Executive Summary

The following is an Executive Summary of the Phase I Environmental Site Assessment (Phase I ESA) that was conducted by Converse Consultants (Converse). Please refer to the appropriate sections of the report for a complete discussion of these issues. In the event of a conflict between this Executive Summary and the report, or an omission in the Executive Summary, the report shall prevail.

This report presents the results of the Converse Phase I ESA performed at 9143 De Soto Avenue in Chatsworth area of the City of Los Angeles, Los Angeles County, referred to as the Subject Property in this report. Converse was retained by Great American Capital to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical within the scope of an ESA, Recognized Environmental Conditions (RECs) in connection with the Subject Property.

Converse has compiled and reviewed information that was obtained from interviews, document research, and on-site and area reconnaissance to identify potential environmental conditions at the Subject Property in conformance with the ASTM Standard E: 1527-21 Environmental Site Assessment Standard Practice (ASTM Standard: E1527-21). This Phase I ESA was conducted during the period of February 19, 2023 to February 28, 2023.

The Subject Property is owned by Kids from the Valley IX, LLC, and is currently a vacant lot. Former building occupants included LA Fitness.

This assessment has revealed no evidence of RECs in connection with the Subject Property. No further assessment appears warranted at this time.

Business Environmental Risks (BERs) or non-scope items are discussed in Section 11.0 of the report.

1.0 Introduction

1.1 Purpose and Scope of Services

This report presents the results of the Converse Consultants (Converse) Phase I Environmental Site Assessment (ESA) performed at 9143 De Soto Avenue in Chatsworth area of the City of Los Angeles, Los Angeles County, California, referred to as the Subject Property in this report. Converse was retained by Great American Capital to conduct this Phase I ESA. Our study has been conducted in order to identify, to the extent practical, Recognized Environmental Conditions (RECs) in connection with the Subject Property. The term Recognized Environmental Conditions is defined in Section 1.1.1 of the American Society of Testing and Materials (ASTM) Standard Practice as the presence or likely presence of any hazardous substances or petroleum products in, at or on a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

This Phase I ESA was completed in accordance with our proposal dated February 9, 2023. Our work consisted of the following and was completed in general conformance with the scope and limitations of the ASTM Practice E1527-21 and complies with standards and practices set forth in 40 Code of Federal Regulations (CFR) Part 312 for AAI.

- Interviews with the Subject Property owner representatives
- Subject Property and vicinity reconnaissance
- Review of regulatory agency records
- Description of physical setting
- Historical review
- Interviews with public agency personnel
- Preparation of this report

1.2 Non-Scope Considerations

There are a number of non-scope issues which are sometimes assessed concurrently with a Phase I ESA. Unless specifically agreed in the contract proposal documents, these non-scope considerations are not included as part of the Phase I ESA. Examples of non-scope issues include:

- Asbestos-containing Building Materials unrelated to release into the environment
- Biological Agent
- Cultural & Historic Resources
- Diffuse Anthropogenic Pollution
- Ecological Resources
- Endangered Species
- Health & Safety
- Indoor Air Quality unrelated to release of hazardous substances or petroleum products in the environment
- Industrial Hygiene
- Lead-based Paint unrelated to releases in the environment
- Lead in Drinking Water
- Mold or microbial growth conditions
- PCB-containing building materials (for example, interior fluorescent light ballasts, paint, and caulk)
- Polyfluoroalkyl Substances
- Naturally-occurring Radon
- Regulatory Compliance

- Substances not defined as hazardous substances unless or until such substances are classified as CERCLA hazardous substances.
- Wetlands

No Non-Scope issues were addressed in this report.

1.3 Significant Assumptions

No assumptions were made for this assessment that need to be noted as significant.

1.4 Limitations and Expectations

There were no limitations or exceptions during this assessment.

1.5 Special Terms and Conditions

No other users were identified.

