACETONITRILE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ACROLEIN: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ACRYLONITRILE: VIGCROUS EXOTHERMIC REACTION.
ALCOHOLS AND HYDROGEN PEROXIDE: POSSIBLE EXPLOSION.
ALLYL ALCOHOL: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ALLYL CHLORIDE: ALLYL CHLORIDE MAY VIOLENTLY POLYMERIZE.
ALKYL NITRATES: MAY CAUSE VIOLENT REACTION.
2-AMINOETHANOL: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
AMMONIUM HYDROXIDE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
AMMONIUM IRON (III) SULFATE DODECAHYDRATE: MAY CAUSE VIOLENT REACTION DUE TO THE EXOTHERMAL REACTION RELEASING WATER FROM THE COMPOUND.
AMMONIUM TRIPERCHROMATE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ANILINE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
BENZYLALCOHOL: MAY DECOMPOSES EXPLOSIVELY AT ABOUT 180 C.

BROMATES AND METALS: POSSIBLE IGNITION AND FIRE.
BROMINE PENTAFLUORIDE: VIOLENT REACTION.
N-BUTYRALDEHYDE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
CARBIDES: CONCENTRATED SULFURIC ACID IS EXTREMELY HAZARDOUS IN CONTACT WITH CARBIDES.
CESIUM ACETYLENE CARBIDE: IGNITION.
1-CHLORO-2,3-EXPOXYPROPANE: MAY CAUSE EXPLOSIVE REACTION.
4-CHLORONITROBENZENE AND SULFUR TRIOXIDE: MAY CAUSE EXPLOSIVE REACTION.
CHLORATES: ALL CHLORATES, WHEN BROUGHT IN CONTACT WITH SULFURIC ACID MAY GIVE OFF EXPLOSIVE CHLORINE DIOXIDE GAS. A VIOLENT EXPLOSION IS USUAL.
CHLORATES AND METALS: IGNITION LIKELY.
CHLORINE TRIFLUORIDE: VIOLENT EXPLOSION.
CHLOROSULFONIC ACID: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
COPPER: MAY PRODUCE HAZARDOUS REACTION.
CUPROUS NITRIDE: VIOLENT REACTION.
2-CYANO-4-NITROBENZENEDIAZONIUM HYDROGEN SULFATE: MAY CAUSE EXPLOSIVE REACTION.
2-CYANO-2-PROPANOL: MAY CAUSE VIOLENT REACTION.
CYCLOPENTADIENE: MAY CAUSE EXPLOSIVE REACTION.
CYCLOPENTANONE OXIME: MAY CAUSE VIOLENT REACTION.
1,3-DIAZIDOBENZENE: MAY CAUSE EXPLOSIVE REACTION.
DIETHYLAMINE: MAY CAUSE VIOLENT REACTION.
DIISOBUTYLENE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
DIMETHYLBENZYLCARBINOL AND HYDROGEN PEROXIDE: EXPLOSION.
DIMETHOXYANTHRAQUINONE: MAY CAUSE VIOLENT REACTION.
4-DIMETHYLAMINOBENZALDEHYDE: MAY CAUSE HAZARDOUS EXOTHERMIC REACTION.
2,5-DINITRO-3-METHYLBENZOIC ACID AND SODIUM AZIDE: MAY CAUSE VIOLENT REACTION.
1,5-DINITRONAPHTHALENE AND SULFUR: MAY CAUSE VIOLENT REACTION.
EPICHLOROHYDRIN: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ETHOXYLATED NONYLPHENOL: MAY CAUSE VIOLENT REACTION.
ETHANOL AND HYDROGEN PEROXIDE: POSSIBLE EXPLOSION.
ETHYLENE CYANOHYDRIN: VIOLENT REACTION.
ETHYLENE DIAMINE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ETHYLENE GLYCOL: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
ETHYLENIMINE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
FULMINATES: SULFURIC ACID IS EXTREMELY HAZARDOUS IN CONTACT WITH FULMINATES.
HEXALITHIUM DISILICIDE: MAY INCANDESCES WHEN FLOATED ON SULFURIC ACID AND MAY CAUSE VIOLENT REACTION.
HYDROCHLORIC ACID: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
HYDROGEN PEROXIDE: MAY CAUSE VIOLENT REACTION.
HYDROFLUORIC ACID: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
IODINE HEPTAFLUORIDE: THE ACID BECOMES EFFERVESCENT.
INDANE AND NITRIC ACID: POSSIBLE EXPLOSION.
IRON: POSSIBLE EXPLOSION DUE TO HYDROGEN GAS FROM THE ACID-METAL REACTION.
ISOPRENE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
LITHIUM SILICIDE: INCANDESCENT REACTION.
MERCURIC NITRIDE: EXPLOSION.

MESITYL OXIDE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
METAL ACETYLIDES: MAY IGNITE.
METALS (POWDERED): CONTACT WITH SULFURIC ACID IS EXTREMELY HAZARDOUS.
4-METHYLPYRIDINE: MAY CAUSE VIOLENT REACTION.
NITRAMIDE: MAY CAUSE VIOLENT REACTION.
NITRIC ACID, ORGANIC MATERIAL: MAY CAUSE VIOLENT REACTION.
NITRIC ACID, TOLUENE: MAY CAUSE VIOLENT REACTION.
NITROARYL BASES AND DERIVATIES: MAY CAUSE VIOLENT REACTION.
NITRIC ACID AND GLYCERIDES: EXPLOSION.
NITROBENZENE: MAY CAUSE VIOLENT REACTION.
3-NITROBENZENESULFONIC ACID: MAY CAUSE VIOLENT REACTION.
NITROMETHANE: MAY CAUSE VIOLENT REACTION.
N-NITROMETHYLAMINE: MAY CAUSE VIOLENT REACTION.
P-NITROTOLUENE: EXPLOSION.
PENTASILVER TRIHYDROXYDIAMINOPHOSPHATE: EXPLOSION.
PERCHLORATES: POSSIBLE EXPLOSION.
PERCHLORIC ACID: FORMATION OF DANGEROUS ANHYDROUS PERCHLORIC ACID.
PERMANGANATES AND BENZENE: POSSIBLE EXPLOSION.
1-PHENYL-2-METHYL-PROPYL ALCOHOL AND HYDROGEN PEROXIDE: POSSIBLE EXPLOSION.
PHOSPHORUS: YELLOW PHOSPHORUS IGNITES WHEN PLACED IN BOILING CONCENTRATED SULFURIC ACID.
PHOSPHORUS ISOCYANATE: VIOLENT REACTION.
PHOSPHORUS TRIOXIDE: MAY CAUSE VIOLENT REACTION.
PICRATES: CONTACT WITH CONCENTRATED SULFURIC ACID IS EXTREMELY HAZARDOUS.
POLYSILYLENE: MAY CAUSE EXPLOSIVE REACTION.
POTASSIUM: MAY CAUSE EXPLOSIVE REACTION.
POTASSIUM TERT-BUTOXIDE: IGNITION.
POTASSIUM CHLORATE: POSSIBLE FIRE AND EXPLOSION.
POTASSIUM PERMANGANATE: POSSIBLE EXPLOSION IN THE PRESENCE OF MOISTURE.
POTASSIUM PERMANGANATE AND POTASSIUM CHLORIDE: VIOLENT EXPLOSION.
BETA-PROPIOLACTONE: MIXTURES IN CLOSED CONTAINERS CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
PROPYLENE OXIDE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
3-PROPYNOL: MAY CAUSE HAZARDOUS REACTION.
PYRIDINE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
RUBIDIUM ACETYLENE CARBIDE: BURNS WITH SULFURIC ACID.
SILVER PERMANGANATE: EXPLOSION.
SILVER PEROXOCHROMATE: MAY CAUSE EXPLOSIVE REACTION.
SODIUM: REACTS WITH EXPLOSIVE VIOLENCE.
SODIUM CARBONATE: VIOLENT REACTION.
SODIUM CHLORATE: POSSIBLE FIRE OR EXPLOSION.
SODIUM HYDROXIDE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
SODIUM TETRAHYDROBORATE: MAY CAUSE VIOLENT EXTHERMIC REACTION.
SODIUM THIOCYANATE: MAY CAUSE VIOLENT EXOTHERMIC REACTION.
STEEL: POSSIBLE EXPLOSION DUE TO HYDROGEN GAS FROM THE ACID-METAL REACTION.
STYRENE MONOMER: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.
TETRAMETHYLBENZENES: MAY CAUSE VIOLENT REACTION IN CLOSED CONTAINERS.
1,2,4,5-TETRAZINE: DECOMPOSES VIOLENTLY ON CONTACT WITH SULFURIC ACID.
THALLIUM(I) AZIDIDITHIOCARBONATE: MAY EXPLODE ON CONTACT.
1,3,5-TRINITROSOHEXAHYDRO-1,3,5-TRIAZINE: MAY CAUSE VIOLENT REACTION.
TOLUENE AND NITRIC ACID: VIOLENT REACTION.
VINYL ACETATE: MIXING IN A CLOSED CONTAINER CAUSED AN INCREASE IN TEMPERATURE AND PRESSURE.

WATER: MAY CAUSE VIOLENT EXOTHERMIC REACTION.
ZINC CHLORATE: LIKELY TO CAUSE FIRES AND EXPLOSIONS.
ZINC IODIDE: MAY CAUSE VIOLENT REACTION.

DECOMPOSITION:
THERMAL DECOMPOSITION MAY RELEASE TOXIC OXIDES OF SULFUR.

POLYMERIZATION:
HAZARDOUS POLYMERIZATION HAS NOT BEEN REPORTED TO OCCUR UNDER NORMAL TEMPERATURES AND PRESSURES.

**********

## CONDITIONS TO AVOID

MAY IGNITE OTHER COMBUSTIBLE MATERIALS (WOOD, PAPER, OIL, ETC.). VIOLENT REACTION WITH WATER. FLAMMABLE, POISONOUS GASES MAY ACCUMULATE IN CONFINED SPACES. RUNOFF TO SEWER MAY CREATE FIRE OR EXPLOSION HAZARD.

**********

## SPILL AND LEAK PROCEDURES

SOIL SPILL:
DIG HOLDING AREA SUCH AS LAGOON, POND OR PIT FOR CONTAINMENT.

DIKE FLOW OF SPILLED MATERIAL USING SOIL OR SANDBAGS OR FOAMED BARRIERS SUCH AS POLYURETHANE OR CONCRETE.

USE CEMENT POWDER OR FLY ASH TO ABSORB LIQUID MASS.

NEUTRALIZE SPILL WITH SLAKED LIME, SODIUM BICARBONATE OR CRUSHED LIMESTONE.

AIR SPILL:
KNOCK DOWN VAPORS WITH WATER SPRAY. KEEP UPWIND.

WATER SPILL:
NEUTRALIZE WITH AGRICULTURAL LIME, SLAKED LIME, CRUSHED LIMESTONE, OR SODIUM BICARBONATE.

ADD SUITABLE AGENT TO NEUTRALIZE SPILLED MATERIAL TO PH-7.

OCCUPATIONAL SPILL:
KEEP COMBUSTIBLES (WOOD, PAPER, OIL, ETC.) AWAY FROM SPILLED MATERIAL. DO NOT TOUCH SPILLED MATERIAL. DO NOT GET WATER INSIDE CONTAINER. STOP LEAK IF YOU CAN DO IT WITHOUT RISK. USE WATER SPRAY TO REDUCE VAPORS. DO NOT PUT WATER ON LEAK OR SPILL AREA. CLEAN UP ONLY UNDER THE SUPERVISION OF AN EXPERT. DIKE SPILL FOR LATER DISPOSAL. DO NOT APPLY WATER UNLESS DIRECTED TO DO SO. KEEP UNNECESSARY PEOPLE AWAY. ISOLATE HAZARD AREA AND DENY ENTRY. VENTILATE CLOSED SPACES BEFORE ENTERING.

REPORTABLE QUANTITY: 1000 POUNDS
THE SUPERFUND AMENDMENTS AND REAUTHORIZATION ACT OF 1986 SECTION 304 REQUIRES THAT A RELEASE EQUAL TO OR GREATER THAN THE REPORTABLE QUANTITY FOR THIS SUBSTANCE MUST BE IMMEDIATELY REPORTED TO THE LOCAL EMERGENCY PLANNING COMMITTEE, THE STATE EMERGENCY RESPONSE COMMISSION, AND THE NATIONAL RESPONSE CENTER (800)-424-8802; IN WASHINGTON, D.C. METROPOLITAN AREA (202)-426-2675.

## PROTECTIVE EQUIPMENT

VENTILATION:
PROVIDE LOCAL EXHAUST OR PROCESS ENCLOSURE VENTILATION TO MEET PUBLISHED EXPOSURE LIMITS.

RESPIRATOR:
THE FOLLOWING RESPIRATORS AND MAXIMUM USE CONCENTRATIONS ARE RECOMMENDATIONS BY NIOSH POCKET GUIDE TO CHEMICAL HAZARDS, U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES OR DEPARTMENT OF LABOR, 29CFR1910; SUBPART Z.
THE SPECIFIC RESPIRATOR SELECTED MUST BE BASED ON CONTAMINATION LEVELS FOUND IN THE WORK PLACE AND BE JOINTLY APPROVED BY THE NATIONAL INSTITUTE OF OCCUPATIONAL SAFETY AND HEALTH AND THE MINE SAFETY AND HEALTH ADMINISTRATION.

25 MG/M3- ANY POWERED AIR-PURIFYING RESPIRATOR WITH AN ACID GAS CARTRIDGE(S) AND HAVING A HIGH-EFFICIENCY PARTICULATE FILTER.
ANY SUPPLIED-AIR RESPIRATOR OPERATED IN A CONTINUOUS FLOW MODE.

50 MG/M3- ANY CHEMICAL CARTRIDGE RESPIRATOR WITH A FULL FACEPIECE AND ACID GAS CARTRIDGE(S) IN COMBINATION WITH A HIGH-EFFICIENCY PARTICULATE FILTER.
ANY SELF-CONTAINED BREATHING APPARATUS WITH A FULL FACEPIECE.
ANY SUPPLIED-AIR RESPIRATOR WITH A FULL FACEPIECE.
ANY AIR-PURIFYING FULL FACEPIECE RESPIRATOR (GAS MASK) WITH A CHIN-STYLE OR FRONT- OR BACK-MOUNTED ACID GAS CANISTER HAVING A HIGH-EFFICIENCY PARTICULATE FILTER.

80 MG/M3- ANY SUPPLIED-AIR RESPIRATOR WITH A FULL FACEPIECE AND OPERATED IN A PRESSURE-DEMAND OR OTHER POSITIVE PRESSURE MODE.

ESCAPE- ANY AIR-PURIFYING FULL FACEPIECE RESPIRATOR (GAS MASK) WITH A CHIN-STYLE OR FRONT- OR BACK-MOUNTED ACID GAS CANISTER HAVING A HIGH-EFFICIENCY PARTICULATE FILTER.
ANY APPROPRIATE ESCAPE-TYPE SELF-CONTAINED BREATHING APPARATUS.

FOR FIREFIGHTING AND OTHER IMMEDIATELY DANGEROUS TO LIFE OR HEALTH CONDITIONS:

SELF-CONTAINED BREATHING APPARATUS WITH FULL FACEPIECE OPERATED IN PRESSURE-DEMAND OR OTHER POSITIVE PRESSURE MODE.

