APPENDIX F
PHASE I ESA

PHASE I
ENVIRONMENTAL SITE ASSESSMENT OF THE PROPERTY LOCATED AT 255, 260 & 290 MAPLE COURT AND 3585 MAPLE STREET VENTURA, CA 93003

Prepared for:

Gelt, Inc.
18751 Ventura Boulevard, 2nd floor
Tarzana, CA 91356

Prepared by:

Environmental Managers & Auditors, Inc.
26500 Agoura Road, #102-374

September 9, 2021

Gelt, Inc.
16421 Scientific Way
Ventura, CA 92618

To whom it may concern:

In accordance with Gelt, Inc.'s request and authorization, Environmental Managers & Auditors Inc. (EMA) performed a review of potential environmental liabilities associated with the property located at 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura in August 2021. The purpose of this assessment was to identify potential environmental concerns associated with the property (exclusive of geologic stability or flood potential), building construction, and use. This investigation was conducted by EMA and consisted solely of the activities described in the Scope of Work section of this report. The findings, conclusions and recommendations presented herein are subject to the limitations discussed in Section 1.3 and the agreement for Environmental Consulting Services.

A brief report summarizing our findings is enclosed. Should you have any questions, please do not hesitate to contact the undersigned at your convenience. EMA appreciates the opportunity to be of professional services to Gelt, Inc. on this project.

Sincerely,

ENVIRONMENTAL MANAGERS & AUDITORS, INC.

Khalid "AL" Mahmood
Project Director

Enclosure

EXECUTIVE SUMMARY

Environmental Managers & Auditors, Inc. (EMA) has performed a Phase I Environmental Site Assessment (ESA) in general accordance with ASTM 1527-13 for the property located at 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura, California.

The Phase I Environmental Site Assessment is designed to provide Gelt, Inc. an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the property. This assessment was conducted utilizing generally accepted ESA industry standards in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

The address of the subject property is 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura, California (herein referred as subject property). The subject property is located in a residential, commercial and light industrial area, in the City of Ventura, California. According to County of Ventura Assessor's Office, the assessor's parcel numbers (APNs) of the subject property are: 079-01-101; 079-01-425; 079-01-445 and 079-01-455. All surrounding areas consist of residential, commercial and light industrial developments.

The subject property consists of four 2-story wood frame stucco exterior/painted office buildings with associates asphalt paved parking lots and courtyards. The buildings descriptions are described as follows: The 2-story office building located at 255 Maple Court consisting of 19,160 sq. ft. on a 47,045 sq. ft. lot was built in 1980; The 2-story office building located at 260 Maple Court consisting of 47,265 sq. ft. on a 105,415 sq. ft. lot was built in 1977; The 2-story office building located at 290 Maple Court consisting of 47,829 sq. ft. on a 98,010 sq. ft. lot was built in 1975; and the 2-story office building located at 3585 Maple Street consisting of 47,863 sq. ft. on a 85,813 sq. ft. lot was built in 1974. The buildings were built on concrete slab foundations. Each office building is serviced with elevators. There are secured trash collection areas located throughout the site. No other structures or significant surface features were noted on the subject property at the time of the site reconnaissance. A review of records available at the City of Ventura Department of Building and Safety and County of Ventura Assessor's Office revealed that the subject property was developed with the current 2-story office buildings in 1974 (3585 Maple Street), 1975 (290 Maple Court), 1977 (260 Maple Court) and 1980 (255 Maple Court).

The interiors of the 2-story office buildings consist of carpeting, ceramic tiles, and bare concrete flooring and dry wood ceilings.

Access to the subject property is from Maple Street to the south and S. Mills Road to the west. Drainage is accomplished via drains located at the property which direct surface water to storm drains in the surrounding streets.

At the time of the site reconnaissance, the subject property was occupied by office tenants. A review of historical city directories and other pertinent regulatory agencies records revealed that Continental Oil Company, Union Oil, Conoco Oil, etc. occupied the subject property in the past. A further review of records indicated that these tenants did not engage in any activities that involved usage, storage and/or generation of hazardous materials/hazardous wastes at the site. These tenants occupied the site strictly for office and administrative purposes only. No other tenants of potential environmental concern were identified in connection with the subject property.

The subject property is bounded by Maple Street to the south, beyond which are residential and commercial developments, Mechanic's Bank and Wells Fargo Bank to the west, beyond which are S. Mills Road and other commercial developments, residential developments to the east and Anacapa Middle School and residential developments to the north, beyond which are Telegraph Road and other residential and commercial developments. No tenants of potential environmental concern were identified in the immediate vicinity of the subject property.

During the site reconnaissance, no hazardous materials and /or hazardous wastes were observed at the site. No chemical odors, hummock topography, closed depressions or other evidence of hazardous waste dumping was observed on-site. No evidence of waste dumping was noted on adjacent properties during the site visit by EMA personnel. During a visual inspection of contiguous properties, there was no evidence to suggest that a significant surface release of a hazardous substance(s) had recently occurred.

During the site reconnaissance, no industrial manufacturing activities were observed on the property. No air emission sources requiring permits were observed at the subject property during the site reconnaissance.

During the site reconnaissance, several pad-mounted electrical transformers owned and operated by Southern California Edison (SCE) were observed outside in the parking lot areas. No stains, spills and/or leaks were noted in the vicinity of these transformers. It should be noted that pad-mounted electrical transformers owned and operated by SCE do not contain polychlorinated biphenyls (PCBs) at levels that require special management.

The non-hazardous solid waste generated at the site is collected in trash dumpsters placed in secured locations throughout the site. During the site reconnaissance, no hazardous materials and/or hazardous wastes were noted in the trash dumpsters.

Based on the original date of construction (built prior to 1982), there is a potential for asbestos in the construction materials. No asbestos sampling was performed as part of this assignment.

A review of the government database report indicated that the previous subject property tenants, Décor, LLC/Conoco, Inc./San Miguelito Field, are listed on Emergency Response

Notification System (ERNS), California Integrated Water Quality System (CIWQS), HAZNET-CA, Hazardous Waste Generators (HWG) and Pipelines, databases. A further review of records indicated that in 1993 Conoco, Inc. generated 0.2297 ton of polychlorinated biphenyls (PCBs) waste at the site. The PCBs waste was hauled off-site for proper disposal. A comprehensive review of regulatory agencies files and interviews with the subject property representative, Mr. Randy Wuerth, revealed that the building located at 290 Maple Court was occupied by Décor, LLC/Conoco, Inc./San Miguelito Field for office and administrative purposes only. These businesses did not use, store and/or generate hazardous material and/or hazardous wastes at the site. A further review of records indicated that no gas and/or crude pipelines operated at the subject property in the past. Based on the information available, listing of Décor, LLC/Conoco, Inc./San Miguelito Field on these databases is not considered a recognized environmental condition to the subject property.

A further review of the database report did not identify any sites of potential environmental concern in the immediate vicinity of the subject property.

FINDINGS, CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- EMA did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- EMA did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- EMA did not identify any historical recognized environmental conditions during the course of this assessment.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

EMA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura, Ventura County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the property. Based on the conclusions of this assessment, EMA does not recommend further investigation at the site.

