1.0 EXECUTIVE SUMMARY

Capstone Equities, LLC (Client and *user*) retained Environmental Solutions (ES) to conduct a Phase I Environmental Site Assessment (ESA) of the approximately 43.52-acres undeveloped site located at APN 162-111-04-00, in the City of Oceanside, in the County of San Diego, California, 92054 referred to herein as the "subject property."

In accordance with ASTM E1527-21 this report is presumed to be viable when it is conducted within 180 days prior to the date of acquisition¹ of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). To comply and qualify for one of the All Appropriate Inquiries *threshold criteria* for satisfying the LLPs to CERCLA liability, their components must be conducted or updated within 180 days of, and prior to, the date of acquisition of the subject property. All other components of all appropriate inquiries must be conducted within one year prior to the date of acquisition of the subject property. Based on this requirement, this report is valid for 180 days after November 13, 2023.

ES have conducted this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This report also meets the requirements of All Appropriate Inquiries (AAI) as defined in CERCLA 42, U.S.C. § 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the Landowner Liability Protections (LLPs) to CERCLA liability (42 U.S.C. § 9601 (35)(A) & (B), § 9607(b)(3), § 9607 (q), and § 9607(r)) assuming compliance with other elements of the defense.

ASTM Findings

This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental condition, de minimis conditions, or significant data gaps in connection with the subject property. Additional investigations are not deemed necessary at this time.

Non-Scope ASTM Findings

ES have not identified any *business environmental risks* in connection with the subject property. Findings, opinions, and recommendations for non-scope ASTM services that are discussed in this report, which are not *recognized environmental conditions* include the following: onsite wetland conditions that are discussed in Section 5.1.3 and possible residual pesticides that are discussed in Section 5.2.1.

¹ Under "All Appropriate Inquiries" 40 C.F.R. Part 312, EPA defines "date of acquisition" as the date on which a person or entity acquires title to the subject property.

2.0 INTRODUCTION

2.1 Location and Legal Description

The subject property was an approximately 43.52-acre irregularly shaped vacant site with no assigned street address but is identifiable by APN 162-111-04-00, in the City of Oceanside, in the County of San Diego, California, 92054. The subject property was located on the south side of the North County Transit District's Sprinter Hybrid Rail Line and east of the terminus of Olive Drive. The railroad tracks delimited the subject property to the north, single-family residences delimited the subject property to the east and south, and vacant land delimited the subject property to the west. The approximate latitude and longitude near the center of the subject property was composed of one parcel with the APN number 162-111-04-00.

At the time of the subject property reconnaissance on February 16, 2024, the subject property was undeveloped except for the presence of some observed storm drains. The *owners* of the subject property were reported to be Oceanside Trolley Place LLC. ES was not provided with a legal description of the subject property.

2.2 Definitions, Contractual Details, Limiting Conditions, and Data Gaps

2.2.1 Definitions

To assist the reader with the interpretation of this report, ES would like to provide the following definitions of significant ESA terminology as defined by ASTM E1527-21.

Finding

A *finding* identifies features, activities, uses, and conditions that, in the judgment of the environmental professional, may indicate the presence or likely presence of hazardous substances or petroleum products at the subject property. Some *findings*, but not necessarily all *findings*, may be indicative of the presence of *recognized environmental conditions*, *controlled recognized environmental conditions*, *historical recognized environmental conditions*, or *de minimis conditions*.

Recognized Environmental Condition

A recognized environmental condition is defined as, "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely² presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

A "material threat" is an obvious condition which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment. An example would be an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage that may cause or contribute to a tank or piping failure resulting in a release to the environment.

Historical Recognized Environmental Condition

A *historical recognized environmental condition* is defined as, "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A *historical recognized environmental condition* is not a *recognized environmental condition*."

There must be documentation and relevant data that demonstrate that unrestricted use criteria established by the applicable regulatory authority or authorities was met. A past release that qualified as a historical recognized environmental condition may no longer quality as a historical recognized environmental conditions or information have been identified such as a change in regulatory criteria or previously unidentified or unknown pathway was not previously evaluated.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition is defined as, "a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

² "Likely" is that which is neither certain nor proved, but can be expected or believed to exist by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinion given herein.

A controlled recognized environmental condition should be accompanied by documentation such as no further action letters (or similar certifications or approvals) issued by the applicable regulatory authority, or in the case of self-directed actions, documentation and relevant data that satisfy risk-based criteria established by the applicable regulatory authority. When the environmental professional determines that a *controlled recognized environmental condition* exists, this does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s). A past release that previously qualified as a *controlled recognized environmental condition* may no longer be valid if new conditions or changes have occurred such as a change in regulatory criteria, change in subject property use, or a migration pathway was not previously known or evaluated.

De Minimis Condition

A de minimis condition is defined as, "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition*."

Business Environmental Risk

Business Environmental Risk (BER) is defined by ASTM as "a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice (ESA, ASTM E1527-21). Consideration of *BER* issues may involve addressing one or more non-scope considerations such as asbestos, lead-based paint, mold, endangered species, and other issues.

Hazardous Substances

Hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 U.S.C. § 9601(14), as interpreted by EPA regulations and the courts." There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA through interpretation by EPA regulations and the courts. These substances may include: (1) some substances that occur naturally or through biological digestion (for example, methane), and (2) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as "PFAS"). These and any other "emerging contaminants," where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this practice. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this practice.

2.2.2 Purpose and Scope

A Phase I ESA is intended to provide a brief description of the subject property, its location and surroundings and to identify, to the extent feasible, associated recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental condition, and de minimis conditions associated with the subject property or surrounding land use and to create a list of the potential human and environmental receptors. The protocol followed for this assessment is in conformance with the requirements of All Appropriate Inquiries as defined in CERCLA 42, U.S.C. 9601(35) (B) and the American Society for Testing and Materials Standard Practice for Environmental Site Assessment for Commercial Real Estate Transactions, ASTM Standard E1527-21. Any exceptions are noted in Section 2.2 – Limiting Conditions and Methodology Used. ES understands that this ESA will be used by Capstone Equities, LLC to perform due diligence with respect to environmental conditions at the subject property.

2.2.3 Assumptions, Limitations, Exceptions, Methodology of Assessment

Due care was taken during this investigation, but as documented in Section 4.5.1 of ASTM E1527-21, no environmental site assessment can wholly eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with a property. An environmental assessment, as any "assessment" work, is eventually the derived judgement of the professional. ASTM E1527-21 also states that performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a subject property, and this practice recognizes reasonable limits of time and cost. Therefore, there is always a potential that certain conditions beyond the ASTM practice may exist on the subject property that could not be identified through the scope of this investigation.

ES accepts no liability for hidden conditions, variations in composition of materials, and identification of materials not normally identified in sites typical of the subject property. Subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surface observations. Conditions observed were considered to be representative of areas that were not observed unless otherwise indicated.

ES has relied on one or more documents developed by other parties and is not liable for any conclusions drawn using these sources if their findings or procedures were erroneous. ES makes no warranty, guaranty, or certification regarding the quality, accuracy, or reliability of any prior reports reviewed and discussed in this report. ES expressly disclaims all liability for any errors or omissions contained in any prior reports provided to ES and discussed in this report. Additionally, the passage of time may result in a change in the environmental characteristics of this subject property and surrounding sites.

The scope of work for this report did not include testing of electrical equipment for the potential presence of polychlorinated biphenyls or the collection of other environmental samples. The scope of work did not include a detailed assessment of natural hazards such as naturally occurring asbestos, arsenic, radon gas or methane gas. The scope of work did not include a detailed assessment of the potential presence of radionuclides, lead in drinking water, lead-based paint, asbestos containing building materials, water intrusion, or mold. The scope of this work did not include an assessment of nonchemical hazards such as the potential for damage from earthquakes or floods, the presence of endangered species or wildlife habitats, wetlands, or the presence of cultural, ecological, or historical resources. The scope of work for this report did not include an assessment of the environmental or regulatory compliance status of the subject property, a review of health and safety practices, an industrial hygiene assessment, or a healthbased risk assessment. The scope of work for this report did not include an indoor air quality assessment unrelated to release of hazardous substances or petroleum products into the environment, or a vapor intrusion assessment beyond that required under ASTM 1527-21. Substances not defined as hazardous substances (including those sometimes generally referred to as "emerging contaminants") were not evaluated unless, or until, such substances are classified by CERCLA as a hazardous substance.

Our professional services have been conducted, our findings obtained, and our recommendations have been prepared in accordance with customary principles and practices in the field of environmental science and engineering. The subject property boundaries, drawings, square footages, and construction dates have been compiled from the best available recorded information and have not been verified by a field survey and may vary from actual conditions.

All areas of the subject property were visually inspected as part of this investigation except for some areas where thick vegetation and steep slopes prevented access. Due to the undisturbed nature of the vegetated areas and the consistency of the other areas traversed, it is the opinion of ES that the ability to identify conditions indicative of releases or threatened releases has not been hampered by the lack of visually inspecting these areas.

2.2.4 Data Gaps

In accordance with the ASTM standard, an attempt to confirm the history and use of the subject property was conducted from the present back to when the subject property was first developed with any structures or was used for residential, agricultural, commercial, industrial or governmental purposes. Referenced historical documents included all or some of the following: Sanborn fire insurance maps, historical topographic maps, historical city directories, historical aerial photographs, building department records, prior environmental reports, regulatory agency database information, and information from a subject property *owner* representative. These documents were consulted to fill in data gaps dating back to 1939, the first reasonably available information. Information from the subject property *owner* representative, Mr. Gregory T. Smith, dated back approximately 20 years to 2004.

Aerial photographs with coverage of the subject property were reviewed from the years 1939, 1946, 1953, 1964, 1967, 1970, 1979, 1985, 1989, 1994, 1997, 2002, 2005, 2009, 2012, 2016, 2020, and 2021. Historical USGS topographic maps of the subject property were reviewed from the years 1893, 1898, 1901, 1947, 1948, 1949, 1968, 1975, 1997, 2012, 2015, 2018, and 2022.

Due to the undeveloped nature of the subject property and its lack of a street address; city directories, building department records, and fire department records could not be effectively researched. ASTM E1527-21 does not require the environmental professional to undertake a review of recorded land title records or search for environmental liens. This responsibility is placed upon the *user*. It is ES's understanding that a lender will engage a title company or title professional to undertake a review of records relating to the subject property. Per the scope of work, ES did not obtain recorded land title records or conduct an environmental lien search.

It is ES's professional opinion that there were no data gaps with regards to the ability of ES to identify conditions indicative of releases and threatened releases.

2.2.5 Reliance

This report was prepared for the sole use and benefit of Capstone Equities, LLC The information and opinions rendered in this report are for the exclusive use and reliance by Capstone Equities, LLC ES will not distribute or publish this report without the consent of Capstone Equities, LLC except as required by law and court order. The information and opinions expressed in this report are given in response to a limited assignment by Capstone Equities, LLC and should be considered and implemented only in respects to that assignment. The services provided by ES in completing this project have been provided in a manner consistent with normal standards of the profession. This report is not a legal opinion and does not offer warranties or guarantees expressed or implied.

3.0 USER PROVIDED INFORMATION

Information from the *user* was obtained from interviews, emails, and/or the questionnaire presented in Appendix G.

3.1 Title Records

The *user* did not provide title records that documented the chain of historical ownership for the subject property and it was not in the scope of work for ES to obtain title records.

3.2 Environmental Liens

No environmental liens were found during this investigation and ES has not received land title records from the *user*. The subject property was not listed in the search of the Federal NPL Liens database. The *user* reported that they were not aware of information indicative of environmental liens, AULs, or governmental notification relating to violations of environmental laws with respect to the subject property. In addition, the subject property *owner* stated that there were no environmental liens on the subject property as documented in Appendix G. For there to be an environmental lien against the subject property, it must be a suspected, or confirmed, contributor to subsurface contamination. Research conducted for this report did not find any uses that would have contributed to subsurface contamination of the subject property and no regulatory agencies identified it as such.

