1.0 INTRODUCTION

1.1 Statutory Authority and Requirements

This Initial Study has been conducted in accordance with the California Environmental Quality Act (CEQA) (California Public Resources Code [PRC] Section 21000 *et seq*.) and the CEQA Guidelines (California Code of Regulations [CCR], Title 14, Section 15000 *et seq*.). Pursuant to CEQA Guidelines Section 15063, this Initial Study has been conducted to determine if the proposed Park Tower Student Housing Project (Project) would have a significant effect on the environment.

The Project is located on a 51,048 square feet (sf) (1.2 acres) triangular-shaped parcel (Project Site) located at 5150 Pacific Coast Highway in the City of Long Beach (City). The Project Site consists of one parcel (Los Angeles County Assessor Parcel Number [APN] 7220-019-009). The Project Site is currently developed with a seven-story office building with three levels of subterranean parking. The existing office building is approximately 120,000 sf, of which 109,600 sf is currently leased.

The Project would adaptively reuse the entire existing building into private housing for students enrolled in California State University, Long Beach (CSULB). The first level of the Project would consist of administrative/management offices and various amenities including a lobby, mail room, kitchen and dining area, study room, laundry facilities, fitness area, and a men and women's locker room. The 149 student residential suites would be located on the second to seventh level. Suites would range from one-person suites to six-person suites for a total of 73,486 sf of residential area with a floor area ratio (FAR) of 2:28:1.

The Project seeks approval of the following entitlements:

- Conditional Use Permit for the Special Group Residence use for the dormitory use;
- General Plan Amendment/Map changing Community Commercial (CC) Placetype to Neighborhood Serving Center (NSC-Moderate);
- Zoning Code Amendment/Map Change from Commercial (C) to Mixed Use (MU-3);
- Building Permits for the change in use of the building;
- A street improvement encroachment permit from the California Department of Transportation (Caltrans) for activities within the Pacific Coast Highway right-of-way; and
- Certification of the EIR for the Project.

Pursuant to CEQA Guidelines Section 15063(c), the purposes of an Initial Study are to:

- Provide the Lead Agency with information to use as the basis for deciding whether to prepare an Environmental Impact Report (EIR) or a Negative Declaration (ND);
- Enable an applicant or Lead Agency to modify a project, mitigating adverse impacts before an EIR is prepared, thereby enabling the project to qualify for a ND;
- Assist in the preparation of an EIR, if one is required;

- Facilitate environmental assessment early in the design of a project;
- Provide documentation of the factual basis for the finding in a ND that a project will not have a significant effect on the environment;
- Eliminate unnecessary EIRs; and
- Determine whether a previously prepared EIR could be used with the project.

This Initial Study is intended to be used as a decision-making tool for the Lead Agency and responsible agencies in considering and acting on the Project. Responsible agencies would comply with CEQA by considering this environmental analysis for discretionary actions associated with Project implementation, if any.

CEQA Guidelines Section 15063(g) specifies that as soon as a Lead Agency has determined that an Initial Study will be required for a project, the Lead Agency shall consult informally with all Responsible Agencies and all Trustee Agencies responsible for resources affected by a project to obtain their recommendations as to whether an EIR, Mitigated Negative Declaration (MND), or ND should be prepared.

1.2 Summary of Findings

Pursuant to CEQA Guidelines Section 15367, the City, as Lead Agency, has the authority for environmental review and adoption of the environmental documentation, in accordance with CEQA. This Initial Study has evaluated the environmental issues outlined in **Section 3.2: Environmental Factors Potentially Affected**. It provides decision-makers and the public with information concerning the Project's potential environmental effects and recommended mitigation measures, if any.

The environmental factors checked below would be potentially affected by the Project, involving at least one impact that is a "Potentially Significant Impact". The environmental factors below will limit the focus of the Environmental Impact Report (EIR) to those environmental factors that cannot be determined to be "Less Than Significant" in the Initial Study.

- Air Quality
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Population and Housing
- Transportation
- Tribal Cultural Resources
- Utilities and Service Systems

Therefore, in accordance with CEQA Guidelines Section 15063, this Initial Study concludes that an EIR is the appropriate document for the Project.

1.3 Report Organization

This document is organized into the following sections:

Section 1.0: Introduction provides a Project introduction and overview, cites the CEQA Guidelines to which the Project is subject, and summarizes the Initial Study's conclusions.

Section 2.0: Project Description details the Project's location, environmental setting, background and history, characteristics, discretionary actions, construction program, phasing, agreements, and required permits and approvals. This Section also identifies the Initial Study's intended uses, including a list of anticipated permits and other approvals.

Section 3.0: Environmental Checklist Form provides the Project background and an overview of potential impacts that may or may not result from Project implementation.

Section 4.0: Evaluation of Environmental Impacts provides an analysis of potential environmental impacts identified in the environmental checklist form.

Section 5.0: References identifies resources used to prepare the Initial Study.

This page intentionally left blank.

2.0 PROJECT DESCRIPTION

2.1 Location

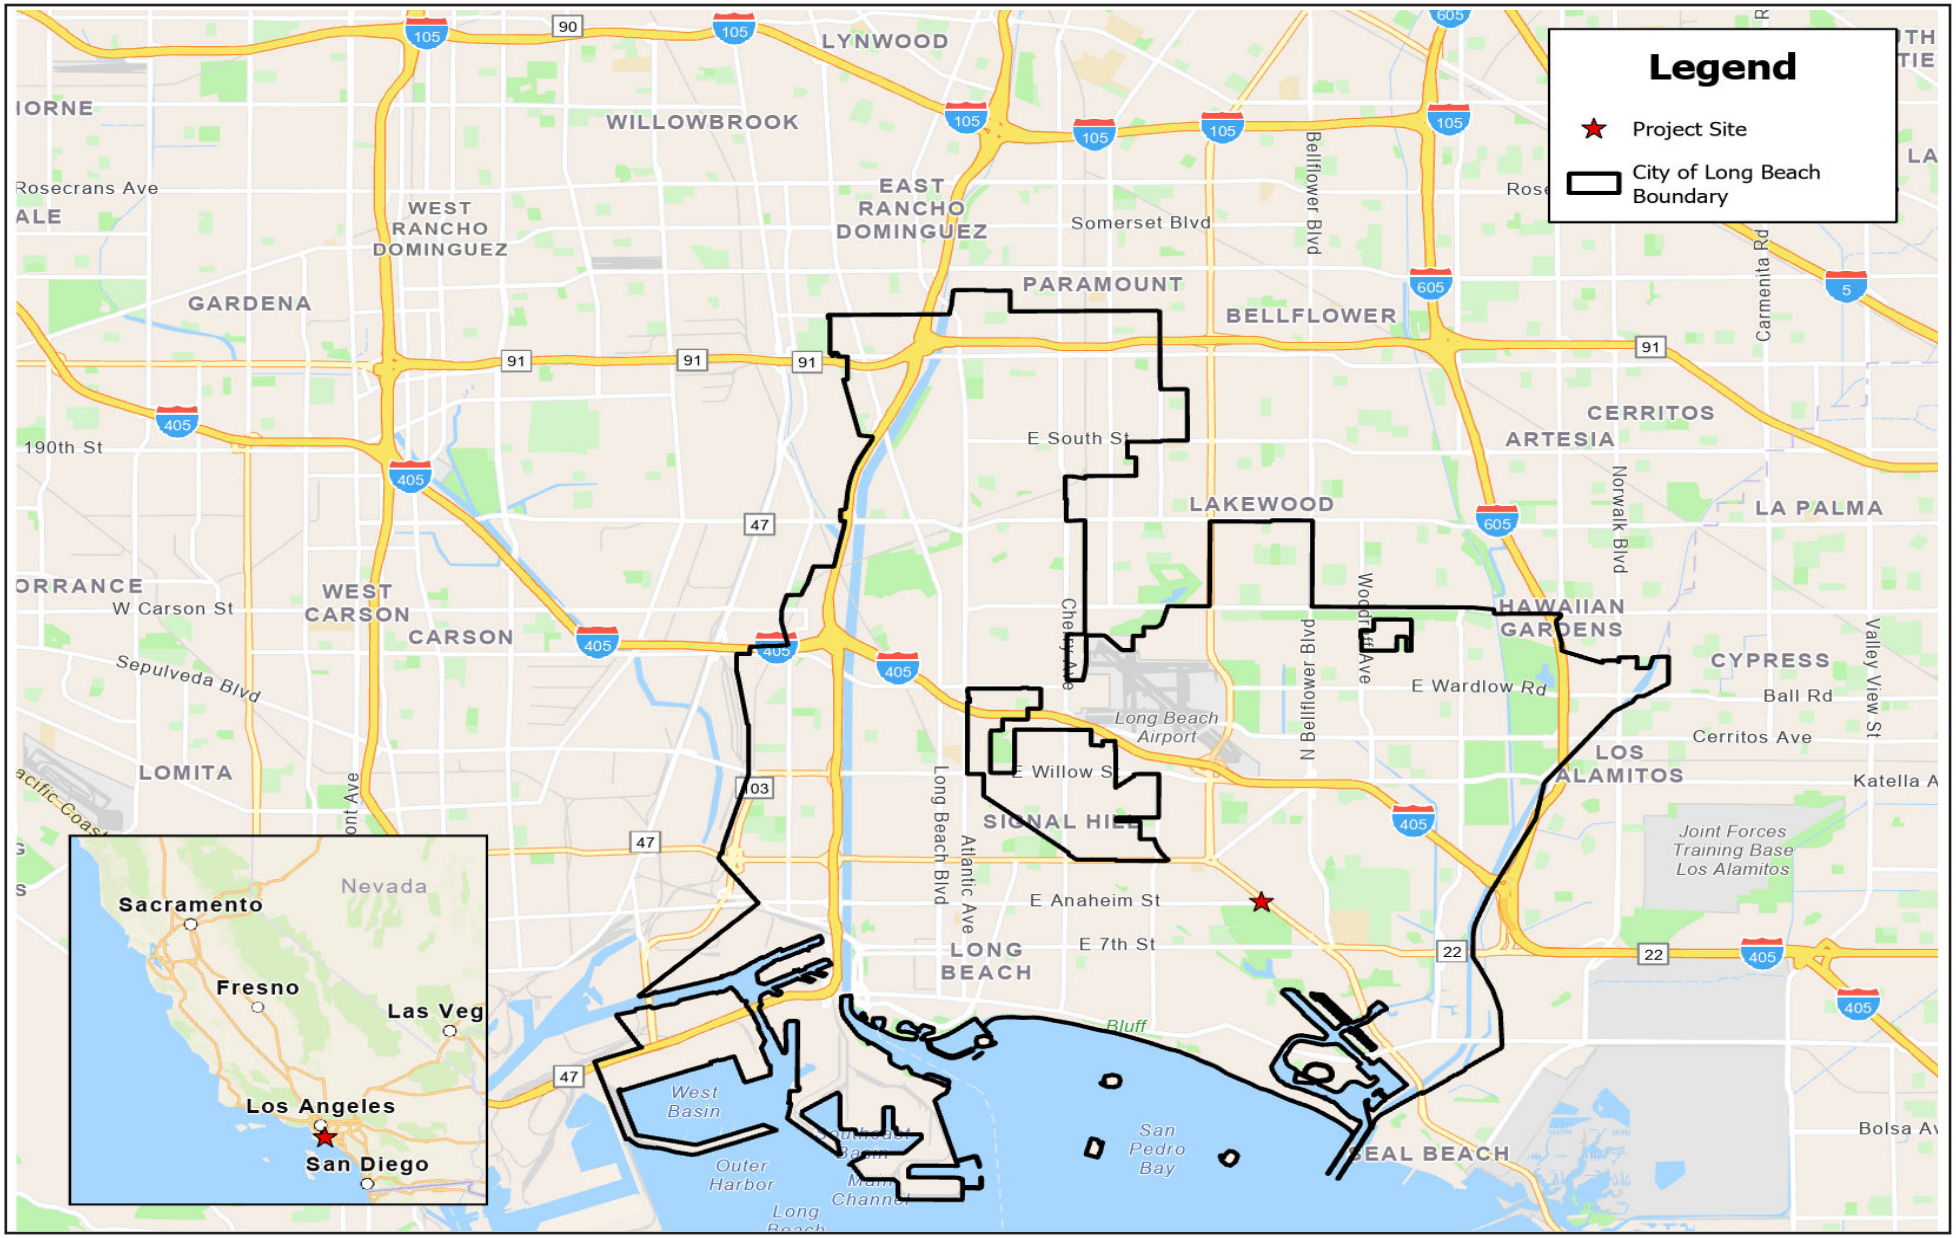

The Project Site is located at 5150 Pacific Coast Highway in the eastern part of the City (**Figure 2-1, Regional Vicinity Location Map**). The Project Site is generally bounded by the Pacific Coast Highway to the north and east, East Anaheim Street to the south, and Clark Avenue to the west. The Project Site is surrounded by commercial, office, residential, and religious uses to the north and east past the Pacific Coast Highway; a recreational golf course (Recreation Park Golf Course 18) to the south; and commercial and residential uses to the west. Also, the CSULB Beachside College student housing center and living facility is located further to the north (**Figure 2-2, Local Vicinity and Surrounding Land Uses Map**).

Primary regional vehicular access is provided by the Pacific Coast Highway and the San Diego Freeway (I-405) located 1.4 miles north of the Project Site. Long Beach Transit (LBT) has multiple stops that travel along the Project Site frontages, including Line 41, 45, and 46 which travels west/east along East Anaheim Street. These LBT routes provide service to the Los Angeles County Metropolitan Transportation Authority (Metro) Downtown Long Beach Station 3.57 miles southwest and CSULB 1.5 miles east of the Project. Additional LBT stops for Lines 171 and 175 are provided 250 feet east of the Project Site. Various other LBT Lines, including Lines 91, 111, 112, 121, and 173, are located within 0.5 miles of the Project Site that would provide additional public transit service to CSULB. Additionally, the CSULB Beachside shuttle is located on Pacific Coast Highway, approximately 900 feet northwest of the Project Site.

2.2 Environmental Setting

The City encompasses approximately 80.35 square miles and is located in southeastern Los Angeles County. The City is bound by the Pacific Ocean to the south; to the west by the cities of Los Angeles (the neighborhoods of San Pedro and Wilmington) and Carson, and portions of unincorporated Los Angeles County (communities of Rancho Dominguez and East Rancho Dominguez); to the north by the cities of Compton, Paramount, Bellflower, Lakewood, and Hawaiian Gardens; and to the east by Orange County (cities of Seal Beach and Los Alamitos). The landlocked city of Signal Hill, surrounded by the city of Long Beach, is located approximately 1.08-mile northwest of the Project Site. The City is highly urbanized with a mix of commercial, industrial, and residential uses. Open space uses are generally located along the Los Angeles River, located approximately 4.12 miles west of the Project Site, the coastline of the Pacific Ocean, and in several parks dispersed throughout the City. Long Beach Municipal Airport, a City-owned commercial service airport, is located approximately 1.60-miles north of the Project Site. The Port of Long Beach (Long Beach Harbor Department), a major cargo port owned and operated by the City, is located approximately 4.3 miles southwest of the Project Site.

2.2.1 On-Site and Surrounding Land Uses

As shown on Figure 2-2, the Project Site is developed and highly disturbed. The Project Site is currently developed with a seven-story office building and three levels of subterranean parking built in 1981. The existing office building is approximately 120,000 sf, of which 109,600 sf is currently leased (as of January 2024). The western side of the Project Site adjacent to Clark Avenue includes a surface parking lot, driveway, and landscaping.

Vehicular access to the Project Site is currently provided by one driveway on Clark Avenue that leads to three levels of subterranean parking. Pedestrian access is provided via sidewalks located along Pacific Coast Highway, East Anaheim Street, and Clark Avenue. Bicycle access is provided by bicycle paths on Pacific Coast Highway.

In addition to the existing building and small surface parking lot on the ground level, there is a mix of ornamental landscaping on the Project Site, including a tree along Clark Avenue. On the western side of the Project Site, there is a sparsely landscaped open space area. There are four street trees along the Pacific Coast Highway. There is signage for the existing office building on the northern corner of the Project Site along Pacific Coast Highway.

Table 2-1: Project Site and Surrounding Land Uses summarizes the on-site and surrounding land uses.

Table 2-1: Project Site and Surrounding Land Uses

Description	Existing Land Use	Zoning[1]
Project Site	Office	Community Automobile-Oriented (CCA) District
North	Pacific Coast Highway; Commercial; Residential	CCA District; Moderate-density Multiple Residential (R-4-R); Moderate-density Multiple Residential (R-4-R (HL-25)); Overlay: HL-25
South	East Anaheim Street; Recreation	Park (P)
East	Commercial; Religious; Offices; Senior Services; Institutional	CCA District; Neighborhood Pedestrian-Oriented Commercial (CNP) District; P District
West	Clark Avenue; Residential; Commercial	R-4-R District, Two-family Residential, standard lot (R-2-N) District, Neighborhood Commercial and Residential (CNR) District.

Notes:
1. City of Long Beach. City of Long Beach Map It. Available at https://gis.longbeach.gov/mapit/. Accessed March 21, 2024.

2.2.2 General Plan Land Use and Zoning

Per the General Plan, the Project Site's Placetype is CC, Community Commercial.[1] The Community Commercial Placetype is intended to serve automobile oriented commercial needs. Residential uses are not allowed under this Placetype. A FAR of between 2.0 and 4.0 is allowed in areas designated for Community Commercial. The maximum building height for areas designated for

[1] City of Long Beach, *City of Long Beach General Plan 2040*, Land Use Element, December 2019.

Community Commercial is seven stories but varies based on location in the City. The General Plan Land Use map identifies the maximum building height at the Project Site as five stories.

The Project Site is in the Community Automobile-Oriented (CCA) Zoning District. Pursuant to Long Beach Municipal Code (LBMC) Section 21.32.020, the CCA Zoning District permits retail and service uses for an entire community including convenience and comparison shopping for goods and associated services.

The Project is proposing a General Plan Amendment from the current Community Commercial (CC) Placetype to the Neighborhood Serving Center (NSC-Moderate) Placetype, which would permit residential uses. The proposed Project would also require a Zoning Code Amendment/Map Change to change the existing zone from Commercial (C) to Mixed-Use (MU-3) to allow for the Project's student residential uses and to enable the proposed Project to take advantage of the adaptive reuse development standards. The proposed Project would also require the approval of a Conditional Use Permit (CUP) to allow the "Special Group Residence" and Site Plan review of adaptive reuse.

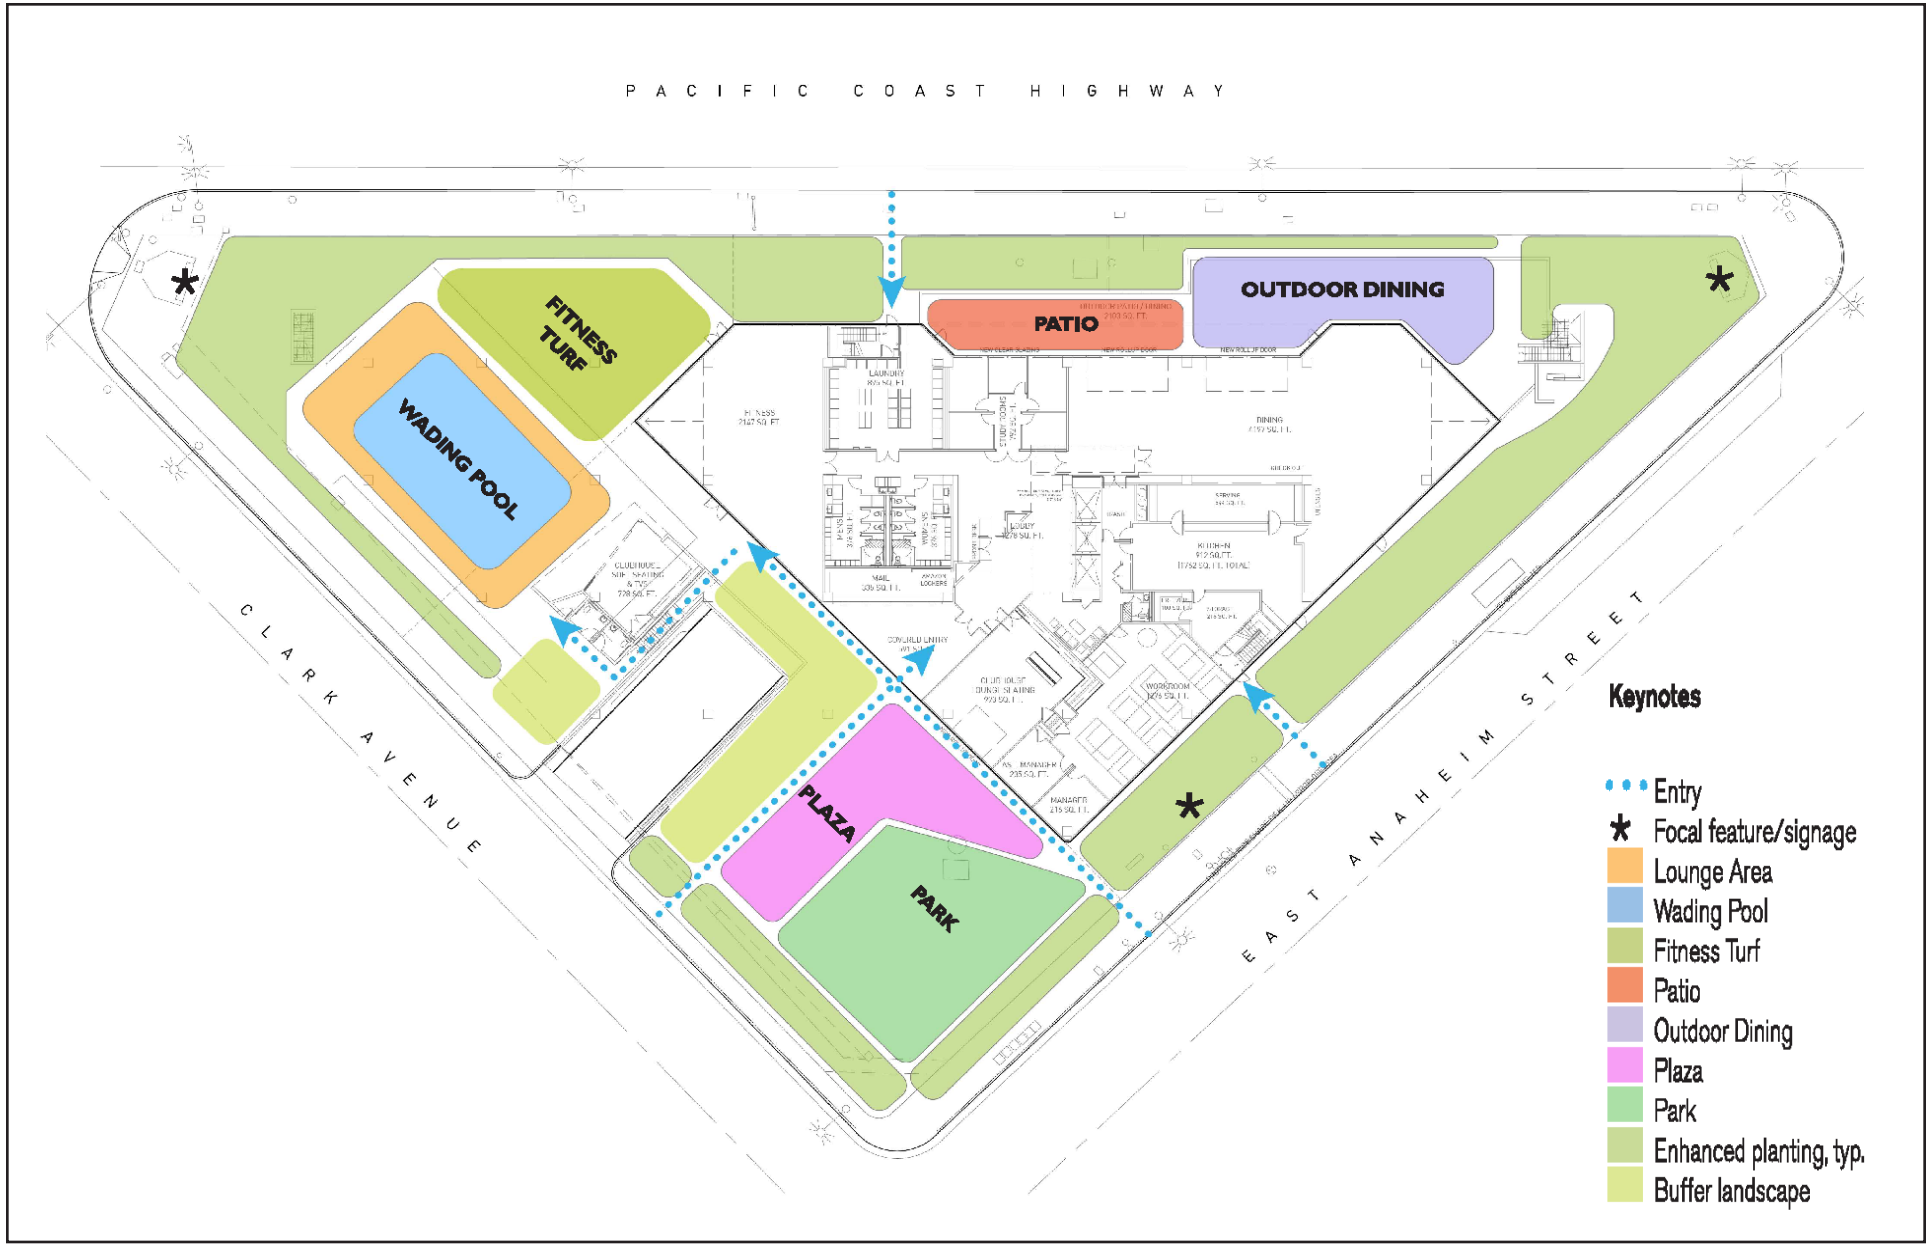

2.3 Project Characteristics

2.3.1 Project Overview

The Project proposes to adaptively reuse an existing seven-story office building with three levels of subterranean parking into a residential building for students enrolled at CSULB. The first level of the proposed Project would consist of administrative/management offices and various amenities including a lobby, mail room, kitchen and dining area, study room, laundry facilities, fitness area, and a men and women's locker room. The 149 student residential suites (593 beds) would be located on the second to seventh floor. The Project would include 12 one-person suites, 2 two-person suites, 7 three-person suites, 96 four-person suites, 20 five-person suites, and 12 six-person suites, totaling approximately 73,486 sf of residential area. The proposed Project would construct a new 728 sf pavilion building that is designed to activate the street front along Clark Avenue. See further details under Section 2.3.2, Design.

