Jim Campbell
ROEM Development
1650 Lafayette Street
Santa Clara, California 95050

Subject: **Phase I Environmental Site Assessment**
5670 Camden Avenue
San Jose, California 95124
AEI Project No. 474228

Dear Jim Campbell:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 559-7600 or tweise@aeiconsultants.com.

Sincerely,

Trent Weise
Vice President
AEI Consultants

PROJECT SUMMARY

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by ROEM Development to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 5670 Camden Avenue, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Site Address(es)	5670 Camden Avenue, San Jose, Santa Clara County, - California 95124 (parent parcel)
Property ID (APN or Block/Lot)	Portion of 567-28-001
Location	North side of Singletree Way and east side of Camden Avenue
Property Type	Recreation - Sports fields
Approximate Site Acreage/Source	3.63/Client provided
Number of Buildings	N/A
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	Baseball fields, playgrounds, batting cages, and sheds
On-site Occupant(s)	Sports fields
Current On-site Operations/Use	Baseball fields and playgrounds
Current Use of Hazardous Substances	None identified
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Prior to 1938	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, historical topographic maps
1939-1956	Orchard	Aerial photographs, historical topographic maps
1963-1987	Vacant land	Aerial photographs, historical topographic maps
1993-Present	Existing baseball fields	Aerial photographs, city directories, historical topographic maps, site observation, interviews

The immediately surrounding properties consist of the following:

North	Multi-family residential buildings (1582, 1584-1595 Blossom Hill Road)	None identified
East	Residential buildings (5615-5663 Blossom Park Lane and 1601-1607 Singletree Way)	Yes; refer to Section 5.1
South	Singletree Way followed by: Hicks Substation (1552 Singletree Way) Apartment (1582-1588 Singletree Way)	Yes; refer to Section 5.1
West	Beacon School (5670 Camden Avenue) Union School District M&O Facility (1583 Singletree Way) Camden Avenue followed by: Multiple-tenant commercial building (1606-1610 Blossom Hill Road)	Yes; refer to Section 5.1

FINDINGS AND OPINIONS

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Based on a review of historical sources, the subject property was historically used for agricultural purposes (Orchards). There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- AEI did not identify evidence of OECs during the course of this assessment.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and E1527-21, of 5670 Camden Avenue, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

As listed in the Findings section above, this assessment has revealed recognized environmental conditions, controlled recognized environmental conditions, and/or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends the following:

- A Limited Phase II Subsurface Investigation

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 5670 Camden Avenue, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- A search of historical city directories was not conducted for the adjoining sites to the east, south, and west (5615-5663 Blossom Park Lane, 1552, 1582-1588, 1601-1607 Singletree Way, and 1583 Singletree Way)). However, based on a review of other available historical sources, these sites appear to have historically been developed residentially. Therefore, this limiting condition is not expected to alter the findings of this assessment.
- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.
- Due to the locked doors, limited access was provided to the storage sheds of the subject property. Based on the lack of hazardous substances reported within the building and information provided by the the key site manager, the limited access is not expected to significantly alter the findings of this assessment.
- Due to the size of the subject property, AEI performed a reconnaissance of the property utilizing a field technique of traversing the site in an attempt to provide an overlapping field of view. Due to the size of the property and the vegetation present on site, isolated areas of the site may have not been accessible for direct observation during AEI's field reconnaissance. Based on the information obtained from agencies and a review of historical sources, this limitation is not expected to significantly alter the findings of this assessment.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

The earliest historical resource obtained during this assessment was aerial photographs from 1939 indicating that the subject property was developed agriculturally. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for agricultural purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.	
Aerial photographs, historical topographic maps	

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of ROEM Development. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by ROEM Development on January 20, 2023. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	5670 Camden Avenue, San Jose, Santa Clara County, - California 95124 (parent parcel)
Property ID (APN or Block/Lot)	Portion of 567-28-001
Location	North side of Singletree Way and east side of Camden Avenue
Property Type	Recreation - Sports fields
Site and Building Information	
Approximate Site Acreage/Source	3.63/Client provided
Number of Buildings	N/A
Building Construction Date(s)/Source	N/A
Building Square Footage (SF)/Source	N/A
Number of Floors/Stories	N/A
Basement or Subgrade Area(s)	None identified
Number of Units	N/A
Additional Improvements	Baseball fields, playgrounds, batting cages, and sheds
On-site Occupant(s)	Sports fields
Current On-site Operations/Use	Baseball fields and playgrounds
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	None identified

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	N/A
Cooling System	N/A
Potable Water	City of San Jose
Sewage Disposal/Treatment	City of San Jose

Utility source/system information listed in the table above is provided by Mr. Jessie Tobar, Lead Maintenance, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed commercial and residential area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Multi-family residential buildings (1582, 1584-1595 Blossom Hill Road)	None identified
East	Residential buildings (5615-5663 Blossom Park Lane and 1601-1607 Singletree Way)	Yes; refer to Section 5.1
South	Singletree Way followed by: Hicks Substation (1552 Singletree Way) Apartment (1582-1588 Singletree Way)	Yes; refer to Section 5.1

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
West	Beacon School (5670 Camden Avenue) Union School District M&O Facility (1583 Singletree Way) Camden Avenue followed by: Multiple-tenant commercial building (1606-1610 Blossom Hill Road)	Yes; refer to Section 5.1

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Q: Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast or desert playas
Soil Series: Description/Source	140: Silty loam, clay, etc. Urban land-Flaskan complex, 0 to 2 percent slopes. Well drained alluvium derived from metamorphic and sedimentary rock and/ or alluvium derived from metavolcanics/USDA Soil Survey
Groundwater Flow Direction/Source	Northeast/Topographic map interpretation
Estimated Depth to Groundwater/Source	18-49 feet bgs/Remediation/Groundwater Monitoring Well data for the 5755 Camden Avenue site (approximately 1,000 feet south of the subject property) obtained from the GeoTracker website
Surface waters on the subject property or adjoining sites	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1938	Unknown use/Data failure; refer to Section 1.6.1	Aerial photographs, historical topographic maps
1939-1956	Orchard	Aerial photographs, historical topographic maps
1963-1987	Vacant land	Aerial photographs, historical topographic maps
1993-Present	Existing baseball fields	Aerial photographs, city directories, historical topographic maps, site observation, interviews

Based on a review of historical sources, the subject property was historically used for agricultural purposes (Orchards). There is potential that agricultural chemicals, such as pesticides, herbicides and fertilizers, were used on site, and that the subject property has been impacted by the use of such agricultural chemicals. AEI understands that the subject property is slated for residential redevelopment. Consequently, AEI recommends the performance of on-site sampling to determine if the subject property has been significantly impacted in connection with the historical agricultural use for the protection of the construction workers and future occupants of the subject property.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020 (non-inclusive)):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939, 1948, 1950, 1956	Orchard	NORTH: Orchard EAST: Roadway followed by agricultural land SOUTH: Orchard WEST: Orchard and roadway followed by agricultural land
1963	Vacant land	NORTH: Vacant land and existing residential building on the east section of the property EAST: Orchard and roadway SOUTH: Substation, orchard, and residential buildings WEST: Building foundation and roadway followed by vacant land

Year(s)	Subject Property Description	Adjoining Site Descriptions
1968, 1974	Vacant land	NORTH: Existing residential buildings EAST: Vacant land SOUTH: No significant changes WEST: Existing school buildings and roadway followed by vacant land
1982	Vacant land	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Existing school buildings and roadway followed by commercial development
1993, 1998, 2005, 2009, 2012, 2016, 2020	Existing baseball fields	NORTH: No significant changes EAST: Existing residential buildings SOUTH: Existing substation and apartments WEST: No significant changes

Subject property:

- Agricultural land - Refer to Section 3.0

Adjoining Site(s):

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

Sanborn map coverage was not available for the subject property.