1.6 Reliance

This report is for the sole benefit and exclusive use of Great American Capital in accordance with the terms and conditions under which these services have been provided. Its preparation has been in accordance with generally accepted environmental practices. No other warranty, either express or implied, is made. The Scope of Services associated with the report was designed solely in accordance with the objectives, schedule, budget, and risk-management preferences of Great American Capital.

This report should not be regarded as a guarantee that no further contamination, beyond that which could be detected within the scope of this assessment, is present at the Subject Property. Converse makes no warranties or guarantees as to the accuracy or completeness of information provided or compiled by others. It is possible that information exists beyond the scope of this assessment. It is not possible to absolutely confirm that no hazardous materials and/or substances exist at the Subject Property. If none are identified as part of a limited scope of work, such a conclusion should not be construed as a guaranteed absence of such materials, but merely the results of the evaluation of the property at the time of the assessment. Also, events may occur after the Subject Property visit, which may result in contamination of the Subject Property. Additional information, which was not found or available to Converse at the time of report preparation, may result in a modification of the conclusions and recommendations presented.

Any reliance on this report by Third Parties shall be at the Third Party's sole risk. Should Great American Capital wish to identify any additional relying parties not previously identified, a completed Application of Authorization to Use (see Appendix A of this report) must be submitted to Converse Consultants.

1.7 Continued Viability

3.0 User Provided Information & Responsibilities

3.1 Requested Documents and Information

The ASTM E1527-21 specifies that the User, Great American Capital, provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Subject Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity Use Limitations (AULs)
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

No information/documentation was provided by Great American Capital.

3.2 User Provided Information

Section 6 of ASTM E1527-21 outlines specific User's responsibilities. This information will help identify the possibility of RECs in connection with the Subject Property. The ASTM Standard provides a questionnaire to help the User to comply with the statutory requirements to perform tasks which would help identify RECs. In general, any Users should make Converse aware of information they have regarding the following:

- Environmental Cleanup Liens filed or recorded against the Subject Property
- Activity and land use limitations that are in place on the Subject Property or have been filed or recorded in a registry.
- Specialized knowledge or experience of the person seeking to qualify for the Legal Liability Protections (LLP)
- Relationship of the purchase price to fair market value of the Subject Property if it were not contaminated
- Commonly known or reasonably ascertainable information about the Subject Property
- The degree or obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect this contamination by appropriate investigation.

The following information was requested from the User(s).

3.2.1 Environmental Cleanup Liens

The User provided no information regarding environmental cleanup liens or title records.

3.2.2 Activity and Use Limitations

The User did not have any information indicating they were aware of any AULs.

3.2.3 Specialized Knowledge or Experience

The User did not provide any information indicating they had specialized knowledge or experience related to the Subject Property or nearby property.

3.2.4 Reason for Significantly Lower Purchase Price

Converse has no information regarding the purchase price of the Subject Property or comparable properties. The User has not indicated to Converse that there is any conclusion that there was a lower purchase price because of known or suspected contamination at the Subject Property.

3.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not have any information about past uses, specific chemicals at the Subject Property, past spills, environmental cleanup or other reasonably ascertainable information regarding the Subject Property.

3.2.6 Obviousness of Contamination

The User did not have any information based on their knowledge or experience that would be obvious indicators of contamination on the Subject Property.

Unless specifically stated otherwise in the Scope of Services, the purpose of this Phase I ESA was to qualify for the landowner liability protections to CERCLA Liability as described in ASTM E1527-21.

Business risk unrelated to the CERCLA innocent landowners defense are only assessed as specifically agreed in the Scope of Services and discussed in Section 11.0, Additional Non-Scope Services, of this report.

3.3 Continuing Obligations

In order to assert a LLP, the User must satisfy a number of statutory requirements that are generally referred to as Continuing Obligations, which are outside the Scope of Services of the Phase I ESA. Examples of Continuing Obligations include providing legally required notices, stopping continuing releases and complying with land use restrictions. Failure to comply with these and other statutory post-acquisition requirements will jeopardize liability protection.