The proposed Project would utilize the three levels of existing subterranean vehicular parking and would include a total of 364 parking stalls (218 standard spaces, 19 accessible spaces, 127 tandem spaces). The Project would also include 150 bicycle parking spaces on the first level of subterranean parking. The proposed Project would include minimal amounts of excavation necessary for pool construction and the installation of utilities to the building.

As shown on **Figure 2-3, Conceptual Site Plan**, the proposed Project would incorporate new accessible at-grade open space as well as indoor and outdoor common and private open space for proposed Project residents and guests. The proposed Project would provide an approximately 22,523 sf of open space that would include student plaza, benches, lounging areas, pool, patio, outdoor BBQs and picnic tables, lawn area, shade structure, planters, and landscaping. Open space areas on the ground floor would be accessed from the entrance of Pacific Coast Highway, East Anaheim Street, Clark Avenue, as well as from the interior of the Project Site from the ground -floor parking level or via subterranean parking exit stairs.

SOURCE: Studio One Eleven, December 2022

N.T.S.

FIGURE 3: Conceptual Site Plan

Kimley»Horn

This page intentionally left blank.

2.3.2 Design

The proposed Project would largely maintain the exterior of the existing building. Minor visual improvements would include the addition of decorative window films, identification signage, improvements to the ground level entryway and the addition of a new 728 sf pavilion building adjacent to the vehicular ramp off of Clark Avenue. The pavilion would include folding walls and roof which would mimic the ground floor architecture of the existing building.

Adjacent to the existing building, the existing surface parking, walkways, and landscaping would be removed and would be replaced by new outdoor amenities.

A security fence and gate would be provided around the perimeter of the Project Site. Project design would also include lighting of entryways, publicly accessible areas, parking areas, and common building and open space residential areas for security purposes.

2.3.3 Open Spaces and Landscaping

Open space and landscaping would be provided in accordance with the LBMC. The proposed Project would incorporate accessible at-grade open space as well as indoor and outdoor common and private open space for Project residents and guests. The proposed Project would provide approximately 22,523 sf of open space that would include the aforementioned, student plaza, lawn area, fitness turf, patio, and upper decks. The outdoor open space would include various amenities including benches, lounging areas, pool, pool lounge, picnic tables, shade structures, and landscaping. Open space areas on the ground floor would be accessed from the entrance of Pacific Coast Highway, East Anaheim Street, Clark Avenue, as well as from the interior of the Project Site from the ground-floor parking level or via subterranean parking exit stairs. Landscaping for the proposed Project would be consistent with LBMC Chapter 21.42, *Landscaping Standards*.

2.3.4 Parking and Access

The City's parking regulations, found in LBMC Chapter 21.41, identify the required number of parking spaces for particular land uses. Special residential uses, such as a dormitory would require 1 parking space per bed. However, the proposed Project would be subject to Assembly Bill (AB) 2097 parking requirements, which would not enforce minimum parking requirements on a residential project if the project is located within one-half mile of public transit.[2] The proposed Project would be located within one-half mile of public transit options including Long Beach Transit (LBT) bus service and the California State University Long Beach (CSULB) Beachside shuttle and therefore be subject to AB 2097. Therefore, the proposed Project would provide 0.61 spaces per bed, which would result in 364 vehicle parking stalls. According to the 2022 Edition of the California Green Building Standards Code (CALGreen Code) Section 4.106.4.2.2, multifamily development projects with 20 or more dwelling units should have ten percent of the total number of parking spaces be electric vehicle (EV) charging spaces capable of supporting future Level 2 electric vehicle supply equipment (EVSE), twenty-five percent of the total number of parking spaces shall be EV ready, and five percent of the total number of parking spaces shall be

[2] AB 2097 Residential, commercial, or other development types: parking requirements.

equipped with EV charging stations (EVCS).[3] The proposed Project would comply with CALGreen Code and provide ten percent of the total number of parking spaces ten percent of the total number of parking spaces EV charging spaces capable of supporting future Level 2 EVSE, twenty-five percent of the total number of parking spaces shall be EV ready, and five percent of the total number of parking spaces shall be equipped with EVCS.

There is currently one driveway located on Clark Avenue. The proposed Project would maintain the existing driveway for residents and guests of the Project. The driveway would lead to three floors of subterranean parking. The Project would also include a proposed rideshare pick-up and drop-off area on East Anaheim Street.

2.3.5 Utilities and Infrastructure

Electric power would be provided to the Project Site by Southern California Edison (SCE). Water and sewer service would be provided by the Long Beach Utilities Department (formerly known as the Long Beach Water Department). The proposed Project would not use natural gas; however, natural gas service in the area is provided by the City of Long Beach Utility Services. Trash and recycling collection would be provided by City of Long Beach Utility Services.

2.4 Project Construction Activities and Phasing

Project construction is anticipated to occur as a single-phase, lasting approximately 15 months, beginning as early as the first quarter of 2025, and ending as early as the first quarter of 2026. For purposes of this environmental analysis, opening year is assumed to be 2026.

2.5 Agreements, Permits, and Approvals

As the Lead Agency, the City would have discretionary approval authority over the Project. To implement the Project, at a minimum, the following discretionary permits/approvals must be granted by the City and others:

- Conditional Use Permit for the Special Group Residence use for the dormitory use;
- General Plan Amendment/Map changing Community Commercial (CC) Placetype to Neighborhood Serving Center (NSC-Moderate);
- Zoning Code Amendment/Map Change from Commercial (C) to Mixed Use (MU-3);
- Building Permits for the change in use of the building;
- Certification of the EIR for the Project;
- A street improvement encroachment permit from Caltrans for activities within the Pacific Coast Highway right-of-way; and
- Other discretionary and ministerial approvals as needed and as may be required.

[3] International Code Council. *2022 California Green Building Standards Code, Title 24, Part 11 (CALGreen), Chapter 4 Residential Mandatory Measures.* Available at https://codes.iccsafe.org/content/CAGBC2022P1/chapter-4-residential-mandatory-measures. Accessed April 1, 2024.

3.0 ENVIRONMENTAL CHECKLIST FORM

3.1 Background

1.	**Project Title:** Park Tower Student Housing Project
2.	**Lead Agency Name and Address:** City of Long Beach Development Services Department 411 W. Ocean Boulevard, 2nd Floor Long Beach, CA 90802 (562) 570.6194
3.	**Contact Person and Phone Number:** Gina Casillas (562) 570-6879
4.	**Project Location:** 5150 Pacific Coast Highway, Long Beach, CA 90804
5.	**Project Sponsor's Name and Address:** Derek Burnham Burnham Development 111 West Ocean Boulevard, Suite 1625 Long Beach, CA 90802
6.	**General Plan Designation:** Community Commercial (CC) to Neighborhood Serving Center (NSC-Moderate)
7.	**Zoning:** Commercial (C) to Mixed-Use (MU-3)
8.	**Description of Project:** See **Section 2.3: Project Characteristics**
9.	**Surrounding Land Uses and Setting:** See **Section 2.2.1: On-Site and Surrounding Land Uses**
10.	**Other public agencies whose approval is required (e.g., permits):** • Conditional Use Permit for the Special Group Residence use for the dormitory use • General Plan Amendment/Map changing Community Commercial (CC) Placetype to Neighborhood Serving Center (NSC-Moderate) • Zoning Code Amendment/Map Change from Commercial (C) to Mixed Use (MU-3) • Building Permits for the change in use of the building. • Certification of the EIR for the Project; and • A street improvement encroachment permit from Caltrans for activities within the Pacific Coast Highway right-of-way.

11.	**Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code § 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of the significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?** To Be Determined

3.2 Environmental Factors Potentially Affected

The environmental factors checked below would be potentially affected by the Project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages. The environmental factors checked below will limit the focus of the Environmental Impact Report (EIR) to those environmental factors that cannot be determined to be "Less Than Significant" in the Initial Study.

☐ Aesthetics	☐ Agriculture and Forestry Resources	☒ Air Quality
☐ Biological Resources	☒ Cultural Resources	☒ Energy
☒ Geology and Soils	☒ Greenhouse Gas Emissions	☒ Hazards and Hazardous Materials
☒ Hydrology and Water Quality	☒ Land Use and Planning	☐ Mineral Resources
☒ Noise	☒ Population and Housing	☐ Public Services
☐ Recreation	☒ Transportation	☒ Tribal Cultural Resources
☒ Utilities and Service Systems	☐ Wildfire	☒ Mandatory Findings of Significance

This page intentionally left blank.

Lead Agency Determination

On the basis of this Initial Study:

I find that the proposed Project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.	
I find that although the proposed Project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the Project have been made by or agreed to by the Project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.	
I find that the proposed Project MAY have a significant effect on the environment and an ENVIRONMENTAL IMPACT REPORT is required.	X
I find that the proposed Project MAY have a potentially significant or a potentially significant unless mitigated impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.	
I find that although the proposed Project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed Project, nothing further is required.	

CITY OF LONG BEACH

Planner

Date

This page intentionally left blank.

4.0 EVALUATION OF ENVIRONMENTAL IMPACTS

The following environmental analysis is patterned after CEQA Guidelines Appendix G**.** An explanation is provided for all responses except "No Impact" responses, which are supported by the cited information sources. The responses consider the whole action involved with the proposed Project: on site and off site, project- and cumulative-level, direct and indirect, and short-term construction and long-term operational. The explanation of each issue also identifies the significance criteria or threshold, if any, used to evaluate each question, and the mitigation identified, if any, to avoid or reduce the impact to less than significant. To each question, there are four possible responses:

- **No Impact.** The project would not have any measurable environmental impact.
- **Less Than Significant Impact.** The project would have the potential to impact the environment, although this impact would be below-established thresholds that are considered to be significant.
- **Less Than Significant With Mitigation Incorporated.** The project would have the potential to generate impacts, which may be considered as a significant effect on the environment, although mitigation measures or changes to the project's physical or operational characteristics could reduce these impacts to a less than significant level.
- **Potentially Significant Impact.** The project could have impacts, which may be considered significant, and therefore additional analysis is required to identify mitigation. A determination that there is a potential for significant effects indicates the need to more fully analyze the project's impacts and identify mitigation.

4.1 Aesthetics

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Except as provided in Public Resources Code § 21099, would the project:				
a) Have a substantial adverse effect on a scenic vista?				X
b) Substantially damage scenic resources, including, but not limited to trees, rock outcroppings, and historic buildings within a State Scenic Highway?				X
c) If in a non-urbanized area, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X	
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X	

Impact Analysis

4.1a Would the Project have a substantial adverse effect on a scenic vista?

No Impact. A scenic vista is commonly defined as a viewpoint that provides expansive views of a highly valued landscape for the public's benefit. The Urban Design Element of the City of Long Beach General Plan identifies several important vistas in the City, including views of downtown Long Beach from mid-City, views from Los Cerritos Park, views across the Long Beach Skyline, the view along Alamitos Avenue south to the Villa Riviera Hotel; views within El Dorado Park; the view down 3rd Street to the cranes at the Port of Long Beach; views along Ocean Boulevard; the view from Bluff Park to the Pacific Ocean and Belmont Pier; the view from Queensway Bay and Shoreline Park to the Queen Mary; and the view from Los Coyotes Drive to the San Gabriel Mountains.[4] The Urban Design Element also identifies scenic routes. Currently, Ocean Boulevard and Livingston Drive constitute City-designated scenic routes, located approximately 1.87 miles south and 1.9 miles south of the Project Site, respectively. By 2030, the City-designated system of scenic routes will be expanded to include Ocean Boulevard on the Belmont Peninsula, the Promenade in downtown Long Beach, the Los Angeles River and San Gabriel River corridors, Appian Way along the Colorado Lagoon, Marine Stadium, Studebaker Road, the approach road to Rancho Los Cerritos, and the entire stretch of Pacific Coast Highway.[5]

[4] City of Long Beach. (2019). *General Plan Urban Design Element*. https://www.longbeach.gov/globalassets/lbcd/media-library/documents/planning/advance/lueude/urban-design-element-final-adopted-december-2019. Accessed March 21, 2024.
[5] *Id*.

The proposed Project is not situated in one of the areas with scenic vistas or along a scenic route as identified in the City's General Plan. The proposed Project would involve the adaptive reuse of a seven-story office building with three levels of subterranean parking into student housing in a highly urbanized area, surrounded by existing development.

The height of the existing building would remain the same under the Project. The exterior of the building would largely remain the same. Minor additions such as decorative window films, identification signage, a small pavilion building, improvements to the ground level entryways, and inclusion of new open space areas would not substantially add to the existing building's massing or scale, nor would they increase the building's height resulting in new impacts to scenic vistas. Accordingly, the proposed Project would not have an adverse effect on a scenic vista. No impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.1b Would the Project substantially damage scenic resources, including but not limited to trees, rock outcroppings, and historic buildings within a State Scenic Highway?

No Impact. The proposed Project Site faces Pacific Coast Highway to the north and east. Pacific Coast Highway is currently not designated as a scenic highway by Caltrans.[6] However, according to the Urban Design Element, the entire stretch of the Pacific Coast Highway will become a scenic highway by 2030.[7] The nearest eligible State Scenic Highway is a segment of California State Route 91 that is located approximately 18.04 miles east of the Project Site. As discussed above, the proposed Project involves the adaptive reuse of the existing office building into new student housing and minor changes to the building façade would not substantially add to the existing building's massing or scale, nor would increase the building's height. Accordingly, the proposed Project would have no impact on scenic resources within a State Scenic Highway, and this issue will not be carried forward for further analysis in the EIR.

4.1c If in a non-urbanized area, would the Project substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Less Than Significant Impact. The proposed Project is in a highly urbanized area surrounded by developed office, residential, and commercial uses. The proposed Project would adaptively reuse an existing seven-story office building and transform it into housing for students enrolled in CSULB. The proposed Project is proposing a General Plan Amendment from the current Community Commercial (CC) Placetype to the Neighborhood Serving Center (NSC-Moderate) Placetype which would permit residential uses. The Project would also require a Zoning Code Amendment/Map Change to change the existing zone from Commercial (C) to Mixed-Use (MU-3) to allow for the Project's student residential uses and to enable adaptive reuse development standards.

[6] California Department of Transportation (Caltrans). *California State Scenic Highway System Map.* Available at https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa. Accessed March 19, 2024.

[7] City of Long Beach. (2019). *General Plan Urban Design Element*, p.15. Available at https://www.longbeach.gov/globalassets/lbcd/media-library/documents/planning/advance/lueude/urban-design-element-final-adopted-december-2019. Accessed March 19, 2024.

The proposed Project would be consistent with the development standards and regulations of the MU-3 Zoning District, upon approval of the Zoning Amendment, including standards governing scenic quality, including building height, residential density, and FAR. As the proposed Project would comply with the required standards and other applicable local regulations pertaining to visual quality, the proposed Project would not conflict with applicable zoning and local regulations governing scenic quality and impacts on scenic quality would be less than significant. Therefore, this issue will not be carried forward for further analysis in the EIR.

4.1d Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Less Than Significant Impact. The proposed Project Site is located in a highly urbanized area with existing sources of light. Existing outdoor lighting in areas around the proposed Project Site includes street lighting along Pacific Coast Highway, Anaheim Street, Clark Avenue, and lighting from surrounding residential, office, and commercial buildings. The existing building includes lighting within entryways, parking areas, and light emitting from interior office uses. The proposed Project would include new sources of exterior lighting on the Project Site from the new amenity and open spaces uses as well as in the surrounding landscaped areas. At night, interior lighting would also emanate from windows in the adaptively reused building.

As the proposed Project is situated in an urban area that is already well illuminated, lighting from the Project would be similar to existing conditions in areas surrounding the Project Site. While the proposed Project would introduce new light sources related to new open space, amenity areas, and more active residential uses, lighting developed as part of the Project would be required to comply with LBMC Chapter 22.30.110, *Lighting Design for Safety*. As required, lighting is required to be directed and shielded to prevent light and glare from intruding onto adjacent sites, and light standards are not to exceed the building height and be appropriately spaced from adjacent property lines. Therefore, nighttime views in the area would not be affected by light generated by the proposed Project.

Glare can be caused by the reflection of sunlight or artificial light from finished surfaces like window glass or other reflective materials. As mentioned previously, the exterior of the building would largely remain the same. Minor additions such as decorative window films, identification signage, a small pavilion building, improvements to the ground level entryways, and open space areas would not involve the use of highly reflective materials known to cause such glare. Therefore, the Project would not create a new source of substantial light or glare which would adversely affect day or nighttime views in the area, and impacts would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.2 Agricultural and Forestry Resources

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project:				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code § 12220(g)), timberland (as defined by Public Resources Code § 4526), or timberland zoned Timberland Production (as defined by Government Code § 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X

Impact Analysis

4.2a Would the Project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

4.2b Would the Project conflict with existing zoning for agricultural use, or a Williamson Act contract?

4.2c Would the Project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code § 12220(g)), timberland (as defined by Public Resources Code § 4526), or timberland zoned Timberland Production (as defined by Government Code § 51104(g))?

4.2d Would the project result in the loss of forest land or conversion of forest land to non-forest use?

4.2e Would the Project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?

No Impact. While small areas of Unique Farmland are mapped within the City, no Prime Farmland or Farmland of Statewide or Local Importance are present. The Project Site is in an area primarily composed of Urban and Built-Up Land.[8] The closest area of Prime Farmland to the proposed Project Site is located approximately 3.96 miles to the southeast. There are no lands subject to a Williamson Act Contract within the City.[9] The Project Site does not include agriculture, forest land, or timberland among its permitted uses. While agriculture is included as a permitted use in some of the City's zoning districts, the City's zoning ordinance does not include agriculture as a permitted use in the CCA Zoning District, nor does it provide zoning for agricultural, forest land, or timberland land uses.

Accordingly, the proposed Project would have no potential to convert farmlands to nonagricultural use, would not conflict with zoning for agricultural use or any Williamson Act contracts, would not conflict with forest land or timberland zoning, result in the loss of forest land, or the conversion of farmland or forest land to non-agricultural or non-forestland use, and no impact would occur. This issue will not be carried forward for further analysis in the EIR.

[8] California Department of Conservation. (2016). *California Important Farmland Finder.* Available at https://maps.conservation.ca.gov/dlrp/ciff/. Accessed March 18, 2024.

[9] California Department of Conservation. (2016). *Williamson Act/Land Conservation Act.* Available at http://www.conservation.ca.gov/dlrp/lca. Accessed March 18, 2024.

4.3 Air Quality

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan?	X			
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable federal or state ambient air quality standard?	X			
c) Expose sensitive receptors to substantial pollutant concentrations?	X			
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?			X	

Impact Analysis

4.3a Would the Project conflict with or obstruct implementation of the applicable air quality plan?

4.3b Would the Project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or state ambient air quality standard?

4.3c Would the Project expose sensitive receptors to substantial pollutant concentrations?

Potentially Significant Impact. The City is within the South Coast Air Basin (SoCAB), which is under South Coast Air Quality Management District's (SCAQMD) jurisdiction. The SCAQMD prepared the 2022 Air Quality Management Plan (AQMP), which establishes a program of rules and regulations directed at reducing air pollutant emissions and achieving State and national air quality standards. The proposed Project would involve minimal construction activities which would generate temporary emissions from interior and pavement demolition, pool construction, interior renovation and construction, architectural coating, and vehicle exhaust associated with construction equipment and worker trips, and movement of construction equipment.

Operational emissions generated by the proposed Project's new residential uses would be associated with area sources, energy sources, generator sources, and mobile sources. As a result, the proposed Project could generate air emissions that exceed SCAQMD thresholds or result in a cumulatively considerable net increase to criteria pollutants. The generation of air pollutants associated with construction and operation of the proposed Project will be analyzed in an EIR to determine whether significant impacts would occur. The EIR will also analyze impacts related to the exposure of sensitive receptors to pollutant concentrations or other emissions such as odors.

4.3d Would the Project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less Than Significant Impact. During construction-related activities, some odors (not substantial pollutant concentrations) that the public may detect are those typical of construction vehicles (e.g., diesel exhaust from grading and construction equipment). These odors are a temporary short-term impact, which are typical of construction projects and disperse rapidly.

The SCAQMD *CEQA Air Quality Handbook* identifies certain land uses as sources of odors. These land uses include agriculture, wastewater treatment plant, food-processing plants, chemical plants, composting, refineries, landfills, dairies, and fiberglass molding. The proposed Project is a residential building for students enrolled at CSULB and does not propose to include any odor-inducing uses on the Project Site. Therefore, the Project would result in a less than significant impact related to other emissions leading to odors adversely affecting a substantial number of people. This issue will not be carried forward for further analysis in the EIR.

4.4 Biological Resources

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			X	
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			X	
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			X	
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			X	
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			X	
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

Impact Analysis

4.4a Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

Less Than Significant Impact. Review of the U.S. Fish and Wildlife Service's (USFWS's) Information for Planning and Consultation (IPaC) database identifies four listed species and one candidate species with likelihood to occur in the environs of the Project Site. The four listed species are Pacific Pocket Mouse (*Perognathus longimembris pacificus*) and California Least Tern

Sterna (*antillarum browni*), Southwestern Pond Turtle (*Actinemys pallida*), and the Western Spadefoot (*Spea hammondii*). The candidate species is Monarch Butterfly (*Danaus plexippus*). Critical habitat has not been identified for any of these species. The Project Site is located outside the range for the Pacific Pocket Mouse, California Least Tern, Southwestern Pond Turtle, and the Western Spadefoot. While within the range of the Monarch Butterfly, the proposed Project Site is highly disturbed and largely devoid of vegetation that would support the Monarch Butterfly.

The California Department of Fish and Wildlife's (CDFW's) California Natural Diversity Database (CNDDB) identifies nine State species of special concern with potential for occurrence in the Long Beach quadrangle. **Table 4.4-1: California Special-Status Species Known to Occur in the Long Beach Area** identifies these species.

Table 4.4-1: California Special-Status Species Known to Occur in the Long Beach Area

Category	Common Name	Scientific Name	State Status
Animals – Birds	western yellow-billed cuckoo	*Coccyzus americanus occidentalis*	Endangered
Animals – Birds	bank swallow	*Riparia riparia*	Threatened
Animals – Birds	California least tern	*Sternula antillarum browni*	Endangered
Animals – Birds	Belding's savannah sparrow	*Passerculus sandwichensis beldingi*	Endangered
Animals – Fish	steelhead – southern California DPS	*Oncorhynchus mykiss irideus pop. 10*	Candidate Endangered
Animals – Insects	Crotch bumble bee	*Bombus crotchii*	Candidate Endangered
Plants – Vascular	Lyons pentachaeta	*Pentachaeta lyonii*	Endangered
Plants – Vascular	salt marsh birds-beak	*Chloropyron maritimum ssp. Maritimum*	Endangered
Plants – Vascular	California Orcutt grass	*Orcuttia californica*	Endangered

Source: CNNDB. QuickView. Available at https://apps.wildlife.ca.gov/bios6/?tool=cnddbqv. Accessed March 18, 2024.

The potential for finding any of these species on the Project Site or in areas around the Project Site is very low because the Project Site is highly disturbed and located in an urbanized area. It is unlikely that the Project Site would support these species or their habitats. Accordingly, the proposed Project would not have a substantial adverse effect on any species identified as a candidate, sensitive, or special-status species in local and regional plans, policies, or regulations, or by the CDFW or USFWS. Impacts would be less than significant. Therefore, this issue will not be carried forward for further analysis in the EIR.

4.4b Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

4.4c Would the Project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

Less Than Significant Impact. The Project Site is highly disturbed and located in an urbanized area. There are no wetlands, sensitive natural communities, or riparian habitats found on or near the proposed Project Site. The nearest wetland (freshwater pond) is found at the Colorado

Lagoon located adjacent to the Recreation Park Golf Course 18 approximately 0.68-mile south of the Project Site.[10] Therefore, impacts on riparian habitat, sensitive natural communities, and wetland habitat would be less than significant, and this issue will not be carried forward for further analysis in the EIR.

