11. Waste discharges into Dominguez Channel must be strictly controlled so that this Board's Water Quality Control Policy for the Dominguez Channel and for the Inner and Outer Harbors is maintained in order that the quality of water in those harbors is suitable for the beneficial uses enunciated above and so that creation of a nuisance is prevented within Dominguez Channel itself.

12. The discharge of wastes to Dominguez Channel is an economic use of the Channel and, insofar as it does not conflict with the beneficial uses enunciated above for protection, or create a nuisance, is in harmony with the Legislature's declared policy to achieve highest water quality consistent with maximum benefit to the people of the state.

13. Based on the December 1962 Montgomery report (referenced above), Dominguez Channel can assimilate a maximum loading of about 10,000 pounds per day, measured as chemical oxygen demand (COD), under conditions of complete dissolved oxygen depletion, based on the location-pattern of waste discharges existing in 1962. Changes which have taken place since that time have not altered this pattern significantly. The loading calculated for a minimum dissolved oxygen of 0.5 mg/l in the Channel is about 8,700 pounds per day, measured as COD.

14. Section 13054.2 of the California Water Code provides that a regional board need not authorize the utilization of the full waste assimilation capacity of a receiving water.

15. In order to ensure that this Board's objective of 0.5 mg/l of dissolved oxygen in the waters of Dominguez Channel will be met at all times, it is necessary to reserve a portion of this capacity to allow for peak discharge flows and loadings, to allow for additional future discharges to Dominguez Channel, and to compensate for other intermittent factors which result in depression of dissolved oxygen, but which cannot be defined precisely. It is deemed necessary to reserve about 20 percent

of the waste assimilation capacity of Dominguez Channel for this purpose.

16. Section 2163 of the California Administrative Code provides that, in formulating requirements for discharges to surface waters, a regional board may delimit a waste dispersion area in the immediate vicinity of a discharge to an extent which, in the board's judgment, will not compromise the beneficial uses and water quality objectives adopted by the board for the general area.

17. Maintenance of this Board's Water Quality Control Policy through strict control of waste discharges present will result in enhancement of water quality in Dominguez Channel and in the harbor.

18. Increased dissolved oxygen content in the waters of Dominguez Channel will result in the development of an indigenous flora and fauna. Control of nutrient content in discharges to the Channel is necessary to prevent proliferation of growth of these biota to the extent that algal blooms, floating mats, or "red tide" conditions occur.

19. This industrial plant lies within the West Coast Hydrologic Subarea, ground waters from which are extensively utilized for municipal, domestic, industrial, and irrigation purposes. The surface of the ground is in hydraulic continuity with water-bearing zones, and wastes discharged to the ground or to unlined ditches, or which are held in storage facilities which permit percolation, could affect these ground waters deleteriously.

20. All existing discharges to the Tidal Prism are located so that the waste waters enter the waters of the Channel at or near the top of the water surface. This and the relatively low density and warmer temperature of the wastes result in a stratification effect in which the wastes tend to override the more saline and cooler tidal flow in the Channel in a "sheet" varying in thickness up to about 5 feet; and

WHEREAS, on February 7, 1968, a letter transmitting a tentative draft of this Resolution was forwarded to the discharger and copies thereof submitted to interested persons and governmental agencies with advice that objections thereto would be considered by this Board if submitted in writing on or before February 20, 1968; and

WHEREAS, objections and recommendations received have been reviewed and considered by the Board;

NOW, THEREFORE, BE IT RESOLVED, that in order to prevent a condition of pollution of the waters of the State, and to prevent creation of a nuisance, this Regional Water Quality Control Board, in accordance with authority granted by Division 7 of the Water Code of the State of California, prescribes the following requirements with respect to this waste discharge, subject to

the provisions of Section 13054 of the Water Code, which reads in part that requirements may be revised from time to time:

1. Waste discharge operations shall be conducted in such a manner that conditions in the receiving waters of Dominguez Channel Tidal Prism, insofar as they are affected by other than natural forces, shall at all times be consistent with the objectives for these waters contained in "Water Quality Control Policy for Harbors, Marinas and Tidal Prisms in Los Angeles and Ventura Counties," adopted by this Regional Water Quality Control Board on April 10, 1967. This includes, but is not limited to, the following specific requirements:

   a. Wastes discharged shall at no time have a pH of less than 6.5 and shall not cause the pH of waters in the Channel to vary from the range 7.0 to 9.5, except in the immediate vicinity of the waste discharge.*

   b. The discharge of wastes shall not cause the average temperature of waters in the Channel to exceed 20 Fahrenheit degrees over the average ambient temperature of the Inner Harbor except within the immediate vicinity of the waste discharge. Average ambient temperature in the Inner Harbor for the purposes of this requirement shall be defined by the measurements at Los Angeles Harbor Monitoring Station No. 44 in Slip No. 5 in front of City of Los Angeles, Department of Water and Power Harbor Steam Station intake.

   c. Visible solids or other materials of waste origin shall not be present in waters in the Channel as a result of this waste discharge except in the immediate vicinity of the waste discharge.

   d. The discharge of wastes shall not cause the color of the waters of the Channel to be altered except in the immediate vicinity of the discharge.

   e. The discharge of wastes shall not cause visible oil, grease, fats, waxes, oily slicks, or foam in the waters of the Channel or on rocks, channel banks, or structures except in the immediate vicinity of the waste discharge.

   f. The discharge of wastes shall not cause the presence of nutrients in concentrations which will result in proliferation of plankton or other undesirable biotic growth.

   g. Wastes discharged shall not contain phenols, mercaptans or other substances in concentrations which will result in objectionable odors emanating from the waters of the Channel.

*For the purpose of these requirements, "immediate vicinity of the waste discharge" is defined as within a distance of 50 feet, both to left and right, from the point of discharge as measured along the longitudinal axis of the Channel.

h. Wastes discharged shall not contain settleable matter in excess of 1.0 ml per liter, and they shall not contain any other substance in concentrations which would cause the formation of sludge deposits in the Channel.

2. Wastes discharged during any calendar day shall not contain more than 30 pounds of chemical oxygen demand (COD).

3. The discharge of wastes to Dominguez Channel shall not cause conditions in the waters of the Los Angeles-Long Beach Inner Harbors and Outer Harbors, insofar as they may be affected by other than natural forces, to be contrary to the objectives for those waters as contained in the Water Quality Control Policy referenced above and in "Water Quality Control Policy for Pacific Ocean Coastal Waters, Rincon Point to San Gabriel River," adopted by this Regional Water Quality Control Board on April 10, 1967.

4. Wastes discharged to the ground, including unlined ditches and ponds, shall be of such quality that:

a. Concentrations of the following mineral constituents do not exceed the maximum limits specified:

Total dissolved solids	1,500 mg/l
Total hardness (as $CaCO_3$)	500 mg/l
Chloride	300 mg/l
Chloride plus sulfate	750 mg/l
Nitrate	50 mg/l

b. The pH of these wastes shall not be less than 6.0.

c. The wastes discharged shall contain no material capable of imparting tastes, odors, color, foaming, or other objectionable characteristics to underground waters.

d. The wastes discharged shall not contain substances in concentrations toxic to human, animal or plant life.

5. These requirements are for the disposal of industrial wastes only. Sanitary sewage, garbage, refuse, and similar materials shall be excluded from this waste discharge.

6. Any wastes which do not meet all of the foregoing requirements shall be stored in impervious containers, and if transferred elsewhere the final discharge shall be at a legal point of disposal; and

BE IT FURTHER RESOLVED, that the discharger is hereby notified that these requirements apply not only to waste material discharged on a routine basis through plant treatment and disposal facilities, but apply as well to material which may be carried to Dominguez Channel from this facility by storm runoff, plant washdown or other circumstances; and

BE IT FURTHER RESOLVED, that in accordance with Section 13055 of the Water Code, technical reports on the quality and quantity of wastes discharged shall be submitted to this Board in accordance with the specifications contained in Exhibit "A" of this Resolution, which specifications the Executive Officer of this Board is authorized to revise from time to time as may be warranted, such revisions being subject to review by this Board at its discretion or at the request of the discharger or any interested person or governmental agency; and

BE IT FURTHER RESOLVED, that the discharger be informed that it is the policy of this Board that waste disposal operations shall be such that flood control structures and appurtenances shall not be damaged; and

BE IT FURTHER RESOLVED, that in prescribing these requirements it is the intent of this Board to:

1. Preserve the quality of the receiving waters of Los Angeles-Long Beach Inner Harbor and Outer Harbor and the West Coast Hydrologic Subarea, insofar as they may be affected by this waste discharge, and protect them for all beneficial uses hereinbefore listed.

2. Prevent the creation of a nuisance as a result of this existing waste discharge; and

BE IT FURTHER RESOLVED, that the attention of the discharger be hereby directed to Section 13054.1 of the Water Code of the State of California which reads in part "Any person discharging sewage or industrial waste within any region, other than into a community sewer system, shall file with the regional board of that region a report of any material change or proposed change in the character, location, or volume of the discharge;" and

BE IT FURTHER RESOLVED, that the discharger be hereby directed to inform this Board of any change in ownership of the waste disposal facility; and

BE IT FURTHER RESOLVED, that the foregoing requirements do not authorize the commission of any act resulting in injury to the property of another; and

BE IT FURTHER RESOLVED, that the discharger be further advised that these requirements do not exempt the operator of this waste disposal facility from compliance with any other law which may be applicable. The requirements are not a permit; they do not legalize this waste disposal facility, and they leave unaffected any further restraints on the disposal of wastes at this site which may be contained in other statutes; and

BE IT FURTHER RESOLVED, that the Executive Officer of this Board be authorized, and he is hereby directed, to certify and submit copies of this resolution to the discharger, and to such individuals and governmental agencies as may have need therefor, or as may request same.

I, Raymond M. Hertel, Executive Officer of the Los Angeles Regional Water Quality Control Board, State of California, do hereby certify that the foregoing is a full, true, and correct copy of a resolution adopted by the Los Angeles Regional Water Quality Control Board at its meeting held on February 21, 1968, the original of which is retained in the files of the Board.

Raymond M. Hertel

RAYMOND M. HERTEL, Executive Officer

EXHIBIT "A"

Specifications for Technical Reports to be Submitted by

Air Products and Chemicals Inc.
(File 63-63)

A. Location of Sampling Stations

1. At each point where plant process effluent (including cooling water) is discharged to Dominguez Channel, an effluent sampling station shall be established so that representative samples of effluent can be obtained prior to discharge to the Channel.

2. Sampling stations for receiving water samples shall be located on cross-sections of the Channel at points 50 feet--as measured along the longitudinal axis of the Channel--from the centerline of the effluent stream for each point of discharge; these cross-sections shall be situated both to the left and right of the discharge.

   On these cross-sections, the sampling stations shall be located at ten feet from the edge of the channel. At each of these points on each cross-section, a sampling station shall be established at two feet below the water surface.

B. Type, Frequency and Techniques of Sampling and Analyzing

1. On at least one day each month, beginning in April, 1968, each of the effluent sampling stations above shall be occupied and the following determinations made:

   Ether solubles
   Settleable solids
   pH
   Phenolic compounds (as phenol)
   Suspended solids
   Chemical oxygen demand

   These determinations shall be made on a composite sample, according to flow, of hourly samples obtained during the period that the receiving water samples below are being obtained.

   The temperature of each hourly sample shall also be determined.

   In addition, for wastes which are discharged to the ground, conveyed to Dominguez Channel in unlined ditches, or held in storage facilities which permit percolation, the following determinations shall be made on a grab sample of those portions which could thus affect underlying ground water:

Total dissolved solids	Sulfate
Total hardness (as $CaCO_3$)	Nitrate
Chloride	pH

2. Once each calendar quarter, beginning in the second quarter of 1968, each of the receiving water stations above shall be occupied and the following determinations made:

   pH
   Dissolved oxygen
   Temperature

   The receiving water stations shall be occupied four times within one tidal cycle each sampling day during periods of waste discharge--once at high water slack, once at low water slack, once on the flood tide midway between low water slack and high water slack, and once on the ebb tide midway between high water slack and low water slack.

3. In addition to the above determinations the following shall be noted at the time of the monthly effluent sampling and at the time of the quarterly receiving water sampling:

   Tide stage
   Direction and estimated force of current
   General weather conditions during monitoring
   For the area outside the immediate vicinity of the discharge point:

   Color of water in Channel and appearance and extent of any visual turbidity or color patches.
   Appearance and extent of any visible solids or other materials of waste origin.
   Appearance and extent of any visible oil and grease, fats or waxes, or foam in the water or at the water's edge.
   Description of odor of Channel water.
   Appearance and extent of any deposits of sludge or other detritus in the water or on Channel banks.
   Appearance and amount of any observed plant or animal growth on banks or substrate or in the water.

4. All samples shall be taken and all analyses shall be performed in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, Inc., except that for specific analyses newer techniques may be used if in the judgment of the Executive Officer the results obtained are consistent with the objectives of these waste discharge requirements.

5. Receiving water monitoring shall not be accomplished during or immediately subsequent to periods of storms. Receiving water monitoring shall be done preferably at times other than those when storm runoff is in the Channel.

C. Filing of Reports

1. Three copies of written report of the results of the monitoring program shall be furnished to the Board within 30 days following the sampling.

2. The written report shall contain the following information:

   a. Dates and times of sampling;

   b. Approximate volume of wastes discharged on the date of sampling in gallons per day;

   c. Tabulated results of specified analyses and physical observations;

   d. Record of all wastes hauled during the reporting period, including types of wastes, volumes, dates of hauling, and ultimate point of disposal.

   Format for these reports and sampling station identification will be provided by the Board.

3. These records and reports are public documents and shall be made available for inspection during business hours at the office of the Los Angeles Regional Water Quality Control Board.

I.N.P. 3113

DATE: 12-12-63

REPORT: I CONTACTED MR. DON REAMER PROCESS SUPT. - HE STATES THEY ARE ENGAGED IN MFG. LIQUID HYDROGEN - FEED STOCK, FORMERLY A WASTE GAS FROM RICHFIELD REFINERY, CONTAINS 80 TO 90% HYDROGEN WITH OTHER GASES. THIS IS FIRST PASSED THROUGH A LIGHT OIL, STRIPPING BENZINE & AROMATICS (NO WASTE). HYDROGEN GAS IS PRESSURIZED TO 1500 PSI LIQUIFIED & THEN HAULED TO GOVT MISSILE PROGAMS. BENZINES & AROMATICS PASS THROUGH A CAUSTIC STRIPPER, CREATING A SODIUM CARBONATE WASTE TO CHANNEL WHICH IS VERY LITTLE & THE COOLING TOWER BLEED OFF, APPROX 206 P.M. GOES TO CHANNEL. DOMESTIC WASTE GOES TO SEPTIC TANK & THEN TO SEEPAGE PITS. A PH TAKEN OF DISC. TO CHANNEL WAS PH 6.5 AT THIS TIME.

Note - Item 3 of I.W.P. Must be changed to fit the fact. It says 126. WASTE shall go to Sanitary Sewer which usually means L.A. County sewer. This goes to septic tank & leach system instead. As outlined in letter of intent from Company.

This can be changed when Channel improvement has been completed & All permits covering such discharge are changed. I have discussed this with Jack Edwards.

23320 S. ALAMEDA ST.

DATE: 1-18-66

REPORT:

INSPECTION MADE AT ABOVE COMPANY. PERSON CONTACTED WAS MR. STANG, ACTING IN PLACE OF MR. REAMER.

A SAMPLE WAS TAKEN OF THE DISCHARGE TO DOMINGUEZ CHANNEL. MR. STANG SAID THAT APPROX. 99% OF THIS WATER COMES FROM THEIR COOLING TOWER. THE OTHER 1% IS YARD WASHDOWN. THIS SAMPLE WILL BE CHECKED FOR SETTLEABLE SOLIDS.

THERE WAS NO EVIDENCE OF CHEMICAL SPILLAGE AT TIME OF INSPECTION.

I TOLD MR STANG THAT SOMETIMES THE DISCHARGE IS A MILKEY WHITE. HE SAID THAT IT WAS NECESSARY TO ADD A COMPOUND TO THE TOWER TO CLEAN IT, AND THE ~~DISCHARGE~~ COMPOUND CHANGED THE COLOR TO WHITE.

IWP-313

TO: J.R. Knight

FROM: LeRoy Davis

FILE: Air Prod. & Chems. Inc.
23320 S. Alameda St

DATE: 10-7-66

REPORT: On 10-6-66 at 1:30 P.M. checked sulfides at above industries outfall into Dominguez Channel

Found undissolved sulfides of 3 P.P.M. and dissolved sulfides of 0.2 P.P.M. There was a steady streak of iridescence on top of effluent to channel.

On 10-7-66 contacted Dudley Anderson - in charge of lab. (Mr. Stange was absent)

Mr. Anderson stated that the effluent to Dominguez Channel had not been monitored for a very long time, but would be checked at least once a day, in the future. JRK

I stated that any rise in sulfides to channel would necessitate the aeriateing of effluent, or other treatment to remove sulfides.

Mr. Anderson further stated that iridesence of effluent would be eliminated in the future.

ATTN: Mr. Raymond Hertel

Gentlemen :

This letter is submitted in response to your notice of February 7, 1968 concerning tentative requirements for the discharge of industrial wastes to Dominguez Channel.

The Air Products & Chemicals liquid hydrogen plant, 23320 So. Alameda, was shut down December, 1967 and no longer will discharge wastes to the Dominguez Channel except for normal wash down of slab areas and run off during rains.

In the future, if this facility should resume normal operations, we will notify immediately.

Very truly yours,

RE: Requirements for Disposal of Industrial Wastes (File 63-63)

Gentlemen:

Thank you for your letter dated March 6, 1968, which notified us that your plant at the above address has been shut down and that there is no longer any discharge of industrial wastes to Dominguez Channel from this facility.

We are closing our file on this case and it will not be necessary for you to conduct the monitoring program called for in Resolution No. 68-4, adopted by this Regional Board on February 21, 1968.

If at some time in the future you resume operations at this facility, it will be necessary for you to comply with the requirements of Resolution No. 68-4. Please notify this Board if you do reopen the plant and before you again start discharging industrial wastes to Dominguez Channel. Your continued cooperation is greatly appreciated.

Very truly yours,

Raymond M. Hertel

Re: Proposed Operation of Facility at 23320 South Alameda Street, Long Beach
(File 63-63)

Gentlemen:

Thank you for your letter of December 7, 1971, notifying us of your intent to resume operations at the subject facility and to conform to this Board's Resolution No. 68-4, prescribing waste discharge requirements.

Those requirements, adopted in 1968, were for the disposal of about 40,000 gallons per day of cooling tower bleedoff. Please inform us whether this fairly describes the proposed operation. If there will be any material change in the character, location, or volume of the discharge, it will be necessary for you to file a new report of waste discharge with the Board.

The discharge of sewage to the channel is explicitly prohibited by Requirement 5 on page 7 of Resolution No. 68-4. Please inform us of the method proposed for disposal of sewage and of industrial wastes other than cooling tower bleedoff, if any, from your facility. Also indicate the approximate date of plant startup.

Your reply is requested by February 2, 1972. Meanwhile if there are any questions, feel free to contact us.

Very truly yours,

RAYMOND M. HERTEL
Executive Officer

ATTENTION: Mr. Norwin Schoenerr, Plant Manager

RE: Disposal of Industrial Wastes (CI 5422)

Gentlemen:

Reference is made to Resolution No. 68-4, adopted by this Board on February 21, 1968, which prescribes requirements for the disposal of wastes by your company to Dominguez Channel.

Requirement 1h provides in part that wastes discharged shall not contain any substance in concentrations which would cause the formation of sludge deposits in the Channel.

An inspection of your facilities by this Board's staff with your Mr. Schoenherr on May 11, 1972, disclosed sludge deposits in the Channel at your waste discharge point.

It is requested that you take immediate action to clean up these deposits, to bring the disposal of wastes into compliance with this Board's requirement, to prevent similar occurrences in the future, and to assure that all requirements are complied with at all times.

It is further requested that you provide a written report to this Board by June 8, 1972, of the corrective and preventive measures taken, together with a time schedule of their implementation, and the date the cleanup was completed.

If you have any questions about this matter please contact Mr. Miller Chambers at (213) 620-4460. Your cooperation in water pollution control is appreciated.

Very truly yours,

Raymond M. Hertel

INSPECTOR'S REPORT

TO: Ed Thompson DATE: 6/7/72

FROM: Don A Tallmon FILE: Air Products & Chem. I-5385-22

REPORT:

A follow Up Inspection Was made Today at the above Location. This Was in regard To a Connection from one of the State Boards Field Inspection. This information Was given To me by Mr. Tom Otteson.

At Todays Inspection I Contacted Mr. Norwin Schoenherr, Plant Manager. He Said that the State Board Inspectors requested that the Company Clean & remove a Coloration on the Rocks of the Bank of Dominguez Channel. This is a Discharge point for their Cooling Tower bleed off, about 10 to 20 gallon per min. It Covers about a 10 Sq. ft. area. This Material of the Discoloration is Calcium Carbonate from the Cooling Water. This has accumulated over the past 10 yrs once is the first Cleaning.

Mr. Schoenherr has made application

LABORATORY NO. 113163

INVESTIGATION Monitoring of Receiving Water in Dominguez Channel in accordance with requirements of the State of California Los Angeles Regional Water Quality Control Board Number 4, according to Exhibit "A", Resolution No. 68-4, Third Quarter 1972

RESULTS

On August 8, 1972 the receiving water of the one outlet to the Dominguez Channel was monitored at two locations four times during a complete tidal cycle. The sampling locations were two feet below the surface at points fifty feet south and fifty feet north of the discharge, 15 feet out from the West bank. The monitoring was conducted at high tide, mid ebb tide, low tide and mid flood tide to determine pH, temperature and dissolved oxygen.

In addition to the measurements, visual observations were recorded as to conditions outside the immediate vicinity of the discharge point.

The monitoring data and other information are tabulated on the following page.

This report applies only to the sample, or samples, investigated and is not necessarily indicative of the quality or condition of apparently identical or similar products. As a mutual protection to clients, the public and these Laboratories, this report is submitted and accepted for the exclusive use of the client to whom it is addressed and upon the condition that it is not to be used, in whole or in part, in any advertising or publicity matter without prior written authorization from these Laboratories.

Gentlemen:

AIR PRODUCTS AND CHEMICALS, INC. (I-5385)

Our records indicate that your facility is currently discharging to Dominguez Channel under Industrial Waste Disposal Permit No. 3113. To complete our files, please provide us with a current set of site and waste piping plans for all your channel discharges. Please indicate on these plans any flow measuring or recording devices installed.

Your plans should be forwarded to:

Mr. C. G. Brisley, Jr., Division Engineer
Project Planning and Pollution Control Division
Department of County Engineer
9150 East Imperial Highway
Downey, California 90242

Attention Mr. Gordon Marion

Thank you for your cooperation.

Very truly yours,

Harvey T. Brandt
CITY ENGINEER

INVESTIGATION

Monitoring of Receiving Water in Dominguez Channel in accordance with requirements of the State of California Los Angeles Regional Water Quality Control Board, Number 4, according to Exhibit "A" Resolution No. 68-4, First Quarter 1973.

RESULTS

On February 13, 1973, the receiving water of the one outlet to the Dominguez Channel was monitored at two locations four times during the complete tidal cycle. The sampling locations were two feet below the surface at points fifty feet south and fifty feet north of the discharge, fifteen (15) feet out from the west bank. The monitoring was conducted at high tide, mid ebb tide, low tide and mid flood to determine pH, temperature and dissolved oxygen.

In addition to the measurements, visual observations were recorded as to conditions outside the immediate vicinity of the discharge point.

The monitoring data and other information are tabulated on the following page.

RE: Waste Discharge Requirements (NPDES Permit No. CA0003085)

Gentlemen:

Reference is made to our letter dated October 3, 1974, which transmitted a draft of tentative requirements for your disposal of wastes into Dominguez Channel.

Pursuant to Division 7 of the Water Code of the State of California, this California Regional Water Quality Control Board, at a public hearing held on November 18, 1974, reviewed these tentative requirements, considered all factors in the case, and adopted Order No. 74-344 (copy attached) relative to this waste discharge.

Please note the revision of the effluent limitation for phenols on page 2 of the Order, as adopted. The concentration limits for settleable solids as presented in the tentative requirements were not changed, as these are consistent with those adopted for other similar discharges. Any request for changing these limits must be substantiated by data supporting the request.

This Order serves as a permit under the National Pollutant Discharge Elimination System, and expires July 31, 1978. Please note that you must file an application for a new permit at least 180 days in advance of that date.

Your attention is directed to the provision in the Monitoring and Reporting Program (copy attached) which requires you to submit a technical report to this Board no later than 30 days after receipt of this permit relative to the operation and maintenance of of the waste disposal facility. You are also required to implement the monitoring program as stated in the Monitoring and Reporting Program within 60 days of the effective date of this Order. Your first monitoring report is due by April 15, 1975. Please reference all technical and monitoring reports to our Compliance File No. 5422.

Very truly yours,

ORDER NO. 74-344

NPDES NO. CA0003085

WASTE DISCHARGE REQUIREMENTS FOR AIR PRODUCTS AND CHEMICALS, INC.

The California Regional Water Quality Control Board, Los Angeles Region, finds:

1. Air Products and Chemicals, Inc., has filed a report of waste discharge and has applied for a permit to discharge wastes under the National Pollutant Discharge Elimination System.

2. Air Products and Chemicals, Inc., operates a liquid hydrogen production plant at 23320 South Alameda Street, Carson, California, and discharges up to 56,000 gallons per day of wastes consisting of cooling tower bleed-off, boiler blowdown, and wash water from concrete-paved operating areas directly into Dominguez Channel, a water of the United States, near Sepulveda Boulevard, within the tidal prism.

3. Air Products and Chemicals, Inc., is operating under requirements adopted by this Board on February 21, 1968, (Resolution No. 68-4)

4. The Board adopted an Interim Water Quality Control Plan for Santa Clara and Los Angeles River Basins on June 10, 1971, and updated that Plan on December 13, 1972. The Interim Plan contains water quality objectives for Dominguez Channel tidal prism.

5. The beneficial uses of the receiving waters are: non-water-contact recreation and marine habitat.

6. Effluent limitation standards established pursuant to Section 301 of the Federal Water Pollution Control Act and amendments thereto are applicable to the discharge.

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Water Pollution Control Act, or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator, EPA, has no objections.

IT IS HEREBY ORDERED, that Air Products and Chemicals, Inc.,

in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Water Pollution Control Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. Wastes discharged shall be limited to cooling tower bleed-off, boiler blowdown, and floor wash water, as proposed.

2. The discharge of an effluent in excess of the following limits is prohibited:

Constituent	Discharge Rate (lbs/day) Maximum Daily	30-Day Average	Concentration Limit (mg/l) Average	Maximum
Suspended solids	35	23.4	50	75
Settleable solids	--	----	0.1*	0.2*
COD	30	30	---	---
Oil and grease	7.0	4.67	10	15
Total chromium	4.67×10^{-3}	2.34×10^{-3}	0.005	0.01
Phenols	0.093	0.047	0.1	0.2

* In ml/l

3. The daily discharge rate shall be obtained from the following calculation for any calendar day:

$$\text{Daily discharge rate} = \frac{8.34}{N} \sum_{1}^{N} Q_i \, C_i$$

in which N is the number of samples analyzed in any calendar day. Q_i and C_i are the flow rate (MGD) and the constituent concentration (mg/l) respectively, which are associated with each of the N grab samples which may be taken in any calendar day. If a composite sample is taken, C_i is the concentration measured in the composite sample and Q_i is the average flow rate occurring during the period over which samples are composited.

4. The 30-day average discharge rate shall be the arithmetic average of all the values of daily discharge rate calculated using the results of analyses of all samples collected during any 30 consecutive calendar day period. If fewer than four samples are collected and analyzed during any 30 consecutive calendar day period, compliance with the 30-day average rate limitation shall not be determined.

5. The pH of wastes discharged shall at all times be within the range 6.5 to 9.0.

6. The temperature of wastes discharged shall not exceed 100°F.

7. Wastes discharged shall not contain visible oil or grease, and shall not cause the appearance of grease, oil or oily slick, or foam in the receiving waters or on channel banks, walls, inverts or other structures.

8. Wastes discharged shall not cause the formation of sludge deposits.

9. Neither the disposal nor any handling of waste shall cause pollution or nuisance.

10. Wastes discharged shall not damage flood control structures or facilities.

11. This discharge shall not cause a violation of any applicable water quality standard for receiving waters adopted by the Regional Board or the State Water Resources Control Board as required by the Federal Water Pollution Control Act and regulations adopted thereunder. If more stringent applicable water quality standards are promulgated or approved pursuant to Section 303 of the Federal Water Pollution Control Act, or amendments thereto, the Board will revise and modify this Order in accordance with such more stringent standards.

12. The discharge of wastes shall not cause the presence of nutrients in concentrations which would result in undue proliferation of plankton or other undesirable biotic growth.

B. Provisions

1. This Order includes the following items of the attached "Standard Provisions": 1, 2, 4, 5, 6, 7, 8, 9, 10 and 11.

2. This Order includes the following items of the attached "Reporting Requirements": 1, 5, and 8.

3. This Order includes the attached "General Monitoring and Reporting Provisions."

4. This Order expires on July 31, 1978, and the discharger must file a Report of Waste Discharge in accordance with Title 23, California Administrative Code, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.

5. A copy of these waste discharge specifications shall be maintained at the discharge facility so as to be available at all times to operating personnel.

6. In the event of any change in name, ownership, or control of these waste disposal facilities, the discharger shall notify this Board of such change and shall notify the succeeding owner or operator of the existence of this Order by letter, copy of which shall be forwarded to the Board.

7. Any discharge of wastes at any point(s) other than specifically described in this permit is prohibited, and constitutes a violation of the permit.

8. Resolution No. 68-4, adopted by this Board on February 21, 1968, is hereby rescinded.

I, Raymond M. Hertel, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Los Angeles Region, on November 18, 1974.

Raymond M. Hertel

RAYMOND M. HERTEL, Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

STANDARD PROVISIONS

1. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the discharger from his liabilities under federal, state, or local laws, nor guarantee the discharger a capacity right in the receiving waters.

2. The discharge of any radiological, chemical, or biological warfare agent or high level radiological waste is prohibited.

3. The discharger shall require any industrial user of the treatment works to comply with applicable service charges and toxic and pretreatment standards promulgated in accordance with Sections 204(b), 307, and 308 of the Federal Water Pollution Control Act or amendments thereto. The discharger shall require each individual user to submit periodic notice (over intervals not to exceed nine months) of progress toward compliance with applicable toxic and pretreatment standards developed pursuant to the Federal Water Pollution Control Act or amendments thereto. The discharger shall forward a copy of such notice to the Board and the Regional Administrator.

4. The discharger shall permit the Regional Board:

   (a) Entry upon premises in which an effluent source is located or in which any required records are kept;

   (b) Access to copy any records required to be kept under terms and conditions of this Order;

   (c) Inspection of monitoring equipment or records, and

   (d) Sampling of any discharge.

5. All discharges authorized by this Order shall be consistent with the terms and conditions of this Order. The discharge of any pollutant more frequently than or at a level in excess of that identified and authorized by this Order shall constitute a violation of the terms and conditions of this Order.

6. The discharger shall maintain in good working order and operate as efficiently as possible any facility or control system installed by the discharger to achieve compliance with the waste discharge requirements.

7. Collected screenings, sludges, and other solids removed from liquid wastes shall be disposed of at a legal point of disposal, and in accordance with the provisions of Division 7.5 of the California Water Code. For the purpose of this requirement, a legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a regional water quality control board and which is in full compliance therewith.

8. After notice and opportunity for a hearing, this Order may be terminated or modified for cause, including, but not limited to:

   (a) Violation of any term or condition contained in this Order;

   (b) Obtaining this Order by misrepresentation, or failure to disclose all relevant facts;

   (c) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

9. If a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standard or prohibition) is established under Section 307(a) of the Federal Water Pollution Control Act, or amendments thereto, for a toxic pollutant which is present in the discharge authorized herein and such standard or prohibition is more stringent than any limitation upon such pollutant in this Order, the Board will revise or modify this Order in accordance with such toxic effluent standard or prohibition and so notify the discharger.

10. There shall be no discharge of harmful quantities of oil or hazardous substances, as specified by regulation adopted pursuant to Section 311 of the Federal Water Pollution Control Act, or amendments thereto.

11. In the event the discharger is unable to comply with any of the conditions of this Order due to:

   (a) breakdown of waste treatment equipment;

   (b) accidents caused by human error or negligence; or

   (c) other causes such as acts of nature,

   the discharger shall notify the Executive Officer by telephone as soon as he or his agents have knowledge of the incident and confirm this notification in writing within two weeks of the telephone notification. The written notification shall include pertinent information explaining reasons for the non-compliance and shall indicate what steps were taken to correct the problem and the dates thereof, and what steps are being taken to prevent the problem from recurring.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

REPORTING REQUIREMENTS

1. The discharger shall file with the Board technical reports on self-monitoring work performed according to the detailed specifications contained in any Monitoring and Reporting Programs as directed by the Executive Officer.

2. The discharger shall file a written report with the Board within 90 days after the average dry-weather waste flow for any month equals or exceeds 75 percent of the design capacity of his waste treatment and/or disposal facilities. The discharger's senior administrative officer shall sign a letter which transmits that report and certifies that the policy-making body is adequately informed about it. The report shall include:

   Average daily flow for the month, the date on which the instantaneous peak flow occurred, the rate of that peak flow, and the total flow for that day.

   The discharger's best estimate of when the average daily dry-weather flow rate will equal or exceed the design capacity of his facilities.

   The discharger's intended schedule for studies, design, and other steps needed to provide additional capacity for his waste treatment and/or disposal facilities before the waste flow rate equals the capacity of present units. (Reference: Sections 13260, 13267(b), and 13268, California Water Code.)

3. The discharger shall notify the Board not later than 120 days in advance of implementation of any plans to alter production capacity of the product line of the manufacturing, producing or processing facility by more than ten percent. Such notification shall include estimates of proposed production rate, the type of process, and projected effects on effluent quality. Notification shall include submittal of a new report of waste discharge and appropriate filing fee.

4. The discharger shall notify the Board of (a) new introduction into such works of pollutants from a source which would be a new source as defined in Section 306 of the Federal Water Pollution Control Act, or amendments thereto, if such source were discharging pollutants to the waters of the United States, (b) new introductions of pollutants into such works from a source which would be subject to Section 301 of the Federal Water Pollution Control Act, or amendments thereto, if it were discharging such pollutants to the waters of the United States, (c) a substantial change in the volume or character of pollutants being introduced into such works by a source introducing pollutants into such works at the time the waste discharge requirements were adopted. Notice shall include a description of the quantity and quality of pollutants and the impact of such change on the quantity and quality of effluent from such publicly owned treatment works. A substantial change in volume is considered an increase of ten percent in the mean dry-weather flow rate. The discharger shall forward a copy of such notice directly to the Regional Administrator.

5. The discharger shall file with the Board a report on waste discharge at least 120 days before making any material change or proposed change in the character, location or volume of the discharge.

6. This Board requires the discharger to file with the Board, within 90 days after the effective date of this Order, a technical report on his preventive (fail-safe) and contingency (cleanup) plans for controlling accidental discharges, and for minimizing the effect of such events. The technical report should:

   Identify the possible sources of accidental loss, untreated waste bypass, and contaminated drainage. Loading and storage areas, power outage, waste treatment unit outage, and failure of process equipment, tanks and pipes should be considered.

   Evaluate the effectiveness of present facilities and procedures and state when they became operational.

   Describe facilities and procedures needed for effective preventive and contingency plans.

   Predict the effectiveness of the proposed facilities and procedures and provide an implementation schedule containing interim and final dates when they will be constructed, implemented, or operational. (Reference: Sections 13267(b) and 13268, California Water Code.

   This Board, after review of the technical report, may establish conditions which it deems necessary to control accidental discharges and to minimize the effects of such events. Such conditions may be incorporated as part of this Order, upon notice to the discharger.

7. The discharger shall submit to the Board, by January 30 of each year, an annual summary of the quantities of all chemicals, listed by both trade and chemical names, which are used for cooling and/or boiler water treatment and which are discharged.

8. The discharger shall submit to the Board, together with the first monitoring report required by this permit, a list of all chemicals and proprietary additives which could affect this waste discharge, including quantities of each. Any subsequent changes in types and/or quantities shall be reported promptly.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

GENERAL MONITORING AND REPORTING PROVISIONS

GENERAL PROVISIONS FOR SAMPLING AND ANALYSIS

Unless otherwise noted, all sampling, sample preservation, and analyses shall be conducted in accordance with the current edition of "Standard Methods for the Examination of Water and Wastewater" or as approved by the Executive Officer.

All analyses shall be performed in a laboratory approved by the Executive Officer.

Effluent samples shall be taken downstream of any addition to the treatment works and prior to mixing with the receiving waters.

The discharger shall calibrate and perform maintenance procedures on all monitoring instruments and equipment to insure accuracy of measurements, or shall insure that both activities will be conducted.

A grab sample is defined as an individual sample collected in fewer than 15 minutes.

A composite sample is defined as a combination of no fewer than eight individual samples obtained over the specified sampling period. The volume of each individual sample is proportional to the discharge flow rate at the time of sampling. The sampling period shall equal the discharge period, or 24 hours, whichever period is shorter.

GENERAL PROVISIONS FOR REPORTING

For every item where the requirements are not met, the discharger shall submit a statement of the actions undertaken or proposed which will bring the discharge into full compliance with requirements at the earliest time and submit a timetable for correction.

By January 30 of each year, the discharger shall submit an annual report to the Board. The report shall contain both tabular and graphical summaries of the monitoring data obtained during the previous year. In addition, the discharger shall discuss the compliance record and the corrective actions taken or planned which may be needed to bring the discharge into full compliance with the waste discharge requirements.

The discharger shall maintain all sampling and analytical results, including strip charts; date, exact place, and time of sampling; date analyses were performed; analyst's name; analytical techniques used; and results of all analyses. Such records shall be retained for a minimum of three years. This period of retention shall be extended during the course of any unresolved litigation regarding this discharge or when requested by the Board.

Monitoring reports shall be signed by:

a. In the case of corporations, by a principal executive officer at least of the level of vice-president or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which discharge originates;

b. In the case of a partnership, by a general partner;

c. In the case of a sole proprietorship, by the proprietor;

d. In the case of municipal, state or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.

The discharger shall mail a copy of each monitoring report to:

Regional Administrator
Environmental Protection Agency
Region IX
100 California Street
San Francisco, CA 94111

Each report shall contain the following completed declaration:

"I declare under penalty of perjury that the foregoing is true and correct.

Executed on the _____day of _____ at _____.

_____(Signature)

_____(Title)"

In reporting the monitoring data, the discharger shall arrange the data in tabular form so that the date, the constituents, and the concentrations are readily discernible. The data shall be summarized to demonstrate compliance with waste discharge requirements, and, where applicable, shall include results of receiving water observations.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION
MONITORING AND REPORTING PROGRAM NO. 5422
FOR
AIR PRODUCTS AND CHEMICALS, INC.
(CA0003085)

The discharger shall implement this monitoring program within 60 days of the effective date of this Order. The first monitoring report under this program is due by April 15, 1975.

Monitoring reports shall be submitted by the dates in the following schedule:

Reporting Period	Report Due
January - March	April 15
April - June	July 15
July - September	October 15
October - December	January 15

If no flow occurred during the quarter the report shall so state.

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent can be obtained. The following shall constitute the effluent monitoring program:

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
pH	pH units	grab	quarterly
Temperature	^{o}F	grab	monthly
Total waste flow	gal/day	----	monthly
Suspended solids	mg/l	grab	quarterly
Settleable solids	ml/l	grab	quarterly
COD	lbs/day	grab	quarterly
Oil and grease*	mg/l	grab	quarterly
Total chromium**	mg/l	grab	quarterly
Phenols	mg/l	grab	quarterly
Sulfide	mg/l	grab	quarterly

* By the trichlorotrifluoroethane extraction method.

** A statement certifying that no chromium compounds were used during the reporting period may be submitted in lieu of this analysis.

Operation and Maintenance Report

The discharger shall file a technical report with this Board not later than 30 days after receipt of this permit, relative to the operation and maintenance program for this waste disposal facility. The information to be contained in that report shall include, as a minimum, the following:

a. The name and address of the person or company responsible for operation and maintenance of the facility.

b. Type of maintenance (preventive or corrective).

c. Frequency of maintenance, if preventive.

RE: Tentative Waste Discharge Requirements (NPDES Permit No. CA0003085)

Gentlemen:

Reference is made to your completed application to this Board for a permit to discharge wastes under the National Pollutant Discharge Elimination System (NPDES).

Pursuant to the Federal Water Pollution Control Act, as amended in 1977, and in accordance with the California Administrative Code, tentative waste discharge requirements have been prepared.