3.3 Specialized Knowledge

Mr. Brian Mikail, Principal with Capstone Equities, LLC, the users of this report, filled out an environmental questionnaire dated February 9, 2024. A copy of this form is provided in Appendix G. Mr. Mikail indicated that a search of recorded land title records or judicial records did not identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law or such a search was not undertaken. He marked that a search of recorded land title records or judicial records where appropriate, did not identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the Subject property under federal, tribal, state or local law or such a search was not undertaken. Mr. Mikail had no specialized knowledge or experience related to the subject property or nearby properties. He was not involved in the same line of business as the current or former occupants of the subject property or adjoining sites and had no specialized knowledge of the chemicals and processes used by these types of businesses. Mr. Mikail believed that the purchase price being paid for the subject property reasonably reflected the fair market value of the subject property. Mr. Mikail was not aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional identify conditions indicative of releases or threatened releases. He did not know the past uses of the subject property. He did not know of specific chemicals that are present or once were present at the subject property. Mr. Mikail did not know of spills or other chemical releases that have taken place at the subject property. He was not aware of any environmental cleanups that have taken place at the subject property. Based on his knowledge and experience related to the subject property, he stated that there were no obvious indicators that point to the presence or likely presence of releases at the subject property. The user's responses did not include any information indicative of a recognized environmental condition in connection with the subject property.

3.4 Valuation Reduction for Environmental Issues

As documented in Appendix G, the *user* reported that to the best of their knowledge, the purchase price or value of the subject property was not significantly less than the purchase price or value of comparable properties.

3.5 Commonly Known or Reasonably Ascertainable Information

As documented in Appendix G, the *user* reported that they were not aware of commonly known or reasonably ascertainable information about the subject property within the local community that was material to *recognized environmental conditions*.

4.0 SITE RECONNAISSANCE

4.1 Subject Property Structures, Roads, and Other Improvements

At the time of the subject property reconnaissance on February 16, 2024, the subject property was vacant, undeveloped, appeared to have never been developed (except for the presence of observed storm drains) and was occupied by native and non-native vegetation and previously disturbed areas. The subject property can be accessed via the west terminus of Olive Drive. There were several dirt roads and dirt trails that traversed the subject property.

Electricity and natural gas in the area were supplied by San Diego Gas & Electric (SDG&E). Clean Energy Alliance (CEA) is an alternative for electrical power. There were no solid waste disposal services active on the subject property at the time of the site reconnaissance. Sewer service was provided by the city municipal system. The supplier of potable water was the City of Oceanside's Water Utilities Department. In the most recently online published report entitled, *"2022 Water Quality Report"* by the City of Oceanside's Water Utilities Department dated 2023, there were no indications that the water provided to the subject property area did not meet regulatory standards.

4.2 Current Uses of the subject property

At the time of the subject property reconnaissance on February 16, 2024, the subject property was vacant, undeveloped, appeared to have never been developed (except for some noted storm drains), and was occupied by native and non-native vegetation and previously disturbed areas.

Loma Alta Creek flows west along the west half of the north subject property border. Loma Alta Creek, like many waterways, could potentially be subject to chemical spills or other environmental incidents due to various factors such as industrial activity, transportation, or accidents. However, ES have not identified any such incidents that would have impacted the subject property. Visual observations in limited accessible areas indicated that the water flowing was clear and there were no visual or olfactory indications that any past chemical spills had impacted the creek.

4.3 Current Uses of Adjacent Sites

Current uses of the immediately adjacent sites and their addresses as noted on the buildings or researched on-line are as follows:

- North North County Transit District's Sprinter Hybrid Rail Lines followed by multiple commercial and light industrial businesses that are summarized in the table below; 4015 through 4095 Oceanside Boulevard;
- Northeast North County Transit District's Sprinter Hybrid Rail Lines followed by the College Station light rail depot and parking lot; no address assigned;
- East Single-family residences; 4010 and 4011 Olive Drive, 4110 and 4113 Crystal Street, and 4160 and 4157 Marcella Street;
- South Single-family residences; 3880 through 4097 Wooster Drive and 3953 Stanford Drive;
- West Vacant land; no address assigned; and,
- Northwest North County Transit District's Sprinter Hybrid Rail Lines followed by vacant land; no address assigned.

Current North Adjacent Tenants				
Tenant	Observed General Use	Listed in a Regulatory Database		
West End Self Storage	Parcel at 4015 Oceanside Boulevard

Inkjet Cartridgtes.com	Offices	No			
Action Carpet & Floor Décor	Retail and contractor's offices	No			
Liberty Tax	Offices	No			
Fully Promoted	Offices	No			

Based on observations and research, It is unlikely that a recognized environmental condition exists at the subject property because of the current adjacent land use to the east, south, west, or northwest. ES did not detect obvious indications that these adjacent sites store large quantities of hazardous substances, petroleum products, hazardous waste, have USTs, or are involved in a cleanup operation.

Past and/or current tenants on several of the north adjacent sites utilized hazardous substances or petroleum products that are discussed below in Section 5.3.2. *Auto Doctors, True Grain Woodworks, North County Mobile Electronics, ATCO Pest Control, Oracle Forensics,* and *Smog Check Shop* are all current tenants on the north adjacent sites that were not listed in any of the EDR searched environmental databases. In addition, there were no records provided by the DEH for any of these tenants. These tenants do not appear to represent a *recognized environmental condition* or *vapor intrusion issue* for the subject property and no further action appears necessary regarding these tenants due to the following:

- Their distances from the subject property;
- The lack of records indicating that significant quantities of hazardous substances or petroleum products have been stored on these sites;
- There were no records of hazardous wastes having been generated on these sites, and;
- There were no reports of USTs, spills, or releases on these sites.

4.4 Hazardous Substances Connected with Identified Uses

An unaccompanied site reconnaissance of the subject property was conducted on February 16, 2024, by Mr. Doug Kochanowski (CHMM, CAC), Biologist and Senior Environmental Scientist, that included a walk of the subject property to determine the presence of hazardous substances, petroleum products, and environmental conditions. Mr. Kochanowski is an *Environmental Professional* as defined by ASTM E1527-21 and 40 C.F.R. § 312.10(b).

All areas of the subject property were visually inspected as part of this investigation except for some areas where thick vegetation and steep slopes prevented access. Due to the undisturbed nature of the vegetated areas and the consistency of the other areas traversed, it is the opinion of ES that the ability to identify conditions indicative of releases or threatened releases has not been hampered by the lack of visually inspecting these areas.

There were no signs of hazardous substances or petroleum products being used or stored on the subject property. There was no evidence of spills or releases noted during the site reconnaissance.

4.5 Unidentified Substance Containers

There were no unidentified substance containers observed on the subject property.

4.6 Storage Tanks

No USTs were noted on the subject property at the time of the subject property reconnaissance. There were no common indicators of USTs such as vent pipes, fill ports, manways, fuel gauges, or dispensers observed. In the regulatory information researched there were no USTs reportedly installed, removed, closed in place, or abandoned at the subject property and no common indicators of closed tanks were observed.

ES observed no ASTs on the subject property and did not identify any equipment which would require such tanks. Moreover, visual indicators of former site ASTs such as tank cradles, secondary containment structures, and tank pedestals were not observed.

4.7 Hydraulic Equipment

No above or below-grade hydraulic lift systems were observed on the subject property.

4.8 Indications of PCBs

There were no pad-mounted transformers, pole-mounted transformers, ballasts, or hydraulic lift systems located on the subject property. The possible presence of PCB containing paint or caulking was not in the scope of this report and was not assessed.

4.9 Indications of Solid Waste Disposal

There was evidence observed of debris, trash, clothing, shopping cards, empty cans, and other materials typical of illegal dumping noted in multiple areas of the subject property. This appeared to be innocuous household trash dumped illegally from transients but there were no signs of disposed hazardous substances or petroleum products. No further action is recommended regarding the innocuous trash on the subject property other than removing it to discourage further dumping on the subject property.

4.10 Surface Staining

There was no evidence noted of discolored soils, odors, or surface staining on the subject property during the site reconnaissance. There was no evidence of sparse, stressed, or dead vegetation (from other than insufficient water). There was no visual evidence of improper handling or disposal of hazardous chemicals or materials noted on the grounds of the subject property.

5.0 RECORDS REVIEW

5.1 Physical Setting

5.1.1 Surface Characteristics

According to the U.S. Geological Survey (USGS) topographic map, San Louis Rey California Quadrangle, the finished elevation near the center of the subject property was approximately 230 feet above Mean Sea Level (MSL) and the general topography varied by location but generally sloped to the north, northwest. Generally, the south half of the subject property was a steep wooded area sloping to the northwest, representing the northwest side of Loma Alta Mountain. The north side was more level, gently sloping down to the west, following the flow of the Loma Alta Creek. The center of the subject property gently sloped to the north, northwest. The subject property was undeveloped and appears to have never been developed except for some noted storm drains. There were no paved areas on the subject property.

5.1.2 Drainage Patterns/Basins

Most of the subject property is in an area designated as "Zone X" on the FEMA Q3 Flood Insurance Rate Map, San Diego County, map number 06073C0758G dated May 16, 2012. These areas have been determined to be outside the 0.2% annual chance floodplain.

Areas along the north subject property border vary in flood zone designations depending upon location. Some are Zone X. Some areas are mapped as a Zone X, other flood area. These areas are defined as, "Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than one foot or within drainage areas less than one square mile; and areas protected by levees from 1% annual chance flood." Other areas are mapped and Zone AE, special flood hazard areas.

There was no industrial water or sanitary sewage discharge from the subject property. Stormwater drainage on the subject property was primarily downward surface percolation. During heavy rain events, stormwater runoff is estimated to move via sheet flow to the north, northwest, draining into Loma Alta Creek that runs along the north subject property border crossing onto the subject property near the center of the parcel. There was also a concrete paved swale located along the north subject property on the east half, adjacent to the railroad. During heavy stormwater events, stormwater from the south adjacent sites is expected to enter the subject property. Due to the residential nature of the south adjacent sites, this is not deemed to be an environmental issue for the subject property.

There were no drinking water wells, groundwater monitoring wells, floor drains, clarifiers, sumps, septic system, or french drains noted, or reported to exist, on the subject property.

5.1.3 Wetlands

ES screened the subject property for the presence of suspect wetlands during the site reconnaissance and by reviewing the U.S. Department of the Interior, Fish and Wildlife Service, *National Wetlands Inventory* online map researched on February 8, 2024, and the most recently available topographic map dated 2022. These sources indicated that the east half of the subject property was not in an area mapped as a potential wetlands area and there were no mapped bodies of water indicative of possible wetlands on this area of the subject property.

The Loma Alta Creek runs north of the north adjacent rail tracks on the east half of the subject property. Near the middle of the subject property the creek crosses over onto the subject property. The Loma Alta Creek has been designated as a Freshwater Forested/Shrub Wetland habitat classified as a "PSSAx." The classification code PSSAx is described as follows:

The P stands for, "System Palustrine." The Palustrine System includes all nontidal wetlands dominated by trees, shrubs, persistent emergents, emergent mosses or lichens, and all such wetlands that occur in tidal areas where salinity due to ocean-derived salts is below 0.5 parts per thousand (ppt). It also includes wetlands lacking such vegetation, but with all of the following four characteristics: (1) area less than 8 hectares (or 20 acres); (2) active wave-formed or bedrock shoreline features lacking; (3) water depth in the deepest part of basin less than 8.2 feet at low water; and (4) salinity due to ocean-derived salts less than 0.5 ppt.

The SS stands for, "Class Scrub-Shrub." This includes areas dominated by woody vegetation less than 20 feet tall. The species include true shrubs, young trees (saplings), and trees or shrubs that are small or stunted because of environmental conditions.

The A stands for, "Water Regime Temporary Flooded." This means that the surface water is present for brief periods (from a few days to a few weeks) during the growing season, but the water table usually lies well below the ground surface for most of the season.

The x stands for, "Special Modifier Excavated." This modifier is used to identify wetland basins or channels that were excavated by humans.

Creeks, rivers, and similar water bodies greater than 300 feet in length generally are considered Jurisdictional Waters of the U.S. by the USFWS. If the subject property is to be developed, precautions should be taken to minimize and/or prevent impact or alteration to the creek area. In addition, federally governed Jurisdictional Waters of the U.S. may require the approval of the U.S. Army Corps of Engineers (USACE) prior to disturbance or alteration. It is recommended that the planning department be contacted for any special requirements related to this condition.

It should be noted that the Environmental Professional who conducted the subject property reconnaissance was not a specialist trained in wetlands delineation. A wetland delineation was beyond the scope of this assessment.

5.1.4 Geology

According to the *Geologic Map of California* published in 2010 by the California Geological Survey, the subject property is underlain by Tertiary Sedimentary Rocks consisting of Eocene marine shale, sandstone, conglomerate, and minor limestone; mostly well consolidated.

According to the *Web Soil Survey* by the National Resources Conservation Service dated August 30, 2023, there are six soil types on the subject property. The three largest primary soil types included Gaviota fine sandy loam with a 0 to 50 percent slope that is well drained; Las Flores loamy fine sand with a 9 to 15 percent slope that is eroded and moderately well drained and eroded; and Salinas clay loam with a 0 to 2 percent slope that is well drained.

