Phase I Environmental Site Assessment 1000 South De Anza Boulevard San Jose, California

SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 1000 South De Anza Boulevard in San Jose, California (Site) as shown on Figures 1 and 2. This work was performed for David J. Powers & Associates in accordance with our July 18, 2023 agreement (Agreement).

1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E1527-21 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule, 40 CFR Part 312). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site.

As defined by ASTM E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition¹ is not a recognized environmental condition.

Cornerstone Earth Group, Inc. (Cornerstone) understands that David J. Powers & Associates is providing CEQA support services associated with a planned residential development at the Site. We performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater.
- Drive-by observation of adjoining properties to note readily apparent activities involving hazardous materials that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of current and/or prior Site uses, including the current Site owner and occupant(s).
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10.

1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, interview responses, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We also assumed that the boundaries of the Site, based on information provided by David J. Powers & Associates, are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 C.F.R. Part 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the All Appropriate Inquiries in general conformance with the standards and practices set forth in 40 CFR Part 312.

SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the Site, based on information provided by David J. Powers & Associates.

Table 1. Location and Ownership

Assessor's Parcel No. (APN)	372-26-018
Reported Address/Location	1000 South De Anza Boulevard, San Jose California
Owner	Richard F. Borello and Debra K. Borello, Trustees, et al.
Approximate Lot Size	0.7 acres

2.2 CURRENT/PROPOSED USE OF THE SITE

The current and proposed uses of the Site are summarized in Table 2.

Table 2. Current and Proposed Uses

Current Use	Unoccupied restaurant (Mori Kitchen)
Proposed Use	Residential

2.3 SITE SETTING AND ADJOINING PROPERTY USE

Land use in the general Site vicinity appears to be mix of residential and commercial properties. During the Site visit, adjoining properties were observed from the Site and from adjacent public thoroughfares. Based on our Site vicinity reconnaissance, adjoining property uses are summarized below in Table 3. No features, activities, uses or conditions on the adjoining properties were observed that are considered indicative of Recognized Environmental Conditions at the Site.

Table 3. Adjoining Property Uses

North	Vacant building (former Country Inn Restaurant)		
South	Primrose School of Cupertino		
East	Residential		
West	Home Depot and a restaurant (Pho Banh Mi)		

SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is David J. Powers & Associates. The "All Appropriate Inquiries"

Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions in connection with the Site, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E1527-21 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA and the User did not provide such search results to Cornerstone.

3.2 SPECIALIZED KNOWLEDGE AND COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with David J. Powers & Associates, we understand that David J. Powers & Associates does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site.

SECTION 4: RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record

information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with respect to the Site. The customary practice is to review information from standard sources that is reasonably ascertainable within reasonable time and cost constraints.

4.1.1 On-Site Database Listings

The Site was not identified in the researched regulatory agency databases.

4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents

Several businesses on adjoining properties to the east, west and south of the Site (e.g., Home Depot, Fountain Park Apartments and Hills Dental) were identified on regulatory agency databases. The database listings for adjoining properties relate primarily to regulatory filings associated with hazardous material use/storage, and generation or disposal of hazardous wastes. Such listings are common for commercial facilities in urban settings and are not indicative of hazardous material releases; thus, further review of records associated with these listings does not appear warranted.

Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 1000 South De Anza Boulevard at the following public agencies: the San Jose Building Department (BD), San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH). The information reviewed is summarized in Table 4. The DEH indicated that they have no files pertaining to the Site.

Table 4. File Review Information

Agency			
Name	Date	Occupant	Remarks
BD	1975	Carl's Jr.	Building, plumbing, mechanical and electrical permit
FD	1975 and	Carl's Jr.	Permits for fire protection systems
	1980		
BD	1979	Restaurant	Permit for interior alterations
BD	1980	Carl's Jr.	Electrical and mechanical permits and inspection records
BD	1980	Restaurant	Certificate of occupancy
BD	1990	Carl's Jr.	Permit for exterior alterations
BD	1991	Carl's Jr.	Permit to add a flag pole

Agency			
Name	Date	Occupant	Remarks
FD	1996 to	Carl's Jr.	Fire safety inspection reports
	2010		
FD	2014	Carl's Jr.	Memorandum noting that Carl's Jr. had closed
FD	2014	Kenji Burger	Permit for fire protection system
BD	2014 and	Kenji Burger	Permits and inspection reports for tenant improvements
	2015		
FD	2014 to	Kenji Burger	Fire safety inspection reports
	2015		
FD	2015	Kenji Ramen	Inspection record noting name change to Kenji Ramen
FD	2016	Mori Kitchen	Inspection record noting name change to Mori Kitchen
BD	2022	NA	Plumbing permit

4.2.2 Geologic Energy Management Division Maps

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Geologic Energy Management Division (CalGEM) website were reviewed. Review of the available map for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

5.1 RECENT USGS TOPOGRAPHIC MAP

A 2018 USGS 7.5-minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 260 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the northeast towards the San Francisco Bay.