SUPPLIED-AIR RESPIRATOR WITH FULL FACEPIECE AND OPERATED IN PRESSURE-DEMAND OR OTHER POSITIVE PRESSURE MODE IN COMBINATION WITH AN AUXILIARY SELF-CONTAINED BREATHING APPARATUS OPERATED IN PRESSURE-DEMAND OR OTHER POSITIVE PRESSURE MODE.

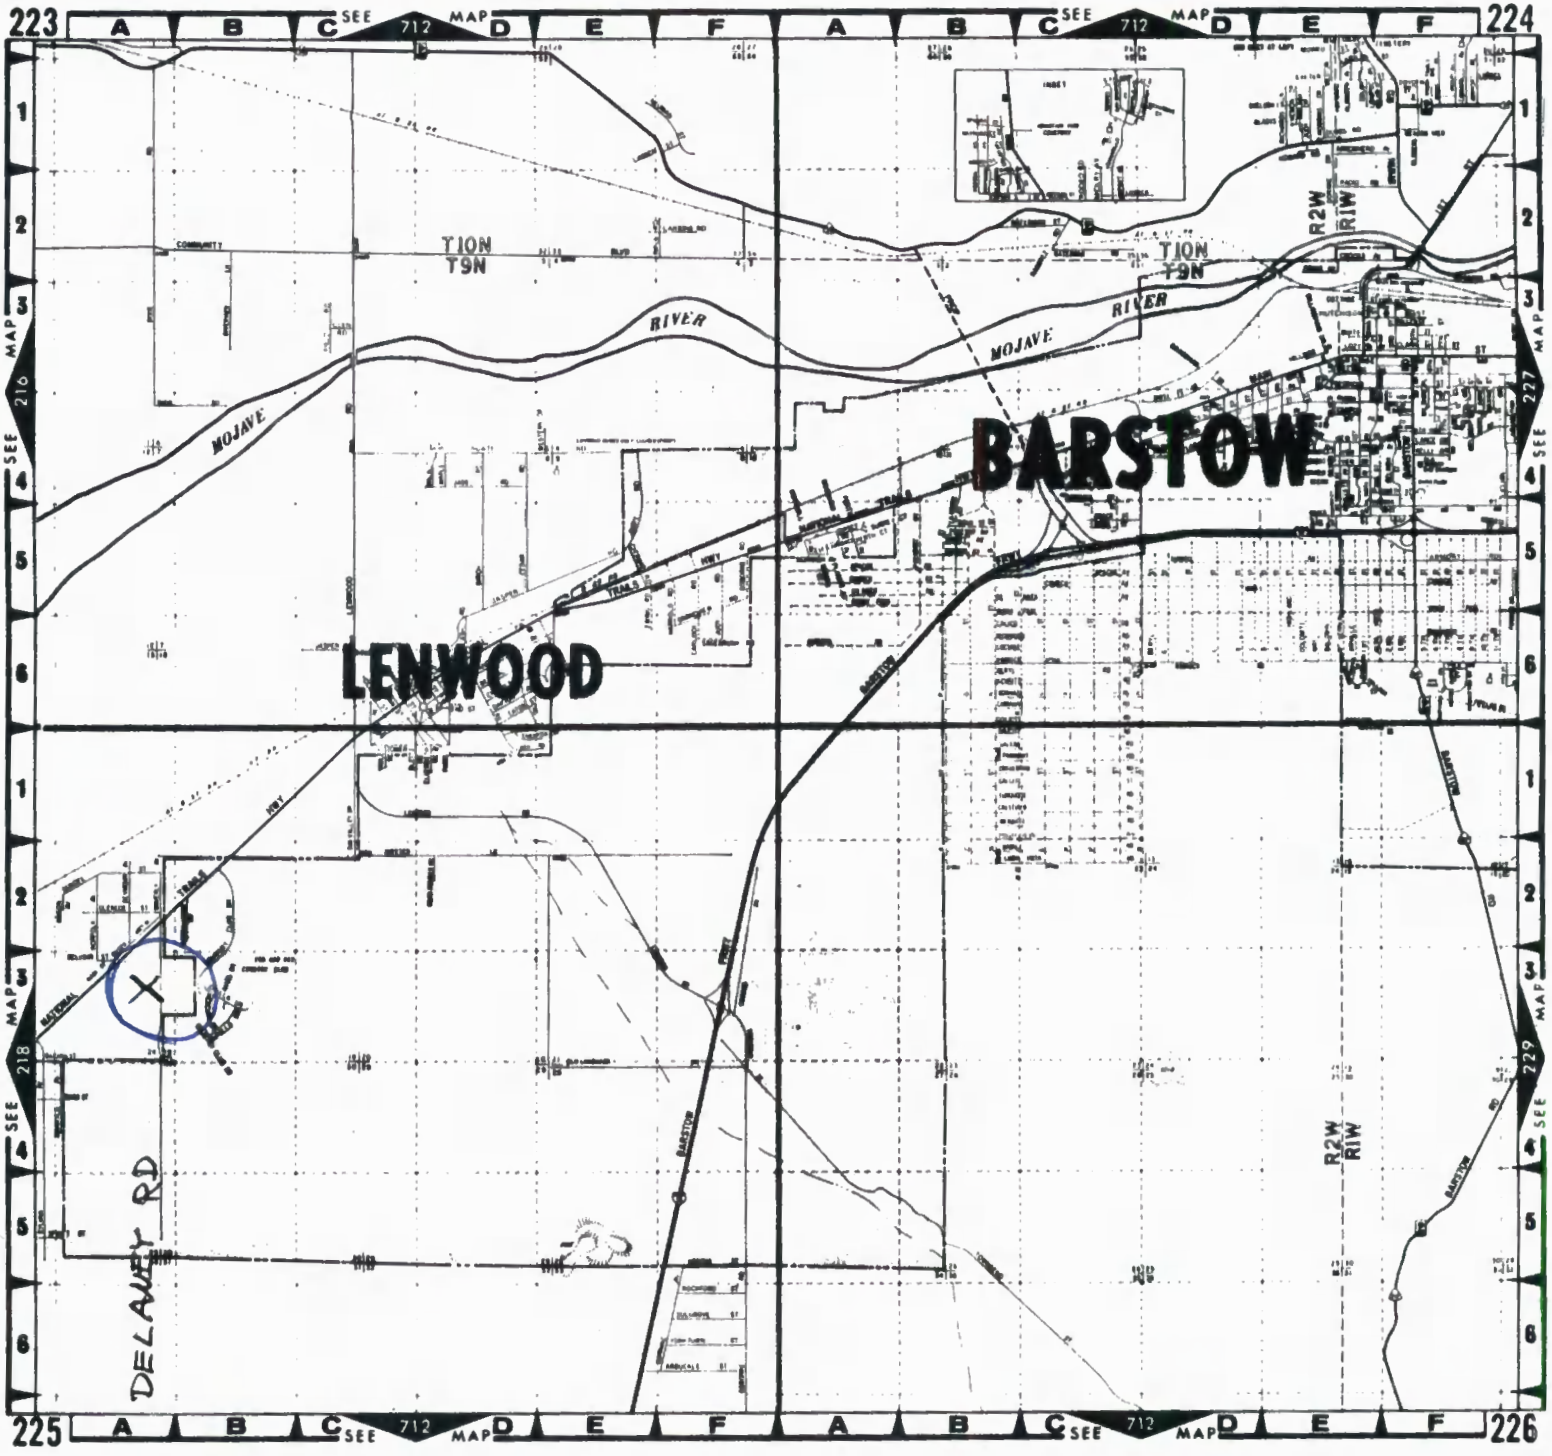

CLOTHING:
WEAR APPROPRIATE PROTECTIVE CLOTHING TO AVOID ANY POSSIBILITY OF SKIN CONTACT WITH LIQUIDS CONTAINING MORE THAN 1% SULFURIC ACID. AVOID REPEATED OR PROLONGED SKIN CONTACT WITH LIQUIDS CONTAINING 1% OR LESS SULFURIC ACID.

GLOVES:
EMPLOYEE MUST WEAR APPROPRIATE PROTECTIVE GLOVES TO PREVENT CONTACT WITH THIS SUBSTANCE.

EYE PROTECTION:
EMPLOYEE MUST WEAR SPLASH-PROOF OR DUST-RESISTANT SAFETY GOGGLES AND A FACESHIELD TO PREVENT CONTACT WITH THIS SUBSTANCE.

WHERE THERE IS ANY POSSIBILITY THAT AN EMPLOYEE'S EYES MAY BE EXPOSED TO THIS SUBSTANCE, THE EMPLOYER SHALL PROVIDE AN EYE-WASH FOUNTAIN WITHIN THE IMMEDIATE WORK AREA FOR EMERGENCY USE.

Business Plan Prepared By: Bill E. Depue

# BUSINESS PLAN 1/89

1. Diamond Pacific Tool Corp
   25647 W. Main St.
   Barstow, CA 92311

   Nickel plating facility located at:
   33326 Delaney Rd.
   Barstow, CA 92311

   Assessor's parcel number 0421071540000

2. Phone: (619) 253-2954

3. Officers: President Bill E. Depue
   Vice-Pres Bob G. Depue
   Sec/Treas Clara B. Pinnell

4. Standard Industrial Classification Code: Not known

5. None

6. Manufacturers of lapidary equipment: diamond grinding wheels and grinding machines

7. Number of employees: 14

8. Emergency contact persons: Bill E. Depue (619) 253-5261
   Bob G. Depue (619) 253-5522
   Don B. Depue (619) 253-5352

9. Inventory - attached

10. Notification Plan

    A. Call San Bern. County Dept of Environmental Health
    (800) 33-TOXIC or (714) 387-6077

    B. State of California, Office of Emergency Services
    (800) 852-7550

    C. Main office - (619) 253-2954
    Bill Depue - (619) 253-5261
    Bob Depue - (619) 253-5522
    Don Depue - (619) 253-5352

11. Emergency Procedures:

    A. Spill of plating bath
    1) Use mop to transfer liquid from floor to mop bucket using rollers to squeeze mop
    2) Replace temporarily in plastic drums
    3) Repair leak in tank
    4) Return bath to tank
    5) Treat with hydrogen peroxide and carbon filter to purify bath

B. Spill of acid
   1) Open both doors for cross ventilation
   2) Mop up spilled acid
   3) Neutralize to ph7 with dilute alkaline cleaner

C. Spill of alkaline cleaner
   1) Mop up spilled cleaner
   2) Neutralize to ph7 with dilute sulfuric acid from acid dip tank

D. Spill of hydrogen peroxide
   1) Open both doors for cross ventilation
   2) Flush with water

12. Evacuation Plan No evacuation necessary

13. Preventive Measures: Place a plastic pan beneath each tank capable of holding tank contents.

14. Facility Training Plan:

Plating personell are already familiar with neutralization of either acid or alkaline solutions to ph7 since this is done about four times yearly when replacing spent alkaline cleaner. They are also good at using a mop.

15. Emergency Equipment:

Mop, roller type mop bucket, rubber gloves, plastic pails

16. Not applicatble

17. Copies of material safety data sheets submitted 12/87

18. Area map attached.

19. Site layout map attached.

9. INVENTORY OF HAZARDOUS MATERIALS ON SITE (INDICATE UNITS USED).

A. HAZARDOUS MATERIALS

1. Chemical Name Sulfuric acid
CAS # (if known)
Composition
Hazard Code/s (See Page 9) 4 / / / /
Common Name
Solid ____ Liquid x Gas ____ Mix ____ Pure ____
Maximum amount at one time on site 8 bottles
Average daily amount on site 4 bottles
Number of days on site/year 365
Container type ½ gallon glass bottles
Storage Pressure 0 Storage Temp ( F) 70

2. Chemical Name Hydrochloric acid
CAS # (if known)
Composition
Hazard Code/s (See Page 9) 4 / / / /
Common Name Muriatic acid
Solid ____ Liquid x Gas ____ Mix ____ Pure ____
Maximum amount at one time on site 6 bottles
Average daily amount on site 3 bottles
Number of days on site/year 365
Container type ½ gallon glass bottle
Storage Pressure 0 Storage Temp ( F) 70

3. Chemical Name Phosphoric acid
CAS # (if known)
Composition
Hazard Code/s (See Page 9) 4 / / / /
Common Name
Solid ____ Liquid x Gas ____ Mix ____ Pure ____
Maximum amount at one time on site 15 gallons
Average daily amount on site 8 gal
Number of days on site/year 365
Container type polypropylene drum
Storage Pressure 0 Storage Temp ( F) 70

4. Chemical Name Phosphorus acid
CAS # (if known)
Composition
Hazard Code/s (See Page 9) 4
Common Name
Solid x Liquid ____ Gas ____ Mix ____ Pure ____
Maximum amount at one time on site 20 lbs
Average daily amount on site 10 lbs
Number of days on site/year 365
Container type 5 lb glass bottles
Storage Pressure 0 Storage Temp ( F) 70

MAKE ADDITIONAL COPIES OF INVENTORY FORM AS NEEDED FOR EVERY CHEMICAL.

ATTN: BILL E. DEPUE

We have approved the 1989 Inventory Form which you recently sent to the Department of Environmental Health Services for the following business DIAMOND PACIFIC TOOL CORP

_____ .

We will send a copy of the approved Inventory Form to your local fire and police agencies.

Claudia Lynn Clark -

**CLAUDIA LYNN CLARK, R.S., M.S.**
**Emergency Management Program**
**(714) 387-3044**

CLC:lg

I still need to know how you would evacuate chemical area if you had to do so.
Would you yell to notify, move to a meeting point...?

3/a/89

No evacuation necessary, but we could yell & walk out the door.

If we had a spill, we would stay right there & clean it up

January 16, 1988

DIAMOND PACIFIC TOOL CORP.
25647 W. Main St.
Barstow, Ca. 92311

RE: 33326 Delaney Road
Barstow

The Department of Environmental Health Services Emergency Management Program has determined that the Business Plan of _____

DIAMOND PACIFIC TOOL CORP. [ ] as amended [✓] as submitted

meets the requirements mandated in the State Health and Safety Code, Chapter 6.95. The entire contents of this approved Business Plan, with exception of "Trade Secrets" and portions of the plan specifying the precise location where hazardous materials are stored and handled on site including the maps, will be available for public inspection.

Within 30 days of any one of the following events, this business must submit to this department an amendment to the inventory form detailing the handling and the following appropriate information.

(1) A 100 percent or more increase in quantity of a previously disclosed material

(2) Any handling of a previously undisclosed hazardous materials subject to the inventory requirements of this chapter

(3) Change of business address

(4) Change of business ownership

(5) Change of business name.

A copy of this Business Plan has been sent to the local enforcement agency and fire jurisdiction.

**33326 DELANEY ROAD, BARSTOW, CALIFORNIA**

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search.

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at hazmatrecords@sbcfire.org to arrange an appointment for a file review.

**ACTIVE PERMIT FACILITIES:** (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

No record of active permit facilities identified in this search.

**INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES:** (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).

***personal use. They had all 3 USTs removed and they are not in use. The file does not contain any permits and/or any permits to remove the USTs.***

**HAZARDOUS MATERIAL INCIDENT AND/OR COMPLAINT RESPONSE ACTIVITY:** (other records of spill notifications and/or complaints not listed below may also exist in facility permit files).

No record of hazardous material incident and/or complaint response activity identified in this search.

**SITE REMEDIATION:** (Underground Storage Tank Clean-Up under Local Oversight Program or Voluntary Hazardous Waste Clean-Up activity under Local Jurisdiction) (documents may be included in regular active or inactive permit files listed above).