3.3 City Directories

A search of historical city directories was conducted for the subject property utilizing EDR. No potential tenants of concern were identified based on AEI's review of the historical city directories. Directories were reviewed in approximate five-year increments from 1922-2017, non-inclusive. The first listing for the subject property parent parcel address (5670 Camden Avenue) appeared in 1970. The following table summarizes the tenants based on AEI's review of the historical city directories.

Subject Property

Year(s)	Address - Occupant Listed
1970	5670 Camden Avenue - Cinnabar School
1975	5670 Camden Avenue - Cinnabar School, Cinnabar Elementary School
1980	5670 Camden Avenue - Cinnabar School, Union School District
1985	5670 Camden Avenue - Belly Dance by Farouche, Jack Douglas Youth Foundation, Learning Academy The, Learning Company The

Year(s)	Address - Occupant Listed
1986	5670 Camden Avenue - Belly Dance by Farouche, Company The, Elisa Vocational Center, Executive Director & Office, Jack Douglas Youth Foundation, Learning, Learning Academy The, Sharon Center, Studio
1991	5670 Camden Avenue - Beacon School, Font John F Ph D, Learning Academy The, Learning Company The, Union Little League
1994	5670 Camden Avenue - Barefoot Lights, Beacon School, French Amer School, Learning Co, Union Little League
1996	5670 Camden Avenue - 18 Learning Company The, Beacon School, Shack Union Little League
1999	5670 Camden Avenue - Beacon School, Font John F Ph D, John Font, Learning Academy The, Union Little League
2000	5670 Camden Avenue - Beacon School, Font John F Ph D, John Font, Learning Academy The, Learning Company The, Union Little League
2004	5670 Camden Avenue - Beacon School
2006	5670 Camden Avenue - Almadn, Beacon School, Font John F Ph D, Preparatory School
2009	5670 Camden Avenue - Almaden Preparatory School , Beacon School, Font John F Ph D, John Font
2014, 2017	5670 Camden Avenue - Beacon School

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

A search of historical city directories was also conducted for the adjoining sites noted below utilizing EDR. No potential occupants of concern were identified based on AEI's review of the historical city directories. Please refer to the appendices for a complete list of historical adjoining occupants identified by EDR.

Adjoining Site Addresses

Direction	Address(es)
North	1582-1595 Blossom Hill Road
East	5615-5663 Blossom Park Lane and 1601-1607 Singletree Way
South	1552, 1582-1588 Singletree Way
West	5670 Camden Avenue 1583 Singletree Way 1606-1610 Blossom Hill Road

City directory coverage was not obtained for the adjoining site(s) to the east, south, and west refer to Section 1.5.

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

3.4 Historical Topographic Maps

In an attempt to close any data failure, AEI reviewed historical topographic maps utilizing NETR Online (www.historicaerials.com). Historical topographic maps were reviewed for the years 1916-2018, non-inclusive. No additional historical information was obtained from available topographic maps.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	January 24, 2023	Online	Ms. Melissa Belloso	No records on file

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	January 24, 2023	Office visit	N/A	No hazardous substances records on file

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Department (SJBD)	January 24, 2023	Office visit	N/A	No records on file

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Planning Department (SJPD)	January 24, 2023	Online	Staff	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	January 24, 2023	Online	N/A	Information obtained is discussed below

Records Summary

APN	567-28-001 (larger parent parcel)
Acreage	19.795 acres (larger parent parcel)
Construction Date	N/A
Building Square Footage	N/A
Current Owner	Not provided

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	January 24, 2023	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	January 24, 2023	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	January 24, 2023	Online	N/A	No records on file
CA DTSC EnviroStor	January 24, 2023	Online	N/A	No records on file
CalEPA Regulated Site Portal	January 24, 2023	Online	N/A	No records on file
Bay Area Air Quality Management District (AQMD)	January 24, 2023	Office visit	Ms. Rochele Henderson, Public Records Officer	No records on file
Valley Water Well Information	February 3, 2023	Online	N/A	No records on file

No other agencies were contacted during the course of this assessment.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy M anagement Division (CalGEM)	January 24, 2023	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	January 24, 2023	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ			
Federal RCRA NonGen/NLR sites	SP/ADJ		✔	
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State- and tribal "Superfund" equivalent sites	1.0			
State- and tribal hazardous waste facilities	0.5			
State/Tribal landfill and solid waste disposal facilities	0.5			
State/Tribal leaking storage tanks	0.5			
State/Tribal registered storage tanks	SP/ADJ			
State/Tribal voluntary cleanup sites	0.5			

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/Tribal EC/IC registries	SP			
State/Tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ		✔	

Facility Name	Pacific Gas and Electric Company - Hicks Substatio, PG&E: Hicks Substation
Address	1607 Singletree Way
Distance & Direction	Adjoining to the east and south
Hydrologic Position	Cross-gradient
Databases Listed	RCRA NONGEN / NLR(x3), CUPA LISTINGS, CERS, HAZMAT
Comments	Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) listing identified the site as "not a generator, verified" in 2021 and 2022. The NAICS Description provided for the business is "electric bulk power transmission and control". No violations were identified in connection with the RCRA listing. According to the regulatory database, this site is listed as CUPA LISTINGS. Program identifier was indicated as DEH Permit Haz Waste Business Plan Program. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Verizon Wireless - Camden & Hic, Sprint SF60XC823
Address	1552 Singletree Way
Distance & Direction	Adjoining to the south across Singletree Way
Hydrologic Position	Up to cross-gradient
Databases Listed	CUPA LISTINGS, EMI, HAZMAT(x2), CERS
Comments	According to the regulatory database, this site is listed as CUPA LISTINGS. Program identifier was indicated as DEH Permit Haz Waste Business Plan Program. According to the regulatory database, this site is listed as CERS listing. CERS Description was indicated as US EPA Air Emission Inventory System (EIS). Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

5.2 Vapor Migration

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Union School District	N/A	N/A	Unknown	Not interviewed; refer to Section 1.5
Key Site Manager	Mr. Jessie Tobar, Lead Maintenance	February 3, 2023	In Person	2022	Interviewed; see Interview Summary table below

INTERVIEW SUMMARY

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	Unknown
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	N/A	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the	Information not provided

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien Search

In accordance with our approved scope of services, AEI contracted AFX Research, LLC (AFX) to perform an environmental lien search for the subject property.