1.0 INTRODUCTION

Environmental Managers & Auditors, Inc. (EMA) was retained by Gelt, Inc. to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura (herein referred as subject property). The protocol used for this assessment is in general conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

On August 15, 2021, EMA conducted a site reconnaissance to assess the possible presence of petroleum products and hazardous materials at the subject property. EMA's investigation included a review of aerial photographs, historical city directories, a reconnaissance of adjacent properties, background research, and a review of available local, state, and federal regulatory records regarding the presence of petroleum products and/or hazardous materials at the subject property

1.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Property. EMA understands that the findings of this study will be used by Gelt, Inc. to evaluate a pending financial transaction in connection with the subject property.

1.2 Detailed Scope of Services

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-13. EMA warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions. No other warranties are implied or expressed.

1.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment, or which were not reasonably identifiable from the available information. EMA believes that the information obtained from the records review and the interviews concerning the site is reliable. However, EMA cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide Gelt, Inc. with information relating to the subject property.

1.4 Special Terms and Conditions

This report is intended for the sole use of Gelt, Inc.. Any party other than Gelt, Inc. who wishes to use this report to identify recognized environmental conditions in the process of making appropriate inquiry into the site or surrounding properties should notify EMA by executing the "Application of Authorization to Use" which follows this document. Based on the intended use of the report, EMA may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by Gelt, Inc. or anyone else will release EMA from any liability resulting from the use of this report by any unauthorized party.

1.5 Limitations

To a large extent, the conclusions reached during this Phase I ESA rely on information gathered from public and private sources. The lack of evidence regarding the presence of hazardous materials resulting from a reasonable and mutually agreed-upon scope of work does not guarantee the absence of such materials. It only indicates that no hazardous materials were found as a result of the investigation. The limited nature of the scope of work for a Phase I ESA precludes EMA from providing any warranty or guarantee regarding the absence of hazardous materials. The report is not a guarantee that chemical contamination does not exist at or beneath the site. This report does not specifically address the quality of groundwater beneath the site. The quality of groundwater can only be ascertained by physical testing. EMA has provided its best professional judgment and performed the agreed-upon services in accordance with standard and accepted consulting practices and procedures. The environmental conditions may vary considerably from those observed during this investigation. Should any additional data become available, these data should be reviewed by EMA and the conclusions presented herein modified as appropriate.

This report has been prepared in accordance with EMA's standard terms and conditions. No other warranty, expressed or implied, is made.

1.6 Limiting Conditions and Methodology Used

The environmental site assessment was performed in general accordance with the methodology set forth in ASTM Standard E-1527-13, Standard Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process. There were no limiting conditions encountered during the Phase I ESA.

1.7 User Reliance

All reports, both verbal and written, are for the benefit of Gelt, Inc. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EMA.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The address of the subject property is 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura, California (herein referred as subject property). The subject property is located in a residential, commercial and light industrial area, in the City of Ventura, California. According to County of Ventura Assessor's Office, the assessor's parcel numbers (APNs) of the subject property are: 079-01-101; 079-01-425; 079-01-445 and 079-01-455. All surrounding areas consist of residential, commercial and light industrial developments.

2.2 Site and Vicinity Characteristics

The subject property consists of four 2-story wood frame stucco exterior/painted office buildings with associates asphalt paved parking lots and courtyards. The buildings descriptions are described as follows: The 2-story office building located at 255 Maple Court consisting of 19,160 sq. ft. on a 47,045 sq. ft. lot was built in 1980; The 2-story office building located at 260 Maple Court consisting of 47,265 sq. ft. on a 105,415 sq. ft. lot was built in 1977; The 2-story office building located at 290 Maple Court consisting of 47,829 sq. ft. on a 98,010 sq. ft. lot was built in 1975; and the 2-story office building located at 3585 Maple Street consisting of 47,863 sq. ft. on a 85,813 sq. ft. lot was built in 1974. The buildings were built on concrete slab foundations. Each office building is serviced with elevators. There are secured trash collection areas located throughout the site. No other structures or significant surface features were noted on the subject property at the time of the site reconnaissance. A review of records available at the City of Ventura Department of Building and Safety and County of Ventura Assessor's Office revealed that the subject property was developed with the current 2-story office buildings in 1974 (3585 Maple Street), 1975 (290 Maple Court), 1977 (260 Maple Court) and 1980 (255 Maple Court).

The interiors of the 2-story office buildings consist of carpeting, ceramic tiles, and bare concrete flooring and dry wood ceilings.

Access to the subject property is from Maple Street to the south and S. Mills Road to the west. Drainage is accomplished via drains located at the property which direct surface water to storm drains in the surrounding streets.

2.3 Description of Structures

The subject property consists of four 2-story wood frame stucco exterior/painted office buildings with associates asphalt paved parking lots and courtyards. The buildings descriptions are described as follows: The 2-story office building located at 255 Maple Court consisting of 19,160 sq. ft. on a 47,045 sq. ft. lot was built in 1980; The 2-story office building located at 260 Maple Court consisting of 47,265 sq. ft. on a 105,415 sq. ft.

lot was built in 1977; The 2-story office building located at 290 Maple Court consisting of 47,829 sq. ft. on a 98,010 sq. ft. lot was built in 1975; and the 2-story office building located at 3585 Maple Street consisting of 47,863 sq. ft. on a 85,813 sq. ft. lot was built in 1974. The buildings were built on concrete slab foundations. Each office building is serviced with elevators. There are secured trash collection areas located throughout the site. No other structures or significant surface features were noted on the subject property at the time of the site reconnaissance.

The interiors of the 2-story office buildings consist of carpeting, ceramic tiles, and bare concrete flooring and dry wood ceilings.

2.4 Current Use of the Property

At the time of the site reconnaissance, the subject property was occupied by office tenants. A review of historical city directories and other pertinent regulatory agencies records revealed that Continental Oil Company, Union Oil, Conoco Oil, etc. occupied the subject property in the past. A further review of records indicated that these tenants did not engage in any activities that involved usage, storage and/or generation of hazardous materials/hazardous wastes at the site. These tenants occupied the site strictly for office and administrative purposes only. No other tenants of potential environmental concern were identified in connection with the subject property.

During the site reconnaissance, no hazardous materials and /or hazardous wastes were observed at the site. No chemical odors, hummock topography, closed depressions or other evidence of hazardous waste dumping was observed on-site. No evidence of waste dumping was noted on adjacent properties during the site visit by EMA personnel. During a visual inspection of contiguous properties, there was no evidence to suggest that a significant surface release of a hazardous substance(s) had recently occurred.

During the site reconnaissance, no industrial manufacturing activities were observed on the property. No air emission sources requiring permits were observed at the subject property during the site reconnaissance.

During the site reconnaissance, several pad-mounted electrical transformers owned and operated by Southern California Edison (SCE) were observed outside in the parking lot areas. No stains, spills and/or leaks were noted in the vicinity of these transformers. It should be noted that pad-mounted electrical transformers owned and operated by SCE do not contain polychlorinated biphenyls (PCBs) at levels that require special management.

The non-hazardous solid waste generated at the site is collected in trash dumpsters placed in secured locations throughout the site. During the site reconnaissance, no hazardous materials and/or hazardous wastes were noted in the trash dumpsters.

2.5 Current Adjacent Properties

The subject property is bounded by Maple Street to the south, beyond which are residential and commercial developments, Mechanic's Bank and Wells Fargo Bank to the west, beyond which are S. Mills Road and other commercial developments, residential developments to the east and Anacapa Middle School and residential developments to the north, beyond which are Telegraph Road and other residential and commercial developments. No tenants of potential environmental concern were identified in the immediate vicinity of the subject property.

3.0 USER PROVIDED INFORMATION

Pursuant to ASTM E 1527-13, EMA requested the following site information from Mr. Randy Wuerth (the Key Site Contact).