No record of site remediation identified in this search.

Records searched include permit database systems for facilities with permits as hazardous waste generators, hazardous materials handlers, and/or underground storage tanks, including inactive and/or out of business records; logs of permits issued for the removal and/or installation of underground storage tanks; records and databases pertaining to illicit dumping and releases; records of non-permitted facilities; sites undergoing remediation for contaminated soil and/or groundwater; and incidents responded to by the hazardous materials emergency response team. Records searched date back to the mid-1980's. Please note if a facility has completed a submission in CERS, the most recent submission can be made available for review upon request.

**Records consist of 2 files, approximately 1 ½" thick, combined.** You may contact us at hazmatrecords@sbcfire.org to request and schedule a file review appointment to view the file(s).

REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS

# RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Protection District (SBCFPD) any record relating to contamination or reports of spills at a particular site. An Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by SBCFPD, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, which can be a useful tool in providing a history of compliance or non-compliance.

Once SBCFPD has completed its records search, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be prepared and issued. Such report will detail all SBCFPD records associated with a particular site by type, date, location, and status (where applicable). All files identified in an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.

If the completed records search reveals no SBCFPD record of hazardous material activity at the site, an Environmental Phase 1 Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description. If possible, please attach a map to this request form.

** IMPORTANT – THIS PAGE MUST BE SIGNED PRIOR TO SUBMITTAL **

**DISCLAIMER:** While all attempts are made to provide accurate, current, and reliable information, San Bernardino County Fire Protection District *(further referred to as SBCFPD)* recognizes the possibility of human error. Therefore, SBCFPD, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report and provides an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report "as is," with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall SBCFPD be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. SBCFPD therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

**RELEASE AND INDEMNIFICATION:** In consideration for the issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge SBCFPD, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of SBCFPD, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report.

In further consideration for SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless SBCFPD, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report prompted by any third party.

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my **REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE 1 CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.**

**I hereby request an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.**

- ☐ **I am including payment of the initial fee of $136.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Protection District, or by credit card payment taken over the phone. I understand that research exceeding one hour will be billed at the rate of $136.00 for each additional hour spent by SBCFPD in completing this request.**
- ☒ **I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.**

Dear Sir:

We have received your notice regarding standards for monitoring underground storage tanks.

We did register three underground gas tanks on our ranch that we used for personal use, but since then, have removed all three from the ground and they are not in use at this time.

Sincerely,

Bob G Depue

[illegible]

Dear Ms. Morse:

On May 14, 2024, the Department of Toxic Substances Control (DTSC) received your email of the same date requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

However, DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to [illegible]. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at http://hwts.dtsc.ca.gov. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a

year. The data reflects the latest updates as they are entered into the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You will find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 818-717-6508 or via email at ChatsworthFileRoom@dtsc.ca.gov.

Respectfully,

*Joseph M von Teichert*

Dear Requestor:

We have received your Public Records Act Request from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs Data Management System. It tracks our cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov.

You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 714-4845337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

*Julie Chandler*

| Other | |
| Sewers | |
| Septic tanks | |
| Leaching fields | |
| Seepage pits | |
| Cesspools | |
| Lakes and ponds | |
| Watercourses | |
| Animal or fowl kept | |

(c) ☒ None of the above are within 500 feet of the well site.

12. I have read this application and agree to comply with all laws regulating the type of work being performed

C-57 Contractor's Signature [signature] Date 2-28-08

County Registration No. 86 California License No. 432905

**DISPOSITION OF PERMIT**

*(For Department Use Only)*

☐ Sent to Water Agency for review.

☐ Water Agency conditions or recommendations attached.

☐ Denied

☑ Approved subject to the following:

A. ☑ Notify the Department, Safe Drinking Water Program, (909) 387-4666, twenty-four (24) hours in advance to make an inspection of the following operations:

☒ Prior to sealing of the annular space or filling of the conductor casing.

☒ After installation of the surface protective slab and pumping equipment.

☐ During destruction of wells, prior to pouring the sealing material.

B. ☑ Submit to the Department, within thirty (30) days after completion of work, a copy of:

☒ Water Well Driller's Report ☒ Bacterial Analysis ☒ Inorganic Chemical Analysis (NITRATE)

☐ Radiological Analysis ☐ General Mineral ☐ Organic Chemical analysis ☐ General Physical

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**USER QUESTIONNAIRE**

Pursuant to the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-13 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

Thank you for taking the time to complete this questionnaire. If you have any questions, please call John Trompeter at 949.283.5447 or e-mail jtrompeter@trccompanies.com

**Date:** 11/21/2024

**Company: BNSF** Jobi Cherian

**Address:** BNSF Railway, Fort Worth TX 76131

**Telephone No.:** 817-352-2939

**E-mail Address:** Jobi.Cherian@BNSF.com

**Signature:** _____

**Site Name & Address:**

Depue, Sandra Property, 33326 Delaney Road, Barstow, CA 92311 / APN(s): 0421-071-54-0000

**Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)**

---

**(1.)** **Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)**
Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

**Yes** ☐ **No** ☐

NOTE 1 — In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

---

---

---

**(2.)** **Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

**Yes** ☐ **No** ☐

**(3.)** **Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection* (LLP) (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

**Yes** ☐ **No** ☐

**(4.)** **Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)**

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

**Yes** ☐ **No** ☐

**(5.)** ***Commonly known* or *reasonably ascertainable* information regarding the Site property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Can you provide any information regarding the past uses of the Site?

(b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site?

(c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site?

(d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site?

**Yes** ☐ **No** ☐

**(6.)** **The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**
Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?

| Yes | No |
|---|---|
| ☐ | ☐ |

**(7.)** **Proceedings Involving the Site**
Are you aware of**:** (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

| Yes | No |
|---|---|
| ☐ | ☐ |

**(8.)** **Questions Regarding Helpful Documents**
Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

| | Yes | No |
|---|---|---|
| - Environment site assessment reports | ☐ | ☐ |
| - Environment compliance audit reports | ☐ | ☐ |
| - Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits) | ☐ | ☐ |
| - Registrations for underground and aboveground storage tanks | ☐ | ☐ |
| - Registrations for underground injection systems | ☐ | ☐ |
| - Material Safety Data Sheets (MSDSs) | ☐ | ☐ |
| - Community Right-To-Know plan(s) | ☐ | ☐ |
| - Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc., | ☐ | ☐ |
| - Reports regarding hydrogeologic conditions at the Site and surrounding area | ☐ | ☐ |
| - Notices or other correspondence from any government agency regarding current or previous violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site property | ☐ | ☐ |
| - Hazardous waste generator notices or reports | ☐ | ☐ |
| - Geotechnical studies | ☐ | ☐ |
| - Risk assessments | ☐ | ☐ |
| - Recorded AULs. | ☐ | ☐ |

## [illegible]

### [illegible]

B.S., Geological Sciences, University of California, Santa Barbara, 2011

### [illegible]

Qualified Industrial Storm Water Practitioner, (#00238)

Scrap Metal Qualified Storm Water Developer, (#SM-QSD-093)

### [illegible]

Mr. Jose Maldonado has environmental technical experience in the following general areas:

- Phase I and II Environmental Site Assessment (ESA) and Due Diligence
- Soil and Groundwater Remedial Investigations
- Work Plan Preparation
- Health and Safety Oversight
- Sub-contractor and Construction Oversight
- Storm Water Pollution Prevention Plan Development
- Exceedance Response Action Site Assessment and Characterization
- Hazardous Material Business Plan Preparation
- Spill Prevention, Control, and Countermeasures
- Regulatory Compliance and Permitting

### [illegible]

Mr. Maldonado has eight years of experience and progressive responsibility in the environmental engineering industry focusing on site assessment, remediation, and environmental compliance. His experience includes Phase I report preparation and Phase II implementation, soil and groundwater characterization, remedial investigations, Storm Water Pollution Prevention Plan (SWPPP) implementation, chemical inventory for Hazardous Material Business Plans (HMBP) / Spill Prevention Control and Countermeasure (SPCC), health and safety, and construction oversight. His qualifications include experience with project and portfolio management, field investigation services including: direct supervision of soil and groundwater assessment and remediation, sub-contractor oversight, technical report writing, laboratory data QA/QC, regulatory compliance, acquisition of permits, data analysis/interpretation, and field coordination/training.  Mr. Maldonado's additional duties include preparation of site investigation work plans, sample collection and processing, data evaluation, county-specific environmental compliance, site specific safety plans, and traffic control plans.

### [illegible]

Mr. Maldonado works with the BNSF Real Estate Department to complete environmental site inspections for a portfolio that includes over 100 sites located throughout the Southern California and the Inland Empire regions. His responsibilities include coordinating access with property owners, completing Phase I and II ESAs for property acquisitions, and project management activities. Additionally, Mr. Maldonado was part of a rapid response team tasked with an expedited site assessment and excavation after a train derailment in the City of Devore.  His responsibilities included on-site coordination with property owners,

directing the Hazardous Material Response Team activities, supervision of drilling sub-contractor activities (confirmation soil borings, soil vapor probe and biovent well installation), soil classification, soil sampling, sample coordination with laboratory and waste disposal sub-contractors.

□□ □M□□ □D□□D□□□□□□□□R□□□□□ □□□□□□□ □□□□R□□ □d□□□□□□□□□d□□ □□□□r□□□□□□□□ □□r□□□□□□□□□□ □ □□□□□□□□□□ □ □□□r□□□□□□□ □□□□□□□□□

Mr. Maldonado was part of the due diligence team responsible for the acquisition of the former Maier Brewing Company located in the City of Los Angeles. His tasks included communication and coordination with the former property owner, the Phase I ESA and public records search, and Phase II implementation and report preparation. Mr. Maldonado was also part of the remedial investigation to further delineate and evaluate off-site soil gas concentrations at a former dry-cleaning operation in the City of Los Angeles. The assessment activities were conducted to investigate the presence of chlorinated volatile organic compounds in soil, groundwater, and soil gas and determine the potential environmental health risk in neighboring residential and commercial properties. Mr. Maldonado also served as the clean-up Supervisor for the homeless encampment program. His responsibilities included oversight of postings, scheduling and coordinating with local law enforcement, implementation of clean-up procedures, health and safety, and sub-contractor oversight related to cleanup activities. Additionally, Mr. Maldonado has experience in construction projects that includes: supervision of Underground Storage Tank (USTs) removals and Above Ground Storage Tank (ASTs) installation, dust control monitoring, traffic control management, and sub-contractor coordination.

□□r□□□□□□□□B□□□□□□□d□□□□□ □□□□□□□□□□ □□□□d□□ □□□□□D□□□r□□□□□□□□□r□□ □□□□□□□□□□□ □ □□□□□□□□□r□□□□□□□

Mr. Maldonado served as the lead Environmental Professional and conducted multiple site inspections as part of the Pier B On-Dock Rail Expansion Project. His responsibilities included site reconnaissance to document visual observations and interviews with site contact(s) or Site owner's representative. Mr. Maldonado helped prepare Phase I ESAs in accordance with ASTM, summarizing the findings and conclusions based on the site reconnaissance and interview(s), EDR reports, and previously prepared environmental documents for the site. Additionally, Mr. Maldonado serves as the primary Project Geologist for multiple schools in the greater Los Angeles area. His responsibilities include: sub-contractor oversight for surveying, geophysical utility clearance, excavation, paving, and drilling. Additional duties include, health and safety oversight, dust monitoring in accordance with South Coast Air Quality Management District (SCAQMD) Rule 1466, soil and groundwater sampling.

R□□R□□□□□□□□□□□□□□R□□□□□

Mr. John Trompeter, PG, CHG has 41 years of experience in the geological sciences and 37 years in the environmental consulting industry with TRC. His experience consists of the following:

- Various environmental portfolio-scale management roles including:□
- Senior remedial technical lead for petroleum- and chlorinated solvents-impacted sites (1992 to present), including:□
  - Subsurface investigations / Hydrogeologic evaluations / Site conceptual model development.
  - Remedial strategies / Critical pathway to closures.
  - Remedial testing planning / Implementation / Analysis / Interpretation.
  - Remedy selection / Design / Implementation.
- Environmental due diligence evaluations related to property acquisitions/divestments and environmental liability transfers (1996 to present).
- Program Manager (2010 to 2021) for a confidential major oil client for a heritage portfolio consisting of ~490 sites including refineries, terminals, pipelines, bulk plants, and retail service stations. Baseline lifecycle work scopes, schedules, and costs were developed for each of these sites and are routinely updated. TRC's oversight activities include due diligence tracking of another major oil company's activities that shares the environmental liabilities for this portfolio. Mr. Trompeter also provides legal support for claims and allocations, as well as liability risk evaluations that consider feasible remedial alternatives and associated probabilistic distribution of costs.
- Program Manager (1992 to 2007) and Account Manager/Principal (1996 to 2007) for environmental remediation services for Mobil's (~150 sites) and ExxonMobil's (~60 sites) petroleum facilities including the Torrance Refinery, pipelines, bulk plants, and retail service stations in California.

□ □

**[illegible]**

Senior Remedial Technical Lead responsible for remedial strategy development and implementation for various clients throughout California. This role has been primarily performed for TRC's major oil customers, including Mobil/ExxonMobil, Unocal/Tosco/ConocoPhillips, Phillips 66, ARCO, and Texaco. Petroleum-impacted facilities include refineries, terminals, bulk plants, pipelines and pumping stations, and retail service stations, Mr. Trompeter has also provided technical support for sites in the Port of Los Angeles on behalf of Plains All American Pipeline and Canners Steam (Del Monte), as well as support for various sites on behalf of the Port of Long Beach. He has also worked on multi-media investigations (e.g., groundwater, soil, soil vapor, and indoor air [vapor intrusion]) and remedial strategies/implementation for chlorinated solvent-impacted sites, including Chromalloy Inc. (sites in Gardena and El Cajon, California) and Carroll Shelby Trust (Gardena, California).

**[illegible]**

Program Manager responsible for providing management oversight and liability forecasting for a confidential major oil company portfolio consisting of 490 petroleum sites with active/open regulatory cases. He directed the initial effort to estimate a baseline value of environmental liabilities for this portfolio at approximately $350MM. The responsibility for environmental liabilities is shared pursuant to a contractual agreement by our major oil client and another U.S.-based major oil company. This portfolio includes refineries, terminals, bulk plants, pipelines, pump stations, and retail services stations in the Western U.S. and Hawaii. Currently, the number of open regulatory cases has been reduced to 170 sites. Mr. Trompeter's management oversight activities include due diligence tracking of corrective action work conducted by the other major oil company that currently is 100% responsible. The goal of the program is to assist the Client to implement strategies to minimize the remaining liabilities that may return to the Client when the cost-sharing agreement ends in the near future. On an ongoing basis, TRC evaluates the progress of each site in the portfolio, and estimates the remaining lifecycle liabilities/risks on a yearly basis.