It is the responsibility of the User to comply with the Continuing Obligations requirements of ASTM E1527-21 and AAI. Anyone seeking LLP protections should take independent action beyond this Phase I ESA to perfect their position.

4.0 Owner Provided Information

The ASTM E1527-21 specifies that the Subject Property owner and the Key Site Manager provide any helpful documents that may be available as listed below.

- Environmental site assessment or environmental compliance audit reports
- Environmental permits or hazardous waste generator notices/reports
- Registrations for aboveground and underground storage tanks
- Septic systems, oil wells, or water wells
- Registrations for underground injection systems
- Safety Data Sheets; Community Right to Know Plans; Safety, Preparedness and Prevention Plans; or Spill Protection Countermeasures and Control Plans
- Reports regarding hydrologic conditions on the Subject Property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property.
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded AULs
- Proceedings regarding hazardous substances and petroleum products including any pending, threatened or past: litigation; administrative proceedings; or notices from any governmental entity regarding possible violations of environmental laws or other possible liability related to hazardous substances or petroleum products.

The Subject Property owner representative, Mr. Matt Huss, Vice President of Great American Capital, stated that he has no environmental reports or documents regarding the Subject Property.

5.0 Records Review

5.1 Physical Setting

Item	Comments
Physical Setting:	The Subject Property is located approximately 892 feet above mean sea level with surface topography sloping towards the south-southeast (United States Geological Survey [USGS] Topographic Map, Canoga Park and Oat Mountain, California, 2018).
Geology:	The Subject Property is underlain by alluvium, lake, playa, and terrace deposits (Division of Mines and Geology, Geologic Map of California, 2015).
Groundwater:	The nearest groundwater well to the Subject Property is located approximately 0.45 miles northwest of the Subject Property near the intersection of Plummer Street and De Soto Avenue. Los Angeles County, Department of Public Works (DPW) well number 4705 was last measured on October 24, 2022. At that time, the depth to groundwater was recorded at 104.20 feet below grade. The groundwater surface elevation was recorded at 805.50.
Potable Water Supply:	Potable water is supplied by DWP. According to the city's 2021 Annual Water Quality Report, drinking water is obtained from Metropolitan Water District, Los Angeles Aqueduct, recycled water and local groundwater.

20931 Nordhoff Street (Southwest adjacent property):

The adjoining property was listed from 1994 to 2009 with occupants that included Work Training Program, Mian Electric Supply Co., and Mastercraft Enterprises Inc.

9134 Independence Avenue (West adjacent property):

The adjoining property was listed from 1985 to 2014 with occupants that in Automotive Accessories Marketing Group, Pope Plastics, and J & J Products.

9142 Independence Avenue (Northwest adjacent property):

The adjoining property was listed from 1994 to 2014 with occupants that included B & M Automotive Products, Automoco Corp, B & M Racing & Performance Products, IT Creations, and Hurst Performance Products.

5.2.4 Data Failure

Historical information regarding the Subject Property indicated the Subject Property was undeveloped land as early as 1903. Therefore, no historical data failure occurred during this assessment.

5.2.5 Summary of Historical Property Use

As early as 1903, the Subject Property appears to be undeveloped land. As early as 1928 to at least 1952, the Subject Property appeared to be either agricultural or fallow agricultural land.

By 1962, the Subject Property appears to be developed for commercial use. Occupants at the Subject Property have included various recreation/health clubs, a swim school and gyms from as early as 1962. In 2022, building permits were issued to backfill two (2) swimming pools, and demolish a commercial building and clear the lot. The Subject Property is currently a vacant lot.

5.2.6 Summary of Past Uses of Adjoining Properties

As early as 1903, the adjoining properties appear to be undeveloped land. There appears to be an adjoining road present to the east of the Subject Property.

As early as 1928 to at least 1952, the adjoining properties appeared to be fallow and agricultural land. The southeast adjacent property appeared to house a residential structure.

