1 INTRODUCTION

Ninyo & Moore was retained by SBABP I, LLC (herein referred to as the client) to perform a Phase I Environmental Site Assessment (ESA) of an approximately 25-acre property consisting of San Bernardino County Assessor's Parcel Number (APN) 1192-211-01, located on the northeast corner of 5th Street and Sterling Avenue in Highland, California (hereinafter referred to as the subject property; Figure 1). The following sections discuss the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with the Phase I ESA.

1.1 Purpose

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM International (ASTM) E1527, recognized environmental conditions (RECs), which are defined by ASTM as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." Ninyo & Moore performed this ESA in conformance with the scope and limitations of ASTM E1527-21.

Identification of RECs fall into the following three categories: existing RECs (as defined above); Historical RECs (HRECs); or Controlled RECs (CRECs). HRECs and CRECs are defined as follows:

- <u>HREC</u> An HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations [AULs], institutional controls, or engineering controls)." An HREC is an environmental condition, which in the past, would have been considered a REC, but currently may or may not be considered a REC. An example of an HREC may be a former gas station where a release of gasoline had occurred, but the subject property was cleaned up to an unrestricted land use standard.
- <u>CREC</u> A CREC is defined as a "recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by a regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, AULs, institutional controls, or engineering controls)." An example of a CREC could be a former gas station where a release of gasoline has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria.

1.2 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA included the activities listed below.

- Reviewed physical setting and background information.
- Performed a subject property reconnaissance.
- Reviewed federal, state, tribal, and local regulatory agency databases for the subject property and for properties located within a specified radius of the subject property.
- Reviewed reasonably ascertainable local regulatory agency files for the subject property, as applicable.
- Reviewed historical information for the subject property, such as aerial photographs, topographic maps, reverse street directories, Sanborn fire insurance maps, and building department records, as available.
- Reviewed user-provided information, as available.
- Interviewed the property owner representative regarding the environmental status of the subject property.
- Prepared this Phase I ESA report, summarizing findings and providing opinions and conclusions regarding RECs at the subject property.

1.3 Significant Assumptions

Ninyo & Moore assumed the information sources from the third-party environmental database vendor, regulatory agencies, and interviewees utilized for this report provided adequate and accurate information. No other significant assumptions were made during the preparation of this report.

1.4 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed subject property conditions and the referenced literature. It should be understood that the conditions of a subject property could change with time as a result of natural processes or the activities of man at the

subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control. Ninyo & Moore cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the subject property. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can altogether eliminate the uncertainty.

1.5 Special Terms and Conditions

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, unless otherwise indicated in this report, this Phase I ESA does not include analysis of the following, which is not intended to be all-inclusive: underground pipelines, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, or high voltage power lines.

1.6 User Reliance

This report may be relied upon by, and is intended exclusively for, the client and its assigns. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the above-referenced client is undertaken at said parties' sole risk.

1.7 Involved Parties

Ms. Sonia Cisneros Ortiz, Project Environmental Scientist, performed regulatory research and historical research in March 2023. Ms. Cisneros Ortiz conducted the subject property reconnaissance on March 21, 2023. Mr. Dennis Fee, Senior Project Engineer, and Mr. Jeff Aguilar, Principal Geologist, performed project oversight and quality review.

2 SUBJECT PROPERTY DESCRIPTION

The following table provides a general description of the subject property. Photographs taken during the subject property reconnaissance are provided in Appendix A.

Table 1 – General Subject Property Setting		
General Subject Property Setting	Description	
Location	The subject property consists of Assessor Parcel No. (APN) 1192-211-01 and is located on the northeast corner of 5 th Street and Sterling Avenue (Figures 1 and 2).	
APN	1192-211-01 (San Bernardino County)	
Property Owner	SBABP I, LLC	
Size (approximate)	25 acres	
Subject Property Use / Occupants	The subject property is vacant land.	
Structures	The subject property is vacant land.	

Table 1 – General Subject Property Setting		
General Subject Property Setting	Description	
Roads	The subject property is accessible from the west by Sterling Avenue, from the north by 6 th Street, and from the south by 5 th Street.	
Heating and Cooling Systems	Not applicable	
Electricity Provider	Southern California Edison, no service onsite.	
Sewer Disposal Provider	East Valley Water District, no service onsite.	
Potable Water Provider	East Valley Water District, no service onsite.	
Subject Property Vicinity Description	Undeveloped land to the north and south, undeveloped land and residential properties to the west, and industrial properties to the east.	

3 USER-PROVIDED INFORMATION

Ninyo & Moore provided a user questionnaire to be filled out by the SBABP, LLC. The following table summarizes information provided by Mr. Peter Mateo, a representative of the client. A copy of the questionnaire is provided in Appendix B.

Table 2 – Summary of User-Provided Information		
Representative	Summary	
Title Records	Title records were not provided.	
Environmental Liens or Activity and Use Limitations (AULs)	Mr. Mateo did not have knowledge of environmental liens or AULs for the site.	
Specialized Knowledge	Mr. Mateo did not have specialized knowledge or experience related to the site.	
Commonly Known or Reasonably Ascertainable Information	Mr. Mateo was not aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of release or threatened releases.	
Valuation Reduction for Environmental Issues	Mr. Mateo did not indicate valuation reduction for environmental issues related to the site was applicable.	
Reason for Performing Phase I ESA	In relation to site development in accordance with the California Environmental Quality Act (CEQA).	

4 RECORDS REVIEW

The following sections summarize records reviewed for the subject property.

4.1 Standard Environmental Record Source - Environmental Databases

A computerized, environmental information database search was performed by Environmental Data Resources, Inc. (EDR). The search included federal, state, tribal, and local databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted properties of potential environmental concern, is presented in the EDR report (Appendix C). The review was conducted to evaluate whether the subject property or properties within the subject property vicinity have been documented as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

4.1.1 Geocoded (Mapped) Listings

Properties within up to 1 mile of the subject property were listed on various regulatory agency databases. The following table lists ASTM standard environmental databases that were searched and the number of listings (excluding unmapped properties).

Database Name	Search Radius (mile)	Number of Listings
ederal Databases	(itilie)	Listii igs
PL (National Priority List)	1	1
roposed NPL	1	0

otes: TSC – Department of Toxic Substances Control JST – Leaking Underground Storage Tank CRA – Resource, Conservation, and Recovery Act		

The subject property was not listed in the searched environmental databases.

Properties/facilities within the subject property vicinity listed in the database report were evaluated as to their potential to impact soil, soil vapor, and/or groundwater at the subject property. To supplement information in the environmental database report, the California State Water Resources Control Board's (SWRCB's) GeoTracker (SWRCB, 2023) and Department of Toxic Substances Control's (DTSC's) EnviroStor (DTSC, 2023) online databases were reviewed. Information from the EDR report and supplemental source is included in the facilities of potential concern summaries below. Supporting documentation is provided in Appendix C. The following properties/facilities were interpreted to represent a potential environmental concern to the subject property, based on their proximity to the subject property, the nature of the database on which they are listed, and/or the assumed direction of groundwater flow in the subject property vicinity (southwest).

Table 4 – Summary of Facilities of Potential Concern in Subject Property Vicinity				
Facility Name/ Address	Distance/ Direction from Subject Property	Database	Summary	
VTTR Enterprise/ Vector Control Program 2355 E 5 th Street	Approximately 59 feet southeast	RCRA NONGEN/NLR San Bern. Co. Permit	This facility was listed as "not a generator, verified" in 2021. No violations were recorded against this facility. This facility was listed as having an inactive hazardous materials permit (dated August 2014) with the County of San Bernardino Environmental Health Services Division. Further information was not provided. These listings are not considered an environmental concern to the subject property.	
Well 151	Approximately 273 feet northeast	PFAS	Drinking Water Well 151 was monitored for PFAS constituents. According to the PFAS database, analytical results for PFAS were below their respective laboratory reporting limits in 2019, 2020, 2021, and 2022. According to GeoTracker, recent reporting limits in 2022 were listed as 2 µg/l. Based on this information, this listing is not considered an environmental concern to the subject property.	
Burrtec – Cal Disposal Yard / Cal Disposal Co. / Cal Disposal 26009 6th Street	Approximately 302 feet east	CERS SWEEPS UST CA FID UST HIST CORTESE WDS HWTS AST CORTESE	According to GeoTracker, this facility was listed as a LUST case with a cleanup status of "completed – case closed as of 7/13/2000." This facility was listed as historically containing one diesel underground storage tank (UST), which was found to have impacted soil in 1998. The diesel-impacted soil was excavated in August 1998 and transported off-site to a soil recycling facility for disposal. A No Further Action (NFA) letter was issued on July 13, 2000 by the San Bernardino County Fire Department for this case. Based on the regulatory status and affected media (soil only), this facility does not represent an environmental concern for the subject property.	
Well 141 (McDaniel) – CL	Approximately 368 feet southeast	PFAS	Drinking Water Well 141 was monitored for PFAS constituents. According to the PFAS database, analytical results for PFAS were below their respective laboratory reporting limits in 2019, 2020, and 2021. According to GeoTracker, recent reporting limits in 2022 were listed as 1.7 µg/l. Based on this information, this listing is not considered an environmental concern to the subject property.	
East VIy Water District Plant 26032 6 th Street	Approximately 465 feet northeast	San Bern. Co. Permit CERS	This facility was listed as a chemical storage facility with an active hazardous materials permit. One violation was recorded against this facility for failure to review and electronically certify that the business plan was complete and up-to-date, which achieved compliance on January 19, 2016. Based on the absence of reported leaks or unregulated discharge, this facility is not considered an environmental concern for the subject property.	

Table 4 – Summary of Facilities of Potential Concern in Subject Property Vicinity				
Facility Name/ Address	Distance/ Direction from Subject Property	Database	Summary	
USAF Norton AFB 305 Tippecanoe Avenue	Approximately 636 ft south	NPL SEMS CORRACTS RCRA-TSDF RCRA-SQG US ENG CONTROLS US INST CONTROLS ROD PFAS NPL	According to GeoTracker, the former US Air Force Norton Air Force Base (AFB) covered approximately 2,036 acres in the City of San Bernardino and was listed as "currently on the Final NPL". This facility began operations in 1942 and served as a major overhaul center for jet engines and the general repair of aircraft. From 1962 to 1989, the facility served as a Military Airlift Command Base. In addition, Norton AFB formerly had the responsibility for providing maintenance and logistics for liquid-fuel intercontinental ballistic missiles. Past hazardous waste management practices, which included burial of drums and other unspecified materials; disposal of waste oils, solvents, and paint residues into landfills, unlined pits, ponds, and drying beds; storage in leaking underground tanks; and spills of aviation gasoline, oils, solvents, polychlorinated biphenyls (PCBs), and acidic plating solutions may have contributed to existing contamination at the base. Industrial solvents were also used extensively on the base. According to GeoTracker, unknown quantities of spent solvents were disposed of in several base landfills. Soil and groundwater beneath this facility and downgradient areas were found to be impacted primarily by trichloroethene (TCE), but also freon, PCBs, tetrachloroethene (TCE), total petroleum hydrocarbons (TPH), metals, and per- and polyfluorinated substances (PFAS). Based on our review of the recent 5-year review report (CH2M, 2020), groundwater remediation and monitoring efforts to treat VOCs continued until 2017, at which time it was discontinued because TCE was found to have been effectively treated to or below its Maximum Contaminant Level (MCL). Areas of the former Norton AFB with ongoing remediation or monitoring activities include the IRP Site 17 and AOC 33, which involved the excavation and removal of soil impacted from wastewater sumps. Vapor intrusion risks may remain in these areas, but are located over a mile south of the subject property. Based on the distance and direction (downgradien	
DBA Advanced Machining / Advanced Machining Dynamics 7935 Lankershim Avenue	Approximately 757 feet east	RCRA NONGEN/NLR HWTS CERS HAZ WASTE HAZNET San Bern. Co. Permit CERS	According to the CERS HAZ WASTE database, this facility was listed as a hazardous waste generator that generated waste oil and mixed oil, aqueous solution with total organic residues less than 10 percent, and unspecified oil-containing waste in 1997, 1999, and 2000. This facility is listed as having an active small quantity generator permit which expires November 30, 2023. This facility was listed as a chemical storage facility and had five violations recorded against this facility in 2014 and 2017 for administrative recordkeeping, for which it eventually achieved compliance. Based on the absence of reported leaks or unregulated discharge, this facility is not considered an environmental concern for the subject property.	

It is our opinion that there is a low likelihood that the listings for the other off-subject properties listed in the database report represent a REC to the subject property at the current time. This opinion is based on one or more of the following factors:

- The nature of the database(s) on which the property is listed, and/or because the property was not listed on a database that reports unauthorized releases of hazardous substances;
- Reported regulatory agency status (i.e., case closed);
- Reported nature of the case (i.e., soil contaminated only);
- Reported distance of the property from the subject property; and/or
- Location of the property in relation to the subject property with respect to topography or expected groundwater flow direction (southwest).

4.1.2 Non-Geocoded (Unmapped) Listings

Unmapped properties are shown by EDR as Orphan Sites. Five unmapped facilities were included in the EDR Radius Map™ Report. Two of the listed Orphan Sites were reported as an illegal drug operation, which were located near the intersection of Church Avenue and 5th Street, and near the intersection of Baseling Street and Sterling Avenue, approximately 1.9 miles east and 0.78 miles north of the subject property, respectively. Further information was not provided. The Norton AFB Bldg 754 Orphan Site, located on Leland Norton way, approximately 0.85 miles southwest of the subject property was listed as a LUST case for heating/fuel oil-impacted soil. This facility was listed as having a cleanup status of "completed - case closed as of 2/27/1996." The Seccombe Lake State Rec Area Orphan Site, located approximately 2.0 miles northwest of the subject property, was listed on the SEMS Archive database with an NPL status of "not on the NPL." Further information was not provided. The Merit Oil Company Orphan Site, located approximately 4.3 miles southwest of the subject property, was listed in the LUST and HIST Cortese databases. This facility was listed as a LUST case for gasoline-impacted soil. This facility was listed as having a cleanup status of "completed – case closed as of 8/30/199." Based on the distance from the subject property, regulatory status, media affected, and/or lack of additional information, the unmapped properties and are not considered a REC or indicators of a REC for to the subject property.

4.2 Additional Environmental Record Sources

According to the ASTM Standard, "if the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing should be reviewed." Regulatory files were requested for the subject property San Bernardino County APN 1192-211-01. The review of regulatory agency records is discussed in the following sections. Regulatory records are provided in Appendix D.

4.2.1 City of Highland Fire Department (CHFD)

Ninyo & Moore requested records for the subject property APN from CHFD on March 17, 2023. According to a representative of CHFD, files were not found for the subject property APN.

4.2.2 San Bernardino County Fire Protection District (SBCFPD)

Ninyo & Moore requested records for the subject property APN from SBCFPD on March 17, 2023. According to a representative from the SBCFPD, records were not found pertaining to the subject property APN.

4.2.3 Regional Water Quality Control Board, Santa Ana Region (RWQCB)

Ninyo & Moore requested records for the subject property APN from the RWQCB on March 17, 2023. According to a representative from the RWQCB, files are maintained by physical address, not by subject property APN or cross streets; therefore, records were not found for the subject property APN.

4.2.4 Department of Toxic Substances Control (DTSC)

Ninyo & Moore requested records for the subject property APN from DTSC March 17, 2023. According to a representative from the DTSC, records were not found pertaining to the subject property APN.

4.2.5 Online Regulatory Databases

Online regulatory databases were reviewed by Ninyo & Moore to supplement the environmental database search conducted by EDR. The following is a summary of pertinent information.

Table 5 – Online Regulatory Databases		
Online Database/Website	Findings	
California Department of Toxic Substances Control (DTSC) EnviroStor	The subject property was not included in the EnviroStor database. Off-subject property facilities were not included in the EnviroStor database within $\frac{1}{2}$ -mile radius of the subject property.	
State Water Resources Control Board (SWRCB) GeoTracker	The subject property was not included in the GeoTracker database. Off- subject property facilities were reviewed on GeoTracker for pertinent information, which are discussed in Table 4 of Section 4.1.1.	
State of California, Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Well Finder website	The subject property is not within the administrative boundaries of an oil/gas field. Oil and gas wells were not observed within 1 mile of the subject property.	
United States Pipeline and Hazardous Materials Safety Administration, National Pipeline Mapping System Map Viewer	Hazardous liquid pipelines were not depicted within a mile of the subject property. A gas transmission pipeline was depicted approximately 0.165 miles south of the subject property. No accidents or incidents were depicted within 1 mile of the subject property. This is not considered an environmental concern to the subject property.	

4.3 Physical Setting

The following table summarizes topographic, geologic, and hydrogeologic conditions in the vicinity of the subject property, based upon the referenced documents review and/or our visual reconnaissance of the subject property.

Table 6 – Physical Setting		
Physical Settings	Reference	Summary
Topography	Α	The subject property elevation is approximately 1,100 to 1,120 feet above mean sea level (MSL). The subject property vicinity is relatively flat, with regional topography sloping gently to the west-southwest.
Subject Property Geology	В	The subject property is underlain by Quaternary alluvium deposits. The alluvial deposits consist of sand and clay of valley areas, covered with gray clay soil, including pebbly sand adjacent to mountain terranes.
Surface Water	С	The nearest surface water is a riverine habitat, City Creek, located approximately 763 feet south of the subject property. The surface water body is characterized by intermittent channels that contains flowing water for part of the year.
Groundwater	D	According to the SWRCB GeoTracker database, the nearest property with available groundwater information (Former Norton Air Force Base at 305 S Tippecanoe Avenue) is approximately 0.12 mile south of the subject property. According to the Operations, Maintenance, and Monitoring 2015 Annual Report for this facility (dated February 2016), groundwater was measured in November 2015 at depths ranging from approximately 171 to 208 feet below ground surface (bgs). The groundwater flow was interpreted to be generally towards the southwest. Groundwater levels, gradient, and flow direction can fluctuate due to seasonal variations, groundwater withdrawal or injection, changes in land use, and other factors.

References:

4.4 Subject Property Historical Use Information

Ninyo & Moore conducted a search of historical records for the subject property, which included a review of city directories, Sanborn® fire insurance maps (Sanborn®) fire insurance maps, aerial photographs, topographic maps, and building department records. The following sections summarize information obtained from the historical sources utilized for this assessment.

4.4.1 City Directories

Available historical reverse street directories from 1922 through 2020 were researched by EDR. The subject property was not listed in the City Directory.

The adjoining properties to the southeast were listed as industrial/commercial properties including vector control and auto repair facilities. The city directory listings of adjoining properties were not considered an environmental concern to the subject property. The EDR City Directory Report is provided in Appendix E.

4.4.2 Historical Topographic Maps

Historical topographic maps were provided by EDR for select years from 1896 through 2018. A listing of the topographic maps reviewed and summary of notable observations are provided in the table below. EDR-provided maps are included in Appendix E.

Table 7 – Historical Topographic Maps Summary			
Date - Source	Summary		
1896	The subject property and immediate vicinity were unmapped.		
1898, 1899 1901	The subject property was depicted as vacant land. A motor railroad was depicted adjoining the subject property to the south. Structures were depicted in the vicinity to the north, south, east, and west.		
1936, 1938 1942 1943	The subject property and vicinity were unmapped.		
1953, 1954	By 1953, four residential structures were depicted on the northeastern portion of the subject property. Norton Air Force Base was depicted approximately 0.2 miles south of the subject property, although a portion of the boundary appeared to extend onto the subject property. The surrounding vicinity to the north and south were depicted as vacant land. Residential structures were depicted adjoining the subject property to the northeast and northwest. Sterling Avenue was depicted adjoining the subject property to the west, 6 th Street adjoined the subject property to the north, and 5 th Street adjoining the subject property to the south.		
1967 1973 1975 1980 1988 1996	Two residential structures were depicted on the northeastern portion of the subject property. The adjoining properties to the east and west were residential, and to the north and south were vacant land.		
2012 2015 2018	The subject property and vicinity were approximately in their present-day configurations. Structures were not depicted on the subject property or vicinity in the 2012, 2015, and 2018 topographic maps.		

