Executive Summary

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the property identified as Assessor's Parcel Number 023-919-223-000 in the City of Rialto, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for Recognized Environmental Conditions (RECs) and was conducted as part of your due diligence efforts to acquire the Site. This Site is an approximately 39.92-acre parcel containing vacant land with an empty historical United States (US) Army munitions bunker and a small partially destroyed brick and mortar structure. It is our understanding that your intentions for the Site include the development of an approximately 750,560 square foot industrial warehouse building.

The Site is a relatively flat parcel with an average elevation of approximately 1,620 feet above mean sea level (msl) with a regional slope to the southeast. The Site is located in the City of Rialto, San Bernardino County and is set in a mixed use type setting with residential and commercial/industrial facilities in the near Site vicinity.

The Site is bound:

- to the north by Rialto Concrete Products, Inc. (2250 W. Lowell St.), Precision Aerial Services, Inc. (2020 W. Lowell St.), Thompson Pipe Group (3009 N. Laurel Ave.), and a vacant lot (2904 N. Locust Ave.);
- on the east by North Locust Avenue across which is an undeveloped parcel, Sennet Semi Trailer (2824 N. Locust Ave), Tubular Steel (2750 N. Locust Ave.), JILK Heavy Construction (2690 N. Locust Ave.), and Radial (2602 N. Locust Ave.);
- to the south by Robertson's Ready Mix materials yards (2601 Adler Ave.); and,
- to the west by Lake Padden Lane across which is Robertson's Ready Mix materials yards (2601 Adler Ave.) and Rialto Concrete Products, Inc. (2250 W. Lowell St.).

Key findings of this Phase I ESA are as follows:

- The Site was vacant land until the 1940's when it was developed with rail spurs and bunkers used by the US Army for the storage of weapons and ammunition. The Site was observed with these uses until the 1960's. Of note was a suspect bermed area noted in an aerial photograph that could have been used as a disposal or burn pit area for the historic operations. Since this time, the Site has

been vacant or portions used for additional storage by various facilities adjacent to the Site;

- The Site vicinity has been used as vacant land, industrial development, and residential development. The immediate Site vicinity has been used by the US Army as well a number of facilities involved with the manufacture of pyrotechnic products. These uses have notably caused releases of perchlorates and volatile organic compounds (VOCs) to soil and groundwater, resulting in an approximately 7-mile groundwater plume that extends beneath the Site and to the southeast. These releases are being investigated under the Rockets, Fireworks, and Flares Superfund Site;

- A limited investigation was conducted at the Site as part of an historical EIR prepared for the Site that reported the presence of petroleum hydrocarbons in shallow soil. No evidence of pyrotechnic materials such as perchlorates, metals, VOCs or polynuclear aromatic hydrocarbons were detected. Arcadis was retained by UPS to further investigate the area, which led to removal of the material to below regulatory screening levels. Arcadis concluded that the area had been adequately remediated and recommended no further action;

- During the Site reconnaissance, the Site was observed as mostly vacant land with an empty munitions bunker remaining from the US Army use and two empty poly totes. No releases were apparent. The bunker as well as a small brick and mortar structure were observed with suspect asbestos containing materials (ACM) and potentially lead based paint (LBP). The remainder of the Site was undeveloped;

- There were no records for facilities at the Site in the EDR regulatory database search. Two records for the former BF Goodrich facility were plotted at the Site but are believed to be in relation to the former adjacent facility as well as the larger Rockets, Flares, and Fireworks Superfund case;

- Based on the review of the available regulatory information, the Site is located with the "160-Acre Area" and the "Former Bunker Area" of the Rockets, Fireworks, and Flares Superfund Site. This area was used for approximately 60 years by several facilities including the US Army, BF Goodrich, and several other facilities

such as defense contractors, fireworks manufacturers, and other facilities that used perchlorate salts and/or chlorinated solvents. These facilities are identified as having releases of these chemicals that have contributed to soil and groundwater contamination, with the groundwater contamination being referred to as the Eastern Plume. Monitoring and the planning of remedial efforts are ongoing;

- Given the findings of this report, there is a possibility a vapor intrusion condition may exist at the Site given the suspect historical uses;

- Given the age and observations of suspect construction materials at the on-Site structures, suspect ACMs and LBP may be present at the Site; and,

- No microbial growth was observed from the accessible exterior areas of the Site structures.

Conclusions

We have performed a Phase I Environmental Site Assessment in accordance with ASTM E1527-21 Standard for the property located at Assessor's Parcel Number 023-919-223-000 in Rialto, California. **The following RECs were identified during this ESA:**

- The Site's location within the "160 Acre Area" and "Former Bunker Area" and off-Site releases resulting in the Fireworks, Rockets, and Flares Superfund.

- Historical uses of the Site for the storage of munitions and one remaining bunker; and,

- Unknown suspect use of the Site by historic adjacent pyrotechnic facilities.

The historical investigation and removal of hydrocarbons in the suspect bermed area constitutes an HREC. No CRECs were identified during this investigation.

While not a REC by ASTM standards, suspect ACMs and LBP may be present at the Site.

Recommendations

Based on the findings of this ESA, HMC recommends the following items for your consideration:

- Conduct a Site-wide subsurface investigation at the Site to supplement the previous investigations;

- Conduct additional research to ascertain what may be required to develop within the Superfund area such as land use restrictions;

- Remove the poly totes and properly dispose of them; and,

- Conduct ACM and LBP surveys prior to any activity that may disturb suspect materials.

PHASE I ENVIRONMENTAL SITE ASSESSMENT
Assessor's Parcel Number 023-919-223-000 Rialto, California 92377

1. INTRODUCTION

Hazard Management Consulting, Inc. (HMC) is pleased to submit this Environmental Site Assessment (ESA) for the property identified as Assessor's Parcel Number 023-919-223-000 in the City of Rialto, California (Site) (Figures 1 & 2). This ESA was prepared to evaluate the Site for Recognized Environmental Conditions (RECs) and was conducted as part of your due diligence efforts to acquire the Site. This Site is an approximately 39.92-acre parcel containing vacant land with an empty historical United States (US) Army munitions bunker and a small partially destroyed brick and mortar structure. It is our understanding that your intentions for the Site include the development of an approximately 750,560 square foot industrial warehouse building.

The Site is a relatively flat parcel with an average elevation of approximately 1,620 feet above mean sea level (msl) with a regional slope to the southeast. The Site is located in the City of Rialto, San Bernardino County and is set in an mixed use type setting with residential and commercial/industrial facilities in the near Site vicinity.

1.1. Objective

In accordance with the ASTM E 1527-13 Standard Practice for Environmental Site Assessments, the objective of the ESA is to assess, to the extent feasible under the standard, whether Recognized Environmental Conditions (RECs), as defined by ASTM, are present at the Site.

A Recognized Environmental Condition "means the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM Standard Practice E1527-21). Performance of a Phase I ESA is intended to reduce, but not eliminate,

uncertainty regarding the potential for Recognized Environmental Conditions in connection with a property, within reasonable limits of time and cost.

All Appropriate Inquires (AAI) as defined in the Final Rule (40 CFR, Part 312), must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, is to identify releases and threatened releases of hazardous substances, which cause or threaten to cause the incurrence of response costs. The U.S. Environmental Protection Agency (EPA) has stated that ASTM Standard E-1527-13 is consistent with the Standards and Practices for AAI and is compliant with the statutory criteria for AAI.

1.2. Scope of Services, Methodology and Limitations

The findings of this ESA must be viewed in recognition of certain limiting conditions. The scope of work commissioned for this project does not represent an exhaustive study, but rather a reasonable inquiry, consistent with good commercial practice, in general accordance with ASTM Practice E-1527-13.

The scope of work for this ESA included the following activities:

- A Site walk to document the current condition of the Site and neighboring facilities.
- Review of a regulatory database report.
- Submittal of questionnaires to the current Owner and User of the report.
- Review of historical references including aerial photographs, city directories, Sanborn Maps and topographic maps.
- On-line research and file review requests concerning the Site and suspect off-Site sources at the State of California Regional Water Quality Control Board (RWQCB) and Department of Toxic Substances Control (DTSC) websites.

- Review of records maintained by the San Bernardino County Fire Protection District.
- Review of records kept by the South Coast Air Quality Management District.
- Review of Records kept by the City of Rialto.
- Preparation of this report of findings.

In the course of this assessment, HMC has relied on information provided by outside parties, such as regulatory agencies, previous reports and interview sources. For the purpose of this assessment, such third-party information is assumed to be accurate unless contradictory evidence is noted, and HMC does not express or imply any warranty regarding information provided by third-party sources.

2. SITE DESCRIPTION

2.1. Site Setting

The Site is currently unoccupied. The Site is a relatively flat parcel with an average elevation of approximately 1,620 feet above mean sea level (msl) with a regional slope to the southeast. The Site is located in the City of Rialto, San Bernardino County and is set in an mixed use type setting with residential and commercial/industrial facilities in the near Site vicinity.

The Site is bound:

- to the north by Rialto Concrete Products, Inc. (2250 W. Lowell St.), Precision Aerial Services, Inc. (2020 W. Lowell St.), Thompson Pipe Group (3009 N. Laurel Ave.), and a vacant lot (2904 N. Locust Ave.);
- on the east by North Locust Avenue across which is an undeveloped parcel, Sennet Semi Trailer (2824 N. Locust Ave), Tubular Steel (2750 N. Locust Ave.), JILK Heavy Construction (2690 N. Locust Ave.), and Radial (2602 N. Locust Ave.);
- to the south by Robertson's Ready Mix materials yards (2601 Adler Ave.); and,
- to the west by Lake Padden Lane across which is Robertson's Ready Mix materials yards (2601 Adler Ave.) and Rialto Concrete Products, Inc. (2250 W. Lowell St.).

Utilities in the area are provided by:

- Electricity: Southern California Edison
- Natural Gas: Southern California Gas Company
- Water: Rialto Water Services
- Sewer: Rialto Water Services

2.2. Regional Geology and Hydrogeology

Information regarding regional geological and hydrogeological conditions was obtained from information included on the California Department of Water Resources website. The Site lies within the Rialto-Colton Subbasin which underlies a portion of the upper Santa Ana Valley in southwestern San Bernardino County and northwestern Riverside County. This subbasin is bound by the San Gabriel Mountains on the north, the San Jacinto fault on the east, the Box Spring Mountains on the south, and the Rialto-Colton fault on the west. Lytle Creek drains this part of the valley southeastward to its confluence with the Santa Ana River in the southern part of the subbasin. Groundwater in the Rialto-Colton Subbasin can be found in alluvial deposits. Specific yield ranges from about 6 percent northwest of Rialto to about 16 percent near Colton. Groundwater within the subbasin is primarily unconfined to semi-confined.

A Record of Decision (ROD) from the US EPA dated September 2, 2022 for the Rockets, Fireworks, and Flares Superfund reported groundwater to be measured at approximately 460 feet below ground surface (bgs); however, drought and increased groundwater pumping had caused groundwater to drop up to an additional 70 feet in some areas. The gradient of ground water below the Site is to the southeast.

2.3. Interviews and User Provided Information

The User of this report is Brookfield Properties who is looking to acquire the Site and would be considered a “User” of the report per ASTM definitions. We requested all available information from the User.

2.4. Title Records

A Title insurance document was provided to HMC for review. The document was prepared for the Site by Stewart Title Guaranty Company dated March 31st, 2023. Title was indicated to the be vested in BT Property, LLC, a Delaware limited liability company. The

Title document discussed easements, taxes, and other related matters however no information of an environmental nature was presented.

2.5. User Knowledge

We interviewed Mr. Amir Latifian of Brookfield Properties who indicated that his firm has no previous knowledge or experience with the property and is unaware of any chemical spills or releases or ongoing environmental matters. He indicated that they are paying full market value for the Site.

2.6. Owner/Occupant Knowledge

The Owner of the Site was not available for interview and an Owner/ Operator Questionnaire was not returned for HMC's review.

2.7. Environmental Liens or Activity and Use Limitations

HMC has found no evidence of land use restrictions on record for the Site. More information regarding the ongoing Superfund action can be found at: https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.contacts&id=0905945

3. SITE USE AND HISTORY

Past usage of the subject Site was assessed through a review of historical aerial photographs, topographic maps and an EDR search of city directories. and/or prior reports. Sanborn maps were not generated for the Site.

3.1. Aerial Photograph Review

Aerial photographs covering the Site were obtained from Environmental Data Resources, Inc. (EDR). Photographs were available from the period 1930 through 2020. Copies of the aerial photographs are included in Appendix B. A summary of the observations noted from the aerial photographs are as follows:

1930-1938	The Site and Site vicinity was first observed to be vacant land with a dirt road where the current North Locust Avenue is located today.
1949	The Site and Site vicinity was first seen to have been developed with rail spurs and bunkers. This area was known to have been developed with rail spurs and bunkers for the

	storage and transportation of munitions and explosives by the US Army.
1953	No significant changes to the Site were noted. A facility was observed to have been developed approximately 1,200 feet north of the Site.
1959	No significant changes were observed at the Site or Site vicinity with the exception of several residential type structures seen east of the Site, across what is now North Locust Avenue.
1966	No significant changes to the Site or Site vicinity were observed.
1975	The Site was no longer seen with rail spurs and bunkers with the exception of one bunker located in the southwest corner of the Site. Additional industrial development was noted approximately one-quarter mile north and south of the Site.
1985	Three shipping containers or shed like structures were noted in the northern portion of the Site. The previously noted northern industrial facility was observed to have expanded south with dirt roads and structures. What appeared to be two logistics facilities and additional residential development was noted to the east.
1989	One additional storage type structure was seen at the Site with a dirt road leading to the east adjacent facility at what is now known as 2824 North Locust Avenue. The Site vicinity was noted with additional industrial and residential development. What appeared to be a concrete products facility was located immediately northwest of the Site.
1990	No significant changes were seen at the Site or the Site vicinity with the exception of an industrial facility immediately

	east of the Site. The facility was noted with several structures and outdoor storage of pipe products.
1995	No significant changes were noted at the Site or Site vicinity.
2002	Storage containers were noted in the southern portion of the Site from the storage container facility located east of the Site. Additional industrial and residential development was seen in the Site vicinity. What appeared to be a concrete facility was located immediately southwest of the Site.
2005	No significant changes to the Site or Site vicinity were seen.
2009	Additional storage at the Site from off-Site facilities was seen. The concrete products facility was noted with storage in the northwest portion of the Site as well as additional storage containers in the south from the eastern facility. What appeared to be a logistics facility was first seen immediately north of the Site.
2012	No significant changes to the Site or Site vicinity were seen.
2016	The Site was seen to be vacant with the exception of the southwestern bunker. There were no significant changes seen in the Site vicinity.
2020	The Site was seen to be vacant. There were no significant changes seen in the Site vicinity with the exception of a large warehouse, first seen immediately east of the southeast corner of the Site.

3.2. Topographic Maps

Historical topographic maps were also reviewed as part of this effort and aided in interpreting the overall Site history. Although, no specific observations were made from the review of these maps.

3.3. Sanborn Maps

Sanborn maps are maps that were created for the insurance industry to document Site activities in metropolitan areas of the country and were used in underwriting. They often times contain detailed information about a Site. While they were prepared for insurance underwriting and were not environmental maps per se, they often times contain information that is useful in evaluating the historical use of a Site. Sanborn maps were not generated for the Site.

3.4. EDR City Directory Review

EDR performed a search of the City Directory records for the Site addresses provided at the initiation of this Phase I ESA and nearby properties at approximately five-year intervals. Review of this report yielded no findings as the Site has not been designated a physical address.

3.5. Summary

The Site was vacant land until the 1940's when it was seen to have been developed with rail spurs and bunkers used by the US Army for the storage of weapons and ammunition. The Site was observed with these uses until the 1960's. Since this time the Site has been vacant or portions used for additional storage by various facilities adjacent to the Site.

The Site vicinity has been noted with vacant land, industrial development, and residential development. The immediate Site vicinity has been used by the US Army as well a number of facilities involved with the manufacture of pyrotechnic products. These uses have notably caused releases of perchlorates and VOCs to soil and groundwater, resulting in an approximately 7-mile groundwater plume that extends beneath the Site to the southeast. These releases are managed under the Rockets, Fireworks, and Flares Superfund.

4. PRIOR INVESTIGATIONS

As part of an Environmental Impact Report prepared for the Site by LSA for the City of Rialto, a limited Phase II Investigation was conducted to assess potential soil impacts from historic use of the Site by pyrotechnics companies. A suspect bermed area was noted on historic aerial photographs. Arcadis was retained by UPS to further characterize and remediate the findings. The following information was obtained from the Arcadis report:

Soil Investigation

On December 9, 2008, ARCADIS personnel mobilized to the Site to collect 13 soil samples (nine soil samples from APN 0234-192-02 and four soil samples from APN 0239-192-03). Soil borings HA-1 through HA-4 were advanced via hand auger in the area referred to in the EIR as the rock and boulder pile at the south central edge of APN 0239-192-02. Soil Samples HA-5 though HA-8 were advanced via hand auger in the area referred to in the EIR as the area of two small oily surface areas located on APN 0239-192-02 identified as local spills along the eastern shoulder of Lowell Street. Soil borings HA-9 through HA-13 were advanced via hand auger in the area referred to in the El R as the western edge of APN 0239-192-02 and the northeastern edge of APN 0239-192-03, a possible pyrotechnic/explosive storage point. The goal of this sampling event was to assess the potential impact on surficial soils at the Site.

Soil samples were collected utilizing grab sampling methods in the depth interval from surface to approximately one foot below land surface (ft-bis), at HA-5 through HA-13, and approximately two ft-bis at HA-1 through HA-4. Stainless steel sampling hand augers and spoons were cleaned utilizing a low-phosphate soap and triple-rinsed prior to the collection of each sample to reduce the risk of cross contamination of the soil samples. Soil samples were placed into clean, laboratory-supplied, glass jars that were sealed with Teflon-lined screw caps. The sample jars were placed in a cooler filled with ice for storage. The cooler was delivered to TestAmerica Laboratories, Inc. (TestAmerica) located in Irvine, California.

TestAmerica analyzed the samples for benzene, toluene, ethylbenzene, xylenes (BTEX), methyl tertiary butyl ether (MTBE), and naphthalene by United States Environmental Protection Agency (EPA) Method 8260B (soil samples HA-5 though HA-8), volatile organic compounds (VOCs) by EPA Method 8260B (soil samples HA-1 through HA-4), Resource Conservation Recovery Act (RCRA) Metals by EPA Method 6010B (soil samples HA-1 through HA-13), polynuclear aromatic hydrocarbons (PAHs) by EPA Method 8270C (soil samples HA-1 through HA-8), total petroleum hydrocarbons-diesel range organics (TPH-DRO) by EPA Method 8015 (soil samples HA-1 through HA-8), TPH-gasoline range organics (GRO) by EPA Method 5030/8015 (soil samples HA-5 through HA-8), copper by EPA Method 6010B (soil samples HA-9 through HA-13), and perchlorate by EPA Method 314.0 modified (soil samples HA-9 through HA-13). Sample handling and chain-of-custody procedures were conducted pursuant to EPA SW-846 protocol. Shallow sample holes

were backfilled with surrounding native material. No investigation-derived waste (IDW) was generated as part the December 2008 investigation.

Soil sample results were compared to the Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs). This cleanup standard was chosen as the Site and surrounding area has a history of industrial and military use. The Site and surrounding area will be commercially developed.

TPH-DRO was detected above the RWQCB ES Ls of 100 milligrams per kilogram (mg/kg) for residential sites and 500 mg/kg for commercial sites in borings HA-5 (5,800 mg/kg), HA-6 (2,700 mg/kg), HA-7 (2,500 mg/kg), and HA-8 (13,000 mg/kg) in the soil samples collected in December 2008. Table 1 presents a tabular summary of the laboratory data.

Soil Remediation - January 2009

On January 15, 2009, ARCADIS personnel excavated soils in the vicinity of previously investigated HA-5 through HA-8, the area of small oily surface areas located on APN 0239-192-02 identified as local spills along the eastern shoulder of Lowell Street. Soils were removed via backhoe and shovel. Soils were screened by a photoionization detector (PID). When readings were less than 1.0 parts per million, and no visual and/or olfactory signs of impacts were detected, a confirmation soil sample was collected and submitted to TestAmerica for analysis of TPH-DRO by EPA Method 8015. The number of samples collected was based on the size of the area excavated (Figure 3). One sample was collected from each area, with the exception of HA-7, which was a larger excavation. Three samples were collected in the vicinity of HA-7 (HA-7A, HA-7B, and HA-7C). During remediation activities, an additional visually stained surficial soil area was identified. This area was also excavated and a confirmation soil sample was collected from this area and is referred to as HA-9. Excavated soils were placed in a roll off box and disposed of at Chemical Waste Management, Inc. in Kettleman City, California.

The soil samples collected in January 2009 showed a significant decrease in the concentrations of TPH-DRO in soil. TPH-DRO was not detected above the RWQCB ESLs of for 500 mg/kg for commercial properties. Soil samples collected from HA-5 (14 mg/kg), HA-6 (40 mg/kg), HA-7A (29 mg/kg), HA-7B (290 mg/kg), HA-7C (130 mg/kg}, and HA-8 (not detected above the laboratory reporting limit) were below

commercial ESLs. Table 1 presents a tabular summary of the laboratory data. The other constituents analyzed in the soil samples collected in 2008 and 2009 were not detected above the respective cleanup objectives.

Conclusion

Surficial soils were impacted with petroleum products above RWQCB ESLs for shallow soils at a commercial property. These impacts were confirmed visually and with laboratory data. The impacted soils were remediated via excavation to within acceptable commercial cleanup limits. Based on these soil results, the current surficial impacted soil at the Site has been removed and soils are below the RWQCB ESLs for shallow soils where groundwater is not a current or potential source of drinking water for commercial sites. No further action was recommended.

5. SITE RECONNAISSANCE

Mr. Troy Taylor of HMC conducted a Site and Site vicinity reconnaissance on May 30th 2023. The reconnaissance was conducted in order to identify visible evidence of REC's at the Site and to assess possible conditions off-Site that may impact the Site. Mr. Taylor was unaccompanied during the Site Reconnaissance.

The Site was seen to be almost entirely undeveloped land with vegetation overgrowth. There were areas noted with dumping of various items including construction debris and general trash. Along the western border, Rialto Concrete Products was noted to be storing equipment and some crushed concrete and asphalt. Its recommended that this facility remove their property from the Site.

The most notable feature at the Site was a munitions bunker located in the southwestern corner of the Site. The barrel roofed structure was made of concrete with wooden piers surrounding the structure. The roof was noted with a tar layer over the top. Concrete and wood debris were piled near the entrance door with a concrete trench with steel plates nearby. The entrance door to the bunker was locked. HMC cut the lock and replaced it before concluding the Site reconnaissance. The bunker was found to be empty aside from some a very small amount of trash. "Explosives" was painted to the left of the entrance door though no explosives were observed. A small, damaged brick and mortar structure was also located at the Site.

No RECs were observed during the Site walk with the exception of the bunker and its noted historical use.

Selected photographs illustrating the Site and nearby off-Site conditions are included in Appendix A. Summaries of the Site and observations are detailed below.

Description and Use of Site:	The Site was observed to be a vacant, unpaved parcel with the exception of a small brick structure and a concrete bunker.
Underground and Aboveground Storage Tanks:	No evidence of USTs or ASTs was seen at the Site.
Hazardous Materials, Hazardous Wastes or Petroleum Products:	Two empty poly totes containers were located near the bunker entrance.
Drains, Drain Lines, and Sumps:	A concrete trench was located near the entrance door to the bunker.
Pits, Ponds, Lagoons	These features were not observed at the Site.
Industrial Wastewater:	Industrial wastewater was not observed being generated at the Site.
Stains:	No stains were observed at the Site.
Wells:	No wells were observed at the Site
Transformers:	Transformers were not seen at the Site.
Other Features:	The structures were noted with suspect asbestos containing materials and the potential for lead paint. These materials should be sampled prior to demolition.

5.1. Site Vicinity

The Site is bound:

- to the north by Rialto Concrete Products, Inc. (2250 W. Lowell St.), Precision Aerial Services, Inc. (2020 W. Lowell St.), Thompson Pipe Group (3009 N. Laurel Ave.), and a vacant lot (2904 N. Locust Ave.);
- on the east by North Locust Avenue across which is an undeveloped parcel, Sennet Semi Trailer (2824 N. Locust Ave), Tubular Steel (2750 N. Locust Ave.), JILK Heavy Construction (2690 N. Locust Ave.), and Radial (2602 N. Locust Ave.);
- to the south by Robertson's Ready Mix materials yards (2601 Adler Ave.); and,
- to the west by Lake Padden Lane across which is Robertson's Ready Mix materials yards (2601 Adler Ave.) and Rialto Concrete Products, Inc. (2250 W. Lowell St.).

From a visual perspective, there were no RECs assessed from off-Site facilities.

6. REGULATORY AGENCY DATABASE RESEARCH

Regulatory agency database information was obtained from a standard radius Site Assessment (ASTM) report by Environmental Data Resources, Inc. The center of the search was in the approximate center of the Site. Search distances for specific databases were one-quarter to one mile as specified in the ASTM 1527-13 standard. The database search includes over 70 federal, state, local, and proprietary records. A complete copy of this report is included in Appendix B.

6.1. Database Records Concerning the Target Property

The Site was listed on the databases researched in the EDR report as being within the Goodrich Corporation boundaries.

Location	Address	Lists	REC	RATIONALE
Goodrich Corporation	160-Acres Locust	SPILLS SLIC REG 8	YES	These records were plotted at the Site in the EDR Radius research. However, the records were for the former BF Goodrich facility, part of the larger Rockets, Flares, and Fire Works Superfund and was located adjacent to Site to the north. The records pertained to the perchlorate groundwater release case with the RWQCB and USEPA. The records were considered a REC due to the Site's partial location with the

				"160 Acre Area" of the Superfund case.

6.2. Database Records Concerning the Site Vicinity

We reviewed the database report for off-Site potential sources within the relevant search distance. In review of the many entries on the database, we reviewed the following factors that affect the ability of a facility to affect the Site:

- Distance from the Site,
- Location from the Site with regard to the direction of groundwater flow,
- Nature of the release and whether the release has affected soil, groundwater or both,
- Status of the investigation (e.g. open or closed)

Groundwater was noted to flow to the southeast below the Site, therefore facilities located adjacent to or to the northwest were further considered. Only those facilities judged using these factors are discussed below. The following presents a summary of our findings:

Location	Address	Dist.	Dir.	Lists	REC	Rationale
Rocket, Fireworks, and Flares Site	3196 North Locust Avenue	0'	N	NPL SEMS SITE ROD PRP	YES	This boundaries of the Superfund Site include a 160-acre area formerly occupied by the US Army, BF Goodrich, and a number of other facilities that appear individually in the EDR Radius research, Geotracker, and/or Envirostor databases that have used perchlorate salts in their manufacturing processes. Perchlorate releases from these facilities have impacted the regional groundwater basin known as the Eastern Plume. Some of the facilities have also been identified as a source of VOC releases that have affected soil and groundwater. Given that groundwater is found at depth

						greater than 400 feet bgs in the Site vicinity, it is very unlikely the VOC releases pose a potential vapor intrusion condition. The Site is located on the southern portion of the "160-Acre Area" and the "Former Bunker Area". There are no records of releases, investigations, or clean-ups at the Site however rail spurs, bunkers, and storage structures were seen at the Site during the time of these facilities in the review of aerial photographs. This history of the Site poses the potential for releases and constitutes an REC. A subsurface investigation at the Site is recommended.
Mid-Valley Sanitary Landfill	2390 North Adler Avenue	96'	WSW	MINES	NO	This facility includes 497 acres, of which about 222 acres are used for waste disposal activities. The operations at this landfill resulted in perchlorate and VOC releases, including TCE, have impacted groundwater. The resulting plume is referred to as the Western Plume which is separated from the Eastern Plume by a "low concentration trough". This facility is not considered a REC due to the location in relation to the Site as well as the depth and direction of groundwater.

Orphan Sites

Orphan Sites are those properties that are included on various agency lists, but for which the records do not have sufficient address information for the database program to map the Site. No orphan Sites were identified in the EDR Radius Report.

6.3. Summary of Off-Site Issues

Based on the review of the available regulatory information, The Site is located with the "160-Acre Area" and the "Former Bunker Area" of the Rockets, Fireworks, and Flares Superfund. This area was used for approximately 60 years by several facilities including the US Army, BF Goodrich, and several other facilities such defense contractors, fireworks manufacturers, and other facilities that used perchlorate salts and/or chlorinated

solvents. These facilities are identified with releases of these chemicals that have contributed to soil and groundwater contamination, the latter being referred to as the Eastern Plume. Monitoring and the planning of remedial efforts are ongoing.

The Site was developed with rail spurs and bunkers by the US Army and several historic adjacent pyrotechnic facilities appear to have utilized portions of the Site for storage. Given this history, there exists a potential for releases of chemicals at the Site. The Site's location within the Superfund boundaries and historical uses are considered a REC

7. LOCAL AGENCY AND OTHER RECORDS REVIEW

7.1. Tribal Records

The Site is not located in a tribal area therefore there were no tribal records to review.

7.2. Oil and Gas Wells

The State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources online mapping website was reviewed for the location of active, plugged, or abandoned oil and gas wells in the vicinity of the Site. No oil or gas wells were listed as having been drilled on or in the near vicinity of the Site.

7.3. State of California

The State of California Geotracker and EnviroStor websites were also reviewed for information on potential on or off-Site facilities that are being remediated under either RWQCB or DTSC oversight. No active cases were listed on these databases that were not listed in the EDR review.

HMC also submitted public records requests to the DTSC and RWQCB. No records were found by either agency for the Site.

7.4. San Bernardino County Fire Protection District

A public records request was submitted to the SBCFPD. No records were found for the Site during their records research.

7.5. South Coast Air Quality Management District

A review of the SCAQMD Facility Information Detail website indicates that no records were on file for the Site.

7.6. City of Rialto

A public records request was submitted to the City of Rialto. There were no records found for the Site during the City's records search.

8. VAPOR INTRUSION, ASBESTOS AND, OTHER CONCERNS

8.1. Vapor Intrusion

Given the findings of this Phase I ESA, it is unlikely that a vapor intrusion condition exists at the Site from groundwater due to the deep depth of groundwater in excess of 400 feet. There could be a vapor intrusion condition from the historical use of the Site.

8.2. Asbestos Containing Materials (ACMs)

The bunker at the Site was seen with a tar like roofing compound which is a suspect ACM. The brick and mortar structure also may contain ACM. The bunker was unable to be entered for further evaluation.

8.3. Lead Based Paint (LBP)

The bunker at the Site was noted with paint on and around the entrance door. Given the age of this structure, this paint is likely to contain lead.

8.4. Radon

The Site is listed as being located in Zone 2 with regards to radon indicating that radon maybe present at concentrations less than 4 pico curies / liter.

8.5. Mold

There was no evidence of microbial growth on the outside of the bunker. A noted above, the bunker was locked was not entered.

9. SUMMARY OF FINDINGS

Key findings of this Phase I ESA are as follows:

- The Site was vacant land until the 1940's when it was developed with rail spurs and bunkers used by the US Army for the storage of weapons and ammunition. The Site was observed with these uses until the 1960's. Of note was a suspect bermed area noted in an aerial photograph that could have been used as a disposal or burn pit area for the historic operations. Since this time, the Site has

been vacant or portions used for additional storage by various facilities adjacent to the Site;

- The Site vicinity has been used as vacant land, industrial development, and residential development. The immediate Site vicinity has been used by the US Army as well a number of facilities involved with the manufacture of pyrotechnic products. These uses have notably caused releases of perchlorates and volatile organic compounds (VOCs) to soil and groundwater, resulting in an approximately 7-mile groundwater plume that extends beneath the Site and to the southeast. These releases are being investigated under the Rockets, Fireworks, and Flares Superfund Site;

- A limited investigation was conducted at the Site as part of an historical EIR prepared for the Site that reported the presence of petroleum hydrocarbons in shallow soil. No evidence of pyrotechnic materials such as perchlorates, metals, VOCs or polynuclear aromatic hydrocarbons were detected. Arcadis was retained by UPS to further investigate the area, which led to removal of the material to below regulatory screening levels. Arcadis concluded that the area had been adequately remediated and recommended no further action ;

- During the Site reconnaissance, the Site was observed as mostly vacant land with an empty munitions bunker remaining from the US Army use and two empty poly totes. No releases were apparent. The bunker as well as a small brick and mortar structure were observed with suspect asbestos containing materials (ACM) and potentially lead based paint (LBP). The remainder of the Site was undeveloped;

- There were no records for facilities at the Site in the EDR regulatory database search. Two records for the former BF Goodrich facility were plotted at the Site but are believed to be in relation to the former adjacent facility as well as the larger Rockets, Flares, and Fireworks Superfund case;

- Based on the review of the available regulatory information, the Site is located with the "160-Acre Area" and the "Former Bunker Area" of the Rockets, Fireworks, and Flares Superfund Site. This area was used for approximately 60 years by several facilities including the US Army, BF Goodrich, and several other facilities

such as defense contractors, fireworks manufacturers, and other facilities that used perchlorate salts and/or chlorinated solvents. These facilities are identified as having releases of these chemicals that have contributed to soil and groundwater contamination, with the groundwater contamination being referred to as the Eastern Plume. Monitoring and the planning of remedial efforts are ongoing;

- Given the findings of this report, there is a possibility a vapor intrusion condition may exist at the Site given the suspect historical uses;

- Given the age and observations of suspect construction materials at the on-Site structures, suspect ACMs and LBP may be present at the Site; and,

  No microbial growth was observed from the accessible exterior areas of the Site structures.

10. DATA GAPS

- An interview with the Owner of the Site was unable to be conducted and an Owner/Operator Questionnaire was not returned for HMC's review.

11. CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in accordance with ASTM E1527-21 Standard for the property located at Assessor's Parcel Number 023-919-223-000 in Rialto, California. **The following RECs were identified during this ESA:**

- The Site's location within the "160 Acre Area" and "Former Bunker Area" and off-Site releases resulting in the Fireworks, Rockets, and Flares Superfund.

- Historical uses of the Site for the storage of munitions and one remaining bunker; and,

- Unknown suspect use of the Site by historic adjacent pyrotechnic facilities.

The historical investigation and removal of hydrocarbons in the suspect bermed area constitutes an HREC. No CRECs were identified during this investigation.

While not a REC by ASTM standards, suspect ACMs and LBP may be present at the Site.

12. RECOMMENDATIONS

Based on the findings of this ESA, HMC recommends the following items for your consideration:

- Conduct a Site-wide subsurface investigation at the Site to supplement the previous investigations;
- Conduct additional research to ascertain what may be required to develop within the Superfund area such as land use restrictions;
- Remove the poly totes and properly dispose of them; and,
- Conduct ACM and LBP surveys prior to any activity that may disturb suspect materials.

13. QUALIFICATIONS

Mark S. Cousineau, NREP

Mr. Mark S. Cousineau, principal with HMC, has a diverse professional background in environmental management, which includes working as a generator, regulator, consultant, and corporate advisor in hazardous waste and other environmental issues.

Mr. Cousineau's technical background is focused in the area of overseeing large-scale environmental investigations and regulatory compliance management related to Site assessments, subsurface investigations, facility surveys, and Site remediation. To projects such as these, Mr. Cousineau brings expertise in evaluating complex Sites and developing solutions to solve the technical, operational, regulatory, financial and timing issues. In addition, Mr. Cousineau routinely assists clients in developing environmental business plans for single assets and multi-Site real estate portfolios and has designed and implemented several tenant audit programs involving the proactive management of environmental risk caused by on-Site commercial and industrial tenant activities.

Mr. Cousineau has provided litigation support and has served, as a court-appointed expert on environmental issues, is a Member of the National Registry of Environmental Professionals, holds a M.S. in Environmental Sciences from California State University Fullerton and a B.S. in Chemistry from University California San Diego.