According to AFX, environmental liens were not identified during the review of historical ownership documentation. A copy of the AFX report is provided in the appendices.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	February 3, 2023
AEI Site Assessor(s)	Nanako Oba
Property Escort(s)/ Relationship(s) to Property	None
Units/Areas Observed	Exterior areas: All exterior grounds
Area(s) not accessed and reason(s)	Locked storage sheds Refer to Section 1.5 for discussion of limiting condition(s)
Other Physical Constraints	• Large parcel Refer to Section 1.5 for discussion of limiting condition(s)
General Observations	The property includes baseball fields and playgrounds with storage sheds.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers		✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other		

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI did not observe any of the items listed in the above Reconnaissance Findings Summary table.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformer(s)

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Three pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 Asbestos-Containing Building Materials

The subject property lacks permanent building structures. Consequently, no building components containing suspect asbestos containing materials were identified during the site inspection.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

The structure is improved with painted sheds and covered dug-out areas. Due to their age, it is unlikely that LBP is present; however, LCP may be present. Based on the good condition of the observed painted surfaces, potential LCP is not considered a significant environmental concern at this time.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

Radon sampling was not requested as part of this assessment. According to the California Department of Health Services Radon Database, 42 tests were conducted for radon levels in the subject property zip code (95124) in 2016. 40 of these tests indicated that radon levels were below the action level of 4.0 pCi/L set forth by the United States EPA. Therefore, radon is not expected to represent a significant environmental concern.

8.4 Suspect Mold or Microbial Growth Conditions

Access to the sheds located on site was not provided. Consequently, mold was not addressed as part of this assessment.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List

US INST CONTROLS ..... Institutional Controls Sites List

Federal ERNS list

ERNS ..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE ..... State Response Sites

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR ..... EnviroStor Database

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

INDIAN LUST ..... Leaking Underground Storage Tanks on Indian Land
CPS-SLIC ..... Statewide SLIC Cases

Lists of state and tribal registered storage tanks

FEMA UST ..... Underground Storage Tank Listing
AST ..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST ..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ..... Voluntary Cleanup Priority Listing
VCP ..... Voluntary Cleanup Program Properties

Lists of state and tribal brownfield sites

Exclusive Recovered Govt. Archives

RGA LF ---------- Recovered Government Archive Solid Waste Facilities List
RGA LUST ---------- Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 4 HIST LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 29 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 10 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Facility handles liquid carbon dioxide above HMBP State-reportable thresholds for their soda machines. Observed the following: - 1 liquid carbon dioxide dewar (approx. 50 gal) Business also handles compressed carbon dioxide gas below reportable threshold. Business last submitted a complete HMBP on 7/23/2018 via the California Environmental Reporting System (CERS), CERS ID: 10467085. This was ACCEPTED. On the next annual HMBP certification, ensure that the liquid carbon dioxide is reported in gallons vs. cubic ft. Notes: - Business was informed of their requirement to provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP. Training must be [Truncated]

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	08S1E18P01f
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Benzene, Gasoline
Site History:	1986 In July, a spill report was completed by the City of San Jose Fire Department stating that during vapor well installation 490 parts per million (ppm) Total Petroleum Hydrocarbons (TPH) as Gasoline (TPHg) were detected 1 foot below the tank backfill. 1989 In April, 2 soil borings (SB1 and SB2) were advanced to approximately 27 and 35 feet below the ground surface (ft bgs) adjacent to the existing underground storage tanks (USTs). 7 soil samples were collected and reported to contain maximum concentrations of 350 parts per million (ppm) TPHg, 0.08 ppm Benzene, 0.2 ppm Toluene, 5.1 ppm Ethylbenzene, and 24 ppm Xylenes. 1990 In February, 4 USTs and associated piping were removed from the site. 8 soil samples (OT1 through OT4 locations A and B) were collected from approximately 10 ft bgs and reported to contain maximum concentrations of 3,900 ppm TPHg, 10 ppm Benzene, 120 ppm Toluene, 64 ppm Ethylbenzene, and 560 ppm Xylenes. It was reported that a portion of the stockpiled soil was returned to the excavation for backfill and the remainder was removed from the site. The volume of soil used for backfill and volume removed were not reported. In a much later report, it states that 1,206 cubic yards of soil were removed from the site. A new excavation was dug for the new USTs just north of the former fueling islands. 6 soil samples (NT1 through NT6) were collected from the excavation at 13 ft bgs and were not reported to have detectable concentrations of the Constituents of

ARCO #2155 (Continued) **S101309144**

Concern (COCs). 14 soil samples (TR1 through TR13; 2 at location TR8) were collected along the piping runs at 3 ft bgs. At location TR8 a soil sample was collected at 0.5 ft bgs, which was reported to have the highest concentrations of all piping samples of 11,000 ppm TPHg, 160 ppm Benzene, 760 ppm Toluene, 200 ppm Ethylbenzene, and 1,300 ppm Xylenes. The sample collected at TR8 at 3 ft bgs was reported to have only 5 ppm TPHg; Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX) were not reported to be present above the laboratory reporting limits. In August and September, 4 groundwater monitoring wells (MW1 through MW4) were completed to 51.5 ft bgs and 5 vadose wells (VW1 through VW5) were completed to 15 ft bgs onsite. The report documenting this work was not found in the file. A table included in another report included a table of the analytical data for the monitoring well soil samples. 12 soil samples were collected and reported to contain maximum concentrations of 1,600 ppm TPHg, 2.8 ppm Benzene, 47 ppm Toluene, 28 ppm Ethylbenzene, and 160 ppm Xylenes in the soil sample collected from 25 ft bgs in MW1. Periodic monitoring of groundwater began at this time. A vapor extraction pilot test was also conducted at this time. Based on the results of the test, it was proposed that soil vapor extraction (SVE) be implemented onsite. 1992 In November, free floating product (FP) was measured in well MW1 at a thickness of 0.01 feet. MW1 is located within the former UST excavation. FP was detected in this well off and on through September 1995 and the maximum thickness reported was 0.01 feet. There were no reports of FP removal activities. 1993 In December, 4 groundwater monitoring wells (MW5 through MW8), a dual-string air sparge well (SP1/SP2) and 5 vadose zone wells (E1 through E5) were installed onsite. Also at this time, well MW3 was drilled out and replaced with well MW3A; the original well casing was damaged. The new monitoring wells were completed between 45-51.5 ft bgs; the new vadose zone wells were completed between 31-44 ft bgs; and the air sparge well was completed to 27 and 35.5 ft bgs. 38 soil samples were collected from the vadose zone wells and reported to have maximum concentrations of 2,900 ppm TPHg, 6.6 ppm Benzene, 70 ppm Toluene, 43 ppm Ethylbenzene, and 290 ppm Xylenes. 27 soil samples were collected from the monitoring and air sparge wells and were reported to have low to non-detectable concentrations of the COCs. 1994 In May, short and long term SVE tests were conducted. Also at this time, an air sparge (AS) test was conducted. This was followed by a combined AS/SVE test. 1995 In September, the SVE system was started onsite. The AS portion of the system was started up in December. The system ran through December 1998 and is estimated to have removed 3,191 pounds of TPHg. 1995 In July, 3 vapor wells (E6 through E8), 3 air sparge wells (SP3 through SP5), 1 vadose well (VW6), and 1 monitoring well (MW9) were installed onsite. 11 soil samples were collected and reported to contain maximum concentrations of 1,900 ppm TPHg, 18 ppm Benzene, 36 ppm Toluene, 24 ppm Ethylbenzene, and 110 ppm Xylenes in the soil samples collected from SP5 located in the southwest corner of the former UST excavation. 1996 In the second quarter, wells MW10 and MW11 were installed offsite. No reports were found in the file documenting the installation of these wells. In a subsequent Corrective Action Plan it was reported that these wells were installed to 47 ft bgs. It also reported that 6 soil samples were collected and were not reported to have concentrations of the COCs present above the laboratory reporting limits. 1999 It appears that the AS/SVE system began operation again in November. The SVE system only operated when groundwater was deep enough to not be entrained