5.2 HYDROGEOLOGY

Based on information presented in the California Geotracker database pertaining to nearby properties, groundwater beneath the Site is likely present at depths of greater than 75 feet. Groundwater likely flows toward the northeast.

SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and adjoining properties to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the Site. The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The identification of obvious uses of adjoining properties also is required.

6.1 HISTORICAL SUMMARY

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 5.

- Historical Aerial Photographs: We reviewed aerial photographs dated between 1939 and 2020 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.
- Historical Topographic Maps: We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1897, 1899, 1902, 1943, 1947, 1948, 1953, 1961, 1968, 1973, 1980, 1995, 2012, 2015 and 2018; copies of historic topographic maps reviewed are presented in Appendix B.
- Historical Fire Insurance Maps: EDR reported that the Site was not within the coverage area of fire insurance maps.

Table 5. Summary of Historical Source Information

Date	Source	Comments
1897, 1899	Topographic	Site: No structures are depicted.
and 1902	maps	
		Adjoining Properties: No structures are depicted.
1939 to	Aerial	Site: Shown to be occupied by a residence and an orchard. The orchard
1974	photographs	trees are shown to have been removed and replaced by row crops by
		the mid-1950s. By 1974, the residence is shown to have been removed
		and the Site appears to consist of undeveloped land.
		Adjoining Properties: Shown to be occupied mainly by orchards until
		the mid-1950s, along with a few residential structures. By 1974, the
		existing commercial building to the west and apartment complex to the
		east were constructed.
1943 to	Topographic	Site: A small structure typical of a residence is depicted on-Site. The
1973	maps	1948 and 1953 maps additionally depict orchards on-Site.
		Adjoining Properties: Shown to be occupied by small structures typical
		of residences. Orchards also are depicted on some adjoining parcels.
		An increase in commercial development is apparent by the 1970s.
1980 to	Topographic	Site: What appears to be the existing commercial building is depicted
2018	maps	on-Site by 1980.
		Adjoining Properties: Shown to be developed for residential and
		commercial uses.
1991 to	Aerial	Site: Shown to be occupied by the existing commercial building.
2020	photographs	
		Adjoining Properties: Shown to be occupied by the existing
		commercial and residential developments.

6.1.1 City Directory Review

To obtain additional information regarding past uses of the Site and adjoining properties, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five-year intervals for the years spanning 1922 through 2002.

Identified Site occupants include Carl's Jr. (1996-2010) and Mori Kitchen (2020). San Jose House Locksmith also was listed at the Site address in directories from 2014 and 2017; however, these listings are not consistent with Building and Fire Department records that indicate the Site was occupied for restaurant use at that time.

The listed business names at adjoining properties are not indicative of businesses that are typically associated with the use or storage of significant quantities of hazardous materials (e.g., gasoline stations, dry cleaners, manufacturing facilities, etc.). The acquired city directory report is presented in Appendix C.

SECTION 7: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 6. Photographs of the Site are presented in Section 7.2.1.

7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on August 9, 2023. The Site reconnaissance was conducted by walking representative areas of the Site, including the interior of the on-Site structure, the periphery of the structure and the Site periphery. The Site also was observed from adjacent public thoroughfares. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing building and associated asphalt paved vehicle drives and parking areas (typical of developed properties).

7.2 OBSERVATIONS

At the time of our visit, the Site was developed with an unoccupied restaurant building, most recently occupied by Mori Kitchen. The building consisted of a customer service counter, dining room, restrooms and a kitchen with cold storage facilities. No hazardous materials or evidence of spills were observed on-Site.

Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The building presumably is connected to the publicly owned sanitary sewer system; no on-Site septic systems were obvious. On-Site storm water catch basins appeared to discharge via below ground piping to the City's storm water drainage system. An electrical transformer owned by PG&E was observed on a concrete pad at the northeastern corner of the building. No evidence of transformer oil leaks was observed. What appeared to be a below grade grease interceptor was observed on the west side of the building.

Table 6. Summary of Readily Observable Site Features

General Observation Comments Aboveground Storage Tanks Not Observed Agricultural Wells Not Observed Air Emission Control Systems Not Observed Boilers Not Observed Burning Areas (waste burn pits or ash disposal areas) Not Observed Chemical Mixing Areas Not Observed Chemical Storage Areas Not Observed Drainage Ditches Not Observed Drums, Totes, and Intermediate Bulk Containers Not Observed Elevators Not Observed Emergency Generators Not Observed Equipment Maintenance Areas Not Observed Fill Placement (i.e., fill used to build up the site elevations) Not Observed Hoods and Ducting (associated with chemical use) Not Observed Hydraulic Vehicle or Equipment Lifts Not Observed Incinerators Not Observed Petroleum Pipelines or Wells Not Observed Pits, Ponds, or Lagoons. SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

8.1 ENVIRONMENTAL QUESTIONNAIRE / CURRENT OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire for completion by the Site owner. The completed questionnaire is attached in Appendix D. The information provided on the questionnaire appears generally consistent with our on-Site observations and information obtained from other data sources. No information indicative of Recognized Environmental Conditions was reported on the questionnaire.

8.2 CURRENT OCCUPANT INTERVIEW

The Site was not occupied at the time of our visit. No occupant interview was conducted.

8.3 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

8.4 INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Per the ASTM Standard, a reasonable attempt should be made to interview at least one staff member of any one of the following types of state and/or local government agencies: fire department, health department, building department, or other agency having jurisdiction over hazardous waste disposal or other environmental matters in the area.

The San Jose Building Department, San Jose Fire Department, and the Santa Clara County DEH were contacted during this study. The DEH is the Certified Unified Program Agency (CUPA) responsible for implementing California's Unified Hazardous Waste and Hazardous Materials Management regulatory program for properties within San Jose. Files pertaining to the Site were requested from each of these agencies; a summary of the information obtained was discussed in Section 4.2.1.

SECTION 9: FINDINGS, OPINIONS, AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general conformance with ASTM E1527-21 to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site historically was occupied by a residence and used for agricultural purposes (orchards and row crops). The existing restaurant building was constructed in approximately 1975 and occupied by Carl's Jr. until approximately 2013. Kenji Burger and Mori Kitchen subsequently occupied the building. The building currently is vacant.

9.2 CHEMICAL STORAGE AND USE

No hazardous materials were observed on-Site during our visit. Additionally, the Site does not appear to have historically been occupied by businesses that are typically associated with the use or storage of significant quantities of hazardous materials.

9.3 AGRICULTURAL USE

The Site was used for agricultural purposes for several decades. Pesticides may have been applied to crops in the normal course of farming operations. Residual pesticide concentrations may remain in on-Site soil. If elevated concentrations of agricultural chemicals are present, mitigation or soil management measures may be required during construction/earthwork activities. Prior to residential development of the Site, we recommend performing soil sampling to evaluate if agricultural chemicals are present.

9.4 LEAD-BASED PAINT AND TERMITE CONTROL PESTICIDES

In 1978, the Consumer Product Safety Commission banned lead-containing paints and coatings sold for consumer use. Some lead-containing products, such as industrial coatings, however, are still allowed. Based on the age of the existing building, lead-containing paint may be present. If demolition is planned, the removal of lead-containing paint is not required if it is bonded to the building materials. However, if the lead-containing paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

Additionally, soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. No information was identified during this study documenting the use of lead-based paint or termite control pesticides on-Site; however, if used, residual pesticide and lead concentrations may remain in on-Site soil. Lead and/or pesticides often are identified in soil near old residences, such as those historically located on-Site. Prior to residential development of the Site, we recommend that shallow soil at the current and former structure locations be evaluated for the possible presence of lead and pesticides.

9.5 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structure, building materials may contain asbestos. If demolition, renovation, or re-roofing of the building is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

9.6 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site.

9.7 IMPORTED AND EXPORTED SOIL

If the planned development will require importing soil for Site grading, we recommend documenting the source and quality of imported soil. The DTSC's October 2001 Clean Fill Advisory provides useful guidance on evaluating imported fill.