By 1967, the adjoining properties appeared to house commercial properties to the north, south, and southeast. The adjoining properties appear to house vacant land to the east and west.

By 1970, the adjoining properties appear to house commercial properties and vacant land to the east. By 1977, the adjoining properties appeared to be developed for commercial and light manufacturing facilities.

5.2.7 Summary of Past Uses of the Surrounding Area

As early as 1903 to at least 1933, the general vicinity consists of undeveloped land and scattered structures. There appears to be a railroad present to the north.

By 1938, the general vicinity consisted of undeveloped land, agricultural land, residential and commercial properties.

By 1967, the general vicinity appears to consist of vacant land, commercial, and residential properties. Portions of agricultural land remain. Based on the 1967 topographic map, the general vicinity consists of schools, parks, and agricultural land. Oil tanks were indicated to the eastern general vicinity of the Subject Property.

5.3 Results of Environmental Records Sources Review

An EDR report of Standard Environmental Record Sources (Records) was prepared specifically for the Subject Property. The search included queries to the following databases for cases within specified ASTM search distances. A copy of the database report is provided in Appendix E.

5.3.1 Property Listings

The Subject Property was identified on the following databases in the EDR report:

Property Listings	
Site Name:	KIDS FROM THE VALLEY IX, LLC, A CALIFORNIA LIMITED LIABILITY
Databases:	ECHO
Address:	9143 DE SOTO AVE
Comments:	The facility is listed in the ECHO database. No violations identified.

Site Name:	KIDS FROM THE VALLEY IX, LLC, A CALIFORNIA LIMITED LIABILITY

5.3.3 Other Off-site Locations of Concern

Other off-site locations of concern identified by EDR within a maximum one-mile radius from the Subject Property included SEMS-ARCHIVE, CORRACTS, RCRA LQG, RCRA-SQG, RESPONSE, ENVIROSTOR, SWF/LF, LUST, CPS-SLIC, UST, AST, HIST Cal-sites, CERS HAZ WASTE, SWEEPS UST, HIST UST, CA FID UST, CERS TANKS, RCRA NonGen/NLR, PFAS ECHO, Cortese, DRYCLEANERS, HIST CORTESE, HWP, LOS ANGELES CO LF METHANE, and EDR HIST AUTO.

The potential for environmental concern to the Subject Property from these off-site locations appears to be low due to one or more of the following: type of regulatory listing; type of resource (soil) affected, location with respect to the direction of regional groundwater, distance from the Subject Property; status of the case; remedial efforts being directed by a regulatory agency; and/or potential responsible parties have been identified.

5.3.4 Orphan Listings

The EDR database report identified three (3) orphan listings. The locations of sites that were identified by address were found to be in the general vicinity of the Subject Property; however, due to distance, location with respect to the direction of regional groundwater, and/or type of listing were determined to have a low potential for environmental concern to the Subject Property.

5.4 Additional Environmental Record Sources

Requests for information or review of online databases were completed for the following regulatory agencies.

Subject Property addresses that were researched included:

- 9143 De Soto Avenue; current Subject Property address;
- 9145 De Soto Avenue; historical address found on the Los Angeles County Assessor's Office web page.

Federal Agencies

6.0 Property Reconnaissance

6.1 Methodology

On February 16, 2023 Converse visited the Subject Property to evaluate present use and to identify observable environmental conditions at the Subject Property. Our methodology involved walking the perimeters, center lines, and accessible interior and exterior areas of the buildings while noting observed evidence of present and potential environmental concerns.

A field-generated map is provided in Appendix B. Pertinent Subject Property photographs are provided in Appendix C.

6.2 Limiting Conditions

Converse's findings are based on the Subject Property conditions observed on Thursday, February 16, 2023.

