Project Title: Finkbiner Park Multi-Benefit Stormwater Capture Project

Project Applicant: City of Glendora

Project Location (include county): City of Glendora, Los Angeles County, CA

Project Description:

The Project would construct a regional stormwater runoff capture facility within Finkbiner Park to provide multiple benefits including improved flood control, water quality, and water supply. The facility would involve diverting runoff from two adjacent drainage features into an underground capture, treatment, and infiltration facility situated beneath the existing ballfields. The Project represents an opportunity to implement regional-scale pollutant load reductions from a sizeable drainage area in the USGR Watershed as well as increase infiltration to the underlying groundwater aquifer. The Project would also include in-kind replacement of existing facilities within the site that require demolition to implement the stormwater BMP with new recreation facilities and features; conversion of the alley along the northern site boundary into a green alley through installation of permeable pavement; and installation of a recirculating stream, native landscaping, and adjacent path in the southeast portion of the site as a new passive recreation opportunity in the park.

This is to advise that the City of Glendora has approved the above
