RE: Phase I Environmental Site Assessment
Proposed Commercial Property
1340 West Avenue L
APNs: 3109-026-32, -40, -42 and -44 (Approximately 10 Acres)
Lancaster, California

Dear Mr. Torkan:

Krazan & Associates, Inc., (Krazan) completed a Phase I Environmental Site Assessment at the referenced site summarized in a report dated November 25, 2020. We appreciate the opportunity to serve your environmental due diligence needs. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in conjunction with the subject site as defined by E 1527-13.

If you have any questions regarding the information presented in this report, please call me at (661) 837-9200.

Respectfully Submitted,
KRAZAN & ASSOCIATES, INC.

William R. Cooper, P.G. 7427
Environmental Manager

APPROXIMATELY 10 ACRES
LANCASTER, CALIFORNIA**

1.0 EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the Proposed Commercial Property located at 1340 West Avenue L, Los Angeles County Assessor's Parcel Numbers 3109-026-32, -40, -42 and -44, in Lancaster, California (subject site). It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report. Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by the ASTM E 1527-13.

ASTM E 1527-13 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in conjunction with the subject site as defined by ASTM E 1527-13.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-13, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections*, or *LLPs*): that is, the practice that constitutes “*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B). This report was also conducted in conformance with the ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

2.2 Scope of Work

The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents, c) a review of historical aerial photographs, a review of pertinent building permit records, city directories, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR). The scope of work for this Phase I ESA conforms to ASTM E 1527-13. Krazan was provided written authorization to conduct the Phase I ESA by Mr. Julian Torkan with Westlanc Partners, LLC on November 9, 2020, in Krazan’s November 9, 2020 Proposal No. PB2018-058.

3.0 SITE DESCRIPTION

The subject site is located at the southeast corner of West 15th Street and West Avenue L with the associated address of 1340 W Avenue L, Los Angeles County Assessor’s Parcel Nos. 3109-026-32, -40, -42 and -44, in Lancaster, California. The subject site comprises approximately 10 acres and is currently vacant land in a mixed commercial and residential area of Lancaster.

General property information and property use are summarized in the following Table I. Refer to Figures No. 1 – 4 following the Reference Section.

TABLE I
Subject Site Information Summary

Current Owner:	Westlanc Partners, LLC
Assessor's Parcel Number:	3109-026-32, -40, -42 and -44
Address:	1340 West Avenue L
Historical Addresses:	None identified
General Location:	Southeast corner of West 15 th Street and West Avenue L
Acreage:	Approximately 10 acres
Existing Use:	Vacant
Original Construction Date:	1952
Proposed Use:	Commercial
Topographic Map:	U.S. Geological Survey, 7.5 minute Lancaster West, California topographic quadrangle map, dated 1958 and photorevised 1974.
Topographic Map Location:	A portion of the northeast quarter of Section 33, Township 7 North, Range 12 West San Bernardino Baseline and Meridian
Latitude/Longitude:	34.6593 / -118.1554
Topography:	Level; approximately 2,460 feet above mean sea level
Approximate Depth to Groundwater:	Approximately 200 feet below ground surface (bgs), County of Los Angeles Department of Public Works (CLADPW).
Regional Groundwater Flow Direction:	Northeast, CLADPW

3.1 Geology and Hydrogeology

The Antelope Valley, which includes the Lancaster area, is within the southwestern portion of the Mojave Desert Geometamorphic Providence. Antelope Valley is bounded by the Tehachapi Mountains of the Sierra Nevada Providence to the northwest and the San Gabriel of the Transverse Ranges to the southwest. A major portion of the Mojave Desert Providence is underlain by Mesozoic granitic rocks. Quarternary alluvium covers a majority of the Antelope Valley floor. Both the Tehachapi and San Gabriel mountain ranges are geologically young mountain ranges and possess active and potentially active fault zones.

The approximate depth to first groundwater in the area of the subject site is 200 feet below existing grade. Significant perched groundwater is not known to exist in the vicinity of the subject site. The general direction of groundwater flow is reported to be toward the northeast in the vicinity of the subject site.

