

**Lake Gregory Regional Park Sitewide Sediment Management Project
Initial Study / Mitigated Negative Declaration**

Appendix F – Hazardous Materials Memorandum

MEMORANDUM

To: Phil Krause, Senior Project Manager, San Bernardino County, Department of Public Works, Special Districts

From: Kristen Bogue, Hazardous Materials Specialist, Michael Baker International

Date: February 12, 2024

Subject: Lake Gregory Sediment Management Project – Hazardous Materials Memorandum

This Hazardous Materials Memorandum (Memorandum) was prepared in an effort to preliminarily identify the potential existence of hazardous materials/wastes within the boundaries of the proposed Lake Gregory Sediment Management Project located in Crestline, California, herein referenced as the Project.

METHODOLOGY

Michael Baker International's (Michael Baker's) findings, presented in this Memorandum, are limited to Michael Baker's scope of work, which included review of a regulatory database search provided by LightBox (formerly Environmental Data Resources, Inc. [EDR]). For the purposes of this Memorandum, the term "hazardous material" refers to both hazardous substances and hazardous waste. A material is defined as "hazardous" if it appears on a list of hazardous materials prepared by a Federal, tribal, State, or local regulatory agency, or if it possesses characteristics defined as "hazardous" by such an agency. A "hazardous waste" is a solid waste that exhibits toxic or hazardous characteristics (i.e., ignitability, corrosivity, reactivity, and/or toxicity).

PROJECT LOCATION AND SETTING

Lake Gregory Regional Park (the Project Site) is located at 24171 Lake Drive within the community of Crestline, in the San Bernardino National Forest of the San Bernardino Mountains; refer to [Exhibit 1, Regional Vicinity](#). The lake is bounded by Lake Drive to the north and northeast, San Moritz Drive to the southeast and south, and Lake Gregory Drive to the west; refer to [Exhibit 2, Site Vicinity](#). On the western shore of the lake is a u-shaped swimming beach that is the focus of the proposed beach improvements. The Lake Gregory Dam is located in the northeast section of the lake with Camp Switzerland stockpile basin to the north of the dam. The Library stockpile basin is located to the west of the swimming area.

The Project Site is a man-made 84-acre reservoir located Crestline. The lake was created with the construction of an earthen dam built in 1938 along the northeast shoreline. It has an approximate 90-acre surface area. On the western shore of the lake is a u-shaped swimming beach that is the focus of the proposed beach improvements. The lake is bounded by Lake Drive to the north and northeast, San Moritz Drive to the southeast and south, and Lake Gregory Drive to the west. The Lake Gregory Dam is located in the northeast section of the lake with Camp Switzerland and stockpile to the north of the dam. The library stockpile is located to the west of

the swimming area. The lake and surrounding shoreline are considered highly disturbed and in an urbanized setting.

REGULATORY DATABASE REVIEW

The governmental sources have been searched by LightBox (at the request of Michael Baker) for sites within the Project Site and within an approximate one-mile radius of the Project Site boundaries. Upon completion of their search, LightBox provided Michael Baker with their findings dated September 28, 2023; refer to Attachment A, Radius Map Report. Michael Baker makes no claims as to the completeness or accuracy of the referenced sources. Our review of LightBox's findings can only be as current as their listings and may not represent all known or potential hazardous waste or contaminated sites. To reduce the potential for omitting possible hazardous material sites on the Project Site and within the surrounding area, sites may be listed in this report if there is any doubt as to the location because of discrepancies in map location, zip code, address, or other information.

Project Site

The Project Site (Lake Gregory Creation Company at 24171 Lake Drive) is listed in multiple databases related to water quality permits; refer to Exhibit 3, Regulatory Database Listing Map. Reported activities include a silt management project in 2013 through 2015, dam rehabilitation improvements; and storm water construction activities involving stormwater quality permits. The Project Site has not been under investigation for violation of any environmental laws, regulations, or standards, as identified in the databases reported by LightBox. No reported releases of hazardous materials are noted. It is acknowledged that the placement of silt would be required to comply with existing federal, state, and local laws and regulations pertaining to the placement of fill material. It is the opinion of Michael Baker that these past on-site operations do not present a concern to soil, soil gas, and/or groundwater at this time.

Off-Site Properties

Public records identified multiple off-site listed regulatory properties within a one-mile radius of the Project Site; refer to Attachment A. The following discusses listed regulatory properties that present a concern to soil, soil gas, and/or groundwater at the Project Site, solely based on the database report (Attachment A).