3.1 Title Records

A Title Report was provided to EMA for review. No environmental concerns were noted in the Title Report.

3.2 Environmental Liens or Activity and Use Limitation

EMA requested information from the Key Site Contact regarding knowledge of environmental liens, activity and use limitations for the Property. The site contact was not aware of any environmental liens associated with the Property. In addition, the site contact had no knowledge of any use or activity limitations

3.3 Specialized Knowledge

EMA inquired with the Key Site Contact regarding any specialized knowledge of environmental conditions associated with the Property. The User and Key Site Manager were not aware of any environmental conditions associated with the Property.

3.4 Commonly Known or Reasonably Ascertainable Information

EMA inquired with the Key Site Contact regarding any commonly known or reasonably ascertainable information within the local community about the Property that is material to recognized environmental conditions in connection with the Property. The User and Key Site Manager were not aware of any information within the local community about the Property that is material to recognized environmental conditions in connection with the Property.

3.5 Valuation Reduction for Environmental Issues

EMA inquired with the Key Site Contact regarding any knowledge of reductions in property value due to environmental issues. The site contact was not aware of any valuation reductions associated with the Property.

3.6 Reason for Performing Phase I ESA

The purpose of this ESA was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E-1527-13) in connection with the Property. This ESA was also performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E-1527-13 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

4.0 REGULATORY AGENCY RECORDS SEARCH

The purpose of Government database lists is to document the location of known Federal and State superfund sites or other known or potentially hazardous waste sites within a one-eighth to one-mile radius of the subject property. The review will also serve to indicate the possibility that the subject property may become a "border zone property@, defined as a property located within 2000 feet of a State-designated hazardous waste property.

EMA obtained a Government record report prepared by Envirosite of Shelton, Connecticut. This computer-generated report is attached to this preliminary environmental site assessment report as Appendix B and consists of Government listed properties within a one-eighth to one-mile radius of the subject property which store and use hazardous materials or have had a release of hazardous materials to soil or groundwater. The study area for this preliminary environmental site assessment includes a one-eighth to one-mile radius for Federal, State and local database sources to meet the ASTM standards.

Appendix B includes a complete copy of the regulatory agency database search report generated by Envirosite select agency databases only. The accuracy of the results of the report in Appendix B is constrained by the limits of care and professional skill exercised by the EMA's sub-consultant. For completeness and quality control, additional agency records were investigated personally by EMA personnel.

EMA makes no claims as to the completeness or accuracy of the referenced sources. Envirosite's review of these records can be only as current as their listings and may not represent the entire sum of known or potentially hazardous waste of contaminated sites.

EMA reviewed the following agency lists to evaluate whether there are sites within the study area that may pose potential environmental concerns relative to the site.

4.1 Federal Sources

4.1.1 Federal RCRA Non-Corracts TSD Facilities List

The EPA's Resources Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of reporting facilities that generate, transport, treat, store or dispose of hazardous waste.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.2 FEDERAL CERCLIS LIST

United States Environmental Protection Agency (USEPA) Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) February 9, 1992 - CERCLIS provides information for businesses or properties that are on or being considered for the federal Superfund Program according to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Under this program, a business or property is identified, and a preliminary assessment is performed to assess whether the site shall become a federal Superfund site.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.2 CERCLIS-NFRAP

As of February 1995, CERCLIS sites designated ANo Further Remedial Action Planned@ (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund action or NPL consideration.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.1.3 Federal Facilities (FEDFAC)

As part of the CERCLA program, federal facilities with known or suspected environmental problems, the Federal Facilities Hazardous Waste Compliance Docket is tracked separately to comply with a Federal Court order.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.4 Federal RCRA CORRACTS Facilities List

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.5 Federal Delisted NPL Site List

The Federal Delisted National Priority List (NPL) sites are the United States Environmental Protection Agency's (USEPA) list of the sites that were delisted and no longer require action.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.6 Federal Landfill and/or Solid Waste Disposal Site Lists

The EPA maintains this database of RCRA facilities which are undergoing "corrective action". A "corrective action order" is issued pursuant to RCRA section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from RCRA facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.1.7 Federal ERNS list

The Emergency Response Notification System (ERNS) is a national database used to collect information on reported accidental releases of oil and hazardous substances. The database contains information from spill reports made to federal authorities including the EPA, the US Coast Guard, the National Response Center and the Department of Transportation.

The previous subject property tenants, Décor, LLC/Conoco, Inc./San Miguelito Field, are listed on this database. In addition, these tenants are listed on the California Integrated Water Quality System (CIWQS), HAZNET- CA, Hazardous Waste Generators (HWG) and Pipelines, databases. A further review of records indicated that in 1993 Conoco, Inc. generated 0.2297 ton of polychlorinated biphenyls (PCBs) waste at the site. The PCBs waste was hauled off-site for proper disposal. A comprehensive review of regulatory agencies files and interviews with the subject property representative, Mr. Randy Wuerth, revealed that the building located at 290 Maple Court was occupied by Décor, LLC/Conoco, Inc./San Miguelito Field for office and administrative purposes only. These businesses did not use, store and/or generate hazardous material and/or hazardous wastes at the site. A further review of records indicated that no gas and/or crude pipelines operated at the subject property in the past. Based on the information available, listing of Décor, LLC/Conoco, Inc./San Miguelito Field on these databases is not considered a recognized environmental condition to the subject property.

4.1.8 Federal RCRA Generators list

The EPA's Resources Conservation and Recovery Act (RCRA) Program identifies small hazardous waste generator sites, who generate less than 100 kg/month of non-acutely hazardous waste and large hazardous waste generator sites, who generate more than 100 kg/month of non-acutely hazardous waste. The RCRA Facilities database is a compilation by the EPA of reporting facilities that generate hazardous waste.

The subject property is not listed on this database.

4.1.9 Federal National Priority List Sites

The Federal National Priorities List (NPL) sites are the United States Environmental Protection Agency's (USEPA) list of prioritized Superfund sites with significant risk to human health and the environment. These sites receive remedial funding under the Comprehensive Environmental Response, Conservation and Liability Act (CERCLA).

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.10 Federal Institutional Controls / Engineering Controls Registries

The EPA maintains this database of Sites with institutional or engineering controls related to Resource Conservation and Recovery Act.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.11 PCB Waste Handler Database (PCB)

The US EPA tracks generators, transporters, commercial stores and/or brokers and disposers of PCBs in accordance with the Toxic Substance Control Act.

The subject property is not listed on this database.

4.1.12 Toxic Release Inventory System

Title III of the Superfund Amendments and Reauthorization Act, Section 313, also known as Emergency Planning and Community Right-to-Know Act of 1986 requires owners or operators of facilities with more than 10 employees and are listed under Standard Industrial Classification (SIC) Codes 20 through 39 to report the manufacturing, processing or use of more than a threshold of certain chemical or chemical categories listed under section 313. This database is also known as Toxic Release Information System (TRIS).

The subject property is not listed on this database.

4.2.13 Hazardous Waste Compliance Docket

Section 120(c) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) requires EPA to establish a listing, known as the Federal Facility Hazardous Waste Compliance Docket (Docket), of Federal facilities which are managing or have managed hazardous waste; or have had a release of hazardous waste.

The subject property is not listed on this database.

4.1.14 Section Seven Tracking System (SSTS)

SSTS evolved from the FIFRA and TSCA Enforcement System. SSTS tracks the registration of all pesticide producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and devices that are produced, sold or distributed each year.