ARCO #2155 (Continued) **S101309144**

into the system (pulsed mode). 2000 Between June and August, a MicroPurge study was conducted in wells MW6, MW7 and MW9. The length of time to complete the study was extended due to malfunctions of the equipment. Previously, an attempt was made to advance CPT/hydropunch onsite, but refusal was met in all borings. Wells MW6 and MW7 were redeveloped prior to the study. Groundwater samples were collected from the bottom 2 feet, middle 5 feet and upper foot of each well. Each well only contained 7-14 feet of groundwater within the casing. This investigation was conducted to assess vertical migration of the plume due to a downward vertical gradient at the site. The depth discrete groundwater samples collected from MW6 indicated an increase in concentrations with depth; whereas the data from wells MW7 and MW9 indicated a general decrease in concentrations with depth. This report also concluded that Based on low concentrations of MTBE (up to 67 micrograms per liter) detected in groundwater during cumulative Site investigations, additional vertical assessment of groundwater conditions at this Site is not warranted. In December, well MW12 was advanced to 60 ft bgs near the existing USTs. This well is discretely screened as a deep well. 2 soil samples were collected and not reported to have concentrations of the COCs present above the laboratory reporting limits. 2002 In March, groundwater monitoring well MW13 was installed to 46.5 ft bgs downgradient and offsite within Preston Drive. 7 soil samples were collected and were not reported to contain concentrations of the COCs above the laboratory reporting limits. 2003 In February, 4 monitoring wells (MW14 through MW17) were installed on and offsite. Soil samples were not collected and submitted for chemical analysis. Wells MW15 and MW16 were installed downgradient of offsite well MW13, which has been reported to have detectable concentrations of the COCs. In May, an attempt was made to advance 5 direct push borings onsite, but met refusal due to large cemented cobbles. 4 of the borings (CB1, CB2, CB4 and CBN5) were completed with a hollow stem auger rig. These borings were advanced near existing vapor extraction wells.12 soil samples were collected and reported to contain low to non-detectable concentrations of the COCs. The samples reported to have detectable concentrations of the COCs were collected just below the groundwater table. In July, a groundwater pumping test was conducted. During the test, the SVE system was started to see if groundwater extraction would increase system operation. Based on the results, it was recommended that groundwater extraction along with SVE be implemented onsite. In September, the SVE system was restarted onsite and ran through March 2004 and is estimated to have removed 184 pounds of TPHg. In November, the piping and dispensers were replaced. 12 soil samples were collected between 3 and 8 ft bgs below the piping and the dispensers and were not reported to have concentrations of the COCs present above the laboratory reporting limits. Approximately 102 tons of soil were removed. The inspection report completed by the fire department noted that the subsurface soils were very rocky. 2004 In March, a groundwater extraction (GWE) system began operations onsite and continued through July 2010. It is estimated that the system treated 776,852 gallons of groundwater and removed approximately 5.676 pounds of TPHg and 0.365 pounds of Benzene. In August, well VW3 was destroyed. This well was located in the area where the permanent GWE system was being installed. 2008 In March, the SVE system began operations again onsite and continued through July 2010. It is estimated that the system removed 1,176 pounds of TPHg and 2.606 pounds of Benzene. 2012 In December, the final

ARCO #2155 (Continued) **S101309144**

groundwater monitoring event was conducted and reported maximum concentrations of 1,400 ppb TPHg, 9.4 ppb Benzene, 0.75 ppb Toluene, 4.6 ppb Ethylbenzene, and 5.2 ppb Xylenes. MtBE and TBA were not reported to be present above the laboratory reporting limits.

Site ID: 93180
Site Name: ARCO 02155
Violation Date: 06-21-2019
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Returned to compliance on 07/21/2019. The sensor in the 87 Master tank's turbine sump would not come out of alarm when initially tested. The sensor was replaced like-for-like, retested and functioned properly. No further corrective actions needed.
Violation Division: Santa Clara County Environmental Health

Violation Date: 06-06-2022
Citation: 23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Description: Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO).
Violation Notes: Returned to compliance on 06/21/2022. Facility records indicate that Ngoc Tran did not receive annual DO training within the required 12 month period. Employee was due to be trained by 4/7/2022 but was overdue as of the date of this inspection. Employees onsite confirm that the employee was working and assumed UST responsibilities during this time period without supervision from another trained employee.

Violation Date:	02-14-2017
Citation:	23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description:	Failure to have an approved UST Monitoring Plan.
Violation Notes:	Returned to compliance on 02/15/2017. The UST Monitoring Plan for all four UST systems incorrectly marks YES to the submittal element, "UDC Monitoring Stops Flow of Product at Dispenser. The Veeder-Root 794380-208 sensors located in each dispenser only trigger audible/visual alarms and provide automatic pump shutdown when a leak is detected, as well as automatic pump shutdown during failure/disconnection of the UDC Monitoring System. Amend the UST Monitoring Plans to mark "NO" for the submittal element indicating that "UDC Monitoring Stops Flow of Product at Dispenser" for all UST systems. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED.