As signatory to this report, I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess the property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Mark Cousineau, NREP
Principal

Notes:
mg/kg = milligrams per kilogram
Only analytes with one or more detections are listed on the table.
RWQCB ESLs = Regional Water Quality Control Board Table B: Environmental Screening Levels for Shallow Soils (≤ 3 meters below ground surface) where Groundwater is NOT a Current or Potential Source of Drinking Water
* = indicates concentration exceeded RWQCB ESL for Residential Sites
Indicates concentration exceeded RWQCB ESL for Commercial and Industrial Sites, and represents soils that have been remediated via excavation and properly disposed of
NE = not established
NA = not available
ND = not detected above the laboratory reporting limit
NS = analyte not sampled
PAHs = polynuclear aromatic hydrocarbons
VOCs = volatile organic compounds
TPH-DRO = total petroleum hydrocarbons-diesel range organics
TPH-GRO = total petroleum hydrocarbons-gasoline range organics

Contact: Troy Taylor

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hazard Management Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # F9AF-487F-AB20

PO # NA

Project APN 023919223 Locust & Lowell

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: F9AF-487F-AB20

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Hazard Management Consulting (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Hazard Management Consulting were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/27/2022 has revealed that there are 6 SEMS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EPA ID:: CAT080022148				

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

TARGET DISTRIBUTION EPA ID:: CAR000225169	3110 N ALDER AVE	NW 1/8 - 1/4 (0.207 mi.)	R81	634

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 SWEEPS UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the SPILLS 90 list, as provided by EDR, and dated 06/06/2012 has revealed that there is 1 SPILLS 90 site within approximately 0.001 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

RIALTO AMMUNITION ST		W 0 - 1/8 (0.097 mi.)	E18	116

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RIALTO CONCRETE PRODUCTS INC (Continued) **1004676040**

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	Not reported
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Perchlorate
Site History:	Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-31-2021
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Cloudy. Staff met with Mark Lastafka, mark.lastafka@thompsonpipegroup.com, 909-822-0200. The facility recently switched to a NEC from NOI with Level 2 ERA Technical Report status. It's possible the facility has a "No Discharge" technical report. Checking SMARTS the document was not present. Mark identified several stormwater collection areas at the site. There is exposure at the site, thus the site should produce a "No Discharge" technical report or obtain full NOI coverage.

Violations:
Site ID: 388340
Site Name: Burlingame Manufacturing
Violation Date: 10-29-2021
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 11/09/2021. OBSERVATION: The facility Hazardous Materials Business Plan was last certified via CERS on 2/28/2020. Your CERS ID number is 10311685. CORRECTIVE ACTION: Review

BURLINGAME MANUFACTURING (Continued) **S110656341**

	and electronically certify the facility Hazardous Materials Business Plan via CERS.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	388340
Site Name:	Burlingame Manufacturing
Violation Date:	02-04-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/04/2019. OBSERVATION: Observed (1) 55 gal drum of used coolant missing a hazardous waste label. CORRECTIVE ACTION: Kevin, Manager, added a complete hazardous waste to the (1) 55 gal drum of used coolant and corrected the violation on site.
Violation Division:	San Bernardino County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	388340

Violations:
Site ID: 441044
Site Name: EZE TRUCKING dba RIG RUNNER
Violation Date: 01-08-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/08/2019. OBSERVATION: The inventory submitted into CERS is not reflective of what was observed at the time of inspection. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory into the California Environmental Reporting System (CERS).
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 441044
Site Name: EZE TRUCKING dba RIG RUNNER
Violation Date: 01-08-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan.
Violation Notes: Returned to compliance on 03/08/2019. OBSERVATION: Facilities that store aboveground storage capacities of petroleum products at or

EZE TRUCKING LLC DBA RIG RUNNER (Continued) **S121451735**

exceeding 1,320 gallons are subject to APSA. Facilities that are subject to APSA must prepare a Spill Prevention, Control, and Countermeasure (SPCC) Plan in accordance with the oil pollution prevention guidelines in the Federal Code of Regulations (40 CFR 112). At the time of inspection, it was observed that this facility is subject to APSA and has not prepared an SPCC plan. CORRECTIVE ACTION: Prepare and implement an SPCC Plan. Maintain the plan on site and submit a signed statement indicating that an SPCC plan has been prepared and implemented. Facility meets the requirements to use a Tier 1 SPCC Plan template.

EMS Map Link: https://fudsportal.usace.army.mil/ems/inventory/map?id=61163
Eligibility: Eligible
Has Projects: Yes
NPL Status: Not on the NPL
Property History: The site was developed for use as depot, including construction of a complete storage facility. A building area was also established east of the storage area with buildings used for administration, kitchen, barracks, vehicle storage and maintenance, shops, and a fire station. Additionally, a gas station, shelters, sewage plant, and water supply were constructed. The Army leased out approximately 2,000 acres for crop cultivation and grazing. Rialto Ammunition Storage Point remained active until late 1945. On 13 November 1945, the Army reported 2814.55 acres fee and 7.60 acres leased as excess to the War Assets Administration. Custody was assumed by the Farm Credit Administration on 9 July 1946. This acreage was then subdivided over a number of years and sold. Most of the property is currently zoned industrial and occupied by a municipal landfill and various companies, including pyrotechnics companies. Some portions of the property, including portions of the building area, have been developed into residential use. Military improvements that have been beneficially used include the water well, and concrete storage bunkers.

FUDS Detail as of Jan 2015:
Fiscal Year: 2013
Federal Facility ID: CA9799F5579
RAB: Not reported
NPL Status: Not Listed
Description: The site is located on 2,821.75 acres 7 miles northwest of San Bernardino, California. In 1942, the Department of War acquired 2,814.55 acres by fee through deed and declaration of taking and a 7.6-acre railroad easement for a total acquisition of 2,822.15 acres. The site was known as the Los Angeles Backup Storage Facility. This name was later changed to Rialto Ammunition Storage Point. The Rialto Ammunition Storage Point is located in San Bernardino County approximately 5 miles north of the City of Rialto and 10 miles northeast of the City of Fontana, California. The property is now used for both industrial (including a municipal landfill owned and operated by the County of San Bernardino) and residential purposes.
History: The site was developed for use as depot, including construction of a complete storage facility. A building area was also established east of the storage area with buildings used for administration, kitchen, barracks, vehicle storage and maintenance, shops, and a fire station. Additionally, a gas station, shelters, sewage plant, and water supply were constructed. The Army leased out approximately 2,000 acres for crop cultivation and grazing. Rialto Ammunition Storage Point remained active until late 1945. On 13 November 1945, the Army reported 2814.55 acres fee and 7.60 acres leased as excess to the War Assets Administration. Custody was assumed by the Farm Credit Administration on 9 July 1946. This acreage was then subdivided over a number of years and sold. Most of the property is currently zoned industrial and occupied by a municipal landfill and various companies, including pyrotechnics companies. Some portions of the property, including portions of the building area, have been developed into residential use. Military improvements that have been beneficially used include the water well, and concrete storage bunkers.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-09-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The site-specific SWPPP, Monitoring plan and log of inspections were available and reviewed at the site. The facility is a warehousing for tubular metals (Pipes) of various sizes. Other than warehousing, the facility performs cutting and machining as per requirements of the customer. The cutting and machining operations are performed indoor. The entire yard is paved. There is a diesel storage tank in the yard. The tank is covered by a canopy. Diesel is dispensed very rarely. Storm water leaves from two locations in the front to Locust Avenue. The facility yard is gently graded to drain storm water onto an infiltration trench designed to treat storm water before leaving the property.. The trench is located on southeastern corner of the property. Mr. Gregg told that about 95% of storm water is treated before discharging into drainage system.

Site ID: 77984
Site Name: TUBULAR STEEL, INC.
Violation Date: 09-29-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 10/29/2015. Failure to operate and maintain facility to prevent a fire, spill or release (CCR 66265.31)
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-09-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The site-specific SWPPP, Monitoring plan and log of inspections were available and reviewed at the site. The facility is a warehousing for tubular metals (Pipes) of various sizes. Other than warehousing, the facility performs cutting and machining as per requirements of the customer. The cutting and machining operations are performed indoor. The entire yard is paved. There is a diesel storage tank in the yard. The tank is covered by a canopy. Diesel is dispensed very rarely. Storm water leaves from two locations in the front to Locust Avenue. The facility yard is gently graded to drain storm water onto an infiltration trench designed to treat storm water before leaving the property.. The trench is located on southeastern corner of the property. Mr. Gregg told that about 95% of storm water is treated before discharging into drainage system.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	OBSERVATION: (3) 55 gallon drums of waste coolant with accumulation start dates of May 2017. Accumulation time can not exceed 180 days for a Small Quantity Generator. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Address: 3040 N LOCUST AVENUE
City,State,Zip: RIALTO, CA 92377
Site ID: 526899
CERS ID: 829748
CERS Description: Industrial Facility Storm Water

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-09-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The site-specific SWPPP, Monitoring plan and log of inspections were available and reviewed at the site. The facility is engaged in recycling of plastics. Used containers are crushed and converted into small pellets. Loading and unloading is performed on eastern and southern side of the property. Back yard is unpaved only covered by rock gravel. All industrial operations are performed indoor. Storm water from main unloading area is diverted to 3 stage clarifier. Remaining storm water discharges outside onto the street. The facility has installed straw wattles in front of the discharge point to capture fine plastic particles

Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Perchlorate
Site History:	Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov

Violation Date: 06-29-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 07/04/2017.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 89365
Site Name: ACA AUTO SALVAGE II
Violation Date: 06-02-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/01/2020. OBSERVATION: Observed (3) 55-gallon drums of used oil and (1) 30-gallon parts washer that were disclosed on the hazardous materials inventory in the incorrect daily maximum quantity. Also the federal hazard category for waste antifreeze is obsolete. Also missing from the hazardous materials inventory is the chemical location for used oil, waste antifreeze and the parts wahser. Used oil and the parts washer are missing a federal hazard category. Your CERS ID number is 10034329. CORRECTIVE ACTION: Update the hazardous materials inventory via CERS by updating the federal hazard category for waste antifreeze, updating the daily maximum quantity for used oil and parts washer to reflect the inventory observed on site, and providing a federal hazard category and chemical location for used oil, the parts washer, and waste antifreeze.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-22-2017
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Yearly inspection for the facility was conducted. On arrival, I observed the facility had limited its recycling and inventory items at the front of the property. The roll-off bin was the only open top storage item at the front of the facility. According to Mr. Adzhinyan, the recycler came by every other week to each month to haul the roll-off bin as it was filled. No stain was observed around the roll-off bin. Mr. Adzhinyan noted that the flow of storm water continued to flow into his facility from the roadway, as well as from the east and west perimeters. He indicated his site continued to be underwater after a heavy storm event, and the soil quickly percolated the ponding water within the day. Behind the front wall, salvaged tires were stored both on the racks and ground. I noticed the tires on the rack had been removed from rims, and tightly packed together to prevent water intrusion into wheel-wells during rain events. According to Mr. Adzhinyan, tires that still had rims on them were left on the ground in packages for resell, while tires without rims were being staged to be hauled off to tire recyclers. Trash containers had lids, and were closed after hours. Containers without lids either get covered if the containers had fluids, or flipped over if they used for dry storage to prevent storm water intrusion. All dismantling activities remained under roof, according to Mr. Adzhinyan. I saw engine blocks were wrapped and placed on racks, while non-moving mechanical parts were stored both on racks and in designated areas above ground. I observed automotive bodies were stored on raised platforms, on the dirt lot. No stains around the storage area noted during the inspection. Mr. Adzhinyan indicated no storm water run-off from the facility in the known storm events.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RIALTO PLANT (Continued) **S106105315**

Annual Report by July 1st.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Case Development Inspection
Eval Date: 08-28-2007
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Facility was issued a Notice of Non-Compliance for failure to submit 2006-2007 annual report. On arrival during an inspection, the facility is still in business. Craig Phillips is no longer the person in charge of submitting document. The new person is Steve Castano (stevec@rrmca.com, 951-685-2200). The site has a sub-facility called Roberson's Transport, with an address of 2430 N. Alder Ave.. Will contact Steve to confirm the Ready Mix plant address.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Complaint Inspection
Eval Date: 03-21-2005
Violations Found: No
Eval Type: Industrial Storm Water Complaint Inspection
Eval Notes: The facility was inspected in response to a complaint regarding sediment-laden storm water discharge. The facility was inspected during a dry day. Mr. Noor Mtichell, Plant Manager escorted us to the facility. During discussions, he told us that all storm water is retained on the property. SWPPP was not available at the property. Monitoring program was also a generic. The facility never collected storm water sample. Some storm water from the neighboring facility run on the property . Robertson try to retain all water at the site.
During this visit it was observed that most storm water and cement wash water enters onto the neighboring property which ultimately discharges onto Stonehurst Dr. Visit of the mining area along Alder Avenue also revealed that there was discharge from the facility due to failure of embankment of the water channel carrying water to the mining area.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Eval General Type: Other/Unknown
Eval Date: 03-21-2005
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: SWPPP was not available. The monitoring program was not specific. There were significant sources of unauthorized non-storm water discharges. Employee training records were not available.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS,

Case Worker:	Not reported
Local Agency:	DEPARTMENT OF TOXIC SUBSTANCES CONTROL
RB Case Number:	Not reported
File Location:	DTSC
Potential Media Affected:	Well used for drinking water supply
Potential Contaminants of Concern:	Perchlorate
Site History:	DTSC is lead. See Department of Toxic Substances Control website at www.envirostor.dtsc.ca.gov/public Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov DTSC LEAD- closure letter completed by DTSC 10/22/20009

Waste Code: D042
Waste Description: 2,4,6-TRICHLOROPHENOL

Waste Code: D043
Waste Description: VINYL CHLORIDE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F004
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F010
Waste Description: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F011
Waste Description: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

Waste Code: F012
Waste Description: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F027

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Description: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P002
Waste Description: 1-ACETYL-2-THIOUREA (OR) ACETAMIDE, N-(AMINOTHIOXOMETHYL)-

Waste Code: P003
Waste Description: 2-PROPENAL (OR) ACROLEIN

Waste Code: P004
Waste Description: 1,4,5,8-DIMETHANONAPHTHALENE, 1,2,3,4,10,10-HEXA-CHLORO-1,4,4A,5,8,8A,-HEXAHYDRO-, (1ALPHA, 4ALPHA, 4ABETA, 5ALPHA, 8ALPHA, 8ABETA)- (OR) ALDRIN

Waste Description: O,O-DIETHYL O-PYRAZINYL PHOSPHOROTHIOATE (OR) PHOSPHOROTHIOIC ACID, O,O-DIETHYL O-PYRAZINYL ESTER

Waste Code: P041
Waste Description: DIETHYL-P-NITROPHENYL PHOSPHATE (OR) PHOSPHORIC ACID, DIETHYL 4-NITROPHENYL ESTER

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P043
Waste Description: DIISOPROPYLFLUOROPHOSPHATE (DFP) (OR) PHOSPHOROFLUORIDIC ACID, BIS(1-METHYLETHYL) ESTER

Waste Code: P044
Waste Description: DIMETHOATE (OR) PHOSPHORODITHIOIC ACID, O,O-DIMETHYL S-[2-(METHYLAMINO)-2-OXOETHYL] ESTER

Waste Code: P045
Waste Description: 2-BUTANONE, 3,3-DIMETHYL-1-(METHYLTHIO)-, O-[METHYLAMINO)CARBONYL] OXIME (OR) THIOFANOX

Waste Code: P046
Waste Description: ALPHA,ALPHA-DIMETHYLPHENETHYLAMINE (OR) BENZENEETHANAMINE, ALPHA, ALPHA-DIMETHYL-

Waste Code: P047
Waste Description: 4,6-DINITRO-O-CRESOL, & SALTS (OR) PHENOL, 2-METHYL-4,6-DINITRO-, & SALTS

Waste Code: P048
Waste Description: 2,4-DINITROPHENOL (OR) PHENOL, 2,4-DINITRO-

Waste Code: P049
Waste Description: DITHIOBIURET (OR) THIOIMIDODICARBONIC DIAMIDE [(H2N)C(S)]2NH

Waste Code: P050
Waste Description: 6,9-METHANO-2,4,3-BENZODIOXATHIEPIN,6,7,8,9,10,10-HEXACHLORO-1,5,5A,6, 9,9A-HEXAHYDRO-,3-OXIDE (OR) ENDOSULFAN

Waste Code: P051
Waste Description: 2,7:3,6-DIMETHANONAPHTH[2,3-B]OXIRENE, 3,4,5,6,9,9-HEXACHLORO-1A,2,2A,3,6,6A,7,7A-OCTAHYDRO-, (1AALPHA, 2BETA, 2ABETA, 3ALPHA, 6ALPHA, 6ABETA, 7BETA, 7AALPHA)- & METABOLITES (OR) ENDRIN (OR) ENDRIN, & METABOLITES

Waste Code: P054
Waste Description: AZIRIDINE (OR) ETHYLENEIMINE

Waste Code: P056
Waste Description: FLUORINE

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Code: P057
Waste Description: ACETAMIDE, 2-FLUORO- (OR) FLUOROACETAMIDE

Waste Code: P058
Waste Description: ACETIC ACID, FLUORO-, SODIUM SALT (OR) FLUOROACETIC ACID, SODIUM SALT

Waste Code: P059
Waste Description: 4,7-METHANO-1H-INDENE, 1,4,5,6,7,8,8-HEPTACHLORO-3A,4,7,7A-TETRAHYDRO- (OR) HEPTACHLOR

Waste Code: P060
Waste Description: 1,4,5,8-DIMETHANONAPHTHALENE, 1,2,3,4,10,10-HEXA-CHLORO-1,4,4A,5,8,8A,-HEXAHYDRO-, (1ALPHA, 4ALPHA, 4ABETA, 5BETA, 8BETA, 8ABETA)- (OR) ISODRIN

Waste Code: P062
Waste Description: HEXAETHYL TETRAPHOSPHATE (OR) TETRAPHOSPHORIC ACID, HEXAETHYL ESTER

Waste Code: P063
Waste Description: HYDROCYANIC ACID (OR) HYDROGEN CYANIDE

Waste Code: P064
Waste Description: METHANE, ISOCYANATO- (OR) METHYL ISOCYANATE

Waste Code: P065
Waste Description: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

Waste Code: P066
Waste Description: ETHANIMIDOTHIOIC ACID, N-[[(METHYLAMINO)CARBONYL]OXY]-, METHYL ESTER (OR) METHOMYL

Waste Code: P067
Waste Description: 1,2-PROPYLENIMINE (OR) AZIRIDINE, 2-METHYL-

Waste Code: P068
Waste Description: HYDRAZINE, METHYL- (OR) METHYL HYDRAZINE

Waste Code: P069
Waste Description: 2-METHYLLACTONITRILE (OR) PROPANENITRILE, 2-HYDROXY-2-METHYL-

Waste Code: P070
Waste Description: ALDICARB (OR) PROPANAL, 2-METHYL-2-(METHYLTHIO)-, O-[(METHYLAMINO)CARBONYL]OXIME

Waste Code: P071
Waste Description: METHYL PARATHION (OR) PHOSPHOROTHIOIC ACID, O,O,-DIMETHYL O-(4-NITROPHENYL) ESTER

Waste Code: P072
Waste Description: ALPHA-NAPHTHYLTHIOUREA (OR) THIOUREA, 1-NAPHTHALENYL-

Waste Code: P073
Waste Description: NICKEL CARBONYL (OR) NICKEL CARBONYL NI(CO)4, (T-4)-

Waste Code: P074
Waste Description: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U130
Waste Description: 1,3-CYCLOPENTADIENE, 1,2,3,4,5,5-HEXACHLORO- (OR) HEXACHLOROCYCLOPENTADIENE

Waste Code: U131
Waste Description: ETHANE, HEXACHLORO- (OR) HEXACHLOROETHANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U133
Waste Description: HYDRAZINE (R,T)

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U135
Waste Description: HYDROGEN SULFIDE (OR) HYDROGEN SULFIDE H2S

Waste Code: U136
Waste Description: ARSINIC ACID, DIMETHYL- (OR) CACODYLIC ACID

Waste Code: U137
Waste Description: INDENO[1,2,3-CD]PYRENE

Waste Code: U138
Waste Description: METHANE, IODO- (OR) METHYL IODIDE

Waste Code: U139
Waste Description: Not Defined

Waste Code: U140
Waste Description: 1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)

Waste Code: U141
Waste Description: 1,3-BENZODIOXOLE, 5-(1-PROPENYL)- (OR) ISOSAFROLE

Waste Code: U142
Waste Description: 1,3,4-METHENO-2H-CYCLOBUTA[CD]PENTALEN-2-ONE, 1,1A,3,3A,4,5,5,5A,5B,6-DECACHLOROOCTAHYDRO- (OR) KEPONE

Waste Code: U143
Waste Description: 2-BUTENOIC ACID, 2-METHYL-, 7-[[2,3-DIHYDROXY-2-(1-METHOXYETHYL)-3-METHYL-1-OXOBUTOXY]METHYL]-2,3,5,7A-TETRAHYDRO-1H-PYRROLIZIN-1-YL ESTER, [1S-[1ALPHA(Z), 7(2S*,3R*), 7AALPHA]]- (OR) LASIOCARPINE

Waste Code: U144
Waste Description: ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE

Waste Code: U145
Waste Description: LEAD PHOSPHATE (OR) PHOSPHORIC ACID, LEAD(2+) SALT (2:3)

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Code: U146
Waste Description: LEAD SUBACETATE (OR) LEAD, BIS(ACETATO-O)TETRAHYDROXYTRI-

Waste Code: U147
Waste Description: 2,5-FURANDIONE (OR) MALEIC ANHYDRIDE

Waste Code: U148
Waste Description: 3,6-PYRIDAZINEDIONE, 1,2-DIHYDRO- (OR) MALEIC HYDRAZIDE

Waste Code: U149
Waste Description: MALONONITRILE (OR) PROPANEDINITRILE

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U152
Waste Description: 2-PROPENENITRILE, 2-METHYL- (I,T) (OR) METHACRYLONITRILE (I,T)

Waste Code: U153
Waste Description: METHANETHIOL (I,T) (OR) THIOMETHANOL (I,T)

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U155
Waste Description: 1,2-ETHANEDIAMINE, N,N-DIMETHYL-N'-2-PYRIDINYL-N'-(2-THIENYLMETHYL)- (OR) METHAPYRILENE

Waste Code: U156
Waste Description: CARBONOCHLORIDIC ACID, METHYL ESTER, (I,T) (OR) METHYL CHLOROCARBONATE (I,T)

Waste Code: U157
Waste Description: 3-METHYLCHOLANTHRENE (OR) BENZ[J]ACEANTHRYLENE, 1,2-DIHYDRO-3-METHYL-

Waste Code: U158
Waste Description: 4,4'-METHYLENEBIS(2-CHLOROANILINE) (OR) BENZENAMINE, 4,4'-METHYLENEBIS[2-CHLORO-

Waste Code: U159
Waste Description: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

Waste Code: U160
Waste Description: 2-BUTANONE, PEROXIDE (R,T) (OR) METHYL ETHYL KETONE PEROXIDE (R,T)

Waste Code: U161
Waste Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Waste Code: U162
Waste Description: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

Waste Code: U163

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Description: GUANIDINE, N-METHYL-N'-NITRO-N-NITROSO- (OR) MNNG

Waste Code: U164
Waste Description: 4(1H)-PYRIMIDINONE, 2,3-DIHYDRO-6-METHYL-2-THIOXO- (OR) METHYLTHIOURACIL

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U166
Waste Description: 1,4-NAPHTHALENEDIONE (OR) 1,4-NAPHTHOQUINONE

Waste Code: U167
Waste Description: 1-NAPTHALENAMINE (OR) ALPHA-NAPHTHYLAMINE

Waste Code: U168
Waste Description: 2-NAPTHALENAMINE (OR) BETA-NAPHTHYLAMINE

Waste Code: U169
Waste Description: BENZENE, NITRO- (OR) NITROBENZENE (I,T)

Waste Code: U170
Waste Description: P-NITROPHENOL (I,T) (OR) PHENOL, 4-NITRO-

Waste Code: U171
Waste Description: 2-NITROPROPANE (I,T) (OR) PROPANE, 2-NITRO- (I,T)

Waste Code: U172
Waste Description: 1-BUTANAMINE, N-BUTYL-N-NITROSO- (OR) N-NITROSODI-N-BUTYLAMINE

Waste Code: U173
Waste Description: ETHANOL, 2,2'-(NITROSOIMINO)BIS- (OR) N-NITROSODIETHANOLAMINE

Waste Code: U174
Waste Description: ETHANAMINE, N-ETHYL-N-NITROSO- (OR) N-NITROSODIETHYLAMINE

Waste Code: U176
Waste Description: N-NITROSO-N-ETHYLUREA (OR) UREA, N-ETHYL-N-NITROSO-

Waste Code: U177
Waste Description: N-NITROSO-N-METHYLUREA (OR) UREA, N-METHYL-N-NITROSO-

Waste Code: U178
Waste Description: CARBAMIC ACID, METHYLNITROSO-, ETHYL ESTER (OR) N-NITROSO-N-METHYLURETHANE

Waste Code: U179
Waste Description: N-NITROSOPIPERIDINE (OR) PIPERIDINE, 1-NITROSO-

Waste Code: U180
Waste Description: N-NITROSOPYRROLIDINE (OR) PYRROLIDINE, 1-NITROSO-

Waste Code: U181
Waste Description: 5-NITRO-O-TOLUIDINE (OR) BENZENAMINE, 2-METHYL-5-NITRO

Waste Code: U182
Waste Description: 1,3,5-TRIOXANE, 2,4,6-TRIMETHYL- (OR) PARALDEHYDE

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Code: U183
Waste Description: BENZENE, PENTACHLORO- (OR) PENTACHLOROBENZENE

Waste Code: U184
Waste Description: ETHANE, PENTACHLORO- (OR) PENTACHLOROETHANE

Waste Code: U185
Waste Description: BENZENE, PENTACHLORONITRO- (OR) PENTACHLORONITROBENZENE (PCNB)

Waste Code: U186
Waste Description: 1,3-PENTADIENE (I) (OR) 1-METHYLBUTADIENE (I)

Waste Code: U187
Waste Description: ACETAMIDE, N-(4-ETHOXYPHENYL)- (OR) PHENACETIN

Waste Code: U188
Waste Description: PHENOL

Waste Code: U189
Waste Description: PHOSPHORUS SULFIDE (R) (OR) SULFUR PHOSPHIDE (R)

Waste Code: U190
Waste Description: 1,3-ISOBENZOFURANDIONE (OR) PHTHALIC ANHYDRIDE

Waste Code: U191
Waste Description: 2-PICOLINE (OR) PYRIDINE, 2-METHYL-

Waste Code: U192
Waste Description: BENZAMIDE, 3,5-DICHLORO-N-(1,1-DIMETHYL-2-PROPYNYL)- (OR) PRONAMIDE

Waste Code: U193
Waste Description: 1,2-OXATHIOLANE, 2,2-DIOXIDE (OR) 1,3-PROPANE SULTONE

Waste Code: U194
Waste Description: 1-PROPANAMINE (I,T) (OR) N-PROPYLAMINE (I,T)

Waste Code: U196
Waste Description: PYRIDINE

Waste Code: U197
Waste Description: 2,5-CYCLOHEXADIENE-1,4-DIONE (OR) P-BENZOQUINONE

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U202
Waste Description: 1,2-BENZISOTHIAZOL-3(2H)-ONE, 1,1-DIOXIDE, & SALTS (OR) SACCHARIN, & SALTS

Waste Code: U203
Waste Description: 1,3-BENZODIOXOLE, 5-(2-PROPENYL)- (OR) SAFROLE

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U207
Waste Description: 1,2,4,5-TETRACHLOROBENZENE (OR) BENZENE, 1,2,4,5-TETRACHLORO-

Waste Code: U208
Waste Description: 1,1,1,2-TETRACHLOROETHANE (OR) ETHANE, 1,1,1,2-TETRACHLORO-

Waste Code: U209
Waste Description: 1,1,2,2-TETRACHLOROETHANE (OR) ETHANE, 1,1,2,2-TETRACHLORO-

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U211
Waste Description: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

Waste Code: U212
Waste Description: Not Defined

Waste Code: U213
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Waste Code: U214
Waste Description: ACETIC ACID, THALLIUM(1+) SALT (OR) THALLIUM(I) ACETATE

Waste Code: U215
Waste Description: CARBONIC ACID, DITHALLIUM(1+) SALT (OR) THALLIUM(I) CARBONATE

Waste Code: U216
Waste Description: THALLIUM CHLORIDE TLCL (OR) THALLIUM(I) CHLORIDE

Waste Code: U217
Waste Description: NITRIC ACID, THALLIUM(1+) SALT (OR) THALLIUM(I) NITRATE

Waste Code: U218
Waste Description: ETHANETHIOAMIDE (OR) THIOACETAMIDE

Waste Code: U219
Waste Description: THIOUREA

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U221
Waste Description: BENZENEDIAMINE, AR-METHYL- (OR) TOLUENEDIAMINE

Waste Code: U222

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Waste Description: BENZENAMINE, 2-METHYL-, HYDROCHLORIDE (OR) O-TOLUIDINE HYDROCHLORIDE

Waste Code: U223
Waste Description: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Waste Code: U225
Waste Description: BROMOFORM (OR) METHANE, TRIBROMO-

Waste Code: U226
Waste Description: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

Waste Code: U227
Waste Description: 1,1,2-TRICHLOROETHANE (OR) ETHANE, 1,1,2-TRICHLORO-

Waste Code: U228
Waste Description: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Waste Code: U230

Waste Code: U232
Waste Description: Not Defined

Waste Code: U233
Waste Description: Not Defined

Waste Code: U234
Waste Description: 1,3,5-TRINITROBENZENE (R,T) (OR) BENZENE, 1,3,5-TRINITRO-

Waste Code: U235
Waste Description: 1-PROPANOL, 2,3-DIBROMO-, PHOSPHATE (3:1) (OR) TRIS(2,3,-DIBROMOPROPYL) PHOSPHATE

Waste Code: U236
Waste Description: 2,7-NAPHTHALENEDISULFONIC ACID,3,3'-[(3,3'-DIMETHYL[1,1'-BIPHENYL]-4,4'-DIYL)BIS(AZO)BIS[5-AMINO -4-HYDROXY]-, TETRASODIUM SALT (OR) TRYPAN BLUE

Waste Code: U237
Waste Description: 2,4-(1H,3H)-PYRIMIDINEDIONE, 5-[BIS(2-CHLOROETHYL)AMINO]- (OR) URACIL MUSTARD

Waste Code: U238
Waste Description: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

Waste Code: U239
Waste Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Waste Code: U240
Waste Description: 2,4-D, SALTS & ESTERS (OR) ACETIC ACID, (2,4-DICHLOROPHENOXY)-, SALTS & ESTERS (OR) DICHLOROPHENOXYACETIC ACID 2,4-D

Waste Code: U243
Waste Description: 1-PROPENE, 1,1,2,3,3,3-HEXACHLORO- (OR) HEXACHLOROPROPENE

Waste Code: U244
Waste Description: THIOPEROXYDICARBONIC DIAMIDE [(H2N)C(S)]2S2, TETRAMETHYL- (OR) THIRAM

DENOVA ENVIRONMENTAL INC (Continued) **1000176809**

Quarterly Update:	Updated 8/7/08 Denova Denova Environmental, Inc. is an inactive off-site hazardous waste treatment, storage and transfer facility in Rialto, California. While it was active, the facility accepted a variety of hazardous wastes, including waste explosives, reactives, flammables, oxidizers, and corrosives. Until 1994, the facility treated explosive waste in an Open Burn/Open Detonation (OB/OD) unit on the northern portion of the facility property. The facility began operations in 1966 at a parcel of land approximately mile south of the present location and moved to the present location in 1987 when an explosion at a neighboring explosives bunker destroyed part of the facility. The facility was owned and operated previously by Broco, Inc. and Broco Environmental, Inc. On May 28, 2002, the Department of Toxic Substances Control (DTSC) terminated the interim status authorization of the Denova facility based on significant and repeated violations of hazardous waste control law. From May 2002 through April 2003, the U.S. Environmental Protection Agency, Region 9 (USEPA) conducted an Emergency Removal Action to remove the hazardous waste inventory. DTSC requested the assistance of USEPA due to USEPA s expertise in handling explosives. The Emergency Removal Action cost approximately $2 million. In May 2003, DTSC issued a unilateral closure and corrective action order to Denova Environmental, Intercoastal LLC, the landowner at the time, and several other Responsible Parties. Intercoastal LLC cooperated with the Order and conducted an initial site investigation to evaluate perchlorate impacts to subsurface soils. Perchlorate was found in both surface and subsurface soils. Additionally, there were many non-detects at high detection limits. Two samples with detections are as follows: 1) Within the Open Burn/Open Detonation (OB/OD) area, boring B-4 at 45 feet below ground surface (bgs), sample id: B-4-45-INT, perchlorate at 16 micrograms per kilogram. Within the Explosives Storage area, boring B-4 at 30 feet bgs, sample id B-4

TARGET DISTRIBUTION CENTER T3840 (Continued) **S121309768**

Site ID:	403505
Site Name:	TARGET DISTRIBUTION CENTER T3840
Violation Date:	11-06-2019
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.
Violation Notes:	Returned to compliance on 12/02/2019. OBSERVATION: The agency contact list shows incorrect phone numbers for the local CUPA, San Bernardino County Fire Department, and for EPA Region 9. CORRECTIVE ACTION: Submit a signed statement that the agency contact list has been revised to include the correct agency phone numbers. For SBC Fire, the number shall be listed as 909-386-8425.