4.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Mr. William Cooper, Krazan's Environmental Professional, on November 12, 2020. Krazan's Environmental Assessor was unaccompanied during the site reconnaissance. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

4.1 Observations

The following Table II summarizes conditions encountered during our site reconnaissance. A discussion of visual observations follows table below. Refer to the Site Map (Figure No. 3) and color photographs following the text for the locations of items discussed in this section of the report.

TABLE II
Summary of Site Reconnaissance

Feature	Observed	Not Observed
Structures Existing		X
Evidence of Past Uses (<i>foundations</i>)	X	
Hazardous Substances and/or Petroleum Products (including containers)		X
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or Evidence of USTs		X
Evidence of Underground Pipelines		X
Strong, Pungent, or Noxious Odors		X
Stained Soil and/or Pavement		X
Pools of Liquid Likely to be Hazardous Materials or Petroleum Products		X
Drums		X
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment		X
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air conditioning (HVAC)		X
Stains or Corrosion on Floors, Walls, or Ceilings		X
Floor Drains, Sumps, or Oil/Water Clarifiers		X
Storm Drains		X
Pits, Ponds, or Lagoons (Stormwater Basin)		X
Soil Piles		X
Stressed Vegetation		X
Railroad tracks/spurs		X
Waste or Wastewater (including stormwater) Discharges to Surface/ Surface Waters		X
Wells (irrigation, domestic, dry, oil wells, monitoring wells)		X
Septic Systems		X

The subject site comprises approximately 10 acres of land located at 1340 West Avenue L in Lancaster, California. The subject site includes Los Angeles County Assessor Parcel Nos. 3109-026-32, -40, -42 and -44. The subject site is bordered to the north by West Avenue L, West 15th Street to the west, State Highway 14 to the east and vacant and commercial properties to the south.

- The subject site was observed to be vacant land with sparse vegetation including weeds, grasses, shrubs and small trees. Minor dumping of refuse household items was noted on the subject site.
- Two concrete-pad foundations were observed within the northwestern portion of the subject site. The two concrete-pad foundations are located within the northern portion of APN 3109-026-32. The concrete pads cover areas of approximately 1,000 square feet (sq. ft.) and 1,200 sq. ft. No drains or sumps or features of environmental concern were observed in association with these concrete pads. The location of the concrete pads appears to be consistent with the location of a former dwelling and garage noted from historical aerial photographs reviewed as part of this Phase I ESA (Refer to Section 6.0).
- No pole- or pad-mounted transformers or high-tension electrical power lines were observed on the subject site.
- During the visual observation of the subject site, no hazardous materials/waste were observed at the subject site; exposed surface soils did not exhibit obvious signs of discoloration. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of underground storage tanks (USTs) was noted within the area observed. No standing water was observed on the subject site. Indications of former structures (concrete -pad foundations) were observed on the subject site at the subject site.

4.2 Utilities

Based on Krazan's research and observations of the subject site during the November 12, 2020 site reconnaissance, no utilities are currently provided for the subject site.

Potable Water

The water purveyor for the subject site area is the City of Lancaster. It is the responsibility of the City of Lancaster Water Division to provide customers with potable water in compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public.

Sewer Service

Krazan has conducted a previous Phase I ESA for the subject site and as part of Krazan's October 2014 Phase I ESA (refer to Section 5.1). On October 14, 2014, the City of Lancaster was contacted for information regarding sewer service at the subject site. According to Mr. Barry Hardy with the City of Lancaster Water and Sewer Division, sewer service has not been provided to the subject site address of 1340 West Avenue L. The City of Lancaster should be contacted for information regarding sewer services in association with any future planned development at the subject site

Krazan's review of historical aerial photographs indicates that dwellings/buildings have been located at the subject site since at least 1952. Septic systems were not observed at the subject site during the November 12, 2020 site reconnaissance. However, based on information provided by the City of Lancaster, it is likely that septic systems were located at the subject site in association with the on-site dwelling. The presence of a septic system is not anticipated to adversely impact the subject site due to its presumed use for domestic purposes. If a septic system(s) is/are identified during any future redevelopment of the subject site, it/they should be properly abandoned/closed or destroyed in accordance with any requirement of the City of Lancaster or Los Angeles County.