If the planned development will require exporting soil, consideration should be given to profiling the soil per the accepting facility's requirements prior to grading activities to help expedite off-Site transport and disposal during construction.

9.8 DATA GAPS

ASTM Standard E1527-21 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data gaps were identified during this Phase I ESA.

9.9 DATA FAILURES

As described by ASTM Standard E1527-21, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five-year intervals back to the first use or to 1940 (whichever is earlier). The ASTM Standard requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

9.10 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E1527-21 of 1000 South De Anza Boulevard, San Jose, California. This assessment identified the following Recognized Environmental Conditions².

- The Site historically was used for agricultural purposes. There is a potential that residual pesticides could remain in Site soil. If present, this soil may require appropriate management.
- Soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to

Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment

control termites. There is a potential that residual lead and pesticide concentrations could remain in on-Site soil resulting from current and prior on-Site structures.

This assessment did not identify any Controlled Recognized Environmental Conditions³ or Historical Recognized Environmental Conditions⁴ associated with the Site.

SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support David J. Powers & Associates in evaluation of Recognized Environmental Conditions associated with the Site. David J. Powers & Associates understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. David J. Powers & Associates understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

This report, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

³ A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

A previous release of hazardous substances or petroleum products affecting the Site that has been addressed to the satisfaction of the applicable regulatory agency and meeting unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to any controls.

10.1 REPORT VIABILITY

Per ASTM E1527-21 and 40 CFR Part 312, a Phase I Environmental Site Assessment report is presumed to be viable when it is conducted within one year prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction), provided that the following components of the inquiries were conducted or updated within 180 days prior to the date of purchase or the date of the intended transaction:

Task

Interview with current owner (owner questionnaire)
Review of standard government environmental record sources
Visual observation of the Site and of adjoining properties
Declaration by the Environmental Professional
Searches for recorded environmental cleanup liens

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SHELL OIL CO 204-195	10710 S. DEANZA BLVD	N 1/8 - 1/4 (0.152 mi.)	F31	89
EPA ID.: CAD981402597				

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund: Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 17 CUPA Listings sites within approximately 0.25 miles of the target property.

Eval General Type: Compliance Evaluation Inspection

Eval Date: 02-16-2018 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a

retail store. Performed a facility walk-through of the following areas: FACILITIES -All lighting change-outs and all resulting universal waste is managed by a contractor. -Janitorial staff are instructed to manage "empty" cleaning products as hazardous waste. PAINT DEPARTMENT -Paint mixers are cleaned using rags. All paint-contaminated rags as well as paint-contaminated containers are collected in paint department and then transferred to the receiving area where they are managed as a hazardous waste. -Waste absorbent used to cleans pills is managed as hazardous waste. BATTERY &

FLUORESCENT LAMP CONTAINER (NEXT TO CUSTOMER SERVICE) -Facility

maintains a drop-off container for household batteries and fluorescent lamps. Each day any waste batteries or lamps are collected and transferred to the receiving area where they are managed as universal

waste. Any broken lamps found in collection [Truncated]

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

CERS Description: Hazardous Waste Generator

Violations:

Site ID: 110587

Site Name: DE ANZA DENTAL CTR INC

Violation Date: 03-15-2017

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter

12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing,

disposing of, transporting or offering for transportation any

hazardous waste.

Violation Notes: Returned to compliance on 05/10/2017. Per the Hazardous Waste Tracking

System, EPA ID# CAL000114848 is inactive. Provided facility with DTSC

form 1358 to reactivate EPA ID#.

Violation Division: Santa Clara County Environmental Health

Violation Program: HW
Violation Source: CERS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Eval Date: 03-15-2017

Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: On site to conduct a routine hazardous waste inspection Observed the

following containers on site: 2 x 5 gallon containers of waste glutaraldehyde Facility uses digital x rays No lead foil is generated at facility Amalgam is collected and managed as universal waste 2 steam autoclaves on site Ultrasonic machine uses ProCide Facility uses Cidex Plus for cold sterilization No whitening is done at facility No tartar and stain removal is performed at facility Surfaces are disinfected using Sanicloths No pharmaceuticals present on site

Container areas are inspected weekly Employees are thoroughly familiar with hazardous waste management Disposal records were reviewed and in

good order The following violations were corrected on site: 2 x 5 gallon containers of waste glutaraldehyde were missing complete hazardous waste markings Emergency information was not posted. Provided facility with Emergency Procedures template. Template was

posted during inspection.