Eval Notes: NOTE TO FACILITY: Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. On-site to observe Secondary Containment (SB989) Testing performed by Tanknology Service Technician, Jarrod Cooke. ICC UST Service Technician #8155550 and Tanknology Level III Secondary Containment Testing Certification were verified as being current. The UST systems are comprised of four double-walled fiberglass underground tanks (three Regular (87), one Premium (91)) and double-walled, fiberglass piping with four associated dispensers. The reported date of installation for all tanks is 2/8/1990. Overfill prevention for the three motor vehicle fuel tanks is through use of mechanical overfill prevention valves pursuant to 23CCR 2635(b)(2)(C) and associated fill sumps are therefore exempt from SB989 testing. The following components are subject to SB989 testing and were tested today: -4 x Submersible [Truncated]

Eval Notes: On-site to conduct a UST compliance inspection. The annual monitoring system certification test was performed by Mr. Elodio Sanchez of Gettler-Ryan. Mr. Sanchez had all of the required certifications. During testing, the following was observed: -STP sump sensors triggered an audible and visual alarm at the monitoring panel and turbine shut-off when tested in water. -UDC sump sensors triggered an audible and visual alarm at the monitoring panel and turbine shut-off when tested in water. -Annular sensors triggered an audible and visual alarm at the monitoring panel. -Sensor out and power out were demonstrated. -Electronic line leak detectors triggered an audible and visual alarm at the monitoring panel. -Spill buckets were tested with 5 gallons of water and passed. The following documents were reviewed on-site: DUSTO monthly inspection reports, DUSTO training documents. A UST CERS (ID: 10354138) submittal was reviewed as complete. Eval Notes: Onsite to witness every 36 month secondary containment testing. All components were tested by Elodio Sanchez, of Gettler-Ryan Inc. Mr. Sanchez has the following certifications: ICC UST Service Tech (exp. 7/14/2020) and Franklin Fueling Systems Incon Sump Test Operation Level 4 (exp. 10/12/2020). The UST systems are comprised of four double-walled fiberglass underground tanks (three Regular (87), one Premium (91)) and double-walled, fiberglass piping with four associated dispensers. The reported date of installation for all tanks is 2/8/1990. Overfill prevention for the motor vehicle fuel tanks is through use of mechanical overfill prevention valves pursuant to 23CCR 2635(b)(2)(C) and associated fill sumps are therefore exempt from SB989 testing. Tanks have 5 regulated product piping runs: Tank 1- Regular STP containment 1 to all 4 dispensers Tank 2- Regular STP containment 1 to all 4 dispensers Tank 4- Premium STP containment to all 4 dispensers Siphon pipe from [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a UST compliance inspection. The annual monitoring system certification test was performed by Mr. Elodio Sanchez of Gettler-Ryan. Mr. Sanchez had all of the required certifications. During testing, the following was observed: -STP sump sensors triggered an audible and visual alarm at the monitoring panel and turbine shut-off when tested in water. -UDC sump sensors triggered an audible and visual alarm at the monitoring panel and turbine shut-off when tested in water. -Annular sensors triggered an audible and visual alarm at the monitoring panel. -Sensor out and power out were demonstrated. -Electronic line leak detectors triggered an audible and visual alarm at the monitoring panel. -Spill buckets were tested with 5 gallons of water and passed. The following documents were reviewed on-site: DUSTO monthly inspection reports, DUSTO training documents. A UST CERS (ID: 10354138) submittal was reviewed as complete. NOTES: -Within 30 days, please [Truncated]

Eval Notes: Onsite to witness every 36 month secondary containment testing. All components were tested by Elodio Sanchez, of Gettler-Ryan Inc. Mr. Sanchez has the following certifications: ICC UST Service Tech (exp. 7/14/2020) and Franklin Fueling Systems Incon Sump Test Operation Level 4 (exp. 10/12/2020). The UST systems are comprised of four double-walled fiberglass underground tanks (three Regular (87), one Premium (91)) and double-walled, fiberglass piping with four associated dispensers. The reported date of installation for all tanks is 2/8/1990. Overfill prevention for the motor vehicle fuel tanks is through use of mechanical overfill prevention valves pursuant to 23CCR 2635(b)(2)(C) and associated fill sumps are therefore exempt from SB989 testing. Tanks have 5 regulated product piping runs: Tank 1- Regular STP containment 1 to all 4 dispensers Tank 2- Regular STP containment 1 to all 4 dispensers Tank 4- Premium STP containment to all 4 dispensers Siphon pipe from [Truncated]

SIC Code:	5541
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	CNWTRS
Waste Type2:	Not reported
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-15-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency

CAMDEN GAS & MINI MART INC (Continued) **S106446860**

Eval Notes: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed in quantities at or above HMBP-reportable thresholds: 1) Gasoline: 40,000 gallons total 2) Liquid Carbon Dioxide: 3933 cubic feet (57 gallons total) It is of note that small quantities of waste debris contaminated with petroleum hydrocarbons and waste gasoline/water mixture was observed on-site, but below HMBP-reportable thresholds. NOTES: - CERS ID: 10354135 - Employees are provided with initial and annual refresher HMBP training and the training is documented. Employee training records from the past 3 years were reviewed during inspection. - The facility owner has notified the property owner that they are subject to HMBP requirements. - This inspection was conducted and violations were discussed on 2/14/2017 and this inspection report was issued on 2/15/2017.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-15-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility is a gas station that dispenses Regular and Premium gasoline. This hazardous waste generator permit is associated only with the underground storage tank (UST) operator, "CAMDEN GAS & MINI MART INC." All hazardous waste generated from day to day operations of the gas station are associated with this generator, but all hazardous waste from UST testing activities (e.g. waste gasoline/water mixture) are associated with the UST owner, "BP WEST COAST PRODUCTS LLC 02155," who has a separate hazardous waste generator permit and CA EPA ID Number. Hazardous wastes generated include debris contaminated with petroleum hydrocarbons (e.g. rags, absorbent, filters, etc.). The following hazardous wastes associated with this generator were observed at the time of inspection: - 1 x 30 gallon drum of "non-RCRA hazardous waste, solid (Rags, absorbent, & debris impacted with petroleum hydrocarbons)" (Initial Accumulation [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Request Closed

Public

Good morning, Nanako.

Thank you for your recent record request received on 01.24.23 for the following address in SAN JOSE:

5670 Camden Avenue

(APN: 567-28-001)

We have no records for the information requested for this location or APN. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for

maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

- UNIDOCS – Who regulates what in Santa Clara County

RE: PUBLIC RECORDS REQUEST of January 24, 2023, Reference # R000820-012423

Dear Nanako Oba,

The City of San Jose received a public information request from you on January 24, 2023. Your request mentioned:

"Hello. I am looking to obtain electronic copies of records related to Activity Use Limitations (AULs: any restriction on future development because of environmental contamination) or zoning violations for the property 5670 Camden Avenue, San Jose, CA 95124 (APN: 567-28-001). Thank you."

The City of San Jose Code Enforcement Division has reviewed its files and has determined there are no responsive documents to your request.

If you have any questions or wish to discuss this further, you may contact my office at 408-535-7770.