**[illegible]**

Senior Remedial Technical Lead responsible for developing/implementing the remedial action plan (RAP) through post-remedial monitoring and closure. The site is located in the Fish Harbor area of the POLA, and contamination resulted from historic discharges from a fuel oil system. Mr. Trompeter developed the strategies and plans for the site investigations, feasibility pilot testing, soil remedial excavation, groundwater remediation, and post-remedial groundwater monitoring. Site investigations included installation of groundwater monitoring wells and delineation of soil contamination to define the extent of remedial excavation activities. He directed the pilot testing to understand tidally-influenced groundwater and LNAPL thickness/distribution variations observed during the tide cycle. Mr. Trompeter developed the FS/RAP that was approved by the LARWQCB and POLA. The remedial strategy included remedial excavation with dewatering to remove contaminated smear-zone soils and free product in the upper saturated zone, followed by implementing an in-situ chemical oxidation (ISCO) program to further remediate dissolved-phase hydrocarbons in groundwater. As a result, free product occurrence was eliminated and the concentrations in groundwater improved by up to three orders of magnitude. Subsequent regulatory negotiations achieved closure from the LARWQCB and POLA.

**D□□□□□□□□□□□□□□□R□□M□□□□□□□R□□□□□□□□□□□□D□R□□□□□□□□□□□□R□□□□□□□□□□□□R□□□□□□□□□□□□R□□□□□□□□□□□□R□□□□**

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of 3 years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of 3 years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience; or (iv) have the equivalent of 10 years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the subject property. TRC personnel resume(s) are included in □□□□□**d**□□□□.

---

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Signature of Environmental Professional:  Date: 11/21/2024

**Certification:**

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Matt Eaton - Principal Geologist

# 2.0 EXECUTIVE SUMMARY

## 2.1 Subject Property Description

This Phase I Environmental Site Assessment (Phase I ESA) was prepared for one approximately 1.1 acre parcel owned by Jessica A. Gomez located on the north side of West Main Street (National Trails Highway-Route 66) in Barstow, California (herein referred to as the "Site"). Figure 1 shows the Site location (Appendix A).

The address provided for the Site is as follows: 25268 W. Main Street, Barstow, CA. The Site is identified by assessors parcel number (APN) 0422-031-10 by the San Bernardino County Assessor's Office.

The Site inspection was conducted on April 4, 2022. The Site is a mixed use residential/commercial property and includes a single-story wood framed residence/house located on the southwest corner and an inactive tire shop/garage located near the center of the Site. The property is surrounded by a perimeter chain link fence.

TRC Environmental Corporation (TRC) was retained by BNSF Railway (also known as "Client" or "User") for its use regarding the Site. TRC's assessment was conducted in connection with the Client's planned business transaction involving the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials Practice E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13).

## 2.2 Data Gaps

Data gaps per the ASTM Standard E1527-13:

- Phase I User Questionnaire was not completed by the user.
- The property owner or the person most knowledgeable regarding the property was available for an interview during the Site inspection, however the environmental questionnaire was not completed.

## 2.3 Environmental Report Summary

TRC has performed a Phase I ESA in conformance with the ASTM Practice E 1527-13 scope and limitations for the Gomez property located at 25268 Main Street, Barstow, California. Any exceptions to or deletions from this practice are described in Section 3.4 of this report.

## 2.3 Environmental Report Summary (continued)

No RECs were identified at the Site. However one *Historical Recognized Environmental Condition* (HREC) was identified associated with a previous diesel spill (100 gallons) in 1999 by a tenant that was leasing the rear of the Site for storage of petroleum containers (Sullivan Petroleum). In 1999, a a Notice of Violation was issued by the local CUPA and required Sullivan to remediate the spill. Sullivan complied and implemented a cleanup including excavation and offsite disposal of 19 tons of impacted soil and collected confirmation samples from the excavation. The soil samples were analyzed for total petroleum hydrocarbons as diesel range (TPH-D) and for benzene, toluene, ethylbenzene, and toluene (BTEX) by EPA Methods 8015 and 5035/8020. The results indicated that TPH-D and BTEX were not detected in the confirmation samples indicating the cleanup was effective. There was no further communication in the CUPA file regarding the spill and cleanup. Since this spill would have been identified as a REC upon discovery in 1999, but was remediated under regulatory direction and the cleanup meets current regulatory guideline, the former spill would be identified as an HREC.

Photos depicting the below findings, opinions, and conclusions are included in Appendix B.

Historical Site Summary

- The historical records indicate the Site has been privately owned by individuals and utilized for residential and commercial purposes.
- The aerial imagery provided in the EDR suggests that the property was developed since 1953 with at least one residence and a small structure (possible storage shed).
- Between 1970 and 1984 the current garage/shop was constructed (the small structure removed/demolished).
- The Site address 25268 Main Street was first listed in the 1976 and 1980 City Directories under the names Osborne WM F and Lee Milton E, respectively.
- From 1986 to 1995 the Site was listed under the name "Abel's Septic Serv".
- In 1999, the rear of the parcel was leased to Sullivan Petroleum for storage of petroleum containers. A diesel spill was documented in 1999, see Records Review below.
- No historical information was found to indicate the historic presence of septic tanks at the Site, however the Site contact reported that there was at least one onsite septic system, however he was not sure if the septic tank was removed when the residence switched to the City of Barstow's sanitary sewer.

Records Review

## 2.3 Environmental Report Summary (continued)

- A record and file dated 1999 was identified at the San Bernardino County Fire Department, Hazardous Materials Division regarding a 100 gallon diesel release on the Site by Sullivan Petroleum Company. The County HMD issued a Notice of Violation and required a cleanup by the tenant. A remediation plan was implemented on May 12, 1999 including excavation and removal of the impacted soil and collection and analysis of confirmation samples. Approximately 19 tons of impacted soil were excavated and disposed offsite. Confirmation samples indicated TPH-D and BTEX were not detected in the bottom of the excavation. The spill would have been identified as a REC at the time if discovery, however since the spill has been remediated under regulatory direction and the case closed, the former spill and cleanup would be identified as an HREC. See Section 6.3.3 for further details. Since this spill would have been identified as a REC upon discovery in 1999, but was remediated under regulatory direction and the cleanup meets current regulatory guideline, the former spill would be identified as an HREC.
- The Site was not listed in the EDR Report.
- The EDR report identifies 12 sites within a 1-mile radius of the Site
- 10 sites located at higher elevations than the Site (potentially upgradient sources of contamination) within a ½-mile radius of the Site. See Summary below:
    - TSM Services Inc, 25277 W Main Bldg 18 (0.019 miles away)
    - Listed within the RCRA-SQG, FINDS, and ECHO databases as a small quantity. No violations were found.
    - Whiting Brothers, 24645 Main (0.040 miles away)
        - Record from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 04/28/1987 and reported 02/25/1992. Site Assessments began in 1993 with the installation of a soil vapor extraction system to mitigate soil impacts at the site. One monitoring well indicated low levels of dissolved phase contaminant in 2009, and closure eligibility occurred in 2013. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 1/03/2014.
        - Review of the RWQCB files indicates four USTs were removed in 1992 and soil contamination was reported. An SVE system with eight SVE wells was installed in 2001 and operated until 2012. Three groundwater monitoring wells were installed, depth to groundwater was approximately 97 feet below grade, and approximately four rounds of sampling were conducted. Total petroleum hydrocarbons as gasoline (TPH-G) was detected at 75 micrograms per liter (µg/L) in one well. Benzene, toluene, ethylbenzene, and

## 2.3 Environmental Report Summary (continued)

xylenes (BTEX) were not detected. The groundwater flow gradient was indicated to be to the north/northwest (Block Environmental, January 9, 2013. *Fourth Quarter 2012 Vapor Extractions and Maintenance Report, Former Whiting Bros. Service Station, 24625 West Main Street, Lenwood California).*

- H Olson Distributing, 25151 Frank St. (0.133 miles away)
  - Listed in the Historical UST database for three USTs on site..
    - Tank 1: 3000 gallon tank that was installed 1976 and contained regular unleaded fuel.
    - Tank 2: 6000 gallon tank that was installed 1980 and contained regular leaded fuel.
    - Tank 3: 6000 gallon tank that was installed 1980 and contained diesel fuel.
  - Listed in the SWEEPS UST, CA FID UST, HAZNET, CIWQS, and HWTS databases.
    - Active status for USTs.
    - CA wastecode:141 - Off-specification, aged or surplus inorganics.
    - Disposal method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Recovery (H010-H129) Or (H131-H135).
    - Inactive stormwater construction permit: NPDES Number: CAS000002.
- Judy Ness, 25425 Bejoal St. (0.2264 miles away)
  - The RCRA NonGen/NLR listing pertains to the facility's handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
- Esganislada Jaramill, 34250 Paris St. (0.0231 miles away)
  - The RCRA NonGen/NLR listing pertains to the facility's handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
- Unknown, 25513 Main St. W. (0.306 miles away)
  - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a gasoline release that impacted soil at the facility. The leak was discovered on 07/24/1986 and reported 08/11/1986. The case was originally closed 11/21/1986 and reopened 11/13/1986. The cleanup case is regulated

## 2.3 Environmental Report Summary (continued)

by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 03/31/1988.

- W A Thompson Co., 25538 Main St. W. (0.321 miles away)
  - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a diesel release that impacted soil at the facility. The leak was discovered on 08/08/1996, reported 08/26/1996, and remediation activities at the site began 09/03/1996. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 01/30/1997.
- Shirley Morgan, 25644 Main St. W. (0.497 miles away)
  - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 10/13/1998. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 05/11/2000.

Site Inspection (April 4, 2022)

- The site is surrounded by a chain link fence and includes a single-story residence and a garage/shop. See Photos 1 through 24.
- An irrigation drip system is installed along the northern and eastern boundaries of the Site. See Photos 2 and 3.
- Trash, concrete debris, and at least one unlabeled container are scattered on the site surface near the eastern perimeter of the Site. See Photo 4.
- Several 5-gallon buckets are stored on the adjacent property near the eastern fence line of the site. No indications of spills were observed near the buckets. See Photo 4.
- The property is primarily unpaved. See Photo 5.
- A 60’ x 45’ pile of concrete and asphalt debris located at the northwest corner of the property. See Photo 6.
- A pole mounted transformer and overhead utilities bisect the property. See Photos 7 and 8.
- Single-story wood framed residence located near the southwest corner of the Site and utilities (gas, water, electric) along the perimeter of the residence. See Photos 9 through 14.

## 2.3 Environmental Report Summary (continued)

- A plumbing cleanout and a 4" PVC pipe with a 1" steel pipe in the center was observed extending through the surface soil on the north side of the residence. See Photo 13. The Site contact reported these features may have been related to a septic system; however, he was not sure if the septic system was removed when the residence switched to the City sewer.
- A canopy and block wall structure located east of the trash enclosure (block walled area for trash cans). See Photo 15.
- An Inactive tire shop and a shipping container located east of the residence. See Photos 16 through 24.
- Several salvaged cars are parked adjacent to tire shop. No leaks or staining observed. See Photo 17.
- Approximately 20 tires stored along the eastern boundary of the shipping container. See Photo 18.
- One shipping container housing miscellaneous items. See Photo 19.
- A concrete pad with some staining located on the exterior of the former tire shop near the northeast corner (may have been for an air compressor). See Photo 20.
- Electrical panel attached to utility pole located along the northern boundary of the tire shop and several utilities. See Photos 21 and 22.
- Interior of former tire shop/garage. See Photos 23 and 24.

### *2.3.1 Findings, Opinions and Conclusions*

Based on the ASTM definitions and professional standards, no RECs or CRECs associated with the Site were identified.

One HREC was identified associated with a historic diesel spill that occurred at the Site in 1999. Review of the file indicates the impacted soil was excavated and disposed offsite; confirmation sampling indicated remaining TPH-D and BTEX concentrations in the soil were not detected. Key events and laboratory results are summarized below. The historical diesel spill has been identified as an HREC.

- A Hazardous Materials Response report provided identified the Sullivan Petroleum Co. as the suspect party. The report listed the property address 25268 Main Street.
- A Notice of Violation issued 4/27/1999 for a diesel release, improper storage of diesel, no business plan, and unpermitted operations.
- A Remedial Action Work Plan detailing proposed remediation technologies was submitted May 10, 1999 by Aqua Geosciences, Inc.
- A Remedial Action Report detailing soil excavation and confirmation sampling activities was submitted on May 28, 1999 by Aqua Geosciences, Inc. A summary of remediation activities below:
    - Approximately 19 tons of impacted soil was excavated and disposed offsite.
    - Confirmation sampling was conducted after soil removal and the samples were analyzed for TPH-D and BTEX by EPA Method 8015/5035/8020. The indicated that TPH-D and BTEX were not detected in the confirmation samples.
    - The samples were also analyzed for total recoverable petroleum hydrocarbons "TRPH" by EPA Method 418.1. The 418.1 results indicated 150 mg/kg "TRPH" in a Background sample collected outside the spill area and the TRPH results in the eight confirmation samples ranged from 110 mg/kg to 520 mg/kg.
    - The "TRPH" results by 418.1 reports non-petroleum constituents as "TRPH" (i.e., biogenic material, leaves, twigs, non-polar molecules, etc.). As a result, regulatory agencies no longer use 418.1 results to make decisions and utilize the more accurate 8015/8020 results for decision making and verification sampling results.

### *2.3.1 Findings, Opinions and Conclusions (continued)*

Since the more accurate 8015/8020 results indicated that TPH-D and BTEX were not detected, the cleanup at the site would be considered to meet current regulatory standards and would not be identified as a REC at this time but would be identified as an HREC.

Although not a REC per the ASTM definition, the following items are noted and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:

- Septic system at the current residence.
- ACM and/or LBP could have been used in construction of the residence.

The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 5.7 miles north of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area. Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information publicly available online. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Site. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources. Recent plume maps and information can be reviewed here:
http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps

## 2.4 Recommendations

The following recommendations are provided:

- If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, additional sampling should be conducted.
- The northern area of the Site was leased by Sullivan Petroleum Company in 1999 for storage of petroleum containers. A diesel spill (100 gallons) was identified and cleaned up in 1999. As a result, it is possible that other spills may have occurred and were not identified. As a result, if petroleum and or soil staining is identified during site demolition or grading, sampling should be conducted to determine the impacts, if any.

# 3.0 INTRODUCTION

This Phase I Environmental Site Assessment (Phase I ESA) was prepared for one approximately parcel owned by  located on the north side of West Main Street (National Trails Highway-Route 66) in Barstow, California (herein referred to as the "Site").  Figure 1 shows the Site location (Appendix A).

The address 25268 Main Street was provided by BNSF. The Site is identified by assessors parcel number (APN) 0422-031-10 by the San Bernardino County Assessor's Office.

TRC Environmental Corporation (TRC) was retained by BNSF Railway (also known as "Client" or "User") for its use regarding the Site. TRC's assessment was conducted in connection with the Client's planned business transaction involving the Site. The Phase I ESA described in this report was performed in accordance with the scope and limitations of the American Society of Testing and Materials Practice E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-13).

## 3.1 Purpose

The purpose of this Phase I ESA was to review environmental conditions prior to potential purchase of the Site by BNSF Railway.

The Phase I ESA was prepared in general conformance with the methods and procedures described in the United States Environmental Protection Agency's (EPA's) *Standards and Practices for All Appropriate Inquiries* (i.e., the "AAI Rule" 40 CFR part 312) pursuant to the American Society of Testing and Materials (ASTM) Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Phase I ESA objectives, scope, significant assumptions, list of client-provided information, exceptions and limitations, are presented in the following sections.

## 3.2 Objective

The objective of this Phase I ESA was to evaluate whether current or historical activities on or adjacent to the Site have potentially resulted in significant contamination by hazardous substances or petroleum products, which is subsequently referred to in this report as a "Recognized Environmental Condition" (REC), a "Historical Recognized Environmental Condition" (HREC) or a "Controlled Recognized Environmental Condition" (CREC).