Violation Date: 04-05-2017

Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter

16, Section(s) 2641(a)

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.

Returned to compliance on 04/05/2017. The sensor in the 87-1 STP/Piping sump was on the incorrect side of the sump. The Service

Technician moved the sensor closest to the pressurized piping. The sensor in the Diesel STP/Piping sump was not vertical. The Service Technician repositioned the sensors retaining bracket to the vertical position. Both instances and this violation was corrected during today's inspection: no further action is required.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and

portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical

characteristics of the Hazardous Waste, and starting accumulation

date.

Violation Notes: Returned to compliance on 11/15/2017. 1-30 gallon steel drum marked

with a typical yellow and red hazardous waste long-label containing drained used oil and gasoline filters. The label did not contain an accumulation start date after the pick-up dated on the label as being

7-22-14.

Violation Division: Santa Clara County Environmental Health

Violation Program: HW Violation Source: CERS,

Site ID: 63078

Site Name: ROTTEN ROBBIE #07

Violation Date: 04-05-2017

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month $\,$

if all of the following conditions are met: (1) The quantity of

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/15/2017. 1-55 gallon steel drum marked

with a typical yellow and red hazardous waste long-label as containing sump water with no accumulation start date after the pick-up date of 8-21-14. 1-30 gallon steel drum is marked with both a gasoline/oil filters label and a typical yellow and red hazardous waste label. Using a typical hazardous waste label confirms that the generator of the waste has determined that the contents must be managed as hazardous waste, which reduces the allowable accumulation time from 365-days for gasoline filters down to 180-days for Small Quantity Generators. The label did not contain an accumulation start date after

the pick-up dated on the label as being 7-22-14. Santa Clara County Environmental Health

Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill

prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill

prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/06/2021. Facility has not completed the

overfill equipment prevention inspection as required. A work order has been recorded in monthly DO reports to have the inspection completed.

Eval Program: UST Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection

Eval Date: 04-05-2018 Violations Found: Yes

Eval Type: Routine done by local agency

Eval Notes: On-site to observe the annual UST Monitoring Certification. The

Service Technician that conducted all tests was Jesse Rodriguez from Service Station Systems, Inc; all required UST certifications were verified to be current. Verified that all equipment tested today matched equipment listed on the CERS submittal, dated 3/26/2018. All spill buckets were hydrostatically tested with 5-gallons of water for 60-minutes with no drop in liquid level. All tanks are equipped with mechanical (flapper valves) for overfill protection. All UDCs are equipped with float & chain mechanisms, except dispenser 5/6; all were

tested with water and functioned as required. Dispenser 5/6 is equipped with a stand-alone sensor that was tested and functioned as

Sub-Part P Indicator: No

Hazardous Waste Summary:

Waste Code: F002

Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene,

Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane,

Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2,

Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And

Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Type: Other, not routine, done by local agency

On-site with Michelle Santos to perform a hazardous materials permit **Eval Notes:**

investigation of Britannia Arms. The permit investigation is a result of permitting another Britannia Arms location. The business is bar and

restaurant, which has been in business since 1981. A facility

walk-through was conducted with the Manager Tom Cauge. The following reportable hazardous materials were observed: -5x 50lbs CO2 Cylinders -4x 50lbs Nitrogen Cylinders -3x 5lbs CO2 Cylinders -3x 5lbs Nitrogen Cylinders Based on these observations this facility will be permitted for having 2 reportable hazardous materials chemicals (BP01). This facility will be required to submit a Hazardous Materials Business Plan, and a follow up visit may be necessary to assist with

submittal. Mr. Cage informed me that his chemical inventory is larger than normal. Mr. Cage was advised that he can call our office, at a later date, to reevaluate the need for a permit with our office.

Site History: 2 previous LUFT cases at this site that are closed. 6/02 USTs and piping removed. 101 tons of soil hauled off site for disposal. 9/03 -

piping removed. 101 tons of soil hauled off site for disposal. 9/03 - 4 soil borings advanced to 100 ft bgs for collection of soil and grab groundwater samples. Based on the grab groundwater samples boring B1 was completed as well MW1. 1/04 - 5 monitoring wells installed and 2 soil borings up to depths of 125 ft bgs. 2/04 - 2 monitoring wells and 1 soil vapor extraction well installed. 5/04 - 3 additional soil vapor extraction wells installed. 11/04 CAP approved to use vapor extraction and dual phase extraction to remediate the site. 5/06 - contamination was found while installing the remediation system. A sump was found, which was removed with piping, a clarifier, and contaminated soil that was encountered. 2/07 - groundwater extraction system started. 3/07 - vapor extraction treatment system started.

