ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS AND STATEMENT

AYESHA SYEDA, M.S.

Ms. Syeda began working in the environmental industry in 1986 while attending university in India where she obtained her Bachelors of Science degree in Civil Engineering. Upon coming to the United States, she continued to work as an intern while furthering her education at the California State University, Long Beach, obtaining her Masters of Science degree in Environmental Engineering. Ms. Syeda has performed hundreds of Phase I Environmental Site Assessments since 1993 and currently oversees, manages and reviews all Phase I and Phase II Environmental Site Assessment's performed by Smith-Emery Laboratories. A copy of Ms. Syeda's resume is included in Appendix C.

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312."

Respectfully submitted,

Smith-Emery Laboratories

AYESHA SYEDA
M.S. Environmental Engineering
Manager of GeoServices

AS/AA

EXECUTIVE SUMMARY

Smith-Emery Laboratories (SEL) has performed a Phase I Environmental Site Assessment at 130 West College Street in the City of Los Angeles, County of Los Angeles, and State of California. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (US EPA) all appropriate inquiry (AAI) standard and the American Society of Testing and Materials ASTM E 1527-13 scope of work.

SITE DESCRIPTION

The subject property is located between North Main Street and North Alameda Street, south of West College Street. North Alameda Street becomes North Spring Street as it continues north past West College Street. The property consists of seven (7) Assessor's Parcel Numbers: 5409-008-001, 5409-008-002, 5409-008-003, 5409-008-004, 5409-008-005, 5409-008-006, and 5409-008-015. The property is approximately 2.24 acres in size and is occupied by Mission Transportation for school bus parking purposes with approximately 127 parking stalls. No structures are present onsite, but the following were observed on the property: a storage container on the north-northwestern corner; an Electric Vehicle (EV) charging station on the central portion; portable restrooms on the northwestern portion; an electric panel board on the northern portion; and eleven (11) 55-gallon drums filled with soil cuttings on the northwestern corner.

SITE HISTORY

According to SEL's interpretation of the historical research data, prior to 1888, five (5) retail stores, two (2) dwellings, two (2) restaurants, one (1) lodging, and a shoe/cotton retail store were observed on the western portion of the Site with remaining areas as vacant land. South Pacific Railway Co.'s railroad tracks were present on the western portion of the Site from at least 1906 to the early 1980s. Records dated 1940 and 1960 indicated Pacific Motor Trucking Co. was engaged in automotive fueling on the western portion. A variety of commercial and industrial operations were present on the eastern portion of the Site, including retail stores, warehousing, light manufacturing, offices, factories, multiple machine shops, chemical mixing areas, steel storage tanks, foundry area, gasoline equipment, brush manufacturing, paint booths, and a chemical factory/plant. A large building on the eastern portion of the Site was occupied by Keystone Ironworks in 1906, Sparling Meter Company in 1954 and 1957, and Water Meter Manufacturing in 1950 and 1953. From 1960 to 1970, the Site was used mainly for offices, to manufacture gym equipment and to store a variety of materials, including school equipment, iron, and other goods. By 1992, all the onsite structures had been demolished and the lot was cleared. Since 2002, the property has been occupied by Mission Transportation and used to park school buses.

HAZARDOUS SUBSTANCE SEARCH

State Agencies

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits, air emissions, and site investigation files for the subject property. Additionally, the State Water Resources Control Board's (SWRCB) GeoTracker, SCAQMD's online Facility Information Detail (FIND), and DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS) online databases were searched for information on the subject property to identify any evidence of previous or current hazardous material usage.

- No files for the subject property were available from the above sources.

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder, formerly known as the California Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System, was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

City/County Agencies

The Los Angeles County Fire Department Health and Hazardous Materials Division (LACFD HHMD) and the City of Los Angeles Bureau of Sanitation (LABS) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. Additionally, the Los Angeles City Fire Department Certified Unified Program Agency (LAFD CUPA) online Active and Inactive CUPA Regulated Facilities and Underground Storage Tank databases, which include Active and Inactive Underground Storage Tank (UST), Active and Inactive Hazardous Materials Inventory (HazMat), and Underground Storage Tank Historical Files, and the LACFD HHMD Active and Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for information pertaining to the subject property.

- No files for the subject property were available through LACFD HHMD, LABS, or the LACFD HHMD online databases.

- The following information was obtained from LAFD CUPA in response to our requests:

  Pacific Motor Trucking Co. (860 North Spring Street) – The corporation was issued a permit dated June 18,1940 to operate two 550-gallon (Rheem) gasoline USTs located 6' and 8.5' east of the west property line along North Alameda Street between Bruno Street and West College Street. Additionally, the corporation was issued another permit dated December 31, 1940 to operate the site as an auto fueling station for private use with two USTs totaling 1,100-gallon capacity.

  Pacific Motor Trucking Co. (130 West College Street) - The corporation was issued a permit dated July 18, 1960 to operate the site as an auto fueling station.

  D & S Ingredients (130 West College Street) -A permit dated July 17, 1979 was issued to D & S Ingredients to install a tank. An attached plot showed a pump island east of a concrete loading dock, and a 8,000-gallon tank with an associated 4 inch fill pipe in the southwest portion of the site near the intersection of railroad tracks and Bruno Street.

  D & S Ingredients dba Transporting (130 West College Street) - A permit was issued to D & S Ingredients dba Transporting dated May 22, 1986 to abandon a tank; the tank was reported to be 8,000-gallon in size that was installed in 1971; per a site plot, the tank was 80 feet south of College Street and 75 feet east of Alameda Street and no visible soil contamination was reported to be found during removal.

The City of Los Angeles NavigateLA Online Mapping System was reviewed to obtain substructure maps for the subject property.

- A review of the substructure maps identified no USTs or other substructure features in the area of the subject property.

Agency File Review Limitations

SEL has received agency responses to all our inquiries for the subject property; there were no agency file review limitations.

VAPOR ENCROACHMENT CONDITION (VEC)

Volatile Organic Compound Vapor Encroachment

The encroachment of hydrocarbon and volatile organic compound (VOC) vapors into soil pore space occurs when organic chemicals migrate from contaminated groundwater or soil into the airspace between soil particles. Some typical organics involved are petroleum based or chlorinated solvents (e.g, BTEX and dry cleaning chemicals). They may have leaked into the groundwater and/or soil from underground storage tanks, or buried waste, or from disposal in septic systems. ASTM Standard E2600-15 (Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions) defines the term "Vapor Encroachment Condition (VEC)" as the presence or likely presence of "chemical of concern" vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property as identified by the Tier 1 or Tier 2 procedures.

In compliance with ASTM Standard E2600-15, SEL evaluated the potential for a VEC at the subject property. Based on the known impacted subsurface soil vapors discussed in section 3.3.7, and the reported USTs at the subject property, it is SEL's opinion that a VEC exists at the subject property.

REGULATORY DATABASE RESEARCH

In addition to the above agency inquiries and database searches, an outside information service, EDR, was contracted to perform a database search of government record sources. That search identified the information below:

Subject Property

D & S Ingredient Transfer Co (130 West College Street) – The subject property is listed on the following regulatory databases: Underground Storage Tank (UST), Facility Inventory Database (CA FID UST), Statewide Evaluation and Planning System (SWEEPS UST), and Hazardous Substance Storage Container Database (HIST UST). According to the listings, one 8,225-gallon diesel UST was reported with inactive status that was installed in 1978. No further information is provided. Please refer to City/County Agencies Section below for more details.

International Bank Property (943 Main Street) - The subject property is listed on the following regulatory databases: California Environmental Reporting System (CERS) and Cleanup Program Sites - Spills, Leaks, Investigations and Cleanup (CPS-SLIC). According to the listings and information from the State Water Resource Control Board's GeoTracker database, the subject property has case closed status as of September 26, 1997. The site received closure based on Phase II section 3.3.7.

860 North Spring Street – The subject property is listed on the UST database. According to the UST information provided, this site was categorized as "historical" as of January 1, 1900 with no further information provided. The designation of "historical" means that the regulatory agency no longer has a need to pursue further investigations with respect to the listing. The January 1, 1900 date is a default designation unrelated to property operations. It is important to note that the regulatory database did not provide any details about site conditions.

Adjacent Site and Sites within Immediate Vicinity

129 West College Street – The north adjacent property (hydrologically up-gradient) across West College Street is listed on the UST database. According to the UST information provided, this site was categorized as “historical” as of January 1, 1900 with no further information provided. The designation of "historical" means that the regulatory agency no longer has a need to pursue further investigations with respect to the listing. The January 1, 1900 date is a default designation unrelated to property operations. It is important to note that the regulatory database did not provide any details about site conditions. According to the LAFD records research, the site was occupied by Southern Pacific Railway Company. It was permitted in 1960 for using hazardous flammable liquid and in 1965 for an auto fueling station. The capacity, former contents, installation, and decommissioned dates, however, were not provided. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, this listing is not expected to represent a significant environmental concern for the subject property.

Freight Sheds B&C (117 West College Street) - The north adjacent property (hydrologically up-gradient) across West College Street is listed on the following databases: CA FID UST, SWEEPS UST, and HIST UST. According to the information provided on these databases, one 500-gallon regular unleaded UST was reported with active status under the ownership of Southern Pacific Transportation. No further information is provided. The installation and decommissioned dates, however, were not provided. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, this listing is not expected to represent a significant environmental concern for the subject property.

Biner Ellison (1001 North Main Street) - The northeast adjacent property (hydrologically cross-gradient) across West College Street is listed on following databases: Resource Conservation and Recovery Act-Small Quantity Generator (RCRA-SQG), Facility and Manifest Data (HAZNET), Hazardous Waste Tracking System (HWTS), Facility Index System/Facility Registry System (FINDS), and Enforcement and Compliance History Information (ECHO). According to the RCRA-SQG information provided, Biner Ellison registered as a small quantity generator of hazardous waste on May 21, 1993 and as a large quantity generator on November 13, 1980. No violations were identified. According to the FINDS and ECHO listings, the site was listed under registry identification number 110002899392. No further information was provided. According to the HAZNET database, the site generated between 0.13 and 0.93-tons of hazardous waste in the form of other organic liquids with metals (alkaline solution (pH >= 12.5) with metals), and aqueous solution with total organic residues less than 10 percent annually from 1998 to 2002. Hazardous waste was disposed via a transfer station. According to HWTS listing, the site obtained EPA ID CAD983668633 in 1995 and was inactive as of 2004. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, the aforementioned listings are not expected to represent a significant environmental concern for the subject property.

Fueling Station Former / Carrasco Ernest & Orlando / Carrasco Bros. (1135 And 1137 North Alameda Street) - The west adjacent property (hydrologically up-gradient) across North Alameda Street is listed on the following databases: Hazardous Waste and Substances Sites List (CORTESE), CERS, Leaking Underground Fuel Tank Report (LUST), EDR Exclusive Historic Gas Stations (EDR Hist Auto), HIST UST, CA FID UST, and SWEEPS UST. According to the EDR Hist Auto listing, the property operated as a gasoline service station from at least 1969 to 2005. No further information is provided. According to the HIST UST, UST, SWEEPS UST, and FID UST information provided, Carrasco Orlando installed six USTs (2,000-gallon, 5,000-gallon, and 8,000-gallon unleaded, 2000-gallon and 5,000-gallon regular unleaded, and one unknown size waste oil). According to the LUST listing and information from the State Water Resource Control Board's

GeoTracker database, an unauthorized release of gasoline that impacted soil was discovered on site on October 25, 2014. The Los Angeles Regional Water Quality Control Board (LARWQCB) provided regulatory oversight and closure on February 12, 2016. Based on the case closure status and relative distance from the subject property across North Alameda Street, the aforementioned listings are not expected to represent a significant environmental concern for the subject property.

No other adjoining or properties within immediate vicinity (within 100-feet) are listed on any of the regulatory databases researched or the listings are not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, do not indicate a known chemical release, and do not indicate a property use where the use of hazardous chemicals would be expected.

NON SCOPE CONSIDERATIONS

The subject property is presently vacant land and no structures are presently located onsite; hence, the potential for the presence of asbestos, lead based paints or mold is low.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the subject site located at 130 West College Street in the City of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the various sections of this report. This assessment has revealed no evidence of recognized environmental conditions or de minimis conditions in connection with the subject property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS (REC)

The historical industrial uses of the subject property for over 80 years (which include a chemical factory, foundry, paint booths, manufacturing, machine shops, and historical USTs), together with prior detections of PCE/TCE and other VOCs in both subsurface soils and soil vapor at levels in prior environmental investigations exceeding the current DTSC and RSL screening values as discussed in section 3.3.7, is considered to be a REC.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

In our expert opinion and based on the analysis in this report, no HRECs were identified during the course of this assessment.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

In our expert opinion and based on the analysis in this report, no CRECs were identified during the course of this assessment.

DE MINIMIS CONDITIONS

In our expert opinion and based on the analysis in this report, no de minimis conditions were identified during the course of this assessment.

RECOMMENDATIONS

Based upon the foregoing, SEL recommends that additional Phase II work be performed and that the property be surveyed for the presence of any remaining underground tanks and piping.

1.0 INTRODUCTION

At the request of S&R Partners, LLC (User), Smith-Emery Laboratories (SEL) performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E 1527-13 at the site located at 130 West College Street, City of Los Angeles, California as shown on the Vicinity Map Plate. The layout of the site and the adjacent sites are shown on the Site Schematic Plate. The layout of the site is shown in the Subject Site Diagram Plate No. 1 and 2. Photographs of the site are displayed as Photo Plates. Subject site documentation is included in Appendix A. The regulatory database report is included in Appendix B. References and contractual conditions are included in Appendix C. The purpose reported by the User for the completion of the Phase I was for development entitlement application.

1.1 Purpose

The purpose of this ESA is to identify "Recognized Environmental Conditions" (REC), Historical RECs (HREC), or Controlled RECs (CREC) as defined by ASTM Standard E1527-13 affecting the subject site. This ESA was performed to satisfy one of the User's requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-13 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B). RECs are defined in the ASTM E 1527-13 Standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The definitions of RECs, HRECs, and CRECs are as follows:

- REC - is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment or under conditions that pose a material threat of a release to the environment (de minimis conditions are not RECs).
- Historical REC (HREC) - is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed in a manner accepted by the applicable regulatory authority without subjecting the property to any activity and use limitations.
- Controlled REC (CREC) - is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that subjects the property to activity and use limitations.

1.2 Report Shelf Life

In conformance with the ASTM Practice E 1527-13, this Phase I Environmental Site Assessment is valid for 180 days from the date of this report. After 180 days from the date of this report, the following sections may be updated up to one year from the date of this report: Environmental Professional Statement; Site Reconnaissance; Interviews; Environmental Lien Search; and Regulatory List Review.

1.3 Scope of Work

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E1527-13 and included the following: Subject site reconnaissance and survey of surrounding land use from publicly accessible areas; Review of historical aerial photographs, Sanborn Maps, and City Directory listings; Review of environmental Liens and other User Provided Information; Interviews with available and cooperative current site occupants/owners, past site occupants/owners, and government officials; Regulatory Database Report Review; Review of the history and past usage of the referenced site and surrounding properties; Summary of regional geology and hydrology; Review of files at local, state, and federal agencies to identify spills, tank leaks, hazardous materials storage, oil wells, underground tanks, landfills, or industrial discharge in the site vicinity; Evaluation of the potential for the presence of current or historical petroleum activities and polychlorinated biphenyls (PCBs); Evaluation of the potential for vapor migration from adjoining/surrounding properties; Evaluation of the potential for the presence of non-scope considerations including asbestos containing building materials, lead based paints, mold, polychlorinated biphenyls (PCBs), and radon; Preparation of this report presenting our findings.

1.4 Non-Scope Considerations

The ASTM E 1527-13 Standard includes the following list of "additional issues" that are non-scope considerations outside of the scope of the ASTM Phase I practice: asbestos-containing materials, biological agents, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, and mold. A general opinion on non-scope items included in this Phase I are PCBs, mold, radon, lead-based paints and asbestos containing building materials.

1.5 Limits of Liability/Assessment

The findings, conclusions, and recommendations contained in this report are based on site conditions as they existed at the time of our investigation. Our review of all documents, lists, databases, and public agency files has been conducted with due diligence. However, our conclusions are based on available information and are further subject to constraints imposed by public agencies on review procedures and information retrieval. As a result, Smith-Emery Laboratories may have been unable to identify potential concerns.

Smith-Emery Laboratories assumes no responsibility for conditions that did not come to our attention despite reasonable care, or for conditions which were not generally recognizable as environmentally unacceptable at the time of this report. Opinions and judgments expressed are based on our understanding and interpretations of currently available regulatory standards and should not be construed as legal opinions or advice.

The factual data and interpretations contained herein pertain to the specific project described in this report and are not applicable to any other project or site. Our investigation was performed using the standard of care and level of skill ordinarily exercised under similar circumstances by reputable environmental assessors and geologists currently practicing in these or similar localities. No other warranty, express or implied, is made as to the conclusions and professional advice included in this report.

This Phase I ESA Report is compliant and consistent with the United States Environmental Protection Agency's 40 CFR Part 312 Standards and Practices for All Appropriate Inquiries and the ASTM E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, based on the information provided by the User. Smith-Emery Laboratories assumes no responsibility for errors or omissions of information provided by the User. Please note that the report does not address whether other requirements in addition to all appropriate inquiry have been met. Other requirements may include, but are not limited to, the continuing obligation not to impede the integrity and effectiveness of existing activity and use limitations (AULs), the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting information. This Report is not intended to be nor interpreted as Legal advice. Third party data and representations may have been utilized in providing the conclusions of this report, however, SEL does not verify the data, findings, or conclusions of third party providers, or attest to the completeness, accuracy, or adequacy of their work. SEL accepts no liability or responsibility for any data, representations, or conclusions made by third parties. Third party work is accepted and used solely on the basis of the certifications, registrations, and/or reputation of the parties completing the work. Please note that sampling and chemical analysis of air, soils, groundwater, and/or building materials was not within the scope of this investigation.

1.6 Reliance for User

This document has been prepared for the sole use and benefit of **S&R Partners, LLC**. Any reliance on this document by any other person or entity shall be at that party's sole risk. **S&R Partners, LLC** may designate assignees to this report, which may assume the same rights of reliance as **S&R Partners, LLC** for all errors and omissions. However, any potential assignee must provide Smith-Emery Laboratories with information necessary to update section 3.3 User Provided Information of this report, and is bound by the terms and conditions of the original contract. A copy of the original contract is provided in Appendix C of this Report.

2.0 SITE DESCRIPTION

2.1 Physical Setting

The subject property is located between North Main Street and North Alameda Street, West College Street and Bruno Street. Arroyo Seco Parkway (110) is located approximately 0.35 miles northwest of the subject property. The property is located approximately 0.5 miles west of the Los Angeles River, approximately 1.1 miles south-southwest of Elysian Reservoir, and approximately 1.5 miles southeast of Echo Park Lake, at an elevation of approximately 292 feet above mean sea level. Currently occupied by a parking lot, the property is located in a mixed commercial and industrial neighborhood.

2.2 Legal Description

Based on records available at the Los Angeles County Assessor's office website, the property is located in the City of Los Angeles, and State of California. The subject property consists of seven (7) Assessor's Parcel Numbers: 5409-008-001, 5409-008-002, 5409-008-003, 5409-008-004, 5409-008-005, 5409-008-006, and 5409-008-015. Copies of maps and relevant information are included in Appendix A.

2.3 Zoning / Land Use Records

According to information on file at the City of Los Angeles Department of Building and Safety website (http://zimas.lacity.org/), the subject property is located in an area zoned “[Q]C2-2-RIO and [T][Q]C2-2-RIO” for commercial usage. Copies of maps, zoning definitions, and other relevant information are included in Appendix A.

2.4 Current and Historical Addresses

Based on our research, 18 current and historical street addresses are associated with the subject property. These are 110, 114, and 130 College Street, 860 North Spring Street and 1140 Alameda Street, 117, 119, 130, and 131 Bruno Street, and 943, 945, 949, 953, 955, 959, 963, 971, and 973 North Main Street.

2.5 Regional Hydrogeology

The property is located approximately 0.5 miles west of the Los Angeles River, approximately 1.1 miles south-southwest of Elysian Reservoir, and approximately 1.5 miles southeast of Echo Park Lake, at an elevation of approximately 292 feet above mean sea level. The contour lines in the area of the subject property indicate the area is sloping toward the southeast.

Based on our review of the GeoCheck Section of the radius report provided by Environmental Data Resources, LLC (EDR), the subject property is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Surficial soil consists of Urban land with variable soil textures. The underlying hydrogeologic unit is comprised of sedimentary deposits that were laid down in stratified layers during the Cenozoic-Quaternary period. Subsurface soils beneath the site and surrounding areas consist entirely of Quaternary alluvium. The alluvium is composed of interbedded sands, silts and clays deposited by the Los Angeles River.

Kleinfelder performed a Phase II environmental assessment of the subject property in 1997. According to its report (dated September 16, 1997), nine borings (B-1 through B-9) were advanced. Soils consisted of brown silty sand to approximately 10 feet below ground surface (bgs), and sand from 10 feet bgs to approximately 31.5 feet bgs. Groundwater was encountered at approximately 29 feet bgs in boring B-2. Based on the contour lines in the area of the subject property, the groundwater is assumed to flow toward the southeast.

3.0 SITE RECONNAISSANCE/INTERVIEWS

3.1 Site Reconnaissance

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the property. Refer to Illustrations for site plots and photos. Our site observations are briefly summarized in the following tables:

Reconnaissance Date/ SEL Personnel/Escort(s)	November 4, 2022 / Ms. Ayesha Syeda and Mr. Afnan Asghar / Mr. Lewis Uyeke (owner's representative)	
Boundaries	W. College St. to the NE, N. Main St. to the SE, Bruno St. to the SW, and N. Alameda St. to the NW.	
Property Area	2.24 acres	
Number of buildings/sizes/age	A parking lot with no structures onsite.	
Onsite business(s)	Mission Transportation	
Site Operations	School bus parking with approximately 127 parking stalls.	
Interior areas	No structures are present onsite.	
Items observed onsite	A storage container was observed on northern corner of the property. An electric Vehicle (EV) charging station was observed on the central portion. Portable restrooms were observed on the northwestern portion. An electric panel board was observed on the northern portion.	
Additional areas	No additional areas were observed.	
Reconnaissance Limitations	No significant limitations were encountered during our reconnaissance of the site.	
Exterior items	The subject property is paved with asphalt.	
Additional Items	Aboveground Storage Tanks	Not Observed
	Underground Storage Tanks	Not Observed
	Drums / containers	Eleven (11); 55-gallon drums filled with soil cuttings were observed on northwestern corner of the subject property.
	Odors/Pools of Liquid	Not Observed
	Waste Water	Not Observed
	Unidentified Substance Containers	Not Observed
	Pole Mounted Transformers/PCBs	Pole-mounted transformers observed in good condition on northern portion along West College Street and Southeastern portion along North main Street. Approximately Five pad-mounted transformers were observed on central, eastern, southern, western, and northern portion of the subject property.
	Stained Soil or Pavement	Not Observed
	Pits/Ponds, Lagoons/Wells	Not Observed
	Solid Waste	Not Observed
	Evidence of Past Site Uses	Not Observed
	Evidence of Microbial Contamination (Mold) in visually accessible areas	Not Observed
Utilities	Heating / Cooling Systems	LADWP
	Potable Water Supply	LADWP
	Sewage Disposal System	Municipal

LADWP – Los Angeles Department of Water and Power

Site Reconnaissance Summary:

- The subject property is approximately 2.24 acres in size and is occupied by Mission Transportation for school bus parking with approximately 127 parking stalls. No structures are present onsite; a storage container was observed on the north-northwestern corner of the property. An electric Vehicle (EV) charging station was observed on the central portion. Portable restrooms were observed on the northwestern portion. An electric panel board was observed on the northern portion. Eleven (11) 55-gallon drums filled with soil cuttings were observed on northwestern corner of the property.

3.1.2 Adjacent Sites

The adjacent sites, their apparent uses, and observed environmental concerns, if any, are described in the following table.

ADJACENT SITE OBSERVATIONS

Direction Relative to Subject Site	Business Name / Residence	Adjacent Site Address	Site Use / Observed Environmental Concerns
North	Vacant lot	129 & 135 W. College St.	Lot / None
Northeast	Fu Yuan International Inc.	1001 N. Main St.	Commercial / None
East	StorQuest Self Storage	1010 N. Main St.	Commercial / None
Southeast	StorQuest Self Storage	1000 N. Main St.	Commercial / None
South	Commercial building	935 and 937 N. Main St.	Commercial / None
Southwest	Homeboy Industries Homegirl Café	130 Bruno St.	Commercial / None
West	North Alameda and railroad tracks beyond	N/A	Commercial / None

3.2 Interviews

Interviews with User were planned and conducted by Ms. Ayesha Syeda via written questionnaires. The objective of interviews is to obtain information indicating recognized environmental conditions in connection with the property. Copies of the questionnaires completed and the records of conversation pertaining to the interviews conducted are included in Appendix A.

3.2.1 Current Owner/Key Site Manager/Tenants

Mr. Lewis Uyeke (manager of Morlin Asset Management) stated that S&R Partners, LLC had owned the subject property since 1997. Mr. Uyeke also indicated that the subject property has been used by Mission Transportation since 2002 to park school buses. Mr. Uyeke indicated that no USTs are presently located at the subject property. According to Aaron Bidne (Director of Development from Granite Properties), the soil cuttings were generated on October 16, 2022 during the geotechnical investigation at the property in connection with a proposed building construction.

3.2.2 Previous Owners/Tenants

SEL attempted to identify contact information for individuals or businesses, for the purpose of conducting interviews of persons with past knowledge of the subject property, by conducting internet searches by business name and the name of individual identified, and by referral from persons currently associated with the site. None of the past owners or occupants were able to be contacted based on the contact information identified.

3.2.3 Regulatory Officials

Personnel at various regulatory agencies who were questioned about the subject site directed SEL to the paper files for review. The information obtained from the files is discussed in section 5.0 in the report.

3.3 User Provided Information

The User provided the following information, which was reviewed by SEL to help identify possible recognized environmental conditions relating to the property and for documenting the purpose of performing the Phase I. A copy of the information received from the User is included in Appendix A.

3.3.1 Environmental Liens/Activity and Use Limitations

No environmental liens and/or activity and use limitations research/reports were provided to SEL. According to the EDR regulatory database search report, there are no liens listed in the United States Environmental Protection Agency (US EPA)'s Federal Superfund Liens List, and no known recorded land-use environmental deed restrictions pertaining to the subject site listed in DTSC's liens database.

3.3.2 Specialized Knowledge or Experience

The User indicated that no spills and/or leaks have occurred at the subject property.

3.3.3 Actual Knowledge

The User stated that there are no environmental liens and/or activity and use limitations for the subject property.

3.3.4 Commonly Known/Reasonably Ascertainable Information

The User stated that the subject property has been used since 2002 by a bus company for parking. The User indicated that the previous owners of the East Tract (i.e., the eastern portion of the subject property) was International Bank Of California and the West Tract (i.e., the western portion of the subject property) was Union Pacific Railroad Company.

3.3.5 Reasons for Significantly Lower Purchase Price

According to the User, the property has no pending transaction; hence, this question is not applicable.

3.3.6 Reason for Conducting this Phase I ESA Report

The User indicated that the purpose of the Phase I report was for development entitlement application.

3.3.7 User Provided Documents

The User provided SEL with the following documents:
"Environmental Site Assessment Proposed California Highway Patrol Facility Alameda Street and College Street, Los Angeles, California" prepared by Leighton and Associates, Inc. dated July 1, 1996.
Per the Leighton Report, the northeastern portion of the subject property was used as a chemical plant, multiple machine shops, foundry, steam hammer shop, oil tool shop, and wood finishing shop. A permit, dated 1940, for the installation of two 550-gallon USTs was found for the 860 North Spring Street address. The permit indicated the USTs were to be installed 4-feet underground, 6 to 8 feet east of the property line along Alameda Street between Bruno and College Streets. No evidence of the USTs was observed during the site reconnaissance and no records were found that the USTs were removed.

In connection with its assessment, Leighton installed soil borings and submitted 19 soil samples for chemical analyses. Seven (7) samples contained detectable concentrations of SVOCs, including bis (2-Ethylhexyl) phthalate, di-n-butyl phthalate, and phenols. All detected concentrations were 2 to 6 orders of magnitude less than the USEPA Preliminary Remediation Goals for industrial site soil at the time of the report. Leighton concluded that the detected

chemicals, especially the phthalate compounds, could have been the result of laboratory induced contamination.

SEL compared the detected SVOC concentrations to current Regional Screening Levels (RSLs). There were no exceedances.

Leighton identified nothing it its assessment that it believed should preclude acquisition and development of the property for a Highway Patrol Facility, as then contemplated. However, given the history of industrial activities on the site, Leighton concluded that there remained a significant potential for latent adverse environmental conditions on the property.

Leighton also recommended (i) conducting a supplemental environmental investigation in areas proposed for excavation once the final building plans were developed for the site and (ii) a subsurface geophysical investigation to determine if the two 550-gallon USTs, reportedly installed in 1940 on the 860 North Spring Street address, are present on the site.

"*Phase II Environmental Site Assessment 943-959 North Main Street and College Street, Los Angeles, California" prepared by* Kleinfelder *dated September 16, 1997.*

Kleinfelder performed soil gas and soil sampling as a follow-up to their "Phase I Environmental Site Assessment, 943-959 North Main Street, Los Angeles, California," report that was dated July 30, 1997. Please note that SEL did not receive a copy of the Phase I report from the User. Environmental concerns reportedly identified during the course of the Phase I environmental assessment were use of ten small steel storage tanks, a dye shop, a machine shop, a varnishing stack (exhaust pipe), a chemical warehouse and mixing area, two elevators, and two spray paint booths.

Nine soil vapor probes were advanced in areas of concern as identified in the Phase I ESA. The results were used in part to focus the soil sampling investigation for VOCs. Two vapor probes detected volatile organic compounds, SG-1 located in the former paint booth area (tetrachloroethene at 2.5 µg/L vapor in the 10 foot sample) and SG- 2 located in the former chemical mixing area (trichloroethene at 12 µg/L vapor and tetrachloroethene at 2.6 µg/L vapor in the five foot sample; trichloroethene at 6.4 µg/L vapor and tetrachloroethene at 1.7 µg/L vapor in the 10 foot sample). Based on these results the soil sampling program was focused in these areas for volatile organic compounds.

Kleinfelder advanced five borings (B-1 through B-5) on August 8, 1997. The borings were drilled to further assess the areas of concern identified in the Phase I ESA. Tetrachloroethene was detected at 16 parts per billion (ppb) and Trichloroethene at 95 ppb in the soil sample obtained from B-1 (former chemical mixing area) at five feet bgs. The sample obtained from B-1 at 10 feet bgs detected 12 ppb of Trichloroethene. No other analytes were detected at levels of concern.