A REC is defined as:

## 3.2 Objective (continued)

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

However, according to the ASTM Phase I ESA standard, the term "Recognized Environmental Condition" is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government authorities.

A HREC is defined as:

"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls). Before calling the past release an HREC, the EP must determine whether the past release is a REC at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC."

A CREC is defined as:

"A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)... a CREC shall be listed in the Findings Section of the Phase I ESA report, and as a REC in the Conclusions Section of the ...report."

## 3.3 Scope of Work

This Phase I ESA was completed by an environmental professional as defined by the AAI Rule. The detailed scope of services consisted of the following tasks within the scope of ASTM Standard E1527-13

Current Site Conditions

- Site inspection to evaluate the nature and type of activities that are conducted at the property in terms of potential for release or threat of release of hazardous substances or petroleum products.
- Inspection of surrounding properties to evaluate the potential for affecting the Site.
- Description of the physical setting of the Site.
- Interview with a Site representative and with local or state environmental agency personnel, as applicable.

Historic Site Conditions

- Review of records on file with regulatory agencies.
- Environmental lien search.
- Environmental database review.

Environmental Agency Review

- Review of environmental databases conducted by a third party, Environmental Data Resources (EDR), and provided to TRC.
- Review of regulatory agency records at state and local environmental agencies.

The following list of "additional issues" that are considered outside the scope of the ASTM Phase I ESA practice by ASTM Method E1527-13 were not included or addressed in this Phase I ESA:

- Asbestos
- Lead-based paint
- Radon
- Lead in drinking water
- Wetlands
- Regulatory compliance
- Cultural and historical resources
- Industrial hygiene
- Health and safety
- Ecological resources

## 3.3 Scope of Work (continued)

- Endangered species
- Indoor air quality
- Bio-agents and mold

## 3.4 Deviations

No significant exceptions, additions, or deletions to the ASTM Standard were made during this Phase I ESA with the exception of the following:

- A chain-of-title document was not secured, reviewed, or discussed in the preparation of this report.

## 3.5 Accuracy and Completeness

The findings and conclusions presented herein are based upon the available information and Site conditions as they existed at the time of TRC's Site inspection. Information included in this report regarding the environmental conditions at surrounding properties and the potential impact to the Site are based on limited information and are considered provisional. Impacts to the Site from historical or off-site sources, including historic fill material, can only be confirmed by sample collection and analysis.

The Site inspection was limited to areas that were readily accessible and free of safety hazards. Areas where floors or the ground surface was covered by objects (e.g. carpeting, furniture, warehoused materials and equipment); areas beneath parked vehicles; behind walls; above ceilings; and/or the roof(s) of on-site building(s) were not inspected.

The ASTM E 1527-13 standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated — No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 2.2.

- Not Exhaustive — A Phase I ESA is not an exhaustive investigation.

- Past Uses of the Property — A review of standard historical sources at intervals less than 5 years is not required.

## 3.5 Accuracy and Completeness (continued)

The Client is advised that the Phase I ESA conducted at the Site is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the Site. Therefore, TRC does not make a statement i) of warranty or guarantee, express or implied for any specific use; ii) that the Site is free of RECs or environmental impairment; iii) that the Site is "clean"; or iv) that impairments, if any, are limited to those that were discovered while TRC was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM standard and intended scope of this assessment. Specific limiting conditions identified during the Site reconnaissance are described in Section 7.1. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other construction purposes.

This report presents TRC's Site reconnaissance observations, findings, and conclusions as they existed at the time of the Site reconnaissance. TRC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state, and local laws, regulations, and codes. TRC makes no guarantees as to the accuracy or completeness of information obtained from others during the course of this Phase I ESA report. It is possible that information exists beyond the scope of this assessment, or that information was not provided to TRC. Additional information subsequently provided, discovered, or produced may alter findings or conclusions made in this Phase I ESA report. TRC is under no obligation to update this report to reflect such subsequent information. The findings presented in this report are based upon reasonably ascertainable information and observed Site conditions at the time of the assessment.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not assessed. Regardless of the findings stated in this report, TRC is not responsible for consequences or conditions arising from facts that were not fully disclosed to TRC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances and was assumed to be correct and complete unless

## 3.5 Accuracy and Completeness (continued)

obviously contradicted by TRC's observations or other credible referenced sources reviewed during the assessment.

TRC is not a professional title insurance or land surveyor firm and makes no guarantee, explicit or implied, that any land title records acquired or reviewed, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

## 3.6 Warranties and Representations

This report does not warrant against: (1) operations or conditions which were not evident from visual observations or historical information provided; (2) conditions which could only be determined by physical sampling or other intrusive investigation techniques; (3) locations other than the client-provided addresses and/or legal parcel description; or (4) information regarding off-Site location(s) (with possible impact to the Site) not published in publicly available records.

## 3.7 Legal Notice

TRC Environmental Corporation (TRC) has prepared this Phase I ESA for BNSF Railway (hereinafter "Client" or "User"). This document was prepared by TRC solely for the benefit of the Client and the User. With regard to third-party recipients of this document, neither TRC, nor the Client, nor the User, nor any of their respective parents, affiliates, or subsidiaries, nor any person acting on their behalf: (a) makes any warranty, expressed or implied, with respect to the use of any information or methods disclosed in this document; or (b) assumes any liability with respect to the use of any information or methods disclosed in this document. Any third-party recipient of this document, by its acceptance or use of this document, releases TRC, the Client, the User, and their parents, affiliates, and subsidiaries from any liability for direct, indirect, economic, incidental, consequential, or special loss or damage whether arising in contract, warranty, express or implied, tort, or otherwise, and irrespective of fault, negligence, and strict liability.

## 3.8 Continued Validity/User Reliance

This report is presumed to be valid, in accordance with, and subject to, the limitations specified in the ASTM E 1527-13 standard, for a period of 180 days from completion, or until the Client obtains specific information that may materially alter a finding, opinion, or conclusion in this report, or until the Client is notified by TRC that it has obtained specific information that may materially alter a finding, opinion, or conclusion in this report. Additionally, pursuant to the

## 3.8 Continued Validity/User Reliance (continued)

ASTM E 1527-13 standard, this report is presumed valid if completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction.

## 3.9 Significant Assumptions

During this Phase I ESA, TRC relied on database information; interviews with Site representatives, regulatory officials, and other individuals having knowledge of Site operations; and information provided by the User as requested in our authorized Scope of Work. TRC has assumed that the information provided is true and accurate. Reliance on electronic database search reports is subject to the limitations set forth in those reports. TRC did not independently verify the information provided. TRC found no reason to question the validity of the information received unless explicitly noted elsewhere in this report. If other information is discovered and/or if previous reports exist that were not provided to TRC, our conclusions may not be valid.

We have assumed that the information sources utilized for this assessment provided complete and accurate information. Evaluations presented in this report are based exclusively on information provided by the City of Barstow, County of San Bernardino, agency representatives, available public records, and observations made during the Site inspection.

## 3.10 User Provided Information

The following documents and/or information were provided by BNSF Railway

- APN parcel number.
- Site location map from satellite imagery.

According to the ASTM Standard E1527-13, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User (in this case the "Phase I User" is BNSF Railway). These tasks include reviewing title records for environmental liens or activity and land use limitations; providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); and providing explanations for significant reduction in the Site purchase price. It is our understanding that BNSF does not have previous environmental documents or specialized information regarding this Site.

## 3.10 User Provided Information (continued)

Appendix C includes the Phase I User documentation as required by ASTM Standard E1527-13.

### *3.10.1 Specialized Knowledge*

The User was not aware of specialized knowledge related to RECs at the Site.

### *3.10.2 Valuation Reduction for Environmental Issues*

The User was not aware of property valuation reduction issues regarding the Site.

### *3.10.3 Owner, Property Manager, and Occupant Information*

BNSF Railway provided a site location map which included the following property owner information:

- APN parcel number.
- Acreage.
- Zoning classification.
- Current Site use.
- Site contact through ROW Advisors.

According to the ASTM Standard E1527-13, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User (in this case the "Phase I User" is BNSF Railway). These tasks include reviewing title records for environmental liens or activity and land use limitations; providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); and providing explanations for significant reduction in the Site purchase price. It is our understanding that BNSF does not have previous environmental documents or specialized information regarding this Site.
Appendix C includes the Phase I User documentation as required by ASTM Standard E1527-13.

### *3.10.4 Reason For Performing Phase I ESA*

It is our understanding that BNSF Railway is considering purchasing the Site and is conducting this Phase I as part of their property transaction due diligence.

# 4.0 SITE DESCRIPTION

## 4.1 Location and Legal Description

This Phase I Environmental Site Assessment (Phase I ESA) was prepared for one approximately 1.1 acre parcel owned by Jessica A. Gomez located on the north side of West Main Street (National Trails Highway-Route 66) in Barstow, California (herein referred to as the "Site"). Figure 1 shows the Site location.

The address 25268 Main Street was provided by BNSF. The Site is identified by assessors parcel number (APN) 0422-031-10 by the San Bernardino County Assessor's Office. Figure 2 is a Site Plan from satellite imagery and Figure 2A shows the parcel designations as identified above. The parcel map is included in Appendix D.

## 4.2 Current Use of Property

The Site is a mixed use residential/commercial property and consists of a single-story wood framed residence located on the southwest corner and an inactive tire shop/garage near the center of the Site. The shop/garage structure is vacant and not in use. The property is surrounded by a perimeter chain link fence with several vehicles parked on the property.

## 4.3 Site and Vicinity Description

The surrounding area was observed on the same day as the Site inspection. Observations of surrounding properties were limited to areas accessible to the public, and areas that could be readily observed from the Site. The following descriptions summarize the adjacent property uses:

North - BNSF right-of-way, beyond which are vacant parcels.
South - Main Street, beyond which are residential and commercial properties.
East - Residential and vacant properties.
West - Residential and commercial properties.

## 4.4 Regional Topography and Hydrology

The Site is located within the South Lahontan Hydrologic Region, specifically the Mojave River Groundwater Basin in the County of San Bernardino. According to the United States Geological Survey (USGS) topographic map, Hodge, Barstow, and Hinkley quadrangles dated 1993 (Figure 1) and Environmental Data Resources, Inc. (EDR) database report, the Site topographic elevation is approximately 2243 feet above mean sea level (MSL), and local topography slopes generally to the north-northeast.

## 4.4 Regional Topography and Hydrology (continued)

The Site is bound to the north by the Mojave River, and multiple fault lines including the Lockhart, Lenwood, and the Mt. General Fault are within 10 miles to the northwest (Fault Activity Map of California, 2010). The underlying rock units are alluvium and Miocene nonmarine rocks. Sources of water in the basin include percolation from precipitation, and infiltration of rainwater runoff from the Lenwood Spreading Grounds. Waterâbearing deposits are unconfined within this water basin (Lower Mojave River Valley Groundwater Basin, Revised February 27, 2004).

The EDR database report (see Appendix E) indicates there are records for approximately 79 groundwater wells within a 1-mile radius.
Groundwater flow direction in the Mojave River Groundwater Basin near the Site is generally to the north, and depth to water in several USGS water supply wells ranged from 45 (1933) to 82 (1958) feet below grade (EDR, 2022).

The database radius report supplied by EDR was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

- Hydric Status: Not Hydric
- Soil Surface Texture: Sand, loam
- Soil Component Name: Cajon (Class A), Helendale (Class B) , Victorville (Class B), Joshua (Class C)
- Deeper Soil Types: Not reported

Refer to the Geocheck Physical Setting Source Summary of the EDR report presented in Appendix E for further information regarding the soil composition in the Site vicinity.

Per Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 06071C3915J, dated September 3, 2016, the Site is located in Zone AO. According to FEMA's Flood Zone Designations, Zone AO represents an area with base flood elevation (BFE) or depth of 1 foot. The FEMA Flood Insurance Rate Map is provided in Appendix F.

## 4.5 Groundwater Quality

The GeoCheck® databases provided with the EDR report (Appendix E) indicate there are approximately 79 wells within a 1-mile radius (pages A-14 to A-37 in Appendix E) within the radius report for the Site. Limited groundwater quality data for inorganic constituents were included in the GeoCheck® database for several of the wells in the Site vicinity. Exceedances of drinking water standards were not reported (see pages A-14 to A-37 in Appendix E).

## 4.5 Groundwater Quality (continued)

It is our understanding that previous groundwater investigations have not been conducted at the Site.

# 5.0 HISTORICAL USE

## 5.1 Historical Summary

Information regarding Site and vicinity historical uses was provided by EDR, who obtained the information from a variety of public and other sources reasonably available to them.

- City directories dated 1964, 1971, 1978, 1980, 1986, 1992, 1995, 2000, 2005, 2010, 2014, and 2017;
- Aerial photographs (scale: 1" = 500') dated 1953, 1959, 1963, 1968, 1970, 1984, 1995, 2005, 2009, 2012, and 2016;
- Historical Sanborn Fire Insurance Maps (Site is located within an unmapped area);
- Topographic maps dated 1932, 1934, 1956, 1971, 1984, 1993, 2012, 2015, and 2018; and
- Local municipal records.

## 5.2 Property Information Management Systems

Historical site ownership as listed in the San Bernardino County Property Information Management System (PIMS) is summarized below. The PIMS Report is included in Appendix G.

**Parcel 0422-031-10: 1.1 Acre**

| Site Owner | From | To |
|---|---|---|
| Jessica A. Gomez | 2016 | Present |
| Erick Orlando Coronado and Theresa Marie Loza | 2014 | 2016 |
| Jessica A. Gomez | 2006 | 2014 |
| Vicki L. Hicks, Roger E. Hicks, Judith Knoll, and Kenneth Knoll | 1999 | 2006 |

### *5.2.1 Interview with Owner*

The Site is currently owned by Jessica A. Gomez, and TRC contacted Right-of-Way Advisors to facilitate an interview with the property representatives and provided an environmental Questionnaire form for the owner to complete and return. An interview with Alex Gomez, the person most knowledgeable regarding the property was conducted as part of the ASTM Phase I Standard, however at the time of reporting, the Questionnaire was not returned. At the time of inspection, Mr. Gomez reported:

- The property has been mixed commercial/residential .
- There is an old tire shop/garage located at the center of the property used by previous tenants.

### *5.2.1 Interview with Owner (continued)*

- No previous industrial activities on the property.
- The Site has not been used for storage and/or use of hazardous materials including ASTs and USTs.
- There no water wells on the property.
- The property had at least one septic system associated with the primary residence.

## 5.3 City Directories

The following site address was listed in the city directory search provided by EDR:

- 25268 Main Street

Listings in the City directories for the time period of 1964 through 2017 were provided by the EDR and the Site address returned records for the years, 1992, 1995, 2005, and 2010 in the EDR's City Directory search. See Summary below.

- 2000-2017: No listings were identified
- 1986-1995: Abels Septic Serv
- 1980: 25268 Main St. - Lee Milton E.
- 1976: 25268 Main St. - Osborne WM F
- 1964: No listing were identified

The City Directory report is included in Appendix E.

## 5.4 Aerial Photos

EDR provided 11 aerial photographs from several collections dating from 2016 to 1953. Copies of the aerial photos are shown in Figures 2 through 12. Features observed in the photographs are summarized below.