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)

Site History: The site is located in the McClellan Square shopping center

comprising 10385 to 10497 South De Anza Blvd, Cupertino, California. In addition to the dry cleaners facility at McClellan Square, the center includes several freestanding buildings: a "Lucky" supermarket (10435 S. De Anza Blvd), "CVS" drug store (10455 S. De Anza Blvd), "Far East Bank" (10465 S. De Anza Blvd), and a "Key Point Credit Union/ Better Home and Loan" (10495 S. De Anza Blvd) with remaining stores located within a strip mall-like structure, adjacent to the southern wall of the CVS drugstore. As part of a due-diligence

process for a real estate property transaction Moore Twining performed a Phase I Environmental Site Assessment (Phase I ESA) for the site in Oct 2010. That assessment identified the McClellan Square

Cleaners in operation at the site since 1989. Prior, the facility operated as another dry cleaner from 1970 to 1989. Concentration of 47 ug/kg (miligrams per kilogram) PCE were detected in soil samples collected during installation of MW-1 (monitoring well) at depth of 15 ft. below ground surface (bgs). Non-detects were reported for VOCs from depths of 15 to 90 ft bgs at this location (MW-1). Additional soil sampling and indoor air quality assessment were performed in February 2011. Results indicated PCE concentrations at 130 mg/kg in

15 ft bgs soil sample in vicinity of existing dry cleaning machine.

Results of the indoor air assessment indicated PCE concentrations

Direction Distance

Elevation Site Database(s) EPA ID Number

MC CLELLAN SQUARE CLEANERS (Continued)

S104580667

EDR ID Number

exceeded screening levels published by California Environmental Protection Agency (CAL-EPA), the California Regional Water Quality Control Board (CRWQCB), and California Prop 65 "No Significant Effect Concentration". Horizontal extent of PCE soil gas concentrations above CHHSL and ESL values was found to extend under building slab to a minimum of 60 ft north (VMP-7) and 60 ft south (VMP-9) of existing dry cleaning machine. PCE concentrations below commercial CHHSL and ESL values were detected in soil gas in the eastern parking lot (VMP-4) about 80 ft east of existing dry cleaning machine. An in-situ SVE (Soil Vapor Extraction) system was recommended to be an appropriate and cost-effective interim method to remove PCE in soil and vapor at the site and to reduce the previously identified risk to indoor air quality.

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)

Site History: 1990 - In August, a waste oil underground storage tank (UST) was

removed. Holes were noted on the top of the UST. One soil sample was collected from 8 feet below the ground surface (ft bgs). The sample was reported to contain 250 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Diesel (TPHd), 25 ppm TPH as Gasoline (TPHg),

3,500 ppm Total Oil and Grease (TOG) and low concentrations of Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX). The sample was

also reported to contain 5.1 ppm Naphthalene, 0.75 ppm Phenanthrene, 0.58 ppm Fluoranthene, 0.87 ppm Pyrene, 1.2 ppm Bis (2-Ethylhexyl) Phthalate, and 8.6 ppm 2-Methylnapthalene (Semi-Volatile Organic Compounds). 1991 - In January, a soil boring (SB1) was drilled to a depth of 16.5 ft bgs near the former waste oil UST. A soil sample collected at 16 ft bgs and was not reported to have concentrations of