Enclosed are copies of the tentative requirements, consisting of:

a. Board Order
b. Standard Provisions
c. Reporting Requirements
d. General Monitoring and Reporting Provisions
e. Monitoring and Reporting Program

In accordance with administrative procedures, this Board at a public hearing to be held on July 25, 1983, at 10:00 a.m., 107 South Broadway, Room 1138, Los Angeles, California, will consider the enclosed tentative requirements and comments submitted in writing regarding any or all portions thereof. The Board will hear any testimony pertinent to this discharge and the tentative requirements. It is expected that the Board will take action at the hearing; however, as testimony indicates, the Board at its discretion may order further investigation.

Any comments that any person has with respect to this tentative Order must be received by July 11, 1983, in order to be included in the Board's agenda folder. However, comments received after that date will still be considered by this Board.

If you have any questions, please call us.

Very truly yours,

Lawrence A. Thyerson

ORDER NO. _____

NPDES NO. CA0003085

WASTE DISCHARGE REQUIREMENTS
FOR
AIR PRODUCTS AND CHEMICALS, INC.

The California Regional Water Quality Control Board, Los Angeles Region, finds:

1. Air Products and Chemicals, Inc. discharges wastes under waste discharge requirements contained in Order 78-53 (NPDES No. CA0003085) adopted by this Board on May 22, 1978.

2. Air Products and Chemicals, Inc. has filed a report of waste discharge and has applied for renewal of its waste discharge requirements and National Pollutant Discharge Elimination System permit.

3. Air Products and Chemicals, Inc. operates a liquid hydrogen production plant at 23320 South Alameda Street, Carson, California, and discharges up to 50,000 gallons per day of cooling tower bleed-off, boiler blowdown, and wash water from concrete-paved operating areas directly into Dominguez Channel, a water of the United States, at a point about 1,500 feet downstream from Alameda Street, within the Fidal prism.

4. The Board adopted a revised Water Quality Control Plan for Los Angeles River Basin on March 27, 1978. The Plan contains water quality objectives for Dominguez Channel. The requirements contained in this Order as they are met will be in conformance with the goals of Water Quality Control Plan.

5. The beneficial uses of the receiving waters are non-contact recreation, preservation of rare and endangered species, marine habitat and saline water habitat.

6. Effluent limitation standards established pursuant to Section 301 of the Federal Water Pollution Control Act and amendments thereto are applicable to the discharge.

7. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21100) of the Division 13, of the Public Resources Code in accordance with Water Code Section 13389.

TENTATIVE

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Water Pollution Control Act, or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator, EPA, has no objections.

IT IS HEREBY ORDERED, that Air Products and Chemicals, Inc.,

in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Water Pollution Control Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. The discharge of an effluent in excess of the following limits is prohibited:

		Discharge Limitations	
Constituent	Unit	30-Day Average	Maximum
Suspended solids	mg/l	50	150
	lbs/day*	20.85	62.6
Settleable solids	ml/l	0.1	0.3
COD	lbs/day*	30.0	30.0
Oil and grease	mg/l	10	15
	lbs/day*	4.17	6.26
Residual chlorine	mg/l	-	0.1

*Based on discharge flow of 50,000 gallons per day.

TENTATIVE

3. The daily discharge rate shall be obtained from the following calculation for any calendar day:

$$\text{Daily discharge rate} = \frac{8.34}{N} \sum_{1}^{N} Q_i C_i$$

in which N is the number of samples analyzed in any calendar day. Q_i and C_i are the flow rate (MGD) and the constituent concentration (mg/l) respectively, which are associated with each of the N grab samples which may be taken in any calendar day. If a composite sample is taken, C_i is the concentration measured in the composite sample and Q_i is the average flow rate occurring during the period over which samples are composited.

4. The 30-day average shall be the arithmetic average of all the daily values calculated using the results of analyses of all samples collected during any 30 consecutive calendar day period. If fewer than four samples are collected and analyzed during any 30 consecutive calendar day period, compliance with the 30-day average limitation shall not be determined.

5. The pH of wastes discharged shall at all times be within the range 6.0 to 9.0.

6. The temperature of wastes discharged shall not exceed 100°F.

7. Wastes discharged shall not contain visible oil or grease, and shall not cause the appearance of grease, oil or oily slick, or persistent foam in the receiving waters or on channel banks, walls, inverts or other structures.

8. Wastes discharged shall not cause the formation of sludge deposits.

9. Neither the disposal nor any handling of waste shall cause pollution or nuisance.

10. Wastes discharged shall not damage flood control structures or facilities.

11. This discharge shall not cause a violation of any applicable water quality standard for receiving waters adopted by the Regional Board or the State Water Resources Control Board as required by the Federal Water Pollution Control Act and regulations adopted thereunder. If more stringent applicable water quality standards are promulgated or approved pursuant to Section 303 of the Federal Water Pollution Control Act, or amendments thereto, the Board will revise and modify this Order in accordance with such more stringent standards.

12. Wastes discharged shall not contain any substances in concentrations toxic to human, animal, plant, or aquatic life.

13. Petroleum products, chemicals, and refuse and other wastes shall not be stored or placed where they will be picked up by rainfall and discharged to surface waters.

TENTATIVE

B. Provisions

1. This Order includes the following items of the attached "Standard Provisions": 1,2,4,5,6,7,8,9, and 11.

2. This Order includes the following items of the attached "Reporting Requirements": 1,5 and 8.

3. This Order includes the attached "General Monitoring and Reporting Provisions."

4. This Order expires on July 10, 1988, and the discharger must file a Report of Waste Discharge in accordance with Title 23, California Administrative Code, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.

5. A copy of these waste discharge specifications shall be maintained at the discharge facility so as to be available at all times to operating personnel.

6. In the event of any change in name, ownership, or control of these waste disposal facilities, the discharger shall notify this Board of such change and shall notify the succeeding owner or operator of the existence of this Order by letter, copy of which shall be forwarded to the Board.

7. Any discharge of wastes at any point(s) other than specifically described in this permit is prohibited, and constitutes a violation of the permit.

8. This order may be modified, or, alternatively, revoked and reissued, to comply with any applicable effluent limitation issued pursuant to the order the United States District Court for the District of Columbia issued on June 8, 1976, in Natural Resources Defense Council, Inc. et al. v. Russell E. Train, 8 ERC 2120 (D.D.C. 1976), if the effluent limitation so issued:

   (1) is different in conditions or more stringent than any effluent limitation in this order; or

   (2) controls any pollutant not limited in this order.

9. These requirements do not exempt the operator of this waste disposal facility from compliance with any other laws, regulations, or ordinances which may be applicable; they do not legalize this waste disposal facility, and they leave unaffected any further restraint on the disposal of wastes at this site which may be contained in other statutes or required by other agencies.

10. Order No. 78-53 adopted by this Board on May 22, 1978, is hereby rescinded.

TENTATIVE

I, Raymond M. Hertel, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Los Angeles Region, on July 25, 1983.

RAYMOND M. HERTEL, Executive Officer

TENTATIVE

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

CA 0003085

STANDARD PROVISIONS

TENTATIVE

1. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the discharger from his liabilities under federal, state, or local laws, nor guarantee the discharger a capacity right in the receiving waters.

2. The discharge of any radiological, chemical, or biological warfare agent or high level radiological waste is prohibited.

3. The discharger shall require any industrial user of the treatment works to comply with applicable service charges and toxic and pretreatment standards promulgated in accordance with Sections 204(b), 307, and 308 of the Federal Water Pollution Control Act or amendments thereto. The discharger shall require each individual user to submit periodic notice (over intervals not to exceed nine months) of progress toward compliance with applicable toxic and pretreatment standards developed pursuant to the Federal Water Pollution Control Act or amendments thereto. The discharger shall forward a copy of such notice to the Board and the Regional Administrator.

4. The discharger shall permit the Regional Board:

   (a) Entry upon premises in which an effluent source is located or in which any required records are kept;

   (b) Access to copy any records required to be kept under terms and conditions of this Order;

   (c) Inspection of monitoring equipment or records, and

   (d) Sampling of any discharge.

5. All discharges authorized by this Order shall be consistent with the terms and conditions of this Order. The discharge of any pollutant more frequently than or at a level in excess of that identified and authorized by this Order shall constitute a violation of the terms and conditions of this Order.

6. The discharger shall maintain in good working order and operate as efficiently as possible any facility or control system installed by the discharger to achieve compliance with the waste discharge requirements.

7. Collected screening, sludges, and other solids removed from liquid wastes shall be disposed of at a legal point of disposal, and in accordance with the provisions of Division 7.5 of the California Water Code. For the purpose of this requirement, a legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a regional water quality control board and which is in full compliance therewith.

8. After notice and opportunity for a hearing, this Order may be terminated or modified for cause, including, but not limited to:

   (a) Violation of any term or condition contained in this Order;

   (b) Obtaining this Order by misrepresentation, or failure to disclose all relevant facts;

   (c) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

9. If a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standards or prohibition) is established under Section 307(a) of the Federal Water Pollution Control Act, or amendments thereto, for a toxic pollutant which is present in the discharge authorized herein and such standard or prohibition is more stringent than any limitation upon such pollutant in this Order, the Board will revise or modify this Order in accordance with such toxic effluent standard or prohibition and so notify the discharger.

10. There shall be no discharge of harmful quantities of oil or hazardous substances, as specified by regulation adopted pursuant to Section 311 of the Federal Water Pollution Control Act, or amendments thereto.

11. In the event the discharger is unable to comply with any of the conditions of this Order due to:

   (a) breakdown of waste treatment equipment;

   (b) accidents caused by human error or negligence; or

   (c) other causes such as acts of nature,

   the discharger shall notify the Executive Officer by telephone as soon as he or his agents have knowledge of the incident and confirm this notification in writing within two weeks of the telephone notification. The written notification shall include pertinent information explaining reasons for the non-compliance and shall indicate what steps were taken to correct the problem and the dates thereof, and what steps are being taken to prevent the problem from recurring.

12. Supervisors and operators of publicly owned wastewater treatment plants shall possess a certificate of appropriate grade in accordance with regulations adopted by the State Water Resources Control Board.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

CA 0003085

REPORTING REQUIREMENTS

1. The discharger shall file with the Board technical reports on self-monitoring work performed according to the detailed specifications contained in any Monitoring and Reporting Programs as directed by the Executive Officer.

2. The discharger shall file a written report with the Board within 90 days after the average dry-weather waste flow for any month equals or exceeds 75 percent of the design capacity of his waste treatment and/or disposal facilities. The discharger's senior administrative officer shall sign a letter which transmits that report and certifies that the policy-making body is adequately informed about it. The report shall include:

   Average daily flow for the month, the date on which the instantantaneous peak flow occurred, the rate of that peak flow, and the total flow for that day.

   The discharger's best estimate of when the average daily dry-weather flow rate will equal or exceed the design capacity of his facilities.

   The discharger's intended schedule for studies, design, and other steps needed to provide additional capacity for his waste treatment and/or disposal facilities before the waste flow rate equals the capacity of present units. (Reference: Sections 13260, 13267(b), and 13268, California Water Code).

3. The discharger shall notify the Board not later than 120 days in advance of implementation of any plans to alter production capacity of the product line of the manufacturing, producing or processing facility by more than ten percent. Such notification shall include estimates of proposed production rate, the type of process, and projected effects on effluent quality. Notification shall include submittal of a new report of waste discharge and appropriate filing fee.

4. The discharger shall notify the Board of (a) new introduction into such works of pollutants from a source which would be a new source as defined in Section 306 of the Federal Water Pollution Control Act, or amendments thereto, if such source were discharging pollutants to the waters of the United States, (b) new introductions of pollutantsinto such works from a source which would be subject to Section 301 of the Federal Water Pollution Control Act, or amendments thereto, if substantial change in the volume or character of pollutants being introduced into such works by a source introducing pollutants into such works at the time the waste discharge requirements were adopted. Notice shall include a description of the quantity and quality of pollutants and the impact of such change on the substantial change in volume is considered an increase of ten percent in the mean dry-weather flow rate. The discharger shall forward a copy of such notice directly to the Regional Administrator.

5. The discharger shall file with the Board a report on waste discharge at least 120 days before making any material change or proposed change in the character, location or volume of the discharge.

6. This Board requires the discharger to file with the Board, within 90 days after the effective date of this Order, a technical report on his preventive (failsafe) and contingency (cleanup) plans for controlling accidental discharges, and for minimizing the effect of such events. The technical report should:

   Identify the possible sources of accidental loss, untreated waste bypass, and contaminated drainage. Loading and storage areas, power outage, waste treatment unit outage, and failure of process equipment, tanks and pipes should be considered.

   Evalulate the effectiveness of present facilities and procedures and state when they became operational.

   Describe facilities and procedures needed for effective preventive and contingency plans.

   Predict the effectiveness of the proposed facilities and procedures and provide an implementation schedule containing interim and final dates when they will be constructed, implemented, or operational. (Reference: Sections 13267(b) and 13268, California Water Code.

   This Board, after review of the technical report, may establish conditions which it deems necessary to control accidental discharges and to minimize the effects of such events. Such conditions may be incorporated as part of this Order, upon notice to the discharger.

7. The discharger shall submit to the Board, by January 30 of each year, an annual summary of the quantities of all chemicals, listed by both trade and chemical names, which are used for cooling and/or boiler water treatment and which are discharged.

8. The discharger shall submit to the Board, together with the first monitoring report required by this permit, a list of all chemicals and proprietary additives which could affect this waste discharge, including quantities of each. Any subsequent changes in types and/or quantities shall be reported promptly.

CA 0003085

TENTATIVE

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION

GENERAL MONITORING AND REPORTING PROVISIONS

GENERAL PROVISIONS FOR SAMPLING AND ANALYSIS

All sampling, sample preservation, and analyses shall be performed in accordance with the latest edition of "Guidelines Establishing Test Procedures for Analysis of Pollutants", promulgated by the United States Environmental Protection Agency.

All chemical, bacteriological, and bioassay analyses shall be conducted at a laboratory certified for such analyses by the State Department of Health.

Effluent samples shall be taken downstream of any addition to the treatment works and prior to mixing with the receiving waters.

The discharger shall calibrate and perform maintenance procedures on all monitoring instruments and equipment to insure accuracy of measurements, or shall insure that both activities will be conducted.

A grab sample is defined as an individual sample collected in fewer than 15 minutes.

A composite sample is defined as a combination of no fewer than eight individual samples obtained over the specified sampling period. The volume of each individual sample is proportional to the discharge flow rate at the time of sampling. The sampling period shall equal the discharge period, or 24 hours, whichever period is shorter.

GENERAL PROVISIONS FOR REPORTING

For every item where the requirements are not met, the discharger shall submit a statement of the actions undertaken or proposed which will bring the discharge into full compliance with requirements at the earliest time and submit a timetable for correction.

By January 30 of each year, the discharger shall submit an annual report to the Board. The report shall contain both tabular and graphical summaries of the monitoring data obtained during the previous year. In addition, the discharger shall discuss the compliance record and the corrective actions taken or planned which may be needed to bring the discharge into full compliance with the waste discharge requirements.

The discharger shall maintain all sampling and analytical results, including strip charts; date, exact place, and time of sampling; date analyses were performed; analyst's name; analytical techniques used; and results of all analyses. Such records shall be retained for a minimum of three years. This period of retention shall be extended during the course of any unresolved litigation regarding this discharge or when requested by the Board.

(Revised 8/1/75)

TENTATIVE

In reporting the monitoring data, the discharger shall arrange the data in tabular form so that the date, the constituents, and the concentrations are readily discernible. The data shall be summarized to demonstrate compliance with waste discharge requirements and, where applicable, shall include results of receiving water observations.

Monitoring reports shall be signed by:

a. In the case of corporations, by a principal executive officer at least of the level of vice-president or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which discharge originates;

b. In the case of a partnership, by a general partner;

c. In the case of a sole proprietorship, by the proprietor;

d. In the case of municipal, state or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.

Each report shall contain the following completed declaration:

"I declare under penalty of perjury that the foregoing is true and correct.

Executed on the _____ day of _____ at _____

_____(Signature)

_____(Title)"

The discharger shall mail a copy of each monitoring report to the following:

California Regional Water Quality
Control Board - Los Angeles Region
107 South Broadway, Room 4027
Los Angeles, CA 90012

ATTN: Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION
MONITORING AND REPORTING PROGRAM NO. 5422

FOR

AIR PRODUCTS AND CHEMICALS, INC.
(CA0003085)

The discharger shall implement this monitoring program on the effective date of this Order. The first monitoring report under this program is due by July 15, 1983.

Monitoring reports shall be submitted by the dates in the following schedule:

Reporting Period	Report Due
January - March	April 15
April - June	July 15
July - September	October 15
October - December	January 15

If no flow occurred during the quarter the report shall so state.

Each monitoring report must affirm in writing that:

> All analyses were conducted at a laboratory certified for such analyses by the State Department of Health and in accordance with current EPA guideline procedures or as specified in the Monitoring Program.

For any analysis performed for which no procedure is specified in the EPA guidelines or in this Monitoring Program, the constituent or parameter analyzed and the method or procedure used must be specified in the report.

TENTATIVE

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent can be obtained. The following shall constitute the effluent monitoring program:

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
pH	pH units	grab	quarterly
Temperature	°F or °C	grab	monthly
Total waste flow	gal/day	----	monthly
Suspended solids	mg/l	grab	quarterly
Settleable solids	ml/l	grab	quarterly
COD	lbs/day	grab	quarterly
Oil and grease	mg/l	grab	quarterly
Residual Chlorine*	mg/l	grab	quarterly
Zinc	mg/l	grab	quarterly

* A statement that this constituent has not been added to the system may be submitted in lieu of analysis.

Demonstration of Compliance with 30-day Average Limitations

For parameters where both 30-day average and maximum limits are specified but where the monitoring frequency is less than four times a month, the following procedure shall apply. Future analyses of two successive samples yield results greater than 90% of the maximum limit for a parameter, the sampling frequency for that parameter shall be increased (within one week of receiving the laboratory result on the second sample) to a minimum of once weekly until at least four consecutive weekly samples have been obtained and compliance with the 30-day average limit has been demonstrated again and the discharger has set forth for the approval of the Executive Officer a program which ensures future compliance with the 30-day average limit.

TENTATIVE

Hauling Reports

In the event wastes are transported to a different disposal site during the reporting period, the following shall be reported.

a. Types of wastes and quantity of each type;

b. Name and either the address or the state registration number for each hauler of wastes (or the methods of transport if other than by hauling); and

c. Location of the final points of disposal for each type of waste.

If no wastes are hauled offsite during the reporting period, a statement to that effect shall be submitted.

RE: Tentative Waste Discharge Requirements
(NPDES Permit No. CA0003085)

Gentlemen:

Reference is made to our letter dated June 24, 1983, which transmitted a draft of tentative requirements for your disposal of wastes to Dominguez Channel and informed you that the Board would consider the requirements at its July 25, 1983, public hearing.

At that hearing, the Board continued the consideration of your tentative requirements to a future Board hearing. You will be sent a copy of the agenda notice prior to that hearing.

If you have any questions, please call us.

Very truly yours,

Raymond M. Hertel

RE: Waste Discharge Requirements - (NPDES No. CA0003085)

Gentlemen:

Reference is made to our letter dated June 24, 1983, which transmitted a draft of tentative requirements for your disposal of wastes to Dominguez Channel. Our letter dated August 1, 1983, informed you that the Board would consider your tentative requirements in a future Board hearing.

Revisions have been made to the tentative requirements. Enclosed is a copy of the revised tentative waste discharge requirements.

In accordance with administrative procedures, this Board at a public hearing to be held on November 28, 1983, at 10:00 a.m., 107 South Broadway, Room 1138, Los Angeles, California, will consider the revised tentative requirements and comments submitted in writing regarding any or all portions thereof. The Board will hear any testimony pertinent to this discharge and the tentative requirements. It is expected that the Board will take action at the hearing; however, as testimony indicates, the Board at its discretion may order further investigation.

Any comments that any person has with respect to this tentative Order must be received by November 14, 1983, in order to be included in the Board's agenda folder. However, comments received after that date will still be considered by this Board.

If you have any questions, please call us.

Very truly yours,

for RAYMOND M. HERTEL
Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD, LOS ANGELES REGION

ORDER NO. _____

NPDES NO. CA0003085

WASTE DISCHARGE REQUIREMENTS FOR AIR PRODUCTS AND CHEMICALS, INC.

The California Regional Water Quality Control Board, Los Angeles Region, finds:

1. Air Products and Chemicals, Inc. discharges wastes under waste discharge requirements contained in Order 78-53 (NPDES No. CA0003085) adopted by this Board on May 22, 1978.

2. Air Products and Chemicals, Inc. has filed a report of waste discharge and has applied for renewal of its waste discharge requirements and National Pollutant Discharge Elimination System permit.

3. Air Products and Chemicals, Inc. operates a liquid hydrogen production plant at 23320 South Alameda Street, Carson, California, and discharges up to 50,000 gallons per day of cooling tower bleed-off, boiler blowdown, and wash water from concrete-paved operating areas directly into Dominguez Channel, a water of the United States, at a point about 1,500 feet downstream from Alameda Street, within the tidal prism.

4. The Board adopted a revised Water Quality Control Plan for Los Angeles River Basin on March 27, 1978. The Plan contains water quality objectives for Dominguez Channel. The requirements contained in this Order as they are met will be in conformance with the goals of Water Quality Control Plan.

5. The beneficial uses of the receiving waters are non-contact recreation, preservation of rare and endangered species, marine habitat and saline water habitat.

6. Effluent limitation standards established pursuant to Section 301 of the Federal Water Pollution Control Act and amendments thereto are applicable to the discharge.

7. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21100) of the Division 13, of the Public Resources Code in accordance with Water Code Section 13389.

TENTATIVE

Revised 10/17/83
6/23/83

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Water Pollution Control Act, or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator, EPA, has no objections.

IT IS HEREBY ORDERED, that Air Products and Chemicals, Inc.,

in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Water Pollution Control Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. The discharge of an effluent in excess of the following limits is prohibited:

		Discharge Limitations	
Constituent	Unit	30-Day Average	Maximum
Suspended solids	mg/l	50	150
	lbs/day*	20.85	62.6
Settleable solids	ml/l	0.1	0.3
COD			
	lbs/day*	30.0	30.0
Oil and grease	mg/l	10	15
	lbs/day*	4.17	6.26

*Based on discharge flow of 50,000 gallons per day.

TENTATIVE

3. The daily discharge rate shall be obtained from the following calculation for any calendar day:

$$\text{Daily discharge rate} = \frac{8.34}{N} \sum_{1}^{N} Q_i C_i$$

in which N is the number of samples analyzed in any calendar day. Q_i and C_i are the flow rate (MGD) and the constituent concentration (mg/l) respectively, which are associated with each of the N grab samples which may be taken in any calendar day. If a composite sample is taken, C_i is the concentration measured in the composite sample and Q_i is the average flow rate occurring during the period over which samples are composited.

4. The 30-day average shall be the arithmetic average of all the daily values calculated using the results of analyses of all samples collected during any 30 consecutive calendar day period. If fewer than four samples are collected and analyzed during any 30 consecutive calendar day period, compliance with the 30-day average limitation shall not be determined.

5. The pH of wastes discharged shall at all times be within the range 6.0 to 9.0.

6. The temperature of wastes discharged shall not exceed 100°F.

7. Wastes discharged shall not contain visible oil or grease, and shall not cause the appearance of grease, oil or oily slick, or persistent foam in the receiving waters or on channel banks, walls, inverts or other structures.

8. Wastes discharged shall not cause the formation of sludge deposits.

9. Neither the disposal nor any handling of waste shall cause pollution or nuisance.

10. Wastes discharged shall not damage flood control structures or facilities.

11. This discharge shall not cause a violation of any applicable water quality standard for receiving waters adopted by the Regional Board or the State Water Resources Control Board as required by the Federal Water Pollution Control Act and regulations adopted thereunder. If more stringent applicable water quality standards are promulgated or approved pursuant to Section 303 of the Federal Water Pollution Control Act, or amendments thereto, the Board will revise and modify this Order in accordance with such more stringent standards.

12. Wastes discharged shall not contain any substances in concentrations toxic to human, animal, plant, or aquatic life.

13. Petroleum products, chemicals, and refuse and other wastes shall not be stored or placed where they will be picked up by rainfall and discharged to surface waters.

14. The waste discharge to watercourses or flood control channels shall not result in residual chlorine concentrations greater than 0.1 mg/l in the receiving waters at the point of discharge.

TENTATIVE

B. Provisions

1. This Order includes the following items of the attached "Standard Provisions": 1,2,4,5,6,7,8,9, and 11.

2. This Order includes the following items of the attached "Reporting Requirements": 1,5 and 8.

3. This Order includes the attached "General Monitoring and Reporting Provisions."

4. This Order expires on November 10, 1988, and the discharger must file a Report of Waste Discharge in accordance with Title 23, California Administrative Code, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.

5. A copy of these waste discharge specifications shall be maintained at the discharge facility so as to be available at all times to operating personnel.

6. In the event of any change in name, ownership, or control of these waste disposal facilities, the discharger shall notify this Board of such change and shall notify the succeeding owner or operator of the existence of this Order by letter, copy of which shall be forwarded to the Board.

7. Any discharge of wastes at any point(s) other than specifically described in this permit is prohibited, and constitutes a violation of the permit.

8. This order may be modified, or, alternatively, revoked and reissued, to comply with any applicable effluent limitation issued pursuant to the order the United States District Court for the District of Columbia issued on June 8, 1976, in Natural Resources Defense Council, Inc. et al. v. Russell E. Train, 8 ERC 2120 (D.D.C. 1976), if the effluent limitation so issued:

   (1) is different in conditions or more stringent than any effluent limitation in this order; or

   (2) controls any pollutant not limited in this order.

9. These requirements do not exempt the operator of this waste disposal facility from compliance with any other laws, regulations, or ordinances which may be applicable; they do not legalize this waste disposal facility, and they leave unaffected any further restraint on the disposal of wastes at this site which may be contained in other statutes or required by other agencies.

10. Order No. 78-53 adopted by this Board on May 22, 1978, is hereby rescinded.

TENTATIVE

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD CA 0003085

LOS ANGELES REGION

STANDARD PROVISIONS

TENTATIVE

1. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the discharger from his liabilities under federal, state, or local laws, nor guarantee the discharger a capacity right in the receiving waters.

2. The discharge of any radiological, chemical, or biological warfare agent or high level radiological waste is prohibited.

3. The discharger shall require any industrial user of the treatment works to comply with applicable service charges and toxic and pretreatment standards promulgated in accordance with Sections 204(b), 307, and 308 of the Federal Water Pollution Control Act or amendments thereto. The discharger shall require each individual user to submit periodic notice (over intervals not to exceed nine months) of progress toward compliance with applicable toxic and pretreatment standards developed pursuant to the Federal Water Pollution Control Act or amendments thereto. The discharger shall forward a copy of such notice to the Board and the Regional Administrator.

4. The discharger shall permit the Regional Board:

   (a) Entry upon premises in which an effluent source is located or in which any required records are kept;

   (b) Access to copy any records required to be kept under terms and conditions of this Order;

   (c) Inspection of monitoring equipment or records, and

   (d) Sampling of any discharge.

5. All discharges authorized by this Order shall be consistent with the terms and conditions of this Order. The discharge of any pollutant more frequently than or at a level in excess of that identified and authorized by this Order shall constitute a violation of the terms and conditions of this Order.

6. The discharger shall maintain in good working order and operate as efficiently as possible any facility or control system installed by the discharger to achieve compliance with the waste discharge requirements.

7. Collected screening, sludges, and other solids removed from liquid wastes shall be disposed of at a legal point of disposal, and in accordance with the provisions of Division 7.5 of the California Water Code. For the purpose of this requirement, a legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a regional water quality control board and which is in full compliance therewith.

8. After notice and opportunity for a hearing, this Order may be terminated or modified for cause, including, but not limited to:

   (a) Violation of any term or condition contained in this Order;

   (b) Obtaining this Order by misrepresentation, or failure to disclose all relevant facts;

   (c) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

9. If a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standards or prohibition) is established under Section 307(a) of the Federal Water Pollution Control Act, or amendments thereto, for a toxic pollutant which is present in the discharge authorized herein and such standard or prohibition is more stringent than any limitation upon such pollutant in this Order, the Board will revise or modify this Order in accordance with such toxic effluent standard or prohibition and so notify the discharger.

10. There shall be no discharge of harmful quantities of oil or hazardous substances, as specified by regulation adopted pursuant to Section 311 of the Federal Water Pollution Control Act, or amendments thereto.

11. In the event the discharger is unable to comply with any of the conditions of this Order due to:

   (a) breakdown of waste treatment equipment;

   (b) accidents caused by human error or negligence; or

   (c) other causes such as acts of nature,

   the discharger shall notify the Executive Officer by telephone as soon as he or his agents have knowledge of the incident and confirm this notification in writing within two weeks of the telephone notification. The written notification shall include pertinent information explaining reasons for the non-compliance and shall indicate what steps were taken to correct the problem and the dates thereof, and what steps are being taken to prevent the problem from recurring.

12. Supervisors and operators of publicly owned wastewater treatment plants shall possess a certificate of appropriate grade in accordance with regulations adopted by the State Water Resources Control Board.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD CA 0003085

LOS ANGELES REGION

TENTATIVE

REPORTING REQUIREMENTS

1. The discharger shall file with the Board technical reports on self-monitoring work performed according to the detailed specifications contained in any Monitoring and Reporting Programs as directed by the Executive Officer.

2. The discharger shall file a written report with the Board within 90 days after the average dry-weather waste flow for any month equals or exceeds 75 percent of the design capacity of his waste treatment and/or disposal facilities. The discharger's senior administrative officer shall sign a letter which transmits that report and certifies that the policy-making body is adequately informed about it. The report shall include:

   Average daily flow for the month, the date on which the instantantaneous peak flow occurred, the rate of that peak flow, and the total flow for that day.

   The discharger's best estimate of when the average daily dry-weather flow rate will equal or exceed the design capacity of his facilities.

   The discharger's intended schedule for studies, design, and other steps needed to provide additional capacity for his waste treatment and/or disposal facilities before the waste flow rate equals the capacity of present units. (Reference: Sections 13260, 13267(b), and 13268, California Water Code).

3. The discharger shall notify the Board not later than 120 days in advance of implementation of any plans to alter production capacity of the product line of the manufacturing, producing or processing facility by more than ten percent. Such notification shall include estimates of proposed production rate, the type of process, and projected effects on effluent quality. Notification shall include submittal of a new report of waste discharge and appropriate filing fee.

4. The discharger shall notify the Board of (a) new introduction into such works of pollutants from a source which would be a new source as defined in Section 306 of the Federal Water Pollution Control Act, or amendments thereto, if such source were discharging pollutants to the waters of the United States, (b) new introductions of pollutantsinto such works from a source which would be subject to Section 301 of the Federal Water Pollution Control Act, or amendments thereto, if substantial change in the volume or character of pollutants being introduced into such works by a source introducing pollutants into such works at the time the waste discharge requirements were adopted. Notice shall include a description of the quantity and quality of pollutants and the impact of such change on the substantial change in volume is considered an increase of ten percent in the mean dry-weather flow rate. The discharger shall forward a copy of such notice directly to the Regional Administrator.

5. The discharger shall file with the Board a report on waste discharge at least 120 days before making any material change or proposed change in the character, location or volume of the discharge.

6. This Board requires the discharger to file with the Board, within 90 days after the effective date of this Order, a technical report on his preventive (failsafe) and contingency (cleanup) plans for controlling accidental discharges, and for minimizing the effect of such events. The technical report should:

   Identify the possible sources of accidental loss, untreated waste bypass, and contaminated drainage. Loading and storage areas, power outage, waste treatment unit outage, and failure of process equipment, tanks and pipes should be considered.

   Evalulate the effectiveness of present facilities and procedures and state when they became operational.

   Describe facilities and procedures needed for effective preventive and contingency plans.

   Predict the effectiveness of the proposed facilities and procedures and provide an implementation schedule containing interim and final dates when they will be constructed, implemented, or operational. (Reference: Sections 13267(b) and 13268, California Water Code.

   This Board, after review of the technical report, may establish conditions which it deems necessary to control accidental discharges and to minimize the effects of such events. Such conditions may be incorporated as part of this Order, upon notice to the discharger.

7. The discharger shall submit to the Board, by January 30 of each year, an annual summary of the quantities of all chemicals, listed by both trade and chemical names, which are used for cooling and/or boiler water treatment and which are discharged.

8. The discharger shall submit to the Board, together with the first monitoring report required by this permit, a list of all chemicals and proprietary additives which could affect this waste discharge, including quantities of each. Any subsequent changes in types and/or quantities shall be reported promptly.

CA 0003085

TENTATIVE

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION

GENERAL MONITORING AND REPORTING PROVISIONS

GENERAL PROVISIONS FOR SAMPLING AND ANALYSIS

All sampling, sample preservation, and analyses shall be performed in accordance with the latest edition of "Guidelines Establishing Test Procedures for Analysis of Pollutants", promulgated by the United States Environmental Protection Agency.

All chemical, bacteriological, and bioassay analyses shall be conducted at a laboratory certified for such analyses by the State Department of Health.

Effluent samples shall be taken downstream of any addition to the treatment works and prior to mixing with the receiving waters.

The discharger shall calibrate and perform maintenance procedures on all monitoring instruments and equipment to insure accuracy of measurements, or shall insure that both activities will be conducted.

A grab sample is defined as an individual sample collected in fewer than 15 minutes.

A composite sample is defined as a combination of no fewer than eight individual samples obtained over the specified sampling period. The volume of each individual sample is proportional to the discharge flow rate at the time of sampling. The sampling period shall equal the discharge period, or 24 hours, whichever period is shorter.

GENERAL PROVISIONS FOR REPORTING

For every item where the requirements are not met, the discharger shall submit a statement of the actions undertaken or proposed which will bring the discharge into full compliance with requirements at the earliest time and submit a timetable for correction.

By January 30 of each year, the discharger shall submit an annual report to the Board. The report shall contain both tabular and graphical summaries of the monitoring data obtained during the previous year. In addition, the discharger shall discuss the compliance record and the corrective actions taken or planned which may be needed to bring the discharge into full compliance with the waste discharge requirements.

The discharger shall maintain all sampling and analytical results, including strip charts; date, exact place, and time of sampling; date analyses were performed; analyst's name; analytical techniques used; and results of all analyses. Such records shall be retained for a minimum of three years. This period of retention shall be extended during the course of any unresolved litigation regarding this discharge or when requested by the Board.

(Revised 8/1/75)

TENTATIVE

In reporting the monitoring data, the discharger shall arrange the data in tabular form so that the date, the constituents, and the concentrations are readily discernible. The data shall be summarized to demonstrate compliance with waste discharge requirements and, where applicable, shall include results of receiving water observations.

Monitoring reports shall be signed by:

a. In the case of corporations, by a principal executive officer at least of the level of vice-president or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which discharge originates;

b. In the case of a partnership, by a general partner;

c. In the case of a sole proprietorship, by the proprietor;

d. In the case of municipal, state or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.

Each report shall contain the following completed declaration:

"I declare under penalty of perjury that the foregoing is true and correct.

Executed on the _____ day of _____ at _____.

_____(Signature)

_____(Title)"

The discharger shall mail a copy of each monitoring report to the following:

California Regional Water Quality
Control Board - Los Angeles Region
107 South Broadway, Room 4027
Los Angeles, CA 90012

ATTN: Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION
MONITORING AND REPORTING PROGRAM NO. 5422

FOR

AIR PRODUCTS AND CHEMICALS, INC.
(CA0003085)

The discharger shall implement this monitoring program on the effective date of this Order. The first monitoring report under this program is due by January 15, 1984.

Monitoring reports shall be submitted by the dates in the following schedule:

Reporting Period	Report Due
January - March	April 15
April - June	July 15
July - September	October 15
October - December	January 15

If no flow occurred during the quarter the report shall so state.

Each monitoring report must affirm in writing that:

> All analyses were conducted at a laboratory certified for such analyses by the State Department of Health and in accordance with current EPA guideline procedures or as specified in the Monitoring Program.

For any analysis performed for which no procedure is specified in the EPA guidelines or in this Monitoring Program, the constituent or parameter analyzed and the method or procedure used must be specified in the report.

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent cab be obtained. The following shall constitute the effluent monitoring program:

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
pH	pH units	grab	quarterly
Temperature	^{o}F or ^{o}C	grab	monthly
Total waste flow	gal/day	-----	monthly
Suspended solids	mg/l	grab	quarterly
Settleable solids	ml/l	grab	quarterly

TENTATIVE

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
COD	lbs/day	grab	quarterly
Oil and grease	mg/l	grab	quarterly
Zinc*	mg/l	grab	quarterly

Receiving Water Monitoring

Receiving water sampling stations shall be established as following

RW 1 - 50 feet from the center of the outfall line in the direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

RW 2- 250 feet from the center of the outfall line in the direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

RW 3 - 250 feet from the center of the outfall line in the opposite direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the opposite direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

Receiving water samples shall be obtained during periods of discharge of cooling tower bleed-off. Samples shall be obtained within one foot of the surface.

The following shall constitute the receiving water monitoring program :

Constituent	Station	Units	Type of Sample	Minumum Frequency of Analysis
Residual chlorine	RW1,RW2,RW3	mg/l	grab	quarterly

* A statement that this constituent has not been added to the system may be submitted in lieu of analysis.

TENTATIVE

Demonstratio of Com liance with 30-day Average Limitations

For parameters where both 30-day average and maximum limits are specified but where the monit ring frequency is less than four times a month, the following procedure shall apply. Future analyses of two successive samples yield results greater than 90 of the maximum limit for a parameter, the sampling frequency for that parameter hall be increased (within one week of receiving the laboratory result on the second sample) to a minimum of once weekly until at least four consecutive weekly samples have been obtained and compliance with the 30-day average limit has been demonstrated again and the discharger has set forth for the approval of the Executive Officer a program which ensures future compliance with the 30-day average limit.

Hauling Reports

In the event wastes are transported to a different disposal site during the reporting period, the following shall be reported.

a. Types of wastes and quantity of each type;

b. Name and either the address or the state registration number for each hauler of wastes (or the methods of transport of other than by hauling); and

c. Location of the final points of disposal for each type of waste.

If no wastes are hauled offsite during the reporting period, a statement to that effect shall be submitted.

RE: Waste Discharge Requirements (NPDES Permit No. CA0003085)

Gentlemen:

Reference is made to our letter dated October 18, 1983, which transmitted a draft of tentative requirements for your disposal of wastes to Dominguez Channel.

Pursuant to Division 7 of the California Water Code, this California Regional Water Quality Control Board, at a public hearing held on November 28, 1983, reviewed these tentative requirements, considered all factors in the case, and adopted Order No. 83-66 (copy attached) relative to this waste discharge. This Order serves as a permit under the National Pollutant Discharge Elimination System, and expires November 10, 1988. Please note that you must file an application for a new permit at least 180 days in advance of that date.

You are required to implement the new monitoring program as stated in the Monitoring and Reporting Program on the effective date of this Order. Please note that ny monitoring report due under your previous Monitoring and Reporting Program is still required and must be submitted by the due date. Please reference all technical and monitoring reports to our Compliance File No. 5422. We would appreciate it if you would not combine other reports, such as progress or technical reports, with your monitoring reports but would submit each type of report as a separate document.

Very truly yours,

JESSE M. DIAZ
Acting Executive Officer

ORDER NO. 83-66

NPDES NO. CA0003085

WASTE DISCHARGE REQUIREMENTS FOR AIR PRODUCTS AND CHEMICALS, INC.

The California Regional Water Quality Control Board, Los Angeles Region, finds:

1. Air Products and Chemicals, Inc. discharges wastes under waste discharge requirements contained in Order 78-53 (NPDES No. CA0003085) adopted by this Board on May 22, 1978.

2. Air Products and Chemicals, Inc. has filed a report of waste discharge and has applied for renewal of its waste discharge requirements and National Pollutant Discharge Elimination System permit.

3. Air Products and Chemicals, Inc. operates a liquid hydrogen production plant at 23320 South Alameda Street, Carson, California, and discharges up to 50,000 gallons per day of cooling tower bleed-off, boiler blowdown, and wash water from concrete-paved operating areas directly into Dominguez Channel, a water of the United States, at a point about 1,500 feet downstream from Alameda Street, within the tidal prism.

4. The Board adopted a revised Water Quality Control Plan for Los Angeles River Basin on March 27, 1978. The Plan contains water quality objectives for Dominguez Channel. The requirements contained in this Order as they are met will be in conformance with the goals of Water Quality Control Plan.

5. The beneficial uses of the receiving waters are non-contact recreation, preservation of rare and endangered species, marine habitat and saline water habitat.

6. Effluent limitation standards established pursuant to Section 301 of the Federal Water Pollution Control Act and amendments thereto are applicable to the discharge.

7. The issuance of waste discharge requirements for this discharge is exempt from the provisions of Chapter 3 (commencing with Section 21100) of the Division 13, of the Public Resources Code in accordance with Water Code Section 13389.

Revised 10/17/83
6/23/83

The Board has notified the discharger and interested agencies and persons of its intent to prescribe waste discharge requirements for this discharge and has provided them with an opportunity to submit their written views and recommendations.

The Board in a public hearing heard and considered all comments pertaining to the discharge and to the tentative requirements.