## 5.4 Aerial Photos (continued)

**Summary**

| Date(s) | Property Comments | Surrounding Area Comments |
|---|---|---|
| 2016 | The Site is developed with one residence, a garage/shop, and several trees located on the southwest quadrant of the property. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. The surrounding area is developed with |

## 5.4 Aerial Photos (continued)

| Date(s) | Property Comments | Surrounding Area Comments |
|---|---|---|
| | | residential/commercial properties in all directions. |
| 2012 | The Site is developed with one residence, a garage/shop, and several trees located on the southwest quadrant of the property. Vehicles observed along the norther boundary. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. Residential/commercial development to the south of the property. |
| 2009 | The Site is developed with one residence, a garage/shop, and several trees located on the southwest quadrant of the property. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. Residential/commercial development to the south of the property. |
| 2005 | The Site is developed with one residence and a garage/shop and several trees located on the southwest quadrant of the property. Vehicles are observed throughout the property. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. Residential/commercial development to the south of the property. |
| 1995 | The Site is developed with one residence, a garage/shop, and a small structure on the southwest quadrant of the property. Vehicles are observed throughout the property. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. Residential/commercial development to the south of the property. |
| 1984 | The Site is developed with one residence and a garage/shop on the southwest quadrant of the property. A small structure is observed north of the garage/shop. | The BNSF right-of-way is observed north of the Site and Main Street to the south of the Site. More residential/commercial development to the south of the property. |
| 1970 | The Site is developed with one structure (residence?), and a rectangular feature north of the structure. Two dark features are shown inside the rectangular feature. It is not clear if the rectangular feature and circular dark features are (possibly trees and fencing?). A natural | The railroad right-of-way is observed north of the Site and Main Street to the south of the Site. Paris Avenue has been paved and the surrounding area consists of residential/commercial properties. |

## 5.4 Aerial Photos (continued)

| Date(s) | Property Comments | Surrounding Area Comments |
|---|---|---|
| | drainage transects the property on the northwest corner. | |
| 1968 | The Site is developed with one residence, fencing, and trees on the southwest quadrant of property. A natural drainage transects the property on the northwest corner. The small structure has been removed or demolished. | The railroad right-of-way is observed north of the Site and Main Street to the south of the Site. Paris Avenue has been paved and the surrounding area consists of residential/commercial properties. |
| 1963 | The Site is developed with one residence on the southwest corner and a small structure on the center of the property. A natural drainage transects the property on the northwest corner. | The railroad right-of-way is observed north of the Site and Main Street to the south of the Site. Paris Avenue has been paved and the surrounding area consists of residential/commercial properties. |
| 1959 | The Site is developed with one residence on the southwest corner and a small structure on the center of the property. A natural drainage transects the property on the northwest corner. | The railroad right-of-way is observed north of the Site and Main Street is visible south of the Site. The surrounding area is primarily vacant undeveloped desert with more residential/commercial development to the south and west of the property. |
| 1953 | The Site is developed with one residence on the southwest corner and a small structure on the center of the property. A natural drainage transects the property on the northwest corner. | The railroad right-of-way is observed north of the Site and Main Street is visible south of the Site. The surrounding area is primarily vacant undeveloped desert with some residences west of the property. |

## 5.5 Sanborn/Historical Maps

EDR reported there is no Sanborn map coverage for the Site or nearby surrounding area. Historical Sanborn® Fire Insurance Maps (Sanborn Maps) were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (i.e., building construction, facility occupants, storage tank locations, and

## 5.5 Sanborn/Historical Maps (continued)

hazardous material storage areas), which can be used as a resource to document land use and structural change over time.

## 5.6 Historical Topographic Maps

Nine USGS topographic maps dated 1932, 1934, 1956, 1971, 1984, 1993, 2012, 2015, and 2018 were obtained and reviewed for information concerning historical activity on or adjacent to the Site. The topographic maps are included in Appendix E. Observations are summarized below:

**Summary**

| Date(s) | Quad | Property Comments | Surrounding Area Comments |
|---|---|---|---|
| 2018 | 7.5 minute | No structures are depicted on the parcel. | The railroad right-of-way are depicted north of the Site. The Mojave River Basin is depicted further north of the Site. W. Main Street is labeled to the south. No structures are shown within the surrounding area. |
| 2015 | 7.5 minute | No structures are depicted on the parcel. | The railroad right-of-way and Cannae Road are depicted north of the Site. The Mojave River Basin is depicted further north of the Site. W. Main Street is labeled to the south. No structures are shown within the surrounding area. |
| 2012 | 7.5 minute | No structures are depicted on the parcel. | The Mojave River is labeled north of the parcel. No structures are shown within the surrounding area. W. Main Street is labeled to the south of the Site. The railroad right-of-way is not not shown. |
| 1993 | 7.5 minute | No structures are depicted on the parcel. | Main Street is labeled south of the Site. The railroad right-of-way, a mobile home park, and the Mojave River Basin are depicted north of the Site. The surrounding area is |

## 5.6 Historical Topographic Maps (continued)

| | | | |
|---|---|---|---|
| | | | developed with neighborhoods, a school, and a park. |
| 1984 | 15 minute | No structures are depicted on the parcel. | Main Street is labeled south of the Site. The railroad right-of-way, Jasper Park, and the Mojave River Basin are depicted north of the Site. The surrounding area is developed with neighborhoods, a Drive-in Theater, and Lenwood Park. |
| 1971 | 7.5 minute | One structure is depicted on the southwest corner of the Site. | Main Street is labeled south of the Site. The railroad right-of-way and the Mojave River are depicted north of the Site. The surrounding area is developed with neighborhoods. Lenwood Park, a Drive-in Theater, and Lenwood School are depicted to the south/southwest of the Site. The intermittent stream is no longer shown on the map. |
| 1956 | 15 minute | One structure is depicted near the center portion of the Site. An intermittent stream transects the property on the northwest corner. | US Route 66/91 is labeled south of the Site. The railroad right-of-way is to the north of the Site, beyond which is the Mojave River basin. The surrounding area is developed with neighborhoods, a Drive-in Theater, and water tank. |
| 1934 | 30 minute | One structure is depicted on the northern boundary of Site. | US Route 66/91 is labeled south of the Site. The railroad right-of-way and one well are depicted north of the Site. The Mojave River Basin is depicted further north of the Site. Several structures shown are observed to the east and west of the Site. |

## 5.6 Historical Topographic Maps (continued)

| | | | |
|---|---|---|---|
| 1932 | 30 minute | One structure is depicted on the northern boundary of Site. | US Route 66/91 is labeled south of the Site. The railroad right-of-way and one well are depicted north of the Site. The Mojave River Basin is depicted further north of the Site. Several structures shown are observed to the east and west of the Site. |

## 5.7 Other Land Use Records

An Environmental Lien Search was provided by EDR for parcel 0422-031-10. No environmental liens or activity and use limitations (AULs) were identified for the parcel. A copy of the environmental lien report is included in Appendix E.

The deed for parcel 0422-031-10 is vested to Jessica A. Gomez.

# 6.0 RECORDS REVIEW

Various regulatory agencies were contacted regarding records and/or files for the Site, and a regulatory database report was obtained from EDR. Agencies contacted or records reviewed included:

- County of San Bernardino, Assessors Office and Land Use Services Department.
- City of Barstow Office of the City Clerk.
- San Bernardino County Fire Department, Hazardous Materials Division.
- California Regional Water Quality Control Board, Lanhontan Region (RWQCB).
- California EPA - Department of Toxic Substances Control (DTSC) Chatsworth and Cypress offices.
- California Energy Management Division (CalGEM).

## 6.1 Previous Environmental Reports

Previous environmental reports regarding the Site were not provided to TRC.

## 6.2 Regulatory Database Review

A regulatory database report summarizing available regulatory search information regarding the Site and other sites within a 1-mile radius was obtained from EDR. The database search is based on information published by federal, state, and local regulatory agencies, and is used to determine whether the Site or nearby properties are listed as having a past or present environmental record of actual or potential environmental impacts from hazardous substances or materials. The regulatory listings include those facilities known to the regulatory agencies at the time of publication or update of the database. The database report was reviewed to evaluate whether the Site or nearby properties are listed in the databases which could indicate a REC on the Site. The EDR report is included in Appendix E.

### *6.2.1 Site*

The Site was not listed in any of the databases in the EDR Radius Report.

### *6.2.2 Adjacent Sites*

The EDR report identifies 12 sites within a 1-mile radius of the Site (see the Mapped Sites Summary in Appendix E, pages Executive Summary 2). Details of each of these sites are included in Appendix E.

The regional groundwater flow direction in the general area of the Site is reported to be in the southeasterly direction similar to local topography (refer to Section 4.6). Therefore, sites

### *6.2.2 Adjacent Sites (continued)*

reported to the northwest of the Site are potentially upgradient with respect to groundwater flow, and may affect the Site.

The Mapped Sites Summary on page 2 of the EDR Report in Appendix E lists 10 sites located at higher elevations than the Site (potentially upgradient sources of contamination) within a ½-mile radius of the Site:

- TSM Services Inc, 25277 W Main Bldg 18 (0.019 miles away)
    - Listed within the RCRA-SQG, FINDS, and ECHO databases as a small quantity. No violations were found.
- Whiting Brothers, 24645 Main (0.040 miles away)
    - Record from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 04/28/1987 and reported 02/25/1992. Site Assessments began in 1993 with the installation of a soil vapor extraction system to mitigate soil impacts at the site. One monitoring well indicated low levels of dissolved phase contaminant in 2009, and closure eligibility occurred in 2013. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 1/03/2014.
    - Review of the RWQCB files indicates four USTs were removed in 1992 and soil contamination was reported. An SVE system with eight SVE wells was installed in 2001 and operated until 2012. Three groundwater monitoring wells were installed, depth to groundwater was approximately 97 feet below grade, and approximately four rounds of sampling were conducted. Total petroleum hydrocarbons as gasoline (TPH-G) was detected at 75 micrograms per liter (µg/L) in one well. Benzene, toluene, ethylbenzene, and xylenes (BTEX) were not detected. The groundwater flow gradient was indicated to be to the north/northwest (Block Environmental, January 9, 2013. *Fourth Quarter 2012 Vapor Extractions and Maintenance Report, Former Whiting Bros. Service Station, 24625 West Main Street, Lenwood California).*
- H Olson Distributing, 25151 Frank St. (0.133 miles away)
    - Listed in the Historical UST database for three USTs on site..
        - Tank 1: 3000 gallon tank that was installed 1976 and contained regular unleaded fuel.
        - Tank 2: 6000 gallon tank that was installed 1980 and contained regular leaded fuel.
        - Tank 3: 6000 gallon tank that was installed 1980 and contained diesel fuel.

### *6.2.2 Adjacent Sites (continued)*

    - Listed in the SWEEPS UST, CA FID UST, HAZNET, CIWQS, and HWTS databases.
        - Active status for USTs.
        - CA wastecode:141 - Off-specification, aged or surplus inorganics.
        - Disposal method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Recovery (H010-H129) Or (H131-H135).
        - Inactive stormwater construction permit: NPDES Number: CAS000002.
- Judy Ness, 25425 Bejoal St. (0.2264 miles away)
    - The RCRA NonGen/NLR listing pertains to the facility's handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
- Esganislada Jaramill, 34250 Paris St. (0.0231 miles away)
    - The RCRA NonGen/NLR listing pertains to the facility's handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
- Unknown, 25513 Main St. W. (0.306 miles away)
    - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a gasoline release that impacted soil at the facility. The leak was discovered on 07/24/1986 and reported 08/11/1986. The case was originally closed 11/21/1986 and reopened 11/13/1986. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 03/31/1988.
- W A Thompson Co., 25538 Main St. W. (0.321 miles away)
    - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a diesel release that impacted soil at the facility. The leak was discovered on 08/08/1996, reported 08/26/1996, and remediation activities at the site began 09/03/1996. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 01/30/1997.
- Shirley Morgan, 25644 Main St. W. (0.497 miles away)
    - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 10/13/1998.

### *6.2.2 Adjacent Sites (continued)*

The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 05/11/2000.

The EDR report lists 3 sites located at lower elevation (potentially downgradient sites) within a ½ a mile radius of the Site. The adjacent downgradient sites are less likely to impact the Site and therefore are only listed below:

- Stout Building Contr., 25352 Main St. (0.135 miles away)
- Jason's Affordable A, 25352 Main St. (0.147 miles away)
- Sentry Welding & EXH, 25408 W. Main St. (0.167 miles away)

### *6.2.3 PG&E Hinkley Site*

The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 5.7 miles north of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area. Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information publicly available online. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Site. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources. Recent plume maps and information can be reviewed here:

http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/.

## 6.3 City and County Agency Records

### *6.3.1 County of San Bernardino, Department of Land Use Services and Assessors Office*

TRC contacted the County of San Bernardino, Department of Land Use Services and Assessors Office and was not able to confirm any permits for the Site. TRC contacted the County of San Bernardino, Department of Land Use Services and Assessors Office, and was not able to confirm any permits for the Site based on the online portal search.

### 6.3.2 City of Barstow, Office of the City Clerk

TRC contacted the County of San Bernardino, Department of Land Use Services and Assessors Office. The online search returned one address associated with the property (25268 Main Street), however no permits were returned through the online permit search. Results from the online permit search are included in Appendix I.

### 6.3.3 San Bernardino County Fire Department, Hazardous Materials Division

The San Bernardino County Fire Department, Hazardous Materials Division (County Fire HMD) was contacted regarding records for the Site (25268 West Main St., Barstow). The County Fire HMD is the local agency regulating UST permitting, hazardous materials handling, and is the enforcement and emergency response administrator at the local level for the Certified Unified Program Administrator (CUPA) program.

The County Fire HMD responded indicating there was a file for the Site dated 1999 related to a Notice of Violation (NOV) for a 100 gallon diesel spill release to the soil. The County letter indicated the spill had been cleaned up and confirmation samples were non-detect and "the Site was considered restored". TRC staff went to the County Fire HMD office to review the file on June 21, 2022. Copies of the information/reports in the file are included in Appendix I. Key information is summarized below.

- A Hazardous Materials Response report identified a spill of 100 gallons of diesel fuel at the property address 25268 Main Street and identified the Sullivan Petroleum Co. as the responsible party.
- A Notice of Violation issued 4/27/1999 for a diesel release, improper storage of diesel, no business plan, and unpermitted operations. The NOV required submittal of a remediation plan.
- A Remedial Action Work Plan detailing proposed remediation technologies was submitted on behalf of Sullivan Petroleum Company on May 10, 1999 by Aqua Geosciences, Inc. The Work Plan presented the plan to excavate the impacted and dispose offsite, then collect and analyze confirmation samples from the excavated area.
- The cleanup was executed on May 12, 1999, and a Remedial Action Report describing soil excavation and confirmation sampling activities was submitted on May 28, 1999 by Aqua Geosciences, Inc. A summary of remediation activities below:
    - On May 12, 1999, diesel impacted soil was excavated (19 tons) and disposed offsite.

### *6.3.3 San Bernardino County Fire Department, Hazardous Materials Division (continued)*

- The excavation footprint was approximately 35’ x 30’ x 1’ deep.
- Confirmation sampling was conducted after soil removal.
- Confirmation samples were analyzed for TPH-D and BTEX by EPA Method 8015/5035/8020.
- TPH-D and BTEX were not detected in the confirmation samples.
- The samples were also analyzed for total recoverable petroleum hydrocarbons "TRPH" by EPA Method 418.1.
- The 418.1 results indicated 150 mg/kg "TRPH" in a Background sample collected outside the spill area.
- The 418.1 results in the eight confirmation samples ranged from 110 mg/kg to 520 mg/kg "TRPH".
- There was no further correspondence in the file regarding the spill and cleanup.
- The County's letter indicated the the Site was considered restored".

