PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC Environmental Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

12. **PLOT PLAN:**

(a) In perspective to the well site, sketch and label the following items: well lot property lines, other wells *(include abandoned wells)*, sewage disposal systems *(sewers, septic tanks, leaching fields, seepage pits, cesspools)*, lakes and ponds, water courses and animals or fowl kept.

(b) Indicate the distance in *feet*, of any of the following which are within 200 ft. of the well site:

Other wells	
Sewers	
Septic tanks	
Leaching fields	
Seepage pits	
Cesspools	
Lakes and ponds	
Water courses	
Animals or fowl kept	

13. I have read this application and agree to comply with all laws regulating the type of work being performed. The California Labor Code requires Workers' Compensation Insurance as a prerequisite to permit issuance unless the applicant signs the following certificate:

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation laws of California.

Owner's Signature [redacted] Date

☐ Contractor's Signature [redacted] Date 3-10-82 Req. No.

DISPOSITION OF PERMIT

(Do Not Fill In)

☒ Approved subject to the following:

A. Notify the Department, Stuart Long (714) 387-4666, twenty-four (24) hours in advance to make an inspection of the following operations:

☐ Prior to sealing of the annular space or filling of the conductor casing.

☐ Verify the depth of the conductor (outer) casing prior to further drilling and installation of the inner casing.

☒ After installation of the surface protective slab and pumping equipment.

☐ During destruction of wells, prior to pouring the sealing material.

B. Submit to the Department within thirty (30) days after completion of work, a copy of:

☒ Water Well Driller's Report ☐ Bacteriological Analysis ☐ Inorganic Chemical Analysis

12. **PLOT PLAN:**

(a) In perspective to the well site, sketch and label the following items: well lot property lines, other wells *(include abandoned wells)*, sewage disposal systems *(sewers, septic tanks, leaching fields, seepage pits, cesspools)*, lakes and ponds, water courses and animals or fowl kept.

(b) Indicate the distance in *feet*, of any of the following which are within 500 ft. of the well site:

Other wells	
Sewers	None
Septic tanks	
Leaching fields	
Seepage pits	
Cesspools	
Lakes and ponds	
Water courses	
Animals or fowl kept	

13. I hereby agree to comply with the laws, ordinances, and regulations that are now or may hereinafter be enforced by the United States Government, the State of California, and the County of San Bernardino pertaining to the construction, reconstruction, and destruction of wells. This permit, or a cop[redacted]letion of the project.

6/29/79
Date

DISPOSITION OF APPLICATION
(Do Not Fill In)

☒ Approved ☐ Denied

Approval conditional to the following:

A. Notify the Department, Cliff Williams 245-3216, twenty-four (24) hours in advance to make an inspection of the following operations:

☐ Prior to sealing of the annular space or filling of the conductor casing.

☒ After installation of the surface protective slab and pumping equipment.

☐ During destruction of wells, after the well has been sealed.

B. Submit to the Department within thirty (30) days after completion of work, a copy of:

☒ Water Well Drillers Report
☐ Bacteriological Analysis
☐ General Mineral Analysis
☐ Other

C. Other

When signed and approved by the DIRECTOR, this application is a PERMIT, and is valid for one calendar year from date of issuance for completion of the work. The well shall not be used until all required inspections have been completed and final field inspection approval has been granted.

Richard L. Roberts, R.S.
Director

0	300	14	sdr 17

Gravel Pack	☑ Yes	☐ No	From (ft.)	20	To (ft.) 300
Specify Other Backfill Material	Cement		From (ft.)	0	To (ft.) 20

9 – PERFORATIONS (list all if applicable)

From (ft.)	To (ft.)	Well Screen Size	Pumping Rate (gpm)
As needed			7 to 20 gpm

10 – SEALED ZONES (list all if applicable)

From (ft.)	To (ft.)
0	20 cement

11 – PLOT PLAN

a) In perspective to the well site, sketch and label the following items on a separate paper: well lot property lines, other wells (include abandoned wells), sewage disposal systems (sewers, septic tanks, leaching fields, seepage pits, cesspools), lakes and ponds, watercourses and animals or fowl kept.

b) Indicate the distance, in feet, of any of the above which are within 500 ft. of the well site. The plot plan needs to be drawn to scale (½ inch = 100 feet). Show the approximate drainage pattern of the property and show access roads to the well site within 500 feet.

c) ☒ None of the above is within 500 feet.

d) Solid or Liquid Disposal Site within Two Miles ☐ Yes ☒ No Location

12 – METHOD OF CONSTRUCTION OR DESTRUCTION

Provide the method of construction/destruction in the space below or as an attachment if more space is needed. The method shall be in accordance with the standards recommended in the California Department of Water Resources Bulletin No. 74-81 and 74-90. Title 22 standards shall also be followed for public water supply wells.

Mud Rotary

I will submit water well drillers report to Environmental Health Services within 30 days of completion, and will construct or destroy well/borings in accordance with the permit application and Water Well Standards Bulletin 74-81 & 74-90.

13 – AGREEMENT AND SIGNATURE

I have read this application and agree to comply with all laws regulating the type of work being performed.

Property Owner's Signature	X [redacted]	Date 03/25/20

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that no records exist for the above site description(s).

Records maintained by OFM-HMD date back to mid-1980's. Records searched include:

- facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions;
- logs of permits issued for the removal, installation, and/or modification of underground storage tanks;
- records and databases pertaining to illicit dumping, spill reports and release notifications, and complaints;
- incidents responded to by the hazardous materials emergency response team;
- and sites undergoing remediation for contaminated soil and/or groundwater.