4.4.3 Historical Aerial Photographs

Historical aerial photographs were provided by EDR for select years from 1930 through 2020. A listing of the photographs reviewed and summary of notable observations from the photograph review are provided in the table below. EDR-provided aerial photographs are included in Appendix E.

Table 8 -	Table 8 – Aerial Photographs Summary			
Date	Source	Summary		
1	Α	The subject property and adjoining properties to the north, west, and east were depicted as agricultural fields. Residential structures were depicted on the adjoining property to the south. By 1938, two residential structures were depicted on the adjoining property to the west, and mixed residential/agricultural land was depicted adjoining the subject property to the southeast.		
1949 1953 1959	А	The subject property was developed with five residential properties on the northeastern portion of the subject property. Norton Air Force Base is depicted approximately 500 feet south of the subject property. By 1949, residential structures were developed on the adjoining property to the northeast.		
1966	Α	By 1966, the residential structure at the adjoining property south of the property was demolished.		
1968 1975 1985 1989 1994	А	By 1968, the five residential structures on the subject property were demolished. Surrounding vicinity to the north, south, northeast, and southwest are vacant land. Residential structures were depicted northwest of the subject property.		
2002 2016	Α	The adjoining property to the east was depicted as industrial/commercial properties.		

Table 8 – Aerial Photographs Summary						
Date	Source	Summary				
2020	А	The subject property and vicinity were similar to that observed during the subject property reconnaissance.				
Sources: A – <u>EDR</u>						

The subject property was depicted as primarily agricultural fields from 1930 to 1959. By 1949 to 1966, five residential structures were developed on the northeastern portion of the subject property. By 1968, the five residential structures on the subject property were demolished and has been vacant land to the present-day.

Based on the historical agricultural use of the site and vicinity, commercial pesticides and herbicides may have been applied to the site and site vicinity during the agricultural use of the land. Residual concentrations of these substances and/or their breakdown derivatives may be present in the soils on the subject property. Based on our experience and the duration since pesticides/herbicides may have been applied (over 50 years), it is our opinion that the former agricultural usage of the site is considered a *de minimis* condition.

4.4.4 Sanborn® Fire Insurance Map

Sanborn® Fire Insurance maps were requested from EDR. However, EDR reported that fire insurance maps covering the target property were not found (EDR, 2023). The Certified Sanborn Map Report is provided in Appendix E.

4.4.5 Building Department Records

Current or historical addresses or standing structures are not associated with the subject property. Therefore, building department records were not available for the subject property.

4.5 Previous Reports

The following section summarizes a previous report for the subject property that as provided to Ninyo & Moore for review. A copy of the report is provided in Appendix B.

Hillmann Environmental Group, LLC (HEG) - August 5, 2002 Phase I ESA

On May 24, 2002, HEG conducted a Phase I ESA of the subject property, which consisted of vacant land located on the northeastern corner of 5th Street and Sterling Avenue in Highland, California. According to HEG's review of aerial photographs and historical topographic maps of the subject property, small residential structures were depicted along East 6th Street on the northern portion of the subject property from 1901 to 1944. According to HEC, remains of the residential structures were observed on the northern portion of the subject property, consisting of

a concrete foundation and some construction debris. No evidence of hazardous materials, petroleum products, USTs, or ASTs were observed on the subject property at the time of the subject property reconnaissance. HEG's May 2002 Phase I ESA revealed no evidence of RECs in connection with the subject property. Based on these results, HEG made no further recommendations.

4.6 Adjoining Property History

By 1930, the adjoining property to the north, south, and east was primarily agricultural land with some residential structures to the south and wet. By 1949, residential structures were developed on the adjoining property to the northeast, and additional residential structures were developed adjoining the subject property to the west. From 1959 to the present the adjoining properties to the north and south have been vacant fields. By 1968, the two residential structures on the adjoining property to the northeast was demolished. By 1994, the adjoining properties to the east was developed for commercial/industrial purposes.

5 SUBJECT PROPERTY RECONNAISSANCE

The objective of the subject property reconnaissance was to obtain information indicating the potential for RECs in connection with the subject property. Ms. Sonia Cisneros Ortiz conducted the reconnaissance on March 21, 2023 and was unaccompanied during the subject property reconnaissance. A subject property plan is provided as Figure 2, and photographic documentation is provided in Appendix A.

5.1 Methodology and Limiting Conditions

The subject property reconnaissance consisted of walking on the subject property and along public sidewalks (for viewing of adjoining/nearby properties). Limiting conditions were not encountered.

5.2 General Subject Property Setting

At the time of the subject property reconnaissance, the subject property was undeveloped land. The subject property vicinity consisted of undeveloped land to the north, south, and southwest. Commercial property was observed adjoining the subject property to the northeast and east. Residential property was observed adjoining the subject property to the northwest. A concrete foundation from a previous residential property was observed on the northeastern portion of the subject property.

Pooled water was observed on the northern and southern boundaries of the subject property due to recent rain. Several concrete pillars that were likely irrigation standpipes for maintaining irrigation

flow to the former agricultural fields were observed along the southern boundary of the subject property. Evidence of leaks, spills in the vicinity of the former irrigation standpipes was not observed.

Trash, including an old mattress, sofa, wooden furniture, plastic toys, 5-gallon bucket of dry cement, automotive tires, and plastic, glass, and paper debris were observed along the northern and southern subject property boundaries, along 6th Street and 5th Street, respectively. No dumping, leaks, or other releases of hazardous materials were observed. Petroleum hydrocarbon or other chemical odors were not observed on the subject property. The presence of the trash and debris on the northern and southern boundaries of the subject property is considered a *de minimis* condition.

5.3 Adjoining Property Observations

Adjoining properties were observed from the subject property and from publicly accessible vantage points (e.g., streets, sidewalks) during the subject property reconnaissance. The properties adjoining the subject property are as follows and as depicted on Figure 2:

- **North:** 6th Street, beyond which are undeveloped land and industrial property (Global Electric/Weber Logistics at 2264 6th Street).
- West: Sterling Avenue, beyond which are undeveloped land and residential properties.
- **South:** 5th Street, beyond which is undeveloped land.
- **East**: Industrial property (Armada Towing at 2285 6th Street and Castaway RV Storage at 26068 W 5th Street)

5.4 Subject Property Observations

Ninyo & Moore evaluated the subject property for evidence of the following potential environmental concerns:

Table 9 – Subject Property Observations					
Conditions	Observed or Noted	Comments			
Hazardous Substances/Petroleum Products		Not observed.			
Waste Generation/Storage/Disposal ASTs		Not observed.			
Potential Evidence of USTs Potential PCB-Containing Equipment		Not observed. Not observed.			
Chemical/Petroleum Odors		Not observed.			
Concrete Patches/Pads	X	A concrete foundation of a previous residential property was observed on the northeastern portion of the subject property.			
Evidence of Prior Environmental Investigations		Not observed.			
Pools of Liquid	X	Pooled water was observed on the northern and southern boundaries of the subject property due to recent rain.			
Sewage Discharge Pipes		Not observed.			
Floor Drains/Sumps Elevator		Not observed.			
Wells		Not observed.			
Drums		Not observed.			
Unidentified Substance Containers		Not observed.			
Stained Soil or Pavement		Not observed.			
Stressed Vegetation		Not observed.			

Table 9 – Subject Property Observations					
Conditions	Observed or Noted	Comments			
Pits, Ponds, or Lagoons		Not observed.			
Wastewater Discharges Disposal Systems		Not observed.			
Septic Systems/Cesspools		Not observed.			
Municipal Solid Waste Disposal Areas		Not observed.			

6 INTERVIEWS

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs in connection with the site. Interviews with present owners, operators, and/or occupants of the site, as well as other knowledgeable parties as appropriate, is mandated by ASTM E 1527-21. A summary of the interviews conducted is provided in the table below.

Representative	Summary
Property Owner	Mr. Peter Mateo, a representative of the owner, completed the owner questionnaire. Mr. Mateo did not have knowledge of hazardous materials and/or waste currently or formerly stored or used at the subject property. Mr. Mateo did not have knowledge of the subject property being previously graded or fill material ever brought onto the subject property. Mr. Mateo did not have knowledge of current or former presence of above ground storage tanks on the subject property. Mr. Mateo did not have knowledge of any releases of hazardous materials or petroleum products onto the ground, groundwater, or surface waters of the subject property. Mr. Mateo did not have knowledge of wells, septic systems, or clarifiers on the subject property. Mr. Mateo did not have any documents of interest with respect to the subject property. Mr. Mateo was not aware of litigation involving hazardous materials or notices of violations. Mr. Mateo did not have knowledge of previous environmental investigations performed for the subject property. A copy of the questionnaire is provided in Appendix B.
Key Site Manager	Ms. Sonia Cisneros Ortiz was unaccompanied during the subject property reconnaissance. No dumping, leaks, or other releases of hazardous materials were observed during the subject property reconnaissance, and no petroleum hydrocarbon or other chemical odors were observed on the subject property.
Past Owners	Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

7 PRELIMINARY VAPOR ENCROACHMENT SCREENING

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the subject property as a result of contaminated soil and/or groundwater near the subject property. The purpose of the pVES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the subject property caused by the release of vapors from contaminated soil or groundwater either on or near the subject property. The potential for VEC beneath the subject property was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated sites surrounding or upgradient of the subject property within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical

Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the subject property (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants). Based on the results of the VESM, it is presumed unlikely that a VEC currently exists beneath the site. A copy of the VESM is included in Appendix F.

8 FINDINGS

Based upon the results of this Phase I ESA, the following findings are provided.

- The 25-acre subject property consists of APN 1192-211-01 and is located on the northeastern corner of 5th Street and Sterling Avenue.
- At the time of the subject property reconnaissance, the subject property was undeveloped land. A concrete foundation from a previous residential property was observed on the northeastern portion of the subject property. Pooled water was observed on the northern and southern boundaries of the subject property due to recent rain. Several former irrigation standpipes were observed along the southern boundary of the subject property. Evidence of leaks, spills, or other hazardous materials releases in the vicinity of the standpipes was not observed.
- Trash, including an old mattress, sofa, wooden furniture, plastic toys, 5-gallon bucket of dry cement, automotive tires, and plastic, glass, and paper debris were observed along the northern and southern subject property boundaries, along 6th Street and 5th Street, respectively. No dumping, leaks, or other releases of hazardous materials were observed. Petroleum hydrocarbon or other chemical odors were not observed on the subject property. The presence of the trash and debris on the northern and southern boundaries of the subject property is considered a *de minimis* condition.
- According to our review of aerial photographs, the subject property was primarily agricultural fields from 1930 to 1959. By 1949 to 1966, five residential structures were developed on the northeastern portion of the subject property. By 1968, the five residential structures on the subject property were demolished and has been vacant land to the present-day.
- Based on the historical agricultural use of the site and vicinity, commercial pesticides and herbicides may have been applied to the site and site vicinity during the agricultural use of the land. Residual concentrations of these substances and/or their breakdown derivatives may be present in the soils on the subject property. Based on our experience and the duration since pesticides/herbicides may have been applied (over 50 years), it is our opinion that the former agricultural usage of the site is considered a de minimis condition.
- By 1930, the adjoining property to the north, south, and east was primarily agricultural land with some residential structures to the south and wet. By 1949, residential structures were developed on the adjoining property to the northeast, and additional residential structures were developed adjoining the subject property to the west. From 1959 to the present the adjoining properties to the north and south have been vacant fields. By 1968, the two residential structures on the adjoining property to the northeast was demolished. By 1994, the adjoining properties to the east was developed for commercial/industrial purposes.
- The subject property was not listed on the searched environmental databases.
- Adjoining properties and other facilities within a mile of the subject property were reviewed
 on the environmental database report, which included the former Norton AFB to the south of
 the subject property. This facility began operations in 1942 and served as a major overhaul

center for jet engines and the general repair of aircraft. From 1962 to 1989, the facility served as a Military Airlift Command Base. Past hazardous waste management practices, which included burial of drums and other unspecified materials; disposal of waste oils, solvents, and paint residues into landfills, unlined pits, ponds, and drying beds; storage in leaking underground tanks; and spills of aviation gasoline, oils, solvents, PCBs, and acidic plating solutions may have contributed to existing contamination throughout the base. Soil and groundwater beneath this facility and downgradient areas were found to be impacted by TCE and other chemicals. Based on our review of the most recent 5-year review report (CH2M. 2020), groundwater remediation and monitoring efforts to treat VOCs continued until 2017, at which time it was discontinued because TCE was determined to have been effectively treated to or below its MCL. Areas of the former Norton AFB with ongoing remediation or monitoring activities include the IRP Site 17 and AOC 33, which involved the excavation and removal of soil impacted from wastewater sumps. Vapor intrusion risks may remain in these areas, but are located over a mile south of the subject property. Based on the distance and direction (downgradient of subject property) of known impacts and closed status for most of the operable unit sites, this listing is not considered a REC to the subject property.

 Ninyo & Moore conducted a pVES for COCs that may migrate as vapors onto the subject property as a result of contaminated soil and/or groundwater near the subject property. Based on the completion of the VEC screening matrix, it is presumed unlikely that a VEC currently exists beneath the site.

9 OPINIONS

Our opinions and rationale for concluding whether the conditions listed in Section 8, above, represent RECs, HRECs, or CRECs (i.e., the presence or likely presence of hazardous substances or petroleum products on a property due to any release to the environment, under conditions indicative of a release, or a material threat of a future release of hazardous substances, pollutants, contaminants, and/or petroleum/petroleum products at the subject property) is provided below.

9.1 RECs

RECs were not observed during the preparation of this report.

9.2 CREC

CRECs were not observed during the preparation of this report.

9.3 HRECs

HRECs were not observed during the preparation of this report.

9.4 De Minimis Conditions

The presence of the trash and debris on the northern and southern boundaries of the subject property is considered a *de minimis* condition.

Also, based on the historical agricultural use of the site and vicinity, commercial pesticides and herbicides may have been applied to the site and site vicinity during the agricultural use of the land. Residual concentrations of these substances and/or their breakdown derivatives may be present in the soils on the subject property. Based on our experience and the duration since pesticides/herbicides may have been applied (over 50 years), it is our opinion that the former agricultural usage of the site is considered a *de minimis* condition.

9.5 Data Gaps

No data gaps were encountered during the preparation of this Phase I ESA.

10 CONCLUSIONS

We have performed a Phase I ESA, in conformance with the scope and limitations of the ASTM Practice E 1527-21, of the subject property, located on the northeastern corner of 5th Street and Sterling Avenue in Highland, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 and in the body of this report. This assessment has revealed no evidence of RECs in connection with the subject property.

12 PROFESSIONAL STATEMENT

As required by 40 CFR §312.21(d) and Section 12.13 of ASTM 1527-21, the following statement is included:

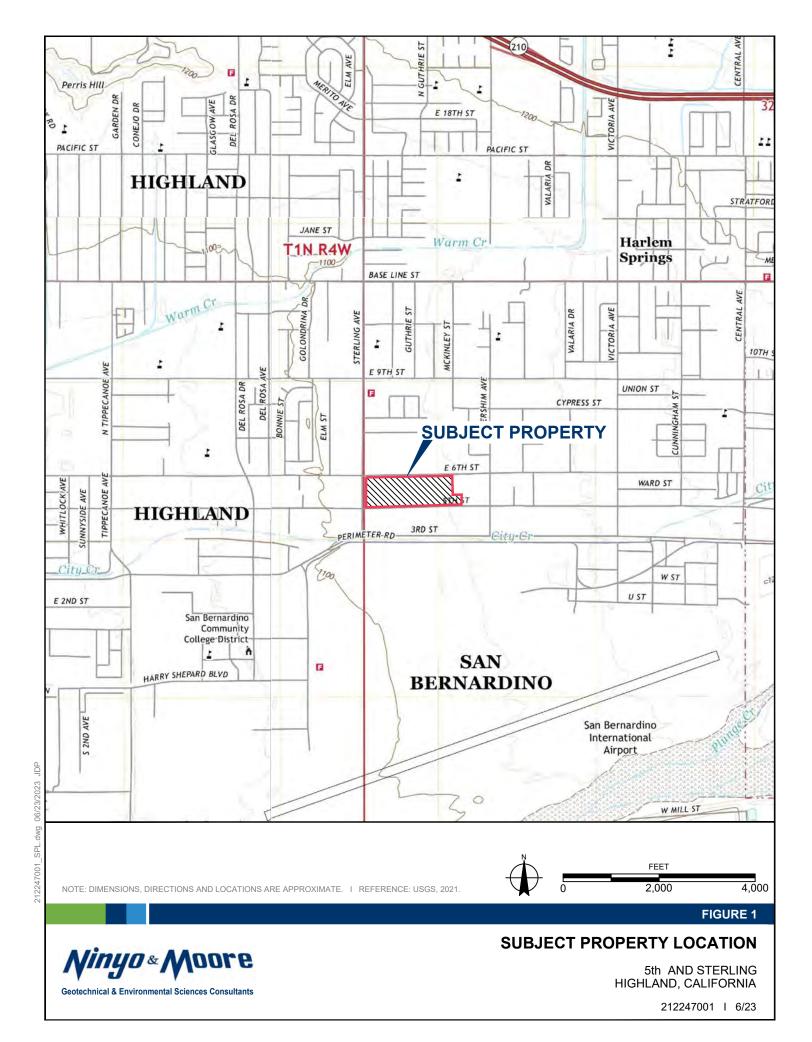

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jeff Aguilar, PGPrincipal Geologist

APPENDIX B User and Property Owner Provided Information

PHASE I ESA/AAI REQUIREMENTS

According to the All Appropriate Inquiry (AAI, 40 CFR 312) requirements and ASTM (E 1527-13) guidance on conducting Phase I Environmental Site Assessments, the "user" of the assessment must provide the following information, if available, to the environmental professional in order to qualify for Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Please check yes or no and provide any additional information you may have regarding the site. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

EXECUTIVE SUMMARY

A Phase I Environmental Site Assessment was performed at the undeveloped land (the subject property) located at the northeast corner of East 5th Street and Sterling Avenue in San Bernardino, San Bernardino County, California by Hillmann Environmental Group, LLC (Hillmann) for San Manuel Band of Mission Indians. Mr. Bob Pilzer, REA, CAC of Hillmann conducted the site inspection for the Phase I Environmental Site Assessment on May 24, 2002.

ON-SITE FINDINGS

- The subject property is approximately 24.83 acres in size and currently exists as a vacant lot (undeveloped land). According to aerial photographs and historical topographical maps, the subject property existed as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property from 1901 to 1994.
- The subject property was not listed under any category identified in the environmental database report.
- No hazardous materials or petroleum products were observed to be stored on the subject property at the time of the site assessment.
- No evidence of any current or previously existing aboveground storage tanks or underground storage tanks (USTs) on the subject property was identified during the site assessment. There are no records of USTs on file for the subject property at the City of San Bernardino Fire Department or the County of San Bernardino Department of Environmental Health Services and the subject property was not identified in the database as an UST or a Leaking Underground Storage Tank (LUST) site.
- No pad-mounted power transformers were observed on the subject property during the site assessment. Some Southern California Edison (SCE) owned pole-mounted power transformers and a power transformer vault were observed along Sterling Avenue to the west side of the subject property during the site assessment. According to SCE, it is unlikely that the power transformers contain PCBs and SCE assumes responsibility for the clean up and repairs of the power transformers in the event of a leak or spill regardless of the PCB content. The pole-mounted power transformers were observed to be in good condition during the site assessment and no spills, stains or leaks were observed in the vicinity of the power transformers at the time of the site assessment.
- Fluorescent light ballasts were not observed on the subject property during the site assessment since the subject property currently exists as a vacant lot (undeveloped land).
- A screening for asbestos-containing materials was not conducted on the subject property as part of the Phase I Environmental Site Assessment, since the subject property currently exists as a vacant lot (undeveloped land).
- A screening for lead-based paint was not conducted on the subject property as part of the Phase I Environmental Site Assessment, since the subject property currently exists as a vacant lot (undeveloped land).
- The subject property is located in an area with low radon potential, based on the predicted radon levels for San Bernardino County and the subject property's zip code (92404).