Sincerely,

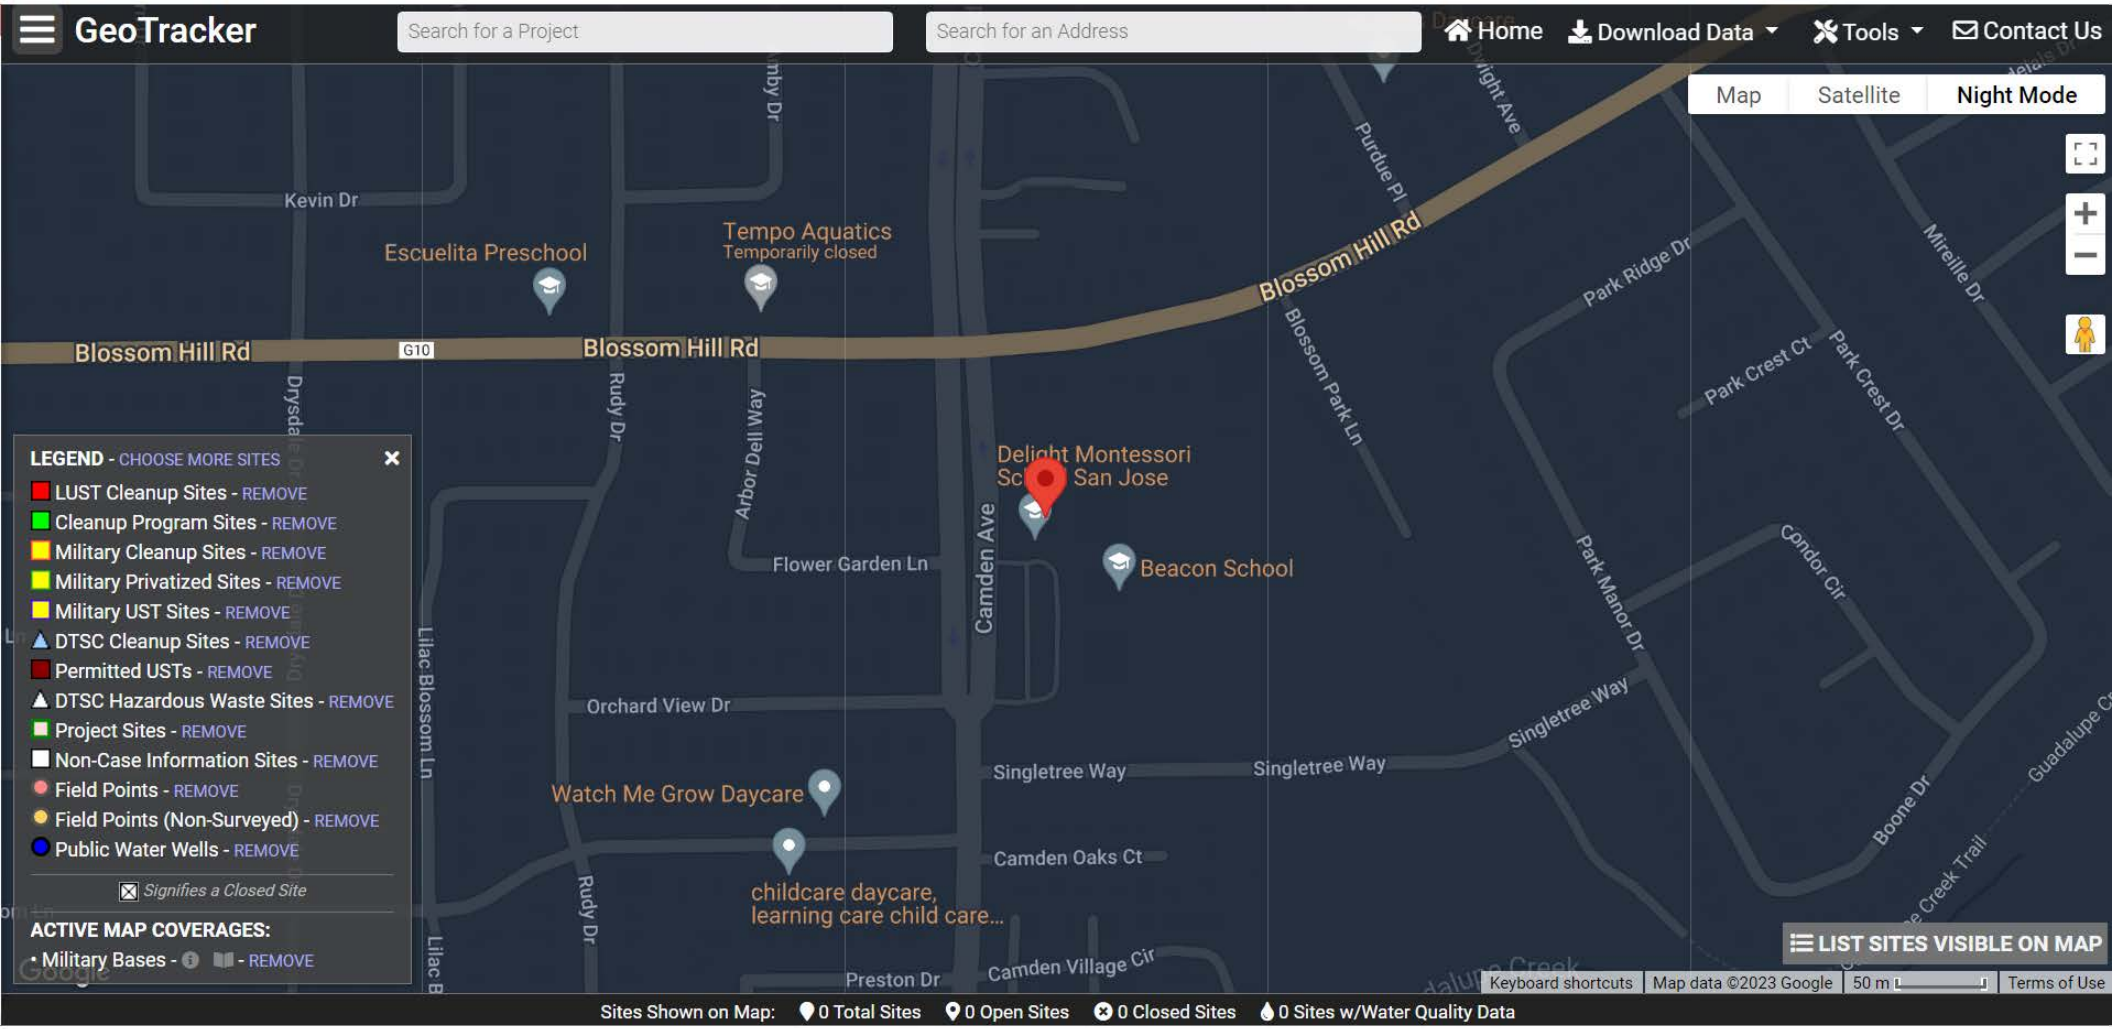

Leslie

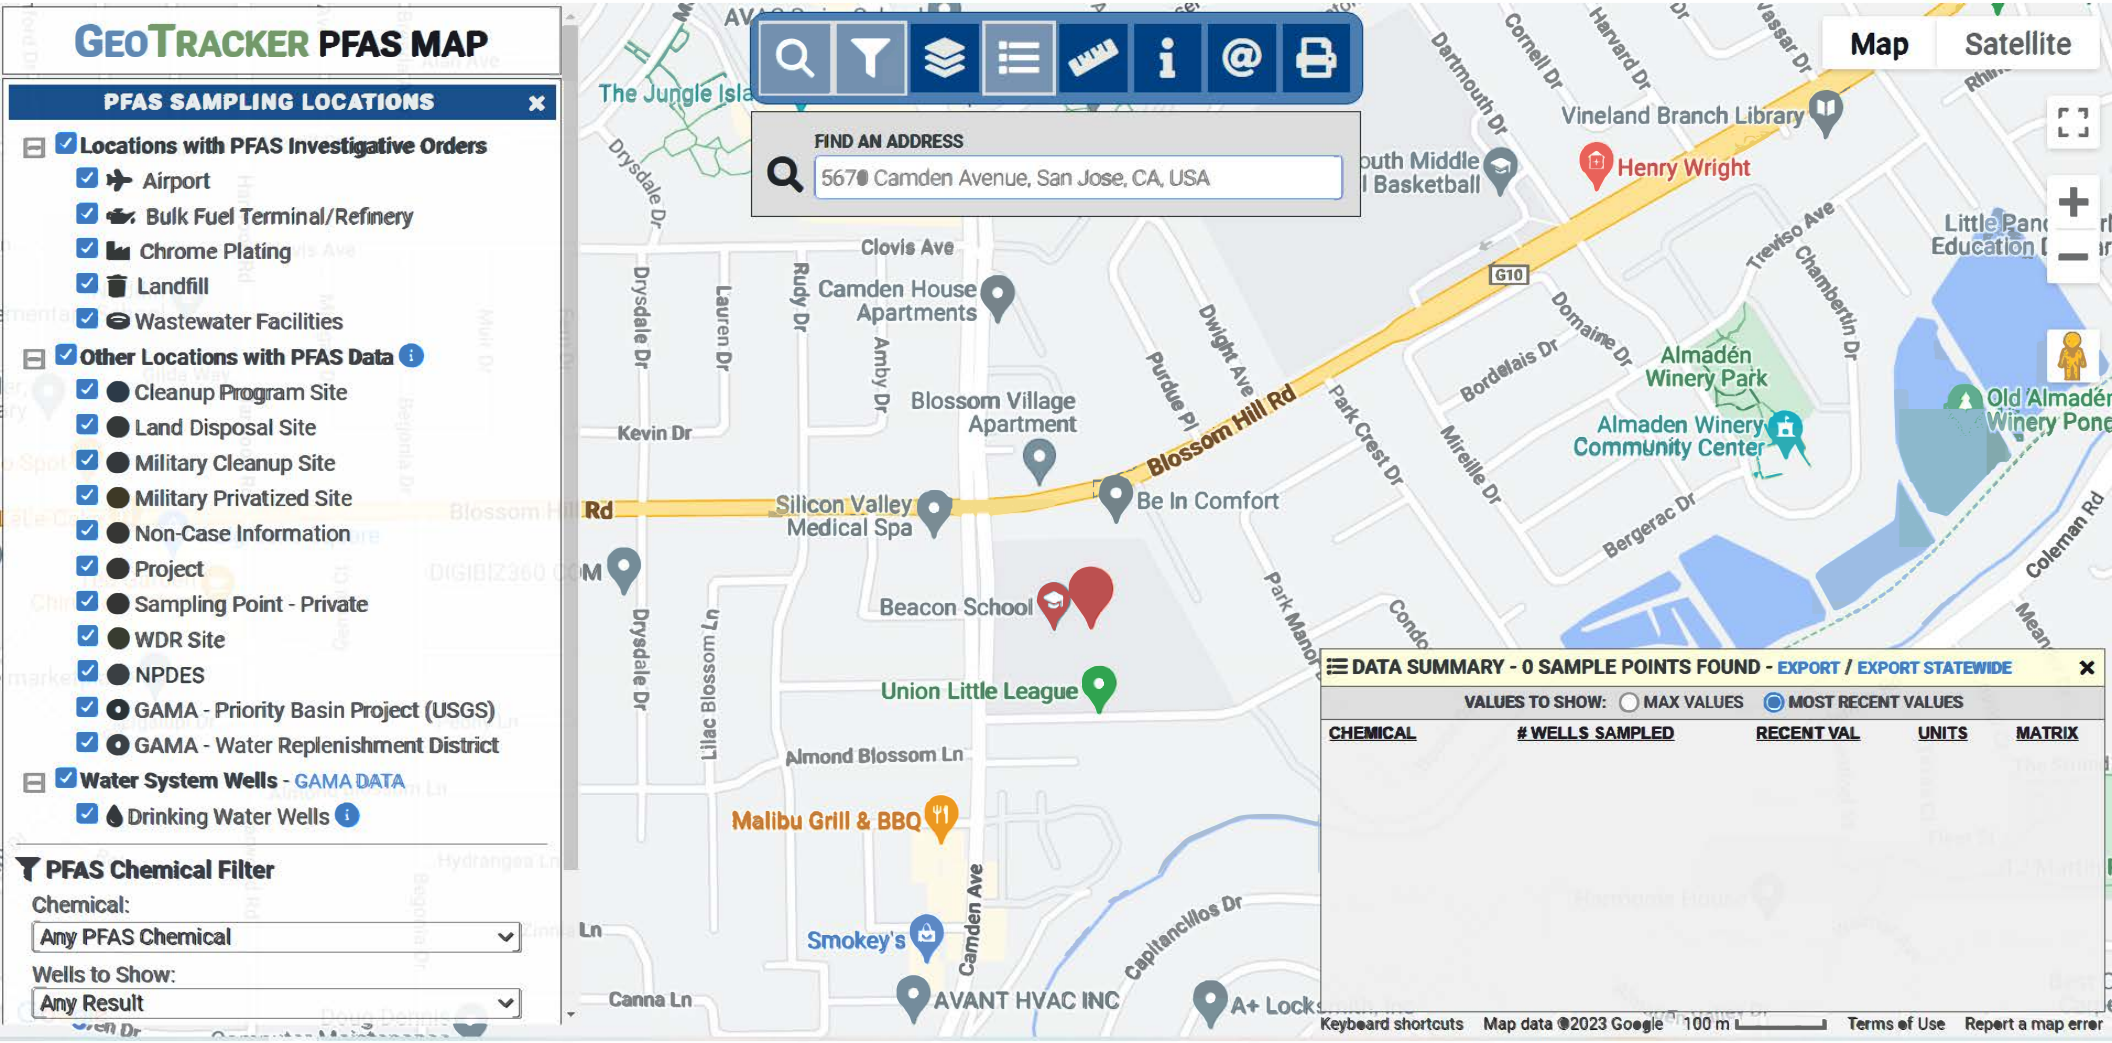

Acting PRA Coordinator

PBCE - Code Enforcement Unit

To monitor the progress or update this request please log into the Public Records Center

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward. This report complies with ASTM 1527-21 standards when used in conjunction with a review of the owner's most recent insurance title policy. Environmental Liens and Activity Use Limitations may exist in the insurance title policy that do not appear within this report.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include City, County, State, Federal and Tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX Research, LLC specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

PRE-SURVEY QUESTIONNAIRE (Environmental)

Instructions: Please complete the following questionnaire to the best of your knowledge.