This Order shall serve as a National Pollutant Discharge Elimination System permit pursuant to Section 402 of the Federal Water Pollution Control Act, or amendments thereto, and shall take effect at the end of ten days from the date of its adoption, provided the Regional Administrator, EPA, has no objections.

IT IS HEREBY ORDERED, that Air Products and Chemicals, Inc.,

in order to meet the provisions contained in Division 7 of the California Water Code and regulations adopted thereunder, and the provisions of the Federal Water Pollution Control Act and regulations and guidelines adopted thereunder, shall comply with the following:

A. Effluent Limitations

1. The discharge of an effluent in excess of the following limits is prohibited:

		Discharge Limitations	
Constituent	Unit	30-Day Average	Maximum
Suspended solids	mg/l	50	150
	lbs/day*	20.85	62.6
Settleable solids	ml/l	0.1	0.3
COD			
	lbs/day*	30.0	30.0
Oil and grease	mg/l	10	15
	lbs/day*	4.17	6.26

*Based on discharge flow of 50,000 gallons per day.

3. The daily discharge rate shall be obtained from the following calculation for any calendar day:

$$\text{Daily discharge rate} = \frac{8.34}{N} \sum_{1}^{N} Q_i C_i$$

in which N is the number of samples analyzed in any calendar day. Q_i and C_i are the flow rate (MGD) and the constituent concentration (mg/l) respectively, which are associated with each of the N grab samples which may be taken in any calendar day. If a composite sample is taken, C_i is the concentration measured in the composite sample and Q_i is the average flow rate occurring during the period over which samples are composited.

4. The 30-day average shall be the arithmetic average of all the daily values calculated using the results of analyses of all samples collected during any 30 consecutive calendar day period. If fewer than four samples are collected and analyzed during any 30 consecutive calendar day period, compliance with the 30-day average limitation shall not be determined.

5. The pH of wastes discharged shall at all times be within the range 6.0 to 9.0.

6. The temperature of wastes discharged shall not exceed 100°F.

7. Wastes discharged shall not contain visible oil or grease, and shall not cause the appearance of grease, oil or oily slick, or persistent foam in the receiving waters or on channel banks, walls, inverts or other structures.

8. Wastes discharged shall not cause the formation of sludge deposits.

9. Neither the disposal nor any handling of waste shall cause pollution or nuisance.

10. Wastes discharged shall not damage flood control structures or facilities.

11. This discharge shall not cause a violation of any applicable water quality standard for receiving waters adopted by the Regional Board or the State Water Resources Control Board as required by the Federal Water Pollution Control Act and regulations adopted thereunder. If more stringent applicable water quality standards are promulgated or approved pursuant to Section 303 of the Federal Water Pollution Control Act, or amendments thereto, the Board will revise and modify this Order in accordance with such more stringent standards.

12. Wastes discharged shall not contain any substances in concentrations toxic to human, animal, plant, or aquatic life.

13. Petroleum products, chemicals, and refuse and other wastes shall not be stored or placed where they will be picked up by rainfall and discharged to surface waters.

14. The waste discharge to watercourses or flood control channels shall not result in residual chlorine concentrations greater than 0.1 mg/l in the receiving waters at the point of discharge.

B. Provisions

1. This Order includes the following items of the attached "Standard Provisions": 1,2,4,5,6,7,8,9, and 11.

2. This Order includes the following items of the attached "Reporting Requirements": 1,5 and 8.

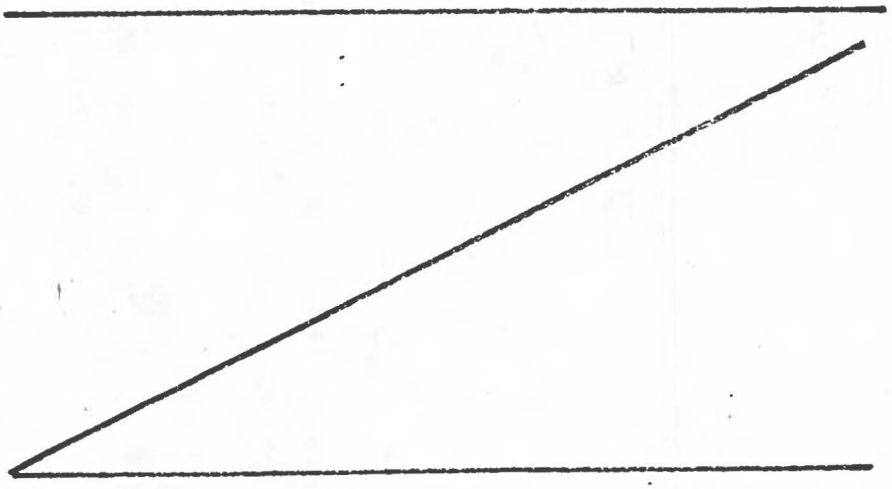
3. This Order includes the attached "General Monitoring and Reporting Provisions."

4. This Order expires on November 10, 1988, and the discharger must file a Report of Waste Discharge in accordance with Title 23, California Administrative Code, not later than 180 days in advance of such date as application for issuance of new waste discharge requirements.

5. A copy of these waste discharge specifications shall be maintained at the discharge facility so as to be available at all times to operating personnel.

6. In the event of any change in name, ownership, or control of these waste disposal facilities, the discharger shall notify this Board of such change and shall notify the succeeding owner or operator of the existence of this Order by letter, copy of which shall be forwarded to the Board.

7. Any discharge of wastes at any point(s) other than specifically described in this permit is prohibited, and constitutes a violation of the permit.



8. This order may be modified, or, alternatively, revoked and reissued, to comply with any applicable effluent limitation issued pursuant to the order the United States District Court for the District of Columbia issued on June 8, 1976, in Natural Resources Defense Council, Inc. et al. v. Russell E. Train, 8 ERC 2120 (D.D.C. 1976), if the effluent limitation so issued:

   (1) is different in conditions or more stringent than any effluent limitation in this order; or

   (2) controls any pollutant not limited in this order.

9. These requirements do not exempt the operator of this waste disposal facility from compliance with any other laws, regulations, or ordinances which may be applicable; they do not legalize this waste disposal facility, and they leave unaffected any further restraint on the disposal of wastes at this site which may be contained in other statutes or required by other agencies.

10. Order No. 78-53 adopted by this Board on May 22, 1978, is hereby rescinded.

I, Jesse M. Diaz, Acting Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Los Angeles, on November 28, 1983.

JESSE M. DIAZ, Acting Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

STANDARD PROVISIONS CA 0003085

1. The requirements prescribed herein do not authorize the commission of any act causing injury to the property of another, nor protect the discharger from his liabilities under federal, state, or local laws, nor guarantee the discharger a capacity right in the receiving waters.

2. The discharge of any radiological, chemical, or biological warfare agent or high level radiological waste is prohibited.

3. The discharger shall require any industrial user of the treatment works to comply with applicable service charges and toxic and pretreatment standards promulgated in accordance with Sections 204(b), 307, and 308 of the Federal Water Pollution Control Act or amendments thereto. The discharger shall require each individual user to submit periodic notice (over intervals not to exceed nine months) of progress toward compliance with applicable toxic and pretreatment standards developed pursuant to the Federal Water Pollution Control Act or amendments thereto. The discharger shall forward a copy of such notice to the Board and the Regional Administrator.

4. The discharger shall permit the Regional Board:

   (a) Entry upon premises in which an effluent source is located or in which any required records are kept;

   (b) Access to copy any records required to be kept under terms and conditions of this Order;

   (c) Inspection of monitoring equipment or records, and

   (d) Sampling of any discharge.

5. All discharges authorized by this Order shall be consistent with the terms and conditions of this Order. The discharge of any pollutant more frequently than or at a level in excess of that identified and authorized by this Order shall constitute a violation of the terms and conditions of this Order.

6. The discharger shall maintain in good working order and operate as efficiently as possible any facility or control system installed by the discharger to achieve compliance with the waste discharge requirements.

7. Collected screening, sludges, and other solids removed from liquid wastes shall be disposed of at a legal point of disposal, and in accordance with the provisions of Division 7.5 of the California Water Code. For the purpose of this requirement, a legal point of disposal is defined as one for which waste discharge requirements have been prescribed by a regional water quality control board and which is in full compliance therewith.

8. After notice and opportunity for a hearing, this Order may be terminated or modified for cause, including, but not limited to:

   (a) Violation of any term or condition contained in this Order;

   (b) Obtaining this Order by misrepresentation, or failure to disclose all relevant facts;

   (c) A change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge.

9. If a toxic effluent standard or prohibition (including any schedule of compliance specified in such effluent standards or prohibition) is established under Section 307(a) of the Federal Water Pollution Control Act, or amendments thereto, for a toxic pollutant which is present in the discharge authorized herein and such standard or prohibition is more stringent than any limitation upon such pollutant in this Order, the Board will revise or modify this Order in accordance with such toxic effluent standard or prohibition and so notify the discharger.

10. There shall be no discharge of harmful quantities of oil or hazardous substances, as specified by regulation adopted pursuant to Section 311 of the Federal Water Pollution Control Act, or amendments thereto.

11. In the event the discharger is unable to comply with any of the conditions of this Order due to:

   (a) breakdown of waste treatment equipment;

   (b) accidents caused by human error or negligence; or

   (c) other causes such as acts of nature,

   the discharger shall notify the Executive Officer by telephone as soon as he or his agents have knowledge of the incident and confirm this notification in writing within two weeks of the telephone notification. The written notification shall include pertinent information explaining reasons for the non-compliance and shall indicate what steps were taken to correct the problem and the dates thereof, and what steps are being taken to prevent the problem from recurring.

12. Supervisors and operators of publicly owned wastewater treatment plants shall possess a certificate of appropriate grade in accordance with regulations adopted by the State Water Resources Control Board.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD

LOS ANGELES REGION

CA 0003085

REPORTING REQUIREMENTS

1. The discharger shall file with the Board technical reports on self-monitoring work performed according to the detailed specifications contained in any Monitoring and Reporting Programs as directed by the Executive Officer.

2. The discharger shall file a written report with the Board within 90 days after the average dry-weather waste flow for any month equals or exceeds 75 percent of the design capacity of his waste treatment and/or disposal facilities. The discharger's senior administrative officer shall sign a letter which transmits that report and certifies that the policy-making body is adequately informed about it. The report shall include:

   Average daily flow for the month, the date on which the instantantaneous peak flow occurred, the rate of that peak flow, and the total flow for that day.

   The discharger's best estimate of when the average daily dry-weather flow rate will equal or exceed the design capacity of his facilities.

   The discharger's intended schedule for studies, design, and other steps needed to provide additional capacity for his waste treatment and/or disposal facilities before the waste flow rate equals the capacity of present units. (Reference: Sections 13260, 13267(b), and 13268, California Water Code).

3. The discharger shall notify the Board not later than 120 days in advance of implementation of any plans to alter production capacity of the product line of the manufacturing, producing or processing facility by more than ten percent. Such notification shall include estimates of proposed production rate, the type of process, and projected effects on effluent quality. Notification shall include submittal of a new report of waste discharge and appropriate filing fee.

4. The discharger shall notify the Board of (a) new introduction into such works of pollutants from a source which would be a new source as defined in Section 306 of the Federal Water Pollution Control Act, or amendments thereto, if such source were discharging pollutants to the waters of the United States, (b) new introductions of pollutantsinto such works from a source which would be subject to Section 301 of the Federal Water Pollution Control Act, or amendments thereto, if substantial change in the volume or character of pollutants being introduced into such works by a source introducing pollutants into such works at the time the waste discharge requirements were adopted. Notice shall include a description of the quantity and quality of pollutants and the impact of such change on the substantial change in volume is considered an increase of ten percent in the mean dry-weather flow rate. The discharger shall forward a copy of such notice directly to the Regional Administrator.

5. The discharger shall file with the Board a report on waste discharge at least 120 days before making any material change or proposed change in the character, location or volume of the discharge.

6. This Board requires the discharger to file with the Board, within 90 days after the effective date of this Order, a technical report on his preventive (failsafe) and contingency (cleanup) plans for controlling accidental discharges, and for minimizing the effect of such events. The technical report should:

   Identify the possible sources of accidental loss, untreated waste bypass, and contaminated drainage. Loading and storage areas, power outage, waste treatment unit outage, and failure of process equipment, tanks and pipes should be considered.

   Evalulate the effectiveness of present facilities and procedures and state when they became operational.

   Describe facilities and procedures needed for effective preventive and contingency plans.

   Predict the effectiveness of the proposed facilities and procedures and provide an implementation schedule containing interim and final dates when they will be constructed, implemented, or operational. (Reference: Sections 13267(b) and 13268, California Water Code.

   This Board, after review of the technical report, may establish conditions which it deems necessary to control accidental discharges and to minimize the effects of such events. Such conditions may be incorporated as part of this Order, upon notice to the discharger.

7. The discharger shall submit to the Board, by January 30 of each year, an annual summary of the quantities of all chemicals, listed by both trade and chemical names, which are used for cooling and/or boiler water treatment and which are discharged.

8. The discharger shall submit to the Board, together with the first monitoring report required by this permit, a list of all chemicals and proprietary additives which could affect this waste discharge, including quantities of each. Any subsequent changes in types and/or quantities shall be reported promptly.

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION

GENERAL MONITORING AND REPORTING PROVISIONS CA 0003085

GENERAL PROVISIONS FOR SAMPLING AND ANALYSIS

All sampling, sample preservation, and analyses shall be performed in accordance with the latest edition of "Guidelines Establishing Test Procedures for Analysis of Pollutants", promulgated by the United States Environmental Protection Agency.

All chemical, bacteriological, and bioassay analyses shall be conducted at a laboratory certified for such analyses by the State Department of Health.

Effluent samples shall be taken downstream of any addition to the treatment works and prior to mixing with the receiving waters.

The discharger shall calibrate and perform maintenance procedures on all monitoring instruments and equipment to insure accuracy of measurements, or shall insure that both activities will be conducted.

A grab sample is defined as an individual sample collected in fewer than 15 minutes.

A composite sample is defined as a combination of no fewer than eight individual samples obtained over the specified sampling period. The volume of each individual sample is proportional to the discharge flow rate at the time of sampling. The sampling period shall equal the discharge period, or 24 hours, whichever period is shorter.

GENERAL PROVISIONS FOR REPORTING

For every item where the requirements are not met, the discharger shall submit a statement of the actions undertaken or proposed which will bring the discharge into full compliance with requirements at the earliest time and submit a timetable for correction.

By January 30 of each year, the discharger shall submit an annual report to the Board. The report shall contain both tabular and graphical summaries of the monitoring data obtained during the previous year. In addition, the discharger shall discuss the compliance record and the corrective actions taken or planned which may be needed to bring the discharge into full compliance with the waste discharge requirements.

The discharger shall maintain all sampling and analytical results, including strip charts; date, exact place, and time of sampling; date analyses were performed; analyst's name, analytical techniques used; and results of all analyses. Such records shall be retained for a minimum of three years. This period of retention shall be extended during the course of any unresolved litigation regarding this discharge or when requested by the Board.

(Revised 9/19/77)

In reporting the monitoring data, the discharger shall arrange the data in tabular form so that the date, the constituents, and the concentrations are readily discernible. The data shall be summarized to demonstrate compliance with waste discharge requirements and, where applicable, shall include results of receiving water observations.

Monitoring reports shall be signed by:

a. In the case of corporations, by a principal executive officer at least of the level of vice-president or his duly authorized representative, if such representative is responsible for the overall operation of the facility from which discharge originates;

b. In the case of a partnership, by a general partner;

c. In the case of a sole proprietorship, by the proprietor;

d. In the case of municipal, state or other public facility, by either a principal executive officer, ranking elected official, or other duly authorized employee.

Each report shall contain the following completed declaration:

"I declare under penalty of perjury that the foregoing is true and correct.

Executed on the _____ day of _____ at _____.

_____(Signature)

_____(Title)"

The discharger shall mail a copy of each monitoring report to the following:

California Regional Water Quality
Control Board - Los Angeles Region
107 South Broadway, Room 4027
Los Angeles, CA 90012

ATTN: Executive Officer

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
LOS ANGELES REGION
MONITORING AND REPORTING PROGRAM NO. 5422

FOR

AIR PRODUCTS AND CHEMICALS, INC.
(CA0003085)

The discharger shall implement this monitoring program on the effective date of this Order. The first monitoring report under this program is due by January 15, 1984.

Monitoring reports shall be submitted by the dates in the following schedule:

Reporting Period	Report Due
January - March	April 15
April - June	July 15
July - September	October 15
October - December	January 15

If no flow occurred during the quarter the report shall so state.

Each monitoring report must affirm in writing that:

> All analyses were conducted at a laboratory certified for such analyses by the State Department of Health and in accordance with current EPA guideline procedures or as specified in the Monitoring Program.

For any analysis performed for which no procedure is specified in the EPA guidelines or in this Monitoring Program, the constituent or parameter analyzed and the method or procedure used must be specified in the report.

Effluent Monitoring

A sampling station shall be established for each point of discharge and shall be located where representative samples of that effluent cab be obtained. The following shall constitute the effluent monitoring program:

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
pH	pH units	grab	quarterly
Temperature	^{o}F or ^{o}C	grab	monthly
Total waste flow	gal/day	-----	monthly
Suspended solids	mg/l	grab	quarterly
Settleable solids	ml/l	grab	quarterly

Constituent	Units	Type of Sample	Minimum Frequency of Analysis
COD	lbs/day	grab	quarterly
Oil and grease	mg/l	grab	quarterly
Zinc*	mg/l	grab	quarterly

Receiving Water Monitoring

Receiving water sampling stations shall be established as following

RW 1 - 50 feet from the center of the outfall line in the direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

RW 2- 250 feet from the center of the outfall line in the direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

RW 3 - 250 feet from the center of the outfall line in the opposite direction of tidal flow at the time of sampling. If sampled at slack tide, this station shall be in the opposite direction where the channel waters have been influenced by the discharge. Samples may be taken from the shore if representative.

Receiving water samples shall be obtained during periods of discharge of cooling tower bleed-off. Samples shall be obtained within one foot of the surface.

The following shall constitute the receiving water monitoring program :

Constituent	Station	Units	Type of Sample	Minumum Frequency of Analysis
Residual chlorine	RW1,RW2,RW3	mg/l	grab	quarterly

* A statement that this constituent has not been added to the system may be submitted in lieu of analysis.

Demonstration of Compliance with 30-day Average Limitations

For parameters where both 30-day average and maximum limits are specified but where the monitoring frequency is less than four times a month, the following procedure shall apply. Future analyses of two successive samples yield results greater than 90% of the maximum limit for a parameter, the sampling frequency for that parameter shall be increased (within one week of receiving the laboratory result on the second sample) to a minimum of once weekly until at least four consecutive weekly samples have been obtained and compliance with the 30-day average limit has been demonstrated again and the discharger has set forth for the approval of the Executive Officer a program which ensures future compliance with the 30-day average limit.

Hauling Reports

In the event wastes are transported to a different disposal site during the reporting period, the following shall be reported.

a. Types of wastes and quantity of each type;

b. Name and either the address or the state registration number for each hauler of wastes (or the methods of transport of other than by hauling); and

c. Location of the final points of disposal for each type of waste.

If no wastes are hauled offsite during the reporting period, a statement to that effect shall be submitted.

Carson, CA 90810

Dear Mr. Buelow:

GROUNDWATER PROTECTION PROGRAM
AIR PRODUCTS MFG. CORP.
23320 S. ALAMEDA ST., CARSON

In order to increase awareness of groundwater pollution problems in Los Angeles County, the Los Angeles County Department of Public Works (LACDPW) is working in conjunction with the United States Environmental Protection Agency (USEPA), to develop a site specific groundwater protection program. The program will apply to all commercial and industrial facilities which discharge, deposit, or dispose of industrial wastewater into the ground or private disposal systems, such as a leach field.

The role of LACDPW will be the investigation of such facilities and may result in required permitting, monitoring and/or closure of certain facilities. The objective of this program is the elimination of facilities which may be a source of pollutants in groundwater supplies. In addition, the LACDPW is implementing an educational program for operators to become familiar with Best Management Practices (BMP), aimed at protecting groundwater.

Enclosed is a series of informational brochures regarding proper handling of waste material at your facility. As part of this program, LACDPW is forwarding these brochures to you in order to increase environmental awareness and provide information which may be useful in your everyday activities.

We appreciate the opportunity to provide you with the enclosed information.

Should you have any questions regarding this matter please contact Ms. Nardy Drew of this office at (626) 458-3511, Monday through Thursday, from 7:00 a.m. to 5:30 p.m.

Very truly your,

HARRY W. STONE

EXECUTIVE SUMMARY

The Air Products and Chemicals, Inc. (APCI) site is located at 23320 South Alameda Street in Carson, California, which is bordered by an Atlantic Richfield Company (ARCO) coke facility to the south, Alameda Street and ARCO refinery to the west, a Texaco sulfur recovery plant to the north and Dominguez Channel to the east.

APCI leased the property from ARCO in 1962 to build a cryogenic hydrogen plant. APCI began manufacturing liquid hydrogen at the site in January 1963 and continued this operation until December 1967. APCI re-initiated the production of liquid hydrogen at the plant in January 1972 and continued to operate until March 1986. The plant had been closed for more than 6 years when the demolition of the H_2 plant began in May 1992.

The objective of this H_2 Plant Demolition Project was to consolidate APCI leased land to the minimum space required by the Specialty Gas Division operations at the Alameda Street location in order to reduce the lease costs. The Specialty Gas Division Facility occupies about 5 acres, which are bordering along the Southwestern portion of the property. The remaining 13.5 acres in the northern and eastern portions of the existing leased area accommodated the PSG H_2 Plant and a Cryogenic Vessel Repair Shop. The dismantlement and consolidation work was accomplished in two phases. Phase 1 involved the removal of two large hydrogen storage spheres and the disposal of hazardous materials and wastes throughout the H_2 plant. Completion of Phase 1 enabled APCI to vacate approximately 8 acres of land where the two H_2 spheres and rear truck parking area were located. Phase 2 involved equipment and building demolition in the hydrogen process area. The demolition project was completed in May 1993.

Two preliminary site assessments and a field investigation were conducted, under CERCLA authority, by the EPA. On March 26, 1991, the site screening inspection report discounted two small accidental discharges of hydrocarbons to the Dominguez Channel and instead emphasized potential landfill activities reported to have occurred on-site prior to 1962. On April 11, 1991, EPA recommended that no further remedial action needed to be taken, and has since terminated its interest in the APCI site.

During plant demolition, care was exercised by APCI regarding the resolution of environmental matters. This included such issues as hazardous material and wastes handling/disposal, underground storage tank removal, potassium permanganate scrubber area cleanup, septic tank and leachfield area investigation, and oil/water separator cleanout.

There remains, however, a hydrocarbon soil contamination problem which was discovered in the hydrogen purification area during demolition in November, 1992. The source of this gasoline/diesel like hydrocarbon release is now believed to be the former aboveground diesel and hydrocarbon condensate storage tanks previously located in the Purification Process Area.

In February 1993, a soil gas survey was conducted by Target Environmental in order to determine the extent of the soil contamination. Based on this survey, 19 soil borings were performed by APCI's contractor, IT Corp., in March and May 1993 (See Figures 7 & 8). Using the results from field OVA tests, the soil gas survey, and the borehole sample results, IT Corp. determined the lateral and vertical extent of the contamination at the APCI site (See Figures 9 and 10). The extent of the contamination is approximately 200 feet in the east-west direction, and is approximately 300 feet in the north-south direction. The contamination is approximately 5 feet deep on the extreme boundary and progressively deeper toward the center of the purification area to a maximum of 30 feet deep.

IT Corp. has recommended the use of in-situ soil vapor extraction technology to remediate the volatile fraction of this hydrocarbon condensate contamination, followed by excavation and transport to an off-site asphalt manufacturing plant for the remaining non-volatile fraction. Probable cost and duration of the cleanup is estimated to be approximately 1.8 million dollars over a duration of 1-2 years.

3.0 REVIEW OF ENVIRONMENTAL ISSUES

3.1 Valid Permits for Plant Operations

The APCI H_2 Plant (SIC 2813) is located in the heavy manufacturing zone in the City of Carson. While operating in the periods from 1/63 to 12/67 and from 1/72 to 3/86, the H_2 plant possessed valid operating permits from appropriate agencies for its air emissions and wastewater discharges as follows:

Air Pollution

Air Permits/Registration

SCAQMD Facility ID #003417

Permit #D01586	Hydrogen Manufacturing
P-00784	Boiler #1
P-00785	Boiler #2
P-01714	Flare
P-01837	Hydrogen Storage Tank
P-01838	H2S04 Adsorption System

Water Pollution

15 Apr63	LA County Permit #3113
Feb68	State Permit Resolution #68-4
28Nov74	CA RWQCB NPDES #CA0003085
22May78	Renewed CA0003085
28Nov83	Renewed CA0003085
28Nov88	Rescinded CA0003085

3.2 Accidental Spills and Releases

3.2.1 Small Spills to Dominguez Channel

There were three incidents involving small discharges to the Dominguez Channel as follows:

* On 24 May 1972, - RWQCB noted calcium carbonate deposits at 001 outfall but incorrectly referred to it as sludge deposits/disposal of waste

Westminster, CA 92683

EXECUTIVE SUMMARY

The Air Products and Chemicals, Inc. (APCI) site is located at 23320 South Alameda Street in Carson, California, which is bordered by an Atlantic Richfield Company (ARCO) coke facility to the south, Alameda Street and ARCO refinery to the west, a Texaco sulfur recovery plant to the north and Dominguez Channel to the east.

APCI leased the property from ARCO in 1962 to build a cryogenic hydrogen plant. APCI began manufacturing liquid hydrogen at the site in January 1963 and continued this operation until December 1967. APCI re-initiated the production of liquid hydrogen at the plant in January 1972 and continued to operate until March 1986. The plant had been closed for more than 6 years when the demolition of the H_2 plant began in May 1992.

The objective of this H_2 Plant Demolition Project was to consolidate APCI leased land to the minimum space required by the Specialty Gas Division operations at the Alameda Street location in order to reduce the lease costs. The Specialty Gas Division Facility occupies about 5 acres, which are bordering along the Southwestern portion of the property. The remaining 13.5 acres in the northern and eastern portions of the existing leased area accommodated the PSG H_2 Plant and a Cryogenic Vessel Repair Shop. The dismantlement and consolidation work was accomplished in two phases. Phase 1 involved the removal of two large hydrogen storage spheres and the disposal of hazardous materials and wastes throughout the H_2 plant. Completion of Phase 1 enabled APCI to vacate approximately 8 acres of land where the two H_2 spheres and rear truck parking area were located. Phase 2 involved equipment and building demolition in the hydrogen process area. The demolition project was completed in May 1993.

Two preliminary site assessments and a field investigation were conducted, under CERCLA authority, by the EPA. On March 26, 1991, the site screening inspection report discounted two small accidental discharges of hydrocarbons to the Dominguez Channel and instead emphasized potential landfill activities reported to have occurred on-site prior to 1962. On April 11, 1991, EPA recommended that no further remedial action needed to be taken, and has since terminated its interest in the APCI site.

During plant demolition, care was exercised by APCI regarding the resolution of environmental matters. This included such issues as hazardous material and wastes handling/disposal, underground storage tank removal, potassium permanganate scrubber area cleanup, septic tank and leachfield area investigation, and oil/water separator cleanout.

There remains, however, a hydrocarbon soil contamination problem which was discovered in the hydrogen purification area during demolition in November, 1992. The source of this gasoline/diesel like hydrocarbon release is now believed to be the former aboveground diesel and hydrocarbon condensate storage tanks previously located in the Purification Process Area.

In February 1993, a soil gas survey was conducted by Target Environmental in order to determine the extent of the soil contamination. Based on this survey, 19 soil borings were performed by APCI's contractor, IT Corp., in March and May 1993 (See Figures 7 & 8). Using the results from field OVA tests, the soil gas survey, and the borehole sample results, IT Corp. determined the lateral and vertical extent of the contamination at the APCI site (See Figures 9 and 10). The extent of the contamination is approximately 200 feet in the east-west direction, and is approximately 300 feet in the north-south direction. The contamination is approximately 5 feet deep on the extreme boundary and progressively deeper toward the center of the purification area to a maximum of 30 feet deep.

IT Corp. has recommended the use of in-situ soil vapor extraction technology to remediate the volatile fraction of this hydrocarbon condensate contamination, followed by excavation and transport to an off-site asphalt manufacturing plant for the remaining non-volatile fraction. Probable cost and duration of the cleanup is estimated to be approximately 1.8 million dollars over a duration of 1-2 years.

3.0 REVIEW OF ENVIRONMENTAL ISSUES

3.1 Valid Permits for Plant Operations

The APCI H_2 Plant (SIC 2813) is located in the heavy manufacturing zone in the City of Carson. While operating in the periods from 1/63 to 12/67 and from 1/72 to 3/86, the H_2 plant possessed valid operating permits from appropriate agencies for its air emissions and wastewater discharges as follows:

Air Pollution

Air Permits/Registration
SCAQMD Facility ID #003417
Permit #D01586 Hydrogen Manufacturing

P-00784	Boiler #1
P-00785	Boiler #2
P-01714	Flare
P-01837	Hydrogen Storage Tank
P-01838	H2S04 Adsorption System

Water Pollution

15 Apr63	LA County Permit #3113
Feb68	State Permit Resolution #68-4
28Nov74	CA RWQCB NPDES #CA0003085
22May78	Renewed CA0003085
28Nov83	Renewed CA0003085
28Nov88	Rescinded CA0003085

3.2 Accidental Spills and Releases

3.2.1 Small Spills to Dominguez Channel

There were three incidents involving small discharges to the Dominguez Channel as follows:

* On 24 May 1972, - RWQCB noted calcium carbonate deposits at 001 outfall but incorrectly referred to it as sludge deposits/disposal of waste

COUNTY OF LOS ANGELES

INSTRUCTIONS

HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (HMUSP)
PERMIT APPLICATION SUPPLEMENT

DO NOT USE THIS FORM FOR CLOSURE, TRANSFER OR RENEWAL OF AN EXISTING HMUSP

(A) Facility name, mailing address and facility address on new permit applications must correspond with information on Part II of the State Permit Application (SPA) form. Please correct mailing label information if affixed for an existing facility.

(B) Use a separate application supplement for each permit activity. Check the new construction box only if there are no existing tanks and no previous HMUSP has been issued for this facility. Additional approval applications must be accompanied by a description of work and four (4) sets of plans and specifications as appropriate. Additional approval requests that change data previously supplied on Parts IV through VIII of the Hazardous Substance Storage Statement (HSSS) as filed with the California Water Resources Control Board or the SPA as filed with a County of Los Angeles HMUSP application shall include an updated SPA. The container number on the updated SPA must correspond with the previous number submitted.

(C) Assessor parcel identification is required for new permit applications at existing facilities and new construction (no existing HMUSP) applications only.

(D) The information required in Part D is the minimum necessary to allow issuance of a Provisional HMUSP. When a Provisional HMUSP has been issued for a facility, the owner will be required to submit for review and approval a facility plot plan, Leak Detection Program (LDP) and a Tank Monitoring Program (TMP) to be implemented in accordance with a timetable to be included within the Provisional HMUSP as conditions and limitations. New construction plans and specifications must show the location of and include details of all containers and monitoring devices proposed. A TMP must be approved and implemented prior to the issuance of a full term HMUSP.

(E) A HMUSP application fee must accompany all applications. The state surcharge is required for first time HMUSP applications (not required for additional approvals). Specify the number of tanks at the facility.

(F) Persons that have been notified to file for a HMUSP and do not store any hazardous materials underground should check the appropriate box and return this form to avoid any unnecessary follow-up mailings.

The storage of hazardous waste in an underground tank where the specific tank is named in a hazardous waste facility permit issued by the California Department of Health Services is not subject to the HMUSP requirements. Owners of such facilities must furnish the permit number for facilities where this exclusion is requested.

Final interceptors in industrial waste pretreatment systems, catch basins, refinery pipelines, lagoons, stormdrains, oil field gathering lines, well cellars, above ground storage tank spill containment, unlined pits or sumps, and piping not directly associated with a permitted facility are not subject to a HMUSP.

(G) Existing facility and new construction HMUSP application supplements and SPA's must be signed by:

1) A principal executive officer at the level of vice-president or by an authorized representitive. The representitive must be responsible for the overall operation of the facility where the tank(s) are located.
2) A general partner proprietor.
3) A principal executive officer, ranking elected official or authorized representitive of a public agency.

Additional approval application supplements may be signed by a person under contract to and authorized by the owner/operator of a facility.

Official Registration Form

California Water Resources Control Board

Hazardous Substance Storage Statement

Who Must File: Each person storing hazardous substances in any underground container must file this form no later than July 1, 1984 (After October 1, 1984 and no later than January 1, 1985 for tanks used on farms).

Definition of Underground Containers: The law applies to "concrete sumps, nonvaulted buried tanks or other underground containers." (Water Code section 13173) All containers, including earthen walled pits, ponds, lagoons and sumps, that are below the normal ground surface level must register. A tank sitting on the ground is not included. Containers partially beneath the surface are included. Lined or unlined pits, ponds and lagoons are covered if earth has been removed from the storage area to construct the facility. Normal grading is not considered construction below ground level.

Definition of Hazardous Substance: Any substance listed in Section 6382 of the Labor Code or in Section 25316 of the Health and Safety Code. This includes: gasoline, diesel fuel, all industrial solvents, pesticides, herbicides and fumigants. If the material must be carried by a registered hauler, disposed of at a hazardous waste site, is explosive, generates pressure due to heat or decomposition or would harm humans or wildlife you must register the tank. Wastes are included.

Fee: For each tank registered a $10 fee must be paid, except that retail gasoline stations pay $5 per tank.

Penalties: For failure to file, the penalty is $500-$5,000 per day. If you falsify information, you can be fined up to $20,000 for each day the information is incorrect and has not been corrected.

Confidentiality: If you have information protected by trade secret laws, please attach a list of the information on this form that is confidential and the justification for confidentiality, including specific citations of relevant statutory and case law.

Multiple Containers: Fill I and II on one form and leave it blank on all the remaining forms. Attach all forms together securely. If you own more than 50 tanks you can file information on computer tape. Call 916/324-1262 for information.

This is not a Permit Application. All Underground Tanks will be subject to local regulation. Some jurisdictions have already begun programs. Check with your local county government for further information.

NOTE: ALL UNDERGROUND CONTAINERS MUST REGISTER EVEN IF STATE AND/OR LOCAL PERMITS ARE IN FORCE.

California Water Resources Control Board

Hazardous Substance Storage Statement

Who Must File: Each person storing hazardous substances in any underground container must file this form no later than July 1, 1984 (After October 1, 1984 and no later than January 1, 1985 for tanks used on farms).

Definition of Underground Containers: The law applies to "concrete sumps, nonvaulted buried tanks or other underground containers." (Water Code section 13173) All containers, including earthen walled pits, ponds, lagoons and sumps, that are below the normal ground surface level must register. A tank sitting on the ground is not included. Containers partially beneath the surface are included. Lined or unlined pits, ponds and lagoons are covered if earth has been removed from the storage area to construct the facility. Normal grading is not considered construction below ground level.

Definition of Hazardous Substance: Any substance listed in Section 6382 of the Labor Code or in Section 25316 of the Health and Safety Code. This includes: gasoline, diesel fuel, all industrial solvents, pesticides, herbicides and fumigants. If the material must be carried by a registered hauler, disposed of at a hazardous waste site, is explosive, generates pressure due to heat or decomposition or would harm humans or wildlife you must register the tank. Wastes are included.

Fee: For each tank registered a $10 fee must be paid, except that retail gasoline stations pay $5 per tank.

Penalties: For failure to file, the penalty is $500-$5,000 per day. If you falsify information, you can be fined up to $20,000 for each day the information is incorrect and has not been corrected.

Confidentiality: If you have information protected by trade secret laws, please attach a list of the information on this form that is confidential and the justification for confidentiality, including specific citations of relevant statutory and case law.

Multiple Containers: Fill I and II on one form and leave it blank on all the remaining forms. Attach all forms together securely. If you own more than 50 tanks you can file information on computer tape. Call 916/324-1262 for information.

This is not a Permit Application. All Underground Tanks will be subject to local regulation. Some jurisdictions have already begun programs. Check with your local county government for further information.

NOTE: ALL UNDERGROUND CONTAINERS MUST REGISTER EVEN IF STATE AND/OR LOCAL PERMITS ARE IN FORCE.

California Water Resources Control Board

Hazardous Substance Storage Statement

Who Must File: Each person storing hazardous substances in any underground container must file this form no later than July 1, 1984 (After October 1, 1984 and no later than January 1, 1985 for tanks used on farms).

Definition of Underground Containers: The law applies to "concrete sumps, nonvaulted buried tanks or other underground containers." (Water Code section 13173) All containers, including earthen walled pits, ponds, lagoons and sumps, that are below the normal ground surface level must register. A tank sitting on the ground is not included. Containers partially beneath the surface are included. Lined or unlined pits, ponds and lagoons are covered if earth has been removed from the storage area to construct the facility. Normal grading is not considered construction below ground level.

Definition of Hazardous Substance: Any substance listed in Section 6382 of the Labor Code or in Section 25316 of the Health and Safety Code. This includes: gasoline, diesel fuel, all industrial solvents, pesticides, herbicides and fumigants. If the material must be carried by a registered hauler, disposed of at a hazardous waste site, is explosive, generates pressure due to heat or decomposition or would harm humans or wildlife you must register the tank. Wastes are included.

Fee: For each tank registered a $10 fee must be paid, except that retail gasoline stations pay $5 per tank.

Penalties: For failure to file, the penalty is $500-$5,000 per day. If you falsify information, you can be fined up to $20,000 for each day the information is incorrect and has not been corrected.

Confidentiality: If you have information protected by trade secret laws, please attach a list of the information on this form that is confidential and the justification for confidentiality, including specific citations of relevant statutory and case law.

Multiple Containers: Fill **I** and **II** on one form and leave it blank on all the remaining forms. Attach all forms together securely. If you own more than 50 tanks you can file information on computer tape. Call 916/324-1262 for information.

This is not a Permit Application. All Underground Tanks will be subject to local regulation. Some jurisdictions have already begun programs. Check with your local county government for further information.

NOTE: ALL UNDERGROUND CONTAINERS MUST REGISTER EVEN IF STATE AND/OR LOCAL PERMITS ARE IN FORCE.

RE: Air Products and Chemicals, Inc.
Long Beach, CA 90810

Dear Sir/Madam:

Enclosed are the registrations of underground storage tanks for the above referenced facility. We had anticipated removal of these tanks by now, since the plant operation have ceased, but tank removal has been delayed until this fall.

For this reason, we are registering these tanks for the iterim period until they are removed.

Please call Robert Swigart at (215) 481-8867 if you have any questions. Thank you for your cooperation with this matter.

Sincerely,

Air Products and Chemicals, Inc.

LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the Los Angeles County Department of Public Works, Waste Management Division, P.O. Box 4089, Los Angeles, CA 90051 containing:

1. File number of facility and closure permit number.
2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets and north arrow.
3. Description of methods for obtaining, handling and transporting samples.
4. Time and date samples were obtained.
5. If borings were established, boring logs certified by a CA Registered Geologist, CA Certified Engineering Geologist or CA Registered Civil Engineer with sufficient experience in soils.
6. Chain-of-custody documentation initiated by person obtaining sample through person at State Department of Health Services certified laboratory.
7. Disposal destination of tanks and evidence of legal disposal.
8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction and methods of analysis.
9. Documentation as to depth of groundwater at facility.
10. Manifests to document hazardous waste disposal of any removed soil.
11. Any observations of site contamination.
12. Remedial action plan to mitigate contamination.
13. Report to be signed by CA Registered Geologist, CA Certified Engineering Geologist or CA Registered Civil Engineer with sufficient experience in soils.

Signature Ronald S. [illegible] Date 7/28/87

CLOSURE PERMIT SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
2250 ALCAZAR STREET
LOS ANGELES, CALIFORNIA 90033

Closure Permit No. 3436 B
File No. I-5335-22

To satisfy the permanent closure requirements for underground storage tanks previously storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application fo Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1,2	2' TO 4' BELOW TANK INVERT	T.P.H	EPA 8015 OR 418.1
3,4	" "	"	" "
5,6	" "	"	EPA 8015
7,8	" "	"	EPA 418.1

3. All soil samples obtained shall be undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report.

4. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

5. The analysis results for all soil samples shall be expressed in milligrams per kilogram (mg/kg). Analysis results for groundwater samples shall be expressed in parts per billion (ppb).

6. Analysis results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) The method of analysis.

7. All soil/groundwater samples obtained shall be handled and transported to a laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. A final report that contains all of the above required information shall be submitted to the office above within one (1) month from the sampling date or 180 days from the date of this permit, whichever earlier.

single containment ✓ secondary containment __ monitoring system __

secondary piping __ other _____

Date inspected 8/4/87

Complies ✓

Not comply _____

Most western diesel tank (listed as 500 gallon, but 2000 gallon) excavation highly contaminated. Clean up may be difficult due to the tank being adjacent to permanently tacked down machinery & above ground tanks. Rumored that plant will be demolished soon. Other excavations look fairly clean. Sampling techniques good.

