Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Finkbiner Park Multi-Benefit Stormwater Capture	
Lead Agency: City of Glendora	
Contact Name: Maliha Ansari	
Email: MAnsari@cityofglendora.org	Phone Number: 626-914-8294
Project Location: 160 North Wabash Avenue, City of Glendora, Los Angeles County	
Project Location: Too North Wabash Avenue, City of Glendora, Los Ang	County

Project Description (Proposed actions, location, and/or consequences).

The City proposes to construct a regional stormwater runoff capture facility within a 3.8-acre portion of the 11.45-acre Finkbiner Park to provide multiple benefits including improved flood control, water quality, and water supply (through infiltration to groundwater and reduced irrigation). The stormwater facility would involve diverting stormwater runoff from two adjacent drainage features (Little Dalton Wash and Los Angeles County Flood Control District's MTD 1129) into an underground capture, treatment, and infiltration facility situated beneath the existing ballfields. The Project represents an opportunity to implement regional-scale pollutant load reductions from a 1,596-acre drainage area of the Upper San Gabriel River Watershed as well as increase infiltration to the underlying groundwater aquifer (Main San Gabriel Basin). The Project would also include in-kind replacement of existing facilities within the site that require demolition to implement the stormwater facility with new recreation facilities and features; conversion of the alley along the northern site boundary into a green alley through installation of permeable pavement; and installation of a recirculating stream, native landscaping, and adjacent path in the southeast portion of the site as a new passive recreation opportunity in the park.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources. MM BIO-1 requires Glendora to prepare and process regulatory permits pursuant to the Clean Water Act. MM BIO-2 requires the Project be conducted in compliance with the Migratory Bird Treaty Act and California Fish and Game Code and to conduct a pre-construction nesting bird and raptor survey and implement buffer zone(s) as appropriate.

Cultural Resources. MM CUL-1 requires a qualified Archaeologist to observe grading activities in undisturbed soils and to salvage and catalog archaeological resources, as necessary.

Geology and Soils. MM GEO-1 requires that, if a paleontologist resource is encountered, disturbance shall cease within 100 foot radius and a qualified Paleonotologist be retained to evaluate the find.

Noise. MM NOI-1 requires submittal of evidence that construction activity within 15 feet of the hearest residences will not include identified equipment.

Tribal Cultural Resources. MMs TCR-1 through TCR-3 requires a Native American monitor to be retained to observe ground-disturbing activity, defines the process for unanticipated discovery of tribal resources and/or human remains and associated funerary or ceremonial objects.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised agencies and the public.
There are no issues of controversy known to the City of Glendora
Provide a list of the responsible or trustee agencies for the project.