4.4d Would the Project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

Less Than Significant Impact. The Project Site is in a highly urbanized environment with minimal existing landscaping, is surrounded by existing development, and is not part of an established wildlife corridor. Project development would occur within the Project Site and would not impact the movement of any native wildlife species. The Project Site contains ornamental landscaping, trees along Clark Avenue and Pacific Coast Highway, and a sparsely landscaped open space area. It is unlikely that the ornamental landscaping on-site would provide suitable habitat for any native resident or wildlife species. However, the existing trees may provide habitat for nesting birds. Most bird nests and eggs are protected under the California Fish and Game Code (CFGC) Section 3503 and the Migratory Bird Treaty Act (MBTA). Project construction activities and tree maintenance activities should occur outside of the general avian breeding season of February 1st to through August 31st to the extent feasible. If Project-related construction, demolition, and tree maintenance activities cannot occur outside of the general avian breeding season (February 1st to through August 31st), a pre-activity nesting bird survey shall be conducted prior to the onset of the aforementioned activities, within a maximum of 14 days prior to commencement. The survey shall be conducted by a qualified biologist. The survey shall be conducted within all suitable nesting habitat located within the area of activity, which includes a 250-foot survey buffer around the activity site to account for all potentially nesting birds on and in the immediate vicinity. If no nesting birds are found, the Project-related activities may commence without potential impacts to nesting birds. Therefore, with compliance with CGFC Section 3503 and the MBTA, the Project would have a less than significant impact on the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. This issue will not be carried forward for further analysis in the EIR.

4.4e Would the Project conflict with local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

Less Than Significant Impact. The proposed Project Site is located in an urbanized area and is highly disturbed with minimal vegetation. The proposed Project would not affect any protected biological resources. The existing tree located on Clark Avenue would be preserved. There are currently four street trees located on the periphery of the proposed Project Site along Pacific Coast Highway. These trees would not be removed as part of the proposed Project. The City does not have a tree preservation policy or ordinance; however, LBMC Chapter 14.28, *Trees and Shrubs*, regulates and controls the planting, maintenance, and removal of trees on City streets.

[10] United States Fish and Wildlife. *National Wetlands Inventory.* Available at https://fwsprimary.wim.usgs.gov/wetlands/apps/wetlands-mapper/. Accessed March 18, 2024.

Any trees to be removed by the Project would be subject to LBMC Chapter 14.28, *Trees and Shrubs*. Additionally, the Project would be required to comply with CFGC Section 3503 and the MBTA to ensure that no significant impacts to nesting birds would occur due to the Project's potential removal of any existing trees.

Accordingly, the proposed Project would not conflict with local policies or ordinances protecting biological resources, and impacts would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.4f Would the Project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The Project Site not located within the boundaries of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan. Accordingly, there would be no impact, and this issue will not be carried forward for further analysis in the EIR.

4.5 Cultural Resources

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?				X
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?	X			
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	X			

Impact Analysis

4.5a Would the Project cause a substantial adverse change in the significance of a historical resource pursuant to § 15064.5?

No Impact. The Project Site is currently developed with a seven-story office building constructed in 1981. The existing office building is not listed in the National Register of Historic Places or California Register of Historical Resources.[11,12] Furthermore, the Project involves the adaptive reuse of the existing building and improvements to the exterior of the building would remain largely the same under existing conditions. Accordingly, the proposed Project would not cause a substantial adverse change in the significance of a historical resource, and no impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.5b Would the Project cause a substantial adverse change in the significance of an archaeological resource pursuant to § 15064.5?

4.5c Would the Project disturb any human remains, including those interred outside of dedicated cemeteries?

Potentially Significant Impact. Construction activities for the proposed Project would involve minimal demolition and excavation. However, proposed earthwork activities could uncover previously known or unknown historical or archaeological resources, or unknown buried resources. The EIR will evaluate the potential of the proposed Project to impact archaeological resources or burial resources as a result of the proposed earthwork activities.

[11] National Park Service. *National Register of Historic Places*. Available at https://www.nps.gov/maps/full.html?mapId=7ad17cc9-b808-4ff8-a2f9-a99909164466. Accessed March 26, 2024.
[12] California State Parks. *California Historical Resources*. Available at https://ohp.parks.ca.gov/ListedResources/?view=all. Accessed March 26, 2024.

4.6 Energy

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	X			
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	X			

Impact Analysis

4.6a Would the Project result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Potentially Significant Impact. The proposed Project would adaptively reuse an existing seven-story office building and provide housing for students enrolled in CSULB. Project construction would include minimal interior and pavement demolition, pool construction, exterior and interior building construction, and architectural coating, which would require energy for the manufacture and transportation of construction materials to the Project Site. Energy consumption related to Project operations could increase compared to existing conditions due to the introduction of residential uses that could increase transportation energy demands and building energy for 24-hour heating/cooling and cooking. Energy consumption would be potentially significant and will be further evaluated as part of the EIR.

4.6b Would the Project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Potentially Significant Impact. The proposed Project has the potential to result in significant short term construction-related and long-term operational energy impacts. A consistency analysis will be conducted to determine if the Project conflicts with or obstructs a State or local plan for renewable energy or energy efficiency. As such, impacts to energy resources would be potentially significant and will be evaluated as part of the EIR.

4.7 Geology and Soils

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?			X	
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
b) Result in substantial soil erosion or the loss of topsoil?			X	
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				X
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?				X
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				X
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	X			

Impact Analysis

4.7ai Would the Project directly or indirectly cause potential substantial adverse effects, including the risks of loss, or death involving the rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.

No Impact. The Alquist-Priolo Earthquake Fault Zoning Act was passed in 1972 to mitigate the hazard of surface faulting to structures for human occupancy. The Alquist-Priolo Earthquake Fault Zoning Act's main purpose is to prevent the construction of buildings used for human occupancy on the surface trace of active faults. The Alquist-Priolo Earthquake Fault Zoning Act requires the State Geologist to establish regulatory zones, known as "Alquist-Priolo Earthquake Fault Zones," around the surface traces of active faults and to issue appropriate maps. If an active fault is found, a structure for human occupancy cannot be placed over the trace of the fault and must be set back from the fault (typically 50 feet). No Holocene-active faults are known to cross the Project Site, and the Project Site is not located within an Alquist-Priolo Earthquake Fault Zone. The closest Holocene-active faults are the Reservoir Hill Fault, located approximately 0.13 miles west of the Project Site, and the Northeast Flank Fault, located approximately 2 miles northwest of the Project Site.[13] The nearest Alquist-Priolo Earthquake Fault Zone is the Long Beach Earthquake Fault Zone, located 0.05 miles west of the Project Site. Therefore, the proposed Project would not expose people or structures to adverse effects involving rupture of a known earthquake fault, and no impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.7aii Would the Project directly or indirectly cause potential substantial adverse effects, including the risks of loss, or death involving strong seismic ground shaking?

Less Than Significant. The Project Site's location in Southern California is characterized by high regional seismicity and there are numerous active faults in the region as described above. The proximity of these faults places the Project area at potential risk for seismic hazards including strong seismic ground shaking. The proposed Project would involve the adaptive reuse of an existing office building. While the Project Site is located in the highly seismic Southern California region, development in the City is required to adhere to the California Building Standards Code (California Code of Regulations, Title 24) and the Uniform Building Code (UBC), as stated in LBMC Chapter 18.68, *Earthquake Hazard Regulations*. Therefore, the proposed Project would not directly or indirectly cause potential adverse effects involving seismic ground shaking, and a less than significant impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.7aiii Would the Project directly or indirectly cause potential substantial adverse effects, including the risks of loss, or death involving seismic-related ground failure, including liquefaction?

No Impact. The Project Site's location in Southern California is characterized by high regional seismicity and there are numerous active faults in the region. The proximity of these faults places

[13] California Department of Conservation. *Alquist-Priolo Investigation Report*. Available at https://maps.conservation.ca.gov/cgs/informationwarehouse/apreports/. Accessed March 21, 2024.

the Project area at potential risk for seismic hazards including strong seismic ground shaking and soil liquefaction. However, the Project is not located within a Liquefaction zone.[14] Moreover, the proposed Project will involve the adaptive reuse of an existing building and minimal excavation will be required. The Project would be required to adhere to the California Building Standards Code (California Code of Regulations, Title 24) and the Uniform Building Code (UBC) as stated in the LBMC Chapter 18.40, *Building Code*. Therefore, the proposed Project would not directly or indirectly cause potential adverse effects involving liquefaction, and there would be no impact. This issue will not be carried for further analysis in the EIR.

4.7aiv Would the Project directly or indirectly cause potential substantial adverse effects, including the risks of loss, or death involving landslides?

No Impact. Landslides are mass movements of the ground that include rock falls, relatively shallow slumping and sliding of soil, and deeper rotational or transitional movement of soil or rock. The Project Site is neither within an Earthquake Induced Landslide Zone nor is it in a location conducive to landslides.[15] Therefore, the proposed Project would not directly or indirectly cause potential adverse effects involving landslides, and there would be no impact. This issue will not be carried forward for further analysis in the EIR.

4.7b Would the Project result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact. The proposed Project would adaptively reuse an existing building and would require minimal grading and earthwork activities. Therefore, the proposed Project would not result in substantial soil erosion or the loss of topsoil and there would be less than significant impacts. This issue will not be carried for further analysis in the EIR.

4.7c Would the Project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

No Impact. The proposed Project is not located in an active fault zone, liquefaction zone, or landslide zone. Therefore, there would be no impact associated with lateral spreading, liquefaction, or collapse if the proposed Project is located on a geologic unit or soil that is unstable. This issue will not be carried for further analysis in the EIR.

4.7d Would the Project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property?

No Impact. Expansive soils typically feature high percentages of clay with a capacity for holding large amounts of water and can frequently be identified by determining the level of soil plasticity. High levels of plasticity are associated with the ability of the soil mineral content to absorb water. A significant impact could occur if the proposed development is constructed on soils that are expansive or have high plasticity. According to the Conservation Element of the General Plan, the

[14] California Geological Survey. *California State Geoportal Seismic Hazards Program: Liquefaction Zones*. Available at https://gis.data.ca.gov/datasets/b70a766a60ad4c0688babdd47497dbad_0/explore?location=33.784407%2C-118.135003%2C17.59. Accessed March 27, 2024.

[15] California Department of Conservation. *Earthquake Zones of Required Investigation.* Available at https://maps.conservation.ca.gov/cgs/eqzapp/app/. Accessed March 21, 2024.

proposed Project is in an area composed of Tujuna fine sand, which is characterized by gray or brownish-gray loose sand.[16] Furthermore, according to **Appendix A: Phase I Environmental Site Assessment Report (ESA)** prepared by Citadel Environmental, Health, Safety, and Sustainability (EHS) on February 28, 2024, the Project Site's soils are comprised of Urban Land Thums-Windfetch Complex. Urban Land Soils are described as terraces with very high runoff; the Thums soils are described as well-drained clay loan and clay with medium runoff; and the Windfetch soils are described as well-drained loam and clay loam with low runoff.[17] Therefore, the Project would not be located on expansive soil due to the low percentages of clay. The proposed Project would adaptively reuse an existing seven-story office building; therefore, the Project would result in minimal Project construction and would not impact undeveloped areas with issues related to expansive soils. No impact would occur, and this issue will not be carried for further analysis in the EIR.

4.7e Would the Project have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

No Impact. The proposed Project's wastewater would discharge to the local sanitary sewer line for conveyance to a sewer system. Accordingly, the proposed Project would not utilize septic tanks or alternative wastewater disposal systems, and there would be no impact. Therefore, this issue will not be carried forward for further analysis in the EIR.

4.7f Would the Project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Potentially Significant Impact. Paleontological resources are the fossilized remains of organisms from prehistoric environments found in geologic strata. These resources are valued for the information they yield about the Earth's history and its past ecological settings. The potential for fossil occurrence depends on the rock type exposed at the surface in a given area. While minimal grading is associated with the proposed Project, disturbance of soil could directly or indirectly destroy a unique paleontological resource. Impacts related to paleontological resources would be potentially significant. Paleontological resources will be further analyzed in the EIR.

4.8 Greenhouse Gas Emissions

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	X			
b) Conflict with applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	X			

Impact Analysis

4.8a Would the Project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Potentially Significant Impact. The Project would include direct and indirect greenhouse gas (GHG) emissions from construction and operations. Project construction would result in direct emissions of carbon dioxide (CO_2), nitrous oxide (N_2O), and methane (CH_4) from construction equipment, the transport of materials, and construction workers traveling to and from the Project Site. Operational (long-term emissions) would occur over the life of the proposed Project. These emissions would result from activities such as vehicular traffic and operation of landscaping equipment. Operational GHG emissions would also result from indirect sources, such as off-site generation of electrical power, the energy required to convey water and wastewater, and emissions associated with solid waste, and any fugitive refrigerants from heating, ventilation, and air conditioning (HVAC) equipment. The EIR will assess the GHG emissions that would be generated by the proposed Project to determine the potential for significant impacts.

4.8b Would the Project conflict with applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Potentially Significant Impact. The proposed Project would result in direct and indirect GHG emissions with the potential to exceed thresholds that have been established in plans, policies, or regulations applicable to the Project area. The EIR will evaluate the construction and operational GHG emissions associated with the proposed Project and analyze the proposed Project's consistency with State and local regulatory requirements and regulations.

4.9 Hazards and Hazardous Materials

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	X			
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	X			
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code § 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	X			
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	X			
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?			X	

Impact Analysis

4.9a Would the Project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Potentially Significant Impact. Project construction activities could involve the transport, storage, use and/or disposal of limited quantities of hazardous materials, such as fuels, solvents, degreasers, and paints. Operation of the proposed Project could involve the use of materials associated with routine maintenance of the property, such as janitorial supplies for cleaning purposes and/or herbicides and pesticides for landscaping. The EIR will assess the potential of

the proposed Project to create a significant hazard through the transport, use, and disposal of hazardous materials.

4.9b Would the Project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Potentially Significant Impact. The Project Site is currently developed with a seven-story office building with three levels of subterranean parking, and associated landscaping. Historic tenants at the Project Site include a gasoline station from at least 1931 to 1952; a restaurant from 1953 to 1969; and a gasoline station with a car wash from 1972 to 1979. Various professional tenants have occupied the site since 1981.[18]

According to the Phase I ESA,[19] no evidence for designating the Project Site as a recognized environmental condition (REC), historical recognized environmental condition (HREC), or controlled recognized environmental condition (CREC) was found. The existing building was constructed prior to the bans of asbestos-containing building materials (ACBs), lead-based paint (LBP), and polychlorinated biphenyls (PCBs). As such, there is potential for the presence of ACBMs, LBP, or PCBs at the Project Site. Additionally, the Project Site is located within the City's Methane Gas Mitigation Zone.[20] Therefore, there is the potential for construction and operation of the proposed Project to result in upset and accident conditions involving the release of hazardous materials into the environment. This issue will be carried forward into the EIR to assess the potential impact the proposed Project.

4.9c Would the Project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Less Than Significant Impact. The closest school is the Woodrow Wilson High School, located approximately 0.45 mile southwest from the Project Site, at 4400 East 10th Street. No truck routes are located adjacent to Woodrow Wilson High School.[21] Therefore, the Project would not emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school, and impacts would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.9d Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code § 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. Government Code Section 65962.5 refers to the Hazardous Waste and Substances Site List, commonly known as the Cortese List, maintained by the California Department of Toxic Substances Control (DTSC). According to the Phase I ESA, historical uses on the proposed Project Site include a gas station, restaurant, and car wash uses.[22] Furthermore, according to the Phase

[18] Citadel EHS. (2024). Phase I Environmental Site Assessment Report Park Tower 5150 East Pacific Coast Highway Long Beach, CA.
[19] *Id.*
[20] City of Long Beach. *Methane Gas Mitigation and Oil Well Map*. Available at https://www.arcgis.com/apps/webappviewer/index.html?id=18d6b7027f8f4e99b0173eed3886a9b0. Accessed March 20, 2024.
[21] City of Long Beach. *Truck Route Map*. Available at https://www.longbeach.gov/globalassets/pw/media-library/documents/resources/general/maps-and-gis/truckroutemap_web. Accessed May 2, 2024.
[22] Citadel EHS. (2024). Phase I Environmental Site Assessment Report Park Tower 5150 East Pacific Coast Highway Long Beach, CA.

I ESA, the Project Site is not listed on the Department of Toxic Substances Control (DTSC) Cortese List. The DTSC Cortese List only lists one site in the City of Long Beach, located in the San Pedro Basin between the coast of Catalina Island and Long Beach. [23] Therefore, there would be no impacts related to hazardous materials. This issue will not be carried forward for further analysis in the EIR.

4.9e For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in a safety hazard or excessive noise for people residing or working in the project area?

Potentially Significant Impact. The nearest airport to the Project Site is Long Beach Municipal Airport, located approximately 1.60 miles north of the Project Site. As the proposed Project would be located within two miles of the Long Beach Municipal Airport, impacts would be potentially significant. This issue will be carried forward into the EIR to assess the potential impacts.

4.9f Would the Project impair implementation of or physically interfere with an emergency response plan or emergency evacuation plan?

Potentially Significant Impact. Under an emergency, any road may be used as both an emergency response route and/or an evacuation route. The City of Long Beach General Plan Public Safety Element states "It is not practical to establish firm routes of evacuation, as the areas to be affected and the possible routes to be used would vary depending upon the disaster and the street conditions at the time."[24]

Project-related construction activities could temporarily impact street access and traffic flow due to potential extension of construction activities into the rights-of-way for utility connections, resulting in temporary lane closures. Therefore, the proposed Project could potentially impact the City's adopted emergency response plan or emergency evacuation plan and further analysis is needed. This issue will be carried forward into the EIR to assess the potential impacts.

4.9g Would the Project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?

Less Than Significant Impact. According to the State of California Department of Forestry and Fire Protection (CAL FIRE) Fire Hazard Severity Zone Map, the Project Site is not located within a Very High Fire Hazard Severity Zone (VHFHSZ) for the State Responsibility Area (SRA) or the Local Responsibility Area (LRA).[25,26] The nearest VHFHSZ in the SRA is located approximately 16 miles northeast of the Project Site in Brea. The nearest VHFHSZ in the LRA map is located approximately 10 miles west of the Project Site in Rolling Hills Estates.

[23] California Department of Toxic Substances Control. *DTSC's Hazardous Waste and Substances Site List- Site Cleanup (Cortese List).* Available at https://dtsc.ca.gov/dtscs-cortese-list/. Accessed May 3, 2024.

Project design and site access would be required to adhere to the requirements of the City's Building Code, including the City's Fire Code. Accordingly, the proposed Project would not expose people or structures, either directly or indirectly, to a significance risk of loss, injury, or death involving wildland fires, and impacts would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.10 Hydrology and Water Quality

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?	X			
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the projects may impede sustainable groundwater management of the basin?	X			
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:				
(i) Result in substantial erosion or siltation on- or off-site.	X			
(ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	X			
(iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	X			
iv) Impede or redirect flood flows?	X			
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?				X
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	X			

Impact Analysis

4.10a Would the Project violate water quality or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Potentially Significant Impact. The Project Site is currently developed and improved with impervious surfaces. However, alterations to the Project Site with the additions of open space and amenity areas could alter the quantities of runoff that would be directed to the City's stormwater collection system. This runoff also has the potential to carry pollutants and sediments; therefore, further analysis in an EIR is warranted.

4.10b Would the Project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Potentially Significant Impact. The proposed Project would connect to the City's water supply, managed by the Long Beach Utilities Department. The Final Draft of the Long Beach 2020 Urban Water Management Plan indicates that the City would meet demand and maintain a water surplus through at least 2050.[27] Roughly 60 percent of the City's water is derived from groundwater with the remaining 40 percent imported from the Colorado River and the Sacramento-San Joaquin Bay Delta by the Metropolitan Water District of Southern California.[28]

Because the proposed Project would involve changes in occupants from office tenants to students and would introduce new amenity uses such as a student plaza and a pool, water demand could increase compared to existing uses. As a significant portion of the City's water is derived from groundwater, the proposed Project could potentially decrease local groundwater supplies. Therefore, the proposed Project may interfere substantially with groundwater recharge. Thus, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

4.10c Would the Project substantially alter the existing drainage pattern of the site or area, including through the alterations of the course of stream or river or through the addition of impervious surfaces, in a manner which would:

(i) Result in substantial erosion or siltation on- or off-site?

(ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

(iii) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

(iv) Impede or redirect flood flows?

Potentially Significant Impact. While the proposed Project would be required to comply with existing federal, State, and local regulations pertaining to water quality preservation and runoff reduction, which would prevent erosion, siltation, and flooding on- or off-site. However, the proposed Project could result in increased net runoff that would exceed the capacity of the existing stormwater drainage system. Therefore, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

4.10d Would the Project in flood hazard, tsunami, or seiche zones, risk release of pollutants due to Project inundation?

[27] Long Beach Water. (2020). *Final Draft 2020 Urban Water Management Plan*. Pg. ES-8. Available at https://www.lbutilities.org/files/sharedassets/utilities/v/1/about-us/documents/lbwd_uwmp2020_final_errata_revised.pdf. Accessed March 21, 2024.

[28] Long Beach Utilities. *Ground and Imported Water*. Available at https://www.lbutilities.org/water/water-sources/ground-and-imported-water. Accessed March 21, 2024.

No Impact. The Project Site is located in an area of minimal flood hazard, outside the 100-year floodplain,[29] outside the tsunami hazard area,[30] not within a dam inundation zone,[31] and is not within a seiche zone. The proposed Project would not result in a release of pollutants due to Project inundation. Accordingly, there would be no impact, and this issue will not be carried forward for further analysis in the EIR.

4.10e Would the Project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Potentially Significant Impact. As discussed in Response 4.10a and 4.10b, the proposed Project would warrant further analysis related to water quality impacts and groundwater recharge and would be further analyzed in the EIR.

4.11 Land Use Planning

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Physically divide an established community?				X
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	X			

Impact Analysis

4.11a Would the Project physically divide an established community?

No Impact. Examples of projects that could physically divide an established community include new freeways or highways that traverse an established neighborhood. The Project Site is currently in an urban setting surrounded by existing development. The proposed Project involves the adaptive reuse of an existing seven-story office building that would be adaptively reused to accommodate student housing. Therefore, the proposed Project would not physically divide an established community, and no impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.11b Would the Project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Potentially Significant Impact. The Project Site's existing General Plan Placetype is CC.[32] The CC Placetype is intended to serve automobile oriented commercial goods and services and buildings no higher than five stories or 60 feet. Residential uses are not allowed. The Placetype allows a FAR of 0.25 to 1.0.

The proposed Project proposes a General Plan Amendment from CC to NSC-Moderate Placetype which would permit residential uses. The proposed Project would also require a Zoning Code Amendment/Map Change to change the existing zone from C to MU-3 to allow for the proposed Project's student residential uses and enable the proposed Project to take advantage of the adaptive reuse development standards. Under the MU-3 zoning designation, adaptive reuse projects are exempt from established height limits and FAR limitations of the underlying zoning.[33] Given that the proposed Project includes a General Plan Amendment and Zoning Code Amendment/Map Change, the Project's consistency with applicable plans, policies, and

[32] City of Long Beach. (2019). *Land Use District Maps.* Available at https://www.longbeach.gov/lbds/planning/advance/maps/land-use-district-maps2/. Accessed March 20, 2024.
[33] City of Long Beach. *Title 22 - Transitional Zoning Code, Chapter 22.15 - Uses*. Available at https://library.municode.com/CA/long_beach/codes/municipal_code?nodeId=TIT22TRZOCO_CH22.15US. Accessed March 20, 2024.

regulations adopted to avoid or mitigate environmental effects will be further analyzed in the EIR.

4.12 Mineral Resources

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?				X

Impact Analysis

4.12a Would the Project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

4.12b Would the Project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

No Impact. The Phase I ESA prepared for the proposed Project identified an oil well located approximately 625 feet east of the Project Site that is inactive and plugged. The well was drilled to a depth of 10,280 feet in October 1945 and was abandoned by November 1945.

Per Special Report 209, *Update of Mineral Land Classification for Portland Cement Concrete-Grade Aggregate in the San Gabriel Valley Production-Consumption Region, Los Angeles County, California* (2010), the Project Site is in an area designated as Mineral Resource Zone (MRZ) 3. MRZ-3 pertains to areas of undetermined mineral resource significance. The nearest mine, the R.J. Noble Company Mine, is an open pit sand and gravel mine approximately 16 miles east of the Project Site. The mine is currently idle and under reclamation.[34]

Mining or mineral extraction has not historically occurred on the Project Site. The proposed Project would not result in the loss of availability of a known mineral resource of value to the region and the residents of the state, nor would it result in the loss of availability of a locally important mineral resource recovery site and there would be no impact. This issue will not be carried forward for further analysis in the EIR.

[34] California Department of Conservation Division of Mine Reclamation. *Mines Online*. Available at https://maps.conservation.ca.gov/mol/index.html. Accessed March 18, 2024.

4.13 Noise

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	X			
b) Generate of excessive ground borne vibration or groundborne noise levels?	X			
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	X			

Impact Analysis

4.13a Would the Project result in generation a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Potentially Significant Impact. The Project Site is an urbanized area and is currently exposed to various noise sources. Existing mobile noise sources include vehicle traffic on surrounding roadways. The primary sources of stationary noise near the Project Site, including nearby residential noise and parking lot noise at the nearby office and commercial buildings, mechanical equipment (e.g., HVAC units), and other urban-related activities (e.g., idling cars/trucks, pedestrians, car radios and music playing, dogs barking, etc.).