RE: 23320 S ALAMEDA ST

TO STORE HAZARDOUS MATERIALS IN UNDERGROUND TANK(S) LOCATED AT THE FACILITY ABOVE.

NUMBER OF PERMITTED TANKS: 5

THIS PROVISIONAL PERMIT IS SUBJECT TO THE FOLLOWING REQUIREMENTS:

PART A — GENERAL CONDITIONS AND LIMITATIONS (ATTACHED).

PART B — AUTHORIZED HAZARDOUS MATERIAL STORAGE TANKS (ATTACHED).

PART C — SPECIFIC CONDITIONS AND LIMITATIONS:

1. THE PERMITTEE SHALL SUBMIT FOR APPROVAL AND IMPLEMENT A LEAK DETECTION PROGRAM (LDP) AND A TANK MONITORING PROGRAM (TMP) PREPARED IN ACCORDANCE WITH "UNDERGROUND STORAGE OF HAZARDOUS MATERIALS - GUIDELINES FOR EXISTING FACILITIES, OCTOBER 1986."

2. THE FOLLOWING TIME SCHEDULE SHALL APPLY TO SUBMITTALS REQUIRED BY THIS PROVISIONAL PERMIT:

   a. PERMIT FEE DUE BY (SEE INVOICE) To Be Billed

   b. TANK INTEGRITY TEST RESULTS DUE BY AUG 27 1987

   c. PROPOSALS FOR LDP AND TMP DUE BY AUG 27 1987

3. PERMIT EFFECTIVE DATE 5-5-86
   NOTE: THE EFFECTIVE DATE IS DETERMINED BY ORIGINAL DATE OF PERMIT APPLICATION.

PART D — SPECIAL CONDITIONS AND LIMITATIONS ATTACHED. YES [ ] NO [XX]

This Provisional Permit is valid only for the continued operation of tanks providing suitable storage and expires six (6) months from the date of issue. Permittee has until the expiration date to complete an approved LDP and to install and be in compliance with an approved TMP. Upon full compliance with the approved LDP and TMP and all other conditions and limitations, this Provisional Permit will be replaced by a full term Operational Permit for the remainder of the unexpired five (5) year term from the effective date unless otherwise noted in Part D above.

UNAUTHORIZED DISCHARGES

20. As soon as any person in charge of a facility or responsible for emergency response for a facility has knowledge of any confirmed or unconfirmed unauthorized discharge of a hazardous material, such person shall take all necessary steps to ensure the discovery, containment, and cleanup of such discharge and shall notify the DPW of the occurrence as required.

21. Any owner or operator who has knowledge of a confirmed unauthorized discharge shall immediately notify the DPW.

22. Within the jurisdiction of the Los Angeles County Fire Department, an unauthorized discharge shall also be reported to the Los Angeles County Forester and Fire Warden, Fire Prevention and Conservation Bureau.

23. The permittee shall institute and complete all actions necessary to remedy the effects of any unauthorized discharge, whether sudden or gradual, and supply information on such actions to the DPW.

24. The continued use of, and permit approval for, existing facilities is subject to review and modification or termination by the DPW whenever there has been any unauthorized discharge. In determining whether continued underground storage in such facility is suitable, the DPW shall consider the age of the facility, the methods of containment, the methods of monitoring, the feasibility of the required retrofit, the concentration of the hazardous materials contained, the severity of potential unauthorized discharge and the suitability of other long term preventive measures.

EVALUATIONS AND INSPECTIONS

25. Whenever the approval or satisfaction of the DPW may be required for a design, monitoring, testing or other technical submittal by a permittee, the DPW may require such permittee, at the permittee's sole cost and expense, to retain a suitable qualified independent engineer, chemist or other appropriate professional consultant acceptable to the DPW, for the purpose of evaluating and rendering a professional opinion respecting the adequacy of such submittal.

26. The DPW conduct inspections for the purpose of ascertaining compliance by the permittee and effecting corrections of any conditions which would constitute any violation of any statute, code, rule or regulation affecting the underground storage of hazardous materials.

27. Whenever necessary for the purpose of investigation or enforcement, or whenever a representative of the DPW, County Health Officer, or Forester and Fire Warden has reasonable cause to believe that there exists in any structure or upon any premises any condition which constitutes a violation, said representative may enter such structure or premises at all reasonable times to inspect the same, or to perform any duty imposed by law.

28. The permittee shall conduct regular inspections of the facility to assure compliance with this permit and shall maintain logs or file reports in accordance with this permit.

29. The DPW may require the periodic employment of special inspectors to conduct an audit or assessment of permittee's facility to make a hazardous material safety evaluation and to determine compliance.

30. Permittee shall, within 30 days of said evaluation, file with the DPW a plan to implement all recommendations, or shall demonstrate to the satisfaction of the DPW why such recommendations shall not be implemented.

31. The DPW may require that any regular or special inspection by the permittee be made in the presence of a representative of the DPW. The DPW may further require advance notice of not less than 72 hours as to the availability of equipment, material and personnel required to conduct such inspections.

SUSPENSIONS AND REVOCATIONS

32. This permit is subject to suspension or revocation if conditions exist which would justify denial of a permit or if permittee fails to correct unsatisfactory conditions.

33. Failure to adhere to all applicable conditions and limitations of this permit shall constitute a willful violation of Title 11, Division 4 of the Los Angeles County Code and may result in civil or criminal penalties, revocation of this permit, or both.

Dear Mr. Shadman:

HAZARDOUS MATERIALS UNDERGROUND STORAGE
SITE INVESTIGATION PROPOSAL AND/OR REMEDIAL ACTION PLAN
FACILITY AT: 23320 South Alameda Street

The site investigation proposal and/or remedial action plan submitted on September 3, 1987 for the above facility has been reviewed by this office and found adequate. You may proceed with the plan as proposed unless otherwise indicated below.

You are cautioned that any contaminated soils or hazardous materials generated during the approved operation must be manifested and transported to a hazardous waste disposal facility as required by California Health and Safety Code, Division 20, Chapter 6.5, unless evidence is presented indicating that the material may be disposed of at a less restricted facility. Copies of all completed manifests shall be submitted to this office as part of the final report.

[ ] A Hazardous Waste Facility Permit or a Variance from permit requirements must be obtained from the State Department of Health Services and copies submitted to this office before commencing the proposed remedial action.

[X] NOTE Requirements pertaining to closure permit 3036B have been satisfied. Upon completing the site assessment and any required remedial action, the closure will be final
A written report containing the required information must be submitted to this office by November 6, 1987.

If you have any questions concerning this matter, please contact Mr. Blair Burgess at (213) 226-4437.

Very truly yours,

Re: I-5385
Air Products Manufacturing Corporation
Carson, California Facility

Dear Mr. Burgess:

Per our earlier telephone conversation and my subsequent conversations with Mr. Ronald Illium, of International Technologies Corporation, we request approval to temporarily postpone the investigation and remedial action planned for tank number 28.91 at our South Alameda Street facility.

The hydrogen plant served by tank 28.91 is no longer in operation. Current plans call for the dismantlement of the facility. Because the area, in which tank 28.91 was located, is overlain by process equipment and structural concrete, it would be necessary to let a separate contract for partial demolition to properly complete the action plan. In addition an inactive, and previously emptied and cleaned, tank lies to the south of 28.91. It too is overlain extensively by equipment and concrete.

It is our hope to dismantle the entire facility, thereby allowing ready access to both tank areas. In this fashion we could then remove the inactive tank and perform a complete remediation to the 28.91 tank area. Accordingly, we are proceeding with the treatment of the previously excavated soils, and request approval to delay further investigation of the 28.91 area until 1 April 1989.

If you should have any questions or require additional information please contact me at (215) 481-5154.

Sincerely,

G P Thompson

Dear Mr. Thompson:

HAZARDOUS MATERIAL UNDERGROUND STORAGE PERMIT
REQUEST FOR TIME EXTENSION
PERMIT NO. 3293
FACILITY LOCATION: 23320 South Alameda Street

Your request for time extension to complete requirements under the subject Provisional Hazardous Materials Underground Storage Permit (HMUSP) is hereby granted as follows:

[ ] Provisional HMUSP expiration date is extended to _____.

[ ] Tank integrity test results due by _____.

[ ] LDP/TMP proposals due by _____.

[X] Other: Site investigation proposal due date extended to January 15, 1988. Immediate action is required due to reported depth to groundwater.

The time extension(s) above apply only to obligations due under your Provisional HMUSP and do not extend the HMUSP effective date or full term operational permit expiration date.

If you have any questions, please contact Mr. Blair Burgess at (213) 226-4437.

RE: Permit No. 3293
Air Products and Chemicals, Inc.
23320 South Alameda Street

Dear Mr. Burgess:

Per your 14 December 1987 letter and our 13 January 1987 telephone conversation, we are planning a two phased approach to the delineation and remediation of the soil contaimination, identified during the 4 August 1987 removal of the 2500 gallon diesel fuel tank.

Attached please find the Scope of Work, prepared by IT Corporation, to determine the depth of the existing contamination. Once we have determined if groundwater has been affected, we will prepare a proposal for determining the lateral extent of contamination along with remediation.

We plan to complete this first phase of work during the week of February 1, 1988.

If you should have any questions or require additional information, please contact me at (215) 481-5154.

Very truly yours,

Air Products and Chemicals, Inc.

GP Thompson

Gerard P. Thompson
Manager, Operations Environmental Engineering

GPT/tms

SCOPE OF WORK

Geophysical Underground Locator

Geophysical utility locating services will be used to delineate any utility conduits, subsurface piping, or other obstructions beneath proposed drilling locations.

Backfill Tank Excavation

Stockpiled soil from the tank excavation will be used as backfill. Prior to backfilling, any standing water will be pumped from the excavation. A sheet of Visqueen® plastic will be placed at the base. The fill material will be compacted in 1 to 2 foot lifts to provide a stable drilling platform.

Standing water will be sampled and analyzed for fuel hydrocarbons to determine appropriate disposition. The water will be removed with a vacuum truck and transported to an oil recycler, if necessary.

Drilling and Sample Collection

IT proposes to drill, log, and sample one soil boring (Boring B-1) within and three more (Borings B-2, B-3, and B-4) circumscribing the backfilled tank excavation of former Tank 28.91 (Refer to Figure 2 - Proposed Soil Boring Locations). The borings will be drilled using 10-inch outside diameter (O.D.), continuous-flight, hollow-stem augers. These borings will be advanced to the base of the soil contaminant plume or to first encounter of ground water, whichever is shallower. These borings will be used to determine the lateral and vertical extent of soil contamination and the presence or absence of near-surface ground water. Soil samples will be collected at 5 foot intervals during drilling for field observation and possible laboratory analysis. Headspace monitoring of soil cuttings using an HNu-model photoionization detector will corroborate further which samples will be submitted for chemical analysis.

Soil cuttings will be drummed on-site pending receipt of analytical results to determine appropriate disposal.

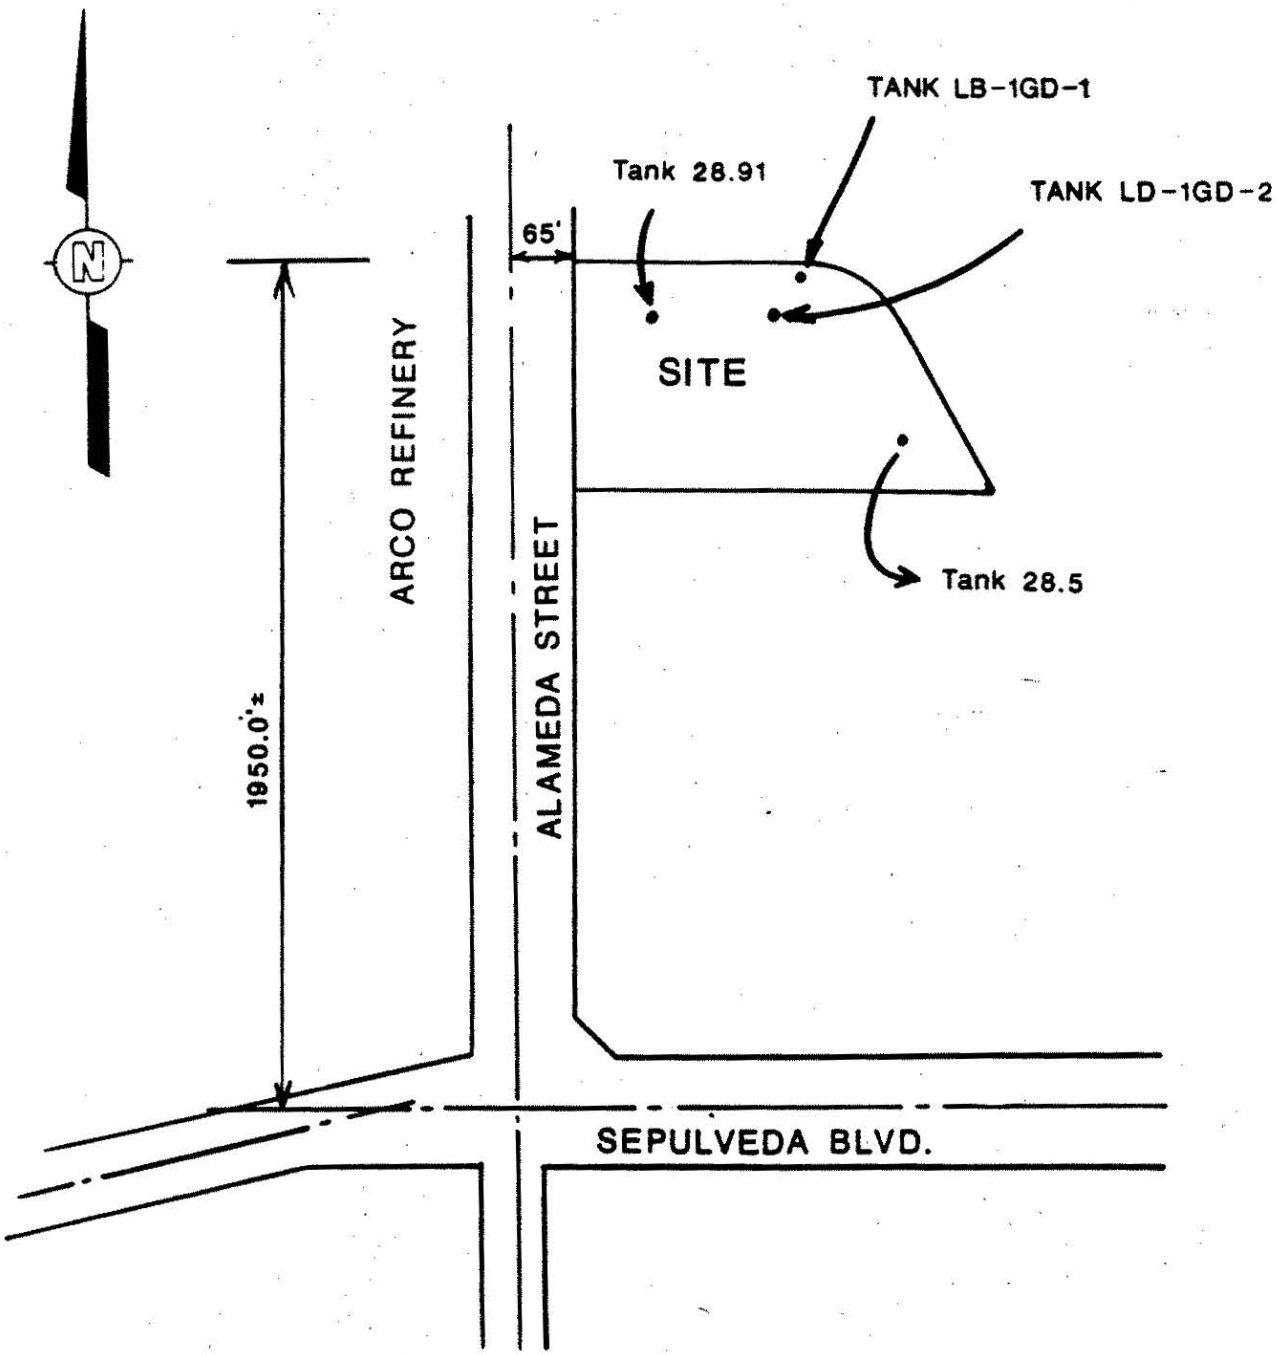
Drilling Without Sample Collection

One soil boring (Boring B-5) will be drilled to ground water in an area near but outside the soil contaminant plume. This boring will be drilled without sampling to a depth of 100 feet or to first encounter of ground water, whichever is shallower.

If ground water is encountered, a sample of aquifer material will be collected for grain size analysis to facilitate proper well installation. The boring will be terminated if a competent clay layer is encountered below the water table that is more than 5 feet thick. Care will be taken to preclude cross contamination of the uppermost aquifer. A sample of aquifer material will be collected for grain size analysis to facilitate proper well installation.

Laboratory Analyses

All analyses will be conducted by IT Analytical Services laboratory (ITAS) in Cerritos, California. Soil samples will be analyzed in accordance with the following U. S. EPA or U. S. EPA modified methods:



Total petroleum hydrocarbons modified (TPH) - EPA 418.1.
Flashpoint by Pensky-Martens closed cup tester - EPA 1010.
Total lead by direct aspiration, modified by California Department of Health Services (DOHS) - EPA 7420.
Benzene, toluene, xylene, and ethylbenzene (BTXE) - EPA 8020

We estimate that eight samples will be analyzed from the soil borings to determine analytically the degree of contamination and the depth at which diesel fuel contamination is no longer present. One surface water sample will be analyzed from the standing water in the tank excavation.

Report

Upon completion of the preliminary ground water site assessment and after receipt of analytical data, IT will prepare a detailed report documenting our field procedures, sample collection and preservation techniques, boring logs, analytical results, conclusions, and pertinent recommendations.

Dear Mr. Thompson

HAZARDOUS MATERIALS UNDERGROUND STORAGE
SITE INVESTIGATION PROPOSAL AND/OR REMEDIAL ACTION PLAN
FACILITY AT: 23320 S. ALAMEDA ST., CARSON

The site investigation proposal and/or remedial action plan submitted on January 20, 1988 for the above facility has been reviewed by this office and found adequate. You may proceed with the plan as proposed unless otherwise indicated below.

You are cautioned that any contaminated soils or hazardous materials generated during the approved operation must be manifested and transported to a hazardous waste disposal facility as required by California Health and Safety Code, Division 20, Chapter 6.5, unless evidence is presented indicating that the material may be disposed of at a less restricted facility. Copies of all completed manifests shall be submitted to this office as part of the final report.

[ ] A Hazardous Waste Facility Permit or a Variance from permit requirements must be obtained from the State Department of Health Services and copies submitted to this office before commencing the proposed remedial action.

[x] NOTE The water well must be constructed down gradient of the former tank location. Water samples must be analyzed for T.P.H. (EPA 8015) and BTX ,(EPA 602).
A written report containing the required information must be submitted to this office by May 20, 1988 .

If you have any questions concerning this matter, please contact Mr. Blair Burgess at (818) 458-3507 .

Very truly yours,

T. A. TIDEMANSON
Director of Public Works

RECEIVED
JUL 20 1988
DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION

Dear Blair:

As mentioned in my 19 April 1988 correspondence, Air Products will employ an environmental consulting firm for the diesel contaminated soil remediation at our above referenced facility. Our selection will be made from one of the three firms I mentioned in our 19 July phone conversation.

As you requested, we will excavate to the extent that Benzene levels approach zero and total petroleum hydrocarbon (TPH) levels reach 100 - 300 ppm. Direct observation through excavating and sampling will best allow us to determine the extent of the clean-up required and whether additional analyses are warranted. We will then bio-treat the contaminated soil on-site to achieve less than 100 ppm TPH. More detailed information concerning the plan for bio-treatment will be provided to you when our contractor formulates a treatment program. Prior to excavation a health and safety plan will be submitted to you for approval before work begins.

We will forward our selected contractor's remedial plan as soon as possible. We would like to begin excavating by 6 September 1988. If you have any questions, please contact me at (215) 481-8867 or Gerard P. Thompson at (215) 481-5154.

Sincerely,

Air Products and Chemicals, Inc.

WASTE MANAGEMENT DIVISION

Dear Mr. Ortega:

Reference is made to your letter dated February 1, 1989, and work plan regarding the applicability of District Rule 1166 to your proposed "Solid-Phase Bioremediation of Contaminated Soil" at the Air Products Chemicals site located at 233020 S. Alameda Street in Carson, California.

Based on the information provided in your letter, only diesel fuel has contaminated the soil. According to District Rule 1166 (copy attached), if the initial boiling point of the organics in the soil is greater than 302 degrees Fahrenheit and the VOC readings above the soil are expected to be below 50 ppm, then the project is exempt from the Rule requirements under section (d)(1)(B). However, if VOC readings are detected above the soil during soil handling at 50 ppm or above, you should have verification from a laboratory that the organics in the soil have a boiling point above 302 degrees Fahrenheit in order to qualify for the exemption under section (d)(1)(B).

Furthermore, for your information, a permit is required by District Rule 201 (copy attached) for treatment of soil with any type of equipment which enhances volatilization (such as a vapor extraction system) and/or emits/controls emissions. The proposed bioremediation treatment method for treatment of soil contaminated with high boiling point organics which meets the exemption described above does not require a Permit to Construct and Operate. Please be advised however, that appropriate mitigation measures should be implemented during soil handling and bioremediation to prevent violations of District Rules 402 (Nuisance) and 403 (Fugitive Dust) (copies attached).

If you have any questions, please call Mrs. Stacey Ebiner at (818) 572-6318.

Very truly yours,

William J. Dennison

Dear Mr. Huff:

On Friday, February 24, 1989, I received notice from Ms. Stacy Ebiner of the South Coast Air Quality Management District (SCAQMD) informing me that the soil bioremediation project we proposed to execute at the Air Products Chemicals, Inc. plant, located at 233020 South Alameda Street, Carson, California, is exempt from the provisions of the SCAQMD Rule 1166.

We will mobilize equipment on March 8, 1989 and begin excavation operations on March 9, 1989. We will send your office a copy of the Baseline and Process Monitoring Report during the latter part of June, 1989 with the Clearance Data Report (Final Report) to follow in September, 1989.

Thank you,

Miguel A. Ortega

Re: Underground Storage Tank Update
Permit #3293
Air Products Manufacturing Corp.
23320 S. Alameda Street
Carson, CA

Dear Sir/Madam:

Enclosed please find the completed underground storage tank (UST) update forms for our above referenced facility. This plant was shutdown in March of 1986. Tank #28.70 was emptied and washed in July-August 1986 and has not been in use since. This tank had been used to store a 10% sodium hydroxide/90% water solution.

In August 1987 four other UST's were removed at this facility. The fifth tank #28.70 could not be removed because it is covered by a concrete equipment pad in a section of the plant where there are overhead pipe rack supports. This section would have to be demolished before tank #28.70 could be removed. We, therefore, would like to complete the requirements for permanent closure of this tank in place.

During investigations related to the removal of the other UST's, we were able to cut through the concrete pad near tank #28.70 and take a soil boring. This soil boring was analyzed for pH at 5 foot intervals down to 30 feet. The pH ranged from 7.6 to 8.3 standard units and would indicate that this caustic tank (10% NaOH/90% water) had never leaked. In addition an impervious concrete pad covers the tank, and the surrounding area, thus preventing any infiltration of surface water. The depth to groundwater at this site is 65 feet.

Given the above, please verify that this tank has met the requirements of permanent closure in place, or that it must still be filled with an inert material. If you have any questions, please call me at (215) 481-8867.

Sincerely,

Air Products and Chemicals, Inc.

Dear Underground Tank Owner/Operator:

FACILITY LOCATION: 23320 S ALAMEDA ST
PERMIT NUMBER: 00003293 NUMBER OF TANKS: 1

The recent enactment of Federal regulations for the control and monitoring of underground storage tanks (USTs) has made it necessary for local agencies and the State Water Resources Control Board to update information on file about the USTs at your facility and the ownership of these tanks. The State has developed the enclosed Form "A" (Site) and Form "B" (Tank) to record the required information.

The enclosed forms have been preprinted with information presently on file for the subject location. Please correct any erroneous data and complete the remaining information as described on the enclosed instructions. One Form "A" is required for each location where USTs exist and one Form "B" is required for EACH TANK at that location.

The completed forms must be submitted 30 days from date of this letter to:

DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
P.O. BOX 1460
ALHAMBRA, CA 91802-1460

This submittal is mandatory to maintain your UST permit

There is no fee required for this submittal. However, if there are USTs at this location that were not previously registered, you will be liable for additional permit and State surcharge fees. If some or all of the USTs shown for this location have been closed, so indicate on Form "B" and include the Closure Permit number on your submittal. Please note that USTs permitted for closure will remain on the record until ALL required post-closure information has been submitted and approved.

Your cooperation will greatly assist State and local compliance with UST regulations. Please contact the Waste Management Division, UST Unit, at (818) 458-3517 if you have any questions or need additional forms.

Very truly yours:

T. A. TIDEMANSON
Director of Public Works

INSTRUCTIONS:

HAZARDOUS MATERIALS UNDERGROUND STORAGE PERMIT (***HMUSP***)
APPLICATION SUPPLEMENT

DO NOT USE THIS FORM FOR CLOSURE OR TRANSFER OF AN EXISTING *HMUSP*, A NEW CONSTRUCTION PLAN CHECK, OR AN ADDITIONAL APPROVAL.

(A) Facility name, mailing address and facility address on new permit applications must correspond with information on Part I of the State Form **"A"**, Facility/Site Information. Please correct mailing label information if affixed.

(B) This application supplement is to be used for application to operate and maintain existing tanks located within the jurisdiction of the Department of Public Works. Facilities located within the corporate limits of the cities of Burbank, Glendale, Long Beach, Los Angeles, Pasadena, San Fernando, Santa Monica, Torrance and Vernon should contact the respective local agencies directly for permit information. Permit renewal is authorized only if no ownership change has occurred. Specify the number of tanks at the facility.

(C) Assessor parcel identification is required for new permit applications only.

(D) The applicant is responsible for completing ***all*** information requested on State Forms **"A"** and **"B"**. The Department of Public Works Underground Tank Inspector will not fill out these forms for you. This application is due by the date indicated. If you are unable to submit your ***LDP/TMP*** by the due date, a Provisional ***HMUSP*** will be issued granting up to 90 days to complete your submittal. Evidence of safe storage must be submitted with this application to qualify for a provisional ***HMUSP***.

(E) The total fees to accompany this application represent the ***HMUSP*** application fee, the first annual ***HMUSP*** maintenance fee plus the State surcharge. Future annual ***HMUSP maintenance fees*** will be payable upon billing by the Department of Public Works.

(F) Persons that have been notified to file for a ***HMUSP*** and do not store any hazardous materials underground should check the appropriate box and return this form to avoid any unnecessary follow-up mailings.

The storage of hazardous waste in an underground tank where the specific tank is named in hazardous waste facility permit issued by the California Department of Health Services is not subject to the ***HMUSP*** requirements. Owners of such facilities must furnish a copy of the State permit for facilities where this exclusion is requested.

Final interceptors in industrial waste pretreatment systems, catch basins, refinery pipelines, lagoons, storm drains, oil field gathering lines, well cellars, above ground storage tank spill containment, unlined pits or sumps, and piping not directly associated with a permitted facility are not subject to a ***HMUSP***. *Claims for exemption are subject to verification.*

(G) This ***HMUSP*** application supplement and each State **"A"** or **"B"** must be signed by:

1) A principal executive officer at the level of vice-president or by an authorized representative. The representative must be responsible for the overall operation of the facility where the tank(s) are located.
2) A general partner proprietor.
3) A principal executive officer, ranking elected official or authorized representative of a public agency.

FACILITY/SITE, INFORMATION

INSTRUCTIONS FOR COMPLETING THIS FORM

GENERAL INSTRUCTIONS:

1. One FORM "A" shall be completed for all **NEW PERMITS, PERMIT CHANGES** or any **FACILITY/SITE INFORMATION CHANGES.**
2. **SUBMIT ONLY ONE (1) FORM "A"** for a Facility/Site, regardless of the number of tanks located at the site.
3. This form should be completed by either the **PERMIT APPLICANT.**
4. Please type or print clearly all requested information.
5. Use a hard point writing instrument, you are making 3 copies.

TOP OF FORM: "MARK ONLY ONE ITEM"

1. Mark an (X) in the box next to the item that best describes the reason the form is being completed.

I. FACILITY/SITE INFORMATION & ADDRESS - (MUST BE COMPLETED)

1. Record name and address (physical location) of the underground tank(s).
   NOTE: Address MUST have a valid physical location including city, state, and zip code.
   P.O. BOX NUMBERS ARE NOT ACCEPTABLE.
   Include nearest cross street and care of address information if appropriate.
2. Check the appropriate box for TYPE OF BUSINESS.
3. Check the appropriate box for TYPE OF BUSINESS OWNERSHIP.(ex. CORPORATION, INDIVIDUAL, etc.)
4. If Facitity/Site is located on land within an indian reservation or other indian trust lands, check the box marked "YES".
5. Phone number must have an area code. If the night number is the same, write "SAME" in proper location.
6. Record the E.P.A. ID # or write "NONE" in the space provided.
7. Indicate the NUMBER of TANKS at this SITE.

II. PROPERTY OWNER INFORMATION & ADDRESS - (MUST BE COMPLETED)

1. Complete all items in this section, unless all items are the same as SECTION 1; If the same, write **"SAME AS SITE"** across this section. Be sure to check PROPERTY OWNERSHIP TYPE box.

III. TANK OWNER INFORMATION & ADDRESS - (MUST BE COMPLETED)

1. Complete all items in this section, unless all items are the same as SECTION I; If the same, write **"SAME AS SITE"** across this section. Be sure to check TANK OWNERSHIP TYPE box.

IV. LEGAL NOTIFICATION AND BILLING ADDRESS

1. Check **ONE BOX** for the address that will be used for **BOTH LEGAL and BILLING NOTIFICATIONS.**

Applicant must sign and date form as indicated.

IT IS THE RESPONSIBLITY OF THE LOCAL AGENCY THAT INSPECTS THE FACILITY/SITE TO VERIFY THE ACCURACY OF THE INFORMATION. THE LOCAL AGENCY IS RESPONSIBLE FOR THE COMPLETION OF THE "LOCAL AGENCY USE ONLY" INFORMATION BOX AND FOR FORWARDING ONE FORM "A" AND ASSOCIATED FORM "B"(s) TO THE FOLLOWING ADDRESS:

FORM 'B':
TANK

UNDERGROUND STORAGE TANK PROGRAM
TANK INFORMATION

INSTRUCTIONS FOR COMPLETING THIS FORM

GENERAL INSTRUCTIONS:

1. One FORM "B" shall be completed for each tank for all **NEW PERMITS, PERMIT CHANGES, TANK CLOSURES, TANK REMOVALS,** and/or any other **TANK INFORMATION CHANGE.**
2. This form should be completed by either the **PERMIT APPLICANT**
3. Please type or print clearly all requested information.
4. Use a hard point writing instrument, you are making 3 copies.

TOP OF FORM: "MARK ONLY ONE ITEM"

1. Mark an (X) in the box next to the item that best describes the reason the form is being completed.
2. Indicate the Facility/Site name where the tank is installed.
3. Is this tank a farm tank? Check 'YES' or 'NO'. A farm tank is a tank located on an agricultural farm which stores motor vehicle fuel used to propel farm vehicles.

I. TANK DESCRIPTION — COMPLETE ALL ITEMS - IF UNKNOWN - SO SPECIFY

A. Indicate owners tank ID # - If there is a tank number that is used by the owner to identify the tank.(ex. AB70789)
B. Indicate the name of the company that manufactured the tank. (ex. ACME TANK MFG.)
C. Indicate the year tank was installed. (ex. 1987)
D. Indicate the tank capacity in gallons. (ex. 25,000 or 10,000, etc.)

II TANK CONTENTS

A. 1. If MOTOR VEHICLE FUEL, check box 1 and complete items B & C.
   2. If not MOTOR VEHICLE FUEL, check the appropriate box in section A and complete items B & D.
B. Check the appropriate box.
C. Check the type of MOTOR VEHICLE FUEL. (if box 1 is checked in A)
D. Print the chemical name of the hazardous substance stored in the tank and the C.A.S. #. (Chemical Abstract Service number), if box 1 is NOT checked in A.

III. TANK CONSTRUCTION — MARK ONE ITEM ONLY IN BOX A, B, C & D

1. Check only one item in TYPE OF SYSTEM, TANK MATERIAL, INTERIOR LINING and CORROSION PROTECTION.
2. If OTHER, print in the space provided.

IV. PIPING INFORMATION

1. Circle **A** if above ground, or **U** if underground; circle both if applicable.
2. If UNKNOWN, circle or if OTHER, print in space provided.

V. LEAK DETECTION SYSTEM

1. Circle **P** for PRIMARY, or **S** for SECONDARY. A primary and/or secondary leak detection system **MUST** be circled.
2. If UNKNOWN, specify or if OTHER, print in space provided.
3. If there is no SECONDARY LEAK DETECTION SYSTEM, circle NONE.

VI. INFORMATION ON TANK PERMANENTLY CLOSED IN PLACE

1. ESTIMATED DATE LAST USED - MONTH/YEAR (January, 1988 or 01/88).
2. ESTIMATED QUANTITY of SUBSTANCE remaining in tank. (in Gallons)
3. WAS TANK FILLED WITH INERT MATERIAL? Check 'YES' or 'NO'.

Applicant must sign and date form as indicated.

IT IS THE RESPONSIBLITY OF THE LOCAL AGENCY THAT INSPECTS THE FACILITY/SITE TO VERIFY THE ACCURACY OF THE INFORMATION. THE LOCAL AGENCY IS RESPONSIBLE FOR THE COMPLETION OF THE "LOCAL AGENCY USE ONLY" INFORMATION BOX AND FOR FORWARDING ONE FORM "A" AND ASSOCIATED FORM "B"(s) TO THE FOLLOWING ADDRESS:

CLOSURE PERMIT SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

Closure Permit
No.: 41613B
File No.
I- 5385-22

PART 1 OF 2

To satisfy the permanent closure requirements for underground storage tanks previously storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	2-4FT BELOW	TPH, BTXE	418.1, 8020
	TANK INVERT	PH, Na	Appropriate EPA Meth
20FT INTERVAL	"	"	
ALONG PRODUCT PIPING		"	418.1, 8020

dn4/FPERMIT Rev. 3/90

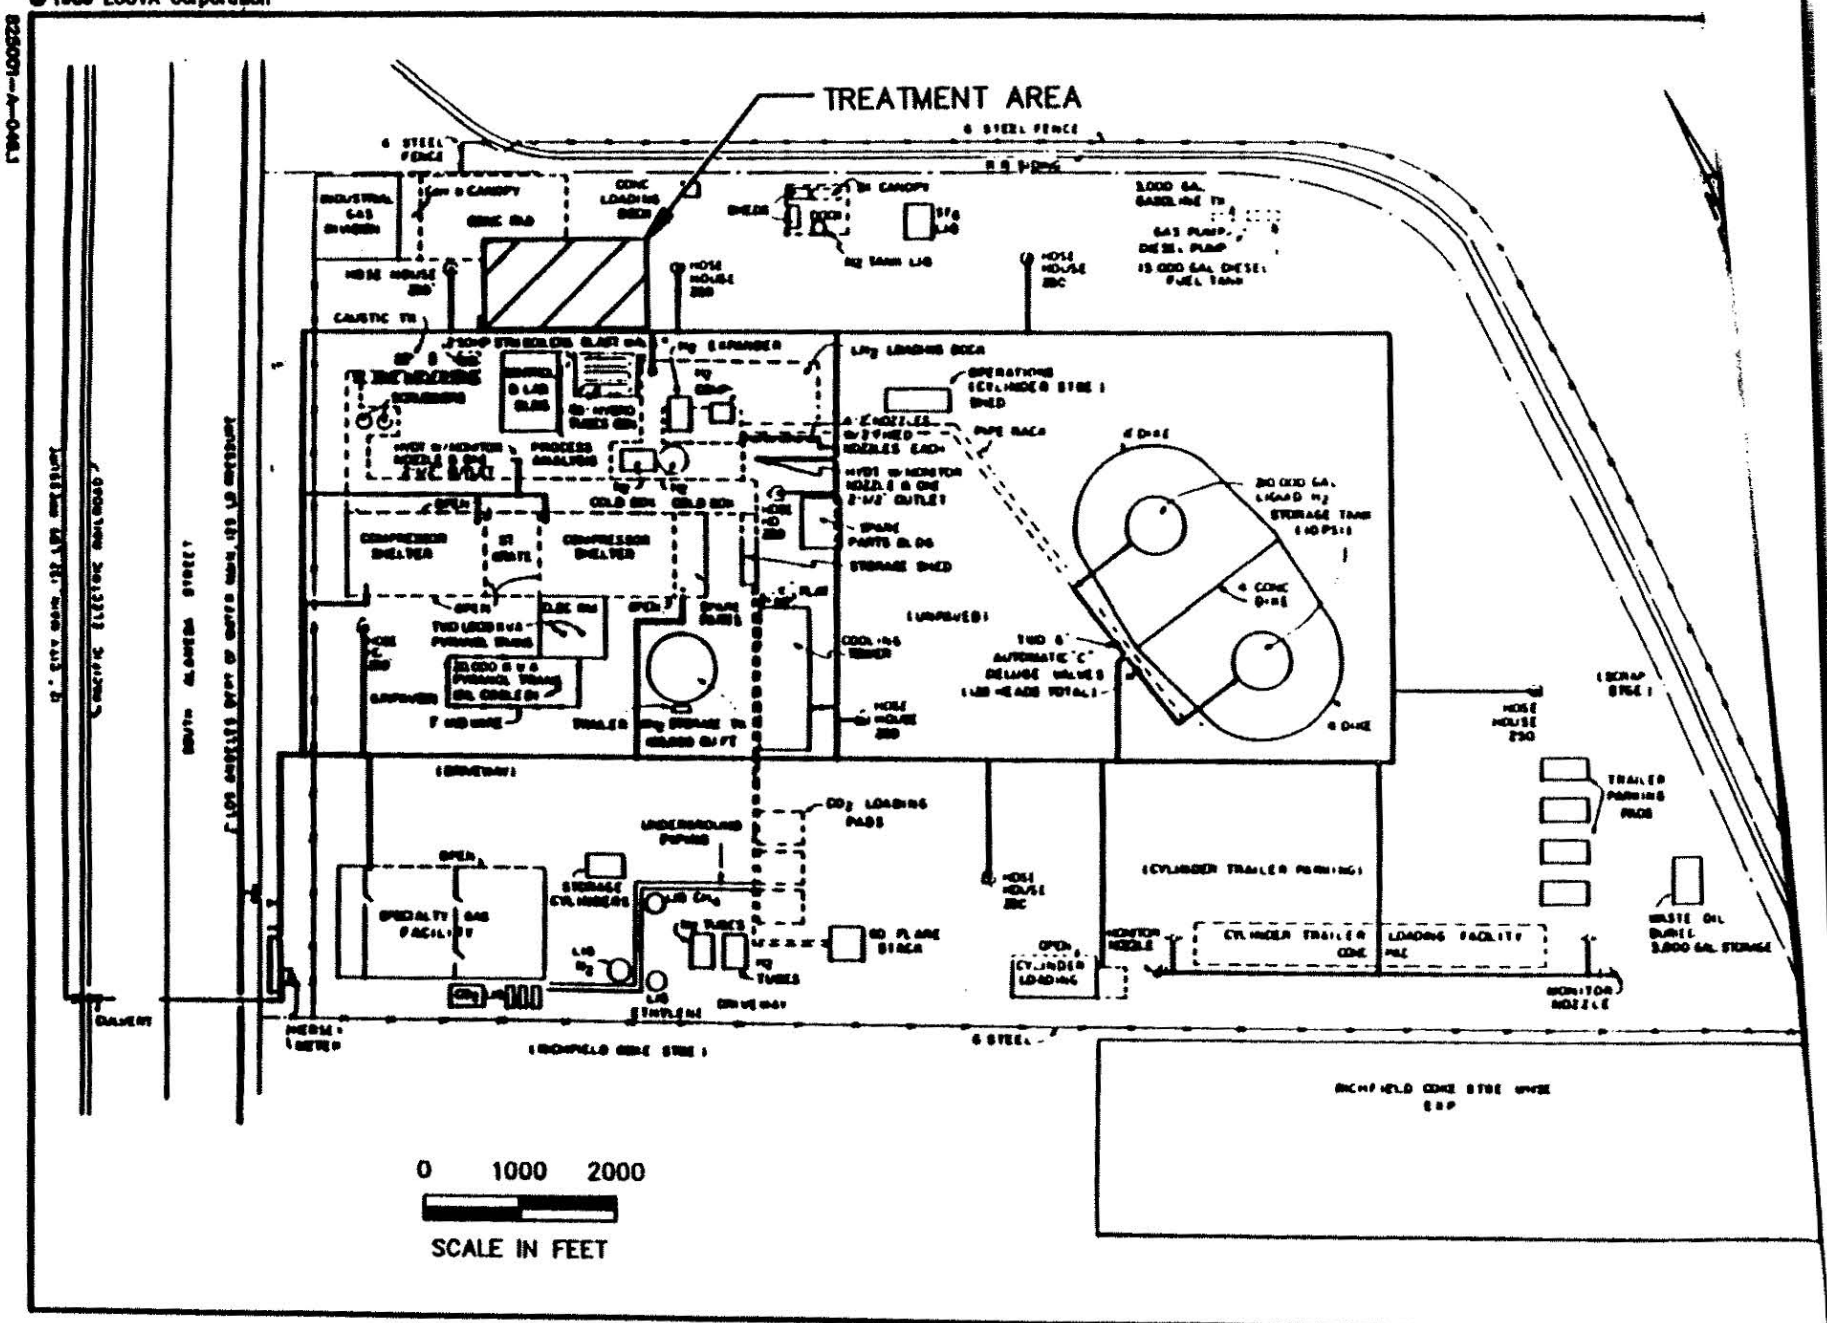
Cont'd on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report.

4. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

5. The analytical results for all soil samples shall be expressed milligrams per kilogram (mg/kg), or micrograms per kilogram (ug/kg) as appropriate. Practical quantitation limits of 5-10 ug/kg (ppb) for volatile organics and 1 mg/kg (ppm) for the petroleum hydrocarbons must be achieved by the laboratory. Analytical results for groundwater samples shall be expressed in ug/l (ppb) and practical quantitation limits of .5-5 ug/l (ppb) for volatile organics, and 1 mg/l (ppm) for petroleum hydrocarbons must be achieved by the laboratory.

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determiantion; d) The method of analysis; e) Signature of chemist certifying results.



7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. A final report that contains all of the above required information shall be submitted to the office above within one (1) month from the sampling date or 180 days from the date of this permit, whichever is earlier.

4907 ;

© 1989 ECOVA Corporation

CLOSURE -- UNDERGROUND STORAGE TANKS

CONDITIONS A -- GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer - Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3) business day advance notification.

   b. Permanent closure of a tank in place or a temporary closure shall require a 30 day written notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their initial construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74-81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies include the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.

   b. The personnel shall be sufficiently skilled to safely carry out such operation.

   c. Contaminated materials removed from such facility shall be disposed of at legal point of discharge.

   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B -- TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, "Abandonment or Removal of Underground Tanks," Part A and any other applicable Parts.

2. A temporary closure shall not exceed 90 days.

CONDITIONS C -- PERMANENT TANK(S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Part D and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tanks shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, site integrity shall be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be backfilled and recompacted to a relative compaction of 90%.

CONDITIONS D -- PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Parts B or C, and any other applicable Parts.

2. Owners/operators shall demonstrate part site integrity as follows:

   a. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test borings may be drilled vertically and the reason stated in the report in 2.h. below.

   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the major axis of the tank.

   c. For multiple tanks, as a minimum, borings shall be placed at 20 foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test location and placement.

   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 40 feet below grade level.

   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.

   f. Soil samples shall be capped immediately with teflon or aluminum.

   g. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.

   h. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials -- Guidelines."

4. A report shall be submitted to the County Engineer containing the results of the site investigation.

NOTICE TO CLOSURE PERMIT APPLICANTS

The South Coast Air Quality Management District (SCAQMD) has adopted Rule 1166 regulating emissions of Volatile Organic Compounds (VOC) from decontamination of soil effective **August 6, 1988.**

In addition to the requirements of your Closure Permit, persons excavating any underground storage tank that previously contained VOC's must:

- Notify the SCAQMD Executive Officer by telephone at (714) 396-2000 24 hours prior to tank excavation. 1166(c)(1)(A)
- Monitor the excavated material during the excavation for VOC contamination. 1166(c)(1)(B)
- When VOC contamination is detected:
  * Cease excavation
  * Cover the contaminated soil until implementation of approved mitigation measures. 1166(c)(1)(C)
  * Notify the SCAQMD Executive Officer at (714) 396-2000 within 24 hours of detection of VOC contaminated soil. 1166(c)(2)(A)
- A person shall not engage in or allow any on-site or off-site spreading of VOC contaminated soil which results in uncontrolled evaporation of VOC to the atmosphere. 1166(c)(3)

Exemptions

- Treatment of less than one (1) cubic yard of contaminated soil. 1166(d)(1)(A)
- Decontamination of soil containing organic compounds that have initial boiling point of 302°F or greater, Reid Vapor Pressure less than 80mm Hg or Absolute Vapor Pressure less than 36mm Hg at 20°C. 1166(d)(1)(B),(F)
- Removal of soil for sampling purposes pursuant to EPA methods. 1166(d)(1)(C)
- Accidental spillage of five (5) gallons or less of VOC. 1166(d)(1)(D)
- Documentation of soil which is contaminated through natural seepage of VOC from oil and gas wells or other natural sources. 1166(d)(1)(E)

SPECIFIC QUESTIONS ON RULE 1166 SHOULD BE REFERRED TO THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (714) 396-2000

UST1/NOTCLOSE

LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the Los Angeles County Department of Public Works, Waste Management Division, P.O. Box 1460, Alhambra, CA 91802-1460, containing:

1. File number of facility and closure permit number.

2 Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets and north arrow.

3. Description of methods for obtaining, handling, and transporting samples.

4. Time and date samples were obtained.

5. If borings were established, boring logs certified by a CA Registered Geologist, CA Certified Engineering Geologist, or CA Registered Civil Engineer with sufficient experience in soils.

6. Chain-of-custody documentation initiated by person obtaining sample through person at State Department of Health Services certified laboratory.

7. Disposal destination of tanks and evidence of legal disposal.

8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction and methods of analysis.

9. Documentation as to depth of groundwater at facility.

10. Manifests to document hazardous waste disposal of any removed soil and tank rinsate.

11. Any observations of site contamination.

12. Remedial action plan to mitigate contamination.

13. Report to be signed by CA Registered Geologist, CA Certified Engineering Geologist, or CA Registered Civil Engineer with sufficient experience in soils.

Signature T. Monie Date 10/19/92

Re: Written Report Follow-up to 30 October 1992 Verbal Spill Notification
Air Products Manufacturing Corp., 23320 S. Alameda St, Long Beach, CA 90810

Dear Sir:

This letter serves to document the verbal spill notification made in regards to our above referenced facility. As you may recall, Air Products was conducting some demolition activities when we encountered some soil contaminated with fuel. We assumed the source was related to an underground diesel tank that we removed and remediated about four years ago. In addition to yourself, I notified the California Office of Emergency Services (Report # 30300) and the Regional Water Quality Control Board (RWQCB).

On 29 October 1992, at 1:00 P.M., during the demolition of a truck-weighing scale pit at our 23320 S. Alameda Street facility, some fuel contaminated soil was encountered. The following day I reported the contaminated soil. An analysis of the soil shows 3516 ppm gasoline and 779 ppm diesel. The quantity of the contamination is unknown. The source of the contamination may have been from the underground diesel tank that was removed adjacent to the scale or due to a possible past surface spill. We are currently making arrangements with an environmental contractor to investigate and remediate or remove and dispose the contaminated soil.

Investigation and remediation reports will be forwarded to you and to the RWQCB unless you would prefer otherwise. If you have any questions, please call me at (215) 481-8867.

Sincerely,

Air Products and Chemicals, Inc

Re: Gasoline/Diesel Contaminated Soil Update
Air Products Manufact. Corp., 23320 S. Alameda St, Long Beach, Ca 90810

Dear Sir:

As you may recall, Air Products was conducting some demolition activities when we encountered some soil contaminated with gasoline and diesel. We assumed the source was related to an underground diesel tank that we removed and remediated about four years ago. As we investigate, we are beginning to put some pieces of the puzzle together that lead us to believe the contamination may be located over a larger area than we suspected and from a different source.

The above referenced facility is an industrial gas manufacturing plant where Air Products received a pipeline gas, from the petroleum cracking operation at the ARCO refinery across the street, and manufactured pure hydrogen. We have leased this property from ARCO since building our plant in 1962. We decommissioned the plant in 1986 and are currently demolishing sections of the facility so that we may return the land to ARCO.

The truck weighing scale, where the contamination was discovered, is adjacent to a section of our plant that we refer to as the purification or pretreatment area. This is were our demolition activities are currently being directed. Within this area is an underground spent caustic solution tank that we are going to remove. In preparation for this tank removal, we broke through the concrete pad, that covers most of this area, and discovered some similar gasoline/diesel contaminated soil. This would indicate that the contamination covers a larger area than just around the truck scale.

Within our purification/pretreatment area there are two aboveground storage tanks that contained hydrocarbon liquids. One tank is a 6000 gallon diesel tank and the other is a 6000 gallon hydrocarbon condensate tank. This hydrocarbon condensate was very similar to gasoline and contained benzene, toluene, ethylbenzene, and xylene. Given the location of the contaminated soil in relation to these aboveground storage tanks, the similarity of the contamination to the substances stored in these tanks, and the fact that the contamination is located near the ground surface, we now believe that possible surface spills related to

11. 12. 92 03:33 PM *PSG MATL. S. MGMT. P02

these tanks may be the source of this soil contamination. We are now directing our attention to the area beneath these tanks.

We are currently using Cleveland Environmental Services, Inc. to conduct our investigation. We continue to demolish aboveground structures in this area as it will facilitate further investigation and remediation.

If you have any questions regarding our activities, please call me at (215) 481-8867.

Sincerely,

Air Products and Chemicals, Inc

CLOSURE -- UNDERGROUND STORAGE TANKS

CONDITIONS A -- GENERAL

1. Closures shall be carried out such that all applicable regulations from the following agencies are complied with: Los Angeles County, Department of County Engineer - Facilities; Los Angeles County Fire Department, Fire Prevention Division or the appropriate City Fire Department; South Coast Air Quality Management District; and Los Angeles County Department of Health Services.

2. The County Engineer and Fire Departments shall be notified in advance of any closure in accordance with the following:

   a. Removal of tank shall require a three (3) business day advance notification.

   b. Permanent closure of a tank in place or a temporary closure shall require a 30 day written notification.

3. Consult current fee schedule for costs.

4. All abandoned wells shall be destroyed in such a way that they will not produce water or act as a channel for interchange of water, when such interchange may result in deterioration of the quality of water in any or all water bearing formations penetrated, or present a hazard to the safety and well-being of people and animals.

5. A well destruction permit issued by the Los Angeles Department of Health Services shall be required for all wells requiring a permit for their initial construction.

6. Well destruction shall be accomplished according to methods described in the latest "Water Well Standards: State of California" by the Department of Water Resources, contained in Bulletin 74-81, December 1981, or any other methods that will provide equivalent or better protection.

7. Plans for the decontamination of a facility shall be submitted to the County Engineer for approval no later than 30 days before the commencement of such operations. Other agencies having jurisdiction shall also be notified. These agencies include the California Regional Water Quality Board, the Los Angeles County Department of Health Services, and the South Coast Air Quality Management District.

8. Decontamination shall require the following, as a minimum:

   a. Cleaning operation shall be done under the supervision of persons who understand the hazardous potential of the original liquid stored and its components.

   b. The personnel shall be sufficiently skilled to safely carry out such operation.

   c. Contaminated materials removed from such facility shall be disposed of at legal point of discharge.

   d. The operation shall be carried out in a manner that will not endanger the health of the public and the environment.

CONDITIONS B -- TEMPORARY

1. All temporary closures shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, "Abandonment or Removal of Underground Tanks," Part A and any other applicable Parts.

2. A temporary closure shall not exceed 90 days.

CONDITIONS C -- PERMANENT TANK(S) REMOVAL

1. All tank removals shall be carried out as indicated in Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Part D and any other applicable Parts.

2. Owners/operators shall notify the Building Department having jurisdiction at the place of removal if a grading permit is necessary.

3. Removed tanks shall not be transported away from the site until an inspection to establish site integrity is carried by the County Engineer.

4. If an appointment has been arranged with a County Engineer Inspector to inspect the removal of a tank, the inspector will only wait at the site a reasonable amount of time (approximately one hour) after arriving for the removal to commence. Another closure fee may be charged if the inspector has to return to the site.

5. After inspection, tanks shall be transported to a legal disposal point.

6. If the tank has stored materials other than motor fuel, fuel oil or waste oil, site integrity shall be demonstrated using the soil sampling and analysis procedures described in CONDITIONS D below.

7. The site shall be backfilled and recompacted to a relative compaction of 90%.

CONDITIONS D -- PERMANENT

1. All permanent closures of tanks in place shall comply with Los Angeles County Fire Department, Fire Prevention Division, Supplement #A -- Inspection Guide #6, Parts B or C, and any other applicable Parts.

2. Owners/operators shall demonstrate part site integrity as follows:

   a. Test borings shall be slant drilled to intercept a point beneath the center of the tank, if possible. If slant drilling is not feasible, the test borings may be drilled vertically and the reason stated in the report in 2.h. below.

   b. For single tanks, a minimum of two test borings will be required, each located on opposite sides of the tank along the major axis of the tank.

   c. For multiple tanks, as a minimum, borings shall be placed at 20 foot intervals around the tank cluster. The actual number and location of borings shall be evaluated on a case-by-case basis. Tanks separated by 20 feet or more shall be considered single tanks for the purposes of test location and placement.

   d. Soil samples shall be taken at depths of 5, 10, 20, 30 and 40 feet below grade level.

   e. A Shelby Tube or a Modified California Sampler shall be utilized for taking all soil samples.

   f. Soil samples shall be capped immediately with teflon or aluminum.

   g. Soil samples shall not be extruded in the field but are to be immediately placed in a refrigerated ice chest and transported to a state certified laboratory for analysis, using suitable methods.

   h. A report containing the results of the above analysis shall be submitted to the County Engineer.

3. If the soil analysis in 2. above indicates the presence of contaminants, the County Engineer shall require a site investigation as described in Chapter V of the County's "Underground Storage of Hazardous Materials -- Guidelines."

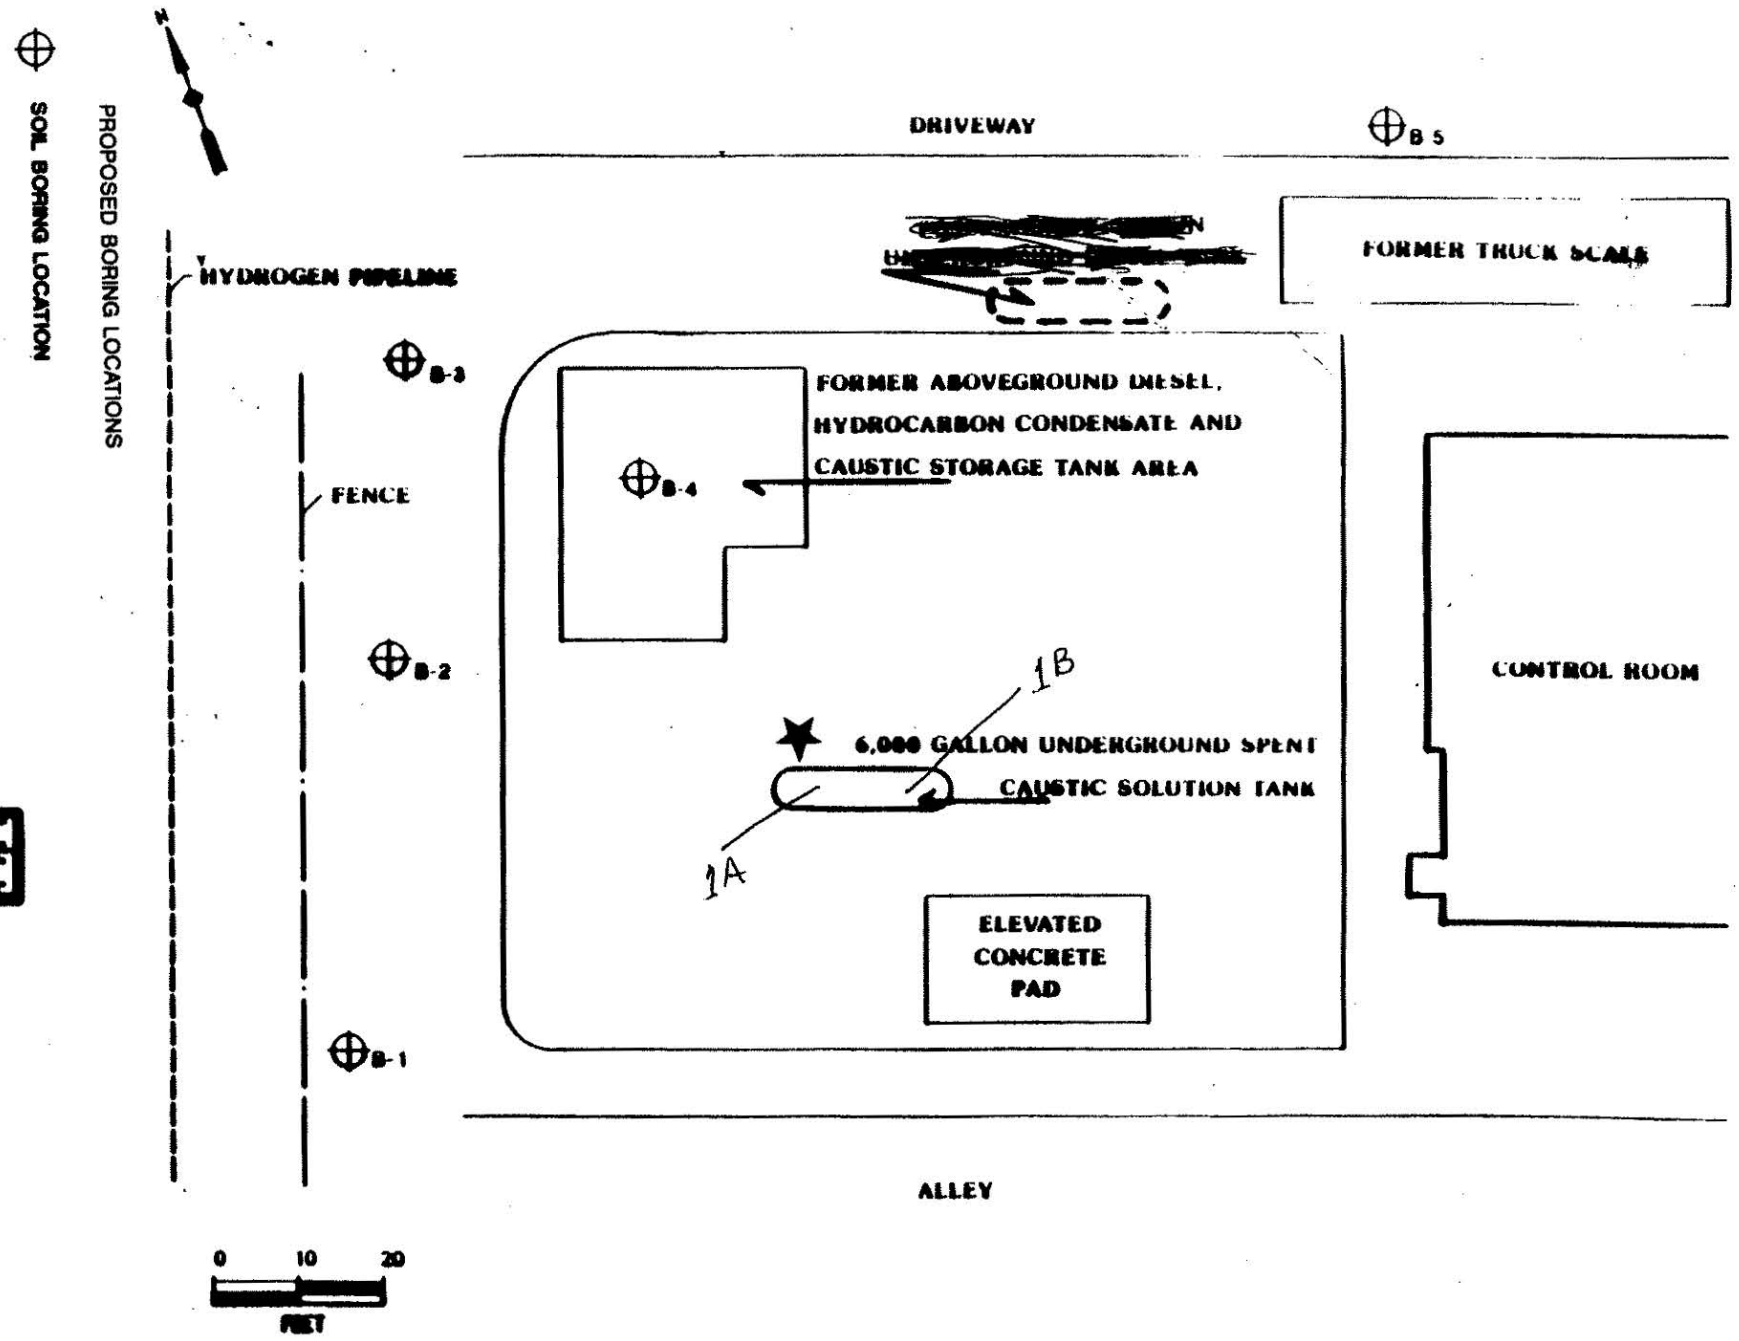
4. A report shall be submitted to the County Engineer containing

NOTICE TO CLOSURE PERMIT APPLICANTS

The South Coast Air Quality Management District (SCAQMD) has adopted Rule 1166 regulating emissions of Volatile Organic Compounds (VOC) from decontamination of soil effective **August 6, 1988.**

In addition to the requirements of your Closure Permit, persons excavating any underground storage tank that previously contained VOC's must:

- Notify the SCAQMD Executive Officer by telephone at (714) 396-2000 24 hours prior to tank excavation. 1166(c)(1)(A)
- Monitor the excavated material during the excavation for VOC contamination. 1166(c)(1)(B)
- When VOC contamination is detected:
  * Cease excavation
  * Cover the contaminated soil until implementation of approved mitigation measures. 1166(c)(1)(C)
  * Notify the SCAQMD Executive Officer at (714) 396-2000 within 24 hours of detection of VOC contaminated soil. 1166(c)(2)(A)
- A person shall not engage in or allow any on-site or off-site spreading of VOC contaminated soil which results in uncontrolled evaporation of VOC to the atmosphere. 1166(c)(3)



Exemptions

- Treatment of less than one (1) cubic yard of contaminated soil. 1166(d)(1)(A)
- Decontamination of soil containing organic compounds that have initial boiling point of 302°F or greater, Reid Vapor Pressure less than 80mm Hg or Absolute Vapor Pressure less than 36mm Hg at 20°C. 1166(d)(1)(B),(F)
- Removal of soil for sampling purposes pursuant to EPA methods. 1166(d)(1)(C)
- Accidental spillage of five (5) gallons or less of VOC. 1166(d)(1)(D)
- Documentation of soil which is contaminated through natural seepage of VOC from oil and gas wells or other natural sources. 1166(d)(1)(E)

SPECIFIC QUESTIONS ON RULE 1166 SHOULD BE REFERRED TO THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (714) 396-2000

CLOSURE PERMIT SUPPLEMENT
HAZARDOUS MATERIALS UNDERGROUND STORAGE
LOS ANGELES COUNTY
DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION
900 S. FREMONT AVENUE
ALHAMBRA, CA 91803

Closure Permit
No.: 61306
File No.
I- 5385

PART 1 OF 2

To satisfy the permanent closure requirements for underground storage tanks previously storing hazardous materials, site integrity must be demonstrated by the analysis of soil samples and, if applicable, groundwater samples as outlined below. These requirements are in addition to the conditions listed on the Application for Closure or contained in an approved Closure Plan.

1. Samples shall be obtained at the sampling points (SP) indicated on the attached plot plan.

2. For each SP, samples shall be obtained at the following depths:

SP	Depth(s)	Compounds	Analysis Method
1A, 1B	2-4 feet below tank invert	TPH, BTEX pH, Na	418.1, 8020 Appropriate EPA method
20 feet interval along product pipe	"	"	"

dn4/FPERMIT Rev. 3/90

Cont'd on Page 2

3. All soil samples obtained shall be discrete, undisturbed and unexposed prior to analysis. The method used to obtain the samples and the date of sampling shall be included in the final report.

4. If groundwater is encountered during sampling, a groundwater monitoring well shall be established at the most downgradient sampling point. The well shall be developed by removing a minimum of four well volumes and a groundwater sample shall be obtained and analyzed.

5. The analytical results for all soil samples shall be expressed milligrams per kilogram (mg/kg), or micrograms per kilogram (ug/kg) as appropriate. Practical quantitation limits of 5-10 ug/kg (ppb) for volatile organics and 1 mg/kg (ppm) for the petroleum hydrocarbons must be achieved by the laboratory. Analytical results for groundwater samples shall be expressed in ug/l (ppb) and practical quantitation limits of .5-5 ug/l (ppb) for volatile organics, and 1 mg/l (ppm) for petroleum hydrocarbons must be achieved by the laboratory.

6. Analytical results shall be reported on laboratory letterhead and shall include the following information: a) The date the analysis was conducted; b) The method of extraction (if applicable); c) Detection limits for each analytical procedure and determiantion; d) The method of analysis; e) Signature of chemist certifying results.

7. All soil/groundwater samples obtained shall be handled and transported to laboratory in strict accordance with applicable EPA regulations utilizing chain-of-custody procedures. Chain-of-custody documentation shall be included in the final report.

8. If the soil/groundwater analysis indicates undefined contamination at the facility, additional sampling shall be required to define the vertical and lateral extent present.

9. A final report that contains all of the above required information shall be submitted to the office above within one (1) month from the sampling date or 180 days from the date of this permit, whichever is earlier.

ATTENTION CONTRACTOR

NOTIFICATION REQUIREMENTS

Pursuant to Los Angeles County Code, Section 11.78.045, and the Conditions and Limitations of the attached Hazardous Materials Underground Storage Closure Permit, you are required to complete **ALL** of the agency notifications indicated below within the time period specified prior to commencement of work on this closure.

[X] 72 HOURS - DEPARTMENT OF PUBLIC WORKS INDUSTRIAL WASTE ENGINEERING INSPECTOR:

FAILURE TO PROVIDE NOTICE AS REQUIRED ABOVE MAY RESULT IN PERMIT REVOCATION, ADDITIONAL SITE ASSESSMENT REQUIREMENTS, AND/OR ADMINISTRATIVE PENALTIES AS PROVIDED BY LAW.

COUNTY OF LOS ANGELES DEPARTMENT OF PUBLIC WORKS
WASTE MANAGEMENT DIVISION

CLOSURE REPORT REQUIREMENTS

A closure report shall be submitted to the County of Los Angeles Department of Public Works, Waste Management Division, P.O. Box 1460, Alhambra, California 91802-1460, containing:

1. File number of facility and closure permit number.

2. Plot plan to scale showing locations of tanks, sampling points, buildings, adjacent streets, and north arrow.

3. Description of methods for obtaining, handling, and transporting samples.

4. Time and date samples were obtained.

5. Soil sampling certification (including but not limited to soils classification, boring logs, sample procedures, sample locations, initiating chain-of-custody, and groundwater location) for UST closure shall be certified by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils. The certification must clearly state that all work was performed under the supervision of the person signing.

6. Chain-of-custody documentation initiated by person obtaining sample through person at CAL/EPA Department of Toxic Substance Control certified laboratory.

7. Disposal destination of tanks and evidence of legal disposal.

8. Analysis results by a State certified laboratory submitted on laboratory letterhead showing analysis date, methods of extraction, and methods of analysis.

9. Documentation as to deptn of groundwater at facility.

10. Manifests to document hazardous waste disposal of any removed soil and tank rinseate.

11. Any observations of site contamination.

12. Remedial action plan to mitigate contamination.

13. Report to be signed by a California registered geologist, a California certified engineering geologist, or a California registered civil engineer with sufficient experience in soils.

Re: Request For Regional Water Quality Control Board (RWQCB) Written Determination Of Underground Storage Tank Closure Status.
Air Products And Chemicals, Inc., 23320 S. Alameda St., Carson, CA 90810

Dear Sir:

As mentioned in my 18 November 1994 letter, Air Products and Chemicals, Inc. (Air Products) would like to return a portion of the above referenced leased property to ARCO Products Company (ARCO). In order to do so, Air Products must address ARCO's environmental concerns related to Air Products past use of the property. One of ARCO's concerns is that Air Products lacks documentation of final approval from the Los Angeles Department Of Public Works (LADPW) for proper underground storage tank removal/closure for three tanks. Since LADPW is only willing to grant closure for the entire site and is unwilling to do so at this time due to an ongoing remediation project, Air Products is unable to provide ARCO with the requested LADPW final closure approval. In light of this, ARCO would like a written determination from the Regional Water Control Board regarding the status of the three underground tanks that were removed.

ARCO's Dean Kirk informed me that you would like a copy of the report I sent to John Lewis of your office before making your determination. This report describes the soil contamination discovered in our hydrogen purification area. This contamination is not related to the three tanks that were removed from the portion of property that we now wish to return. Given the character of the contamination and the surface spill extent, it also does not appear to be related to two additional underground tanks that were removed from our purification area. All indications lead us to a contamination source of a past, aboveground, hydrocarbon condensate tank. We are about to commission a soil vapor extraction system to remove these hydrocarbons from the purification area.

Please review the enclosed report and issue me a letter regarding the RWQCB determination of the closure status of tanks # LD-IGD-1, LD-IGD-2, and 28.5. Keep in mind that this report and the hydrogen purification area is unrelated to the subject area to be returned and its three removed underground tanks. If you would like to discuss this with me, please call me at (610) 481-8867. My contact at ARCO has been Dean Kirk (310) 816-8421 and my contact at the LADPW has been Mohammed Farzan (818) 458-3980.

I would greatly appreciate your speedy response to this request to:

Robert Swigart

7201 Hamilton Boulevard
Allentown, PA 18195-1501

AIR PRODUCTS MANUFACTURING CORP. - 23320 SOUTH ALAMEDA STREET, CARSON (FILE NO. 95-089)

We reference your letter of April 27, 1995, and supporting documents requesting closure of underground tank locations LD-IGD-1, LD-IGD-2, and 28.5 at the subject site. The depth to first ground water at the subject site is about 30 feet below ground surface (bgs) and the depth of the underlying Gage aquifer is about 75 feet bgs.

Following are our determinations from reviewing your submittal:

1. Petroleum hydrocarbon soil contamination was identified:

   a. In the underground tank locations LD-IGD-1 and LD-IGD-2. The soil contamination was below the screening levels established in the Interim Site Assessment and Cleanup Guidebook, February 1995;

   b. In the southeastern half of the site, near the former underground tank 28.5. After removal and remediation of the underground tank No. 28.91, about 410 cubic yards of soil with up to 9,590 mg/kg TPH contamination were disposed where the former underground tank 28.5 was located;

   c. In the northern half of the site at the southeastern edge of the former vessel repair shop (up to 11,900 mg/kg TRPH, 167 mg/kg TPH gasoline, 9,880 mg/kg TRPH diesel, and 5 µg/kg benzene);

   d. In the former specialty gas plant area (up to 71,500 mg/kg TRPH, 19 mg/kg benzene, and 450 mg/kg toluene); and

   e. Along the western property line (up to 35,400 mg/kg TRPH, 7,170 mg/kg TPH gasoline, 50,400 mg/kg TPH diesel, 17.4 mg/kg benzene, 10.9 mg/kg toluene, 9.68 mg/kg ethylbenzene, 24.1 mg/kg xylene).

2. Also, a report by IT Corporation, dated August 12, 1993, indicated that the CAM-WET analytical results for arsenic in

L 71969

sample C-6 was 22 mg/ℓ. This exceeds the STLC for arsenic of 5 mg/ℓ. The report indicates that the portion of the berm near sample C-6 was removed but did not report any confirmation samples.

Based upon the information submitted we have determined that no further action is required for the underground tank locations LD-IGD-1 and LDIGD-2. However, before sign-off of underground tank location 28.5, we require that confirmation samples be collected in the area where the 410 cubic yards of soil containing up to 9,590 mg/kg TRPH was disposed.

In addition, the following is required:

1. Remediate the petroleum-hydrocarbon soil contamination in the northern half of the site - specifically at the southeastern edge of the repair shop, in the Specialty Gas Plant area, and along the western property line.

2. Collect confirmation samples from the cinder block berm noted in determination 2, above, and analyze for arsenic.

Submit a work plan to this Regional Board by October 31, 1995, addressing the two requirements, above. Please call Keith Elliott at (213) 266-7614 if you have any questions.

J.E. ROSS, Unit Chief

7201 Hamilton Boulevard
Allentown, PA 18195-1501

AIR PRODUCTS MANUFACTURING CORP. - 23320 SOUTH ALAMEDA STREET, CARSON (FILE NO. 100.315)

We reference your letter of October 26, 1995, responding to our letter dated September 21, 1995, and requesting closure of the underground tank No. 28.5. Based upon the information provided, the following are our determinations:

1. Your letter indicates that soil sample S5 (ND for STLC arsenic), located underneath concrete sample C6, was collected and analyzed to confirm that the contamination identified in sample C6 (22 mg/kg for STLC arsenic) was removed. The confirmation sample requested in our September 21, 1995, letter is no longer required.

2. Total petroleum hydrocarbon (TPH) up to 210 mg/kg was identified in soil samples collected from underground tank No. 28.5. This contamination is below our screening levels for site remediation, therefore, no further action is required regarding this underground tank.

3. After removal and remediation of the underground tank No. 28.91, about 410 cubic yards of soil with up to 7,400 mg/kg TPH, possibly weathered crude oil, was disposed towards the eastern border of the property at an unknown location. The disposal location of this contaminated soil must be located before closure of underground tank No, 28.1, and final site closure may be granted.

4. We will place in abeyance the requirement for additional investigation and remediation of the facility pending completion of the current soil vapor extraction system remediation activities. However, prior to site closure, ARCO and Air Products must provide sufficient evidence showing that site activities have not contributed to the petroleum-hydrocarbon contaminants identified in site soils out-side the influence of the vapor extraction system.

In addition, your letter requested citing information regarding benzene and toluene soil contamination in the former specialty gas plant area. The report of the closure of the spent caustic tank, dated September 1, 1993, identified up to 91 mg/kg benzene, 450 mg/kg toluene, 320 mg/kg xylene, 57 mg/kg ethylbenzene, and 3,540 mg/kg TPH in site soils. However, we acknowledge that a soil vapor extraction system is present at the site to remediate these contaminants.

L77969

Submit a work plan to collect confirmation samples and perform the above required investigation 30 days prior to completion of the vapor extraction activities at the site. Please call Keith Elliott at (213) 266-7614 if you have any questions.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GRANT DEED AND ENVIRONMENTAL RESTRICTION

The undersigned Grantor declares that documentary transfer tax is not shown pursuant to Section 11932 of the California Revenue and Taxation Code, as amended.

FOR AND IN CONSIDERATION OF THE SUM OF TEN DOLLARS ($10.00) AND OTHER GOOD AND VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, BP WEST COAST PRODUCTS LLC, a Delaware limited liability company ("BPPNA"), with its principal place of business at 501 Westlake Park Blvd., Houston, Texas 77079, and ATLANTIC RICHFIELD COMPANY, a Delaware corporation, successor in interest to Atlantic Richfield Company, a Pennsylvania corporation, formerly known as The Atlantic Refining Company, a Pennsylvania corporation, successor by merger to Richfield Oil Corporation, a Delaware corporation ("ARCO"), with its principal place of business at 501 Westlake Park Blvd., Houston, Texas 77079 (ARCO, together with BPPNA, are hereinafter collectively referred to as, "Grantor"), does hereby grant, bargain, sell and convey to TESORO REFINING & MARKETING COMPANY LLC, a Delaware limited liability company, with its principal place of business at 100 Ridgewood Parkway, San Antonio, Texas 78259, ("Grantee"), the real property located in the City of Carson and County of Los Angeles, State of California described as follows, together with all buildings, fixtures and real property improvements owned

by Grantor located thereon (the "Property"), together with all right, title and interest, if any, of Grantor in and to any streets and roads abutting the Property to the center lines thereof, plus all the estate and rights of Grantor in and to any easements, rights of way, rights, appurtenances and other privileges appurtenant to the Property on the terms and conditions set forth herein:

See attached Exhibit A-1, as to the Property being conveyed by BPPNA, and Exhibit A-2, as to the Property being conveyed by ARCO, both of which are incorporated by reference to this document.

To reduce risks to human health and/or the environment and to permit application of environmental corrective action standards or other protective activities that are consistent with applicable law, this conveyance is made by Grantor and accepted by Grantee on the express condition and subject to the restrictions, notices, acknowledgments and covenants set forth in Exhibit B attached hereto and incorporated by reference to this document.

With respect only to the portion of the Property described as "Parcel E" on Exhibit A-1 ("Parcel E"), Parcel E is hereby conveyed subject to the following:

(a) As required pursuant to the Grant Deed by and between Carson Redevelopment Agency, a public body, corporate and politic, as grantor, and BPPNA, as grantee, recorded March 2, 2009, as Instrument No. 20090286245, in the Recorder's Office of Los Angeles County, California, with respect to Parcel E, Grantee herein covenants by and for himself or herself, and his or her heirs, executors, administrators, and assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Parcel E herein conveyed, nor shall Grantee himself or herself or any person claiming under or through him or her, establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, or vendees in Parcel E herein conveyed. The foregoing covenants shall run with the land of Parcel E; and

(b) Parcel E is hereby conveyed to Grantee subject to the Restrictions as defined and as set forth in that certain Covenant to Restrict Use of Property Environmental Restriction by and between City of Carson Redevelopment Agency and the Department of Toxic Substances Control, recorded December 21, 2005, as Instrument No. 05-3142785, in the Recorder's Office of Los Angeles County, California, and such Restrictions are hereby incorporated by reference.

The express and implied warranties of Grantor under this deed are made to Grantee only, do not extend to third parties and are subject to (a) all non-delinquent general and special taxes; (b) all matters of record, including without limitation, all covenants, conditions, restrictions, rights of way, easements, and reservations of record; (c) all building and zoning ordinances, laws, regulations and restrictions by municipal or other governmental authority; (d) all matters which would be disclosed by a survey or inspection of the Property; and (e) such facts of which Grantee has actual notice.

Exhibit A-1 to Grant Deed

Legal Description
(BP Products North America Inc.)

Parcel A:

Parcel 1:

The Northeasterly 640.00 feet of that portion of Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, Records of said County lying Southwesterly of the Southerly line of the land as described in the Document recorded September 9, 1998 as Instrument No. 98-1608470, Official Records.

Except therefrom that portion of said land lying Southwesterly of a line parallel with and distant 348.00 feet, as measured at right angles , from said Southwesterly line of said Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 87.00 feet, as measured at right angles, from the Northeasterly line of said Lot 1, as shown and described as Parcel 1 under Certificate of Compliance, recorded December 27, 2006, as Instrument No. 06-2876653, of Official Records.

Parcel 2:

That portion of the Northeasterly 640.00 feet of that portion of Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, Records of said County lying Southwesterly of the Southerly line of the land as described in the Document recorded September 9, 1998 as Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 348.00 feet, as measured at right angles , from said Southwesterly line of said Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 87.00 feet, as measured at right angles, from the Northeasterly line of said Lot 1, as shown and described as Parcel 2 under Certificate of Compliance, recorded December 27, 2006, as Instrument No. 06-2876653, of Official Records.