## 6.4 State Agency Records

### *6.4.1 California Regional Water Quality Control Board*

The Lahontan RWQCB was not contacted directly regarding records or files for the Site and parcel number as they have directed TRC to solely use the state GeoTracker database. The GeoTracker database was reviewed, and six LUST clean up sites that have the status of completed - closed were identified within a mile radius of the Site. The online database screen capture is included in Appendix I.

### *6.4.2 California EPA - Department of Toxic Substances Control*

The California EPA - DTSC was contacted regarding records or files for the Site address and parcel number. No records for the Site were identified by the DTSC Chatsworth or Cypress offices. Additionally, the online EnviroStor database was reviewed and returned no records. The letter responses and online database screen capture are included in Appendix I.

### *6.4.3 California Department of Conservation - Division of Oil, Gas, and Geothermal Resources*

California Department of Conservation — CalGem well finder (WellSTAR) was searched through the online database. No oil or gas wells were located on Site. The online database screen capture is included in Appendix I.

## 6.5 Historic Use Summary

The historical records indicate the Site has been privately owned by individuals and utilized for residential and commercial purposes. The aerial imagery provided in the EDR suggests that the property was developed since 1953 with at least one residence and a small structure located on the southwest quadrant of the Site. Between 1970 and 1984 the current garage/shop was constructed (the small structure removed/demolished) and the Site appears to be near its current configuration. The Site address 25268 Main Street was first listed in the 1976 and 1980 City Directories under the names Osborne WM F and Lee Milton E, respectively. From 1986 to 1995 the Site was listed under the commercial name Abel's Septic Serv. In 1999, The County Fire Department records indicate the tenant was D & R Motors (auto sales) and the back of the property was leased to Sullivan Petroleum for storage of petroleum containers. Records documenting a 100-gallon spill of diesel are discussed in 6.3.3. Since the spill was identified and cleaned up under regulatory direction, the spill and cleanup are identified as an HREC. The site contact reported that there was an old residential septic system onsite, however he was not sure if the septic tank was removed when the residence switched to the City of Barstow's sanitary sewer.

# 7.0 SITE RECONNAISSANCE

## 7.1 Methodology and Limiting Conditions

Mr. Jose Maldonado, Project Geologist, and Ms. Laura Grigoryan, Staff Engineer, conducted a Site inspection on April 4, 2022 . Jose Maldonado and Laura Grigoryan were accompanied by Alex Gomez, who provided access to the Site and answered questions during the reconnaissance. Photographs taken during the reconnaissance are provided as Appendix A. A Site plan is included as Figure 2.

## 7.2 Site Observations

As shown in Figure 2A, the Site consists of a single-story residence and a garage/shop in the central part of the site. Observations are summarized below.

- The site is surrounded by a chain link fence and includes a single-story residence and a garage/shop (Mr. Gomez reports the garage was a tire shop). See Photos 1 through 24.
- An irrigation drip system is installed along the northern and eastern boundaries of the Site. See Photos 2 and 3.
- Trash, concrete debris, and at least one unlabeled container are scattered on the site surface near the eastern perimeter of the Site. See Photo 4.
- Several 5-gallon buckets are stored on the adjacent property near the eastern fence line of the site. No indications of spills were observed near the buckets. See Photo 4.
- The property is primarily unpaved. See Photo 5.
- A 60’ x 45’ pile of concrete and asphalt debris located at the northwest corner of the property. See Photo 6.
- A pole mounted transformer and overhead utilities bisect the property. See Photos 7 and 8.
- Single-story wood framed residence located near the southwest corner of the Site and utilities (gas, water, electric) along the perimeter of the residence. See Photos 9 through 14.
- A plumbing cleanout and a 4" PVC pipe with a 1" steel pipe in the center was observed extending through the surface soil on the north side of the residence. See Photo 13. The Site contact reported these features may have been related to a septic system; however, he was not sure if the septic system was removed when the residence switched to the City sewer.
- A canopy and block wall structure located east of the trash enclosure (block walled area for trash cans). See Photo 15.
- An Inactive tire shop and a shipping container located east of the residence. See Photos 16 through 24.

## 7.2 Site Observations (continued)

- Several salvaged cars are parked adjacent to tire shop. No leaks or staining observed. See Photo 17.
- Approximately 20 tires stored along the eastern boundary of the shipping container. See Photo 18.
- One shipping container housing miscellaneous items. See Photo 19.
- A concrete pad with some staining located on the exterior of the former tire shop near the northeast corner (may have been for an air compressor). See Photo 20.
- Electrical panel attached to utility pole located along the northern boundary of the tire shop and several utilities. See Photos 21 and 22.
- Interior of former tire shop/garage. See Photos 23 and 24.

### *7.2.1 Use of Hazardous Substances*

The use and storage of petroleum products or hazardous materials was not observed at the Site. However, the records review indicated that the the rear of the property was leased by Sullivan Petroleum for storage of petroleum containers in 1999. As discussed in Section 6.3.3, a 100-gallon spill of diesel was documented in 1999 and the spill was cleaned up under regulatory oversight in 1999.

### *7.2.2 Underground Storage Tanks*

Evidence or indications for the presence of USTs were not observed. No historical information was identified relating to the presence of previous USTs during the course of this site assessment.

### *7.2.3 Aboveground Storage Tanks*

There are no ASTs present at the Site. No historical information was found relating to the presence of previous ASTs at the Site.

### *7.2.4 Clarifier/Skimmer*

No clarifiers or skimmers were observed at the Site. No historical information was found to indicate the historic presence of clarifiers or skimmers at the Site.

### *7.2.5 Septic Tanks*

No septic tanks were observed at the Site. No historical information was found to indicate the historic presence of septic tanks at the Site, however the Site contact reported that there was

### 7.2.5 Septic Tanks (continued)

at least one onsite septic system, however he was not sure if the septic tank was removed when the residence switched to the City of Barstow's sanitary sewer. No permits from the County of San Bernardino were reported confirming the location of the septic system or details of installation/removal.

### 7.2.6 Waste Management and Disposal

No information regarding waste generation or management was identified during the completion of this Phase I. Household trash, tires, concrete, asphalt, and debris were observed throughout the Site.

### 7.2.7 Polychlorinated Biphenyls

The use or storage of potentially PCB-containing materials was not observed. Additionally, one pole mounted electrical transformer which could potentially contain PCB-containing oil was observed at the Site.

### 7.2.8 Water Wells

No wells were observed to be associated with the Site.

### 7.2.9 Radon

The Geocheck®database indicates the Site is located within Federal EPA Radon Zone 2 with a predicted average radon concentration of >= 2 pCi/L and <= 4 pCi/L (see Appendix B, Page A-38. The report indicates that the site was tested and the average radon activity was 0.8 pCi/L. EPA has set a standard of 4.0 pCi/L as the concentration of radon at which corrective action is recommended.

# 8.0 CONCLUSIONS AND RECOMMENDATIONS

TRC completed this Phase I ESA in general accordance with ASTM Standard E1527-13 guidelines for the Jessica A. Gomez property located 25268 W. Main Street, Barstow, CA. The Site includes one parcel: 0422-031-10 and totals 1.1 acre

Findings and conclusions relative to RECs at the Site are summarized below.

## 8.1 Summary Of Findings and Opinions

TRC has performed a Phase I ESA in conformance with the ASTM Practice E 1527-13 scope and limitations for the Gomez property located at 25268 Main Street, Barstow, California. Any exceptions to or deletions from this practice are described in Section 3.4 of this report.

No RECs were identified at the Site. However one *Historical Recognized Environmental Condition* (HREC) was identified associated with a previous diesel spill (100 gallons) in 1999 by a tenant that was leasing the rear of the Site for storage of petroleum containers (Sullivan Petroleum). In 1999, a a Notice of Violation was issued by the local CUPA and required Sullivan to remediate the spill. Sullivan complied and implemented a cleanup including excavation and offsite disposal of 19 tons of impacted soil and collected confirmation samples from the excavation. The soil samples were analyzed for total petroleum hydrocarbons as diesel range (TPH-D) and for benzene, toluene, ethylbenzene, and toluene (BTEX) by EPA Methods 8015 and 5035/8020. The results indicated that TPH-D and BTEX were not detected in the confirmation samples indicating the cleanup was effective. There was no further communication in the CUPA file regarding the spill and cleanup. Since this spill would have been identified as a REC upon discovery in 1999, but was remediated under regulatory direction and the cleanup meets current regulatory guideline, the former spill would be identified as an HREC.

Photos depicting the below findings, opinions, and conclusions are found in Appendix B.

Historical Site Summary

- The historical records indicate the Site has been privately owned by individuals and utilized for residential and commercial purposes.
- The aerial imagery provided in the EDR suggests that the property was developed since 1953 with at least one residence and a small structure (possible storage shed).
- Between 1970 and 1984 the current garage/shop was constructed (the small structure removed/demolished).

## 8.1 Summary Of Findings and Opinions (continued)

- The Site address 25268 Main Street was first listed in the 1976 and 1980 City Directories under the names Osborne WM F and Lee Milton E, respectively.
- From 1986 to 1995 the Site was listed under the name "Abel's Septic Serv".
- In 1999, the rear of the parcel was leased to Sullivan Petroleum for storage of petroleum containers. A diesel spill was documented in 1999, see Records Review below.
- No historical information was found to indicate the historic presence of septic tanks at the Site, however the Site contact reported that there was at least one onsite septic system, however he was not sure if the septic tank was removed when the residence switched to the City of Barstow's sanitary sewer.

Records Review

- A record and file dated 1999 was identified at the San Bernardino County Fire Department, Hazardous Materials Division regarding a 100 gallon diesel release on the Site by Sullivan Petroleum Company. The County HMD issued a Notice of Violation and required a cleanup by the tenant. A remediation plan was implemented on May 12, 1999 including excavation and removal of the impacted soil and collection and analysis of confirmation samples. Approximately 19 tons of impacted soil were excavated and disposed offsite. Confirmation samples indicated TPH-D and BTEX were not detected in the bottom of the excavation. The spill would have been identified as a REC at the time if discovery, however since the spill has been remediated under regulatory direction and the case closed, the former spill and cleanup would be identified as an HREC. See Section 6.3.3 for further details. Since this spill would have been identified as a REC upon discovery in 1999, but was remediated under regulatory direction and the cleanup meets current regulatory guideline, the former spill would be identified as an HREC.
- The Site was not listed in the EDR Report.
- The EDR report identifies 12 sites within a 1-mile radius of the Site
- 10 sites located at higher elevations than the Site (potentially upgradient sources of contamination) within a ½-mile radius of the Site. See Summary below:
    - TSM Services Inc, 25277 W Main Bldg 18 (0.019 miles away)
    - Listed within the RCRA-SQG, FINDS, and ECHO databases as a small quantity. No violations were found.
    - Whiting Brothers, 24645 Main (0.040 miles away)
        - Record from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 04/28/1987 and reported 02/25/1992. Site Assessments began in 1993 with the installation of a soil vapor extraction system to mitigate soil impacts at the

## 8.1 Summary Of Findings and Opinions (continued)

site. One monitoring well indicated low levels of dissolved phase contaminant in 2009, and closure eligibility occurred in 2013. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 1/03/2014.

- Review of the RWQCB files indicates four USTs were removed in 1992 and soil contamination was reported. An SVE system with eight SVE wells was installed in 2001 and operated until 2012. Three groundwater monitoring wells were installed, depth to groundwater was approximately 97 feet below grade, and approximately four rounds of sampling were conducted. Total petroleum hydrocarbons as gasoline (TPH-G) was detected at 75 micrograms per liter (µg/L) in one well. Benzene, toluene, ethylbenzene, and xylenes (BTEX) were not detected. The groundwater flow gradient was indicated to be to the north/northwest (Block Environmental, January 9, 2013. *Fourth Quarter 2012 Vapor Extractions and Maintenance Report, Former Whiting Bros. Service Station, 24625 West Main Street, Lenwood California).*

- H Olson Distributing, 25151 Frank St. (0.133 miles away)
  - Listed in the Historical UST database for three USTs on site..
    - Tank 1: 3000 gallon tank that was installed 1976 and contained regular unleaded fuel.
    - Tank 2: 6000 gallon tank that was installed 1980 and contained regular leaded fuel.
    - Tank 3: 6000 gallon tank that was installed 1980 and contained diesel fuel.
  - Listed in the SWEEPS UST, CA FID UST, HAZNET, CIWQS, and HWTS databases.
    - Active status for USTs.
    - CA wastecode:141 - Off-specification, aged or surplus inorganics.
    - Disposal method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Recovery (H010-H129) Or (H131-H135).
    - Inactive stormwater construction permit: NPDES Number: CAS000002.
- Judy Ness, 25425 Bejoal St. (0.2264 miles away)
  - The RCRA NonGen/NLR listing pertains to the facility’s handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
- Esganislada Jaramill, 34250 Paris St. (0.0231 miles away)

## 8.1 Summary Of Findings and Opinions (continued)

        - The RCRA NonGen/NLR listing pertains to the facility's handling of hazardous waste and non-generator classification. Hazardous waste handler activities are not specified and no violations are listed. The NAICS description includes all other waste management services.
    - Unknown, 25513 Main St. W. (0.306 miles away)
        - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a gasoline release that impacted soil at the facility. The leak was discovered on 07/24/1986 and reported 08/11/1986. The case was originally closed 11/21/1986 and reopened 11/13/1986. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 03/31/1988.
    - W A Thompson Co., 25538 Main St. W. (0.321 miles away)
        - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database indicate a diesel release that impacted soil at the facility. The leak was discovered on 08/08/1996, reported 08/26/1996, and remediation activities at the site began 09/03/1996. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 01/30/1997.
    - Shirley Morgan, 25644 Main St. W. (0.497 miles away)
        - Listed in the LUST, Cortese, Historical Cortese, and CERS databases. Records from the Leaking Underground Storage Tank (LUST) database for a gasoline release that impacted soil at the facility. The leak was discovered on 10/13/1998. The cleanup case is regulated by the Lahontan Regional Water Quality Control Board and was reported as closed with "no further action" on 05/11/2000.

Site Inspection (April 4, 2022)

- The site is surrounded by a chain link fence and includes a single-story residence and a garage/shop. See Photos 1 through 24.
- An irrigation drip system is installed along the northern and eastern boundaries of the Site. See Photos 2 and 3.
- Trash, concrete debris, and at least one unlabeled container are scattered on the site surface near the eastern perimeter of the Site. See Photo 4.

## 8.1 Summary Of Findings and Opinions (continued)

- Several 5-gallon buckets are stored on the adjacent property near the eastern fence line of the site. No indications of spills were observed near the buckets. See Photo 4.
- The property is primarily unpaved. See Photo 5.
- A 60’ x 45’ pile of concrete and asphalt debris located at the northwest corner of the property. See Photo 6.
- A pole mounted transformer and overhead utilities bisect the property. See Photos 7 and 8.
- Single-story wood framed residence located near the southwest corner of the Site and utilities (gas, water, electric) along the perimeter of the residence. See Photos 9 through 14.
- A plumbing cleanout and a 4" PVC pipe with a 1" steel pipe in the center was observed extending through the surface soil on the north side of the residence. See Photo 13. The Site contact reported these features may have been related to a septic system; however, he was not sure if the septic system was removed when the residence switched to the City sewer.
- A canopy and block wall structure located east of the trash enclosure (block walled area for trash cans). See Photo 15.
- An Inactive tire shop and a shipping container located east of the residence. See Photos 16 through 24.
- Several salvaged cars are parked adjacent to tire shop. No leaks or staining observed. See Photo 17.
- Approximately 20 tires stored along the eastern boundary of the shipping container. See Photo 18.
- One shipping container housing miscellaneous items. See Photo 19.
- A concrete pad with some staining located on the exterior of the former tire shop near the northeast corner (may have been for an air compressor). See Photo 20.
- Electrical panel attached to utility pole located along the northern boundary of the tire shop and several utilities. See Photos 21 and 22.
- Interior of former tire shop/garage. See Photos 23 and 24.