Construction activities would include building interior and pavement demolition, pool construction, interior building construction, and architectural coating. Noise generated by construction equipment, including earth movers, material handlers, and portable generators, can reach high levels. The primary new noise sources associated with operation of the proposed Project would be noise from amenity areas such as the pool and lounge area and mobile traffic noise. As such, the proposed Project would have the potential to result in generation of substantial noise levels in excess of established standards. The EIR will describe the existing ambient noise levels and local noise policies and ordinances applicable to the Project Site, and to assess the proposed Project's impact potential, the EIR will quantify the potential noise levels associated with Project construction and operational activities.

4.13b Would the Project generate excessive groundborne vibration or groundborne noise levels?

Potentially Significant Impact. While it is not anticipated that Project operations would generate excessive groundborne vibration, construction would have the potential to result in varying degrees of temporary groundborne vibration, depending on the specific construction equipment used and the operations involved. The potential vibration levels associated with construction and operation of the proposed Project will be identified in the EIR for comparison to applicable standards and thresholds.

4.13c Would the Project be located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project expose people residing or working in the project area to excessive noise levels?

Potentially Significant Impact. There are no private airstrips in the vicinity of the Project Site. The nearest airport to the Project Site is Long Beach Municipal Airport, located approximately 1.60 miles north of the Project Site. As the Project Site is located within two miles of the Long Beach Municipal Airport, impacts related to airport noise could be potentially significant. The EIR will further evaluate impacts related to airport noise.

4.14 Population and Housing

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	X			
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X

Impact Analysis

4.14a Would the Project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Potentially Significant Impact. The proposed Project proposes to retrofit an existing seven-story office building to add new student residential uses that would include 593 beds. Therefore, there is potential that the new student residential uses could induce substantial population growth in the City, and this impact would be potentially significant. The EIR would further evaluate population growth associated with the proposed Project.

4.14b Would the Project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. The proposed Project would not displace existing housing or require construction of replacement housing elsewhere as no housing is currently located on the Project Site. Therefore, no impact would occur. This issue will not be carried forward for further analysis in the EIR.

4.15 Public Services

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?			X	
b) Police protection?			X	
c) Schools?			X	
d) Parks?			X	
e) Other public facilities?			X	

Impact Analysis

4.15a Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for fire protection?

Less Than Significant Impact. The City of Long Beach Fire Department (LBFD) operates 23 fire stations throughout the City. Three fire stations are located within 1 mile of the Project Site: LBFD Station 4 at 411 Loma Avenue LBFD Station 14 at 5200 East Elliot Street, and LBFD Station 17 at 2247 Argonne Avenue, located approximately 1.2 miles southwest, 0.95-mile south, and 1.2 miles southwest of the Project Site, respectively.

The LBFD responded to approximately 80,000 calls in 2022. In February 2022, the latest month for which data was available, the LBFD made 4,981 calls; however, 4,180 (84 percent) of those calls were for medical service, and 587 (12 percent) of calls made for fire protection.[35] In fiscal year 2022, the LBFD arrived on scene within six minutes for approximately 33.8 percent of emergency calls.[36]

The proposed Project would adaptively reuse an existing seven-story office building and introduce housing for students which could incrementally increase demand for fire protection services. Therefore, there is potential for an increase in service calls to the LBFD due to an increase in student residents on the Project Site. However, according to LBMC Section 18.16.050,

[35] City of Long Beach. (2022). *Fire Department Calls for Service, February 2022*. Available at https://www.longbeach.gov/globalassets/fire/media-library/documents/news/calls-for-service-february2022-combined. Accessed March 20, 2024.

[36] City of Long Beach. (2023). *Fiscal Year 2022 Annual Report*. Available at https://www.longbeach.gov/globalassets/finance/media-library/documents/city-budget-and-finances/accounting/comprehensive-annual-financial-report/fiscal-year-2022-annual-report. Accessed March 20, 2024.

Fire Facilities Impact Fee, all residential and nonresidential developments would be required to pay a Fire Facilities Impact Fee to support a potential for an increase in need for fire protection services. Impacts associated with fire protection services would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.15b Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for police protection?

Less Than Significant Impact. The City of Long Beach Police Department (LBPD) operates four patrol division stations: North, East, South, and West Patrol Division stations. The East Patrol Division Station is located at 3800 East Willow Street, approximately 1.5 miles northwest of the Project Site.

In 2022, the LBPD responded to approximately 210,000 service calls. Patrol officers respond to calls for service and emergencies. Call types range from Priority 1 calls such as shootings and violent crime to Priority 3 such as nonviolent 991 calls that are primarily requests for a crime report.[37] The average response time for Priority One calls was 5.1 minutes.[38] The proposed Project would adaptively reuse an existing office building into new student residential uses that would include 593 beds which could incrementally increase demand for fire protection services. However, all new residential and nonresidential developments would be required to comply with LBMC Section 18.15.060, *Fire Facilities Impact Fee,* and pay a Police Facilities Impact Fee to support a potential for an increase in need for police protection services. Impacts associated with police protection services would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.15c Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for schools?

Less Than Significant Impact. The Project Site is within the boundaries of the Long Beach Unified School District (LBUSD), which serves public school needs for the City of Long Beach, as well as the cities of Signal Hill, Lakewood, and Avalon on Catalina Island. The LBUSD operates 84 schools and serves 65,500 students.[39] Furthermore, under the provision of SB 50, school districts are authorized to collect fees to offset the costs associated with increasing school capacity as a result of development and related population increases; therefore, impacts associated with schools

[37] City of Long Beach. *Police Department Overview*. Pg. 4-7. Available at https://www.longbeach.gov/globalassets/finance/media-library/documents/city-budget-and-finances/budget/budget-documents/fy-21-adopted-budget/29-police. Accessed May 7, 2024.
[38] City of Long Beach Police Department. (2023). *2022 Year in Review.* Available at https://www.longbeach.gov/globalassets/police/media-library/documents/about-the-lbpd/year-in-review/2022-lbpd-year-in-review. Accessed May 3, 2024.
[39] City of Long Beach Unified School District (LBUSD). *About.* Available at https://www.lbschools.net/about/about-long-beach-unified-school-district. Accessed May 3, 2024.

would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.15d Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for parks?

Less Than Significant Impact. The City operates 169 parks, 26 community centers, 2 tennis centers, 5 municipal golf courses, a public marina, and 6 miles of public beach. The closest park to the Project Site is the Los Altos Plaza Playground, located approximately 0.8 mile east of the Project Site. The Recreation Park Golf Course 18 is located 85 feet south of the Project Site. The Project would adaptively reuse an existing seven-story office building and provide housing for students enrolled in CSULB. The Project would incorporate 22,523 sf of open space, that would include a student plaza, benches, lounging areas, pool, patio, outdoor BBQs and picnic tables, lawn area, shade structure, planters, and landscaping. Students residing on the Project Site would likely primarily utilize the amenities on-site or amenities on-campus. Additionally, the proposed Project would be required to comply with LBMC Section 18.18.180, *Park Fee as Additional and Supplemental Requirements,* which requires that all residential and nonresidential development projects pay a proportionate share of the cost of providing park land and recreational improvements necessary to meet the needs created by such development. Therefore, impacts related to new of physically altered governmental facilities would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.15e Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physical altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for other public facilities?

Less Than Significant Impact. Other public facilities typically pertain to services such as public libraries. The City of Long Beach Public Library operates twelve libraries throughout the City.[40] The closest library to the Project Site is the Brewitt Neighborhood Library, located approximately 0.6-mile to the west of the Project Site. The introduction of new student residents could result in impacts to the provision of new of physically altered libraries. However, student residents would also have access to CSULB's resources, which include a modern six-story library with a seating capacity near 4,000. Impacts related to public libraries would result in less than significant impacts. This issue will not be carried forward for further analysis in the EIR.

[40] City of Long Beach. *Long Beach Public Library Locations.* Available at https://www.longbeach.gov/library/visit/locations/. Accessed May 3, 2024.

4.16 Recreation

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?			X	

Impact Analysis

4.16a Would the Project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

4.16b Does the Project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

Less Than Significant Impact The proposed Project would adaptively reuse an existing seven-story building and provide 149 residential suites with 593 beds for students. Therefore, the proposed Project would introduce new student residents to the City. As discussed in 4.15d, Students residing on the Project Site would likely primarily utilize the recreational amenities on-site or amenities on-campus. Furthermore, LBMC Section 18.18.180, *Park Fee as Additional and Supplemental Requirements,* requires that all residential and nonresidential development projects pay a proportionate share of the cost of providing park land and recreational improvements necessary to meet the needs created by such development. Therefore, the proposed Project would be required to pay the park impact fee. Therefore, impacts to recreational facilities would have a less than significant impact. This issue will not be carried forward for further analysis in the EIR.

4.17 Transportation

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycles, and pedestrian facilities?	X			
b) Conflict or be inconsistent with CEQA Guidelines § 15064.3, subdivision (b)?			X	
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (for example, farm equipment)?				X
d) Result in inadequate emergency access?			X	

Impact Analysis

4.17a Would the Project conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?

Potentially Significant Impact. The proposed Project is an adaptive reuse of an existing seven-story office building into student housing with 149 residential suites that would include 593 beds.

Project construction has the potential to affect the transportation system through the hauling of excavated materials and debris, the transport of construction equipment, the delivery of construction materials, and travel by construction workers to and from the Project Site. During Project operation, the proposed Project may generate increased vehicle, bicycle, pedestrian, and transit trips, resulting in an increase in the use of the Project area's transportation facilities. As such, the proposed Project could potentially conflict with an applicable program plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities, and impacts could be potentially significant. This issue will be further analyzed in the EIR.

4.17b Would the Project conflict or be inconsistent with CEQA Guidelines § 15064.3, subdivision (b)?

Less Than Significant Impact. CEQA Guidelines Section 15064.3(b) provides regulations on determining the significance of transportation impacts. As analyzed in **Appendix B: Trip Generation Analysis and Vehicle Miles Traveled Screening**, the City of Long Beach's Transportation Thresholds of Significance Guide (May 2020) provides screening criteria to identify when a project should be expected to cause a less than significant impact without conducting a Vehicle Miles Traveled (VMT) analysis. Based on the City's guidelines, the assumption of a less than significant impact can be made for the following types of projects: projects within a transit priority area (within 0.5 miles of a transit station and 15 minutes or less

service frequency during peak hours), residential or office developments located in areas with low VMT with similar characteristics to the surrounding developments. As the Project falls within a Transit Priority Area (TPA) and a low VMT/capita area, VMT impacts would be less than significant.

Compared to the existing use, the Project is anticipated to generate 507 daily trips, 112 fewer trips during the weekday AM peak hour, and 3 trips during the weekday PM peak hour. The City of Long Beach Traffic Impact Analysis Guidelines (June 2020) states that a traffic impact study is generally required "for any project in Long Beach that is expected to generate 500 or more net new daily trips." Based on the City's traffic study guidelines, a traffic study would be needed if the project generates more than 500 net daily trips. However, it should be noted that the Project generates less than 50 total net new peak hour trips (the City's threshold to analyze LOS at intersections).[41] Therefore, a traffic impact study is not required for the Project. Impacts would be less than significant, and this issue will not be carried forward for further analysis in the EIR.

4.17c Would the Project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

No Impact. There is an existing driveway located on Clark Avenue that provides a two-way driveway for ingress and egress into the Project Site. The existing driveway would be maintained and would continue to provide access to the three levels of subterranean parking. As required by the LBMC, internal drive aisles would accommodate standard fire lane turning radiuses and hammerhead turnaround maneuvers design for emergency vehicles and fire services. The proposed Project driveway and internal drive aisle configuration would be constructed pursuant to LBFD standards, and the proposed Project would not require any off-site roadway improvements.

Because of the nature of the proposed land use, the proposed Project does not include the use of any incompatible vehicles or equipment on the Project Site. The proposed Project would not increase hazards to the public due to incompatible use; the student residential uses proposed by the Project are compatible with surrounding land uses. All on-site improvements would also be constructed as approved by the City of Long Beach Public Works Department. Sight distance at the Project driveway would be subject to compliance with applicable American Association of State Highway and Transportation Officials (AASHTO) Section 9.5.2: Sight Triangles sight distance standards. Therefore, no impacts would occur, and this issue will not be carried forward for further analysis in the EIR.

4.17d Would the Project result in inadequate emergency access?

Less Than Significant Impact. Emergency access is determined by the number of private and public access points, the width of the access point, and internal roadways serving a project site. As discussed above, primary vehicular access to the Project Site would be provided via a two-way driveway from Clark Avenue at the Project Site's western boundary. Pedestrian access to the

[41] Kimley-Horn. (2024). Trip Generation Analysis and Vehicle Miles Traveled Screening.

Project Site is provided via sidewalks located along Pacific Coast Highway, East Anaheim Street, and Clark Avenue. Project Site design, including automobile and pedestrian access would comply with the City's design standards and other requirements as established in the LBMC. The Project plans are subject to site and design review and the LBFD would review the site plan prior to the approval of permits for construction of the proposed Project to ensure that adequate emergency access is provided. Accordingly, the proposed Project would not result in inadequate emergency access and any impacts would be less than significant. This issue will not be carried forward for further analysis in the EIR.

4.18 Tribal Cultural Resources

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code § 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is				
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code § 5020.1(k); or	X			
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code § 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code § 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	X			

Impact Analysis

4.18ai Would the Project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code § 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code § 5020.1(k); or

4.18aii Would the Project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code § 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is a resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code § 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code § 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe?

Potentially Significant Impact. Chapter 532 Statutes of 2014 (AB 52) requires that lead agencies evaluate a project's potential impact on "tribal cultural resources," which include "[s]ites, features, places, cultural landscapes, sacred places, and objects with cultural value to a California Native American tribe that are eligible for inclusion in the California Register of Historical Resources or included in a local register of historical resources." AB 52 also gives lead agencies the discretion to determine, based on substantial evidence, whether a resource qualifies as a "tribal cultural resource."

There is a potential for the proposed Project to affect tribal cultural resources during ground-disturbing activities associated with construction of the proposed Project. The EIR will evaluate potential impacts to tribal cultural resources and incorporate the results of AB 52 consultation into the analysis.

4.19 Utilities and Service Systems

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	X			
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	X			
c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project projected demand in addition to the provider's existing commitments?	X			
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	X			
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	X			

Impact Analysis

4.19a Would the Project require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

i) Water

Potentially Significant Impact. Water service for the Project Site would be provided by Long Beach Utilities. Long Beach Utilities serves nearly 500,000 customers with a potable water system consisting of 910 miles of transmissions and distribution pipeline and over 93,000 service connections.[42] The only water infrastructure improvements required by the proposed Project would be onsite pipelines and connection units to the City's existing water infrastructure. However, due to introduction of student residential land uses on the Project Site, the Project may

[42] City of Long Beach Water Department. *Capital Improvement Plan Fiscal Year 2023*. Available at https://www.lbutilities.org/files/sharedassets/utilities/v/1/about-us/documents/23_cip-final.pdf. Accessed March 21, 2024.

result in an increase of water demand such that new, relocated, or water service lines would be required to service the Project Site. Therefore, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

ii) Wastewater Treatment

Potentially Significant Impact. The sanitary sewer system for the Project Site is owned and operated by Long Beach Utilities and serves the entire City with the exception of the Port of Long Beach. The majority of the City's wastewater is sent to the Joint Water Pollution Control Plant in the city of Carson. The remaining portion of the City's wastewater is sent to the Long Beach Water Reclamation Plant. Both facilities are owned and operated by the Los Angeles County Sanitation Districts.

Due to introduction of student residential land uses on the Project Site, the Project Site could increase the generation of wastewater. Such an increase could potentially exceed wastewater treatment capabilities. Therefore, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

iii) Stormwater Drainage

Potentially Significant Impact. The Project would be required to comply with the Los Angeles County Department of Public Works Low Impact Development Standards Manual and implement Best Management Practices (BMPs) to reduce runoff. Due to introduction of student residential land uses on the Project Site, the Project may increase stormwater runoff such that new, relocated, or altered stormwater drainage systems would be required to service the Project Site. Therefore, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

iv) Electric Power, Natural Gas, and Telecommunications

Potentially Significant Impact. Project operations would require electric and natural gas uses. Additionally, the proposed Project would require connection to local telecommunications services. Because the proposed Project would increase the intensity of development within the Project Site compared to existing conditions, the proposed Project's demand for electric power, natural gas, and telecommunications would be greater than under existing conditions. Therefore, new facilities may be required to provide these services to the Project Site, the construction of which would be potentially significant, and this issue will be further analyzed in the EIR.

4.19b Would the Project have sufficient water supplies available to serve the Project and reasonably foreseeable future development during normal, dry and multiple dry years?

Potentially Significant Impact. The proposed Project would be serviced by the Long Beach Utilities Department. Due to introduction of student residential land uses on the Project Site conditions, the proposed Project could increase on-site water use. Such an increase could potentially exceed local supplies, which would be potentially significant. Therefore, this issue will be further analyzed in the EIR.

4.19c Would the Project result in a determination by the wastewater treatment provider which serves or may serve the project that it does not have adequate capacity to serve the project projected demand in addition to the provider's existing commitments?

Potentially Significant Impact. As discussed in Response 4.19aii, a majority of the City's wastewater is delivered to the Joint Water Pollution Control Plant, and the remaining portion is delivered to the Long Beach Water Reclamation Plant.

The proposed Project would result in new residential development on the Project Site which could increase the generation of wastewater. Such an increase could potentially exceed wastewater treatment capabilities. Therefore, impacts would be potentially significant, and this issue will be further analyzed in the EIR.

4.19d Would the Project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

4.19e Would the Project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Potentially Significant Impact. The City of Long Beach Environmental Services Bureau is responsible for managing solid waste disposal and recycling in the City. The City contracts with Waste Management for recycling collection services. In the City, solid waste, excluding recyclables, is diverted to one of the County's several landfills or to the Southeast Resource Recovery Facility (SERRF) to be incinerated and used in the production of energy.

The proposed Project would be required to comply with federal, State, and local statutes and regulations related to solid waste and recycling, such as AB 939, through participation in existing City waste diversion programs, such as the City's Construction and Debris Recycling Program.

The proposed Project would result in new residential development on the Project Site. Therefore, the Project could potentially increase the amount of solid waste generated within the Project Site compared to existing conditions. This increase could exceed, or contribute to an exceedance of, the capacity of solid waste disposal facilities serving the proposed Project Site. Impacts would be potentially significant, and this issue will be further analyzed in the EIR.

4.20 Wildfire

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?				X
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?				X
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				X
+d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				X

Impact Analysis

4.20a Would the Project substantially impair an adopted emergency response plan or emergency evacuation plan?

4.20b Would the Project, due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

4.20c Would the Project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

4.20d Would the Project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. As stated in Response 4.9g, the Project Site is not located within a VHFHSZ in either the SRA or an LRA. The nearest VHFHSZ in the SRA is located approximately 16 miles northeast of the Project Site in Brea. The nearest VHFHSZ in the LRA map is located approximately 10 miles west of the Project Site in Rolling Hills Estates. The proposed Project is located in a well-developed highly urbanized area not susceptible to wildfires, and would not impair an adopted wildfire emergency response plan or emergency evacuation plan. Project design and site access

would be required to adhere to the requirements of the LBFD's regulations and the City's Building Code, including the City's Fire Code. Infrastructure associated with proposed Project would not exacerbate wildfire risk and the Project would not be located in an area with potential to expose occupants to, pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire, nor would the proposed Project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes. Accordingly, the proposed Project would not result in wildfire impacts. No impact would occur, and this issue will not be carried forward for further analysis in the EIR.

4.21 Mandatory Findings of Significance

Environmental Issue	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
Does the Project:				
a) Have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	X			
b) Have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects.)	X			
c) Have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	X			

Impact Analysis

4.21a Does the Project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

Potentially Significant Impact. The proposed Project has potentially significant impacts associated with air quality, cultural resources, energy, geology and soils, GHG emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, transportation, tribal cultural resources, and utilities and service systems. These potentially significant impacts have the potential to substantially degrade the quality of the environment and will be discussed in detail in the EIR.

As discussed in Section 4.4, *Biological Resources*, the proposed Project would not substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, nor substantially

reduce or restrict the range of a rare or endangered plant or animal. Impacts to Biological Resources would be less than significant.

As discussed in Section 4.5, *Cultural Resources*, the proposed Project would not impact the significance of a historical resource. However, minimal excavation activities associated with the proposed Project could uncover previously known or unknown archaeological resources, or unknown buried resources. These potentially significant impacts could affect important examples of California prehistory and will be discussed in detail in the EIR.

4.21b Does the Project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects.)

Potentially Significant Impact. The proposed Project has potentially significant impacts associated with air quality, cultural resources, energy, geology and soils, GHG emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, transportation, tribal cultural resources, and utilities and service systems. These potentially significant impacts could contribute to cumulative impacts on the Project Site and in the surrounding areas. Accordingly, the potential for the proposed Project to contribute to significant cumulative impacts will be studied in the EIR.

4.21c Does the Project have environmental effects which will cause substantial adverse effects on human beings, directly or indirectly?

Potentially Significant Impact. As discussed in this Initial Study, the proposed Project has potentially significant environmental impacts associated with air quality, cultural resources, energy, geology and soils, GHG emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, noise, population and housing, transportation, tribal cultural resources, and utilities and service systems. These impacts would have the potential to cause substantial direct or indirect adverse effects on human beings. Accordingly, the potential for the proposed Project to cause substantial adverse effects on human beings will be studied in the EIR.

Re: CITADEL Project No. 0503.1009.0
Phase I Environmental Site Assessment Report
Park Tower
5150 East Pacific Coast Highway
Long Beach, California 90804

Dear Ms. Rous:

Enclosed please find Citadel EHS's Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for Kimley-Horn and Associates, Inc., in accordance with Citadel's Proposal 0503.1009.P, dated February 21, 2023, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely,
CITADEL EHS

Mark Drollinger, M.Eng., CSP
Principal, Engineering and Environmental Sciences

Citadel EHS (Citadel) was contracted by Kimley-Horn and Associates, Inc. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Park Tower property located at 5150 East Pacific Coast Highway, in the City of Long Beach, Los Angeles County, California; hereinafter referred to as the "Site."

[1] Such surveys and sampling are recommended to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

Current Site Conditions

The Site consists of one seven-story commercial office structure of approximately 120,000 square feet (SF) with three subterranean parking levels, a surface parking lot, and associated landscaping. Access to the Site parking areas is along the west boundary of the Site on Clark Avenue. At the time of the Site reconnaissance, the Site was occupied by various professional office tenants.

Stationary equipment at the Site includes three cable-traction elevators, a 15,000-gallon underground water storage tank, hot water heaters, compressors, a cooling tower, dry-type transformers, a fire pump, and a sump. In general, the Site appeared to be well maintained. Carbon monoxide monitors are located throughout the subterranean parking levels.

Site History

A review of historical sources showed that the Site was undeveloped as early as 1896 until at least 1925, with the development of a small structure in the north portion of the Site and a small structure in the south portion of the Site. Permits reviewed indicated the development of a gasoline station at the Site in 1935; based on the 1947 aerial photograph, this structure likely replaced the previously identified structure in the southeast portion of the Site. The previously identified structure in the north portion of the Site appeared to have been demolished by 1947. The gasoline station appeared to have been demolished by 1952. A permit to construct a new restaurant at the Site was issued in 1953; the permit indicated that no existing structures were on-Site at that time. The restaurant appeared to have been demolished and replaced with several commercial structures by 1976. According to the 1979 demolition permit, these structures included a gasoline station, three canopies, and a car wash. The current Site structure was built in 1981.

Historic tenants at the Site included a gasoline station from at least 1931 to 1952; a restaurant from 1953 to 1969; and a gasoline station with a car wash from 1972 to 1979. Various professional office tenants have occupied the Site since 1981.

The historic occupancy of the Site as a gasoline station from 1931 to 1952 and a gasoline station with a car wash from 1972 to 1979 may represent an environmental concern. However, based on the redevelopment of the Site with three subterranean parking levels, the historic occupancies of gasoline stations at the Site are not likely to represent a significant environmental concern.

Environmental Databases

The Site was identified on numerous environmental databases due to being a hazardous waste generator in 1999, 2013, 2017, and 2020. No violations were identified on these databases. The Site was identified on the HAZNET database for generating the following hazardous waste:

- Off-specification, aged, or surplus organics in 2016, 2018, 2020, and 2021
- Liquids with pH less than or equal to two in 2020
- Other organic solids in 2020 and 2021

The Site was also identified on the Emergency Response Notification System (ERNS) and the California Hazardous Material Incident Report System (CHMIRS) on April 7, 2007, for the release of dirt and dust from the roof that washed down with a non-butyl based soap into the storm drain due to operator error. The cleanup was completed by Infiniti Environmental. No further cleanup was required. The appearance of the Site on these databases reflects proper disposal of hazardous waste. Based on a lack of violations and that the release of dirt, dust, and soap was cleaned up, these listings are not considered to represent a significant environmental concern.

The Site was also identified on Environmental Data Resources, Inc.'s (EDR) Historical Gas Station database in 1931, 1939, and 1948; EDR's Historical Dry Cleaner database in 1976; and the Long Beach UST database with potential historic Site addresses. The historical dry cleaner listing referenced a car wash facility and no underground storage tanks (USTs) were listed on the Long Beach UST database. Based on these listings and review of historic sources, the first gasoline station was on-Site prior to 1931; the second gasoline station likely replaced the former gasoline station in 1935 and operated until 1952. The third gasoline station with a car wash facility operated from 1972 to 1979, prior to the development of the current Site structure in 1981. Based on the UST listing indicating no tanks and that the Site consists of three subterranean parking levels, the historic occupancies of gasoline stations at the Site are not likely to represent a significant environmental concern.