Based on the above findings, four additional borings (B-6, B-7, B-8 and B-9) were drilled around B-1 on August 20, 1997. The borings were located approximately 15 feet north, south, east and west of B-1 to assess the lateral extent of the findings. Borings B-6, B-7, B-8 and B-9 were drilled to 20 feet bgs and sampled every five feet. Each soil sample was submitted to the analytical laboratory and analyzed for volatile organic compounds by EPA method 8260. All soil samples were non detect for Tetrachloroethene and Trichloroethene, however one sample, B-7 at 5 feet bgs detected 14 ppb of ethylbenzene and 42 ppb of total xylenes.

Soil conditions encountered consisted of a brown silty sand to approximately 10 feet bgs, and sand from 10 feet bgs to approximately 31.5 feet bgs. Groundwater was encountered at approximately 29 feet below ground surface in boring B-2.

Kleinfelder interpreted the results as indicating there to be limited risk of TCE and PCE soil impacts contributing to groundwater degradation due to the low concentrations detected and a distance above first encountered groundwater in excess of 29 feet bgs. Please note that the groundwater was not sampled.

Preliminary Remedial Goals (PRGs) for industrial sites have been set at 7.0 mg/kg, and 17 mg/kg for PCE and TCE. All of the samples analyzed were well below the PRGs established for industrial sites.

Kleinfelder noted that the California Regional Water Quality Control Board reviews PCE and TCE impacted sites on a case by case basis to determine cleanup levels that require remediation. Based on the information obtained from the field investigation and analytical results, Kleinfelder recommended that closure be sought from the Regional Water Quality Control Board (RWQCB) or the Los Angeles County Department of Public Works, Waste Management Division.

SEL compared the Kleinfelder 1997 analytical results with the current screening values: The PCE/TCE concentration found in soil vapors at three locations (SG-1, SG-2, and SG-3/ former paint booth/former chemical mixing area) at 5 and 10 feet bgs exceeded the current DTSC HERO-HHRA Note Number 3 and RSLs (using industrial site attenuation factor of 0.03). One location (B-

1/former chemical mixing area) out of six locations (B-1, B-3, B-6, B-7, B-8, and B-9) subsurface soils tested had concentrations of PCE/TCE in soils exceeding the DTSC and RSL screening values at depth of 5 and 10 feet bgs; one location (B-7/former chemical mixing area) had concentrations of Ethylbenzene and Total Xylenes above RSLs in subsurface soils.

SEL's opinion/recommendation

Based on the lack of any analytical testing results at the two historical USTs, known PCE/TCE impacted soil and soils vapors, SEL recommends performance of additional Phase II work.

4.0 HISTORICAL LAND USE

4.1 Sanborn Map Review

Sanborn Maps were originally compiled for fire insurance purposes. The Sanborn Fire Insurance maps were initially produced by private companies for the insurance industry to provide information regarding risks associated with fires in the structures and often contained detailed information regarding the history and past uses of a property as well as historical addresses associated with the site. Copies of Sanborn Maps are included in Appendix A. A summary of the available Sanborn Maps with information pertaining to the site and adjacent sites is tabulated as follows.

Date:	***1888 and 1894***
Subject Property:	Depicted as 5 retail stores, two dwellings, two restaurants, one lodging, and shoe/cotton retail store on the western portion of the Site with remaining areas as vacant land. By 1894, vacant land was observed.
North:	Depicted as roadway "College Street" and vacant land beyond. By 1894, industrial structure occupied by "F.L Stearns Machine Works" was observed in the southeastern portion with remaining portion depicted as vacant land.
South:	Depicted as roadway "San Francisco Street" and vacant land beyond.
East:	Depicted as roadway "Main Street" and industrial structure used as "HH. Conhlin's Foundry", "Willamette Steam", and "Stearns Manufacturing Company". By 1894, Keystone Iron and Brass Foundry was observed replacing all previous occupants.
West:	Depicted as roadway "Alameda Street" and residential dwelling was observed beyond.
Date:	***1906, 1950, 1953, 1954, 1957, 1960, 1964, 1965, 1968, and 1970***
Subject Property:	Depicted as rail spurs in the western portion with a foundry on the eastern portion in 1906, along with machine shops, a tank, and a gasoline engine. By 1954, Sparling Meter Manufacturing Company was observed on the eastern portion with 10 small steel tanks and two spray paint booth areas located on the southeastern portion.
North:	Depicted as roadway "College Street" and rail spurs oriented north-northeast across the parcel. A roadway "Prudent" parallel to the rail lines was shown in the central southeastern portion. A rectangular feature denoted "oil" was present along a platform in the northwestern portion. No significant changes noted since 1894 on the southeastern portion. By 1953, the southeastern portion was used for Machine Shop Painting and Pump Assembling; however, the remaining portion of the northern adjacent property is occupied by Southern Pacific Co. Freight House using railroad spurs.
South:	Depicted as roadway "Bruno Street" and commercial structures used as machines shops with a gasoline engine. By 1964, a new commercial structure was observed.
East:	Depicted as roadway "Main Street", and industrial structure used as machine shops occupied by "Pilgrim Iron Works" beyond. By 1950, a new machine shop and boiler shop was observed beyond North Main Street.
West:	Depicted as roadway "Alameda Street" and commercial structure used as restaurant was observed beyond. By 1950, gas and oil station observed beyond.

4.2 Aerial Photograph Review

Historical aerial photographs searches were conducted at EDR. The purpose of our review of aerial photographs was to examine the property and surrounding areas for any signs of potential negative environmental impact.

Items searched for in each photograph included, but were not limited to: evidence of tanks or gas stations on the subject or surrounding properties; evidence of any industrial site usage which may have impacted the subsurface soils; historical drains and water drainage pathways; areas which show evidence of drums or excessive debris; soil areas suspected as being discolored or stained;

areas of distressed vegetation, etc. Copies of available aerial photographs are included in Appendix A. The following descriptions are summaries of the aerial photographs as they appeared.

Date:	*1923, 1928, 1938, 1948, 1952, 1964, 1972, 1977, 1983, and 1989*
Subject Property:	Appeared as industrial structures on the eastern portion. The western portion was observed as railroad tracks until 1983 and later observed as storage yard on the western portion in 1989.
North:	Appeared as industrial structures. By 1989, vacant land was observed in western portion.
South:	Appeared as roadway and commercial structure beyond. By 1928, residential dwellings were observed beyond. By 1964, new commercial structure with parking lot was observed.
East:	Appeared as roadway and industrial structure beyond. By 1972, new industrial structure with parking lot was observed beyond.
West:	Appeared as roadway and commercial structure beyond. By 1964, new commercial structure with parking lot was observed beyond.
Date:	*1994, 2002, 2005, 2009, 2012, and 2016*
Subject Property:	Appeared as vacant land as the industrial structures were razed to ground on the eastern portion and no railroad tracks were observed on the western portion. By 2002, parking lot was observed.
North:	Appeared as roadway, industrial structure in the southeast corner of the parcel and remaining parcel was vacant. In the year 2005, parking lot was observed in the western and north western portion.
South:	Appeared as roadway and commercial structure with parking space beyond. By 2009, new commercial structure was observed in the north western portion.
East:	Appeared as roadway and industrial structure beyond.
West:	Appeared as roadway and commercial structure with parking lot beyond.

4.3 Building Permit Review

Addresses for the subject property were reviewed at the City of Los Angeles Department of Building and Safety. The purpose of our review of building permits and other documents is to construct a chain of ownership and history of construction activities onsite.

Items considered in the course of building permit research included: construction or demolition of any structures that may have a potential negative environmental impact, previous site usage, previous ownership, and any other historical information. The following building permits were on file for the subject site. Copies of the building permits are included in Appendix A.

113 and 115 Bruno Street (Subject Property)

Date	Owner/Business	Comments
01/16/1929	Richard Livingston Corp./Shed	Demolish and remove the existing wood storage shed. (115 Bruno)
01/18/1929	Richard Livingston Corp./Light Manufacturing	Alteration permit for light manufacturing facility. (115 Bruno)
02/24/1937	Frank Livingston/Warehouse	Alteration permit for miscellaneous repair. (113 Bruno)

110 and 114 West College Street (Subject Property)

Date	Owner/Business	Comments
05/23/1929	Richard Livingston Inc./Chemical plant	Permit for constructing new two-story concrete building for chemical plant. (114)
07/24/1929	Richard Livingston Inc./Chemical factory	Permit for installing chute and land conveyor. (114)
07/29/1929	Richard Livingston Inc./Chemical factory	Permit for installing 12” retaining wall for tanks to be placed under sidewalk. (114)
04/23/1930	Richard Livingston Inc./Storage	Alteration permit. (110)
09/20/1948	Pacific Chemical Co.	Permit for brick-up 8 existing windows. (110-114)
05/12/1975	Hydro Oil/ Warehouse	Permit or demolishing portion of warehouse and convert to parking lot. (114-26 College St.)

130 West College Street (Subject Property)

Date	Owner/Business	Comments
03/06/1979	D& S Ingredients Transfer Com. Inc./Pumping Station	Permit for office, pump room, and boiler room. (130)
09/06/1979	D& S Ingredients Transfer Com. Inc.	Certificate of occupancy for 1-story,type V, 26' x 38' pumping station, G-1 occupancy. (130)
12/11/1981	D& S Ingredients	Certificate of occupancy for 1-story, type V, 10' x 8', canopy addition to an existing building creating a 26' x 46' building. G1 Occupancy. (130)

943-973 North Main Street (Subject Property)

Date	Owner/Business	Comments
01/27/1914	Pacific Copper & Brass Co. & Glass Co. / Factory	Plumbing permit. (943)
02/13/1915	Pacific Copper & Brass Co. & Glass Co. / Factory	Plumbing permit. (943)
10/27/1916	R. Livingston/Machine Shop	Re-roofing permit. (963)
04/25/1917	R. Livingston & Wm. Kay Crawford G./Manufacturing	Alteration permit for miscellaneous work. (945-951)
01/25/1929	Richard Livingston Corp./Store	Alteration permit for miscellaneous work. (973)
02/01/1929	R. Livingston Corp./ Vacant	Alteration permit for proposed restaurant. (973)
03/22/1929	Richard Livingston Inc./Shed	Permit for demolishing the shed building and haul away for future proposed factory usage. (953-973)
04/08/1929	Richard Livingston Inc./Manufacturing	Alteration permit. (943)
08/27/1929	Richard Livingston Inc./Restaurant	Alteration permit for adding toilet. (973)
04/11/1949	Richard Livingston Inc./Offices and Industrial	Alteration permit. (943-973)
08/12/1952	Richard Livingston Inc./Offices	Alteration permit. (973)
07/14/1958	Richard Livingston Inc./Wholesale Sales & Storage	Alteration permit. (951)
11/20/1958	P. Livingston/Warehouse	Re-roofing permit. (945)
03/25/1960	Richard Livingston Estate/Warehouse	Alteration permit. (953)
04/30/1962	George Wigmore, Inc./Office Building	Permit for termite repairs. (973)
12/04/1963	R. Livingston	Highway dedication permit, to comply with mile 6228. (943-973)
07/26/1965	Mr. Hanger/Warehouse	Permit for constructing interior stairs. (973)
08/04/1969	Paul Richard & Lenora Martha Carter/Warehouse	T.I. and change of usage from manufacturing to warehouse purposes. (945)
04/21/1980	Daing Dee & Yek K Yel/Storage & Retail Sales	Alteration permit. (945-973)
05/08/1981	Haly Yee Wong/ Storage	Alteration permit for new stairway to 2nd floor. (945)
01/06/1982	Doung Yep Yee/ Warehouse – Wholesale grocery	Permit for change of use to wholesale packaged grocery warehouse. (947)
07/10/1985	Mr. Hailt Wong/ Retail Stores	Permit for repairing damaged brick wall with new reinforced 8" concrete brick wall. (973)
04/21/1992	Mr. Wong/Warehouse	Permit for removing hazardous URM walls at 943-945 N. Main Street damaged by fire. (973)
05/05/1992	Mr. Wong/ Warehouse	Permit for demolishing the warehouse and clear the lot. (951-959)

Building Permit Summary:

- The earliest permit identified during the review was dated 1914 and issued to Pacific Copper & Brass Co. & Glass Co. for plumbing used for factory purposes. According to permits dated between 1914 and 1992, the site was used for retail, storage, light manufacturing, office, factory, warehouse, machine shop, restaurant, wholesale grocery warehouse, chemical factory/plant, and parking lot operations. By 1992, the subject property was permitted to be demolished and the lot was cleared.

4.4 City Directory Search

The purpose of the City Directory research was to determine the businesses that were historically located onsite. City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in particular. With each address the directory lists the name of the resident or if a business operated from this address, and a street index. While city directory coverage is usually comprehensive for major cities, it may be spotty for rural areas and small towns. The following tabulated information was listed for the subject and adjacent sites. A copy of the City Directory Research is included in Appendix A.

4.5 Historical Summary

4.5.1 Subject Property

According to SEL's interpretation of the historical research data, prior to 1888, five (5) retail stores, two (2) dwellings, two (2) restaurants, one (1) lodging, and a shoe/cotton retail store were observed on the western portion of the Site with remaining areas as vacant land. South Pacific Railway Co.'s railroad tracks were present on the western portion of the Site from at least 1906 to the early 1980s. Records dated 1940 and 1960 indicated Pacific Motor Trucking Co. was engaged in automotive fueling on the western portion. A variety of commercial and industrial operations were present on the eastern portion of the Site, including retail stores, warehousing, light manufacturing, offices, factories, multiple machine shops, chemical mixing areas, steel storage tanks, foundry area, gasoline equipment, brush manufacturing, paint booths, and a chemical factory/plant. A large building on the eastern portion of the Site was occupied by Keystone Ironworks in 1906, Sparling Meter Company in 1954 and 1957, and Water Meter Manufacturing in 1950 and 1953. From 1960 to 1970, the Site was used mainly for offices, to manufacture gym equipment and to store a variety of materials, including school equipment, iron, and other goods. By 1992, all the onsite structures had been demolished and the lot was cleared. Since 2002, the property has been occupied by Mission Transportation and used to park school buses.

4.5.2 Adjacent Sites

In general, the adjacent sites have been used primarily for commercial, manufacturing, and industrial purposes. The adjacent sites are discussed in detail in the following sections of the report: Site Reconnaissance, Aerial Photograph Review, Sanborn Maps, City Directory Research, and Regulatory Database Review. Based on our research, the adjacent sites in our opinion are not expected to have significantly impacted the subject property.

4.6 Historical Data Gaps

A data gap is considered a lack of, or inability to obtain, information required by the ASTM E 152713 practice despite good faith efforts by the environmental professional to gather such information. This Phase I Environmental Site Assessment has not identified significant data gaps that affect our ability to identify recognized environmental conditions.

5.0 HAZARDOUS SUBSTANCE SEARCH

5.1 State Agencies

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits, air emissions, and site investigation files for the subject property. Additionally, the State Water Resources Control Board's (SWRCB) GeoTracker, SCAQMD's online Facility Information Detail (FIND), and DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS) online databases were searched for information on the subject property to identify any evidence of previous or current hazardous material usage.

- According to the review of aforementioned online databases and response to our request, there are no files for the subject property.

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder, formerly known as the California Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System, was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

5.2 City/County Agencies

The Los Angeles County Fire Department Health and Hazardous Materials Division (LACFD HHMD) and the City of Los Angeles Bureau of Sanitation (LABS) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. Additionally, the Los Angeles City Fire Department Certified Unified Program Agency (LAFD CUPA) online Active and Inactive CUPA Regulated Facilities and Underground Storage Tank databases, which include Active and Inactive Underground Storage Tank (UST), Active and Inactive Hazardous Materials Inventory (HazMat), and Underground Storage Tank Historical Files, and the LACFD HHMD Active and Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for information pertaining to the subject property.

- No files for the subject property were available through LACFD HHMD, LABS, or the LACFD HHMD online databases.

- The following information was obtained from LAFD CUPA in response to our requests:

  Pacific Motor Trucking Co. (860 North Spring Street) – The corporation was issued a permit dated June 18,1940 to operate two 550-gallon (Rheem) gasoline USTs located 6' and 8.5' east of the west property line along North Alameda Street between Bruno Street and West College Street. Additionally, the corporation was issued another permit dated December 31, 1940 to operate the site as auto fueling station for private use with two USTs totaling 1,100-gallon in capacity.

  Pacific Motor Trucking Co. (130 West College Street) – The corporation was issued a permit dated July 18, 1960 to operate the site as an auto fueling station.

D & S Ingredients (130 West College Street) – A permit dated July 17, 1979 was issued to D & S Ingredients to install a tank; an attached plot showed a pump island east of a concrete loading dock, and a 8,000-gallon tank and associated 4 inch fill pipe at the southwest portion of the site near the intersection of railroad track and Bruno Street.

D & S Ingredients dba Transporting (130 West College Street) – A permit was issued to D & S Ingredients dba Transporting dated May 22, 1986 to abandon a tank reported to be 8,000-gallon in size and installed in 1971. A site plot showed the tank to be 80 feet south of College Street and 75 feet east of Alameda Street. No visible soil contamination was found during removal.

The City of Los Angeles NavigateLA Online Mapping System was reviewed to obtain substructure maps for the subject property.

- A review of substructure maps identified no USTs or other substructure features in the area of the subject property.

5.3 Agency File Review Limitations

SEL has received agency responses to all our inquiries for the subject property; there were no agency file review limitations.

5.4 Volatile Organic Compound Vapor Encroachment

The encroachment of hydrocarbon and volatile organic compound (VOC) vapors into soil pore space occurs when organic chemicals migrate from contaminated groundwater or soil into the airspace between soil particles. Some typical organics involved are petroleum based or chlorinated solvents (e.g, BTEX and dry cleaning chemicals). They may have leaked into the groundwater and/or soil from underground storage tanks, or buried waste, or from disposal in septic systems. ASTM Standard E2600-15 (Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions) defines the term “Vapor Encroachment Condition (VEC)” as the presence or likely presence of “chemical of concern” vapors in the subsurface of the Target Property caused by the release of vapors from contaminated soil or groundwater or both either on or near the Target Property as identified by the Tier 1 or Tier 2 procedures.

In compliance with ASTM Standard E2600-15, SEL evaluated the potential for a VEC at the subject property. Based on the known impacted subsurface soil vapors discussed in section 3.3.7, and the reported USTs at the subject property, it is SEL’s opinion that a VEC exists at the subject property.

6.0 REGULATORY LIST REVIEW

An outside information service, EDR, was contracted to perform a database search of government record sources. EDR's report is attached as Appendix B of this report and should be referenced for specific information and explanation of government records sources, dates of source listings, and locations of sites. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site and adjoining/immediately surrounding properties are listed on the respective database. Our opinion is based on the database listings, other historical and regulatory resources, the "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM International E2600-15), and the assumed groundwater flow direction. As discussed in section 2.5 of this report, groundwater is estimated to be in excess of approximately 29 feet bgs in the area of the subject property (source: Kleinfelder report dated September 16, 1997) and is assumed to flow towards the southeast (source: EDR radius report lightbox using contour lines). A select list of records searched, summary of listed sites, and the potential for listed sites to impact the subject property are discussed as follows:

Database	Search Distance (Miles)	Subject Site (Yes/No)	Adjacent Site (Yes/No)	Total Listings(#)
Federal National Priorities List (NPL)	1.0	No	No	0
Federal De-listed NPL	1.0	No	No	0
Federal CERCLIS	0.5	No	No	1
Federal CERCLIS NFRAP	0.5	No	No	7
Federal RCRA CORRACTS	1.0	No	No	1
Federal RCRA non-CORRACTS TSD	0.5	No	No	1
Federal RCRA Generators	0.25	Yes	Yes	15
Federal Institutional/Engineering Controls	0.5	No	No	0
Federal ERNS	Property	No	No	0
State/Tribal Equivalent NPL	1.0	No	No	3
State/Tribal Equivalent CERCLIS	1.0	No	No	0
State/Tribal Landfill	1.0	No	No	0
State/Tribal Underground Storage Tank (UST)	0.25	Yes	Yes	52
State/Tribal Leaking Underground Storage Tank (LUST/ CPS-SLIC)	0.5	Yes	Yes	35
State/Tribal Institutional/Engineering Controls	0.5	No	No	0
State/Tribal Voluntary Clean-up Sites	0.5	No	No	8
State/Tribal Brownfield Sites	0.5	No	No	0

Regulatory Database Review:

6.1 Subject Property

- **D & S Ingredient Transfer Co (130 West College Street) –** The subject property is listed on the following regulatory databases: Underground Storage Tank (UST), Facility Inventory Database (CA FID UST), Statewide Evaluation and Planning System (SWEEPS UST), and Hazardous Substance Storage Container Database (HIST UST). According to the listings, one 8,225-gallon diesel UST was reported with inactive status that was installed in 1978. No further information is provided. Please refer to City/County Agencies Section below for more details.

- **International Bank Property (943 Main Street) -** The subject property is listed on the following regulatory databases: California Environmental Reporting System (CERS) and Cleanup Program Sites - Spills, Leaks, Investigations and Cleanup (CPS-SLIC). According to the listings and information from the State Water Resource Control Board's GeoTracker database, the subject property has case closed status as of September 26, 1997.

  The site received closure based on the Phase II results discussed in section 3.3.7.

- **860 North Spring Street –** The subject property is listed on the UST database. According to the UST information provided, this site was categorized as “historical” as of January 1, 1900 with no further information provided. The designation of "historical" means that the regulatory agency no longer has a need to pursue further investigations with respect to the listing. The January 1, 1900 date is a default designation unrelated to property operations. It is important to note that the regulatory database did not provide any details about site conditions.

6.2 Adjacent Site and Sites within Immediate Vicinity

- **129 West College Street –** The north adjacent property (hydrologically up-gradient) across West College Street is listed on an UST database. According to the UST information provided, this site was categorized as “historical” as of January 1, 1900 with no further information provided. The designation of "historical" means that the regulatory agency no longer has a need to pursue further investigations with respect to the listing. The January 1, 1900 date is a default designation unrelated to property operations. According to the LAFD records research, the site was occupied by Southern Pacific Railway Company, was permitted in 1960 for using hazardous flammable liquid and was permitted in 1965 for an auto fueling station. The capacity, former contents, installation, and decommissioned dates for associated tanks, however, were not provided. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, this listing is not expected to represent a significant environmental concern for the subject property.

- **Freight Sheds B&C (117 West College Street) -** The north adjacent property (hydrologically up-gradient) across West College Street is listed on following databases: CA FID UST, SWEEPS UST, and HIST UST. According to the information provided, one 500-gallon regular unleaded UST was reported with active status under the ownership of Southern Pacific Transportation. No further information is provided. The installation and decommissioned dates, however, were not provided. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, this listing is not expected to represent a significant environmental concern for the subject property.

- **Biner Ellison (1001 North Main Street) -** The northeast adjacent property (hydrologically cross-gradient) across West College Street is listed on following databases: Resource Conservation and Recovery Act-Small Quantity Generator (RCRA-SQG), Facility and Manifest Data (HAZNET), Hazardous Waste Tracking System (HWTS), Facility Index System/Facility Registry System (FINDS), and Enforcement and Compliance History Information (ECHO). According to the RCRA-SQG information provided, Biner Ellison registered as a small quantity generator of hazardous waste on May 21, 1993 and as a large quantity generator on November 13, 1980. No violations were identified. According to the FINDS and ECHO listings, the site was listed under registry identification number 110002899392. No further information was provided. According to the HAZNET information provided, the site generated between 0.13 to 0.93-tons of hazardous waste in the form of other organic liquids with metals (alkaline solution (pH >= 12.5) with metals), and aqueous solution with total organic residues less than 10 percent annually from 1998 to 2002. Hazardous waste was disposed via transfer station. According to the HWTS listing, the site obtained EPA ID CAD983668633 in 1995 and was inactive as of 2004. Based on the lack of evidence of a release and relative distance from the subject property across West College Street, the aforementioned listings are not expected to represent a significant environmental concern for the subject property.

- **Fueling Station Former / Carrasco Ernest & Orlando / Carrasco Bros. (1135 And 1137 North Alameda Street) -** The west adjacent property (hydrologically up-gradient) across North Alameda Street is listed on following databases: Hazardous Waste and Substances Sites List (CORTESE), CERS, Leaking Underground Fuel Tank Report (LUST), EDR Exclusive Historic Gas Stations (EDR Hist Auto), HIST UST, CA FID UST, and SWEEPS UST. According to the EDR Hist Auto listing, the property operated as a gasoline service station from at least 1969 to 2005. No further information is provided. According to the HIST UST, UST, SWEEPS UST, and FID UST information provided, the site contained six USTs (2,000-gallon, 5,000-gallon, and 8,000-gallon unleaded, 2000-gallon and 5,000-gallon regular unleaded, and one unknown size waste oil). According to the LUST listing and information from the State Water Resource Control Board's GeoTracker database, an unauthorized release of gasoline that impacted soil was discovered on site on October 25, 2014. The Los Angeles Regional Water Quality Control Board (LARWQCB) provided regulatory oversight and closure on February 12, 2016. Based on the case closure status and relative distance from the subject property across North Alameda Street, the aforementioned listings are not expected to represent a significant environmental concern for the subject property.

- No other adjoining properties or properties in the immediate vicinity (within 100-feet of the subject site) are listed on any of the researched regulatory databases associated with the storage or disposal of hazardous wastes (including aboveground or underground storage tanks listings), a known chemical release, or a property use where hazardous chemicals would be expected. Therefore, no adjoining properties or properties within the immediate vicinity (within 100-feet) of the subject property are expected to represent a significant environmental concern for the subject property.

6.3 Orphan Sites

- Orphan sites are locations that EDR is unable to map for purposes of its radius reports. One orphan site was identified in the Radius Map Report located approximately 2,500 feet south-southwest of the subject property. The orphan site was manually mapped to determine its location relative to the subject property and groundwater gradient. The following conclusion was made:

- In our expert opinion, the orphan site listed does not pose a significant threat to the subject property as there is no indication of a release at the respective site and the site is located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

7.0 EVALUATION OF ADDITIONAL RISKS

7.1 Non-Scope Considerations

7.1.1 Asbestos Potential

Asbestos is a natural occurring mineral fiber utilized in a multitude of building material products due to its high tensile strength and excellent fire resistant properties. The EPA has defined asbestos materials as being either friable or non-friable materials. Friable material is defined as being easily broken or crushed by hand pressure (e.g., soft acoustical ceilings or blown-on fireproofing).

Non-friable asbestos is generally found in pre-manufactured products that bind the asbestos in an adhesive material, such as roofing felts, floor tile, transite pipe and mastics. The EPA currently does not require the removal of asbestos-containing materials that do not present a problem for human exposure. Most friable asbestos-containing materials were banned in building materials by 1978.

Asbestos Potential Summary:

- The site is presently a parking lot. No structures are presently located onsite; hence, the potential for the presence of ACBMs is low.

7.1.2 Lead Potential

Lead and lead compounds can be found in many types of paint. In 1978, the Consumer Product Safety Commission set the allowable lead levels in paint at 0.06% by weight in a dry film of newly applied paint. In the 1970s, the chief concern of lead paint was its cumulative effect on bodily systems, primarily when paint chips containing lead were ingested by children. Research in the early 1980s showed that lead dust is of special concern, because the smaller particles are more easily absorbed by the body. Common methods of paint removal, such as sanding, scraping, and burning, create excessive amounts of dust. Lead dust is especially hazardous to young children because they play on the floor and engage in a great deal of hand-to mouth activity, increasing their potential for exposure. Lead based paints were commonly used on buildings built prior to 1970s.

Lead Potential Summary:

- The site is presently a parking lot. No structures are presently located onsite; hence, the potential for the presence of lead based paints is low.

7.1.3 Radon Potential

High levels of radon may be found in every state. Medical and environmental studies have shown that radon can be a health risk, primarily as a cause of lung cancer. Radon is a naturally occurring colorless, odorless and tasteless gas produced by the decay of uranium and radium. Radon levels vary from place to place depending on the underlying geology.

Radon Potential Summary:

- Based on our research at the California Department of Public Health, the radon level for Los Angeles County is classified as Federal EPA Radon Zone 2. This is a classification designated for zones with average radon levels ranging between 2 and 4 picoCuries/liter (pCi/L), which is below the action level set by the Environmental Protection Agency of 4 pCi/L, and means that radon is not an item of concern at the subject property.

7.1.4 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Mold Potential Summary:

- SEL did not observe any structure onsite. Hence, the potential for mold-related concerns onsite is low.

8.0 CONCLUSIONS AND RECOMMENDATIONS

Conclusions

At the request of S&R Partners, LLC (User), SEL has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the subject site located at 130 West College Street in the City of Los Angeles, California. Any exceptions to, or deletions from, this practice are described in the various sections of this report. This assessment has revealed no evidence of recognized environmental conditions or de minimis conditions in connection with the subject property, except for the following:

Recognized Environmental Conditions (REC)

The historical industrial uses of the subject property for over 80 years (which include a chemical factory, foundry, paint booths, manufacturing, machine shops, and historical USTs), together with prior detections of PCE/TCE and other VOCs in both subsurface soils and soil vapor at levels in prior environmental investigations exceeding the current DTSC and RSL screening values as discussed in section 3.3.7, is considered to be a REC.

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

In our expert opinion and based on the analysis in this report, no HRECs were identified during the course of this assessment.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)

In our expert opinion and based on the analysis in this report, no CRECs were identified during the course of this assessment.