RIALTO PERCHLORATE INVESTIGATION - HESCOX, HARRY (Continued) **S110505129**

RB Case Number:	Not reported
File Location:	Not reported
Potential Media Affected:	Not reported
Potential Contaminants of Concern:	Not reported
Site History:	Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov

RIALTO PERCHLORATE INVESTIGATION - LOCKHEED/GCR (Continued) **S110505128**

Potential Contaminants of Concern: Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Perchlorate

Site History: Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov

Status Date:	07/11/2016
Global Id:	SL0607199978
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	34.155337
Longitude:	-117.416618
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	2080021
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Perchlorate
Site History:	Perchlorate contamination was first detected in groundwater in the Rialto, Colton and Chino Subbasins in 1997. At that time, the California Department of Health Services (DHS) Action Level (AL) for perchlorate in drinking water was 18 parts per billion (ppb). Two wells had perchlorate levels exceeding 18 ppb and were shut down. In January 2002, the DHS lowered the AL to 4 ppb. In response to the reduced AL for perchlorate, the local water purveyors in the Rialto, Colton and Chino Groundwater Subbasins restricted or eliminated the use of additional production wells with perchlorate concentrations that exceeded 4 ppb. Between 1997 and the present, various suspected perchlorate dischargers have been identified. For more up to date information on enforcement actions, see our website at www.waterboards.ca.gov

RIALTO PERCHLORATE INVESTIGATION - MID-VALLEY SANITARY LANDF (Continued) **S108992017**

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Perchlorate
Site History: Site Description, Operational History, and Contaminants of Concern: The Mid-Valley Sanitary Landfill (MVSL) is a municipal solid waste disposal facility that has been operated by the County since 1958. The MVSL is in the City of Rialto approximately 6.5 miles to the northwest of the City of Colton. Landfilling of waste has been conducted in phases, with each phase consisting of waste being applied on a different portion of the property. Early phases of the landfill (Units 1 and 2) were constructed on native soil without a clay or synthetic liner, or a leachate collection system. The most recent phase of the landfill (Unit 3) began operation in 2002. This phase has, and all future phases (Units 4 and 5) will have, a double composite liner and a leachate collection and removal system. The Site overlies the Rialto Colton Basin (RBC) and consists of about 497 acres, of which about 222 acres are used for waste disposal activities. Results of historical site investigations and monitoring program indicated that perchlorate, and a variety of volatile organic compounds (VOCs) including trichloroethene (TCE), have impacted groundwater beneath the Site. Perchlorate was first detected within the Rialto-Colton Groundwater Basin in 1997 during the routine monitoring of groundwater around the footprint of MVSL. In 2001, the concentration of perchlorate in one of groundwater monitoring wells increased significantly, to 250 microgram per liter (a%g/L). Municipal water supply wells in the RCB have been affected by the perchlorate pollution in this basin. Consequently, the County installed the groundwater treatment system (GWTS) pursuant to the two cleanup abatement orders (ORDERs) Nos. R8-2003-0013 and R8-2004-0072 to contain and treat perchlorate and VOC impacts that originate on properties near the Countys MVSL . Hydrogeology and Hydrostratigraphy The RCB is an elongate, northwest trending alluvial basin positioned in the upper Santa Ana River drainage area. The basin is approximately 13 miles long and varies from about 3.0 miles wide in the northwest to about 1.5 miles wide near its southeasterly terminus at the Santa Ana River. Groundwater flow in the RCB is controlled by several faults with the San Jacinto and Rialto-Colton faults respectively forming the eastern and western boundaries of the basin. Groundwater in the RCB occurs within alluvial gravels, sands, silts, and clays at depths ranging from more than 400 feet below ground surface (bgs) within the center of the basin to less than 100 bgs closer to the mountain front. The USGS estimates that alluvial aquifers in the RCB extend to depths of up to approximately 1,000 feet in some parts of the basin. According to the data provided, perchlorate and VOC impacts to groundwater near the MVSL property indicate that groundwater in the northern RCB has occurred within three laterally continuous aquifers. The Upper Aquifer (also known as the A Aquifer) is currently dry near the Western Plume owing to long-term drought conditions in the region. The Intermediate Aquifer (the B Aquifer) is perched on a laterally continuous aquitard (the BC Aquitard) that separates the Intermediate Aquifer from the deeper Regional Aquifer (i.e., the C Aquifer). The saturated section of the Intermediate Aquifer is now only about 75 feet thick in the northern portion of the Western Plume. The BC-Aquitard results in a current downward hydraulic gradient of about 100 feet between the Intermediate and Regional Aquifers. The main objective of the Operation Maintenance and Monitoring Plan (OMMP) (GLA-2016 is to

RIALTO PERCHLORATE INVESTIGATION - MID-VALLEY SANITARY LANDF (Continued) **S108992017**

assure the proper functioning and effectiveness GWTS that was installed by the County at City of Rialto Extraction Well No. 3. The OMMP includes simulations of 5- and 10-year modeling look ahead periods to evaluate how the plume may behave under a variety of possible pumping stresses and groundwater elevations within the basin. Based on the data provided in OMMP, perchlorate and VOC impacts to groundwater in the northern RCB originate from two separate source areas. 1) The Western Plume originates from the planned MVSL Unit 5 expansion area and the adjacent Stonehurst property; and 2) The Eastern Plume originates from the 160-acre site parcel that is located northeast of the MVSL. A low-concentration trough of impacts has historically separated the Western Plume from the Eastern Plume. In summary and based on the historical site investigation, monitoring program, GWTS, and groundwater modeling, GLA concluded that the migration of the Western Plumes (Perchlorate and VOCs) is predictable and consistent with the Countys established hydro-geologic model. Currently, the Site is under supplementary site investigations, long term groundwater and remedial performance monitoring program.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

APN 023919223
NOT REPORTED
RIALTO, CA 92377

TARGET PROPERTY COORDINATES

Latitude (North):	34.150497 - 34ˆ 9’ 1.79’’
Longitude (West):	117.415225 - 117ˆ 24’ 54.81’’
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	461721.6
UTM Y (Meters):	3778726.0
Elevation:	1629 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015961 DEVORE, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

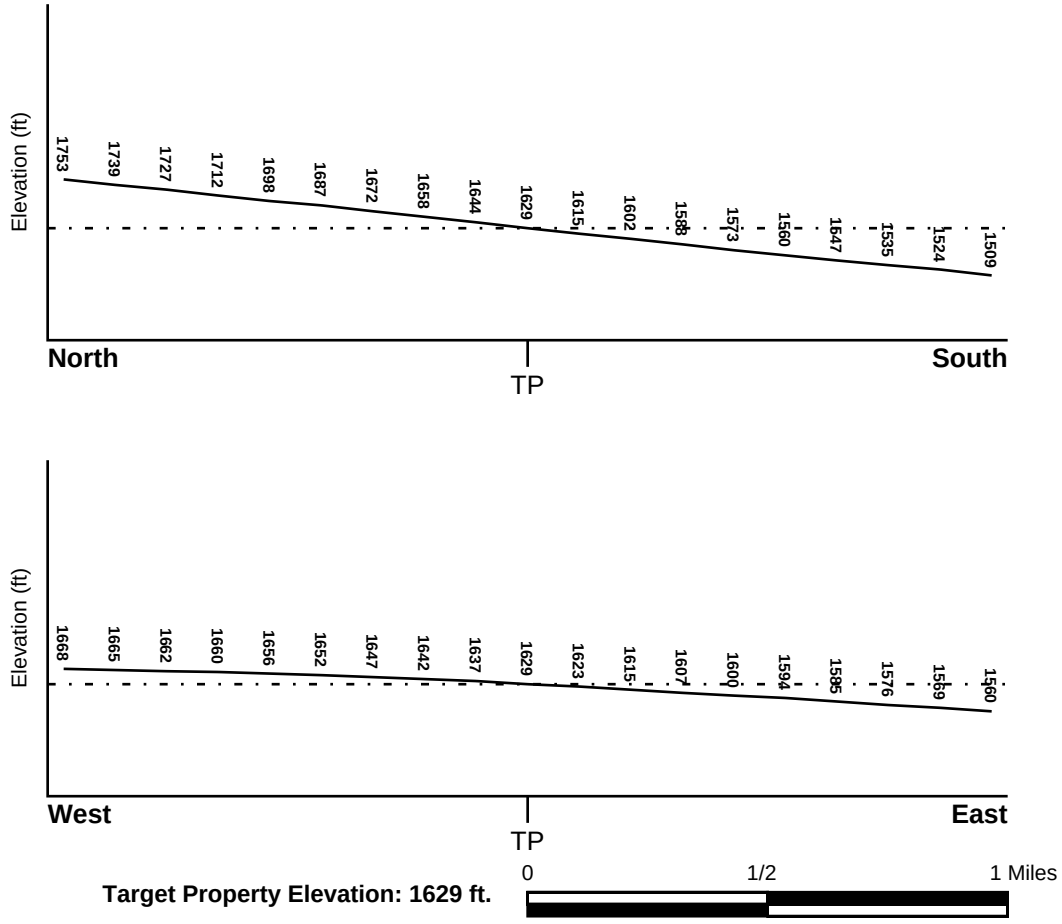

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1629 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SW
Site Name:	FONTANA SAN LDFL
Site EPA ID Number:	CAT080029630
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	approximately 350 feet.
Hydraulic Connection:	The unsaturated zone consists of clayey sands and gravels.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Soboba

Soil Surface Texture: very stony loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	very stony loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 141	Max: 7.8 Min: 6.6
2	9 inches	59 inches	very stony sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 141	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: A review of the NPL list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

APN 023919223
NOT REPORTED
RIALTO, CA 92377

TARGET PROPERTY COORDINATES

Latitude (North):	34.150497 - 34ˆ 9’ 1.79’’
Longitude (West):	117.415225 - 117ˆ 24’ 54.81’’
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	461721.6
UTM Y (Meters):	3778726.0
Elevation:	1629 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015961 DEVORE, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

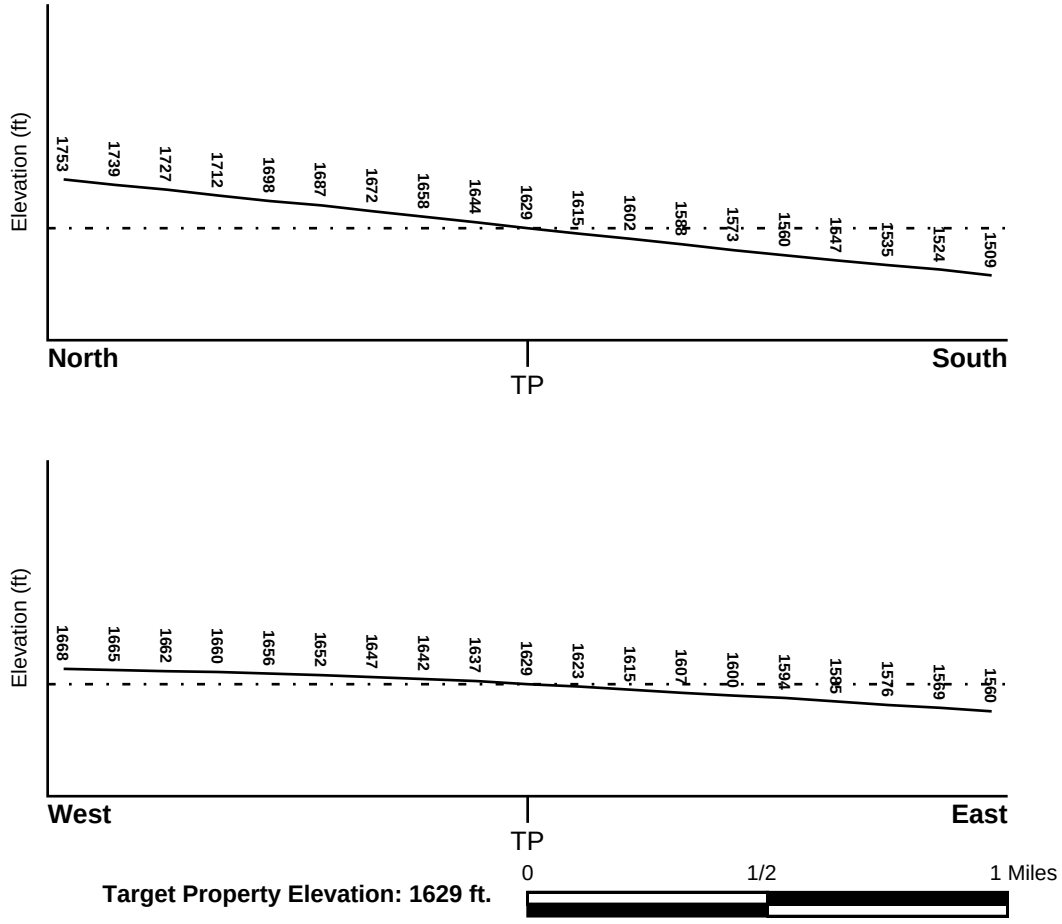

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1629 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C7920H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
Not Reported	

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SW
Site Name:	FONTANA SAN LDFL
Site EPA ID Number:	CAT080029630
Groundwater Flow Direction:	Southeast
Measured Depth to Water:	approximately 350 feet.
Hydraulic Connection:	The unsaturated zone consists of clayey sands and gravels.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

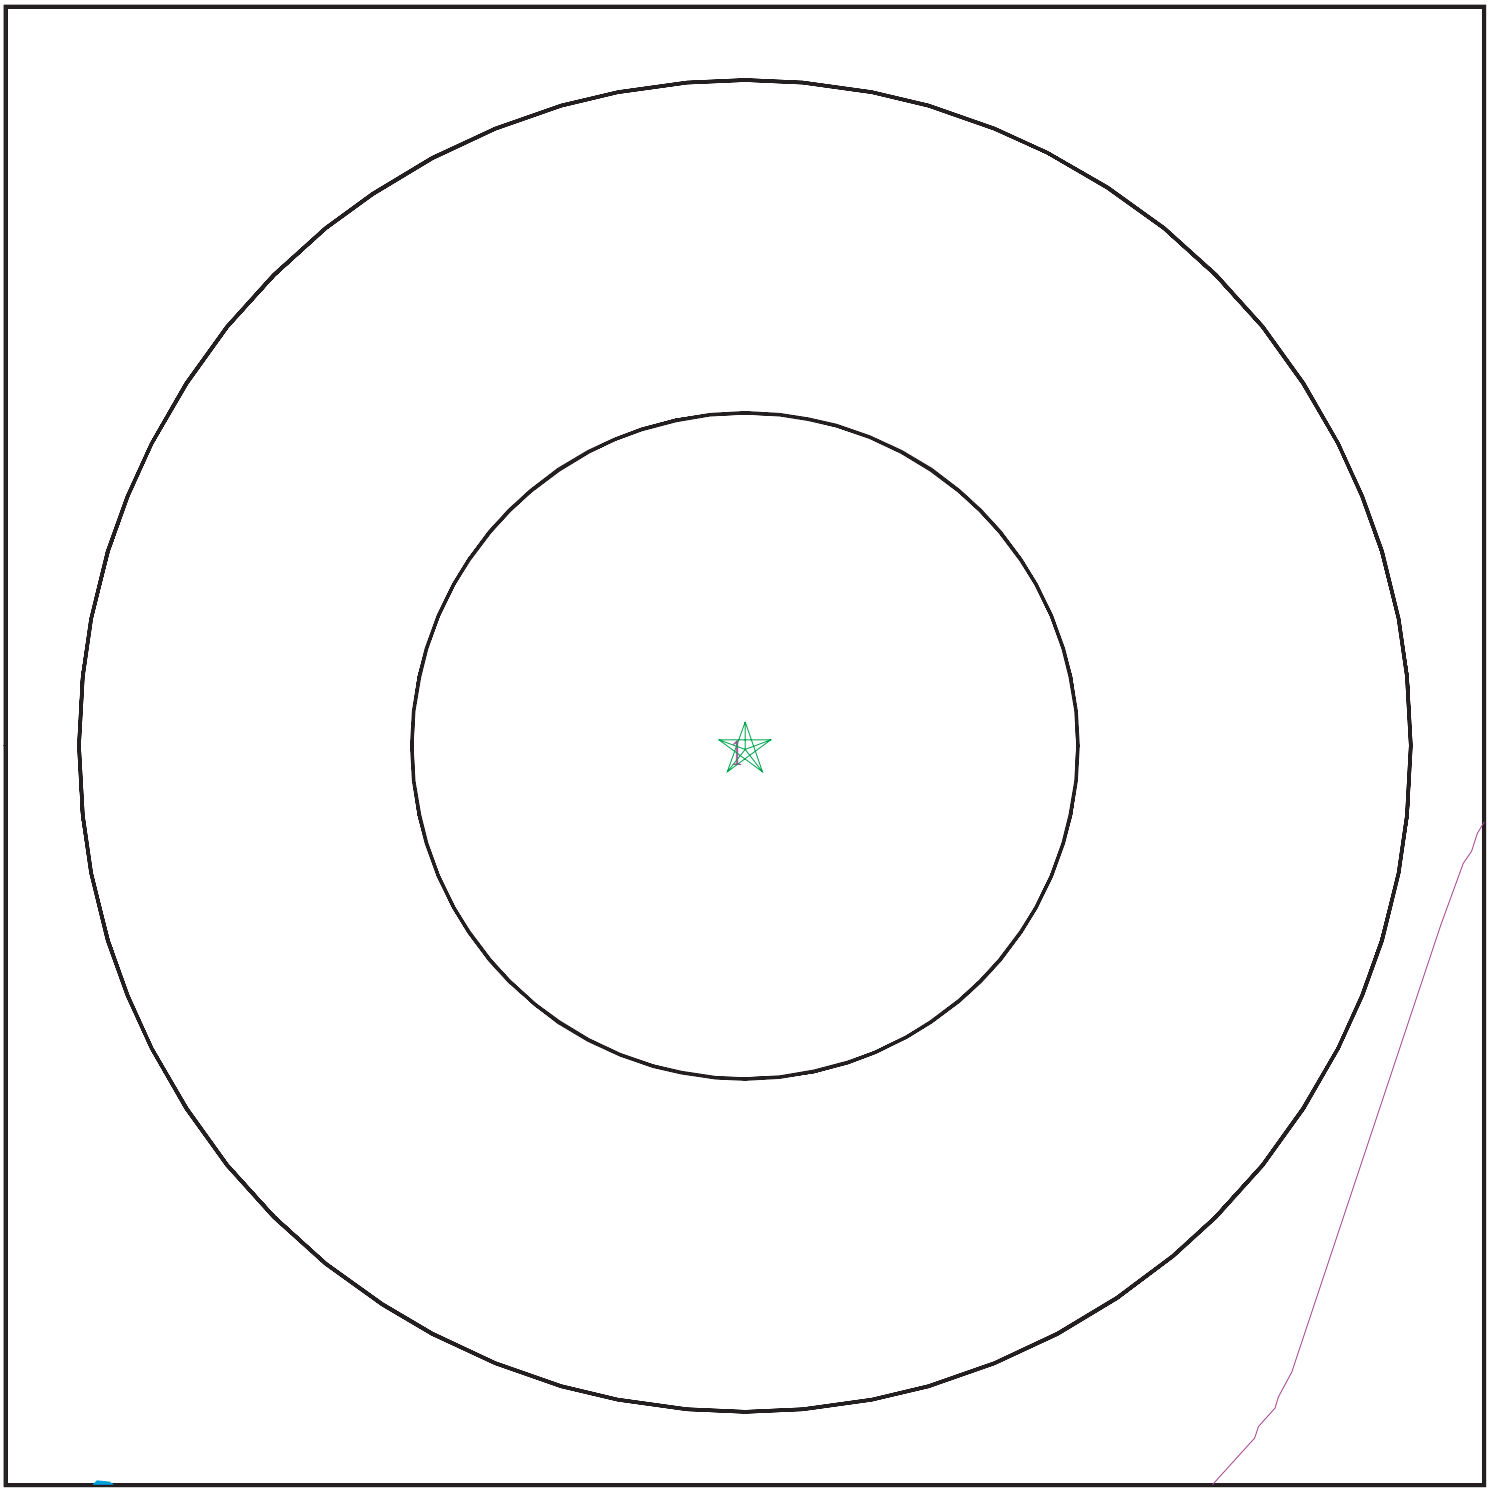

Era:	Cenozoic
System:	Quaternary

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Soboba

Soil Surface Texture: very stony loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	very stony loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 141	Max: 7.8 Min: 6.6
2	9 inches	59 inches	very stony sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 141	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Part 1: The Declaration

1.1 Site Name and Location

The Rockets, Fireworks, and Flares Superfund Site (RFF Site, or Site) is located in San Bernardino County, California. The Site was formerly known as the B.F. Goodrich site. See Figure 1 for the Site location. The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) ID for the Site is CAN000905945.

1.2 Statement of Basis and Purpose

This decision document presents the selected remedy for the Mid-Basin Operable Unit (MBOU or OU2) of the RFF Site. The selected remedy was chosen in accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, and, to the extent practicable, the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This decision is based on the Administrative Record for the Site. The State of California was consulted on the proposed remedy in accordance with CERCLA Section 121 (f) (42 U.S. Code [U.S.C.] Section [§] 9621 (f)) and concurs with the selected remedy.

1.3 Assessment of Site

The response action selected in this Record of Decision (ROD) is necessary to protect the public health or welfare or the environment from actual or threatened releases of hazardous substances into the environment, and/or from pollutants or contaminants from this Site which may present an imminent and substantial endangerment to public health or welfare.

1.4 Description of Selected Remedy

U.S. Environmental Protection Agency's (EPA's) selected remedy for the MBOU is a groundwater extraction and treatment system intended to protect human health by preventing exposure to groundwater affected by Site contaminants, protect drinking water supply wells threatened by Site-related contamination, and protect and restore the groundwater resource. The selected remedy is the second of two remedies which address contaminated groundwater at the Site. EPA's first groundwater remedy, known as the Source Area Operable Unit (SAOU), addresses the most contaminated groundwater at the Site; this second remedy addresses contaminated groundwater that has moved past (i.e., downgradient of) the area targeted by EPA's SAOU. EPA is also evaluating the feasibility of cleaning up contaminated soil at the 160-acre source area at the Site.

The remedy for the MBOU includes the following remedy components:

- Groundwater extraction wells to pump contaminated water to the surface in two areas: the "leading edge" of contamination where Site-related perchlorate concentrations remain above drinking water standards; and a mid-plume area where contaminant concentrations are higher. The preliminary estimate of the average extraction rate needed in the leading-edge area is 2,400 gallons per minute (gpm). Extraction in the mid-basin area will vary over time from zero up to about 2,000 gpm.

- Water treatment systems to remove perchlorate, the most prevalent Site contaminant, from the extracted groundwater to levels below the California drinking water standard. A biological treatment process and/or ion exchange technology will be used to remove perchlorate from the groundwater. The need for water treatment systems to remove other constituents will be determined during remedial design.
- Pipelines and pumps to convey the contaminated water from the groundwater extraction wells to the treatment plant, and from the treatment plant to one or more end use locations. After treatment, the water will be delivered to one or more local drinking water utilities which will distribute the water to their customers, and to existing groundwater recharge basins and/or groundwater injection wells where the treated water will be returned to the Rialto-Colton Groundwater Basin (RCB).
- A groundwater monitoring program to provide data to determine if the remedy is achieving its objectives, including hydraulic control of contamination in the leading-edge area and progress in reducing concentrations of Site-related contamination throughout the MBOU.

The remedy will require new construction and is expected to make use of existing wells, water treatment systems, and pipelines. Decisions about the exact location of any new groundwater wells, the water treatment location, and pipeline locations will be made during the design phase of the project.

The total present worth cost for the Selected Remedy is estimated at $31.0 to $37.2 million.

1.5 Statutory Determinations

The Selected Remedy is protective of human health and the environment, complies with Federal and State requirements that are applicable or relevant and appropriate to the remedial action, is cost-effective, and utilizes permanent solutions and alternative treatment (or resource recovery) technologies to the maximum extent practicable.

This remedy also satisfies the statutory preference for treatment as a principal element of the remedy (i.e., reduces the toxicity, mobility, or volume of hazardous substances, pollutants, or contaminants as a principal element through treatment).

Because this remedy will take more than 5 years to complete and will result in hazardous substances, pollutants, or contaminants remaining onsite above levels that allow for unlimited use and unrestricted exposure during the time cleanup is ongoing, a policy review will be conducted within 5 years after construction is complete to ensure that the remedy is protective of human health and the environment.

1.6 ROD Data Certification Checklist

The following information is included in the Decision Summary section of this ROD. Additional information can be found in the Administrative Record for this Site.

- Chemicals of concern (COCs) and their respective concentrations (Section 2.6.1 and Table 3)
- Baseline risk represented by the COCs (Section 2.6)
- Cleanup levels established for COCs and the basis for these levels (Table 11)

- Current and potential future beneficial uses of groundwater used in the baseline risk assessment and ROD (Section 2.5)
- Potential groundwater use that will be available at the Site as a result of the selected remedy (Section 2.11.2)
- Estimated capital, annual operation and maintenance (O&M), and total present value costs, discount rate, and the number of years over which the remedy cost estimates are projected (Section 2.11.3)
- Key factors that led to selecting the remedy (Section 2.11.1)

1.7 Authorizing Signature

This ROD documents the remedy for contaminated groundwater at the MBOU of the RFF Site. The Director of the Regional Superfund Division has been delegated the authority to approve and sign this ROD. The State of California concurs with the selected remedy.

Michael M. Montgomery, Director
Superfund and Emergency Management Division
U.S. Environmental Protection Agency Pacific Southwest Region

Date

Part 2: Decision Summary

2.1 Site Name, Location, and Brief Description

The RFF Site is located in San Bernardino County, California (CA).

See Figure 1 for the Site location and Figure 2 for an aerial photo of a portion of western San Bernardino County which includes the Site (looking to the northwest toward the San Gabriel and San Bernardino Mountains).

EPA's CERCLIS ID for the Site is: CAN000905945.

EPA is the lead agency for the Site. The California Department of Toxic Substances Control (DTSC) is the primary State agency supporting EPA's efforts. EPA has also worked cooperatively with a second State agency, the California Regional Water Quality Control Board, Santa Ana Region (Water Board).

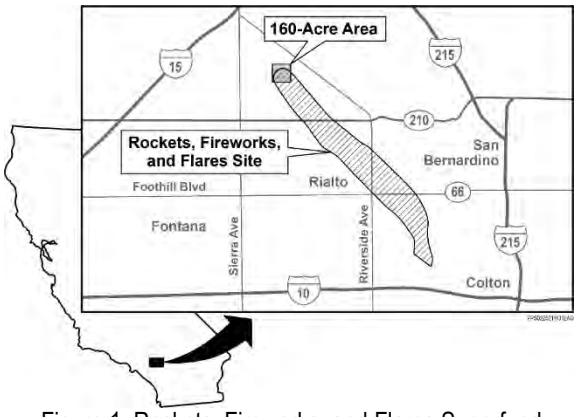

Figure 1. Rockets, Fireworks, and Flares Superfund Site Location

Currently, cleanup work at the Site is financed by Potentially Responsible Parties (PRPs). Section 2.2, Site History and Enforcement Activities, provides additional detail on the source of cleanup monies.

The Site includes contaminated soil and groundwater in an industrial area in Rialto, California known as the "160-acre area" and contaminated groundwater that has spread to the south and east into the cities of Colton and San Bernardino. The 160-acre area is where most or all of the Site contaminants appear to have entered the groundwater and where testing has identified the highest levels of groundwater contamination.

Figure 2. Aerial Photo of the Rialto-Colton Area (looking northwest)

2.2 Site History and Enforcement Activities

The following sections provide a Site history and summarize enforcement activities and community participation activities at the Site.

2.2.1 Site Activities that Contributed to the Contamination

The 160-acre area is part of a larger area developed by the U.S. Army in the 1940s as an inspection, consolidation, and storage facility for ammunition and other ordnance in transit to the Port of Los Angeles. The facility, known as the Rialto Ammunition Backup Storage Point (RASP), included a network of rail spurs to store rail cars, bunkers adjacent to the rail spurs, concrete storage igloos, and magazines used to store ammunition.

The U.S. Army ceased operations at the RASP in about 1946. Since then, the 160-acre area has been used by a variety of defense contractors, fireworks manufacturers, and others who used perchlorate salts and other chemicals in their manufacturing activities or products.

From about 1952 to 1957, West Coast Loading Corporation manufactured photoflash flares and ground-burst simulators, both containing potassium perchlorate, disposed of wastes onsite, and used its facility in 1957 to dry ammonium perchlorate.

From about 1957 to 1962, B.F. Goodrich Corporation (Goodrich Corporation) developed, tested, and produced solid-fuel rocket propellant and solid-fuel missile and rocket motors containing ammonium perchlorate, used chlorinated solvents in its operations, and disposed of wastes in one or more onsite pits.

From about 1968 to 1987, Pyrotronics manufactured, tested, and distributed pyrotechnics containing potassium perchlorate, and disposed of wastes onsite.

Since 1979, Pyro Spectaculars Inc. (PSI), a public display fireworks operator, wholesaler, and importer and exporter of fireworks, has operated on the 160-acre area. PSI tested fireworks, burned waste materials, and disposed of wastes onsite. Since about 1989, American Promotional Events–West (APE-West) has operated on the 160-acre area. APE-West tested and stored fireworks containing potassium perchlorate and burned defective and off-spec fireworks onsite.

2.2.2 Site Investigations and Enforcement Activities

The Water Board led investigation and cleanup efforts at the Site from 2002 until about 2008. They issued approximately 23 directives to current and past property owners and tenants pursuant to State authority, requiring submittal of information, soil testing, and/or groundwater testing. The DTSC has also directed and overseen soil testing on a portion of the Site.

EPA directed and/or conducted investigation efforts at the Site beginning in about 2003, initially complementing State efforts and beginning in about 2009 as the lead agency. EPA added the Site to the Superfund National Priorities List (NPL) in September 2009. EPA efforts included oversight of soil sampling, soil gas sampling, and groundwater well installation and sampling conducted by the Goodrich Corporation in 2004, oversight of soil and soil gas sampling by Emhart Industries (a corporate successor to West Coast Loading Corporation) in 2004, 2006, and 2007, and additional groundwater well installation and sampling conducted by the Goodrich Corporation between 2013 and 2022.

EPA enforcement efforts at the Site included issuance of a Unilateral Administrative Order for Remedial Investigation (RI) work (2003), notifications to PRPs of potential CERCLA liability (2008), negotiation of an Administrative Order on Consent for RI work (2009), assistance to the U.S. Department of Justice (DOJ) in the filing of a complaint on EPA's behalf pursuant to CERCLA and the Resource Conservation and Recovery Act (RCRA) seeking reimbursement of costs and performance of response actions (2010), issuance of "Special Notice" letters inviting

PRPs at the Site to participate in settlement negotiations with EPA, and negotiation of an Administrative Consent Order and six Consent Decrees to resolve the litigation (2012–2017). Two of the six Consent Decrees require the performance of cleanup work at the Site.

2.2.3 Community Participation

The June 2021 Remedial Investigation/Feasibility Study (RI/FS) Report and January 2022 Proposed Plan for the MBOU of the RFF Site were made available to the public on January 24, 2022. They can be found in the Administrative Record and the information repository maintained by EPA at the Region 9 Office in San Francisco and are available online via links available on the EPA Site webpage at www.epa.gov/superfund/rff. A notice of the availability of the Proposed Plan and more than 150 documents considered in developing the Plan was published in the San Bernardino Sun newspaper on January 24, 2022. EPA recorded and made available on YouTube a presentation describing its Proposed Plan in lieu of a public meeting due to the coronavirus disease 2019 (COVID-19) pandemic. On January 25, 2022, EPA sent postcards by regular mail to approximately 516 parties announcing the availability of the Proposed Plan, explaining how to view the plan and the YouTube presentation about the plan, and explaining when and how to submit comments on the plan.

EPA also sent copies of the Proposed Plan by email on January 24, 2022 to representatives of the cities of Rialto, Colton, and Riverside, and other State and local agencies. A public comment period was held from January 24, 2022 to February 23, 2022. EPA's responses to comments received during this period are included in the Responsiveness Summary, which is part of this ROD.

Previous efforts to inform and engage the community about EPA's cleanup work at the Site included interviews of local residents, business representatives, representatives of neighborhood watch groups, and government officials (2010), development of a Site Community Involvement Plan (2013), preparation of fact sheets, additional interviews to gauge community interest and better understand technical assistance needs of the community related to EPA cleanup efforts (2015), regular updates to State and local agency representatives through participation in meetings generally held quarterly, and regular updates to the Site webpage.

2.3 Scope and Role of Operable Unit

EPA has organized its work at the Site into three operable units (OUs). The term "operable unit" describes a separate action in the cleanup of a large or complicated Superfund site.

The three RFF OUs are:

- Operable Unit 1, known as the "Source Area Operable Unit" (SAOU or OU1)
- Operable Unit 2, known as the "Mid-Basin Operable Unit" (MBOU or OU2)
- Operable Unit 3, known as the "Soils Operable Unit" (OU3)

Figure 3 shows the approximate location of OU3 (the 160-acre area) and the two groundwater OUs (OUs 1 and 2).

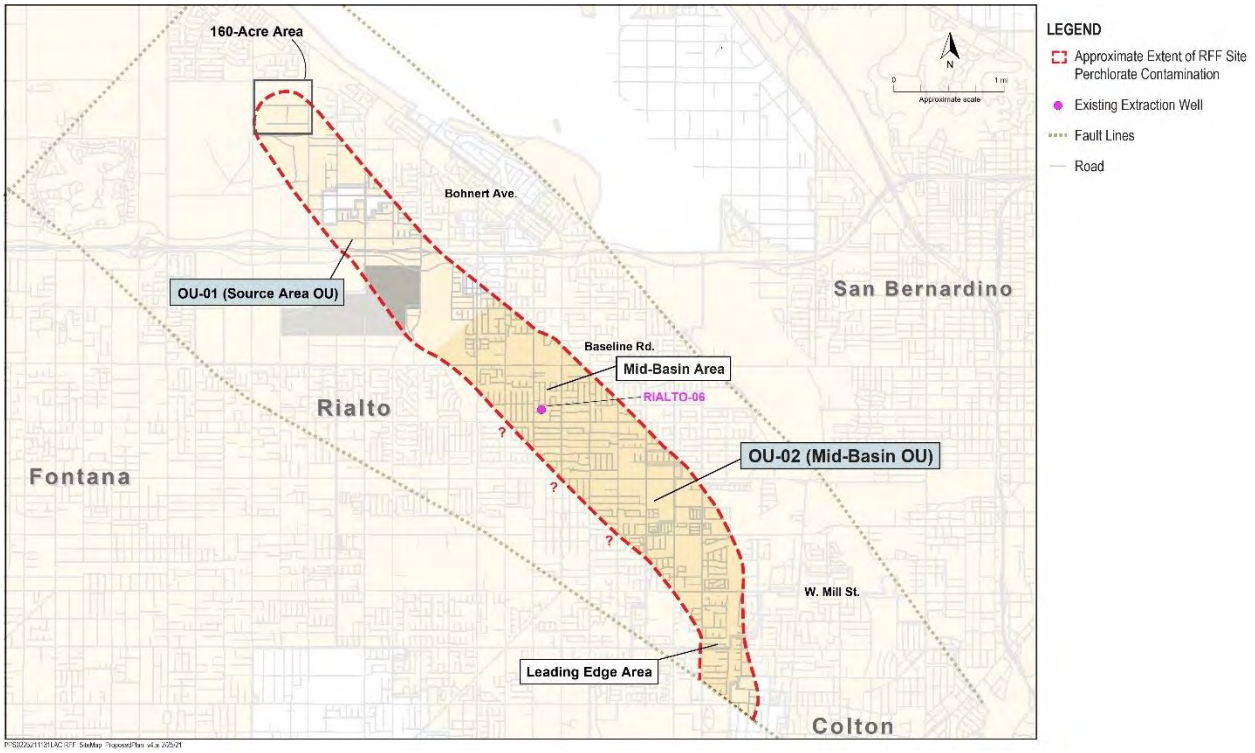

Figure 3. Rockets, Fireworks, and Flares Superfund Site Operable Units

EPA's OU1 (the SAOU) is the first of the two planned groundwater remedial actions at the Site. EPA selected a remedy for OU1 in 2010. The SAOU targets the most contaminated groundwater at the Site, which extends from the 160-acre area about 1.5 miles to the southeast and is intended to intercept and remove contaminated groundwater originating at and near the 160-acre source area. The cleanup facilities needed to implement EPA's 2010 plan have been constructed and are expected to begin operation in mid-2022. They include a new groundwater extraction well, expansion of an existing water treatment system, and other facilities needed to convey untreated and treated groundwater.

EPA's OU2 (the MBOU), the subject of this ROD, targets contaminated groundwater exceeding Federal or State drinking water standards (known as maximum contaminant levels or MCLs) which has moved past the area targeted by OU1. The groundwater contamination targeted for cleanup as part of OU2 is approximately 4 miles long, up to 1 mile wide, and ranges from about 250 to 800 feet below ground.

EPA's OU3 (the Soils OU) addresses contaminated soils at the 160-acre area. EPA will determine the need for cleanup at OU3 at a future date.

2.4 Site Characteristics

The following sections provide a conceptual site model, an overview of the Site, and a summary of groundwater resources, chemical contaminants, site sampling strategy, known or suspected sources of contamination, and the nature and extent of groundwater contamination targeted by this remedy.

2.4.1 Conceptual Site Model

The conceptual model for the Site (Figure 4) is that perchlorate and other COCs were released to the environment at multiple locations at the 160-acre area over a period of decades. Perchlorate release mechanisms are assumed to have included onsite disposal in one or more unlined pits, leakage or overflow from an onsite impoundment, airborne dispersion of material handled during manufacturing, disposal of contaminated rinse water onto unpaved areas, and at least one explosion. Releases probably began in the 1950s, and possibly earlier. Volatile organic compounds (VOCs) are assumed to have been released to the environment in multiple locations at the 160-acre area by onsite disposal in one or more unlined pits and/or other means.

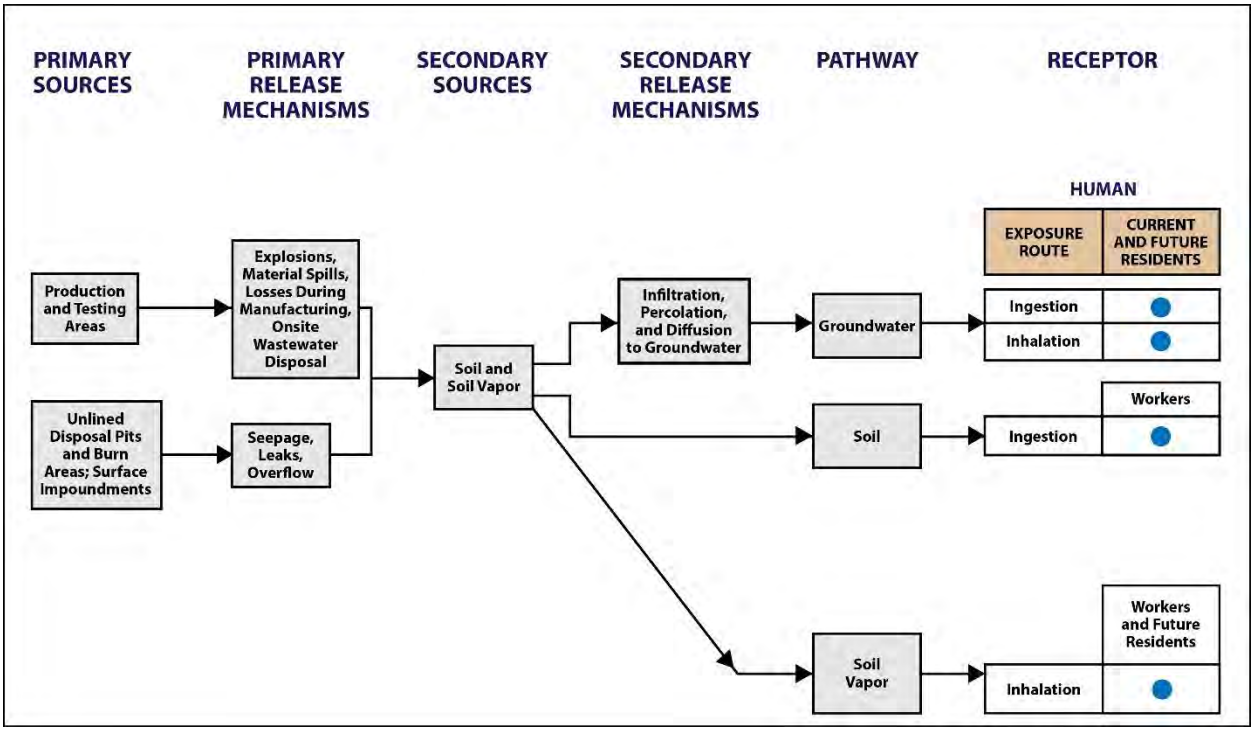

Figure 4. Conceptual Rockets, Fireworks, and Flares Superfund Site Model

The contaminants released to the environment contaminated surface soils, then moved downward to the groundwater through the several-hundred-foot-thick vadose zone. The downward movement of contaminants is the result of infiltration and percolation of rainfall and other liquids and (for VOCs) diffusion.