5.1.5 Hydrogeology

Based on a review of the California Regional Water Quality Control Board (CRWQCB) Water Quality Control Plan for the San Diego region, the subject property lies within the Loma Alta Area (4.10), in the Carlsbad Hydrologic Unit (400). This unit has existing beneficial industrial groundwater uses but is excepted from municipal uses (CRWQCB, 1994).

Hydrogeologic investigations have not been performed on the subject property; therefore, to what extent localized variations in groundwater presence and flow occur on the subject property is unknown. ES therefore reviewed subsurface data from investigations on a nearby site. The former 76 gasoline station 7288 located at 4181 Oceanside Boulevard was located approximately 1,180 feet northeast of the subject property. In a report dated April 25, 2005, by TRC Solutions, Inc. entitled "*Corrective Action Plan*" shallow groundwater was reported to be at a depth of approximately 4.4 to 5.8 feet below ground surface (bgs).

Shallow groundwater generally flows in directions subparallel to the ground surface slopes and under the influence of gravity toward points of discharge such as creeks, swamps, drainage swales, or pumped groundwater wells. Based on the surface topography at the subject property that drops to the north, northwest and the location of Loma Alta Creek along the north subject property border of the subject property, the presumed groundwater flow direction in the uppermost water-bearing unit across the subject property would be to the north, northwest. North, northwest is only the presumed groundwater flow direction and only physical testing can accurately state the true groundwater flow direction.

5.1.6 Other Physical Setting Conditions

The investigations of the potential presence of endangered species, threatened species, culturally sensitive areas, or historically significant areas were not included in the scope of this report. Based on the undeveloped nature of the subject property, it is possible that some of these conditions may exist on the subject property. If these conditions were to exist on the subject property, it is noted that they would not constitute a *recognized environmental condition*.

5.2 Historical Records Review

5.2.1 Historical Uses of the Subject Property

Historical information was obtained from aerial photographs (1939, 1946, 1953, 1964, 1967, 1970, 1979, 1985, 1989, 1994, 1997, 2002, 2005, 2009, 2012, 2016, 2020, and 2021) presented in Appendix C. Historical USGS topographic maps of the subject property were reviewed from the years 1893, 1898, 1901, 1947, 1948, 1949, 1968, 1975, 1997, 2012, 2015, 2018, and 2022. Information from the subject property *owner* representative, Mr. Gregory T. Smith, dated back approximately 20 years to 2004.

The subject property was undeveloped and occupied by native vegetation in the first reasonably available historical documentation dated 1893. In 1893, Loma Alta Creek and the railroad tracks were visible along the north border. By 1939, portions of the subject property had been cleared for agricultural use and a small orchard was visible in the center along the north border. By 1946, the orchard was no longer visible. The subject property was occupied by native vegetation and agricultural land through 1953. By 1964, the former agricultural land appeared to be fallow. There were some dirt roads and trails traversing the subject property. There were no significant differences on the subject property since 1964.

Because the subject property use appeared to have been agricultural from as early as 1939 through at least 1953, it is possible that pesticides have been applied to the subject property. Prior to 1972, it was a common practice to use environmentally persistent pesticides, specifically those that included DDT, DDD, DDE and Toxaphene. In general, proper pesticide applications, if any, only used small amounts. Many pesticides applied to the soil were designed to be relatively immobile and were applied to remain near the surface where they were most effective and did not readily leach downward to groundwater.

Application of agricultural chemicals for intended use is not considered a release; therefore, potential residual pesticides remaining would not be considered a *recognized environmental condition*. However, the potential presence of agricultural chemicals may have resulted in subject property impairment that may have, or could, result in adverse impact to subject property soil. Consideration should be given to the potential presence of these chemicals when evaluating business environmental risk and future uses of the subject property.

It is ES's professional opinion that the business environmental risk is low. The orchard was very small and has not been present for over 78 years. In addition, it is possible that row crops existed, but aerial photographs indicate even that possible use has not been present on the subject property for over 60 years. The orchard is circled in red in Figure 4 in Appendix A. Finally, Loma Alta Creek, on the subject property and north of the train tracks that border the subject property, is likely to have resulted in significant surface water crossing the former agricultural areas washing away agricultural chemicals that may have been used.

The following sections contain more detailed descriptions of the sources used to compile the above historical summary.

5.2.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps with coverage of the subject property area were searched but no maps were made for this area.

5.2.3 Historical Aerial Photographs

The following are descriptions of the historical aerial photographs taken at the subject property and reviewed by ES. This review has been supplemented by geographic place names and other data obtained in other assessment activities of this ESA. These photographs can be found in Appendix C. Although it may be stated below that there were no obvious signs of the storage or disposal of hazardous substances or petroleum products in these photographs, specific uses, or the presence of materials, may not have been identifiable from the information contained in the photographs. The descriptions below are mainly limited to the subject property, however, information from these maps was used to describe the history of the adjacent sites as discussed below in Section 5.2.8.

1939

In the 1939 aerial photograph, the subject property appeared to have been undeveloped. The center and north areas had been partially cleared for agricultural use and the remainder was occupied by native vegetation. There was a small orchard in the center of the subject property along the north border. The Loma Alta Creek traversed the west half along the north border and the north adjacent railroad tracks were visible. The adjacent sites were undeveloped and either had agricultural land use or were occupied by native vegetation. The surrounding area was also undeveloped and occupied by native vegetation or agricultural land. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in this photograph.

1946

There were no changes in the subject property in the 1946 aerial photograph from the 1939 photograph except that the orchard was no longer visible. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in this photograph.

1953

There were no significant differences on the subject property in the 1953 aerial photograph from the 1946 aerial photograph. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in this photograph.

1964

In the 1964 aerial photograph, the subject property appeared to have been undeveloped. The former agricultural land no longer appeared to have been actively farmed and was fallow. The remainder of the subject property was occupied by native vegetation. There were several unpaved roads and trails running through the site. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in this photograph.

1967, 1970, 1979, 1985, 1989, 1994, 1997, 2002, 2005, 2009, 2012, 2016, 2020, and 2021

There were no significant differences on the subject property or adjacent sites in the 1967, 1970, 1979, 1985, 1989, 1994, 1997, 2002, 2005, 2009, 2012, 2016, 2020, and 2021 aerial photographs from the 1964 aerial photograph. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in these photographs.

5.2.4 Topographic Maps

Topographic maps from 1893, 1898, 1901, 1947, 1948, 1949, 1968, 1975, 1997, 2012, 2015, 2018, and 2022 are presented in Appendix H. These maps depicted the subject property, adjacent sites, and surrounding areas as vacant, occupied by non-descript structures, or shaded as developed using house omission tint indicating dense urban development. There were no obvious signs of the storage or disposal of hazardous substances or petroleum products on the subject property in any of the topographic maps.

5.2.5 Previous Subject Property Inspection Reports

The Client did not provide any previous inspection reports or Phase I Environmental Site Assessments for the subject property.

5.2.6 City Directories

Because the subject property has never been developed and has no specific street address, city directories were not researched.

5.2.7 Building Permits

Because the subject property had never been developed, building permits were not researched.

5.2.8 Past Uses of Adjoining Sites

North

Historical sources indicated that the sites adjacent to and north of the subject property, across Loma Alta Creek and the railroad tracks, were undeveloped in 1893. The railroad tracks were already present in 1893. By 1939, the parcels were being used for agricultural crops. By 1964, the land appeared to have been fallow. Between 1970 and 1979, the west three parcels had been developed or were being developed and the east two parcels were being graded. Between 1979 and 1985, the two west parcels and the center parcel were developed with the existing improvements and the east two parcels had been graded but were still vacant. Between 1985 and 1989, the east end parcel had been developed as it currently exists and between 1989 and 1994, the other east side parcel was developed.

West End Self Storage Parcel at 4015 Oceanside Boulevard

The west end parcel at 4015 Oceanside Boulevard was developed with the existing storage facility between 1970 and 1979 and has not changed since.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the east adjacent sites in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from these adjacent sites.

Industrial Park Parcel East of the West End Parcel at 4035 Oceanside Boulevard

The industrial park with multiple tenants occupying the parcel east of the west end parcel at 4035 Oceanside Boulevard was also developed between 1970 and 1979. This site has been occupied by a variety of vehicle repair businesses that were listed in one or more environmental databases. Specific information regarding hazardous substances or petroleum products on these sites is discussed below in Section 5.3.2.

Center Industrial Park Parcel at 4051 Oceanside Boulevard

The industrial facility occupying the center parcel at 4051 Oceanside Boulevard was developed between 1970 and 1979. This site has been occupied by a variety of businesses that were listed in one or more environmental databases. Specific information regarding hazardous substances or petroleum products on these sites is discussed below in Section 5.3.2.

Commerce Center Parcel East of the East End Parcel at 4055-4065 Oceanside Boulevard

The commerce center with multiple tenants occupying the parcel east of the east end parcel at 4055-4065 Oceanside Boulevard was developed between 1994 and 1997. This site has been occupied by multiple businesses that were listed in one or more environmental databases. Specific information regarding hazardous substances or petroleum products on these sites is discussed below in Section 5.3.2.

East End Rancho Del Oro Business Center Parcel at 4079-4095 Oceanside Boulevard

The Rancho Del Oro Business Center with multiple tenants occupying the east end parcel at 4079-4095 Oceanside Boulevard was developed between 1985 and 1989. This site has been occupied by multiple businesses that were listed in one or more environmental databases. Specific information regarding hazardous substances or petroleum products on these sites is discussed below in Section 5.3.2.

Northeast

Historical sources indicated that the parking lot and College Boulevard Light Rail Station adjacent to the northeast of the subject property, across the railroad tracks and Loma Alta Creek, was undeveloped in 1893. By 1939, this site was partially agricultural land. By 1964, this site appeared to be fallow agricultural land. Between 1979 and 1985 this site was cleared and graded. Between 2002 and 2005, the parking lot was paved and the rail station was added between 2005 and 2009. Agricultural land, a parking lot, and the rail station were the only identified uses on this site.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the northeast adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

East

Historical sources indicated that the residential sites adjacent to and east of the subject property were undeveloped in 1893 and occupied by native vegetation. Between 1939 and 1946, these sites were cleared and their use appeared to be agricultural. Between 1970 and 1979, the existing single-family residences were developed on these sites. Residential and agricultural land are the only identified uses on these sites.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the east adjacent sites in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from these adjacent sites.

South

Historical sources indicated that the residential sites adjacent to and south of the subject property were undeveloped in 1893 and were occupied by native vegetation. Between 1939 and 1946, portions of these sites were cleared and their use appeared to be agricultural. Between 1970 and 1979, the existing single-family residences were developed on these sites. Residential and agricultural land are the only identified uses on these sites.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the south adjacent sites in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from these adjacent sites.

West

Historical sources indicated that the site adjacent to and west of the subject property was undeveloped in 1893 and appears to have never been developed.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the west adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

Northwest

Historical sources indicated that the site adjacent to and northwest of the subject property, across the restaurant tracks, was undeveloped in 1893 and appeared to have been used as agricultural land. Agricultural land was the only identified use of this adjacent site.

There were no signs of the storage or disposal of hazardous substances or petroleum products on the northwest adjacent site in the historical information reviewed. There were no indications from any historical sources that the subject property has been impacted from this adjacent site.

5.3 Regulatory Records Review

A Federal, State and Local Radius Profile Report from Environmental Data Resources, Inc. dated November 13, 2023, was reviewed by ES. The radius report, found in Appendix F, contains records of registered sites surrounding the subject property for the classifications and distances as required by ASTM Practice E1527-21. Descriptions of each database, their source, and publication dates are detailed in this appendix section.

5.3.1 Subject Property Environmental Database Summary

The subject property was not listed in any of the databases searched.

5.3.2 Adjacent Sites Environmental Database Summary

Two of the south adjacent sites and multiple sites adjacent to the north, across the railroad tracks, were listed in one or more of the environmental databases searched.

South Adjacent Sites

Bryan Snyder at 4044 Wooster Drive and *Josefina Hampton* at 4014 Wooster Drive were both listed in the RCRA NonGen/NLR database. These sites applied for EPA Generator ID numbers and were assigned numbers CAC003208350 and CAC003144359 respectively. These sites have been residential since their first development and there were no records of any hazardous substances or petroleum products usage, hazardous waste generation, or violations on these sites. It is unlikely that a *recognized environmental condition* exists at the subject property due to these sites for the following reasons: there were no records of any hazardous substances or petroleum products usage, hazardous waste generation, USTs, or violations on these sites; these site no longer generate hazardous wastes; and there were no records of spills or releases on these sites. No further action is recommended regarding these sites.