6.3 Exterior Observations of Property

During our Subject Property visit, Converse made the following observations of the exterior of the Subject Property:

Exterior Observations		
Item or Condition	Observed Evidence?	Comments
Hazardous Substances & Petroleum Products:	No	
Storage Tanks & Related Equipment:	No	
Odors:	No	
Standing Surface Water or Other Pools of Liquid:	No	
Drums & Other Containers of Hazardous Substances, Petroleum Products, or Other Unidentified Contents:	No	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	No	
Pits, Ponds, or Lagoons:	No	
Stained Soil or Pavement:	No	

Item or Condition	Observed Evidence?	Comments
Stressed Vegetation (other than from insufficient water):	No	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	No	
Waste Water or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	No	
Wells (active, inactive, or abandoned):	No	
Septic Systems or Cesspools:	No	
Prior Structures:	Yes	<p>There appears to be a 6-foot by 3-foot precast concrete container located on the northeast portion of the Subject Property. The use is unknown. No stains or leaks were observed.</p> <p>An electrical utility pole is located on the eastern portion of the lot. No stains or leaks were observed.</p>
Roads, Tracks, Railroad Tracks or Spurs:	Yes	The Subject Property fronts onto De Soto Avenue to the east and an alley to the west.
Suspect Asbestos containing Building Materials released into the environment	No	
Suspect Lead-based Paint released into the environment	No	
Suspect PCB Caulk, Paint or Ballasts released into the environment	No	

Additional Comments:

In addition to the above items, Converse also observed the following:

- Located on the southwest corner of the Subject Property is trash. The items observed included two (2) empty 5-gallon paint containers, and two (2) chairs.

6.4 Current Uses of Adjoining Properties

Based on our research and observations during our Subject Property visit, the Subject Property is bordered by the following:

Adjoining Property Use	
Direction	Current Development
North	Commercial properties; Starbucks and Yoshinoya (9157 De Soto Avenue) and Fire Wings, Capriotti's (9171 De Soto Avenue).
Northeast	De Soto Avenue, followed by Micro Quality Calibrations, Inc. (9168 De Soto Avenue).
Northwest	Alley, followed by IT Creations, Inc. (9142 Independence Avenue).
South	Building under construction (9119 De Soto Avenue).
Southeast	De Soto Avenue, followed by Storage Etc. (9110 De Soto Avenue).
Southwest	Alley, followed by Main Electric Supply Co. (20931 Nordhoff Street).
East	De Soto Avenue, followed by MRS (9150 De Soto Avenue) and ABC Plastics, Inc. (9132-9136 De Soto Avenue).
West	Alley, followed by Career Technologies (9134 Independence Avenue).

6.5 Current Uses of Surrounding Area

Based on our research and observations during our Subject Property visit, the surrounding area of the Subject Property consists of commercial and industrial properties.

7.0 Interviews

During the interviews, the owners and occupants were asked if they had any available documents that would be helpful. The documents that were requested are detailed in Section 4.0 of this report:

Interview:	Comments:
Subject Property Owner Representative:	According to Mr. Matthew Huss, the Subject Property Owner, Representative stated that the Subject Property is owned by Kids from the Valley IX, LLC. Mr. Huss stated that the Subject Property is a vacant lot. Mr. Huss is unaware of any environmental issues associated with the Subject Property.
Tenant/ Occupant:	The Subject Property is vacant land.
State or Local Government Officials:	Other than the information provided in Section 5.4, no other information was provided by a government official.
Owners and Occupants of Neighboring Sites:	No interviews of owners or occupants of neighboring sites were conducted.

8.0 Findings & Opinions

A cursory summary of findings is provided below. However, details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

The Subject Property is owned by Kids from the Valley IX, LLC, and is occupied by a vacant lot. Former building occupants included LA Fitness.

During Converse's reconnaissance, Converse observed the following at the Subject Property.

- There appears to be a 6-foot by 3-foot precast concrete container located on the northeast portion of the Subject Property. The use is unknown.
- An electrical utility pole is on the eastern portion of the lot.
- The southwest corner of the Subject Property consists of trash. The items observed included two (2) empty 5-gallon paint containers, and two (2) chairs.