Dear Ms. Grigoryan:

On February 3, 2022, the Department of Toxic Substances Control (DTSC) received your email of February 2, 2022, requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Roya Nejad

APPENDIX A: PHASE I USER QUESTIONNAIRE & ENVIRONMENTAL QUESTIONNAIRE SENT TO OWNER
APPENDIX B: PARCEL MAP
APPENDIX C: EDR REPORT
APPENDIX D: FEMA MAP
APPENDIX E: PIMS REPORT
APPENDIX F: AGENCY RECORDS REQUEST AND RESPONSE LETTERS

EXECUTIVE SUMMARY

1. This report presents the results and findings of the Phase I Environmental Site Assessment (ESA) for Shirley Otto Trust (LP19) property total approximately 10.0 acres. The Site located approximately 0.25 miles west of Oak Grove Road in Barstow, California. The Site is identified as Assessor's Parcel Number (APN) 0139-262-06-0000 as there is no current address for the parcel.

2. This Phase I ESA was completed in general accordance with ASTM Standard E1527-13 guidelines. Findings and conclusions relative to RECs at the Site are summarized below.

SUMMARY OF FINDINGS AND OPINIONS

1. TRC staff inspected the Site on October 7, 2021, the parcel is vacant and undeveloped with fallowed agricultural field in the southwestern part of the Site. The area surrounding the Site is used as agricultural operations currently owned by the John Van Leeuwen Trust, which consists of both active and fallow agricultural fields, farming operations and irrigation system with wells.

2. Three crushed 55-gallon drums were observed along the access road in the northern part of the Site. One drum appeared to be completely buried under the crushed drums. Minor surface staining was observed under the crushed drums. The buried drum would be identified as a REC.

3. A gate valve and remnants of irrigation piping and farm equipment were observed in the north end of the Site.

4. Historical aerial photos indicate the western and southern part of the Site were used for agricultural activities (center-pivot) from approximately 1990s to 2020. Prior to the 1990s, the Site appears to have been native desert and undeveloped.

5. No records were identified that indicate previous structures or development within the parcel. No records for industrial uses (i.e., USTs, ASTs, clarifiers, etc.) were identified in the city, County, or State databases for the Site.

6. The EDR radius report did not report any sites within a 1-mile radius of the parcel; however, the PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 4.02 miles north of the Site (i.e., north of the Mojave River). Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs, and an extensive amount of information is publicly available online. Recent plume maps and information can be reviewed here: http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Site. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources.

PHASE I RECOGNIZED ENVIRONMENTAL CONDITIONS

1. Based on the ASTM definitions and professional standards, one RECs were identified:
    - Three 55-gallon and at least one partially buried 55-gallon drums were located on the Site. These drums were not labeled, former contents unknown, and appeared to be empty. Very minor surface staining was observed beneath the three 55-gallon drums at top the surface.

2. Although not a REC per the ASTM definition, the following items are noted, and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:
    - Possible irrigation valve and piping within the northern portion of the parcel.

3. HRECs, or CRECs associated with the Site were not identified at this time.

4. Lastly, the PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 4.02 miles north of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Radius Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area.

RECOMMENDATIONS

1. Remove the buried drum(s) and collect soil samples to determine if releases occurred.
2. If the historic agricultural activities are a potential concern, or if further information regarding the above items is identified, follow-up sampling could be conducted.
3. If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, additional sampling should be conducted.

1.0 INTRODUCTION

1. This Phase I Environmental Site Assessment (Phase I ESA) was prepared for one parcel identified as the Shirley Otto Trust (LP19) property total approximately 10.0 acres. The parcel is located approximately 0.25 miles west of Oak Grove Road in Barstow, California. Figure 1 shows the Site location.

2. No address(s) were provided for the Site. The Site is surrounded by agricultural fields associated with farming operations owned by John Van Leeuwen Trust and is identified by the San Bernardino County Assessor's Office as the following assessor's parcel numbers (APN) as 0421-032-10.

4. This Phase I ESA was prepared for BNSF for its use regarding the Site.

1.1 STATEMENT OF PURPOSE

1. The purpose of this Phase I ESA was to review environmental conditions prior to potential purchase of the Site by BNSF.

2. The Phase I ESA was prepared in general conformance with the methods and procedures described in the United States Environmental Protection Agency's (EPA's) *Standards and Practices for All Appropriate Inquiries* (i.e., the "AAI Rule" 40 CFR part 312) pursuant to the American Society of Testing and Materials (ASTM) Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Phase I ESA objectives, scope, significant assumptions, list of client provided information, exceptions and limitations, are presented in the following sections.

1.2 OBJECTIVE

1. The objective of this Phase I ESA was to evaluate whether current or historical activities on or adjacent to the Site have potentially resulted in significant contamination by hazardous substances or petroleum products, which is subsequently referred to in this report as a "Recognized Environmental Condition" (REC), a "Historical Recognized Environmental Condition" (HREC) or a "Controlled Recognized Environmental Condition" (CREC).

   A REC is defined as:

   > "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."
   >
   > However, According to the ASTM Phase I ESA standard, the term "Recognized Environmental Condition" is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government authorities.

A HREC is defined as:

> "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls). Before calling the past release an HREC, the EP must determine whether the past release is a REC at the time the Phase I ESA is conducted (e.g., if there has been a change in the regulatory criteria). If the EP considers this past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC."

A CREC is defined as:

> "A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)… a CREC shall be listed in the Findings Section of the Phase I ESA report, and as a REC in the Conclusions Section of the …report."

1.3 DETAILED SCOPE OF SERVICES

1. This Phase I ESA was completed by an environmental professional as defined by the AAI Rule. The detailed scope of services consisted of the following tasks within the scope of ASTM Standard E1527-13:

Current Site Conditions

- Site inspection to evaluate the nature and type of activities that are conducted at the property in terms of potential for release or threat of release of hazardous substances or petroleum products.
- Inspection of surrounding properties to evaluate the potential for affecting the Site.
- Description of the physical setting of the Site.
- Interview with a Site representative and with local or state environmental agency personnel, as applicable.

Historic Site Conditions

- Review of historic aerial photographs, topographic maps, and Sanborn fire insurance maps, as available.
- Review of records on file with regulatory agencies.
- Environmental lien search.
- Environmental database review.