Adjoining Properties

Public records identified nine (9) listed regulatory properties adjoining the Project Site (off-site properties that are contiguous to the Project Site boundaries). Of the nine properties, the following three adjoining facilities present a concern to soil, soil gas, and/or groundwater at the Project Site, solely based on the database report:

- Crestline Sanitation District Office Crestline Station (24516 Lake Drive) – This property is reported as the Crestline Sanitation District maintenance and district office facilities. This operation is reported as a small quality generator. Reported hazardous materials include the presence of waste oil and mixed oil, asbestos-containing waste, unspecified oil-containing waste, and other organic solids. Disposal methods were reported as treatment/recovery, disposal, landfill, recycler, and storage, bulking and/or transfer off-site. Reported violations appear to be administrative and these violations were reported to return to compliance. The database report also noted the presence of underground

storage tank(s) (USTs). Two USTs are reported to contain premium and diesel fuels, which were reported to release hazardous materials to the groundwater aquifer in 2004. The case received case closure on March 20, 2006 by the Regional Water Quality Control Board (RWQCB).

Although this facility has achieved case close, this site continues to operate USTs adjoining the Project Site. As such, it is the opinion of Michael Baker that this facility remains a concern to soil, soil gas, and groundwater underlying the Project Site.

- Bills ARCO (24157 Lake Drive) – This property is anticipated to have historically operated as a gasoline service station from 1972 through 1985. No other databases were reported. Given this property adjoins the northern portion of the lake, it is the opinion of Michael Baker that this facility presents a concern to soil, soil gas, and groundwater underlying the Project Site.
- Mountain Area Regional Transit Authority and Lee's Automotive (621 Forest Shade) – This facility currently, and historically, operates as an automotive service facility (currently for fleet vehicles and historically as a retail auto service shop). Given the current fleet vehicle maintenance activities that adjoin the lake to the west, it is the opinion of Michael Baker that this facility presents a concern to soil, soil gas, and groundwater underlying the Project Site.

Adjacent Properties

Public records identified 18 listed regulatory properties adjacent to the Project Site (off-site properties that are not contiguous to the Project Site boundaries). The following discusses listed adjacent regulatory properties that present a concern to soil, soil gas, and/or groundwater at the Project Site, solely based on the database report.

- Seven-11 Store #23818 (24156 Lake Drive) – This facility, located approximately 300 feet to the north of the western portion of the lake, currently operates a gasoline service station with USTs. Based on the database report, gasoline was released to the groundwater aquifer. Although remediation and monitoring are noted, the case remains open with the RWQCB. Further secondary compliance/leak detection violations were noted; although the facility returned to compliance.

Given the open case status, and the proximity to the lake, it is the opinion of Michael Baker that this off-site gasoline service station presents a concern to groundwater underlying the Project Site.

Unmapped Properties

According to LightBox's *ESA Report Desktop Reference*, dated 1996, some reported sites (Unmapped Properties) are unmappable as exact locations remain undefined. Listings in publicly available records, which do not have adequate address information, are not generally considered practically reviewable. For the purposes of this Memorandum, practically reviewable is defined as information provided in a manner and in a form that yields information without the need for extraordinary analysis of irrelevant data. Although the location of these sites may be unknown, the site and detail information are often available through LightBox.

Michael Baker's review of Unmapped Properties consisted of a verification that the Project Site is not listed (i.e., referenced by name or street address) and a review to identify if any of the Unmapped Properties cause a moderate to high potential to contaminate groundwater that underlies the Project Site. No Unmapped Properties are reported within the boundaries of the Project Site. Other than Crestline Sanitation District Office Crestline Station (24516 Lake Drive) discussed above, contaminated groundwater underlying the Project Site as a result of one or more of the reported off-site Unmapped Properties is considered to be low due to the groundwater flow direction, status of the site, and/or the distance from the Project Site.

FINDINGS/OPINIONS

The following are findings and opinions and are considered preliminary. Michael Baker's scope of work included research of available Federal, tribal, State, and local regulatory databases to verify if listed regulatory sites or hazardous wastes have been reported within or near the boundaries of the Project Site. Michael Baker did not conduct any work to satisfy the conditions of ASTM 1527-21 (i.e., file reviews, historical records review, site visit, interviews, etc.). Michael Baker did not review historical documentation or other available public records other than the Regulatory Database Search provided by LightBox. Based on the Radius Map Report reviewed during the preparation of this Memorandum, the following are Michael Baker's opinions, in accordance with the scope-of-services, and subject to the limitations thereof, with regard to on-site hazardous materials:

- It is the opinion of Michael Baker that the following off-site adjoining facilities present a concern to soil, soil gas, and/or groundwater underlying the Project Site:
 - Crestline Sanitation District Office Crestline Station (24516 Lake Drive)
 - Bills ARCO (24157 Lake Drive)
 - Mountain Area Regional Transit Authority and Lee's Automotive (621 Forest Shade); and
 - Seven-11 Store #23818 (24156 Lake Drive).