Above-average rainfall in the Rialto-Colton area during the winter of 2004–2005 resulted in a significant increase in groundwater levels later in 2005 and a one to two order-of-magnitude increase in groundwater contaminant concentrations in wells in the 160-acre area. Additional periods of above-average rainfall since 2004–2005 have also been followed by increases in contaminant concentrations in the groundwater. The increase in contaminant levels suggests that a significant amount of contaminant mass is still present in the vadose zone.

The contaminated groundwater poses a risk to human health if used for potable water supply. Large municipal water supply production wells are used to extract groundwater at and near the Site.

2.4.2 Site Overview

The RFF Site includes contaminated soil and groundwater in a 160-acre industrial area in Rialto, CA, and contaminated groundwater that has spread from the 160-acre area over a distance of about 6 miles to the south and east. The land surface at the Site gently slopes from an elevation of more than 1,600 feet above mean sea level (amsl) at the 160-acre area to less than 1,100 feet amsl at the leading-edge area of groundwater contamination. Most rainfall at the Site occurs from about November through April, with mean annual precipitation in the City of San Bernardino (located approximately 7 miles east of the Site) of approximately 16 inches. The average maximum summer temperature is 96 degrees Fahrenheit in July and August; the average winter minimum is 41 degrees Fahrenheit in December.

There are no perennial streams, rivers, or natural wetlands at the Site. The most prominent surface water feature at the Site is the Cactus Wash, which is a former stream channel that has been channelized and altered to accommodate development, provide flood control, and allow imported water to percolate into the ground to recharge the groundwater aquifer. Figure 5 shows the location of the Cactus Basins, part of the Cactus Wash.

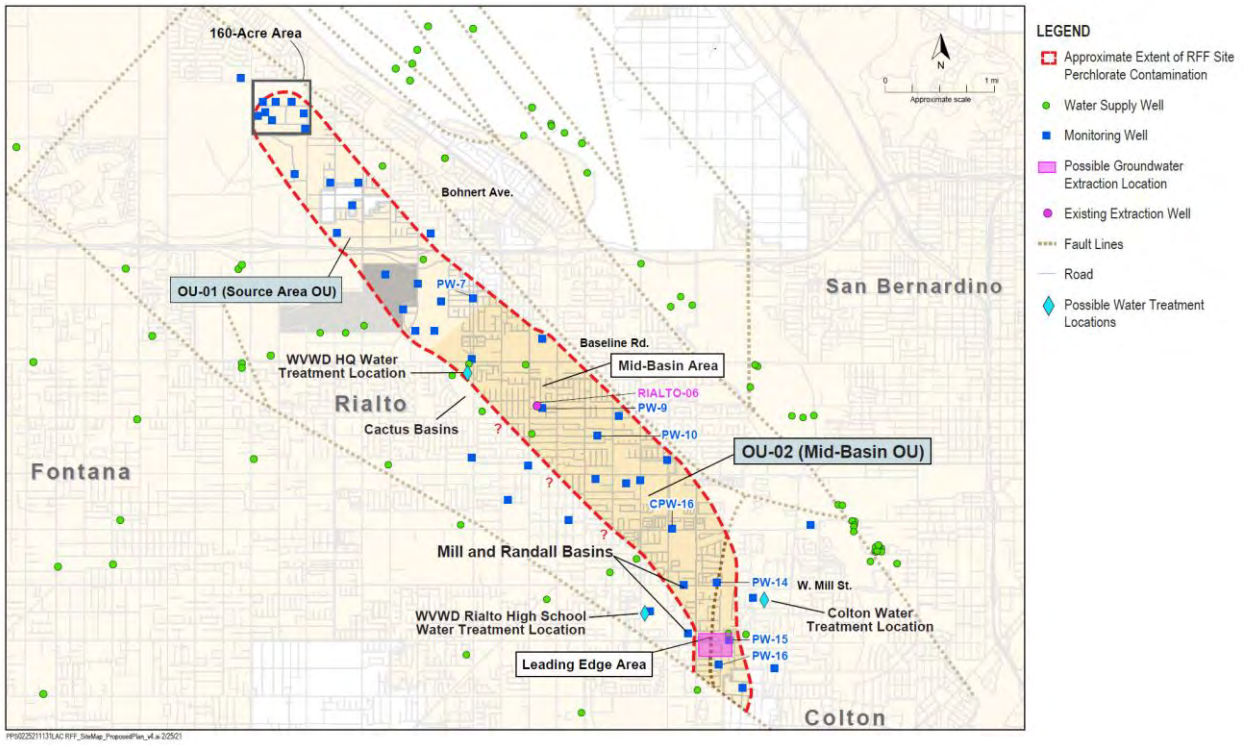

Figure 5. Rockets, Fireworks, and Flares Superfund Site Extent of Groundwater Contamination

2.4.3 Sampling Strategy

The RI at the Site began in the early 2000s and the RI for the MBOU began in about 2006. The RI has included soil and soil gas sampling at the 160-acre area, installation of groundwater monitoring wells, periodic water level monitoring, and the periodic collection and analysis of groundwater samples. These data have been used to monitor groundwater flow directions and hydraulic gradients and characterize and delineate the extent of groundwater contamination.

Sitewide, there are more than 175 wells, well zones, and piezometers. Many of the groundwater monitoring wells have more than one sampling zone to allow water level monitoring and the collection of water samples from multiple depths. Generally, a sample collected from the shallowest zone of a multilevel monitoring well is designated with the suffix "A" (e.g., PW-10A), the next deepest sample is labeled with the suffix "B" (e.g., PW-10B), and so on. Some of the wells with only one sampling zone were constructed in clusters of three or more wells to allow water level monitoring and sample collection from multiple depths at adjacent locations.

In the MBOU, in 2021, groundwater samples were collected and analyzed from 114 wells or well zones. Water levels were monitored in a similar number of wells. About 33 of the wells were in nine clusters of three or four wells. The other 81 well zones were in 16 wells with between five and seven zones per well. Wells have generally been monitored and sampled annually and groundwater samples analyzed for VOCs and perchlorate.

The Goodrich Corporation completed the majority of the sampling in 2006 and from 2013 to 2021. EPA conducted sampling between about 2008 and 2012.

Additional details about the groundwater sampling conducted for the MBOU are provided in the June 2021 Feasibility Study Report and multiple groundwater sampling reports and summary tables included in the Administrative Record. Table 1 lists the reports and data summaries.

Although they played a limited role in developing the MBOU remedy, the Administrative Record also includes groundwater reports for wells upgradient of the MBOU. The reports were prepared as part of the SAOU. Table 1 also lists the reports and data summaries prepared for the SAOU.

A limited number of groundwater samples have been analyzed for stable oxygen and chlorine isotopes to help distinguish between Site-related perchlorate and perchlorate likely to be naturally occurring or present from the past use of perchlorate-contaminated fertilizers. Nitrogen-rich fertilizers containing trace amounts of perchlorate were imported from the Atacama Desert in Chile in the early to mid-1900s and applied to high value crops like citrus once common in the mid-basin area. The reports and data summaries describing the stable oxygen and chlorine isotopic analyses are available in the Administrative Record and listed in Table 1.

2.4.4 Known or Suspected Sources of Contamination.

Groundwater testing at locations on or at the downgradient end of the 160-acre area (including the PW-2, PW-3, and PW-4 groundwater monitoring wells) indicates that there are multiple locations on the 160-acre area where COCs have reached the groundwater. Groundwater testing upgradient of the 160-acre area indicates that there are only minor sources of perchlorate and no sources of trichloroethene (TCE) or other VOCs immediately upgradient of the 160-acre area. Soil and soil gas testing have identified multiple locations where COCs have been spilled, dumped, or otherwise released at ground surface on the 160-acre area. Additional information on known and suspected sources of contamination is provided in documents listed in the Administrative Record for the SAOU ROD.

Employees of businesses that operated at the 160-acre area in the 1950s and 1960s have testified that perchlorate and cleaning solvents were used at the Site. The chemicals contaminated the soil and groundwater from disposal in unlined pits, leakage or overflow from a waste storage area, contaminated rinse water, and explosions.

2.4.5 Types of Contamination and Media Affected

The most prevalent contaminant at the Site is perchlorate. Perchlorate is an inorganic chemical used as an oxidizer in rocket propellant, flares, fireworks, and other products. Another contaminant, TCE, is also present at some locations. TCE is a VOC widely used as a cleaning solvent in the 1950s and 1960s. Other VOCs have been sporadically detected, generally at concentrations below State and Federal drinking water standards. Table 2 lists the COCs at the MBOU.

Table 2. Chemicals of Concern at the Mid-Basin Operable Unit

Chemical of Concern	Characteristics	Affected Media (MBOU)	2021 Concentration (MBOU)
Perchlorate	Inorganic	Groundwater	Up to 400 µg/L
TCE	VOC	Groundwater	Up to 11 µg/L
PCE	VOC	Groundwater	Up to 2.1 µg/L

Notes:
µg/L = microgram(s) per liter
PCE = tetrachloroethylene

Perchlorate, TCE, and PCE, when dumped or spilled, can persist in groundwater for decades.

The MBOU only addresses contaminated groundwater. Contaminants in soil on the 160-acre area will be addressed by OU3.

2.4.6 Nature and Extent of Contamination at the Site

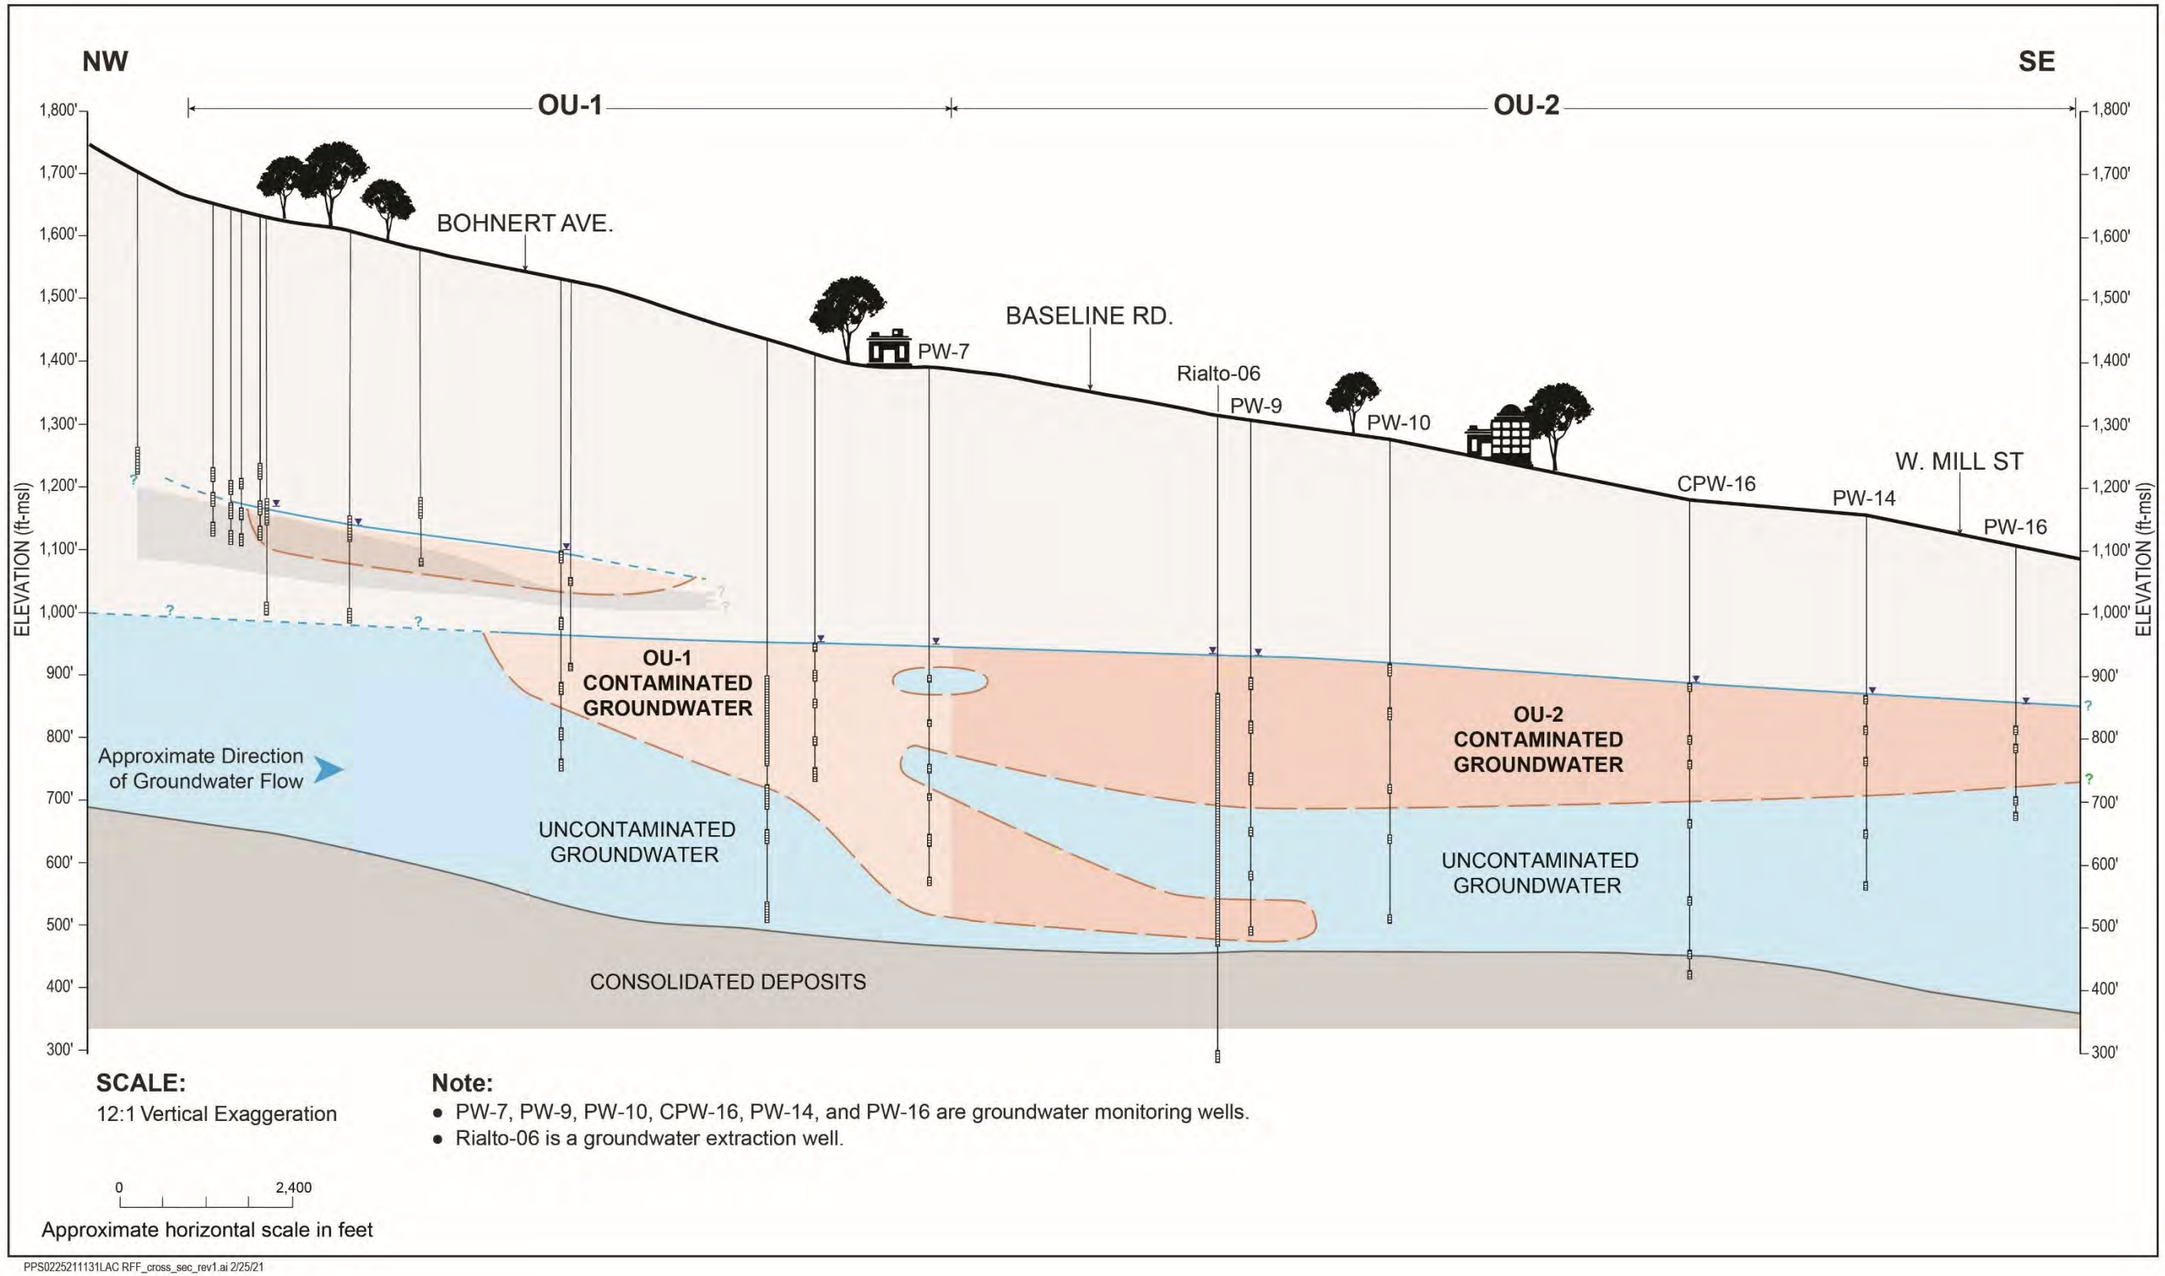

Sitewide

The Site addresses an area of contaminated groundwater more than 6 miles in length and up to 1 mile wide. The contaminants are dissolved in and move with the groundwater, generally from the northwest to the southeast. The affected groundwater is primarily in the RCB, and may extend into the Riverside-Arlington Basin (also known as the Riverside North Basin). Section 2.5 provides additional information on the groundwater.

Figures 5 and 6 show the approximate extent of Site-related contamination in excess of drinking water MCLs. Figure 7 shows well locations and the maximum perchlorate concentrations detected at each location in groundwater samples analyzed in the SAOU between January and March 2022. Figure 8 shows similar information for the MBOU in June and July 2021.

Sitewide, the highest perchlorate concentration detected in groundwater is 10,000 micrograms per liter (µg/L). This concentration, more than 1,500 times the California MCL of 6 µg/L, was detected at a groundwater monitoring well located on the 160-acre area in April 2006, after above-average rainfall in early 2005. The peak TCE concentration of 1,500 µg/L was also detected at a groundwater monitoring well located on the 160-acre area in July 2006. This concentration is 300 times the Federal and California MCL of 5 µg/L.

In 2021, the highest perchlorate and TCE concentrations measured at the Site were 400 µg/L and 50 µg/L respectively.

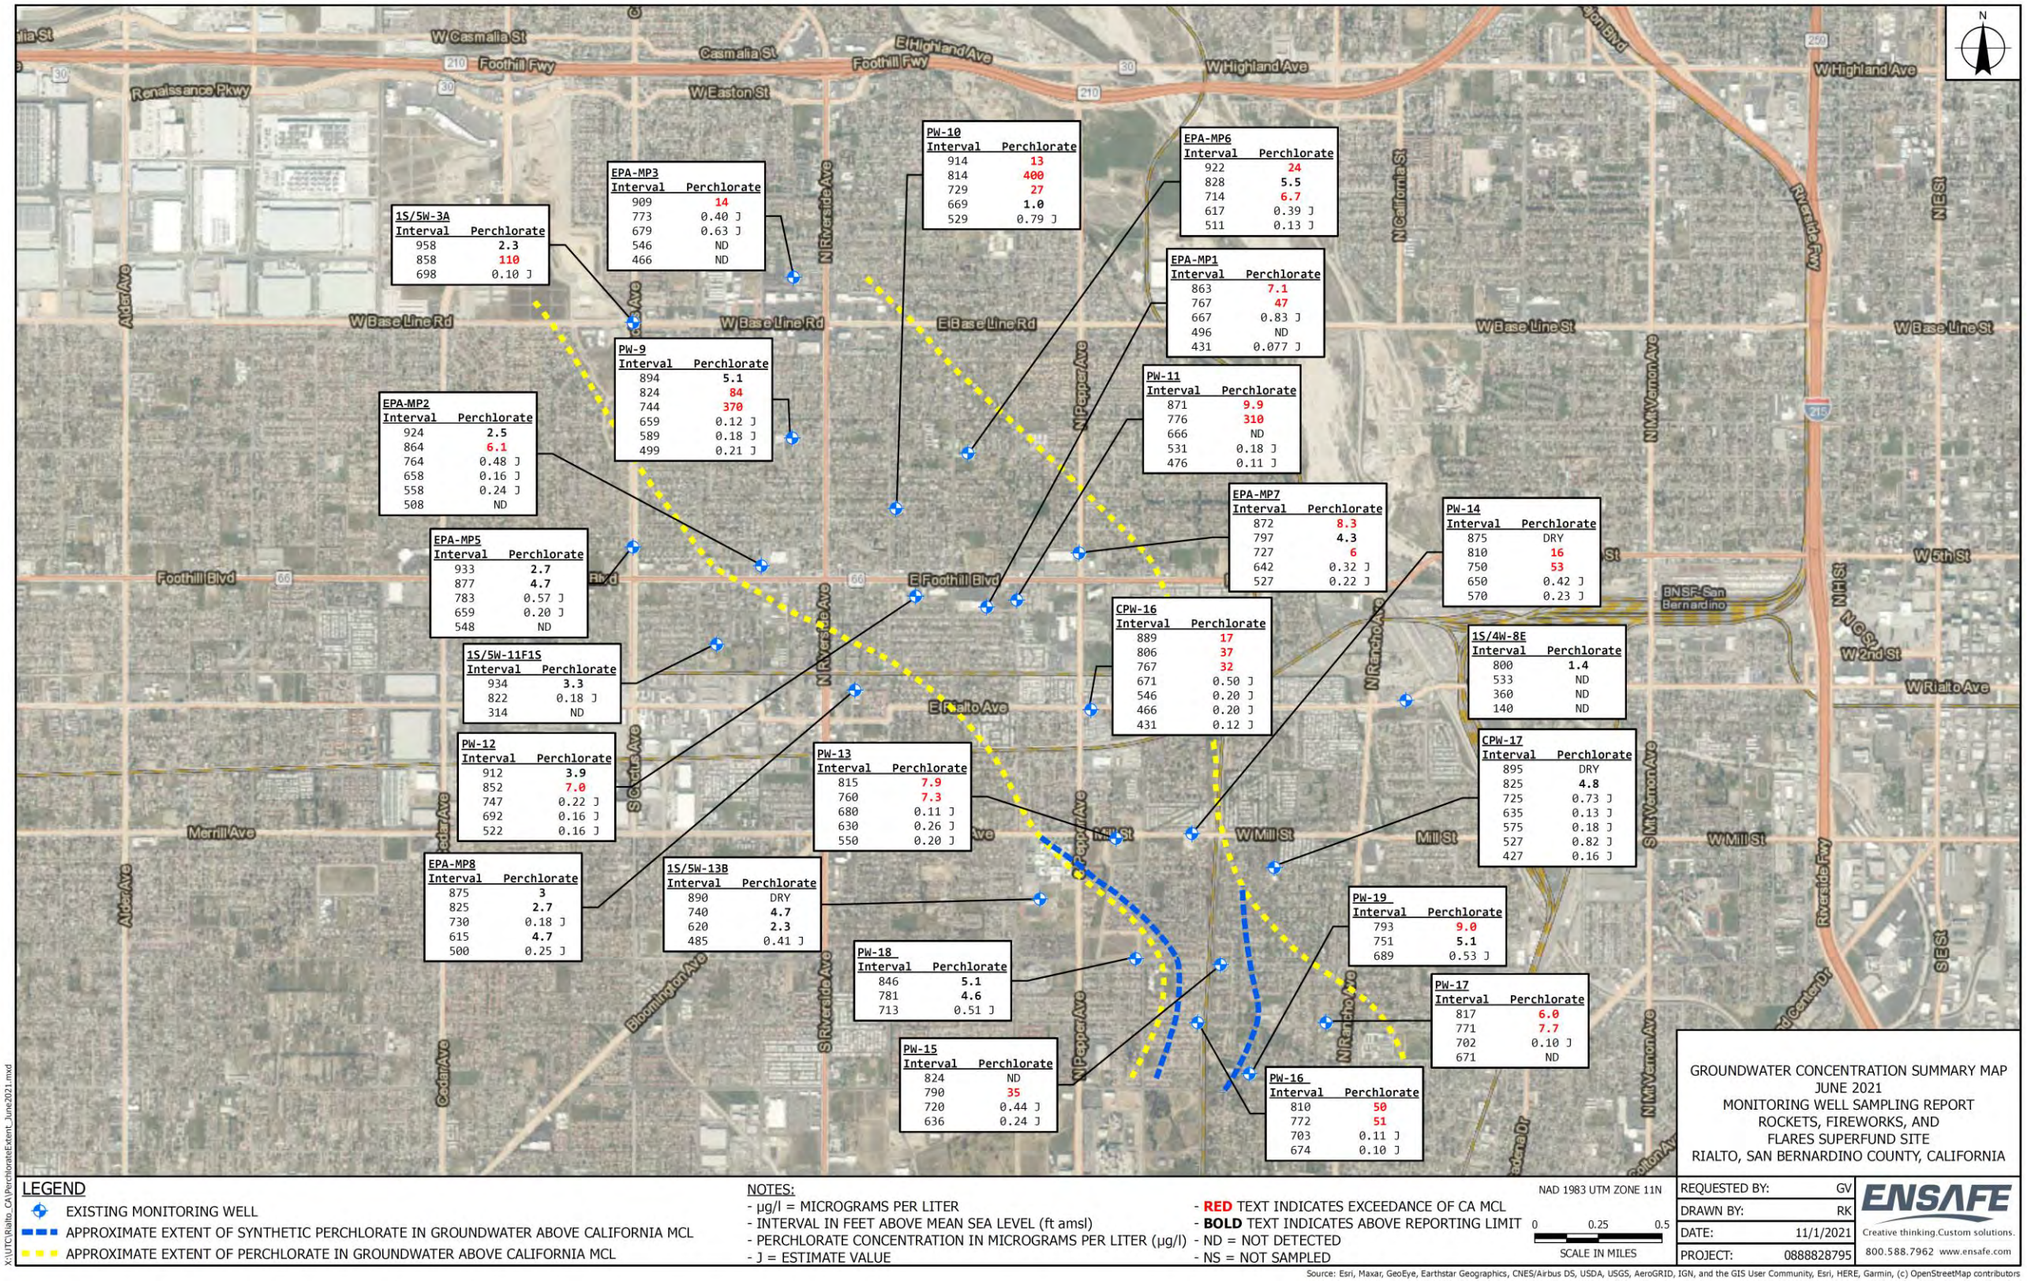

Figure 8. Rockets, Fireworks, and Flares Superfund Site MBOU Well Locations and Perchlorate Concentrations in June and July 2021

The Mid-Basin Operable Unit

Perchlorate appears to have arrived in the MBOU in the late 1990s. Figure 9 shows perchlorate concentrations at a City of Rialto-water supply well (well 06) which is located near the upgradient end of the MBOU, steadily increasing from about 2000 to 2008. Concentrations have since declined.

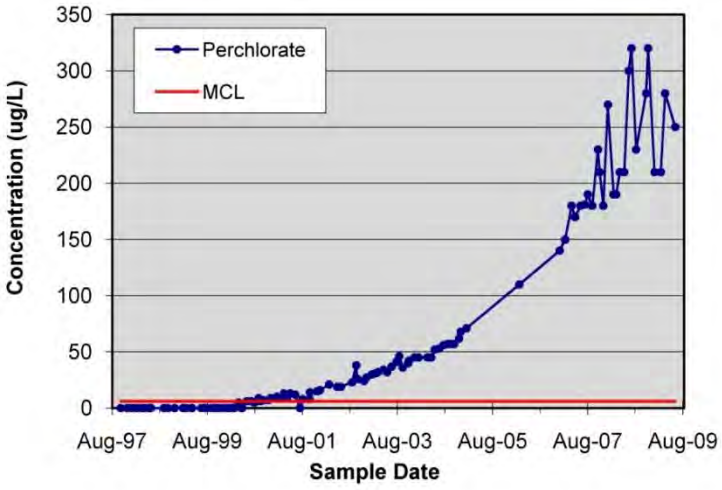

Figure 9. Rockets, Fireworks, and Flares Superfund Site Perchlorate Concentrations at the Rialto-06 Drinking Water Well

In the MBOU, in 2021, perchlorate concentrations ranged from 400 µg/L to the low tens of µg/L. Higher concentrations have generally been in the northwestern (upgradient) portion of the MBOU. The highest measured perchlorate concentration in the mid-basin area has been 781 µg/L (at well PW10 in 2013). Figure 5 shows well locations.

The highest concentrations of perchlorate have generally been measured along a 3-mile long northwest to southeast arc that includes wells PW9, PW10, PW11, CPW-16, PW-14, PW-15, and PW16. In 2021, the highest perchlorate concentrations at each of these seven wells were 370, 400, 310, 37, 53, 35, and 51 µg/L respectively.

The TCE concentrations at the seven wells have been much lower than the perchlorate concentrations. In 2021, they were 11, 7.2, 4.1, 0.9., 0.9, 0.5, and 0.5 µg/L respectively. The four measurements less than 1 µg/L are "J flagged," meaning the values are approximate.

In 2021, four VOCs other than TCE were detected above their Federal or State MCL. They were benzene, MTBE, 1,2-dichloroethane (1,2-DCA), and 1,2,3-trichloropropane. Benzene was detected in five wells or well zones at a maximum concentration of 31 µg/L; MTBE was detected in two well zones at a maximum concentration of 30 µg/L; 1,2-DCA was detected in 26 well zones at a maximum concentration of 9.3 µg/L; and 1,2,3-trichloropropane was detected in one well zone at a maximum concentration of 0.43 µg/L. Other VOCs were sporadically detected at concentrations below their Federal and State MCL.

At the upgradient end of the MBOU, contamination is present from about 900 feet amsl down to 500 feet amsl. At the leading edge of the MBOU, the contamination is present from about 860 feet amsl down to 720 feet amsl.

Some of the perchlorate present in groundwater at the Site appears to be the result of past use of nitrogen-rich fertilizers containing trace amounts of perchlorate. The perchlorate in the fertilizer is believed to have been carried by irrigation water into the subsurface, contaminating the groundwater. In addition, low levels of naturally occurring perchlorate may be present in groundwater. Analyses of stable oxygen and chlorine isotopes have been completed on

groundwater samples collected from several monitoring wells (e.g., PW-15, PW-16 and PW-19) to distinguish the origin of the perchlorate detected in the samples.

Test results from 2004 to 2021 are included in the Administrative Record.

Perchlorate has been found in several groundwater supply wells in the MBOU, including the Rialto-06 well and the Colton 17 well. Both wells were shut down after the contamination was discovered and later resumed operation after water treatment systems were installed.

2.4.7 Groundwater Modeling

EPA has relied on several different groundwater flow models to help evaluate the effectiveness of remedial alternatives at the Site. Two models were used to evaluate remedial alternatives for the MBOU: a numerical groundwater flow and contaminant transport model known as the "Joint Groundwater Model" and a simpler model which made use of analytical equations presented in the EPA guidance document entitled "A Systematic Approach for Evaluation of Capture Zones at Pump and Treat Systems," EPA 600/R 08/003, January 2008. The modeling is described in the June 2021 FS Report.

2.5 Current and Potential Future Site and Resource Uses

2.5.1 Groundwater

The groundwater at the Site is an important source of drinking water for the cities of Rialto, Colton, and Fontana. Most or all of the Site is located in the RCB. In recent years, the RCB supplied approximately 17,500 acre-feet of groundwater per year (more than 15 million gallons of water per day) through large municipal water supply wells which pump water from hundreds of feet below ground. That is enough water to meet the needs of tens of thousands of area residents. See Figure 5 for water supply well locations.

The RCB is an alluvial basin located south of the San Gabriel and San Bernardino Mountains, an east-west trending mountain range in southern California. The basin is approximately 10 miles long, 1.5 to 3.5 miles wide, and is bounded by geologic faults on its western, northern, and eastern sides.

The RCB is filled with unconsolidated alluvial material consisting of sand, gravel, and boulders interbedded with lenticular deposits of silt and clay. Alluvial sediments in much of the RCB are about 500 to 1,000 feet deep. The unconsolidated alluvium is underlain by partly consolidated and consolidated continental deposits. The basement complex consists of metamorphic and igneous rocks.

The unconsolidated alluvial material contains groundwater in multiple water-bearing layers. In 2020, at the 160-acre area, the depth to groundwater was more than 460 feet below ground surface (bgs). The shallowest aquifer, known as the Intermediate Aquifer, is unconfined, about 50 to 100 feet thick, and is underlain by a laterally extensive aquitard. The aquifer is comprised of multiple thin water-bearing units separated by thin aquitards and dry intervals. Below the laterally extensive aquitard is a deeper water-bearing layer known as the Regional Aquifer (also referred to as the middle and lower water-bearing units). It is generally unconfined to partly confined and is about 300 to 500 feet thick. Potentiometric heads have been as much as 150 feet higher in the Intermediate Aquifer than in the underlying Regional Aquifer, resulting in a strong downward hydraulic gradient between the two aquifers. About one to one and half miles to the

southeast of the 160-acre area, only the Regional Aquifer is present. The Intermediate Aquifer is not present at the MBOU.

Groundwater flow in the RCB is strongly influenced by the presence of geologic faults that restrict groundwater flow. Groundwater in the Intermediate Aquifer generally flows to the southeast, parallel to two major faults, at a speed of up to several feet per day. Groundwater in the Regional Aquifer generally flows to the southeast at an average rate of about one to two feet per day. Near the leading edge of the MBOU contamination, groundwater flow direction shifts from northwest-southeast to north-south. Groundwater elevations and flow rates in the RCB vary both seasonally and year to year. The primary cause of the variability is year-to-year changes in precipitation and associated recharge. Seasonal and year-to-year variability in groundwater pumping also affects water levels and groundwater flow directions.

Historical water level measurements from water supply wells screened in the Regional Aquifer indicate that water levels have varied by over 100 feet during the period of record (1962-present). From 2001 to 2021, drought and increased groundwater production caused groundwater levels to drop about 70 feet.

The primary source of water to the RCB is subsurface inflow from adjacent groundwater basins. Most groundwater leaves the RCB via municipal drinking water supply wells or as subsurface flow into adjacent groundwater basins.

2.5.2 Groundwater Rights

Four water utilities are responsible for most of the groundwater pumping in the RCB: the City of Rialto, WVWD, the City of Colton, and Fontana Water Company. A 1961 Decree entered in San Bernardino County Superior Court restricts pumping of groundwater from the RCB (*The Lytle Creek Water & Improvement Company vs. Fontana Ranchos Water Company, et al., Action 81264*). The Decree allows unlimited pumping from the basin by parties to the Decree if the average of the spring-high water levels at three wells specified in the Decree ("index wells") exceeds 1,002.3 feet amsl. When the level is between 969.7 and 1,002.3 feet amsl, a party's entitlement is limited to quantities specified in the Decree. If the average spring-high water level drops below 969.7 feet amsl, as it has since 2008, the entitlement is reduced by 1% for every foot the average is below 969.7 feet amsl, but not by more than 50%. Restrictions are recalculated annually by the San Bernardino Valley Municipal Water District.

Designated existing or potential beneficial uses for the RCB in the 2008 State of California Water Quality Control Plan are municipal and domestic supply, agricultural supply, industrial service supply, and industrial process supply.

Because the selected remedy only addresses groundwater, current and reasonably anticipated future land uses have limited relevance to the selected remedy. The primary relevance is in the selection of locations for facilities constructed as part of the remedy. These decisions will be made post-ROD, during the remedial design phase.

Land use at the Site is primarily residential, with some industrial and commercial uses and limited open space.

2.6 Summary of Site Risks

EPA is taking action at the MBOU because the groundwater at the Site is a current source of drinking water to tens of thousands of residents and businesses, the levels of contamination in

groundwater exceed drinking water standards, the calculated Site-specific Hazard Quotient value for perchlorate exceeds one, and contaminated groundwater continues to spread into uncontaminated and less contaminated portions of the groundwater aquifer.

EPA's decision to take action is supported by a baseline risk assessment, which estimates the risks posed by the Site if no action is taken. The baseline risk assessment, included in its entirety as Section 3 of the "Technical Memorandum, OU-2 ARARs, RAOs, and Baseline Risk Assessment, Rockets, Fireworks, and Flares Superfund Site Operable Unit 2," dated October 2015," identifies the contaminants and exposure pathways that need to be addressed by the remedial action. This section of the ROD summarizes the results of the baseline risk assessment for this Site.