EXECUTIVE SUMMARY

OFF-SITE FINDINGS

- None of the adjacent properties were listed under any category identified in the environmental database report.
- No State Landfill (Solid Waste Landfill Facility) sites are identified within a ½ mile radius of the subject property; no RCRIS Sm. Quan. Gen. (Resource Conservation and Recovery Information System Small Quantity Generator) or UST (Underground Storage Tank) sites are identified within a ¼ mile radius of the subject property.
- One NPL (National Priority List) and one Cal-Site (State Hazardous Waste Site) are identified within a 1 mile radius of the subject property; one CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System), one RCRIS-TSD (Resource Conservation and Recovery Information System Transport, Storage, and Disposal) and two LUST (Leaking Underground Storage Tank) sites are identified within a ½ mile radius of the subject property; one RCRIS Lg. Quan. Gen. (Resource Conservation and Recovery Information System Large Quantity Generator) site are identified within a ¼ mile radius of the subject property. Due to the distances from the subject property and the cross-gradient or down-gradient locations of the sites relative to the subject property, none of the sites are expected to have negatively impacted the subject property.

CONCLUSIONS

Based on the findings of the Phase I Environmental Site Assessment, the following conclusions are made:

• No on-site or off-site recognized environmental concerns were identified during the site assessment.

RECOMMENDATIONS

Based on the findings and conclusions of the Phase I Environmental Site Assessment, the following recommendation is made:

• No further recommendations are made at this time.

SECTION 1.0 INTRODUCTION

1.0 General This service is rendered in good faith on the behalf of our client. San Manuel Band of Mission Indians requested that Hillmann Environmental Group, LLC (Hillmann) conduct a Phase I Environmental Site Assessment at the undeveloped land located at the northeast corner of East 5th Street and Sterling Avenue in San Bernardino, San Bernardino County, California. The subject property currently exists as a vacant lot (undeveloped land).

This Phase I Environmental Site Assessment report is designed to provide a thorough *due-diligence* investigation and assessment in accordance with the ASTM Standards. The Phase I Environmental Site Assessment investigates the potential for negative environmental conditions resulting from the use, storage, generation and/or consumption of hazardous substances and/or petroleum products on the given subject property.

1.1 Scope of Work Hillmann conducted a Phase I Environmental Assessment directed at identifying possible areas of environmental concern and presented recommendations as to what, if any, action should be considered at the subject premises.

The Phase I Environmental Site Assessment performed of the subject property includes a review of the following:

Site Reconnaissance
Area Reconnaissance
Historical Site-use Research
Standard Federal and State Environmental Databases
Miscellaneous Local Agency/Utility Records
Geo-physical Information
Interviews with Knowledgeable Parties

The findings of this Phase I Environmental Site Assessment have been summarized in our report, and include an Executive Summary, and Conclusions and Recommendations. Copies of supporting documents, site diagrams/maps and a photographic log documenting significant conditions observed on the subject property during the site assessment are provided in the Appendices of this report.

SECTION 2.0 SITE INFORMATION

2.1 Address: Northeast corner of East 5th Street and Sterling Avenue, San

Bernardino, San Bernardino County, California 92404

2.2 Parcel Number: 1192-211-01-0000

2.3 Size in Acres: A total of approximately 24.83 acres.

2.4 Property Use: The subject property is zoned CG-1 (Commercial General District).

2.5 Building Descriptions: The subject property currently exists as a vacant lot (undeveloped

land).

2.6 Type of Heating: Not applicable, the subject property currently exists as a vacant lot

(undeveloped land).

2.7 Other Improvements: A concrete foundation and some construction debris that remain from

a single-family residential home that was previously demolished on site were observed on the north side of the subject property during the site assessment. A storm drainage ditch is located along East 5th Street on the south side of the subject property. No other improvements were observed on the subject property during the site

assessment.

2.8 Area Land Use: Primarily commercial and residential, with some undeveloped land.

2.9 Adjoining Properties: North: A vacant lot (undeveloped land) is located across East 6th

Street and adjacent to the north of the subject property.

South: A vacant lot (undeveloped land) is located across East 5th

Street and adjacent to the south of the subject property.

East: Armada Towing (2285 East 6th Street) is located along East 6th Street and adjacent to the east of the subject property and Cast Away RV Storage (26068 East 5th Street) is located along East 5th Street and

adjacent to the east of the subject property.

West: Residential homes and a vacant lot (undeveloped land) are located across Sterling Avenue and adjacent to the west of the subject

property.

2.10 Potable Water Supply: Drinking water is provided to the subject property by the City of San

Bernardino Municipal Water Department. The City of San Bernardino Municipal Water Department obtains their potable water supply from 60 domestic wells located throughout San Bernardino

County.

2.11 Sewage Disposal: City of San Bernardino Municipal Water Department

SECTION 2.0 SITE INFORMATION

2.12 Local Geology:

According to the E Data Resources, Inc. database, the geologic formation in the vicinity of the subject property consists of Stratified Sequence from the Cenozoic Era, Quaternary System, Quaternary Series. The subject property is located at an elevation of approximately 1,100 feet above sea level and the terrain is sloping slightly to the southwest.

2.13 Description of Soil:

According to a Soil Survey of San Bernardino County, Southwestern Part, California issued in January of 1980 by the United States Department of Agriculture Soil Conservation Service in cooperation with the University of California Agricultural Experiment Station, the soil on the eastern half of the subject property consists of Tujunga gravelly loamy sand, 0 to 9% slopes; the soil on the western half of the subject property consists of Tujunga loamy sand, 0 to 5% slopes; and the soil on a portion of the southern border of the subject property consists of Hanford coarse sandy loam, 2 to 9% slopes.

Tujunga gravelly loamy sand, 0 to 9% slopes, are somewhat excessively drained, nearly level to moderately sloping soils that occur on long, broad, smooth alluvial fans. The typical profile is a brown to dark brown loamy sand surface layer about 0 to 6 inches thick underlain by a pale-brown to brown coarse sand subsoil layer about 6 to 18 inches thick and a pale-brown to brown coarse sand subsurface layer about 18 to 60 inches thick. Permeability of this soil is rapid and the available water holding capacity is 3.0 to 4.0 inches per 60 inches of soil depth. Runoff is very slow to slow and the hazard of erosion is slight.

Tujunga loamy sand, 0 to 5% slopes, are somewhat excessively drained, nearly level to gently sloping soils that occur on broad, long alluvial fans. The typical profile is a brown to dark brown loamy sand surface layer about 0 to 6 inches thick underlain by a pale-brown to brown coarse sand subsoil layer about 6 to 18 inches thick and a pale-brown to brown coarse sand subsurface layer about 18 to 60 inches thick. Permeability of this soil is rapid and the available water holding capacity is 4.0 to 5.0 inches per 60 inches of soil depth. Runoff is very slow to slow and the hazard of erosion is slight.

SECTION 2.0 SITE INFORMATION

2.13 Description of Soil:

Hanford coarse sandy loam, 2 to 9% slopes, are well-drained, gently sloping to moderately sloping soils that occupy alluvial fans. The typical profile is a pale-brown to brown sandy loam surface layer about 0 to 12 inches thick underlain by a pale-brown to brown sandy loam subsoil layer about 12 to 32 inches thick and a very pale brown to brown sandy loam subsurface layer about 32 to 60 inches thick. Permeability of this soil is moderately rapid and the available water holding capacity is 7.0 to 8.0 inches per 60 inches of soil depth. Runoff is slow to medium and the hazard of erosion is slight to moderate.

A photocopy of the soil survey map and soil descriptions is located in Appendix B.

2.14 Presumed Direction of Regional Groundwater Flow: According to the E Data Resources, Inc. database and the City of San Bernardino Municipal Water Department, the inferred direction of regional groundwater flow in the vicinity of the subject property is generally from the northeast to the southwest (toward the Santa Ana River). A storm drainage ditch is located along East 5th Street on the south side of the subject property. The closest surface water bodies to the subject property are the City Creek which is located approximately ½ mile to the south of the subject property and the Santa Ana River which is located approximately ½ miles to the south of the subject property.

2.15 Depth to Groundwater:

According to the E Data Resources, Inc. database and the City of San Bernardino Municipal Water Department, the depth to the shallow groundwater aquifer in the vicinity of the subject property is approximately 30 to 50 feet below ground surface and the depth to the deep groundwater aquifer in the vicinity of the subject property is approximately 150 to 300 feet below ground surface. The closest groundwater wells are located approximately ½ mile to the northeast of the subject property, approximately ½ mile to the east of the subject property and approximately ½ mile to the west-southwest of the subject property.

2.16 Local Radon

According to an EPA Map of Radon Zones from 1996, San Bernardino County is located in Radon Zone 2, which has predicted radon levels that are greater than or equal to 2.0 picoCuries per liter (pCi/L) and less than or equal to 4.0 pCi/L. According to the California Department of Health Services Statewide Radon Survey from 1991, the subject property's zip code (92404) has predicted radon levels that are less than 1.1 pCi/L. According to the E Data Resources, Inc. database, eighteen homes were tested for radon in San Bernardino County from the years 1986 to 1992, and the homes were found to have an average radon concentration of 0.678 pCi/L which is below the EPA guideline of 4.0 pCi/L. Based on the predicted radon levels for San Bernardino County and the subject property's zip code (92404), radon has a low potential to impact the subject property.

3.1 Site Use History:

The subject property currently exists as a vacant lot (undeveloped land). According to aerial photographs and historical topographical maps, the subject property existed as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property from 1901 to 1994.

<u>Aerial Photographs</u>: Aerial photographs from the years 1953, 1967, 1977, 1989 and 1994 were obtained from E Data Resources, Inc. and were reviewed during the site assessment. The following information was obtained from reviewing the aerial photographs:

- 1994: The subject property appears to exist as mostly undeveloped land with a small residential structure located along East 6th Street on the north side of the subject property. The adjacent properties to the north and south appear to exist as undeveloped land and the adjacent properties to the west appear to be occupied by residential homes and exist as undeveloped land. The adjacent properties to the east are not shown in this aerial photograph.
- 1989: The subject property appears to exist as mostly undeveloped land with a small residential structure located along East 6th Street on the north side of the subject property. Dirt roads appear to exist on the subject property in this aerial photograph. The adjacent properties to the north and south appear to exist as undeveloped land and the adjacent properties to the west appear to be occupied by residential homes and exist as undeveloped land. The adjacent properties to the east are not shown in this aerial photograph.
- 1977: The subject property appears to exist as mostly undeveloped land with a small residential structure located along East 6th Street on the north side of the subject property. The adjacent properties to the north and south appear to exist as undeveloped land and the adjacent properties to the east and west appear to be occupied by residential homes and exist as undeveloped land.
- 1967: The subject property appears to exist as mostly undeveloped land with a small residential structure located along East 6th Street on the north side of the subject property. The adjacent properties to the north and south appear to exist as undeveloped land and the adjacent properties to the east and west appear to be occupied by residential homes and exist as undeveloped land.
- 1953: The subject property appears to exist as mostly undeveloped land with a small residential structure located along East 6th Street on the north side of the subject property. The adjacent properties to the north and south appear to exist as undeveloped land and the adjacent properties to the east and west appear to be occupied by residential homes and exist as undeveloped land.

Photocopies of the aerial photographs are located in Appendix A.

3.1 Site Use History:

Building Permits: The City of San Bernardino Building and Safety Department and the County of San Bernardino Building Department were visited during the site assessment in order to review any building permits on file for the subject property. No building permits were on file for the subject property at either the City of San Bernardino Building and Safety Department or the County of San Bernardino Building Department.

<u>City Directories:</u> A City Directory Abstract researching Haines Criss-Cross City Directories from the years 1971, 1975, 1980, 1985, 1990, 1995 and 2001 was obtained from E Data Resources, Inc. and was reviewed during the site assessment. The following information was obtained from reviewing the City Directory Abstract:

<u>Year</u> 1971	Address East 6 th Street	Uses Address not listed in research source
1975	East 6 th Street	Address not listed in research source
1980	East 6 th Street	Address not listed in research source
1985	East 6 th Street	Address not listed in research source
1990	East 6 th Street	Address not listed in research source
1995	East 6 th Street	Address not listed in research source
2001	2285 East 6 th Street	San Bernardino Towing

None of the past or present uses of the subject property and the surrounding area are expected to have negatively impacted the subject property. A photocopy of the City Directory Abstract from E Data Resources, Inc. is located in Appendix B.

3.1 Site Use History:

Historical Topographical Maps: Historical topographical maps from 1901, 1954, 1967, 1980 and 1988 were obtained from E Data Resources, Inc. and were reviewed during the site assessment. The following information was obtained from reviewing the historical topographical maps.

- 1988: The subject property appears to exist as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property in a 7.5 Minute Series Topographical Map of the Redlands, California Quadrangle from 1967 that was photorevised in 1988.
- 1980: The subject property appears to exist as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property in a 7.5 Minute Series Topographical Map of the Redlands, California Quadrangle from 1967 that was photorevised in 1980.
- The subject property appears to exist as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property in a 7.5 Minute Series Topographical Map of the Redlands, California Quadrangle from 1967.
- 1954: The subject property appears to exist as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property in a 7.5 Minute Series Topographical Map of the Redlands, California Quadrangle from 1954.
- 1901: The subject property appears to exist as mostly undeveloped land with some small residential structures located along East 6th Street on the north side of the subject property in a 15 Minute Series Topographical Map of the Redlands, California Quadrangle from 1901.

Photocopies of the historical topographical maps are located in Appendix A.

Sanborn Fire Insurance Maps: Sanborn Fire Insurance Map coverage was not available for the subject property. A photocopy of documentation from E Data Resources, Inc. regarding the Sanborn Fire Insurance Map coverage for the subject property is located in Appendix A.

- 3.1.1 Current use: The subject property currently exists as a vacant lot (undeveloped land).
- 3.1.2 Previous uses of existing building: No buildings were observed on the subject property at the time of the site assessment, however a concrete foundation and some construction debris that remain from a single-family residential home that was previously demolished on-site were observed on the north side of the subject property during the site assessment.
- **3.1.3 Uses associated with previous developments:** According to aerial photographs from 1953, 1967, 1977, 1989 and 1994 and historical topographical maps from 1901, 1954, 1967, 1980 and 1988, some small residential structures were previously located along East 6th Street on the north side of the subject property.

3.2 Database Search Report:

Several key Federal and State databases were searched in order to identify properties that are or have the potential for existing or future site contamination, environmental liabilities, or the potential for contamination migration to surrounding areas. The database search report was provided by E Data Resources Inc., and is included in Appendix C. Each database was searched for sites located within a specific radius around the subject property:

Category	# of Sites
NPL	1 within 1 mile radius
CERCLIS	1 within ½ mile radius
RCRIS-TSD	1 within ½ mile radius
RCRIS Lg. Quan. Gen.	1 within ¼ mile radius
RCRIS Sm. Quan. Gen.	0 within ¼ mile radius
Cal-Sites	1 within 1 mile radius
State Landfill	0 within ½ mile radius
LUST	2 within ½ mile radius
UST	0 within ¼ mile radius

NPL - National Priority List, identifies hazardous waste sites identified for priority cleanup under the Superfund Program.

CERCLIS - Comprehensive Environmental Response, Compensation, and Liability Information System, contains data on potentially hazardous waste sites that have been reported to the EPA pursuant to CERCLA.

RCRIS-TSD - Resource Conservation and Recovery Information System/Treatment, Storage, Disposal Facility: An EPA database of reporting facilities that treat, store, or dispose of hazardous waste.

RCRIS Lg. Quan. Gen. - Resource Conservation and Recovery Information System/Large Quantity Generator: An EPA database of reporting facilities that generate greater than 1000 kg. of hazardous waste per month.

RCRIS Sm. Quan. Gen. - Resource Conservation and Recovery Information System/Small Quantity Generator: An EPA database of reporting facilities that generate > 100 kg. of hazardous waste, but 1000 kg. of hazardous waste per month.

Cal-Sites - Known and potential hazardous substance sites (formerly ASPIS).

State Landfill - Solid Waste Information System, State list of active, closed, and inactive landfills.

LUST - Leaking Underground Storage Tank, Inventory of reported leaking underground storage tank incidents.

UST - Underground Storage Tank, Inventory of facilities with registered underground storage tanks.

The subject property was not listed under any category identified in the environmental database report.

3.2.1 The following adjoining sites were identified by the database search reports:

None of the adjacent properties were listed under any category identified in the environmental database report.

3.2 Database Search Report:

3.2.2 The following additional sites were identified within the database search distance of the subject property:

NPL

One NPL site is identified within a 1 mile radius of the subject property. USAF Norton AFB (I-10 and US Highway 395) is located between 1/8 to ¼ mile to the south of the subject property. Based on the inferred direction of regional groundwater flow (southwest), this site would appear to be located cross-gradient relative to the subject property. This site (EPA ID #CA4570024345) is listed as a Federal facility that has contaminated the groundwater aquifer with carbon tetrachloride and trichloroethylene (TCE). According to the database, this site is on the Final NPL as of July 22, 1987. No other information was reported by the database under the NPL listing for this site. Due to the distance from the subject property and the cross-gradient location of the site relative to the subject property, this NPL site is not expected to have negatively impacted the subject property.

CERCLIS

One CERCLIS site is identified within a ½ mile radius of the subject property. USAF Norton AFB (I-10 and US Highway 395) is located between 1/8 to ¼ mile to the south of the subject property. Based on the inferred direction of regional groundwater flow (southwest), this site would appear to be located crossgradient relative to the subject property. This site is listed as a Federal facility that has contaminated the soil with polychlorinated biphenyls (PCBs), trichloroethylene (TCE), petroleum hydrocarbons, metals such as lead and polycyclic aromatic hydrocarbons. According to the database, a "Five Year Remedy Assessment" was completed at this site as of October 27, 1999. No other information was reported by the database under the CERCLIS listing for this site. Due to the distance from the subject property and the cross-gradient location of the site relative to the subject property, this CERCLIS site is not expected to have negatively impacted the subject property.

RCRIS-TSD

One RCRIS-TSD site is identified within a ½ mile radius of the subject property. USAF Norton AFB (I-10 and US Highway 395) is located between 1/8 to ¼ mile to the south of the subject property. Based on the inferred direction of regional groundwater flow (southwest), this site would appear to be located cross-gradient relative to the subject property. This site is listed as treatment, storage, disposal facility of unreported wastes with fifteen past reported violations. This RCRIS-TSD site has past violations reported in the areas of "Generator-All Requirements (Oversight)", "TSD-Other Requirements (Oversight)", "TSD-Closure/Post-Closure Requirements" and "TSD-Groundwater Monitoring Requirements" during a Compliance Evaluation Inspection (CEI). No other information was reported by the database under the RCRIS-TSD listing for this site. Due to the distance from the subject property and the cross-gradient location of the site relative to the subject property, this RCRIS-TSD site is not expected to have negatively impacted the subject property.

3.2 Database Search Report:

3.2.2 The following additional sites were identified within the database search distance of the subject property:

RCRIS Lg. Quan. Gen.

One RCRIS Lg. Quan. Gen. site is identified within a ½ mile radius of the subject property. USAF Norton AFB (I-10 and US Highway 395) is located between 1/8 to ¼ mile to the south of the subject property. Based on the inferred direction of regional groundwater flow (southwest), this site would appear to be located cross-gradient relative to the subject property. This site is listed as a large quantity generator of unreported wastes with fifteen past reported violations. This site has past violations reported in the areas of "Generator-All Requirements (Oversight)", "TSD-Other Requirements (Oversight)", "TSD-Closure/Post-Closure Requirements" and "TSD-Groundwater Monitoring Requirements" during a Compliance Evaluation Inspection (CEI). No other information was reported by the database under the RCRIS Lg. Quan. Gen. listing for this site. Due to the distance from the subject property and the cross-gradient location of the site relative to the subject property, this RCRIS Lg. Quan. Gen. site is not expected to have negatively impacted the subject property.