Environmental Agency Review

- Review of environmental databases conducted by a third party, Environmental Data Resources (EDR), and provided to TRC.
- Review of regulatory agency records at state and local environmental agencies.

2. The following list of "additional issues" that are considered outside the scope of the ASTM Phase I ESA practice by ASTM Method E1527-13 were not included or addressed in this Phase I ESA:
   - Asbestos
   - Lead-based paint
   - Radon
   - Lead in drinking water
   - Wetlands
   - Regulatory compliance
   - Cultural and historical resources
   - Industrial hygiene
   - Health and safety
   - Ecological resources
   - Endangered species
   - Indoor air quality
   - Bio-agents and mold

1.4 SIGNIFICANT ASSUMPTIONS

1. We have assumed that the information sources utilized for this assessment provided complete and accurate information. Evaluations presented in this report are based exclusively on information provided by the City of Barstow, County of San Bernardino, agency representatives, available public records, and observations made during the Site inspection.

1.5 CLIENT-PROVIDED INFORMATION/PHASE I USER QUESTIONNAIRE

1. The following documents and/or information were provided by BNSF:
   - APN parcel numbers.
   - Site location map from satellite imagery.

2. According to the ASTM Standard E1527-13, certain tasks that may help identify the presence of RECs associated with the Site are generally conducted by the Phase I ESA User (in this case the "Phase I User" is BNSF). These tasks include reviewing title records for environmental liens or activity and land use limitations; providing specialized knowledge related to RECs at the Site (e.g., information about previous ownership or environmental litigation); and providing explanations for significant reduction in the Site purchase price. It is our understanding that BNSF does not have previous environmental documents or specialized information regarding this Site.

3. Appendix A includes the Phase I User documentation as required by ASTM Standard E1527-13.

1.6 DATA GAPS

1. The following potential data gaps per the ASTM Standard E1527-13 were identified:

    - The Site is currently owned by Shirley Otto, and representatives of Shirley Otto were not available for interview regarding property knowledge or history. Additionally, previous owners of the Site were not contacted. See Appendix A for a copy of the standard interview questionnaire.

1.7 EXCEPTIONS AND LIMITATIONS

1. TRC performed the activities described herein in accordance with the ASTM Standard E1527-13 for Phase I ESAs. Certain information contained in this report was provided by third parties or other outside sources. TRC does not make any warranties or representations, whether expressed or implied, regarding the accuracy of such information, and shall not be held accountable or responsible in the event that any such inaccuracies are present.

2. This report was prepared solely for the use of BNSF, its agents, and its legal counsel, as it pertains to the Site. The judgments, conclusions, and recommendations described in this report pertain to the conditions judged to be present or applicable at the time the work was performed. Future conditions may differ from those described herein, and this report is not intended for use in future evaluations of the Site, unless an update is conducted by a consultant familiar with environmental assessments. The purpose of this assessment was to provide information about the Site and the surrounding area relative to the potential environmental concerns and the potential presence of hazardous/toxic materials at the Site. Any reliance on, or use of, this report by any third party shall be at such party's sole risk.

2.0 SITE DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

1. The Site is located approximately 0.25 miles west of Oak Grove Road in Barstow, California. Figure 1 shows the Site location. The Site consists of one parcel of vacant desert and is approximately 10.0-acres.

2. No address(s) were provided for the Site. The Site is The Site is surrounded by agricultural fields associated with farming operations owned by John Van Leeuwen Trust and is identified by the San Bernardino County Assessor's Office as the following assessor's parcel numbers (APN) as 0421-032-10.

3. Figure 2 is a Site Plan from satellite imagery and Figure 2A shows the parcel designation as identified above. The parcel maps are included in Appendix B.

2.2 CURRENT SITE USE

1. The Site is currently unpaved and there are no structures or development located on the parcel. A dirt road runs through the middle of the Site connecting two agricultural roads between active and fallow fields.

2.3 SURROUNDING LAND USES

1. The surrounding area was observed on the same day as the Site inspection. Observations of surrounding properties were limited to areas accessible to the public, and areas that could be readily observed from the Site. The following descriptions summarize the adjacent property uses:

North - Active agricultural fields

South - Fallow agricultural fields

East - Fallow agricultural fields

West - Fallow agricultural fields

2.4 REGIONAL TOPOGRAPHY AND HYDROGEOLOGY

1. The Site is located within the South Lahontan Hydrologic Region, specifically the Mojave River Groundwater Basin in the County of San Bernardino. According to the United States Geological Survey (USGS) topographic map, Hodge, Barstow, and Hinkley quadrangles dated 1971 (Figure 1) and Environmental Data Resources, Inc. (EDR) database report, the Site topographic elevation is approximately 2,240 feet above mean sea level (MSL), and local topography slopes generally to the north-northwest.

2. The Site is bound to the north by the Mojave River, and multiple fault lines including the Lockhart, Lenwood, and the Mt. General Fault are within 10 miles to the northwest (Fault Activity Map of California, 2010). The underlying rock units are alluvium and Miocene nonmarine rocks. Sources of water in the basin include percolation from precipitation, and infiltration of rainwater runoff from the Lenwood Spreading Grounds. Water-bearing deposits are unconfined within this water basin (Lower Mojave River Valley Groundwater Basin, Revised February 27, 2004).

3. The EDR database report (see Appendix C) indicates there are records for approximately 77 groundwater wells within a 1-mile radius for the combined reports.

4. Groundwater flow direction in the Mojave River Groundwater Basin near the Site is generally to the north, and depth to water in several USGS water supply wells ranged from 30.03 (1995) to 105 (1991) feet below grade (EDR, 2021). However, a subsurface investigation would be required to determine actual groundwater flow direction and depth.

5. The database radius report supplied by EDR was reviewed to obtain information regarding the dominant soil composition in the Site vicinity. This information is summarized below:

Hydric Status:	Not Hydric
Soil Surface Texture:	Sand
Soil Component Name:	Villa (Class B), and Victorville (Class B)
Deeper Soil Types:	Not reported

Refer to the Geocheck Physical Setting Source Summary of the EDR report presented in Appendix C for further information regarding the soil composition in the Site vicinity.