No risks to wildlife or other ecological receptors have been identified or are expected.

2.6.1 Contaminant Identification

Perchlorate, TCE, and PCE were identified as COCs in groundwater in the MBOU based on the laboratory analysis of groundwater samples.

Table 3 presents the COCs and exposure point concentration (EPC) for each of the COCs in the groundwater. An EPC is a concentration used to estimate exposure and risk associated with each COC in the groundwater. For each of the three COCs, the table includes the range of concentrations detected, the frequency of detection (i.e., the number of times the chemical was detected compared to the number of sample results used in the risk assessment), the EPC, and the statistic used to calculate the EPC. The table indicates that perchlorate was the most frequently detected COC.

Statistics recommended by EPA's ProUCL Version 5.0 were used to calculate EPCs. The 95% Kaplan-Meier Chebyshev Upper Confidence Limit was used as the EPC for perchlorate; the 95% Approximate Gamma Kaplan-Meier Upper Confidence Limit was used as the EPC for TCE; and the 95% Kaplan-Meier (Percentile Bootstrap) Upper Confidence Limit was used as the EPC for PCE.

The groundwater sampling results used to calculate the EPCs were obtained and evaluated in accordance with procedures detailed in EPA-approved field and laboratory planning documents.

Table 3. Summary of Chemicals of Concern and Exposure Point Concentrations

Scenario Timeframe: Current or Future Resident
Medium: Groundwater
Exposure Medium: Groundwater

Exposure Point	Chemical of Concern	Minimum Conc. Detected (µg/L)	Maximum Conc. Detected (µg/L)	Frequency of Detection	EPC (µg/L)	Statistical Measure Used to Calculate the EPC
Groundwater	Perchlorate	0.62	476	51 of 106	49.9	95% KM Chebyshev UCL
	TCE	0.2	21.2	14 of 103	1.63	95% Approximate Gamma KM-UCL
	PCE	0.5	2.5	6 of 103	0.39	95% KM (Percentile Bootstrap) UCL

Exposure Assessment Notes:
EPC= Exposure Point Concentration

µg/L = micrograms per liter
KM = Kaplan-Meier
UCL= upper confidence limit

In the exposure assessment, EPA identifies possible exposure scenarios and pathways of concern based on the conceptual site model for the Site. The pathway of concern is exposure to contaminated groundwater by current and future residents who receive drinking water from groundwater wells at the Site. Exposure could occur through ingestion of perchlorate or VOCs present in the groundwater, or inhalation of VOCs during showering and other activities that enhance the movement of volatile chemicals from water to air.

Exposure through dermal contact is not expected to be a significant pathway for any of the COCs. Nor is the volatilization of contaminants in the aquifer and upward movement of the contaminants to the surface (i.e., vapor intrusion) expected to be a significant pathway, given the depth to groundwater (more than 200 feet).

In keeping with EPA guidance, the risk assessment assumes that Federal and State drinking water regulations that prohibit or limit the use of contaminated water are not enforced.

The exposure assessment is described in more detail in Section 3.3 of the October 2015 Technical Memorandum.

2.6.2 Toxicity Assessment

Tables 4 and 5 provide toxicity information indicating the potential for the three COCs to adversely affect exposed individuals. Two of the three COCs have toxicity data indicating their potential for adverse carcinogenic health effects in humans; all three have toxicity data indicating their potential for adverse noncarcinogenic health effects in humans.

Table 4. Cancer Toxicity Data Summary`

Pathways: Ingestion and Dermal			
Chemical of Concern	**Ingestion Slope Factor**	**Slope Factor Units**	**Source**
TCE	4.60 x 10-2	(mg/kg-day)-1	IRIS

PCE	chronic	4.00E-02	mg/m^3	Nervous system; ocular	IRIS

Key
IRIS: Integrated Risk Information System, EPA
OEHHA= California Office of Environmental Health Hazard Assessment

2.6.3 Risk Characterization

The risk characterization summarizes and combines outputs of the exposure and toxicity assessments to characterize baseline risks associated with exposure to contaminated groundwater.

For carcinogens, risks are generally expressed as the incremental probability that an individual could develop cancer over a lifetime as a result of exposure to the carcinogen. The risk estimates are probabilities often expressed in scientific notation (e.g., 1 x 10^{-6} or 10^{-6}). An excess lifetime cancer risk of $1x10^{-6}$ indicates that an individual experiencing the reasonable maximum exposure estimate has a 1 in 1,000,000 chance of developing cancer as a result of Site-related exposure. This is referred to as an excess lifetime cancer risk because it would be in addition to the risks individuals face from non-Site causes such as smoking or exposure to the sun. The chance that a typical individual would develop cancer from non-Site sources has been estimated to be as high as one in three. EPA's generally acceptable risk range for site-related exposures is 10^{-6} to 10^{-4}, with the 10^{-6} risk level used as the "point of departure."

Table 6 provides cancer risk estimates for TCE and PCE for each relevant exposure pathway, and the combined risk from TCE and PCE. The risk estimates were calculated using the online Risk Assessment Information System (RAIS) calculators available at https://rais.ornl.gov. These risk estimates are based on a reasonable maximum exposure and were developed by using conservative assumptions about the frequency and duration of a potential exposure to the

groundwater, as well as the toxicity of the COCs. The combined risk is equal to 1.2×10^{-5}, exceeding EPA's 1×10^{-6} "point of departure."

Table 6. Risk Characterization Summary—Carcinogens

Scenario Timeframe: Current
Receptor Population: Resident
Receptor Age: Child and Adult

Medium	Exposure Medium	Exposure Point	Chemical of Concern	Carcinogenic Risk			
				Ingestion	Inhalation	Dermal	Exposure Routes Total
Ground-Water	Ground-Water	Tap Water	Perchlorate	NA	NA	NA	NA
			TCE	2.99×10^{-6}	3.29×10^{-6}	4.90×10^{-7}	6.76 x 10-6
			PCE	2.72×10^{-6}	4.13×10^{-7}	1.61×10^{-6}	4.75 x 10-6
Total Risk =							**1.2 x 10-5**

Key
N/A: Route of exposure is not applicable to this medium.

The potential for noncarcinogenic effects was also evaluated by comparing the estimated exposure level over a specified time period with a reference dose (RfD) derived for a similar exposure period. An RfD represents a level that an individual may be exposed to that is not expected to cause any deleterious effect. The ratio of exposure to toxicity is called a hazard quotient (HQ). An HQ less than 1 indicates that a receptor's estimated dose of a single contaminant is less than the RfD, and that toxic noncarcinogenic effects from that chemical are unlikely. An HQ greater than 1 indicates that Site-related exposures may present a risk to human health.

Table 7 provides HQs for each route of exposure and the sum of hazard quotients for all routes of exposure. The risk estimates were calculated using the RAIS calculators. The Site-specific HQ for perchlorate exceeds 1, indicating potential health impacts from exposure to contaminated groundwater at the Site.

Table 7. Risk Characterization Summary—Non-Carcinogens

Scenario Timeframe: Current
Receptor Population: Resident
Receptor Age: Child and Adult

Medium	Exposure Medium	Exposure Point	Chemical of Concern	Primary Target Organ	Non-Carcinogenic Hazard Quotient			
					Ingestion	Inhalation	Dermal	Total
Ground-water	Groundwater	Tap Water	Perchlorate	Endocrine system (thyroid)	2.47	N/A	0.01	2.48
			TCE	Developmental; immune system	0.11	0.39	0.02	0.52
			PCE	Nervous system; ocular	0.002	0.005	0.001	0.008

Key
Hazard Quotient = CDI/RfD, where CDI = Chronic daily intake and RfD = Reference dose
Hazard Quotients included in table are age-weighted averages of child and adult hazard quotients

The response action selected in this ROD is necessary to protect the public health or welfare or the environment from actual or threatened releases of hazardous substances into the environment, and from actual or threatened releases of pollutants or contaminants from this Site which may present an imminent and substantial endangerment to public health or welfare.

2.6.4 Uncertainties

Key sources of uncertainty in the risk assessment include limitations in the human and animal studies used to calculate the toxicity values in Tables 4 and 5 and uncertainty about the current and future level of exposure to Site contaminants.

In accordance with EPA guidance for a baseline human health risk assessment, the risk assessment assumes that drinking water regulations that prohibit or limit the consumption of contaminated water are not enforced. This assumption is likely to lead to an overestimation of actual exposure and associated risks and hazards.

2.6.5 Summary of Ecological Risk Assessment

This action addresses risks to human health that could result from human consumption and use of contaminated groundwater. Because there is no known exposure pathway in which ecological receptors could be exposed to contaminated groundwater, no risks to wildlife or other ecological receptors are expected.

EPA will evaluate the potential for construction-related impacts on ecological receptors, if any, when preliminary locations are identified for the construction of any new groundwater wells, water treatment facilities, pipelines, and/or other components of the remedy.

2.7 Remedial Action Objectives

The Remedial Action Objectives (RAOs) for the MBOU of the RFF Site are to:

- prevent the spread of groundwater where Site-related contaminant concentrations exceed California or Federal drinking water standards to protect drinking water supply wells and groundwater resources threatened by the contamination;
- remove contaminants until the concentrations of Site-related contaminants in the groundwater aquifer are below California and Federal MCLs (i.e., “aquifer restoration”); and
- protect human health by preventing exposure to groundwater affected by Site contaminants.

As noted above, the groundwater at the Site is a current source of drinking water to tens of thousands of residents and businesses.

2.8 Description of Remedial Alternatives

EPA identified four cleanup options for the mid-basin area. The four options are labeled: Alternative 1, Alternative 2, Alternative 3, and a “no-action” option which EPA established as a baseline for comparison. The no-action option does not include active cleanup or monitoring.

2.8.1 Description of Remedy Components

The three “action” alternatives include the following components:

- **Extraction of Contaminated Groundwater.** Groundwater extraction would occur in two areas: i) an area about 6 miles from the 160-acre area where Site-related perchlorate concentrations remain above drinking water standards (the "leading edge" of contamination); and ii) an area about 3 miles from the 160-acre area between the SAOU and the leading edge of Site-related contamination (the "mid-plume" area). The remedial alternatives assume the use of the existing Rialto-06 water supply well in the mid-plume area and the construction of a new well in the leading-edge area. Figure 5 shows the location of the Rialto-06 well and the area where leading-edge extraction is assumed to occur.

  The total groundwater extraction and treatment capacity is assumed to be 3,150 gpm. Pumping rates in the two areas are assumed to change over time, with most of the extraction occurring in the leading-edge area at rates intended to hydraulically contain Site-related contaminated groundwater.

- **Treatment of the Extracted Groundwater to Destroy or Remove Contaminants.** Water treatment systems would remove perchlorate from the groundwater, using an above-ground biological treatment process which uses microbes to destroy the perchlorate and/or an ion exchange (IX) technology. Biological and ion exchange systems would provide similar levels of treatment. Treatment residuals may include spent resin (ion exchange) and waste biomass (biological treatment). The remedial alternatives assume the use of existing biological and ion exchange water treatment systems at the WVWD Headquarters location. Other existing treatment systems in the mid-basin area may be used, and/or new treatment systems may be constructed. Figure 5 shows the WVWD Headquarters location and the locations of other existing treatment systems.

  The remedial alternatives assume that the groundwater would not need to be treated to remove TCE or PCE because current and expected TCE and PCE concentrations in the mid-basin area are generally well below the levels allowed by drinking water standards.

- **Pipelines, Pumps, and other Conveyance Systems to Transport the Groundwater.** Conveyance systems would move water from the extraction wells to the treatment plant(s) and from the treatment plant to the delivery location(s). Delivery locations may include an existing water utility pipeline or reservoir, an existing groundwater recharge basin, or a groundwater reinjection location. Existing conveyance systems in the mid-basin area may be used, and/or new conveyance systems may be constructed. The remedial alternatives assume the use of an existing pipeline to move untreated water from the Rialto-06 location to the water treatment location and the construction of a new pipeline to move untreated water from the leading-edge extraction location to the water treatment location. The alternatives assume the use of existing and/or new pipelines to move treated water from the assumed water treatment location to the delivery location(s), depending on the remedial alternative.

- **Groundwater Monitoring.** The monitoring network would generate data to be used to optimize the operation of the groundwater extraction and treatment systems and evaluate the performance of the cleanup. The network will mostly consist of existing wells but may include construction of new wells.

2.8.2 Common Elements and Distinguishing Features of Each Remedial Alternative

The elements described in Section 2.8.1 are common to the three action alternatives.

Table 8 summarizes key Applicable or Relevant and Appropriate Requirements (ARARs) associated with the action alternatives. They were considered in developing the RAOs and are expected to apply to all three remedial action alternatives.

Table 8. Key Applicable or Relevant and Appropriate Requirements	
ARAR	**Importance**
Federal Safe Drinking Water Act (SDWA), 42 U.S.C. § 300 et seq., National Primary Drinking Water Standards, including 40 CFR 141.61 and 40 CFR 141.62	To be used to establish treatment standards for perchlorate and VOCs present in the extracted groundwater and cleanup goals for the aquifer
State of California Domestic Water Quality and Monitoring Regulations, California Safe Drinking Water Standards (MCLs), 22 CCR §§ 64431, 64444	
California Porter-Cologne Water Quality Act, California Water Code 13240 Water Quality Control Plan (Basin Plan) for the Santa Ana River Basin, Chapters 2 (Plans and Policies), 3 (Beneficial Uses), and 4 (Water Quality Objectives)	To be used to establish additional treatment requirements for groundwater recharge, groundwater reinjected into the aquifer, or groundwater discharged to surface water.

The principal difference between the remedial alternatives is the assumed use of the groundwater after the contaminants are removed. The possible uses are delivery to a local water utility for distribution to residents and businesses, and recharge or reinjection back into the groundwater aquifer, as summarized in Table 9 and described further in the following sections.

Table 9. Remedial Alternatives		
Remedial Alternative	**Groundwater Extraction and Treatment**	**Use of Treated Water**
No-Action	-	
1	Groundwater extraction in the leading edge and mid-plume areas, ion exchange and/or biological treatment for perchlorate removal, pipelines and pumps (i.e., conveyance systems), groundwater monitoring	Drinking water supply
2		Groundwater recharge and/or groundwater reinjection
3		Drinking water supply, groundwater recharge, and/or groundwater reinjection

The No-Action Alternative

The No-Action Alternative does not require active remediation or monitoring. It has no direct cost. It is included to provide a baseline for comparison to the other remedial alternatives.

Alternative 1: Pump and Treat Contaminated Groundwater and Use Treated Water as Drinking Water Supply

Alternative 1 includes groundwater extraction wells, water treatment systems, and conveyance systems capable of extracting, treating, and distributing up to 3,150 gpm of contaminated groundwater. It also includes a groundwater monitoring and performance evaluation program. Alternatives 2 and 3 include these same elements.

Alternative 1 assumes that all of the extracted and treated groundwater is used as drinking water supply after contaminant removal and that existing conveyance systems would move treated water from the water treatment location into WVWD's potable water distribution system. Implementing this alternative would require the acquisition of water rights for 100% of the extracted and treated groundwater. It is assumed that water rights made available by WVWD in accordance with a 2017 Site remediation agreement between Goodrich Corporation and WVWD would be used. In 2022 the water rights available from WVWD were less than the assumed system capacity of 3,150 gpm. Available rights depend on groundwater levels in three wells monitored in accordance with the 1961 decree and are recalculated annually by the San Bernardino Valley Municipal Water District.

Alternative 1 (as well as Alternatives 2 and 3) requires O&M, primarily affecting the groundwater extraction and water treatment components of the alternatives. Typical O&M requirements include labor, electricity usage, water testing, and disposal of treatment residuals. The type and frequency of maintenance activities, and the frequency at which system components will need to be replaced, are expected to be similar to that required at existing water purveyor wells and treatment systems.

Alternative 1 (as well as Alternatives 2 and 3) does not include any Institutional Controls.

Table 10 provides the estimated capital, annual O&M, and total present value costs of the alternative. Alternative 1 is expected to take from one to 2 years to construct, and to operate for a period of years to decades. Alternatives 2 and 3 would require similar timeframes to construct and operate.

Alternative 2: Pump and Treat Contaminated Groundwater and Recharge or Reinject the Treated Water

Alternative 2 assumes the same extraction and treatment components as Alternative 1. In contrast to Alternative 1, Alternative 2 assumes non-drinking water end use of the extracted and treated water. The assumed end use is recharge or reinjection of the treated water back into the groundwater aquifer (rather than direct use as drinking water supply). The level of treatment is assumed to be the same whether the treated water is used as drinking water supply, recharged, or reinjected. The alternative assumes that existing conveyance systems would move treated water from the treatment location to one or more existing groundwater recharge basins but that new conveyance systems may be needed to move water to two newly constructed groundwater injection wells. If used, Alternative 2 (and 3) would require O&M specific to groundwater injection wells.

It is assumed that water rights would not be needed for the extraction of groundwater that would be returned to the aquifer.

Alternative 3: Pump and Treat Contaminated Groundwater and Use the Treated Water as Drinking Water Supply or for Recharge/Reinjection

Alternative 3 assumes the same extraction and treatment components as Alternatives 1 and 2.

Alternative 3 combines the end use options in Alternatives 1 and 2. It would include use of the treated groundwater as drinking water supply and recharge or reinjection of the treated water back into the aquifer. It is assumed that most of the treated groundwater would be used as drinking water supply but that the limited availability of water rights in the RCB may at times

restrict the ability to use the treated water as drinking water. The end uses of the treated water would depend on the water rights available each year.

The alternative is assumed to make use of existing conveyance systems to move treated water from the water treatment location into WVWD's potable water distribution system (as in Alternative 1) and existing groundwater recharge basins (as in Alternative 2), and may require new conveyance systems to move water to two newly constructed groundwater injection wells.

2.8.3 Expected Outcome of Each Alternative

Alternative 1 would limit further downgradient movement of groundwater contaminated with Site-related perchlorate and VOCs, reduce risk to human health, and help protect the future use of drinking water supply wells and groundwater resources. Over a period of decades, Alternative 1 is expected to remove Site-related contaminants until aquifer cleanup levels are achieved. Alternative 1 will also provide a reliable, long-term supply of clean water for municipal (e.g., drinking water) use by one or more local water utilities.

Alternatives 2 and 3 would also limit further downgradient movement of contaminated groundwater, reduce risk to human health, and help protect groundwater resources. Groundwater extraction and treatment rates would not be subject to available water rights, as in Alternative 1, potentially increasing the rate of contaminant removal and increasing the likelihood that complete hydraulic control would occur.

Alternative 3 would also provide a reliable, long-term supply of clean water for municipal (e.g., drinking water) use.

2.9 Summary of Comparative Analysis of Alternatives

The following sections summarize the comparative analysis of alternatives based on the June 2021 FS Report. Separate sections address each of the nine remedy selection criteria. EPA categorizes the nine criteria into three groups: (1) threshold criteria, (2) balancing criteria, and (3) modifying criteria.

An alternative must meet the threshold criteria to be the selected remedy. The threshold criteria are "overall protection of human health and the environment" and "compliance with Applicable or Relevant and Appropriate Requirements ('ARARs')." The comparison of alternatives is based primarily on the balancing criteria. The balancing criteria are "Long-Term Effectiveness and Permanence," "Reduction of Toxicity, Mobility, or Volume through Treatment," "Short-Term Effectiveness," "Implementability," and "Cost." The modifying criteria are "State Acceptance" and "Community Acceptance."

2.9.1 Overall Protection of Human Health and the Environment

The Overall Protection of Human Health and the Environment criterion addresses whether or not an alternative provides adequate protection of human health and the environment and describes how risks posed through each exposure pathway are eliminated, reduced, or controlled through treatment, engineering controls, and/or institutional controls.

The evaluation of Overall Protection of Human Health and Environment is based largely on the long-term effectiveness criterion. Alternatives 1, 2, and 3 would reduce risks posed by the Site through extraction and treatment of contaminated groundwater and are considered protective.

They would not exacerbate Site conditions. The No-Action Alternative is not considered protective.

Alternatives 1 through 3 would reduce short- and long-term risks to human health and the environment by limiting the spread of contaminated groundwater into less-contaminated areas and depths and eventually providing aquifer restoration. This would reduce impacts on downgradient water supply wells and protect future uses of less-contaminated and uncontaminated portions of the aquifer. Because of potential water rights limitations with Alternative 1, Alternatives 2 and 3 would likely provide greater protection of human health by achieving higher rates of groundwater extraction and more robust hydraulic control than Alternative 1.

Alternatives 1 through 3 would reduce the toxicity, mobility, and volume of the contaminants or contaminated groundwater. The perchlorate treatment technologies (and VOC treatment technologies, if necessary) would be effective in meeting Federal and State drinking water standards. Alternatives 1 and 3 also offer the benefit of making available a clean water supply source to one or more water utilities whose wells are currently affected or threatened by Site-related contamination.

The negative impacts associated with the alternatives include the disruption that would result from installation of pipelines and other components of the remedy, and the impacts of handling and disposing of treatment residuals (e.g., spent resin and/or waste biomass).

Limitations of the No-Action Alternative include the increased potential for human exposure to contaminated groundwater; the increased likelihood that concentrations of Site-related COCs will increase at active water supply wells downgradient of the MBOU; the increased cost and difficulty of operating existing water treatment facilities if contaminant concentrations increase; and the increased cost, difficulty, and time required for control and restoration of the contaminated portions of the aquifer.

2.9.2 Compliance with Applicable or Relevant and Appropriate Requirements

Section 121(d) of CERCLA and NCP § 300.430(f)(1)(ii)(B) require that remedial actions at CERCLA sites attain legally applicable or relevant and appropriate Federal and State requirements, standards, criteria, and limitations which are collectively referred to as ARARs, unless such ARARs are waived under CERCLA § 121(d)(4).

Applicable requirements are those cleanup standards, standards of control, and other substantive requirements, criteria, or limitations promulgated under Federal environmental or State environmental or facility siting laws that specifically address a hazardous substance, pollutant, contaminant, remedial action, location, or other circumstance found at a CERCLA site.

Only those State standards that are identified by a state in a timely manner, are more stringent than Federal requirements, and are promulgated and uniformly applied may be applicable.

Relevant and appropriate requirements are those cleanup standards, standards of control, and other substantive requirements, criteria, or limitations promulgated under Federal environmental or State environmental or facility siting laws that, while not applicable to a hazardous substance, pollutant, contaminant, remedial action, location, or other circumstance at a CERCLA site,

address problems or situations sufficiently similar to those encountered at the CERCLA site that their use is well-suited to the particular site.

Only those State standards that are identified in a timely manner, are more stringent than Federal requirements, and are promulgated and uniformly applied, may be relevant and appropriate.

The compliance with ARARs criterion addresses whether a remedy will meet all of the applicable or relevant and appropriate requirements of Federal and State environmental statutes or provides a basis for invoking a waiver.

All the alternatives, except the No-Action Alternative, have common ARARs associated with groundwater cleanup actions that incorporate construction and operation of pump and treat systems. These include Federal and State drinking water standards and, if treated water is recharged or reinjected, the California Porter-Cologne Water Quality Act). Most of the ARARs are associated with use of the treated groundwater and management and disposal of treatment residuals.

Acquisition of permits would not be necessary for onsite activities.

All the active alternatives would attain their respective Federal and State ARARs, except as described in Section 2.12.2.

2.9.3 Long-Term Effectiveness

Long-term effectiveness and permanence refer to residual risk, and the ability of a remedy to maintain reliable protection of human health and the environment over time, once the RAOs are met. Residual risk can result from exposure to untreated waste or treatment residuals. The magnitude of the risk depends on the nature and quantity of the wastes and the adequacy and reliability of controls, if any, that are used to manage untreated waste and treatment residuals. For this remedy, untreated waste refers to contaminated groundwater not removed from the aquifer. Treatment residuals may include spent resin and waste biomass.

The performance of the alternatives in relation to this criterion has been evaluated primarily by estimating the extent to which each alternative prevents the migration of contaminated groundwater into clean and less-contaminated areas. The evaluation also considers the relative magnitude of the treatment residuals.

The three action alternatives may differ in their long-term effectiveness. All three action alternatives are expected to achieve RAOs if the target groundwater extraction rates can be achieved, particularly the 2,400 gpm estimated to be necessary in the leading-edge area. However, during extended dry periods that result in low water levels in the RCB, available water rights may limit the ability of Alternative 1 to pump at the targeted rate, resulting in less contaminant removal and potentially resulting in additional plume migration. The water rights currently available for the MBOU cleanup are largely held by WVWD. In the 2019–2020 water year, the WVWD water rights available for the cleanup would have allowed groundwater extraction at an average rate of less than 2,200 gpm. Available water rights depend on regional groundwater levels and may vary year to year. The availability of water rights is not expected to impact Alternatives 2 or 3, which assume that some (Alternative 3) or all (Alternative 2) of the treated water is returned to the aquifer.

Because Alternative 1 may not be fully effective at preventing the spread of contaminated groundwater during extended dry periods, it is ranked lower in relation to the "Long-term Effectiveness and Permanence" criterion.

Also considered in relation to this evaluation criterion is the health risk resulting from treatment residuals. In Alternatives 1 through 3, the ion exchange or biological treatment systems for perchlorate and liquid-phase granular-activated carbon (LGAC) for VOCs (if necessary), the spent resin, spent carbon and waste biomass would be transported offsite for regeneration or disposal. Compliance with RCRA and U.S. Department of Transportation regulations would result in minimal risks associated with spent carbon and spent resin treatment residuals. The magnitude of the residual risks from treatment residuals for Alternatives 2 and 3 would be slightly higher than for Alternative 1 because the higher average extraction rates would generate slightly more waste.

The No-Action Alternative, in which no active remediation or monitoring occurs, is ranked low in relation to the Long-Term Effectiveness and Permanence criterion. If no action is taken, contaminated groundwater will continue to spread, increasing the likelihood of future increases in contaminant concentrations in clean and less contaminated portions of the aquifer and increasing the eventual cost, difficulty, and time required for restoration of the aquifer.

Because this remedy will result in hazardous substances, pollutants, or contaminants remaining onsite above levels that allow for unlimited use and unrestricted exposure, a policy review will be conducted within 5 years after completion of construction to ensure that the remedy is, or will be, protective of human health and the environment.

2.9.4 Reduction of Toxicity, Mobility, or Volume through Treatment

Reduction of toxicity, mobility, or volume through treatment refers to the anticipated performance of the treatment technologies that may be included as part of a remedy.

Alternatives 1 through 3 all satisfy the statutory preference for treatment and would employ treatment technologies that would reduce the volume of contaminants by inhibiting contaminant migration, and reduce the toxicity and volume of contaminants or contaminated groundwater by reducing contaminant concentrations to low or non-detectable levels in groundwater pumped to the surface for treatment.

The ion exchange and biological treatment processes assumed for perchlorate removal would permanently remove the contaminants from the extracted groundwater, greatly reducing mobility. Although VOC treatment is not expected to be needed, if implemented, the LGAC or other VOC treatment technologies would also permanently remove the contaminants from the extracted groundwater.

All of the likely treatment technologies are partially or fully destructive technologies in that most or all of the contaminants are ultimately sequestered or converted to non-toxic products. The biological process considered for perchlorate removal is a destructive technology. The use of disposable ion exchange resin for perchlorate treatment may also result in permanent destruction of the perchlorate if the resin is incinerated. With LGAC, the contaminants are typically destroyed when the carbon is reactivated.

Alternatives 1 through 3 are ranked similarly for this criterion, although there would be a small difference in toxicity, mobility, and volume reduction under Alternative 1 because the average extraction rate over time is likely to be lower.

2.9.5 Short-Term Effectiveness

Short-term effectiveness addresses adverse impacts that may be posed to workers, the community, and the environment during construction of the remedy.

All three action alternatives are assigned a high ranking for short-term effectiveness. They are expected to include construction of a new groundwater extraction well, pipeline construction, and installation of groundwater monitoring wells. They may include construction of new water treatment systems or expansion of existing systems. The amount of new construction will be determined during remedial design. None of the alternatives pose unmitigable risks to the community during construction, nor do any of the alternatives pose unmitigable risks to workers beyond typical hazards associated with large construction projects.

It is expected that Alternatives 1 through 3 would require 1 to 2 years to construct and would use similar construction methods. Noise and dust abatement during construction, along with onsite treatment or offsite disposal of any contaminated purge water from well installation and development, would protect the community during construction.

There may be minor differences between the alternatives in the time required for construction if Alternatives 2 or 3 were to incorporate injection wells because of the additional time required for well construction and installation of the pipelines needed to convey water from the treatment plant to the injection wells.

2.9.6 Implementability

Implementability addresses the technical and administrative feasibility during design, construction, and operation of a remedy. It also considers factors such as the availability of services and materials, administrative feasibility, and coordination with other governmental entities.

None of the alternatives are assigned a high ranking for the implementability criterion, reflecting the need to acquire land or arrange access for the construction of extraction wells, treatment facilities, and/or conveyance facilities, and other difficulties associated with a construction project in a developed area. Goodrich Corporation has an agreement in place with WVWD that provides access to WVWD's water rights, treatment facilities, and other infrastructure and provides for WVWD use of the treated water for drinking water supply. This increases the implementability of Alternatives 1 and 3. Even with this agreement in place, none of the alternatives are assigned the highest ranking for this evaluation criterion, reflecting water rights limitations and the likely need to arrange access for construction in a developed area.

Alternative 3 is assigned the highest ranking, reflecting the incorporation of recharge as a backup end use option when water rights limit drinking water use. Alternative 2 is likely to face obstacles related to the recharge and/or reinjection of the treated groundwater. It would require coordination with other users of the recharge basins, and is expected to require an agreement with local water management agencies for use of the recharge basins. It may also require additional coordination with local water utilities for use of their infrastructure for non-drinking water end uses. Alternatives 2 and 3 also potentially require injection wells and additional water

conveyance systems beyond those required for Alternative 1, increasing the likelihood that difficulties would be encountered in acquiring property or arranging access, resulting in potential delays. Similar to Alternative 2, Alternative 3 would also require coordination with other users of the recharge basins and an agreement to allow recharge and/or reinjection of treated groundwater, although the amount to be recharged and/or reinjected would be less.

Implementation of each alternative would require the fabrication of pumps and conveyance pipe, but none of the required equipment or materials are out of the ordinary and all required services and materials are likely to be available, including qualified contractors for construction and operation of the technologies under consideration.

The extraction, treatment, and conveyance technologies included in Alternatives 1 through 3 are widely used and are generally known to be proven and reliable. The biological treatment process for perchlorate removal is less widely used than ion exchange, although it has been demonstrated to be effective. No significant difficulties are expected because of the type of technologies employed.

Alternatives 1 through 3 include an extensive monitoring program to evaluate remedy performance and to provide early warning of changes in contaminant concentrations or groundwater flow that may require modifications in extraction rates, well locations, or treatment methods to ensure attainment of RAOs and ARARs.

None of the remedial alternatives is expected to interfere with the implementation of future response actions at the Site.

2.9.7 Cost

The estimated Net Present Value (NPV) of the least expensive action alternative (Alternative 1) is $30.4 million. The estimated NPV of the most expensive alternative (Alternative 2) is $31.7 to $38.4 million. The cost estimates for all three alternatives assume the use of existing WVWD infrastructure. A range of costs is provided for Alternatives 2 and 3 to reflect the possibility that some of the treated groundwater may need to be reinjected resulting in increased capital and O&M costs. The NPV is a measure of the capital and O&M costs over a period of 30 years. It is calculated as the sum of the capital and O&M costs, with O&M costs discounted to the present at a rate of 7% per year.

No direct costs are associated with the No-Action Alternative. Costs are summarized in Table 10.

Table 10. Evaluation and Comparison of Remedial Alternatives							
Alternative	**Overall Protection of Human Health and Environment**	**Compliance with ARARs**	**Long-Term Effectiveness and Permanence**	**Reduction of Toxicity, Mobility, or Volume Through Treatment**	**Short-term Effectiveness**	**Implementability**	**Capital Cost (O&M) [Net Present Value]**
No-Action Alternative	No protection to human health or the environment.	NA	Low—Does not provide hydraulic control or cleanup	NA	NA	NA	$0
1.	Yes	Yes	Med.—Potentially less control because of water rights limitations. Minimal risk from treatment residuals.	High—Meets preference for treatment and provides significant reduction of Significant reduction of toxicity and volume	High—No unmitigable risks during construction and implementation.	Med.—Uses proven technologies, but there are administrative issues to be resolved, primarily associated with potable end use and water rights limitations.	$9.1 ($1.6–$1.9/yr) [$30.4]
2.	Yes	Yes	High—Better than Alt. 1 because there are no water rights limitations.	High—Same as Alt. 1	High—Similar to Alt. 1, but potentially more pipeline/well construction.	Med.—Uses proven technologies, but there are administrative issues to be resolved, primarily for recharge/reinjection and use of water purveyor infrastructure.	$9.1–$14.1 ($1.7–$2.1/yr) [$31.7–$38.4]
3.	Yes	Yes	High—Same as Alt. 2.	High—Same as Alt. 1	High—Same as Alt. 2	Med. to High—Similar to Alts. 1 and 2, but without the water rights limitations and with less water recharged and/or reinjected.	$9.1–$14.1 ($1.7–$2.0/yr) [$31.0–$37.2]

Notes:

NA= Not Applicable.

Costs are millions of dollars.

In Alternatives 2 and 3, the range of capital costs reflects the possible construction of groundwater reinjection wells and associated conveyance facilities.

The range of O&M costs reflects the assumed decrease in O&M costs after the first 6 years of operation (Alternatives 1, 2, and 3) and the possible use of wells (Alternatives 2 and 3).

NPV = Net Present Value. The NPV estimates assume 30 years of O&M and a 7% discount rate.

2.9.8 State Acceptance

The State of California supported EPA's preferred alternative and concurs with the selected remedy.

2.9.9 Community Acceptance

During the public comment period, one comment explicitly supported EPA's preferred alternative. None of the comments supported the no action alternative. Several comments made recommendations that EPA will address during the design, permitting, construction, or monitoring of the remedy (i.e., after EPA selects a remedy) and do not express a preference for or oppose a particular remedial alternative.

2.10 Principal Threat Waste

The NCP establishes an expectation that EPA will use treatment to address the principal threats posed by a Site wherever practicable. Generally, "Principal Threat Wastes" are source materials that include hazardous substances, pollutants, or contaminants and act as a source of direct exposure or a reservoir for migration of contamination to groundwater or other media. The MBOU does not address source materials and no Principal Threat Waste is known to be present.

2.11 Selected Remedy

2.11.1 Summary of the Rationale for the Selected Remedy

Based on CERCLA requirements, the results of the MBOU remedial investigation and feasibility study, and public comments received on its January 2022 proposed cleanup plan, EPA has chosen Alternative 3, its preferred alternative, as the selected remedy. The selected remedy is a groundwater pump and treat system which will be designed to hydraulically contain the leading edge of Site-related contamination to protect downgradient groundwater resources, include the extraction and treatment of additional groundwater in the mid-plume area to speed cleanup, make the treated groundwater available as a source of drinking water to local water utilities, and recharge or reinject into the aquifer treated groundwater that cannot be used as drinking water.

EPA believes that the selected remedy will be more effective and more easily implemented than the other remedial alternatives considered in EPA's January 2022 Proposed Plan for the MBOU, and that these advantages justify the higher cost compared to Alternative #1. The increased effectiveness and implementability are largely due to the multiple end use options to be provided for the treated groundwater (potable use, recharge and/or reinjection). Overall, the selected remedy provides the best balance of tradeoffs among the remedial alternatives with respect to the balancing and modifying criteria described in Section 2.9.

EPA received comments from six entities on its proposed cleanup plan during the public comment period. One commenter supported EPA's proposal. None of the other commenters supported a particular remedial alternative. Many of the comments raise issues which will be addressed during remedy design. The State of California concurs with EPA's selected remedy.

2.11.2 Description of the Selected Remedy

EPA's selected remedy for the MBOU includes groundwater extraction, water treatment, multiple end use options for the treated groundwater, conveyance systems for the untreated and treated groundwater, and groundwater monitoring (Figure 10).

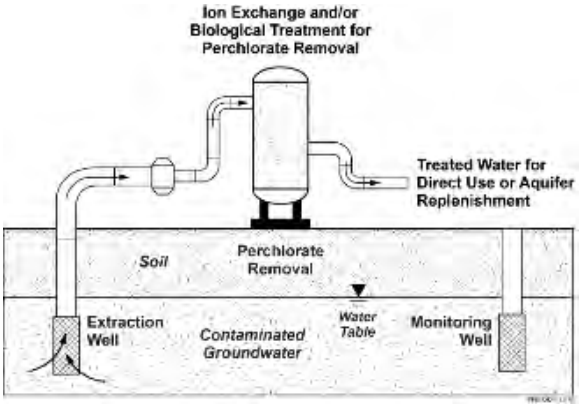

Figure 10. Selected Remedy Components

The remedy shall be designed, constructed, and operated to provide sufficient hydraulic control to prevent further migration of Site-related contamination from the MBOU leading-edge area into clean or less contaminated portions of the aquifer.