North Adjacent Sites

Industrial Park Parcel East of the West End Parcel at 4035 Oceanside Boulevard Multiple tenants in the industrial park occupying the parcel east of the west end parcel at 4035 Oceanside Boulevard were listed in one or more environmental databases.

Alfredo Bernal, Vergara Automotive, Elliott Auto Repair, D&J Auto Doctors, and Vegas Towing & Auto Electric were all listed in the RCRA NonGen/NLR database. The DEH did not have any records of these tenants. It therefore appears that they had obtained EPA Generator ID numbers but had not yet, or ever, generated any hazardous waste. Based upon the lack of the generation of any hazardous wastes and no records of hazardous substances or petroleum products storage from the DEH, these tenants do not represent a *recognized environmental condition* for the subject property.

Porky's Specialized Paints was listed in the RCRA-SQG, FINDS, and ECHO databases. This tenant generated small quantities of hazardous waste under US EPA Generator number CAD982478794. The DEH did not have any records of this tenant. It is unlikely that a *recognized environmental condition* exists at the subject property due to this north adjacent tenant for the following reasons: because of its distance from the subject property; only small quantities of wastes have been generated; and there were no records of spills, releases, USTs, or violations from this tenant. No further action is recommended regarding this tenant.

California Automotive Solutions was listed in the RCRA NonGen/NLR, San Diego County HMMD, CERS HAZ WASTE, HWTS, HAZNET, NPDES, CIWQS, and CERS databases. The DEH did not have any records of this tenant. According to the EDR databases searched, this site generated small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID number CAL000352371. From 2001 through 2021, this tenant generated small quantities of the following wastes: waste oil & mixed oil, organic liquids with metals, used oil filters, unspecified oil-containing waste, and unspecified organic liquid mixture. This tenant has several paperwork violations but nothing that represented a release. It is unlikely that a *recognized environmental condition* exists at the subject property due to this tenant for the following reasons: because of its distance from the subject property; only small quantities of wastes have been generated; this tenant no longer stores significant quantities of hazardous materials or petroleum products nor generates hazardous wastes; and there were no records of spills, releases, USTs, or violations on this site. No further action is recommended regarding this tenant.

European Car Clinic was listed in the Historic Auto Stations databases. This tenant was not a gasoline station. This tenant was a vehicle repair business under multiple names from 1991 through 2014. The DEH did not have any records of this tenant. It is unlikely that a *recognized environmental condition* exists at the subject property due to this tenant for the following reasons: because of its distance from the subject property; this tenant no longer stores significant quantities of hazardous materials or petroleum products nor generates hazardous wastes; and there were no records of spills, releases, USTs, or violations on this site. No further action is recommended regarding this site.

ES requested records for all of the addresses on this parcel from the DEH. Below is a table with a summary of the files provided by the DEH. Copies of these files are presented in Appendix D. Marsway Machining Inc. was listed in the RCRA NonGen/NLR database and was the only tenant with a file at the DEH. It is unlikely that a *recognized environmental condition* exists at the subject property due to this tenant for the following reasons: because of its distance from the subject property; only small quantities of wastes have been generated; and there were no records of spills, releases, USTs, or violations indicating a risk of a release occurred on this site. No further action is recommended regarding this tenant.

Su	Summary of DEH Files for the Industrial Park Parcel East of the West End Parcel					
Year	Address	Tenant	ltem	Description		
2015	4035	Marsway Machining Inc.	CERS Access	New business		
2016	4035	Marsway Machining Inc.	Return to compliance	CERS submitted, employee training documented, site map updated, manifests available		

Su	Summary of DEH Files for the Industrial Park Parcel East of the West End Parcel						
Year	Address	Tenant	ltem	Description			
2016	4035	Marsway Machining Inc.	Inspection Checklist	Generate hazardous waste and store hazardous materials. CESQG generator. Violations for chemical inventory not complete, training not conducted, site map not submitted, and waste manifests not available			
2018	4035	Marsway Machining Inc.	Inspection	Generate hazardous waste and store hazardous materials. This facility is a machine shop. CESQG generator. Violations for not having HMBP annually recertified, EPA Generator number not current,			
2021	4035	Marsway Machining Inc.	Inspection	Hazardous materials included one 55 gallon drum containing new machine coolant and one 55 gallon drum labeled used machine coolant. No violations			
2021	4035	Marsway Machining Inc.	Letter from DEH	Annual hazardous materials business plan certification not completed			
2023	4035	Marsway Machining Inc.	Notice to Comply	Must submit CERS data			

Center Industrial Park Parcel at 4051 Oceanside Boulevard

The industrial development occupying the center parcel at 4051 Oceanside Boulevard was developed between 1970 and 1979. This site has been occupied by a variety of businesses that were listed in one or more environmental databases.

San Diego Auto Auction was listed in the LUST, San Diego County HMMD, SWEEPS UST, San Diego County SAM, San Diego County LOP, HIST CORTESE, Cortese, HWTS, NPDES, CIWQS, and CERS databases. Greenfield Fence, Inc. was listed in the RCRA NonGen/NLR database. This site generated small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID numbers CAL000255261 and CAL000375347. San Diego Auto Auction had an air pollution permit. San Diego Auto Auction had multiple petroleum product USTs. San Diego Auto Auction had a release of gasoline that impacted soil discovered in 1994. Testing and/or remediation have been performed on this site and its status as of 1997 has been closed. ES requested records for this site from the DEH which are summarized in the table below and are presented in Appendix D. There were no records from these files indicating that the release that had occurred would impact the subject property.

Sun	Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard					
Year	Tenant	ltem	Description			
1990	San Diego Auto Action	Permit to operate USTs	One 1,000 gallon gasoline UST and one 550 gallon waste il UST			
1994	San Diego Auto Action	Permit Application	Remove three single walled gasoline USTs; one 8,000 gallon and two 1,000 gallon tanks installed in 1979			
1997	San Diego Auto Action	Tank Removal Application	Remove tank removal completed			
2006	Golden State Fence Co	Corrective Actions Return to Compliance	Paperwork submitted, accumulated wastes removed, containers were sealed, materials no longer comingled, oil cleaned from catch basin, paint thinner grounded, and employee training program established.			
2006	Golden State Fence Co	Inspection	Violations for not having health permit, comingled wastes, labels missing, wastes stored too long, spill inside secondary containment, training not adequate, business plan needed			
2006	Golden State Fence Co	AST Facility	One 500 gallon gasoline AST and four 55 gallon used oil ASTs			
2008	Golden State Fence Co	Hazardous materials plan certification	Approved			
2008	Golden State Fence Co	Hazardous materials questionnaire	Store flammable liquids			
2010	Golden State Fence Co	Inspection	No violations			
2010	Greenfield Fence Inc.	CERS Access Request	Change of ownership			
2010	Greenfield Fence Inc.	Inspection	Violations for HMBP not complete, wastes on site too long,			

Sun	Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard						
Year	Tenant	ltem	Description				
2017	Greenfield Fence Inc.	Inspection Checklist	 Hazardous materials on site, generate hazardous waste, and small quantity generator. This facility manufactures fences. Hazardous materials included: 1) 1x 500 gallon aboveground tank of Unleaded Gasoline, 2) 1x 185 gallon aboveground tank of 15w-40 Lubricant Oil, 3) 1x 55 gallon poly drum of Waste Antifreeze, 4) 1x 300 gallon aboveground tank of Used Oil, 5) 3x 55 gallon steel drums of Waste Paint Solvent, 6) 12 x 9 gallon of Propane, 7) 2x 200 cubic ft of Oxygen, 8) 6x 300 cubic ft of CO2, 9) 1x 529 gallon aboveground tank of Liquid Argon, 10) 5x 343 cubic ft of Argon/CO2. Violations issued for open containers, HMBP not certified. 				
2019	Greenfield Fence Inc.	Inspection Checklist	 Hazardous materials on site, generate hazardou waste, and small quantity generator. This facilit manufactures fences. Hazardous materials included: During today's inspection, I observed th following hazardous materials/waste: Carbon dioxide liquid (1 265-litters), Argon liqui (529 gallons), Argon/carbon dioxide mix (14 200- cylinders), Argon (7 200-cft cylinders), Acetylene 126-cft cylinders), Oxygen (4 337-cft cylinders) Propane (32 7-gal cylinders), Gasoline unleaded 500-gal AST), Portland Cement (8000 lbs), Oxol/thinner (5 55-gal drums), Waste oil (1 250-g AST), Waste antifreeze (1 55-gal drum), Oily/solvent rags (2 55-gal drums), Waste metal filters (1 55-gal drum), Waste paint (6 55-gal drums). Violations for HMBP not certified annual chemical inventory incomplete 				
2019	Greenfield Fence Inc.	Letter	Greenfield Fence generates waste paint, waste oil, waste antifreeze, waste oil rags, and used oil filters.				
2022	Greenfield Fence Inc.	Inspection	Violations issued for HMBP not readily available or certified as complete, failed to maintain waste analysis records, and missing labels.				
2022	Greenfield Fence Inc.	SPCC Plan	SPCC plan for facility. 1,000 gallons of gasoline in ASTs, smaller quantities of used oil, paint oil, and emulsified oil in ASTs				

In addition to the records provided by the DEH, ES reviewed documents relating to the LUST case presented in the GeoTracker website published by the State Water Resource Control Board. Excerpts from these files are presented in Appendix E. According to a Case Closure Summary published by the DEH on November 3, 1997, this site removed one 4,000 gallon gasoline UST and two 550 gallon waste oil USTs on October 6, 1994. Visual evidence at that time justified opening a case. Initial soil sample results were very low. The excavation was over excavated and conformation samples were taken. The soil sample results were low enough that the soil was allowed to be used as backfill. Three groundwater monitoring wells were installed and tested. The groundwater samples showed no significant impact and no additional assessment or remedial actions were required. The DEH issued a No Further Action (NFA) letter dated November 6, 1997, which is also presented in Appendix E.

It is unlikely that a *recognized environmental condition* exists at the subject property due to this site for the following reasons: because of its distance from the subject property; only small quantities of wastes have been generated; the release had been limited to the soil and is therefore not anticipated to migrate to the subject property; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

<u>Commerce Center Parcel East of the East End Parcel at 4055-4065 Oceanside Boulevard</u> The commerce center with multiple tenants occupying the parcel east of the east end parcel at 4055-4065 Oceanside Boulevard was developed between 1994 and 1997. This site has been occupied by multiple businesses that were listed in one or more environmental databases.

Prepak Products were listed in the RCRA NonGen/NLR database. The DEH did not have any records on this tenant. It therefore appears that they had obtained an EPA Generator ID number but had not yet, or ever, generated any hazardous waste. Based upon the lack of the generation of any hazardous wastes and no records of hazardous substances or petroleum products storage from the DEH, this tenant does not represent a *recognized environmental condition* for the subject property.

ES requested records for all of the addresses on this parcel from the DEH. Below is a table with a summary of the files provided by the DEH. Copies of these files are presented in Appendix D. *AM Chemicals LLC* was listed in the RCRA-SQG, FINDS, ECHO, and PFAS databases. *AM Chemicals LLC* generated small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID number CAR000169706 and their records are contained in this table. Also, the DEH had records for *Biomedical Research (BRISC)* who were not listed in any of the EDR databases. It is unlikely that a *recognized environmental condition* exists at the subject property due to these tenants for the following reasons: because of their distances from the subject property; only small quantities of wastes have been generated; and there were no records of spills, releases, USTs, or violations indicating a risk of a release on this site. No further action is recommended regarding this site.