DE MINIMIS CONDITIONS

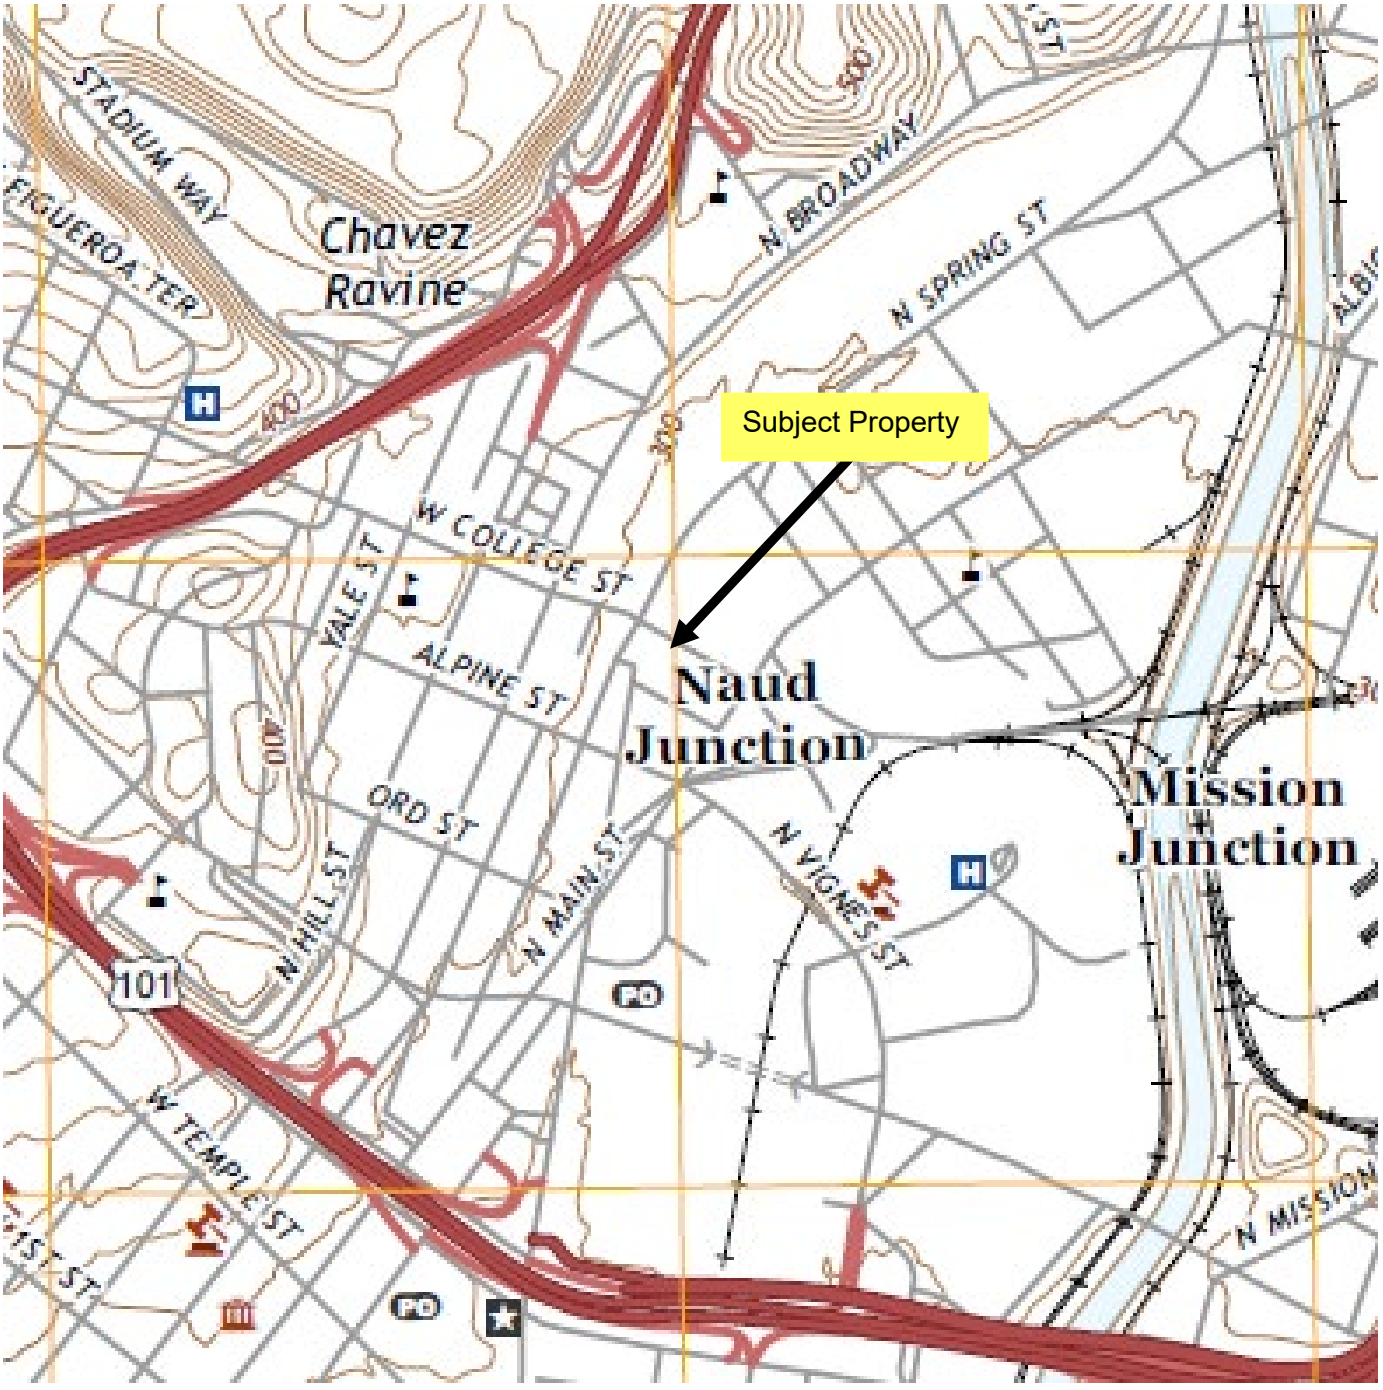

In our expert opinion and based on the analysis in this report, no de minimis conditions were identified during the course of this assessment.

RECOMMENDATIONS

Based upon the foregoing, SEL recommends that additional Phase II work be performed and that the property be surveyed for the presence of any remaining underground tanks and piping.

Contact: Afnan Asghar

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Smith Emery GeoServices were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

DEPARTMENT OF BUILDING AND SAFETY

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

3 Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: that this permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES
DEPARTMENT OF BUILDING AND SAFETY
BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

CITY OF LOS ANGELES

DEPARTMENT OF BUILDING AND SAFETY

BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER SIGN ON BACK

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 7-19-85 Lic. Class B Lic. Number 430117 Contractor Robt Ahlen (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. F15536 Insurance Company Fairmont Ins Co.

☐ Certified copy is hereby furnished.

☒ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

BUILDING DIVISION

3 DEPARTMENT OF BUILDING AND SAFETY

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

BUILDING DIVISION

3 DEPARTMENT OF BUILDING AND SAFETY

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 7-19-85 Lic. Class B Lic. Number 430117 Contractor Robt Ahlen (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. F15536 Insurance Company Fairmont Ins Co.

☐ Certified copy is hereby furnished.

☒ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date 7-19-85 Applicant's Signature Robt Ahlen

Applicant's Mailing Address 5430 Van Nuys Blvd. #309A, V-N.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

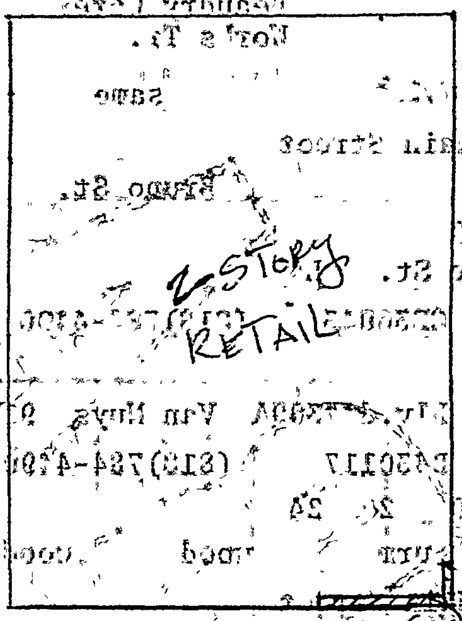

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. Application for the Erection of Buildings

CLASS "A" "B" "C" D Brick

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

STATEMENT OF RESPONSIBILITY

I certify that in doing the work specified herein I will not employ any person in violation of the Labor Code of the State of California relating to workmen's compensation insurance.

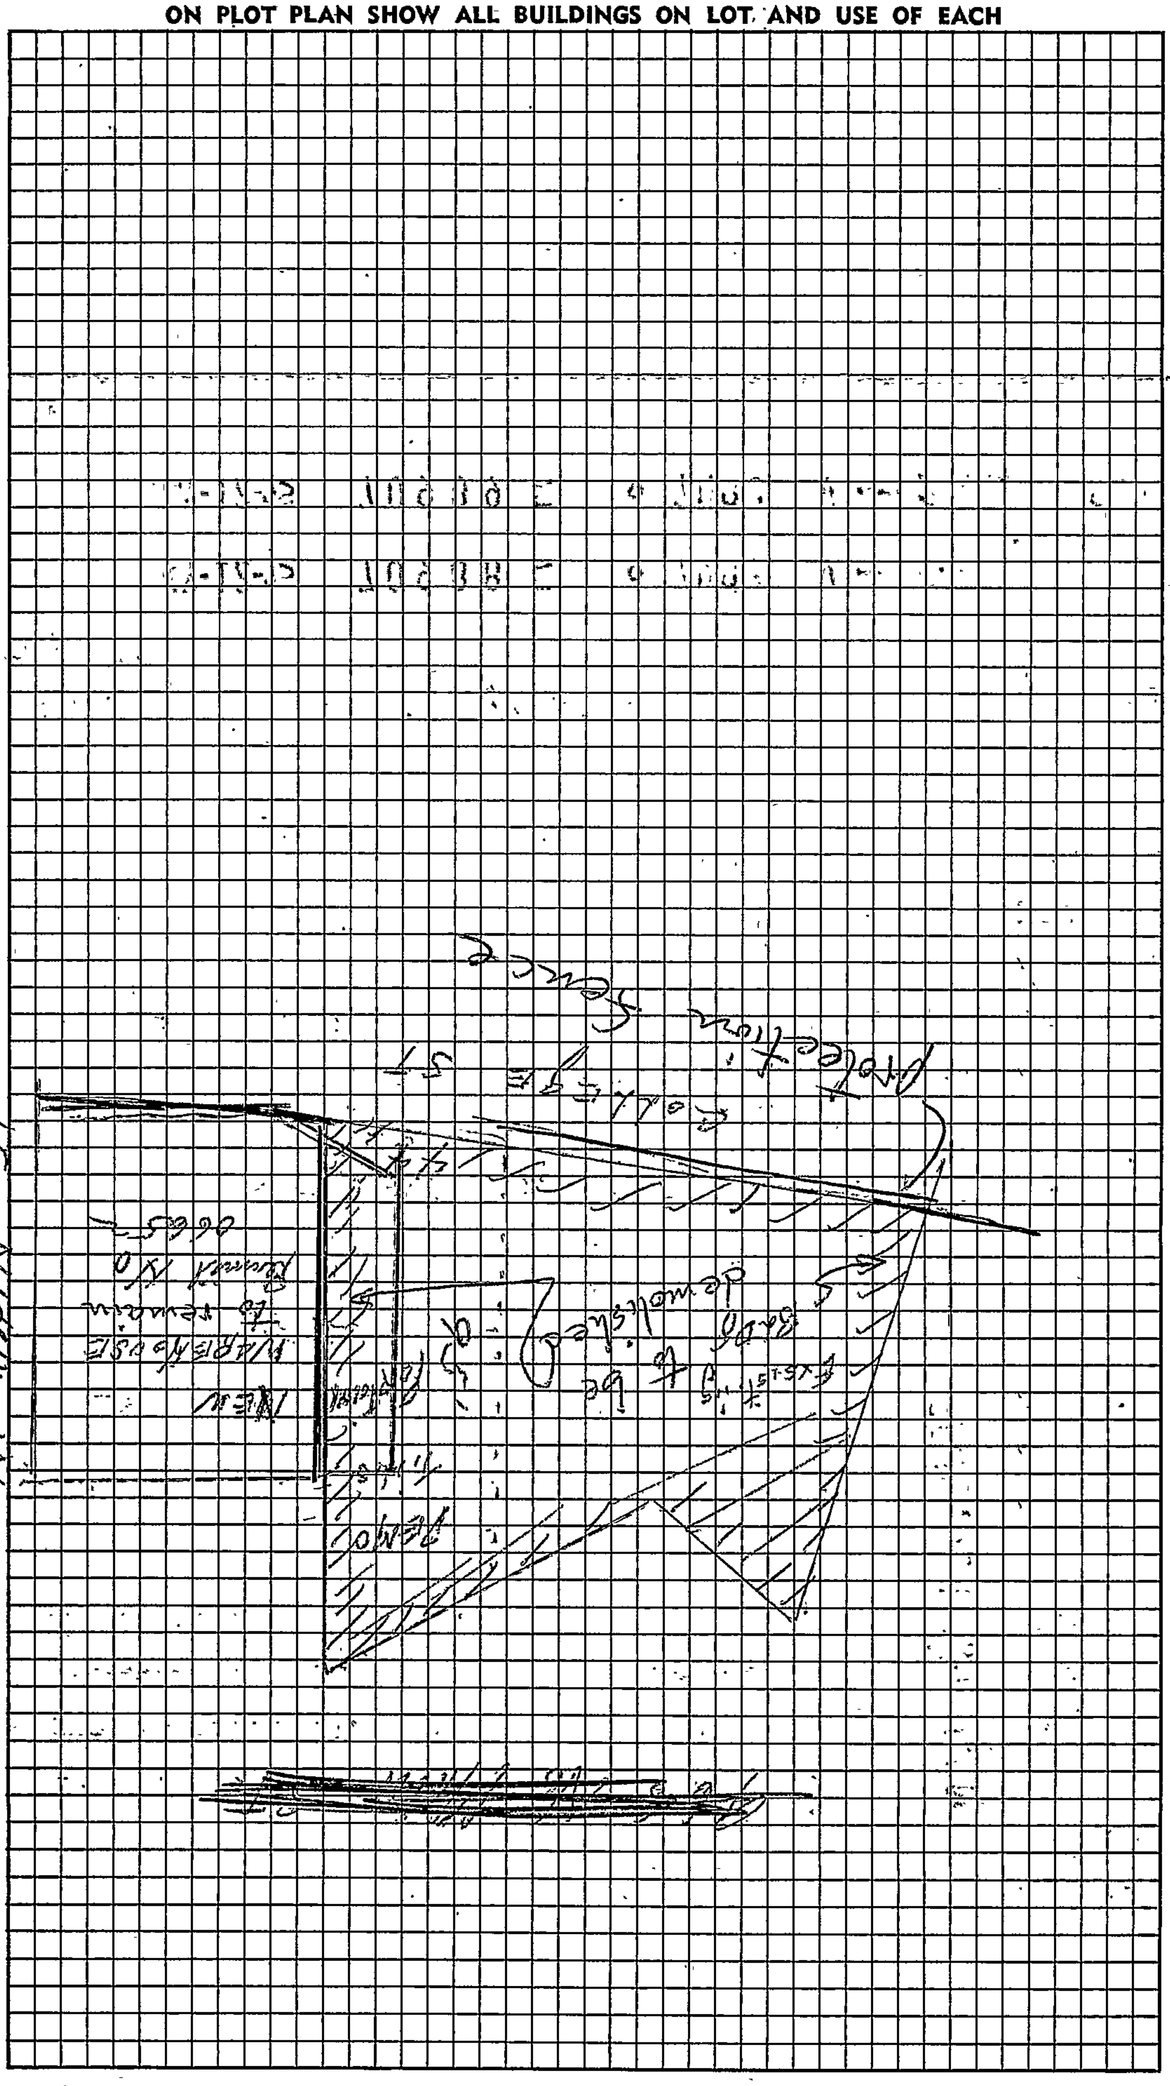

"This permit is an application for inspection, the issuance of which is not an approval or an authorization of the work specified herein. This permit does not authorize or permit, nor shall it be construed as authorizing or permitting the violation or failure to comply with any applicable law. Neither the City of Los Angeles, nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein, or the condition of the property or soil upon which such work is performed." (See Sec. 91.0202 L.A.M.C.)

Application to Alter, Repair or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

Public Records Request Number: 1-102722-10
Location(s): 130 West College Street, Los Angeles, CA 90012

Dear Requestor:

On October 27, 2022, the Department of Toxic Substances Control (DTSC) received your email of October 27, 2022 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-3611 or via email at PubReqAct@dtsc.ca.gov.

Sincerely,
Tee Xiong

Public Records Request Number: 1-102722-08
Location(s): 117 & 119 Bruno Street, Los Angeles, CA 90012

Dear Requestor:

On October 27, 2022, the Department of Toxic Substances Control (DTSC) received your email of October 27, 2022 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-3611 or via email at PubReqAct@dtsc.ca.gov.

Sincerely,
Tee Xiong

OF THE CALIFORNIA PUBLIC UTILITIES CODE; RECORDED MARCH 30, 1995 AS INSTRUMENT NO. 95–452262, OF OFFICIAL RECORDS. **(PLOTTED HEREON)**
13. THE MATTERS CONTAINED IN AN INSTRUMENT ENTITLED "RESOLUTION HISTORIC RESOURCES DESIGNATION (PUBLIC RESOURCES CODE SECTION 5029; GOVERNMENT CODE SECTION 27288.2)", RECORDED APRIL 27, 1995 AS INSTRUMENT NO. 95–695495, OF OFFICIAL RECORDS. **(NOT A SURVEY MATTER)**
14. RIGHTS OF PARTIES IN POSSESSION. **(NOT A SURVEY MATTER)**

POSSIBLE ENCROACHMENT NOTES

THIS IS A LISTING OF OBSERVED IMPROVEMENTS THAT CROSS PROPERTY LINES. STATEMENT OF OWNERSHIP OR POSSESSION IS NOT THE INTENT OF THIS LISTING.

NO APPARENT ENCROACHMENTS

SURVEYOR'S NOTES

- THE UTILITIES SHOWN HEREON ARE BASED ON OBSERVED EVIDENCE ONLY. THIS SURVEY WOULD NOT SHOW UTILITIES COVERED BY CARS/TRUCKS OR RECENTLY PAVED ASPHALT/CONCRETE OR OVERGROWN BRUSH, TREES AND SHRUBS.
- UNLESS THIS PLAN HAS THE SEAL AND SIGNATURE OF THE SURVEYOR AND/OR ENGINEER RESPONSIBLE FOR ITS PREPARATION, THIS IS NOT AN AUTHENTIC COPY OF THE ORIGINAL SURVEY AND SHALL NOT BE DEEMED RELIABLE.

ITEMS CORRESPONDING TO TABLE A ITEMS

ITEM 6(a)
ZONING INFORMATION NOT PROVIDED BY CLIENT

ITEM 14
THE NEAREST INTERSECTING STREET TO THE PROPERTY AS SHOWN HEREON.

ITEM 16
NO EVIDENCE OF RECENT EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS OBSERVED IN THE PROCESS OF CONDUCTING THE FIELD WORK.

ITEM 17
NO EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS OBSERVED IN THE PROCESS OF CONDUCTING THE FIELD WORK.

FLOOD NOTE: BY GRAPHIC PLOTTING ONLY, THIS PROPERTY IS IN ZONE "X" OF THE FLOOD INSURANCE RATE MAP, PANEL NO. 06037C1620F, PANEL DATED 9/26/2008. THIS PROPERTY IS NOT LOCATED IN AN AREA WHERE FLOOD HAZARDS EXIST AS DETERMINED BY FEMA. BY TELEPHONE CALL TO THE NATIONAL FLOOD INSURANCE PROGRAM (800-638-6620) WE HAVE LEARNED THIS COMMUNITY DOES CURRENTLY PARTICIPATE IN THE PROGRAM. NO FIELD SURVEYING WAS PERFORMED TO DETERMINE THIS ZONE AND AN ELEVATION CERTIFICATE MAY BE NEEDED TO VERIFY THIS DETERMINATION OR APPLY FOR A VARIANCE FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY.

SURVEYOR'S CERTIFICATE

TO S&R PARTNERS, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY AND FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 1, 2, 3, 4, 5, 6(a), 7(a), 7(b)(1), 7(c), 8, 9, 10, 11(a), 14, 15, 16 & 18 OF TABLE A THEREOF. THE FIELD WORK WAS COMPLETED ON JULY 25, 2022.

DATE OF PLAT OR MAP: AUGUST 25, 2022.

Mr. Richard McCollister
International Bank Of California
888 South Figueroa Street
Los Angeles, CA 90017

PROPERTY LOCATED AT 943-973 NORTH MAIN STREET, LOS ANGELES, CALIFORNIA (FILE NO. 97-118)

We received a letter of transmittal dated September 23, 1997, from your consultant, Kleinfelder, transmitting copies of two reports titled "Phase I Environmental Site Assessment" dated July 30, 1997, and "Report of Phase II Environmental Site Assessment" dated September 16, 1997, for the property located at the address listed above. The letter also requested Los Angeles Regional Water Quality Control Board staff review the reports and provide a no further action (NFA) letter for the site, if appropriate.

The phase one assessment report provides a review of the previous businesses and chemical use at the site and recommends that a phase two investigation be conducted to address several areas of concern. The phase two assessment report discusses the results of a soil gas survey, which consisted of collecting soil gas samples from nine different locations, characterization of site-specific geology by evaluating soil cuttings and soil samples from nine soil borings at different locations, and evaluating the analytical results of soil and soil gas samples. According to the analytical results, low levels of trichloroethylene (TCE) (95 µg/kg) and perchloroethylene (PCE) (16 µg/kg) were detected in soil gas samples collected from locations SG-1 and SG-2 and soil samples collected from soil boring B-1. Low levels of ethylbenzene (14 µg/kg) and xylenes (42 µg/kg) were detected in shallow soil samples from boring B-5.

Based on the information presented in the reports and the concentration and distribution of TCE, PCE, ethylbenzene, and xylenes in the soil, Board staff have determined that no further action is required for this site.

Please contact Mr. John Geroch at (213) 266-7577 if you have any questions.

J.E. ROSS, Chief
Site Cleanup Unit

REQUEST FOR DOCUMENTS - UNDER THE PUBLIC RECORDS ACT

In reply to your request of October 27th, 2022, for records concerning Request #22-11007.

As of this date, our office has determined that LA Sanitation and Environment (LASAN) is not in possession of any documents or information relating to your request.

This does not include any records that may be in the custody of other city departments, as each department in the City of Los Angeles maintains and is responsible for their own records.

For all other City Department records please go to their respective website at https://lacity.org, the City's 311 website at http://myla311.lacity.org or call 311 to reach the City's call center during business hours.

SITE INFORMATION QUESTIONNAIRE

(To be completed by the Owner/Key Site Manager)

Name of Facility: 130 W. College St. Phone #

Address: 130 West College Street City: Los Angeles

Owner of Facility: S&R Partners, LLC Years Owned: 25

Site Manager/Contact: Morlin Asset Management / Lewis Uyeke Years With Facility: Around 3 years

Phone # of Facility Manager/Contact: 213-622-4442 x211 / Lewis Uyeke

1. Purpose of this Phase I Environmental Site Assessment
   - ☐ A. Qualify for CERCLA protection
   - ☐ B. Satisfy lending requirements
   - ☐ C. Business risk evaluation purposes
   - ☑ D. Other Development Entitlement Application

2. The type of property Surface Parking Lot

3. Type of property transaction (i.e. sale, purchase, refinance, exchange, etc)
   - ☐ A. Sale
   - ☐ B. Purchasing
   - ☐ C. Refinance
   - ☑ D. Other N/A - No Pending Transaction

4. List of parties that will rely on the Phase I Environmental Site Assessment
   S&R Partners, LLC

5. Does the purchase price being paid for the property reasonably reflect the fair market value of the property? ☐ Yes ☐ No

   If No, is it due to environmental concerns?
   Please explain N/A - No Pending Transaction

6. Is there a chain of title available for the site? ☐ Yes ☑ No (If yes, please provide a copy)

7. Are you aware of any Environmental cleanup liens against the property or of any activity or land use restrictions or any deed restrictions? (including but not limited to engineering controls/institutional controls/land use restrictions)? [This research is the user's responsibility-However, SEG can provide you with the Environmental Liens Search for an added fee]
   None

8. Do you have any actual or specialized knowledge or experience of the subject site or nearby sites (i.e. you are involved in a similar line of business as the current or previous occupants sot that you would know the type of chemicals or processes used by this type of business)
   No

9. Are you aware of any commonly known or reasonably ascertainable information about the property (i.e. previous usage, landfill, burned debris, etc)
The past 20 years has been bus company.

10. Based on your knowledge, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
No

11. Do you have knowledge of specific chemicals previously or currently used/stored onsite?
No

12. Do you have any knowledge or experience of chemical spills or releases at the site?
No

13. Do you know if the site was historically used as a gas station, a dry cleaner, or for industrial purposes?
We have a report conducted for a previous owner indicating that the site was historically used for several industrial uses.

14. Please list all known previous owners of the property.
International Bank of California (East Tract); Union Pacific Railroad Company (West Tract)

15. Please list all known previous occupants of the site. Occupant/Approximate time frame

A: Atlantic, but bought out by Mission Transportations.
B:
C:
D:
E:
F:

16. Is the site currently occupied? Yes No
Business name(s) Mission Transportation

17. What are the current site operations?
School Bus Parking

18. What is the total square footage of the property? 2.24 Acres (Net of R.O.W. Easement)

19. Do you have a plot plan of the site? ☑ Yes ☐ No (If yes, please provide)

20. How many buildings are located on site? None

21. What year was the facility built? N/A Does the facility have any additions? ☐ Yes ☐ No ☑ NA

22. What year was the addition # 1 built? _____ Addition # 2 _____ Addition # 3 _____

23. Does the facility have a basement? ☐ Yes ☐ No ☑ NA

24. What is the total square footage of the onsite building(s)? _____

25. Does this site have an underground storage fuel tank(s)? ☐ Yes ☑ No

26. Has the site ever had any previous underground storage tanks? ☑ Yes ☐ No

27. If yes, how many? 2 How large? 550 gal Location? 860 N Spring Street

28. What type of fuel? ☐ Gasoline ☐ Diesel ☐ Heating Oil ☐ Ethanol ☑ Other Unknown

29. Are these tanks currently permitted? ☐ Yes ☑ No ☐ NA (If yes, provide a copy)

30. Does the site have an emergency power generator(s)? ☐ Yes ☑ No Type/Make _____

31. How is the unit fueled? ☐ Gasoline ☐ Diesel ☐ Propane ☐ Other _____

32. Do you have a Fire Department permit for the generator? ☐ Yes ☐ No ☑ NA

33. Do you store/use any hazardous materials onsite? ☐ Yes ☑ No

If yes, what type(s) and what quantities?

A: D:
B: E:
C: F:

34. Does the site generate hazardous waste? ☐ Yes ☑ No ☐ NA

If yes, how much hazardous waste per month?

Disposal is handled by _____

35. Does the site have a hazardous materials permit for storage? ☐ Yes ☐ No ☑ NA

36. Does this facility have a grease inteceptor(s)/clarifier(s)? ☐ Yes ☑ No

37. Has the site ever had an asbestos survey? ☐ Yes ☑ No (If yes, provide a copy of the report)

38. Has the site ever had a radon gas survey? ☐ Yes ☑ No

39. If yes, do you have a copy of the report from the survey? ☐ Yes ☐ No

40. Company that supplies the potable water to the facility None

41. Company that supplies electricity to the facility LADWP

42. Sewage disposal by

☑ A Municipal connection
☐ B ☐ Leach field ☐ septic tank ☐ cesspool
☐ C Other _____

43. Is this facility connected to municipal storm water drainage? ☐ Yes ☑ No

44. Does this facility have or require a storm water drainage permit? ☐ Yes ☑ No

45. Does the site have a business/maintenance operations plan (BOP)? (This is for regularly scheduled maintenance of items at facility) ☐ Yes ☐ No ☑ NA

46. Are copies of this BOP on file at the site? ☐ Yes ☐ No ☑ NA

47. What is the power or fuel source(s) for heating N/A and cooling systems _____

48. What is the legal address of the property?
See attached survey and title commitment for all of the parcels included in the property.

49. Please give all addresses that you are aware of, that are currently or historically associated with the property
110, 114, and 130 College St.; 860 and 1140 Alameda St.;
943, 945, 949, 953, 955, 959, 963, 971, and 973 North Main St.

50. What is the nearest cross street? City Block bounded by College, Alameda, Bruno, and Main

51. Please list all of the known environmental assessments conducted at the site.
Leighton and Associates, Inc. Project No. 960124-0010; July 1, 1996
Kleinfelder Project No. 58-7160-001; July 30, 1997 (Phase I) and 58-718901-002; August 6, 1997 (Phase II)

I certify that the above responses were made to the best of my knowledge.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). SMITH EMERY GEOSERVICES used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by SMITH EMERY GEOSERVICES. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by SMITH EMERY GEOSERVICES of the SEMS list, as provided by EDR, has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

An online review and analysis by SMITH EMERY GEOSERVICES of the SEMS-ARCHIVE list, as provided by EDR, has revealed that there are 7 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

An online review and analysis by SMITH EMERY GEOSERVICES of the CORRACTS list, as provided by EDR, has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

An online review and analysis by SMITH EMERY GEOSERVICES of the RCRA-TSDF list, as provided by EDR, has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

An online review and analysis by SMITH EMERY GEOSERVICES of the RCRA-LQG list, as provided by EDR, has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

An online review and analysis by SMITH EMERY GEOSERVICES of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by SMITH EMERY GEOSERVICES of the ENVIROSTOR list, as provided by EDR, has revealed that there are 42 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

An online review and analysis by SMITH EMERY GEOSERVICES of the UST list, as provided by EDR, has revealed that there are 49 UST sites within approximately 0.25 miles of the target property.

Local Land Records

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

An online review and analysis by SMITH EMERY GEOSERVICES of the DEED list, as provided by EDR, has revealed that there are 3 DEED sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by SMITH EMERY GEOSERVICES of the RCRA NonGen / NLR list, as provided by EDR, has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID: CAD000633305:

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

An online review and analysis by SMITH EMERY GEOSERVICES of the EDR MGP list, as provided by EDR, has revealed that there are 6 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

An online review and analysis by SMITH EMERY GEOSERVICES of the EDR Hist Auto list, as provided by EDR, has revealed that there are 23 EDR Hist Auto sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 06-02-2016
Citation: HSC 6.5 25187.6 - California Health and Safety Code, Chapter 6.5, Section(s) 25187.6
Violation Description: No person shall remove, transfer, or dispose of the hazardous waste until permission for removal, transfer, or disposal is given by an authorized agent.
Violation Notes: Returned to compliance on 12/06/2016. OBSERVATION: HAZARDOUS WASTE OF SAND BLASTS AND FLOOR SWEEP INCLUDING ALL OTHER CONTAMINATED SOLIDS WERE ACCUMULATED AND STORED OUTSIDE PROPERTY/ PREMISES. Owner/Operator removed, transferred, or disposed of a hazardous waste without permission for removal, transfer, or disposal is given by an authorized agent. CORRECTIVE ACTION: Owner/Operator shall immediately include or verify that the facility operational procedures/training includes and does not allow for removal, transfer or disposal of a hazardous waste without permission from a designated employee and that these authorized agents are clearly noted in the facilities operational procedures. All employees shall be retrained on these procedures and the training documented and submitted to the CUPA within 30 days.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes: Returned to compliance on 10/19/2017. OBSERVATION: VIOLATIONS OBSERVED DURING THIS INSPECTION SHOWED THAT EMPLOYEES LACK OF HAZARDOUS WASTE HANDLING KNOWLEDGE. The Owner/Operator failed to properly train personnel who handle hazardous waste. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. Eval Notes: Complaint came from a Robert Galbraith to the state water board (e-mail) . It was forwarded to me by Eloy Luna , Robert states there are underground tanks that were filled with cement about 20 years ago on site . I reviewed cers and found that Robert Galbraith used to work at 1033 E Alhambra as a safety / environmental person . Inspector Hamilton was at this location last year and nothing was mentioned about the underground tanks by Robert Galbraith . I spoke to robert

CALIFORNIA DROP FORGE, INC. (Continued) **S123498465**

over the phone and he states he could not say anything till now . He states the diesel tanks were filled with cement (not sure if a permit was used). no information was found on cers, attached to envision about the tanks over 100 pages Michael richlak Plant manager states no underground tanks on site, spoke to several employees about tanks 25 years ago and they stated no tanks , Spoke to frize corporation Joe mc carthy he states no tanks on site (626) 369-6088, (contractor) This complaint has [Truncated]

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Primary Waste Type: Not reported
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

1101 N MAIN STREET (Continued) **1024089770**

corrective action activities required under RCRA.