Compliance with the performance criterion shall be verified by demonstrating hydraulic control of the target area and reducing groundwater concentrations at compliance locations (specified below) over time. Compliance shall initially be determined by demonstrating hydraulic control, which is anticipated shortly after startup. After the remedy has operated for a period of time, expected to be several years, compliance shall be determined by demonstrating continued hydraulic control and a decrease in Site-related contaminant concentrations in compliance wells.

The compliance points shall be at least two compliance monitoring wells or well clusters downgradient of the leading-edge extraction wells and adequately located to verify that Site-related groundwater contamination migrating through the leading-edge area is intercepted by the remedy extraction wells.

Groundwater Extraction

The remedy includes the operation of groundwater extraction wells to pump contaminated water to the surface, where contaminants will be removed. Groundwater extraction will occur in two areas i) an area about 6 miles from the 160-acre area where Site-related perchlorate concentrations remain above drinking water standards (the "leading edge" of contamination); and ii) an area about 3 miles from the 160-acre area between the SAOU and the leading edge of Site-related contamination (the "mid-plume" area). Figure 5 shows the expected location of the mid-plume extraction (at or near the location of the Rialto-06 well) and the area where leading-edge extraction will occur.

Extraction may occur at existing wells, new wells, or both. Existing wells under consideration are the Rialto-06 well owned by the City of Rialto and currently under lease to WVWD, and the Colton 17 well owned by the City of Colton. Decisions about the use of existing wells and the exact locations of any new wells will be made during remedial design. Land would need to be acquired or access arrangements made for installation of any new wells. Factors to be considered in determining whether to use existing wells include proximity of the wells to water treatment locations, the well's location in relation to Site-related contamination, well construction, the need for agreements with water utilities or other third parties for use of the wells, cost, and community or stakeholder concerns.

Extraction in the leading-edge area would occur at rates needed to hydraulically contain the movement of Site-related contamination. The preliminary estimate of the average rate needed for

containment is 2,400 gpm. The leading-edge extraction well or wells will be designed and constructed with sufficient capacity to account for uncertainty in the properties of the groundwater aquifer and the concentrations of Site-related contamination. Additional capacity will also be required if pumping rates are anticipated to vary seasonally to accommodate the needs of the end user or users of the water. The average target pumping rate will be determined during remedial design based on updated estimates of the area and depth of Site-related contamination exceeding drinking water standards. The estimated depth of Site-related contamination in the leading-edge area is approximately 250 to 400 feet bgs.

Extraction in the mid-basin area will vary over time from zero up to about 2,000 gpm based in part on contaminant concentrations. If existing groundwater extraction, treatment, and conveyance systems are available, as expected, extraction in the mid-basin area is expected to occur initially at or near 2,000 gpm, which is near the maximum rate possible with existing infrastructure.

Over the life of the remedy, most of the extraction is expected to occur in the leading-edge area.

The selected remedy does not target cleanup of perchlorate from non-Site sources such as Chilean fertilizer and naturally occurring perchlorate, although it will remove non-Site perchlorate where mixed with Site-related contamination from the 160-acre area. Analyses of the ratios of stable isotopes may be used to distinguish Site-related contamination from non-Site sources.

Water Treatment

The remedy includes the operation of water treatment systems to remove contaminants exceeding MCLs from the extracted groundwater. The water treatment systems shall be designed with the capacity to treat water at or above the maximum planned groundwater extraction rate.

A biological treatment process and/or ion exchange will be used to remove perchlorate, the primary contaminant in the groundwater. Biological treatment processes use microbes to destroy the perchlorate; ion exchange uses a synthetic resin or other media to transfer contaminants from the water to the removal media.

If necessary to meet MCLs, LGAC or other technologies would be required to remove TCE or PCE from the groundwater.

Any spent resin or other treatment residuals requiring disposal shall be sent to an EPA-approved facility for treatment and/or disposal.

The purpose of this response action is to control health risks posed by exposure to contaminated groundwater. Table 11 provides the cleanup levels for the treated groundwater and the aquifer for the MBOU chemicals of concern.

Table 11. Cleanup Levels for Chemicals of Concern (COCs)

Media: Groundwater
Groundwater Use: Drinking Water

COC	Federal MCL (µg/L)	California MCL (µg/L)	Cleanup Level (µg/L)	Basis for Cleanup Level
Perchlorate	none	6	6	Compliance with State ARAR
TCE	5	5	5	Compliance with Federal ARAR
PCE	5	5	5	Compliance with Federal ARAR

Notes:

1. µg/L = micrograms per liter
2. At current (2021) concentrations in the mid-basin area, treatment for TCE or PCE is unlikely to be needed.
3. In practice, the water treatment technologies are expected to reduce concentrations to levels substantially below cleanup levels.

Treatment is expected to occur at one or more existing water treatment facilities and make use of existing water treatment systems. Existing water treatment facilities at or near the Site are located at: i) the WVWD Headquarters location, where existing biological and ion exchange systems are expected to be available; ii) a WVWD site near Rialto High School, where existing ion exchange systems are expected to be available; and iii) a City of Colton water treatment location, where existing ion exchange systems are expected to be available. See Figure 5 for locations. An agreement between Goodrich Corporation and WVWD is in place to make available existing water treatment systems at the two WVWD water treatment facilities.

Treated Water End Use and Conveyance

After the contaminants are removed, the extracted and treated groundwater will be used as drinking water supply and/or returned to the RCB.

The remedy includes the operation of conveyance systems (e.g., pipelines, pumps, and storage tanks) to move the contaminated water from the extraction wells to the water treatment locations, and from the water treatment locations to the delivery locations. The delivery locations will include one or more drinking water utilities which will distribute the water to their customers, and one or more locations where the treated water will be returned to the RCB. The treated water may be returned to the RCB at existing groundwater recharge basins or via newly constructed injection wells. If injection wells are needed, two or more wells would be constructed.

New conveyance systems will be constructed as part of the remedy. Easements or other access arrangements will be required. Some existing conveyance systems and recharge basins may also be used, including a pipeline connecting the Rialto-06 well to the WVWD Headquarters water treatment location, existing water utility water distribution systems, the existing Cactus flood control basins operated by the San Bernardino County Flood Control District, and other flood control basins owned and operated by San Bernardino County. Three water utilities have infrastructure at or near the MBOU and water rights in the RCB: WVWD, the City of Rialto, and the City of Colton.

Decisions about which water utilities will accept and distribute water from the remedy, whether existing conveyance systems and recharge basins will be used, the locations of new pipelines and conveyance systems, and the locations of injection wells, if used, will be made during remedial design. An agreement between Goodrich Corporation and WVWD provides for WVWD to distribute the treated water and makes available certain WVWD conveyance systems. Factors to be considered in determining the end uses of the treated groundwater include proximity to the water treatment location(s); available water rights; available capacity in existing flood control/groundwater recharge basins; the need for agreements with water utilities, San Bernardino County Flood Control District, and other third parties; cost; community concerns; and stakeholder concerns. See Figure 5 for locations of existing recharge basins.

The selected remedy allows any combination of potable use, recharge, and reinjection. It is anticipated that most of the treated groundwater will be used as drinking water supply (i.e., for potable use) and that the end uses of the treated water will vary seasonally and from year to year.

Groundwater Monitoring

The remedy includes a groundwater monitoring and performance evaluation program to demonstrate hydraulic control of Site-related contamination and progress in reducing contaminant concentrations in the MBOU area to the cleanup levels identified in Table 11. Groundwater monitoring shall occur upgradient and downgradient of the leading-edge extraction location(s).

The groundwater monitoring and performance evaluation program shall also provide early warning of changes in the nature or extent of contamination upgradient of the groundwater extraction locations and changes in groundwater elevations. Upgradient conditions that could affect system operations include changes in the lateral or vertical extent of contamination, changes in contaminant concentrations, or detection of new contaminants which could require changes to extraction rates or water treatment system operation.

The groundwater monitoring and performance evaluation program is expected to rely on a combination of new and existing wells.

If there are no suitably constructed existing monitoring wells located within several hundred feet of the leading-edge extraction well(s), a nested piezometer pair may be required near the extraction well(s) to provide water level data to help define the size of the extraction well capture zone and assist in evaluating hydraulic control.

As described above, two compliance monitoring points are required downgradient of the leading-edge extraction well(s) to support evaluation of hydraulic control and to monitor progress in reducing contaminant concentrations to chemical-specific ARARs. Depending on the final extraction location, the compliance monitoring points could be either new or existing monitoring wells. The compliance wells should be located no more than approximately 1,500 feet downgradient of the extraction well(s) and monitor depths similar to the extraction well screened interval.

There is a moderate to high level of uncertainty about groundwater flow conditions downgradient of the planned leading-edge extraction area due to the limited number of monitoring locations and the presence of geologic faults that may affect flow directions.

Decisions about the number, location, and design of the new monitoring wells needed to satisfy groundwater monitoring objectives shall be made during remedial design. Monitoring frequencies and the types of analyses shall also be determined during remedial design. The monitoring program is expected to include water level measurements, analysis of groundwater samples for chemicals of concern and other chemicals that could affect the operation of the remedy, and analysis of groundwater samples to distinguish Site-related perchlorate from non-Site perchlorate.

Future Remedy Changes

The remedy may change as a result of the remedial design and construction processes. If appropriate, changes to the remedy described in the ROD will be documented in a technical memorandum, an Explanation of Significant Differences (ESD), or amendment to this ROD.

2.11.3 Summary of the Estimated Remedy Costs

Tables 12a and 12b provide summaries of the estimated capital, O&M, and present value costs of the major components of the selected remedy. Both tables describe costs for Alternative 3. Two tables are provided because Alternative 3 allows recharge or reinjection of a portion of the

treated water. Table 12a assumes that the portion of the treated water not supplied for potable drinking water use is recharged at an existing groundwater recharge basin; Table 12b assumes that this portion is reinjected directly into the aquifer. The information in the tables is based on the best available information regarding the anticipated scope of the remedy. Changes in costs may occur as a result of new information, data collected during the remedial design phase, or changes in the configuration of the remedy. Major changes may be documented in the form of a memorandum, ESD, or ROD amendment. As is the practice at Federal Superfund sites, the cost estimates are order-of-magnitude engineering estimates expected to be within +50 to -30% of the actual cost.

Table 12a. Detailed Cost Estimate for the Selected Remedy—Drinking Water End Use with Surface Recharge

Capital Costs (Drinking Water/Recharge End Use)				
Major System/Component		**Quantity**	**Unit Cost**	**Cost**
Mobilization and Permitting		1	$160,000	$160,000
Extraction Well, Booster Pump and Conveyance

Maintenance, Redevelopment, Sampling and Reporting	30	Year	$38,750	$38,750
Injection Well O&M Contingency (15%)	30	Year	$19,313	$19,313
Estimated Annual O&M Costs		30 Years		$1,758,063
Estimated Annual Ion Exchange O&M Costs		6 Years		$276,000
NET PRESENT VALUE OF THE ESTIMATED O&M COSTS				$23,131,000
TOTAL ESTIMATED PRESENT WORTH FOR THE SELECTED REMEDY				$37,209,000

Notes:

The Net Present Value of the Estimated O&M costs and the Total Estimated Present Worth for the Selected Remedy are based on a 7% discount rate and 30 years of O&M. Capital cost estimates are not discounted.

Treatment locations, treatment technologies and pipeline routes may change during remedial design, affecting costs. Cost estimates are expected to be within a +50 to -30% accuracy range.

2.11.4 Expected Outcomes of Selected Remedy

The selected remedy will limit further downgradient movement of groundwater contaminated with Site-related perchlorate and VOCs, reduce risk to human health, and help protect future uses of drinking water supply wells and groundwater resources. Through removal of Site-related contaminants, the selected remedy is expected to lead to restoration of the aquifer, allowing for unrestricted use. Achieving this outcome may take several decades.

The remedy will start protecting downgradient areas shortly after startup and will continue to protect downgradient areas during the full range of expected future groundwater conditions.

Groundwater cleanup levels for the primary COCs are summarized in Table 11. EPA will use Federal and State drinking water MCLs as the cleanup levels for the aquifer and also for the treated groundwater. If the treated water is distributed to local water utilities as potable water supply (the expected end use option for the majority of the treated water), the extracted water will be treated to lower levels as required by the California State Water Resources Control Board Division of Drinking Water. Treated groundwater from the remedy is expected to provide a reliable, long-term supply of clean water for municipal (e.g., drinking water) use by one or more local water utilities.

2.12 Statutory Determinations

This section provides a brief, Site-specific description of how the selected remedy satisfies the statutory requirements of CERCLA §121, as required by NCP §300.430(f)(5)(ii) and explains the 5-year review requirement for the selected remedy.

2.12.1 Protection of Human Health and the Environment

The selected remedy, Alternative 3, will protect human health by extracting and treating contaminated groundwater. These actions will prevent contaminated groundwater from moving into clean or less contaminated portions of the groundwater aquifer and remove contaminants from the aquifer. The remedy targets groundwater where contaminant concentrations in 2021 were up to 67 times the level allowed in drinking water. The groundwater aquifer is a current source of drinking water to tens of thousands of people.

If no action is taken, contaminated groundwater will continue to spread, increasing the likelihood of future increases in contaminant concentrations in downgradient portions of the aquifer, increasing risk by increasing the likelihood of exposure, and increasing the eventual cost, difficulty, and time required for restoration of the aquifer.

The selected remedy includes above-ground water treatment systems to remove the COCs from the extracted groundwater. After treatment, the extracted groundwater will achieve all ARARs identified in this ROD. The remedy also requires compliance with ARARs associated with the disposal of treatment residuals to eliminate or minimize short-term risks and cross-media impacts. The remedy includes an extensive monitoring program to evaluate the performance of the remedy.

There is no known exposure pathway by which ecological receptors could be exposed to contaminated groundwater at the Site.

2.12.2 Compliance with Applicable or Relevant and Appropriate Requirements

The selected remedy of groundwater extraction and treatment shall comply with ARARs as described in Tables 13 through 15, except, potentially, during studies and investigations undertaken pursuant to CERCLA § 104(b) (CERCLA § 104(b) activities) during remedial design. EPA expects to fully comply with ARARs during most CERCLA § 104(b) activities, but there may be activities during which EPA concludes that it is not practicable to comply fully. Such activities may include discharges of untreated or partially treated groundwater resulting from the development and testing of new groundwater extraction wells, but may also include other temporary high flow, high volume discharges.

In such cases, EPA will evaluate the practicability of fully complying with ARARs, and comply with the EPA policy that removal actions "will comply with ARARs to the extent practicable, considering the exigencies of the circumstances." Studies and investigations undertaken pursuant to CERCLA § 104(b) are considered removal actions (40 CFR 300.415(j)).

Table 16 provides a list of other Federal requirements which should be considered in designing and implementing the remedy.

ARARs are frozen at the time the ROD is signed, but offsite requirements are not (e.g., drinking water standards applicable to treated water delivered for potable use). Offsite requirements in effect at the time the action occurs must be met, even if they differ from those in effect at the time the ROD is signed.

Table 13. Chemical-specific Applicable or Relevant and Appropriate Requirements				
Source	**Citation**	**ARAR Status**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
SDWA, 42 U.S.C. §§ 300f–300j-26	National Primary Drinking Water Standards, including 40 CFR 141.61 and 40 CFR 141.62	Relevant and Appropriate	Establishes national primary drinking water standards, including MCLs, to protect the quality of water in public water systems. MCLs are enforceable standards and represent the maximum concentrations of contaminants permissible in a public water system.	Water treatment systems will reduce the concentration of COCs in need of treatment to below EPA MCLs. MCLs also provide cleanup levels for the groundwater aquifer.
State of California Domestic Water Quality and Monitoring Regulations	California SDWA Standards, 22 CCR §§ 64431, 64444	Relevant and Appropriate	Establishes California MCLs. Some California MCLs are more stringent than the Federal MCLs, and California has MCLs established MCLs for chemicals for which there are no Federal MCLs.	Water treatment systems will reduce the concentration of perchlorate to below California MCLs. The California MCL for perchlorate also provides the cleanup level for the groundwater aquifer. There is a California MCL for perchlorate but no Federal MCL.

Note:
CCR = California Code of Regulations
CFR = Code of Federal Regulations

Table 14. Action-specific Applicable or Relevant and Appropriate Requirements				
Source	**Citation**	**ARAR Status**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
Clean Air Act, South Coast Air Quality Management District (SCAQMD)	SCAQMD Regulation XIII, comprising Rules 1301–1313, SCAQMD Rule 1401, SCAQMD Rule 1401.1, SCAQMD Rules 401–403	Potentially Applicable	Rules 1301–1313 establish new source review requirements. Rule 1303 requires that all new sources of air pollution in the district use best available control technology (BACT) and meet emission offset requirements for all new sources that emit in excess of 1 pound per day of VOCs. SCAQMD Rule 1401 requires that best available control technology for toxics (T-BACT) be employed for new stationary operating equipment if the cumulative carcinogenic impact from air toxics would exceed the maximum individual cancer risk limit of 1 in 1 million (1 × 10-6) without T-BACT. SCAQMD Rule 1401.1 applies to discharges that are within 500 feet of a school and requires that the discharges from a facility not create a cancer risk in excess of 1 in 1 million (1 × 10-6) at the school. SCAQMD Rule 401 limits visible emissions from a point source. SCAQMD Rule 402 prohibits discharge of material that is odorous or causes injury, nuisance, or annoyance to the public. SCAQMD Rule 403 limits downwind particulate concentrations.	Construction activities must comply with applicable SCAQMD requirements. If air stripping is used to remove VOCs from groundwater, air emissions must meet substantive SCAQMD requirements, if applicable.
RCRA Subtitle C Hazardous Waste Identification and Generator Requirements and California Hazardous Waste Requirements	22 CCR, Division 4.5, Chapter 11 (Identification and Listing of Hazardous Waste)	Potentially Applicable	A solid waste is a RCRA hazardous waste if it exhibits any of the characteristics of ignitability, corrosivity, reactivity, or toxicity identified in 22 CCR §§ 66261.21, 66261.22(a)(1), 66261.22(a)(2), 66261.23, 66261.24(a)(1), 22 CCR § 66262.11, and 22 CCR § 66260.200, or if it is listed as a hazardous waste in Article 4 of Chapter 11. Wastes can also be classified as non-RCRA, State-only hazardous wastes if they exceed the soluble threshold limit concentration or total threshold limit concentration values listed in 22 CCR § 66261.24(a)(2).	Wastes generated during remedial action (e.g., drill cuttings from well installation, soil from pipeline installation, spent resin or other wastes generated during water treatment) will be characterized and managed in accordance with substantive provisions of any applicable RCRA and California requirements.
Federal SDWA Underground Injection Control (UIC) Regulations, 42 U.S.C. § 300f et seq.	40 CFR 144.12-144.13	Potentially Applicable	Prohibits injection wells from 1) causing a violation of primary MCLs in the receiving waters, and 2) adversely affecting the health of persons. Provides that contaminated groundwater that has been treated may be reinjected into the formation from which it is withdrawn if such injection is conducted pursuant to a CERCLA cleanup and is approved by EPA.	Groundwater reinjected into the aquifer will be treated to comply with UIC requirements.
RCRA § 3020	42 U.S.C. § 6939b(b)	Potentially Applicable	Provides that the ban on the disposal of hazardous waste into a formation that contains an underground source of drinking water shall not apply to the injection of contaminated groundwater into the aquifer if: (i) such injection is part of a response action authorized by CERCLA; (ii) such contaminated groundwater is treated to substantially reduce hazardous constituents prior to such injection; and (iii) such response action will, upon completion, be sufficient to protect human health and the environment.	Groundwater determined to be hazardous waste will be reinjected into the aquifer only if it is treated as part of the CERCLA response action and the action is protective of human health and the environment.
California Porter-Cologne Water Quality Act, California Water Code 13240	Water Quality Control Plan (Basin Plan) for the Santa Ana River Basin, Chapters 2 (Plans and Policies), 3 (Beneficial Uses), and 4 (Water Quality Objectives)	Potentially Relevant and Appropriate	The California Porter-Cologne Water Quality Act incorporates the requirements of the Federal Clean Water Act and implements additional standards and requirements for surface waters and groundwaters of the State. The Water Board formulates and enforces water quality standards as defined in the Basin Plan. The Basin Plan identifies the beneficial uses of surface and ground waters and establishes water quality objectives necessary to protect beneficial uses. Water	The reinjection of treated water into the aquifer or temporary discharges to surface water during design, construction, or operation of the remedy must comply with relevant and appropriate provisions of Chapters 2, 3 and 4 of the Basin Plan.

Table 14. Action-specific Applicable or Relevant and Appropriate Requirements				
Source	**Citation**	**ARAR Status**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
			quality objectives impose limitations on receiving waters, rather than on discharges. The Basin Plan also incorporates State Water Resources Control Board Resolution 68-16, "Statement of Policy with Respect to Maintaining High Quality of Waters in California." Resolution 68-16 requires maintenance of existing State water quality unless it is demonstrated that a change will benefit the people of California, will not unreasonably affect present or potential uses, and will not result in water quality less than that prescribed by other State policies.	
Federal Water Pollution Control Act 33 U.S.C. §§ 1311, 1314(b)		Potentially Applicable	Establishes effluent limitations and criteria for discharges from point sources	Temporary discharges to surface water during design, construction, or operation must comply with applicable provisions.
Federal Water Pollution Control Act 33 U.S.C. § 1342, 1344	33 CFR 323.1 et seq.	Potentially Relevant and Appropriate	Provides requirements for discharges from point sources into waters of the United States. Waters of the United States are defined in 40 CFR 122.2. Includes dredge and fill requirements for discharges into the navigable waters of the United States.	Temporary discharges to surface water during design, construction, or operation must comply with relevant and appropriate provisions.
California Toxics Rule	40 CFR 131.36(d)(10)(ii)	Potentially Applicable	The California Toxics Rule is a Federal regulation promulgated under the Federal Water Pollution Control Act that sets numeric criteria for certain pollutions in inland waters. It applies to waters assigned an aquatic life or human health use classification in a California Regional Water Quality Control Plan.	Temporary discharges to surface water during design, construction, or operation must comply with applicable provisions.
California Land Disposal Restrictions, Requirements	22 CCR § 66268.1 et seq. Also 22 CCR §§ 66268.3, 66268.7, 66268.9, 66268.40 and 66268.50	Potentially Applicable	Defines hazardous wastes that cannot be disposed of to land without treatment.	Hazardous wastes generated during the treatment of groundwater and planned for offsite disposal must comply with substantive requirements. Wastes would be characterized before shipment offsite to determine whether land disposal restriction treatment standards apply and, if so, whether the waste meets applicable treatment standards.
California Hazardous Waste Regulations	22 CCR § 66262.34(a)(1)(A)	Potentially Relevant and Appropriate	Hazardous waste stored onsite should be stored in compliance with regulations cited in this section.	Hazardous wastes generated and stored onsite must comply with substantive requirements.
California Hazardous Waste Regulations	22 CCR § 66265.170 et seq. (Article 9) 22 CCR § 66265.190 et seq. (Article 10)	Potentially Applicable	Regulates the use and management of hazardous waste in containers, compatibility of hazardous wastes with containers, and special requirements for certain hazardous wastes.	Hazardous waste generated and accumulated onsite must comply with substantive requirements.

Table 15. Location-specific Applicable or Relevant and Appropriate Requirements				
Requirement	**Citation**	**Applicable or Relevant and Appropriate?**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
National Historic Preservation Act (NHPA), 54 U.S.C. § 300101 et seq. Historic Sites Act of 1935, 54 U.S.C. §§ 320101–320106	36 CFR Parts 60.4, 62, 63, 65, 68, 800	Potentially Applicable	The NHPA requires Federal agencies to take into account the effect of any federally assisted undertaking or licensing on any district, site, building, structure, or object that is included in or eligible for inclusion in the National Register of Historic Places (NRHP). The Historical Sites Act authorizes the Secretary of the Interior to designate sites, buildings and objects of national significance as natural landmarks for listing on the National Registry of Natural Landmarks.	EPA will evaluate whether any site, building, or object encountered during remedial action may be eligible. To date, no sites, buildings and objects of national significance have designated as having historic value to warrant inclusion in the NRHP, or listed as a national natural landmark under the Historic Sites Act.
The Archaeological and Historic Preservation Act (AHPA), 16 U.S.C. § 469 et seq. Archaeological Resources Protection Act (ARPA), 16 U.S.C. § 470	43 CFR Part 7	Potentially Applicable	The AHPA provides for the preservation of historical and archaeological data that might be destroyed through alteration of terrain as a result of a Federal construction project or a federally licensed activity or program. The ARPA prescribes steps to be taken by investigators to preserve data.	EPA will evaluate whether any terrain which may be altered during the remedial action may affect archaeological or historical data. If remedial activities would cause irreparable loss or destruction of significant scientific, prehistoric, historical, or archaeological data, mandatory data recovery and preservation activities would be necessary.

Table 15. Location-specific Applicable or Relevant and Appropriate Requirements				
Requirement	**Citation**	**Applicable or Relevant and Appropriate?**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
The Endangered Species Act (ESA), 16 U.S.C. § 1531, et seq. California Endangered Species Act, California Fish and Game Code, Division 3, Chapter 1.5 Native Plants Protection Act, California Fish and Game Code, Division 2, Chapter 10	50 CFR Part 17; 50 CFR Part 402 CCR §§ 2050–2089 14 CCR § 670.5	Potentially Applicable	The Federal ESA requires consultation with the resource agencies for remedial actions that may affect threatened or endangered species or their critical habitat. Section 7 of the ESA requires that Federal agencies consider whether their actions will jeopardize the existence of species that are listed as threatened or endangered by the United States Fish and Wildlife Service or the National Marine Fisheries Service or their critical habitat. The California ESA establishes additional requirements for the protection of native threatened or endangered species. The Native Plants Protection Act establishes requirements for the protection of endangered or rare plants native to California.	EPA will evaluate planned construction locations for threatened or endangered species and their critical habitat, and comply with substantive provisions of these three acts if applicable species and/or habitat may be affected by planned remedial actions, including consultation with appropriate resource agencies. Recovery areas for an endangered insect, the Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*, DSF), have been identified in the City of Colton.
Migratory Bird Treaty Act, 16 U.S.C. § 703 California Fish and Game Code, Division 4	50 CFR 10.13 CCR §§ 3003, 3005, 3511, 3513	Potentially Applicable	The Federal act protects migratory birds, and any part, nest, or egg of any such bird, native to the United States or its territories. Regulations codified at 50 CFR 10.13 provide a list of migratory birds protected by the act. CCR establishes additional provisions and regulations to protect migratory birds.	EPA will consult with the U.S. Fish and Wildlife Service and comply with substantive provisions of applicable requirements if planned remedial activities may affect migratory birds.

Table 15. Location-specific Applicable or Relevant and Appropriate Requirements				
Requirement	**Citation**	**Applicable or Relevant and Appropriate?**	**Description of Requirement**	**Action to be Taken to Attain Requirement**
Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. §§ 3001–3013. California Native American Graves Protection and Repatriation Act, California Health and Safety Code 8010–8011	43 CFR Part 10	Potentially Applicable	The Federal and State acts address the identification, protection and appropriate disposition of human remains, funerary objects, sacred objects, and objects of cultural patrimony. The California Act allows for the protection and repatriation of Native American Tribes not federally recognized.	EPA will comply with substantive provisions of applicable requirements if human remains, funerary objects, sacred objects, or objects of cultural patrimony are encountered during remedy construction.

Table 16. Other Federal Requirements		
Requirement	**Description of Requirement**	**Action to be Taken to Attain Requirement**
Executive Order 11593 Protection and Enhancement of the Cultural Environment	Requires that Federal agencies take timely steps to make records of any property listed on the NRHP that may be substantially altered by a Federal action.	EPA will determine during remedial design if remedial activities may affect any properties listed on the NRHP.
Executive Order 11988 on Floodplain Management	Requires that Federal agencies evaluate the potential effects of activities in a floodplain to avoid, to the extent possible, adverse effects associated with direct and indirect development. EPA has developed guidance relevant to this Executive Order, the *Policy on Floodplains and Wetlands Assessments for CERCLA Actions* (EPA, 1985).	EPA will determine during remedial design if planned remedial activities may occur in a floodplain and avoid adverse effects to the extent possible.
Protection of Wetlands Executive Order 11990	Requires avoidance to the extent practicable of adverse impacts associated with the destruction or loss of wetlands and to avoid support of new construction in wetlands if a practical alternative exists. Wetlands are defined as waters of the United States in 40 CFR 122.2. Wetlands include those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and under normal circumstance do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.	EPA will determine during remedial design if planned remedial activities may affect wetlands. If so, EPA will avoid impacts to the extent practicable.
Indian Sacred Sites Executive Order 13007	To the extent practicable, where permitted by law, and not clearly inconsistent with essential agency functions, requires executive branch agencies to (1) accommodate access to and ceremonial use of Indian sacred sites by Indian religious	EPA will determine during remedial design if planned remedial activities may occur on Federal lands and sacred Indian sites may be present. If so, EPA

Table 16. Other Federal Requirements		
Requirement	**Description of Requirement**	**Action to be Taken to Attain Requirement**
	practitioners and (2) avoid adversely affecting the physical integrity of such sacred sites.	will comply with the Executive Order to the extent practicable.

2.12.3 Cost-Effectiveness

EPA must select a remedy that is cost effective. The NCP defines a cost-effective remedy as one whose "costs are proportional to its overall effectiveness." Overall effectiveness is determined by evaluating three of the balancing criteria (long-term effectiveness; reduction in toxicity, mobility, and volume through treatment; and short-term effectiveness) and then comparing overall effectiveness to cost.

In EPA's judgment, the selected remedy for the MBOU is cost-effective in that its overall effectiveness is proportional to its costs. The estimated present worth cost of the Selected Remedy (Alternative 3) is $31.0 million to $37.2 million, depending on whether groundwater reinjection wells are constructed and used. The selected remedy is slightly more expensive ($0.6 million to $6.8 million) than Alternative 1 but judged more effective. The selected remedy is similar in cost to Alternative 2 with a similar level of effectiveness. EPA judges the No-Action Alternative as neither protective of human health nor cost-effective. Table 17 summarizes the costs and effectiveness of the alternatives.

Table 17. Cost and Effectiveness						
Alternative	**Cost-Effective?**	**Present Worth Cost**	**Incremental Cost**	**Long-Term Effectiveness and Permanence**	**Reduction of Toxicity, Mobility, or Volume Through Treatment**	**Short-Term Effectiveness**
No Action	No	---	---	No hydraulic control, contaminant removal, and risk reduction	No reduction of toxicity, mobility, or volume	---
Alternative 1: Pump and Treat Contaminated Groundwater and Use Treated Water as Drinking Water Supply	Yes	$30,430,000	+$30,430,000	Significant hydraulic control, contaminant removal, and risk reduction	Significant reduction of toxicity and volume	No unmitigable risks during construction and implementation.
Alternative 3: Pump and Treat Contaminated Groundwater and Use the Treated Water as Drinking Water Supply or for Recharge/ Reinjection	Yes	$31,010,000 to $37,200,000	-$580,000 to +$6,777,000	- Potential for increased contaminant removal - Higher confidence of complete hydraulic control	Potential for greater reduction of toxicity, mobility, or volume.	Same as Alternative 1
Alternative 2: Pump and Treat Contaminated Groundwater and Recharge or Reinject the Treated Water	Yes	$31,690,000 to $38,400,000	+$680,000 to +$1,200,000	Same as Alternative 3	Same as Alternative 3	Same as Alternative 1

Notes:

The no action alternative is not considered to be cost-effective.

Alternatives are listed in order of increasing cost. Incremental cost is the difference between the listed alternative and the preceding alternative.

Alternative 3, EPA's selected remedy, provides a potentially greater return on investment compared to the other alternatives.

2.12.4 Utilization of Permanent Solutions and Alternative Treatment Technologies to the Maximum Extent Practicable

EPA has determined that the selected remedy represents the maximum extent to which permanent solutions and treatment technologies can be utilized in a practicable manner and provides the best balance of tradeoffs in terms of the five balancing criteria, while also consideringthe statutory preference for treatment as a principal element and bias against offsite treatment and disposal and considering State and community acceptance.

The selected remedy employs treatment technologies that would reduce the toxicity and volume of contaminated groundwater by inhibiting contaminant migration, and reduce the volume of contaminants by removing contaminants from the extracted groundwater.

The selected remedy is expected to be more effective than Alternative 1 because it provides multiple end use options. The effectiveness of Alternative 1 may be limited during extended dry periods that result in low groundwater levels in the RCB. Low groundwater levels reduce the available water rights and may limit the ability of Alternative 1 to pump at the targeted rate, potentially resulting in additional plume migration. The selected remedy is expected to be more easily implemented than Alternative 2 because of the agreements in place that provide access to water rights, treatment facilities, and other infrastructure and provides arrangements to use the treated water for drinking water supply. These criteria were key factors and decisive in the selection decision. The selected remedy is similar to the other action alternatives in the Reduction of Toxicity, Mobility, or Volume through Treatment and Short-Term Effectiveness criteria. There would be minor differences in toxicity, mobility, or volume reduction if limited water rights reduced the average extraction and treatment rate of Alternative 1.

Comments received on EPA's January 2022 proposal indicate that the community generally supports EPA's selected remedy. One comment explicitly supported EPA's preferred alternative. Several commenters made recommendations, such as recommending that water treatment occur close to the leading-edge extraction location to minimize disruption to local communities, maximizing the use of the treated groundwater for potable water use, or using a particular groundwater recharge basin, which will be addressed after EPA selects a remedy (i.e., during the design, permitting, construction, and monitoring of the remedy).

2.12.5 Preference for Treatment as a Principal Element

Although no principal threat wastes are present, the MBOU remedy will use treatment to remove contaminants from the extracted groundwater. By utilizing treatment as a significant element of the remedy, the remedy will support the statutory preference that remedies employ treatment as a principal element.

2.12.6 Five-Year Review Requirements

Because this remedy will result in hazardous substances, pollutants, or contaminants remaining onsite above levels that allow for unlimited use and unrestricted exposure, a policy review will be conducted within 5 years after completion of construction to ensure that the remedy is, or will be, protective of human health and the environment.

2.13 Documentation of Significant Changes

The Proposed Plan for the MBOU was released for public comment on January 24, 2022. The Proposed Plan identified as EPA's preferred alternative the groundwater extraction, treatment, conveyance, and monitoring facilities included in Alternative 3.

EPA has carefully considered all comments submitted during the public comment period and determined that no changes are needed to the preferred alternative identified in EPA's January 2022 proposal.

Part 3: Responsiveness Summary

The purpose of this Responsiveness Summary is to provide EPA's responses to comments received on the January 2022 Proposed Plan for the MBOU of the RFF Site. During the public comment period, EPA received six sets of comments on its proposal. All comments were submitted electronically (by email).

The six sets of comments can be summarized as follows.

- All six sets of comments were from public agencies located at or near the Site.
- Four of the six sets of comments were from public water suppliers affected by or with an interest in groundwater contamination in the RCB.

3.1 Stakeholder Issues and Lead Agency Responses

One comment supports EPA's preferred remedial alternative. A second comment expresses a preference for remedial alternatives that make use of an existing network of groundwater recharge basins known as the Cactus Basins. EPA's response to these comments is that the selected remedy includes use of the Cactus Basins for recharge as one of several end use options for the groundwater extracted and treated as part of the cleanup.

A third commentor recommends that EPA choose the remedial alternative that minimizes disruption to local communities.

One comment questions an assumption (the assumed water treatment location for groundwater extracted in the leading-edge area) made in the evaluation of the remedial alternatives. EPA responds that the water treatment location assumed in the evaluation of remedial alternatives does not commit or bind EPA to the assumed location. As stated in the proposed cleanup plan and ROD, a decision about the water treatment location will be made during the design phase of the project.

One comment questions whether the groundwater contamination addressed by the MBOU has been adequately characterized. EPA responds that the extent of contamination has been characterized to develop and select a remedy. EPA completed a multi-year remedial investigation which included the installation and sampling of 25 groundwater monitoring wells. Most of the wells are multi-depth wells which allow the collection of discrete groundwater samples from five or more depths per well. Groundwater sampling activities will continue in support of the design of the MBOU remedy and to evaluate the performance of the remedy after it begins operation. EPA expects the performance monitoring activities to include the groundwater monitoring downgradient of the leading-edge groundwater extraction location.

One comment expresses disappointment about a lack of participation in the development of the proposed cleanup plan and requests that EPA hold a public meeting in the City of Rialto to provide notice to the community about its proposal. EPA responds that it provided ample notice to the community about its proposal through a notice of availability published in a local newspaper, an announcement placed on the EPA Site webpage, an email announcement, and postcards sent by regular mail to parties on EPA's mailing list. EPA did not hold an in-person public meeting in the Rialto area due to the COVID-19 pandemic.