Parcel 3:

That portion of Lot 1 as shown on Map of Tract 10844, in the City of Carson, County of Los Angeles, State of California, recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County, described as follows:

Beginning at a point on a line that is parallel with and distant Easterly 40 feet, measured at right angles, from the Westerly line of said Lot 1, distant South 17°09'45" West thereon 557.25 feet from the Northerly line of said Lot 1; Thence Southeasterly leaving said parallel line, along the arc of a curve concave Northeasterly having a radius of 317.72 feet, (a radial line to said curve at said Point of Beginning bears South 55°40'05" West) through an angle of 8°34'50", a distance of 47.58 feet; Thence of South 42°54'45", tangent to last described curve, 37.33 feet; Thence South 51°05'01" East, 42.49 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 317.72 feet; Thence Southeasterly along the arc of last described curve, through an angle of 17°38'16", a distance of 97.62 feet; Thence South 21°18'23" West, 20.00 feet, to a point on a curve, concave Northeasterly, having a radius of 317.72 feet, (a radial line to last said curve at said point bears South 28°35'28" West); Thence Southeasterly, along the arc of last described

curve, through an angle of 11°25'43", a distance of 63.37 feet; Thence South 72°50'15" East, tangent to last described curve, 397.68 feet to the beginning of a tangent curve, concave Southwesterly having a radius of 342.72 feet; Thence Southeasterly along the arc of last described curve, through an angle of 62°09'45", a distance of 371.83 feet; Thence South 10°40'30" East, tangent to last described curve 3.30 feet to the beginning of a tangent curve concave Westerly, having a radius 492.53 feet; Thence Southerly, along, the arc of last described curve, through an angle of 6°21'36", a distance of 54.69 feet; Thence South 4°18'55" East, tangent to last described curve, 209.89 feet to the beginning of a tangent curve, concave Easterly, having a radius of 621.78 feet; Thence Southerly, along the arc of last described curve, through an angle of 6°21'35", a distance of 69.02 feet to a point on a line that is parallel with and distant Westerly 35.00 feet measured at right angles, from the Easterly line of said Lot 1; Thence South 10°40'30" East, along last said parallel line, 558.57 feet to the beginning of a tangent curve, concave Westerly, having a radius of 397.24 feet; Thence Southerly, leaving said parallel line, among the arc of last described curve, through an angle of 12°39'00", a distance of 87.70 feet; Thence South 1°58'30" West, tangent to last described curve, 182.31 feet to the beginning of a tangent curve, concave Easterly, having a radius of 621.78 feet; Thence Southerly along the arc of last described curve, through an angle of 6°21'35", a distance of 69.02 feet; Thence South 85°36'55" West, 25.00 feet; Thence North 4°23'05" West, 27.00 feet to the beginning of a tangent curve, concave Easterly, having a radius of 404.64 feet; Thence Northerly, along the arc of last described curve, through an angle of 6°21'35", a distance of 44.91 feet; Thence North 1°58'30" East, tangent to last described curve, 181.31 feet to the beginning of a tangent curve, concave Westerly, having a radius of 370.24 feet; Thence Northerly, along the arc of last described curve, through an angle of 12°39'00" a distance of 81.85 feet to a point in a line that is parallel with and distant Westerly 61.50 feet, measured at right angles, from said Easterly line of Lot 1; Thence North 10°40'30" West, along said parallel line, tangent to last described curve, 476.47 feet; Thence leaving said parallel line, South 82°30'18" West, 12.09 feet to a point on a curve, concave Westerly, having a radius of 372.24 feet (a radial line to said curve at said point bears North 82°30'18" East); Thence Northerly, along the arc of last described curve, through an angle of 3°10'48", a distance of 20.66 feet; Thence North 10°40'30" West, tangent to last described curve, 24.46 feet; Thence North 4°18'55" West, 317.15 feet to the beginning of a tangent curve, concave Westerly, having a radius of 462.68 feet; Thence Northerly, along the arc of last described curve through an angle of 6°21'35", a distance of 51.36 feet; Thence North 10°40'30" West, tangent to last described curve, 3.30 feet to the beginning of a tangent curve, concave Southwesterly, having a radius of 312.72 feet; Thence Northwesterly, along the arc of last described curve, through an angle of 62°09'45", a distance of 339.28 feet; Thence North 72°50'15" West, tangent to last described curve, 397.63 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 347.72 feet; Thence Northwesterly, along the arc of last described curve, through an angle of 29°55'30", a distance of 181.61 feet; Thence North 42°54'45" West, tangent to last described curve, 80.31 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 347.72 feet; Thence Northwesterly, along the arc last described curve, through an angle of 4°44'49", a distance of 28.81 feet to a point on the aforesaid line that is parallel with and distant Easterly 40 feet, measured at right angles, from the Westerly line of said Lot 1; Thence North 17°09'45" East, along last said parallel line, 37.34 feet to the Point of Beginning.

Parcel B:

Lot 2 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County.

Except therefrom that portion of said land described in the Document recorded September 5, 1958 as Instrument No. 3766 of Official Records.

Also except that portion of said land described in the Document recorded October 5, 1962 as Instrument No. 5504, of Official Records.

Also except therefrom that portion of said land described in the Deed to the County of Los Angeles, recorded September 1, 1966 as Instrument No. 2394, of Official Records.

The above described land is a portion of and shown as Parcel B of "Notice of Lot Merger No. 253-11 – Certificate of Compliance", recorded December 14, 2012, as Instrument No. 20121936995, of Official Records.

Parcel C:

Parcels 1, 2 and 3 of Parcel Map No. 23139, in the City of Carson, County of Los Angeles, State of California, as shown on Map filed in Book 248, Pages 63 through 67 of Parcel Maps, in the Office of the Registrar-Recorder of said County.

Parcel E:

Parcel 1 of Parcel Map No. 61063, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 355, Pages 81 through 83, inclusive, of Maps, in the Office of the County Recorder of said County.

Parcel F:

That portion of the 398.11 acre tract, in the Rancho San Pedro, in the City of Carson, County of Los Angeles, State of California, allotted to Ana Josefa Dominguez De Guyer in Case No. 3284 of the Superior Court of said County, described as follows:

Beginning at the intersection of the Southerly line of 223rd Street, formerly Wilmington Street, 66 feet wide, as shown on the Partition Map filed in said Case No. 3284 with a line that is parallel with and distant Westerly 250 feet, measured at right angles from the Westerly line of the right-of-way of the Pacific Electric Railway Company (San Pedro Branch); Thence parallel with said Westerly line South 17°01'48" West 972.54 feet; Thence parallel with said 223rd Street South 89°45'25" West 523.61 feet to a line that is parallel with and distant Westerly 750 feet from said Westerly line; Thence parallel with said Westerly line North 17°01'48" East 972.54 feet to said Southerly line of 223rd Street; Thence along said street North 89°45'25" East 523.61 feet to the Point of Beginning.

Parcel I:

Parcel 1:

That portion of the 398.11 acre tract in Rancho San Pedro, in the City of Carson, County of Los Angeles, State of California, allotted to the Josefa Dominguez De Guyer, by Final Degree of Partition of a portion of said Rancho, had in Los Angeles County Superior Court Case No. 3284, being that portion of the 25 feet parcel of land described in the Deed to Watson Land Company,

recorded in Book 15504, Page 179 of Official Records of said County, lying Easterly of the Westerly line of Los Angeles County Flood Control District Channel, 250 feet wide, as said Westerly line is described in Easement recorded in Book 19501, Page 324 of Official Records of said County.

Excepting therefrom all oil and mineral rights, provided, however, the foregoing rights and the exercise thereof are and shall be subject to the following limitations, to-wit: Neither the grantor nor anyone claiming under or through the grantor shall have or exercise any right of entry upon or through said real property except beneath a depth of 200 feet below the present surface of said real property, nor to in any wise affect the surface use of said real property by the grantee, as reserved by Dominguez Estate Company, a Corporation by Deed recorded January 8, 1957, as Document No. 2030, in Book 53297 Page 140, Official Records.

Parcel J:

Parcel 1:

That portion of the Ana Josefa Dominguez De Guyer 398.11 acre allotment in the Partition of a part of the Rancho San Pedro, in the City of Carson, in the County of Los Angeles, State of California, as shown on Map filed in Case No. 3284, of the Superior Court of the State of California, in and for the County of Los Angeles, bounded as follows:

On the Northeast and Southwest by the Northeasterly and Southwesterly lines of the 250 foot wide strip of land as described in Deed to Los Angeles County Flood Control District recorded on August 29, 1942 as Document No. 20 in Book 19537, Page 152, Official Records, in the Office of the County Recorder of said County, and also shown as Los Angeles County Flood Control "Dominguez Channel" on Sheet No. 3 of the Map of Tract No. 10844, recorded in Book 301, Pages 37 to 39 inclusive of Maps, in the Office of the County Recorder of said County; on Northwest by the Southeasterly boundary line of the land conveyed to County Sanitation District No. 8 of Los Angeles County by Deed recorded on October 25, 1958 as Document No. 3918, in Book D-254, Page 463, of said Official Records; and on the South by the Northerly line of the 25 foot wide strip of land conveyed to Watson Land Company by Deed dated November 2, 1937 and recorded in Book 15504, Page 179, Official Records.

Except that portion within the lines of the 25 foot wide strip of land as described in Deed to Watson Land Company recorded on April 20, 1945 as Document No. 57 in Book 21890, Page 191, Official Records.

Parcel 2:

That portion of the Ana Josefa Dominguez De Guyer 398.11 acre allotment in the Partition of a part of the Rancho San Pedro, in the City of Carson, in the County of Los Angeles, State of California, as shown on Map filed in Case No. 3284, of the Superior Court of the State of California, in and for the County of Los Angeles, included within the lines of the 25 foot wide strip of land as described in Deed to Watson Land Company recorded on April 20, 1945 as Document No. 57 in Book 21890, Page 191, Official Records, in the Office of the County Recorder of said County.

Parcel K:

Parcels 1, 2 and 4 of Parcel Map No. 1363, in the City of Carson, County of Los Angeles, State of California, as per map filed in Book 31, Page 13, of Parcel Maps, in the Office of the County Recorder of said County.

Except all oil, gas and other hydrocarbons and other minerals in, under or recoverable from said land, and the right to explore, mine, drill and operate for the same and to produce and remove the same, but without the right to enter upon the surface of said land for said purposes, as excepted by Richfield Oil Corporation, a Corporation, in deed recorded June 14, 1960, as Instrument No. 1384, in Book D-877, Page 131, Official Records.

Also except all oil, gas and other hydrocarbon substances and all other minerals in, under or recoverable from said land, and the right to explore, mine, drill and operate for the same to produce and remove same, but without the right to enter upon the surface of said land for said purpose, as excepted in the deed from Richfield Oil Corporation, a Corporation, recorded June 22, 1964, as Instrument No. 5314, in Book D-2519, Page 270, Official Records.

Also excepting all oil, gas and other hydrocarbon substances and all other minerals in, under or recoverable from said real property hereinabove described, and the right to explore, mine, drill and operate for the same and to produce and remove the same, but without the right to enter upon the surface of said real property hereinabove described for said purpose, as reserved by Atlantic Richfield Company, a Pennsylvania corporation, (formerly The Atlantic Refining Company, successor to Richfield Oil Corporation, a Corporation by merger), in deed recorded July 13, 1970, as Instrument No. 3144, in Book D4770, Page 868, Official Records.

Parcel L:

That portion of the 398.11 acre lot tract allotted to Ana Josefa Dominguez DeGuyer, by Decree of Partition of the Rancho San Pedro entered in Case No. 3284, Superior Court, Los Angeles County, in the City of Carson, County of Los Angeles, State of California, being a portion of the 250 foot strip of land described in the deed from White Star Land Company, recorded in Book 2977, Page 115, Official Records, bounded by the following described lines:

Beginning at a point in the Easterly line of said 250 foot strip of land, distant Southwesterly thereon 88.02 feet from its intersection with the Southerly line of 233rd Street, 66 feet wide (formerly Wilmington Street); thence Southwesterly 707 feet along said Easterly line to a point in a curve concave to the Northwest and having a radius of 343.39 feet; thence Southwesterly along said curve 243.02 feet, more or less, to a point in a line parallel with and distant Northerly 35 feet, measured at right angles from the Southerly line of said 250 foot strip of land distant Easterly 54.93 feet along said parallel line from a point in the Easterly line of the 50 foot strip of land described in the deed to Johns-Manville Products Company, recorded in Book 21842, Page 395, Official Records, in the Office of the County Recorder of said County; thence Westerly along said parallel line 54.93 feet to said Easterly line; thence Northeasterly 935.88 feet along said last mentioned Easterly line to a point in the Southerly line of said 223rd Street; thence Easterly along said Southerly line of said street 194.04 feet; thence Southerly in a direct line 84.73 feet to the point of beginning.

Parcel M:

That portion of the 398.11 acre lot tract allotted to Ana Josefa Dominguez DeGuyer, by Decree of Partition of the Rancho San Pedro entered in Case No. 3284, Superior Court, Los Angeles County, in the City of Carson, County of Los Angeles, State of California, described as follows:

Being that certain parcel of land bounded on the North by the South line of the 25 foot parcel of land described in deed to Watson Land Company recorded in Book 15504 Page 179, of Official Records of said county;

On the South by the North line of that certain parcel of land described in deed to Johns-Mansville Products Corporation, recorded in Book 19497 Page 374 of Official Records of said county and on the Westerly prolongation of said North line;

On the West by the Westerly line of the Los Angeles County Flood Control Easement, 250 feet wide, as said easement is described and recorded in Book 19438 Page 355 of Official Records of said county and

Said land is shown and described as Lot C, under Certificate of Compliance, recorded December 24, 2007, as Instrument No. 2007-2824658, of Official Records.

Except therefrom that portion of said land described as Lots A and B, under Certificate of Compliance, recorded December 24, 2007, as Instrument No. 2007-2824658, of Official Records.

The above described land is a portion of and shown as Parcel M of "Notice of Lot Merger No. 253-11 – Certificate of Compliance", recorded December 14, 2012, as Instrument No. 20121936995, of Official Records.

Exhibit A-2 to Grant Deed

Legal Description
(Atlantic Richfield Company)

Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per map recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County.

Except that portion of said land described in the deed to Los Angeles County Flood Control District, a body corporate and politic, recorded October 9, 1961, as Instrument No. 4182, Official Records.

Also except that portion of said land described in the deed to Los Angeles County Flood Control District, a body corporate and politic, recorded July 14, 1970, as Instrument No. 2618, of Official Records.

Also except that portion of said land described in the deed to Stauffer Chemical Company, a Delaware Corporation, recorded December 21, 1973, as Instrument No. 279, of Official Records.

Also except that portion of said land described in the deed to the County of Los Angeles, recorded July 24, 1995, as Instrument No. 95-1197702, of Official Records.

Also except that portion of said land described in the deed to BP West Coast products LLC, a Delaware limited liability company, recorded February 22, 2002, as Instrument No. 02-0419284, of Official Records.

Also except that portion of said land described in the Quitclaim Deed to the Los Angeles County Flood Control District, a body corporate and politic, recorded June 26, 2003, as Instrument No. 03-1836063, of Official Records.

Exhibit B to Grant Deed

Environmental Restrictions

1. Background Information: Purpose and Intent. Certain Hazardous Substances (as defined in Paragraph 2 below), may be present at, on and underneath the Property. Grantor and Grantee agree that (i) the terms of this Exhibit B (the "Environmental Restrictions") are necessary to protect present and future human health and safety and the environment and (ii) the Environmental Restrictions are a covenant running with the land as provided in California Civil Code Section 1471 and other applicable law.

2. Definitions. As used herein, "Hazardous Substances" means (i) any chemicals, materials or substances in any form, whether solid, liquid, gaseous, semisolid, or any combination thereof, whether waste materials, raw materials, chemicals, finished products, by-products, or any other materials or articles, which are listed, defined or otherwise designated as hazardous, toxic or dangerous under Environmental Law (as defined below), including asbestos, and lead-containing paints or coatings, (ii) any petroleum, petroleum derivatives, petroleum products or by-products of petroleum refining or any oxygenate in any fuel, Released (as defined below) into the environment, and (iii) any other chemical, substance or waste that is regulated by Environmental Laws. "Environmental Law" or "Environmental Laws" as used herein means all federal, state and local laws (including common law) relating to the protection of natural resources, wildlife, human health, safety or well being, property, the environment or workplace health or safety, including the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. §§ 9601 et seq. ("CERCLA"), the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. §§ 6901 et seq., the Clean Air Act, as amended, 42 U.S.C. §§ 7401 et seq., the Emergency Planning and Community Right-to-know Act, as amended, 42 U.S.C. §§ 11001 et seq., the Federal Water Pollution Control Act, as amended, 33 U.S.C. §§ 1251 et seq., the Oil Pollution Act of 1990, 33 U.S.C. §§ 2701 et seq., the Occupational Safety and Health Act of 1970, 29 U.S.C. §§ 651 et seq., applicable underground storage tank system laws, including California Health & Safety Code §§ 25280, et seq., and California Health & Safety Code Section 25359.7. "Released" as used herein shall have the meaning set forth in Environmental Laws, including CERCLA and any analogous state law, statute, code, regulation, rule, injunction, judgment, ordinance, order, decree, ruling, charge, permit, or other restriction), but does not include migration or movement of Hazardous Substances already present in the environment.

3. Successors Bound. The Environmental Restrictions are and shall be binding on Grantee and all successive owners of the Property. Every person who now or hereafter owns, occupies or acquires any right, title, or interest in or to the Property is and shall be conclusively deemed to have consented and agreed to the Environmental Restrictions, whether or not any reference to this Deed is contained in the instrument by which such person acquired an interest in the Property.

4. Beneficiary of Environmental Restrictions. The Environmental Restrictions are for the benefit of, and shall be enforceable by, Grantor and Grantor's successors and assigns and Grantee and Grantee's successors and assigns.

5. Prohibited Uses. The Property shall not be used or occupied (if used or occupied at all) for residential purposes, and additionally, no part of the Property shall be used for the purpose of operating a child care or elder care facility, a nursing home facility or hospice, a medical or dental facility, a school, a church or other place of worship, a park, jail, a juvenile detention center, a hotel, motel, or other lodging facility, zoo, animal shelter, animal treatment or care facility, kennel, horse boarding or riding stable, food processing facility, greenhouse, plant nursery, farm or livestock housing, overnight camping, recreational vehicle park, swimming, fishing, hunting or trapping, dry cleaners or a hospital.

6. Groundwater Restriction. No water supply wells of any kind (including, without limitation, water wells used for drinking, bathing or other human consumption purposes and water wells used for livestock, farming or irrigation) shall be installed or used on the Property (collectively, the "Groundwater Exposure Restriction"); provided, however, that the Groundwater Exposure Restriction does not prohibit the installation or use of any compliance wells or any groundwater monitoring, recovery or extraction wells or similar devices used for or related to the performance of any remediation or environmental corrective action work on the Property now or in the future.

7. Excavation of Soils/Materials. Excavation of any sort shall be performed in a manner to minimize personal contact with excavated soil/materials and all excavated soil/materials shall be managed in accordance with all applicable Environmental Laws.

8. Notice of the Presence of Hazardous Substances. Prior to the sale, lease or sublease of the Property, the owner, lessor, or sublessor shall give the buyer, lessee or sublessee, as applicable, notice that Hazardous Substances are located on or beneath the Property, as required by California Health and Safety Code Section 25359.7, including any future amendments or revisions thereof.

9. Incorporation into Deeds and Leases. Without in any way limiting paragraph 3 above, the Environmental Restrictions shall be incorporated by reference in each and every deed and lease for the Property.

10. Rules of Construction. As used herein, (i) all references to the term "Property" shall be deemed to be followed by the phrase "or any portion thereof"; (ii) all references to the word "including" shall be deemed to be followed by the phrase ", without limitation,"; and (iii) the term "person" includes natural persons, corporations, partnerships, limited liability companies and any other private or public legal entity.

11. Severability. If any term or provision of the Environmental Restrictions is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms and provisions shall continue in full force and effect.

GRANT DEED AND ENVIRONMENTAL RESTRICTION

The undersigned Grantor declares that documentary transfer tax is not shown pursuant to Section 11932 of the California Revenue and Taxation Code, as amended.

FOR AND IN CONSIDERATION OF THE SUM OF TEN DOLLARS ($10.00) AND OTHER GOOD AND VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, BP WEST COAST PRODUCTS LLC, a Delaware limited liability company ("BPPNA"), with its principal place of business at 501 Westlake Park Blvd., Houston, Texas 77079, and ATLANTIC RICHFIELD COMPANY, a Delaware corporation, successor in interest to Atlantic Richfield Company, a Pennsylvania corporation, formerly known as The Atlantic Refining Company, a Pennsylvania corporation, successor by merger to Richfield Oil Corporation, a Delaware corporation ("ARCO"), with its principal place of business at 501 Westlake Park Blvd., Houston, Texas 77079 (ARCO, together with BPPNA, are hereinafter collectively referred to as, "Grantor"), does hereby grant, bargain, sell and convey to TESORO REFINING & MARKETING COMPANY LLC, a Delaware limited liability company, with its principal place of business at 100 Ridgewood Parkway, San Antonio, Texas 78259, ("Grantee"), the real property located in the City of Carson and County of Los Angeles, State of California described as follows, together with all buildings, fixtures and real property improvements owned

by Grantor located thereon (the "Property"), together with all right, title and interest, if any, of Grantor in and to any streets and roads abutting the Property to the center lines thereof, plus all the estate and rights of Grantor in and to any easements, rights of way, rights, appurtenances and other privileges appurtenant to the Property on the terms and conditions set forth herein:

See attached Exhibit A-1, as to the Property being conveyed by BPPNA, and Exhibit A-2, as to the Property being conveyed by ARCO, both of which are incorporated by reference to this document.

To reduce risks to human health and/or the environment and to permit application of environmental corrective action standards or other protective activities that are consistent with applicable law, this conveyance is made by Grantor and accepted by Grantee on the express condition and subject to the restrictions, notices, acknowledgments and covenants set forth in Exhibit B attached hereto and incorporated by reference to this document.

With respect only to the portion of the Property described as "Parcel E" on Exhibit A-1 ("Parcel E"), Parcel E is hereby conveyed subject to the following:

(a) As required pursuant to the Grant Deed by and between Carson Redevelopment Agency, a public body, corporate and politic, as grantor, and BPPNA, as grantee, recorded March 2, 2009, as Instrument No. 20090286245, in the Recorder's Office of Los Angeles County, California, with respect to Parcel E, Grantee herein covenants by and for himself or herself, and his or her heirs, executors, administrators, and assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, color, creed, religion, sex, marital status, national origin or ancestry in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Parcel E herein conveyed, nor shall Grantee himself or herself or any person claiming under or through him or her, establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees, or vendees in Parcel E herein conveyed. The foregoing covenants shall run with the land of Parcel E; and

(b) Parcel E is hereby conveyed to Grantee subject to the Restrictions as defined and as set forth in that certain Covenant to Restrict Use of Property Environmental Restriction by and between City of Carson Redevelopment Agency and the Department of Toxic Substances Control, recorded December 21, 2005, as Instrument No. 05-3142785, in the Recorder's Office of Los Angeles County, California, and such Restrictions are hereby incorporated by reference.

The express and implied warranties of Grantor under this deed are made to Grantee only, do not extend to third parties and are subject to (a) all non-delinquent general and special taxes; (b) all matters of record, including without limitation, all covenants, conditions, restrictions, rights of way, easements, and reservations of record; (c) all building and zoning ordinances, laws, regulations and restrictions by municipal or other governmental authority; (d) all matters which would be disclosed by a survey or inspection of the Property; and (e) such facts of which Grantee has actual notice.

Exhibit A-1 to Grant Deed

Legal Description
(BP Products North America Inc.)

Parcel A:

Parcel 1:

The Northeasterly 640.00 feet of that portion of Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, Records of said County lying Southwesterly of the Southerly line of the land as described in the Document recorded September 9, 1998 as Instrument No. 98-1608470, Official Records.

Except therefrom that portion of said land lying Southwesterly of a line parallel with and distant 348.00 feet, as measured at right angles , from said Southwesterly line of said Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 87.00 feet, as measured at right angles, from the Northeasterly line of said Lot 1, as shown and described as Parcel 1 under Certificate of Compliance, recorded December 27, 2006, as Instrument No. 06-2876653, of Official Records.

Parcel 2:

That portion of the Northeasterly 640.00 feet of that portion of Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, Records of said County lying Southwesterly of the Southerly line of the land as described in the Document recorded September 9, 1998 as Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 348.00 feet, as measured at right angles , from said Southwesterly line of said Instrument No. 98-1608470, Official Records and lying Southwesterly of a line parallel with and distant 87.00 feet, as measured at right angles, from the Northeasterly line of said Lot 1, as shown and described as Parcel 2 under Certificate of Compliance, recorded December 27, 2006, as Instrument No. 06-2876653, of Official Records.

Parcel 3:

That portion of Lot 1 as shown on Map of Tract 10844, in the City of Carson, County of Los Angeles, State of California, recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County, described as follows:

Beginning at a point on a line that is parallel with and distant Easterly 40 feet, measured at right angles, from the Westerly line of said Lot 1, distant South 17°09'45" West thereon 557.25 feet from the Northerly line of said Lot 1; Thence Southeasterly leaving said parallel line, along the arc of a curve concave Northeasterly having a radius of 317.72 feet, (a radial line to said curve at said Point of Beginning bears South 55°40'05" West) through an angle of 8°34'50", a distance of 47.58 feet; Thence of South 42°54'45", tangent to last described curve, 37.33 feet; Thence South 51°05'01" East, 42.49 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 317.72 feet; Thence Southeasterly along the arc of last described curve, through an angle of 17°38'16", a distance of 97.62 feet; Thence South 21°18'23" West, 20.00 feet, to a point on a curve, concave Northeasterly, having a radius of 317.72 feet, (a radial line to last said curve at said point bears South 28°35'28" West); Thence Southeasterly, along the arc of last described

curve, through an angle of 11°25'43", a distance of 63.37 feet; Thence South 72°50'15" East, tangent to last described curve, 397.68 feet to the beginning of a tangent curve, concave Southwesterly having a radius of 342.72 feet; Thence Southeasterly along the arc of last described curve, through an angle of 62°09'45", a distance of 371.83 feet; Thence South 10°40'30" East, tangent to last described curve 3.30 feet to the beginning of a tangent curve concave Westerly, having a radius 492.53 feet; Thence Southerly, along, the arc of last described curve, through an angle of 6°21'36", a distance of 54.69 feet; Thence South 4°18'55" East, tangent to last described curve, 209.89 feet to the beginning of a tangent curve, concave Easterly, having a radius of 621.78 feet; Thence Southerly, along the arc of last described curve, through an angle of 6°21'35", a distance of 69.02 feet to a point on a line that is parallel with and distant Westerly 35.00 feet measured at right angles, from the Easterly line of said Lot 1; Thence South 10°40'30" East, along last said parallel line, 558.57 feet to the beginning of a tangent curve, concave Westerly, having a radius of 397.24 feet; Thence Southerly, leaving said parallel line, among the arc of last described curve, through an angle of 12°39'00", a distance of 87.70 feet; Thence South 1°58'30" West, tangent to last described curve, 182.31 feet to the beginning of a tangent curve, concave Easterly, having a radius of 621.78 feet; Thence Southerly along the arc of last described curve, through an angle of 6°21'35", a distance of 69.02 feet; Thence South 85°36'55" West, 25.00 feet; Thence North 4°23'05" West, 27.00 feet to the beginning of a tangent curve, concave Easterly, having a radius of 404.64 feet; Thence Northerly, along the arc of last described curve, through an angle of 6°21'35", a distance of 44.91 feet; Thence North 1°58'30" East, tangent to last described curve, 181.31 feet to the beginning of a tangent curve, concave Westerly, having a radius of 370.24 feet; Thence Northerly, along the arc of last described curve, through an angle of 12°39'00" a distance of 81.85 feet to a point in a line that is parallel with and distant Westerly 61.50 feet, measured at right angles, from said Easterly line of Lot 1; Thence North 10°40'30" West, along said parallel line, tangent to last described curve, 476.47 feet; Thence leaving said parallel line, South 82°30'18" West, 12.09 feet to a point on a curve, concave Westerly, having a radius of 372.24 feet (a radial line to said curve at said point bears North 82°30'18" East); Thence Northerly, along the arc of last described curve, through an angle of 3°10'48", a distance of 20.66 feet; Thence North 10°40'30" West, tangent to last described curve, 24.46 feet; Thence North 4°18'55" West, 317.15 feet to the beginning of a tangent curve, concave Westerly, having a radius of 462.68 feet; Thence Northerly, along the arc of last described curve through an angle of 6°21'35", a distance of 51.36 feet; Thence North 10°40'30" West, tangent to last described curve, 3.30 feet to the beginning of a tangent curve, concave Southwesterly, having a radius of 312.72 feet; Thence Northwesterly, along the arc of last described curve, through an angle of 62°09'45", a distance of 339.28 feet; Thence North 72°50'15" West, tangent to last described curve, 397.63 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 347.72 feet; Thence Northwesterly, along the arc of last described curve, through an angle of 29°55'30", a distance of 181.61 feet; Thence North 42°54'45" West, tangent to last described curve, 80.31 feet to the beginning of a tangent curve, concave Northeasterly, having a radius of 347.72 feet; Thence Northwesterly, along the arc last described curve, through an angle of 4°44'49", a distance of 28.81 feet to a point on the aforesaid line that is parallel with and distant Easterly 40 feet, measured at right angles, from the Westerly line of said Lot 1; Thence North 17°09'45" East, along last said parallel line, 37.34 feet to the Point of Beginning.

Parcel B:

Lot 2 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County.

Except therefrom that portion of said land described in the Document recorded September 5, 1958 as Instrument No. 3766 of Official Records.

Also except that portion of said land described in the Document recorded October 5, 1962 as Instrument No. 5504, of Official Records.

Also except therefrom that portion of said land described in the Deed to the County of Los Angeles, recorded September 1, 1966 as Instrument No. 2394, of Official Records.

The above described land is a portion of and shown as Parcel B of "Notice of Lot Merger No. 253-11 – Certificate of Compliance", recorded December 14, 2012, as Instrument No. 20121936995, of Official Records.

Parcel C:

Parcels 1, 2 and 3 of Parcel Map No. 23139, in the City of Carson, County of Los Angeles, State of California, as shown on Map filed in Book 248, Pages 63 through 67 of Parcel Maps, in the Office of the Registrar-Recorder of said County.

Parcel E:

Parcel 1 of Parcel Map No. 61063, in the City of Carson, County of Los Angeles, State of California, as per Map recorded in Book 355, Pages 81 through 83, inclusive, of Maps, in the Office of the County Recorder of said County.

Parcel F:

That portion of the 398.11 acre tract, in the Rancho San Pedro, in the City of Carson, County of Los Angeles, State of California, allotted to Ana Josefa Dominguez De Guyer in Case No. 3284 of the Superior Court of said County, described as follows:

Beginning at the intersection of the Southerly line of 223rd Street, formerly Wilmington Street, 66 feet wide, as shown on the Partition Map filed in said Case No. 3284 with a line that is parallel with and distant Westerly 250 feet, measured at right angles from the Westerly line of the right-of-way of the Pacific Electric Railway Company (San Pedro Branch); Thence parallel with said Westerly line South 17°01'48" West 972.54 feet; Thence parallel with said 223rd Street South 89°45'25" West 523.61 feet to a line that is parallel with and distant Westerly 750 feet from said Westerly line; Thence parallel with said Westerly line North 17°01'48" East 972.54 feet to said Southerly line of 223rd Street; Thence along said street North 89°45'25" East 523.61 feet to the Point of Beginning.

Parcel I:

Parcel 1:

That portion of the 398.11 acre tract in Rancho San Pedro, in the City of Carson, County of Los Angeles, State of California, allotted to the Josefa Dominguez De Guyer, by Final Degree of Partition of a portion of said Rancho, had in Los Angeles County Superior Court Case No. 3284, being that portion of the 25 feet parcel of land described in the Deed to Watson Land Company,

recorded in Book 15504, Page 179 of Official Records of said County, lying Easterly of the Westerly line of Los Angeles County Flood Control District Channel, 250 feet wide, as said Westerly line is described in Easement recorded in Book 19501, Page 324 of Official Records of said County.

Excepting therefrom all oil and mineral rights, provided, however, the foregoing rights and the exercise thereof are and shall be subject to the following limitations, to-wit: Neither the grantor nor anyone claiming under or through the grantor shall have or exercise any right of entry upon or through said real property except beneath a depth of 200 feet below the present surface of said real property, nor to in any wise affect the surface use of said real property by the grantee, as reserved by Dominguez Estate Company, a Corporation by Deed recorded January 8, 1957, as Document No. 2030, in Book 53297 Page 140, Official Records.

Parcel J:

Parcel 1:

That portion of the Ana Josefa Dominguez De Guyer 398.11 acre allotment in the Partition of a part of the Rancho San Pedro, in the City of Carson, in the County of Los Angeles, State of California, as shown on Map filed in Case No. 3284, of the Superior Court of the State of California, in and for the County of Los Angeles, bounded as follows:

On the Northeast and Southwest by the Northeasterly and Southwesterly lines of the 250 foot wide strip of land as described in Deed to Los Angeles County Flood Control District recorded on August 29, 1942 as Document No. 20 in Book 19537, Page 152, Official Records, in the Office of the County Recorder of said County, and also shown as Los Angeles County Flood Control "Dominguez Channel" on Sheet No. 3 of the Map of Tract No. 10844, recorded in Book 301, Pages 37 to 39 inclusive of Maps, in the Office of the County Recorder of said County; on Northwest by the Southeasterly boundary line of the land conveyed to County Sanitation District No. 8 of Los Angeles County by Deed recorded on October 25, 1958 as Document No. 3918, in Book D-254, Page 463, of said Official Records; and on the South by the Northerly line of the 25 foot wide strip of land conveyed to Watson Land Company by Deed dated November 2, 1937 and recorded in Book 15504, Page 179, Official Records.

Except that portion within the lines of the 25 foot wide strip of land as described in Deed to Watson Land Company recorded on April 20, 1945 as Document No. 57 in Book 21890, Page 191, Official Records.

Parcel 2:

That portion of the Ana Josefa Dominguez De Guyer 398.11 acre allotment in the Partition of a part of the Rancho San Pedro, in the City of Carson, in the County of Los Angeles, State of California, as shown on Map filed in Case No. 3284, of the Superior Court of the State of California, in and for the County of Los Angeles, included within the lines of the 25 foot wide strip of land as described in Deed to Watson Land Company recorded on April 20, 1945 as Document No. 57 in Book 21890, Page 191, Official Records, in the Office of the County Recorder of said County.

Parcel K:

Parcels 1, 2 and 4 of Parcel Map No. 1363, in the City of Carson, County of Los Angeles, State of California, as per map filed in Book 31, Page 13, of Parcel Maps, in the Office of the County Recorder of said County.

Except all oil, gas and other hydrocarbons and other minerals in, under or recoverable from said land, and the right to explore, mine, drill and operate for the same and to produce and remove the same, but without the right to enter upon the surface of said land for said purposes, as excepted by Richfield Oil Corporation, a Corporation, in deed recorded June 14, 1960, as Instrument No. 1384, in Book D-877, Page 131, Official Records.

Also except all oil, gas and other hydrocarbon substances and all other minerals in, under or recoverable from said land, and the right to explore, mine, drill and operate for the same to produce and remove same, but without the right to enter upon the surface of said land for said purpose, as excepted in the deed from Richfield Oil Corporation, a Corporation, recorded June 22, 1964, as Instrument No. 5314, in Book D-2519, Page 270, Official Records.

Also excepting all oil, gas and other hydrocarbon substances and all other minerals in, under or recoverable from said real property hereinabove described, and the right to explore, mine, drill and operate for the same and to produce and remove the same, but without the right to enter upon the surface of said real property hereinabove described for said purpose, as reserved by Atlantic Richfield Company, a Pennsylvania corporation, (formerly The Atlantic Refining Company, successor to Richfield Oil Corporation, a Corporation by merger), in deed recorded July 13, 1970, as Instrument No. 3144, in Book D4770, Page 868, Official Records.

Parcel L:

That portion of the 398.11 acre lot tract allotted to Ana Josefa Dominguez DeGuyer, by Decree of Partition of the Rancho San Pedro entered in Case No. 3284, Superior Court, Los Angeles County, in the City of Carson, County of Los Angeles, State of California, being a portion of the 250 foot strip of land described in the deed from White Star Land Company, recorded in Book 2977, Page 115, Official Records, bounded by the following described lines:

Beginning at a point in the Easterly line of said 250 foot strip of land, distant Southwesterly thereon 88.02 feet from its intersection with the Southerly line of 233rd Street, 66 feet wide (formerly Wilmington Street); thence Southwesterly 707 feet along said Easterly line to a point in a curve concave to the Northwest and having a radius of 343.39 feet; thence Southwesterly along said curve 243.02 feet, more or less, to a point in a line parallel with and distant Northerly 35 feet, measured at right angles from the Southerly line of said 250 foot strip of land distant Easterly 54.93 feet along said parallel line from a point in the Easterly line of the 50 foot strip of land described in the deed to Johns-Manville Products Company, recorded in Book 21842, Page 395, Official Records, in the Office of the County Recorder of said County; thence Westerly along said parallel line 54.93 feet to said Easterly line; thence Northeasterly 935.88 feet along said last mentioned Easterly line to a point in the Southerly line of said 223rd Street; thence Easterly along said Southerly line of said street 194.04 feet; thence Southerly in a direct line 84.73 feet to the point of beginning.

Parcel M:

That portion of the 398.11 acre lot tract allotted to Ana Josefa Dominguez DeGuyer, by Decree of Partition of the Rancho San Pedro entered in Case No. 3284, Superior Court, Los Angeles County, in the City of Carson, County of Los Angeles, State of California, described as follows:

Being that certain parcel of land bounded on the North by the South line of the 25 foot parcel of land described in deed to Watson Land Company recorded in Book 15504 Page 179, of Official Records of said county;

On the South by the North line of that certain parcel of land described in deed to Johns-Mansville Products Corporation, recorded in Book 19497 Page 374 of Official Records of said county and on the Westerly prolongation of said North line;

On the West by the Westerly line of the Los Angeles County Flood Control Easement, 250 feet wide, as said easement is described and recorded in Book 19438 Page 355 of Official Records of said county and

On the East by the Westerly line of Pacific Electric Land Company, strip of land, 250 feet wide, as described in deed Recorded in Book 2845 Page 356, of Official Records of said county.

Said land is shown and described as Lot C, under Certificate of Compliance, recorded December 24, 2007, as Instrument No. 2007-2824658, of Official Records.

Except therefrom that portion of said land described as Lots A and B, under Certificate of Compliance, recorded December 24, 2007, as Instrument No. 2007-2824658, of Official Records.

The above described land is a portion of and shown as Parcel M of "Notice of Lot Merger No. 253-11 – Certificate of Compliance", recorded December 14, 2012, as Instrument No. 20121936995, of Official Records.

Exhibit A-2 to Grant Deed

Legal Description
(Atlantic Richfield Company)

Lot 1 of Tract No. 10844, in the City of Carson, County of Los Angeles, State of California, as per map recorded in Book 301, Pages 37, 38 and 39 of Maps, in the Office of the County Recorder of said County.

Except that portion of said land described in the deed to Los Angeles County Flood Control District, a body corporate and politic, recorded October 9, 1961, as Instrument No. 4182, Official Records.

Also except that portion of said land described in the deed to Los Angeles County Flood Control District, a body corporate and politic, recorded July 14, 1970, as Instrument No. 2618, of Official Records.

Also except that portion of said land described in the deed to Stauffer Chemical Company, a Delaware Corporation, recorded December 21, 1973, as Instrument No. 279, of Official Records.

Also except that portion of said land described in the deed to the County of Los Angeles, recorded July 24, 1995, as Instrument No. 95-1197702, of Official Records.

Also except that portion of said land described in the deed to BP West Coast products LLC, a Delaware limited liability company, recorded February 22, 2002, as Instrument No. 02-0419284, of Official Records.

Also except that portion of said land described in the Quitclaim Deed to the Los Angeles County Flood Control District, a body corporate and politic, recorded June 26, 2003, as Instrument No. 03-1836063, of Official Records.

Exhibit B to Grant Deed

Environmental Restrictions

1. Background Information: Purpose and Intent. Certain Hazardous Substances (as defined in Paragraph 2 below), may be present at, on and underneath the Property. Grantor and Grantee agree that (i) the terms of this Exhibit B (the "Environmental Restrictions") are necessary to protect present and future human health and safety and the environment and (ii) the Environmental Restrictions are a covenant running with the land as provided in California Civil Code Section 1471 and other applicable law.

2. Definitions. As used herein, "Hazardous Substances" means (i) any chemicals, materials or substances in any form, whether solid, liquid, gaseous, semisolid, or any combination thereof, whether waste materials, raw materials, chemicals, finished products, by-products, or any other materials or articles, which are listed, defined or otherwise designated as hazardous, toxic or dangerous under Environmental Law (as defined below), including asbestos, and lead-containing paints or coatings, (ii) any petroleum, petroleum derivatives, petroleum products or by-products of petroleum refining or any oxygenate in any fuel, Released (as defined below) into the environment, and (iii) any other chemical, substance or waste that is regulated by Environmental Laws. "Environmental Law" or "Environmental Laws" as used herein means all federal, state and local laws (including common law) relating to the protection of natural resources, wildlife, human health, safety or well being, property, the environment or workplace health or safety, including the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, 42 U.S.C. §§ 9601 et seq. ("CERCLA"), the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. §§ 6901 et seq., the Clean Air Act, as amended, 42 U.S.C. §§ 7401 et seq., the Emergency Planning and Community Right-to-know Act, as amended, 42 U.S.C. §§ 11001 et seq., the Federal Water Pollution Control Act, as amended, 33 U.S.C. §§ 1251 et seq., the Oil Pollution Act of 1990, 33 U.S.C. §§ 2701 et seq., the Occupational Safety and Health Act of 1970, 29 U.S.C. §§ 651 et seq., applicable underground storage tank system laws, including California Health & Safety Code §§ 25280, et seq., and California Health & Safety Code Section 25359.7. "Released" as used herein shall have the meaning set forth in Environmental Laws, including CERCLA and any analogous state law, statute, code, regulation, rule, injunction, judgment, ordinance, order, decree, ruling, charge, permit, or other restriction), but does not include migration or movement of Hazardous Substances already present in the environment.

3. Successors Bound. The Environmental Restrictions are and shall be binding on Grantee and all successive owners of the Property. Every person who now or hereafter owns, occupies or acquires any right, title, or interest in or to the Property is and shall be conclusively deemed to have consented and agreed to the Environmental Restrictions, whether or not any reference to this Deed is contained in the instrument by which such person acquired an interest in the Property.

4. Beneficiary of Environmental Restrictions. The Environmental Restrictions are for the benefit of, and shall be enforceable by, Grantor and Grantor's successors and assigns and Grantee and Grantee's successors and assigns.