Completed Document Type: Removal Action Completion Report
Completed Date: 10/21/2014

BLOSSOM PLAZA (Continued) **S109691862**

Comments: DTSC approved final TCRA Completion Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/20/2013
Comments: DTSC approved the Soil Vapor Survey Results and determined no further environmental investigation of the Sit is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/27/2013
Comments: Further action required at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 09/18/2013
Comments: DTSC reviewed and approved the Soil Vapor Sampling Plan to characterize the presence and nature of VOCs, methane, and hydrogen sulfide in the vadose zone beneath the proposed building foundation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 11/01/2013
Comments: VCA Amendment to amend Scope of Work and DTSC Oversight Cost Estimate

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: No Further Action Letter
Completed Date: 12/20/2013
Comments: Based on available Site data, DTSC concludes that further environmental investigation of the Site is not required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/18/2014
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 12/18/2014
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 12/18/2013
Comments: DTSC approved the HHRE. Based on the HHRE, the residual petroleum-related VOCs detected in soil vapor do not pose an unacceptable risk to future occupants in the proposed multi-level buildings.

Case Type: Cleanup Program Site
Case Worker: DY
Local Agency: Not reported
RB Case Number: 0904B
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Not reported
Site History: Parcel PA-018 is located at the intersection of North Spring Street and College Street in the City of Los Angeles, and across the street from the Metro Chinatown Station. The Site was previously owned by Union Pacific Railroad Company and at present is owned by the Los Angeles to Pasadena Metro Blue Line Construction Authority (Authority). The Site is about 6 acres and is surrounded by industrial and commercial use land. Historically the Site has been used for a wood and coal yard, an oil warehouse, dwellings, and for small businesses. Since 1905 it was used as a rail freight yard, but it has been vacant since about 1970. Buildings at the Site were demolished in the late 1980s. A gasoline tank was removed in April 1987 with no evidence of leakage. Reports from 1989 indicate that the Site was used for the storage of tanks and shipping containers. Several water-bearing zones underlie the Site, but there are no production wells within one mile of the property. The shallow semi-perched zone is about 30 ft below ground surface, and the groundwater flow direction is in a south-southwest direction.

Groundwater in the southwestern portion of the Site has been impacted by heavy-end hydrocarbons (diesel-range and total recoverable petroleum hydrocarbons). Based on regional groundwater flow and documented historic service station operations at neighboring off-site properties, the groundwater contamination appears to be from

BLUE LINE PARCEL PA-018 (Continued) **S106087297**

off-site sources. The Site is planned for development of a four-story building, with commercial, retail business on the lower level, and housing on the other three floors. There are no planned underground structures, green areas, or unpaved areas at the Site.

Click here to access the California GeoTracker records for this facility:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: HEUNG HUA HENG JEWELRY INC
Violation Date: 08-25-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 09/24/2015. OBSERVATION: This facility s EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately contact DTSC and reactivate your EPA ID number and submit evidence to the cupa within 30 days from the inspection date.
Violation Division: Los Angeles County Fire Department

Violation Source: CERS,

Site ID: 122409
Site Name: HEUNG HUA HENG JEWELRY INC
Violation Date: 08-25-2015
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 10/22/2015. OBSERVATION: The sludge collected in a 5 gallon pail under the drain in the jewelry repair area. The sludge is heated to recover precious metals. Any person who generates a waste shall determine if the waste is a hazardous waste. CORRECTIVE ACTION: Immediately remove sludge waste from the trash, stop disposal as non-hazardous waste, or recycling the sludge, make a hazardous waste determination for the sludge collected in the 5 gal pail to include but not limited to CAM 17 metals, and manage it according the Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed within 30 days from the inspection date.

CERS HAZ WASTE:
Name: HEANG CHHUN HENG
Address: 818 N BROADWAY UN 114
City,State,Zip: LOS ANGELES, CA 90012
Site ID: 122044
CERS ID: 10259779
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 122044
Site Name: HEANG CHHUN HENG
Violation Date: 09-03-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 03/22/2016. OBSERVATION: This facility s EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately contact DTSC and reactivate your EPA ID number and submit evidence to the cupa by 30 days from now.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 122044
Site Name: HEANG CHHUN HENG
Violation Date: 09-03-2015
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity,

HEANG CHHUN HENG (Continued) **S123536749**

5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: Returned to compliance on 09/26/2016. OBSERVATION: Generator failed to meet one of the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, [Truncated]

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 09/26/2016. OBSERVATION: Copies of hazardous waste disposal records for 2012-2015 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA within 30 days from the inspection date. Provide a recycling receipt for review.

Violation Date: 02-14-2019
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 03/20/2019. OBSERVATION: 7 x 55-gallon empty drums were observed in the fenced area next to the HM/HW storage room and 2 x 55-gallon empty drums were observed inside the HM/HW storage room. None of the drums observed were properly labeled as EMPTY along with the date they were emptied. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Violation Date: 02-14-2019
Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Description: Failure to inspect hazardous waste tanks for the following, when present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).
Violation Notes: Returned to compliance on 03/20/2019. OBSERVATION: OBSERVATION: Weekly hazardous waste tank inspections for the used oil tank have not been conducted. The floor of the curbed secondary containment area around the used oil tank was observed covered with oil saturated absorbent. The secondary containment area must be kept clean at all times and spills shall be contained and cleaned up as soon as possible. CORRECTIVE ACTION: Conduct weekly inspections of the hazardous waste tank according to the requirements identified above and provide a picture of the secondary containment area once it has been cleaned up.

Site ID: 118607
Site Name: Centerra Integrated Services LLC
Violation Date: 02-14-2019
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 02/14/2019. OBSERVATION: A 55-gallon drum of waste antifreeze located in the maintenance bay was observed open. CORRECTIVE ACTION: Corrected on site.

Violation Date: 03-26-2019
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 03/26/2019. OBSERVATION: T2 (North 87) annular VR 420 sensor had a splice outside a j-box and not in a gel pack. To put splice in gel pack or back in j-box the sensor the sensor would no longer be at the lowest point to determine a leak at the earliest opportunity. CORRECTIVE ACTION: D5 like for like permit SRLH2BHA0 issued to James Gilmartin with La County ISD. Sensor was attempted to be changed by Caesar Torres with Fuel-Tec. The new VR 420 was also too short to be at the lowest point to detect a leak at the earliest opportunity. Tester acquired a new VR 420 sensor and when he returned to the property the facility was locked up. Tester stated to Inspector Young he would be there tomorrow to install the new sensor.

Environmental Interest/Information System:
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
Registry ID: 110002769335

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CPS-SLIC:
Name: UNION PACIFIC RAILROAD - CORNFIELD YARD
Address: 1245 NORTH SPRING ST
City,State,Zip: LOS ANGELES, CA 90012
Region: STATE
Facility Status: **Open - Verification Monitoring**
Status Date: 07/08/2010
Global Id: SL2047T1683
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.069218179263
Longitude: -118.232052326202
Case Type: Cleanup Program Site
Case Worker: JEC
Local Agency: Not reported
RB Case Number: 0891
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Other Petroleum
Site History: The site is a former Union Pacific Railroad facility that has been converted to use for the Metro Rail Gold Line and as a park. Groundwater is impacted primarily by benzene.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/17/2019. "NOT ACCEPTED: Effective December 28, 2017, CalEPA has replaced the previously existing five federal hazard categories in CERS with twenty-four new federal hazard categories. The following federal hazard categories are now obsolete fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you still have the previous federal categories selected and/or have NOT selected any of the NEW federal hazard categories for your chemical inventory. Please review your hazardous material inventory and complete the following steps: 1) Deselect all of the five obsolete federal hazard categories for all chemical inventory listed under your facility. 2) Update your hazardous material inventory and select all applicable federal hazard categories from the 24 newly listed categories for all chemical inventory stored at your facility. You may refer to Section 2 of a current Safety Data Sheets (SDS) (previously called an MSDS) to determine [Truncated]

Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 05/16/1995
Comments: DTSC entered into a Voluntary Cleanup Agreement with Witco Corporation to complete a Preliminary Endangerment Assessment (PEA) for the Witco Corporation site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/24/1995
Comments: DTSC completed its review of the PEA Report for the Witco Corporation, Allied Kelite Division Site. Based on the information provided, DTSC determined that the residual contamination observed in the Site's soil does not pose a threat to human health via the inhalation and ingestion routes of exposure. Accordingly, DTSC concurs with the "No Further Action" recommendation for the soil with respect to the aforementioned routes of exposure. DTSC has determined that the groundwater beneath the Site has been impacted by Site operations and possibly other regional sources. The groundwater beneath the Site is not a potable source of drinking water and does not pose an imminent and substantial endangerment. However groundwater should be investigated. DTSC reserves the right to require additional work in the future should the Site's conditions differ from those described in the PEA

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CHINA TOWN GAS AMERICA (Continued) **U001560538**

16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 07/24/2019. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: Tank owner/operator not the DO fills out Section V in response to compliance issues noted by DO in Section III. CERS ID was missing on DO report on 10/2018-2/2019. Section VII was incorrectly marked YES on 11/2018-6/2019. Overfill was noted late but was not corrected from previous DO inspection report. Fuel alarm on 6/6/2019 for L6 91 fill was not noted on DO report in Section III or alarm log/work order was not attached to the DO report showing response to the alarm. Overfill was marked NO in Section X on 5/29/2019 & 2/5/2019, but it was not noted in Section III and tank owner/operator was not able to fill in response in Section V. CORRECTIVE ACTION: Have tank owner/operator fill out Section V on DO reports in response to compliance issues noted by DO in Section III. Add CERS ID of 10249207 to listed DO reports 10/2018-2/2019. Have DO correct Section VII to state NO [Truncated]

Violation Date: 06-23-2021
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 06/23/2021. OBSERVATION: The T1 87 fill sump sensor was raised approximately 1 inch off the lowest point of the sump and not located to detect a leak at the earliest opportunity. Monitoring equipment shall be maintained to be able to detect a leak at the earliest possible opportunity. Sensor was sitting on top of a tipped over sensor sleeve. CORRECTED ON SITE: Sensor was immediately relocated the sensor to the lowest point of the T1 87 fill sump by tester Peyman Nasibi with Pacific Nozzle. This is a warning for the facility, if the facility is caught with raised sensors going forward the violation will be a Class I and will be sent to my legal unit for fine assessment.

CHINA TOWN GAS AMERICA (Continued) **U001560538**

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 06/27/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Facility did not test overfill protection before the October 1st 2018 deadline. Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 07/24/2019. OBSERVATION UST tank information is not current in CERS. In tank description under DATE UST SYSTEM INSTALLED for both tanks it states "1/1/1900". CORRECTIVE ACTION: In tank description under DATE UST SYSTEM for both tanks it should state sometime after "11/20/1998". Inspector looked through archive records and determined permit to install tanks was around 11/20/1998. OBSERVATION: Facility does not have an approved operating permit application. In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VENT SECONDARY CONTAINMENT for both tanks it states "NONE". CORRECTIVE ACTION: In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VENT SECONDARY CONTAINMENT for both tanks it should state "FIBERGLASS. OBSERVATION: Facility does not have an approved operating permit application. In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VAPOR SECONDARY containment for both tanks it states "NONE". CORRECTIVE [Truncated]

Violation Notes: Returned to compliance on 08/20/2021. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO noted incorrect ICC exp date on 7/20-1/21 DO reports. DO noted date of 6/18/2022. DO did not include date on alarm print out on 4/21, 1/21, 12/20, 10/20, & 7/20 DO reports. CORRECTIVE ACTION: Have DO note correct date for ICC exp date of 6/19/2022 on DO reports from 7/20-1/21. Ensure DO is including date on alarm print out that is attached to DO reports. Submit copy of compliant DO inspection record.

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following

CHINA TOWN GAS AMERICA (Continued) **U001560538**

requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes: Returned to compliance on 08/20/2020. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO did not include the date and time on alarm print out for 5/2/2020-10/2019 & 7/2019-6/2019 DO reports. CORRECTIVE ACTION: Ensure that DO is including date and time on alarm print outs. Submit copy of compliant DO inspection record.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 06/22/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

California Hazardous Waste Tracking System - Datamar
provides California with information on hazardous waste
generators, transporters, and treatment, storage, and dis
facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Alternate Address: 1300 CARDINAL STREET
Alternate City,St,Zip: LOS ANGELES, CA 90012
Background Info: This site south of Cardinal Street previously operated as a refinery from 1900 - 1924 by the Southern Refining Company and Amalgamated Oil Company.
Not reported
Historical documents indicated refining equipment and above ground storage tanks (AGST). Dark oily materials were discovered during construction activities in the playground area. Areas were covered to prevent contact with potential contaminants. DTSC entered into a Voluntary Cleanup Program Agreement with the RP for oversight of a Preliminary Endangerment Assessment.
Not reported
AREA NORTH OF CARDINAL STREET
This Site is divided into two areas, the area South of Cardinal Street is designated by the letter "S" following the commitment description, and the DTSC LEAD ACTIVITIES area North of Cardial Street is designated by the letter "N" following each description.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: OBSERVATION: Facility has not completed overfill protection testing in accordance with Federal regulations which went into effect on 10/13/2018. CORRECTIVE ACTION: Have a certified UST service technician inspect using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes: 531 W College St Inspector Young and Corral onsite to conduct a pre-inspection on the facility at 531 W College St. Facility is a closed medical building with a UST. The property has new owners and the former DO Brenda Puepke had told Inspector Corral that she had not been doing the monthly DO inspections. Permission to enter was given by site manager Bruce Woockman with Red E Services. Inspectors Young and Corral observed on facility's VR ILS-350 that the last monitor cert was done on 9-6-2017 by Belshire. Inspector Corral advised Bruce that the facility need to still complete the monthly DO inspections, annual testing, and secondary containment testing. Inspector Corral advised Bruce that their monitor cert was due in 7 days and to contact a contractor to get that completed, as well as the CERS UST submittal and necessary documentation onsite. Inspectors Young and Corral unable to look in the sumps.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Department of Defence: False
Solid Waste Assessment Test Program: Not reported
Threat to Water Quality: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BNSF - MISSION TOWER SITE (Continued) **S104549284**

Latitude: 34.06234
Longitude: -118.227442
Case Type: Cleanup Program Site
Case Worker: SR
Local Agency: Not reported
RB Case Number: 0955
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Crude Oil, Other Petroleum, Polynuclear aromatic hydrocarbons (PAHs), Total Petroleum Hydrocarbons (TPH)
Site History: The Site is a triangular-shaped, 0.5-acre industrial property near downtown Los Angeles and is occupied by two major railroad lines (Figures 1 and 2). The Site is generally vacant and includes numerous railroad tracks, a rail switching box, aboveground and underground utility lines and small intermittently occupied building, the Mission Tower, which contains decommissioned rail traffic control and switching equipment. The Site is located within a mixed industrial/residential area and bordered by a low-income federal housing project to the northwest, the Los Angeles City Jail to the southwest, the Los Angeles River to the east and an east-west trending major railroad line to the south. Access to the Site is restricted by high-security fencing. Surrounding properties were initially developed in the latter part of the nineteenth century, and portions of the existing railroad right-of-way were present by the early 1900s. The two major railways (Pasadena Branch and Union Pacific Line) were present by the late nineteenth century. During the late nineteenth and early twentieth centuries, crude oil was extracted from multiple small oilfields nearby and processed at the former Southern Refining Company located immediately northwest of the Site. Historical aerial photos and Sanborn maps indicate that the refinery contained four aboveground storage tanks (ASTs) for storing crude oil. The refinery was apparently dismantled by 1921 and the ASTs were removed sometime between 1921 and 1928. The Site has been used as a railroad junction for over 100 years and is currently maintained as such for use by three major passenger and freight lines. It has some of the heaviest rail traffic in Southern California, with approximately 135 passenger and two freight trains daily. The property will most likely continue to be used as a railroad junction well into the foreseeable future. Between 1990 and 2003, eight phases of site investigation were conducted. During this time, a total of 32 soil borings and six groundwater monitoring wells were installed onsite and offsite (Figure 3). Soil samples were collected generally at 5- or 10-foot intervals to a maximum depth of 45 feet bgs. The soil consists mainly of sand with relatively minor silt and gravel, and is impacted with heavy petroleum hydrocarbons primarily at depths between 5 and 35 feet bgs. Results of fuel fingerprinting analyses indicated that residual hydrocarbons in shallow soil (≤15 feet bgs) were similar to asphalt or tar, whereas those in deeper soils (>15 feet) were more typical of Bunker C or crude oil. Maximum total extractable petroleum hydrocarbons (TEPH) of 16,000 milligrams per kilogram (mg/kg) were initially detected in soil from the central portion of the Site. Subsequent sampling at this location showed TEPH levels of 5,800 mg/kg.

Simulated hydrocarbon distribution (carbon-chain) analyses indicated that 7% of the hydrocarbons were within the gasoline-range of C6-C12, 10% were within the diesel-range of C13-C22, and 83% were within the extended-range of C23-C40. The highest concentrations in soil were

BNSF - MISSION TOWER SITE (Continued) **S104549284**

detected between 20 and 35 feet bgs within MW-4 and along portions of the western and southern railways. Eight volatile organic compounds (VOCs) and six polynuclear aromatic hydrocarbons (PAHs) were detected in soil from 0.0078 to 5.5 mg/kg. The highest VOCs were detected in soil between 25 and 35 feet bgs in MW-4 and along the southern railway track. The detected VOCs and PAHs were consistent with heavy-end hydrocarbons. Of the seventeen metals analyzed, twelve were detected, five of which were above background levels. Groundwater monitoring was conducted during six events between August 1999 and February 2003. During this time, both depth to groundwater (~ 35 feet bgs) and flow direction (south, southwest) have been relatively consistent. Groundwater has been impacted with diesel-range petroleum hydrocarbons from 0.19 to 14 milligrams per liter (mg/L), but no measurable free product has been observed. Six VOCs were detected in groundwater, including three petroleum-related VOCs (methyl-tertiary butyl ether (MTBE), isopropylbenzene and t-butylbenzene) and three chlorinated VOCs (cVOCs) (1,1-dichloroethane, trichloroethylene, and cis-1,2-dichloroethene (cis-1,2-DCE). Most of the detected VOCs were at low concentrations and generally below their respective maximum contaminant levels (MCLs). However, cis-1,2-DCE and MTBE were detected up to 17 micrograms per liter (a%g/L) and 160 a%g/L, respectively. Although some cVOCs were detected in groundwater, no cVOCs were detected in the soil. Of the seventeen metals analyzed, eight metals were detected in filtered groundwater samples and four of those (antimony, cobalt, silver, and zinc) were detected at higher concentrations in downgradient wells. No PAHs were detected in any of the groundwater samples. No remediation has been conducted at the Site due to the technical infeasibility of cleaning up the residual heavy, relatively immobile, non-volatile petroleum hydrocarbons and access limitations within such a highly active railroad yard. Soil excavation would require shutting down a major railroad hub and dismantling or undermining portions of the railroad tracks. Surfactant chemicals could be applied that might mobilize the heavy hydrocarbons and allow for their extraction from the soil. However, such methods could also spread the contamination offsite and into groundwater and create more of a problem. Based on the past, present and likely future use of this site, an industrial/commercial land use restriction is considered the best option at this time to limit exposure to site-related chemicals of concern (COCs). Environmental Resources Management (ERM) conducted a human health risk assessment (HHRA) in 2003. Their risk evaluation was based primarily on two major exposure scenarios: risks to onsite industrial workers and onsite construction workers. The differences in these two exposure scenarios are based on the duration and degree of exposure to the COCs in soil. A third exposure scenario involves the use of shallow groundwater for residential supply. However, the shallow groundwater is of poor quality (high total dissolved solids, naturally petroleum deposits) and residential use at the Site is precluded due to its current and future use as a railroad junction and an intended deed restriction that will be recorded as part of the site closure. ERM considered exposure routes based on ingestion, dermal contact and inhalation (including VOCs, fugitive dust, etc.) and considered exposure to all site-related organic constituents in soil and groundwater as well as metals that exceeded regulatory screening levels. Based on these data, ERM calculated incremental lifetime carcinogenic risks (ILCR) of 4x10-6 (industrial worker) and 1x10-7 (construction worker), and respective non-cancer hazard indices (HI)

BNSF - MISSION TOWER SITE (Continued) **S104549284**

of 1.0 and 0.4. The HHRA was reviewed by a toxicologist with the California Office of Environmental Health Hazard Assessment (OEHHA) in 2005. OEHHAs comments were based on data collection, sampling analyses, and risk assessment assumptions. ERM provided detailed technical responses to OEHHAs comments for OEHHA and Regional Board responses that are documented in multiple response to comments sessions and best summarized in ERMs September 5, 2007 Response to Comments Concerning Human Health Risk Assessment (report). Regional Board staff reviewed the report and met with representatives from ERM and URS on November 17, 2011 to discuss the prior multiple comments and responses between OEHHA and ERM. Following this meeting, Regional Board staff determined that all but a few of OEHHAs comments had been addressed. The few outstanding comments were subsequently addressed by URS and ERM in follow-up emails to Regional Board staff. The revised risk estimates included contributions from VOCs in soil vapor and groundwater that could potentially affectindoor air quality in the Mission Tower Building. Revised HHRA calculations by ERM in January 2012 yielded cumulative risks/hazard indices of 5x10-6/1.3 for industrial workers and 5x10-7/0.8 for construction workers, These values are within the USEPA acceptable risk range of 10-6 to 10-4, with hazard indices <1. Furthermore, these risk/hazard values are below the target incremental lifetime cancer risk (ILCR) and hazard index (HI) values of 10-5 and 1.0, respectively, for commercial/industrial use. The slight exceedance of the hazard index of 1.3 for industrial workers above the commercial/industrial target value of 1.0 is negligible considering that hazard indices are generally expressed as one significant figure only according to the USEPAs 1989 Risk Assessment Guidance for Superfund, Volume 1 Human Health Evaluation Manual (Part A), Interim Final. In summary, the calculated risk/hazard values from residual soil, soil vapor and groundwater contamination at the Site will not result in significant risks to human health or groundwater based on the anticipated future commercial/industrial use and minimal human occupancy of the Site.

STADIUM WAY AND CORONEL STREET SITE (Continued) **S123523226**

Status Date: 12/20/2018
Global Id: T10000012497
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 34.06723
Longitude: -118.24065
Case Type: Cleanup Program Site
Case Worker: NLA
Local Agency: Not reported
RB Case Number: 1444
File Location: Regional Board
Potential Media Affected: Soil, Soil Vapor
Potential Contaminants of Concern: Lead, Total Petroleum Hydrocarbons (TPH)
Site History: In December 2018, the Regional Board received correspondence from Sentinel Environmental (Sentinel) on behalf of the property owner, requesting voluntary oversight from the Regional Board for the Site. Sentinel enclosed the Phase II ESA presenting the findings of their July 2017 investigation. The assessment found evidence of lead impacted soil that will likely require excavation and disposal as a hazardous waste, especially if the Site is to be redeveloped for residential use. Additionally, proper abandonment of R. Earl Well No. 1 according to DOGGR standards is recommended prior to redevelopment of the Site. To facilitate this, a Remedial Action Plan (RAP), well abandonment plan, and Soil Management Plan (SMP) will be submitted to the Regional Board for review and comment. Following the removal of impacted soils in accordance with the approved RAP and proper abandonment of oil well R. Earl Well No. 1, Sentinel will request a No Further Action letter once the Regional Board has determined that soil, soil vapor, and (potentially) groundwater impacts have been satisfactorily addressed at the Site.

Actual:
289 ft.

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide,polycyclic aromatic hydrocarbons and heavy metals

WDS:
Name: TRANS DIV. 30
Address: 900 Lyon St
City: LOS ANGELES
Facility ID: 4 19I000504
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 4
Facility Telephone: 2139225717
Facility Contact: Rick Hittinger
Agency Name: LA CO METRO TRANS AUTHORITY
Agency Address: Not reported
Agency City,St,Zip: 0
Agency Contact: Not reported
Agency Telephone: Not reported
Agency Type: Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)
SIC Code: 4111
SIC Code 2: 4173
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: 531 W College St.
Waste2: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants

LA CO., METROPOLITAN TRANS AUT (Continued) **S100944575**

or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL

MAIN STREET CENTER (Continued) **1000102032**

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P098
Waste Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Waste Code: U188
Waste Description: PHENOL

Waste Description: PYRIDINE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

MAIN STREET CENTER (Continued) **1000102032**

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P098
Waste Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Waste Code: U188
Waste Description: PHENOL

Quarterly Update: Active facility - RCRA units undergoing Closure: A hazardous waste facility permit, issued to LADWP on August 10, 1983, allowed the facility to store up to 60 55-gallon drums of hazardous waste. The site was first acquired by LADWP in 1915 which was used as the service maintenance for several LADWP s operations. Prior to the acquisition, the site was for residential use with exception of the northeastern portion of the facility which was occupied by a former manufactured gas company. LADWP did not renew the permit and requested the closure of the hazardous waste storage unit. Closure plan was implemented and investigation detected up to 2,900 ppb of PCB and 1,740 ppb of arsenic in the concrete chip and core samples, 1,320 mg/kg of TEPH, 114 ug/kg of PCE, 70.8 ug/kg of DCE, and 20,000 ug/Kg of PCB in the soil. Several metals (As, Ba, Cd, Co, Pb, Ni, Se, TI, V, Hg) exceeding the clean up criteria were also detected. Small amount of VOCs was also detected in soil gas samples. Based on the soil sample results, it is likely the hazardous waste storage unit cannot meet the clean closure criteria. LADWP is currently preparing a closure certification report for the hazardous waste storage unit.

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/02/1995
Comments: The Department completed review of the PEA report. Based on the information provided in the PEA, the site does not constitute an immediate threat that would require an expedited response action. However, DTSC recommends furthe action, in that the current asphalt must be maintained and a deed restriction notification be placed on the site. DTSC considers the PEA complete.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/28/1993
Comments: The Department received a notice of intent to initiate a PEA dated September 27, 1993. Manufactured Gas Plant (MGP) was operated at the site from approximately 1906 to 1919??? The MGP operations ceased at the site on 1919? when the Southern California Gas Company acquired the MGP properties. In 1922 Los Angeles City Water and Power acquired the property and dismantled the gas plant. The hazardous wastes found at the former MGP sites includes PAHs, Cyanides, TPHs, BTEX, Sulphides/sulfates, and Metals. Due to the evidence of hazardous

MAIN STREET OIL DEPOT (Continued) **S101297113**

wastes in the other MGP sites, the Department recommends a PEA. The Department completed review of the sampling plan. RP is investigating the site.

Background Info: The Naval and Marine Corps Reserve Center, Los Angeles (NMCRC-LA) consists of approximately 6 acres of land, approximately 1 mile northeast of downtown Los Angeles. This site is a closed reserve center where Naval or Marine Corps activities are no longer cond ucted. NMCRC-LA was constructed from 1938 to 1940 by the Works Progress Administration and was commissioned in 1940 to provide a dministrative, training, and logistics support to reserve units.
The facility has one Installation Restoration site, identified as Site 1, the former Service Station and Vehicle Lube Rack. The former service Station was built in 1943 and was used for fuelin

US MARINE CORPS RESERVE CENTER (Continued) **S101584386**

g vehicles on site. The aboveground portion of the station has be
en removed. Adjacent to the former Service Station, the Vehicle L
ube Rack was used for vehicle maintenance and drained directly to
a waste of oil underground storage tank(UST). Between 1987 to 19
89, hazardous substances (including used oil, solvents, hydraulic
, fluid, and other new and used vehicle maintenance products) wer
e stored in 55-gallon drums on the Vehicl Lube Rack. In Novembe
r 1994, the waste oil UST was removed in 1994 under supervision o
f the Los Angeles Fire Department. Soil with detected levels of
total recoverable petroleum hydrocarbons was excavated and dispos
ed off site. In 1995, an Environmental Baseline Study (EBS) was
conducted. The EBS identified the Vehicle Lube Rack and the form
er Service Station gasoline UST as areas requiring further invest
igation. In 1996, a subsurface soil investigation conducted for
Site 1 indicated the presence of gasoline-range hydrocarbons, be
nzene, toluene, ethylbenzene, total xylenes, and 1,2-dichloroetha
ne.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/18/2005
Comments: The SI included Geophysical survey; soil sampling and analysis; groundwater sampling and analysis; assessing the nature and extent of contamination; assessing the fate and transport of contaminants and assessing potential risk to human health. Based on the results, it is recommended that the site no longer considered a CERCLA IR site, and should fall under State of California UST program. DTSC concurs with this recommendation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 10/20/2000
Comments: DTSC entered into a Voluntary Cleanup Agreement (Agreement) with Southern California Gas Company (Proponent). The purpose of this Agreement is for the Proponent to conduct a Remedial Investigation/Feasibility Study to further characterize the existing soil and groundwater contamination and, if necessary, to prepare a removal action workplan and implement a removal action under the oversight of DTSC. If appropriate, the Proponent has agreed to implement a deed restriction for the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 08/15/1996
Comments: On 08/15/1996 DTSC & The Gas Company executed a Consent Order for a Preliminary Endangerment Assessment for a portio (Sector A) of the former Aliso Manufactured Gas Plant Site - which is being investigated in 5 sectors or units. The "530 Ramirez" site (CalSites 19490235) is a portion of Sector A.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/26/1997
Comments: PEA completed. Further investigation (RI/FS) warranted for the site as PAH, VOC, TPH, metals and cyanide contamination exist in both soil and groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 01/26/2004
Comments: Notices of Determination for Aliso Street Section A West Parcel and Sector A East Parcel were hand-delivered to the Governor’s Office of Planning and Research on 1/26/2004.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 10/20/2000
Comments: DTSC entered into a Voluntary Cleanup Agreement (Agreement) with Southern California Gas Company (Proponent). The purpose of this Agreement is for the Proponent to conduct a Remedial Investigation/Feasibility Study to further characterize the existing soil and groundwater contamination and, if necessary, to prepare a removal action workplan and implement a removal action under the oversight of DTSC. If appropriate, the Proponent has agreed to implement a deed restriction for the Site.

Manufactured Gas Plants:

The former Aliso Street Manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "B" sector consists of 14 acres south of the Cesar Chavez Avenue,west of Keller Street, east of Lyon Street and north of Ramirez Street. Contaminants suspected include petroleum hydrocarbons, volatile

SO CAL GAS/ALISO B MGP (Continued) **1008407704**

organic compounds, cyanide, polycyclic aromatic hydrocarbons and heavy metals. See also Sites 19490235, 19490240,19490241, 19490242, 19490243, and 19490248. Sector D Former MGP Aliso Street Site History Sector D of the Aliso Street Towne Gas facility covers approximately 11 acres and was the sector historically used for lampblack pits, processing, and storage.An area of the sector was converted to 1,3-Butadiene production in the 1940s. The Metropolitan Transportation Authority (MTA) owns and currently uses the property for offices, storage, and maintenance of buses.