Several comments relate to topics to be addressed after EPA selects a remedy (i.e., during the design, permitting, construction, or monitoring of the remedy). The topics include the water treatment location (recommending treatment close to the leading-edge extraction location and the use of existing wells and water treatment systems operated by the City of Colton), the chemicals in the groundwater which will require treatment, the end use of the treated groundwater (recommending that EPA maximize use of the treated groundwater for potable water use), where groundwater may be recharged (recommending use of the existing Cactus Basins), and the need to minimize risks and environmental harm to the community during the cleanup. EPA responds that it has convened a design working group, which includes representatives of the cities and agencies most affected by decisions to be made during design, to discuss and provide input to EPA on key design decisions.

Two comments address the importance of not delaying the cleanup.

No single issue was raised by a significant number of commenters. Because EPA did not receive a large number of comments, and the comments address a variety of issues, EPA has prepared point-by-point responses to all comments received. The responses are provided in Appendix A, along with the comments in their entirety.

3.2 Technical and Legal Issues

Technical or legal issues raised by the comments are addressed in the point-by-point responses provided in Appendix A.

Appendix A
Detailed Responses to Comments

Comments by Marcus L. Fuller, City Manager, sent on behalf of the City of Rialto. Comment letter dated February 22, 2022

Comment Rialto-1. Why was the City of Rialto not invited to participate in the development of the Feasibility Study Report prepared in coordination by US EPA and Goodrich / UTC and their consultants? As a community that first raised awareness of the perchlorate contamination in the Rialto-Colton groundwater basin leading to the Consent Decree causing its cleanup, the City as an important stakeholder and municipal water supplier, should have been consulted prior to EPA's approval of the Feasibility Study Report and its public release as part of the proposed cleanup plan.

↳EPA Response: EPA agrees that the city is an important stakeholder in the cleanup and is formally responding to the city's comments and concerns in this Responsiveness Summary. Before releasing its proposed cleanup plan, EPA representatives discussed the cleanup with city staff and elected officials on multiple occasions. EPA carefully considered the city's comments before finalizing its cleanup plan and, as explained below, has determined that most of the city's comments are relevant to decisions to be made after the cleanup plan is finalized, during the design of the selected remedy.

Comment Rialto-2. Alternative 3 is identified by EPA as its Preferred Alternative and includes Alternatives 1 and 2 to allow for extraction and treatment for both drinking water supply and groundwater recharge dependent upon the availability of groundwater rights for extraction. Extraction is proposed in the "leading-edge" area of the groundwater contamination and is a key component of the Preferred Alternative. Extraction would begin after new facilities (conveyance systems including pipelines, pumps and tanks) are constructed and become operational. The Feasibility Study Report assumed treatment of contaminated groundwater extracted from the leading-edge area occurring at the West Valley Water District (WVWD) Headquarters far from the leading-edge area where there are two existing treatment systems located nearby (one at Rialto High School owned by WVWD, and one located just east of Macy Street and north of Ellen Street owned by the City of Colton). Why weren't these two treatment plants assumed to be used for treatment of contaminated groundwater in the leading-edge area in EPA's Feasibility Study Report as opposed to the treatment plant at WVWD Headquarters located several miles away?

↳EPA Response: The June 2021 Feasibility Study Report prepared in support of EPA's selected remedy assumed treatment of extracted groundwater at the West Valley Water District Headquarters (WVWD HQ) site to reflect a 2017 agreement between Goodrich Corporation and WVWD. The agreement makes available existing water treatment systems at the HQ site and rights to pump water in the Rialto-Colton Groundwater Basin (RCB). As noted in the comment, the use of the WVWD HQ site is an assumption. EPA is not selecting water treatment locations as part of this Record of Decision (ROD) and is not committed to or bound by the treatment location assumed in the Feasibility Study Report. As stated in the proposed cleanup plan and this ROD, a decision about the water treatment location will be made during the design phase of the project. EPA has convened a design working group, which includes representatives of the cities and agencies most affected by decisions to be made during design, to consider treatment sites other than the WVWD HQ site, including the two locations identified in the comment.

EPA supports the use of the Rialto High School water treatment location over the WVWD HQ location due to the shorter distance to the planned leading-edge extraction location. Other benefits include: the availability of two ion exchange systems at the Rialto High School location; proximity to the WVWD water distribution system; and provisions for use of the location in the 2017 Site remediation agreement between Goodrich Corporation and WVWD.

Comment Rialto-3. EPA should identify in its proposed cleanup plan the alternative that will result in the least disruption to the communities of Colton, Rialto and San Bernardino. The alternative suggested in EPA's Feasibility Study Report with treatment of contaminated groundwater occurring at WVWD Headquarters located at Baseline Road / Cactus Avenue will require construction of approximately 5 miles of new pipelines in City streets, to convey untreated contaminated groundwater with the potential for future leakage and environmental harm to an area designated as both disadvantaged and environmental justice communities. These new pipelines will cause City residents and business owners to face a permanent risk of exposure to contaminated groundwater either through the rupture, leakage or other failures of the new facilities to be constructed. These risks will have a detrimental impact on the communities through which they extend. The proposed cleanup plan does not identify this risk or how it will be minimized or avoided.

↳EPA Response: EPA agrees that it should attempt to minimize disruption to nearby communities caused by the construction and operation of its selected remedy, including the temporary disruption associated with well, treatment plant, and pipeline construction.

The comment expresses concern about the potential for pipelines carrying contaminated groundwater to fail and cause environmental harm. EPA believes that the risk of failure is low, the likelihood that city residents and business owners would be exposed to contaminated groundwater in the event of a pipeline failure is low, and that if a pipeline failed and exposure occurred, there would be little or no risk to human health or the environment. The primary contaminant in the groundwater is perchlorate, which presents a health risk if ingested. Perchlorate is not volatile and does not present a health risk via inhalation. Nor does perchlorate, at the levels present in the groundwater, present a health risk from occasional contact with the skin. A preliminary estimate of the perchlorate concentration in groundwater extracted in the leading-edge area is less than 35 micrograms per liter. Using this concentration and the EPA toxicity value for perchlorate (oral reference dose of 7.0 x 10-4 mg/kg-day), exposure to the community during a pipeline leak or equipment failure would not result in an appreciable risk.

The groundwater may contain a second contaminant, TCE, at low levels. A preliminary estimate of the TCE concentration in groundwater extracted in the leading-edge area is less than 1 microgram per liter. This concentration is below the level allowed in drinking water (5 micrograms per liter [µg/L]) and would not present a significant health risk in the unlikely event of a pipeline leak.

Comment Rialto-4. EPA should ensure the risks imposed on the community through the proposed cleanup plan are minimized to the greatest extent possible by identifying in the final cleanup plan a location for the treatment of extracted contaminated groundwater closest to the point of extraction as possible thereby reducing the length of any new conveyance pipelines that are required. The proposed cleanup plan does not address this and leaves the location of the treatment plant to be determined at a later date.

↳EPA Response: EPA's selected remedy will clean up contamination in the community's drinking water. EPA does not agree that pipelines carrying contaminated water pose a significant risk to the community but will, nevertheless, consider the city's preferences, and those of other

interested parties, in making decisions about water treatment locations during the design phase of the project. Please also see responses to comments Rialto-2 and Rialto-3.

Comment Rialto-5. The proposed cleanup plan states: "The Preferred Alternative was developed to take full advantage of a 2017 agreement between Goodrich Corporation and WVWD." The proposed cleanup plan further states: "The agreement is expected to speed the cleanup by making WVWD infrastructure and water rights available. The infrastructure made available by the agreement includes an existing well in the mid-basin area (the Rialto-06 well), an existing pipeline that conveys water from the well to the existing WVWD water treatment systems, and use of existing water treatment systems capable of removing perchlorate." The cities of Rialto and Colton, and WVWD, are cooperative partners in the management of the Rialto-Colton groundwater basin, and the referenced 2017 agreement should not be solely relied upon as the basis for the proposed cleanup plan, nor the final cleanup plan approved by EPA. Why weren't Colton and Rialto consulted prior to EPA identifying and selecting its Preferred Alternative?

↳EPA Response: EPA agrees that the 2017 agreement should not be the sole basis for its final cleanup plan (or the sole basis for decisions made during the design phase of the project). Please see responses to comments Rialto-3 and Rialto-4.

The referenced statement ("*The agreement is expected to speed the cleanup by making WVWD infrastructure and water rights available*") was intended to communicate that using existing infrastructure already committed to the cleanup should speed the cleanup effort and minimize construction impacts on the local community. Siting and constructing a new water treatment plant or other new infrastructure is likely to take much longer than making use of existing infrastructure. Negotiating an agreement for the use of infrastructure not addressed in the 2017 agreement could also cause significant delay.

Comment Rialto-6. The proposed cleanup plan acknowledges that "Groundwater extraction, water treatment, and pipeline locations may change from those assumed in the Feasibility Study Report. Final locations would be chosen during the remedial design process, after EPA finalizes its cleanup plan. During the design process, EPA would also determine which existing water treatment systems would be used and whether injection wells are needed to return the treated groundwater to the aquifer." EPA should only consider the existing water treatment systems located closest to the leading-edge area for treatment of contaminated groundwater extracted in that area.

↳EPA Response: Please see responses to comments Rialto-3, Rialto-4, and Rialto-5.

Comment Rialto-7. The proposed cleanup plan states: "One or more new wells may be needed in the leading-edge area to supplement the existing well, along with a pipeline to convey water from the new well to the water treatment location. Easements or other access arrangements would probably be required for new pipelines." Approvals from the cities of Colton, Rialto and San Bernardino will also be required to the extent new conveyance pipelines are proposed within City streets. Plans identifying the location of any new conveyance pipelines and other facilities located in public rights-of-way will require review and approval by the City. Encroachment permits will be required to authorize construction of any new facilities in public rights-of-way. All these City actions will require EPA to ensure to the City that the final cleanup plan approved by EPA minimizes to the greatest extent possible any required use of public rights-of-way.

The City reserves the right to deny approval of plans or issuance of encroachment permits for excessive lengths of conveyance pipelines that are proposed by EPA in the final cleanup plan that are unnecessary given the availability of existing facilities located closer to the extraction point in the leading-edge area.

Under "Implementability" of the proposed cleanup plan, EPA acknowledges "Alternative 2 is likely to face obstacles related to the recharge and/or reinjection of the treated groundwater. It would require coordination with other users of the recharge basins, and is expected to require an agreement with local water management agencies for use of the recharge basins. It may also require additional coordination with local water utilities for use of their infrastructure for non-drinking water end uses and the acquisition of land for and construction of injection wells. Alternative 3 would also require coordination with other users of the recharge basins, land acquisition, and an agreement to allow recharge and/or reinjection of treated groundwater, although the amount to be recharged and/or reinjected would be less." EPA has failed to identify the City's concerns previously provided to EPA on the disproportionate impact on the City's disadvantaged and economic justice areas on the proposal in its Feasibility Study Report caused by construction of excessive lengths of new conveyance pipelines for transmission of untreated contaminated groundwater, and the opposition by the community to this proposal. Further, any construction of new pipelines or other facilities within public rights-of-way will require the express approval of the respective local agency (Colton, San Bernardino, or Rialto).

We are aware of a concern by WVWD of its continuing obligations to operate the treatment facility at its Headquarters location due to a provision in its Funding Agreement with the California Department of Public Health (Agreement No. 84-10C15 and Project No. P84-3610004-801). Specifically, Section 9 "Operation and Maintenance of Project" indicates that "Upon project completion, and for a period of 20 years, which is the reasonably expected useful life of the Project, Supplier shall, as further consideration for this funding, commence and continue operations of the Project; cause the Project to be operated in an efficient and economical manner; provide for the making of all repairs, renewals, and replacements necessary for the effective operation of the Project; and cause the Project to be maintained in as good of condition as upon its construction, ordinary and reasonable ware and depreciation excepted. Failure by Supplier to operate and maintain the Project in accordance with this provision may, at the option of State, be considered a material breach of Agreement and may be treated as a default under Article A-24 of the Standard Conditions." The City reasonably believes this provision has prompted WVWD to pursue in EPA's Feasibility Study Report an alternative that ensures the treatment facility at its Headquarters located furthest from the leading-edge area is identified for continued treatment of contaminated groundwater. EPA should not rely upon this as the basis for a final cleanup plan. EPA should, in fact, base its decision on the alternative that provides the least environmental harm to the community.

↳EPA Response: EPA is aware of the environmental justice issues facing the community impacted by the contamination and will continue to work with the communities to address these issues as they arise during the design, construction, and operation of its cleanup remedy. Please also see responses to comments Rialto-2 through Rialto-5.

Comment Rialto-8. The City requests a public meeting to be scheduled by EPA in the City of Rialto as an opportunity for EPA to provide notice to the community of the proposed cleanup plan and its analysis of the alternatives considered, including the construction of any new conveyance pipelines and facilities for transmission of untreated contaminated groundwater.

↳EPA Response: EPA provided notice of its proposed cleanup plan to the community through a notice of availability published in the San Bernardino Sun newspaper, an announcement placed on the EPA Site webpage at https://www.epa.gov/superfund/rff, an email announcement sent to representatives of the City of Rialto and other local stakeholders, and postcards sent by regular mail to approximately 516 parties on EPA's RFF Site mailing list. EPA also recorded a presentation that describes EPA's proposal and the alternatives EPA considered and made the presentation available on its Site webpage. Due to the coronavirus disease 2019 (COVID-19) pandemic, EPA did not hold a public meeting in the Rialto area.

EPA will continue to work with representatives of the City of Rialto and other affected agencies during the design of the remedy. Please also see responses to comments Rialto-2 through Rialto-5.

Comments by Wendy Wang, BEST BEST & KRIEGER LLP, sent on behalf of the City of Colton. Comment letter dated February 22, 2022

<u>Comment Colton-1.</u> Delays to implementation of an adequate cleanup plan would result in further migration of the plume and potential contamination of wells down gradient from the current location of the plume.

The Proposed Plan as currently drafted does not provide the most expedient cleanup solution and does not mitigate the continual plume migration while the final OU-2 cleanup remedy is being planned/constructed. As an initial matter, Colton is concerned with the time it would take to implement the Proposed Plan, which would allow the plume to migrate beyond the current leading-edge area and impact Colton's other wells and water supplies. Specifically, if the plume migration is not stopped, the plume may migrate to the Riverside North Basin and impact Colton's wells in that basin.

As the Proposed Plan acknowledges, Colton has an existing ion exchange system in the mid-basin that is capable of treating and removing contaminations from the groundwater. Colton also has wells capable of pumping contaminated groundwater and existing infrastructure to transport the contaminated groundwater to its treatment plant. Colton's existing facilities should be used either as part of the permanent solution or as an intermediary measure to mitigate plume migration while the permanent solution is being constructed. Use of Colton's existing facilities will expedite the cleanup process and mitigate any impact of the plume migration while additional infrastructure for the OU-2 is constructed

↳<u>EPA Response</u>: EPA agrees that delays in implementing its cleanup plan should be minimized to the extent possible. The design working group described in response to comment Rialto-2 is considering the feasibility, advantages, and disadvantages of using Colton's existing wells, water treatment systems, and pipelines and whether their use is likely to expedite the cleanup and minimize plume migration in the leading-edge area. The group has also been asked to evaluate the feasibility of continuing to operate existing Colton wells and ion exchange systems in the mid-basin area as an intermediary measure.

Also please see responses to comments Riverside-2 and Riverside-4 on perchlorate detected in Colton's Well 24 and the past impacts of Colton's wells on plume movement in the leading-edge area.

Comments by Todd M. Corbin General Manager, City of Riverside Public Utilities, sent on behalf of the City of Riverside. Comment letter dated February 22, 2022

Comment Riverside-1. The Rockets, Fireworks, and Flare plume has traveled a great distance from the original site and continues to advance further within and into the Riverside North Basin. The plume maps included in the June 11, 2021 Feasibility Study OU-2, demonstrate that the extent of the leading edge of the plume has not been fully characterized. Furthermore, Figure 2-4 depicts the perchlorate plume using the State's Maximum Contaminant Level (MCL) of 6 parts per billion (ppb) as the metric to define the plume. In moving forward with characterizing the OU-2 remediation plan, the plume should be defined by the State's Perchlorate Detection Limit for Reporting Purposes (DLR), or by commonly used laboratory low level perchlorate detection methods which in many cases have a detection limit of 0.1or 0.5 ppb. Given that the technology to detect perchlorate down to these low levels is widely practiced and available, and since the Public Health Goal (PHG) is 1 ppb; plume concentrations below 6 ppb should be identified as a best practice and to provide transparency to the ratepayers who can be adversely impacted by contaminants found in their water supply. Furthermore, Riverside believes that additional monitoring wells are needed in the Riverside North Basin to identify the full extent of perchlorate originating from the RFF site which is one of the sources of perchlorate in the Rialto-Colton Basin.

↳EPA Response: EPA believes that the extent of leading-edge contamination has been characterized to the extent necessary to develop and select a remedy. Groundwater sampling activities will continue in support of the design of the MBOU remedy and to evaluate the performance of the remedy after it begins operation. Performance monitoring activities may include the construction of additional groundwater monitoring wells downgradient of the leading-edge groundwater extraction location.

The comment notes that Figure 2-4 in the 2021 Feasibility Study report depicts the perchlorate plume using the State's maximum contaminant level (MCL) of 6 parts per billion (ppb) and requests that the plume be defined by California's Detection Limit for Reporting Purposes (DLR), or by commonly used laboratory low level perchlorate detection methods. The current DLR for perchlorate is 2 µg/L. EPA agrees that perchlorate concentrations should be measured to levels lower than the State MCL of 6 µg/L. During the remedial investigation, EPA generally achieved detection limits of 0.1 to 0.5 µg/L. In addition to depicting the approximate area of perchlorate contamination exceeding the 6 µg/L MCL, Figure 2-4 shows the measured perchlorate concentration at each of 24 monitoring wells in the OU2 area whatever the measured concentration. Concentrations are reported as low as 0.1 µg/L.

Comment Riverside-2. The OU-2 proposed plan identifies the vicinity of Colton wells 15, 17 & 24 for extracting and treating groundwater. This strategy is intended to limit the advancement of the synthetic perchlorate plume originating from the RFF Site from continuing into the Riverside North Basin. However, perchlorate that has traveled past the planned OU-2 remediation vicinity will continue to be present in the Riverside Basin and must be addressed and removed.

↳EPA Response: The selected remedy will include monitoring to provide information on perchlorate that has moved past the leading-edge extraction area. These data will be used to

evaluate the performance of the project, optimize its operation, and evaluate the need for any modifications to the remedy.

Between 2015 and 2020, perchlorate concentrations in Colton Well 24 (located downgradient of the planned leading-edge extraction area) ranged from 6.3 to 9.7 µg/L. Some of the perchlorate present in groundwater at Colton 24 and other locations in the leading-edge area appears to originate from the past use of fertilizers containing trace amounts of perchlorate. Perchlorate-contaminated fertilizers were applied to high value crops like citrus once common in the mid-basin area. EPA's selected remedy does not target cleanup of naturally occurring perchlorate or perchlorate from the use of perchlorate-containing fertilizer, although it will remove perchlorate from non-Site sources where mixed with Site-related contamination from the 160-acre area.

In 2017, a groundwater sample was collected from Colton-24 and analyzed for stable oxygen and chlorine isotopes to help distinguish between Site-related perchlorate and perchlorate likely to be naturally occurring or present from past fertilizer use. Based on the stable isotope concentrations, the perchlorate measured in the well was estimated to be 28% synthetic. The non-synthetic fraction was assumed to be from perchlorate-contaminated fertilizer use or naturally occurring. As an indicator of the amount of Site-related perchlorate that may have moved beyond the planned leading-edge extraction area, a 28% synthetic fraction at 10 µg/L perchlorate represents a synthetic perchlorate concentration of less than 3 µg/L.

Perchlorate concentrations in Colton Well 24 from 2015 to 2020 have been added to the Administrative Record.

Comment Riverside-3. Success criteria that the EPA will use to evaluate the effectiveness of the OU-2 remediation efforts should consider using the State's DLR as a metric to ensure that perchlorate originating from the RFF Superfund Site be removed from the Inland Empire's water supply consistent with State of California public health guidelines. Communities within the Inland Empire have a right to clean, reliable supplies of water, as is echoed in the State's Human Right to Water legislation. Treatment technologies for removing perchlorate from water have been in use for multiple decades now and have demonstrated the efficient and economic feasibility of removing perchlorate from water sources to non-detectable levels such as California's DLR. Furthermore, State regulations are continuing to evolve, and it is anticipated that the State of California will lower the Maximum Contaminant Level to be consistent with the Public Health Goal.

In 2004, California's PHG for perchlorate was 6 ppb. However, in 2015, the Office of Environmental Health Hazard Assessment updated the PHG to 1 ppb to reflect the current science on health impacts of perchlorate on infants, and the amount of water they consume. In 2017, the Division of Drinking Water recommended establishing a lower DLR to gather additional occurrence data and consider revising the MCL if the new data supports the development of a new standard. The revised perchlorate DLR was approved and became effective July 1, 2021. The EPA's evaluation of the plume using 6 ppb seems to be counter to the State's regulation in re-evaluating the MCL in the near future.

↳EPA Response: The Superfund law (CERCLA § 121) requires that Superfund cleanups be protective of human health and the environment and comply with "Applicable or Relevant and Appropriate Requirements" (ARARs). State requirements can be ARARs if they are more stringent than Federal requirements and have been promulgated, meaning that they are of general applicability and legally enforceable. EPA has determined that the California Maximum Contaminant Level for perchlorate in drinking water is relevant and appropriate and should be used as the cleanup level for the groundwater aquifer.

The California DLR is neither applicable nor relevant and appropriate as a cleanup level. A DLR is defined in 22 CCR § 64671.15 as the "minimum level at or above which any analytical finding of a contaminant in drinking water resulting from monitoring … shall be reported."

As the comment notes, MCLs can change and California could, at a future date, reduce the MCL for perchlorate. A change in the perchlorate MCL would have an impact on the cleanup if the current MCL is no longer protective of human health. EPA will periodically evaluate the protectiveness of its selected remedy to ensure that cleanup requirements remain protective. Formal evaluations (5-year reviews) will occur every 5 years as long as hazardous substances, pollutants, or contaminants remain onsite above levels that allow for unlimited use and unrestricted exposure.

The comment notes that treatment technologies can remove perchlorate from water sources to non-detectable levels such as the California's DLR. We expect that the treatment technologies used as part of the MBOU remedy will remove perchlorate from the groundwater to well below the 6 µg/L MCL. Treated groundwater used as drinking water will also be subject to permit requirements set by the State of California.

Comment Riverside-4. Once implemented, an adaptive management strategy should be initiated to evaluate the OU-2 treatment efforts and to ensure groundwater quality is significantly improving and that the remediation plan is not adversely impacting groundwater quantity in the Riverside North Basin. The existing Colton production wells have been active for the last 30+ years and yet perchlorate has continued to bypass the wells and enter the Riverside North Basin. A robust monitoring well network should be considered in conjunction with the extraction well(s) to continually evaluate the effectiveness of the remediation and to monitor any potential downgradient impacts.

↳EPA Response: EPA agrees that its selected remedy should include monitoring of groundwater quality and periodic evaluations of the effectiveness of the remedy. Annual Performance Evaluation Reports will evaluate compliance with EPA's cleanup objectives, which include preventing the spread of Site-related contamination and reducing contaminant concentrations in groundwater to the cleanup levels identified in this ROD. In addition, "5-year reviews" will be completed as long as hazardous substances, pollutants, or contaminants remain onsite above levels that allow for unlimited use and unrestricted exposure.

The comment includes a statement about the impact of existing Colton production wells on contaminant movement. EPA is aware of three Colton wells in or near the planned leading-edge extraction area, known as Colton wells 15, 17, and 24. Based on data collected during the MBOU remedial investigation, Colton Well 15 appears to be located to the east of the Site-related contamination and its use probably has a limited impact on the migration of Site contaminants. Pumping at Colton 17 and 24 has probably helped limit the migration of Site-related contamination but pumping rates at these wells have been less than the expected remedial pumping rate in the leading-edge area and the Colton wells are not optimally placed or constructed (e.g., they extract water over a large vertical interval) to intercept Site-related contamination. According to pumping records provided by the City of Colton, Well 17 operated at about 25% of the preliminary leading-edge pumping rate over the last 10 years (2011–2021) and did not operate between September 2015 and August 2018. Pumping records for Colton's 15, 17 and 24 wells have been added to the Administrative Record.

Comment Riverside-5. By extracting contaminated groundwater in the Rialto-Colton Basin, the remediation plan may limit the volume of underflow that historically flowed into the Riverside North. Basin. Two of the treatment alternatives include recharging all or a portion of the extracted and

treated water at the Cactus Basins. Riverside is in favor of these alternatives because it could alleviate any potential water level impacts that could be caused by restricting underflow. Riverside encourages the EPA to consider installing groundwater monitoring wells in the vicinity of Cactus Basin so that the treated, reintroduced water is fully characterized, and any impacts or benefits are understood.

In addition to the Rialto Decree, the Western-San Bernardino Judgment provides a framework for extractions occurring within the Rialto-Colton and Riverside Basin. Extractions from the Colton Basin and Riverside North for use within San Bernardino Valley Municipal Water District's service area are not limited. However, San Bernardino Valley shall provide the water to maintain a water level of 822.04 feet above mean sea level computed by averaging 3 index wells. 2018 marked the first year since implementation of the 1969 Western San Bernardino Judgment in which the average water level occurred below the threshold. Water levels have since continued to occur below the threshold. Riverside requests the EPA ensure that the remediation plan is neutral to, or benefits, groundwater levels within the vicinity of the index wells, which are located in the vicinity of the Santa Ana River, downgradient to the Interstate 10 and 215 interchange.

↳EPA Response: The comment expresses concern that EPA's selected remedy could limit underflow into the Riverside North Basin. We note that the remedy is not expected to result in a significant change in the volume of groundwater being extracted from the RCB. Groundwater extracted as part of the remedy and delivered for potable use will comply with the 1961 RCB decree and associated water rights limitations. We anticipate that any water extracted by the remedy that exceeds the available water rights would be returned to the basin via groundwater recharge or reinjection. Because the remedy is not expected to result in a substantive change to the volume of water extracted, the remedy is unlikely to result in a significant change in groundwater flow into the Riverside North Basin.

We note Riverside's preference for alternatives that include recharge at the Cactus Basins. Potential recharge/reinjection is a component of the selected remedy, with the locations to be selected during the design phase. The remedy will include monitoring in the vicinity of location(s) where the treated groundwater from the remedy is recharged or reinjected.

Given the distance from the leading-edge groundwater extraction area to the Interstate 10 and Interstate 215 interchange and that the remedy is not expected to significantly change the volume of water extracted from the RCB, we do not expect the cleanup to have an impact on groundwater levels at the index wells monitored as part of the Western-San Bernardino Judgment.

Comments by Ricky S. Manbahal, General Manager, sent on behalf of the West Valley Water District. Comment letter dated February 23, 2022

Comment WVWD-1. Support for Alternative 3: As part of its support for Alternative 3, WVWD notes that it is critical to expeditiously pursue the remedial objectives of preventing the spread of contamination the removal of perchlorate from the leading edge of the contamination plume to prevent the spread of contaminated groundwater and human exposure to site contaminants. Utilizing WVWD's pumping rights and the existing agreement as part of Alternative 3 will ensure that the removal of the contaminated groundwater from the aquifer will be completed in a timely manner.

↳EPA Response: EPA notes WVWD's support for Alternative 3 (EPA's preferred alternative) and agrees it is critical to minimize delays in implementing its selected remedy.

Comment WVWD-2. Underground Pipeline: Transmission of raw water with perchlorates above the maximum contaminant level (MCL) has been voiced as a potential public health concern by a significant stakeholder. The EPA, whose mission is to protect public health, should address this concern by either clearly explaining how this concern is being mitigated nationwide (if indeed it is a public health concern) or otherwise stating why mitigation is not required (if indeed that is EPA's opinion). We are aware of many influent pipelines running throughout the country carrying water above drinking water MCLs, which EPA has seemingly not prohibited or required mitigation. We bring up this concern because there is currently an influent pipeline running in the City of Rialto with perchlorate above the MCL.

↳EPA Response: EPA does not believe that pipelines carrying contaminated groundwater from the planned extraction locations to the water treatment location(s) will present a significant public health risk to the community in the unlikely event the pipelines leak. Please see the response to comment Rialto-3.

Comment WVWD-3. Basin Recharge: WVWD anticipates that one of the other stakeholders may make comments preferring any recharge be done at recharge basins and not via injection wells. WVWD would take no exception to such comment and in response would further state that if surface recharge is selected that such recharge be done at the Cactus Basins (rather than at the Mills Basin), which would provide more widespread public benefit to the stakeholders of the Rialto Basin because that location — further up in hydraulic gradient of the basin and within the perchlorate plume area — would provide a positive groundwater dilution effect.

↳EPA Response: Decisions about the need for groundwater injection wells and the use of existing recharge basins will be made during the design phase of the project.

Comment WVWD-4. Strongly Supports: WVWD strongly supports the comments made from the representatives of the EPA at the 1/31/2022 workgroup meeting and reflected in the EPA plan, where it was stated that a desirable secondary public benefit for this project is to maximize the use of the Leading Edge Area effluent for potable water use first and to use the effluent for recharge as minimally as possible.

↳EPA Response: The comment appears to refer to a brief summary of EPA's proposed MBOU cleanup plan provided at a January 2022 design workgroup meeting. Similar statements are included in EPA's proposed MBOU cleanup plan. The plan states that "*After the contaminants are removed, the extracted and treated groundwater would be used as drinking water supply,*

recharged, or reinjected into the aquifer. Most of the water is expected to be used as drinking water supply. Any treated water not used for drinking water supply, because of water rights or other limitations, would be recharged or reinjected into the aquifer."

Comment WVWD-5. Strongly Supports: WVWD, as a fellow purveyor of the Rialto Basin, supports the City of Colton's comments made at the 1/31/2022 workgroup meeting stating that the operation of seizing the perchlorate plume at the Leading Edge Area should not be unduly delayed.

↳EPA Response: Comment noted.

Comment WVWD-6. 1,2,3-Trichloropropane (TCP) above the MCL and as high as 25 ppt was detected in January 2022 in a well a bit upstream of the Leading Edge Area. If TCP is detected in the new well in the Leading Edge Area, accommodation for this will be required. Does the FBR biological system treat TCP or, alternatively, do the other 2 proposed treatment sites have room to install GAC vessels to treat TCP?

Nitrates above the MCL are known to be found in wells near and upstream of the Leading Edge Area. If the new well at the Leading Edge Area has nitrates above the MCL, accommodation for this will be required. Does the FBR biological system treat nitrates or, alternatively, do the other two proposed treatment sites have room to install additional IX vessels targeting nitrates? (It is WVWD's understanding that IX vessels targeting perchlorate may not sufficiently address nitrates, in which case another set of IX vessels would be required). Additionally, brine disposal will also need to be addressed.

↳EPA Response: EPA expects to monitor for a wide range of constituents in the groundwater during the design phase of the remedy to ensure that the water treatment systems are capable of achieving all standards relevant to the planned end uses of the water.

In response to the comment, EPA obtained laboratory reports which indicate that the referenced concentration of 1,2,3-Trichloropropane (1,2,3-TCP) was detected in a WVWD water supply well located about one mile to the northwest of the planned leading-edge extraction area. Additional data obtained from the same well indicates that 1,2,3-TCP was detected in 2018, 2019, 2020, and 2021 at concentrations between 5 and 8 nanograms per liter (ng/L). The California MCL for 1,2,3-TCP in drinking water is 5 ng/L.

EPA also obtained publicly available data which indicate that nitrate has been detected at a WVWD water supply well located about one mile to the northwest of the planned leading-edge extraction area at concentrations above the Federal and State MCL for nitrate in drinking water.

During the design phase of the project, EPA will consider the likelihood that 1,2,3-TCP, nitrate, or other constituents not identified as chemicals of concern will need to be removed from groundwater extracted as part of the MBOU remedy, and the capability of existing water treatment systems that may be used as part of the remedy to remove any constituents requiring treatment.

Information provided by WVWD on 1,2,3-TCP and nitrate concentrations in selected WVWD wells, and other water quality information obtained from publicly available sources, have been added to the Administrative Record.

Comment WVWD-7. The ultimate selection of the treatment site should consider the possibility of perchlorate, TCP, TCE, and nitrates being simultaneously present in the new Leading Edge Area well at levels above the MCLs.

↳EPA Response: Comment noted. EPA agrees that the availability of land, among other factors, should be considered in choosing the water treatment location.

Comment WVWD-8. Page 14 of the proposed clean-up plan (and other pages) state that WVWD's Pump Year-ending 2020 rights were available at an average rate of 2,065 gpm. WVWD's data tracking shows that the actual water rights in that production year that were available to the project were 3,561 AF, which calculates out to a higher average gpm than the one stated.

↳EPA Response: WVWD provided information to EPA clarifying the basis for the comment. WVWD's estimate of the water rights available for the cleanup in the pumping year ending in 2020 (3,561 acre-feet) corresponds to pumping at an average rate of 2,208 gallons per minute, slightly higher than EPA's estimate of 2,065 gpm. The information provided by WVWD has been added to the Administrative Record.

Comment WVWD-9. Extraction in the mid-plume area is identified in the future to decrease to 750 gpm (Page 9 of Cleanup Plan). The party performing said extraction would like to reserve its right to potentially pump at a higher rate than that.

↳EPA Response: As described in the ROD, EPA expects that the groundwater extraction rate at the Rialto-06 well will initially be at or near the capacity of the well and then decrease after extraction in the leading-edge area begins. Exaction rates in the mid-plume area are expected to vary over time, depending on future contaminant concentrations in the groundwater, available water rights, and other factors.

Comments by Anne E. Sturdivant, Assistant Executive Officer, Santa Ana Regional Water Quality Control Board. Comment letter dated February 23, 2022

Comment RWQCB-1. The Cleanup Plan states that groundwater will be treated and may be discharged into the Cactus Basins for infiltration back into the aquifer. The discharges should be implemented in accordance with the substantive requirements of the Santa Ana Regional Water Quality Control Board's (Santa Ana Water Board) Order Number R8-2012-0027, National Pollutant Discharge Elimination System (NPDES) No. CAG918001—"General Groundwater Cleanup Permit for Discharges to Surface Waters of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Petroleum Hydrocarbons, Solvents, Metals and/or Salts." (Order No. R8-2012-0027). On August 23, 2012, the Santa Ana Water Board approved Discharge Authorization and Monitoring and Reporting Program No. R8- 2012-0027-007, under General Order No. R8-2012-0027, authorizing WVWD to discharge treated groundwater, extracted from wells WVWD-11 and Rialto-06, into the Cactus Basins.

The Cleanup Plan also states that the treated groundwater will be reinjected into the aquifer. Reinjection of the treated groundwater should be implemented in accordance with the substantive requirements of Santa Ana Water Board Order No. R8-2002-0033 "General Waste Discharge Requirements for the Reinjection/Percolation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Petroleum Hydrocarbons, Solvents and/or Petroleum Hydrocarbons Mixed with Lead and/or Solvents", as amended by Order No. R8-2003-0085 and Order R8-2013-0020.

The proposed infiltration and/or reinjection of treated groundwater into the aquifer should also be implemented in accordance with the substantive requirements specified in and the State Water Resources Control Board's Antidegradation Policy (Resolution 68-16).

↳EPA Response: EPA anticipates discussing permitting requirements (and/or the substantive requirements of any permits applicable or relevant and appropriate to onsite actions) associated with recharge and reinjection of groundwater extracted and treated as part of the remedy with the Water Board during the design phase of the project.

Comments by MICHAEL R. PERRY, Supervising Planner Environmental Management, San Bernardino County Department of Public Works. Comment letter dated February 22, 2022

Comment SBC-1. We are aware there may be storm drains in and around the site that may be affected by the proposed Project. When planning for or altering existing or future storm drains, be advised that the Project is subject to the Rialto MPD, dated February 2009. It is to be used as a guideline for drainage in the area and is available at the San Bernardino County Department of Public Works-Flood Control Planning Section. Any revision to the drainage should be reviewed and approved by the Jurisdictional Agency. Should construction of new, or alterations to existing storm drains be necessary as part of the Proposed Project, their impacts and any required mitigation should be discussed within the Draft EA and the Groundwater Cleanup Plan before the document is adopted by the Lead Agency

↳EPA Response: The cleanup is being conducted under CERCLA, which is the functional equivalent of the National Environmental Policy Act (NEPA) process. As such, this response action is exempt from the NEPA or California Environmental Quality Act (CEQA) process and an Environmental Assessment (EA) is not being prepared. Also, by law, CERCLA response actions are exempted from requirements to obtain Federal, State or local permits related to any activities conducted onsite. Where applicable, the substantive requirements of the relevant permitting requirements will be followed. EPA will obtain any permits needed for offsite work.