Cal-Sites

One Cal-Site is identified within a ½ mile radius of the subject property. USAF Norton AFB (I-10 and US Highway 395) is located between 1/8 to ¼ mile to the south of the subject property. Based on the inferred direction of regional groundwater flow (southwest), this site would appear to be located cross-gradient relative to the subject property. This Cal-Site (Facility ID #36970004) is listed as a closed military base that is an active Annual Work Plan (AWP) site under the oversight of the Environmental Protection Agency as of May 1, 1986. No other information was reported by the database under the Cal-Site listing for this site. Due to the distance from the subject property and the cross-gradient location of the site relative to the subject property, this Cal-Site is not expected to have negatively impacted the subject property.

LUST

Two LUST sites are identified within a ½ mile radius of the subject property. Only one LUST site is actually located within ½ mile of the subject property, since the same site was identified twice in the database as a LUST site. This site (Cal Disposal) is not located adjacent to the subject property. Cal Disposal (26009 East 6th Street) is located between ¼ to ½ mile to the east-northeast of the subject property. Based on the inferred direction of regional groundwater flow (southwest) would appear to be located upgradient relative to the subject property. This site appeared twice as a LUST site for leaking diesel fuel on August 25, 1998 that has affected the soil only. According to the database, remedial action was either completed or deemed unnecessary and the case was signed off on June 8, 2000. Due to the distance from the subject property and since the case is closed, this LUST site is not expected to have negatively impacted the subject property.

3.3 Additional Research: The following sources have been contacted or were visited during the course of the records review of the assessment:

City of San Bernardino Building and Safety Department

City of San Bernardino Fire Development

City of San Bernardino Municipal Water Department

City of San Bernardino Planning Department

City of San Bernardino Public Works Department

County of San Bernardino Building Department

County of San Bernardino Department of Environmental Health Services (DEH)

County of San Bernardino Tax Assessor's Office

Southern California Edison (SCE)

State of California Regional Water Quality Control Board (RWQCB) - Santa Ana Region (8)

City of San Bernardino Building and Safety Department

The City of San Bernardino Building and Safety Department was visited during the site assessment in order to review any building permits on file for the subject property. No building permits were on file for the subject property.

City of San Bernardino Fire Department

The City of San Bernardino Fire Department was contacted in order to research if there are any records of underground storage tanks or hazardous materials on file for the subject property. According to the City of San Bernardino Fire Department, there are no records of underground storage tanks or hazardous materials on file for the subject property.

City of San Bernardino Municipal Water Department

Drinking water is provided to the subject property by the City of San Bernardino Municipal Water Department. The City of San Bernardino Municipal Water Department obtains their potable water supply from 60 domestic wells located throughout San Bernardino County. According to the City of San Bernardino Municipal Water Department, their drinking water supply meets or exceeds Federal and State regulatory guidelines. A photocopy of the 2001 Drinking Water Consumer Confidence Report from the City of San Bernardino Municipal Water Department is located in Appendix B.

City of San Bernardino Planning Department

The City of San Bernardino Planning Department was visited in order to obtain zoning information for the subject property. The subject property is located in an area of San Bernardino, California that is zoned CG-1 (Commercial General District). Zoning information from the City of San Bernardino Planning Department is located in Appendix B.

3.3 Additional Research:

City of San Bernardino Public Works Department

The City of San Bernardino Public Works Department was visited in order to obtain flood zone information for the subject property. The subject property is located in Flood Zone X which is an area of minimal flooding determined to be outside the limits of the 500-year flood plain. The Federal Emergency Management Agency (FEMA) – Flood Insurance Rate Map (FIRM) Community Panel Number is #06071C-8701F and the effective date of the map is March 18, 1996.

County of San Bernardino Building Department

The County of San Bernardino Building Department was visited during the site assessment in order to review any building permits on file for the subject property. No building permits were on file for the subject property.

County of San Bernardino Department of Environmental Health Services (DEH)

The County of San Bernardino Department of Environmental Health Services (DEH) was contacted in order to research if there are any records of underground storage tanks or hazardous materials on file for the subject property. According to the DEH, there are no records of underground storage tanks or hazardous materials on file for the subject property.

County of San Bernardino Tax Assessor's Office

The County of San Bernardino Tax Assessor's Office was visited in San Bernardino, California in order to research ownership information for the subject property. The current owner of the subject property is listed as Midway Homes and the current Assessor's Parcel Number (APN) for the subject property is 1192-211-01-0000. A photocopy of the parcel map and ownership information from the San Bernardino County Tax Assessor's Office is located in Appendix B.

Southern California Edison (SCE)

Southern California Edison (SCE) was contacted regarding the PCB content of the SCE-owned pole-mounted power transformers and power transformer vault that were observed along Sterling Avenue to the west side of the subject property during the site assessment. According to SCE, it is unlikely that the power transformers contain PCBs. In the event of a leak or spill, SCE assumes responsibility for the clean up and repairs regardless of the PCB content of the power transformers. The pole-mounted power transformers were observed to be in good condition during the site assessment and no spills, stains or leaks were observed in the vicinity of the power transformers at the time of the site assessment. Documentation from SCE regarding the PCB-content of the power transformers is located in Appendix B.

State of California Regional Water Quality Control Board (RWQCB) - Santa Ana Region (8)

The State of California Regional Water Quality Control Board (RWQCB) – Santa Ana Region (8) was contacted in order to research if there are any records of underground storage tanks or groundwater contamination on file for the subject property. According to the RWQCB, there are no records of underground storage tanks or groundwater contamination on file for the subject property.

SECTION 4.0 SITE ASSESSMENT

- 4.1 Hazardous Substances/Petroleum Product Storage: No hazardous substances or petroleum products were observed to be stored on the subject property at the time of the site assessment.
- **4.2 Evidence of Spill/Releases:** No evidence of any spills or releases of hazardous substances or petroleum products was observed on the subject property at the time of the site assessment.
- 4.3 Bulk Storage Tanks: No evidence of any current or previously existing aboveground storage tanks or underground storage tanks on the subject property was identified during the site assessment. There are no records of USTs on file for the subject property at the City of San Bernardino Fire Department or the County of San Bernardino Department of Environmental Health Services and the subject property was not identified in the database as an UST or LUST site.
- 4.4 Suspect Polychlorinated Biphenyls (PCBs): No pad-mounted power transformers were observed on the subject property during the site assessment. Some pole-mounted power transformers and a power transformer vault were observed along Sterling Avenue to the west side of the subject property during the site assessment. The power transformers are owned and maintained by Southern California Edison (SCE) and were not labeled regarding their PCB content. According to SCE, it is unlikely that the power transformers contain PCBs. In the event of a leak or spill, SCE assumes responsibility for the clean up and repairs regardless of the PCB content of the power transformers. The pole-mounted power transformers were observed to be in good condition during the site assessment and no spills, stains or leaks were observed in the vicinity of the power transformers at the time of the site assessment. Documentation from SCE regarding the PCB-content of the power transformers is located in Appendix B.

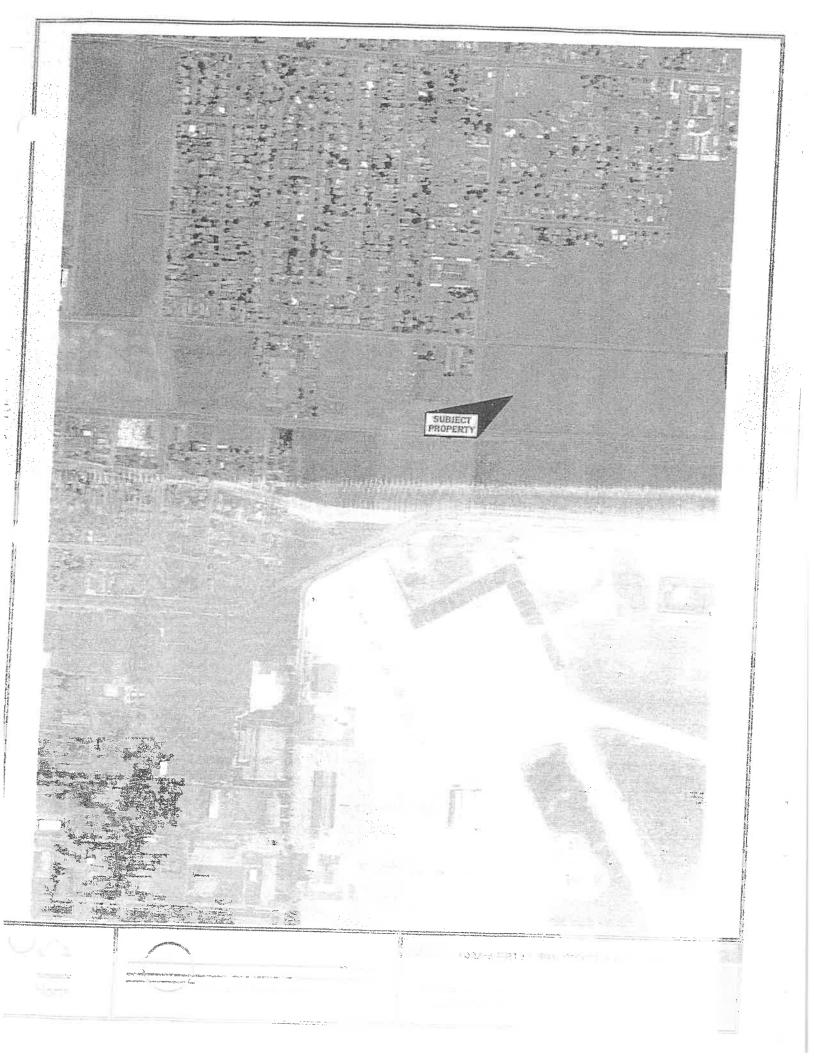

Fluorescent light ballasts were not observed on the subject property during the site assessment since the subject property currently exists as a vacant lot (undeveloped land).

- 4.5 Asbestos-Containing Materials (ACM): A screening for asbestos-containing materials was not conducted on the subject property as part of the Phase I Environmental Site Assessment, since the subject property currently exists as a vacant lot (undeveloped land).
- **4.6 Lead-Based Paint (LBP):** A screening for lead-based paint was not conducted on the subject property as part of the Phase I Environmental Site Assessment, since the subject property currently exists as a vacant lot (undeveloped land).
- **4.7 Waste Discharges:** No waste discharges were identified on the subject property. Stormwater runoff from the subject property is directed toward a storm drainage ditch located along East 5th Street on the south side of the subject property and toward storm drains located along East 6th Street to the north of the subject property, along East 5th Street to the south of the subject property and along Sterling Avenue to the west of the subject property.
- **4.8 Fill Materials/Dumping:** Some construction debris that remains from a single-family residential home that was previously demolished on the subject property was observed on the north side of the subject property during the site assessment. No other evidence of fill material or dumping was observed on the subject property during the site assessment.
- **4.9 Area Reconnaissance:** The subject property is located in an area of San Bernardino, California that is zoned CG-1 (Commercial General District). The surrounding area primarily consists of commercial and residential buildings with some undeveloped land. Color photographs of the subject property and surrounding properties are located in Appendix D.

Environmental Data Resources, Inc. City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist professionals in evaluating potential liability on a target property resulting from past activities. ASTM E 1527-00, Section 7.3 on Historical Use Information, identifies the prior use requirements for a Phase I environmental site assessment. The ASTM standard requires a review of reasonably ascertainable standard historical sources. Reasonably ascertainable means information that is publicly available, obtainable from a source with reasonable time and cost constraints, and practically reviewable.

To meet the prior use requirements of ASTM E 1527-00, Section 7.3.4, the following standard historical sources may be used: aerial photographs, fire insurance maps, property tax files, land title records (although these cannot be the sole historical source consulted), topographic maps, city directories, building department records, or zoning/land use records. ASTM E 1527-00 requires "All obvious uses of the property shall be identified from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources as are necessary, and that are reasonably ascertainable and likely to be useful." (ASTM E 1527-00, Section 7.3.4, page 12.)

EDR's City Directory Abstract includes a search and abstract of available city directory data.

City Directories

City directories have been published for cities and towns across the U.S. since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area. Twentieth century directories are generally divided into three sections: a business index, a list of resident names and addresses, and a street index. With each address, the directory lists the name of the resident or, if a business is operated from this address, the name and type of business (if unclear from the name). While city directory coverage is comprehensive for major cities, it may be spotty for rural areas and small towns. ASTM E 1527-00 specifies that a "review of city directories (standard historical sources) at less than approximately five year intervals is not required by this practice." (ASTM E 1527-00, Section 7.3.4, page 12.)

Please call EDR Nationwide Customer Service at 1-800-352-0050 (8am-8pm EST) with questions or comments about your report.

Thank you for your business!

U.S.D.A. SOIL SURVEY MAP AND SOIL DESCRIPTION

U. S. DEPARTMENT OF AGRICULTURE SOIL CONSERVATION SERVICE

SOIL SURVEY OF

San Bernardino County Southwestern Part, California

United States Department of Agriculture Soil Conservation Service in cooperation with University of California Agricultural Experiment Station Also included are areas of Hanford coarse sandy loam. Runoff is medium, and the hazard of erosion is noderate if the soil is unprotected.

This Greenfield soil is used for irrigated citrus, alfalfa, pasture plants, and dryfarmed small grains.

Capability unit IIe-1 irrigated.

Greenfield sandy loam, 9 to 15 percent slopes (GtD). This strongly sloping soil occupies alluvial fans. Included with it in mapping are small areas of Hanford coarse sandy loam and Ramona sandy loam.

Runoff is rapid, and the hazard of erosion is moderate to high where the soil is without vegetation.

This soil is used for citrus and dryfarmed small grains and pasture plants. Small areas are used for homesites and related uses. Capability unit IIIe-1

Greenfield cobbly sandy loam, 5 to 15 percent slopes (GuD).—This moderately sloping to strongly sloping soil occupies broad, short, alluvial fans. It has a profile similar to the one described as representative of the series, but the surface layer is grayish brown sandy loam. Also cobblestones occupy about 15 percent of the surface area. Included with this soil in mapping are small patches of Ramona sandy loam and small areas of Hanford coarse sandy loam.

Runoff is medium, and the hazard of erosion is slight. The cobbly surface tends to reduce erosion activity somewhat. Available water capacity is about

6 to 8 inches.

This soil is used mainly for seeded dryfarmed pasture and for spring grazing of livestock. Capability it IVs-7 irrigated.

Hanford Series

The Hanford series consists of well-drained, nearly level to strongly sloping soils that formed in recent granitic alluvium on valley floors and alluvial fans. Slopes are 0 to 15 percent. Elevation is 1,000 to 1,800 feet. Vegetation is mainly annual grasses and forbs. The average annual precipitation is 12 to 16 inches, the mean annual air temperature is 62° to 65° F, and the frost-free season is 230 to 280 days.

In a representative profile, the soil material is palebrown and very pale brown sandy loam to a depth of 60 inches or more. This material is slightly acid or

neutral throughout.

These soils are moderately rapidly permeable. Their available water capacity is about 7 to 8 inches. Roots penetrate to a depth of 60 inches or more.

These soils are used for irrigated crops such as citrus, alfalfa, grapes, pasture plants, and small

grains. Some areas are used for homesites.

Representative profile of Hanford sandy loam, 0 to percent slopes, about 100 feet south of Palmetta Avenue and about one-fourth mile west of Nevada Avenue, NW1/4NE1/4SE1/4 sec. 17, T. 1 S., R. 3 W.; San Bernardino base line and meridian:

-0 to 12 inches, pale-brown (10YR 6/3) sandy loam, brown (10YR 4/3) when moist; massive; slightly hard, friable, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, tubular and interstitial pores; slightly acid; gradual, smooth boundary. C1—12 to 32 inches, pale-brown (10YR 6/3) sandy loam, brown (10YR 4/3) when moist; weak, fine, subangular blocky structure; slightly hard, friable, nonsticky and nonplastic; common very fine and fine roots; common, very fine and fine, interstitial and tubular pores; neutral; gradual, smooth boundary.

C2—32 to 60 inches, very pale brown (10YR 7/3) sandy loam, brown (10YR 5/3) when moist; massive; slightly hard, friable, nonsticky and nonplastic; few very fine roots; few, very fine and fine, interstitial and tubu-

lar pores; neutral.

The A horizon is pale brown, light brownish gray, or brown. Its texture is sandy loam or coarse sandy loam. The soil is generally massive but may have weak, fine or medium, granular or subangular blocky structure. Thickness ranges from 8 to 14 inches but is 12 inches in most places.

The C horizon is pale brown, very pale brown, or light yellowish brown. Its texture is sandy loam, fine sandy loam, or coarse sandy loam. Reaction ranges from slightly acid to neutral but it may be mildly alkaline in some places. Some fine pebbles occur in a few places but generally do not exceed 5 percent by volume. Thin lenses of loam often

Hanford coarse sandy loam, 2 to 9 perceent slopes (HaC). —This gently sloping to moderately sloping soil occupies alluvial fans. It has a profile similar to the one described as representative of the series, but the surface layer is light brownish-gray coarse sandy loam about 10 inches thick. Included with it in mapping are areas of Greenfield sandy loam that make up as much as 10 percent of the total mapped areas. Also included are patches of Tujunga loamy sand, 0 to 5 percent slopes.

Runoff is slow to medium, and the hazard of erosion is slight to moderate where the soil is left unprotected.

This Hanford soil is used for irrigated crops such as citrus and alfalfa. It also is used for dryfarmed small grains and pasture plants. Homesites and other related uses are also important. Capability unit IIe-1 irrigated.

Hanford coarse sandy loam, 9 to 15 percent slopes (HaD). - This strongly sloping soil is on fans and terraces that have short side slopes. It has a profile similar to the one described as representative of the series, but the surface layer is brown coarse sandy loam about 10 inches thick. Included with it in mapping are areas of Greenfield sandy loam and Ramona sandy loam that each make up about 5 percent of the total area.

Runoff is medium, and the hazard of erosion is medium to high if the soil is left without plant cover.

This soil is used for citrus, grapes, and dryfarmed small grains. Some areas are used for homesites. Capability unit IIIe-1 irrigated.

Hanford sandy loam, 0 to 2 percent slopes (HbA). This nearly level soil is on valley floors and toe slopes of alluvial fans. Included with it in mapping are small areas where slopes are 2 to 5 percent. Also included are small areas of Greenfield sandy loam, 2 to 9 percent slopes, and small scattered patches of soils that are loamy sand below a depth of 40 inches.

Runoff is slow, and the hazard of erosion is slight

if the soil is left unprotected.

This soil is used for irrigated crops such as citrus, alfalfa, small grains, and pasture plants. Capability unit I irrigated.

grasses and forbs, manzanita, live oak, and pine trees. The average annual precipitation is 14 to 25 inches, the mean annual air temperature is 52° to 57° F, and

the frost-free season is 160 to 210 days.

In a representative profile, the surface layer is dark grayish-brown and brown sandy loam about 12 inches thick. It is underlain by very pale brown weathered granitic rock that extends to a depth of 60 inches or more. Tollhouse soils are slightly acid throughout the profile.

These soils are moderately rapidly permeable. Their available water capacity is about 1 to 3 inches. Roots

can penetrate to a depth of 10 to 20 inches.

These soils are used for watershed and for spring

grazing of livestock.

Representative profile of Tollhouse sandy loam, 30 to 50 percent slopes, on the north side of the Forest Service Road on the edge of a firebreak about onefourth of a mile north of Pisgah Peak; NE14SE14. SE14 sec. 35, T. 1 S., R. 1 W.; San Bernardino base line and meridian:

A11-0 to 8 inches, dark grayish-brown (10YR 4/2) sandy loam, very dark brown (10YR 2/2) when moist; weak, fine, granular structure; soft, very friable, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, interstitial and tubular pores;

slightly acid; clear, smooth boundary,

A12—8 to 12 inches, brown (10 YR 4/3) sandy loam, dark brown (10 YR 3/3) when moist; moderate, medium, granular structure; soft, very friable, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, interstitial pores; slightly acid; abrupt, wavy boundary.