Completed Document Type: * Discovery
Completed Date: 10/22/1982
Comments: Known as the I T E Circuit Breaker Company, Inc: facility identified from L.A. Chamber of Commerce Directory 1963-1964. Electrical Distribution Equipment. On 05/31/1983, a facility drive-by was conducted. Now Truflex Rubber. Office in front; no waste visible from rear.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/30/1993
Comments: The Department received a complaint dated December 29, 1992 relates to alleged unlawful disposal or releases of hazard- ous wastes and hazardous substances, including PCE, TCE, 1,1,1-TCA and toluene at the site and neighboring property. Due to the evidience of on-site contamination, the Dept recommends a PEA.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type: Standard Voluntary Agreement
Completed Date: 01/19/2001
Comments: DTSC entered into a "Master" Voluntary Cleanup Agreement (Docket No. HSA-A 00/01-173) with the Southern California Gas Company (The Gas Company) (Proponent). The purpose of this Agreement is for The Gas Company, as a former owner and/or operator of the Aliso Street Former Manufactured Gas Plant site, to conduct and complete all necesary remedial investigations, removal actions, and/or remedial actions under the oversight of DTSC. All previous agreements for the Aliso Street Former MGP Site are hereby terminated. (VCA for Sectors A, B, C, D, and E.

Comments:	The Department received a Notice of Intent to Commence Action Under RCRA and CERCLA dated June 22, 1993. On July 30, 1993, the Department mailed the Information Request to all PRPs. The information received from the PRPs indicates that in 1945 the Empire Chemical Co. moved to the subject location. The current owner is Jerry Elkind. The company

EMPIRE CHEM CO INC (Continued) **U001561274**

was involved in the sale of janitorial products and insecticides. It did some packing in the permises as part of their operation. One 5000-gallon UST was installed in 1947-1950 to store kerosene. Soil around the area of of the UST is contaminated with TPH and the groundwater is also suspected to be contaminated. The Department's contact with the Los Angeles City Fire Department, UG Tank Plan Check indicates that they are the lead agency. Therefore, the Department's involvement is unnecessary.

Comments: Document uploaded for the administrative record.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 08/19/2002
Comments: A deed restriction to restrict use of the property was recorded on August 19, 2002. The deed restriction prohibits sensitive uses of the property including, but not limited to residential, hospital, public or private school uses for persons under 21 years of age, and daycare uses for children.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 06/30/2000
Comments: DTSC approves the Soil Removal Action Workplan (RAW) for the former Bortz Oil site. Bortz will implement a soil vapor extraction technology to achieve the remedial goals set forth in the RAW. DTSC has determined and filed a CEQA Notice of Exemption for the Site. The Removal Action Workplan (RAW) for the above site was approved on June 30, 2000. As indicated in the RAW, Soil Vapor Extraction will be implemented at the area designated as AOPC-2.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 08/02/1996
Comments: DTSC approves the Removal Action Workplan and Neg. Dec. for Bortz Oil-Spring Street property. The Removal Action involves removal of above-ground tanks and structures.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 07/07/1993

Alternate Address: PO BOX 60368
Alternate City,St,Zip: LOS ANGELES, CA 90012
Alternate Address: 1746 NORTH SPRING STREET
Alternate City,St,Zip: LOS ANGELES, CA 90012
Background Info: The Bortz Oil Company (BOC) was a petroleum products blending and packaging facility. The site produced various petroleum products (i.e. kerosene, paint, acetone, methyl ethyl ketone (MEK),lacquer thinners, and denatured alcohol). High levels of hydrocarbons and chlorinated solvents have been identified in the soil, while 1,1-dichloroethane (DCE), vinyl chloride, petroleum hydrocarbons, and benzene have been detected in the groundwater.
On August 9, 1984, a fire broke out in one of the metal and concrete warehouse facilities on the North Spring Street property. Undetermined amounts of chemicals were consumed by the fire and spilled on the ground, which has since percolated into the soil. The Department's inspection in December 1985, and January 1986, revealed that there were numerous uncontrolled chemical spills, leaking valves and drums, and illegal disposal of chemicals at the site. Since the groundwater is not being used as a drinking water source, the potential impact of the contaminated groundwater is not an immediate concern. The groundwater investigation will be conducted after the Spring Street property is sold. Direct contact with the contaminated soil, inhalation, and dermal absorption are the potential routes of exposure.
On April 14, 1987, the Department issued a Remedial Action Order (RAO) to BOC to develop and implement the Remedial Investigation/Feasibility Study (RI/FS), Remedial Action Plan (RAP) and remediation. On July 6, 1988, the RAO was modified to include additional property (1726 N. Naud Street) owned by (BOC). Although remedial activities have been slowed due to the death of the owner in March 1990 the Department approved the Focused Feasibility Study Report for the Naud Street property. The Probate Court has determined that BOC's assets will be used towards the remediation of the Naud Street Property. On October 23, 1992, the Dept. negotiated a Consent Order with the Executor of the BOC estate.
In August 1996, DTSC completed a removal action on the North

Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: The responsible parties have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions.
This has not been identified as a NPL site, nor does it appear, to be a likely NPL candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for this site.
Site Description: Bortz Oil was a petroleum products blending and packaging facility. The packaging warehouse was destroyed by fire in 1984. During reconstruction, pervasive subsurface contamination was detected. The site now operates only as a warehouse for storage of chemical products.
Hazardous Waste Desc: Subsurface exploration has revealed that the soil and ground water are contaminated with acetone, toluene, xylene, benzene, methyl ethyl ketone (MEK), methylene chloride and 1,2-dichloroethane (DCE).
Threat To Public Health & Env: Major routes of concern for human and animal exposure are soils, surface water and ground water. The Los Angeles River Channel is 100 feet from the site. Contamination of the soil and ground water was documented in January, 1986. The shallow and deeper aquifers are believed to be hydraulically connected. Soil gas vapors could pose an explosive threat; no threat has been identified to date.
Site Activity Status: A remedial action order was issued April 13, 1987 directing the RPs to mitigate the site. A remedial investigation work plan was submitted and approved with modifications by DHS. Implementation of the remedial investigation commenced August 10, 1987. Routine monitoring of the ground water monitoring wells and vapor collection system is being conducted. The responsible parties were found in non-compliance with the order on April 28, 1988. Completion of the RI/FS is projected for January, 1990.

Completed Date: 07/26/2004
Comments: Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

Completed Area Name: PROJECT WIDE

Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 07/26/2004
Comments: Block L - Polycyclic aromatic hydrocarbon (PAH) and volatile organic hydrocarbon (VOC) contaminated soil was excavated and thermally treated offsite. Site has been backfilled with clean soil. Subsurface contamination did not extend laterally to offsite areas. Contamination was found, as expected, at the ground water table, and will be addressed in a later, regional effort. As the soil was remediated to industrial cleanup goals, a deed restriction will limit use of the site, preventing residential or other sensitive uses on this parcel.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/27/2003
Comments: Block L - PEA-E investigated the former manufactured gas plant and petroleum transfer site. VOCs, SVOCs, PAHs and hydrocarbons were

SO CAL GAS/ALISO SECTOR C, BLOCK L (Continued) **S118756528**

found to impact the site. A Renivak Action Work Plan will address clean up of this contamination. PEA-E completion was delayed due to further Site Characterization activities and delays in receiving the Human Human Health Risk Assessment reports associated with the PEA-E.

Manufactured Gas Plants:

The former Aliso Street manufactured Gas Plant covered approximately 52 acres in downtown Los Angeles. The site is being investigated as 5 sectors and an overall groundwater unit. The "C" sector consists of 16.4 acres south of the Hollywood (101) Freeeway, bisected by Center Street and bounded by Commercial, Ducommun and Jackson Streets. Sector C is further subdivided into Blocks G, K, L, N, O, Q, and R. Contaminants suspected include petroleum hydrocarbons, volatile organic compounds, cyanide,polycyclic aromatic hydrocarbons and heavy metals

looking to change the land-use of the property and construct a 3-story building. Further investigation is necessary in order to define the nature and extent of residual contamination and evaluate additional remedial alternatives. MTA was informed of the FA determination in face-to-face meetings.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 07/21/2016
Comments: Document deemed incomplete for the purposes of evaluating potential intrusion into hazardous waste areas subject to the LUC. In addition, LUC review revealed that Soils Management Plan called out was never submitted. Metro advised of the inadequacies. Meeting scheduled to revise work plan and discuss the new soils management plan.

CERS ID: 863381
CERS Description: Construction Storm Water

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2020
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Staff discussed the inspection findings with Mr. Esposito. Mr. Esposito contacted site personnel to order new gravel bags while Staff was onsite. Staff observed a street sweeper by the entrance to where minor sediment track-out was observed and requested that Mr. Esposito send a photograph to show that it is swept. On January 17, 2020, Mr. Esposito sent a photograph to Staff showing that the SWPPP was onsite and notified Staff that the stormwater representative would address the remaining issues. On February 4, 2020, Staff followed up to inquire about the remaining action items.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/26/2022

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022

Next Scheduled EDR Contact: 01/09/2023
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/26/2022

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

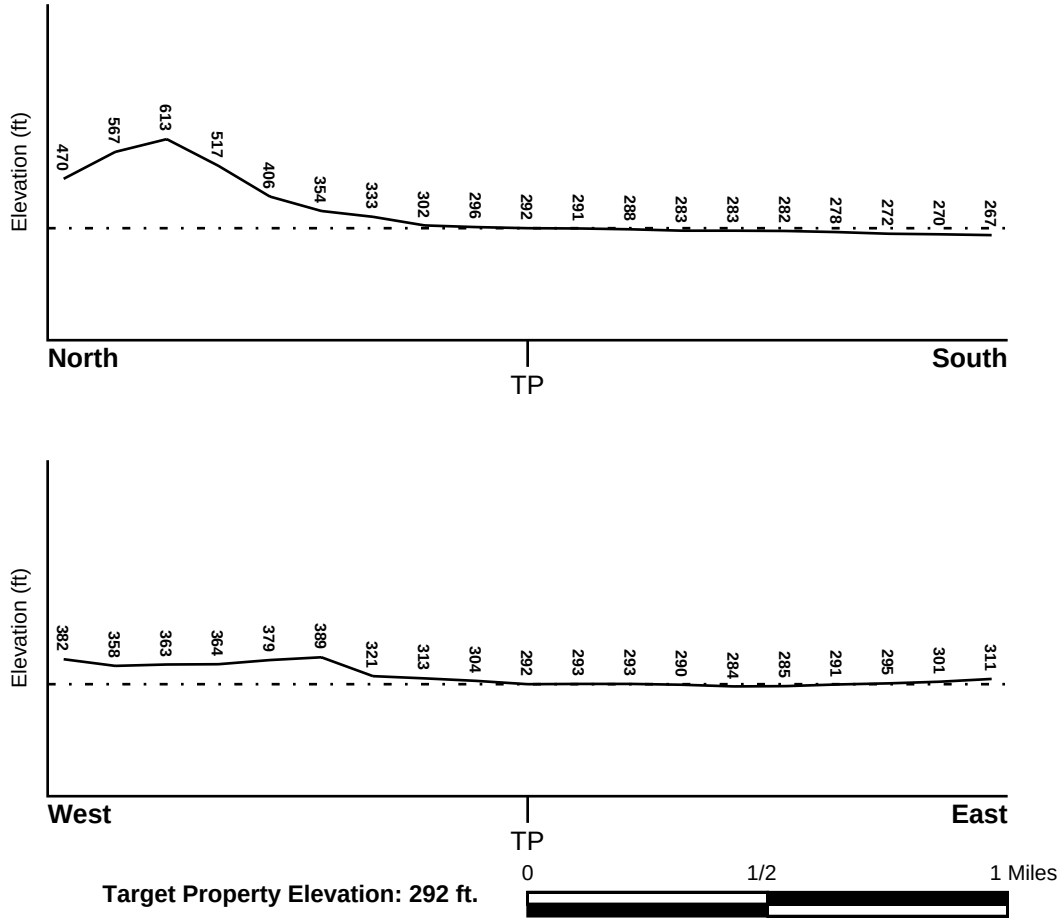

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 292 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1628F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06037C1637F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile SE
Site Name:	Van Der Horst Corporation Of America
Site EPA ID Number:	CAD020159166
Surficial Aquifer Flow Dir.:	VARIABLE. A FLOW TO THE S AND SE HAS BEEN IDENTIFIED DURING FORMER INVESTIGATIONS. MORE RECENT INVESTIGATIONS IDENTIFIED A FLOW TO THE E.
Measured Depth to Water:	28 feet to 38 feet.
Hydraulic Connection:	Aquifer interconnections exist within 2 miles of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX C

RESUMES / CONTRACT / REFERENCES

AYESHA S. SYEDA

Title: **Manager of GeoServices**

Summary of Qualifications: Experienced in conducting and managing Phase I/Phase II Environmental Assessments, Soil Vapor Surveys, and site characterizations in California, Arizona, mid-west states, and Washington. Other experience includes overseeing and supervising work activities at commercial and industrial facilities including sampling of groundwater monitoring wells, oversight and sampling of underground storage tank (UST) removals and abandonment's, drilling of soil borings and collection of soil samples for laboratory analysis, excavation and transportation of hazardous and non-hazardous soils.

Academic Background:

M.S. Environmental Engineering, Cal. State Univ. Long Beach (1993)
B.S. Civil Engineering, Osmania University, India (1988)
Certificate -Industrial Hygiene Technician, Cal. State University, Long Beach
OSHA 29 CFR 1910.120 - 40 hour training.
AHERA Certified Building Inspector/ Certified Asbestos Contractor/Supervisor

Professional Experience:

March 2007 to present: Manager of GeoServices
Smith-Emery Laboratories - Los Angeles, California
Manage personnel associated with Smith-Emery Los Angeles County's office's Environmental/Geotechnical Departments and soils laboratory. Other responsibilities include review and sign off of final reports and documents.

December 1993 to March 2007: Engineer/Phase I Manager
Smith-Emery Laboratories - Los Angeles, California
Responsible for field research and analysis of Phase I Environmental Assessments, report preparation, and project supervision. Assists with Phase II Assessment fieldwork and report preparation.

June 1993 - September 1993: Environmental Engineer
BCM Engineers- Ontario, California
Project manager for Phase I and Phase II Environmental Assessments, asbestos sampling, and supervising abatement.

June 1992-March 1993: Engineer
Epics International Engineers-Long Beach, California
Duties included Phase I Site Assessments, including research for federal and state requirements. Performed building inspections for asbestos potential.

October 1991 to May 1992: Volunteer Student Intern
Public Works Department-San Bernardino County, California
Assisted civil engineers in their duties, including surveying and drafting, research and collecting data for specialized engineering functions. Reviewing geologic and hydrologic information and estimating for quantities of materials.

Granite Properties
5601 Granite Parkway, Suite 1200
Plano, Texas 75024

Subject: ***Proposal for Phase I Environmental Site Assessment***
130 West College Street, Los Angeles, CA 90012
Assessor's Parcel Numbers: 5409-008-001, 5409-008-002, 5409-008-003, 5409-008-004, 5409-008-005, 5409-008-006, and 5409-008-015

Aaron Bidne:

Smith-Emery Laboratories (SEL) presents this proposal to perform a Phase I Environmental Site Assessment (ESA) at the above referenced property. The Phase I ESA will be performed in compliance with the EPA All Appropriate Inquiry (AAI) Rule and following the guidance of the ASTM Standard Practice for Environmental Site Assessments (E-1527-13) and the ASTM Standard Guide for Vapor Encroachment Screening (E-2600-15).To SEL to proceed with this important project please sign and date the attached Terms and Conditions, and forward entire agreement to SEL's Los Angeles Branch Office.

PROPERTY INFORMATION

SEL understands that the subject property consists of seven (7) parcels totaling approximately 2.25 acres in size and depicted as an industrial parking lot.

COST

The Phase I ESA will be performed for the sum of $x,xxx.xx.

This proposal is valid for 30 days. Payment in full is due prior to issuance of report.

SCHEDULE

The project will be completed, and report submitted, in 20 business days..

Optional Extra Items (If Requested)

RUSH Turnaround fees (Turnaround time: 10-15 business days) = $ 350.00

Note: Please check the box(s) for optional extra items on the signature page (last page).

SCOPE OF SERVICES

The following components are included as part of the Phase I ESA process:

1. **Site Reconnaissance** – A site reconnaissance will be performed by an environmental professional. This shall include a reasonable observation of the property and structures, the periphery of the property, the interior common areas of structures, and a representative sample of occupant spaces. Items such as current and past uses of the property and adjoining properties; obvious geologic, hydrologic, and topographic conditions; structures; roads; potential hazardous substances and petroleum products; storage tanks; odors; pools of liquid; drums; containers; surface waters; suspected fill materials; stained soil or pavement; stressed vegetation; solid waste; waste water; wells; and septic systems shall be noted as reasonably and visibly observed.
2. **Historical sources –** As available, historical resources including building department records, historical aerial photographs, local street directories, fire insurance maps, and USGS 7.5 Minute Topographical Maps will be reviewed.
3. **Radius Map Review** – A search and review of federal, state, local and tribal databases will be conducted according to the current ASTM and AAI standard search distances.
4. **Regulatory Research** – State and local regulatory agencies will be contracted in an attempt to obtain copies of permits, inspection reports, and other information pertaining to the use, storage, and disposal of hazardous materials and petroleum products or any reported releases of hazardous materials and petroleum products.
5. **Owner/Occupant Interviews** - Past and present owners, occupants, neighbors, and/or other persons who are familiar with the property shall be attempted to be interviewed in person, by telephone, or in writing regarding the history, operations, management, waste management practices, and other environmental considerations for the subject property as those persons are available and open to an interview. Relevant reports provided by these individuals or the Client will be reviewed and a summary and opinion will be provided in the report.
6. **Report -** A written report of our observations and conclusions will be prepared. If a Recognized Environmental Condition associated with the property is identified, the report may include recommendations for additional testing. Our findings will be presented in a manner consistent with standard practices. The report will be prepared on the behalf of and for your exclusive use. It may not be used by or relied on by others without our permission. The report may include slight deviations in the exact format specified by E 1527 in order to account for site-specific conditions and to improve the readability and usefulness of the report. SEL assumes no responsibility for deviations from the ASTM E 1527 standard practice if by request of the client.

USER RESPONSIBILITIES

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the user conduct independent research and consider certain information before purchasing a property:

1. Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the user should provide that information to the Environmental Professional (SEL). If the user has actual

knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the user should provide that information to the Environmental Professional (SEL).

2. The user should provide the Environmental Professional (SEL) with any specialized knowledge the user has with regard to recognized environmental conditions in connection with the property.
3. If the user is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the user should provide the information to the Environmental Professional (SEL).
4. If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the user to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the user should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

ASSUMPTIONS AND EXCLUSIONS

1. SEL understands the property of investigation to be as described in the subject of this agreement including the address(es) and APN(s) listed on the first page. If the information is incorrect, Client shall notify SEL in writing immediately at the time of acceptance of this proposal.
2. Unless otherwise stated, all fieldwork will be performed during normal business hours (Monday through Friday, 8:00AM to 5:00PM). Additional fees may be assessed if fieldwork is performed outside these hours.
3. Cancelation by Client will result in an assessed fee of $120/hour/person (time) and cost-plus-25% (expense) incurred on the project through cancellation notice.
4. Site access, safety and security is the responsibility of the Client unless otherwise specified herein. In the event the safety or security of the site cannot be guaranteed by the Client, SEL reserves the right to postpone or cancel fieldwork until such time a safe and secure working environment can be provided. The project schedule may be impacted, and remobilization costs, if incurred, will be billed in accordance with rates specified below. The determination of a safe and secure work area will be made solely by SEL. In the event a security guard is needed during fieldwork activities, Client will furnish upon request or one can be provided at a rate of $55/hour.
5. Project deliverables will be provided in electronic format and one hard copy upon request. Additional hard copy deliverables can be provided for $75 per copy.

STANDARD TERMS AND CONDITIONS

The following Terms and Conditions are incorporated in full as part of this agreement. The client's signature at the end of this document is required for the work to proceed and indicates that the client is aware of the Risk Allocation Section of this document.

SECTION 1: THE AGREEMENT

1.1 Smith Emery Laboratories (hereinafter known as SEL) agrees to perform its services, which are intended solely for the use of the client, in a manner consistent with the current standards of professional practice in the community. Client agrees to pay for and to look to SEL for only such services as set forth in this work order and/or the attached proposal. Submittals to governmental agencies are the responsibility of the Client.

1.2 The agreement between the parties consists of these terms, the attached proposal, if any, and any exhibits or attachments noted in the proposal. Together these elements will constitute the entire agreement superseding any and all prior negotiations, correspondence, or agreements either written or oral. Any changes to this agreement must be mutually agreed to in writing.

1.3 If the Client is a corporation or public entity, the individuals who sign this agreement on behalf of the Client warrant that they are duly authorized agents of the Client and guarantee that the Client will perform its duties under this agreement. The client binds itself, its partners, successors, executors, administrators and assigns to this agreement in respect to all its terms and conditions.

SECTION 2: STANDARD OF CARE

2.1 The client recognizes that subsurface conditions may vary from those observed at locations where borings, surveys, or explorations are made, and that site conditions may change with time. Data interpretations and recommendations by SEL will be based solely on information available to SEL. SEL is responsible for those data, interpretations, and recommendations, but will not be responsible for other parties' interpretations or use of the information developed.

2.2 Services performed by SEL under this agreement will be conducted in a manner consistent with the level of care and skill ordinarily exercised by members of this profession currently practicing under similar conditions and in the same locality of the project. No warranty, expressed or implied, is made.

SECTION 3: SITE ACCESS AND SITE CONDITIONS

3.1 Client will grant or obtain free access to the site for all equipment and personnel necessary for SEL to perform the work set forth in this agreement. Client will grant or obtain permission for SEL personnel to photograph the site. The client will notify any and all possessors of the project site that client has granted SEL free access to the site. SEL will take reasonable precautions to minimize damage to the site, but it is understood by client that, in the normal course of work, some damage may occur and the correction of such damage is not part of this agreement unless so specified in the proposal.

3.2 The client is responsible for the accuracy of locations for all subterranean structures and utilities. SEL will take reasonable precautions to avoid known subterranean structures, and the client waives any claim against SEL, and agrees to defend, indemnify, and hold SEL harmless from any claim or liability for injury or loss, including costs of defense, arising from damage done to subterranean structures and utilities not identified or accurately located. In addition, client agrees to compensate SEL for any time spent or expenses incurred by SEL in defense of any such claim with compensation to be based on SEL's prevailing fee schedule and expense reimbursement policy.

SECTION 4: COOPERATION AND PROJECT UNDERSTANDING

4.1 Client will make available to SEL all information regarding existing and proposed conditions of the site. The information shall include, but not be limited to plot plans, topographic surveys, hydrographic data and previous soil data including borings, field and laboratory tests, and written reports. Client will immediately transmit to SEL any new information which becomes available or any change in plans.

4.2 Client agrees to provide a representative at the job site to supervise and coordinate the job when required by SEL and upon 24 hours notice. SEL shall not be liable for any incorrect advice, judgment or decision based on any inaccurate information furnished by client, and client will indemnify SEL against claims, demands, or liability arising out of or contributed to by such information.

SECTION 5: SAMPLE DISPOSAL

5.1 SEL will dispose of all remaining soil, rock and materials samples at the time of report completion. Further storage or transfer of samples can be made at client's expense upon client's prior written request.

5.2 Contaminated drill cuttings, sample spoils, and wash water may be produced as a result of encountering hazardous materials at the site. Such materials will be properly contained, labeled, and stored on-site by SEL. It is the client's responsibility for the proper transportation and disposal of such hazardous materials. SEL can arrange for the transportation and disposal of hazardous materials at the client's request.

SECTION 6: CONSTRUCTION MONITORING

6.1 If SEL is retained by the client to provide a site representative for the purpose of monitoring specific portions of the construction work as set forth in the proposal, then this section applies. For the specified assignment, SEL will report observations and professional opinions to the client. No action of SEL or SEL's site representative can be construed as altering any agreement between the client and others. SEL will report any observed work to the client which, in SEL's professional opinion, does not conform with plans and specification. SEL has no right to reject or stop work of any agent of the client. Such rights are reserved solely for the client. Furthermore SEL's presence on site does not in any way guarantee the completion or quality of the performance of the work of any party retained by the client to provide construction related services.

6.2 Neither the professional activities of SEL, nor the presence of SEL or its employees and subcontractors, shall be construed to imply that SEL has any responsibility for methods of work performances, supervision, sequencing of construction, or safety in, on , or about the job site. Client agrees that the General Contractor is solely responsible for job site safety, and warrants that this intent shall be made evident in the Owner's agreement with the General Contractor. This requirement shall be made to apply continuously and not be limited to normal working hours. Client also warrants that SEL shall be made an additional insured under the General Contractor's general liability insurance policy.

6.3 In the event that SEL expressly assumes health and safety responsibilities for toxic or other concerns specified, the acceptance of such responsibility does not and shall not be deemed an acceptance of responsibility for any other health and safety requirements, such as but not limited to those relating to excavating, trenching, drilling or backfilling.

SECTION 7: BILLING AND PAYMENT

7.1 Client will pay SEL the fee indicated in the proposal or, if no fee is indicated, in accordance with the schedule of personnel and equipment charges, as shown in the proposal and its attachments. Backup data on billing will not be available unless prior arrangements have been made. Prior to initiation of field work, a retainer as specified in the proposal, is required. Invoices for the balance will be submitted to client by SEL, and will be due and payable upon presentation. If client objects to all or any portion of any invoice, client will so notify SEL in writing within fourteen (14) calendar days of the invoice date, identify the cause of disagreement, and pay when due that portion of the invoice not in dispute. The parties will immediately make every effort to settle the

disputed portion of the invoice. In the absence of written notification described above, the balance as stated on the invoice will be paid.

7.2 Invoices are delinquent if payment has not been received within thirty (30) days from date of invoice. Client will pay an additional charge of 1 1/2 (1.5) percent per month (or the maximum percentage allowed by law, whichever is lower) on any delinquent amount, excepting any portion of the invoiced amount in dispute and resolved in favor of client. Payment thereafter will first be applied to accrued interest and then to the principal unpaid amount. All time spent and expenses incurred (including any attorney's fees) in connection with collection of any delinquent amount will be paid by the client to SEL per SEL's current fee schedule. In the event client fails to pay SEL within sixty (60) days after invoices are rendered, client agrees that SEL will have the right to consider the failure to pay SEL's invoice as a breach of this agreement. (See Section 11, Termination.)

7.3 Fee schedules are periodically revised. Unless otherwise agreed, new rates apply to ongoing work as the rates are issued.

7.4 If client or SEL should become bankrupt or make an assignment for the benefit of creditors, SEL, or trustee in bankruptcy, shall be paid the reasonable value of all work theretofore performed, and the obligations of all parties under the agreement shall thereupon terminate. In determining reasonable value under this paragraph, the agreement shall be deemed reasonable.

SECTION 8: OWNERSHIP OF DOCUMENTS

8.1 All reports, boring logs, field data, field notes, laboratory test data, calculations, estimates, and other documents prepared by SEL as instruments of service, shall remain the property of SEL.

8.2 Client agrees that all reports and other work furnished to the client or his agents, which is not paid for, will be returned upon demand and will not be used by the client or others for any purpose whatsoever.

8.3 SEL will retain pertinent records relating to the services performed for a period not exceeding three years following submission of the report, during which period the records will be made available to the client at reasonable times.

SECTION 9: CLIENT CHANGES

9.1 In the event any changes are made in the plans and specifications by the client, or persons other than SEL, client agrees to hold SEL harmless from any liability arising out of such changes and the client assumes full responsibility unless the client has given SEL prior notice and has received SEL's written consent for such changes.

SECTION 10: INSURANCE

10.1 SEL and its agents, staff, and consultants employed by it are protected by Worker's compensation insurance and maintains coverage under public liability and property damage insurance policies which SEL deems to be adequate. Certificates for all such policies of insurance shall be provided to client upon request in writing. SEL shall not be responsible for any loss, damage or liability beyond the amounts, limits, and conditions of such insurance. SEL shall not be responsible for any loss, damage, or liability arising from any acts by clients, its agents, staff, and other consultants employed by it. Provided however such insurance coverage should be for not less than one million dollars.

SECTION 11: TERMINATION

11.1 This agreement may be terminated by either party upon written notification, or seven (7) days after written notice in the event of nonpayment (see Section 7), any breach of any provision of this agreement, in the event of substantial failure of performance by the other party, or if the client suspends the work for more than three (3) months. In the event of termination, SEL will be paid for services performed prior to the date of

termination plus reasonable termination expenses, including the cost of completing analyses, records, and reports necessary to document job status at the time of termination.

SECTION 12: RISK ALLOCATION

12.1 There are a variety of risks which potentially affect SEL by virtue of entering into an agreement to perform professional engineering services on the client's behalf. In order for the client to obtain the benefit of a fee which includes a lesser allowance for dealing with SEL's risks, the client agrees to limit SEL's liability to the client and to all other parties for claims arising out of SEL's performance of the services described in this agreement. The total aggregate liability of SEL will not exceed $50,000 for negligent professional acts, errors or omissions, and the client agrees to indemnify SEL for all liabilities in excess of the monetary limits established above.

12.2 Client agrees that in no instance shall SEL be responsible, in total or in part, for the errors or omissions of any other Design Professional, Contractor, Subcontractor or any other party. Client also agrees that SEL shall not be responsible for the means, methods, procedures, performance or safety of the construction contractors or subcontractors or for their errors or omissions. Client agrees to indemnify, hold harmless and defend SEL from and against any and all loss, expenses, including attorney fees, injury, damage, liability or cost claims arising out of the services performed by SEL or work by Client or other parties upon the real property described above, except where such loss, injury, damage, liability, cost, expenses or claims are the result of the negligence or willful misconduct of SEL, its agents, employees, or officers. Liability resulting from design defects (as defined in California Civil Code Section 2782.5) shall be the sole responsibility of the Client.

SECTION 13: DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

13.1 Client warrants that a reasonable effort to inform SEL of known or suspected hazardous materials on or near the project site has been made.

13.2 Hazardous materials may exist at a site when there is no reason to believe they could or should be present. SEL and client agree that the discovery of unanticipated hazardous materials constitutes a changed condition mandating a re-negotiation of the scope of work or termination of services. The client recognizes that the discovery of hazardous materials may necessitate immediate protective measures to safeguard the public health and safety and agrees to compensate SEL for measures that in our professional opinion are justified to preserve and protect the health and safety of site personnel and the public.

13.3 SEL agrees to notify client as soon as practically possible should hazardous materials be encountered at the site that pose a threat to human health, safety, or the environment. Client agrees that the discovery of hazardous materials at the site must legally be reported to the proper authorities as required by Federal, State, and local regulations. Client agrees to make the required report at the recommendation of SEL or, if unable to do so, authorizes SEL to make this report. Client also agrees to inform the property owner in the event that hazardous materials are encountered at the site.