6. Per Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map 06071C4507H, dated August 28, 2008, the Site is located in Zone D (shaded) and Zone X (unshaded). According to FEMA's Flood Zone Designations, Zone D represents an area of undetermined flood hazard and Zone X is an area of minimal flood hazard. The FEMA Flood Insurance Rate Map is provided in Appendix D.

2.5 GROUNDWATER QUALITY

1. The GeoCheck® databases provided with the EDR report (Appendix C) indicate there are approximately 77 wells within a 1-mile radius (pages A-11 to A-82 in Appendix C) within the radius report for the Site.

2. Limited groundwater quality data for inorganic constituents were included in the GeoCheck® database for several of the wells in the Site vicinity. Exceedances of drinking water standards were not reported (see pages A-11 to A-82 in Appendix C).

3. It is our understanding that previous groundwater investigations have not been conducted at the Site.

3.0 HISTORICAL INFORMATION

1. Historical information was reviewed to evaluate previous use and history of the Site. The following sources of information were reviewed during the course of this investigation:

    - Interview with Owner or Owner's Representative
    - Aerial Photographs
    - Sanborn Maps
    - USGS Topographic Quadrangle Maps
    - City Directories

2. Historical site ownership as listed in the San Bernardino County Property Information Management System (PIMS) is summarized below. The PIMS Report is included in Appendix E.

    Parcel 0488-131-04: (Parcel LP1 74.8 acres)

Shirley Otto Trust	2015	Present
Shirley Otto	1993	2015
Richard Otto	At least 1982	1992

3.1 INTERVIEW WITH OWNER

1. The Site is currently owned by Shirley Otto Trust, and TRC contacted Right-of-Way Advisors to facilitate an interview or Key Site Manger interview form. At the time of reporting, no interview was completed or form returned. No other previous owners were located or contacted. An interview with the current owner and/or persons most knowledgeable regarding the property is part of the ASTM Phase I Standard, so the lack of a site interview with the current owner or previous owner would be considered a potential data gap.

3.2 SANBORN MAPS

1. EDR reported there is no Sanborn map coverage for the Site or nearby surrounding area. Historical Sanborn® Fire Insurance Maps (Sanborn Maps) were originally produced for assessing fire insurance liability in urban areas in the United States. The maps provide detailed information (i.e., building construction, facility occupants, storage tank locations, and hazardous material storage areas), which can be used as a resource to document land use and structural change over time.

3.3 AERIAL PHOTOGRAPH REVIEW

1. EDR provided 10 aerial photographs from several collections dating from 2016 to 1953. Copies of the aerial photos are shown in Figures 2 through 11. Features observed in the photographs are summarized below.

2016, 2012, 2009 Aerial Photos (Figure 2 through 4)

- The Site is vacant with scattered vegetation with the southwestern portion of the Site apart of a larger center pivot agricultural field.
- Dirt roads are observed along the north and east of the Site with a dirt road bisecting the northeastern portion of the Site.
    - Surrounding area to the north, south, east and west is developed with agricultural operations.

2005 and 1995 Aerial Photos (Figure 5 through 6)

- The Site appears to be mostly native undisturbed desert. Agricultural rows appear to extend into the western and southern part of the Site.
- Dirt roads are observed along the north and east of the Site with a dirt road bisecting the northeastern portion of the Site.

1984 Aerial Photo (Figure 7)

- The Site appears to be native, undisturbed desert- dark spots that appear to be bushes or vegetation are shown in the southeast part of the Site.
- Dirt roads are observed on all four sides of the Site.
- Surrounding area to the north, south, east and west is developed with agricultural operations.

1972, 1970 and 1953 Aerial Photos (Figures 8 through 12)

- The Site appears to be native, undisturbed desert- dark spots that appear to be bushes or vegetation are shown in the southeast part of the Site.
- Surrounding area to the east is developed with agricultural operations with the remaining areas vacant desert.

3.4 USGS TOPOGRAPHIC QUADRANGLE MAPS

1. Seven USGS topographic maps dated 1932, 1934, 1956, 1971, 1984, 1993, and 2012 were obtained and reviewed for information concerning historical activity on or adjacent to the Site. The topographic maps are included in Appendix B. Observations are summarized below:

1932 and 1934 *(30-Minute Quadrangle)*

- No structures are shown on the Site.
- A dirt road is observed along the northern Site boundary.
- ATSF railroad is identified to the south within the vicinity of the Site and the Mojave River is shown to the north within the vicinity of the Site.

1956 *(15-Minute Quadrangle)*

- No structures are shown on the Site.
- ATSF railroad is identified to the south within the vicinity of the Site and the Mojave River is shown to the north within the vicinity of the Site.
- Small structures are shown in the Site vicinity to the south and east.

1971 (*7.5-Minute Quadrangle*)

- No structures are shown on the Site.
- The railroad is labeled on the map as AT&SF and Union Pacific south within the vicinity of the Site.
- Mojave River is labeled and located to the north within the vicinity of the Site.

1984 (*15-Minute Quadrangle*)

- No structures are shown on the Site.
- The railroad is labeled on the map as AT&SF and Union Pacific.
- Mojave River is located to the north within the vicinity of the Site.

1993 *(7.5-Minute Quadrangle)*

- No structures are shown on the Site.
- The railroad is not labeled on the map south of the Site.
- New levees are shown on the western side of the Mojave River.
- Mojave River and "Sand Dunes" are labeled and located to the north within the vicinity of the Site.

2018, 2015, and 2012 (*7.5-Minute Quadrangle*)

- No structures or features are shown on the Site.
- The existing railroad is not drawn on the map to the south of the Site in 2012.

3.5 CITY DIRECTORIES

1. Listings in City directories for the time period of 1975-2014 were provided by EDR. There is no historical address associated with the Site so findings were reviewed by EDR.