Vapor Encroachment Conditions

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Nearby LUST facilities include the following:

- City of Long Beach, located at 5000 East Anaheim Street, is listed as a LUST facility. According to EDR, the property is approximately 414 feet west-southwest and cross-gradient of the Site and the gasoline leak impacting soil only was reported in December 1989. The case was completed and closed by the Los Angeles Regional Water Quality Control Board (LARWQCB) on July 22, 1996. This property is not expected to represent a significant environmental concern to the Site.
- Former Shell Station, located at 5095 East Pacific Coast Highway, is listed as a LUST facility. According to EDR, the property is approximately 320 feet north-northwest and downgradient of the Site and the gasoline leak was discovered in 1993. Remedial actions included free product removal in 1993, soil vapor extraction (SVE) from 1993 to 1995, removal of the USTs and soil excavation in 2002, dual phase extraction in 2015, and potassium sulfate injection from 2019 to 2021. The nearest groundwater monitoring well is located approximately 20 feet west of the Site and serves as the off-site upgradient monitoring well. The most recent groundwater monitoring data for this well was in June 2022, and contaminants were not detected above laboratory reporting limits, with the exception of total petroleum hydrocarbon as diesel (TPH), which was detected at 73 micrograms per liter (µg/L). The LUST facility is currently eligible for case closure as of May 12, 2023. Based on regulatory oversight and that the case is currently eligible for closure, this LUST facility is not expected to represent a significant environmental concern to the Site.

One property was identified as within 365 feet and cross-gradient of the Site on the Historical Gas Station database. This property, located 279 feet west-southwest of the Site, is not likely to have adversely affected the Site. No properties were identified as within 0.125-mile and upgradient of the Site on the Historical Dry Cleaners database.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the

environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

NON-ASTM SCOPE CONSIDERATIONS

The current Site building was constructed prior to bans using asbestos-containing building materials (ACBMs), lead-based paint (LBP), and polychlorinated biphenyls (PCBs) in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

The Site is located within the City of Long Beach Methane Gas Mitigation Zone recognized by the Long Beach Department of Development Services. For sites within the Methane Gas Mitigation Zone, the Long Beach Department of Development Services, through Chapter 18.79 of the Long Beach Building Code, requires that subsurface soil vapor sampling for methane be conducted prior to any new development.

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately

0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 15 tests were performed within the 90804 zip code for the presence of radon. Of these, one test was found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

A potable well was not observed on-Site and the Site does not lie within a known or potential flood zone or wetlands.

ESA SHELF LIFE

Date of ESA Report: February 28, 2024

Date of Site Inspection: January 24, 2024

Date Interview was performed: January 24, 2024

Date Records Review was performed: January 10, 2024

Date Lien Search was performed: January 11, 2024

1.0 INTRODUCTION

Citadel EHS (Citadel) was contracted by Kimley-Horn and Associates, Inc. (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the Park Tower property located at 5150 East Pacific Coast Highway, in the City of Long Beach, Los Angeles County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, are Kimley-Horn and Associates, Inc. and City of Long Beach.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by Kimley-Horn and Associates, Inc. and City of Long Beach. Citadel recognizes that this report is to be used exclusively by Kimley-Horn and Associates, Inc., City of Long Beach, and their successors, lenders, and assigns. It is a report upon which Kimley-Horn and Associates, Inc., City of Long Beach, and their successors, lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of Kimley-Horn and Associates, Inc., City of Long Beach, their lenders and assigns (Client) solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.

- Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.

- Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

- Consulted with appropriate governmental agencies having jurisdiction relative to past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.

- Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The triangular-shaped Site is located approximately 0.65 mile north of Colorado Lagoon and 1.33 miles south of the Interstate 405 Freeway, locally referred to as the San Diego Freeway. The Site is bounded by East Pacific Coast Highway to the northeast; East Anaheim Street to the south; and Clark Avenue to the west. North Greenbrier Road is located approximately 25 feet northeast of Pacific Coast Highway; however, properties along North Greenbrier Road are identified with Pacific Coast Highway as the address. The general Site vicinity is occupied by single and multi-family residential properties with commercial/retail properties along East Pacific Coast Highway.

According to the U.S. Geological Survey (USGS) Long Beach Quadrangle (7.5 Minute Series), dated 2012, the Site is at an elevation of approximately 55 feet above mean sea level (AMSL) and appears to slope to the west-northwest. The Site is located at approximate coordinates of 33° 46' 58.73" North Latitude and 118° 8' 1.21" West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of Los Angeles' Assessor's Parcel Maps, the Site is comprised of one parcel legally identified as Assessor's Parcel Number (APN) 7220-018-009. The Site encompasses approximately 1.17 acres of land.

The Site consists of one seven-story commercial office structure of approximately 120,000 square feet (SF) with three subterranean parking levels, a surface parking lot, and associated landscaping. Access to the Site parking areas is along the west boundary of the Site on Clark Avenue. At the time of the Site reconnaissance, the Site was occupied by various professional office tenants.

Stationary equipment at the Site includes three cable-traction elevators, a 15,000-gallon underground water storage tank, hot water heaters, compressors, a cooling tower, dry-type

transformers, a fire pump, and a sump. In general, the Site appeared to be well maintained. Carbon monoxide monitors are located throughout the subterranean parking levels.

A Site Plan is included as Figure 2 in Appendix A. Select photographs of the Site and vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

The immediately surrounding properties of the Site consist of the following:

Direction from Site	Address – Tenant/Use
North	5103 East Pacific Coast Highway – 7-Eleven, a convenience store 5105 East Pacific Coast Highway – Knead Donuts and Tea, a donut shop 5107 East Pacific Coast Highway – United States Pro Scooters, a skate shop 5109 East Pacific Coast Highway – Holé Molé, a restaurant
East	5155 East Pacific Coast Highway – International City Masonic Center, a banquet hall 5175 East Pacific Coast Highway – Four-story multi-tenant commercial structure 5199 East Pacific Coast Highway – Seven-story multi-tenant commercial structure
South	5001 Deukmejian Drive – Recreation Park 18 Golf Course
West	5096 East Pacific Coast Highway – The Crooked Duck, a restaurant 1326, 1332, 1340, 1346, 1354 Granada Avenue – Single-family residences 5101 East Anaheim Street – Multi-family residence

2.4 UTILITIES

Electrical service is supplied to the Site by Southern California Edison. Gas service is supplied by City of Long Beach. General rubbish (non-hazardous) is removed from the Site on a regular basis by a contracted waste hauler.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the North American Datum (NAD) of 1983, the Site is at an elevation of approximately 55 feet AMSL.

The Site is identified on the geologic map of the Long Beach quadrangle, California (Saucedo, Greene, Kennedy, and Bezore, 2016) as being Pleistocene aged old shallow marine deposits on wave-cut surface (Qom). The deposits are described as poorly sorted, moderately permeable, reddish-brown, interfingered strandline, beach, estuarine and colluvial deposits composed of siltstone, sandstone, and conglomerate. The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Urban Land-Thums-Windfetch complex. The Urban Land soils are described as terraces landform with very high runoff; the Thums soils are described as well-drained clay loam and clay with medium runoff; and the Windfetch soils are described as well-drained loam and clay loam with low runoff.

USGS Topographic Map	Long Beach Quadrangle
Groundwater Basin	Coastal Plain of Los Angeles Groundwater Basin – Central Subbasin
Nearest Surface Water to Site	Bouton Creek Channel, approximately 0.33 mile north of the Site

Gradient Direction (Source)	North (GeoTracker/Wayne Perry, Inc., 2022)
Estimated Depth to Groundwater (Source)	49.39 feet below ground surface (bgs), approximately 20 feet west of the Site (GeoTracker/Wayne Perry, Inc., 2022)
Nearest Wetland to Site (Source)	Riverine, approximately 0.21 mile southwest of the Site (National Wetlands Inventory)
Nearest 100 or 500-year Flood Zone	500-year flood zone, approximately 0.26 mile northwest of the Site (Federal Emergency Management Agency)

4.0 SITE RECONNAISSANCE

Citadel representative Ms. Shirley Lee conducted the Phase I ESA reconnaissance on January 24, 2024. Ms. Lee was accompanied by Mr. Chad Mast, the Chief Engineer for the Site, and Mr. Garrett Butler, the Building Engineer for the Site. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Mr. Mark Drollinger reviewed this Phase I ESA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 SITE RECONNAISSANCE FINDINGS

Yes	No	Observation
	X	Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)
X		Identified Hazardous Materials
X		Polychlorinated Biphenyls (PCBs) – Electric or Mechanical Equipment Likely to Contain Fluids
X		Radioactive Man-Made Materials
	X	Pits, Ponds, and Lagoons
	X	Septic Tanks and Cesspools
X		Wells, Cisterns, Sumps, and Drains
	X	Wastewater or Grease Interceptors
	X	Interior Stains or Corrosion
	X	Strong, Pungent, or Noxious Odors
	X	Pools of Liquid
	X	Stained Soil or Pavement
	X	Stressed Vegetation
X		Other

The above-identified observed items are further discussed below.

IDENTIFIED HAZARDOUS MATERIALS

Hazardous Material (size/quantity)	Location	Secondary Containment	Staining/Leaks	SDS
Cooling Water Treatment (55-gallon container	Roof	Yes	None identified	No

Routine janitorial and maintenance supplies were observed in containers sized for commercial use and properly stored in a storage room on Level P1 with no signs of staining or leaking. The hazardous materials observed are not expected to represent a significant environmental concern.

POLYCHLORINATED BIPHENYLS

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of PCB-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

No pad or pole-mounted transformers were observed at the Site. Three cable-traction elevators were observed on the roof of the Site building. The elevators are maintained by Schindler Elevators on a monthly basis. The observed equipment appeared to be in working order with no signs of staining or leaking. The equipment observed is not expected to represent a significant environmental concern.

RADIOACTIVE MAN-MADE MATERIALS

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. While these do not constitute a recognized environmental condition, the exit signs must be properly identified to ensure proper handling and disposal practices.

WELLS, CISTERNS, SUMPS, AND DRAINS

A sump was observed on Level P3 at the Site. According to Mr. Mast and Mr. Butler, the stormwater runoff water collected in the sump is pumped and discharged to the street. Additionally, mop sinks were located within the Site building. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for water runoff, the presence of the sump and drains is not expected to represent a significant environmental concern.

OTHER

One 15,000-gallon underground water storage tank is located in the southwest portion of the Site by the Site structure. The storage tank contained emergency water and is maintained on an annual basis. The underground water storage tank is not expected to represent a significant environmental concern.

4.2 NON-ASTM SERVICES

ASBESTOS CONTAINING MATERIALS

The EPA issued a final rule under Section 6 of Toxic Substances Control Act (TSCA) banning most asbestos-containing building materials (ACBMs) in 1989. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled,

pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities.

Building materials, coatings, and/or finishes containing asbestos may be present in any structure regardless of the date of construction. In accordance with NESHAPS and local air pollution control district regulations, all suspect materials, finishes, and coatings that will be impacted by renovation or demolition regardless of the date of construction are required to be surveyed for the presence of asbestos by State-licensed asbestos consultants.

A survey for asbestos-containing materials was not requested or conducted as part of this Phase I ESA.

LEAD-BASED/LEAD-CONTAINING PAINTS

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has greater than or equal to one milligram per square centimeter (mg/cm^2) (5,000 microgram per gram (µg/g) or 5,000 parts per million (ppm)) of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm^2 to 2.0 mg/cm^2. In 2009, the US Consumer Product Safety Commission (16 Code of Federal Regulations CFR 1303) banned paint containing more than 0.009% (90 ppm) lead for residential use. Buildings built before 1978 are much more likely to have LBP; however, all commercial structures regardless of the date of construction likely contain lead-based or lead-containing glazings, varnishes, stains, coatings, paints, and primers. Such materials that will be impacted by renovation, repair, or demolition should be tested beforehand and the results disclosed to trades or staff that will be doing such work. All associated waste streams should be accurately characterized for proper disposal requirements.

A survey for lead containing materials was not requested or conducted as part of this Phase I ESA.

POLYCHLORINATED BIPHENYLS

Polychlorinated biphenyls (PCBs) were an ingredient added to a variety of building materials during manufacture, most notably, but not limited to, caulking, putty, and glazing, particularly around windows, door frames, and building joints. Building materials containing PCBs were used in many buildings in the 1950s through the 1970s, and potentially before the 1950s. There are significant regulations regarding the removal of these materials during demolition and/or renovation, both from an environmental protection standpoint as well as an occupational health and safety standpoint. In addition, under the Toxic Substances Control Act (TSCA), building materials that contain PCBs at or above 50 ppm are considered an "unauthorized use" of PCBs, and removal can be compelled under TSCA. The presence of PCBs may have the potential to impact a property's future land use. Based on the construction date for the Site building, building materials containing PCBs may have been used in the construction of the Site building.

A survey for PCBs is beyond the required scope of ASTM E1527-21 and was not specifically requested or conducted as part of this Phase I ESA.

DRINKING WATER

The Site is supplied with municipal drinking water by City of Long Beach. An assessment of lead in drinking water was not requested or conducted as part of this Phase I ESA.

RADON

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L).

The Federal EPA Radon Zone for Los Angeles County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 15 tests were performed within the 90804 zip code for the presence of radon. Of these, one test was found to contain radon in excess of 4.0 pCi/L. Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

METHANE

In June 2021 and November 2022, Ordinance Numbers ORD-21-0019 and ORD-22-0033, respectively, were adopted into the Long Beach Municipal Code (Title 18, Chapter 18.79) to establish citywide methane mitigation requirements, and included updated construction standards to control methane intrusion into buildings. This ordinance established defined areas and set forth a standard of assessment and mitigation in the planning stages of all new construction in these areas.

The Site is located within the City of Long Beach Methane Gas Mitigation Zone recognized by the Long Beach Department of Development Services. For sites within the Methane Gas Mitigation Zone, the Long Beach Department of Development Services, through Chapter 18.79 of the Long Beach Building Code, requires that subsurface soil vapor sampling for methane be conducted prior to any new development.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1928	A small structure appears developed in the north portion of the Site; and a small structure appears developed in the southeast portion of the Site	**North:** Unimproved road with undeveloped land beyond **East:** Unimproved road with undeveloped land beyond **South:** East Anaheim Street with undeveloped land beyond **West:** Undeveloped land; several small structures, likely residences, appear developed further west
1947	The previously identified structure is no longer shown; a gasoline station appears developed in the southeast portion of the Site	**North:** Relatively unchanged **East:** East Pacific Coast Highway appears developed; large areas further east appear to have been paved for development **South:** A golf course appears developed **West:** Additional single-family residences appear developed
1952	The previously identified structure appears to have been demolished	**North:** A gasoline station appears developed north of East Pacific Coast Highway **East:** North Greenbrier Road appears developed further east; single and multi-family residences appear developed further northeast **South:** Relatively unchanged **West:** Clark Avenue appears developed
1963	A large commercial structure appears developed	**North:** Relatively unchanged **East:** The current banquet hall appears developed further east **South:** Relatively unchanged **West:** Relatively unchanged
1977	The previously identified structure appears to have been replaced with several commercial structures	**North:** The previously identified gasoline station appears to have been demolished and replaced with the current retail stores **East:** The current commercial office structures appear developed **South:** Relatively unchanged **West:** Relatively unchanged
1983	The current Site structure and surface parking lot appear developed	**North:** Relatively unchanged **East:** Relatively unchanged **South:** Relatively unchanged **West:** Relatively unchanged
1989, 1994, 2002, 2005, 2009, 2012, 2016, 2020	Relatively unchanged	**North:** Relatively unchanged **East:** Relatively unchanged **South:** Relatively unchanged **West:** The current multi-family residence along East Anaheim Street appears developed

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. In addition, Citadel reviewed building permits with the City of Long Beach Building Department. Permits reviewed indicated the following:

- A service station associated with the address 5159 East Anaheim Street was built in 1935. The permit record identified the property as Lot 61.
- A permit to construct a new restaurant associated with the address 5150 East Pacific Coast Highway (Lot 61) was issued in 1953. The permit and provided figure did not include any existing structure at the time of permit issuance.
- Alterations to the restaurant were completed in 1954, including the widening of a car service canopy. The provided figure for the 1954 permit indicated two existing canopies as part of the restaurant. The car service canopy was likely associated with carhop services.
- A permit associated with the addresses 5150 to 5190 East Pacific Coast Highway to demolish a service station, three canopies, and a car wash was issued in 1979.
- The current Site structure was built in 1981. Permits for tenant improvements were completed from 1982 to 2018.

A copy of the EDR Building Permit Report is included as Appendix D.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site.

A copy of the EDR Sanborn Map Report is included as Appendix E.

5.4 CITY PARCEL PROFILE REPORT

A parcel profile report was not available for the Site.

5.5 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR in order to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched city directory listings from 1920 through 2020 (non-inclusive) and provided their search results to Citadel for review. Citadel also reviewed online sources including the Library of Congress. The following table summarizes information for the Site provided by the city directory search.

Dates(s)	Occupant Listed
5150 EAST PACIFIC COAST HIGHWAY (CURRENT SITE ADDRESS)	
1986	Blacks Office Guide, John Beasley Construction, Newhard Cook and Company
1990	Air Products and Chemicals Inc., American Bridge Division of USA, Architemps Inc., Coast Savings Park Estates, Nashua Computer Products, Newhard Cook and Company Inc.

1948, 1950, 1954, 1957, 1960, 19643, 1964, 1969	Single-family residences
1980, 1985	Sigma Alpha Epsilon Fraternity House
1991, 1992, 1995, 2000, 2005, 2006, 2010, 2014, 2020	Multi-family residences

A copy of the EDR City Directory Abstract is included as Appendix F.

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

No prior reports or relevant documentation was provided to Citadel. No reports are included in Appendix G.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provides the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. Below are brief descriptions of observations made from the topographic maps of the Site and vicinity.

Dates(s)	Site Description	Surrounding Area Descriptions
1896, 1899, 1902	Undeveloped land	**North:** Undeveloped land **East:** Undeveloped land **South:** East Anaheim Street, with undeveloped land beyond **West:** Undeveloped land
1925	A small structure appears developed in the southeast portion of the Site	**North:** Relatively unchanged with the exception of an unimproved road traversing in a north-south trajectory **East:** Relatively unchanged with the exception of the development of a road traversing in a northwest-southeast trajectory **South:** Relatively unchanged **West:** Several small structures appear developed along East Anaheim Street

Dates(s)	Site Description	Surrounding Area Descriptions
1942, 1943, 1947	Shading indicative of urban development	**North:** Relatively unchanged **East:** East Pacific Coast Highway appears developed **South:** Relatively unchanged **West:** Clark Avenue appears developed; properties further west appear shaded, which is indicative of urban development
1949	Relatively unchanged	**North:** The previously identified unimproved road is no longer shown; the current street system further north appears developed **East:** North Greenbrier Road appears developed further east **South:** Relatively unchanged with the exception of the development of the Recreation Park **West:** Relatively unchanged
1964, 1972, 1981,	Relatively unchanged	**North:** Clark Avenue appears developed north of the Site; properties to the north appear shaded, which is indicative of urban development **East:** Shading indicative of urban development **South:** Relatively unchanged **West:** Relatively unchanged
2012, 2015, 2018, 2021	Structures not depicted on these maps	Structures not depicted on these maps

Copies of the historical topographic maps provided by EDR are included as Appendix H.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Geological Energy Management Division (CalGEM) Online Mapping System (COMS) shows that there is an oil well approximately 625 feet east of the Site. The oil well is identified by API 0403705879. According to COMS, the well operator for the well is listed as Shell Western E&P Inc. and the status for the well is inactive and plugged. The prospect well was drilled to a depth of 10,280 feet in October 1945 and was abandoned by November 1945.

5.9 INTERVIEWS

Citadel interviewed Mr. Chad Mast, the Chief Engineer for the Site, and Mr. Garrett Butler, the Building Engineer for the Site during the Site reconnaissance. Mr. Mast and Mr. Butler were not aware of any historic or current environmental concerns or hazards at the Site. Citadel also submitted a User Questionnaire to the Client.

The completed User Questionnaire was not provided to Citadel at the time of this report. A copy of Citadel's User Questionnaire can be found in Appendix I.

5.10 ENVIRONMENTAL LIEN

Citadel contracted with EDR to perform an Environmental Lien Search for the Site. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations (AUL) for the Site. A deed dated August 2, 2016, was included in the report. The deed granted the title from Park Tower LLC to Milan Park Tower LLC.

A copy of the environmental lien and AUL search can be found in Appendix J.

5.11 SUMMARY OF SITE HISTORY

A review of historical sources showed that the Site was undeveloped as early as 1896 until at least 1925, with the development of a small structure in the north portion of the Site and a small structure in the south portion of the Site. Permits reviewed indicated the development of a gasoline station at the Site in 1935; based on the 1947 aerial photograph, this structure likely replaced the previously identified structure in the southeast portion of the Site. The previously identified structure in the north portion of the Site appeared to have been demolished by 1947. The gasoline station appeared to have been demolished by 1952. A permit to construct a new restaurant at the Site was issued in 1953; the permit indicated that no existing structures were on-Site at that time. The restaurant appeared to have been demolished and replaced with several commercial structures by 1976. According to the 1979 demolition permit, these structures included a gasoline station, three canopies, and a car wash. The current Site structure was built in 1981.

Historic tenants at the Site included a gasoline station from at least 1931 to 1952; a restaurant from 1953 to 1969; and a gasoline station with a car wash from 1972 to 1979. Various professional office tenants have occupied the Site since 1981.

The historic occupancy of the Site as a gasoline station from 1931 to 1952 and a gasoline station with a car wash from 1972 to 1979 may represent an environmental concern. However, based on the redevelopment of the Site with three subterranean parking levels, the historic occupancies of gasoline stations at the Site are not likely to represent a significant environmental concern.

The following provides a brief history of adjacent properties:

- Properties north of the Site were undeveloped as early as 1896 until at least 1925 with the development of an unimproved road traversing in a north-south trajectory. Pacific Coast Highway was developed by 1942 and a gasoline station appeared developed north of Pacific Coast Highway by 1952. The gasoline station was demolished and replaced with the current retail stores in 1976. Historic occupants of the adjacent property north of the Site include a service station from 1952 to at least 1969; a convenience store from 1992 to 2020; a donut shop from 1992 to 2014; offices from 1980 to 1990; a restaurant from 1992 to 2020; a dry cleaner (Ace's Cleaners) from 2000 to 2010; and a vape shop from 2014 to 2020.
- Properties east of the Site were undeveloped as early as 1896 until at least with the development of an unimproved road traversing in a north-south trajectory. Pacific Coast Highway was developed by 1942 and North Greenbrier Road was developed by 1949. The current banquet hall was built in 1958; and the current commercial office structures were built in 1966 and 1968. Historic occupants of the banquet hall include a masonic temple from 1960 to 1969 and a church from 1992 to 2020. Historic occupants of the commercial office structures generally include dentists and other professional tenants from 1969 to 2020.
- East Anaheim Street was developed as early as 1896. Properties south of the Site were undeveloped as early as 1896 until at least 1947 with the development of the current golf course.
- Properties west of the Site were undeveloped as early as 1896 until at least 1925 with the development of several small structures, likely residences, along East Anaheim Street. Additional single-family residences were built in 1928, 1929, and 1938. The current restaurant structure was built in 1940 as a residence. Clark Avenue was constructed by

1942. The current restaurant structure was converted from a real estate office to a beauty shop in 1982. The current multi-family residence was built in 1987. Historic occupants of the current restaurant property include residences from 1940 to 1975; real estate office in 1982; beauty shop/hair salon form 1982 to 1995; and restaurants from 1998 to 2020. Historic occupants of the remaining adjacent properties generally include residences from 1935 to 2020.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into five columns. The first column identifies the environmental database researched; the second column indicates the distance from the Site that was used for the research; the third column indicates if the Site was identified in the specified database; the fourth column lists the number of listings identified on the database within the specified distance of the Site; and the fifth column indicates if the sites identified are potential environmental concerns to the Site.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
National Priorities List	1 mile	No	0	
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	No	0	
Delisted National Priorities List	1 mile	No	0	
CERCLIS Sites	½ mile	No	0	
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	No	0	
RCRA Non-Corrective Action TSD Facilities	½ mile	No	0	
State/Tribal Voluntary Cleanup Sites	½ mile	No	0	
State/Tribal Leaking Registered Storage Tank Sites	½ mile	No	8	See discussion below
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	No	0	
Historic CORTESE List	½ mile	No	5	No

Database	Radius	Site Identified	No. of Listings Identified	Potential Environmental Concern to the Site
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	No	0	
Federal/State/Tribal Engineering Controls Registries	½ mile	No	0	
Federal/State/Tribal Institutional Controls Registries	½ mile	No	0	
RCRA Large Quantity Generators	¼ mile	No	1	No
RCRA Small Quantity Generators	¼ mile	No	4	No
RCRA Non Generators	¼ mile	Yes	43	See discussion below
State/Tribal Registered Storage Tank Sites	¼ mile	No	6	See discussion below
HIST UST	¼ mile	No	5	See discussion below
CA FID UST	¼ mile	No	3	See discussion below
SWEEPS UST	¼ mile	No	3	See discussion below
Facility Index System (FINDS)	Site	Yes	1	See discussion below
HAZNET	Site	Yes	2	See discussion below
Orphan	N/A	No	2	No

A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix K.