-12 to 60 inches, very pale brown (10YR 7/4) weathered granitic rock.

The A1 horizon is dark grayish brown, dark brown, or brown. Its texture is sandy loam or fine sandy loam. Structure is typically weak or moderate, fine or medium, granular. Thickness ranges from 10 to 18 inches but is about 12 inches in most areas. Reaction is typically slightly acid, but in a few places it is medium acid or neutral. In places there is a thin C horizon of brown or pale-brown sandy loam or loam that contains fragments of parent material. Where this horizon occurs, it generally has moderate, medium, blocky structure, but in places it is massive. In most places, the A1 horizon is directly underlain by weathered parent material. Depth to weathered granite is 10 to 20 inches, and depth to hard rock varies from place to place and in many places within a short distance. In nearly all areas the depth to hard rock is more than 40

Tollhouse sandy loam, 30 to 50 percent slopes (ToF). This steep soil is on foothills and mountains. Included with it in mapping are small, moderately steep areas, about 10 to 25 acres in size, where slopes range from 15 to 25 percent. Also included are areas of Cieneba-Rock outcrop complex.

Runoff is rapid to very rapid. The hazard of erosion is moderate to high in places where soil is left bare.

This Tollhouse soil is used for spring grazing of livestock and watershed. Capability unit VIIe-1 dryland.

Tujunga Series

The Tujunga series consists of somewhat excessively drained, nearly level to moderately sloping soils that

formed on alluvial fans in granitic alluvium. Slopes are 0 to 9 percent. Elevation is 1,000 to 2,000 feet. Vegetation is thin strands of chamise, some big sagebrush, and annual grasses and forbs. The average annual precipitation is 12 to 16 inches, the mean annual air temperature is 61° to 65° F, and the frost-free season is 230 to 280 days.

In a representative profile, the soil is brown loamy sand and pale-brown coarse sand that extends to a depth of 60 inches or more. Tujunga soils are slightly

acid throughout their profile.

The Tujunga soils are rapidly permeable. Roots can penetrate to a depth of 60 inches or more.

These soils are used mainly for such irrigated crops

as citrus, grapes, small grains, and potatoes.

Representative profile of Tujunga loamy sand, 0 to 5 percent slopes, about 100 feet east of Webster Road and about 200 feet northeast of Orange Street; SW1/4 NE1/4SW1/4 sec. 3, T. 1 S., R. 3 W.; San Bernardino base line and meridian:

A1-0 to 6 inches, brown (10YR 5/3) loamy sand, dark brown (10YR 4/3) when moist; single grained; loose when dry or moist, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, in-

terstitial pores; slightly acid; clear, smooth boundary. C1—6 to 18 inches, pale-brown (10YR 6/3) coarse sand, brown (10YR 5/3) when moist; single grained; loose when dry or moist, nonsticky and nonplastic; few very fine roots; slightly acid; gradual, smooth boundary.

18 to 60 inches, pale-brown (10YR 6/3) coarse sand, brown (10YR 5/3) when moist; single grained; loose when dry or moist, nonsticky and nonplastic; few very fine roots; slightly acid.

The A1 horizon is brown or grayish brown loamy sand, sand, or loamy coarse sand that is gravelly in places. It is generally single grained, but is massive in some places. This horizon is generally slightly acid, but it is neutral in a few spots. It ranges from 6 to 10 inches in thickness.

The C horizon is pale brown, very pale brown, or brown coarse sand, loamy sand, sand, and loamy coarse sand. Thin lenses of fine gravel are common. In small areas texture is gravelly loamy sand throughout, and in these areas the C horizon is about 15 to 30 percent gravel, by volume. In places there are a few cobbles below a depth of 44 inches. The soil is typically single grained, but in a few places the C horizon is massive. It is slightly acid in most places, is neutral in some places, and mildly alkaline below a depth of 40 inches in a few places.

Tujunga loamy sand, 0 to 5 percent slopes (TuB). This nearly level to gently sloping soil is on broad, long alluvial fans. It has the profile described as representative of the series.

Included with it in mapping are areas of Tujunga gravelly loamy sand, 0 to 9 percent slopes, that generally are 10 to 20 acres in size. Also included are areas of Hanford sandy loam, 0 to 2 percent slopes.

Runoff is slow to very slow. The hazard of water erosion is slight, but the soil will blow if left unprotected. The hazard of soil blowing is moderate to high on bare soil. Available water capacity is 4 to 5 inches.

This soil is used for such irrigated crops as citrus, grapes, small grains, and pasture plants. Capability unit IIIe-4 irrigated.

Tujunga gravelly loamy sand, 0 to 9 percent slopes (TvC). —This nearly level to moderately sloping soil occurs on long, broad, smooth alluvial fans. It has a

profile similar to the one described as representative f the series, but the content of fine gravel, to a depth of 3 to 40 inches, is about 15 to 30 percent, by volume. Near Highland Avenue and Citrus Avenue north of 22d and Mountain Avenues, patches of this soil have a dark grayish-brown or dark-brown surface layer.

Included with this soil in mapping are areas of Soboba gravelly loamy sand. Also included are areas

of Delhi fine sand.

Runoff is very slow to slow. Available water capacity is 3 to 4 inches. The hazard of erosion is slight because

of the gravelly surface layer.

This Tujunga soil is used for irrigated small grains and pasture plants. It is a favored soil for lemons in the west end of the survey area north of Foothill Boulevard. Capability unit IVs-4 irrigated.

Vista Series

The Vista series consists of well-drained, steep soils that formed on foothills in the uplands in material weathered from granitic rock. Slopes are 30 to 50 percent. Elevation is 1,200 to 3,500 feet. Vegetation is chamise and annual grasses and forbs. The average annual precipitation is 12 to 16 inches, the mean annual air temperature is 61° to 65° F, and the frostfree season is 230 to 280 days.

In a representative profile, the surface layer is brown sandy loam or coarse sandy loam about 20 inches thick. The subsoil is yellowish-brown coarse sandy loam or sandy loam about 18 inches thick. De-

iposed granitic rock is at a depth of 38 inches. Vista are typically slightly acid in the surface layer but become neutral with increasing depth.

These soils are moderately rapidly permeable. Their available water capacity is about 3 to 5 inches. Roots can penetrate to a depth of 24 to 40 inches.

These soils are used mainly for spring livestock

grazing and watershed.

Representative profile of Vista sandy loam, 30 to 50 percent slopes, in an area of Vista-Rock outcrop complex, about three-fourths mile northwest of Rosendale Avenue in La Loma Hills and about three-fourths mile north of Riverside Freeway 395; NW14NW14 SW1/4 sec. 6, T. 2 S., R. 4 W; San Bernardino base line and meridian:

A11-0 to 2 inches, brown (10YR 4/3) sandy loam, dark brown (10YR 3/3) when moist; weak, medium, crumb structure; soft, very friable, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, interstitial pores; slightly acid; abrupt, smooth boundary.

A12-2 to 11 inches, brown (10YR 5/3) coarse sandy loam, dark brown (10YR 4/3) when moist; weak, medium, crumb structure; slightly hard, very friable, nonsticky and nonplastic; many very fine and fine roots; many, very fine and fine, interstitial pores; slightly acid; gradual, smooth boundary.

11 to 20 inches, brown (10YR 5/3) coarse sandy loam, dark brown (10YR 4/3) when moist; weak, medium, granular structure; slightly hard, very friable, nonsticky and nonplastic; common very fine and fine roots; many, very fine and fine, interstitial pores; slightly acid; clear, wavy boundary.

321—20 to 29 inches, yellowish-brown (10YR 5/4) coarse sandy loam, dark yellowish brown (10YR 4/4) when moist; weak, medium, subangular blocky structure;

slightly hard, very friable, nonsticky and nonplastic; few very fine and fine roots; many, very fine and fine, interstitial and tubular pores; slightly acid; gradual, wavy boundary.

B22-29 to 38 inches, yellowish-brown (10YR 5/4) sandy loam, dark yellowish-brown (10YR 4/4) when moist; massive; hard, friable, nonsticky and nonplastic; few very fine roots; many, very fine, interstitial and tubular pores; neutral; abrupt, wavy boundary. C-38 to 60 inches, brownish-yellow (10YR 6/6) decom-

posed granitic rock; neutral.

The A1 horizon is brown to dark grayish brown. In places it is weak, medium, subangular blocky in the lower part. This horizon is typically slightly acid, but it is medium acid in spots or even neutral. Thickness ranges from 12 to 20 inches but is about 20 inches in most places.

The B2 horizon is yellowish brown, brown, or strong brown fine sandy loam, sandy loam, or coarse sandy loam. In most places, it has weak, fine to medium, subangular blocky structure throughout, but in some places the lower part is massive. It ranges from 12 to 20 inches in thick ness. In some places this horizon has a few thin clay films on ped faces or lining the tubular pores, but in other places the clay films occur as few to common, thin to mod-

places the clay lims occur as lew to common, thin to moderately thick bridgings between mineral grains.

The C horizon is brownish-yellow or other varicolored decomposed granitic rock. Depth to weathered granite is 24 to 40 inches. Depth to hard rock is generally more than 60 inches but varies considerably within short distances.

Vista-Rock outcrop complex (Vr). —This steep complex is mainly on uplands. It is about 50 percent Vista sandy loam, 30 to 50 percent slopes, and 30 percent rock outcrops. Vista sandy loam and rock outcrops occur at random throughout each mapped area, but Vista sandy loam commonly occurs on the side slopes, and rock outcrops occupy the ridgetops and steeper parts of the landscape.

Included with this complex in mapping are about 135 acres south and southwest of Loma Linda near the Riverside County line where slopes are 10 to 15 percent and bedrock is not exposed. Also included are small scattered patches of a soil similar to this soil that has a subsoil of reddish-brown light sandy clay loam and small areas of San Timoteo loam, 30 to 50 percent slopes, eroded.

Runoff is medium to rapid, and the hazard of erosion

is moderate.

This soil is used mainly for watershed but occasionally it is used for grazing of livestock in spring. Capability unit VIIe-1 dryland.

Use and Management of the Soils

In this section the system of capability grouping used by the Soil Conservation Service is discussed, the soils in each capability unit are described, and management suited to the soils in each unit is suggested. The estimated acre yields of principal crops and the Storie index rating of the soils are given. Use of the soils for wildlife, engineering purposes, and recreational development are discussed.

Capability Grouping

Some readers, particularly those who farm on a large scale, may find it practical to use and manage alike some of the different kinds at soils on their

LETTER FROM SOUTHERN CALIFORNIA EDISON (SCE)
REGARDING THE PCB CONTENT OF THE POWER TRANSFORMERS

An EDISON INTERNATIONAL Company
PO BOX 410
LONG BEACH, CALIFORNIA 90801

This letter is in response to your inquiry regarding the subject property and polychlorinated biphenyls (PCB).

It is highly unlikely that the transformer serving your facility contains polychlorinated biphenyls (PCB) at concentration levels requiring special management under the Environmental Protection Agency's rules. SCE has never specified the purchase of distribution transformers utilizing PCB as the insulating/cooling fluid. SCE distribution transformers utilize mineral oil as the insulating/cooling fluid exclusively. In a statistically valid test of over 20,000 SCE distribution transformers, we determined that the concentration of PCB in the mineral oil is less that 50 parts per million (PPM) in over 96 percent of the units. The mineral oil in the four percent that tested above 50 PPM is generally below 100 PPM.

However, we will perform a test of the equipment if we receive written authorization from you to inspect/test the equipment and you agree to pay certain costs. SCE will charge \$60.00 to inspect each transformer location to provide nameplate information (i.e., manufacturer, serial number, rating, and insulation/cooling fluid used.)

If you desire to know the specific PCB concentration of the fluid in the transformer, it is necessary to interrupt electric service for one to two hours to obtain a sample. The sample will be analyzed at a laboratory, and the results made known to you. The cost of inspecting, sampling and analysis is \$500.00 for each transformer location. Since our practice is to replace equipment fluid with concentrations of PCB of 50 PPM or greater as the equipment wears out or is refurbished, we shall assume all costs of the test and replacement if the results show the fluid is 50 PPM PCB or greater.

CITY OF SAN BERNARDINO PLANNING DEPARTMENT ZONING INFORMATION

CHAPTER 19.06 COMMERCIAL DISTRICTS

19.06.010 PURPOSE

- 1. The purpose of this Chapter is to achieve the following:
 - A. Provide appropriate commercial areas for retail and service establishments, neighborhood convenience and office uses required by residents of the City in a manner consistent with the General Plan.
 - B. Provide adequate space to meet the needs of commercial development, including off-street parking and loading.
 - C. Minimize traffic congestion and avoid the overloading of utilities.
 - D. Protect commercial areas from excessive noise, illumination, unsightliness, odor, smoke, and other objectionable influences.
 - E. Promote high standards of site planning, and landscape design for commercial and office developments within the City.
 - F. Provide employment opportunities for existing and future residents of the City and those of adjacent communities.
 - G. Provide for land uses which meet the needs of and attract regional populations, in addition to local residents.
 - H. Ensure compatibility with adjacent land uses.
 - I. Single-family dwelling units which legally existed in commercial land use districts prior to June 3, 1991 may remain as a permitted use. MC 823 3/5/92
- 2. The purpose of the individual commercial land use districts are as follows:

A. CN (COMMERCIAL NEIGHBORHOOD) DISTRICT

This district is intended to provide for the continued use, expansion, and new development of small scale, low-intensity neighborhood commercial uses which serve and are in proximity to residential neighborhoods throughout the City.

B. CO-1 (COMMERCIAL OFFICE) DISTRICT

This district is intended to provide for the continued use, expansion, and new development of administrative and professional offices, hospitals, and supporting retail uses in proximity to major transportation corridors and ensure their

compatibility with adjacent residential and commercial uses. Additionally, this district permits a maximum density of 47 units per gross acre for senior citizen and senior congregate care housing.

C. CO-2 (COMMERCIAL OFFICE-CONVERSION) DISTRICT

This district is intended to promote the conversion, rather than the demolition of existing residential structures where feasible, in designated areas for low-intensity administrative and professional offices. Additionally, this district permits a maximum density of 47 units per gross acre for senior citizen and senior congregate care housing. Existing single family residential structures may remain as a permitted use. MC 818 1/7/92

D. CG-1 (COMMERCIAL GENERAL) DISTRICT

This district is intended to provide for the continued use, enhancement, and new development of retail, personal service, entertainment, office and related commercial uses along major transportation corridors and intersections to service the needs of the residents; reinforcing existing commercial corridors and centers and establishing new locations as residential growth occurs.

E. CG-2 (COMMERCIAL GENERAL-BASELINE/MT. VERNON) DISTRICT

This district is intended to enhance the economic activity of the Baseline Street and Mount Vernon Avenue, and other appropriate commercial corridors; infilling and intensifying existing development, establishing new key activity centers and nodes, allowing for the development of medium and medium high residential density as alternative uses. The residential development shall have a minimum contiguous area of 1 gross acre with a maximum density of 12 units per gross acre along Mount Vernon Avenue and Baseline Street and other designated locations west of I-215 and a maximum density of 21 units per gross acre along Baseline Street and other designated locations east of I-215. Additionally, a bonus density of 50% for the development of senior citizen and senior congregate care housing shall be permitted, subject to the approval of a Conditional Use Permit.

F. CG-3 (COMMERCIAL GENERAL-UNIVERSITY VILLAGE) DISTRICT

This district provides for the development of properties adjacent to California State University at San Bernardino along North Park Boulevard, Kendall Drive, and University Parkway for commercial and personal service uses to meet the needs of students, faculty, and visitors.

G. CG-4 (COMMERCIAL GENERAL-THEME CENTER[S]) DISTRICT

This district is intended to promote the upgrading and enhancement of Mount Vernon Avenue, between 4th and 9th Streets, by establishing an ethnic-themed specialty commercial center, including retail, restaurant, entertainment, gift shops and similar uses. Additionally, this district shall racilitate the reuse of the railroad

depot and adjacent properties for retail/specialty commercial and similar uses. Design guidelines for the Mount Vernon Corridor (Paseo Las Placitas) are contained in Chapter 19.10, Special Purpose Districts, Section 19.10.030(3). MC 1054 8/16/99

H. CG-5 (COMMERCIAL GENERAL-VERDEMONT AREA)

This district is intended to provide for the continued use, enhancement, and new development of retail, commercial service uses and other related commercial uses along I-215 and major transportation corridors and intersections within the Verdemont Area to serve the needs of residents; reinforcing existing commercial corridors and centers, and establishing new locations as new residential growth occurs. MC 863 3/24/93

I. CR-1 (COMMERCIAL REGIONAL-MALLS) DISTRICT

This district is intended to maintain and enhance Central City and Inland Center Malls and adjacent properties as the principal region-serving retail centers of the City.

J. CR-2 (COMMERCIAL REGIONAL-DOWNTOWN) DISTRICT

This district is intended to permit a diversity of regional-serving uses in the Downtown area including local, county, and state governmental/administrative, professional offices, cultural/historical and entertainment, convention facilities, hotels/motels, financial establishments, restaurants, supporting retail and services, educational institutions, public open spaces, and residential and senior citizen housing. Development of sites exclusively for residential uses shall have a minimum contiguous area of 1 gross acre, with a maximum density of 47 units per gross acre. Senior citizen and senior congregate care housing shall permit a maximum density of 130 units per gross acre, subject to the approval of a Conditional Use Permit.

K. CR-3 (COMMERCIAL REGIONAL-TRI-CITY/CLUB) DISTRICT

This district is intended to permit a diversity of regional-serving uses including corporate and professional offices, retail commercial, entertainment (theaters, nightclubs, etc.), financial establishments, restaurants (drive-thrus south of I-10 and adjacent to Tippecanoe Avenue between Hospitality Lane and I-10 only), hotels/motels, warehouse/promotional retail, supporting retail and services, and similar uses. MC 1098 7/5/01

L. CR-4 (COMMERCIAL REGIONAL-AUTO PLAZA) DISTRICT

7

This district is intended to provide for the development of new and used automobile and truck sales and related retail and service uses in the Auto Plaza area.

M. CCS-1 (CENTRAL CITY SOUTH) DISTRICT

This district is intended to permit general retail type uses. Standards are contained in Chapter 19.13.

N. CCS-2 (CENTRAL CITY SOUTH) DISTRICT

This district is intended to permit service commercial uses. Standards are contained in Chapter 19.13.

O. CCS-3 (CENTRAL CITY SOUTH-FLOOD CONTROL CHANNEL) DISTRICT

This district is intended to provide for the flood control channel. Standards are contained in Chapter 19.13.

P. CH (COMMERCIAL HEAVY) DISTRICT

This district is intended to accommodate automobile and truck sales and repair facilities, lumberyards, and related hardware sales, plant nurseries, light industrial manufacturing and storage facilities, and similar uses requiring extensive outdoor or indoor space for their sales, service, and/or storage, excluding neighborhood commercial uses.

Q. OIP (OFFICE INDUSTRIAL PARK) DISTRICT

This district is intended to establish the Waterman Avenue corridor and other appropriate areas as distinctive office industrial parks and corporate centers serving City and regional needs. Supporting retail/commercial services may be located in Corporate Office Industrial Park structures.

R. UBP (UNIVERSITY BUSINESS PARK) DISTRICT

This district actually incorporates three separate districts created as part of the University Business Park Specific Plan and are intended to apply only to parcels within the boundaries of the Specific Plan. Permitted and conditionally permitted uses for the University Business Park are contained in Chapter 19.10, Special Purpose Districts, Section 19.10.030.

1. UBP-1

The UBP-1 designation emphasizes industrial and non-retail commercial service uses. Essentially, it combines uses currently permitted within the OIP and IL designations, but without the more intense industrial uses such as motor freight transportation, mini-storage, truck stops, service stations, etc.

2. UBP-2

The UBP-2 designation emphasizes the typical commercial retail uses currently permitted in the CG-1 designation but eliminates some of the heavier (and less desirable) uses that would not be appropriate within a business park setting. For example, the UBP-2 does not permit recreation camps and RV parks, funeral parlors, truck and RV rental agencies and commercial sports. No outside uses or storage is permitted.