3.6 ENVIRONMENTAL LIEN SEARCH

1. An Environmental Lien Search was provided by EDR for the Site. No environmental liens or activity and use limitations (AULs) were identified for the parcel. A copy of the environmental lien report is included in Appendix C.

2. The deed for parcel is vested to Joe Borurdeau Trustee as of April 22, 2021.

4.0 RECORDS REVIEW

1. Various regulatory agencies were contacted regarding records and/or files for the Site, and a regulatory database report was obtained from EDR. Agencies contacted or records reviewed included:

    - County of San Bernardino, Assessors Office and Land Use Services Department.
    - City of Barstow Office of the City Clerk.
    - San Bernardino County Fire Department, Hazardous Materials Division.
    - California Regional Water Quality Control Board, Lanhontan Region (RWQCB).
    - California EPA - Department of Toxic Substances Control (DTSC) Chatsworth and Cypress offices.
    - California Department of Conservation – Division of Oil, Gas, and Geothermal Resources (DOGGR)

4.1 PREVIOUS ENVIRONMENTAL REPORTS

1. Previous environmental reports regarding the Site were not provided to TRC.

4.2 REGULATORY DATABASE REVIEW

1. A regulatory database report summarizing available regulatory search information regarding the Site and other sites within a 1-mile radius was obtained from EDR. The database search is based on information published by federal, state, and local regulatory agencies, and is used to determine whether the Site or nearby properties are listed as having a past or present environmental record of actual or potential environmental impacts from hazardous substances or materials. The regulatory listings include those facilities known to the regulatory agencies at the time of publication or update of the database. The database report was reviewed to evaluate whether the Site or nearby properties are listed in the databases which could indicate a REC on the Site. The EDR report is included in Appendix C.

4.2.1 SITE

1. The Site was not listed in any of the databases in the EDR Radius Report.

4.2.2 ADJACENT SITES

1. The EDR report identified no sites within a 1-mile radius of the Site (see Radius Map on Page 2 in Appendix C).

2. The regional groundwater flow direction in the Site area is reported to be in the north direction similar to local topography (refer to Section 2.4). Therefore, sites reported to the south of the Site are potentially upgradient with respect to groundwater flow, and may affect the Site.

3. The EDR report lists no sites within a 1-mile radius of the Site.

4. The EDR report does not list any sites located at lower elevation (potentially downgradient sites) within a 1-mile radius of the Site.

4.2.3 PG&E HINKLEY SITE

1. The PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 4.02 miles north/northwest of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area. Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information publicly available online. Recent plume maps and information can be reviewed here: http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Shirley Otto property. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources.

4.3 CITY AND COUNTY AGENCY RECORDS

4.3.1 COUNTY OF SAN BERNARDINO, DEPARTMENT OF LAND USE SERVICES AND ASSESSORS OFFICE

1. TRC contacted the County of San Bernardino, Department of Land Use Services and Assessors Office and was not able to confirm any permits for the Site.

4.3.2 CITY OF BARSTOW, OFFICE OF THE CITY CLERK

1. The City of Barstow Office of the City Clerk was contacted regarding records for the Site. At the time of this report, the City had not responded for records pertaining to the Site.

4.3.3 SAN BERNARDINO COUNTY FIRE DEPARTMENT, HAZARDOUS MATERIALS DIVISION

1. The San Bernardino County Fire Department, Hazardous Materials Division (County HMD) was contacted regarding records for the Site parcels due to no historical address identified. The County HMD is the local agency regulating UST operations and hazardous material generation and handling. At the time of reporting, the agency had not responded.

4.4 STATE AGENCY RECORDS

4.4.1 CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

1. The Lahontan RWQCB was not contacted directly regarding records or files for the Site and parcel number as they have directed TRC to solely use the state GeoTracker database. The GeoTracker database was reviewed, and records for the Site parcels were not identified. The online database screen captures are included in Appendix F.

4.4.2 CALIFORNIA EPA - DEPARTMENT OF TOXIC SUBSTANCES CONTROL

1. The California EPA - DTSC was contacted regarding records or files for the Site addresses and parcel numbers. No records for the Site were identified by the DTSC EnviroStor database. The online database screen captures are included in Appendix F.

4.4.3. CALIFORNIA DEPARTMENT OF CONSERVATION – DIVISION OF OIL, GAS, AND GEOTHERMAL RESOURCES

1. California Department of Conservation – DOGGR well finder (WellSTAR) was searched through the online database. No oil or gas wells were located on Site. The online database screen captures are included in Appendix F.

4.5 HISTORICAL USE SUMMARY

1. The site is currently vacant, and the southwest part of the Site is currently a fallowed agricultural field. The western and southern part of the Site were used for agricultural activities (center-pivot) from approximately 1990s to 2020. Prior to the 1990s, the Site appears to have been native desert and undeveloped. No records were identified that indicate previous structures or development within the parcel.

2. The surrounding area is a part of a larger agricultural operations currently owned by the John Van Leeuwen Trust, which consists of both active and fallow agricultural fields, farming operations and irrigation system with wells.

3. The BNSF right-of-way is located approximately 0.40 miles away from the site and the Mojave River is located north of the Site.

5.0 SITE INSPECTION

1. A Site inspection was conducted by TRC staff on October 7, 2021. Photographs taken during the Site inspection are included in the Photo Log and a site plan is shown on Figure 2A.

2. The inspection followed a pattern of moving from east to west across the Site. TRC staff accessed the Site via existing access roads and walked throughout the Site areas that were not accessible via access roads.