S104397024

the Constituents of Concern (COCs), including Semi-Volatile Organic Compounds, present above the laboratory reporting limits. In September, 3 gasoline USTs and associated piping were removed from the site. 6 soil samples were collected from approximately 14.5-15 ft bgs in the UST excavation and were reported to contain maximum concentrations of 220 ppm TPHg, 2.3 ppm Benzene, 14 ppm Toluene, 8.4 ppm Ethylbenzene, and 54 ppm Xylenes. 4 soil samples were collected from beneath the piping at 1.5-3 ft bgs and were reported to have very low to non-detectable concentrations of the COCs. Approximately 100 cubic yards of soil was removed from the tankpit was transported to the Durham Road Landfill in Fremont for disposal. The tankpit was backfilled with clean material. 1993 - In June, 7 soil borings (QSB1 through QSB6) were drilled to 40-100 ft bgs onsite. One boring (QSB-1) was located in the center of the former gasoline UST pit and was advanced to 100 ft bgs; three borings (QSB-2, QSB-3 and QSB-4) were drilled peripheral to the gasoline UST pit to 40 ft bgs; one boring (QSB-5) was drilled in the center of the former waste oil UST pit to 60 ft bgs; and two borings (QSB-6 and QSB-7) were drilled peripheral to the waste oil UST pit to 15 ft bgs. Maximum concentrations were reported for the soil samples collected from QSB1 at 6,200 ppm TPHg, 73 ppm Benzene, 510 ppm Toluene, 160 ppm Ethylbenzene, and 900 ppm Xylenes and in soil samples collected from QSB5 of 630 ppm TOG and 3.000 ppm TOG, 1996 - In March, 3 groundwater monitoring wells (MW1, MW2 and MW3) were installed to depths of 95-102 ft bgs at the site. MW1 was located within the former gasoline UST pit. In addition, 2 vapor extraction wells (VW1 and VW2) were completed in a single borehole within the gasoline UST pit to 75-95 ft bgs. 16 soil samples were collected and reported to contain maximum concentrations of 6,400 ppm TPHg, 52 ppm Benzene, 350 ppm Toluene, 82 ppm Ethylbenzene, and 430 ppm Xylenes in the sample collected at 60.5 ft bgs in VW1. Depth to groundwater beneath the UST pit was approximately 92 feet. Periodic sampling of the wells was initiated. Initial groundwater samples were reported to contain maximum concentrations of 180,000 parts per billion (ppb) TPHg, 28,000 ppb TOG, 15,000 ppb Benzene, 24,000 ppb Toluene, 4,500 ppb Ethylbenzene, 20,000 ppb Xylenes, 650 ppb Naphthalene, and 140 ppb 2-Methylnaphthalene in well MW1. Free floating gasoline product was observed in MW1 in August and a program of product bailing was begun and continued through October 2007. It is estimated that 113 gallons of free product and groundwater were removed during this time from well MW1. 1999 - In October, monitoring well MW4 was installed onsite to 95 ft bgs, downgradient of the gasoline UST tankpit. 5 soil samples were collected and reported to contain maximum concentrations of 510 ppm TPHg, 6.2 ppm Benzene, 26 ppm Toluene, 13 ppm Ethylbenzene, and 73 ppm Xylenes in the sample collected at 95.5 ft bgs. Methyl tert Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the monitoring program. In December, a soil vapor extraction test was performed on wells VW1 and VW2. The results indicated high vapor concentrations. Flow rates and radius of influence were suitable to encompass the mass of contaminated soil beneath the tankpit. 2001 In May and June, monitoring wells MW5 and MW6 were installed to 100 ft bgs downgradient of the site in Saratoga-Sunnyvale Road. Soil and groundwater samples were non-detect for all analytes. These wells were added to the monitoring program. 2004 In May, soil vapor extraction (SVE) was begun utilizing vapor wells VW1 and VW2 and monitoring well MW1 as extraction wells. The SVE operated through

EDR ID Number

August 2010 and removed approximately 47,418 pounds of TPHg. 2005 In September, monitoring wells MW5 and MW6 were destroyed. 2007 Groundwater elevations fell substantially (approximately 10 feet) between 2007 and 2009 with MW1 and MW4 ultimately going dry. This, however, allowed the SVE system to draw vapors from the entire screened interval of MW1. Water levels began recovering in 2010 to the present day. FP did not reoccur in well MW1 when the groundwater elevation rose. 2011 In October, the final groundwater monitoring event was conducted and reported maximum concentrations of 140 ppb TPHg, 2.3 ppb Benzene, and 1 ppb Xylenes. Detections of these constituents were only reported for the samples from wells MW1 and MW4. In November, one soil boring (CB1) was advanced to 100 ft bgs within the former tank excavation for the collection of confirmation soil samples. 10 soil samples were collected (1 every 10 feet) and reported to contain maximum concentrations of 1,400 ppm TPHg (90 ft bgs), 0.015 ppm Benzene (100 ft bgs), 10 ppm Toluene (90 ft bgs), and 190 ppm Xylenes (90 ft bgs). The concentrations of TPHg, Toluene, and Xylenes in the 100 foot sample decreased significantly to 1, <0.005, and 0.018 ppm, respectively. Groundwater was encountered during drilling at approximately 97 ft bgs.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Number of Days to Update: 15

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality

Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation: 257 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 12016429 CUPERTINO, CA

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

CUPERTINO YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Quaternary

Code: Q (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA
Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information									
	Boundary			Classification					
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60		
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60		
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60		

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

TARGET PROPERTY: ADDRESS NOT IDENTIFIED IN RESEARCH SOURCE

The following Target Property addresses were researched for this report, and the addresses were not identified in the research source.