Historically, as early as 1903, the Subject Property appears to be undeveloped land. As early as 1928 to at least 1952, the Subject Property appeared to be either agricultural or fallow agricultural land. By 1962, the Subject Property appears to be developed for commercial use. Occupants at the Subject Property have included various recreation/health clubs, a swim school and gyms from as early as 1962. In 2022, building permits were issued to backfill two (2) swimming pools, and demolish a commercial building and clear the lot. The Subject Property is currently a vacant lot.

The Subject Property was identified on the EDR report in the ECHO, FINDS, RCRA NonGen / NLR, HWTS, and HAZNET database.

As early as 1903, the adjoining properties appear to be undeveloped land. There appears to be an adjoining road present to the east of the Subject Property. As early as 1928 to at least 1952, the adjoining properties appear to be fallow and agricultural land. The southeast adjacent property appears to house a residential structure. By 1967, the adjoining properties appear to house commercial properties to the north, south, and southeast. The adjoining properties appear to house vacant land to the east and west. By 1970, the adjoining properties appear to house commercial properties and vacant land to the east. As early as 1977, the adjoining properties appear to be developed for commercial and light manufacturing.

The adjoining properties were identified in the EDR report on the RCRA NonGen / NLR, UST, HWTS, SAN JOSE HAZMAT, HAZNET, CERS, CERS HAZ WASTE, ECHO, RCRA-LQG, FINDS, CA FID UST, EMI, SWEEPS UST, and NPDES. This site appears to have a low potential for environmental concern to the Subject Property based on the type of regulatory listing.

Recognized Environmental Conditions (RECs): No RECS pertaining to the Subject Property were identified during this assessment.

Controlled Recognized Environmental Conditions (CRECs): No CRECS pertaining to the Subject Property were identified during this assessment.

Historical Recognized Environmental Conditions (HRECs): No HRECS pertaining to the Subject Property were identified during this assessment.

Significant Data Gaps: No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Per the ASTM Section 12.8, Additional Investigation, to detect the presence of hazardous materials and petroleum products, it is our opinion that no additional investigation is

warranted to detect hazardous materials or petroleum products within the context of this Phase I ESA.

9.0 Conclusions & Recommendations

Converse has performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E1527-21 for 9143 De Soto Avenue, in Chatsworth area of the City of Los Angeles, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions of Assessment section of this report. This assessment has revealed no evidence of *recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps* in connection with the Subject Property.

No further assessment appears warranted at this time.

10.0 Deviations & Limitations

No deviation(s) from the ASTM Standard Practice were encountered during this assessment.

11.0 Additional Non-Scope Services

There are environmental issues outside the scope of the ASTM E1527-21 that can be assessed in connection with a commercial real estate transaction. These are dealt with as non-scope considerations since they do not typically present a Superfund Liability. The specific level of inquiry (if any) is defined in the Proposal which contains a Scope of Work. These non-scope services are very client specific and not covered by the ASTM standard. They are frequently related to the business environmental risk which is defined in the standard as "risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate".

No non-scope issues were addressed during this assessment.

12.0 Signature of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Å§312.10 of 40 CFR 312.

I have the specific qualifications based on education, training and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/27/2022 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 6 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there are

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there are 12 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 01/10/2022 has revealed that there are 3 LOS ANGELES CO LF METHANE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

STATE MASTER
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

this report, on or before the COMPLY BY date associated with each
violation. NOTE: The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4;
57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store,
use or handle hazardous materials in the City of Los Angeles to obtain
a Consolidated Permit from the Los Angeles Fire Department CUPA ****
Annual submission of a Hazardous Materials Business Plan into CERS is
required between January 1 and March 1 of every year. Please remember
that any change in inventory of greater than 100 percent will require
new submission within 30 days of that change. As a reminder, you must