Site Name	Omya Specialty Materials, Men at Work Concrete Cleaners, Lipscomb Chemical Company, The Muller Company
Database(s)	FINDS, ECHO, HWTS, RCRA NONGEN/NLR, CHMIRS, HAZNET, ERNS
Address	5150 East Pacific Coast Highway
Distance/Direction	Target Property
Comments	The Site was identified on the Facility Index System/Facility Registry System (FINDS), the Enforcement and Compliance History Information (ECHO), and the Hazardous Waste Tracking System (HWTS) databases. FINDS contains facility information and "pointers" to other sources that contain more detail; ECHO provides integrated compliance and enforcement information; and HWTS is the Department of Toxic Substances Control's (DTSC) data repository for hazardous waste identification and manifest information. The Site was identified on these databases due to being a hazardous waste generator in 1999, 2013, 2017, and 2020. No violations were reported on these databases. The Site was also identified on the Emergency Response Notification System (ERNS) and the California Hazardous Material Incident Report System (CHMIRS) on April 7, 2007, for the release of dirt and dust from the roof that washed down with a non-butyl based soap into the storm drain due to operator error. The cleanup was completed by Infiniti Environmental. No further cleanup was required. The Site was identified as a RCRA Non-Generator in 2020. The Site was identified on the HAZNET database for generating the following hazardous waste:

	➢ Off-specification, aged, or surplus organics in 2016, 2018, 2020, and 2021 ➢ Liquids with pH less than or equal to two in 2020 ➢ Other organic solids in 2020 and 2021 The appearance of the Site on the HAZNET database reflects proper disposal of hazardous waste. Based on a lack of violations and that the release of dirt, dust, and soap was cleaned up, these listings are not considered to represent a significant environmental concern.

Site Name	Exxon Car Wash
Database(s)	EDR HIST CLEANER, LONG BEACH UST
Address	5190 East Pacific Coast Highway
Distance/Direction	Target Property (historic Site address)
Comments	According to EDR, this address was identified on the EDR Historical Dry Cleaners database in 1976 and on the Long Beach UST database with no tanks listed. While this address is not currently associated with the Site, it is likely a historic Site address based on its location and reviewed building permits. Permits reviewed indicated that a gasoline station and a car wash were demolished in 1979, prior to the development of the current Site structure in 1981. Based on the UST listing indicating no tanks and that the Site consists of three subterranean parking levels, USTs associated with the former gasoline station and car wash were likely removed prior to or during redevelopment of the Site.

Site Name	Pepper Tree Service Station
Database(s)	EDR HIST AUTO
Address	5151 East Anaheim Street
Distance/Direction	Target Property (historic Site address)
Comments	According to EDR, this address was identified on the EDR Historical Gas Station database as associated with a gasoline and oil station in 1931. While this address is not currently associated with the Site, it is likely a historic Site address based on its location and reviewed aerial photographs. The gasoline station was likely replaced with a new station in 1935. The gasoline station appeared to have been demolished by 1952, prior to the development of a restaurant. The historic occupancy of the Site as a gasoline station may represent an environmental concern. However, based on the redevelopment of the Site with three subterranean parking levels, USTs associated with the former gasoline station were likely removed prior to or during redevelopment of the Site.

Site Name	DA Hughes, CH Dolie
Database(s)	EDR HIST AUTO
Address	5159 East Anaheim Street
Distance/Direction	Target Property (historic Site address)
Comments	According to EDR, this address was identified on EDR's Historical Gas Station database as associated with a gasoline and oil station in 1939 and 1948. While this address is not currently associated with the Site, permits reviewed indicated that a gasoline station associated with this address was built at the Site in 1935. The listing is likely associated with the listing for 5151 East Anaheim Street. The gasoline station

	appeared to have been demolished by 1952, prior to the development of a restaurant. The historic occupancy of the Site as a gasoline station may represent an environmental concern. However, based on the redevelopment of the Site with three subterranean parking levels, USTs associated with the former gasoline station were likely removed prior to or during redevelopment of the Site.

Site Name	Ace Cleaners
Database(s)	EDR HIST CLEANER, DRYCLEANERS, RCRA-SQG, HWTS, HAZNET
Address	5107 East Pacific Coast Highway
Distance/Direction	109 feet north and downgradient of the Site
Comments	An adjacent property was identified on the DTSC's Drycleaners and EDR's Historical Dry Cleaner databases. According to the EDR, the property was occupied as a drycleaning plant from 1995 to 2014. According to the Drycleaner listing, inactive permits to operate dry cleaning equipment using tetrachloroethylene (PCE) were issued in 1992, 2006, and 2007. The former dry cleaner was also identified as a RCRA Small Quantity Generator (SQG) in 1993 and on the HAZNET database as a generator of liquids with halogenated organic compounds in 2005. While EDR identifies this property as located 109 feet north of the Site, the tenant space with the address 5107 East Pacific Coast Highway is located approximately 225 feet northeast of the Site. Reviewed city directory listings indicate that the tenant space was occupied as a bakery in 1992, by Ace Cleaners from 2000 to 2010, and by Breathe Vape Spot in 2014 and 2020; the tenant space is currently occupied by a United States Pro Scooters as a skate shop. Based on the distance from the Site, the former operation of a dry cleaner is not expected to represent a significant environmental concern to the Site.

Site Name	Former Shell Station
Database(s)	LUST, CORTESE, CERS, RCRA-VSQG, HIST UST, SWEEPS UST, CA FID UST, FINDS, ECHO, HWTS, HAZNET, WDR, CIWQS, UST
Address	5095 East Pacific Coast Highway
Distance/Direction	320 feet north-northwest and downgradient of the Site
Comments	This property was identified on numerous environmental databases including the historical UST databases for three 12,000-gallon gasoline USTs installed in 1979 and on the Long Beach UST database with no tanks listed. The property was identified as a leaking underground storage tank (LUST) facility. According to documents available on GeoTracker, one of the 12,000-gallon USTs was emptied and repaired in 1992 and an initial site assessment identified a gasoline release in 1993. Remedial actions included free product removal in 1993, soil vapor extraction (SVE) from 1993 to 1995, removal of the USTs and soil excavation in 2002, dual phase extraction in 2015, and potassium sulfate injection from 2019 to 2021. A request for case closure was submitted in October 2022 and January 2023. The LUST facility is currently eligible for case closure as of May 12, 2023. The nearest groundwater monitoring well is located approximately 20 feet west of the Site and serves as the off-site upgradient monitoring well. The most recent groundwater monitoring data for this well was in June 2022, and contaminants were not detected above laboratory reporting limits, with the exception of total petroleum hydrocarbon as diesel (TPH), which was detected at 73 micrograms per liter (µg/L). Based on regulatory oversight and that the case is currently eligible for closure, this LUST facility is not expected to represent a significant environmental concern to the Site.

Maps showing the location of these facilities and additional information are provided in the Government Records Report in Appendix K.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated plume that might be associated with the nearby known or suspected COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. Nearby LUST facilities include the following:

- City of Long Beach, located at 5000 East Anaheim Street, is listed as a LUST facility. According to EDR, the property is approximately 414 feet west-southwest and cross-gradient of the Site and the gasoline leak impacting soil only was reported in December 1989. The case was completed and closed by the Los Angeles Regional Water Quality Control Board (LARWQCB) on July 22, 1996. This property is not expected to represent a significant environmental concern to the Site.
- Former Shell Station, located at 5095 East Pacific Coast Highway, is listed as a LUST facility. According to EDR, the property is approximately 320 feet north-northwest and downgradient of the Site and the gasoline leak was discovered in 1993. This property is discussed above in Section 6.1. Based on regulatory oversight and that the case is currently eligible for closure, this LUST facility is not expected to represent a significant environmental concern to the Site.

EDR also provided the following listings on the Historical Gas Station and Dry Cleaners databases as within 0.125-mile and upgradient, 365 feet and cross-gradient, or 100 feet and downgradient of the Site.

Historical Gas Stations	
Site Name	Pepper Tree Service Station
Address	5151 East Anaheim Street
Distance/Direction	Target Property
Comments	According to EDR, this property was occupied as a gasoline and oil station in 1931. This listing is discussed above in Section 6.1 as part of the Site.
Site Name	DA Hughes, CH Dolie
Address	5151 East Anaheim Street
Distance/Direction	Target Property
Comments	According to EDR, this property was occupied as a gasoline and oil station in 1935 and 1948. This listing is discussed above in Section 6.1 as part of the Site.
Site Name	Carter's Flying A Service, Park Estates 66 Service
Address	5109 East Pacific Coast Highway
Distance/Direction	178 feet north and downgradient of the Site
Comments	According to EDR, this property was occupied as a gasoline station from 1955 to 1969. This property was then redeveloped with the current retail plaza in 1976. While EDR identifies this property as 178 feet north of the Site, the former gasoline station was likely located approximately 115 feet north of the Site. Based on the groundwater monitoring data from the Former Shell Station LUST case, groundwater near the Site did not appear to have been impacted by contaminants. Based on this finding and the distance and downgradient location, this former gasoline station is not likely to have adversely affected the Site.
Site Name	Park Service Station
Address	5049 East Anaheim Street
Distance/Direction	279 feet west-southwest and cross-gradient of the Site

Historical Gas Stations	
Comments	According to EDR, this property was occupied as a gasoline and oil service station in 1924. The current commercial structure was built in 1965 as an accounting office. Based on the groundwater monitoring data from the Former Shell Station LUST case, groundwater near the Site did not appear to have been impacted by contaminants. Based on this finding and the distance and cross-gradient location, this former gasoline station is not likely to have adversely affected the Site.

Historical Dry Cleaners	
Site Name	Exxon Car Wash
Address	5190 East Pacific Coast Highway
Distance/Direction	Target Property
Comments	According to EDR, this property was occupied by Exxon Car Wash in 1976. This listing is discussed above in Section 6.1 as part of the Site.

Additional information on these properties can be reviewed in the vapor encroachment screen provided by EDR, which is included as Appendix L.

6.3 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the Site.

BUILDING DEPARTMENT

Citadel contacted the City of Long Beach Building Department for information regarding the Site in order to identify historical tenants and property use. Please see Section 5.2 for further discussion.

FIRE DEPARTMENT

The Long Beach Fire Department and Long Beach Health Department share oversight of the local Certified Unified Program Agency (CUPA) for the City of Long Beach. The Long Beach CUPA has been in effect since July 1, 1997. Citadel submitted a records request for information regarding the Site in order to identify historical tenants and property use. The agency indicated that no records were found.

Citadel also reviewed the Los Angeles County Fire Department (LACFD) online databases for recently issued lists of Site Mitigation Inventory, CalARP Facility Inventory, Active Facility Inventory, and Inactive Facility Inventory; and the Los Angeles Department of Public Works's (LADPW) online file review for industrial waste, USTs, and storm water certificates. The Site was not identified on these databases.

CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY

The California EPA (CalEPA) Regulated Site Portal combines data of environmentally regulated sites and facilities in California into a single, searchable database. The portal provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups,

impacted ground and surface waters, and toxic materials. Citadel reviewed the Site Portal Profile for the Site addresses. The Site was not identified in the database.

AIR QUALITY MANAGEMENT DISTRICT

Citadel reviewed information available on-line through the South Coast Air Quality Management District's Facility Information Detail (FIND) database. The Site was identified on the database for the following:

- Air Prod & Chemicals (Facility ID No. 49569)
  - No equipment listed
  - No Notices of Violation (NOVs) or Notices to Comply (NTCs) were reported
- IDM Properties Corp (Facility ID No. 84046)
  - An inactive permit, issued in 1993, to operate a natural gas boiler
  - No NOVs or NTCs were reported
- Park Tower, IDM Properties Corp (Facility ID No. 85144)
  - No equipment listed
  - A NTC was issued in September 2016, for failure to demonstrate compliance with Rule 1146.1 and to submit Rule 1415 Plan Notifications (these rules are associated with emissions from boilers and HVAC systems); the Site was re-inspected and returned to compliance in January 2017
  - No VOCs were reported
- Ryder Public Transportation Services (Facility ID No. 88164)
  - No equipment listed
  - No NOVs or NTCs were reported
- Park Tower, Milan Capital (Facility ID No. 184074)
  - Applications for a boiler and Rule 1415 Plan Notifications were submitted in 2017; however, no permits to operate were issued
  - A NOV was issued in January 2017, for failure to register air conditioning units containing greater than 50 pounds of refrigerant and to obtain a permit to operate a boiler rated greater than two million British thermal units (btu); the case was closed in January 2018
  - No NTCs were reported
- Milan Park Tower, LLC (Facility ID No. 184304)
  - A cancelled application for a natural gas boiler was submitted in March 2017; no permits to operate were issued
  - No NOVs or NTCs were reported

These listings are not expected to represent significant environmental concerns.

REGIONAL WATER QUALITY CONTROL BOARD

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. According to GeoTracker, Former Shell Station, located at 5095 Pacific Coast Highway, approximately 320 feet north-northwest of the Site, is listed as the nearest LUST Cleanup Site. According to information provided by GeoTracker, an initial site assessment identified a gasoline release in 1993. Remedial actions included free product removal in 1993, SVE from 1993 to 1995, removal of three 12,000-gallon USTs and soil excavation in 2002, dual phase extraction in 2015, and potassium sulfate

injection from 2019 to 2021. A request for case closure was submitted in October 2022 and January 2023. The LUST facility is currently eligible for case closure as of May 12, 2023.

Based on regulatory oversight and that the case is currently eligible for closure, this LUST facility is not expected to represent a significant environmental concern to the Site.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

- Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities.

With regard to these data gaps, Citadel believes that the most significant potential sources for on-site contamination have been identified during the current investigation and the Phase I ESA was performed in compliance with all appropriate inquiry, published in 40 CFR 312.

8.0 FINDINGS

Citadel was contracted by Kimley-Horn and Associates, Inc. (Client) to perform a Phase I ESA of the Park Tower property located at 5150 East Pacific Coast Highway, in the City of Long Beach, Los Angeles County, California; hereinafter referred to as the "Site."

Current Site Conditions

The Site consists of one seven-story commercial office structure of approximately 120,000 SF with three subterranean parking levels, a surface parking lot, and associated landscaping. Access to the Site parking areas is along the west boundary of the Site on Clark Avenue. At the time of the Site reconnaissance, the Site was occupied by various professional office tenants.

Stationary equipment at the Site includes three cable-traction elevators, a 15,000-gallon underground water storage tank, hot water heaters, compressors, a cooling tower, dry-type transformers, a fire pump, and a sump. In general, the Site appeared to be well maintained. Carbon monoxide monitors are located throughout the subterranean parking levels.

Site History

A review of historical sources showed that the Site was undeveloped as early as 1896 until at least 1925, with the development of a small structure in the north portion of the Site and a small structure in the south portion of the Site. Permits reviewed indicated the development of a gasoline station at the Site in 1935; based on the 1947 aerial photograph, this structure likely replaced the previously identified structure in the southeast portion of the Site. The previously identified structure in the north portion of the Site appeared to have been demolished by 1947. The gasoline station appeared to have been demolished by 1952. A permit to construct a new restaurant at the Site was issued in 1953; the permit indicated that no existing structures were on-Site at that time. The

restaurant appeared to have been demolished and replaced with several commercial structures by 1976. According to the 1979 demolition permit, these structures included a gasoline station, three canopies, and a car wash. The current Site structure was built in 1981.

Historic tenants at the Site included a gasoline station from at least 1931 to 1952; a restaurant from 1953 to 1969; and a gasoline station with a car wash from 1972 to 1979. Various professional office tenants have occupied the Site since 1981.

The historic occupancy of the Site as a gasoline station from 1931 to 1952 and a gasoline station with a car wash from 1972 to 1979 may represent an environmental concern. However, based on the redevelopment of the Site with three subterranean parking levels, the historic occupancies of gasoline stations at the Site are not likely to represent a significant environmental concern.

Environmental Databases

The Site was identified on numerous environmental databases due to being a hazardous waste generator in 1999, 2013, 2017, and 2020. No violations were identified on these databases. The Site was identified on the HAZNET database for generating the following hazardous waste:

- Off-specification, aged, or surplus organics in 2016, 2018, 2020, and 2021
- Liquids with pH less than or equal to two in 2020
- Other organic solids in 2020 and 2021

The Site was also identified on the ERNS and the CHMIRS on April 7, 2007, for the release of dirt and dust from the roof that washed down with a non-butyl based soap into the storm drain due to operator error. The cleanup was completed by Infiniti Environmental. No further cleanup was required. The appearance of the Site on these databases reflects proper disposal of hazardous waste. Based on a lack of violations and that the release of dirt, dust, and soap was cleaned up, these listings are not considered to represent a significant environmental concern.

The Site was also identified on EDR's Historical Gas Station database in 1931, 1939, and 1948; EDR's Historical Dry Cleaner database in 1976; and the Long Beach UST database with potential historic Site addresses. The historical dry cleaner listing referenced a car wash facility and no USTs were listed on the Long Beach UST database. Based on these listings and review of historic sources, the first gasoline station was on-Site prior to 1931; the second gasoline station likely replaced the former gasoline station in 1935 and operated until 1952. The third gasoline station with a car wash facility operated from 1972 to 1979, prior to the development of the current Site structure in 1981. Based on the UST listing indicating no tanks and that the Site consists of three subterranean parking levels, the historic occupancies of gasoline stations at the Site are not likely to represent a significant environmental concern.

Vapor Encroachment Conditions

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. Nearby LUST facilities include the following:

- City of Long Beach, located at 5000 East Anaheim Street, is listed as a LUST facility. According to EDR, the property is approximately 414 feet west-southwest and cross-gradient of the Site and the gasoline leak impacting soil only was reported in December 1989. The case was completed and closed by the Los Angeles Regional Water Quality

Control Board (LARWQCB) on July 22, 1996. This property is not expected to represent a significant environmental concern to the Site.

- Former Shell Station, located at 5095 East Pacific Coast Highway, is listed as a LUST facility. According to EDR, the property is approximately 320 feet north-northwest and downgradient of the Site and the gasoline leak was discovered in 1993. Remedial actions included free product removal in 1993, SVE from 1993 to 1995, removal of the USTs and soil excavation in 2002, dual phase extraction in 2015, and potassium sulfate injection from 2019 to 2021. The nearest groundwater monitoring well is located approximately 20 feet west of the Site and serves as the off-site upgradient monitoring well. The most recent groundwater monitoring data for this well was in June 2022, and contaminants were not detected above laboratory reporting limits, with the exception of TPH, which was detected at 73 µg/L. The LUST facility is currently eligible for case closure as of May 12, 2023. Based on regulatory oversight and that the case is currently eligible for closure, this LUST facility is not expected to represent a significant environmental concern to the Site.

One property was identified as within 365 feet and cross-gradient of the Site on the Historical Gas Station database. This property, located 279 feet west-southwest of the Site, is not likely to have adversely affected the Site. No properties were identified as within 0.125-mile and upgradient of the Site on the Historical Dry Cleaners database.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-21, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the (1) presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

An historical recognized environmental condition, or HREC, is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

According to ASTM E2600-10, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the

target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on a review of historical and present records, and Site reconnaissance, Citadel believes that sufficient information was collected and evaluated for the Site to determine if a REC, HREC, CREC, or a de minimis condition exists. Based on our review, reported release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC was not identified. No evidence for designating the Site as a REC, HREC, or CREC from reviews of historic documents and present Site conditions was found.

Citadel recommends that the tenant follow best management practices, in conformance with all appropriate current regulations, in regards to potential use of regulated hazardous materials and/or waste generated during everyday operations.

The current Site building was constructed prior to bans using ACBMs, LBP, and PCBs in electrical equipment came into effect in 1989, 1978, and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs, LBP, or PCBs at the Site.

Prior to renovation or demolition of building components, particularly roofing materials, Citadel recommends that the Client perform a survey for ACBMs, LBP, and PCBs. Such surveys should be performed to identify if ACBMs, LBP, or PCBs are present and to ensure proper handling and disposal and to allow for measures to protect both worker and building occupant safety during routine building maintenance, renovation or demolition.

The Site is located within the City of Long Beach Methane Gas Mitigation Zone recognized by the Long Beach Department of Development Services. For sites within the Methane Gas Mitigation Zone, the Long Beach Department of Development Services, through Chapter 18.79 of the Long Beach Building Code, requires that subsurface soil vapor sampling for methane be conducted prior to any new development.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

11.0 DISCLAIMER

The services performed by Citadel Environmental Services, Inc. ("Citadel"), d.b.a. Citadel EHS, in connection with this Report were performed in accordance with generally and currently accepted engineering practices and principles; provided, however, Citadel completed such

services as directed by the Client and the recommendations described in this Report are therefore limited in purpose and scope. The procedures and methodologies used by Citadel in its performance of services, and the recommendations contained herein, are not intended to meet the requirements under any specific laws or regulatory guidelines unless expressly set forth in the Proposal.

The recommendations and conclusions set forth in this Report are based on information and data available to Citadel during the course of its performance of the services. Citadel relied on the information and data provided by or on behalf of Client, including, if applicable, historical and present operations, conditions and test data, and Citadel assumed all such information and data was correct and complete. Citadel shall not be liable for any damages or losses resulting from inaccuracies of, or omissions from, information or data provided by or on behalf of the Client, any interested third-parties, or any federal, state, county, or local governmental authority, or otherwise available in the public domain.

The information contained in this Report and conclusions resulting therefrom are based solely on information available to Citadel at the time of its performance of services, and from observations and perceived conditions and materials existing on the date of Citadel's limited survey of the site, if applicable. Citadel disclaims any inaccuracy in the Report as a result of any part or parcel of property to which Citadel was not provided access, or which was concealed, including, but not limited to, wall cavities/chases, ceiling plenums, below floor finishes, crawlspaces, below grade, beneath existing structures, or behind electrical panels.

The findings and recommendations presented in this Report are based upon observations of present conditions and may not necessarily indicate future conditions. No conclusions should be construed or inferred other than those expressly stated in this Report. EXCEPT FOR ANY WARRANTIES EXPRESSLY SET FORTH IN THE PROPOSAL OR OTHER WRITTEN AGREEMENT BETWEEN CITADEL AND CLIENT, CITADEL MAKES NO WARRANTIES HEREUNDER WITH RESPECT TO ANY INFORMATION CONTAINED IN THIS REPORT, EXPRESS OR IMPLIED, AND CITADEL HEREBY DISCLAIMS ALL OTHER WARRANTIES.

All testing and remediation methods have reliability limitations and no method nor number of sampling locations can guarantee that a hazard will be discovered if contamination or other evidence of the hazard is not encountered within the performance of the services as authorized. Reliability of testing or remediation varies according to the sampling frequency and other service variables that were selected by Client. Citadel shall not be at fault or liable for any such limitations.

The information and opinions rendered in this report are exclusively for use and reliance by the Client. The information contained herein may not be used, disclosed, or copied without written permission of the Client and may not be relied upon without the written permission of Citadel.

13.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I ESA of the property located at 5150 East Pacific Coast Highway, in the City of Long Beach, Los Angeles County, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-21 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

Principal, Engineering and Environmental Sciences

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by the final All Appropriate Inquiry (AAI) Rule published in 40 CFR Part 312.10 (December 15, 2022). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting described in this Phase I ESA. I have developed and performed the AAI in conformance with the standard and care of this Rule.

Mark Drollinger, MEng, CSP, CHMM, EiT

Director of Environmental Geology & Engineering

EXPERIENCE

With over **35 years** of experience in environmental engineering, compliance, permitting and management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations; and with local agencies, fire departments and public works. Mr. Drollinger has provided environmental engineering, assessment and compliance, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

ROLE

As Director of Environmental Geology & Engineering, Mr. Drollinger's primary responsibility includes developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; litigation support; and coordinating tasks with multi-discipline project teams.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments.

EDUCATION

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama, and a M.Eng. in Advanced Safety Engineering and Management, University of Alabama, Birmingham.

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Society of Safety Engineers, Board of Certified Safety Professionals, Institute of Hazardous Materials Management, Institute of Industrial Engineers and International Facilities Management Association.

Shirley Lee

Environmental Specialist, Environmental Geology and Engineering

EXPERIENCE

Ms. Lee has **12 years** of experience as an Environmental Specialist. Her responsibilities includes performing Phase I and Phase II Environmental Site Assessments, NPDES monitoring and permitting, groundwater monitoring, indoor air quality inspections, hazardous materials inventory, and preparation of health and safety plans and hazardous materials business and contingency plans.