5. Prohibited Uses. The Property shall not be used or occupied (if used or occupied at all) for residential purposes, and additionally, no part of the Property shall be used for the purpose of operating a child care or elder care facility, a nursing home facility or hospice, a medical or dental facility, a school, a church or other place of worship, a park, jail, a juvenile detention center, a hotel, motel, or other lodging facility, zoo, animal shelter, animal treatment or care facility, kennel, horse boarding or riding stable, food processing facility, greenhouse, plant nursery, farm or livestock housing, overnight camping, recreational vehicle park, swimming, fishing, hunting or trapping, dry cleaners or a hospital.

6. Groundwater Restriction. No water supply wells of any kind (including, without limitation, water wells used for drinking, bathing or other human consumption purposes and water wells used for livestock, farming or irrigation) shall be installed or used on the Property (collectively, the "Groundwater Exposure Restriction"); provided, however, that the Groundwater Exposure Restriction does not prohibit the installation or use of any compliance wells or any groundwater monitoring, recovery or extraction wells or similar devices used for or related to the performance of any remediation or environmental corrective action work on the Property now or in the future.

7. Excavation of Soils/Materials. Excavation of any sort shall be performed in a manner to minimize personal contact with excavated soil/materials and all excavated soil/materials shall be managed in accordance with all applicable Environmental Laws.

8. Notice of the Presence of Hazardous Substances. Prior to the sale, lease or sublease of the Property, the owner, lessor, or sublessor shall give the buyer, lessee or sublessee, as applicable, notice that Hazardous Substances are located on or beneath the Property, as required by California Health and Safety Code Section 25359.7, including any future amendments or revisions thereof.

9. Incorporation into Deeds and Leases. Without in any way limiting paragraph 3 above, the Environmental Restrictions shall be incorporated by reference in each and every deed and lease for the Property.

10. Rules of Construction. As used herein, (i) all references to the term "Property" shall be deemed to be followed by the phrase "or any portion thereof"; (ii) all references to the word "including" shall be deemed to be followed by the phrase ", without limitation,"; and (iii) the term "person" includes natural persons, corporations, partnerships, limited liability companies and any other private or public legal entity.

11. Severability. If any term or provision of the Environmental Restrictions is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms and provisions shall continue in full force and effect.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by NV5 were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	NA	**Latitude:**	33.811482 33° 48' 41" North

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by NV5 were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Solid Waste Disposal Provider:	Unknown		
Hazardous Waste Disposal:	Unknown		
Reason for Performing ESA	Due diligence in advance of long-term lease		

Are you aware of any environmental liens that have been filed or recorded under Federal State, local or tribal law? If yes provide details.
□ Yes ☒ No

Are you aware of any activity or land use limitations (AULs), engineering controls or land use limitations that have been filed or recorded under Federal, State, Local or Tribal Law? If yes, provide details.
□ Yes ☒ No

Do you have any specialized knowledge of the property or experience related to the subject property or nearby properties so that you would have knowledge of chemicals or processes used at the property? If yes, provide details.
□ Yes ☒ No

Is the acquisition price differing from the fair market value of the property?
□ Yes ☒ No
If there is a difference, have you considered a lower price is due to contamination known or believed to be present at the property? Please provide details.
□ Yes ☒ No

As the user of this ESA, based on your knowledge and experience with the property, are there any obvious indications of the presence or likely presence of contamination at the property? If yes, provide details.
□ Yes ☒ No

Are you aware of any information that would help the environmental professional identify conditions indicative of releases or potential releases, including past uses of the property, uses of chemicals at the property, or environmental cleanups that have taken place at the property? If yes, provide details.
□ Yes ☒ No

Do you know of any pending, past or threatened litigation or administrative proceedings related to hazardous substances or petroleum products on, in or from the property or any notices regarding possible violations of environmental laws or possible liability related to hazardous substances or petroleum products? If yes, provide details.
□ Yes ☒ No

Are there any chemical storage areas or hazardous material storage areas located at the subject property?
If yes, provide details.
□ Yes □ No Unknown, but I do not believe so

Are there any current or historical Aboveground Storage Tanks or Underground Storage Tanks? If yes, provide details.
□ Yes □ No
Unknown, but I do not believe so

Are there any current or historical wastewater treatment systems, clarifier/interceptor systems, or grease trap systems associated with the subject property? If yes, provide details.

□ Yes □ No Unknown

Are you aware of the existence or location of the following documents related to the subject property, and if yes, can copies be made available for review by the Environmental Professional?

□ Previous Environmental Site Assessment reports or Investigation reports
□ Environmental Permits
□ Registrations for underground storage tanks (USTs)
□ Spill Prevention Containment and Contingency Plans (SPCC)
□ Stormwater Pollution Prevention Plans (SWPPP)
□ Risk Assessments
□ Hydrogeologic Reports related to the property or surrounding area
□ Notices of Violation from governmental agencies regarding past or current violations of environmental laws or related to environmental liens encumbering the property
□ Hazardous waste manifests or generation reports
□ Recorded land and activity use limitations
□ Geotechnical Studies Unknown to all

EXECUTIVE SUMMARY

Alta Environmental LP, an NV5 Company (NV5) has completed an Environmental Route Assessment of the proposed Avocet Gen-Tie Route in Carson, Los Angeles County, California (Route). The purpose of this assessment was to evaluate the environmental condition of the Route to identify potential environmental concerns that might be encountered during construction of the Gen-Tie. The assessment was performed using similar methods as a conventional Phase I Environmental Site Assessment conducted in accordance with the ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).

Route and Vicinity Description

The approximately 1.25-mile Route originates on the eastern portion of the property currently occupied by the Lovco Recycling facility (a concrete recycling plant). The Route proceeds east across the Dominguez Channel, then crosses the western boundary of the Union Pacific Railroad ICTF Intermodal Transport Terminal facility (ICTF Intermodal Terminal). The Route continues east to the eastern boundary of the ICTF Intermodal Terminal and then proceeds north along the Terminal's eastern boundary. The Route then proceeds to the east along the northern boundary of the existing electrical substation where the Route terminates.

The Route is located within an area of primarily industrial/heavy transportation land use. Industrial users in the western portion of the Route include an Air Products facility and a Marathon Coke facility. After crossing the Dominguez Channel, the middle portion of the Route traverses and then runs north along the eastern boundary of the ICTF Intermodal Terminal facility (a rail and tractor trailer yard). The eastern portion of the Route is bordered to the east by land developed with power transmission lines and the electrical substation where the Route terminates.

Route Land Use History

Historical resources reviewed during this assessment allowed the land uses of the properties along the Route and adjoining the Route to be traced from the present back to 1896 when the area was undeveloped and/or cultivated for agricultural use. Rail lines were constructed along the central portion of the Route in the 1940's and utilized by the military as part of the Wilmington Classification and Hold facility, a loading and storage area for military equipment awaiting shipment. By the 1950's, several small commercial structures were constructed west of the Route origin along Alameda Street, as well as the Dominguez Channel, which the Route crosses just east of the Route origin. In the 1960's, the western adjoining property to the Route origin was developed with a hydrogen plant, a drag strip (automotive racetrack) was constructed along the central portion of the Route, and the electrical substation and associated transmission lines were constructed along the eastern portion of the Route. In the 1980's the present-day ICTF Intermodal Terminal (rail and tractor trailer yard) was constructed near the central and eastern portions of the Route. In the 1990's and early 2000's the hydrogen plant on the western adjoining property to the Route origin was demolished and replaced with the present-day concrete recycling facility.

Areas of Potential Concern

This assessment identified the following areas of potential concern along and adjoining the Route. These areas are identified on Figure 2, along with corresponding Map ID numbers identifying the tenant where each area of potential concern is located. An area of potential concern is a property where current or former use, storage, or disposal of a hazardous substance or petroleum product was identified along with a likely potential for impact to the Route in the event of a release. Unless specifically identified, an area of potential concern does not indicate that a release has occurred, only that there is the potential to impact the Route if a release has occurred.

Properties Crossed by the Route

The Montrose Chemical Corporation/The Dominguez Channel
Potential Contaminants of Concern/Impact: DDT in Sediment

The Montrose Chemical Corporation was a former dichlorodiphenyltrichloroethane (DDT) manufacturing plant located approximately five miles northwest of the Route origin location. It was discovered that the DDT manufacturing work conducted at the facility had severely contaminated soil and groundwater beneath and nearby the former plant property. In 1989, the facility was listed as an EPA Superfund site. The major transport mechanisms identified were reported as storm water runoff and aerial emissions. Contamination is reported to have flowed off the facility into the Kenwood Stormwater Drainage Pathway and subsequently into the Dominguez Channel, which is crossed by the Route. The contamination is a well-known regional issue which in the vicinity of the Route primarily consists of impacted sediment.

Former Wilmington Classification and Holding Yard/Present-Day Union Pacific ICTF Intermodal Terminal (Figure 2 Map ID 4)
Potential Contaminants of Concern/Impact: Petroleum hydrocarbons, volatile organic compounds, heavy metals, pesticides, herbicides, polychlorinated biphenyls, and unexploded ordinance.

The Route crosses the present-day ICTF Intermodal Terminal, a large active rail and tractor trailer yard. The ICTF terminal is constructed on a portion of the former Wilmington Classification and Holding Yard, a former military equipment loading and storage facility that operated in the 1940's. A Site Survey Summary Sheet prepared by the Army Corps of Engineers in 1999 noted that "*various types and sources of subsurface soil contamination have been identified in the railyard portion of the site*." The types and locations of the soil contamination were not reported.

The Site Survey Summary Sheet also included an evaluation for hazard severity associated with unexploded ordinance. The property was given a rating of "4" indicating negligible hazard; however, a score of "5" indicating a marginal hazard was also listed as recommended. According to records reviewed, this designation was primarily determined on the use of warehouse 17 (located over one mile from the Route) as an ordinance depot.

While specific areas of contamination at the ICTF Intermodal Terminal were not reported, it is not uncommon to encounter areas of shallow soil impacted from past releases/spills of hazardous substances and petroleum products as well as pesticides and herbicides applied as part of facility maintenance.

Properties Adjoining or Nearby the Route

ARCO (Marathon Carson) Refinery, 1801 Sepulveda Boulevard, Carson, California 90810 (Figure 2 Map ID 7).
Potential Contaminants of Concern/Impact: Petroleum Hydrocarbons and Volatile Organic Compounds in Groundwater.

This facility is located approximately 500 feet west of the Route origin, across Alameda Street and the Union Pacific Railroad. According to the CPS-SLIC database, the facility is currently undergoing remediation of total petroleum hydrocarbons in groundwater. According to documents available on Geotracker, a release was identified at the facility as early as 1990 and various site investigations and remediation continue to be conducted for light non-aqueous phase liquid (LNAPL). The lateral and vertical extent of LNAPL contamination is still being assessed.

Based on the documented extent of LNAPL contamination to groundwater, distance of the facility with respect to the Route, and the inherent environmental risk associated oil refining operations, this facility is considered to represent an area of potential concern for the Route.

Air Products, 23300 South Alameda Street (Figure 2 Map ID 1) and Lovco Recycling, 23320 South Alameda Street (Figure 2 Map ID 2).
Potential Contaminants of Concern/Impact: Petroleum Hydrocarbons, Volatile Organic Compounds, and lead in shallow soils.

The properties adjoining the Route origin to the north and to the west were previously developed with a hydrogen gas plant between the early 1960's to the late 1990's. Historical records reviewed identified evidence of past hazardous substances or petroleum products use at the hydrogen gas plant including documented releases of petroleum hydrocarbons and VOCs from former USTs and hydrogen production operations at the facility, along with evidence of potential off-site hydrocarbon releases and regional groundwater impact. These potential impacts were reported at both the portion of the hydrogen production facility located on the northern adjoining property, and at the portion of the facility located at the western adjoining property (primarily from surficial spills near a waste oil UST located on the eastern portion of the facility). These releases were subsequently remediated and granted case closure/no further action status. Additionally, during subsequent redevelopment 1,200 cubic yards of petroleum and lead impacted soil was excavated and removed from the northern adjoining property. Due to the elevated concentrations of soluble lead, the soil was classified as a California designated hazardous waste.

1 INTRODUCTION

The purpose of this assessment was to evaluate the environmental condition of the Route to identify potential environmental concerns that might be encountered during construction of the Gen-Tie within the Route. The assessment was conducted using similar methods as a conventional Phase I Environmental Site Assessment performed in accordance with the ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).

This report was prepared exclusively for use by Avocet Energy Storage, LLC. This report may not be relied upon by any other person or entity without NV5's express written consent. The information, conclusions, and recommendations presented in this report apply to conditions existing at certain locations when services were performed and are intended only for the specific purposes, locations, time frames and project parameters indicated. NV5 cannot be responsible for the impact of any changes in environmental standards, practices, or regulations after performance of services.

1.1 Objectives

NV5's objective for this environmental assessment was to identify conditions indicative of releases and threatened releases of hazardous substances or petroleum products on, at, or adjacent to the Route.

1.2 Services

NV5 performed the following services to assess the Route:

1. Reviewed historical sources of information;
2. Reviewed Federal, State, Tribal, and local government records;
3. Visually inspected the Route and the adjoining properties;

1.3 Assumptions

NV5 has assumed the following for the purposes of this assessment:

1. Information provided during any interview (written or oral) was accurate and correct;
2. Database information reviewed was accurate and correct;
3. Historical information reviewed was accurate and correct;
4. Information reviewed at any governmental agency was accurate and correct;
5. Groundwater flow and depth to groundwater, unless otherwise specified by on-site well data, or well data from adjacent properties are assumed based on contours depicted on the United States Geological Survey (USGS) Topographic Maps; and
6. The location and boundaries of the Route assessed in this report are consistent with the description of the Route provided to NV5 by the Client.

1.4 Limitations

This assessment is not intended to represent a Phase I ESA of the Route. While similar methods as described in the ASTM Standard Practice E1527-21 were used, this report does not constitute an ASTM or AAI compliant Phase I ESA. Interviews with current Route occupants and local regulatory officials, review of environmental lien documentation, a reconnaissance of non-publicly accessible portions of the Route were not conducted due to the nature of the assessment and authorized scope of services.

Additionally, this assessment specifically excludes assessment of the following:

1. Asbestos and asbestos-containing building materials;
2. Biological agents;
3. Cultural and historic resources;
4. Ecological resources;
5. Endangered species;
6. Health and safety;
7. Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment;
8. Industrial hygiene;
9. Lead-Based Paint;
10. Lead in Drinking Water;
11. Mold;
12. Radon;
13. Regulatory compliance; and
14. Wetlands.

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the assessment. The conclusions presented in this report are based solely on the services described herein, and not on scientific tasks or procedures beyond the scope of agreed-to services or the time and budgeting restraints imposed by the Client. No subsurface exploratory drilling or sampling of any kind was conducted under the scope of this work. Unless specifically stated otherwise in this report, no chemical or physical analyses have been performed during the course of the assessment.

Some of the information provided in this report is based upon review of available documents, records, and maps held by the appropriate government and private agencies. This information is subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted. As applicable, NV5 has relied in good faith upon representations and information furnished by individuals with respect to operations and existing property conditions, to the extent that they have not been contradicted by data obtained from other sources. Accordingly, NV5 accepts no responsibility for any deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed.

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the Route and vicinity. NV5 makes no warranty, express or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

This assessment report is not, and should not be construed as, a warranty or guarantee about the presence or absence of hazardous substances or petroleum products that may affect the Route.

All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on

the date and time of the Route visit. Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.5 Terms

The following terms are used in this report:

- "Route" refers to the property located along the Gen-Tie pathway described in Section 2;
- "Adjoining Property" refers to the property sharing a common boundary with the Route.
- "Area of Potential Concern" – An area of potential concern is a property where current or former use, storage, or disposal of a hazardous substance or petroleum product was identified along with a likely potential to impact to the Route in the event of a release. Unless specifically identified, an area of potential concern does not indicate that a release has occurred, only that the potential exists to impact the Route if a release has occurred.
- "Migrate/migration" – For the purposes of this practice, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.
- "Hazardous Substances" – The term "hazardous substance" is used here in general accordance with its use as defined in the following regulations:

    -- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended; and

    -- Superfund Amendment and Reauthorization Act (SARA) of 1986, as amended.

- The words "impact" or "impacted" are used to mean the effect or result of a release of a hazardous substance or petroleum product at a property crossed by the Route or adjoining the Route. Search distances for government agency lists were those designated by the ASTM Standard E 1527-21.

1.6 Environmental Professionals

This document has been prepared by an Environmental Professional as defined by the EPA, 40 CFR Part 312.10. All work performed for this assessment was performed by or under the direct supervision of an Environmental Professional.

2 ROUTE DESCRIPTION

Mr. Eric Fraske of NV5 conducted a visual reconnaissance of the Route on April 10, 2023. The descriptions provided herein are based on observations made during that visit. Representative photographs are included in Appendix A. Route location and layout maps depicting the areas and features described in the following sections are also provided in Figures 1 and 2.

Observations of areas and features discussed below were made from publicly accessible portions of the Route and other adjoining properties when accessible, noting that some portions of the Route were not accessible. Additionally, features that were previously identified during a previous Phase I ESA of an adjoining property are also included for reference.

2.1 Route Location and Use Along the Route

The approximately 1.25-mile Route originates at the property currently occupied by the Lovco Recycling facility (a concrete recycling plant). The Route proceeds east across the Dominguez Channel, then crosses the western boundary of the Union Pacific Railroad ICTF Intermodal Transport Terminal facility (ICTF Intermodal Terminal). The Route continues east to the eastern boundary of the ICTF Intermodal Terminal and then proceeds north along the Terminal's eastern boundary. The Route then proceeds to the east along the northern boundary of the existing electrical substation where the Route terminates.

The Route is located within an area of primarily industrial/heavy transportation land use. Industrial users in the western portion of the Route include an Air Products facility and a Marathon Coke facility. After crossing the Dominguez Channel, the middle portion of the Route traverses and then proceeds north along the eastern boundary of the ICTF Intermodal Terminal facility (a rail and tractor trailer yard). The eastern portion of the Route is bordered to the east by land developed with power transmission lines and the electrical substation where the Route terminates.

2.2 Utility Service Providers

Local utility service providers in the Route vicinity include:

Electricity	Southern California Edison
Water	Los Angeles Department of Water and Power
Gas	Southern California Gas Company
Sewer	Los Angeles County Sanitation District

No water wells or septic systems were observed within the accessible portions of the Route.

2.3 Hazardous Materials and Chemical Storage Areas

Route:

ICTF Intermodal Terminal: A review of the ICTF Intermodal Terminal Map (Figure 3) indicates that the Route passes through the "Roadability" area at the terminal, which may be a vehicle servicing or inspection facility. While these types of activities generally suggest potential chemical or petroleum product storage and use, access to the Terminal property was not permitted during inspection of the Route. Therefore, the storage or use of hazardous materials or other chemicals could not be determined.

Adjoining Properties:

Lovco Recycling: During a previous Phase I ESA completed by NV5 in September 2021 for the Lovco Recycling facility, various 5-gallon containers of motor oil and hydraulic oil, and smaller containers of household cleaners, resin, and fuel were observed within the onsite building and in the work area east of the building. No evidence of leaks, spills, or staining was observed in the vicinity of the containers.

Drums

No drums were observed along the Route or adjoining properties.

2.4 Storage Tanks

2.4.1 Aboveground Storage Tanks (ASTs)

Route: No ASTs were observed along the Route.

Adjoining Property:

Lovco Recycling: During a previous Phase I ESA completed in September 2021 for the Lovco Recycling facility, a 1,000-gallon diesel AST was reported on the western portion of the property located between the onsite building and the guard shack. The AST was reported to be used for refueling loaders and excavator equipment onsite. Minimal soil staining was reportedly observed on the southern side of the AST in the 2021 Phase I ESA report.

2.4.2 Underground Storage Tanks (USTs)

No evidence of USTs along the Route or adjoining properties was observed.

2.4.3 Septic Tanks

No evidence of septic tanks was observed along the Route or on adjoining properties.

2.5 Polychlorinated Biphenyls

Several electrical transformers were observed to be present on adjoining properties along the Route. The transformers appeared to be in good condition with no evidence of past leaks or releases.

2.6 Floor Drains, Sumps, and Clarifiers

No floor drains or sumps were observed along the Route or adjoining properties.

2.7 Back-up Power Generation

No fixed back-up power generators were observed along the Route or adjoining properties.

2.8 Cooling Towers

No cooling towers were observed along the Route or adjoining properties.

2.9 Elevators, Lifts and Compactors

No elevators, lifts, or compactors were observed along the Route or adjoining properties.

2.10 Odors

No strong, pungent, or noxious odors indicative of a past release of hazardous substances or petroleum products were noted along the Route or adjoining properties.

2.11 Pools of Liquid

No standing surface water or other pits, ponds, or lagoons potentially containing hazardous substances or petroleum products were identified along the Route or adjoining properties.

2.12 Surface Staining

No surface staining indicative of a past release of hazardous substances or petroleum products was observed along the Route or adjoining properties.

2.13 Stressed Vegetation

No significantly stressed vegetation or other indications of potential release of hazardous substances or petroleum products were observed along the Route or adjoining properties.

2.14 Solid Waste

Route: No evidence of solid waste disposal was observed along the Route.

Adjoining Property: Various amounts of trash and household debris (furniture, tires, general refuse, etc.) appear to have been dumped along the roadside adjacent to Intermodal Way. This material did not appear hazardous in nature, buy may require special handling and/or disposal if removed during construction.

2.15 Adjacent Properties

The Route is located within an area of mixed industrial/heavy transportation use. The following land uses in the near vicinity of the Route were observed:

Direction	Property Name	Property Address	Business Operation
At Route Origin			
North:	Air Products	23300 South Alameda Street	Hydrogen Plant
West:	Lovco Recycling	23320 South Alameda Street	Concrete Recycling Yard
South:	Marathon	23500 South Alameda Street	Coke Storage Facility
Proceeding East Across the Dominguez Channel			
North	Union Pacific ICTF Intermodal Terminal	2401 East Sepulveda Boulevard	Rail and Tractor-Trailer Yard
South	Union Pacific ICTF Intermodal Terminal	2401 East Sepulveda Boulevard	Rail and Tractor-Trailer Yard
Proceeding North Along ICTF Terminal Eastern Boundary			
West	Union Pacific ICTF Intermodal Terminal	2401 East Sepulveda Boulevard	Rail and Tractor-Trailer Yard
East	Vacant Land	NA	Vacant Land with Electrical Transmission Lines
Route Termination			
South:	Electrical Substation	NA	Electrical Substation

3 ROUTE SETTING

3.1 Topographic

The 2018 United States Geological Survey (USGS), [Poway] 7.5 Minute Topographic Quadrangle map of the Route and surrounding vicinity was reviewed. The elevation of the Route varies between elevations of approximately 17 feet and 37 feet above mean sea level (msl). The Route and surrounding topography area is generally flat, but slopes toward the south. A copy of the USGS 7.5 Minute Topographic Quadrangle Map is included in Appendix B.

3.2 Regional Geology and Hydrology

The following description of regional geology and hydrology was developed based on regional information presented in the Environmental Data Resources (EDR) GeoCheck report (2023) and on the Regional Water Quality Control Board's online *Geotracker* database.

According to United States Department of Agriculture (USDA) soil data published in the EDR GeoCheck report, soil underlying the Route is classified as *Urban Land*. Soil of this type is variable in character and has variable infiltration rates (Appendix B).

NV5 reviewed groundwater data published on the Geotracker database for multiple current cleanup program facilities located near the Route. Based on a review of published groundwater monitoring data, groundwater is reported to be present at depths ranging from approximately 10 to 80 feet below ground surface (bgs) with a flow direction towards the west-northwest. According to environmental investigation reports prepared for the northern adjoining Air Products property (See Section 4.2), a perched groundwater zone was observed at the depth of approximately 30 feet bgs, followed by a deeper groundwater zone at depths of 60 to 100 feet bgs.

3.3 Flood Plain

According to Federal Emergency Management Agency flood plain data presented in the route-specific EDR Geocheck Report, the Route is located within the boundaries of a 500-year flood zone (EDR, 2023). The EDR Report is presented as Appendix B.

3.4 Wetlands

According to map data published on the United States Department of Fish and Wildlife (USFW) National Wetlands Inventory (https://www.fws.gov/wetlands/data/mapper.html), a Riverine area is mapped along the portion of the Route that crosses the concrete-lined Dominguez Channel (Appendix C).

3.5 Water Bodies

The Dominguez Channel is located immediately east of the location of the Route origin between the present-day Lovco Recycling facility and the ICTF Intermodal Terminal.

3.6 Oil and Gas Wells

According to the State of California Geologic Energy Management Division (CalGEM) Online Mapping System, no oil/gas wells were identified on the Route or adjoining properties (Appendix C). A plugged dry

hole (Cy 3) is located to the South of the Route near the intersection of Intermodal Way and Sepulveda Boulevard.

4 RECORDS REVIEW

4.1 Governmental Databases

NV5 contracted EDR to perform a radius search of governmental databases for this project. The distribution of listed facilities with respect to the Route is tabulated and mapped in EDR's Radius Map Report, presented in Appendix B. The reader is referred to the Map Findings Summary Table, which can be found on Page 4 of EDR's report.

NV5 conducted a review of the above-referenced database reports and provides the following findings based on facilities and listings that have the potential to impact the Route. Our findings are based on the assumption that a hazardous substance or petroleum product released to the subsurface generally does not migrate laterally within unsaturated soil for a significant distance. Although a hazardous substance or petroleum product can migrate in groundwater in a generally down-gradient direction, there are limitations to this interpretation such as groundwater depth, soil lithology and other subsurface barriers.

4.1.1 Route Database Findings

EDR's report identified the following listings for facilities that the Route crosses.

Facility Name & Address	**Montrose Chemical Corporation 20201 S. Normandie Avenue Torrance, California 90502**	**Located East of Route Origin**
Database(s) Listed: NPL, SEMS, RCRA-LQG, US Eng Controls, US Inst Controls, ROD, PRP, ICIS, Consent, FINDS		
• The Montrose Chemical Corporation was a former dichlorodiphenyltrichloroethane (DDT) manufacturing plant located approximately five miles northwest of the Route origin location. It was discovered that the DDT manufacturing work conducted at the facility had severely contaminated soil and groundwater beneath and near the former plant property. In 1989, the facility was listed as an EPA Superfund site. The major transport mechanisms identified were reported as storm water runoff and aerial emissions. Contamination is reported to have flowed off the facility into the Kenwood Stormwater Drainage Pathway and subsequently into the Dominguez Channel, which is crossed by the Route. The contamination is a well-known regional issue which in the vicinity of the Route primarily consists of impacted sediment.		

Facility Name & Address	**Wilmington Classification and Holding Yard**	**Figure 2 - Map ID 4**
Database(s) Listed: Formerly Used Defense Site (FUDS), Envirostor, UXO (Unexploded Ordinance)		
This former facility was mapped in the EDR report as being located within the boundaries of the ICTF Intermodal Terminal. According to information published on the Envirostor Website, "*The site consisted of 274.57 acres, located 2401 E. Pacific Coast Highway in Wilmington, California. The property composing the Wilmington Class and Hold Yard was acquired by the U.S. Army during 1943 and 1944. Records indicate*		

Facility Name & Address	Wilmington Classification and Holding Yard	Figure 2 - Map ID 4

that 272.23 acres were leased from the City of Los Angeles (W2972-eng-755 and W04- 193-eng-4356). Approximately 1.55 acres were leased from the Watson Land Company (W04-193-eng2652). Approximately 0.65 acres were acquired by permit and 0.142 acres were acquired by license from various private and public parties. Thus, a total of 274.57 acres were acquired by the Army for the Wilmington Class and Hold Yard. In the months of May and June 1946, 201.57 and 73 acres, respectively, of the Class and Hold Yard were declared surplus. On 1 July 1946 the land was transferred to the Veterans Administration. The City of Los Angeles currently owns 272.23 acres of the former Wilmington Class and Hold Yard. The property is currently being beneficially used for many purposes. Business located on the property include shipping container platforms for loading and unloading container onto railroad cars (Intermodal Container and Transportation Facility), sulfur storage (California Sulfur Company), import and export operations (Import Dealers Service Corporation), warehouses (Port of Los Angeles, California Cartage Company, Inc.) and a refinery (Texaco).

The site was used by the U.S. Army as a loading and storage area for military equipment awaiting shipment. Improvements to the site, all constructed in 1943 and 1944, included three warehouses, a railroad spur, sewer, and water lines. The property, formerly known as Manuel Warehouse, is currently the site of the Cal Cartage, Inc., a container, and freight station that stores and distributes goods that arrive at the Port of Los Angeles from U.S. and international destinations. Goods stored and distributed at the facility include bulk cotton, copper, and other miscellaneous items. Cal Cartage occupies approximately the same area as the former Manuel Warehouse, which encompassed 85 acres. The southern boundary of Cal Cartage is Pacific Coast Highway; the northern boundary is Sepulveda Boulevard; the western Boundary is the Dominguez Channel and Union Pacific Railroad Line; and the eastern boundary is a Southern California Edison electrical tower transmission easement. Although Cal Cartage leases the Edison easement for storage, this easement is not part of the Wilmington Classification and Hold Yard or Manuel Warehouse site. There are three 200,000 square foot former DoD warehouses being beneficially used by Cal Cartage. These warehouses, currently numbered 13, 16, and 17 (formerly numbers 1, 2, and 3 respectively), were constructed in 1943 for the DoD. The LA Ordnance Depot occupied warehouse No. 17. The warehouses are surrounded by roadways, rail lines, and other miscellaneous facilities associated with importing and exporting of goods from the port. Some of the rail lines, constructed for DoD use, are being beneficially used. Large portions of the property are occupied by stored freight containers."

It was further noted on the Envirostor website that two USTs may have been installed on the north side of warehouse 17, located almost one mile southeast of the Route.

A Site Survey Summary Sheet, published on the Envirostor website, for the former facility that was prepared in 1999 noted "*various types and sources of subsurface soil contamination have been identified in the railyard portion of the site."* The types and locations of the soil contamination were not reported. The Site Survey Summary Sheet also included an evaluation for hazard severity associated with unexploded ordinance. The property was given a rating of "4" indicating negligible hazard; however, a score of "5" indicating a marginal hazard was also listed as recommended. This designation was primarily determined on the use of warehouse 17 (located over one mile from the Route) as an ordinance depot.

The Site status is listed as "Needs Evaluation as of July 1, 2005."

4.1.2 Adjoining Property Database Findings

EDR's report identified multiple adjoining properties. The details of these listings are presented as follows.

Facility Name & Address	**Air Products and Chemicals, Inc. 23320 South Alameda St Carson, California 90810**	**Northern Adjoining Property Figure 2 Map ID 1**
Database(s) Listed: HWTS, HIST UST, HAZNET, SWEEPS UST, EMI, FINDS, CPS-SLIC, LUST, CA FID UST, Los Angeles CO. HMS, CERS, RGA LUST, ENVIROSTOR, HIST CORTESE, CIWQS, ERNS		
• According to the HWTS and HAZNET databases, this facility generated hazardous waste, including laboratory waste chemicals, off-specification, aged or surplus organics, other inorganic solid waste, and waste oil and mixed oil from 1982 to 2000. In addition, in 1994 and 1995, the facility disposed of 0.75 and 4.82 tons, respectively, from a cleanup. • According to the HIST UST, SWEEPS UST and CA FID UST databases, a 500-gallon and 10,000-gallon diesel UST, a 6,000-gallon UST with unknown contents, a 2,000-gallon waste oil, and a 3,000-gallon gasoline UST are reported to be present at the facility. • According to the LUST and CPS-SLIC databases, a leaking UST was reported at the facility in 1993. The media affected was reported to be soil with hydrocarbon impacts. Based on the reported information, the facility was granted no further action status by the Los Angeles Regional Water Quality Control Board (LARWQCB) and has a Completed – Case Closed status as of September 25, 1997. • According to the CERS database, chemical storage facilities are present at the facility. No violations have been reported. • According to the Envirostor database, a preliminary assessment report was conducted for the facility in 1985 in response to reports of various chemical wastes (hydrocarbon solvents) being dumped into the channel. In 1989, a site screening and reassessment was completed for the facility. The facility was then referred to the LARWQCB in 1992. • According to the CIWQS database, an industrial stormwater construction permit was granted to the facility in 1998 and was reported to be terminated in 1999. • According to the ERNS database, in 1988, a release of 55 gallons of 5% potassium permanganate solution was released at this facility after a pipe connected to a scrubber broke. The material was contained and drummed for disposal. Based on NV5's review of environmental regulatory file information, these listings seem to be attributed to the operation at the northern adjoining property prior to the separation of the northern adjoining and western adjoining property land parcels.		

Facility Name & Address	**Tesoro Logistics Operations, LLC 23320 South Alameda St Carson, California 90745**	**Northern Adjoining Property Figure 2 Map ID 1**
Database(s) Listed: HWTS, ECHO, HAZNET, RCRA NONGEN/NLR.		
• According to the HWTS and HAZNET databases, this facility generated hazardous waste including organic solids and asbestos containing waste in 2019 from pipeline transportation of crude oil. • According to the RCRA NONGEN database, the facility is not a generator of hazardous wastes as of June 2019.		

Facility Name & Address	**Carson Liquid Hydrogen Plant 23320 South Alameda St Carson, California**	**Northern Adjoining Property Figure 2 Map ID 1**
Database(s) Listed: WMUDS/SWAT		
• According to the WMUDS/SWAT database, a passive waste treatment and disposal system operated at the facility. The primary waste type was reported as designated/influent or solid waste that poses a significant threat to water quality because of their high concentrations and manageable hazardous wastes. The facility was listed as a moderate threat to water quality based on the primary waste type. The facility was required to submit self-monitoring reports quarterly to the oversight agency (not listed). No other information is listed. Based on NV5's review of environmental regulatory file information, these listings seem to be attributed to the operation at the northern adjoining property prior to the separation of the northern adjoining and western adjoining property land parcels.		

Facility Name & Address	**Air Products and Chemicals, Inc. 23300 S. Alameda St Carson, California 90810**	**Northern Adjoining Property Figure 2 Map ID 1**
Database(s) Listed: RCRA-LQG, AST, HWTS, CERS HAZ WASTE, CERS TANKS, HAZNET, CERS		
This facility is located north of the Route origin location. • According to the RCRA-LQG database, this facility has been a large quantity generator of hazardous waste since March 2012. The types of waste generated at this facility included ignitable waste and corrosive waste. No violations were reported. • According to the HWTS and HAZNET databases, this facility disposed of hazardous waste, including laboratory waste chemicals, off-specification, aged or surplus organics, other inorganic solid waste, and waste oil and mixed oil from 1982 to 2000. In addition, in 1998, the facility disposed of approximately 1,761 tons of contaminated soil from site cleanups. • According to the CERS and CERS HAZ WASTE databases, chemical storage facilities are present at this facility. Violations were reported for the facility in 2017 for failure to complete and electronically submit a site map with all required content, failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer prior to placing the tank system in service, failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on facility at or above reportable quantities, and failure to revise, update and submit a Risk Management Plan. The facility returned to compliance for all violations in October 2017. • According to the AST and CERS TANKS databases, an AST is present at the facility.		

4.1.3 General Vicinity Database Findings

EDR's report identified multiple nearby facilities within applicable ASTM search radii. NV5 considered most of the listed facilities unlikely to impact the Route, based upon factors including (but not limited to):

- The nature of the listing;
- The use of the facility;
- When the facility was listed and its current listed status;
- The developmental density of the setting;
- The distance between the listed facility and the Route as related to the distance that releases are

likely to migrate based on local surface and subsurface drainage conditions;
- The presence of intervening drainage divides; and/or
- The inferred groundwater movement.

Three facilities of note are further discussed below.

Facility Name & Address	**ARCO (Marathon Carson) Refinery 1801 Sepulveda Carson, California 90810**	**500 Feet West of Route Origin**
Database(s) Listed: CPS-SLIC		
This facility is located approximately 500 feet west of the Route origin, across Alameda Street and the Union Pacific Railroad. According to the CPS-SLIC database, the facility is currently undergoing remediation of total petroleum hydrocarbons in groundwater. According to documents available on Geotracker, a release was identified at the facility as early as 1990 and various site investigations and remediation activities continue to be conducted for light non-aqueous phase liquid (LNAPL). The lateral and vertical extent of LNAPL contamination is still being assessed. Based on the documented extent of LNAPL contamination to groundwater, distance of the facility with respect to the Route, and the inherent environmental risk associated oil refining operations, this facility is considered to represent an area of potential concern.		

Facility Name & Address	**Olympus Terminals (Former Chemoil Tank Farm) 2365 E. Sepulveda Boulevard Carson, California**	**1,000 Feet South of Route**
Database(s) Listed: CPS-SLIC		
This facility is located approximately 1,000 feet south of the Route. According to the Geotracker website, *"This site is a petroleum terminal and tank farm. Groundwater is impacted by petroleum hydrocarbons with the primary contaminant being benzene at concentrations up to 1,800 ug/L (as of March 2009 sampling). Other groundwater contaminants include total xylenes, MTBE, TBA, and dissolved lead. The groundwater plume appears to be stable on-site, with the possible exception of MTBE transport to the west. The source area onsite is unknown*." NV5 reviewed the most recent (January 2023) groundwater sampling data for this facility, which indicated that the extent of groundwater impact is contained within the boundaries of the facility and does not extend beneath the Route. This facility is not considered to represent an area of potential concern.		

4.2 Regional Agency Offices

NV5 reviewed publicly available information published on various county and regional environmental regulatory agency websites for facilities located along and adjacent to the Route. Documentation obtained from regulatory agency requests is presented in Appendix C.