The subject property is not listed on this database.

4.1.15 Nuclear Regulatory Commission Licenses (NC)

The Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards has been mandated to protect the public health and safety, the common defense and security, and the environment by licensing, inspection and environmental impact assessment for all nuclear facilities and activities and for the import and export of special nuclear material.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.1.16 Permit Compliance System (PCS)

PCS is a database which contains data on NPDES permit holding facilities. PCS was developed by The US EPA to meet the information need of the NPDES program under the Clean Water Act. PCS tracks permit, compliance, and enforcement states of NPDES facilities.

No properties within a one-mile radius, including the subject property, appear on this list.

4.1.17 AIRS Facility System (AFS)

AFS contains emissions and compliance data on air pollution point sources tracked by USEPA and State and Local environmental agencies.

The subject property is not listed on this database.

4.1.18 FIFRA/TSCA Tracking System (FIFRA)

NCDB supports implementation of the Federal Insecticide, Fungicide and Rodenticide Control Act (FIFRA) and the Toxic Substance Control Act (TSCA).

The subject property is not listed on this database.

4.1.19 Federal Facilities Information System (FFIS)

Federal Facilities Information System (FFIS) contains a list of all Treatment Storage and Disposal Facilities owned and operated by federal agencies.

No properties within a one-fourth mile radius, including the subject property, appear on this list.

4.1.20 Chemicals in Commerce Information System (CICIS)

CICIS contains an inventory of chemicals manufactured in commerce or imported for Toxic Substance Control Act regulated commercial purposes. CICIS allow EPA to maintain a comprehensive listing of over 70,000 chemical substances that are manufactured or imported and are regulated under TSCA.

No properties within a one-fourth mile radius, including the subject property, appear on this list.

4.1.21 EPA Facility Index System (FINDS)

The US EPA maintains an index system of all facilities which are regulated or have been assigned an identification number for other purposes.

The subject property is not listed on this database.

4.1.22 Records of Emergency Release Reports (HMIRS)

The Hazardous Material Report Incident Subsystem HMIRS of the Research and Special Programs Administration (RSPA) Hazardous Materials Information System was established in 1971 to fulfill the requirements of the Federal hazardous material transportation law. Part 171 of Title 49, Code of Federal Regulations (49 CFR) contains the incident reporting requirements of carriers of hazardous materials. An unintentional release of hazardous materials meeting the criteria set forth in Section 171.16, 49 CFR, must be reported on DOT Form 5800.1. The data from the reports received are subsequently entered in the HAZMAT database.

The subject property is not listed on this database.

4.2 California State Sources

4.2.1 State and Tribal Registered Storage Tank Lists

The California State Water Regional Control Board, Office of Underground Storage Tanks maintains an inventory of registered aboveground and underground storage tanks.

The subject property is not listed on this database. Four sites are listed on this database. Based on the distance and status, these sites are not considered a recognized environmental condition to the subject property.

4.2.2 State and Tribal Brownfield Sites

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.3 State and Tribal – Equivalent CERCLIS

The California Water Quality Control Board, Division of Loan Grants maintains an inventory of sites with Historical Toxic Pits that are no longer in current agency list, Toxic Pit sites which are currently active, and sites listed on Envirostor database maintained by the DTSC.

The subject property is not listed on this database. Eleven sites are listed on this database. These sites are not located in the immediate vicinity of the subject property. Based on the distance and status, these sites are not considered recognized environmental condition to the subject property.

4.2.4 State and Tribal – Equivalent NPL

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk that are no longer in current agency list.

The subject property is not listed on this database. One site is listed on this database. This site is not located in the immediate vicinity of the subject property. Based on the distance and status, this site is not considered recognized environmental condition to the subject property.

4.2.5 State and Tribal Leaking Underground Storage Tanks

The leaking underground storage tanks (LUST) list in the City of Ventura is maintained by the Regional Water Quality Control Board (RWQCB), City of Ventura Fire Department, Ventura County Environmental Healthy and Ventura County FireDepartemnt. The LUST list is a compilation of all investigations conducted by the RWQCB in response to reports of hazardous materials leaking from USTs.

The subject property is not listed on this database. Fourteen sites are listed on this database. A review of database report indicated that cases have been closed for thirteen of the fourteen sites. One site, Gasco #094 located at 3781 Telegraph Road, 893 feet north-northeast of the subject property, is undergoing remediations. Based on the distance and status, the above listed LUST sites are not considered recognized environmental condition to the subject property.

4.2.6 State and Tribal Landfill and/or Solid Waste Disposal Sites

This list is maintained by the California Integrated Waste Management Board. In 1977, this list was created to identify active and inactive sanitary landfills, transfer stations, and disposal facilities.

No properties within one-half mile radius, including the subject property, appear on this list.

4.2.7 State and Tribal Voluntary Cleanup Sites

This category contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

No properties within one-half mile radius, including the subject property, appear on this list.

4.2.8 Local Brownfield Lists

The Site Mitigation and Brownfield Reuse Database (SMBRD) identify certain potentially hazardous waste sites. These are confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity and deemed generally high-priority and high potential risk.

No properties within one-half mile radius, including the subject property, appear on this list.

4.2.9 Local Lists Hazardous Waste / Contaminated Sites

The U.S. Department of Justice and Department of Toxic Substances Control maintain listing of clandestine drug lab locations, historical listing of clandestine drug lab locations, listing of Meth and clandestine drug labs and listing of possible hazardous materials contamination sites on existing school properties.

No properties within one-quarter mile radius, including the subject property, appear on this list.

4.2.10 Records of Emergency Release Reports

The Hazardous Material Report Incident Subsystem HMIRS of the Research and Special Programs Administration (RSPA) Hazardous Materials Information System was established in 1971 to fulfill the requirements of the Federal hazardous material transportation law. Part 171 of Title 49, Code of Federal Regulations (49 CFR) contains the incident reporting requirements of carriers of hazardous materials. An unintentional release of hazardous materials meeting the criteria set forth in Section 171.16, 49 CFR, must be reported on DOT Form 5800.1. The data from the reports received are subsequently entered in the HAZMAT database.

The subject property is not listed on this database.

4.2.11 Local Land Records

The Department of Toxic Substances Control maintains a listing of properties with environmental liens and deed restrictions.

The subject property is not listed on this database.

4.2.12 Local Lists of Landfill / Solid Waste Disposal Sites

This Database contains listing of local landfills and facilities which perform recycled material processing activities.

No properties within one-half mile radius, including the subject property, appear on this list.

4.2.13 Solid Waste Assessment Test

This program, provided for under the Calderon legislation, requires that disposal sites with more than 50,000 cubic yards of waste provide sufficient information to the regional water quality control board to determine whether or not the site has discharged hazardous substances which will impact the environment.

The subject property is not listed on this database.

4.2.14 Properties Needing Further Evaluation

This category of The Site Mitigation and Brownfields Reuse Program Database contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.15 Hazardous Waste and Substance Site List (CORTESE List)

The CORTESE List is compiled by the California State Office of Planning and Research and provides information concerning identified hazardous waste/substance sites within the State of California. The CORTESE List contains the following information:

- Records that have been compiled by the CAL-EPA DTSC. These are abandoned hazardous waste sites.

- Records that have been compiled by the Environmental Health Division of Cal EPA. These sites contain contaminated public drinking water wells that serve less than 200 connections (Small Wells) and more than 200 connections (large wells).

- Sites included under the Hazardous Substance Cleanup Bond Act, pursuant to Section 25356 of the California Health and Safety Code.