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Observation: Overdue tank inspection. Conducted inspection with Mr. Banifazl and visualized UST location and monitoring system (Ronan). UST is back up generator and has not been in use for at least ten years per Mr. Banifazl. The sticker on the monitoring system panel dated 6/30/11. This was the last time the tank was tested. Other than the sticker on the panel, there is no other documentation/paperwork associated with the UST. Violations observed during inspection: Failure to maintain documentation on site and submit business plan and tank forms electronically. Failure to test leak detection equipment annually and every 36 months. Failure to comply with the designated operator monthly inspection requirements. This report along with related pictures will be sent to legal for further follow up. Mr. Banifazl is aware and states he will look into tank removal as soon as possible. Contact [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to properly close a hazardous waste tank system ensuring the minimization of further maintenance and that the following requirements are met: a) the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components (liners, etc.), contaminated soils, and structures and equipment contaminated with waste, and manage them as hazardous waste. The closure plan, closure activities, cost estimates for closure, and financial responsibility for tank systems shall meet all of the requirements specified in articles 7 and 8 of this chapter. b) If the owner or operator demonstrates that not all contaminated soils can be practicably removed or decontaminated as required in subsection (a) of this section, then the owner or operator shall close the tank system and perform post-closure care in accordance with the closure and post-closure care requirements that apply to landfills (section 66265.310). In addition, for the purposes of closure, post-closure, and financial responsibility, such a tank system is then considered to be a landfill, and the owner or operator shall meet all of the requirements for landfills specified in articles 7 and 8 of this chapter. c) If an owner or operator has a tank system which does not have secondary containment that meets the requirements of section 66265.193(b) through (f) and which has not been granted a variance from the secondary containment requirements in accordance with section 66265.193(g), then: 1) the closure plan for the tank system shall include both a plan for complying with subsection (a) of this section and a contingent plan for complying with subsection b) of this section; 2) a contingent post-closure plan for complying with subsection (b) of this section shall be prepared and submitted as part of the permit application; 3) the cost estimates calculated for closure and post-closure care shall reflect the costs of complying with the contingent closure plan and the contingent post-closure plan, if these costs are greater than the

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to properly design pipe supports to minimize abrasion and corrosion, and allow for expansion and contraction.
Violation Notes: Returned to compliance on 03/04/2021. Water is been discharged on to fuel lines just south of B115. Signs of corrosion are visible on the fuel lines. Please reroute fuel lines or water discharge outlet so the fuel lines are not affected by the water discharge. Once this deficiency has been fixed, let me know so that I can clear this deficiency.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 04/24/2019. OBSERVATION: Observed one unlabeled, uncovered 5-gallon pail containing waste Iridite rinse water and one unlabeled, uncovered 5-gallon pail containing waste chromate rinse water in the plating area. Also observed one uncovered, unlabeled 5-gallon pail containing hazardous deburring waste in the deburring area. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the containers listed above have been properly covered.

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194

Violation Description: Failure to maintain the following general tank operating requirements:
a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.

Violation Notes: Returned to compliance on 08/12/2016. OBSERVATION: Observed exterior of hazardous waste treatment tanks are not in good repair. CORRECTIVE ACTIONS: Immediately ensure that the HW tank system is operated according to the requirements listed in the regulations.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

HAZARDOUS AIR POLLUTANT MAJOR

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History: The site is the location of a former Methode Electronic facility. Based on previous reports of subsurface investigations at the site, the soil, soil gas, and groundwater have been contaminated primarily by VOCs. The VOCs groundwater plume has migrated offsite during the last several years, but no groundwater remediation has yet been conducted. Some SVE was conducted previously to remediate a vadose zone source area of VOCs.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Land use advisory is applied to restrict residential use. This site has copper and nickel contamination subslab at an industrial risk level. In addition halogenated volatile organic compounds were detected in soil vapors at an industrial risk level and groundwater but not soils. Indications are that the source of the halogenated volatile organic compounds is upgradient groundwater.