Agency	Records Summary
CalGEM	No oil or gas wells were identified on the Route or adjoining properties.
Regional Water Quality Control Board – GEOTRACKER	**Adjoining Property - Air Products** https://geotracker.waterboards.ca.gov/profile_report?global_id=T0603703068 Files for this facility, provided by the Regional Water Quality Control Board, were reviewed. While the files reviewed refer to the western adjoining property address, it is important to note that the western adjoining property was once part of the northern adjoining property (now 23300 South Alameda Street) and the activities described below appear to have been conducted primarily on the northern adjoining property. *Tank Closure Report, Air Products and Chemicals, Inc., 23320 South Alameda Street, Prepared by International Technology Corporation (ITC). Dated August 27, 1987* In August 1987, ITC removed 4 USTs (12,000-gallon diesel, 3,000-gallon gasoline, 2,000-gallon waste oil, and 2,500-gallon diesel) from the facility under the oversight of the Los Angeles County Fire Prevention Division. Soil samples collected within the excavation for the 2,500-gallon diesel fuel tank exhibited elevated concentrations of TPH. Based on the results, ITC recommended additional investigation in the area of the 2,500-gallon diesel tank and remediation if necessary. *Final Report, Remediation of Diesel Contaminated Soil, Air Products Facility, 23320 South Alameda Street. Prepared by Ecova Corporation (Ecova). Dated March 30, 1990.* In March 1989, in response to the contamination identified by ITC during the tank removals, Ecova removed approximately 410 cubic yards of petroleum hydrocarbon contaminated soil immediately below and adjacent to the former 2,500-gallon diesel tank. Confirmation samples were collected from the sidewalls and bottom of the excavation. Results of the confirmation samples indicated all contamination was removed. The contaminated soil was placed on a treatment bed for biodegradation. Based on the results of the treatment bed, Ecova recommended the soil should be treated until all diesel fuel has been degraded and then kept on site and used as fill material. *Site Investigation Study Report, 23320 South Alameda Street, Prepared by ITC. Dated December 1993.* In this report, ITC completes a review of previous investigations conducted at the facility, with emphasis on the

Agency	Records Summary
	former hydrogen plant purification area. The reported indicated that in addition to past on-site releases from operations at the Air Gas Hydrogen plant, evidence of impact from off-site sources such as regional groundwater impact, past unknown placement of impacted fill material, or past releases from pipeline located beneath Alameda Street were also identified. ITC recommended remedial action, soil vapor extraction (SVE), in particular, for remediation of soil. *Closure Soil Borings Drilling and Sampling Plan, 23320 South Alameda Street, Prepared by Terra Vac. Dated February 27, 1997.* In the report, Terra Vac describes drilling five closure soil borings at the facility to maximum depths of 35.5 feet bgs. The soil samples collected were analyzed for diesel, gasoline, benzene, toluene, ethylbenzene, and xylenes. Soil sample results were below detection limits to low concentrations of contaminants with the exception of boring CB-5 (TPH gasoline concentrations of 1,700 milligrams per kilogram [mg/kg] at 15.5 feet bgs and 8,600 mg/kg at 35.5 feet bgs). However, Terra Vac indicated that in the area of CB-5 dense clay zones are less affected by the former SVE system due to low permeability and a plastic liner installed in the excavation after the former caustic tank was removed. Based on the results, Terra Vac recommended the release be considered for closure. *Closure Investigation Report, 23320 South Alameda Street, Prepared by Air Products. Dated February 27, 1997.* Air Products provided a closure investigation report for the former hydrogen manufacturing facility to the LARWQCB. The report indicates that Air Products operated an SVE system from May 1995 to November 1996. Following rebound tests, and LARWQCB approval, the SVE system was shut down and five closure borings (as described above) were advanced. Air Products proposed no further action for the release and requested the LARWQCB review the closure request and provide comments. *Underground Storage Tank Case Review Form, Los Angeles Regional Water Quality Control Board, Dated September 23, 1997.* This document summarizes the case information for the facility, including USTs removed, site characterization information, maximum concentrations of contaminants, and soil and groundwater remediation activities. The LARWQCB indicated in the comments and justification for recommended action section that the release be closed based upon

Agency	Records Summary
	"common sense" closure criteria with limitation for industrial use. **Adjoining Property – 23300 South Alameda Street** One report for the adjoining property was provided by the Regional Water Quality Control Board. *SCAQMD Rule 1166 Soil Excavation Oversight Report, 23300 South Alameda Street, Prepared by ITC. Dated October 1998* This report details soil excavation activities conducted at the facility in response to Air Products and Chemicals, Inc. intent to construct a new hydrogen facility on the property. Air monitoring in accordance with SCAQMD Rule 1166, environmental engineering oversight, and soil sampling was conducted by ITC during demolition of certain concrete foundations and associated footers near the west end of the property. A total of approximately 1,200 cubic yards (or 1,782 tons) of soil was removed and disposed of as California designated hazardous waste due to detected concentrations of soluble lead.
Department of Toxic Substances Control – ENVIROSTOR	**Properties Crossed by the Route: Wilmington Class and Hold Yard** https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=80000531 Records reviewed on the Envirostor website for this facility have been summarized in Section 4.1.1. **Adjoining Property – Air Products** According to the Envirostor database, a preliminary assessment report was conducted for the facility in 1985 in response to reports of various chemical wastes (hydrocarbon solvents) being dumped into the channel. In 1989, a site screening and reassessment was completed for the facility. The facility was then referred to the LARWQCB in 1992.
Los Angeles County Fire Department	**Adjoining Property – Air Products 23320 South Alameda** Records include Notice of Violation documents and response letters from Air Products and Chemicals, Inc. to the Los Angeles County CUPA with respect to the Notices of Violations and Orders to Comply issued. Violations included submitting generator manifests copies, receipts used for oil, and manifests for all hazardous wastes generated on premises. Air Products and Chemicals, Inc included information with respect to the violations and requested to be returned to compliance based on the information provided. In

Agency	Records Summary
	a letter dated August 11, 1999, Air Products and Chemicals, Inc. notified the LA County CUPA that the operations at the portion of the facility located at 23320 S. Alameda Street (the present-day Lovco Recycling facility) would cease and would no longer have hazardous materials after August 31, 1999. **Adjoining Property – 23300 South Alameda Street** Records identified include a letter dated October 26, 1999, from Air Products and Chemicals, Inc. to the Los Angeles County Fire Department describing and including a consolidated permit application package for the new Air Products Carson Hydrogen Plant, located at 23300 South Alameda Street in Carson, California.
Los Angeles County Public Works Environmental Programs Division	**Northern and Western Adjoining Property: - Air Products** Records received from this agency consisted of UST removal records and industrial wastewater discharge records for the former on-site/adjoining hydrogen gas production plant, which was previously identified by the 23320 Alameda Street address prior to the early 2000's. *Industrial Wastewater Discharge* Industrial wastewater discharge records starting in 1962 indicated that industrial wastewater generated at the facility's Control Building Laboratory would be discharged to the sanitary sewer system. Carbon dioxide and sodium carbonate generated during the hydrogen gas manufacturing process would be discharged along with cooling tower bleed off and stormwater runoff directly into the eastern adjoining Dominguez Channel. An inspection report dated December 12, 1963, indicated that laboratory waste was discharged via a septic tank and leach field as opposed to the sanitary sewer system. A letter from Air Products dated March 6, 1968, indicated that waste would no longer be discharged to the Dominguez Channel and that the liquid hydrogen plant had been shut down. Operations and discharge were subsequently resumed at this facility in 1972. Permit records indicate that hydrogen plant ceased operation in 1986. Demolition of the plant was started in 1992 and the plant was closed in 1999. *UST Removal* Permit records indicated that this facility operated five USTs including: one 2,000-gallon diesel UST installed in 1962, one 6,000-gallon waste sodium hydroxide UST installed in 1962, one 2,000-gallon waste oil UST installed in 1962, one 3,000-gallon gasoline UST installed in 1974, and one 10,000-gallon diesel UST installed in 1974, The USTs were removed in

Agency	Records Summary
	1987. Based on maps included in the permit documentation, it appears that one UST (waste oil Tank #28.5) may have been located on the eastern portion of the present-day Lovco Recycling facility. The other USTs appear to have been located on the northern adjoining property.

4.3 Historical Records

NV5 used USGS Topo maps, aerial photographs, and fire insurance maps to provide information about the history of the Route and its surroundings. The resources NV5 reviewed are tabulated below and presented in Appendix E.

Historical Resources		
Source Type	**Years Reviewed**	**Source**
USGS Topo Maps	1896, 1899, 1902, 1930, 1942, 1943, `947, 1949, 1964, 1972, 1981, 2012, 2015, and 2018	USGS/EDR
Aerial Photograph(s)	1928, 1947, 1952, 1963, 1983, 1989, 1994, 2002, 2005, 2009, 2012, and 2020	EDR
Fire Insurance (Sanborn) Maps	No Coverage Letter	EDR

4.3.1 USGS Topo Maps

Our interpretation of past land uses of properties crossed by the Route and properties adjoining the Route based on our review of historical Topo maps is presented below.

Date	Interpreted Property Use
1896	No structures or improvements are depicted along the Route or on adjoining properties.
1899	No significant changes from the 1896 Topo map are depicted.
1902	No significant changes from the 1899 Topo map are depicted.
1930	A small road is depicted near the Route origin. No other significant changes from the 1902 Topo map are depicted.
1942	Several small roads and structures are depicted throughout the vicinity of the Route.
1943	No significant changes from the 1942 Topo map.
1947	No significant changes from the 1943 Topo map.
1949	The railyard located along the southern portion of the Route is depicted. The rail yard is noted to be located within the boundaries of a Military Reservation (See Section 4.1.1)
1964	The western adjoining properties are depicted to be developed with several small structures and what appear to be ASTs. The rail yard has been replaced with a drag strip (automotive racetrack). Electrical transmission lines and electrical substation are depicted to the east of the Route.

Date	Interpreted Property Use
1972	The present-day Coke storage building to the south of the Route is depicted along with the Dominguez Channel.
1981	The drag strip is no longer depicted to be present.
2012	No structures are depicted on the Topo map.
2015	Additional rail lines consistent with the present-day ICTF Intermodal Terminal are depicted.
2018	No significant changes from the 2018 Topo map are depicted.

4.3.2 Aerial Photographs

Our interpretation of past land uses of properties crossed by the Route and properties adjoining the Route based on our review of historical aerial photographs is presented below.

Date	Interpreted Property Use
1928	The Route and surrounding properties are depicted to be cultivated for agricultural use.
1947	The Route and surrounding properties appear to be mostly vacant land except for some cultivated properties and roadways.
1952	Small structures on the western adjoining property and what appears to be the Dominguez Channel are visible. The remainder of the properties in the vicinity of the Route appear to be developed with railroad tracks or cultivated for agricultural use.
1963	Additional structures and ASTs are visible on the northern and western adjoining properties near the Route origin. The electrical substation located at the Route's terminus appears to be present.
1983	The present-day Marathon Coke building is visible on the southern adjoining property at the Route's origin. Most of the property along the Route appears to be undeveloped. The electrical substation and transmission lines along the eastern portion of the Route are visible.
1989	The present-day intermodal terminal is present.
1994	The structures and ASTs previously located on the western adjoining property at the Route origin are no longer present.
2002	No significant changes from the 1994 aerial photograph are noted.
2005	The concrete recycling facility located at the western adjoining property at the Route's origin is now present. No other significant changes from the 2002 aerial photograph are noted.
2009	No significant changes from the 2005 aerial photograph are noted.
2012	No significant changes from the 2009 aerial photograph are noted.
2020	No significant changes from the 2012 aerial photograph are noted.

4.3.4 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps depicting the Route or adjoining properties were not available for review.

4.4 Past Uses – Summary

Historical resources reviewed during this assessment allowed the land uses of the properties along the Route and adjoining the Route to be traced from the present back to 1896 when the area was undeveloped and/or cultivated for agricultural use. Rail lines were constructed along the central portion of the Route in the 1940's and utilized by the military as part of the Wilmington Classification and Hold

facility, a loading and storage area for military equipment awaiting shipment. By the 1950's, several small commercial structures were constructed at the properties located along Alameda Street, to the west of the Route origin along with construction of the Dominguez Channel. In the 1960's the western adjoining property to the Route origin was developed with a hydrogen plant, a drag strip was constructed along the central portion of the Route, and the electrical substation and associated transmission lines were constructed along the eastern portion of the Route. In the 1980's the present-day Intermodal Terminal (rail and tractor trailer yard) was constructed near the central and eastern portions of the Route. In the 1990's and early 2000's the hydrogen plant on the western adjoining property to the Route origin was demolished and replaced with the present-day concrete recycling facility.

5 FINDINGS

Based on the reconnaissance, review of historical records, and available environmental regulatory database and documents, NV5 finds the following:

5.1 Areas of Potential Concern

This assessment identified the following areas of potential concern along and adjoining the Route. These areas are identified on Figure 2, along with corresponding Map ID numbers identifying the tenant where each area of potential concern is located. An area of potential concern is a property where current or former use, storage, or disposal of a hazardous substance or petroleum product was identified along with a likely potential for impact to the Route in the event of a release. Unless specifically identified, an area of potential concern does not indicate that a release has occurred, only that there is the potential to impact the Route if a release has occurred.

Properties Crossed by the Route

The Montrose Chemical Corporation/The Dominguez Channel
Potential Contaminants of Concern/Impact: DDT in Sediment

The Montrose Chemical Corporation was a former dichlorodiphenyltrichloroethane (DDT) manufacturing plant located approximately five miles northwest of the Route origin location. It was discovered that the DDT manufacturing work conducted at the facility had severely contaminated soil and groundwater beneath and nearby the former plant property. In 1989, the facility was listed as an EPA Superfund site. The major transport mechanisms identified were reported as storm water runoff and aerial emissions. Contamination is reported to have flowed off the facility into the Kenwood Stormwater Drainage Pathway and subsequently into the Dominguez Channel, which is crossed by the Route. The contamination is a well-known regional issue which in the vicinity of the Route primarily consists of impacted sediment.

Former Wilmington Classification and Holding Yard/Present-Day Union Pacific ICTF Intermodal Terminal (Figure 2 Map ID 4)
Potential Contaminants of Concern/Impact: Petroleum hydrocarbons, volatile organic compounds, heavy metals, pesticides, herbicides, polychlorinated biphenyls, and unexploded ordinance.

The Route crosses the present-day ICTF Intermodal Terminal, a large active rail and tractor trailer yard. The ICTF terminal is constructed on a portion of the former Wilmington Classification and Holding Yard, a former military equipment loading and storage facility that operated in the 1940's. A Site Survey Summary Sheet prepared by the Army Corps of Engineers in 1999 noted

that "*various types and sources of subsurface soil contamination have been identified in the railyard portion of the site*." The types and locations of the soil contamination were not reported.

The Site Survey Summary Sheet also included an evaluation for hazard severity associated with unexploded ordinance. The property was given a rating of "4" indicating negligible hazard; however, a score of "5" indicating a marginal hazard was also listed as recommended. According to records reviewed, this designation was primarily determined on the use of warehouse 17 (located over one mile from the Route) as an ordinance depot.

While specific areas of contamination at the ICTF Intermodal Terminal were not reported, it is not uncommon to encounter areas of shallow soil impacted from past releases/spills of hazardous substances and petroleum products as well as pesticides and herbicides applied as part of facility maintenance.

Properties Adjoining or Nearby the Route

ARCO (Marathon Carson) Refinery, 1801 Sepulveda Boulevard, Carson, California 90810 (Figure 2 Map ID 7).
Potential Contaminants of Concern/Impact: Petroleum Hydrocarbons and Volatile Organic Compounds in Groundwater.

This facility is located approximately 500 feet west of the Route origin, across Alameda Street and the Union Pacific Railroad. According to the CPS-SLIC database, the facility is currently undergoing remediation of total petroleum hydrocarbons in groundwater. According to documents available on Geotracker, a release was identified at the facility as early as 1990 and various site investigations and remediation continue to be conducted for light non-aqueous phase liquid (LNAPL). The lateral and vertical extent of LNAPL contamination is still being assessed.

Based on the documented extent of LNAPL contamination to groundwater, distance of the facility with respect to the Route, and the inherent environmental risk associated oil refining operations, this facility is considered to represent an area of potential concern for the Route.

Air Products, 23300 South Alameda Street (Figure 2 Map ID 1) and Lovco Recycling, 23320 South Alameda Street (Figure 2 Map ID 2).
Potential Contaminants of Concern/Impact: Petroleum Hydrocarbons, Volatile Organic Compounds, and lead in shallow soils.

The properties adjoining the Route origin to the north and to the west were previously developed with a hydrogen gas plant between the early 1960's to the late 1990's. Historical records reviewed identified evidence of past hazardous substances or petroleum products use at the hydrogen gas plant including documented releases of petroleum hydrocarbons and VOCs from former USTs and hydrogen production operations at the facility, along with evidence of potential off-site hydrocarbon releases and regional groundwater impact. These potential impacts were reported at both the portion of the hydrogen production facility located on the northern adjoining property, and at the portion of the facility located at the western adjoining property (primarily from surficial spills near a waste oil UST located on the eastern portion of the facility). These releases were subsequently remediated and granted case closure/no further action status. Additionally, during subsequent redevelopment 1,200 cubic yards of petroleum and lead impacted soil was excavated and removed from the northern adjoining property. Due to the elevated concentrations of soluble lead, the soil was classified as a California designated hazardous waste.

6 QUALIFICATIONS AND SIGNATURE

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in 40 CFR 312.10. I have the specific qualifications based on education, training, and experience to assess property of the nature, history, and setting of the Route. This assessment and findings reported herein were conducted in general accordance with standard industry practices.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTROSE CHEMICAL CO Cerclis ID:: 900993 EPA Id: CAD008242711	***20201 S NORMANDIE AV***	***0 - 1/8 (0.000 mi.)***	***0***	***41***

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there are 2

SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTROSE CHEMICAL CO Site ID: 0900993 EPA Id: CAD008242711	***20201 S NORMANDIE AV***	***0 - 1/8 (0.000 mi.)***	***0***	***41***
ALAMEDA ST SAN LDFL Site ID: 0901806 EPA Id: CAD980636393	22700 S ALAMEDA ST	NNW 1/4 - 1/2 (0.359 mi.)	L63	342

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2023 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 28 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed that there are 2 LOS ANGELES CO LF METHANE sites within approximately 0.5 miles of the target property.

DETAIL MAP - 7294079.2S

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- Sensitive Receptors
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Pipelines
- Special Flood Hazard Area (1%)
- 0.2% Annual Chance Flood Hazard
- National Wetland Inventory
- State Wetlands
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

A5 **CARSON LIQUID HYDROGEN PLANT** **WMUDS/SWAT** **S104156408**
Target **23320 SOUTH ALAMEDA STREET** **N/A**
Property **CARSON ,CA, CA 90810**

Site 5 of 13 in cluster A

Actual: **23 ft.**

WMUDS/SWAT:

Edit Date:	Not reported
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
Primary Waste:	MISCEL
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Base Meridian:	Not reported
NPID:	HH0003085
Tonnage:	0

CARSON LIQUID HYDROGEN PLANT (Continued) **S104156408**

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 04/19/1982
Comments: FACILITY IDENTIFIED IDENTIFIED THROUGH TIP

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 02/14/1992
Comments: SSI Report reviewed by Region 4 staff. The site is bounded by: Alameda St. to the west, Sepulveda Blvd. to the south, and the Dominguez Channel to the north and east. There are three separate entities operating at the site: Texaco Ref. & Marketing, Air Products & Chemicals, and Atlantic Rich- field Co. (ARCO). In addition, the LA Co. Flood Control District (LACFCD) uses a portion in the SE corner as an equipment yard for the Dominguez Gap Saltwater Barrier Pro- ject. The Texaco Sulfer Recovery Plant is in the RCRA data base (EPA id# CAT000646331). Air Products & Chem. is also (EPA ID# CAT080010655). ARCO as well (EPA ID# CAD077227049) The RWQCB is overseeing GW contam. problems in the Carson area associated with past practices of refineries, but is not currently involved with this site. Recommend referral to RWQCB. Alameda Street Landfill is on the NE side of the Dom- inguez Channel from this site (Calsites # 19490218).

Substance: DDT
Pathway: SURFACE WATER PATHWAY
Scoring: 3

Summary Details:

Conditions at proposal October 15, 1984): Montrose Chemical Corp. manufactured DDT on a l3-acre site in a light industrial/residential area of Torrance, Los Angeles County, California, from 1947 until 1982. About 3,000 people live or work within 0.25 mile of the site. The company s operations included formulation, grinding, packaging, and distribution of DDT. According to analyses conducted by EPA, Montrose, and various State and local agencies, on- and off-site soils, surface water, and sediments are contaminated with DDT. The major transport mechanisms identified were storm water run-off and aerial emissions. On May 6, 1983, EPA issued an Administrative Order under CERCLA Section 106 requiring Montrose Chemical to cease all discharges of DDT and to initiate a study to determine the nature and extent of contamination. After a more detailed review of the Montrose site, EPA determined that further work was necessary to characteri e the site andevaluate alternatives. Therefore, EPA prepared a workplan for a remedial investigation/feasibility study RI/FS). This second phase of investigation will assess all areas of contamination, both on- and off-site, and any public health and environmental impacts. Status June 1986): In February 1985, Montrose installed a temporary asphalt cover over the site. EPA did not endorse this activity. In the summer of 1985, EPA conducted Part I of the RI. On-site sampling foundhigh levels of contamination at 77-foot depths in soil and in shallow ground water. In October 1985, Montrose and EPA signed an Administrative Order under CERCLA Section 106 requiring Montrose to conduct Part II of the RI, which includes on-site sampling of ground water and off-site sampling of soil, sediments, surface water, and ground water. Status November 1988): During July 1986, EPA sampled off-site dust and soil and verified that DDT migrated off-site via aerial dispersion.In November 1986, Montrose completed Phase I sampling under Part II of the RI. Results indicated that soils near the site are contaminated with high levels of DDT, and that the two shallower aquifers in the four-aquifer system underlying the site are contaminated with DDT and monochloroben ene. In October 1987, EPA and Montrose signed an amendment to the October 1985 Administrative Order, calling for both on- and off-site sampling of the two deeper aquifers in the four-aquifer system. Status October 4, 1989): In July 1989, EPA and Montrose signed a second amendment to the original order, under which Montrose will conduct the FS for the overall site and evaluate options for removing DDT-contaminated sediments in the sanitary sewer lines near the site. Sampling conducted under the first amended order indicates that ground water is contaminated with high levels of monochloroben ene 0.25 mile downgradient from the site. Deep wells and additional downgradient wells will be constructed and sampled.

Category as of 08/2019:
NPL Status: Currently on the Final NPL
Category Description: Depth To Aquifer-> 100 Feet
Category Value: 400

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
SUPERFUND NPL
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Has Projects:	Yes
NPL Status:	Not reported
Project Required:	Yes
Feature Description:	The site was used by the U.S. Army asa loading and storage area for military equipment awaiting shipment. Improvements to the site, all constructed in 1943 and 1944, included three warehouses, a railroad spur, sewer and water lines. The property, formerly known as Manuel Warehouse, is currently the site of the Cal Cartage, Inc., a container and freight station that stores and distributes goods that arrive at the Port of Los Angeles from U.S. and international destinations. Goods stored and distributed at the facility include bulk cotton, copper, and other miscellaneous items. Cal Cartage occupies approximately the same area as the former Manuel Warehouse, which encompassed 85 acres. The southern boundary of Cal Cartage is Pacific Coast Highway; the northern boundary is Sepulveda Boulevard; the western Boundary is the Dominguez Channel and Union Pacific Railroad Line; and the eastern boundary is a Southern California Edison electrical tower transmission easement. Although Cal Cartage leases the Edison easement for storage, this easement is not part of the Wilmington Classification and Hold Yard or Manuel Warehouse site. There are three 200,000 square foot former DoD warehouses being beneficially used by Cal Cartage. These warehouses currently numbered 13, 16, and 17 (formerly numbers 1, 2, and 3 respectively) were constructed in 1943 for the DoD. The LA Ordnance Depot occupied warehouse No. 17. The warehouses are surrounded by roadways, rail lines, and other miscellaneous facilities associated with importing and exporting of goods from the port. Some of the rail lines, constructed for DoD use, are being beneficially used. Large portions of the property are occupied by stored freight containers.

FUDS Detail as of Jan 2015:

Fiscal Year:	2013
Federal Facility ID:	CA9799F5690
RAB:	Not reported
NPL Status:	Not Listed
Description:	The site consisted of 274.57 acres, located 2401 E. Pacific Coast Highway in Wilmington, California. The property composing the Wilmington Class and Hold Yard was acquired by the U.S. Army during 1943 and 1944. Records indicate that 272.23 acres were leased from the City of Los Angeles (W2972-eng-755 and W04- 193-eng-4356). Approximately 1.55 acres were leased from the Watson Land Company (W04-193-eng2652). Approximately 0.65 acres were acquired by permit and 0.142 acres were acquired by license from various private and public parties. Thus, a total of 274.57 acres were acquired by the Army for the Wilmington Class and Hold Yard. In the months of May and June 1946, 201.57 and 73 acres, respectively, of the Class and Hold Yard were declared surplus. On 1 July 1946 the land was transferred to

WILMINGTON CLA & HOLD YD (Continued) **1007212263**

the Veterans Administration. The City of Los Angeles currently owns 272.23 acres of the former Wilmington Class and Hold Yard. The property is currently being beneficially used for many purposes. Business located on the property include shipping container platforms for loading and unloading container onto railroad cars (Intermodal Container and Transportation Facility), sulfur storage (California Sulfur Company), import and export operations (Import Dealers Service Corporation), warehouses (Port of Los Angeles, California Cartage Company, Inc.) and a refinery (Texaco).

History: The site was used by the U.S. Army asa loading and storage area for military equipment awaiting shipment. Improvements to the site, all constructed in 1943 and 1944, included three warehouses, a railroad spur, sewer and water lines. The property, formerly known as Manuel Warehouse, is currently the site of the Cal Cartage, Inc., a container and freight station that stores and distributes goods that arrive at the Port of Los Angeles from U.S. and international destinations. Goods stored and distributed at the facility include bulk cotton, copper, and other miscellaneous items. Cal Cartage occupies approximately the same area as the former Manuel Warehouse, which encompassed 85 acres. The southern boundary of Cal Cartage is Pacific Coast Highway; the northern boundary is Sepulveda Boulevard; the western Boundary is the Dominguez Channel and Union Pacific Railroad Line; and the eastern boundary is a Southern California Edison electrical tower transmission easement. Although Cal Cartage leases the Edison easement for storage, this easement is not part of the Wilmington Classification and Hold Yard or Manuel Warehouse site. There are three 200,000 square foot former DoD warehouses being beneficially used by Cal Cartage. These warehouses currently numbered 13, 16, and 17 (formerly numbers 1, 2, and 3 respectively) were constructed in 1943 for the DoD. The LA Ordnance Depot occupied warehouse No. 17. The warehouses are surrounded by roadways, rail lines, and other miscellaneous facilities associated with importing and exporting of goods from the port. Some of the rail lines, constructed for DoD use, are being beneficially used. Large portions of the property are occupied by stored freight containers.

Violation Date:	09-06-2017
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 10/05/2017. Log onto the California Environmental Reporting System (CERS) web site to correct the deficiencies in the HAZARDOUS MATERIALS INVENTORY section. Observed the following corrections required; 1. Hydrogen and flammable mixtures containing hydrogen and methane need to be reported in pounds, 2. Ensure all reportable hazardous materials are properly reported; the inventories for propane and argon are under reported; 3. Ensure the Hazardous Components sections are completed for all entries; these sections are left blank for several hazardous materials including the entries for the hydrogen and various compressed gases. Operator failed to properly report hazardous materials to the California Environmental Reporting System (CERS).

Citation:	19 CCR 4.5 2760.1(d)(1) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2760.1(d)(1)
Violation Description:	Failure to compile written process safety information pertaining to the equipment in the process that includes the following: 1. Materials of construction; 2. Piping and instrument diagrams (P&IDs); 3. Electrical classification; 4. Relief system design and design basis; 5. Ventilation system design; 6. Design codes and standards employed; 7. Material and energy balances for processes built after June 21, 1999; 8. Safety systems (e.g., interlocks, detection, or suppression

AIR PRODUCTS & CHEMICALS INCORPORATED (Continued) **S112897061**

	systems).
Violation Notes:	OBSERVATION: The owner/operator failed to compile written process safety information pertaining to the equipment in the process that includes: material and energy balances for processes built after June 21, 1999; safety systems (e.g., interlocks, detection, or suppression systems). Operator stated the KMI binders included all the required elements for the PSI information; however, the information was not able to review at the time of inspection. At minimum, the process safety information should indicate the binder number, sections of the binder and the page numbers and page numbers of each of the elements of the section is located. CORRECTIVE ACTION: Compile written process safety information pertaining to the equipment in the process that includes: materials of construction; piping and instrument diagrams (P&IDs); electrical classification; relief system design and design basis; ventilation system design; design codes and standards employed; material and energy [Truncated]

Violation Description:	Failure to develop and have available for review, a report of the scope, methods used, results and findings of the audit.
Violation Notes:	OBSERVATION: The owner/operator failed to develop and have available for review, a report of the scope, methods used, results and findings of the audit. The compliance audit report did not include a report of the scope, methods used, results and findings of the audit. The report should include the above mentioned items . This report, including results, shall be available for UPA review. The owner/operator failed to make available for review, the audit report, scope and the method used, and the results and finding for each section audited during the audit process. The 2016 and 2019 compliance audit certification page and the recommendation pages were available for review; however, the scope and method used (checklist, questionnaire, etc.) and a complete report for the audit were not available for review upon request. CORRECTIVE ACTION: Maintain supporting documentations and provide a copy of the complete audit report that include the scope, methods used, and results [Truncated]

AIR PRODUCTS & CHEMICALS INCORPORATED (Continued) **S112897061**

Site ID:	384362
Site Name:	Air Products and Chemicals, Inc. - Carson
Violation Date:	09-06-2017
Citation:	19 CCR 4.5 2750.1 - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2750.1
Violation Description:	Failure to comply with Sections 2750.2 through 2750.9
Violation Notes:	Returned to compliance on 10/05/2017. Revise Offsite Consequence Analysis (OCA) narratives to correspond to the data entered into the RMP Comp software. The data for the OCA section on the Risk Management Plan (RMP) is inconsistent with the data entered into the RMP Comp software. For example, the narrative stated that 447 lbs of ammonia is assumed to be released over a 2 minute period for the toxic alternative release scenario but the data on RMP Comp show a 200 gal release over a 10 minute period. Another example, the narrative stated that 6,800 lbs of flammable substance is assumed to be released for the flammable worst case release scenario but the data on RMP Comp show 947 lbs and 641 lbs to be released for hydrogen and methane, respectively. Owner/operator failed to ensure the proper and consistent parameters are used for the OCA.
Violation Division:	Los Angeles County Fire Department
Violation Program:	CalARP
Violation Source:	CERS,

Site ID:	384362
Site Name:	Air Products and Chemicals, Inc. - Carson
Violation Date:	09-06-2017
Citation:	19 CCR 4.5 2745.10(b) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.10(b)
Violation Description:	Failure to revise, update, and submit the Risk Management Plan to the United States Environmental Protection Agency and the Administering Agency as follows: 1. At least once every five years from the date of its initial submission or most recent update required by section 2745.10(a)(2) through (7); 2. No later than three years after a newly regulated substance is first listed by the United States Environmental Protection Agency; 3. No later than the date on which on which a new regulated substance is first present in an already covered process above a threshold quantity; 4. No later than the date on which a regulated substance is first present above a threshold quantity in a new process; 5. Within six months of a change that requires a revised process hazard analysis or hazard review. 6. Within six months of a change that requires a revised offsite consequence analysis as provided in section 2750.7; 7. Within six months of a change that alters the program level that applied to any covered process.
Violation Notes:	Returned to compliance on 10/05/2017. Ensure RMP updates that are submitted to the US EPA are also submitted to the LA County Fire Department/Administering Agency. Update in the Offsite Consequence Analysis was submitted to the US EPA in April 2017 but was not submitted to the LA County Fire Department. Owner/operator failed to submit RMP update to the local Administering Agency.

Quarterly Update: This facility is also known as Texaco USA/Equilon Enterprises LLC. Files are very limited for this site. Original Part A & ISD could not be found in files. However, per inspection reports, facility submitted Part A application on November 1980. On 3/30/81, ISD was issued. Facility units consisted of two storage tanks: Tank 602 and Tank 7506. Tank 602 stored Spent Stretford Solution and Tank 7506 stored Stretford Wastewater solution. In the Part A & ISD, there may also have been a container storage unit as well. However, this can't be confirmed. The two storage tanks were verified closed on 3/6/90. There were no corrective action related files found in files. It is likely no Corrective Action was conducted after facility obtained clean closure.

SULFUR RECOVERY PLANT (Continued) **U001566261**

Violation Date:	09-26-2017
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 10/10/2017. OBSERVATION: Uniform Hazardous Waste Manifests for the waste sludge, used oil, waste aerosols, waste absorbent, and other HW solids were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste sludge, used oil, waste aerosols, waste absorbent, and other HW solids and submit copies to the CUPA.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	403656
Site Name:	TESORO REFINING AND MARKETING CO
Violation Date:	09-26-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 10/10/2017. OBSERVATION: Owner/Operator failed to adequately label hazardous materials. Observed more than twenty empty drums (55 gallons each) stored at the "haz-pad" area without an "EMPTY" label and date the drum was emptied. CORRECTIVE ACTION: Hazardous materials that are mislabeled or not adequately labeled must be properly labeled within 10 days or be managed as a hazardous waste. 22 CCR11 66261.2(f)
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW

COMMERCIAL CARRIERS INC (Continued) **S101582906**

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RB Case Number:	0453B
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water), Sediments, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Lead, Benzene, Ethylbenzene, MTBE / TBA / Other Fuel Oxygenates, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	This site is a petroleum terminal and tank farm. Groundwater is impacted by petroleum hydrocarbons with the primary contaminant being benzene at concentrations up to 1,800 ug/L (as of March 2009 sampling). Other groundwater contaminants include total xylenes, MTBE, TBA, and dissolved lead. The groundwater plume appears to be stable on-site, with the possible exception of MTBE transport to the west. The source area onsite is unknown.

Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.

CHEMOIL TERMINALS CORPORATION (Continued) **S102002384**

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 22 CCR 45 67450.13(b) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.13(b)
Violation Description: Failure to prepare a written estimate of the cost of closing each unit which includes the cost that would be incurred for closing a treatment

CHEMOIL TERMINALS CORPORATION (Continued) **S102002384**

unit when using the owner or operator or generator's own staff and/or personal equipment taking into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. This estimate shall be submitted as an attachment to the Certification of Financial Assurance for Permit by Rule and Conditionally Authorized Operations/ Maintenance page(s) of the Unified Program Consolidated Form (x/99)).

Violation Notes: OBSERVATION: A written estimate of closure costs for the fixed treatment unit(s) has not been submitted to the CERS. A owner/operator shall prepare a written estimate of the cost of closing each unit. Observed Closure Cost Estimate not submitted to CERS. CORRECTIVE ACTION: Submit the written estimate of closure costs for financial assurance for each unit to the CERS. OBSERVATION: Owner/Operator did not prepare, did not prepare correctly, and/or did not submit to the UPA, the Certification of Financial Assurance. Observed facility is permitted for Onsite Permit-By-Rule Hazardous Waste Treatment, however, Financial Assurance Certification page submitted claims facility is operating Conditionally Authorized Hazardous WasteTreatment. CORRECTIVE ACTION: Correctly prepare and submit to the UPA, the Certification of Financial Assurance.

Violation Date: 09-22-2022
Citation: 22 CCR 45 67450.13(b) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.13(b)
Violation Description: Failure to prepare a written estimate of the cost of closing each unit which includes the cost that would be incurred for closing a treatment unit when using the owner or operator or generator's own staff and/or personal equipment taking into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. This estimate shall be submitted as an attachment to the Certification of Financial Assurance for Permit by Rule and Conditionally Authorized Operations/ Maintenance page(s) of the Unified Program Consolidated Form (x/99)).
Violation Notes: OBSERVATION: A written estimate of closure costs for the fixed treatment unit(s) has not been submitted to the CERS. A owner/operator shall prepare a written estimate of the cost of closing each unit. Observed Closure Cost Estimate not submitted to CERS. CORRECTIVE ACTION: Submit the written estimate of closure costs for financial assurance for each unit to the CERS. OBSERVATION: Owner/Operator did not prepare, did not prepare correctly, and/or did not submit to the UPA, the Certification of Financial Assurance. Observed facility is permitted for Onsite Permit-By-Rule Hazardous Waste Treatment, however, Financial Assurance Certification page submitted claims facility is operating Conditionally Authorized Hazardous WasteTreatment. CORRECTIVE ACTION: Correctly prepare and submit to the UPA, the Certification of Financial Assurance.

CA BOND EXP. PLAN:
Reponsible Party: RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The responsible party has paid for all remediation activities to date and is expected to continue. The RP provided DHS with $50,000 advance funding for DHS' oversight and monitoring costs under the terms of the enforceable agreement signed in November, 1987. The $50,000 in advance funds have been spent. DHS has budgeted $50,000 for contractor assistance to DHS oversight/monitoring staff. DHS will recover 100 percent of direct costs plus staff costs related to the project.
Site Description: This 65-acre site was used from 1937 to 1982 to manufacture asbestos insulation products, cement and polyvinyl chloride pipe. The site is currently vacant but contains spilled and buried asbestos waste.
Hazardous Waste Desc: Numerous buried settling ponds and disposal pits which contain asbestos wastes exist throughout the site.
Threat To Public Health & Env: The primary threat is human exposure to a release of asbestos fibers. To preclude direct contact with the substances, the site is fenced and secured 24 hours a day.
Site Activity Status: Manville Corporation entered into an enforceable agreement with the Department in November, 1987 to conduct remedial investigation activities. A remedial investigation was conducted to define the nature and extent of contamination and to determine the type and extent of remedial measures necessary. A feasibility study was approved July, 1988. A draft RAP is under review by DHS and is expected to be final by January, 1989.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Threat to Water Quality:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

CARSON TERMINAL EXPANSION PROJECT PHASE IV (Continued) **S100925072**

Description:	RP states that a storage tank was discovered to be leaking due to unknown reasons resulting in the release of less than 100 gallons of crude oil onto the ground. The release is not contained and is still leaking at a trickling rate. Caller states that absorbent pads have been applied to absorb the release. No waterways have been impacted.

Description:	Caller states: A gasoline truck was being loaded with 1,100 gallons of gasoline; however there was a quarter sized hole in the tank which is causing the gasoline to release to the ground. The release is to engineered containment. The release is being watered down to be collected into a storage tank.

Case Type: Cleanup Program Site
Case Worker: JYL
Local Agency: Not reported
RB Case Number: 0045
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: The tank storage facility at the site was constructed in 1921 for petroleum storage and is bordered by petroleum processing facilities operated by Tesoro Los Angeles Refinery, ConocoPhillips Los Angeles Plant, and BP Arco Refinery. Site assessment and remediation under Regional Board Cleanup and Abatement Order (CAO) No. 90-152. Responsible Party also participates Carson Regional Groundwater Group's (CRGG) regional groundwater contamination investigation. US EPA and RWQCB established MOU to regulate groundwater contamination matter under RCRA Corrective Action and CAO Order No. 90-152.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D018
Waste Description: BENZENE

Waste Code: D019
Waste Description: CARBON TETRACHLORIDE

TESORO CARSON REFINERY (Continued) **1015732785**

Waste Code: D021
Waste Description: CHLOROBENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D026
Waste Description: CRESOL

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS

TESORO CARSON REFINERY (Continued) **1015732785**

LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F037
Waste Description: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

Waste Code: F038
Waste Description: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

Waste Code: F039
Waste Description: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

Waste Code: K048
Waste Description: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K049
Waste Description: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K050
Waste Description: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K051
Waste Description: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

Waste Code: K169

TESORO CARSON REFINERY (Continued) **1015732785**

Waste Description: K169

Waste Code: K170
Waste Description: K170

Waste Code: K171
Waste Description: K171

Waste Code: P030
Waste Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P110
Waste Description: PLUMBANE, TETRAETHYL- (OR) TETRAETHYL LEAD

Waste Code: U036
Waste Description: 4,7-METHANO-1H-INDENE, 1,2,4,5,6,7,8,8-OCTACHLORO-2,3,3A,4,7,7A-HEXAHYDRO- (OR) CHLORDANE, ALPHA & GAMMA ISOMERS

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U117
Waste Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Waste Code: U153
Waste Description: METHANETHIOL (I,T) (OR) THIOMETHANOL (I,T)

Waste Code: U160
Waste Description: 2-BUTANONE, PEROXIDE (R,T) (OR) METHYL ETHYL KETONE PEROXIDE (R,T)

Waste Code: U162
Waste Description: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

Waste Code: U188
Waste Description: PHENOL

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U211
Waste Description: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Quarterly Update: TESORO CARSON QUARTERLY UPDATE: Quarterly Update Period: July 1, 2022 to September 30, 2022 The permit is currently in permit maintenance. FACILITY DESCRIPTION/ HISTORY The Tesoro Refining & Marketing Company LLC, Carson Refinery (Facility) is located at 1801 East Sepulveda Boulevard in Carson, California. Also, the Facility has been using the 2350 E. 223rd Street, Carson, California 90810 address since their administrative Offices are in the main Campus Building. The Refinery and the surrounding area are zoned for heavy manufacturing. The Facility is bordered by Wilmington Avenue to the west, 223rd Street on the north, Dominguez Channel and Alameda Street on the east and Sepulveda Boulevard on the south. Surrounding land use is primarily heavy manufacturing except for two areas. South of Sepulveda Boulevard and west of Wilmington Avenue are single family residences. North of 223rd Street and along the 405 freeway there are commercial automotive businesses. The Facility is situated in an industrial area and is surrounded by a variety of manufacturing and petroleum-refining and storage facilities. The Facility currently has the capacity to process approximately 260,000 barrels of crude oil per day to make gasoline, jet fuel, diesel, liquefied petroleum gas (LPG), sulfur, and petroleum coke. A cogeneration plant, located on site, produces power to supply the Refinery and to export to utilities. The Facility currently operates the East and West Retention Basins as surface impoundments for emergency management of non-hazardous waters, including stormwater and mixed process water during large storm events. Fire deluge (the fire deluge water stream) is occasionally routed to the East Retention Basin. Water temporarily stored in the basins is discharged to the Facility s wastewater treatment system and subsequently discharged to the Los Angeles County Sanitation District sewers. PERMITTING REGULATORY DESCRIPTION/ HISTORY Petroleum refining operations have been conducted at the site since 1923 when the Pan American Petr

Background Info:	The Stauffer Chemical site is located at 2112 East 223rd Street in the City of Carson, Los Angeles County. The site occupies an area of approximately 25 acres. The site is an inactive polyvinyl chloride plant. The plant was deactivated in 1982 and the majority of buildings, chemical storage, and process facility have been removed and there is no active storage of hazardous waste materials at the site. 1,2 DCA or 1,2 dichloroethane and vinyl chloride are the primary constituents of concern. Soil and groundwater investigations have indicated the presence of chlorinated hydrocarbons.

Quarterly Update:	This facility is also known as Stauffer Chemical Co. This facility manufactured ethylene chloride/dichloride, vinyl chloride, and polyvinyl chloride resins. This facility Received an ISD on 4/6/81. After obtaining the ISD, Stauffer requested amendments to their ISD to add an incinerator to the ISD. The incinerator was needed as Stauffer was no longer able to dispose distillation heavy ends. DTSC amended the ISD on 9/18/81. Stauffer did not pursue a Part B permit but rather shut down the operation and closed the facility. Facility operation ceased in May 1982 and Stauffer sent a notification letter to EPA on 10/22/82 stating facility shut down and closure was completed. Although Stauffer had already conducted closure activity, they did not notify EPA/DHS of their closure and did not go through the formal closure process. Therefore, they were required to submit Closure Plans after the fact of facility closure. Stauffer submitted closure plans to DHS on 6/17/83 and 5/4/83. Facility structures were demolished in 1985. File records do not show the closure of the facility being approved and closure being certified/verified. Instead, closure/cleanup of the facility was undertaken by site mitigation. On 7/7/94 a consent agreement & Imminent and substantial endangerment order was issued by Site Mit to require remediation of the site. Refer to site mitigation database for site cleanup details. It looks like site clean up is still active at this facility. 4/25/2018- Consent order dated 06/27/1994 was uploaded from cleanup to refer facility to CERCLA for cleanup. PM, Isaac Hirbawi, confirmed that this site is still open and undergoing cleanup.