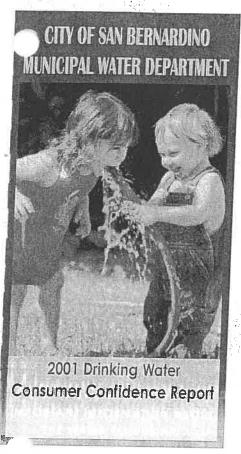

3. UBP-3

The UBP-3 designation emphasizes large, stand-alone uses which have a single freestanding building on each parcel. It would not permit strip commercial centers with several small tenants. Light manufacturing uses, including warehouses and research and development businesses, are permitted as long as all activities take place indoors and there is no outside storage. One of the primary criteria for structures within this designation is the visual impact to the Interstate freeway. MC 856 12/21/92

19.06.020 DEVELOPMENT PERMITTED AND CONDITIONALLY PERMITTED USES

Table 06.01 represents those uses in the commercial land use districts which are subject to a Development Permit (D) or Conditional Use Permit (C). MC 888 1/6/94

CITY OF SAN BERNARDINO MUNICIPAL WATER DEPARTMENT 2001 DRINKING WATER CONSUMER CONFIDENCE REPORT

We are pleased to report that all water served in 2001 by the City of San Bernardino Municipal Water Department met all water quality standards for domestic drinking water.

ABOUT THIS REPORT

State and Federal laws require all large water systems that serve domestic drinking water to provide their customers with an annual report that discloses whether or not the agency met all drinking water quality standards during the past year.

This report must disclose, in a manner that is understandable, which State Health Department maximum contaminant levels (MCLs) for chemical or mineral constituents were exceeded in the drinking water during the past year. If any MCLs were exceeded, the serving agency must state what treatment technology can be used to eliminate the contaminant(s). The serving agency is also required to tell their customers how much it will cost to install the treatment equipment, and how much it will increase the cost of their water.

The State of California recently passed legislation that established drinking water Public Health Goals (PHGs). The PHGs are not currently enforceable; however, we have included them in this report for your

PARA INFORMACION EN ESPAÑOL

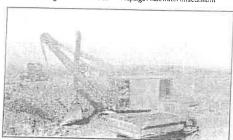

Este informe contiene informacion muy importante. Si no entiende su contenido, por favor hable con alguien que se lo pueda traducir. Si tiene alguna pregunta sobre este informe llama a nuestra oficina para obtener ayuda, (909) 384-5095.

VULNERABLE POPULATION

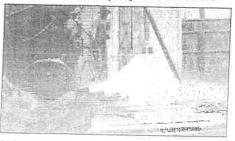

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons, such as persons with cancer undergoing chemotherapy, persons who have persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders; some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers.

USEPA/Centers for Disease Control guidelines on appropriate means to lessen the risk of infection by Cryptosportdium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling USEPAS Safe Drinking Water Hotline (800) 426-4791 or withing that Water least the contaminants and potential health effects can be obtained by calling the New Later. 4791 or visiting their Web site at www.epa.gov\safewater\hfuets.html

Water Department infrastructure improvement projects in 1928

ABOUT YOUR WATER DEPARTMENT

The City of San Bernardino Municipal Water Department delivers water to more than 151,000 residents of San Bernardino through 551 miles of water mains. The average person uses 330 gallons of water per day and peak day use climbs to 497 gallons per person every day.

We produce all of our water from 60 wells located throughout our 45square miles of water service area. We have more than 96 million gallons of water storage in 30 covered reservoirs. The reservoirs enable us to meet our peak hour water demand on hot summer days and to provide emergency and fire protection storage.

EMPLOYEE CERTIFICATION

To comply with State and Federal law, Water Production and Treatment Operators must possess and maintain valid State of California Department of Health Services certification in water treatment. Our operators and technicians obtain state certification of various grade levels (1-5) through a combination of course work in water science, years of work experience, and successfully passing a state-administered Water Treatment Operator examination. Our certified employees operate, monitor and regulate the wells, reservoirs and treatment plants that make up your water system 24hours-a-day, 7 -days-a week, to ensure the water you drink meets all State and Federal standards for domestic drinking water.

Water Distribution

We require the employees that repair and maintain the water facilities to obtain and maintain California Department of Health Services Water Distribution Operator Certification. Certification is obtained by successfully completing college-level course work in water science, work experience, and passing a state-administered Water Distribution Operator examination.

Water Quality

Our Water Quality Technicians must also possess and maintain valid State of California Department of Health Services certification in water treatment. They collect more than 6,000 water quality samples throughout the water system each year. Our state-certified contract laboratory conducts about 30,000 water analyses on those samples. We do this to ensure that all the water we serve meets or exceeds State and Federal standards.

Prederal standards.

Unless otherwise noted, the data presented in the graphs on the opposite, of this brochure is from testing done January 1-December 31, 2001. The State requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Some of the data, though representative of the water quality, is more than one year old

SOURCE WATER ASSESSMENT PROGRAM

The California Department of Health Services (DHS) Division of Drinking Water and Environmental Management has developed a program to assess the vulnerability of drinking water sources to contamination. This program, which is required by federal and state law, is called the Drinking Water Source Assessment and Protection (DWSAP) Program. Completion of drinking water source assessments for California's approximately 16,000 drinking water sources is required by May 2003.

May 2019.
The program has two primary elements: Assessment and Protection. The Assessment element consists of defining protection areas around water sources and conducting an inventory of possible contaminating activities. The Protection element consists of managing activities around water The Totection element consists of managing activities around water sources to prevent contamination and planning for contingencies.

The City of San Bernardino Municipal Water Department, in conjunction with the San Bernardino Valley Water Conservation District, has completed the source water assessment for all of our wells. A final report listing all of our findings will be available at the California Department of Health Services

Preventing contamination is the key to keeping water supplies safe. Once a drinking water supply becomes contaminated, a community is faced with the difficult and costly task of installing treatment facilities or locating an alternative source

WHAT YOU CAN DO TO PROTECT OUR WATER SUPPLY

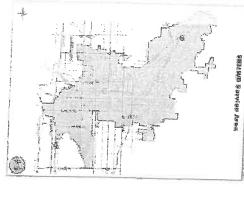

You can help protect our precious water supply by disposing of harmful household products and other toxic chemicals in the proper manner. Household hazardous waste includes cleaners, glues, soaps, pesticides, paints, fertilizers, medicines, chlorine, motor oil, and batteries. Never dumn these passes and the properties of the propertie dump these wastes down the drain, in the trash, or on the ground Instead, take them to a hazardous waste collection or recycling center. Whenever possible, cut down your use of toxic household products by switching to safer alternatives.

You can take your household hazardous waste to the San Bernardino County Fire Department Household Hazardous waste to the San Bernardino County Fire Department Household Hazardous Waste Program at 2824 East "W" Street, San Bernardino (former Norton Air Force Base). The Center is open Monday through Friday from 9 a.m. to 4 p.m. (use delivery entrance). For more information on household hazardous waste call (909) 382-5401

quality of the water in the watersheel. It is our bolief that this can be accomplished through the implementation of a comprehensive, enforceable 1990. The City of San Bernardino Municipal Water Department share the groundwater basin develop a long-term plan to protect the of our highest priorities is to make dwater basin operating plan

FUTURE WATER SUPPLY RELIABLITY ENHANCEMENTS

Ouring this past year, our enigeneeuing and administrative stiff successfully completed the environmental review process required for several projects that use entitled redurants of our Enhanced Reliability Plan. This critical and completened process gives the public, other agencies and public servee groups the chance to review and comment on our planned improvements,

Water spaten improvements are generally financed over a period of years and through a combination of water rates, new water servace acquisition of service fees and sate and feeten Igrants.

Figure 3 shows how each dollar paid in water rates and service fees it used to provide our encounters with hic high quality water they receive. While basic water rate differ with he sate of the water his used, versyone gets the first five "units" of water as part of his service. A unit of water is 7 48 weener readmant accounter of the service of additional unit costs the weener readmant accounter.

CHLORINE IN THE WATER

Why do we put chlorine in the water? Chlorine is an oxidizing agent that when added it water kills interouganisms such as betterfa and virtues. The State of California requires that we instinate a minimum readual of 0.2 parts per million (ppm) of chlorine in our water at all times to kill any potential microorganism(s).

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS 1 degree Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. EDR's definition of a site with an elevation equal to the target property includes a tolerance of +/- 10 feet. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property (by more than 10 feet). Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the

A review of the NPL list, as provided by EDR, and dated 04/22/2002 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

The 2,003-acre Norton AFB is located in San Bernardino County, California (40th Congressional District), approximately 65 miles east of Los Angeles. The site is bounded by the Santa Ana River to the south, and other adjacent areas are used for resid ential, industrial, and agricultural purposes. Operations at the site began in 1942, and the facility served as a major overhaul center for jet engines and the general repair of aircraft. The site formerly had the responsibility of providing mainte nance and logistics for liquid-fuel intercontinental ballistic missiles. There are more than 20 areas of contamination on the base including two landfills, six discharge areas, four chemical pits, a fire training area, a fuel spill area, a polychlor inated biphenyl (PCB) spill area, a chemical spill area, two waste storage areas, an underground storage area, and a low-level radioactive waste burial site. Soil contaminants included PCBs. trichloroethylene (TCE), petroleum hydrocarbons, metals su ch as lead and polycyclic aromatic hydrocarbons. An off-site groundwater plume (TCE) has impacted several municipal drinking water wells. Norton AFB was closed by the Department of Defense in March 1994, based on the legislative requirements in the Base Realignment and Closure Act of 1990. Consistent with the reuse alternatives identified in the Final Environmental Impact Statement, the Base is being redeveloped as an airport with mixed non-aviation, light industrial land use. The Base Closure team has worked closely with the City of Riverside to ensure that controls are in place to protect the public from exposure to contamination. The Air Force constructed a groundwater extraction and treatment remedy in 1994 and is cur rently operating two pump and treat systems which have treated over 90 million gallons of contaminated groundwater to date. Approximately 325 lbs. of TCE have been removed from the groundwater. Additionally, a soil vapor extraction system is curren tly operating and 6,247 lbs. of TCE have been removed from the contamination source area. Since 1994, the Air Force has excavated approximately 40,000 cubic yards of contaminated soils from various locations on the base which were then treated and d isposed of on-site, or transported to an off site disposal facility. The Air Force also closed numerous underground storage tanks and excavate and treated contaminated soil using bioremediation technology in 1996. An investigation of alleged radiol ogical contamination was conducted and results showed that elevated levels of radionuclides in groundwater were caused by naturally occurring uranium. In 1996, the Air Force removed a waste line contaminated with radium paint residue

and another indu strial waste line. A JP-4 aircraft fuel system which was not contaminated will be salvaged for future use by the airport. Norton Air Force Base is located in the city of San Bernardino, San Bernardino County, California, 55 miles east of Los Angeles and 60 miles west of Palm Springs. The main surface water features near the site are City Creek, Warm Creek, the Twin Cr eek flood control channel, and the Santa Ana River, which flows southwest along the southern base boundary. The aquifer system beneath the site is part of the Bunker Hill hydrologic basin. Drinking water is derived from the middle and lower water-b earing zones. The site is classified as residential and light industrial. Adjacent properties includes area of residences, light and heavy industry, and agriculture. The population of the county is 1,418,380. The site was activated in March 194 2 as an engine repair center for Air Force, U. S. Navy, and private industry aircraft. The site became a Military Airlift Command base in 1966. In 1968, the Aerospace Audiovisual Services established its headquarters at the base. The site also pro vided airlift and sustenance capabilities for air and combat units world-wide. Solvents, specifically TCE, were used in servicing aircraft from 1940s to the early 1980s. Former waste disposal, handling, and discharge practices have resulted in the contamination of soil and the upper water-bearing zone of a drinking water aquifer. In 1980, DOD issued a policy requiring identification of hazardous waste sites. In 1982, Norton issued the Phase I Records Search. In 1985, the site issued the Phase II Problem Confirmation Study. In June 1989, after various investigations, the A ir Force signed the Norton AFB Federal Facility Agreement. In November 1990, Norton AFB began the Central Base Area (CBA) OU Groundwater Investigation to define the extent of the plume. In 1991, through a removal action, TCE-contaminated soil was t reated onsite. In early 1993, the Air Force issued a draft RI, FS and proposed plan. In June 1992, the Air Force began a treatability test of the ground water pump and treat system. In 1993, Norton AFB issued the Final FS and Plan.

priority. 06/18/1998

05/22/2000

Event Date:

Event:

Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1) it appears to be technically infeasible or inappropriate (NF) or 2) there is a lack of technical information (IN). Reasons for this conclusion may be the

status of closure at the facility, the degree of risk, timing

considerations, the status of corrective action work at the facility, or

other administrative considerations.

Event Date:

06/18/1998

Event:

Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the El determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of

significant changes at the facility.

Event Date:

06/18/1998

Event:

Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the El determination, it has been determined that migration of contaminated groundwater is under control at the facility.

Specifically, this determination indicates that the migration of

contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the

facility.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Copyright 2023 by Environmental Data Resources, LLC. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, LLC, or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): Norton Air Force Base covers approximately 2,036 acres 58 miles east of Los Angeles near the City of San Bernardino, San Bernardino County, California. It is in a low-lying alluvial plain surroundedon the north and east by the San Bernardino Mountain Range. The base began operations in 1942 and has served as a major overhaul center for jet engines and the general repair of aircraft. Since 1962, the facility has served as a Military Airlift Command Base. In addition, Norton formerly had the responsibility for providing maintenance and logistics for liquid-fuel intercontinental ballistic missiles. Past ha ardous waste management practices may have contributed to existingcontamination problems throughout the base. The practices include burial of drums and other

unspecified materials; disposal of waste oils, solvents, and paint residues into landfills, unlined pits, ponds, and drying beds; storage in leaking underground tanks; and spills of AVGAS, oils, solvents, PCBs, and acidic plating solutions. Industrial solvents have been used extensively on the base. Unknown quantities of spent solvents were disposed of in several base landfills. A well on the base has been contaminated with trichloroethylene TCE). The well water is currently being used in a blended system and is sampled quarterly to ensure that TCE is below the California State action level. The water is used by approximately II,000 people who live and/or work on the base. Norton Air Force Base is participating in the Installation Restoration Program IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from ha ardous materials. The Air Force has completed Phase I records search). Phase II remedial investigation) is underway. Status July 22, 1987): In November 1986, the California Regional Water Quality Control Board issued a Cleanup and Abatement Order requiring Norton to clean up one on-base area, the Industrial Waste Water Treatment Plant Sludge Drying Beds. Phase II-Stage 2 of the IRP was completed in December 1986. It focusedon characteri ation of the contamination at 18 on-base areas. More than 22 areas have been identified to date. Additional areas will be studied in Stage 3, scheduled to begin in the fall of 1987. Within the boundaries of this Federal facility, there are areas subject to the Subtitle C corrective action authorities of the Resource Conservation and Recovery Act RCRA). However, no such areas were included in scoring this specific site. Therefore, this Federal facility site isbeing placed on the Federal section of the NPL under the NPL/RCRA policy announced on September 8, 1983 48 FR 40662).

Design Flow: Baseline Flow: 0

Reclamation: Not reported POTW: Not reported

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Violation Date: 04-06-2020

Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5,

Section(s) 25250.22

Violation Description: Failure to properly manage used oil and/or fuel filters in accordance

with the requirements.

Violation Notes: Returned to compliance on 04/20/2020. OBSERVATION: At the time of

inspection, observed (1) 55 gallon drum of used oil filters labeled "Drained Used Oil Filters" that was missing an accumulation start date on the label. Also observed metal and paper used oil filters combined in that same (1) 55 gallon drum that was labeled "Drained Used Oil Filters" and per records review, are all being managed as drained used oil filters. Also observed (1) bucket of used oil filters open when

not in use. CORRECTIVE ACTION: Properly label and manage all used oil filters. Non-metal paper filters must be stored, labeled and managed as hazardous waste. Submit photos demonstrating that both drained used

oil filters and non-metal paper filters are stored separately, closed

when not in use, and properly labeled.

6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month

if all of the following conditions are met: (1) The quantity of

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/23/2022. OBSERVATION: At the time of the

inspection, observed a 55-gallon drum storing waste paint that did not have an accumulation start date. Also observed approximately (40) 1-quart and 1-pint containers storing waste left over paint. While reviewing hazardous waste disposal records, observed that the last disposal of waste paint was 06/08/2021. Per Jesus Chagoya, this facility hasn't disposed of waste paint since the last pickup of 2021. CORRECTIVE ACTION: Contact a registered hazardous waste hauler and have them pick up the waste paint that was observed on site. Within 30 days send a copy of the hazardous waste disposal record to this Division. Complete and return the Certificate of Compliance form

indicating that this violation was corrected.

Violation Description: Failure to provide initial and annual training to all employees in

safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training

records for a minimum of three years.

Violation Notes: Returned to compliance on 06/23/2022. OBSERVATION: At the time of the

inspection, this facility was unable to provide any employee training records. Per Jesus Chagoya, employee training is conducted upon hire, but it is not documented. CORRECTIVE ACTION: Conduct and document employee training in regards to hazardous materials management and emergency response procedures. Within 30 days submit a copy of the employee training record to this Division as proof of corrective

action. Complete and return the Certificate of Compliance form indicating that this violation was corrected.

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General Violation Notes: Returned to compliance on 09/10/2014. Failure to label hazardous was

Returned to compliance on 09/10/2014. Failure to label hazardous waste containers (CCR 66262.34(f)(3)) All containers and tanks used to store a hazardous waste must be labeled or marked with the words hazardous waste; and include the following information: generator name and address, hazardous properties of the waste, composition and physical state of the waste, and the accumulation start date. Observed (1) 55 gallon drum of paint waste with missing hazardous waste label.

Violation corrected at the time of the inspection: paint waste drum was labeled properly with all the required information by operator.

Comments: BUILDING 658 CLEANUP OF SHALLOW SUBSTANCE TRICHLOROETHYLENE (TCE)

CONTAMINATED SOILS BY EX-SITU SOIL VAPOR EXTRATION. THIS ACTIVITY IS THE ONE OF THE SELECTED REMEDIES DESCRIBED IN THE NOVEMBER 24, 1993, CENTRAL BASE AREA OPERABLE UNIT RECORD OF DECISION (ROD), SECTION 9.2.2. THE NOVEMBER 18, 19 ENGINEERING DESIGN REPORT DESCRIBED THE REMEDIAL ACTIONS TO BE IMPLEMENTED AT BUILDING 658. THESE ACTIONS CONSIST OF: EXCAVATION OF TCE-CONTAMINATED SOIL AT BUILDING 658, AND REMOVAL OF A SUMP AND ASSOCIATION APPURTENANCES; TRANSPORT OF THE SOIL FROM BUILDING 658 TO A ON-BASE LOCATION; CONSTRUCTION OF AN EX-SITU TREATMENT CELL AND VAPOR ABATEMENT SYSTEM TO REMEDIATE THE

EXCAVATED SOIL USING VAPOR EXTRATION; OPERATION OF THE EX-SITU

TREATMENT SYSTEM UNTIL TCE CONCENTRATIONS ARE BELOW LEVELS PRESCRIBED

IN THE ROD; AND SITE RESTORATION, INCLUDING BACKFILL OF THE EXCAVATION AND RESURFACING OF THE DISTURBED AREA. RESULT OF THE

CONFIRMATION SAMPLING DID NOT DETECT ANY CONCENTRATIONS ABOVE THE

CLEANUP STANDARD (5UG/L IN LEACHATE ANALYZED BY THE TOXIC CHARACTERISTICS LEACHING PROCEDURE (TCP)). ORDER Installation

Restoration Program (IRP) Site 5 is the former fire training area. Soils at IRP Site 5 are contaminated with hydrocarbons, dioxins, metals, and polynuclear aromatic hydrocarbons (PAHs). The proposed

remedial actions will meet industrial reuse and groundwater

protection based Target Cleanup Goals (TCGs) and will consist of: -Soil Vapor Extraction (SVE), including activated carbon treatment of extracted vapors, to reduce hydrocarbon contam- ination in site soils to below groundwater protection based TCGs; - Excavation and offsite

landfill disposal of soils contain- ing dioxin concentrations in excess of industrial reuse TCGs at a licensed Subtitle C disposal facility permitted to accept dioxin-contaminated soils; - Excavation, stabilization, and transport to IRP Site 2 Landfill (to be used as

fill material for landfill closure cap) of metal- and

PAH-contaminated soil above the indus- trial reuse TCGs; - Excavation and transport to IRP Site 2 (without stabil- ization), of metal- and PAH-contaminated soils above the industrial reuse TCGs and classified

as California nonhazardous. VOLUME TREATED, STABILIZED, OR DISPOSED:

Comments: RA - SITE 8: The removal actions involved the excavation and disposal

of 1,553 cubic yards of contaminated soil either to an offsite disposal facility, if hazardous, or to IRP Site 2. Verification

sampling was conducted to document that target cleanup goals (TCGS) identified in the Final Action Memoran- dum were achieved. Site restoration was also performed. Confirmation surface soil samples were collected from the excavations to assess if cleanup goals had been attained, in accordance with the Work Plan. RA - AOC37: The removal actions involved the excavation and disposal of 8,925 cubic yards of contaminated soil either to an offsite disposal facility, if hazardous, or to IRP Site 2. Verification sampling was conducted to document that target cleanup goals (TCGS) identified in the Final Action Memoran- dum were achieved. Site restoration was also performed. Confirmation surface soil samples were collected from the excavations to assess if cleanup goals had been attained, in

accordance with the Work Plan. RA - AOC38: The removal actions involved the excavation and disposal of 1,603 cubic yards of contaminated soil either to an offsite disposal facility, if

hazardous, or to IRP Site 2. Verification sampling was conducted to document that target cleanup goals (TCGS) identified in the Final Action Memoran- dum were achieved. Site restoration was also performed. Confirmation surface soil samples were collected from the

excavations to assess if cleanup goals had been attained, in

accordance with the Work Plan.