Sum	Summary of DEH Files for the Commerce Center Parcel East of the East End Parce						
Year	Address	Tenant	Item	Description			
2017	4065	AM Chemicals LLC	CERS Request Form	Request for CERS			
2018	4055	Biomedical Research (BRISC)	Inspection Checklist	Medical waste generator only, no hazardous waste or USTs			
2018	4065	AM Chemicals LLC	Inspection Checklist	Hazardous materials storage and hazardous waste generator, small quantities. This facility is a laboratory that synthesizes precursor chemicals for the pharmaceutical industry. Chemicals onsite were: 1) 1x 55 gallon drum of Acetonitrile 2) 1x 55 gallon drum of Methanol 3) 1x 55 gallon drum of waste solvents (methanol, hydrochloric acid) 4) 1x 55 gallon drum of waste chlorinated solvents 5) Nitrogen in below reportable amount (<1,000 cubic ft). Violations for Unified Program Facility permits not obtained, failed to establish and implement a HMBP, missing labels, open containers, training issues, missing manifests			
2020	4065	AM Chemicals LLC	Inspection Checklist	Hazardous materials storage and hazardous waste generator, small quantities. This facility is a laboratory that synthesizes precursor chemicals for the pharmaceutical industry. Chemicals onsite were: 3 55 gal drums of waste acetone/acetonitrile, 1 55 gal drum of di chlorinated mixture, 1 55 gal drum of new toluene (1/4 full), 1 55 gal drum of new methanol. Violation issued for training deficiencies.			
2020	4065	AM Chemicals LLC	Corrective Action Corrected	Training deficiencies corrected			
2021	4055	Biomedical Research (BRISC)	Inspection	Closure inspection, no violations			
2023	4065	AM Chemicals LLC	Inspection	No violations			

East End Rancho Del Oro Business Center Parcel at 4079-4095 Oceanside Boulevard

The commerce center with multiple tenants occupying the parcel east of the east end parcel at 4079-4095 Oceanside Boulevard was developed between 1985 and 1989. This site has been occupied by multiple businesses that were listed in one or more environmental databases.

Scripps Coastal Med, Bay Cal Commercial Painting, and TIPD LLC were all listed in the RCRA NonGen/NLR database. TIPD LLC were also listed in the FINDS, ECHO, and PFAS ECHO databases but there were no records of any hazardous waste generation or hazardous substances or petroleum products storage by this tenant. The DEH did not have records for any of these tenants. It therefore appears that they had obtained EPA Generator ID numbers but had not yet, or ever, generated any hazardous waste. Based upon the lack of the generation of any hazardous wastes and no records of hazardous substances or petroleum products storage from the DEH, these tenants do not represent a *recognized environmental condition* for the subject property.

ES requested records for all of the addresses on this parcel from the DEH. Below is a table with a summary of the files provided by the DEH. Copies of these files are presented in Appendix D. *HTS Engineering Inc.* was listed in the RCRA NonGen/NLR, CERS HAZ WATE, and CERS databases and their records are contained in this table. Also, the DEH had records for *F1 Optics*, *Hi Tech Swiss Engineering, Rhino Linings of North County, Bloxton Chiropractic,* and *Opti Sources* who were not listed in any of the EDR databases. It is unlikely that a *recognized environmental condition* exists at the subject property due to these tenants for the following reasons: because of their distances from the subject property; only small quantities of wastes have been generated; and there were no records of spills, releases, USTs, or violations indicating a risk of a release on these sites. No further action is recommended regarding these sites.

Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard				
Year	Address	Tenant	ltem	Description
1991	4093	Opti Sources	Questionnaire	Machine Shop
1997	4079	Hi Tech Swiss Engineering	Inspection	Violations for commingling hazardous waste and floor waste not being disposed of improperly into the sewer and waste onsite from more than 90 days
1997	4093	Opti Sources	Inspection	Violation for storing hazardous waste too long
1998	4079	Hi Tech Swiss Engineering	Inspection	Violations for improper designation of a hazardous waste and waste manifest not properly recorded
1998	4083	Bloxton Chiropractic	Letter	Installing X-ray equipment
1998	4083	Bloxton Chiropractic	Inspection	Health permit and HMBP needed

Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard				
Year	Address	Tenant	ltem	Description
1999	4079	Hi Tech Swiss Engineering	Inspection	Violations for no labels on drums and kerosine being added to waste oil
1999	4093	Opti Sources	Inspection	No violations
2000	4083	Bloxton Chiropractic	Inspection	No violations
2001	4079	Hi Tech Swiss Engineering	Inspection	No violations
2003	4079	Hi Tech Swiss Engineering	Inspection	No violations
2003	4083	Bloxton Chiropractic	Notification	Photographic waste only
2003	4093	Opti Sources	Inspection	No violations
2004	4079	Hi Tech Swiss Engineering	Inspection	Violation for kerosine being mislabeled
2004	4089	Rhino Linings of North County	Inspection	New business, no violations, no hazardous waste generated, no USTs
2005	4093	Opti Sources	Inspection	Need copy of manifest
2006	4079	Hi Tech Swiss Engineering	Inspection	Violation for used oil spilled in containment basin, map needs updating, need to keep shop floor dry, and mislabeled containers
2006	4079	Hi Tech Swiss Engineering	Return to compliance	Violations from 2006 inspection corrected
2007	4079	Hi Tech Swiss Engineering	Inspection	Violation for used oil spilled in containment basin, open drums, MSDS sheets not on file, mixing wastes,
2007	4079	Hi Tech Swiss Engineering	Return to compliance	Violations from 2007 inspection corrected
2008	4079	Hi Tech Swiss Engineering	Hazardous materials business plan (HMBP) Certification	Approved, no details provided

Sur	Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard			
Year	Address	Tenant	ltem	Description
2010	4089	F-1 Optics	Inspection	Violation for hazardous materials without permit
2010	4089	F-1 Optics	Return to compliance	Permit issued
2010	4079	HTS Engineering	Inspection	Violation for spilled oil on floor
2011	4079	Hi Tech Swiss Engineering	Inspection	Violations for unlabeled containers and drums and storing materials for more than 90 days
2012	4089	F-1 Optics	Court Documents	Documents associated with failure to pay for permit
2012	4089	F-1 Optics	Letter	Must submit documents electronically
2014	4089	F-1 Optics	Inspection	Violation for hazardous materials without permit and
2014	4079	HTS Engineering	CERS Request Form	Request for CERS
2014	4079	HTS Engineering	Letter From DEH	Must register with CERS
2015	4089	F-1 Optics	Notice of Violation	Violation for xylene storage without permit
2015	4079	HTS Engineering	Inspection	Small quantity generator, no violations
2017	4089	F-1 Optics	Permit	Permit for generator number
2017	4089	F-1 Optics	Inspection Checklist	CESQG Generator of hazardous waste, no USTs
2017	4089	F-1 Optics	Inspection	Violations for failure to obtain generator ID number, failure to submit CERS data, failure to post emergency contact,
2017	4089	F-1 Optics	Letter	Have not obtained EPA Generator Number
2017	4079	HTS Engineering	Inspection Checklist	Hazardous waste generator and hazardous materials handler, no USTs, small quantity generator

Sur	Summary of DEH Files for the Center Industrial Park at 4051 Oceanside Boulevard			
Year	Address	Tenant	ltem	Description
2017	4079	HTS Engineering	Inspection	This facility manufactures hardware for electronic connectors for military and aerospace Hazardous materials included: 1) 2x 55 gallon poly drums of used cutting oil; 2) 1x 55 gallon steel drum of solvent; 3) 1x 55 gallon drum of Bio Tuff Degreaser; 4) 1x 55 gallon drum of Arrow Kut; 5) 2x 55 gallon steel drum of Fast Cat. Small quantity generator.
2017	4079	HTS Engineering	Waste Manifests	Used oil
2018	4079	HTS Engineering	Letter from DEH	Annual hazardous materials business plan certification not completed
2018	4079	HTS Engineering	Waste Manifests	Used oil
2019	4089	F-1 Optics	Inspection Checklist	CESQG Generator of hazardous waste, no USTs
2019	4089	F-1 Optics	Inspection	Violations for failure to obtain generator ID number
2019	4079	HTS Engineering	Inspection Checklist	Hazardous waste generator and hazardous materials handler, no USTs, small quantity generator. This facility is a machine shop subject to a Hazardous Materials Business Plan. Observed: 1) 4x 55 gallon drums of waste oil, 2) 4x 55 gallon drums of degreaser, 3) 1x 55 gallon drum of Fast Cat, 4) 4x 55 gallon drums of new lubricating oil.
2022	4089	F-1 Optics	Inspection	No violations
2022	4079	HTS Engineering	Inspection	Violations for map incorrect and missing labels

5.3.3 Sites Within 0.125 miles of the Subject Property

Unocal 76 Oceanside at 4101 Oceanside Boulevard was located approximately 555-feet northeast and downgradient of the subject property. This site was listed in the Historic Auto Stations database. This site was listed as a gasoline station in 2007. This site is currently a car wash with no fueling stations or USTs. There were no records indicating that this site had previously had any fuel stations or USTs. It appears that this site may have been operated by *Unocal* 76 but was not a gasoline station. It is unlikely that a *recognized environmental condition* exists at the subject property due to this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; no wastes have been generated from this site; and there were no records of spills, releases, USTs, or violations on this site. No further action is recommended regarding this site.

There were ten other sites on the RCRA NonGen/NLR database that were located within 660 feet of the subject property. It is unlikely that a recognized environmental condition exists at the subject property as a result of these sites because none of them were adjacent, drycleaners, historical drycleaners, had USTs, were gasoline stations, had reported spill, USTs, or releases. No further action is recommended regarding these sites.

5.3.4 Sites Between 0.125 miles and 0.25 miles of the Subject Property

Plaza Del Oro Cleaners at 4140 Oceanside Boulevard was located approximately 1,081-feet north, northeast and downgradient of the subject property. This site was listed in the RCRA NonGen/NLR, DRYCLEANERS, RCRA-SQG, CERS HAZ WASTE, FINDS, ECHO, EMI, HWTS, and CERS databases. This site generated small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID number CAL000470712 and CAD982428849. This site was a drycleaner that used petroleum based solvents and had an air pollution permit. It is unlikely that a *recognized environmental condition* exists at the subject property due to this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; this site no longer stores significant quantities of hazardous materials or petroleum products nor generates hazardous wastes; and there were no records of spills, releases, or violations on this site. No further action is recommended regarding this site.

SMM USA, Inc./Greene Group Industries/Southwest Green International at 4055 Calle Platino was located approximately 1,134-feet north, northwest and downgradient of the subject property. This site was listed in the SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-SQG, HWP, CERS HAZ WASTE, NPDES, CIWQS, CES, RCRA NonGen/NLR, and ENVIROSTOR databases. This site generated hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID number CAD982414146 that included halogenated solvents. This site had a stormwater permit. This site had an air pollution permit. This site was issued multiple violations. This site is no longer an active generator of hazardous waste. ES reviewed online files published for this site by the DTSC on the ENVIROSTOR database. According to a 2010 Records Review Checklist from the DTSC, an analogous RCRA facility assessment was completed in 1991 and no corrective action was needed. It is unlikely that a recognized environmental condition exists at the subject property due to this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; this site no longer stores significant quantities of hazardous materials or petroleum products nor generates hazardous wastes; and there were no records of spills, releases, or USTs on this site. No further action is recommended regarding this site.

76 Service Station/Walgreens at 4181 Oceanside Boulevard was located approximately 1.148feet northeast and downgradient of the subject property. This site was listed in the LUST, RCRA-VSQG, FINDS, ECHO, San Diego County SAM, CPS-SLIC, UST, SWEEPS UST, and San Diego County HMMD databases. This site generated small quantities of hazardous waste and/or petroleum products for off-site disposal or recycling under EPA Generator ID number CAR000253351. This site had an air pollution permit. This site was a gasoline station with multiple petroleum product USTs that has been closed and redeveloped. This site had a release of gasoline that impacted soil and groundwater discovered in 2000. Testing and/or remediation have been performed on this site and its status as of 2007 has been closed. It is unlikely that a recognized environmental condition exists at the subject property due to this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; this site no longer stores significant quantities of hazardous materials or petroleum products, has USTs, nor generates hazardous wastes; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

TMI at 4079 Calle Platino was located approximately 1,190-feet north and downgradient of the subject property. This site was listed in the San Diego County SAM, CPS-SLIC, San Diego County HMMD, EMI, and CERS databases. This site was a cell tower site that stored diesel fuel and lead acid batteries. This site was investigated for a release and its status as of 1995 has been closed. It is unlikely that a *recognized environmental condition* exists at the subject property due to this site for the following reasons: because of its distance from the subject property; its location downgradient from the subject property; only small quantities of wastes have been generated; this site no longer stores significant quantities of hazardous materials or petroleum products nor generates hazardous wastes; and the site status has been closed with remedial action completed or deemed unnecessary. No further action is recommended regarding this site.

There were other sites on multiple databases that were located between 0.125 and 0.25 miles from the subject property that have a low likelihood of creating a recognized environmental condition at the subject property and no further action is recommended regarding any of these sites because of their distances from the subject property and there were no reports of spills or releases on any of these sites.