- Records compiled by the State Water Resources Control Board (WRCB). These are the sites of reported UST leaks that have been investigated by the WRCB.

- Records compiled by the California Waste Management Board. These are solid waste disposal facilities from which there is a known migration of hazardous wastes.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.16 Hazardous Materials System Industrial Waste List

The Ventura County Department of Public Works (CLADPW) maintains a listing of sites with industrial waste discharges.

No properties within a 1/4-mile radius, including the subject property, appear on this list.

4.2.17 Cal Sites - No Further Action

This section includes the sites on the Calsite list, which have been flagged for no further action by the California Environmental Protection Agency, Department of Toxics Substance Control (DTSC) in accordance with Section 25359.6 of the California Health and Safety Code.

No properties within a one-half mile radius, including the subject property, appear on this list.

4.2.18 Hazardous Waste Information System (HWT-CA)

The DTSC maintains a database keeping track of the movement and disposal of hazardous waste. The data is used to support the Tanner legislation, AB 2948.

The subject property is not listed on this database.

4.1.19 Dry Cleaners

This Sate maintains a list of dry cleaners that maintain and operate dry-cleaning equipment on the premises.

The subject property is not listed on this database.

4.1.20 Medical Waste Management Program (MWMP)

This State maintains a list of facilities that generate permitted medical waste and are inspected by the Medical Waste Management Program.

The subject property is not listed on this database.

4.2.21 Toxic Release Inventory System

The California Regional Water Quality Control Boards for local Department of Health Services keeps track of toxic releases to the environment. These lists are known as Unauthorized Release, Spill, Leaks, Investigations and Cleanups, Non-Tank Release, Toxics List or similar, depending on the local agency.

The subject property is not listed on this database.

4.2.23 Enforcement and Compliance History Online (ECHO)

ECHO is the Enforcement and Compliance History Online Website to search for facilities to assess their compliance with environmental regulations.

The subject property is not listed on this database.

4.2.24 Facility Registry System (FRS)

The Facility Registry Service provides quality facility data to support EPA's mission of protecting human health and the environment. Learn more about facilities, sites, or places of environmental interest that are subject to regulation.

The subject property is not listed on this database.

4.3 Local Sources

4.3.1 City of Ventura Department of Building and Safety

Records from the City of Ventura Department of Building and Safety (CVDBS) were reviewed for evidence indicating the developmental history of the subject property, and for the presence of documentation relative to underground storage tanks (USTs) and hazardous materials. No records of potential environmental concern were identified in the CVDBS files.

Copies of building records are presented in Appendix C.

4.3.2 City of Ventura Fire Department

Records from the City of Ventura Fire Department (CIFD) were reviewed for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.3 Ventura County Fire Department

Records from the Ventura County Fire Department were reviewed for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.4 County of Ventura Department of Public Works

Records from the County of Ventura Department of Public Works (CODPW) were reviewed for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.5 Ventura County Environmental Health

Records from the Ventura County Environmental Health were reviewed for evidence indicating the presence of Underground Storage Tanks (USTs) and for the use of hazardous materials. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.6 South Coast Air Quality Management Control District

A file review was conducted at the South Coast Air Quality Management Control District (SCAQMD). No records were found for the subject property.

4.3.7 Department of Toxic Substances Control

Records from the Department of Toxic Substances Control (DTSC) were reviewed. No records for the hazardous materials and/or USTs were found for the subject property.

4.3.8 California Regional Quality Control Board – Los Angeles Region

Records from the California Regional Quality Control Board – Los Angeles Region were reviewed No records for the hazardous materials and/or USTs were found for the subject property.

5.0 ENVIRONMENTAL SETTING

5.1 Geology and Hydrogeology

The site lies in the Transverse Range Province. This is an east west trending range of mountains bounded by faults to the north and south. The Santa Susana Mountains are north of the site. The underlying bedrock is mainly Plio-Pleistocene with a dropped block to form the valleys. The surface sediments, especially on the valley floor are Quaternary to Recent alluvial material eroded from the higher elevations and carried down valley.

Local sediments found beneath the site to the depth of boring consist of fine sands and silts with some clay or fine gravel showing occasionally. The sediments in all the cores were very dry. Gravels when they appeared were angular to sub angular.

Based on the Ventura Water Resources Department well database the nearest wells were located about one-half block north of the subject site. These were production wells that were used in the 1960's but have since been abandoned. The ground surface elevation of these wells was about 975 feet (the site is at about 965 feet) and the depth to groundwater recorded 40 years ago was 200 to 250 feet in one well and 240 feet in the other.

6.0 HISTORICAL SITE USAGE

A review of records available at the City of Ventura Department of Building and Safety indicated and County of Ventura Assessor's Office indicated that the subject property was developed with the current office buildings in 1974, 1975, 1977 and 1980.

6.1 Aerial Photographs

Historical and current usage of the subject property and adjacent areas was investigated by reviewing aerial photographs provided by Envirosite.

The historical aerial photographs available from 1927 to present were reviewed. No evidence of waste disposal, wetlands, wastes dumping, or debris on the subject site was observed in the historical aerial photographs reviewed by EMA.

Copies of the aerial photographs are presented in Appendix D.

6.2 Sanborn Fire Insurance Maps

These maps were prepared for fire insurance underwriting purposes and describe the construction and relative fire-resistance of buildings, depict the locations of fire-prevention devices, gasoline storage tanks, water lines, cistern, and any potentially flammable materials in the site vicinity over time. A search of Sanborn fire insurance maps conducted by Envirosite indicated that no mapping was done for the subject area.

A copy of the response stating "Fire Insurance Maps No Coverage Statement" is presented in Appendix E.

6.3 City Directories Records

City Directories have been published for many cities and towns across the United States since the 18th Century. Originally a list of town residents, the City Directory became a tool for locating individuals and businesses in a particular urban or suburban area. For each address within an area, City Directories list the name of each resident or, if a business operates from that address, the name and the type of business. This historic overview of occupants of a given property is a valuable tool for companies involved in assessing the historic prior use of any resident or commercial property.

Envirosite performed the City Directories search. A review of historical city directories and other pertinent regulatory agencies records revealed that Continental Oil Company, Union Oil, Conoco Oil, etc. occupied the site in the past. A further review of records indicated that these tenants did not engage in any activities that involved usage, storage and/or generation of hazardous materials/hazardous wastes at the site. These tenants occupied the site strictly for office and administrative purposes only. No other tenants of potential environmental concern were identified in connection with the subject property.

Copies of city directories are presented in Appendix F.

6.4 Historical Topographic Maps

EMA obtained historical topographic maps from Envirosite. A review of Topo Maps dated 1935 through 2018 did not reveal production wells or other significant surface features on the topographic maps.

Copies of the Topographic Maps are presented in Appendix G.

6.5 Prior Assessment Reports

Although requested, no previously prepared environmental reports such as Phase I or II Environmental Site Assessments, lead-based paint surveys, lead-in-water surveys, asbestos surveys or geotechnical reports prepared by other consultants were provided for EMA's review.

6.6 Zoning/Land Use Records

Records of the local government were reviewed to determine current and historical uses of the subject property permitted by the local government. According to the City Ventura Department of Building and Safety, the subject property is zoned commercial.

6.7 Recorded Land Title Records

Review of a 50-year chain of title was not included in the scope of the assessment. A title report was requested from the Client but was not received prior to issuance of this report. As a result, the information required for review of recorded land title records is considered not to be readily ascertainable.