Completed Document Type: Removal Action Completion Report

Completed Date: 12/29/1997

Comments: RA - SITE1: A removal action was implemented as a result of an

Actrion Memorandum completed in March 1996. the removal action was implemented in two phases between November 1996 and July 1997. A total of approximately 20,900 tons of soils exceeding cleanup levels were excavated and disposed of off- base at an appropriate facility. Approximately 3,800 square feet of material above the cleanup levels were left in place as they were not extractable during the removal effort. The excavation was subsequently back filled and the graded to its original levels. In addition, three new monitoring wells were installed for monitoring purposes. A Long Term Ground- water Monitoring plan will be implemented as a result of leaving matreials

in place.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report

Completed Date: 01/14/2005

Comments: The action cosisted of demolishing 11 metal sheds and their floors,

removing the top foot of soil (440 cubic yards), and taking

confirmation samples. The calculated human health risk is 1.1x10-5 excess cancer risk and 0.02 in hazard index. The site may be suitable

for unrestricted use.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Removal Action Completion Report

Completed Date: 01/26/2005

Comments: The Air Force excavated and disposed 560 cubic yards of soil soil

contaminated with metal and petroleum hydrocarbons. The confirmation samples indicate no contaminants of concern exceeding the clean up

goals. The site may be suitable for unrestricted use.

Completed Area Name: BASEWIDE Completed Sub Area Name: STE10

Completed Document Type: Remedial Action Plan

Completed Date: 11/20/2003

Comments: RAP - SITE 10 (Removal action at Site 10 and 12): Following the

finalization of Basewide Feasibility Study Report, the AF issued this document for conducting soil removal at these sites to accelerate cleanup actions at the former Norton AFB. Because of the endangered species, the AF will conduct formal consultation with US Fish and Wildlife and obtain permits from California Dept. of Fish and Game. The detected contamination is within four feet of ground surface, the AF will restrict depth of excavation accordingly. Also, because part of Site 10 is now potions of a golf course, part of the golf course will be closed during the removal action. Excavated soil will be profiled and sent to a regulated landfill. Once the removal action is complete, no further remedial actions are anticipated at these sites.

Completed Area Name: BASEWIDE Completed Sub Area Name: STE10

Completed Document Type: *Action Memorandum (if <\$1M)

Completed Date: 01/27/2004

Comments: RAW - STE10: Because of the San Bernadino Kangaroo Rat, the Air Force

will trap and relocate the animals and set up fences to prevent burrowing animals from crawling back into the excavation area during removal. The Air Force will remove the top two feet of soil and then depending on the presence of ash layers and fieldscreening sampling

results to determine whether additional two feet of soil will be removed or not. After excavation, the AF will take confirmation soil samples and analyze them for dioxins/furans and metals. If excessive contamination remains, excavation will resume. Once the removal action is complete, the AF will restore the site to pre-excavation

conditions.

Completed Document Type: Removal Action Completion Report

Completed Date: 06/09/1999

Comments: RA - SAR: Between July and October 1997 Earth Tech, a remedial

contractor hired by the Air Force excavated, treated and disposed of lead contaminated soils down to 2 feet bgs at the base of the SAR and

4 feet into the impact berm. A total of 11,478 tons of soil was

excavated and processed at IRP Site 2. Of this amount 210 tons were bullet fragments and small rocks which were classified as RCRA Hazardous waste and were disposed of offsite at Laidlaw Environmental Services landfill in Westmoreland, California. Approximately 2,100 tons were stabilized by adding 15% Portland Cement and processing through a pug mill. None of the stabilized soil met the treatment standard so all of it was sent offsite to Browning Ferris Industries (BFI) landfill in La Paz, Arizona as a California hazardous, non-RCRA

waste.

Completed Date: 09/29/2005

Comments: DTSC concurred with the Basewide ROD, which addresses 22 Installation

Restoration Program (IRP) sites, 73 areas of concern (AOC), the Small Arms Range, Building 752, and groundwater contamination in the Northeast Base Area. The ROD will enable properties at Norton Air Force Base to be transferred to the redevelopment authorities. The closed portions of the base are planned for air cargo, warehouses, commercial, and other industrial uses. The selected remedy for Site 2, a former landfill, is operation and maintenance of the landfill cover and gas extraction system. Excavation and off-site disposal was selected for Sites 7, 10, 17, Building 752, and AOC 33. In addition, institutional controls were selected for Sites 2, 5, 19, Small Arms

Comments: The Air Force removed 19,000 cubic yards of dioxin contaminated soil.

Of this soil, 2,700 cubic yards were classified as California hazardous wastes and disposed at a permitted hazardous waste facility. The remaining soil was transported to a nearby city disposal facility to be used as landfill cover. The Air Force took 18 confirmation soil samples and calculated the post-removal risk to human health and sensitive burrowing animals. The results indicated that the combined child/adult excess cancer risk is 1.7x10-6. The non cancer hazard index for children is 1.2x10-2 at the golf course area and 3.3x10-2 at the habitat area. For adults, the non-cancer hazard index for the golf course portion is 3.8x10-4 and 1.1x10-2 for the

habitat area

Completed Document Type: Removal Action Completion Report

Completed Date: 10/29/1998

Comments: RA - AOC70: The Removal Action goal for AOC 70 was to excavate and

remove soil containing contaminants of concern: PCBs, benzo(a pyrene, benzo(b)flouranthene, benzo(k)-flouranthene, TPH-diesel and

TPH-gasoline at depths up to 10 feet. Approximately 1632 cubic yards

of material was excavated, treated and disposed off- site.

Confirmation samples were then taken, analyzed and the determination was made that the objectives were met. The area was then backfilled with clean fill and graded. 'RA - IRP10: The Removal Action goal for IRP Site 10 was to excavate and remove soil containing contaminants of concern: lead arsenic and chromium at depths up to three feet or one foot below the ash layer, as this was the zone of ecological risk. Approx. 224 cubic yards of non-hazardous material was disposed of at the base landfill, IRP Site 2 and approximately 116 cubic yards of potentially hazardous waste were excavated and disposed off site. Confirmation samples were then taken, analyzed and the determination was made that the objectives were met. The area was then

backfilled with clean fill and graded.

Background Info: This site is a U.S. Air Force Milit

This site is a U.S. Air Force Military Command Base which began o perations in 1942. Norton's original function was to maintain an d repair aircraft. After World War II, the oper- ations were exp anded by providing maintenance, storage, and logistic support for various missile programs. Norton became a Military Airlift Wing in 1966. In 1968, the Aero- space Audiovisual Services establis hed its headquarters at Norton. Past waste management practices associated with base activities include drum burial, hazardous wa ste dispo- sal in unlined pits, storage of leaking drums, leakage of underground storage tanks, and materials spills. The practic es have resulted in significant soil and groundwater contaminatio

Direction Distance Elevation

EDR ID Number

n. Past disposal practices onsite have caused the release of larg e volumes of fuels, solvents, and luminescent dials and heavy met als to the soil and groundwater. Monitoring wells on the base ar e contaminated with methylene chloride, toluene, benzene and tric hloroethene (TCE). Chemicals found in the soil onsite include oi I and grease, hexavalent chromium, xylene and polychlorinated bip henyls (PCBs). There is a potential for direct worker contact wit h contami- nated onsite soils. Contaminants have migrated into th e soil and groundwater beneath the Base. The City of Riverside's drinking water supply wells are within 500 feet of waste disposa I onsite. Domestic wells owned by the City showed TCE contaminati on and levels of radionuclides above the maximum contaminant leve The site was placed on the NPL on July 22, 1987. On June 29, 1989, EPA, DTSC, and DoD entered into a Federal Facility Agre ement (FFA) to remediate contamination under EPA over- sight. DT SC will support EPA's oversight of the DoD's reme-dial activitie s. The FFA provides funding and will reim- burse the State for a Il reasonable costs incurred during oversight of the IRP activiti es. The FFA has established a procedural framework and schedule for developing, implement- ing, and monitoring appropriate respon se actions at the site. The State has also entered into a Defens e/State Memo- randum of Agreement (DSMOA) with DoD which addresse s State reimbursement.

Higher FEDERAL FACILITY SITE CLEANUP WORKPLAN Reponsible Party:

Project Revenue Source Company: Not reported Actual: Project Revenue Source Addr: Not reported 1138 ft. Project Revenue Source City, St, Zip: Not reported

> Project Revenue Source Desc: DHS will either enter into an interagency agreement with EPA and DOD or will

issue an order to DOD. DHS has budgeted \$100,000 for oversight and monitoring

of DOD's activities. DHS will seek cost recovery for its direct costs plus

staff costs and overhead related to the project.

Site Description: This site is a U.S. Air Force Military Command Base which began operations in

1942. Past waste management practices associated with base activities included drum burial, hazardous waste disposal in unlined pits, storage of leaking

drums, leakage of underground storage tanks, and materials spills. The

Direction Distance

N/A

SCH

EDR ID Number

practices have resulted in significant soil and ground water contamination. Hazardous Waste Desc: Past disposal practices onsite have caused the release of large volumes of

fuels, solvents and heavy metals to the soil and ground water. Monitoring wells on the base are contaminated with methylene chloride, toluene, benzene and trichloroethene (TCE). Chemicals found in the soil onsite include oil and grease, hexavalent chromium, xylene and polychlorinated biphenyls (PCBs).

Threat To Public Health & Env: Contaminants have migrated into soil and ground water beneath the Base. Major

public drinking supply wells are within 500 feet of waste disposal areas onsite. Drinking water supplies are threatened. In addition, there is a potential for direct worker contact with contaminated soils onsite.

Site Activity Status: The site is currently in Phase II of a four phase installation restoration

program (IRP). The IRP was initiated by the Department of Defense (DOD). The site has been proposed for inclusion on the NPL. EPA and DOD are negotiating and agreement to remediate contamination under EPA oversight. DHS will monitor

the DOD's remedial activities.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

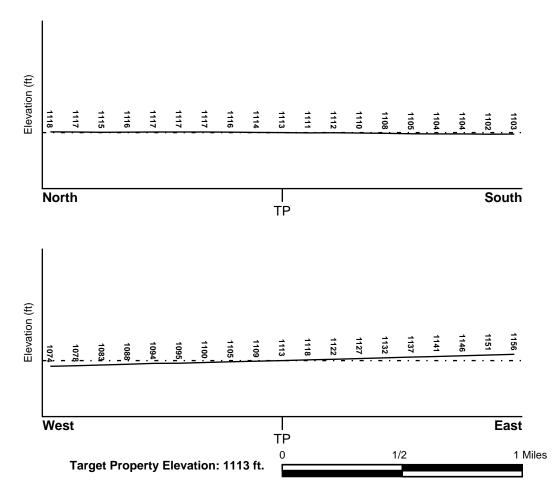

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION
MAP ID FROM TP GROUNDWATER FLOW
Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

Soil Map ID: 2

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to

> 0 inches

excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Depth to Watertable Min:

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

Soil Map ID: 3

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

APPENDIX D Regulatory Documentation

From: Sonia Cisneros Ortiz

Sent: Friday, March 17, 2023 1:20 PM bhughes@cityofhighland.org

Subject: City of Highland Fire Department - Records Request

Attachments: PRR-form-PDF.pdf

Hi Betty,

Ninyo & Moore is currently conducting work for a client with interests in Highland, California. Attached is a records request form for the City of Highland Fire Department records for the following Site APN:

APN: 1192-211-01, Highland, CA 92410 (no associated site address)

Thank you,

Sonia Cisneros Ortiz

Project Environmental Scientist

Ninyo & Moore | Geotechnical & Environmental Sciences Consultants

475 Goddard, Suite 200 | Irvine, CA 92618 949.753.7070 (**x12205**) | 949.689.2146 (Cell)

Public Records Act Request Form

The California Public Records Act (Government Code §6250 et. Seq.) applies to writings in city files "containing information relating to the conduct of the public's business prepared, owned, used or retained by any state or local agency regardless of physical form or characteristics." Please note that the City is not required by law to create a list from an existing record or create a new record.

Requests will be processed in compliance with the Public Records Act California Government Code §6253. Upon a request for a copy or inspection of records, the City shall, within 10 days from receipt of the request, determine whether the request, in whole or in part, will be made available and shall promptly notify the person making the request of the determination and the reasons, therefore. In certain circumstances, the time limit prescribed in this section may be extended by written notice to the person making the request, setting forth the reasons for the extension and the date on which a determination is expected to be dispatched. Please note that you will be contacted when the information is available for pickup and/or inspection, or the information will be emailed to you at your request.

Record(s) Requested

Describe the record(s) you are requesting. Please be as specific as possible and include enough detail to assist staff in locating the record(s). *Example: Permits for address 123 Any Street. Include relevant dates or date range.* Print legibly or type all information.

••	
Request for City of Highland's Fire Department records pert reports, clarifiers, septic tanks, and notices of violation regar California (no associated site address).	
Please fill out this form completely with as much detail as poss This form is to be submitted to the City Clerk's office or you can Requestor Information

Subject: RE: City of Highland Fire Department - Records Request

Good morning:

The City has no responsive records pertaining to Fire as those records are not maintained by the City of Highland. I suggest that you contact Cal Fire as it is their jurisdiction. Below is a link to their website.

California Public Records | CAL FIRE

Additionally, the City has no records responsive to septic tanks. I suggest you contact East Valley Water District as they are the jurisdiction that provides water and sewer service in the City of Highland.

APN: 1192-211-01

Dear Ms. Ortiz:

On March 17, 2023, the Department of Toxic Substances Control (DTSC) received your email of the same date requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the site referenced above.

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 818-717-6521 or via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Robert Hardison

Records Mgmt. Asst. Coordinator

Good morning,

Unfortunately, we do not use APN numbers or cross streets to maintain our files. We only use facility names and/or physical address numbers to locate files. If you can provide a numerical address or facility name, we can carry out your request.

If we can be of further assistance, please do not hesitate to contact us again.

Thank you, File Review Desk 3737 Main St. Suite 500 Riverside, CA 92501

REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE I CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT

The main focus of a REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE I CERTIFIED HAZARDOUS MATERIALS. RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardine County I are Protection District (SECIPD) any record relating to contamination or reports of spills at a particular site. An Environmental Phase I Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by SBCFPD, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, which can be a useful tool in providing a natery of compliance or non-compliance.

Once SBCFPD has completed its records season, an Environmental Phase | Certified Hazardous Materials Records Search Finding Report will be prepared and issued. Such report will detail all SBCFPD records associated with a particular site by type, date, incation, and status (where applicable). All files identified in an Environmental Phase | Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.

If the completed records search reveals no SBCFPD record of hazardous material activity at the site, an Environmental Phase Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found. Ist another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5.11 Ave. & Muliii St.), and/or least description. If possible, please attach a map to this request form.

DISCLAIMER: While all attempts are made to provide accurate, current, and reliable information. San Bernardino County Fire Protection District (further referred to as SBDFPD) recognizes the possibility of human error. Therefore, SBCFPD, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report and provides an Environmental Audit Phase 1 Certified Hazardons Materials Records Search Finding Report "as is," with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall SBCFPD be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. SBCFPD therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

RELEASE AND INDEMNIFICATION: In consideration for the issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge SBCFPD, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with SBCFPD's issuance of an Environmental Audit Phase I Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of SBCFPD, its officers, employees, agents and volunteers.

I am familiar with the previsions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from SBCFPD's issuance of an Environmental Audit Phase I Certified Hazardous Materials Records Search Finding Report,

In further consideration for SBCFPD's issuance of an Environmental Audit Phase I Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless SBCFPD, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with SBCFPD's issuance of an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report brought by any third party.

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR AN ENVIRONMENTAL AUDIT PHASE I CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request an Environmental Audit Phase 1 Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

I am including payment of the initial fee of \$136.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Protection District, or by credit card payment taken over the phone. I understand that research exceeding one hour will be billed at the rate of \$136.00 for each additional hour spent by SBCFPD in completing this request.

I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

SUBJECT: CERTIFIED RECORD SEARCH FINDINGS

APN #: 1192-211-01-0000 HIGHLAND, CALIFORNIA

This is to confirm that the OFM Hazardous Materials Division (HMD) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that <u>no records</u> exist for the above site description(s).

Records maintained by OFM-HMD date back to mid-1980's. Records searched include:

- Facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage
 tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities,
 and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted
 facility actions
- Logs of permits issued for the removal, installation, and/or modification of underground storage tanks
- Records and databases pertaining to illicit dumping, spill reports, release notifications, and complaints
- Incidents responded to by the hazardous materials emergency response team
- Sites undergoing remediation for contaminated soil and/or groundwater

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

APPENDIX F Vapor Encroachment Screening

		r Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, oncern Test (COC), and (3) a Critical Distance Test [1].	
(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (including the site)?			
Yes	No	If \emph{No} , then screening for a VEC is complete and no VEC $\emph{currently}$ exists, go to #4. If \emph{Yes} , then:	
(2) Chemicals of Concern Test : Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?			
☐ Yes ☐	No	If No , then screening for a VEC is complete and no VEC <i>currently</i> exists, go to #4. If Yes , then:	
	e(s) ma	nce Test*: A plume test to determine whether or not COC in the contaminate be within the critical distance. (3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)? (3b) If No , then a VEC cannot be ruled out; check Yes in #4 below indicating it is likely a VEC exists. If Yes , then:	
☐ Yes ☐		(3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If Yes , then check Yes in #4 below indicating it is likely a VEC exists. (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If Yes , then check Yes in #4 below indicating it is likely a VEC exists.	
planned stri than 30 fee exists bene greater than troleum hyd exists bene	ucture t for diseath the n or equivalent tractions the		
(4) Is it like ☐ Yes ☐	-	It a VEC currently exists beneath the site? If No, then the VEC screening is complete and no further investigation is recommended at this time. If Yes, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.	
[1] Based on guidance presented in the ASTM E 2600-10 Standard.