5.3.5 Sites Located More than 0.25 miles from the Subject Property

There were multiple sites on several databases that were located more than 0.25-miles from the subject property that have a low likelihood of creating a recognized environmental condition at the subject property and no further action is recommended regarding any of these for the following reasons:

- Their distances from the subject property;
- There were no reports of spills or releases, and/or;
- The releases were not of a magnitude that would be expected to impact the subject property and/or;
- The site statuses had been closed with remedial action completed or deemed unnecessary.

5.3.6 Orphan (Unmapped) Sites

There were no "Orphan" (unmapped) sites identified in the EDR Radius Map Report.

5.3.7 San Diego Regional Water Quality Control Board

Due to the lack of a street address and because ethe subject property has never been developed, ES was not able to request records for the subject property from the San Diego Regional Water Quality Control Board. ES does not anticipate that there are any significant records to be reviewed for the subject property at this agency that would change our opinion.

5.3.8 County of San Diego Department of Environmental Health (DEH)

Because the County of San Diego Department of Environmental Health (DEH) can search records by APN number, ES requested to review records for the subject property and the north adjacent sites from this agency. Ms. Atieh Khalili, Office Support Specialist, did not provide any records for the subject property. Records for the north adjacent sites are discussed above in section 5.3.2 and relevant copies of documents are presented in Appendix D. Ms. Khalili indicated that files relating to the Site Assessment and Mitigation Program (SAM), or LUST cases, were all posted on the GeoTracker website. There were no SAM records for the subject property. SAM records were identified for one of the north adjacent sites which is also discussed in Section 5.3.2 and excerpts from these documents are presented in Appendix E.

5.3.9 San Diego Air Pollution Control District (SDAPCD)

Due to the lack of a street address and because ethe subject property has never been developed, ES was not able to request records for the subject property from the San Diego Air Pollution Control District (SDAPCD). ES does not anticipate that there are any significant records to be reviewed for the subject property at this agency that would change our opinion.

5.3.10 City of Oceanside Fire Department Fire Prevention Bureau

Due to the lack of a street address and because the subject property has never been developed, ES was not able to request records for the subject property from the City of Oceanside Fire Department. ES does not anticipate that there are any significant records to be reviewed for the subject property at this agency that would change our opinion.

5.3.11 Department of Toxic Substances Control (DTSC)

DTSC Files

Because the subject property has never been developed and has no specific street address, a request for DTSC files could not be sent. There are no records expected to exist at this agency that are related to the subject property.

Generator Information Services Section

Because the subject property has never been developed and has no specific street address, a request for Generator Information Services Section files could not be sent. There are no records expected to exist at this agency that are related to the subject property.

EnviroStor

ES searched for the subject property and adjacent sites on the EnviroStor website published by the DTSC. This website contains listings of Federal Superfund sites, State Response sites, Voluntary Cleanup sites, School Cleanup sites, Evaluation sites, School Evaluation sites, Military Evaluation sites, Tiered Permit sites, Corrective Action sites, Operating Permit sites, Post Closure Permit sites, and Non-Operating Permit sites. The subject property and adjacent sites to the east, south, west, and northwest were not identified on the EnviroStor website.

Relevant documents published on this web site for the north adjacent SMM USA, Inc. site at 4055 Oceanside Boulevard are discussed above in Section 5.3.2.

5.3.12 State Water Resources Control Board (GeoTracker)

ES searched for the subject property and adjacent sites on the GeoTracker website published by the State Water Resources Control Board. GeoTracker contains lists of DTSC cleanup sites, other cleanup sites, LUST sites, UST sites, land disposal sites, military sites, and DTSC Disposal Permit sites. The subject property and adjacent sites east, south, west, and northwest were not identified on the GeoTracker website. Reports published on this web site for one of the north adjacent sites are discussed above in Section 5.3.2 and relevant excerpts from these files are presented in Appendix E.

5.3.13 CalEPA Regulated Sites

ES searched for the subject property and adjacent sites on the CalEPA Regulated Site Portal. This site combines data about environmentally regulated sites and facilities in California. These include sites that store or use hazardous substances, petroleum products, toxic materials, or generate hazardous waste. It also includes sites that have or are currently involved in state and federal cleanups and have impacted ground and surface waters. The subject property and adjacent sites to the east, south, west, and northwest were not identified in the CalEPA Regulated Site Portal. Information regarding multiple of the north adjacent sites was consistent with other data already reviewed and discussed above in Section 5.3.2.

5.3.14 Solid Waste Information System (SWIS) Database

The Solid Waste Information System (SWIS) database contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of solid waste activities found in this database include landfills, transfer stations, composting sites, invessel digestion sites, engineered municipal solid waste conversion facilities, transformation facilities, and closed disposal sites. For each site, the database contains information about the location, land owner, operator, activity type, regulatory and operational status, authorized waste types, local enforcement agency, inspections and enforcement action records. According to the SWIS database searched on February 9, 2024, the subject property and adjacent sites were not listed as solid waste facilities.

5.3.15 Vapor Intrusion

Based on a review of agency records, historical documents, and current site uses, there were no onsite sources identified that had the potential to have created a vapor intrusion issue on the subject property.

There were no offsite properties identified in the database research that had an open release of petroleum hydrocarbons within 528 feet (one-tenth of a mile (0.1-miles)) upgradient, 165-feet crossgradient, or 100 feet downgradient of the subject property. There were no offsite properties identified in the database research that had a documented release of other chemicals, such as VOCs, identified within 1,760-feet (one-third of a mile ($1/_3$ -mile)) upgradient, 365-feet crossgradient, or 100 feet downgradient of the subject property.

It should be noted that ES was not contracted to perform an assessment of the subject property in accordance with ASTM Standard E2600 nor does this assessment meet the requirements of said standard.

6.0 INTERVIEWS AND QUESTIONNAIRES

6.1 Regulatory Agency Representative Interviews

Using information obtained from the Federal, State and Local Radius Profile Report from Environmental Data Resources, Inc. dated November 13, 2023, along with responses to FOIA requests and other documents discussed in Section 5.3, ES was able to identify conditions indicative of releases and threatened releases without the need to interview regulatory agency representatives.

6.2 Tenant Information

There were no tenants on the subject property at the time of the subject property reconnaissance.

6.3 **Owner Information**

Mr. Gregory T. Smith with Oceanside Trolley Place LLC, the subject property owners, filled out an environmental questionnaire dated February 8, 2024. A copy of this form is provided in Appendix G. Mr. Smith indicated that he had firsthand knowledge of the subject property since approximately 2004 and appeared to have had good knowledge of the uses and physical characteristic of the subject property and was deemed to be the key site manager. He indicated that he knew of no significant amounts of hazardous or petroleum products used on the subject property. Mr. Smith marked that he knew of no current or past environmental liens in association with the subject property. He was not aware of any Activity or Use Limitations (ALUs) such as engineering controls, land use restrictions or institutional controls in place or on file under federal, tribal, state or local law. He indicated that he had no knowledge of any Underground Storage Tanks (USTs), Above Ground Storage Tanks (ASTs) or the storage of any hazardous substances or petroleum products on the subject property. Mr. Smith stated that to the best of his knowledge, there had never been any spills or violations on the subject property in association with hazardous substances or petroleum products. Mr. Smith was aware of no soil or groundwater contamination on the subject property or on adjacent sites. He wrote that he was not aware of a reduction in the subject property value due to environmental issues. Regarding land use restrictions, Mr. Smith stated to the *Client* that the property, of course, was subject to compliance with all applicable laws and regulations. Mr. Smith indicated that regarding any special rules only applicable to the property, the answer was none. He was not aware of any issues or reports on the subject property regarding environmental site assessments, asbestos surveys, lead-based paint surveys, mold testing, soil and/or groundwater testing. Mr. Smith indicated to the Client that there were studies performed but these were limited to onsite biological reports regarding vegetation and habitats. Mr. Smith wrote that to the best of his knowledge, which dates back 20 years, there has been no use of the subject property during the existing ownership.

7.0 NON-SCOPE SERVICES

7.1 Asbestos

The subject property was undeveloped at the time of the site reconnaissance, therefore, no suspect asbestos containing materials were noted on the subject property.

Agricultural sites, such as the former subject property usage, sometimes utilized transite asbestos pipes for irrigation water distribution. These pipes were usually buried and may not be identified until the subject property is excavated or graded. If the subject property is to be developed, it is recommended that the grading contractor be advised to look out for such pipes and contact ES for assessment prior to disturbance. If the pipes are damaged during redevelopment, then the abatement of the subject property would require not only the removal of the transite pipe but also soil impacted by damaged piping, greatly increasing the time and cost of abatement.

7.2 Lead-Based Paint

The subject property was undeveloped at the time of the site reconnaissance; therefore, no suspect lead-based paint was noted on the subject property.

7.3 Lead Contamination of Drinking Water

The condition of the drinking water at the subject property is unknown; the subject property was undeveloped at the time of the subject property reconnaissance.

7.4 Radon

Based on the results of the State of California Department of Health Services' 1990 California Statewide Radon Survey, the U.S. Environmental Protection Agency (U.S. EPA) lists San Diego County as being in Radon Zone 3. Zone 3 areas have a predicated average indoor radon screening potential of less than 2.0 picocuries per liter (pCi/L). The level at which the U.S. EPA considers radon levels to be unhealthful is 4.0 pCi/L in residential structures.

7.5 Urea-Formaldehyde

The subject property was undeveloped at the time of the site reconnaissance; therefore, no suspect urea-formaldehyde containing materials were noted on the subject property.

7.6 Water Intrusion and Mold

The subject property was undeveloped at the time of the site reconnaissance; therefore, no mold or water intrusion issues were observed that could potentially affect indoor air quality.

7.7 Earthquake Induced Landslides, Liquefaction, and Fault Lines

According to the California Earthquake Hazards Zone Application ("EQ Zapp") researched on February 12, 2023, the subject property was not located in an Earthquake Fault Zone. The area of the subject property has not been evaluated for Liquefaction or Earthquake Induced Landslide conditions.

7.8 Methane Conditions

The subject property is in an area surrounded by commercial and residential developments and vacant land. The area around the subject property began to significantly develop in the 1970s.

According to a State of California, California Geologic Energy Management Division (CalGEM) Well Finder search, the subject property is not located within an oil or gas field. There were no oil wells depicted on the subject property, adjacent sites, or within one mile of the subject property.

7.9 Pipelines

ES reviewed the online National Pipeline Mapping System published by the Pipeline and Hazardous Materials Safety Administration, a division of the Department of Transportation. According to this agency, there were no pipelines mapped on the subject property.

7.10 Mercury

The subject property was undeveloped at the time of the site reconnaissance, therefore, no mercury containing components were identified on the subject property.

7.11 Fluorescent Light Tubes

The subject property was undeveloped at the time of the site reconnaissance, therefore, there were no fluorescent light tubes identified on the subject property.

8.0 FINDINGS, OPINIONS, CONCLUSIONS, AND RECOMMENDATIONS

ES have conducted this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the subject property. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This report also meets the requirements of All Appropriate Inquiries (AAI) as defined in CERCLA 42, U.S.C. § 9601(35)(B) and 40 C.F.R. Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the Landowner Liability Protections (LLPs) to CERCLA liability (42 U.S.C. § 9601 (35)(A) & (B), § 9607(b)(3), § 9607 (q), and § 9607(r)) assuming compliance with other elements of the defense.

ASTM Findings

This assessment has revealed no recognized environmental conditions, controlled recognized environmental conditions, historical recognized environmental condition, de minimis conditions, or significant data gaps in connection with the subject property. Additional investigations are not deemed necessary at this time.

Non-Scope ASTM Findings

ES have not identified any *business environmental risks* in connection with the subject property. Findings, opinions, and recommendations for non-scope ASTM services that are discussed in this report, which are not *recognized environmental conditions* include the following: onsite wetland conditions that are discussed in Section 5.1.3 and possible residual pesticides that are discussed in Section 5.2.1.

9.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

The undersigned certifies that the professional services have been performed, our findings obtained, and our recommendations have been prepared in accordance with customary principles and practices in the field of environmental science and engineering. ES has acted in good faith and has no relationship with sellers, buyers or agents of the subject property. There have been no conflicts of interest involved in the drawing of conclusions, which have been based solely on materials reviewed and visual inspections performed by ES. The undersigned declares that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312 Section 312.10. We have the specific qualifications based on science background, education, training and many years of experience to assess a subject property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 with any exceptions noted in Section 2.2 - Limitations, Exceptions and Methodology of Assessment.