13.4 Notwithstanding any other provision of the agreement, client waives any claim against SEL, and to the maximum extent permitted by law agrees to defend, indemnify, and save SEL harmless from any claim, liability, and/or defense costs for injury or loss arising from SEL's discovery of unanticipated hazardous materials or suspected hazardous materials including any costs created by delay of the project and any cost associated with possible reduction of the property's value. Client will be responsible for ultimate disposal of any samples secured by SEL which are found to be contaminated.

SECTION 14: AQUIFER CONTAMINATION

14.1 The client recognizes that it is impossible for SEL to know the exact composition of a site's subsurface even after conducting a comprehensive exploratory program. As a result, there is a risk that drilling and sampling may result in contamination of certain subsurface areas, as when a boring passes through a

contaminated zone, connecting it to one or more aquifers not previously contaminated and capable of spreading contamination.

14.2 Although SEL will take all reasonable precautions to avoid such an occurrence, client waives any claim against, and agrees to defend, indemnify and save SEL harmless from any claim or liability for injury or loss which may arise as a result of cross-contamination caused by drilling, sampling, or monitoring well installation. Client also agrees to adequately compensate SEL for any time spent and expenses incurred in defense of any such claim.

SECTION 15 DISPUTES RESOLUTION

15.1 All claims, disputes, and other matters in controversy between SEL and client arising out of or in any way related to this agreement will be submitted to "Alternative Dispute Resolution" (ADR) such as mediation and/or arbitration, before and as a condition precedent to other remedies provided by law. If and to the extent client and SEL have agreed on methods for resolving such disputes, then such methods will be set forth in the "Alternative Dispute Resolution Agreement" which, if attached, is incorporated and made a part of this agreement.

15.2 If a dispute at law related to the services provided under this agreement arises and that dispute requires litigation instead of ADR as provided above, then:

(1) the claim will be brought and tried in judicial jurisdiction of the court of the county where SEL's principal place of business is located and client waives the right to remove the action to any other county or judicial jurisdiction; and

(2) The prevailing party will be entitled to recovery of all reasonable costs incurred, including staff time, court costs, attorney's fees, and other claim related expenses.

SECTION 16: ASSIGNS

16.1 Neither the client nor SEL may delegate, assign, sublet or transfer his duties or interest in this Agreement without the written consent of the other party.

16.2 The contractual agreement between the client and SEL shall pertain only to the benefit of the parties hereto, and no third party shall have any rights hereunder.

SECTION 17: GOVERNING LAW AND SURVIVAL

17.1 The laws of the State of California will govern the validity of these terms, their interpretation and performance.

17.2 If any of the provisions contained in this agreement are held illegal, invalid, or unenforceable, the enforceability of the remaining provision will not be impaired. Limitations of liability and indemnities will survive termination of this agreement for any cause.

ACCEPTANCE

The individual executing this Proposal on behalf of Client represents and warrants that it has the right, power, legal capacity and authority to execute this Proposal and to bind the party for whom it is signing.

ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS AND STATEMENT

AYESHA SYEDA, M.S.

Ms. Syeda began working in the environmental industry in 1986 while attending university in India where she obtained her Bachelors of Science degree in Civil Engineering. Upon coming to the United States, she continued to work as an intern while furthering her education at the California State University, Long Beach, obtaining her Masters of Science degree in Environmental Engineering. Ms. Syeda has performed hundreds of Phase I Environmental Site Assessments since 1993 and currently oversees, manages and reviews all Phase I and Phase II Environmental Site Assessment's performed by Smith-Emery Laboratories. A copy of Ms. Syeda's resume is included in Appendix C.

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by in §312.10 of 40 CFR part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312."

Respectfully submitted,

Smith-Emery Laboratories

AS/AA

EXECUTIVE SUMMARY

PURPOSE & SCOPE OF INVESTIGATION

The purpose of the investigation, the Phase II Environmental Site Assessment (ESA), was to evaluate the potential environmental impacts of the historical operations at 130 West College Street in the City of Los Angeles. Based on the recommendations of the Phase I ESA report, the Phase II assessment was aimed to identify potential underground tanks, assess the condition of subsurface soils, and determine the presence of soil vapors. Mr. David Riboli (owner) provided project authorization for Proposal No. LA-7186.

The investigation involved conducting a geophysical survey and installing thirteen (13) soil borings up to 25 feet below the ground surface. The soil samples were analyzed for Volatile Organic Compounds (VOCs), Total Petroleum Hydrocarbons (TPH), and Total metals. Soil vapor samples were also collected and analyzed for VOCs.

Based on the client's site plan for the proposed project, the Site is intended for a commercial building that includes a podium with at-grade and above-grade parking levels. The podium levels will feature active ground floor commercial uses along Alameda Street, Bruno Street, and Main Street. Above the podium, there will be four levels dedicated to office use, with underground parking estimated to be located 13 to 15 feet below grade.

SITE INFORMATION

The Site is located between North Main Street and North Alameda Street, south of West College Street. It spans approximately 2.24 acres and is currently used as a school bus parking lot. There are no structures presently located on the Site, but it contains a storage container, an Electric Vehicle (EV) charging station, portable restrooms, an electric panel board, and eleven 55-gallon drums filled with soil cuttings from a prior geotechnical investigation.

A Phase II environmental assessment was conducted in 1997, which revealed that the soil composition consisted of brown silty sand up to 10 feet below ground surface, transitioning to sand from 10 feet to approximately 31.5 feet below ground surface. Groundwater was encountered at around 29 feet below ground surface in one of the borings, and it was assumed to flow towards the southeast based on contour lines in the area.

Historical research indicates that before 1888, the western portion of the Site housed various retail stores, dwellings, restaurants, lodging facilities, and a shoe/cotton retail store. South Pacific Railway Co.'s railroad tracks were present on the western portion from at least 1906 until the early 1980s. Pacific Motor Trucking Co. engaged in automotive fueling on the western portion, and the eastern portion of the site had a diverse range of commercial and industrial operations, including retail stores, warehouses, manufacturing facilities, offices, factories, and more.

Permits were issued in 1940 for two 550-gallon gasoline Underground Storage Tanks (USTs) operated by Pacific Motor Trucking Co., located east of the west property line along North Alameda Street. In 1979, D & S Ingredients obtained a permit to install an 8,000-gallon tank in the southwest portion of the site, and in 1986, a permit was issued to abandon an 8,000-gallon tank installed in 1971. An inactive 8,225-gallon diesel UST was also listed for D & S Ingredient Transfer Co. at 130 West College Street, which is part of the site, but no further information is provided about it.

DISCUSSION & CONCLUSIONS

Soil Sampling

Eleven (11) out of twenty two (22) Site soil samples had no TPH concentrations above the laboratory detection limits (i.e., "non-detect"). The remaining eleven (11) soil samples had detectable concentrations of TPH that were below the RSLs. None of the soil samples contained VOCs at a concentration above the detection limits, with the exception of B10-5' where toluene was detected at a level which is below than the RSLs. Please refer to paragraphs below for details:

Soil samples identified as B2-5', B4-15', B5-10', B5-15', B6-10', B7-15', B7-20', B9-15', B11-5', B11-15', and B12-5' did not contain any TPH or VOCs at concentrations above the laboratory detection limits (i.e., "non-detect"). Detectable TPH as diesel (C13-C22) concentrations were identified as 2.81 mg/kg @B1-2', 106.0 mg/kg @ B3-2', 2.88 mg/kg @ B6-15', 112 mg/kg @ B8-2', 4.49 mg/kg @ B8-5', 19.2 mg/kg @ B9-5', 5.47 mg/kg @ B10-5', 5.88 mg/kg @ B10-15', 10.6 mg/kg @ B12-2', 4.76 mg/kg @ B13-5', and 2.62 mg/kg @ B13-20'. Detectable TPH motor oil (C23-C32) concentrations were identified as 1,820.0 mg/kg @ B3-2', 555.0 mg/kg @ B8-2', 375.0 mg/kg @ B9-5', and 168.0 mg/kg @ B12-2'. Detectable TPH as High End Motor Oil (C33-C36) concentrations were identified as 474 mg/kg @ B3-2' and 164 mg/kg @ B9-5'. These results are tabulated and referred as Table 1 and 2 in the Table Section attached to the report.

The presence of detectable TPH concentrations in soil samples may indicate the release of petroleum- based contaminants to the subsurface.

The detected TPH concentrations were below the Los Angeles RWQCB Los Angeles May 1996 Guidebook for Maximum Soil Screening Level.

The detected Toluene concentration was found to be below the RSL.

CAM 17 Total Metals were found in shallow Site soils samples at B7-2', B8-5', B9-2', B11-2', and B12-2' to be present at concentrations within California background levels and below levels which require hazardous waste characterization.

Lead was found at B8-2' and B11-2' at concentrations of 238 mg/kg and 54.1 mg/kg, respectively, which were below the EPA's RSLs and DTSC HERO Note 3; however, B8-2' exceeded the Maximum California background level for lead of 97.1 mg/kg.

Both B8-2' and B11-2' exceeded the California Regulated Hazardous Waste characterization trigger value, which is 10 times the STLC (Soluble Threshold Limit Concentration). Additional leaching testing (Waste Extraction Testing - WET) found a lead concentration of 30.5 mg/L at B8-2', exceeding the STLC threshold value of 5 mg/L; however, the lead concentration of 0.522 mg/L at B11-2' was below the STLC threshold value of 5 mg/L. Based on the additional leaching test results, soils at 2 feet at B8 are characterized as California regulated Hazardous Waste and need to be disposed of at a hazardous waste accepting facility. Please note that soils at 5 feet at this B8 location did not reveal any lead concentrations above the RSLs, DTSC, and California background levels, and did not warrant any further hazardous waste characterization.

Please note that the closest samples to B8-2' were to the southeast (B9) and south-southwest (B7) located 30 feet and 40 feet, respectively. Neither of those samples contained lead concentrations exceeding the regulatory screening levels.

Soil Gas Sampling

PCE was detected in subsurface soil vapor at multiple depths in all sampled locations other than SV-6-10. TCE was found in subsurface soil vapor in four out of 11 locations. Please refer to paragraphs below for details including analytical results comparisons to agency screening levels:

Results –ND or below agency screening levels

The soil vapor sample identified as SV-6-10 collected at 10 feet bgs had no detectable concentration for VOCs above laboratory detection limits (i.e., "non-detect"). Ten soil vapor samples contained PCE at concentrations that were detectable but less than the RSL (1.5667 µg/L) and the DTSC soil gas screening level of 0.067 µg/L using an attenuation factor (AF)=0.03: SV-1-5, SV-4-10, SV-5-10, SV-8-10, SV-9-5, SV-10-10, SV-11-5, SV-12-9, SV-13-10, and SV-13-10-Rep. Detectable concentrations of TCE were found in four samples: SV-7-5, S-V-9-5, SV-10-10, and SV-11-5; all were below the DTSC soil gas screening level of 0.1 µg/L using AF=0.03.

Results –above agency screening levels

Elevated PCE concentrations were found in two soil vapor samples SV-7-5 and SV-7-5-Rep at concentrations of 0.104 µg/L and 0.096 µg/L exceeding the DTSC soil gas screening level of 0.067 µg/L using AF=0.03. Elevated TCE was found in one sample SV-7-5 Rep at a concentration of 0.108 µg/L exceeding the DTSC soil gas screening level of 0.1 µg/L using AF=0.03.

Conclusions

This Phase II report presents the findings of the Environmental Sampling at 130 West College Street, Los Angeles, California. The program consisted of soil and soil vapor sampling to address any potential impact of TPH, VOCs, and CAM 17 Total Metals from historical operations at the Site.

Based upon the results of the soil data collected in this Phase II program, eleven (11) out of twenty two (22) Site soil samples had no TPH concentrations above the laboratory detection limits (i.e., "non-detect"). The remaining eleven (11) soil samples had detectable concentrations of TPH that were below the RSLs. None of the soil samples contained VOCs at a concentration above the detection limits, with the exception of B10-5' where toluene was detected at a level which is below the RSLs.

Based upon the results of the soil data collected in this Phase II program, 1 (B8-2') out of 5 locations investigated contained lead at a concentration exceeding the California background screening level. Based on further STLC testing, the soil at this location is characterized as California regulated Hazardous Waste and would need to be disposed of at a hazardous waste accepting facility if excavated. Please note that soils at 5 feet at the B8 location did not reveal any lead concentrations above the RSLs, DTSC, and California background levels, and did not warrant any further hazardous waste characterization.

Based upon the results of the soil vapor data collected in this Phase II program, ten out of eleven locations contained detectable levels of PCE in subsurface soil vapor between 5 and 10 feet bgs. Only one of the detected PCE concentrations exceeded the DTSC screening level, SV-7-5, located in the central portion of the Site. TCE was found in subsurface soil vapor in four out of 11 locations; of which one location exceeded the RSL.

Based on the Project's site plan provided by the client, the Project's underground parking is estimated to be between 13 and 15 feet below grade.

The following SEL recommendations are based on knowledge that the Site will be excavated between 13 and 15 feet below ground for construction of the Project's underground parking:

- SEL recommends that air monitoring by SCAQMD Air Monitoring Rule 1166 be conducted during the site excavation to segregate any soil for which a VOC reading exceeds 50 ppm.
- SEL recommends that the stockpile generated during the soil excavation at the elevated lead location, or any other areas with an indication of presence of any hazardous materials, be segregated and disposed of at appropriate facility in compliance with applicable regulations.
- Based on the future use as a subterranean parking garage, which minimizes human occupancy, in our expert opinion, the known PCE in soil vapors onsite are not expected to be an item of concern. A vapor barrier can be installed during construction as extra protection to prevent any PCE migration into the future buildings through cracks/fractures.

It is SEL's expert opinion that further environmental sampling is not necessary since the Project's excavation of subsurface soils would be for construction of an underground parking. The excavated soils can be segregated based on air monitoring results and disposed of at an appropriate facility.

1.0 INTRODUCTION

1.1 Purpose

Smith-Emery Laboratories (SEL) performed a Phase I Environmental Site Assessment (Phase I ESA) at 130 West College Street (Site) in the City of Los Angeles (City) dated April 6, 2023. The Phase I ESA recommended that a Phase II Environmental Site Assessment (Phase II ESA) be performed to determine the extent to which historical operations may have impacted the Site. As described in more detail in the Phase I ESA, past uses of the Site have included a chemical factory, foundry, paint booths, manufacturing, machine shop, and historical underground storage tanks (USTs)/fuel dispensing operations. Mr. David Riboli (owner) provided project authorization for Proposal No. LA-7186.

1.2 Scope of Investigation

This Phase II ESA evaluated the potential presence of underground tanks, the condition of subsurface soils and potential presence of soil vapors. This report provides a description of the methods used and results of laboratory analysis.

First, a geophysical survey was performed. Second, SEL installed thirteen (13) soil borings up to 25 feet below ground surface (bgs) were analyzed for Volatile Organic Compounds (VOCs) by United States Environmental Protection Agency (EPA) Method 8260B/5035, Total Petroleum Hydrocarbons (TPH) by EPA Method 8015B, and California Administrative Manual (CAM) 17 Total metals by EPA Method 6010B/7471A. Soil vapor samples were analyzed for VOCs by EPA Method 8260B.

Based on the site plan for the proposed project provided by the client, the Site is intended to be developed with a commercial building comprised of a podium with one level of at-grade parking and one level of above-grade parking (both podium levels would be wrapped with active ground floor commercial uses along the Alameda Street, Bruno Street, and Main Street frontages), four (4) levels of office uses above, with below grade (underground) parking (Project). The proposed underground parking is estimated to be between 13 feet and 15 feet below grade.

1.3 Limits of Liability

The findings, conclusions, and recommendations contained in this report are based on site conditions as they existed at the time of our investigation. We further assume the explorations to be representative of subsurface conditions throughout the areas of the site which were addressed. This report was prepared solely for the use of **S & R Partners, LLC**. The factual data and interpretations pertain to the specific project described in this report and any reliance on this document by any other person or entity shall be at that party's sole risk. Our investigation was performed using the standard of care and level of skill ordinarily exercised under similar circumstances by reputable Environmental Assessors, Engineers, and Geologists currently practicing in these or similar localities. No other warranty, express or implied, is made as to the conclusions and professional advice included in this report.

1.4 Reliance for User

This document has been prepared for the sole use and benefit of **S & R Partners, LLC**. Any reliance on this document by any other person or entity shall be at that party's sole risk. **S & R Partners, LLC** may designate assignees to this report, which may assume the same rights of reliance as **S & R Partners, LLC** for all errors and omissions.

2.0 SITE INFORMATION

2.1 Site Location and Description

The Site is located between North Main Street and North Alameda Street, south of West College Street. North Alameda Street continues to the north as North Spring Street past West College Street. The Arroyo Seco Parkway (110) is located approximately 0.35 miles northwest of the Site. The Site consists of seven (7) Assessor's Parcel Numbers: 5409-008-001, 5409-008-002, 5409-008-003, 5409-008-004, 5409-008-005, 5409-008-006, and 5409-008-015. The Site is approximately 2.24 acres in size and is used by Mission Transportation as a school bus parking lot which includes approximately 127 parking stalls. No structures are presently located onsite, but the following were observed on the property: a storage container on north-northwestern corner of the Site; an Electric Vehicle (EV) charging station was on the central portion; portable restrooms on the northwestern portion; an electric panel board on the northern portion; and eleven (11) 55-gallon drums filled with soil cuttings on the northwestern corner of the Site, which were reportedly obtained from a prior geotechnical investigation completed in October of 2022.

2.2 Site History

Historical research indicated that, prior to 1888, five (5) retail stores, two (2) dwellings, two (2) restaurants, one (1) lodging, and a shoe/cotton retail store were present on the western portion of the Site and that the remaining areas were vacant land. South Pacific Railway Co.'s railroad tracks were present on the western portion of the Site from at least 1906 to the early 1980s. Records dated 1940 and 1960 indicated Pacific Motor Trucking Co. was engaged in automotive fueling on the western portion. A variety of commercial and industrial operations were present on the eastern portion of the Site, including retail stores, warehousing, light manufacturing, offices, factories, multiple machine shops, chemical mixing areas, steel storage tanks, foundry area, gasoline equipment, brush manufacturing, paint booths, and a chemical factory/plant. A large building on the eastern portion of the Site was occupied by Keystone Ironworks in 1906, Sparling Meter Company in 1954 and 1957, and Water Meter Manufacturing in 1950 and 1953. From 1960 to 1970, the Site was used mainly for offices, to manufacture gym equipment and to store a variety of materials, including school equipment, iron, and other goods. By 1992, all the onsite structures had been demolished and the lot was cleared. Since 2002, the Site has been occupied by Mission Transportation and used to park school buses.

2.3 Historical Tanks

According to the Los Angeles City Fire Department Certified Unified Program Agency (CUPA) records, Pacific Motor Trucking Co. (860 North Spring Street) was issued a permit dated June 18, 1940 to operate two 550-gallon (Rheem) gasoline Underground Storage Tanks (USTs) reportedly located 6 feet and 8.5 feet east of the west property line along North Alameda Street between Bruno Street and West College Street. Additionally, Pacific Motor Trucking Co. was issued (i) a permit dated December 31, 1940 to operate the Site as an auto fueling station (fuel dispensing) for private use with two USTs with a capacity totaling 1,100-gallon and (ii) a permit for 130 West College Street dated July 18, 1960 to operate the Site as an auto fueling station. A permit dated July 17, 1979 was issued to D & S Ingredients to install an 8,000-gallon tank in the southwest portion of Site near the intersection of railroad tracks and Bruno Street. D & S Ingredients dba Transporting was issued a permit dated May 22, 1986 to abandon a tank reported to be 8,000-gallon in size that had been installed at the Site in 1971. A site plot attached to the permit (attached in the Appendix C) showed that tank was located 80 feet south of College Street

and 75 feet east of Alameda Street; an accompanying hand written note stated that no visible soil contamination was reported to be found during removal.

The regulatory databases contain a listing for an inactive 8,225-gallon diesel UST installed in 1978 at D & S Ingredient Transfer Co (130 West College Street, part of the Site). No further information was provided in the listing.

2.4 Regional and Hydrogeologic Setting

The property is located approximately 0.5 miles west of the Los Angeles River, approximately 1.1 miles south-southwest of Elysian Reservoir, and approximately 1.5 miles southeast of Echo Park Lake, at an elevation of approximately 292 feet above mean sea level. The contour lines in the area of the subject property indicate the area is sloping toward the southeast.

Based on our review of the GeoCheck Section of the radius report provided by Environmental Data Resources, LLC (EDR), the subject property is not situated within a 100-year FEMA Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Surficial soil consists of Urban land with variable soil textures. The underlying hydrogeologic unit is comprised of sedimentary deposits that were laid down in stratified layers during the Cenozoic-Quaternary period. Subsurface soils beneath the site and surrounding areas consist entirely of Quaternary alluvium. The alluvium is composed of interbedded sands, silts and clays deposited by the Los Angeles River.

Kleinfelder performed a Phase II environmental assessment of the subject property in 1997. According to its report (dated September 16, 1997), nine borings (B-1 through B-9) were advanced. Soils consisted of brown silty sand to approximately 10 feet below ground surface (bgs), and sand from 10 feet bgs to approximately 31.5 feet bgs. Groundwater was encountered at approximately 29 feet bgs in boring B-2. Based on the contour lines in the area of the subject property, the groundwater is assumed to flow toward the southeast.

3.0 PREPARATORY ACTIVITIES

SEL obtained access approval, and all interested parties were notified in advance of the project schedule. No permits were required to complete the work.

3.1.1 Utility Clearance

The Underground Service Alert of Southern California (Dig Alert ticket A223620219) was notified to verify the possible presence of underground utilities at the Site.

3.1.2 Health and Safety Plan

SEL reviewed the site-specific Health and Safety Plan with onsite personnel involved in the project prior to the commencement of drilling activities.

3.2 Geophysical Survey

A geophysical Survey of the Site was conducted by Atlas Technical Consultants LLC (Atlas). The purpose of the survey was to assess the potential presence of buried underground storage tanks (USTs) and/or backfilled excavations associated with the removal of these features within the limits of each study area at the Site.

On December 27, 2022, Atlas conducted its evaluation at the Site using a Geonics EM-61 high-sensitivity metal detector (EM-61), Sensors & Software "Noggin Smart Cart" ground penetrating radar (GPR) unit coupled to a 500-MHz antenna, a Fisher TW-6 M-Scope shallow-focus metal detector (M-Scope) and a RadioDetection RD4000 electromagnetic utility locator (RD4000). A Trimble Pro 6H GPS unit and a digital field computer were used during EM-61 data acquisition. The EM-61 high-sensitivity metal detector was used in an effort to delineate areas where metallic objects (such as underground storage tanks and buried metal piping) may be buried. The EM-61 transmitter generates short pulses of a primary magnetic field that induces electromagnetic currents in nearby metallic objects. Between pulses, the two receiver coils measure the decay of these electromagnetic currents in millivolts (mV). The measured values are proportional to the metal content (ferrous and non-ferrous) of the nearby objects. Ground Penetrating Radar was used to explore the area of investigation for evidence of excavations or tank pits. The Fisher M-Scope metal detector was used to relocate shallow buried metallic features identified in the EM-61 data.

Results, Conclusion, and Recommendations

EM61 data is displayed as contour lines and a color gradient map in millivolts (mVolts). Relatively significant features are revealed in the EM61 data as high densities of contour lines and hot pink colors. The results are displayed in Figures 2, 3a and 3b of the geophysical report attached in the Appendix B and revealed five candidate EM anomalies, labeled Anomalies A, B, C, D and E. These anomalies appear to be aligned with previously existing structures as viewed in historical aerial photographs of the Site (www.historicaerials.com). GPR traverses over Anomalies A, C, D, and E were inconclusive as to their cause or nature. It is possible that these anomalies are remnants of foundations, slabs, or utilities associated with historic structures; however, the exact cause and nature of these anomalies are unknown. GPR traverses conducted over Anomaly B appear to indicate railroad tracks and ties just beneath the surface of the Site. Several utility lines were also delineated in the study area and included electric lines connecting bus charging stations on the Site. The results of our evaluation did not clearly indicate the presence of USTs or backfilled excavations associated with UST removal within the study

area of the Site. A copy of this report detailing methods and plots indicating historical structure's locations are included in Appendix B.

3.3 Equipment

The borings were advanced by Strongarm Environmental of Norwalk, California using a Geoprobe® Model 6620T track-mounted direct-push drilling rig.

3.4 Sampling Location Strategy

The subsurface investigation locations were based on historical USTs/fuel dispensing operations reported on the western portion of the Site, historical site uses of concern found on the eastern portion of the Site, and geophysical survey results on the western portion of the Site. Please refer to Section 2.3 for detail descriptions.

3.5 Soil Sampling Borings

On January 3 and 4, 2023, a total of thirteen (13) soil borings locations (B1 through B13) were advanced at the Site utilizing a Geoprobe Model 6620T track- mounted rig (direct push method).

Borings B1, B2, and B3 were advanced to a depth of 5 feet bgs; Boring B4 was advanced to 25 feet bgs; and remaining borings B5, B6, B7, B8, B9, B10, B11, B12, and to B13 were advanced up to 20 feet bgs. Soil samples were collected from the borings at multiple depths including 2, 5, 10, 15, 20, and 25 feet bgs.

3.6 Soil Vapor Sampling Borings

On January 3 and 4, 2023, a total of eleven (11) soil vapor borings were completed and sampling probes were installed at the Site. Soil vapor samples were collected between 5 and 10 feet bgs from selected eleven borings (SV-1-5', SV-4-10', SV-5-10', SV-6-10', SV-7-5', SV-8-10', SV-9-5', SV-10-10', SV-11-5', SV-12-9', and SV-13-10').

3.7 Subsurface screening with a Photo Ionization Device (PID)

Upon removing the sampler from the borehole, the acetate liner containing the soil core was opened at various intervals, and the soils were visually inspected and screened using a photoionization detector (PID) for the possible presence of contamination. Borings were logged in the field in accordance with the Unified Soils Classification System (USCS). Copies of the Site's boring logs are attached in are shown in the Plates Section (Plate 3 to Plate 17). No elevated VOC reading was noted during our investigation of the Site's borings.

3.8 Soil Sampling

Soil samples were collected at the Site on January 3 and 4, 2023, at each boring location at selected depth with a steel sampler rod (1.5-inch diameter) and attached soil sampling sleeve that was advanced into the undisturbed soil using a direct push system. Soil samples intervals selected for chemical analysis were cut from sampling sleeves at multiple depths (including 2, 5, 10, 15, 20, and 25 feet bgs) into 6 inch long acetate sleeves, which were then sealed with Teflon sheeting and plastic caps, labeled, and stored on ice in a cooler for transport to the testing laboratory under appropriate chain-of- custody control. Soil samples selected for VOC analysis were collected directly from the cut liner using Encores.

The general layout of the Site and the boring locations are attached in the Plates Section as the Site Diagram, Plate 2.

3.9 Soil Gas Sampling

Soil Gas Probe & Well Construction

Soil vapor probes were advanced and installed at depths of sub-slab and 5 feet bgs by Direct Push method using electro rotohammer with detachable extension. Each soil vapor implant was installed following direct push method which involves advancement of an approximate 5/8-inch outer-diameter stainless steel probe rod. Soil vapor probes were advanced and installed immediately beneath the slab and to a depth of five feet bgs. The soil gas sampling probes consist of plastic micro-porous vapor implants that are approximately 2 inches long with a 0.25-inch outside diameter, connected to 0.25-inch outside diameter nylaflow tubing that extended above the ground surface. For sub-slab well, the annulus around the vapor implants was backfilled with approximately 2-inch of screen-washed #3 sand, and 2-inch of dry bentonite, and remaining hydrated bentonite was placed immediately above dry bentonite up to the ground surface to provide a secure borehole seal. For five (5) feet bgs well, the annulus around the vapor implants was backfilled with approximately one (1) foot of screen-washed #3 sand and one (1) foot of dry bentonite. The hydrated bentonite was placed immediately above dry bentonite up to the ground surface to provide a secure borehole seal. The probes were finished with gas-tight fittings at the surface pending vapor purging and sampling. The probe was allowed to set for minimum of 2 hours prior to sampling to allow the hydrated bentonite time to properly seal, and the subsurface soil gas to equilibrate.

Leak Testing the Sample Train and Probes

Prior to purging or sampling, a tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. 1,1-Difluoroethane (DFA) was used as the tracer gas at each sample probe to determine if any leaks existed in any of the vapor well. 1, 1-Difluoroethane was not detected in any of the soil vapor samples.

A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evacuated to a maximum measured vacuum of 100 inches of water. The vacuum gauge is sensitive enough to indicate a water pressure change of at least 0.5 inches. The gauge dial readings are in 1" of water increments. The 0.5" reading would be an estimated reading. The pump was calibrated by PLS at 200 mL/min as noted.

Probe Purging

A minimum of three (3) purge volumes were removed from each boring prior to sampling by PLS. Purge rate never exceeded the DTSC maximum of 200 milliliters per minute, nor did vacuum exceeded 100 inches of water, during soil vapor sampling procedures. The pump shuts off when it cannot maintain a constant flow rate (approximately at about 30" of water). The purpose of purging is to remove stagnant air from the vapor sampling train to ensure representative samples are obtained.

Subsurface Soil Vapor Sampling

Soil vapor samples were collected in general accordance with Active Soil Gas Investigation Advisory, July 2015. Soil vapor sampling was performed by Positive Lab Service (PLS) personnel. Soil vapor was

withdrawn from the end of the inert nylaflow tubing that extends from the sampling tip to the surface using a vacuum pump to complete the purge and to collect the sample in 125 ml glass sampling bulb. New tubing and bulbs were used at each probe to prevent cross contamination. A material blank using ambient air was collected and tested to identify any background contamination.

3.10 Analytical Laboratory and Quality Control

Site soil samples were analyzed by EPA Method 8260B/5035, EPA Method 8015B, and EPA Method 6010B/7471A. Soil vapor samples were analyzed by EPA Method 8260B. Quality control data was provided as part of the laboratory report(s) and included as part of the final report. These procedures include method blanks, surrogates, Laboratory Control Sample (LCS) and laboratory duplicates. Copies of the analytical reports are included in Appendix A.

3.11 Site Analytical Action Screening Level Sources

Environmental Protection Agency (EPA) Region 9 Regional Screening Levels (RSLs) [formerly Preliminary Remediation Goals (PRGs)] are generic, risk-based chemical concentrations developed by the EPA for use in initial screening-level evaluations. RSLs combine human health toxicity values with standard exposure factors to estimate contaminant concentrations that are considered to be health protective of human exposures over a lifetime through direct-contact exposure pathways (e.g., via inhalation and/or ingestion of and/or dermal contact with impacted soil and/or indoor air). RSLs are not legally enforceable standards, but rather are considered guidelines to evaluate if potential risks associated with encountered chemical impacts may warrant further evaluation. The Regional Screening Levels (RSLs) have been developed by the EPA using default exposure and toxicity criteria to provide conservative screening levels, whereby concentrations of contaminants below such levels are not considered to represent a significant risk (including cancer and non-cancer risks) to human receptors. EPA publishes RSLs periodically. The most current release is dated May 2023 (EPA 2020). For the Site, the “Target Risk = 1E-06, Target Hazard Quotient = 1.0” RSL data set is appropriate to use.