6.8 Additional Historical Record Sources

Historical use of the Property was researched using standard historical sources. No other research was conducted or deemed necessary for this assessment.

6.9 Historical Use Information on Adjoining Properties

A review of the historical records revealed that the surrounding areas were used for residential and commercial purposes in the past.

6.10 Data Failure

The objective of historical research is to develop a history of the previous uses of the subject property and surrounding area, in order to help identify the likelihood release of hazardous substances as a result of past activities. The agreed scope of work requires the assessor to

attempt to identify use of the Property at 5-year intervals from 1940 to the present, or, if the Property was already developed in 1940, to the first date of development, but recognizes that data failure frequently occurs, making this impossible. When data failure occurs, ASTM E 1527-13 requires the assessor to document the data failure and assess the potential impact on the ability of the EP to identify recognized environmental conditions.

Information developed in the course of this assessment is adequate to satisfy the requirements of the scope of assessment. No related data failure has been identified.

7.0 SITE RECONNAISSANCE

On August 15, 2021, EMA personnel conducted an inspection of the site located at 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura to assess the current on-site activities that may pose potential impact to the subsurface conditions of the subject site.

During the site visit, EMA personnel inspected the subject site regarding potential environmental concerns including the presence of the UST's or AST's, spray booths, pits, clarifiers, and/or sumps, quantities and types of hazardous/toxic materials and wastes stored, treated, used, generated, or disposed of as part of present or previous tenants business activities, unusual stains or odors, and knowledge of hazardous material spills on the subject site. The subject site was inspected for evidence of any staining and/or spills.

Environmental considerations associated with the site and the study area is discussed in the following sections.

7.1 Aboveground Storage Tanks

No aboveground fuel storage tanks were observed on the subject property during the site reconnaissance.

7.2 Underground Storage Tanks

Visual observation for manways, vent pipes, fill connections, concrete pads and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage fuel tank (UST) installation at the subject site.

7.3 Water and Wastewater

No industrial wastewater was being discharged. No wastewater treatment devices were observed during the site reconnaissance.

7.4 Hazardous Materials/Wastes

During the site reconnaissance, no hazardous materials and/or hazardous wastes arere noted at the site.

During the site reconnaissance, no chemical odors, hummock topography, closed depressions or other evidence of hazardous waste dumping was observed on-site. No evidence of waste dumping was noted on adjacent properties during the site visit by EMA personnel. During a visual inspection of contiguous properties, there was no evidence to suggest that a significant surface release of a hazardous substance(s) had recently occurred.

7.5 Air Emissions

No air emission sources requiring permits were observed at the subject property during the site reconnaissance.

7.6 PCBs

In general, all PCB-designated transformers were required to be replaced with non-PCB-designated transformers when PCBs were designated as a carcinogen by the EPA in 1977. Transformers are currently classified as PCB-containing if their cooling oils contain greater than 50 milligrams per liter (ppm) total PCBs.

During the site reconnaissance, several pad-mounted electrical transformers owned and operated by Southern California Edison (SCE) were observed outside in the parking lot areas. No stains, spills and/or leaks were noted in the vicinity of these transformers. It should be noted that pad-mounted electrical transformers owned and operated by SCE do not contain polychlorinated biphenyls (PCBs) at levels that require special management.

7.7 Solid Waste

The non-hazardous solid waste generated at the site is collected in trash dumpsters placed in secured locations throughout the site. During the site reconnaissance, no hazardous materials and/or hazardous wastes were noted in the trash dumpsters.

7.8 Asbestos Containing Materials (ACMs)

The potential for the presence of friable ACM was evaluated based on the age of the improvements, dates of renovation and other relevant information. Appendix G of the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book) was used as a guide in identifying suspect materials and the definition of suspect ACM and presumed asbestos containing material is taken from 29 CRF Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. It should be noted that asbestos may still be utilized in some non-friable products, such as sheet vinyl flooring, vinyl floor tiles, floor tile mastic, joint compound, asbestos-cement board and roofing materials, as these materials may still be manufactured and installed in the United States. The level of the preliminary evaluation performed was not designed to comply with the survey requirements of the Asbestos Hazard Emergency Response Act (AHERA), 40 Code of Federal Regulations (CFR) Part 763, National Emission Standard for Hazardous Air Pollutants (NESHAP) 40 CFR 61, Occupational Safety and Health Administration (OSHA) 29 CFR Part 1926.1101, or other local, state or federal regulations, but has been conducted per accepted industry practices to satisfy the scope of work of the rating agencies and/or lenders. A finding in this report of "ACM is not a significant concern" or

"No significant asbestos was identified" should not be interpreted as "the building is asbestos free".

Based on the original date of construction (built prior to 1982), there is a potential for asbestos in the construction materials. No asbestos sampling was performed as part of this assignment.

7.9 Pesticides

No visual evidence of pesticides use on the property was observed during the site reconnaissance.

7.10 Radon

High radon readings are typically found and tested in areas of geologic activity, and in cold-weather climates where structures have inadequate ventilation and below grade construction. Radon levels of 4 picocuries per liter (pCi/L) or greater are considered significant readings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4.0 picoCuries per Liter (pCi/L). It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L.

7.11 Wetland

There are no wetlands on the subject property or within the vicinity of the subject property. The review of aerial photographs, topographic maps and personal interviews with local agencies staff did not indicate the presence of wetlands site on the subject property, nor in the vicinity of the subject site.

7.12 Oil Wells

California Division of Oil and Gas (DOG) maps and records were researched for data regarding the presence of petroleum-producing properties and/or "wildcat" oil or gas wells in the site vicinity. No oil and gas wells were identified on the subject site.

7.13 Landfills

There are no landfills on the subject property or within the vicinity of the subject property. A review of historical aerial photographs, topographic maps, personal interviews with local agencies staff and government database report did not indicate the presence of landfills site on the subject property, nor in the vicinity of the subject site.

8.0 INTERVIEWS

8.1 Interviews with Owner

The owner, Ms. Jane Wan, was available for an interview at the time of the site inspection.

8.2 Interviews with Site Manager

The Key Site Contact, Ms. Jane Wan, was available for an interview at the time of the site inspection.

8.3 Interviews with Occupants

The property was observed to be vacant at the time of the site inspection. Currently, the property is undergoing renovation for future occupancy.

8.4 Interviews with Local Government Offices

City of Ventura Department of Building and Safety

City of Ventura Fire Department

Ventura County Fire Departemnt

South Coast Air Quality Management District

Department of Toxic Substances Control

California Regional Water Quality Control Board – Los Angeles Region

9.0 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

9.1 Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- EMA did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- EMA did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- EMA did not identify any historical recognized environmental conditions during the course of this assessment.

CONCLUSIONS, OPINIONS AND RECOMMENDATIONS

EMA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 255, 260 & 290 Maple Court and 3585 Maple Street, Ventura County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the property. Based on the conclusions of this assessment, EMA does not recommend further investigation at the site.

