Re: Waste Management Service Provider

Dear Mr. Mayer:

Waste Management of the Inland Empire (WM) is pleased to provide solid waste collection to the business community in the City of Menifee.

The project, Menifee Business Park, located at 33521 Zieders Road is an industrial park planned for approximately 11 industrial businesses. Based on plans shared, waste enclosures, 11 accounted for, are large enough to fit up to three bins at each location. In addition, the collection trucks will be able to operate with no space constraints.

This new industrial park will require waste collection service consisting of trash and recycling services. Organic services may be required according to SB 1383 regulation depending on the type of business, and whether organics waste is being generated. Once a business requests waste collection services, WM's business recycling representative will meet with each business to ensure that they comply with all state recycling mandates.

Should you need additional information or have any further questions, please contact me at 951-609-6341 or email at lquiroa@wm.com.

Waste Management looks forward to providing waste collection service to businesses located at the Menifee Business Park.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Lily V. Quiroa', with a long horizontal flourish extending to the right.