Comment SBC-2. The current Water Spreading Agreement (WSA) with West Valley Water District (WVWD) for Cactus Basin No. 2 required letters of approval from both the United States Environmental Protection Agency and the Regional Water Quality Control Board. Please note that the WSA with WVWD limits the amount of water that may be discharged to the basin on an annual basis. Any new agreements or the amending of the existing agreement should require that the amount of the discharge to the basin be reevaluated by the above listed agencies for approval. The impacts and associated mitigation for increased discharges as well as amendments to the WSA should be included within the Draft EA and Groundwater Cleanup Plan prior to adoption by the Lead Agency.

↳EPA Response: EPA will evaluate the potential impacts of planned recharge on groundwater and contaminant movement during the design phase of the project based on updated estimates of the timing and volume of water proposed for recharge into the Cactus Basins or other recharge basins, if any. EPA will also consult with WVWD and other agencies as appropriate on the need to amend the current WSA or develop a new agreement. As described in response to comment SBC-1, no EA is being prepared.

Comment SBC-3. According to the most recent FEMA Flood Insurance Rate Map, Panels 06071C7920H, 8657H, dated August 28, 2008; and 06071C7940J, 8657J, 8676J, 8677J, 8678J, and 8679J, dated September 2, 2016, the Project lies within A, AE, X-shaded (500-yr. floodplain, protected by a levee), and X. Impacts associated with the project's occurrence in the Flood Zone areas mentioned and their mitigation, should be discussed within the Draft EA and Groundwater Cleanup Plan prior to adoption by the Lead Agency.

↳EPA Response: Consistent with Executive Order 11988 on Floodplain Management, EPA will determine during the design phase if planned remedial activities may occur in a floodplain and avoid adverse effects to the extent possible.

Comment SBC-4. The proposed Project is adjacent to a San Bernardino County Flood Control District (SBCFCD) facilities and right-of-way for the Rialto Channel/Cactus Basins, (2-120/2-104) Be advised that any encroachments on SBCFCD's facilities or right-of way will require a permit from the SBCFCD prior to start of the project. If you have any questions regarding this process, please contact the FCD Permit Section at (909) 387-7995. The necessity for permits, and any impacts associated with them, should be addressed in the Draft EA and Groundwater Cleanup Plan prior to adoption and certification.

↳EPA Response: EPA will obtain any permits needed for offsite work. As stated in the response to comment SBC-1, permits are not required for onsite work.

ALTA COMMITMENT FOR TITLE INSURANCE (07-01-2021)

ISSUED BY
STEWART TITLE GUARANTY COMPANY

NOTICE

IMPORTANT - READ CAREFULLY: THIS COMMITMENT IS AN OFFER TO ISSUE ONE OR MORE TITLE INSURANCE POLICIES. ALL CLAIMS OR REMEDIES SOUGHT AGAINST THE COMPANY INVOLVING THE CONTENT OF THIS COMMITMENT OR THE POLICY MUST BE BASED SOLELY IN CONTRACT.

THIS COMMITMENT IS NOT AN ABSTRACT OF TITLE, REPORT OF THE CONDITION OF TITLE, LEGAL OPINION, OPINION OF TITLE, OR OTHER REPRESENTATION OF THE STATUS OF TITLE. THE PROCEDURES USED BY THE COMPANY TO DETERMINE INSURABILITY OF THE TITLE, INCLUDING ANY SEARCH AND EXAMINATION, ARE PROPRIETARY TO THE COMPANY, WERE PERFORMED SOLELY FOR THE BENEFIT OF THE COMPANY, AND CREATE NO EXTRACONTRACTUAL LIABILITY TO ANY PERSON, INCLUDING A PROPOSED INSURED.

THE COMPANY'S OBLIGATION UNDER THIS COMMITMENT IS TO ISSUE A POLICY TO A PROPOSED INSURED IDENTIFIED IN SCHEDULE A IN ACCORDANCE WITH THE TERMS AND PROVISIONS OF THIS COMMITMENT. THE COMPANY HAS NO LIABILITY OR OBLIGATION INVOLVING THE CONTENT OF THIS COMMITMENT TO ANY OTHER PERSON.

COMMITMENT TO ISSUE POLICY

Subject to the Notice; Schedule B, Part I - Requirements; Schedule B, Part II - Exceptions; and the Commitment Conditions, STEWART TITLE GUARANTY COMPANY, a Texas corporation (the "Company"), commits to issue the Policy according to the terms and provisions of this Commitment. This Commitment is effective as of the Commitment Date shown in Schedule A for each Policy described in Schedule A, only when the Company has entered in Schedule A both the specified dollar amount as the Proposed Amount of Insurance and the name of the Proposed Insured.

If all of the Schedule B, Part I - Requirements have not been met within six months after the Commitment Date, this Commitment terminates and the Company's liability and obligation end.

Countersigned by:

Secretary

This page is only a part of a 2021 ALTA® Commitment for Title Insurance. This Commitment is not valid without the Notice; the Commitment to Issue Policy; the Commitment Conditions; Schedule A; Schedule B, Part I - Requirements; and Schedule B, Part II - Exceptions; and a countersignature by the Company or its issuing agent that may be in electronic form.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

COMMITMENT CONDITIONS

1. DEFINITIONS

a. "Discriminatory Covenant": Any covenant, condition, restriction, or limitation that is unenforceable under applicable law because it illegally discriminates against a class of individuals based on personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or other legally protected class.
b. "Knowledge" or "Known": Actual knowledge or actual notice, but not constructive notice imparted by the Public Records.
c. "Land": The land described in Item 5 of Schedule A and improvements located on that land that by State law constitute real property. The term "Land" does not include any property beyond that described in Schedule A, nor any right, title, interest, estate, or easement in any abutting street, road, avenue, alley, lane, right-of-way, body of water, or waterway, but does not modify or limit the extent that a right of access to and from the Land is to be insured by the Policy.
d. "Mortgage": A mortgage, deed of trust, trust deed, security deed, or other real property security instrument, including one evidenced by electronic means authorized by law.
e. "Policy": Each contract of title insurance, in a form adopted by the American Land Title Association, issued or to be issued by the Company pursuant to this Commitment.
f. "Proposed Amount of Insurance": Each dollar amount specified in Schedule A as the Proposed Amount of Insurance of each Policy to be issued pursuant to this Commitment.
g. "Proposed Insured": Each person identified in Schedule A as the Proposed Insured of each Policy to be issued pursuant to this Commitment.
h. "Public Records": The recording or filing system established under State statutes in effect at the Commitment Date under which a document must be recorded or filed to impart constructive notice of matters relating to the Title to a purchaser for value without Knowledge. The term "Public Records" does not include any other recording or filing system, including any pertaining to environmental remediation or protection, planning, permitting, zoning, licensing, building, health, public safety, or national security matters.
i. "State": The state or commonwealth of the United States within whose exterior boundaries the Land is located. The term "State" also includes the District of Columbia, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, and Guam.
j. "Title": The estate or interest in the Land identified in Item 3 of Schedule A.

2. If all of the Schedule B, Part I - Requirements have not been met within the time period specified in the Commitment to Issue Policy, this Commitment terminates and the Company's liability and obligation end.

3. The Company's liability and obligation is limited by and this Commitment is not valid without:

a. the Notice;
b. the Commitment to Issue Policy;
c. the Commitment Conditions;
d. Schedule A;
e. Schedule B, Part I - Requirements;
f. Schedule B, Part II - Exceptions; and
g. a countersignature by the Company or its issuing agent that may be in electronic form.

4. COMPANY'S RIGHT TO AMEND

The Company may amend this Commitment at any time. If the Company amends this Commitment to add a defect, lien, encumbrance, adverse claim, or other matter recorded in the Public Records prior to the Commitment Date, any liability of the Company is limited by Commitment Condition 5. The Company is not liable for any other amendment to this Commitment.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

5. LIMITATIONS OF LIABILITY

a. The Company's liability under Commitment Condition 4 is limited to the Proposed Insured's actual expense incurred in the interval between the Company's delivery to the Proposed Insured of the Commitment and the delivery of the amended Commitment, resulting from the Proposed Insured's good faith reliance to:
   i. comply with the Schedule B, Part I - Requirements;
   ii. eliminate, with the Company's written consent, any Schedule B, Part II - Exceptions; or
   iii. acquire the Title or create the Mortgage covered by this Commitment.

b. The Company is not liable under Commitment Condition 5.a. if the Proposed Insured requested the amendment or had Knowledge of the matter and did not notify the Company about it in writing.

c. The Company is only liable under Commitment Condition 4 if the Proposed Insured would not have incurred the expense had the Commitment included the added matter when the Commitment was first delivered to the Proposed Insured.

d. The Company's liability does not exceed the lesser of the Proposed Insured's actual expense incurred in good faith and described in Commitment Condition 5.a. or the Proposed Amount of Insurance.

e. The Company is not liable for the content of the Transaction Identification Data, if any.

f. The Company is not obligated to issue the Policy referred to in this Commitment unless all of the Schedule B, Part I—Requirements have been met to the satisfaction of the Company.

g. The Company's liability is further limited by the terms and provisions of the Policy to be issued to the Proposed Insured.

6. LIABILITY OF THE COMPANY MUST BE BASED ON THIS COMMITMENT; CHOICE OF LAW AND CHOICE OF FORUM

a. Only a Proposed Insured identified in Schedule A, and no other person, may make a claim under this Commitment.

b. Any claim must be based in contract under the State law of the State where the Land is located and is restricted to the terms and provisions of this Commitment. Any litigation or other proceeding brought by the Proposed Insured against the Company must be filed only in a State or federal court having jurisdiction.

c. This Commitment, as last revised, is the exclusive and entire agreement between the parties with respect to the subject matter of this Commitment and supersedes all prior commitment negotiations, representations, and proposals of any kind, whether written or oral, express or implied, relating to the subject matter of this Commitment.

d. The deletion or modification of any Schedule B, Part II—Exception does not constitute an agreement or obligation to provide coverage beyond the terms and provisions of this Commitment or the Policy.

e. Any amendment or endorsement to this Commitment must be in writing and authenticated by a person authorized by the Company.

f. When the Policy is issued, all liability and obligation under this Commitment will end and the Company's only liability will be under the Policy.

7. IF THIS COMMITMENT IS ISSUED BY AN ISSUING AGENT

The issuing agent is the Company's agent only for the limited purpose of issuing title insurance commitments and policies. The issuing agent is not the Company's agent for closing, settlement, escrow, or any other purpose.

8. PRO-FORMA POLICY

The Company may provide, at the request of a Proposed Insured, a pro-forma policy illustrating the coverage that the Company may provide. A pro-forma policy neither reflects the status of Title at the time that the pro-forma policy is delivered to a Proposed Insured, nor is it a commitment to insure.

9. CLAIMS PROCEDURES

This Commitment incorporates by reference all Conditions for making a claim in the Policy to be issued to the Proposed Insured. Commitment Condition 9 does not modify the limitations of liability in Commitment Conditions 5 and 6.

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use.
All other uses are prohibited. Reprinted under license from the American Land Title Association.

10. CLASS ACTION

ALL CLAIMS AND DISPUTES ARISING OUT OF OR RELATING TO THIS COMMITMENT, INCLUDING ANY SERVICE OR OTHER MATTER IN CONNECTION WITH ISSUING THIS COMMITMENT, ANY BREACH OF A COMMITMENT PROVISION, OR ANY OTHER CLAIM OR DISPUTE ARISING OUT OF OR RELATING TO THE TRANSACTION GIVING RISE TO THIS COMMITMENT, MUST BE BROUGHT IN AN INDIVIDUAL CAPACITY. NO PARTY MAY SERVE AS PLAINTIFF, CLASS MEMBER, OR PARTICIPANT IN ANY CLASS OR REPRESENTATIVE PROCEEDING. ANY POLICY ISSUED PURSUANT TO THIS COMMITMENT WILL CONTAIN A CLASS ACTION CONDITION.

11. ARBITRATION

The Policy contains an arbitration clause. All arbitrable matters when the Proposed Amount of Insurance is $2,000,000 or less may be arbitrated at the election of either the Company or the Proposed Insured as the exclusive remedy of the parties. A Proposed Insured may review a copy of the arbitration rules at http://www.alta.org/arbitration.

STEWART TITLE GUARANTY COMPANY

All notices required to be given the Company and any statement in writing required to be furnished the Company shall be addressed to it at Stewart Title Guaranty Company, P.O. Box 2029, Houston, Texas 77252-2029.

Copyright 2021 American Land Title Association. All rights reserved.

ALTA COMMITMENT FOR TITLE INSURANCE (07-01-2021)
SCHEDULE B PART I

ISSUED BY
STEWART TITLE GUARANTY COMPANY

Requirements

File No.: 21000110162

All of the following Requirements must be met:

1. The Proposed Insured must notify the Company in writing of the name of any party not referred to in this Commitment who will obtain an interest in the Land or who will make a loan on the Land. The Company may then make additional Requirements or Exceptions.

2. Pay the agreed amount for the estate or interest to be insured.

3. Pay the premiums, fees, and charges for the Policy to the Company.

4. Documents satisfactory to the Company that convey the Title or create the Mortgage to be insured, or both, must be properly authorized, executed, delivered, and recorded in the Public Records.

5. In order to insure a conveyance, acquisition or encumbrance by the foreign liability company named below, you must provide the following:

   Limited liability company: BT Property, LLC, a Delaware limited liability company

   a. Evidence that the limited liability company was duly formed in its home state, is in good standing and its right to do business has not been suspended for any reason.

   b. Original certified copies of the limited liability company application for registration (Form LLC-5) filed with the California Secretary of State and any filed amendment (Form LLC-6), if any.

   c. A copy of the operating agreement and any amendment thereto.

   Additional requirements or items may be requested upon review of the required documents set forth above.

6. Please be advised that the search did not disclose any open deeds of trust. If you have knowledge of any outstanding obligations, please contact your title officer immediately for further review.

ALTA COMMITMENT FOR TITLE INSURANCE (07-01-2021)
SCHEDULE B PART II

ISSUED BY
STEWART TITLE GUARANTY COMPANY

Exceptions

File No.: 21000110162

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This Commitment and the Policy treat any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document will be excepted from coverage.

The Policy will not insure against loss or damage resulting from the terms and conditions of any lease or easement identified in Schedule A, and will include the following Exceptions unless cleared to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I - Requirements are met.

2. Water rights, claims or title to water in, on, or under the Land, whether or not shown by the Public Records.

3. Any interests (including rights of the public) in and to any portion of the Land lying within roads, streets, alleys or highways.

4. Ownership of, or rights to, minerals or other substances, subsurface and surface, of whatsoever kind, including, but not limited to coal, ores, metals, lignite, oil, gas, geothermal resources, brine, uranium, clay, rock, sand and gravel in, on, under and that may be produced from the Land, together with all rights, privileges, and immunities relating thereto, whether the ownership or rights arise by lease, grant, exception, conveyance, reservation or otherwise, and whether or not appearing in the Public Records or listed in Schedule B. Stewart Title Guaranty Company and its issuing agent make no representation as to the present ownership of any such interests. There may be leases, grants, exceptions, or reservations of interests that are not listed.

5. Reservations and exceptions in the Patent by the United States of America recorded February 8, 1916 in Book K, Page(s) 31 of Patents.

6. Covenants, Conditions, and Restrictions as set forth in an instrument, but omitting, except to the extent permitted by any applicable federal or state law, covenants or restrictions, if any, based on race, color, religion, sex, familial status, national origin, handicap, sexual orientation, marital status, ancestry, source of income, disability, medical condition, or other unlawful basis.
   Recorded : February 16, 1954 in Book 3328, Page(s) 584 of Official Records

   Note: Section 12956.1 of the Government Code provides the following: If this document contains any restrictions based on race, color, religion, sex, sexual orientation, familial status, marital status, disability, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, that restriction violates state and federal fair housing laws and is void, and may be removed pursuant to Section 12956.2 of the Government Code. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

   Among other things, said document provides for an easement for wells for the development of water, and incidental purposes.

7. The matters contained in an instrument entitled "Assignment/Right of Way Agreement" upon the terms therein

Copyright 2021 American Land Title Association. All rights reserved.
The use of this Form (or any derivative thereof) is restricted to ALTA licensees and ALTA members in good standing as of the date of use. All other uses are prohibited. Reprinted under license from the American Land Title Association.

Exceptions

provided recorded June 3, 1966 in Book 6639, Page(s) 520 of Official Records.

8. An easement or other provisions for the purpose of sewer and drainage and rights incidental thereto as shown on the recorded map no. Parcel Map 7064 recorded September 21, 1981 in Book 68, Page(s) 22 of Parcel Maps, which affects as shown thereon.

9. An easement for aerial and/or underground electric or communication structures and rights incidental thereto in favor of Southern California Edison Company as set forth in a document recorded November 6, 1981 as Instrument No. 81-245735 of Official Records, affects as shown therein.

10. An easement or other provisions for the purpose of public utilities and street trees and rights incidental thereto as shown on the recorded map no. Parcel Map 7173 recorded October 28, 1982 in Book 77, Page(s) 64 of Parcel Maps, which affects as shown thereon.

11. An easement for public utilities and rights incidental thereto in favor of Southern California Edison Company, a Corporation, its successors and assigns, as set forth in a document recorded October 29, 1987 as Instrument No. 87-387032 of Official Records, affects as shown therein.

12. The fact that said land is included within a project area of the Rialto Industrial Redevelopment Agency, and that proceedings for the redevelopment of said project have been instituted under the Redevelopment Law (such redevelopment to proceed only after the adoption of the redevelopment plan) as disclosed by a document recorded August 23, 1989 as Instrument No. 89-308985 of Official Records.

13. An easement for public utilities and rights incidental thereto in favor of Southern California Edison Company, a Corporation as set forth in a document recorded September 29, 1989 as Instrument No. 89-364421 of Official Records, affects as shown therein.

14. An easement for ingress and egress and roadway and rights incidental thereto in favor of Hayward Family Partners, Ltd., as set forth in a document recorded March 30, 1994 as Instrument No. 94-151235 of Official Records, affects as shown therein.

15. An easement for ingress and egress and roadway and rights incidental thereto in favor of Imperial Properties as set forth in a document recorded March 30, 1994 as Instrument No. 94-151236 of Official Records, affects as shown therein.

16. An easement for ingress and egress and roadway and rights incidental thereto in favor of Peggy L. Brower, sole surviving trustee, as set forth in a document recorded March 30, 1994 as Instrument No. 94-151237 of Official Records, affects as shown therein.

17. An easement for ingress and egress and roadway and rights incidental thereto in favor of Hayward Family Partners, Ltd., as set forth in a document recorded March 30, 1994 as Instrument No. 94-151238 of Official Records, affects as shown therein.

18. An easement for ingress and egress and roadway and rights incidental thereto in favor of Peggy L. Brower, sole surviving trustee, as set forth in a document recorded March 30, 1994 as Instrument No. 94-151239 of Official Records, affects as shown therein.

ALTA COMMITMENT FOR TITLE INSURANCE (07-01-2021)
SCHEDULE B PART II

ISSUED BY
STEWART TITLE GUARANTY COMPANY

Exceptions

19. An easement for ingress and egress and roadway and rights incidental thereto in favor of Imperial Properties as set forth in a document recorded March 30, 1994 as Instrument No. 94-151240 of Official Records, affects as shown therein.

20. The terms, provisions and easements contained in the document entitled Easement Deed, recorded March 30, 1994 as Instrument No. 94-151243 of Official Records.

21. Rights or claims of parties in possession whether or not shown by the Public Records.

22. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes, to be levied for the fiscal year 2023 - 2024.

23. Property taxes for the fiscal year 2022 - 2023 shown below are paid. For proration purposes the amounts are:
    1st Installment: $146,742.09
    2nd Installment: $146,742.09
    Parcel No.: 0239-192-23-0-000
    Code Area/Tracer No.: 006015

24. The lien of supplemental taxes, if any, assessed pursuant to the provisions of Chapter 3.5 (commencing with Section 75) of the revenue and taxation code of the State of California.

25. Taxes and/or assessments affecting the Land, if any, for community facility districts, including Mello Roos, which may exist by virtue of assessment maps or filed notices. These taxes and/or assessments are typically collected with the county taxes; however, sometimes they're removed and assessed and collected separately.

PROCEDURES TO ACCOMPANY THE
RESTRICTIVE COVENANT MODIFICATION FORM

The law prohibits unlawfully restrictive covenants based upon:

> "…age, race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry… Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status."

As the individual holding or acquiring an interest in the property, you may elect to have any unlawfully restrictive covenants "removed", which means "redacted."

To have the unlawfully restrictive covenant removed, you may prepare and submit to the county recorder's office, a "Restrictive Covenant Modification" form (RCM) together with a copy of the attached document with the unlawfully restrictive covenant redacted. This request must be submitted to the county recorder's office and must include your return address so the county recorder can notify you of the action taken by the county counsel.
NOTE: The RCM provided with your title product MAY NOT be the same form required by your county recorder's office; please double check your county recorder's office before completing this form.

The process at the county recorder's office is as follows:

- The county recorder takes the RCM with the redacted document and the original document attached and submits it to the county counsel for review to determine if, from a legal standpoint, the language was an unlawfully restrictive covenant and thus the redacted version should be indexed and recorded.
- The county counsel shall inform the county recorder of his/her determination within a reasonable amount of time, not to exceed three months from the date of your request.
- If county counsel determined that the redacted language was unlawful then, once recorded, the redacted document is the only one that effects the property and this modified document has the same effective date as the original document.
- If county counsel determined that the redacted language was not unlawful then county counsel will return the RCM package to the county recorder and the county recorder will advise the requestor that same the request has been denied and the redacted document has not been recorded.
- The modification document shall be indexed in the same manner as the original document and shall contain a recording reference to the original document.

STEWART TITLE GUARANTY COMPANY
PRIVACY NOTICE

This Stewart Title Guaranty Company Privacy Notice ("Notice") explains how Stewart Title Guaranty Company and its subsidiary title insurance companies (collectively, "Stewart") collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of your information. Pursuant to Title V of the Gramm-Leach Bliley Act ("GLBA") and other Federal and state laws and regulations applicable to financial institutions, consumers have the right to limit some, but not all sharing of their personal information. Please read this Notice carefully to understand how Stewart uses your personal information.

The types of personal information Stewart collects, and shares depends on the product or service you have requested.

Stewart may collect the following categories of personal and financial information from you throughout your transaction:

1. Identifiers: Real name, alias, online IP address if accessing company websites, email address, account name, unique online identifier, social security number, driver's license number, passport number, or other similar identifiers;

2. Demographic Information: Marital status, gender, date of birth.

3. Personal Information and Personal Financial Information: Name, signature, social security number, physical characteristics or description, address, telephone number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, credit reports, or any other information necessary to complete the transaction.

Stewart may collect personal information about you from:

1. Publicly available information from government records.
2. Information we receive directly from you or your agent(s), such as your lender or real estate broker;
3. Information about your transactions with Stewart, our affiliates, or others; and
4. Information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Stewart may use your personal information for the following purposes:

1. To provide products and services to you or in connection with a transaction.
2. To improve our products and services.
3. To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

Stewart may use or disclose the personal information we collect for one or more of the following purposes:

a. To fulfill or meet the reason for which the information is provided.
b. To provide, support, personalize, and develop our website, products, and services.
c. To create, maintain, customize, and secure your account with Stewart.
d. To process your requests, purchases, transactions, and payments and prevent transactional fraud.
e. To prevent and/or process claims.
f. To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf pursuant to valid service provider agreements.
g. As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
h. To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
i. To help maintain the safety, security, and integrity of our website, products and services, databases and other technology-based assets, and business.
j. To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
k. Auditing for compliance with federal and state laws, rules and regulations.
l. Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments.
m. To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal information or use the personal information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent throughout the course of your transaction (for example, a realtor, broker, or a lender). Stewart may disclose your personal information to a non-affiliated third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter in a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

a. Non-affiliated service providers and vendors we contract with to render specific services (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
b. To enable Stewart to prevent criminal activity, fraud, material misrepresentation, or nondisclosure.
c. Stewart's affiliated and subsidiary companies.
d. Non-affiliated third-party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you.
e. Parties involved in litigation and attorneys, as required by law.
f. Financial rating organizations, rating bureaus and trade associations.
g. Federal and State Regulators, law enforcement and other government entities to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order.

The law does not require your prior authorization or consent and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with non-affiliated third parties, except as required or permitted by law.

Right to Limit Use of Your Personal Information

You have the right to opt-out of sharing of your personal information among our affiliates to directly market to you. To opt-out of sharing to our affiliates for direct marketing, you may send an "opt out" request to Privacyrequest@stewart.com, or contact us through other available methods provided under "Contact Information" in this Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

How Stewart Protects Your Personal Information

Stewart maintains physical, technical and administrative safeguards and policies to protect your personal information.

Contact Information

If you have questions or comments about this Notice, the ways in which Stewart collects and uses your information described herein, your choices and rights regarding such use, or wish to exercise your rights under law, please do not hesitate to contact us at:

Privacy Notice at Collection for California Residents

Pursuant to the California Consumer Privacy Act of 2018 ("CCPA") and the California Privacy Rights Act of 2020, effective January 1, 2023 ("CPRA"), Stewart Information Services Corporation and its subsidiary companies (collectively, "Stewart") are providing this **Privacy Notice at Collection for California Residents** ("CCPA & CPRA Notice"). This CCPA & CPRA Notice supplements the information contained in Stewart's existing privacy notice and applies solely to all visitors, users, and consumers and others who reside in the State of California or are considered California Residents as defined in the CCPA & CPRA ("consumers" or "you"). All terms defined in the CCPA & CPRA have the same meaning when used in this Notice.

Personal and Sensitive Personal Information Stewart Collects

- Publicly available information from government records.
- Deidentified or aggregated consumer information.
- Certain personal information protected by other sector-specific federal or California laws, including but not limited to the Fair Credit Reporting Act (FCRA), Gramm Leach Bliley Act (GLBA) and California Financial Information Privacy Act (FIPA).

Specifically, Stewart has collected the following categories of **personal and sensitive personal information** from consumers within the last twelve (12) months:

Category	Examples	Collected
A. Identifiers	A real name, alias, postal address, unique personal identifier, online identifier, Internet Protocol address, email address, account name, Social Security number, driver's license number, passport number, or other similar identifiers .	YES
B. Personal information categories listed in the California Customer Records statute (Cal. Civ. Code § 1798.80(e)).	A name, signature, Social Security number, physical characteristics or description, address, telephone number, passport number, driver's license or state identification card number, insurance policy number, education, employment, employment history, bank account number, credit card number, debit card number, or any other financial information, medical information, or health insurance information. Some personal information included in this category may overlap with other categories.	YES
C. Protected classification characteristics under California or federal law	Age (40 years or older), race, color, ancestry, national origin, citizenship, religion or creed, marital status, medical condition, physical or mental disability, sex (including gender, gender identity, gender expression, pregnancy or childbirth and related medical conditions), sexual orientation, veteran or military status, genetic information (including familial genetic information).	YES
D. Commercial information	Records of personal property, products or services purchased, obtained, or considered, or other purchasing or consuming histories or tendencies.	YES
E. Biometric information.	Genetic, physiological, behavioral, and biological characteristics, or activity patterns used to extract a template or other identifier or identifying information, such as, fingerprints, faceprints, and voiceprints, iris or retina scans, keystroke, gait, or other physical patterns, and sleep, health, or exercise data.	YES
F. Internet or other similar network activity.	Browsing history, search history, information on a consumer's interaction with a website, application, or advertisement.	YES

G. Geolocation data.	Physical location or movements.	YES
H. Sensory data.	Audio, electronic, visual, thermal, olfactory, or similar information.	YES
I. Professional or employment-related information.	Current or past job history or performance evaluations.	YES
J. Non-public education information (per the Family Educational Rights and Privacy Act (20 U.S.C. Section 1232g, 34 C.F.R. Part 99)).	Education records directly related to a student maintained by an educational institution or party acting on its behalf, such as grades, transcripts, class lists, student schedules, student identification codes, student financial information, or student disciplinary records.	YES
K. Inferences drawn from other personal information.	Profile reflecting a person's preferences, characteristics, psychological trends, predispositions, behavior, attitudes, intelligence, abilities, and aptitudes.	YES

Stewart obtains the categories of personal and sensitive information listed above from the following categories of sources:

- Directly and indirectly from customers, their designees, or their agents (For example, realtors, lenders, attorneys, brokers, etc.)
- Directly and indirectly from activity on Stewart's website or other applications.
- From third-parties that interact with Stewart in connection with the services we provide.

Use of Personal and Sensitive Personal Information

Stewart may use or disclose the personal or sensitive information we collect for one or more of the following purposes:

a. To fulfill or meet the reason for which the information is provided.
b. To provide, support, personalize, and develop our website, products, and services.
c. To create, maintain, customize, and secure your account with Stewart.
d. To process your requests, purchases, transactions, and payments and prevent transactional fraud.
e. To prevent and/or process claims.
f. To assist third party vendors/service providers who complete transactions or perform services on Stewart's behalf pursuant to valid service provider agreements.
g. As necessary or appropriate to protect the rights, property or safety of Stewart, our customers or others.
h. To provide you with support and to respond to your inquiries, including to investigate and address your concerns and monitor and improve our responses.
i. To personalize your website experience and to deliver content and product and service offerings relevant to your interests, including targeted offers and ads through our website, third-party sites, and via email or text message (with your consent, where required by law).
j. To help maintain the safety, security, and integrity of our website, products and services, databases and other technology-based assets, and business.
k. To respond to law enforcement or regulator requests as required by applicable law, court order, or governmental regulations.
l. Auditing for compliance with federal and state laws, rules and regulations.
m. Performing services including maintaining or servicing accounts, providing customer service, processing or fulfilling orders and transactions, verifying customer information, processing payments, providing advertising or marketing services or other similar services.
n. To evaluate or conduct a merger, divestiture, restructuring, reorganization, dissolution, or other sale or transfer of some or all of our assets, whether as a going concern or as part of bankruptcy, liquidation, or similar proceeding, in which personal information held by us is among the assets transferred.

Stewart will not collect additional categories of personal or sensitive information or use the personal or sensitive information we collected for materially different, unrelated, or incompatible purposes without providing you notice.

Disclosure of Personal Information to Affiliated Companies and Nonaffiliated Third Parties

Stewart does not sell your personal information to nonaffiliated third parties. Stewart may share your information with those you have designated as your agent throughout the course of your transaction (for example, a realtor, broker, or a lender). Stewart may disclose your personal information to a third party for a business purpose. Typically, when we disclose personal information for a business purpose, we enter into a contract that describes the purpose and requires the recipient to both keep that personal information confidential and not use it for any purpose except performing the contract.

We share your personal information with the following categories of third parties:

a. Service providers and vendors we contract with to render specific services (For example, search companies, mobile notaries, and companies providing credit/debit card processing, billing, shipping, repair, customer service, auditing, marketing, etc.)
b. Affiliated Companies.
c. Parties involved in litigation and attorneys, as required by law.
d. Financial rating organizations, rating bureaus and trade associations.
e. Federal and State Regulators, law enforcement and other government entities

In the preceding twelve (12) months, Stewart has disclosed the following categories of personal information for a business purpose:

Category A:	Identifiers
Category B:	California Customer Records personal information categories
Category C:	Protected classification characteristics under California or federal law
Category D:	Commercial Information
Category E:	Biometric Information
Category F:	Internet or other similar network activity
Category G:	Geolocation data
Category H:	Sensory data
Category I:	Professional or employment-related information
Category J:	Non-public education information
Category K:	Inferences

Your Consumer Rights and Choices Under CPPA and CPRA

Your Rights Under CCPA

The CCPA provides consumers (California residents as defined in the CCPA) with specific rights regarding their personal information. This section describes your CCPA rights and explains how to exercise those rights.

Access to Specific Information and Data Portability Rights

You have the right to request that Stewart disclose certain information to you about our collection and use of your personal information over the past 12 months. Once we receive and confirm your verifiable consumer request, Stewart will disclose to you:

- The categories of personal information Stewart collected about you.
- The categories of sources for the personal information Stewart collected about you.
- Stewart's business or commercial purpose for collecting that personal information.
- The categories of third parties with whom Stewart shares that personal information.
- The specific pieces of personal information Stewart collected about you (also called a data portability request).
- If Stewart disclosed your personal data for a business purpose, a listing identifying the personal information categories that each category of recipient obtained.

Deletion Request Rights

You have the right to request that Stewart delete any of your personal information we collected from you and retained, subject to certain exceptions. Once we receive and confirm your verifiable consumer request, Stewart will delete (and direct our service providers to delete) your personal information from our records, unless an exception applies.

Stewart may deny your deletion request if retaining the information is necessary for us or our service providers to:

1. Complete the transaction for which we collected the personal information, provide a good or service that you requested, take actions reasonably anticipated within the context of our ongoing business relationship with you, or otherwise perform our contract with you.
2. Detect security incidents, protect against malicious, deceptive, fraudulent, or illegal activity, or prosecute those responsible for such activities.
3. Debug products to identify and repair errors that impair existing intended functionality.

4. Exercise free speech, ensure the right of another consumer to exercise their free speech rights, or exercise another right provided for by law.
5. Comply with the California Electronic Communications Privacy Act (Cal. Penal Code § 1546 *seq.*)
6. Engage in public or peer-reviewed scientific, historical, or statistical research in the public interest that adheres to all other applicable ethics and privacy laws, when the information's deletion may likely render impossible or seriously impair the research's achievement, if you previously provided informed consent.
7. Enable solely internal uses that are reasonably aligned with consumer expectations based on your relationship with us.
8. Comply with a legal obligation.
9. Make other internal and lawful uses of that information that are compatible with the context in which you provided it.

Your Rights Under CPRA

CPRA expands upon your consumer rights and protections offered by the CCPA. This section describes your CPRA rights and explains how to exercise those rights.

Opt-Out of Information Sharing and Selling

Stewart does not share or sell information to third parties, as the terms are defined under the CCPA and CPRA. Stewart only shares your personal information as commercially necessary and in accordance with this CCPA & CPRA Notice.

Correction of Inaccurate Information

You have the right to request that Stewart correct any inaccurate information maintained about.

Limit the Use of Sensitive Personal Information

You have the right to limit how your sensitive personal information, as defined in the CCPA and CPRA is disclosed or shared with third parties.

Exercising Your Rights Under CCPA and CPRA

To exercise the access, data portability, deletion, opt-out, correction, or limitation rights described above, please submit a verifiable consumer request to us by the available means provided below:

1. Calling us Toll Free at 1-866-571-9270
2. Emailing us at Privacyrequest@stewart.com; or
3. Visiting http://stewart.com/ccpa.

Only you, or someone legally authorized to act on your behalf, may make a verifiable consumer request related to your personal information. You may also make a verifiable consumer request on behalf of your minor child, if applicable.

To designate an authorized agent, please contact Stewart through one of the methods mentioned above.

You may only make a verifiable consumer request for access or data portability twice within a 12-month period. The verifiable consumer request must:

- Provide sufficient information that allows us to reasonably verify you are the person about whom we collected personal information or an authorized representative.
- Describe your request with sufficient detail that allows us to properly understand, evaluate, and respond to it.

Stewart cannot respond to your request or provide you with personal information if we cannot verify your identity or authority to make the request and confirm the personal information relates to you.

Making a verifiable consumer request does not require you to create an account with Stewart.

Response Timing and Format

We endeavor to respond to a verifiable consumer request within forty-five (45) days of its receipt. If we require more time (up to an additional 45 days), we will inform you of the reason and extension period in writing.

A written response will be delivered by mail or electronically, at your option.

Any disclosures we provide will only cover the 12-month period preceding the verifiable consumer request's receipt. The response we provide will also explain the reasons we cannot comply with a request, if applicable. For data portability requests, we will select a format to provide your personal information that is readily useable and should allow you to transmit the information from one entity to another entity without hindrance.

Stewart does not charge a fee to process or respond to your verifiable consumer request unless it is excessive, repetitive, or manifestly unfounded. If we determine that the request warrants a fee, we will tell you why we made that decision and provide you with a cost estimate before completing your request.

Non-Discrimination

Stewart will not discriminate against you for exercising any of your CCPA and CPRA rights. Unless permitted by the CCPA or CPRA, we will not:

- Deny you goods or services.
- Charge you a different prices or rates for goods or services, including through granting discounts or other benefits, or imposing penalties.
- Provide you a different level or quality of goods or services.
- Suggest that you may receive a different price or rate for goods or services or a different level or quality of goods or services.

Record Retention

Your personal information will not be kept for longer than is necessary for the business purpose for which it is collected and processed. We will retain your personal information and records based on established record retention policies pursuant to California law and in compliance with all federal and state retention obligations. Additionally, we will retain your personal information to comply with applicable laws, regulations, and legal processes (such as responding to subpoenas or court orders), and to respond to legal claims, resolve disputes, and comply with legal or regulatory recordkeeping requirements

Changes to This CCPRA & CPRA Notice

Stewart reserves the right to amend this CCPA & CPRA Notice at our discretion and at any time. When we make changes to this CCPA & CPRA Notice, we will post the updated Notice on Stewart's website and update the Notice's effective date.