SITE INFORMATION			
Street Address(es)/Location: 5670 Camden Avenue			
City: San Jose	County: Santa Clara	State: CA	Zip: 95124
Parcel Number(s): 567-28-001			

Contact	**Name**	**Phone Number**	**Yrs. Associated w/Site**
Owner:	United School District		Unknown
Site Contact:	Jessie Tobar		7 months
Key Site Manager:			
Previous Owners, Operators and/or Occupants:	Unknown		

PROPERTY USE AND SPECIFICATIONS

☐ Residential ☐ Office/Retail ☐ Industrial ☐ Vacant Land ☐ Agricultural ☒ Other: _____

Provide all known current/former addresses and/or parcel numbers:

Are there any plans for site redevelopment or change in use? ☐ No ☐ Yes If yes, describe: Unknown

Total Property Size (acres): Unknown	Electricity Provider: PG&E
Number of Buildings: N/A	Heating System Fuel Source(s): N/A
Building Size(s) (SF): N/A	Gas Provider: N/A
Original Construction Date(s): N/A	Cooling System Power Source: N/A
Date(s) of Renovation(s): N/A	Potable Water Source/Provider: City of San Jose
Number of vacant units: N/A	Sanitary Sewer Provider: City of San Jose

Any wastewater discharge at the site? ☐ Septic Tank/Leachfield ☐ Sanitary Sewer ☐ Other ☒ None

PROPERTY HISTORY

Current and Previous Occupant(s)	**Years of occupancy**	**Brief description of on-site operations**

Has the subject site ever been occupied by the following?

☐ Dry Cleaner ☐ Gas Station ☐ Printing Facility ☐ Manufacturing Facility

If yes, provide years of occupancy:

Have any previous investigations been performed at the subject property? ☒ No ☐ Yes

If Yes, are copies available? ☒ No ☐ Yes

If Yes, what type: ☐ Phase I ESA ☐ Phase II ☐ Asbestos Survey ☐ Lead Paint Survey ☐ Radon Sampling ☐ Other: _____

ON-SITE ENVIRONMENTAL CONDITIONS			
Are you aware of any of the following environmental conditions, **either current or former**, on the subject site?			
Environmental Condition/Issue	**Response**	**Environmental Condition/Issue**	**Response**
Aboveground Storage Tanks (ASTs)	☒ No ☐ Yes	Polychlorinated Biphenyls (PCBs)	☒ No ☐ Yes
Underground Storage Tanks (USTs)	☒ No ☐ Yes	Electrical Transformers	☒ No ☐ Yes
Hazardous/Toxic Substances/Chemicals	☒ No ☐ Yes	Hydraulic Lifts	☒ No ☐ Yes
Chemical Spills/Releases	☒ No ☐ Yes	Elevators	☒ No ☐ Yes
Dump Areas/Landfills	☒ No ☐ Yes	Asbestos	☒ No ☐ Yes
Waste Treatment Systems	☒ No ☐ Yes	Lead-Based Paint	☒ No ☐ Yes
Wastewater Discharges	☒ No ☐ Yes	Oil/Gas Wells	☒ No ☐ Yes
Floor Drains, Sumps, Clarifiers/Oil Water Separators	☒ No ☐ Yes	Flooding, Leaks, Other Water Intrusion	☒ No ☐ Yes
Pits, Ponds, Lagoons	☒ No ☐ Yes	Environmental Permits	☒ No ☐ Yes
Stained Soil, Stressed Vegetation	☒ No ☐ Yes	Environmental Cleanups	☒ No ☐ Yes
Pesticide/Herbicide Use	☒ No ☐ Yes	Water Damage, Mold	☒ No ☐ Yes

OTHER ENVIRONMENTAL CONDITIONS

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? ☒ No ☐ Yes If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? ☒ No ☐ Yes If yes, provide brief explanation.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? ☒ No ☐ Yes If yes, provide brief explanation.

SIGNATURE INFORMATION

Person completing questionnaire: Jessie Tobar

Title/Affiliation to property: Lead Maintenance

Number of years associated with property: 7 months

Date: 2/3/2023

SITE VISIT INFORMATION

- A person knowledgeable of current property use/business operations should be present during the site visit.
- Access to a percentage of units should be provided as requested by the field professional.
- Access to the following areas should be provided: all common areas, storage areas, and utility areas; all underground features and chemical storage/disposal areas.
- The following documentation should be provided for review if applicable: all hazardous waste manifests, environmental permits, and any previous environmental reports.

APPENDIX H

QUALIFICATIONS

Nanako Oba

Project Manager, Due Diligence

EDUCATION

- B.S. – Chemical and Biological Sciences, Japan Women's University
- M.S. – Environmental Studies, San José State University

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Oba provides expertise in environmental project management, consulting, and due diligence services to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database and Historical Records Reviews for large- and small-scale industrial, commercial, multi-tenant residential, and rural properties.

PROJECT EXPERIENCE

Project experience for Ms. Oba includes:

- Phase I Environmental Site Assessments (PHI ESAs)
- Limited Environmental Site Assessments (LESAs)
- Environmental Transaction Screens (ETSs)
- Records Research with Risk Assessments (RSRAs)
- Regulatory Database Reviews
- Historical Records Reviews

As a Due Diligence Project Manager, Ms. Oba provides project management and technical expertise to ensure ASTM compliance and satisfaction of client requirements in the Northern California area.

In addition, prior to joining the environmental consulting industry, Ms. Oba spent six years studying a diverse range of environmental disciplines including: environmental science, water resource management, energy and the environment, forest ecology and conservation, ecological sampling and design analyses, and geographic information system.

Marsha Thompson
National Client Manager

EDUCATION

- B.S. – Bachelor of Science, Environmental Science, Barry University

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Thompson has been in the environmental service and due diligence industry since 2007. Her AEI project management experience includes Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, Historical Records Reviews, and Limited Environmental Site Assessments. Ms. Thompson has successfully completed assessments on a variety of properties including: industrial, commercial, agricultural, residential, and vacant sites and has managed multi-site portfolios of properties spread across various states. Ms. Thompson is accustomed to the needs and requirements of a variety of reporting standards including Freddie Mac, Fannie Mae, and customized client formats.

PROJECT EXPERIENCE

Project experience for Ms. Thompson includes:

- Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Regulatory Database Reviews
- Historical Records Reviews
- Limited Environmental Site Assessments
- Project coordination and setup

As a National Client Manager, Ms. Thompson provides in-house technical guidance and review to ensure all projects meet client's goals and scope expectations and develops an understanding of client's goals to facilitate the delivery of consulting to meet those needs.