5.1 OBSERVATIONS

1. As shown in Figure 2A, the Site is vacant desert and undeveloped. Observations follow below.

    - The southwestern portion is a fallowed agricultural field. See Figure 2A, the southwestern part of the Site was part of the center-pivot agricultural activities (the irrigation pivot was on the adjacent parcel).
    - The site is vacant; the surface is unpaved and covered with scattered vegetation. See Photos 1 through 16.
    - A gate valve (possibly associated with irrigation) was observed on the surface near the northern boundary of the Site. See Photo 2.
    - Three crushed 55-gallon drums were observed along an access road in the center portion of the Site. See Photos 3 through 8.
        - The crushed drums were empty, unlabeled 55-gallon drums were observed on the surface along the dirt road bisecting the parcel from east to west.
        - At least one drum appeared to be buried adjacent to the crushed drums.
        - Minor surficial staining was located beneath the drums. See Photos 7 and 8.
    - Multiple inground stakes were observed along the northern parcel boundary (in line with the above-mentioned valve). Adjacent to the stakes were 3-inch metal fittings possibly associated with inground irrigation. See Photos 9 through 12.
    - Remnants of former farm equipment was located adjacent to the fallow field. See Photo 13.
    - The southwestern portion of the Site consisted of fallow agricultural field associated with a larger center pivot field within another parcel. See Photos 14 through 16.

5.2 USE OF HAZARDOUS MATERIALS

1. The use and storage of petroleum products or hazardous materials was not observed at the Site. The crushed drums appeared to be disposed at the location where they were observed and did not appear to be indicative of a storage area.

5.3 UNDERGROUND STORAGE TANKS

1. Evidence or indications for the presence of USTs were not observed. No historical information was identified relating to the presence of previous USTs during the course of this site assessment.

5.4 ABOVEGROUND STORAGE TANKS

1. There are no ASTs present at the Site. No historical information was found relating to the presence of previous ASTs at the Site.

5.5 CLARIFIER/SKIMMER

1. No clarifiers or skimmers were observed at the Site. No historical information was found to indicate the historic presence of clarifiers or skimmers at the Site.

5.6 SEPTIC TANKS

1. No septic tanks were observed at the Site. No historical information was found to indicate the historic presence of septic tanks at the Site.

5.7 WASTE MANAGEMENT AND DISPOSAL

1. No information regarding waste generation or management was identified during completion of this Phase I.

5.8 POLYCHLORINATED BIPHENYLS

1. The use or storage of potentially PCB-containing materials was not observed. Additionally, pole-mounted electrical transformers which could potentially contain PCB-containing oil were not observed at the Site.

5.9 WATER WELLS

1. No wells were observed to be associated with the Site. Possible irrigation systems are in place for the former agricultural fields associated with the property.

5.10 RADON

1. The Geocheck® database indicates the Site is located within Federal EPA Radon Zone 2, with a predicted average radon concentration of <4.0 pCi/L (see Appendix B, Page A-83). The report indicates that the site was tested and the average radon activity was 0.800 pCi/L. EPA has set a standard of 4.0 pCi/L as the concentration of radon at which corrective action is recommended.

6.0 CONCLUSIONS AND RECOMMENDATIONS

1. TRC completed this Phase I ESA in general accordance with ASTM Standard E1527-13 guidelines for the Shirley Otto Trust (LP19) property total approximately 10.0 acres. The Site located approximately 0.25 miles west of Oak Grove Road in Barstow, California.

2. Findings and conclusions relative to RECs at the Site are summarized below.

6.1 SUMMARY OF FINDINGS AND OPINIONS

Historical Use Summary

- The site is currently vacant, and the southwest part of the Site is currently a fallowed agricultural field. The western and southern part of the Site were used for agricultural activities (center-pivot) from approximately 1990s to 2020. Prior to the 1990s, the Site appears to have been native desert and undeveloped. No records were identified that indicate previous structures or development within the parcel.
- The surrounding area is a part of a larger agricultural operations currently owned by the John Van Leeuwen Trust, which consists of both active and fallow agricultural fields, farming operations and irrigation system with wells.
- Previous industrial activities associated with the Site were not identified.

Records Review

- No records were identified in the County, City or State databases for the Site.
- The Site was not listed in the EDR Report. No other sites were listed within a 1-mile radius of the Site.

Site Inspection (10/7/2021)

- The Site is vacant and undeveloped with fallowed agricultural field observed in the southwestern portion of the Site.
- Evidence for storage and/or use of hazardous materials was not identified at the Site during the Site inspection, however:
- Three crushed 55-gallon drums were observed along the access road in the northern part of the Site. One drum appeared to be completely buried under the crushed drums. Minor surface staining was observed under the crushed drums. The buried drum would be identified as a REC.
- A valve associated with irrigation was observed within the northern boundary along with multiple inground stakes along the northern parcel boundary (in line with the above-mentioned valve). Adjacent to the stakes were 3-inch metal fittings possibly associated with inground irrigation.
- Remnants of former farm equipment was located adjacent to the fallow field.

6.2 DATA GAPS

Data gaps per the ASTM Standard E1527-13:

- Phase I User Questionnaire was not completed by the user.
- The property owner, or the person most knowledgeable regarding the property, declined to provide an interview or complete the environmental questionnaire relative to the property.

6.3 PHASE I RECOGNIZED ENVIRONMENTAL CONDITIONS

1. Based on the ASTM definitions and professional standards, one RECs were identified:
    - Three 55-gallon and at least one partially buried 55-gallon drums were located on the Site. These drums were not labeled, former contents unknown, and appeared to be empty. Very minor surface staining was observed beneath the three 55-gallon drums at top the surface.

2. Although not a REC per the ASTM definition, the following items are noted and BNSF should be aware of relative to potential environmental conditions which may or may not require further evaluations:
    - Possible irrigation valve and piping within the northern portion of the parcel.