10.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312" and We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Khalid Mahmood
Project Director

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Activity Monitoring

Report Cycle :	2015
Hazardous Waste Page Number :	1
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	CONSTRUCTION DEBRIS WITH RCRA METALS
Primary NAICS :	22121 - Natural Gas Distribution
Source Code :	G19 - Other one-time or intermittent processes (specify in comments)
Form Code :	W002 - Contaminated debris (see definition at 40 CFR 268.2(g) and requirements at 40 CFR 268.45):for example, certain paper, clothing, rags, wood, empty fiber or plastic containers, glass, piping, or other solids
Management Method :	H132 - Landfill or surface impoundment that will be closed as landfill (to include prior treatment and/or stabilization)
Generation Tons :	46.32274
Managed Tons :	0
Shipped Tons :	46.32274
Received Tons :	0

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description :

1. Failure to prepare a SPCC plan that follows a sequence of rule and/or cross-reference. 2. Failure of the owner or operator of a facility subject to this part to prepare a SPCC plan in accordance with good engineering practices. 3. Failure to have the full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC plan. 4. Failure to prepare the Plan in writing. AND 5. Failure to prepare a SPCC plan that addresses additional procedures/methods/equipment not yet fully operational.

Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description
Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

HWTS-DATAMART provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Generator Details

Details for this site have been truncated due to the large number of available details for this site within this dataset. For the complete details for this site, contact your Envirosite account representative for a complimentary site report containing all of the details available.

State Waste :
2013: 222 - Oil/water separation sludge, 2.085 tons to CAT080013352
2012: 221 - Waste oil and mixed oil, 0.209 tons to CAT080013352
2012: 222 - Oil/water separation sludge, 1.251 tons to CAT080013352
2011: 221 - Waste oil and mixed oil, 0.175 tons to AZR000501510
2011: 222 - Oil/water separation sludge, 1.14675 tons to CAT080013352
2010: 222 - Oil/water separation sludge, 1.73055 tons to CAT080013352
2009: 222 - Oil/water separation sludge, 1.27185 tons to CAT080013352

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Action Type :	IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Phase :	Soil
Contaminant Mass Removed :	N/R
Description :	Volume is lbs extracted during this treatment event - treating both water and soil (somewhat).
Begin Date :	2006-08-29
End Date :	2006-09-01
Action Type :	IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Phase :	Soil
Contaminant Mass Removed :	N/R
Description :	Volume is lbs extracted during this treatment event - treating both water and soil (somewhat).
Begin Date :	2006-05-23
End Date :	2006-12-21
Action Type :	IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Phase :	Soil
Contaminant Mass Removed :	N/R
Description :	Begin quarterly dual phase extraction - treating both water and soil (somewhat). Volume is cumulative HC's recovered.
Begin Date :	2006-03-13
End Date :	2006-03-18
Action Type :	IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Phase :	Soil
Contaminant Mass Removed :	N/R
Description :	Last annual dual phase extraction - treating both water and soil (somewhat)
Begin Date :	2005-03-07
End Date :	2005-03-10
Action Type :	IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Phase :	Soil

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Description :

Seven victims self transported to the hospital (Ventura Co Medical Center, 3291 Loma Vista Road, Ventura) with symptoms (nausea, elevated heart rate and difficulty breathing). The hospital called the FD for decontamination of the victims. All seven victims were exposed to an unknown pesticide in a strawberry field (at the intersection of Central Ave and Ventura Blvd, Camarillo). The victims reported there were an additional 70 persons exposed, but this has not been confirmed. No further victims have come to the hospital. The seven victims should be released by 2300 hours tonight.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The Leaking Underground Storage Tank (LUST) - American Recovery and Reinvestment Act (ARRA) system collects data on LUST releases that are tracked by ARRA performance measures or for which ARRA funds are being spent. Data is collected for each release, including identification, performance measures, reference information, and location information.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description
Source Description : The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description : The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description
Source Description :

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 07/09/2021

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 07/09/2021

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/25/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 05/11/2021

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/29/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 05/11/2021

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 02/12/2021
Agency Update Frequency: Varies
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 05/11/2021

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/05/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 07/09/2021

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 06/08/2021

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

SEMS_DELETED NPL: All Deleted National Priority List Sties

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

FEDERAL LANDFILL AND/OR SOLID WASTE DISPOSAL SITE LISTS

EPA LF MOP: Sites in the EPA Landfill Methane Outreach Program

Agency Version Date: 07/06/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 10/04/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 07/06/2021

FEDERAL ERNS LIST

ERNS: Emergency Response Notification System records of reported spills

Agency Version Date: 05/03/2021
Agency Update Frequency: Annually
Planned Next Contact: 10/26/2021
Agency: National Response Center United States Coast Guard
Agency Contact: N/R
Most Recent Contact: 07/30/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES

FED E C: Federal listing of remediation sites with engineering controls

Agency Version Date: 06/07/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/01/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 06/07/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES (cont.)

FED I C: Federal listing of remediation sites with institutional controls

Agency Version Date: 06/07/2021
Agency Update Frequency: Varies
Planned Next Contact: 09/01/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 06/07/2021

RCRA IC_EC: Sites with institutional or engineering controls related to Resource Conservation and Recovery Act

Agency Version Date: 05/18/2021
Agency Update Frequency: Varies
Planned Next Contact: 08/16/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 05/18/2021

FEDERAL RCRA GENERATORS LIST

HIST RCRA_CESQG: List of Resource Conservation and Recovery Act licensed conditionally exempt small quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

HIST RCRA_LQG: List of Resource Conservation and Recovery Act licensed large quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

HIST RCRA_NONGEN: List of Resource Conservation and Recovery Act licensed non-generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

HIST RCRA_SQG: List of Resource Conservation and Recovery Act licensed small quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 06/08/2021

RCRA_LQG: Resource Conservation and Recovery Act listing of licensed large quantity generators

Agency Version Date: 04/13/2021

Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C-36 License No. 389400

Date 9/7/88 Contractor TREVINO PLBG.

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Section 7031.5 Business and Professions Code: Any city which requires a permit to construct, alter, improve, demolish, or repair any structure prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).)

☐ I as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Section 7044 Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I as owner of the property, am exclusively contracting with licensed contractors to construct the project (Section 7044 Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Section _____, B & P C. for this reason _____

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Section 3800, Lab. C.)

Policy No. _____ Company _____

☐ Certified copy is hereby furnished

☐ Certified copy is filed with _____

Date _____ Applicant _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or less)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date 9/7/88 Applicant TREVINO PLBG.

Job Address 3585 MAPLE

NOTICE TO APPLICANT: If after making this Certificate of Exemption, you should become subject to Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Section 3097, Civ. C.)

Lender's Name _____

Lender's Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. This permit becomes null and void if work authorized is not commenced within 180 days or if work is suspended or abandoned for a period of 180 days at any time after work is commenced.

Historical Information Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Ventura Co: (1926-1934, 1956-2019)

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Maple Court: (1981-2019)
Maple Street: (1972-2019)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the “Site Specific HIG Data”) contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2019 Haines Ventura County

2011 Haines Ventura County

2006 Haines Ventura County

2001 Haines Ventura County

1996 Haines Ventura County

1991 Haines Ventura County

1986 Haines Ventura County

1981 Haines San Luis Obispo Santa Barbara-Ventura

1976 Haines San Luis Obispo Santa Barbara-Ventura

1972 Haines Santa Barbara-Ventura

Abstract Section 1- This section includes the city directory data sorted by address.

Research Summary for City Directory Abstract

Site Location
3585 Maple St and 255, 260 & 290 Maple Court
3585 Maple St
Ventura, CA

Conducted For
Envirosite Corporation
2 Corporate Drive, Suite 450
Shelton, CT

HIG Project #
2053573
Client Project #
58623
Date Created
08/03/2021

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2019 Haines Ventura County

2011 Haines Ventura County

2006 Haines Ventura County

2001 Haines Ventura County

1996 Haines Ventura County

1991 Haines Ventura County

1981 Haines San Luis Obispo Santa Barbara-Ventura

Abstract Section 1- This section includes the city directory data sorted by address.