Quarterly Update:

The Ambitech facility is circuit board manufacturing facility in Chatsworth California (in the City of Los Angeles) that has ceased operation and is reorganizing its business. In 1989, DTSC completed a RCRA Facility Assessment (RFA) that identified 11 SWMUs. In 2000, DTSC and Ambitech entered into an Agreement for Corrective Action (ACA) to address the 11 SWMUs. As part of this ACA, Ambitech has sampled several of the SWMUs and provided summary reports. At three of the SWMUs elevated levels of contamination were not found and are in the process of being cleared. The facility operated under interim status for a short time and moved over to the Permit by Rule program. As part of that program DTSC CUPA unit found several violations at the facility and is pursuing penalties in court. One of the two buildings that comprise Ambitech has been sold. Ambitech has since went bankrupt and the remaining property sold to EMA L.L.C.. As of August 2007 the new owner was talking with DTSC about Corrective Action to complete the investigation and remediate any contamination. EMA L.L.C. entered into a Corrective Action Consent Agreement on January 10, 2008. The Current Condition Report revision C was recieved August 27, 2008 and approved on 9/29/2008. The RFI work plan revision D was recieved on 2/27/2009 and approved on 3/9/2009.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

installation of 5 new power poles, of which 4 are existing poles that are being replaced, 1 is a new pole. Two of the existing poles are within the property boundary (double poles with pole mounted transformer), the additional pole is to be installed within the property boundary that is deeded by a LUC. Based on historical operations and information available to DTSC, the proposed work does not impact the areas known to have existing soil contamination. DTSC approves the work. It is not expected to impact the restrictions. However, should any discolored soils or potentially contaminated soils be encountered, please notify DTSC prior to proceeding. Caution should be used in handling Site soils, standard precautions should be in place for all workers exposed to excavated soils. If excavated soils are in doubt of its potential contamination, they should be profiled prior to disposal at an appropriate facility. DTSC approved the work. No changes to Site on Site Visit.

Completed Date: 08/01/1997
Comments: Preliminary PEA investigation data submitted for DTSC review. Data indicates presence of elevated levels of hexavalent and total chromium in soil in vicinity of former hazardous material storage area. Further action warranted. Further action may include land use covenant, further investigation and/or remediation. Preparation of final PEA report not necessary, in light of data and need for further action. PEA VCA terminated and F.A. determination made based on elevated levels of Cr+6 in soil. Consultants to address contamination and submit PEA at later date.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/14/2021. Submit a Hazardous Materials Inventory into CERS. Included in this inventory should be all hazardous materials stored in a capacity equal to or greater than 55 gallons of liquid, 200 cubic feet of compressed gas or 500 pounds in weight of a solid. The following was noted: Effective December 28, 2017, CalEPA has replaced the previously existing 5 federal hazard categories in CERS with 24 new federal hazard categories. The following federal hazard categories are now obsolete fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you still have the previous federal categories selected &/or have NOT selected any of the NEW federal hazard categories for your chemical inventory. Please review your hazardous material inventory & complete the following steps: 1) De-select all of the five obsolete federal hazard categories for all chemical inventory listed under your facility. 2) Update your hazardous material inventory & [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: San Emigdio

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	18 inches	77 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

05/05/2011.

Mr. David Herrera, Supervisor, sent me the copy of the gas bills since january 1, 2010. The review of the gas bills revealed that their yearly gas usage was more than 9,000 Therms and therefore they are not exempt from the emission requirements of Rule 1146.2. He failed to provide me any test results demonstrating that their Raypak boiler (S.N. 0585 102261) meets the emission requirements of Rule 1146.2.

I issued NOV # P53932 to Bally Total fitness for failing to demonstrate that their Raypak boiler (1.082 MM Btu/hr., S.N. 0585 102261) manufactured in May 1985 meets the emission requirements of Rule 1146.2.