11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Michael Rezvani, EP Senior Environmental Scientist and Advisor REPA #554617, CAC#93-1225

Professional Experience:

Michael Rezvani has been directly involved with various aspects of the environmental engineering and consulting industry since 1982. As the principal officer of Environmental Solutions, he continues to develop and execute new environmental assessment projects and sustains his lasting relationships with his clients. He has accrued knowledge and understanding of the true intent and importance of environmental site assessments (phase I and phase II), subsurface soils-testing and soil-gas surveys, asbestos consulting services, physical risk assessments, indoor air quality testing, emission testing, lead surveys and hazard mitigation monitoring. He involves himself personally in the daily activities and correspondences of his projects. He is uniquely qualified when it comes to making sense out of a large volume of technical data and simplifying the results into an understandable form for his clients. He has performed hundreds of "phase I and phase II" environmental site assessments since 1988 and even prior to issuance of the current ASTM standards. He has the ability to educate his clients about a given environmental or geotechnical case problem and involve them in the step by step process of mitigation to reach closure. He creates a sense of personal trust and transparency in his execution of a given environmental project.

He has uniquely designed and personally managed major construction and/or demolition projects involving asbestos and lead abatement. He has been conducting asbestos and lead awareness classes since 1990. His litigation experience as an expert witness which stems from many years in the consulting industry is further exemplified by his personal participation as a key part of several defense teams for his clients in environmental related law suits. He has testified as an expert witness at the Superior Court of Los Angeles and in out-of-court settlements for environmental mitigation cases. His knowledge, common sense and simple approach to interpret the intent of the environmental regulations have assisted legal teams to succeed in several significant cases.

In the late 1980's he performed over 10 million square feet of EPA/AHERA asbestos surveys and provided the documentation for the associated EPA management plans for the schools (K-12) throughout the central and western parts of the United States. In the mid 1980's, he performed the original volumetric and hydrostatic testing and damage assessment of the underground storage tanks (USTs) in Southern and Central California following the US EPA issuance of Subtitle I & II of EPA-RCRA. He later managed the subsequent phase II assessment and the removal of the USTs.

In the early 1980's, and on behalf of Halliburton's subsidiary, Analytical Inspection Inc., he utilized his radiography and radiation training to coordinate and performed the radiographic inspections of the Louisiana and Texas offshore production platforms for determination of internal corrosion and erosion throughout the Gulf of Mexico. He worked under direct supervision of the Louisiana Chief Radiation Safety Officer (RSO), Lloyd Anderson.

Education:

Bachelor of Science in Industrial Technology & Civil Engineering, University of Louisiana, 1982 EPA-NIOSH Microscopy, University of Southern California, 1989

Registrations and Certifications:

Registered Environmental Property Assessor Certified Asbestos Consultant Certified UST Assessor Certified EPA/NIOSH 582 Certified EPA Hazardous Waste Operations Certified Level II Radiography

Doug Kochanowski, EP Senior Environmental Scientist and Advisor CHMM (#9970), CAC (#99-2699)

Professional Experience:

Mr. Kochanowski has been performing Phase I Environmental Site Assessments (ESAs) since 1988 and is considered an industry expert. The environmental consulting profession was in its infancy when he performed his first ESA. Over the past three decades, Mr. Kochanowski has performed ESAs on almost every type of real property in over ten different states and in Europe. This includes military bases, medical facilitate, high-rise office buildings, learning institutions, factories, shopping malls and plazas, gasoline stations, industrial parks, manufacturing facilities, vacant land, agricultural land, housing tracks, multifamily developments, and government facilities. His wide array of experience has made him a key component for conducting complex ESAs and his expertise is sought after by a wide variety of clients and other consulting firms. His practical approach and comprehensive knowledge of the ASTM standards result in ESAs that are accurate, comprehensive, and address environmental issues with a common-sense approach.

Mr. Kochanowski's environmental portfolio also includes experience conducting a variety of additional services that include soil, groundwater, and soil vapor testing, modeling, landfill leachate testing, indoor air sampling, and conducting human health risk assessments. He has managed several large IDT contracts for the European District Corps of Engineers, working at over twenty bases in Germany and Spain. Projects included remediation design, soil and groundwater sampling, landfill leachate testing, asbestos surveys, air monitoring, and radon testing.

For as long as Mr. Kochanowski has been writing ESAs he has also been performing asbestos testing and consulting. He is a California Certified Asbestos Consultant and is NIOSH 582 Certified to analyze Polarized Light Microscopy (PLM) samples. Mr. Kochanowski performs asbestos surveys, develops removal specifications and drawings, writes Operations and Management (O&M) Plans, and conducts contractor observation and air monitoring during abatement projects. His asbestos experience includes schools, nuclear facilities, universities, airports, hospitals, military bases, shopping malls, high-rise office buildings, industrial complexes, port facilities, apartments and single-family homes. Mr. Kochanowski was the Manager and Facility Security Officer (FSO) for a high-profile asbestos survey, air monitoring and abatement project of the White House, Washington D.C. His AHERA survey experience includes inspecting over eight million square feet of building space for school districts in California, Kansas, New Mexico and Tennessee.

Mr. Kochanowski has teaching experience including conducting OSHA 1910.120 HAZWOPR, Confined Space Entry, and asbestos awareness classes.

He has served as Secretary on the Board of Directors and was a founding father for the SoCal ACHMM chapter. In the past, he has served on the technical committee for a Local Emergency Planning Commission (LEPC) and was elected Secretary on the Board of Directors for the Rhine-Main Post of the Society of American Military Engineers (SAME).

Education:

Bachelor of Science, Biology, San Diego State University, 1987. Continuing Education; Strategies for Conducting Meaningful Microbial IAQ Investigations/American Indoor Air Quality Council

Registrations and Certifications:

CHMM, Master Level; Secretary of the SoCal ACHMM Chapter California Certified Asbestos Consultant (#09-2699) NIOSH 582 Accredited Sampling and Evaluation Airborne Asbestos Certified, OSHA 40Hr Trained 1910.120/Site Supervisor Certified TRGS 519 Under German Hazardous Materials Regulations AHERA Certified Asbestos Inspector, Management Planner, Designer, and Abatement Supervisor Certified Radiation Worker Confined Space Entry Certified

SITE ASSESSMENT AND MITIGATION DIVISION

November 6, 1997

Linda Scott 2435 Industry Street Oceanside, CA 92056

Dear Ms. Scott:

UNDERGROUND STORAGE TANK (UST) CASE SAN DIEGO AUCTION, 4051 OCEANSIDE BLVD., CA 92056 #H23909-001

This letter confirms the completion of a site investigation and remedial action for the underground storage tanks formerly located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Section 2721(e)of Title 23 of the California Code of Regulations.

Please contact Mark McPherson at (619) 338-2242 if you have questions regarding this matter.

Sincerely,

CHUCK PRYATEL, Chref Site Assessment and Mitigation Division

soil sample results from the original tank removal were very low. The excavation was over excavated and conformation samples taken.

Soil sample results were low and the excavated soil was allowed to be used as backfill on the site.

Three temporary wells were sampled to determine impact to the groundwater. The samples showed no significant impact. No additional assessment or remediation was required

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

data on individual sites can be reviewed.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 09/19/2023 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EPA ID:: CAD982414146				

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that

there are 4 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 3 CPS-SLIC sites

within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 07/17/2023 has revealed that there

are 8 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 51 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Violation:	ACCUMULATED HW>180 OR >270 DAYS	
Violation Citation:	Accumulated waste too long (>180 or 270 days). 66262.34(d), CFR 262.34(e)&(f), &/or 25201(a) [>90 days for AHW waste]	
Activity:	ACTIVE	
Permit Number:	206591	
Update Date:	11/02/2012	
Inspection Date:	10/05/2006	
Violation Code:	6HV0227	
Violation:	HAZWASTE TANK/CONTAINER W/O LABEL/DATE	
Violation Citation:	Failed to properly label/date hazardous waste container &/or tank.	
	66262.34(f)	
Activity:	ACTIVE	
Permit Number:	206591	
Update Date:	11/02/2012	
Inspection Date:	10/05/2006	
Violation Code:	6HV0228	
Violation:	CONTAINER NOT KEPT CLOSED	
Violation Citation:	Failed to keep container closed. CFR 265.173	
Activity:	ACTIVE	
Permit Number:	206591	
Update Date:	11/02/2012	
Inspection Date:	10/05/2006	
Violation Code:	6HV0231	
Violation:	INCOMPATIBLE HW NOT PROPERLY SEPARATED	
Violation Citation:	Failed to properly separate incompatible wastes. CFR 265.177	
Activity:	ACTIVE	
Permit Number:	206591	
Update Date:	11/02/2012	
Inspection Date:	10/05/2006	
Violation Code:	6HV0234	
Violation:	FACILITY NOT OPERATED TO MINIM. RELEASE	
Violation Citation:	Did not maintain &/or operate facility to prevent release or fire. CFR 265.31	
Activity:	ACTIVE	
Permit Number:	206591	
Update Date:	11/02/2012	
Inspection Date:	10/05/2006	
Violation Code:	6HV0407	
Violation:	EMPLOYEE TRAINING NOT ADEQUATE	
Violation Citation:	Employee training program for small quantity generator of hazardous	
	waste is inadequate. CFR 262.34(d)(5)(iii)	
Activity:	ACTIVE	
Name:	GREENFIELD FENCE INC.

Hazardous Waste Summary: Waste Code: Waste Description:	D001 Ignitable Waste
Waste Code: Waste Description:	D002 Corrosive Waste
Waste Code: Waste Description:	D003 Reactive Waste
Waste Code: Waste Description:	F001 The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code: Waste Description:	F003 The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The Used Oil Recycling System (UORS) is managed by the California

Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters. The California Environmental Protection Agency (CalEPA) has recently

implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Citation:	Chapter 15, Section(s) 66265.192(h)	∠,
Violation Description:	Failure to obtain and maintain a written assessment reviewed and	
	certified by an independent, qualified, professional engineer statin	g
	the new hazardous waste tank system has sufficient structural	
	integrity, is acceptable for the transferring, storing and treating of	
	hazardous waste, and that the tanks and containment system incl	•
	the foundation, structural support, seams, connections, and press controls (if applicable) are suitably designed and that the tank	ure
	system has sufficient structural strength, compatibility with the	
	waste(s) to be transferred, stored or treated, and corrosion	
	protection so that it will not collapse, rupture, or fail. This	
	assessment shall be obtained prior to placing the tank system in	
	service, and shall be kept on file at the facility. The tank	

assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design

Envir ontal Int ot/Info ..

Environmental Intere	st/Information Svstem:
Environmental Intere	st/Information System: THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES The California Environmental Protection Agency (CaIEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CaIEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI). The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, stoters, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities. Click this hyperlink while viewing on your computer to access additional FINDS; detail in the EDR Site Report.