CEQA Considerations

The following are hazardous materials-related considerations pursuant to the California Environmental Quality Act (CEQA), Appendix G, *CEQA Threshold of Significance*:

IX(b) – Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

The Project involves improvements to two debris/sedimentation basins, construction of headwalls around lake inlets, reconstruction of an ephemeral stream, improvements to the Swim Beach area, and implementation of an on-going lake maintenance program. Construction and operation of the Proposed Project would not involve hazardous materials that may result in a significant hazard to the public or to the environment. The placement of silt associated with Project buildout would be required to comply with existing federal, state, and local laws and regulations pertaining to the placement of fill material.

Maintenance of the lake entails a number of maintenance activities that are limited to the off-season, non-operational period only for health and safety reasons. While some maintenance activities are required to be conducted during the park operational season. The process of keeping

the lake aesthetically and functionally optimal consists of a number of operational and maintenance procedures. Further, no known soil contamination has been reported within the Project Site. Pursuant to the Clean Water Act Section 401 Certification (33 U.S.C. Section 1341), the Project would be required to comply with best management practices (BMPs) including the proper disposal of dredged materials. If hazardous materials are detected, the materials shall be properly disposed of in accordance with Federal and State requirements. Compliance with these O&M activities as well as existing laws and regulations would ensure impacts are less than significant.

Implementation of the Proposed Project would require a Clean Water Act Section 401 Certification from the Lahontan Regional Water Quality Control Board to ensure that the proposed Project would not violate State water quality standards. Implementation of the Project would involve notification and procurement of necessary permits and authorizations. Notification to the Lahontan RWQCB and coordination for attainment of the necessary CWA 401 Certification would ensure that the Proposed Project would not violate water quality standards or waste discharge requirements. Per the requirements of the National Pollutant Discharge Elimination System (NPDES), the Project contractor would be responsible for submitting to San Bernardino County, copies of the approved General Construction Permit, including an approved Stormwater Pollution and Prevention Plan (SWPPP). Best Management Practices (BMPs) to be implemented during Project construction activities would be outlined in the SWPPP. The NPDES General Permit requires the proper handling and discharge of harmful pollutants that could affect water quality in the area. Therefore, compliance with the NPDES General Permit would ensure that any harmful pollutants or hazardous materials contained within any excavated materials, if present, would be properly handled and disposed of to prevent unsafe exposure to construction workers.

In the event that hazardous materials are encountered in soil/water during dredging activities, off-site transport and disposal of hazardous materials may occur. Specifically, the handling, transport, and disposal of hazardous materials are regulated by the DTSC, CalEPA, Cal/OSHA, OCHCA, and NBFDD. The Project construction contractor would also be subject to the requirements of the Cal/OSHA and OCHCA governing removal actions. Further, DTSC regulations would require specific hazardous materials handling methods, truck haul routes, and schedules to minimize potential exposure during hazardous materials removal actions, if any.

With adherence to the mandatory requirements of affected regulatory agencies regarding the handling, transport, and disposal of hazardous materials, and compliance with the Clean Water Act Section 401 Certification process and the NPDES General Permit requirement and Government Code Section 4216 et seq., potential handling of hazardous substances in dredged materials would result in a less than significant impact.

IX(d) – Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

Based on the public records reviewed as part of this Memorandum, the Project Site is not located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 (otherwise known as the “Cortese List”). Therefore, no impacts would result in this regard.

Conclusion

It is the opinion of Michael Baker staff that impacts pertaining to these CEQA thresholds of significance, based on the information presented in this Memorandum, would likely be less than significant or no impact. No mitigation measures are anticipated to be required. However, it is acknowledged that this determination would have to be reviewed and confirmed by the CEQA Lead Agency in accordance with CEQA.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

EXECUTIVE SUMMARY

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

CERS:

Name: CRESTLINE SANITATION DISTRICT- DISTRICT OFFICES / MAINTENANCE FACILITY
Address: 24516 LAKE DRIVE
City,State,Zip: CRESTLINE, CA 92325
Site ID: 108785
CERS ID: 10038562
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 108785
Site Name: Crestline Sanitation District- District Offices / Maintenance Facility
Violation Date: 05-26-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 05/26/2020. Observed (1) 120 gallon container of lubricating oil and (1) 251 cubic foot cylinder of oxygen, that were not disclosed in the hazardous materials inventory submitted via CERS on 12/30/2019. Violation corrected on site; operator resubmitted a complete and accurate hazardous materials inventory via CERS.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 108785
Site Name: Crestline Sanitation District- District Offices / Maintenance Facility
Violation Date: 05-26-2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/10/2020. Observed (3) 55 gallon drums of used lubricating oil and (1) 55 gallon drum of waste antifreeze to have content and exceeded the accumulation time frame for the facility. The accumulation start date on the hazardous waste labeling affixed to those drums was disclosed as 10/04/2019. CORRECTIVE ACTION: Sign the Certificate of Compliance indicating that all hazardous waste