Envirosite's Historical Topographic Map Report is designed to assist in evaluating a subject property resulting from past activities. Envirosite's Historical Topographic Map Report includes a search of USGS historical topographic maps, dating back to the early 1900s.

TOPOGRAPHIC MAPS FOUND:

	Map Name:	Year:	Revision Year:	Scale:
1.	Santa Paula	1903	N/R	1 : 62500
2.	Santa Paula	1942	N/R	1 : 62500
3.	Santa Paula	1947	N/R	1 : 62500
4.	Saticoy	1951	N/R	1 : 24000
5.	Saticoy	1951	N/R	1 : 24000
6.	Saticoy	1951	1967	1 : 24000
7.	Santa Paula	1964	N/R	1 : 62500
8.	Saticoy	2012	N/R	1 : 24000
9.	Saticoy	2015	N/R	1 : 24000

The USGS 7.5 minute series includes scales 1:24,000 / 1:25,000 / 1:31,680. The USGS 15 minute series includes scales 1:48,000 / 1:62,500 / 1:63,360. The USGS 30x60 minute series scale is 1:100,000.

APPPENDIX H

ENVIRONMENTAL PROFESSIONAL'S RESUME

KHALID MAHMOOD, R.E.A.

[redacted]

CREDENTIALS

B.S., Chemical Engineering

University of Maryland

American Institute of Chemical Engineers

American Chemical Society

National Asbestos Council

Registered Environmental Assessor (R.E.A., No. 1382), State of

California National Society of Professional Engineers

EXPERIENCE SUMMARY

Mr. Mahmood has over twenty years of diversified engineering and management experience in the environmental field. Emphasis has been in hazardous waste site investigations, environmental audits, closure plans, real estate environmental assessments, RCRA Part B application, waste minimization, and remediation. Mr. Mahmood has direct experience in the oversight of remedial investigations, feasibility studies, remedial design, and implementation activities for variety of hazardous waste sites under Federal and State auspices.

Mr. Mahmood has performed over two thousand real estate environmental assessments including office complexes, major shopping centers, commercial, industrial, and manufacturing facilities, and multi family complexes. Some of the environmental assessments included potential environmental liability cost estimates associated with multi-billion-dollar property acquisitions or company asset transfers.

Mr. Mahmood has performed detailed environmental engineering reviews necessary to construct hazardous waste treatment facilities, including bid and construction reviews, and design evaluations. Mr. Mahmood has extensive experience in developing National Pollutant Discharge Elimination System (NPDES) permits for industrial wastewater treatment plants ranging from those for petroleum refining to Publicly Owned Treatment Works (POTW).

Mr. Mahmood has been extensively involved in the evaluation and development of data management system to track compliance of permitted facilities as well as bringing non-compliance facilities into regulatory compliance.

Mr. Mahmood has also been extensively involved in the solid waste area. The experience includes municipal refuse characterization, treatment processes, and environmental impact assessment, assessment studies for on-hand disposal resource recovery experience with treatability studies and evaluation of process for recovery of methane from municipal and industrial wastes.

KEY PROJECTS

- Managed remedial investigation program for the Rocky Mountain Arsenal. Directed services of the Industrial and Hazardous Waste Engineering Group. Assessed the soil and groundwater contamination from chemical warfare and pesticide manufacturing wastes.

- Performed detailed feasibility studies to treat Hanford Nuclear Facility groundwater contaminated with radionuclides, organic solvents, metals and inorganics. Recommended remedial alternatives for the mobile treatment systems as well as a fixed central treatment facility.

- Managed hazardous waste reduction project at the Hewlett Packard Facility in Palo Alto, California. Project included investigation of processes such as separation, precipitation/fixation, ion exchange, plus other applicable technologies for segregating, reducing, recycling and/or treating arsenic wastes in the calcium fluoride sludge resulting from the manufacture of gallium arsenide chips.

- Conducted treatment processes for the volume reduction of wastes containing heavy metals such as arsenic, cadmium, copper, mercury, molybdenum, and zinc at Pacific Gas and Electric (PG&E) geothermal facilities in Northern California.

- Established the on-site chemical analysis laboratory for the post-closure treatment for a hazardous waste site for Firestone Tire and Rubber Manufacturing Company in Salinas, California. The project included design and installation of a soil vapor extraction system and a groundwater treatment system to remove organic contaminants from groundwater as well as soil. Assisted with regulatory agency liaison for required permitting. Prepared equipment specifications, drawings and bid documents.

- Conducted EPA Superfund investigation and material analysis for hazardous waste assessment of Weldon Springs, Missouri Ammunition Plant. The site is contaminated with radionuclear inorganics, organics and heavy metals. Recommended remedial measures to comply with RCRA regulations.

- Performed the treatability testing data, chemical process design, and technical specifications for the leachate treatment plant for Time Oil Company in Washington. Set up bench scale experiments to test the leachability/extraction rate of volatile organics in the soil using water as a flushing solvent.

- Conducted soil gas and groundwater investigations for major electronic facilities (i.e., Hewlett Packard, IBM, Monolithic Memories, Electronics Company, etc.), in silicon Valley. Recommended remedial measures for highly contaminated areas.

- Prepared an alternative analysis and detailed feasibility study of process alternatives to remove aromatic hydrocarbons (i.e., benzene, toluene, and xylene) from ballast water at Valdez Harbor Oil Terminal in Alaska.

- Assisted in preparation of RCRA Part B application for continued operation and closure of operating facilities.

- Performed detailed technical, economical, environmental and institutional feasibility studies for recovering energy and materials from solid waste for U.S. Department of Energy and private firms. Set up and tested various conveyors (belt, apron, vibrating), trommels, cyclones, air separation and rotary screen equipment to determine how conveyance of different solid waste fraction may be improved.

- Managed SARA Title III, Section 313, Toxic Chemical Release Inventory for a major Oil Refinery in Southern California. The project included detailed review of process operations and performance of material/mass balances to calculate the total emissions of each chemical under Title III into the air, soil, groundwater, surface water etc. Recommended necessary measures to comply with regulations.

- Assisted a major valves manufacturing facility in Southern california perform SARA Title III, Toxic

Chemical Release Inventory.

- Managed U.S. Navy hazardous waste remediation project at North Island, San Diego. The project include hazardous waste characterization of drummed waste accumulated during last 12 years; recommended different alternatives to dispose/thermally destroy hazardous wastes.

- Conducted feasibility studies for the remediation alternatives for California Department of Transportation. The project involved detailed evaluation/screening/selection of alternatives to remove contamination from the soils.

- Performed a waste minimization study for California utilities. Proposed alternatives to reduce/eliminate/substitute Toxic Chemicals in their operations.

- Designed and implemented the In Situ Volatilization (ISV) system for a major valves manufacturing company. The system removed chlorinated solvents and aromatics contamination from the soils. The waste stream treated with activated carbon prior to discharge.

- Performed feasibility studies to select/screen remedial alternative to remove radioactive, volatile organic compounds and heavy metals from soils and groundwater at Rocky Flats, Colorado.

- Managed and prepared Toxic Hot Spots (AB 2588) Inventory Plans for General Motors, THUMS Long Beach (Consortium of Texaco, Humbel, Union, Mobil, and Shell), chemical Waste Management Kettleman Hill Hazardous Waste Landfill, and SupraCote.

- Managed and prepared Air Toxic Inventory Reports (AB 2588) for the University of California and several industrial facilities.