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

SAN DIEGO COUNTY LOP Local Agency H29228-002 Other Groundwater (uses other than drinking water), Soil Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating Manual Entry on Screens NO Not reported 04/01/2010 04/12/2010 Tank Closure **During UST Removal Activities** Tank Physc / Mech Damage Close and Remove Tank Remove UST System 02/09/2012 Carlsbad - Loma Alta (904.10) Not reported Not reported 21-25% 35-40% No Not reported SAN DIEGO RWQCB (REGION 9) A subsurface investigation was performed at 4181 Oceanside Boulevard, Oceanside, California, in September 2009. A gas station was in operation on the 1.19-acre property from 1988 until it was sold in October 2009. During the investigation, soil samples were collected from ten borings that were advanced at the site to depths of 15 to 20 feet below ground surface (bgs). Groundwater was not encountered in the borings. Soil sample analytical results indicated that low-level petroleum hydrocarbon impacts had occurred as a result of the gas station operation. In association with redevelopment of the property, which is located on the southwest corner of Oceanside Boulevard and College Avenue, four underground storage tanks (USTs) and associated dispensers and piping were removed on March 11, 2010. Three of the USTs had 12,000-gallon capacities and had held gasoline. Waste oil had been stored in the fourth tank, which had a 500-gallon capacity. During the waste oil UST removal, the County inspector noted staining at the base of the excavation and that odors were emanating from the exposed soils. Observation of the base of gasoline tank excavation was hampered by the presence of groundwater, which exhibited a surface sheen and appeared to be impacted by fuel. Odors were also noted during removal of the gasoline USTs. Analytical results for a groundwater grab sample collected from the gasoline tank excavation indicated the presence of gasoline and diesel at concentrations of 46 and 81 milligrams per liter (mg/L), respectively. Ethanol was detected in the grab sample at a concentration of 15 mg/L. Because ethanol had not been detected in groundwater during investigation of the initial unauthorized release at the site (DEH Case #H29228-001), its detection in the grab sample indicated the occurrence of a second release [Note: the case for the first release was closed March 15, 2007]. A second case (#H29228-002) was opened on March 25, 2010. A site investigation work plan and an addendum were submitted to DEH in April 2010, and both were subsequently approved. The work

UNOCAL 76 #31292-257288 (Continued)

S105691718

plan/addendum proposed installation of three groundwater monitoring wells and excavation of petroleum hydrocarbon-impacted soils located within the footprint of a proposed building. [Note: The former dispenser islands associated with the gas station had been located in the area of the proposed building]. Total Petroleum Hydrocarbons (TPH) as gasoline and as diesel had been detected in soil samples collected beneath a dispenser during the previous case (#H29228-001), both at maximum concentrations of 1,400 milligrams per kilogram (mg/kg). During grading of the site for redevelopment, the hydrocarbon-impacted soils beneath the former dispensers were temporarily stockpiled and subsequently disposed at Otay Landfill. The three groundwater monitoring wells proposed in the work plan/addendum were not installed at the site until construction of the proposed building had been completed (January 2011). Although low levels of gasoline and extractable fuel hydrocarbons were detected in soil samples collected from two of the well borings, benzene, toluene, ethylbenzene, and xylenes (collectively referred to as BTEX) and fuel oxygenates were not detected. Following installation, the wells were monitored and sampled on February 16 and August 12, 2011, respectively. Groundwater sampling results to date indicate that TPH-diesel, BTEX, naphthalene, and ethanol were not detected. The maximum detected TPH-gasoline concentration was 120 micrograms per liter (a/L). The fuel oxygenates detected in the groundwater samples were methyl-tert-butyl ether (MTBE) and tert-butyl alcohol (TBA) at concentrations of 9.1 and 37 g/L, respectively. The site is located in a hydrologic area where the designated beneficial use for groundwater is for industrial purposes. The area is excepted from use for municipal supply. Excavation activities at the site substantially removed the petroleum hydrocarbon-impacted soils that impacted groundwater. Petroleum hydrocarbon impacts to groundwater are minimal, and the detected concentrations of MTBE are below its Maximum Contaminant Level (MCL). Based on these findings, the consultant has recommended no further action at the site and case closure. DEH concurs with these recommendations.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste. The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: N/A Last EDR Contact: 11/01/2023 Next Scheduled EDR Contact: 01/08/2024 Data Release Frequency: Quarterly

EPA Region 8 Telephone: 303-312-6774

EPA Region 9 Telephone: 415-947-4246

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: N/A Last EDR Contact: 11/01/2023 Next Scheduled EDR Contact: 01/08/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: N/A Last EDR Contact: 11/01/2023 Next Scheduled EDR Contact: 01/08/2024 Data Release Frequency: Quarterly

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/23/2023	Telephone: 703-603-8704
Date Made Active in Reports: 09/20/2023	Last EDR Contact: 09/26/2023
Number of Days to Update: 89	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 09/19/2023 Date Data Arrived at EDR: 10/03/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 16 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 11/02/2023 Next Scheduled EDR Contact: 01/22/2024 Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023 Date Data Arrived at EDR: 07/31/2023 Date Made Active in Reports: 08/14/2023 Number of Days to Update: 14 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/20/2023 Next Scheduled EDR Contact: 01/01/2024 Data Release Frequency: Quarterly

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023 Date Data Arrived at EDR: 07/31/2023 Date Made Active in Reports: 08/14/2023 Number of Days to Update: 14 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/20/2023 Next Scheduled EDR Contact: 01/01/2024 Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023 Date Data Arrived at EDR: 07/31/2023 Date Made Active in Reports: 08/14/2023 Number of Days to Update: 14 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 09/20/2023 Next Scheduled EDR Contact: 01/01/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators) RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/21/2023 Date Data Arrived at EDR: 08/21/2023 Date Made Active in Reports: 11/07/2023 Number of Days to Update: 78 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 08/21/2023 Next Scheduled EDR Contact: 12/04/2023 Data Release Frequency: Quarterly

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40 Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 05/04/2023 Date Data Arrived at EDR: 05/25/2023 Date Made Active in Reports: 07/24/2023 Number of Days to Update: 60 Source: EPA Telephone: (415) 947-8000 Last EDR Contact: 11/08/2023 Next Scheduled EDR Contact: 12/11/2023 Data Release Frequency: Quarterly

ECHO: Enforcement & Compliance History Information

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 06/24/2023 Date Data Arrived at EDR: 06/29/2023 Date Made Active in Reports: 09/25/2023 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 202-564-2280 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Quarterly

UXO: Unexploded Ordnance Sites

A listing of unexploded ordnance site locations

Date of Government Version: 11/09/2021

FUELS PROGRAM: EPA Fuels Program Registered Listing

This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 08/14/2023 Date Data Arrived at EDR: 08/15/2023 Date Made Active in Reports: 10/19/2023 Number of Days to Update: 65 Source: EPA Telephone: 800-385-6164 Last EDR Contact: 08/15/2023 Next Scheduled EDR Contact: 11/27/2023 Data Release Frequency: Quarterly

PFAS NPL: Superfund Sites with PFAS Detections Information

EPA's Office of Land and Emergency Management and EPA Regional Offices maintain data describing what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment.

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 10/02/2023 Number of Days to Update: 89 Source: Environmental Protection Agency Telephone: 703-603-8895 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

PFAS FEDERAL SITES: Federal Sites PFAS Information

Several federal entities, such as the federal Superfund program, Department of Defense, National Aeronautics and Space Administration, Department of Transportation, and Department of Energy provided information for sites with known or suspected detections at federal facilities.

PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 10/02/2023 Number of Days to Update: 89 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

Date of Government Version: 06/24/2020 Date Data Arrived at EDR: 03/17/2021 Date Made Active in Reports: 11/08/2022 Number of Days to Update: 601 Source: Department of Health & Human Services Telephone: 202-741-5770 Last EDR Contact: 10/23/2023 Next Scheduled EDR Contact: 02/05/2024 Data Release Frequency: Varies

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 10/02/2023 Number of Days to Update: 89 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 09/25/2023 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 09/25/2023 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

Date of Government Version: 07/05/2023 Date Data Arrived at EDR: 07/05/2023 Date Made Active in Reports: 09/25/2023 Number of Days to Update: 82 Source: Environmental Protection Agency Telephone: 202-272-0167 Last EDR Contact: 10/03/2023 Next Scheduled EDR Contact: 01/15/2024 Data Release Frequency: Varies

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert,	

pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	50005844 SAN LUIS REY, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

06073C0759G	FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property SAN LUIS REY	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Cenozoic Category:	Stratifed Sequence
System:	Tertiary	
Series:	Eocene	
Code:	Te (decoded above as Era, System & Series)

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	LAS FLORES
Soil Surface Texture:	loamy fine sand
Hydrologic Group:	Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.
Soil Drainage Class:	Moderately well drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information									
	Boundary			Classi	fication	Saturated hydraulic				
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec				
1	0 inches	14 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:			
2	14 inches	22 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:			
3	22 inches	38 inches	sandy clay	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Solutions

Assessment – Strategy - Mitigation

OWNER-SELLER

Vacant Land at APN 1621110400, Oceanside, CA 92054

Environmental Solutions is conducting a Phase I ESA of the above referenced site, hereinafter referred to as the, "subject property." Please have an owner or operator representative that has good knowledge of the uses and physical characteristics of the subject property fill out this form. The questions should be answered to the best of one's knowledge, if an answer is unknown, simply check the box "No/Don't Know." Please e-mail the completed form to es65@pacbell.net

- 1) Has the subject property, past or present, been occupied by a tenant using significant amounts of hazardous substances or petroleum products?
 - YES NO/DON'T KNOW IF YES, EXPLAIN:
- 2) Are there any adjoining sites, past or present, occupied by a tenant using significant amounts of hazardous substances or petroleum products?
 - YES NO/DON'T KNOW IF YES, EXPLAIN:
- 3) Are you aware of spills or releases on the subject property or adjacent sites?
 - YES NO/DON'T KNOW IF YES, EXPLAIN:
- 4) In regards to the subject property, are there any environmental liens or Activity or Use Limitations (ALUs) such as engineering controls, land use restrictions or institutional controls in place or on file under federal, tribal, state or local law?

YES NO/DON'T KNOW IF YES, EXPLAIN:

- 5) Are there clarifiers or oil water separators on the subject property? If yes, please provide the name of the firm that cleans them and how often.
 - YES NO/DON'T KNOW IF YES, PROVIDE NAME OF COMPANY AND HOW OFTEN CLEANED :
- Have there been any pits, ponds, or lagoons located on the subject property?
 YES NO/DON'T KNOW IF YES, EXPLAIN:
- 7) Have there been any Underground Storage Tanks (USTs) or Aboveground Storage Tanks (ASTs) located on the subject property?
 - YES NO/DON'T KNOW IF YES, EXPLAIN:
- Has the sale price of the subject property been discounted for any environmental reason?
 YES NO/DON'T KNOW IF YES, EXPLAIN:
- Have you been informed of any environmental violations with respect to the subject property?
 YES NO/DON'T KNOW IF YES, EXPLAIN:

- 10) Do you have knowledge of any past environmental reports performed on the subject property such as: an environmental site assessment, asbestos survey, lead based paint survey, mold testing, soil and/or groundwater testing?
 - YES NO/DON'T KNOW IF YES, DESCRIBE THE REPORT(S) AND SEND ELECTRONIC COPY(S):
- 11) Do you know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of a hazardous substance or petroleum product involving the subject property?

YES NO/DON'T KNOW IF YES, EXPLAIN:

- 12) Does the subject property discharge regulated industrial wastewater into a sanitary sewer system? Y YES NO/DON'T KNOW IF YES, EXPLAIN:
- 13) What is the reason for having the Phase I Environmental Site Assessment performed?

PURCHASE	LEASE	SALE	LOAN	OTHER (explain below)
----------	-------	------	------	-----------------------

14) Are there hydraulic lifts and or elevators on the subject property? If so, please provide the number of lifts and the name of the company that has been hired to maintain the hydraulic lifts or elevators.

15) Has the hydraulic lift/elevator maintenance company ever indicated that there had been significant releases of hydraulic fluid from the system(s)?

YES NO/DON'T KNOW IF YES, EXPLAIN:

- 16) How many years of firsthand knowledge do you possess regarding the subject property:
- 17) Please explain your relationship to the subject property (owner, tenant, purchaser, real estate agent), the company you represent, and your title:
- 18) Please provide to he best of your knowledge, the present and historical uses and/or tenants on the subject property:
- 19) If you are not a subject property owner, please provide a representative's name and phone number:

USER-BUYER

Vacant Land at APN 1621110400, Oceanside, CA 92054

Environmental Solutions is conducting a Phase I ESA of the above referenced site hereinafter referred to as the, "subject property." Please answer the following questions to the best of your knowledge. It is not necessary to look up information. If you don't know an answer, simply check the "No/I Don't Know" box. Please e-mail the completed form to **es@pacbell.net**.

- Did a search of land title records or judicial records identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law? No I Don't Know Yes, describe:
- Did a search of land title records or judicial records, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law? No I Don't Know Yes, Describe:
- 3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No I Don't Know Yes, describe:
- To the best of your knowledge, does the purchase price being paid for the subject property reasonably reflect the fair market value of the property? Yes No
- 5. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property? Not Applicable, the price appears to reflect the fair market value of the subject property.
- 6. Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? This includes the following:

Do you know the past uses of the subject property?

No I Don't Know Yes, describe:

Do you know of specific chemicals that are present or once were present at the subject property?

No I Don't Know Yes, describe:

Do you know of spills or other chemical releases that have taken place at the subject property?

No I Don't Know Yes, describe:

Do you know of any environmental cleanups that have taken place? No I Don't Know Yes, describe:

 Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of releases at the subject property? No I Don't Know Yes, describe:

Subject: RE: Oceanside Land - Phase I Needed

Hi Doug, please see attached questionnaires. For the Seller Item #4 – question asks whether there are any land use restrictions. The Seller says that the property, of course, is subject to compliance with all applicable laws and regulations. If the question was more specifically written; special rules only applicable to the property, the answer would be, no. Also, on Seller #10 the environmental studies the Seller is referring to are biological reports for the vegetation and habitat onsite.

Let me know if you need anything else.

Brian Mikail | Capstone Equities | Principal 5455 Wilshire Blvd. Suite #1012 | Los Angeles, CA 90036 tel: 310-666-6860 | BRE#02083474