Address Researched

Address Not Identified in Research Source

1000 South De Anza Boulevard

2001, 1995, 1992, 1991, 1986, 1985, 1982, 1980, 1978, 1975, 1974, 1970, 1968, 1966, 1965, 1964, 1963, 1962, 1960, 1957, 1955, 1950, 1946, 1945, 1942, 1940, 1936, 1935, 1931, 1930, 1926, 1925, 1922

APPENDIX D - QUESTIONNAIRE

Environmental Questionnaire (Owner Questionnaire)

Cornerstone Earth Group is performing a Phase I environmental site assessment (ESA). The purpose of the ESA is to evaluate current and historic uses of the property that may have involved the use, generation, or storage of hazardous materials. Please respond to these questions in good faith and to the extent of your knowledge. **Enter "unknown" if the requested information is not known.** Thank you for your assistance and timely response.

	you for your assistance and tim	nely response.				
	GENERAL PROPERTY INFORM	IATION				
1)	Site Address(es) and Assessor's Parcel Number(s): Please list all current and former addresses. Some sites have multiple addresses; all are needed, even if they are not in current use.					
	Address(es)	APN Number(s)				
	1000 S. Deanza Boulevard, San Jose, CA 95129					
	372-26-018					
2)	Property Size: 31,3150 SF	(Sq. Ft. or Acres)				
3)	Current site owner(s) and put	rchase date:				
	Current Owner Name		Year Purchased			
	See attached:		5/28/21			
4)	Previous site owner(s) and d	ates of ownership:				
Τ,	Prior Owner Name	Year Purchase	<u>d</u> <u>Year Sold</u>			
	SG Borello & Sons, Inc.	1977	2021			
	STRUCTURES AND OCCUPAN	TS				
5)	Please describe all on-site bu	uildings (current and former):				
	Building Size (sq. ft)	Building Use	Date of Construction			
	2,658 SF	Former Carls, Jr. Currently Vacan	t Unknown			
	Potable Water Source (e.g., city	y or other water agency, on-site well, etc.):			
	Sewage Disposal System (<i>e.g.</i> , city sewer, septic tank, etc.): City					

Heating/Cooling System and Fuel Source (e.g., electric, natural gas, fuel oil, etc.): Electric and Natural Gas

6) Current site tenant(s), site use, a	and years of occupancy:
--	-------------------------

<u>Tenant</u>	Site Use	Years of Occupancy (e.g., From 1995 to 2007)
Vacant		
Prior site tenant(s), s	ite use, and years of occupancy:	Vears of Occupancy
Prior site tenant(s), s	ite use, and years of occupancy: <u>Site Use</u>	Years of Occupancy (e.g., From 1975 to 1983)

OTHER SITE FEATURES AND INFORMATION

8) Please indicate if you are aware of any of the following features <u>currently or formerly</u> at the site.

Standard Footing	Vac	No	Do Not
Structure/Feature	Yes	No	Know
Aboveground Storage Tanks		^ `	
Agricultural Wells		Х	
Air Emission Control Systems			Х
Boilers			X
Burning Areas (waste burn pits or ash disposal areas)		Х	
Chemical Mixing Areas		Х	
Chemical Storage Areas		X	
Drainage Ditches			X
Drums, Totes, and Intermediate Bulk Containers		X	
Elevators		Х	
Emergency Generators		Х	
Equipment Maintenance Areas		X	
Fill Placement (i.e., fill used to build up the site elevations)		X	
Groundwater Monitoring Wells		X	
Hoods and Ducting (associated with chemical use)	Х		
Hydraulic Vehicle or Equipment Lifts		X	
Incinerators		Х	
Petroleum Pipelines or Wells		Х	
Pits, Ponds, or Lagoons.		Х	
Railroad Lines		Х