DTSC recommends the use of alternative screening levels based on toxicity criteria reviewed by DTSC’s Human and Ecological Risk Office (HERO). DTSC-modified Screening Levels (DTSC-SLs) are updated periodically and published in Human Health Risk Assessment (HHRA) Note, HERO HHRA Note Number: 3, DTSC-modified Screening Levels (DTSC-SLs), Release Date: June 2020 (Note 3) revised May 2022. For compounds that have screening criteria listed in Note 3, the alternative screening levels are used instead of RSLs.

3.12 Site Restoration

Once the borings were completed, and samples obtained, each boring was backfilled with hydrated bentonite. Care was taken to assure that the borings were compacted, sealed, and that the potential cross contamination or future water migration is minimized. Each boring was then compacted and surfaced with asphalt.

3.13 Chain of Custody Form

All samples were logged on chain-of-custody forms, signed by the laboratory personnel completing the sampling. Sample point identification is included on the chain-of-custody form and included the date, time, location, project identification, boring number, and sample depth. A copy of the chain of custody documentation is included in the analytical reports (see Appendix A).

4.0 CHEMICAL ANALYSIS

4.1 Laboratory Analysis

All collected Site soil samples were immediately transferred to PLS for analyses of VOCs by EPA Method 8260B/5035, TPH by EPA Method 8015B, and CAM 17 total metals by EPA Method 6010B/7471A. Addition testing included Soluble Threshold Limit Concentration (STLC) – Individual California Regulated Metals Analytical Results EPA 6010B and/or 7471A Waste Extraction Test (WET) and Soil Samples Toxicity Characteristic Leaching Procedure (TCLP) – Individual Federally Regulated Metals Analytical Results EPA 1311/6010B and/or 1311/7471A.

Site soil vapor samples were collected by PLS and analyzed by EPA Method 8260B. Quality control data was provided as part of the laboratory report(s) and included as part of the final report in Appendix A.

5.0 DISCUSSION AND CONCLUSIONS

5.1 Soil Sampling

Eleven (11) out of twenty two (22) Site soil samples had no TPH concentrations above the laboratory detection limits (i.e., "non-detect"). The remaining eleven (11) soil samples had detectable concentrations of TPH that were below the RSLs. None of the soil samples contained VOCs at a concentration above the detection limits, with the exception of B10-5' where toluene was detected at a level which is below than the RSLs. Please refer to paragraphs below for details:

Soil samples identified as B2-5', B4-15', B5-10', B5-15', B6-10', B7-15', B7-20', B9-15', B11-5', B11-15', and B12-5' did not contain any TPH or VOCs at concentrations above the laboratory detection limits (i.e., "non-detect"). Detectable TPH as diesel (C13-C22) concentrations were identified as 2.81 mg/kg @B1-2', 106.0 mg/kg @ B3-2', 2.88 mg/kg @ B6-15', 112 mg/kg @ B8-2', 4.49 mg/kg @ B8-5', 19.2 mg/kg @ B9-5', 5.47 mg/kg @ B10-5', 5.88 mg/kg @ B10-15', 10.6 mg/kg @ B12-2', 4.76 mg/kg @ B13-5', and 2.62 mg/kg @ B13-20'. Detectable TPH motor oil (C23-C32) concentrations were identified as 1,820.0 mg/kg @ B3-2', 555.0 mg/kg @ B8-2', 375.0 mg/kg @ B9-5', and 168.0 mg/kg @ B12-2'. Detectable TPH as High End Motor Oil (C33-C36) concentrations were identified as 474 mg/kg @ B3-2' and 164 mg/kg @ B9-5'. These results are tabulated and referred as Table 1 and 2 in the Table Section attached to the report.

The presence of detectable TPH concentrations in soil samples may indicate the release of petroleum-based contaminants to the subsurface.

The detected TPH concentrations were below the Los Angeles RWQCB Los Angeles May 1996 Guidebook for Maximum Soil Screening Level.

The detected Toluene concentration was found to be below the RSL.

CAM 17 Total Metals were found in shallow Site soils samples at B7-2', B8-5', B9-2', B11-2', and B12-2' to be present at concentrations within California background levels and below levels which require hazardous waste characterization.

Lead was found at B8-2' and B11-2' at concentrations of 238 mg/kg and 54.1 mg/kg, respectively, which were below the EPA's RSLs and DTSC HERO Note 3; however, B8-2' exceeded the Maximum California background level for lead of 97.1 mg/kg.

Both B8-2' and B11-2' exceeded the California Regulated Hazardous Waste characterization trigger value, which is 10 times the STLC (Soluble Threshold Limit Concentration). Additional leaching testing (Waste Extraction Testing - WET) found a lead concentration of 30.5 mg/L at B8-2', exceeding the STLC threshold value of 5 mg/L; however, the lead concentration of 0.522 mg/L at B11-2' was below the STLC threshold value of 5 mg/L. Based on the additional leaching test results, soils at 2 feet at B8 are characterized as California regulated Hazardous Waste and need to be disposed of at a hazardous waste accepting facility. Please note that soils at 5 feet at this B8 location did not reveal any lead concentrations above the RSLs, DTSC, and California background levels, and did not warrant any further hazardous waste characterization.

Please note that the closest samples to B8-2' were to the southeast (B9) and south-southwest (B7) located 30 feet and 40 feet, respectively. Neither of those samples contained lead concentrations exceeding the regulatory screening levels.

5.2 Soil Gas Sampling

PCE was detected in subsurface soil vapor at multiple depths in all sampled locations other than SV-6-10. TCE was found in subsurface soil vapor in four out of 11 locations. Please refer to paragraphs below for details including analytical results comparisons to agency screening levels:

Results –ND or below agency screening levels

The soil vapor sample identified as SV-6-10 collected at 10 feet bgs had no detectable concentration for VOCs above laboratory detection limits (i.e., "non-detect"). Ten soil vapor samples contained PCE at concentrations that were detectable but less than the RSL (1.5667 µg/L) and the DTSC soil gas screening level of 0.067 µg/L using an attenuation factor (AF)=0.03: SV-1-5, SV-4-10, SV-5-10, SV-8-10, SV-9-5, SV-10-10, SV-11-5, SV-12-9, SV-13-10, and SV-13-10-Rep. Detectable concentrations of TCE were found in four samples: SV-7-5, S-V-9-5, SV-10-10, and SV-11-5; all were below the DTSC soil gas screening level of 0.1 µg/L using AF=0.03.

Results –above agency screening levels

Elevated PCE concentrations were found in two soil vapor samples SV-7-5 and SV-7-5-Rep at concentrations of 0.104 µg/L and 0.096 µg/L exceeding the DTSC soil gas screening level of 0.067 µg/L using AF=0.03. Elevated TCE was found in one sample SV-7-5 Rep at a concentration of 0.108 µg/L exceeding the DTSC soil gas screening level of 0.1 µg/L using AF=0.03.

5.3 Conclusions

This Phase II report presents the findings of the Environmental Sampling at 130 West College Street, Los Angeles, California. The program consisted of soil and soil vapor sampling to address any potential impact of TPH, VOCs, and CAM 17 Total Metals from historical operations at the Site.

Based upon the results of the soil data collected in this Phase II program, eleven (11) out of twenty two (22) Site soil samples had no TPH concentrations above the laboratory detection limits (i.e., "non-detect"). The remaining eleven (11) soil samples had detectable concentrations of TPH that were below the RSLs. None of the soil samples contained VOCs at a concentration above the detection limits, with the exception of B10-5' where toluene was detected at a level which is below the RSLs.

Based upon the results of the soil data collected in this Phase II program, 1 (B8-2') out of 5 locations investigated contained lead at a concentration exceeding the California background screening level. Based on further STLC testing, the soil at this location is characterized as California regulated Hazardous Waste and would need to be disposed of at a hazardous waste accepting facility if excavated. Please note that soils at 5 feet at the B8 location did not reveal any lead concentrations above the RSLs, DTSC, and California background levels, and did not warrant any further hazardous waste characterization.

Based upon the results of the soil vapor data collected in this Phase II program, ten out of eleven locations contained detectable levels of PCE in subsurface soil vapor between 5 and 10 feet bgs. Only one of the detected PCE concentrations exceeded the DTSC screening level, SV-7-5, located in the central portion of the Site. TCE was found in subsurface soil vapor in four out of 11 locations; of which one location exceeded the RSL.

Based on the Project's site plan provided by the client, the Project's underground parking is estimated to be between 13 and 15 feet below grade.

The following SEL recommendations are based on knowledge that the Site will be excavated between 13 and 15 feet below ground for construction of the Project's underground parking:

- SEL recommends that air monitoring by SCAQMD Air Monitoring Rule 1166 be conducted during the site excavation to segregate any soil for which a VOC reading exceeds 50 ppm.

- SEL recommends that the stockpile generated during the soil excavation at the elevated lead location, or any other areas with an indication of presence of any hazardous materials, be segregated and disposed of at appropriate facility in compliance with applicable regulations.

- Based on the future use as a subterranean parking garage, which minimizes human occupancy, in our expert opinion, the known PCE in soil vapors onsite are not expected to be an item of concern. A vapor barrier can be installed during construction as extra protection to prevent any PCE migration into the future buildings through cracks/fractures.

It is SEL's expert opinion that further environmental sampling is not necessary since the Project's excavation of subsurface soils would be for construction of an underground parking. The excavated soils can be segregated based on air monitoring results and disposed of at an appropriate facility.

KEY TO SAMPLES

■ INDICATES DEPTH OF UNDISTURBED SAMPLE

□ INDICATES DEPTH OF SAMPLING ATTEMPT WITH NO RECOVERY

NOTE ON SAMPLERS:

Track-mounted Geoprobe drill rig (direct push)

Undisturbed samples were obtained with a 4 feet long barrel steel sampler. The steel sampler has an O.D. of 2.5 inches inserted with an I.D. of 1.5 inch acetate liner. Unless practical refusal was encountered, the barrel sampler was driven into the soil using Geoprobe with direct push method.

NOTES:

The descriptions on the boring logs apply only at the specific boring locations and at the time the borings were made. They are not warranted to be representative of subsurface conditions. Soil and rock descriptions are based on commonly accepted geotechnical methods of indentifi-cation and classification and are based on our professional judgment and experience. The stratification of soil layers is represented with approximate boundaries and the transition between soil types may be gradual.
Groundwater depths indicated on boring logs are specific to the time of drilling. The term "encountered" refers to the level at which free water was first noticed in the boring. The term "stabilized" refers to the level of the water after a lapse of at least one hour.

BROWN 10 YR 4/3, SILTY SAND, DRY, NO STAINING, NO HYDROCARBON ODOR.
MEDIUM BROWN 10 YR 4/4, SILTY SAND CLAY WITH SOME FINE TO MEDIUM PEBBLE, SLIGHT MOIST, NO STAINING, NO HYDROCARBON ODOR.
SM
BROWN 10 YR 4/3, SILTY SAND, DRY, NO STAINING, NO HYDROCARBON ODOR.
GREY/ BROWN 2.5 Y 5/2, MEDIUM TO COARSE SAND WITH FINE TO COARSE PEBBLE, SLIGHT MOIST, NO HYDROCARBON ODOR.
GC
GREY/ BROWN 2.5 YR 5/2, MEDIUM TO COARSE SAND WITH FINE PEBBLES, SLIGHT MOIST, NO HYDROCARBON ODOR.
SM
GREY/ BROWN 2.5 YR 6/2, SILTY SAND WITH FINE TO MEDIUM PEBBLES, SLIGHT MOIST, NO HYDROCARBON ODOR.
INSTALL SOIL VAPOR PROBES AT 9, 12, 17, AND 22 FEET BGS
BORING TERMINATED AT A DEPTH OF 25 FEET ON 01/04/2023.
NO GROUNDWATER ENCOUNTERED.
BACKFILLED WITH BENTONITE.
LOGGED BY AFNAN ASGHAR.

February 06, 2023

Ayesha Syeda
Smith Emery Laboratories
791 East Washington Blvd.
Los Angeles, CA 90021

Report No.: 2301047
Project Name: 48309-2

Dear Ayesha Syeda,

This report contains the analytical results for the sample(s) received under chain of custody(s) by Positive Lab Service on January 04, 2023.

The test results in this report are performed in compliance with ELAP accreditation requirements for the certified parameters. The laboratory report may not be produced, except in full, without the written approval of the laboratory.

The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report. Preliminary data should not be used for regulatory purposes. Authorized signature(s) is provided on final report only.

If you have any questions in reference to this report, please contact your Positive Lab Service coordinator.

Project Manager

Report No.: 2301048
Project Name: 48309-2

Dear Ayesha Syeda,

This report contains the analytical results for the sample(s) received under chain of custody(s) by Positive Lab Service on January 04, 2023.

The test results in this report are performed in compliance with ELAP accreditation requirements for the certified parameters. The laboratory report may not be produced, except in full, without the written approval of the laboratory.

The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report. Preliminary data should not be used for regulatory purposes. Authorized signature(s) is provided on final report only.

If you have any questions in reference to this report, please contact your Positive Lab Service coordinator.

January 6, 2023

Client Name: Smith Emery Laboratories
Project Name: 48309-2 , 130 W. College Street, Los Angeles, CA.
Report No.: 2301060 & 2301088

This letter details a soil vapor investigation done by Positive Lab Service (PLS) for Smith Emery Laboratories on January 4-5, 2023.

PLS was contracted to perform a soil vapor survey at 48309-2 130 W. College Street, Los Angeles, CA. The objective of the investigation was to determine if soil vapor contamination was present and the possible source area(s) of any contamination in the subsurface soil.

Scope of Work

A total of eleven sampling locations were tested for soil gas analysis. All locations consisted of a single soil vapor probe with a depth of 5ft., 9ft., or 10ft. bgs. The collected vapor samples were analyzed using PLS mobile laboratory.

Sampling Method

Samples at each location were taken from exiting vapor probes using a vacuum pump. The recommended time for vapor probe stabilization was allowed before any purging was done. Purging and sample collection was performed with a vacuum pump set to draw 200ml/min of soil vapor at a maximum vacuum of 100" of water. The pump was attached to the vapor well with tubing and the soil vapor was drawn into a 125ml glass sampling bulb. New tubing and bulbs were used at each probe to prevent cross contamination. A material blank using ambient air was collected and tested to identify any background contamination. Leak tests were performed using 1, 1-Difluoroethane at each sample probe to determine if any leaks existed in the vapor well. The presence of 1, 1-Difluoroethane at or above 0.150ug/l was reported in compliance with the Active Soil Gas Investigation Advisory, July 2015.

All sample probes produced adequate flow. All samples collected were purged to three purge volumes per Active Soil Gas Investigation Advisory, July 2015. Sampling rates, volumes, and pressures were recorded in a daily log and submitted to the client.

213.745.6372 Fax

Sample Analysis

Samples were analyzed using an Agilent model 7890A series gas chromatograph equipped with a 5975C series mass spectrometer detector (GC/MS) utilizing a purge and trap method. The GC/MS used a J & W Scientific DB-624 column. An Eclipse 4760 purge and trap concentrator connected to an Archon autosampler was used to purge the sample for desorbtion onto the GC/MS system. Samples were loaded individually and autosampler sequencing was not used in processing samples. Sample results were collected on a PC using Agilent Chemstation software for data handling. Surrogate additions were added as part of the purging process. The calibration was performed using liquid standards that were converted to a vapor phase. The calibration was verified by two second source standards, one a converted liquid standard and the other a commercial vapor phase standard.

Results

The soil vapor results are listed in report number 2301060 and 2301088.

Quality Assurance

Calibration, Continuing Calibration Verification(s), and Second Source Calibration Verification standards were analyzed in accordance with the Active Soil Gas Investigation Advisory, July 2015. Laboratory Blank, Laboratory Control Sample, and Field Replicate results were included in the sample report. The Laboratory Replicate was not requested by the client.

Disclaimer

Information in this letter is solely derived from information gathered by PLS during the soil gas survey of January 4-5, 2023. Soil gas testing by PLS is a screening tool and PLS advises the recipient of this report to confirm any regulatory limits with the appropriate authorities before using the PQLs provided.

Report No.: 2301060
Project Name: 48309-2 130 W. College Street, Los Angeles, CA (Mobile Lab 1/4/23)

Dear Ayesha Syeda,

This report contains the analytical results for the sample(s) received under chain of custody(s) by Positive Lab Service on January 04, 2023.

The test results in this report are performed in compliance with ELAP accreditation requirements for the certified parameters. The laboratory report may not be produced, except in full, without the written approval of the laboratory.

The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report. Preliminary data should not be used for regulatory purposes. Authorized signature(s) is provided on final report only.

If you have any questions in reference to this report, please contact your Positive Lab Service coordinator.

January 6, 2023

Client Name: Smith Emery Laboratories
Project Name: 48309-2 , 130 W. College Street, Los Angeles, CA.
Report No.: 2301060 & 2301088

This letter details a soil vapor investigation done by Positive Lab Service (PLS) for Smith Emery Laboratories on January 4-5, 2023.

PLS was contracted to perform a soil vapor survey at 48309-2 130 W. College Street, Los Angeles, CA. The objective of the investigation was to determine if soil vapor contamination was present and the possible source area(s) of any contamination in the subsurface soil.

Scope of Work

A total of eleven sampling locations were tested for soil gas analysis. All locations consisted of a single soil vapor probe with a depth of 5ft., 9ft., or 10ft. bgs. The collected vapor samples were analyzed using PLS mobile laboratory.

Sampling Method

Samples at each location were taken from exiting vapor probes using a vacuum pump. The recommended time for vapor probe stabilization was allowed before any purging was done. Purging and sample collection was performed with a vacuum pump set to draw 200ml/min of soil vapor at a maximum vacuum of 100" of water. The pump was attached to the vapor well with tubing and the soil vapor was drawn into a 125ml glass sampling bulb. New tubing and bulbs were used at each probe to prevent cross contamination. A material blank using ambient air was collected and tested to identify any background contamination. Leak tests were performed using 1, 1-Difluoroethane at each sample probe to determine if any leaks existed in the vapor well. The presence of 1, 1-Difluoroethane at or above 0.150ug/l was reported in compliance with the Active Soil Gas Investigation Advisory, July 2015.

All sample probes produced adequate flow. All samples collected were purged to three purge volumes per Active Soil Gas Investigation Advisory, July 2015. Sampling rates, volumes, and pressures were recorded in a daily log and submitted to the client.

Sample Analysis

Samples were analyzed using an Agilent model 7890A series gas chromatograph equipped with a 5975C series mass spectrometer detector (GC/MS) utilizing a purge and trap method. The GC/MS used a J & W Scientific DB-624 column. An Eclipse 4760 purge and trap concentrator connected to an Archon autosampler was used to purge the sample for desorbtion onto the GC/MS system. Samples were loaded individually and autosampler sequencing was not used in processing samples. Sample results were collected on a PC using Agilent Chemstation software for data handling. Surrogate additions were added as part of the purging process. The calibration was performed using liquid standards that were converted to a vapor phase. The calibration was verified by two second source standards, one a converted liquid standard and the other a commercial vapor phase standard.

Results

The soil vapor results are listed in report number 2301060 and 2301088.

Quality Assurance

Calibration, Continuing Calibration Verification(s), and Second Source Calibration Verification standards were analyzed in accordance with the Active Soil Gas Investigation Advisory, July 2015. Laboratory Blank, Laboratory Control Sample, and Field Replicate results were included in the sample report. The Laboratory Replicate was not requested by the client.

Disclaimer

Information in this letter is solely derived from information gathered by PLS during the soil gas survey of January 4-5, 2023. Soil gas testing by PLS is a screening tool and PLS advises the recipient of this report to confirm any regulatory limits with the appropriate authorities before using the PQLs provided.

Report No.: 2301088
Project Name: 48309-2 130 W. College Street, Los Angeles, CA (Mobile Lab 1/5/23)

Dear Ayesha Syeda,

This report contains the analytical results for the sample(s) received under chain of custody(s) by Positive Lab Service on January 05, 2023.

The test results in this report are performed in compliance with ELAP accreditation requirements for the certified parameters. The laboratory report may not be produced, except in full, without the written approval of the laboratory.

The issuance of the final Certificate of Analysis takes precedence over any previous Preliminary Report. Preliminary data should not be used for regulatory purposes. Authorized signature(s) is provided on final report only.

If you have any questions in reference to this report, please contact your Positive Lab Service coordinator.

Subject: Geophysical Evaluation
130 West College Street
Los Angeles, California

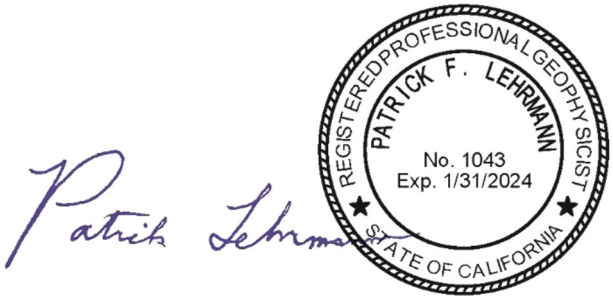

Dear Ms. Ayesha:

In accordance with your authorization, Atlas is pleased to submit this data report pertaining to our geophysical evaluation located at 130 West College Street in Los Angeles, California. The purpose of our evaluation was to assess the presence of buried underground storage tanks (USTs) and/or backfilled excavations associated with the removal of these features within the limits of each study area. In addition, the presence of detectable underground utilities was also evaluated in the study areas. Our field services were conducted on December 27th, 2023. This report presents the study methodology, equipment used, analysis, and results from our study.

We appreciate the opportunity to be of service on this project. Should you have any questions related to this report, please contact the undersigned at your convenience.

Respectfully submitted,
Atlas Technical Consultants LLC

1. INTRODUCTION

In accordance with your authorization, Atlas is pleased to submit this data report pertaining to our geophysical evaluation located at 130 West College Street in Los Angeles, California (Figure 1). The purpose of our evaluation was to assess the presence of buried underground storage tanks (USTs) and/or backfilled excavations associated with the removal of these features within the limits of each study area. In addition, the presence of detectable underground utilities was also evaluated in the study areas. Our field services were conducted on December 27th, 2023. This report presents the study methodology, equipment used, analysis, and results from our study.

2. SCOPE OF SERVICES

Our scope of services included:

- Performance of a geophysical evaluation for a portion of the subject property.
- Site reconnaissance including field mapping of surface structures at and near the study area.
- Compilation and analysis of the collected data.
- Preparation of this report presenting our findings, conclusions, and recommendations.

3. SITE DESCRIPTION

The project site was located at 130 West College Street in Los Angeles, California (Figure 1). The ground surface at the site is covered with asphalt pavement and surrounded by chain link fencing. Currently used for school bus storage, the site is occupied by school buses parked in the eastern portion of the lot, school bus charging stations, a storage bin, transformers, parking stoppers, street lights, and bollards. Figures 2, 3a, and 3b depict the general conditions at the site.

Based on our discussions with you, and our review of historical aerial imagery, it is our understanding that the site was previously occupied by several buildings and other structures and that USTs may have been utilized at the properties; however, details regarding size, purpose, location, and/or removal are unknown.

4. GEOPHYSICAL INSTRUMENTATION AND APPLICATIONS

Our evaluation included the use of a Geonics model EM61-MK2, GSSI SIR 4000 GPR, Schonstedt, model GA-52C magnetic gradiometer, Fisher M-Scope TW-6 pipe and cable locator, Vivax vLoc3-Pro line tracer, and a StoneX S700A global navigation satellite system (GNSS) receiver unit for spatial control. These instruments provide real-time results and facilitate the delineation of subsurface features.

The EM61 instrument is a high resolution, electromagnetic (EM) time-domain device for detecting buried conductive objects. It consists of a powerful transmitter that generates a pulsed primary magnetic field when its coils are energized, which induces eddy currents in nearby conductive

objects. The decay of the eddy currents, following the input pulse, is measured by the coils, which in turn serve as receiver coils. The decay rate is measured for two coils, mounted concentrically, one above the other. By making the measurements at a relatively long time interval (measured in milliseconds) after termination of the primary pulse, the response is nearly independent of the electrical conductivity of the ground. Thus, the instrument is a very sensitive metal detector. Due to its unique coil arrangement, the response curve is a single well-defined positive peak directly over a buried conductive object. This facilitates quick and accurate location of targets. Conductive objects to a depth of approximately 11 feet generally can be detected.

The GPR instrument beams energy into the ground from its transducer/antenna, in the form of electromagnetic waves. A portion of this energy is reflected back to the antenna at boundaries in the subsurface across which there are an electrical contrast. The recorder continuously makes a record of the reflected energy as the antenna is moved across the ground surface. The greater the electrical contrast, the higher the amplitude of the returned energy. The EM wave travels at a velocity unique to the material properties of the ground being studied, and when these velocities are known, or closely estimated from ground conductivity values and other information, two-way travel times can be converted to depth. Penetration into the ground and resolution of the GPR images produced are a function of ground electrical conductivity and dielectric constant. Images tend to be graphic, even at considerable depth, in sandy soils, but penetration and resolution may be limited in more conductive clayey moist ground.

The magnetic gradiometer has two fluxgate magnetic fixed sensors that are passed closely to and over the ground. When not in close proximity to a magnetic object, that is, only in the earth's field, the instrument emits an audible signal at a low frequency. When the instrument passes over buried iron or steel objects (so that the field is significantly different at the two sensors) the frequency of the emitted sound increases. Frequency is a function of the gradient between the two sensors.

The M-Scope TW-6 device energizes the ground by producing an alternating primary magnetic field with alternating current (AC) in the transmitting coil. If conducting materials (including soils) are within the area of influence of the primary field, AC eddy currents are induced to flow in the conductors. A receiving coil senses the secondary magnetic field produced by these eddy currents, and outputs an audio response. The strength of the secondary field is a function of the conductivity of the object, its size, and its depth and position relative to the instrument's two coils. Conductive objects to a depth of approximately 10 feet are sensed. Also, the device is somewhat focused, that is, it is more sensitive to conductors below (and above) the instrument, than to conductors off to the side.

Where risers are present, the Vivax vLoc3-Pro utility locator transmitter can be connected to the object, and a current is impressed on the conductor pipe or cable. The receiver unit is tuned to this same frequency and is used to trace the pipe's surface projection away from the riser. The transmitter and receiver can also be used in a non-connect (induction) mode, whereby the

transmitter is positioned on the ground and an electromagnetic signal is emitted. In the presence of buried metal pipes and wires, a discrete signal will be induced on the conductor which can be sensed by the receiver. In addition, the instrument may be used in the passive mode, whereby radio and 60 Hz electromagnetic signals produced by communication and live electric lines are detected.

5. STUDY METHODOLOGY

The collection of EM61 data was performed in conjunction with a StoneX S700A GNSS receiver unit for spatial control. The limits of the study were selected by you and your office. Traverses with the EM61 were conducted across accessible portions of the study areas along transects spaced approximately 5 feet apart. GPR traverses were conducted along roughly north-south and east-west transects spaced approximately 5 feet apart. GPR traverses were also conducted along random profiles across and near detected features. Traverses with the M-Scope and gradiometer were conducted along transects spaced approximately 5 feet apart. The line tracer was used in passive, direct connect and inductive modes to delineate the presence of detectable underground utilities in the study area. The recorded EM61 data was downloaded to a portable computer in the field for preliminary analysis. Significant anomalies, as well as detectable underground utilities, were marked on the ground surface with paint, mapped, and reported to you upon completion of the field work.

6. RESULTS, CONCLUSIONS, AND RECOMMENDATIONS

EM61 data is displayed as contour lines and a color gradient map in millivolts (mVolts). Relatively significant features are revealed in the EM61 data as high densities of contour lines and hot pink colors. The results of our evaluation are displayed in Figures 2, 3a and 3b and revealed five candidate EM anomalies, labeled Anomalies A, B, C, and D. These anomalies appear to be aligned with previously existing structures as viewed in historical aerial photographs of the site (www.hitoricaerials.com 2023).

GPR traverses over Anomalies A, C, D, and E were inconclusive as to their cause or nature. It is possible these anomalies are remnants of foundations, slabs, or utilities associated with historic structures; however, the exact cause and nature of these anomalies are not known. GPR traverses conducted over Anomaly B appear to indicate railroad tracks and ties just beneath the surface. Several utility lines were also delineated in the study area and included electric lines connecting bus charging stations on site. The results of our evaluation did not clearly indicate the presence of USTs or backfilled excavations associated with UST removal within the study area.