## 8.2 Data Gaps

Data gaps per the ASTM Standard E1527-13:

- Phase I User Questionnaire was not completed by the user.
- The property owner, or the person most knowledgeable regarding the property, declined to provide an interview or complete the environmental questionnaire relative to the property.

## 8.3 Phase I Recognized Environmental Conditions

Based on the ASTM definitions and professional standards, no RECs or CRECs associated with the Site were identified.

One HREC was identified associated with a historic diesel spill that occurred at the Site in 1999. Review of the file indicates the impacted soil was excavated and disposed offsite; confirmation sampling indicated remaining TPH-D and BTEX concentrations in the soil were not detected. Key events and laboratory results are summarized in Section 6.3.3 and documents are included in Appendix I.

Although not a REC per the ASTM definition, the following items are noted and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:

- Historic septic systems at the current residence.
- Potential ACM/LBP in the existing residences.

The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately  miles north of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area. Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information publicly available online. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Site. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources. Recent plume maps and information can be reviewed here:

http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/.

## 8.4 Recommendations

The following recommendations are provided:

- If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, additional sampling should be conducted.

## 8.4 Recommendations (continued)

- The rear area of the Site was leased by Sullivan Petroleum Company in 1999 for storage of petroleum containers. A diesel spill (100 gallons) was identified and cleaned up in 1999. As a result, it is possible that other spills may have occurred and were not identified. As a result, if petroleum and or soil staining is identified during site demolition or grading, sampling should be conducted to determine the impacts, if any.

# 9.0 TEAM QUALIFICATIONS

TRC's project team for this Phase I ESA was Matthew R. Eaton, P.G., and Jose Maldonado, both located in TRC's Irvine, California office.

Mr. Eaton is a California Professional Geologist with 35 years of environmental experience managing and conducting environmental projects for private industry. Mr. Eaton has conducted numerous Phase I, II, and III investigations, due diligence assessments, feasibility studies and remediation projects for commercial and industrial property with soil and groundwater impacted with petroleum fuels, chlorinated solvents, heavy metals, dioxins, PCBs, and semi-volatile hydrocarbons. Mr. Eaton is currently a Principal at TRC's Irvine office and manages numerous projects for several clients that involve Phase I, II, and III assessments, coordination with federal, state, and local agencies, and development and implementation of soil and groundwater remediation programs. Mr. Eaton has an M.S. degree in geology, and has been with TRC for 30 years.

Mr. Maldonado has 7 years of experience in the environmental consulting industry. Prior to joining TRC, Mr. Maldonado worked as a storm water consultant for 2.5 years. He has performed environmental site assessments and remedial activities at numerous sites in California including commercial, industrial, and residential facilities. Mr. Maldonado is currently a Project Geologist at TRC with a B.S. degree in Geological Sciences..

# Appendix C:

# Phase I User Questionnaire

**PHASE I ENVIRONMENTAL SITE ASSESSMENT**
**USER QUESTIONNAIRE**

Pursuant to the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-13 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager*.

Thank you for taking the time to complete this questionnaire. If you have any questions, please call Matt Eaton at (949) 727-7395 or e-mail meaton@trcsolutions.com

**Date:** _____

**User Name:** Mark Engdahl

**Company:** BNSF

**Address:** _____2500 Lou Menk Drive, Ft Worth, TX 76131

**Telephone No.:** 817-352-3613

**E-mail Address:** Mark.Engdahl@BNSF.com

**Signature:** _____

**Site Name & Address:** __Parcel: Gomez

APN: 0422023020000 Barstow, CA

**Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)**

**(1.) Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)**
Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

**Yes** ☐ **No** ☐

NOTE 1 — In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

**(2.)** **Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

**Yes** ☐ **No** ☐

**(3.)** **Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection* (LLP) (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

**Yes** ☐ **No** ☐

**(4.)** **Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)**

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

**Yes** ☐ **No** ☐

**(5.)** ***Commonly known* or *reasonably ascertainable* information regarding the Site property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Can you provide any information regarding the past uses of the Site?
(b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site?
(c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site?
(d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site?

**Yes** ☐ **No** ☐

**(6.)** **The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**

Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?

| Yes | No |
|---|---|
| ☐ | ☐ |

**(7.)** **Proceedings Involving the Site**

Are you aware of**:** (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

| Yes | No |
|---|---|
| ☐ | ☐ |

**(8.)** **Questions Regarding Helpful Documents**

Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

| | Yes | No |
|---|---|---|
| - Environment site assessment reports | ☐ | ☐ |
| - Environment compliance audit reports | ☐ | ☐ |
| - Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits) | ☐ | ☐ |
| - Registrations for underground and aboveground storage tanks | ☐ | ☐ |
| - Registrations for underground injection systems | ☐ | ☐ |
| - Material Safety Data Sheets (MSDSs) | ☐ | ☐ |
| - Community Right-To-Know plan(s) | ☐ | ☐ |
| - Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc., | ☐ | ☐ |
| - Reports regarding hydrogeologic conditions at the Site and surrounding area | ☐ | ☐ |
| - Notices or other correspondence from any government agency regarding current or previous violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site property | ☐ | ☐ |
| - Hazardous waste generator notices or reports | ☐ | ☐ |
| - Geotechnical studies | ☐ | ☐ |
| - Risk assessments | ☐ | ☐ |
| - Recorded AULs. | ☐ | ☐ |

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal RCRA generators***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

***Lists of state and tribal leaking storage tanks***

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

**ADDITIONAL ENVIRONMENTAL RECORDS**

### *Local Lists of Registered Storage Tanks*

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Lists of Federal NPL (Superfund) sites***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022
Number of Days to Update: 19

Source: EPA
Telephone: N/A
Last EDR Contact: 03/02/2022
Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022

Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Next Scheduled EDR Contact: 11/28/2011
Data Release Frequency: No Update Planned

***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/25/2022

***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021
Date Data Arrived at EDR: 06/24/2021
Date Made Active in Reports: 09/20/2021
Number of Days to Update: 88

Source: Environmental Protection Agency

Next Scheduled EDR Contact: 04/11/2022
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022
Number of Days to Update: 19

Next Scheduled EDR Contact: 04/25/2022
Data Release Frequency: Quarterly

***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/25/2022

***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/28/2022

***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/28/2022
Date Data Arrived at EDR: 03/02/2022

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/28/2022
Date Data Arrived at EDR: 03/02/2022

***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/11/2021
Date Data Arrived at EDR: 11/12/2021

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

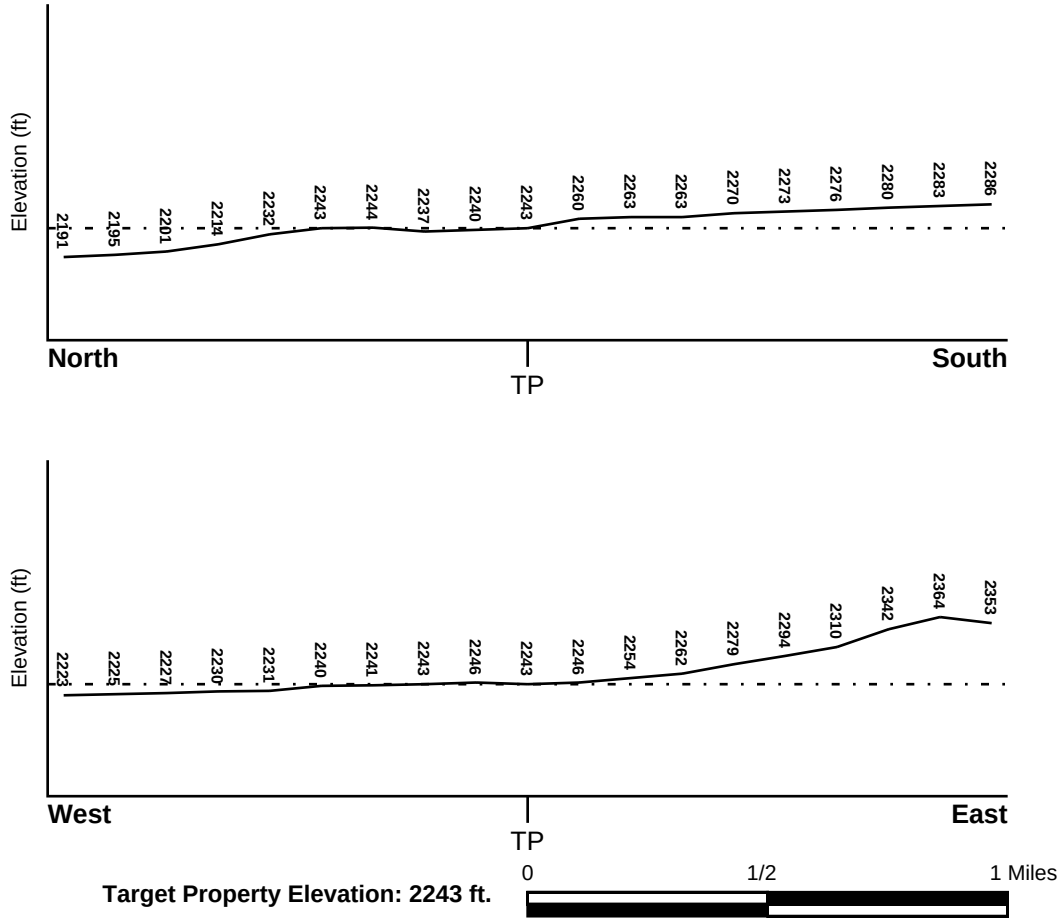

**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General NNW

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 06071C3915H | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 06071C3900F | FEMA Q3 Flood data |
| 06071C3915F | FEMA Q3 Flood data |
| 06071C4507H | FEMA FIRM Flood data |
| 06071C4526H | FEMA FIRM Flood data |
| 06071C4527H | FEMA FIRM Flood data |

### NATIONAL WETLAND INVENTORY

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| NOT AVAILABLE | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

| | |
|---|---|
| Search Radius: | 1.25 miles |
| Status: | Not found |

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

**GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

**Soil Map ID: 1**

Soil Component Name: Cajon

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|---|---|---|---|---|---|---|---|
| | Boundary | | | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 5 inches | sand | Granular materials (35 pct. or less passing No. 200), Fine Sand. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 8.4 Min: 7.4 |

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION

| DATABASE | SEARCH DISTANCE (miles) |
|---|---|
| Federal USGS | 1.000 |
| Federal FRDS PWS | Nearest PWS within 1 mile |
| State Database | 1.000 |

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW$^{R}$ Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

# EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal RCRA generators*

RCRA-SQG: A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

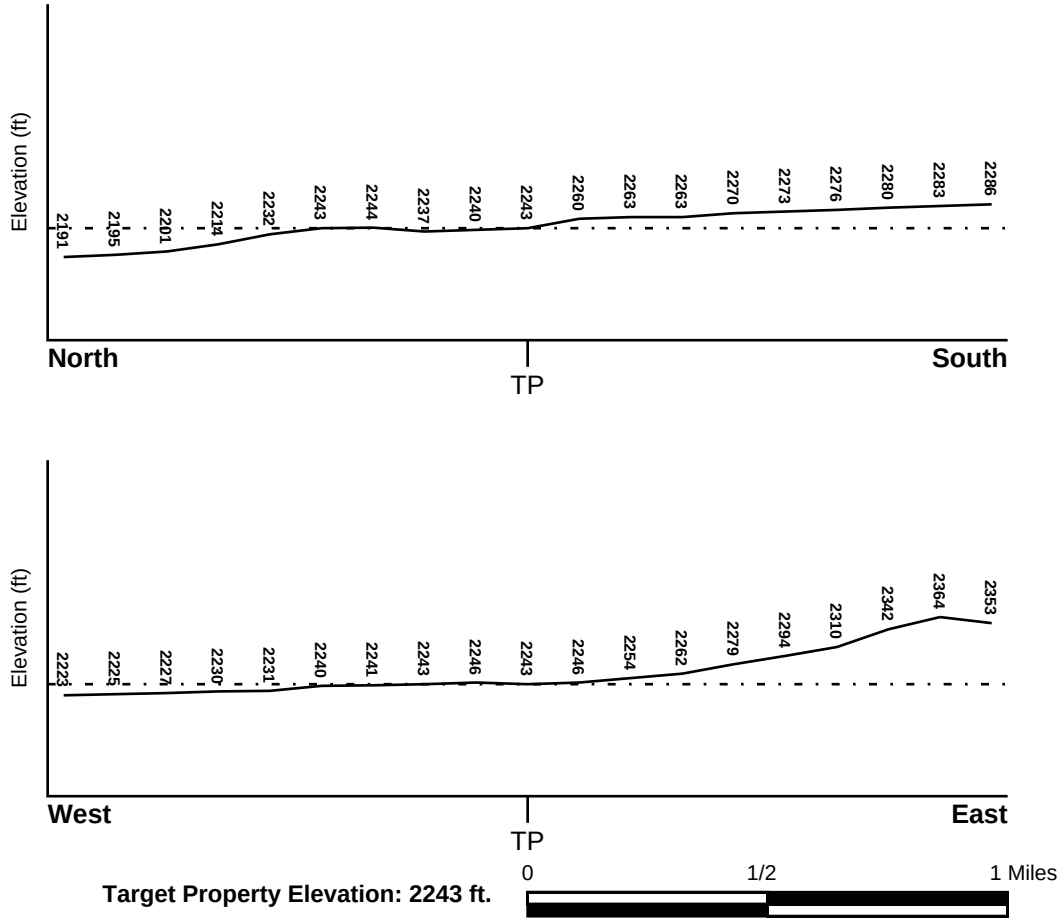

**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General NNW

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 06071C3915H | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 06071C3900F | FEMA Q3 Flood data |
| 06071C3915F | FEMA Q3 Flood data |
| 06071C4507H | FEMA FIRM Flood data |
| 06071C4526H | FEMA FIRM Flood data |
| 06071C4527H | FEMA FIRM Flood data |

### NATIONAL WETLAND INVENTORY

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| NOT AVAILABLE | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

|---|---|
| Search Radius: | 1.25 miles |
| Status: | Not found |

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

**GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

**ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

**Soil Map ID: 1**

Soil Component Name: Cajon

Soil Surface Texture: sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|---|---|---|---|---|---|---|---|
| | Boundary | | | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 5 inches | sand | Granular materials (35 pct. or less passing No. 200), Fine Sand. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 8.4 Min: 7.4 |
| 2 | 5 inches | 25 inches | sand | Granular materials (35 pct. or less passing No. 200), Fine Sand. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 8.4 Min: 7.4 |

| 3 | 20 inches | 59 inches | very gravelly coarse sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 14 | Max: 8.4 Min: 7.4 |

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## WELL SEARCH DISTANCE INFORMATION