S102423521

Violation Notes: Returned to compliance on 09/22/2014. THE SMARTSENSOR SETUP WAS DEFICIENT AT THE TIME OF INSPECTION. NEITHER S1 NOR S2 WERE CORRECTLY PROGRAMMED FOR POSITIVE SHUTDOWN IN THE VENT OF A NO VACUUM ALARM. REQUIREMENT: NO VAC ALARMS WERE ADDED DURING THE INSPECTION FOR S1 AND S2 UNDER THE PROGRAMMING FOR TANK 3. POSITIVE SHUTDOWN CONFIRMED; VIOLATION CORRECTED. CARE MUST BE OBSERVED DURING REPROGRAMMING THE SENSOR SET-UP FOLLOWING COLD STARTS (WHICH HAS OCCURRED AT LEAST TWICE IN THE LAST TWO YEARS).

Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 867
Site Name: 7-ELEVEN INC. #23818
Violation Date: 08-19-2016
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665

Violation Description: Failure of the overfill prevention system to meet one of the following requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 10/04/2016. COMPLIANCE ACTIVITY (10/04/2016): FACILITY SUBMITTED COMPLIANCE DOCUMENTATION. OBSERVATION: THE 91-ATG FLOATS DETACHED FROM UNIT. COMPLIANCE REQUIREMENT: SUBMIT A COPY OF THE WORK ORDER DOCUMENTING THE REPAIR/ REPLACEMENT AND FUNCTIONALITY OF THE 91-ATG PROBE.

Violations:

Site ID: 50602
Site Name: MTN AREA REGIONAL TRANSIT AUTHORITY
Violation Date: 04-05-2018
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Returned to compliance on 09/05/2018. OBSERVATION: Owner/Operator failed to comply with maintaining copies of manifests for three years. CORRECTIVE ACTION: Ensure that all wastes transported on a consolidated manifest meet all consolidated manifest requirements, and maintain copies of manifests for three years.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 50602
Site Name: MTN AREA REGIONAL TRANSIT AUTHORITY
Violation Date: 04-05-2018
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 09/05/2018. OBSERVATION: Uniform Hazardous Waste Manifests for waste coolant were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for waste coolant and submit copies to the CUPA.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 50602
Site Name: MTN AREA REGIONAL TRANSIT AUTHORITY
Violation Date: 04-05-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/05/2018. OBSERVATION: 55-gallon drum of used oil located in the hazardous waste storage area was observed without the following information on the label: Physical State, Hazardous Properties, and Accumulation Start Date. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violations:

Site ID: 394949
Site Name: Huston Creek Wastewater Treatment Plant
Violation Date: 05-26-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 05/26/2020. Observed (1) 350 gallon container of diesel and (1) ~30 gallon container of diesel, which was not disclosed in the hazardous materials inventory submitted via CERS on 12/30/2019. Violation was corrected on site at the time of the inspection; operator resubmitted an accurate and complete hazardous materials inventory via CERS.

Feature Description: The Air Force acquired 8.247 acres via a special use permit from the Department of Agriculture, U.S. Forest Service, on 19 November 1943. By November 1946, the site had expanded to 40 acres. The site was established as a radio forward relay station for the San Bernardino Army Airfield. The extent to which military improvements were constructed on the site is unknown. The site is not identified on a 1949 Real Estate Map for Norton AFB (previously known as San Bernardino Army Airfield) so it is assumed that the permit was terminated,-some-time prior to that year. There are no known military

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/22/2023	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 08/14/2023	Last EDR Contact: 09/20/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/01/2024
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: (415) 495-8895

	Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/25/2023	Source: Department of the Navy
Date Data Arrived at EDR: 05/31/2023	Telephone: 843-820-7326
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/02/2023
Number of Days to Update: 54	Next Scheduled EDR Contact: 11/20/2023
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695
Date Made Active in Reports: 07/24/2023	Last EDR Contact: 08/21/2023
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/04/2023
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/22/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/23/2023	Telephone: 703-603-0695

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

Data Release Frequency: Quarterly

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Next Scheduled EDR Contact: 11/06/2023
Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022
Date Data Arrived at EDR: 11/16/2022
Date Made Active in Reports: 02/06/2023
Number of Days to Update: 82

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
