Lead Agency (if different from above): N/A

Subject: *Filing of Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code.*

State Clearinghouse Number (if submitted to Clearinghouse): 2024060684

Project Title: Haynes Generation Station Sewer Force Main Project

Project Applicant: City of Long Beach/Long Beach Utilities Department

Project Location (include county): City of Long Beach (Los Angeles); City of Seal Beach (Orange County). The project is located within the eastern portion of the City of Long Beach in southern Los Angeles County, California. A small portion of the project extends into the City of Seal Beach, California. The project starts at the Haynes Generating Station, just south of State Route 22 and extends north along the San Gabriel River to the Long Beach Water Reclamation Facility on Willow Road.

Project Description: The proposed project includes the construction of a new 12-inch-diameter sewer force main that would extend from the Los Angeles Department of Water and Power (LADWP) Haynes Generating Station (HGS) to an existing Los Angeles County Services District (LACSD) 42-inch sewer main located at the LACSD Long Beach Water Reclamation Facility (WRF). The proposed project would facilitate the beneficial reuse of up to 2.766 million gallons per day (MGD) of industrial wastewater discharge and 0.075 MGD of on-site stormwater runoff (for a total of 2.841 MGD) from the HGS to the LACSD's Long Beach WRF. The total length of pipeline installed would be approximately 17,000 feet using a combination of trenching and trenchless construction methods. A flow control/pressure reducing station consisting of an above grade or partially buried structure would be constructed at the LACSD Water Reclamation Facility. In addition, the HGS is currently located outside of the LACSD's adopted sphere of influence (SOI) and service area. Therefore, as part of the proposed project, the LACSD proposes to expand its service area boundary to include the HGS and annexation into LACSD Sanitary District Number 19 under the site's existing zoning. The Project is not located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. The Haynes Generating Station Unit 8 Recycled Water Cooling System Retrofit Project, which is incorporated by reference in this IS/MND, can be found online here: <https://ceqanet.opr.ca.gov/2021110083>.

Environmental Review: An Initial Study/Mitigated Negative Declaration (IS/MND) was prepared for the proposed Project (SCH # 2024060684). This is to advise that the City of Long Beach/Long Beach Utilities Department (lead agency) has approved the above-described project on **October 17, 2024**, and has made the following determinations regarding the above-described project:

1. The project (☐ will/☒ will not) have a significant effect on the environment.
2. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA
☒ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA
3. Mitigation Measures (☒ were/☐ were not) made a condition of the approval of the project.
4. A Mitigation Monitoring and Reporting Program (☒ was/☐ was not) adopted for this project.
5. A Statement of Overriding Considerations (☐ was/☒ was not) adopted for this project.
6. Findings (☒ were/☐ were not) made pursuant to the provisions of CEQA.

The Final IS/MND and record of project approval is available for review to the General Public at:

**Department of Long Beach Utilities Department, 1800 East Wardlow Road, Long Beach, CA 90807,
and on the City's website at: <https://www.longbeach.gov/lbcd/planning/environmental/reports/>.**