ROLE

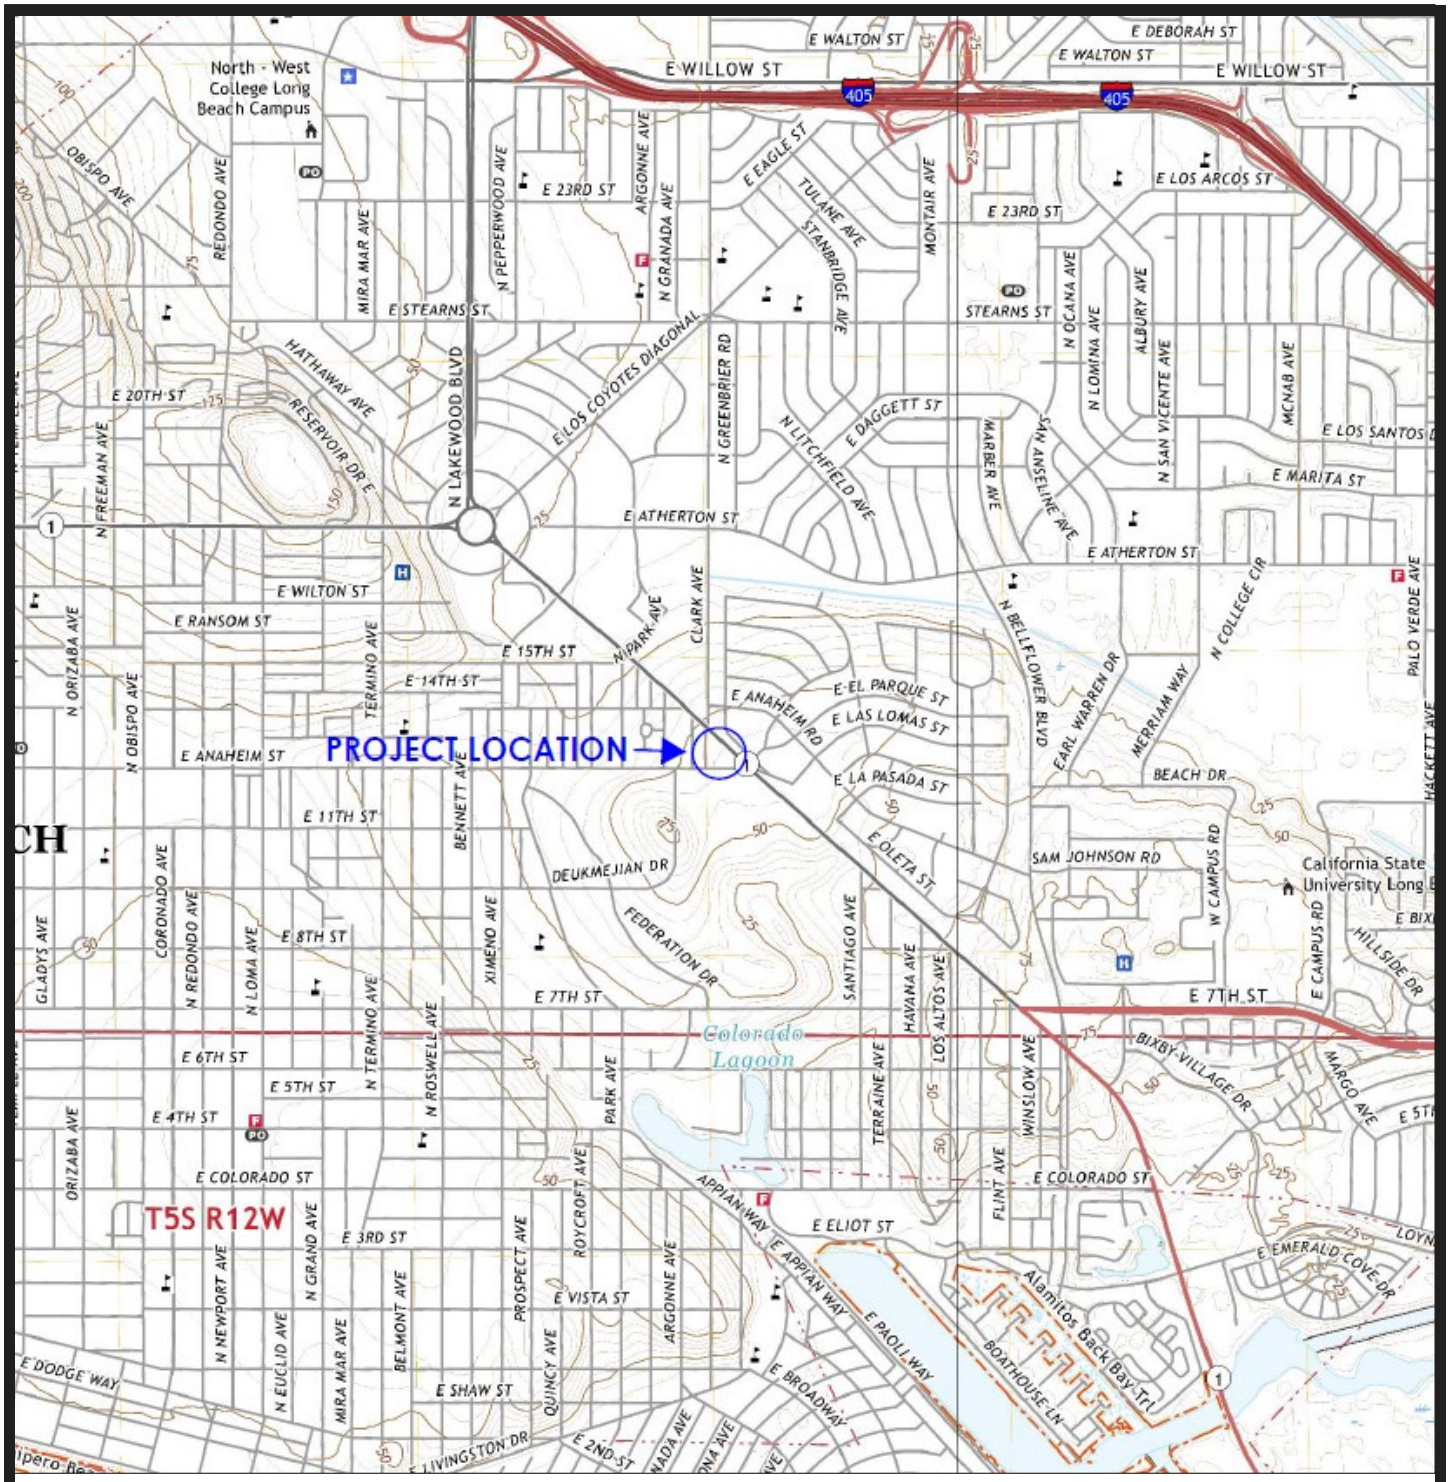

As an Environmental Specialist, Ms. Lee provides on-site organization, direction, control, and coordination necessary for the successful implementation, execution, and completion of environmental geology and environmental compliance-related projects awarded to Citadel. She also assists the Director of Environmental Geology and Engineering in the completion of all assigned projects so that the client is satisfied with the finished work product and the working relationship. Her assignments include a combination of field-based activities in a number of varying environments and office-based activities.

EDUCATION

Ms. Lee holds a Bachelor of Arts in Environmental Analysis and Design from the University of California, Irvine; with a minor in Urban and Regional Planning. Ms. Lee also holds a 40-hour HAZWOPER General Site Worker Certification. She has recently received her Environmental Management Certification from the University of California, Irvine.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

To the Department of Building and Safety of the City of Long Beach:

Application is hereby made to the Department of Building and Safety of the City of Long Beach, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure thereon described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure thereon described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Long Beach.

Third: That the granting of the permit does not affect or prejudice any claim at title to, or right of possession in, the property described on such permit.

To the Department of Building and Safety of the City of Long Beach:

Application is hereby made to the Department of Building and Safety of the City of Long Beach, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions which is hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Long Beach.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described on such permit.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Citadel EHS were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Citadel EHS were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

Building Engineer		
Other		

TITLE & JUDICIAL RECORDS

Per ASTM E 1527-13 Section 6.2, the User is required to provide and/or report to the environmental professional any title and/or judicial records so identified for the subject property.

Please provide any information on title and/or judicial records:

ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

Per ASTM E 1527-13 the User is required to provide and/or report to the environmental professional any environmental liens or AULs so identified for the subject property. The environmental professional per the ASTM practice is not responsible to undertake a review of information to identify environmental liens or AULs.

Please provide any information on environmental liens or activity and use limitations (AULs):

SPECIALIZED OR ACTUAL KNOWLEDGE OF USER

Per the ASTM standard, it is the User's responsibility to communicate to the environmental professional any information that is material to recognized environmental conditions in connection with the subject property based on such specialized knowledge, actual knowledge, experience, or commonly known and reasonably ascertainable information within the local community.

Please provide any information of the following items:

ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
USTs		
ASTs		
PCB Electrical Equipment		
Hydraulic Equipment		
Chemicals, Hazardous Materials, and Raw Materials Storage and Usage		
Waste Generation, Storage and Disposal		
Wells, Sumps, Pits, and Floor Drains		
Stormwater Runoff and Surface Water		
Lagoons, Septic Systems, Wastewater Treatment, and Separators		
Stressed Vegetation, Staining and Odors		
Surficial Disturbances		
On-Property Dry Cleaners		

NON-ASTM Scope Item	Property Contact Aware of them (Y/N)	Comment
Asbestos Containing Materials		
Radon		
Lead-Based Paint		
Lead in Drinking Water		
Potable Well		
Potential Wetlands		
Air Emissions		
Mold/Water Intrusion		

Please refer to "Helpful Documents" section below to provide any relevant reports associated with the above items.

VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

(For Property Owner) Per the ASTM standard, in a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a significantly lower price which does not reasonably reflect fair market value if the property was not contaminated, and make a written record of such explanation. The ASTM standard does not require that a real estate appraisal be obtained in order to ascertain fair market value of the property.

PROCEEDINGS INVOLVING THE PROPERTY

Per the ASTM standard, prior to the site visit, the User (if different from the property owner), Key site manager (if any is identified), and property owner shall be asked whether they know of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

- **Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, or from the property? Y / N**
  If yes, please explain:

- **Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? Y / N**
  If yes, please explain:

HELPFUL DOCUMENTS

Per the ASTM Standard, Prior to the property visit, the Property owner, key site manager (if any is identified), and User (if different from the property owner) shall be asked if they know whether any of the documents below exist and if so, whether copies can and will be provided within reasonable time and cost constraints:

	User		Key Site Manager		Property Owner

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXCEPT ALL THE MINERALS, GAS, OILS, PETROLEUM, NAPHTHA AND OTHER HYDROCARBON SUBSTANCES IN, ON, OR UNDER SAID LAND, TOGETHER WITH, BUT NOT CONFINED TO THE FOLLOWING RIGHTS, NAMELY, ALL NECESSARY AND CONVENIENT RIGHTS FOR THE PURPOSE OF DRILLING FOR, PRODUCING, EXTRACTING, AND TAKING ANY OF SAID MINERALS, GAS, OILS, PETROLEUM, NAPHTHA, AND OTHER HYDROCARBON SUBSTANCES, FROM SAID LAND, TOGETHER WITH THE RIGHT TO USE OR DEVELOP AND USE ALL WATER NECESSARY AND CONVENIENT FOR SAID DRILLING, EXTRACTING OR TAKING OF SAID MINERALS, GAS, OILS, PETROLEUM, NAPHTHA AND OTHER HYDROCARBON SUBSTANCES, SUBJECT TO THE LIMITATION THAT SAID DRILLING FOR, PRODUCING, EXTRACTING AND TAKING THE SAME SHALL BE CARRIED ON BY MEANS OF MINES, WELLS, DERRICKS, AND/OR OTHER TANKS AND EQUIPMENT

LOCATED OUTSIDE THE BOUNDARIES OF SAID LAND, WHICH WELLS AND MINES MAY EXTEND BENEATH THE SURFACE OF ANY AND ALL PARTS OF SAID LAND FOR SAID PURPOSE OF EXTRACTING AND TAKING ANY OF SAID MINERALS, GAS, OILS, PETROLEUM, NAPHTHA AND OTHER HYDROCARBON SUBSTANCES FROM SAID LAND, AS RESERVED BY ERNEST A. BRYANT, JR., AND ALLEN L. CHICKERING, AS EXECUTORS OF THE LAST WILL AND TESTAMENT OF SUSANNA P. BRYANT, DECEASED, IN DEED RECORDED MAY 8, 1947 IN BOOK 24532 PAGE 261 OF OFFICIAL RECORDS.

SAID LAND IS ALSO KNOWN AS LOT 61 OF THE ALAMITOS TRACT, AS PER MAP RECORDED IN BOOK 36, PAGES 37 TO 44 INCLUSIVE OF MISCELLANEOUS RECORDS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

APN: 7220-018-009

SCHEDULE 2

PERMITTED ENCUMBRANCES

1. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2016-2017.

2. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title.

3. Water rights, claims or title to water, whether or not disclosed by the public records.

4. An easement to Alamitos Water Company recorded in Book 379 Page 295 in the Office of the County Recorder in Los Angeles County.

5. An easement to the City of Long Beach recorded on July 22, 1971 as Instrument No. 2974 in the Office of the County Recorder in Los Angeles County.

6. An easement to the City of Long Beach recorded on April 19, 1972 as Instrument No. 2338 in the Office of the County Recorder in Los Angeles County.

7. An easement to the City of Long Beach recorded on January 15, 1981 as Instrument No. 81-48981 in the Office of the County Recorder in Los Angeles County.

8. An easement to Southern California Edison Company recorded on January 19, 1981 as Instrument No. 81-62467 in the Office of the County Recorder in Los Angeles County.

9. Any rights, claims or interests that may exist or arise by reason of the following facts disclosed by a map dated May 11, 2016 last revised May 12, 2016 of an ALTA/NSPS Land Title Survey completed May 6, 2016 prepared by or under the responsible charge of David W. Mackey LS 8912, of/for Huitt-Zollars, Inc., Project/Job No. R306300.01.

    a. The angle point of a raised planter wall on the south side of surveyed property extends 0.2 feet onto East Anaheim Street.

    b. Planter walls on the west side of surveyed property extend onto an easement for street and alley purposes recorded April 19, 1972 as Instrument No. 2338 of Official Records.

    c. The back of walk on the southwest side of East Pacific Coast Highway extends 0.1 feet onto surveyed property.

    d. There is an electrical cabinet on the northeast line of surveyed property.

e. Monument signs planter walls and landscape area in the north corner and west side of surveyed property extends onto an easement for street and alley purposes recorded April 19, 1972 as Instrument No. 2338 of Official Records.

f. A monument sign on the northeast side of surveyed property encroaches onto an easement for public utilities in favor of Southern California Edison Company recorded January 19, 1981 as instrument # 81- 62467 of Official Records.

g. The underground parking garage on surveyed property encroaches onto an easement for street and alley purposes recorded April 19, 1972 as Instrument No. 2338 and onto an easement for street purposes recorded January 15, 1981 as Instrument No. 81-48981 both of official records.

h. The underground parking garage on surveyed property encroaches onto an easement for public utilities in favor of Southern California Edison Company recorded January 19, 1981 as instrument # 81-62467 of official records.

i. There is an electric vault, an unidentified metal vault, a fire department hose connection and gas meter in various locations on surveyed property lying outside the boundary of any easement therefore.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CALIFORNIA STATE UNI EPA ID:: CAR000201327	4825 E PACIFIC COAST	NW 1/8 - 1/4 (0.214 mi.)	J69	171

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/04/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site

within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 7 CA ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CA CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CA CERS HAZ WASTE list, as provided by EDR, and dated 10/16/2023 has revealed that there is 1 CA CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/04/2023 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System

GENERAL TELEPHONE OF CA (Continued) **1000213854**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	23 CCR 16 2715(a)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(a)(2)
Violation Description:	Failure to submit the Underground Storage Tank Statement of Understanding and Compliance Form.

VERIZON CA INC (Continued) **S113122497**

Violation Notes:	Returned to compliance on 04/30/2019. OBSERVATION: Owner/operator failed to submit the Underground Storage Tank Statement of Understanding and Compliance Form. CORRECTIVE ACTION: Submit the Underground Storage Tank Statement of Understanding and Compliance Form . UPLOAD STATEMENT OF UNDERSTANDING AND COMPLIANCE FORM TO CERS AND PROVIDE COPY TO BE ADDED TO SITE FOLDER FORM WAS PRESENTED TO INSPECTOR ON SITE AND WAS INSERTED IN UST ON SITE FILE FOLDER BY SERVICE TECHNICIAN AT CONCLUSION OF TEST.
Violation Division:	Long Beach Environmental Heath
Violation Program:	UST
Violation Source:	CERS,
Site ID:	393208
Site Name:	Frontier California, Inc.: Clark CO
Violation Date:	04-26-2018
Citation:	23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637
Violation Description:	Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter.Use a procedure that demonstrates the system works as well as at installation.Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval.Performed by a certified service technician or a licensed tank tester.
Violation Notes:	Returned to compliance on 05/26/2018. OBSERVATION: Owner/Operator did not conduct COMPLETE secondary containment testing within six months of installation and every 36 months thereafter and/or conduct testing in accordance with proper practices, protocols, or test methods. CORRECTIVE ACTION: Conduct secondary containment testing of the containment structures for the emergency generator piping (tray and day tank secondary) immediately. Conduct testing in accordance with proper practices, protocols, or test methods. Make notification of testing. The facility has failed to properly maintain the exemption provided by CHSC 25281.5 that requires documentation and maintenance of a log for visual inspections each time the generator runs. The generator run log shows monthly runs. The monthly DO looking at the piping when it is not running does not meet the requirement on a system that is run at least once per month. Oil collection cloths were observed in the secondary containment of the day tank where the tray to. [Truncated]

Violation Description:	Business Plan Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 08/30/2019. OBSERVATION: Owner/Operator did not properly display a valid Operating Permit from the CUPA. CORRECTIVE ACTION: Properly display a valid Operating Permit from the CUPA.
Violation Division:	Long Beach Environmental Heath
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	393208
Site Name:	Frontier California, Inc.: Clark CO
Violation Date:	06-19-2019
Citation:	HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description:	Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/30/2019. OBSERVATION: Owner/Operator failed to implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. CORRECTIVE ACTION: A hard copy or digital copy of the current Hazardous Materials Business Plan submittal shall be available and all persons at the facility qualified to serve as emergency coordinators must be thoroughly familiar with the contents and use of the HMBP, with the operations and activities of the facility, and with the locations of hazardous materials records maintained by the facility.

Eval Notes: Long Beach Fire Department Hazardous Materials Specialists, Brian Erdman was on site to conduct a Hazardous Materials Business Plan inspection. The purpose of the HMBP is to assist the LBFD during an emergency response to this facility. Ed provided consent to conduct the HMBP inspection. Any facility that stores Hazardous Materials at or above a reportable volume is required to complete an electronic HMBEP to the California Environmental Response System https://cers.calepa.ca.gov/ . The reportable volume for Hazardous Wastes / Materials or mixture is equal to or greater than 55 gallons of a liquid, 500 pounds of solid, or 200 cubic feet of a gas. The last submittal of the HMBP in CERS 10604053 was conducted on 3-9-2021. Ensure to Certify the HMBP annually if there are no changes and resubmit all sections of the HMBP every 3 years or within 30 days of a change owner, business address, business name, emergency contact information, inventory and/or other site [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And

CALIFORNIA STATE UNIVERSITY (Continued) **1000132557**

F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: P093

CALIFORNIA STATE UNIVERSITY (Continued) **1000132557**

Waste Description:	Phenylthiourea (Or) Thiourea, Phenyl-
Waste Code:	P096

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

CALIFORNIA STATE UNIVERSITY (Continued) **1000132557**

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

CALIFORNIA STATE UNIVERSITY (Continued) **1000132557**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
THE ENERGY INFORMATION ADMINISTRATION (EIA) IS AN INDEPENDENT AGENCY WITHIN THE U.S. DEPARTMENT OF ENERGY THAT DEVELOPS SURVEYS, COLLECTS ENERGY DATA, AND DOES ANALYTICAL AND MODELING ANALYSES OF ENERGY ISSUES. THE EIA-860 DATABASE SUPPORTS THE ANNUAL ELECTRIC GENERATOR REPORT AND CONTAINS ELECTRIC UTILITY AND NON-UTILITY (INCLUDING INDEPENDENT POWER PRODUCERS, COMBINED HEAT AND POWER PRODUCERS, AND OTHER INDUSTRIALS) GENERATOR-SPECIFIC PLANT DATA, INCLUDING COUNTY AND STATE LOCATION AND OWNERSHIP INFORMATION
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/25/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

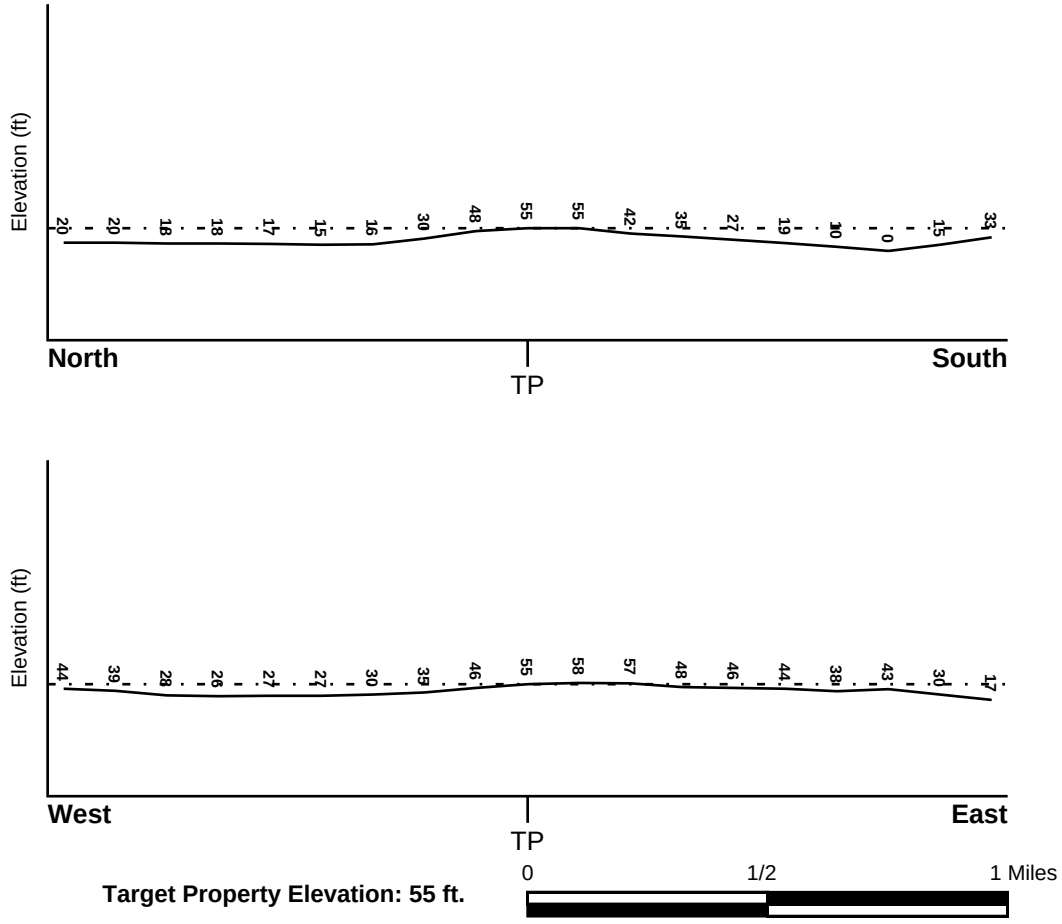

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 55 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1970F	FEMA FIRM Flood data

NORTH LONG BEACH (OE)	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Trip Generation Analysis and Vehicle Miles Traveled Screening

Kimley»Horn

TECHNICAL MEMORANDUM

To:	Amy L. Harbin, AICP, Planner Gina Casillas, Planner City of Long Beach
From:	Trevor Briggs, P.E. Angelo Pastelin, E.I.T.
CC:	Heidi Rous
Date:	August 8, 2024
Subject:	5150 Pacific Coast Highway Development, City of Long Beach Trip Generation Analysis and Vehicle Miles Traveled Screening

INTRODUCTION

The purpose of this technical memorandum is to establish the trip generation and determine if a vehicle miles traveled (VMT) and/or level of service (LOS) analysis is required for the proposed student housing project (the "Project") located at 5150 East Pacific Coast Highway (PCH) in the City of Long Beach ("City"). The findings of the trip generation analysis will help determine if a VMT or LOS assessment are required. Trip generation was based on the Institute of Transportation Engineers (ITE) *Trip Generation Manual,* 11th Edition (2021).

PROJECT DESCRIPTION

The Project site is located on Pacific Coast Highway (PCH) between Clark Avenue and E Anaheim Street located on a 51,048–square-foot (SF) triangular-shaped parcel. The Project site is bounded by PCH to the north and east, E Anaheim Street to the south, and Clark Avenue to the west. Surrounding land uses to the Project site include a recreational golf course (Recreational Park 18) to the south, residential uses to the west, as well as commercial and office uses to the north and east. The Project is shown in its regional vicinity in **Attachment A**. Long Beach Transit (LBT) has multiple stops that travel along the Project Site frontages, including Lines 41, 45, and 46, which travel west/east along East Anaheim Street and provides service to the Downtown Long Beach Metro Station 3.57 miles southwest and California State University, Long Beach (CSULB) 1.5 miles east of the Project. Additional bus lines are provided by LBT, 250 feet east of the Project Site, including Lines 171 and 175. LBT Line 111 and 112 are located 2,319 feet west of the Project Site and LBT Lines 91,121, and 173 are located 2,362 ft north of the Project Site, which provide service to CSULB. The CSULB Beachside shuttle is located on Pacific Coast Highway, 905 feet northwest of the Project site.