3. HRECs, or CRECs associated with the Site were not identified at this time.

4. Lastly, the PG&E Hinkley site, a well-known and high-profile site involving contamination of groundwater by hexavalent chromium (this is the "Erin Brockovich Site") is located approximately 4.02 miles north of the Site (i.e., north of the Mojave River). Since the PG&E site is >1 mile from the Site, the PG&E site is not identified in the EDR Radius Report. However, BNSF should be aware of the site and its location relative to the properties being acquired by BNSF in this area. Generally, the chromium contamination from the PG&E site has impacted groundwater in the area and PG&E provides drinking water to residents in the area surrounding the Site. There are ongoing remediation and groundwater monitoring programs and an extensive amount of information is publicly available online. Recent plume maps and information can be reviewed here: http://www.hinkleygroundwater.com/site-information/groundwater-monitoring-and-plume-maps/. Review of the latest plume maps indicates that the groundwater flow direction in the PG&E site area is northerly, i.e., away from the Shirley Otto property. As a result, it does not appear that the PG&E Hinkley site has or would impact the Site area; however, BNSF should be aware of the proximity of the PG&E Site should future plans involve use of groundwater resources.

6.4 RECOMMENDATIONS

1. If further information is required regarding the items identified above, the following recommendations are provided:
    - Remove the buried drum(s) and collect soil samples to determine if releases occurred.

- If the historic agricultural activities are a potential concern, or if further information regarding the above items is identified, follow-up sampling could be conducted.
- If during grading or redevelopment, evidence for soil contamination is identified such as staining or odors, additional sampling should be conducted.

7.0 CERTIFICATION

1. TRC's project team for this Phase I ESA was Matthew R. Eaton, P.G., and Cassandra Fausel, both located in TRC's Irvine, California office.

2. Mr. Eaton is a California Professional Geologist with 32 years of environmental experience managing and conducting environmental projects for private industry. Mr. Eaton has conducted numerous Phase I, II, and III investigations, due diligence assessments, feasibility studies and remediation projects for commercial and industrial property with soil and groundwater impacted with petroleum fuels, chlorinated solvents, heavy metals, dioxins, PCBs, and semi-volatile hydrocarbons. Mr. Eaton is currently a Sr. Project Manager at TRC and manages numerous projects for several clients that involve Phase I, II, and III assessments, coordination with federal, state, and local agencies, and development and implementation of soil and groundwater remediation programs. Mr. Eaton has an M.S. degree in geology, and has been with TRC for 30 years.

3. Ms. Fausel has 7 years of environmental experience in the environmental consulting industry. She has performed environmental site assessments and remedial activities at numerous sites in California including commercial, industrial, and residential facilities. Ms. Fausel is currently a Staff Environmental Scientist at TRC with a M.S. degree in environmental science.

   I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312.

   I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

January 24, 2022

Matthew R. Eaton, P.G.
Senior Project Manager

January 24, 2022

Cassie Fausel
Project Environmental Scientist

APPENDIX A

PHASE I USER QUESTIONNAIRE & ENVIRONMENTAL QUESTIONNAIRE SENT TO OWNER

PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE

NOT COMPLETED BY USER

Pursuant to the American Society for Testing and Materials E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-13), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

The "User" is defined in the ASTM E 1527-13 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager*.

Thank you for taking the time to complete this questionnaire. If you have any questions, please call Matt Eaton at (949) 727-7395 or e-mail meaton@trcsolutions.com

Date: _____

User Name: Doug McReynolds

Company: **BNSF**

Address: 2500 Lou Menk Drive, Ft Worth, TX 76131

Telephone No.: 817-352-3613

E-mail Address: doug.mcreynolds@bnsf.com

Signature: _____

Site Name & Address: San Bernardino County, California

Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)

(1.) **Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)**
Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

Yes ☐ **No** ☐

NOTE 1 — In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2.) **Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))**

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

Yes ☐ **No** ☐

(3.) **Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection* (LLP) (40 CFR 312.28)**

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☐ **No** ☐

(4.) **Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)**

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes ☐ **No** ☐

(5.) ***Commonly known* or *reasonably ascertainable* information regarding the Site property (40 CFR 312.30)**

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Can you provide any information regarding the past uses of the Site?

(b.) Can you provide any information regarding specific chemicals that are present or once were present at the Site?

(c.) Can you provide any information regarding spills or other chemical releases that have occurred at the Site?

(d.) Can you provide any information regarding any environmental cleanups that have occurred at the Site?

Yes ☐ **No** ☐

(6.) **The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)**
Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?

Yes	No
☐	☐

(7.) **Proceedings Involving the Site**
Are you aware of**:** (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

Yes	No
☐	☐

(8.) **Questions Regarding Helpful Documents**
Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

	Yes	No
- Environment site assessment reports	☐	☐
- Environment compliance audit reports	☐	☐
- Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits)	☐	☐
- Registrations for underground and aboveground storage tanks	☐	☐
- Registrations for underground injection systems	☐	☐
- Material Safety Data Sheets (MSDSs)	☐	☐
- Community Right-To-Know plan(s)	☐	☐
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.,	☐	☐
- Reports regarding hydrogeologic conditions at the Site and surrounding area	☐	☐
- Notices or other correspondence from any government agency regarding current or previous violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site property	☐	☐
- Hazardous waste generator notices or reports	☐	☐
- Geotechnical studies	☐	☐
- Risk assessments	☐	☐
- Recorded AULs.	☐	☐

Phase I ESA Questionnaire

Name of preparer:_____

Site Address or APN:_____

Name of property owner / representative and title:_____

Date property was purchased:_____

How have you utilized the Property?		
What was the use of the Property by the previous owner?		
Do you have any knowledge of environmental issues at the site?	☐ Yes	☐ No
If yes please explain:		
Do you have knowledge of any environmental liens for the site?	☐ Yes	☐ No
If yes please explain:		
Do you have any past or current storage of hazardous materials at the site?	☐ Yes	☐ No
If yes please explain:		
Do you know of any current or past Above or Underground Storage Tanks at the site?	☐ Yes	☐ No
If yes please explain:		
Do you know if any clarifiers have ever been present at the site?	☐ Yes	☐ No
If yes please explain:		
Do you know of any spills or cleanups at the site?	☐ Yes	☐ No
If yes please explain:		
Do you have any knowledge of previous environmental assessments conducted for the site?	☐ Yes	☐ No
If yes please explain:		