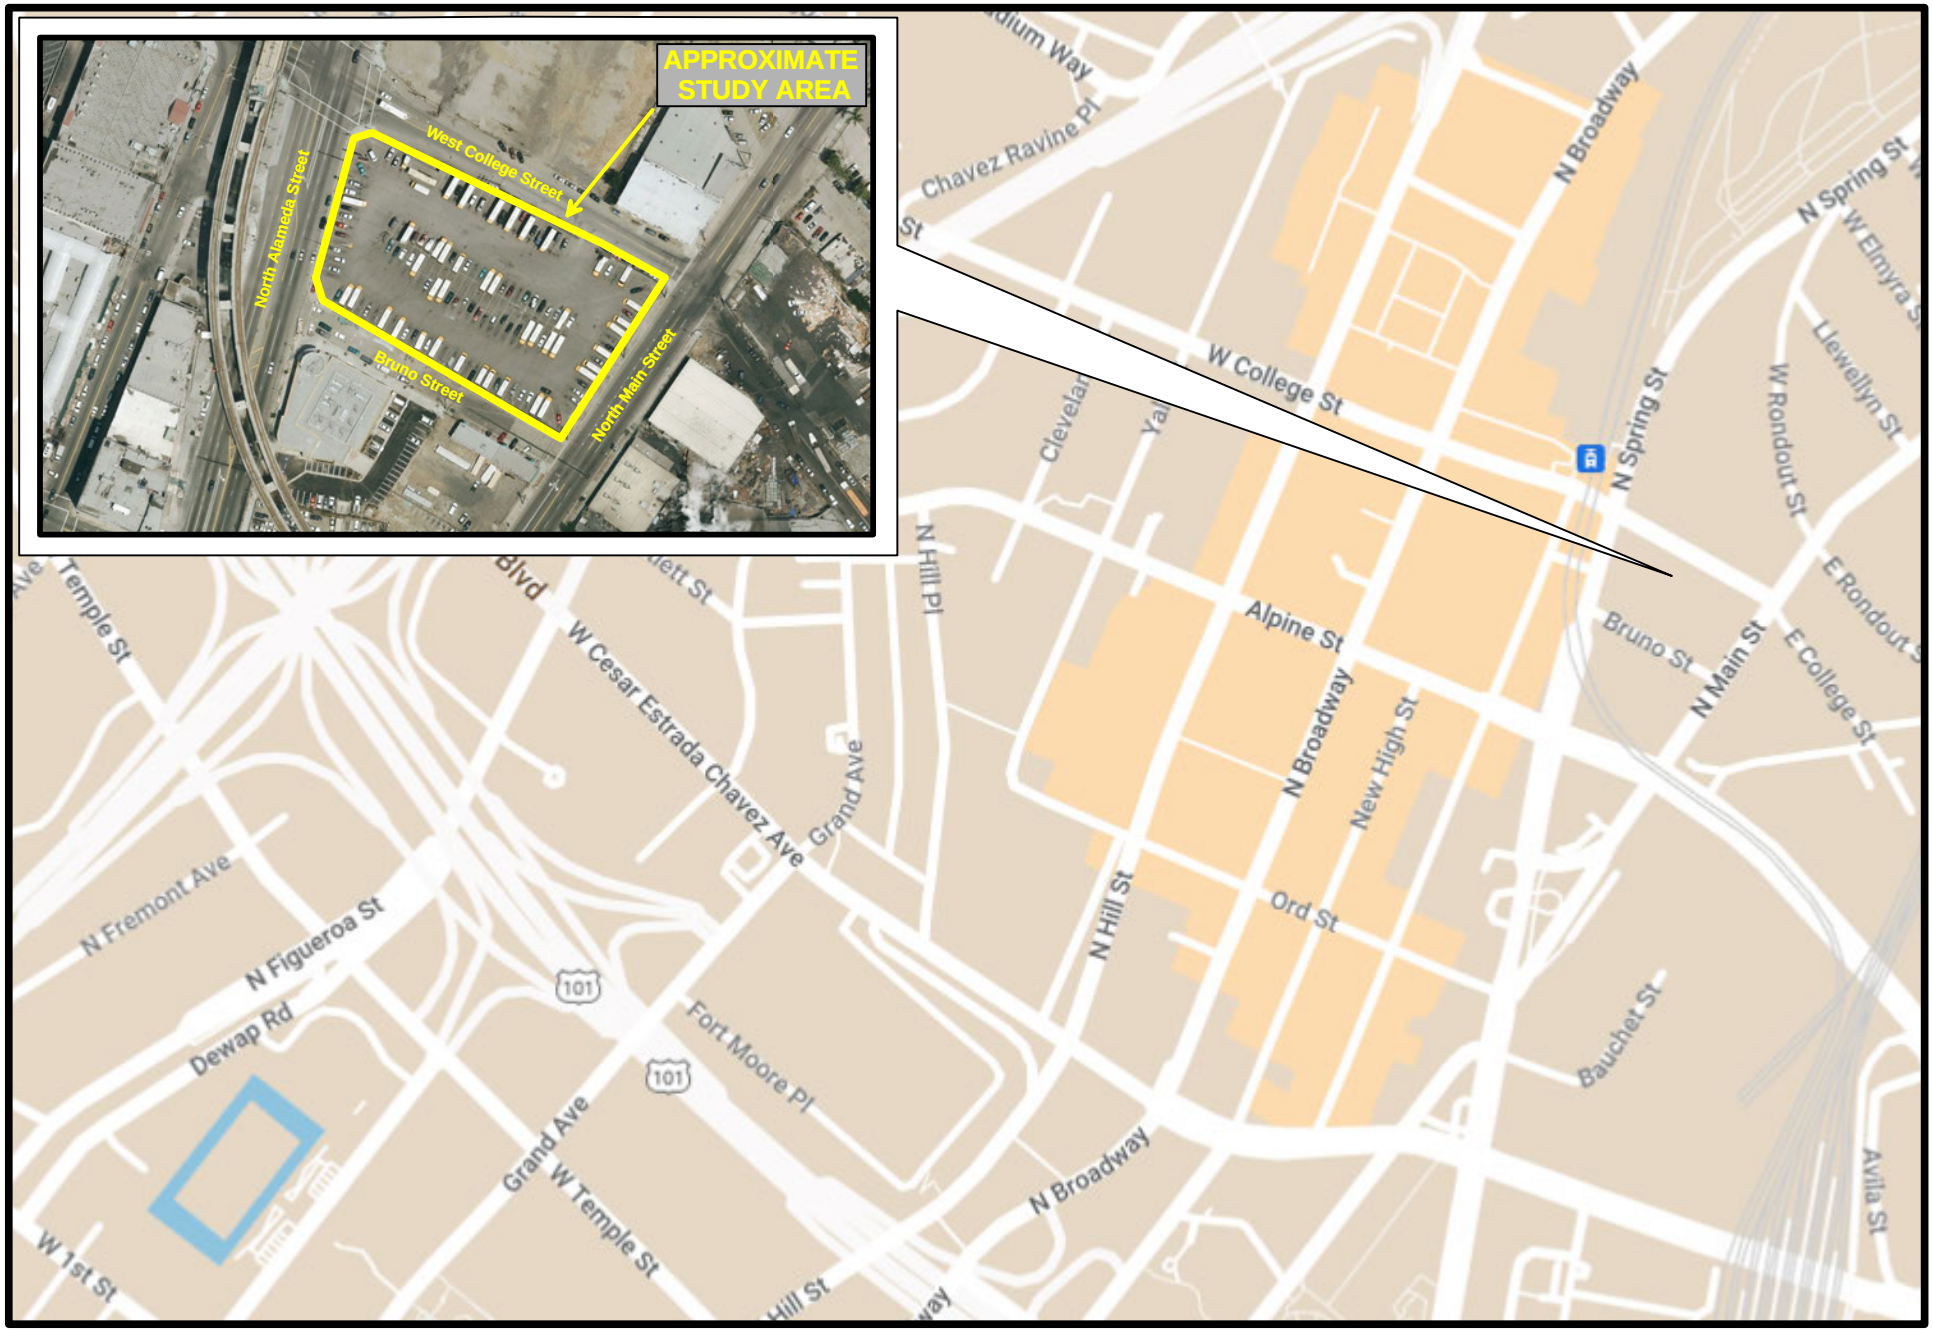

7. LIMITATIONS

The field evaluation and geophysical analyses presented in this report have been conducted in general accordance with current practice and the standard of care exercised by consultants performing similar tasks in the project area. No warranty, express or implied, is made regarding

the conclusions and opinions presented in this report. There is no evaluation detailed enough to reveal every subsurface condition. Variations may exist, and conditions not observed or described in this report may be present. Uncertainties relative to subsurface conditions can be reduced through additional subsurface evaluating and/or exploration. Additional subsurface evaluations can be performed upon request.

Please also note that our evaluation was limited to the detection of USTs and backfilled tank excavations, as well as the presence of detectable underground lines. “USA” or “Dig Alert” should also be contacted prior to conducting subsurface exploration activities. In addition, we recommend that available utility plans/drawings of the project site be reviewed as appropriate.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Atlas should be contacted if the reader requires additional information or has questions regarding the content, interpretations presented, or completeness of this document. This report is intended exclusively for use by the client. Any use or reuse of this report by parties other than the client is undertaken at said parties’ sole risk.

NOTIFICATION OF UNDERGROUND TANK ABANDONMENT

6/4/86
(Date)

City of Los Angeles Fire Department
Fire Prevention Bureau
200 North Main Street, Room 920
Los Angeles, California 90012

52203
A D STRUCTURES

Attention: Records Office

Gentlemen:

This letter is to comply with Fire Department regulations regarding underground tank abandonment. (57.31.16)

The tank(s) was/were located at the following street address:

130 W. College.

The tank(s) was/were located from 2 property lines as follows:

.

(Show sketch on reverse side.)

The number of tank(s) 1 and total capacity in gallons each 8,000.

WHEN REMOVED:

The label numbers (or other tank designation numbers) were as follows: # LAFD 341 installed 1971.

The tank(s), prior to transporting was/were degassed, using 80 pounds of carbon dioxide (dry ice). (One pound CO_2 per hundred gallons capacity of tank).

The tank(s) was/were removed to: Anaheim & Santa Fe Long Beach.

WHEN FILLED:

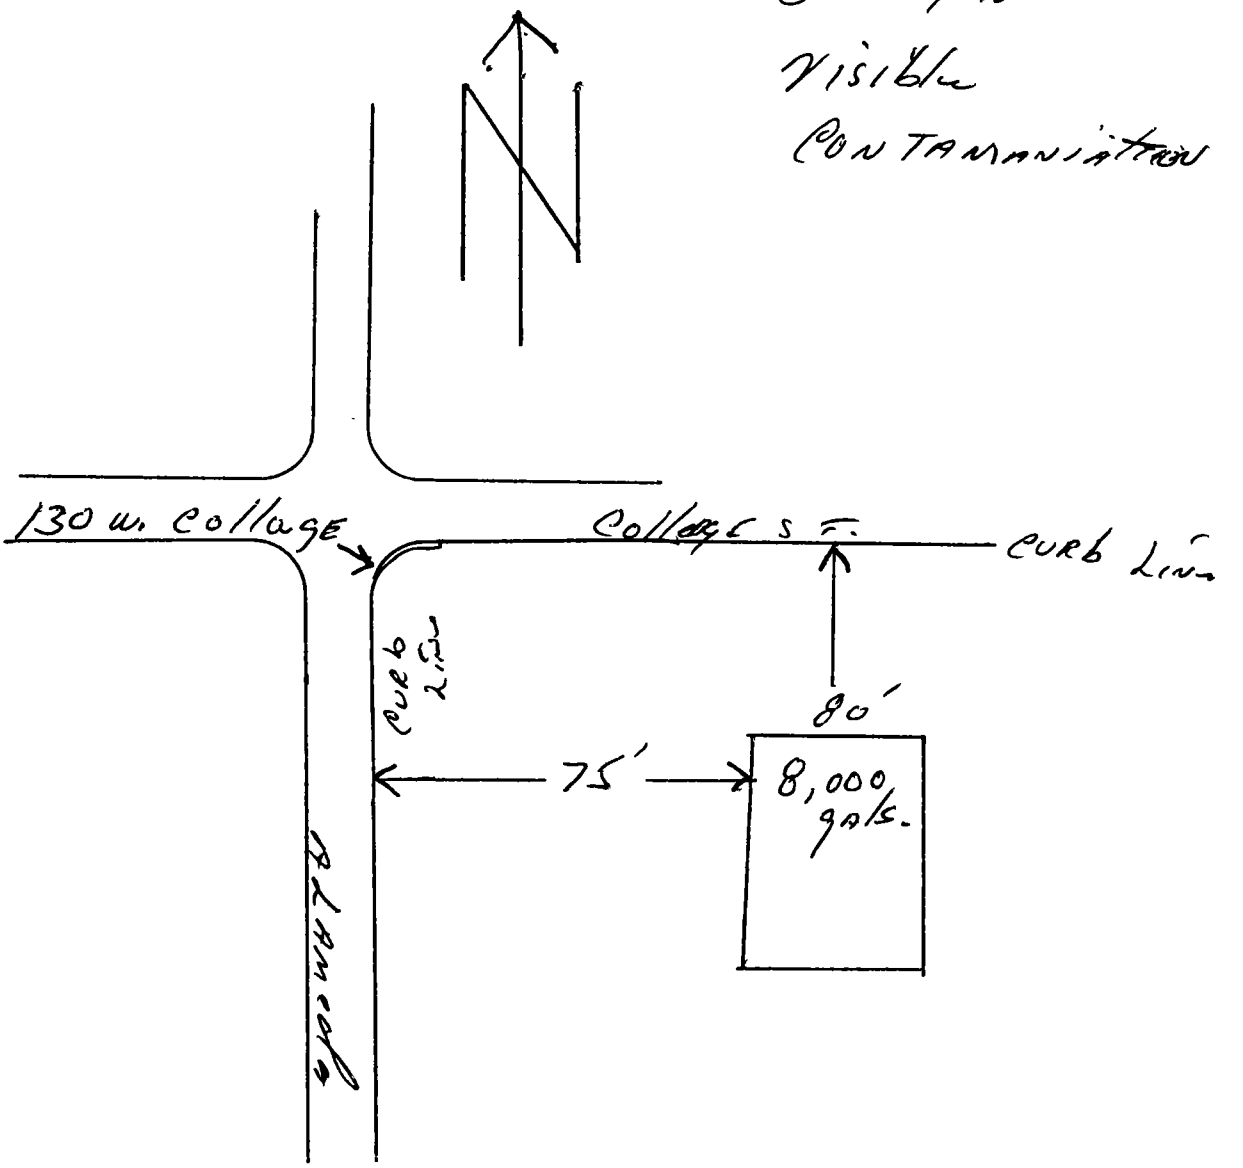

Approved mixture type _____, using _____ cu. yards total. The material was supplied by: _____.

The abandonment work was inspected by: Carl A. Ney.

The following conditions shall apply at time of tank abandonment:

1. Residual fuel in the tank shall not be placed in the evacuation.
2. Visually inspect the evacuation for signs of fuel leakage or soil contamination. Note: Any indication of fuel leakage or soil contamination requires further action. A soils investigation and site assessment may be required as directed by the Fire Department.
3. Other requirements may be instituted by the L.A.F.D. Inspector as is deemed necessary.

Plano, TX 75024

RE: Clarification of Environmental Reports for 130 West College Street, Los Angeles, CA

Dear Aaron,

Thank you for forwarding the City of LA Planning Department's questions regarding our Phase I (G-22-3000r) and Phase II (G-22-3020) reports for 130 West College Street. We are pleased to provide the following clarifications for submission to the City.

1. Regarding the UST Installation Date Discrepancy (Phase I, Page 25):

After reviewing our records, I can confirm that this appears to be a record-keeping error. The permits reference the same 8,000-gallon tank at the same location (130 West College Street) operated by the same entity (D & S Ingredients). The discrepancy between the 1979 installation permit and the 1986 abandonment permit (which states the tank was installed in 1971) is likely due to a clerical error in the documentation.

This type of discrepancy is not uncommon in historical UST records, particularly from this time period. The tank specifications, location description (80 feet south of College Street and 75 feet east of Alameda Street), and business owner all indicate this is the same tank. Unfortunately, as these records are over 40 years old, we are unable to verify the exact installation date with the current business or property owner. D & S Ingredients is no longer operating at this location, and the current property owner (S&R Partners, LLC) has only owned the property since 1997, well after these tank operations ceased. The most reliable information would be from the abandonment documentation, as it represents the most recent handling of the tank.

Based on our professional experience with similar situations, we believe this is simply a documentation inconsistency rather than evidence of two separate tanks.

2. Regarding PCE Migration and Vapor Barrier (Phase II):

Yes, the proposed combined methane/VOC vapor barrier would be sufficient to address potential PCE vapor intrusion.

As stated in the recommendations of our Phase II report (G-22-3020), we stand by our conclusion that a vapor barrier is an appropriate measure. This recommendation was made out of an abundance of caution, as the risk of exposure is already considered low given that the future use is a subterranean parking garage with minimal human occupancy, which significantly reduces potential exposure pathways.

While our expertise is specific to the environmental contaminants assessed (like PCE and other VOCs) and we do not hold specific certifications for methane mitigation, it is our understanding that a properly designed and installed combined vapor intrusion mitigation system is engineered to prevent the migration of various subsurface gases, including both methane and VOCs like PCE.

The installation of a chemically-resistant vapor barrier is the primary engineering control to prevent vapor intrusion. In our opinion, if a robust vapor barrier is chosen and properly installed, the addition of a sub-slab ventilation system would be a redundant control. The combined system is more than sufficient to address the potential for PCE migration.

To directly address the City's question, PCE is a VOC, and the combined methane/VOC barrier is designed to mitigate it. We would recommend that PCE be specifically called out in the mitigation measure to ensure the barrier selected has the appropriate chemical resistance for chlorinated solvents.

Please let us know if you or the City requires further details.

Best regards,

Ayesha Syeda, M.S.

LIMITS OF LIABILITY

The findings, conclusions and recommendations contained in this report are based on site conditions as they existed at the time of our investigation. We further assume the explorations to be representative of subsurface conditions throughout the areas of the site which were addressed. This report was prepared solely for the use of Granite Properties. The factual data and interpretations pertain to the specific project described in this report and any reliance on this document by any other person or entity shall be at that party's sole risk.

Our investigation was performed using the standard of care and level of skill ordinarily exercised under similar circumstances by reputable Environmental Assessors and Geologists currently practicing in these or similar localities. No other warranty, express or implied, is made as to the conclusions and professional advice included in this report. This report is intended for screening purposes only. Recommendations herein are based on the data available at the time of the investigation and may require validation through follow-up assessments.

Respectfully submitted,

SMITH - EMERY LABORATORIES

AYESHA SYEDA

Eric Deaver, Langan

Date: March 14, 2024

Re: **Certificate of Compliance for Methane Test Data**
130 West College Street
Los Angeles, CA 90012
Langan Project No.: 721036101

This memorandum presents the results from the methane testing performed at 130 West College Street (Site) in Los Angeles, California. The Site is associated with the following Los Angeles County Accessor Parcel Numbers: 5409-008-001, 5409-008-002, 5409-008-003, 5409-008-004, 5409-008-005, 5409-008-006, and 5409-008-015. In accordance with the City of Los Angeles Department of Building and Safety (LADBS) Ordinance No. 175790 and the LADBS Information Bulletin P/BC 2020-101 (LADBS Guidance), site-specific methane testing is required for the proposed development because the Site is located within a City of Los Angeles methane zone. The proposed development includes one below grade basement level to be utilized as a parking garage, with a maximum excavation depth of up to 17 feet below ground surface (bgs).

Five temporary nested wells (MSV-1 through MSV-5) were installed by Strongarm Environmental Field Services, Inc. at the Site on January 3 and 4, 2023 (Figure 1). This installation was under the direction of Smith Emery Company performing a Phase II Environmental Site Assessment (ESA) for the Site. The wells were constructed at each boring location in accordance with LADBS Guidance. Groundwater was expected to be encountered at the Site (based on Langan's 2022 Geotechnical investigation) at 24 to 27 feet bgs.

Probe sets (at least one every 20,000 square feet per LADBS Guidance) were installed at the following locations:

MSV-1	13 and 18 ft bgs
MSV-2	13, 18 and 23 ft bgs
MSV-3	13, 18 and 23 ft bgs

MSV-4	14, 19 and 24 ft bgs
MSV-5	12, 17 and 22 ft bgs

Probe sets were installed within the proposed building footprint. However, results for MSV-1, MSV-2, and MSV-3 at 13 feet bgs, MSV-4 at 14 feet bgs and at MSV-5 at 12 feet bgs are within soils in the vadose zone that will be removed during excavation. As such, these samples are not considered representative of post construction vapor intrusion conditions. Moreover, groundwater was not encountered during well installation.

Langan personnel collected methane soil-gas and differential pressure measurements from MSV-1 through MSV-5 on January 6, 2023. Differential pressure readings between the soil gas and atmospheric pressure were collected from each soil gas probe with a Dwyer digital manometer prior to sampling. The soil gas probes were also monitored for methane using a field-calibrated Landtec GEM-5000 prior to purging and sampling the probes.

The soil gas points were purged of at least three volumes at a rate of no more than 200 milliliters per minute by an air-sampling pump. At the end of the purge and prior to sampling, the soil gas points were monitored again for methane and differential pressure using the landfill gas meter and manometer, respectively. After purging, soil gas samples were collected in 1-liter summa canisters over a period of approximately 5 to 10 minutes. Final differential pressure and methane readings were recorded from the soil gas points following sample collection.

Soil gas sampling was performed in accordance with LADBS Guidance. Following sample collection, the probes were pulled, and the surface was patched with quick-dry concrete or asphalt cold patch. Samples were delivered under chain of custody to California ELAP-certified laboratory, Eurofins Environmental Testing in Tustin, California.

Langan designates the Site as Design Level I, as shown on Table 71 of Ordinance No. 175790 (copy provided in Attachment A of this report), as the test results meet the following criteria:

- Pressure readings of less than 2 inches of water column.
- Field measurements indicating no methane concentrations above zero parts per million (ppm) by volume. Additionally, analytical results from the summa canister samples reported non-detect concentrations of methane at each soil gas point.
- The Site is located within a "Methane Zone" and therefore, mitigation measures, including a sub-slab barrier and passive ventilation system are at minimum required, regardless of testing results indicating zero concentrations in the subsurface.

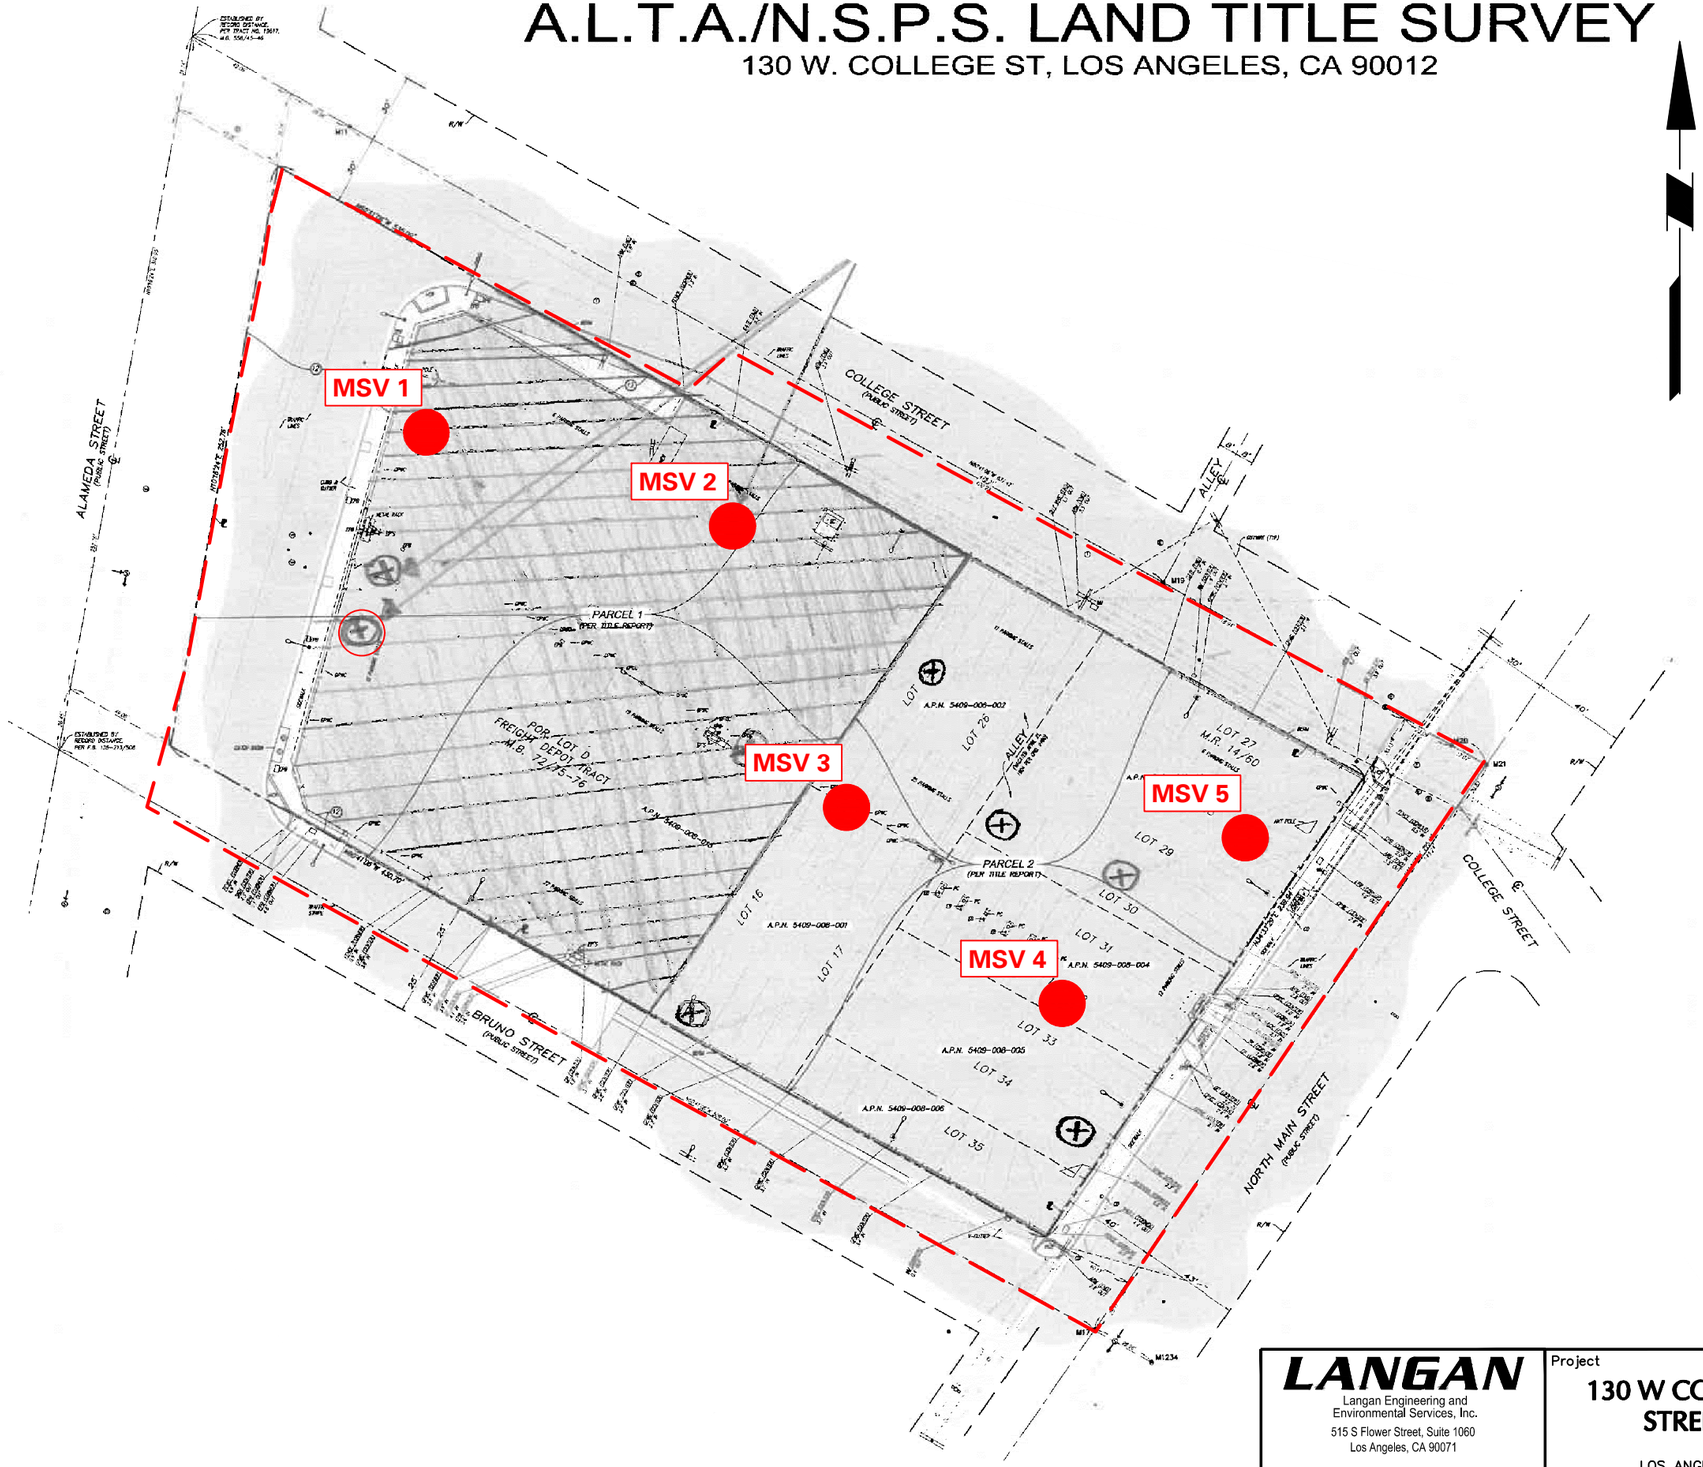

As part of the proposed development's building design, trench dams and conduit or cable seal fittings will also be required to prevent the potential migration of methane soil gas through any permeations of a building foundation.

The Certificate of Compliance for Methane Test Data completed for the Site is presented in Attachment B of this report for reference.

X = Indicates a Required Mitigation Component

1. See Section 91.7104.3.7 for exception.
2. The Mechanical Extraction System shall be capable of providing an equivalent of a complete change of air every 20 minutes of the total volume of the Gravel Blanket.
3. See Section 91.7104.3.1 for Narrow Buildings.
4. The Mechanical Ventilation systems shall be capable of providing an equivalent of one complete change of the lowest occupied space air every 15 minutes.
5. Vent opening complying with Section 91.7104.3.4 may be used in lieu of mechanical ventilation.
6. The total quantity of installed Vent Risers shall be increased to double the rate for the Passive System.

Attachment B

FORM 1 - CERTIFICATE OF COMPLIANCE FOR METHANE TEST DATA

Part 1: Certification Sheet

Site Address: 130 West College Street

Legal Description: Tract: Freight Depot; Beaudry Water Works Lot: FR D; 16, 17, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, VAC ORD 9460 Block: None

Building Use: Commercial

Architect=s, Engineer=s or Geologist=s Stamp:

Name of Architect, Engineer, or Geologist:
Kyle Petersen
Mailing Address:
515 Flower Street #1010 Los Angeles, CA 90071

Telephone: 208.409.1203

Name of Testing Laboratory: Langan Engineering and Environmental Services, Inc.

City Test Lab License #: Pending

Telephone: 213-314-8100

I hereby certify that I have tested the above site for the purpose of methane mitigation and that all procedures were conducted by a City of Los Angeles licensed testing agency in conformity with the requirements of the LADBS Information Bulletin P/BC 2020-101. Where the inspection and testing of all or part of the work above is delegated, full responsibility shall be assumed by the architect, engineer or geologist whose signature is affixed thereon.

Signed: _____ date March 13, 2024

Required Data:

_ Project is in the (Methane Zone) or (Methane Buffer Zone).

_ Depth of ground water observed during testing: N/A feet below the Impervious Membrane.

_ Depth of Historical High Ground Water Table Elevation*: >24 feet below the Impervious Membrane.

_ Design Methane Concentration**: 0.0 parts per million in volume (ppmv).

_ Design Methane Pressure***: 0.00 inches of water column.

_ Site Design Level: (Level I, Level II, Level III, Level IV, Level V) with 0.00 inches of water column.

De-watering:

_ De-watering (is) (is not) required per Section 7104.3.7.

_ Pump discharge rate N/A cubic feet per minute per reference geology or soil report: ----- dated -----.

Additional Investigation:

_ Additional investigation (was) (was not) conducted.

Latest Grading on Site:

_ Date of last grading on site (was) (was not) more than 30 days before Site Testing.

_ See Attached explanation of the effect on soil gas survey results by grading operations.

Notes:

* Historical High Ground Water Table Elevation shall mean the highest recorded elevation of ground water table based on historical records and field investigations as determined by the engineer for the methane mitigation system.

** Design Methane Concentration shall mean the highest recorded measured methane concentration from either Shallow Soil Gas Test or any Gas Probe Set on the site.

*** Design Methane Pressure shall mean the highest total pressure measured from any Gas Probe Set on the site.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities.