The current site is an existing 120,000 SF (109,600 leasable SF) seven-story office building with three levels of subterranean parking. The Project would adaptively reuse the entire existing building into housing for students enrolled in California State University, Long Beach (CSULB). The proposed Project would include 149 residential units, 593 total beds, supportive parking, administrative office uses, amenities, open space, and a kitchen and dining area, study room, laundry facilities, fitness area, and a men and women's locker room. The residential units would range from one-person suites to six-person suites. The Project would include three levels of subterranean vehicular parking with a total of 364 parking stalls (218 standard spaces, 19 accessible spaces, and 127 tandem spaces) and 150 bicycle parking spaces. The site plan is shown in **Attachment B**.

PROPOSED PROJECT TRIP GENERATION

Trip generation estimates for the proposed and existing uses on the Project site were calculated using the ITE *Trip Generation Manual*, 11th Edition trip generation rates for Off-Campus Student Mid-Rise Housing (Land Use Code 226), and General Office Building (Land Use Code 710:). The Off-Campus Student Mid-Rise Housing provides trip rates based on being within ½ mile of campus. To account for the proposed Project being over ½ mile from the CSULB campus, modified rates were developed using ITE trip generation data from the Off-Campus Student Apartment (Low-Rise) land use with the "adjacent to campus" subcategory.

The ITE *Trip Generation Manual*, 11th Edition, defines Off-Campus Student Apartments as complexes that house college students and are typically rented by the bedroom. The apartments typically also contain a common area or shared living space and range in dwelling unit size between a studio and five-bedroom apartment. .As a conversative approach, for trip generation purposes, the number of bedrooms equals the number of beds (593). Daily, morning (AM) peak hour, and evening (PM) peak hour trip generation estimates for the existing and proposed uses are summarized on **Table 1.**

Table 1: Project Trip Generation

Trip Rates								
Land Use	**ITE Code**	**ADT[1]**	**AM Peak Hour**			**PM Peak Hour**		
			In	**Out**	**Total**	**In**	**Out**	**Total**
Off-Campus Student Apartment (Mid-Rise) (Modified Rates for Over ½ Mile from Campus)	226	2.858	0.043	0.051	0.09	0.128	0.143	0.271
General Office Building	710	10.84	1.338	0.182	1.52	0.245	1.195	1.44

Project Trip Generation									
Land Use	**Size**	**Unit**	**ADT[1]**	**AM Peak Hour**			**PM Peak Hour**		
				In	**Out**	**Total**	**In**	**Out**	**Total**
Proposed Project									
Off-Campus Student Apartment (Mid-Rise) (Modified Rates for Over ½ Mile from Campus)	593	Bedrooms	1,695	25	30	55	76	85	161
Existing Land Use									
General Office Building	109.6	KSF	-1,188	-147	-20	-167	-27	-131	-158
Net Project Trips			**507**	**-122**	**10**	**-112**	**49**	**-46**	**3**

[1]*ADT=Average Daily Traffic, the daily trips generated by a site, in vehicles per unit.*

As shown in **Table 1**, after applying existing use trip credits for the displaced land use (General Office Building), the Project is anticipated to generate 507 net daily trips, 112 fewer trips during the weekday AM peak hour, and 3 trips during the weekday PM peak hour.

TRAFFIC STUDY REQUIREMENTS

The City of Long Beach *Traffic Impact Analysis Guidelines* (June 2020) states that a traffic impact study is generally required "for any project in Long Beach that is expected to generate 500 or more net new daily trips." Based on the City's traffic study guidelines, a traffic study would be needed if the project generates more than 500 net daily trips. However, it should be noted that the project generates less than 50 total net new peak hour trips (the City's threshold to analyze LOS at intersections). Therefore, a traffic impact study is not required for the proposed project.

VEHICLE MILES TRAVELED SCREENING

With the passage of Senate Bill (SB) 743, Vehicle Miles Travelled (VMT) has become an important indicator for determining if a development will result in a "significant transportation impact" under the

California Environmental Quality Act (CEQA). The Governor's Office of Planning and Research's (OPR) provides guidance on VMT and potential impacts for land use projects.

The City of Long Beach's *CEQA Transportation Thresholds of Significance Guide* (VMT Guidelines; May 2020) provides screening criteria to identify when a project should be expected to cause a less-than-significant impact without conducting a VMT analysis, similar to the guidance provided by OPR. Based on the City's guidelines, the assumption of a less-than-significant impact can be made for the following types of projects: projects within a transit priority area (within 0.5 miles of a transit station and 15 minutes or less service frequency during peak hours), residential or office developments located in areas with low VMT with similar characteristics to the surrounding developments.

Project VMT Analysis

For the Project, a less-than-significant impact can be presumed because the Project falls within a Transit Priority Area (TPA) and a low VMT/capita area. A map of TPAs within the City of Long Beach, as provided in the City's VMT Guidelines, is provided in **Attachment C.** A map of TPA within the City, as provided in the Southern California Coalition of Governments' (SCAG) *2020-2045 Regional Transportation Plan/Sustainable Communities Strategy*, is provided in **Attachment D.** A map o of the VMT per capita for all existing Long Beach residential areas, as provided in the City's VMT Guidelines, is provided in **Attachment E**.

Because the Project is located in a TPA and a low VMT area, the Project can be presumed to have a less-than-significant impact. Therefore, no further VMT analysis is required for the proposed Project.

CONCLUSION

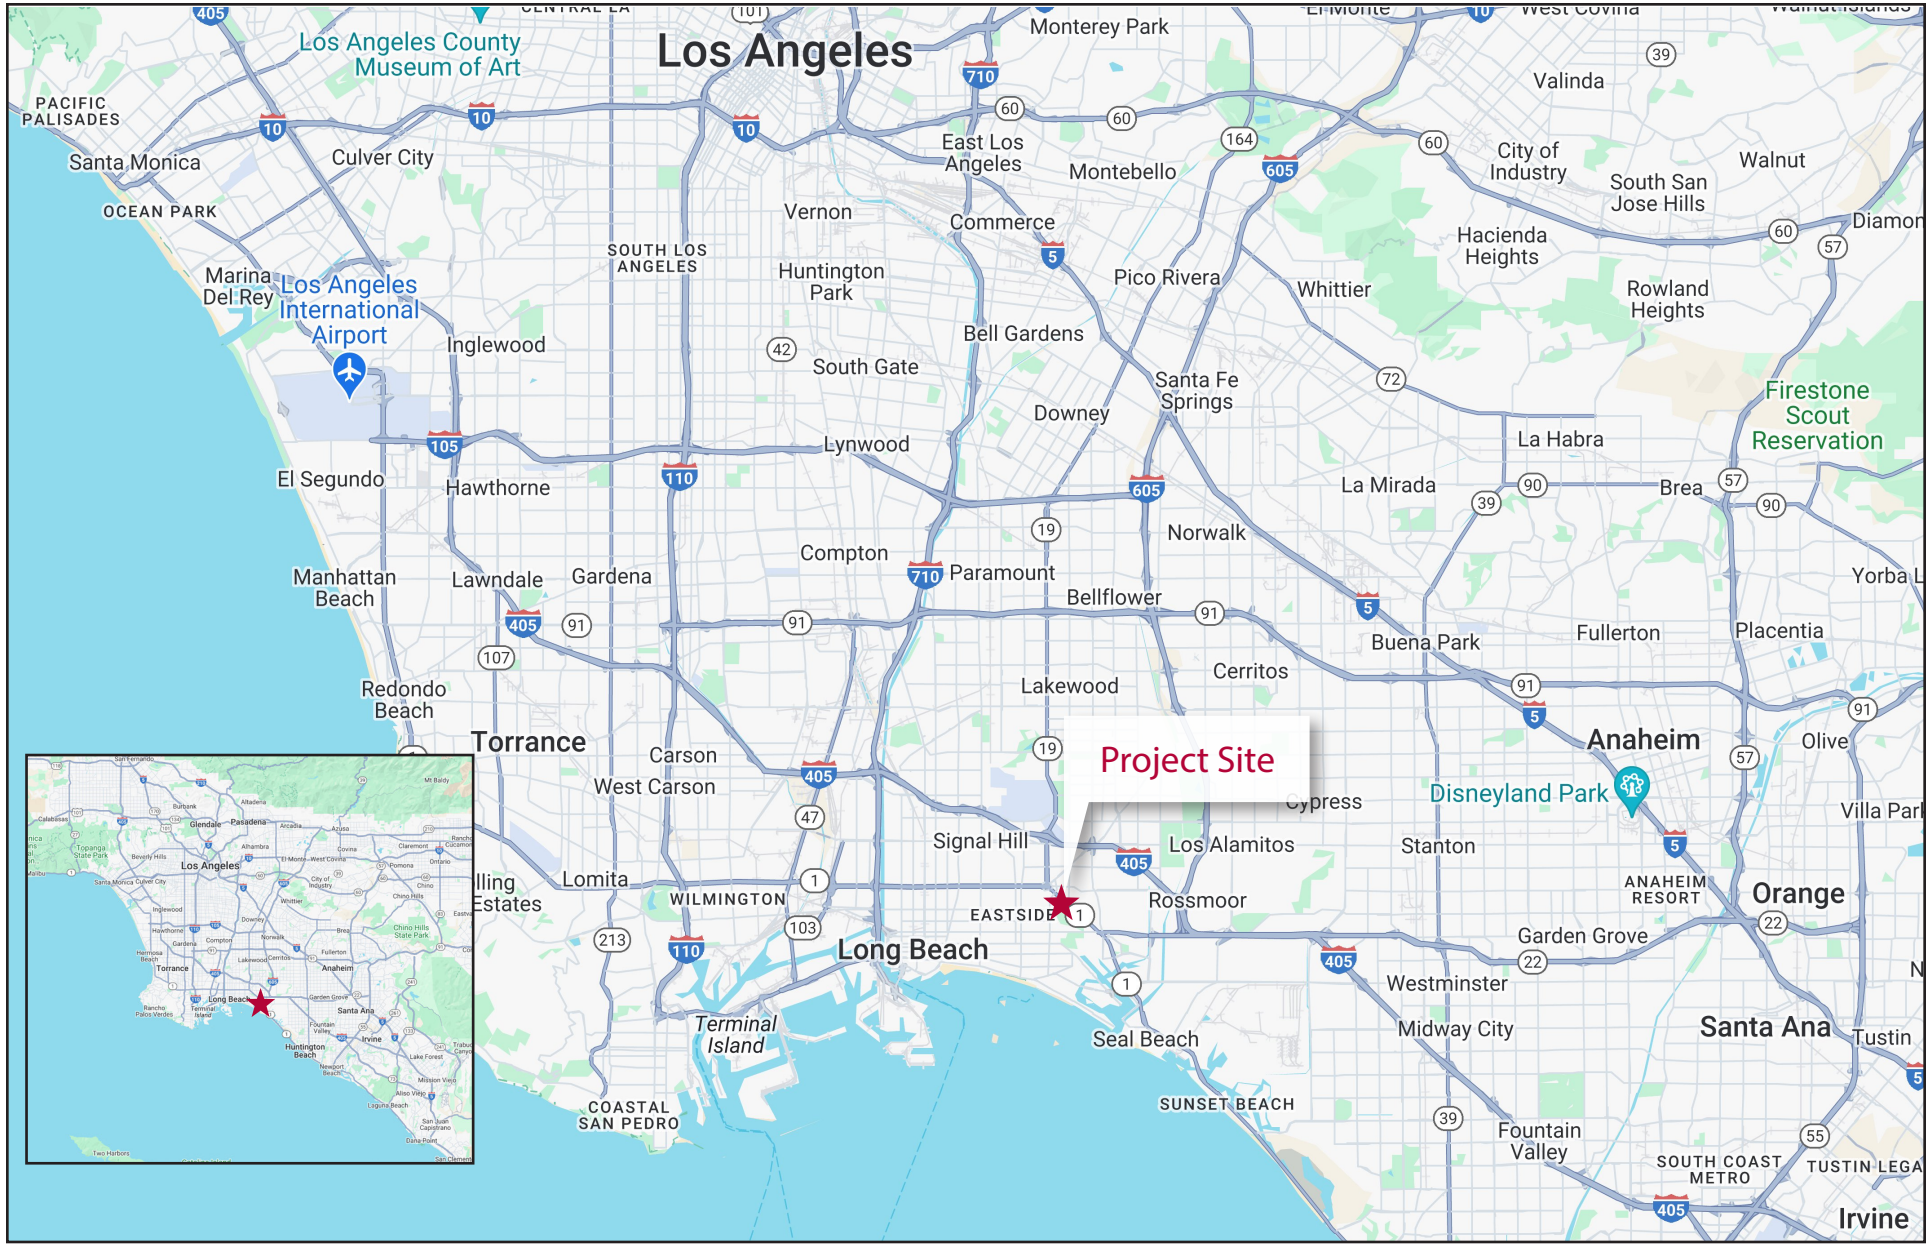

This memorandum has been prepared to estimate the proposed Project's trip generation and determine if a VMT analysis is required. Although the proposed Project would generate more than 500 net new daily trips, it would generate less than 50 total net new peak hour trips (the City's threshold to analyze LOS at intersections).Therefore, a traffic impact study is not required for the proposed Project. Additionally, the proposed Project would be screened from further VMT analysis.

The following are the key conclusions of the analysis:

- Compared to the existing use, the Project is anticipated to generate 507 daily trips, 112 fewer trips during the weekday AM peak hour, and 3 trips during the weekday PM peak hour.

- The Project would screen out of further VMT analysis based on the Project being in a TPA and a low VMT area (See **Attachment C** and **Attachment E**).

Major Transit Stops and Transit Priority Areas in City of Long Beach [Year 2045]

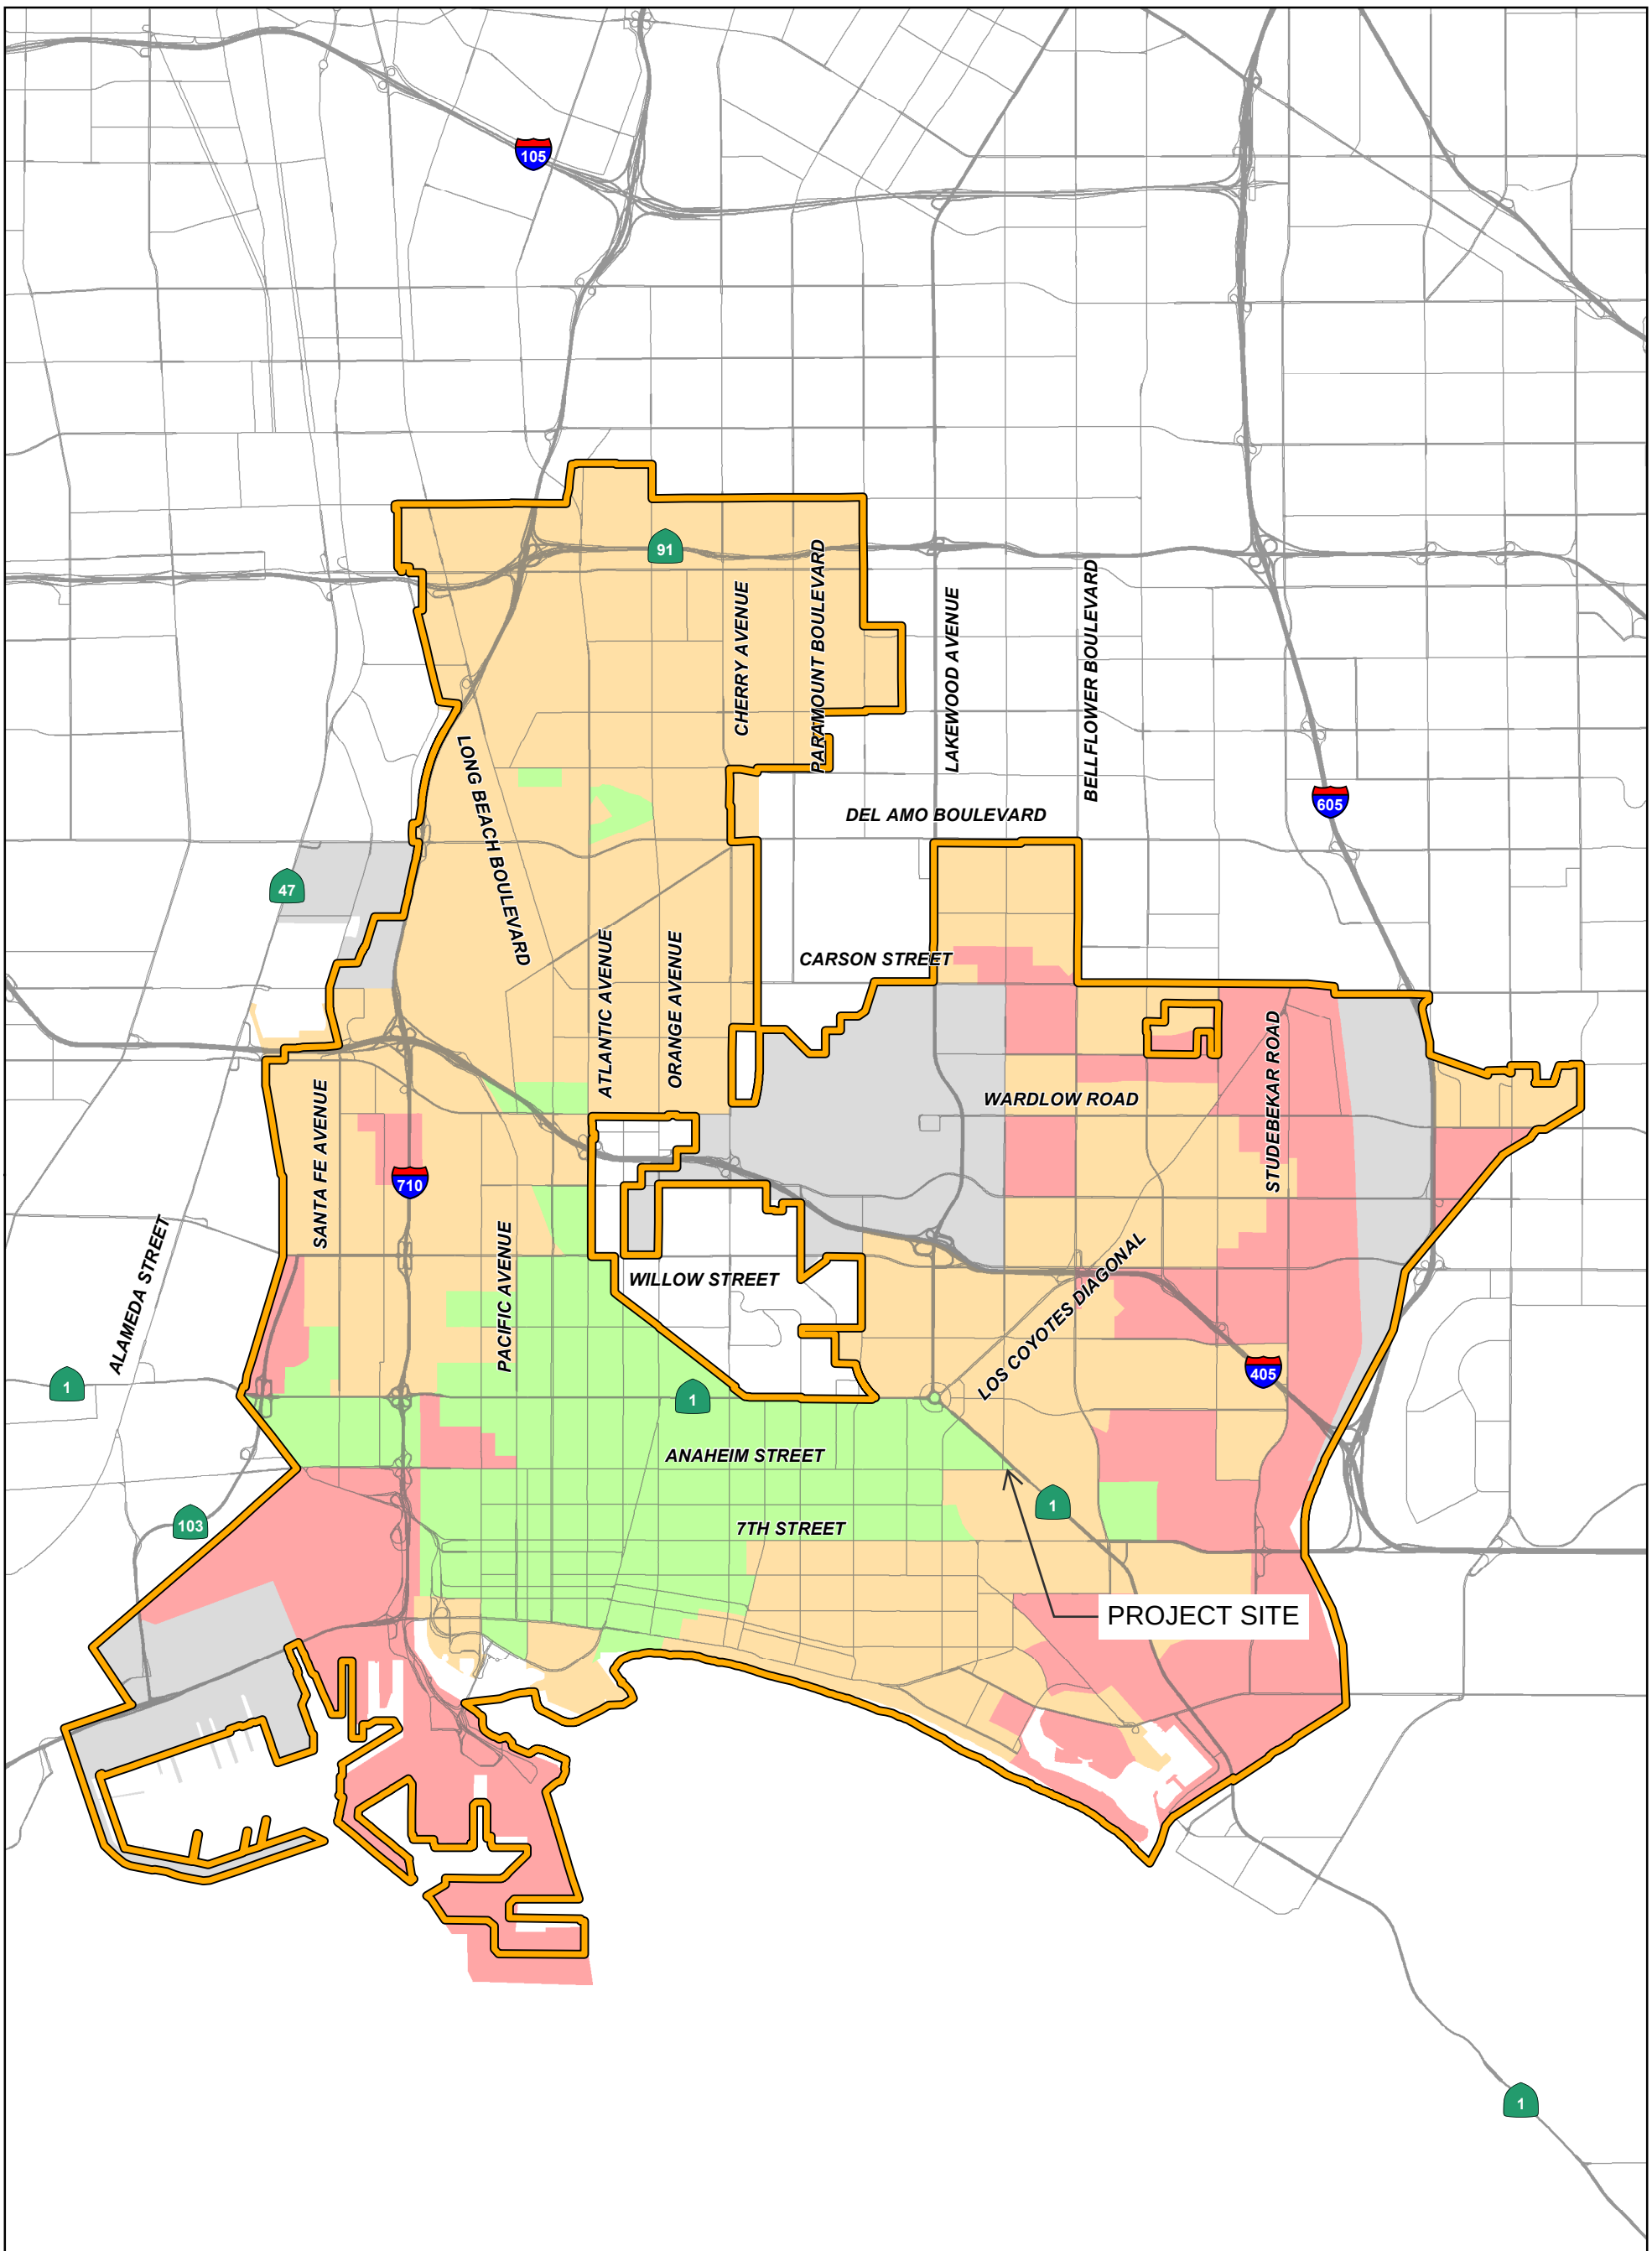

● Major Transit Stops Transit Priority Areas (Areas within One-Half Mile from Major Transit Stops)

Note: As defined in SB 743, "Transit priority area" means an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program adopted pursuant to Section 450.216 or 450.322 of Title 23 of the Code of Federal Regulations. Major transit stops are extracted from 2045 plan year of the Draft Connect SoCal. Please note that this map may undergo changes as SCAG continues to update its transportation network as part of the Connect SoCal development process and SCAG shall not be responsible for local jurisdiction's use of this map. Updates to this information will be forthcoming as information becomes available.