I certify that the above is completed to the best of my knowledge.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-SQG ---------- RCRA - Small Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE..... State Response Sites

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR..... EnviroStor Database

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

LUST..... Geotracker's Leaking Underground Fuel Tank Report
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land
CPS-SLIC..... Statewide SLIC Cases

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing
UST..... Active UST Facilities
AST..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

VCP..... Voluntary Cleanup Program Properties
INDIAN VCP..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS..... Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT..... Waste Management Unit Database
SWRCY..... Recycler Database
HAULERS..... Registered Waste Tire Haulers Listing
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations

ODI	Open Dump Inventory
IHS OPEN DUMPS	Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL	Delisted National Clandestine Laboratory Register
HIST Cal-Sites	Historical Calsites Database
SCH	School Property Evaluation Program
CDL	Clandestine Drug Labs
CERS HAZ WASTE	CERS HAZ WASTE
Toxic Pits	Toxic Pits Cleanup Act Sites
US CDL	National Clandestine Laboratory Register
PFAS	PFAS Contamination Site Location Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

Longitude (West):	117.176884 - 117ˆ 10’ 36.78’’
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	483828.9
UTM Y (Meters):	3856033.5
Elevation:	2240 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015985 HODGE, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

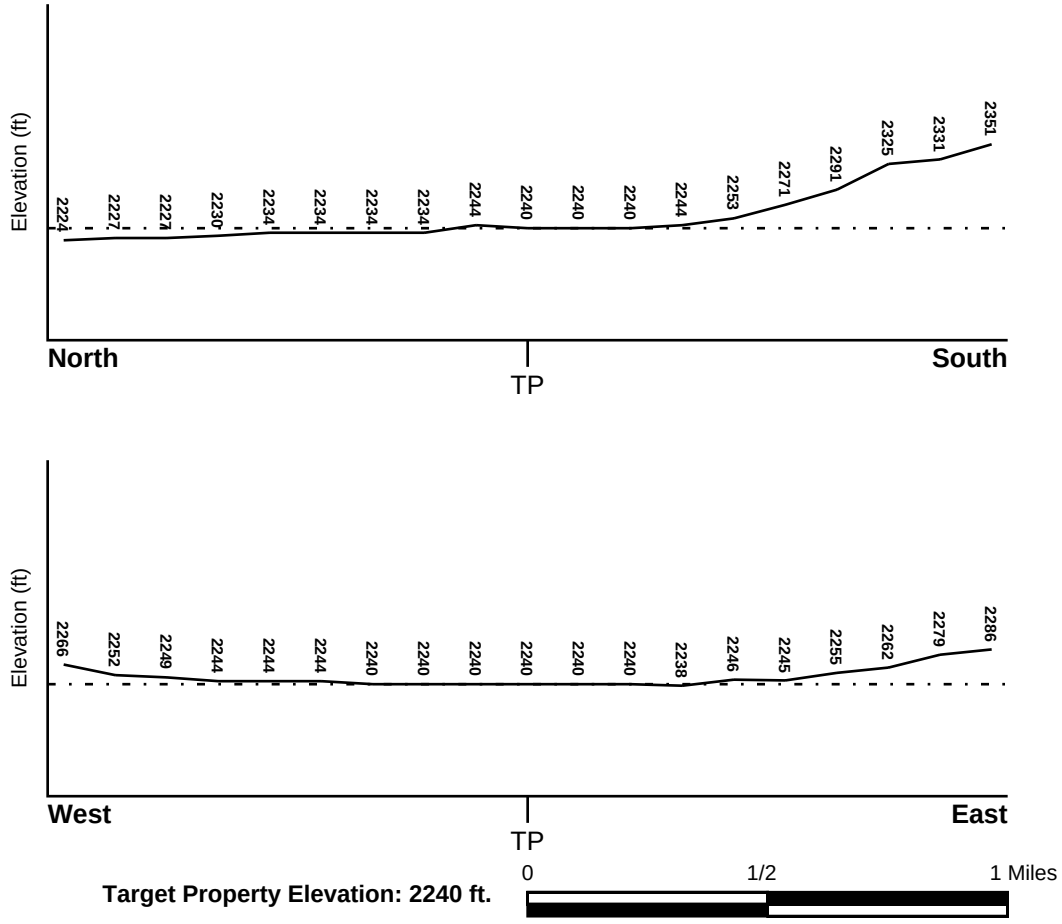

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 2240 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C4525F	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: VILLA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	7 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: VICTORVILLE

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches		Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	16 inches	35 inches		Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	35 inches	48 inches		Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
4	48 inches	59 inches		Not reported	Not reported	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: VILLA

Soil Surface Texture:

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Organization ID:	USGS-CA		
Organization Name:	USGS California Water Science Center		
Monitor Location:	009N003W23F001S	Type:	Well
Description:	Depth greater than 450 ft on 8/21/96		
HUC:	18090208	Drainage Area:	Not Reported
Drainage Area Units:	Not Reported	Contrib Drainage Area:	Not Reported
Contrib Drainage Area Unts:	Not Reported	Aquifer:	Basin and Range basin-fill aquifers
Formation Type:	Not Reported	Aquifer Type:	Not Reported
Construction Date:	19941116	Well Depth:	585
Well Depth Units:	ft	Well Hole Depth:	589
Well Hole Depth Units:	ft

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC Environmental Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Environmental Lien and AUL Search

EDR® Environmental Data Resources Inc

6 Armstrong Road
Shelton, CT 06484
800.352.0050
www.edrnet.com

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

STATE OF CALIFORNIA)

COUNTY OF SANTA BARBARA)

On 4/12/2021, before me, CHRISTINE GRESS, Notary Public, personally appeared Joe Bourdeau, who proved to me on the basis of satisfactory evidence to be the person whose name is subscribed to the within instrument, and acknowledged to me that he executed the same in his authorized capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

I certify under PENALTY OF PERJURY under the laws of the State of California that the foregoing paragraph is true and correct.

WITNESS my hand and official seal.

Christine Gress

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.