Sonia Cisneros Ortiz

Project Environmental Scientist

EDUCATIONB. A., Environmental Analysis and Design, University of California, Irvine, 1999

REGISTRATIONS/ CERTIFICATIONS

OSHA HAZWOPER with annual refreshers OSHA Construction Safety OSHA Defensive Driving OSHA Fall Protection OSHA Field Work Safety OSHA Office Organomics OSHA Valley Fever

PROFESSIONAL AFFILIATIONS

National Groundwater Association

Ms. Cisneros Ortiz is a Project Environmental Scientist for Ninyo & Moore. Ms. Cisneros Ortiz has over 19 years' experience supporting project managers on small to large-scale groundwater monitoring and remediation project sites in southern California under regulatory oversight of the Regional Water Quality Control Board (RWQCB) and Department of Toxic Substance Control (DTSC). Ms. Cisneros Ortiz has years' experience performing environmental remediation, groundwater and soil sampling, well installation, geological logging, conducting environmental site assessments (ESAs) and preparing technical reports for investigations.

EXPERIENCE

Phase I ESAs – Various Sites, Southern California: Project Environmental Scientist, performed several Phase I ESAs of commercial, industrial, and residential properties throughout Southern California for various financial institutions, land developers, and government agencies. The Phase I ESAs were performed in accordance with the ASTM International (ASTM), Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Designation E1527-13 and Practices for All Appropriate Inquires (AAI) as set forth in the Code of Federal Regulations (CFR), Title 40, Part 312. The Phase I ESAs also included reviewing regulatory files of various government agencies to evaluate the extent and type of impacts at sites, conducted site walks and owner/operator interviews, and preparing reports.

Norwalk-La Mirada Unified School District, Preliminary Environmental Assessment, La Mirada, California: Ninyo & Moore collected soil samples using hand auger and direct push methods to assess lead and pesticide contamination from lead-based paint and termiticides of historical small structures on the southern portion of La Mirada High School, and pesticide or herbicide contamination from former agricultural land use and fill area along the northwestern and southern portions of the site. Sample results were used to determine the extent of contamination and potential associated health risks to field personnel participating in planned development of the baseball, softball, and practice fields at La Mirada High School. Tasks performed included preparation of the preliminary environmental assessment (PEA) report.

City of Los Angeles, Bureau of Sanitation, Groundwater Monitoring and Reporting, Los Angeles, California: Project Environmental Scientist for the Los Angeles Bureau of Sanitation Northeast Interceptor Sewer (NEIS) project. Project involved remediation of hydrocarbon-affected soil gas, soil and groundwater at a former industrial plastic coating facility. Several site investigations have detected volatile organic compounds (VOCs), mainly tetrachloroethene (PCE) and trichloroethene (TCE) in soil gas, soil, and groundwater samples collect at the site. Soil and soil gas remediation was completed at the site in 2017. A groundwater monitoring and reporting program is currently being implemented at the site. Tasks performed consisted of preparation and review of the second semi-annual 2021 groundwater monitoring report, including QA/QC of laboratory-reported groundwater analytical results, tabulation of groundwater elevation data and laboratory analytical results, preparation of report figures, and data evaluation and interpretation.

City of Santa Ana, Warner Avenue Widening Project, Santa Ana, California: Ninyo & Moore provided environmental oversight services for petroleum hydrocarbonimpacted soil encountered in the vicinity of the former Arco Station#5147 on the

Sonia Cisneros Ortiz

Project Environmental Scientist

northeast corner of Warner Avenue and Main Street during trenching for installation of storm drains along Warner Avenue. Ninyo & Moore field personnel used a photo-ionization detector (PID) to monitor the VOC concentrations during excavation, stockpiling, handling, and direct-loading into trucks based on VOC concentrations, in accordance with the South Coast Air Quality Management District (SCAQMD) Rule 1166 Compliance Plan. Tasks performed consisted of preparation of a Rule 1166 VOC Monitoring Report documenting VOC monitoring results and activities performed during excavation work for the Warner Avenue Widening Project.

BBK, Indoor Air Sampling, Corona, California: Project Environmental Scientist, prepared an Indoor Air Sampling report for a Limited Phase II ESA performed at a 99Cents Only Stores in Corona, California. Indoor air sampling activities were performed in the storage room at the 99Cents Only Stores to evaluate current indoor air conditions within the storage room related to selected VOC concentrations. Tasks performed consisted of preparation of an Indoor Air Sampling report, including QA/QC and tabulation of air sample analytical results, preparation of report figures, and data evaluation and interpretation.

MarMar Group, Indoor Air Sampling, Los Angeles, California: Project Environmental Scientist, prepared an Indoor Air Sampling report for indoor air sampling activities performed at Factor's Famous Deli in Los Angeles, California. Indoor air sampling activities were performed to evaluate current indoor air conditions within the building related to selected VOC concentrations from potential releases from a former adjoining dry cleaner. Tasks performed consisted of preparation of an Indoor Air Sampling report, including QA/QC and tabulation of air sample analytical results, preparation of report figures, and data evaluation and interpretation.

California Department of Food and Agriculture, Blythe Border Protection Station, Blythe, California: Ninyo and Moore field personnel collected soil samples, using hand auger methods, along unpaved shoulders of the site to assess agricultural and aerially deposited lead (ADL) impacts of soil from years of contamination from leaded gasoline. Samples were also collected of traffic paint striping on roadways within the project site to assess the likely presence of chromium and/or lead. Sample results were used to determine the waste characterization for proper disposal and handling of road and highway improvements. Tasks performed consisted of preparation of an ADL and Limited Site Investigation report, including QA/QC, tabulation of soil and traffic stripe sample analytical results, preparation of report figures, data validation, and data evaluation and interpretation.

HMA, Metropolitan Water District of Southern California, Regional Recycled Water Program, Los Angeles County, California: Project Environmental Scientist, performed a Hazardous Materials Assessment (HMA) for the Metropolitan Water District of Southern California, Regional Recycled Water Program. The site was comprised of various roadways, freeways, recreational parks, easements, nurseries, an electrical substation, Dominguez Channel, Compton Creek, Los Angeles River, San Gabriel River, San Gabriel Coastal Basin Spreading Grounds, San Jose Creek, commercial properties, industrial facilities, Sanitation Districts of Los Angeles County, the San Gabriel Canyon, and railroad rights-of-way (ROWs). Areas of recognized or potential environmental concern identified during the course of the HMA included one on-site Spills, Leaks, Investigation, and Cleanup (SLIC) case, three adjacent off-site leaking underground storage tank (LUST) cases, the presence of dichlorodiphenyltrichloroethane (DDT), chlorobenzene, and pCBSA-impacted surface water in a drainage channel, the Dominguez Channel, originating from an upgradient Superfund site, two Superfund site groundwater plumes extending beneath the site, areas of the San Gabriel Valley (Area 2) Baldwin Park Operable Unit, the presence of "areas of concern" on-site, which contain VOC contamination at or above the California Maximum Contaminant Levels (MCLs), the presence of the site within the administrative boundaries of several oil fields, the presence of an oil well on an adjoining property to the west of the site, the presence of hazardous liquid pipelines and gas transmission lines on-site, the potential presence of residual chemicals from the railroad ROWs on or adjoining the site, and the presence of aboveground storage tanks (ASTs) containing petroleum within an adjacent refinery located north of the site. Ninyo & Moore proposed mitigation measures to render these environmental concerns and impacts to the site less than significant for the identified CEQA thresholds. Mitigation measures to be implemented included the preparation of a Hazardous Materials Contingency Plan addressing the potential for discovery of unidentified USTs, hazardous materials, petroleum hydrocarbons, or hazardous or solid wastes encountered during construction, the disposal of all hazardous or solid wastes and debris encountered or generated during construction and demolition activities in accordance with all federal, state, and local laws and regulations, and the preparation and implementation of a Soil Management Plan during all phases of construction.

As a Senior Project Engineer for Ninyo & Moore, Mr. Fee manages and leads teams that perform the acquisition, documentation, and dissemination of data related to all phases of environmental investigations. Mr. Fee prepares complex reports such as Phase I/II Environmental Site Assessments, Groundwater Monitoring Reports, Remedial Work Plans, and Soil Management Plans; conducts investigations of subsurface contamination, including mapping, and logging of exploratory borings; preparation of correspondence, permit requests, data tables, and quality assurance/ quality control procedures; interfaces with regulatory agencies; and provides technical support services for a variety of construction, site investigation, and remediation projects.

Dennis has a solid understanding of local, state, and federal regulatory requirements and contaminant action levels and has managed various projects in a number of sectors that meet these requirements. Dennis is committed to environmental engineering, compliance, and sustainability and is a respected environmental consultant and technical expert.

EXPERIENCE

Los Angeles World Airports, Leaking Underground Storage Tank (UST) Facility, Los Angeles, California: Mr. Fee provided services for this project that included reviewing site historical information of previous environmental assessments, reviewing analytical data for potential off-site and upgradient groundwater impacts, conducting groundwater well redevelopment and repairs, performing soil vapor sampling and quarterly groundwater monitoring, and developing a health risk assessment and conceptual site model. Soil vapor extraction was also initiated at this facility to remediate gasoline contamination between deep confining soil layers. The primary objective was to strategize and develop a pathway to closure to demonstrate that environmental site conditions meet or exceed the Low-Threat Underground Storage Tank Case Closure Policy criteria in accordance with the State Water Resources Control Board's 2012 resolution.

City of Downey/Spartan Lacquer, Soil Vapor Extraction, Downey, California: Mr. Fee provided environmental consulting services for a former paint and lacquer manufacturing facility that contained18 chemical USTs. Various contaminants were present in soil, soil vapor, and groundwater, primarily volatile organic compounds (VOCs) and gasoline range total petroleum hydrocarbons (TPH). Mr. Fee oversaw the installation of soil vapor monitoring wells; conducted operation, maintenance, and monitoring activities for a permitted SVE treatment system; conducted groundwater monitoring and sampling; and prepared quarterly monitoring reports submitted to the Regional Water Quality Control Board (RWQCB). The elevated VOC and TPH gasoline concentrations resulted in a high rate of carbon usage, so alternative options were evaluated. A catalytic-oxidation treatment system replaced the previous granular activated carbon treatment system due to the high influent VOC concentrations and the relatively low levels of chlorinated compounds in the influent.

San Bernardino International Airport, Hazardous Material Business Plan and Compliance in California Environmental Report System (CERS), San Bernardino, CA: Mr. Fee assisted the San Bernardino International Airport with compliance for its

Dennis Fee

Senior Project Engineer

hazardous materials business plan within the CERS. Dennis performed duties that included conducting site reconnaissance of the airport, collecting inventory of hazardous material at the site and storage tanks, checking hazardous material mitigation equipment, creating figures displaying the site layout and areas of interest, compiling data in the CERS database, and achieving regulatory acceptance with the local Certified Unified Program Agency.

Port of Los Angeles, Berths 171-173, Groundwater Monitoring, Wilmington, California: Mr. Fee conducted groundwater well sampling and surface water sampling in accordance with general waste discharge requirements (WDR) at a complex remediation site. The sampling activities followed the application of nutrients and Oxygen Release Compound (ORC®) within the soil excavations for the enhanced remediation of volatile organic compounds (VOCs) and total petroleum hydrocarbons (TPH) in accordance with the RWQCB Monitoring and Reporting Program. As part of the sampling program, 18 groundwater monitoring wells were sampled for chemical analysis on a quarterly basis in accordance with the WDR permit. In addition, surface water samples were collected from three locations in the East Basin Channel to demonstrate that VOCs, TPH, nutrients, and ORC® compounds were not migrating off site into harbor waters.

Metropolitan Water District, Industrial Activity Monitoring, Yorba Linda, California: Mr. Fee managed the air and dust monitoring and health and safety oversight in coordination with a certified industrial hygienist (CIH) during the mitigation of suspected polychlorinated biphenyl (PCB) contaminated caulking and concrete in drinking water basins. Remediation entailed the removal of contaminated caulking followed by the precise grinding of concrete 1 inch beyond the caulking. Contaminated dust and debris were immediately encapsulated in HEPA-equipped shop vacs. Select workers in the exclusion zone were equipped with personal air sampling pumps, and filter samples were sent to analytical labs daily for analysis of PCBs and silicate to determine health exposure risks to workers. Confirmation samples of concrete were also collected to ensure migration of PCBs did not occur into surrounding areas and additional abatement was not needed. A summary report was prepared which detailed the project scope, engineering controls, personal protective equipment, and other health and safety protocols, analytical results of dust, concrete, and basin water sampling, and implications, and recommendations for remediation in future water basins.

City of Santa Ana, Berths ARCO Limited Subsurface Investigation, Santa Ana, California: Mr. Fee conducted an LSI for a gasoline facility within the limits of a street improvement project. The project site was an ARCO gasoline service station (owned by Tesoro) that had an active leaking underground storage tank (LUST) case with the RWQCB, Santa Ana Region. The purpose of the LSI was to understand the nature and extent of contaminants at the site in conjunction with historical data, and to estimate potential threats to on-site workers during future roadwork in the area. In preparation for LSI fieldwork, Dennis prepared a work plan and health and safety plan in accordance with Tesoro's environmental remediation project requirements. Dennis oversaw the advancement of 5 soil borings at the site and engaged the services of geophysical surveyors to assess the subsurface for anomalies such as buried USTs, drums, or backfilled pits. Based on the results of the activities, Dennis recommended continued groundwater monitoring under the directive of the Low-Threat Underground Storage Tank Case Closure Policy. Dennis also recommended that monitoring for VOCs be conducted in accordance with South Coast Air Quality Management District Rule 1166 during roadwork activities and construction of storm water catch basins at the site.

NorthStar, Multiple Phase I Reports, San Pedro, California: Mr. Fee prepared several Phase I reports for an oil and gas company to assist in property evaluations, transactions, and release of liability. The facilities in question, two in San Pedro and one in Paramount, had complex histories that included on-site petroleum storage and off-site contamination from TPH and VOC impacted groundwater plumes. Mr. Fee spent many hours reviewing UST inspection records, building department records, stormwater discharge permits, the EDR radius report of potential facilities of concern in the site vicinity, aerial photographs, Sanborn fire insurance maps, and environmental reports available on websites such as GeoTracker and EnviroStor. Mr. Fee was able to piece together the site histories through a review of these databases and developed a list of recognized environmental conditions (RECs) that were used by the client for property transaction purposes.

County of Los Angeles, As-Needed Environmental Services, Los Angeles, California: Mr. Fee assisted on various environmental projects for this multiple-award, on-call contract at various sites throughout Los Angeles County.. Projects included evaluation of asbestos, lead, and mold; underground storage tanks (USTs); hazardous materials and wastes; former landfills; and other contaminants in/on building materials, soil, groundwater, and air. Typical projects included the preparation of Phase I and II ESAs; hazardous material assessments; and plans, drawings, and cost estimates for abatement, remediation, and disposal of contaminants. Many projects included providing bidding/construction support, abatement monitoring, and site closures.

Jeff Aguilar, PG Principal Geologist

PROFESSIONAL AFFILIATIONS

South Coast Geological Society

As a Principal Geologist, Mr. Jeff Aguilar has extensive experience as an environmental geologist and project manager and is skilled in portfolio and project management, regulatory and client interactions, technical report writing and data analysis. His areas of expertise include developing investigative scopes of work, cost proposals; permitting; feasibility studies; remedial design and implementation; subcontractor management; operation of treatment systems; compliance monitoring; reporting and regulatory negotiations. He is knowledgeable in the regulatory process of federal, state, and local agencies including the United States Environmental Protection Agency (USEPA), California Regional Water Quality Control Board (RWQCB) Cal-EPA Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD) and Orange County Health Care Agency (OCHCA).

RELEVANT PROJECT EXPERIENCE

Exide Lead Smelter, Vernon, California: Lead geologist retained to investigate and characterize contaminants associated with 100 years' worth of industrial use on a former lead smelter property. Ensured regulatory compliance during the demolition of the property and provided technical review and approval of all reports and regulatory required documents. Calculated and managed the total cleanup cost of the site which was expected to exceed 100 million. Was responsible for tracking and maintaining the budget and management of all subcontractors. Oversaw all fieldwork associated with the project and managed all subcontractor budgets and invoicing. Was involved in all regulatory and legal interactions and worked to ensure that all regulatory deadlines for state and federal agencies were met. Challenges included negotiating with multiple regulatory agencies and interactions with community activists and environmental groups.

ExxonMobil Portfolio Management, Orange and San Diego Counties, California: Managed a portfolio of 52 sites across Orange and San Diego County for ExxonMobil. The portfolio was budgeted at 2 million annually and consisted of sites that ranged from needing closure requests to those that needed complete characterization and remediation. Implemented multiple types of remediation at the sites to expedite case closure. Managed a team that closed half of the sites within the first two years. The rapid closure schedule was completed on budget and allowed the client to sell the properties sooner than planned and with limited liability. Challenges included limited budget, a challenging regulatory environment and expedited closure schedules.

Department of Defense Contractor, Hawthorne, California: Conducted an expedited due diligence environmental investigation of an oilfield located on an Aerospace company for the Department of Defense. Challenges included limited historical research documents and a limited budget. Phase I and Phase II investigations were completed on time and on budget and the abandoned oilfield wells were successfully located allowing for proposed construction work to proceed without any delay to schedule.

Aervoe Paint, Compton, California: As Lead Geologist, I managed the investigation and remediation of a former paint manufacturer. The investigation involved installing multiple wells into the local drinking aquifer which required specialized drilling techniques and well construction to prevent contaminant migration. A specialized

Jeff Aguilar Principal Geologist

remediation system was designed and constructed to remediate the large contaminant plume which underlay several city blocks. Challenges included limited access on neighboring properties and difficult drilling conditions. The investigation was completed on time and on budget and a site-specific remediation system is currently operating.

Ammunition and Explosives Manufacturer, Hercules, California: Oversaw the investigation of a property with a history of ammunition and explosives manufacturing. The property was to be graded to allow construction of new homes. Expedited Phase II investigations were completed using multiple types of drilling technology and contaminant impacts were located, characterized and remediated. Challenges included multiple types of contaminants and a short timeframe for project completion. Multiple drilling companies were used simultaneously to expedite the investigation and remediation. The project was finished on time allowing the construction of homes to proceed without delay.

Chevron Bulk Terminal Project, El Segundo, California: As Lead Geologist on this project, I oversaw the excavation of ½ mile of pipeline located in a major thoroughfare leading to a bulk terminal in El Segundo. The pipeline was exposed and replaced in sections over a six-month period. During excavation, air monitoring was performed and soil was continually inspected for impacts. Impacted soil was characterized, delineated, excavated and segregated. The characterization and excavation of the soil had to be performed quickly so as not to delay the replacement of the pipeline and to minimize the impact on traffic in the thoroughfare. Negotiations were conducted to reuse the excavated soil at a different construction site therefore saving the client on transportation and disposal costs. Challenges included working in the public right of way and safety of personnel due to traffic and heavy machinery. The project was completed safely, on time and on budget.

ExxonMobil Groundwater Remediation System Installation, Dana Point, California: As Lead Geologist, I oversaw the installation of a groundwater extraction system at an operating service station impacted by a historical release. Due to the time lapse between the release and discovery dates, impacted groundwater had traveled a significant distance under nearby streets with high traffic volume. A site-specific remediation system was designed but reaching the downgradient edge of the plume with the remediation system presented a challenge. A specialized drilling subcontractor was utilized to horizontally drill beneath the streets to install remedial piping without disrupting traffic. The vacuum on the remediation system was increased to accommodate the long distances that the impacted groundwater had to be pulled. The system was installed safely and on budget and after three years of operating the system, it had cleaned the site to a level where a No Further Action letter was issued.

Lennar Home Builders, Yorba Linda, California: Oversaw the investigation, characterization and remediation of a 35-acre parcel that was redeveloped for single family residences. The site had multiple impacts to soil from multiple contaminants and had five oil pumping wells that required abandonment prior to site redevelopment. Challenges included multiple stakeholders, challenging terrain and a challenging regulatory environment. A comprehensive remedial action plan was created, approved and implemented. The Orange County Health Care Agency agreed that the site was remediated to their standards and construction was allowed to proceed with no delay. All work was completed safely with little to no impact to the surrounding neighborhood.