4.3 Adjacent Streets and Property Usage

The following Table III summarizes the current adjacent roads and adjacent property uses observed during the site reconnaissance:

TABLE III
Adjacent Streets and Property Use

Direction	Adjacent Street	Adjacent Property Use
North	West Avenue L	Vacant and residential to the northwest
East	Antelope Valley Freeway 14	Antelope Valley Freeway 14 south-bound on-ramp
South	None	Vacant land and LACWD water tank
West	West 15 th Street	Vacant land residential to the southwest

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials are stored or handled at the adjacent

4.4 ASTM Non-Scope Considerations

According to ASTM E 1527-13, there may be environmental issues or conditions at the subject site that are outside the scope of the Phase I ESA practice (non-scope considerations). Some substances may be present at the subject site in quantities and under conditions that may lead to contamination of the subject site or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM non-scope considerations are discussed below.

Asbestos-Containing Materials

Asbestos is a group of naturally occurring mineral fibers that have been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos has been used for a wide range of manufactured goods, mostly in building materials, vehicle brakes, and heat-resistant fabrics, packaging, gaskets, and coatings. When asbestos-containing materials (ACMs) are damaged or disturbed by repair, remodeling, or demolition

activities, microscopic asbestos fibers may become airborne and can be inhaled into the lungs, where they can cause significant health problems. No structures located on the subject site; therefore, ACMs do not appear to be an environmental concern.

Lead-Based Paint

Although lead-based paint (LBP) was banned in 1978, many building constructed prior to 1978 have paint that contains lead. Lead from paint, chips, and dust can pose serious health hazards if not addressed properly. No structures located on the subject site; therefore, LBP does not appear to be an environmental concern.

Mold and Moisture Intrusion

A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce spores to reproduce, just as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth. Moisture control is the key to mold control. Molds need both food and water to survive; since molds can digest most things, water is the factor that limits mold growth. No structures located on the subject site; therefore, mold and moisture intrusion is not an environmental concern.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Health Services (CDHS) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L).

The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones.

Zone 1, being those areas with the average predicted indoor radon concentration in residential dwellings exceeds the EPA Action Limit of 4.0 pCi/L; Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L; and Zone 3 where average predicted radon levels are below 2.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

Wetlands

As defined by the U.S. EPA and the Department of Army, Corps of Engineers, wetlands are “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.” Jurisdictional wetlands are regulated under Section 404 of the Clean Water Act (1972, 1977, and 1987, and also the 1985 and 1990 Farm Bills), and are important for protection of aquatic waterfowl and species, water purification, and flood control. According to current Corps of Engineers information, three basic criteria are currently used to define wetlands:

- Wetland hydrology - areas exhibiting surface or near-surface saturation or inundation at some point in time (greater than 12.5 percent of growing season defined on basis of frost-free days) during an average rainfall year.
- Hydrophilic vegetation - frequency of occurrence of wetland indicator plants (plant life growing in water, soil, or substrate that is periodically deficient in oxygen as a result of excessive water content).
- Hydric soil - landscape patterns identified by saturation, flooding, or ponding long enough during the growing season (generally seven days) which develop characteristic color changes in the upper part of the soil as a result of anaerobic conditions.

Based on Krazan's reconnaissance of the subject site, evidence was not apparent to suggest that the site contained a wetland. Furthermore, according to the U. S. Fish & Wildlife Service (USFWS) National Wetlands Inventory available via the USFWS Internet website, the subject site does not contain a designated wetland. Therefore, at this time, regulations pertaining to wetlands do not appear to impact the subject site.

Environmental Non-Compliance Issue

No material non-compliance issue was identified in connection with the subject site in the process of preparing this report.

Activity and Use Limitations

No activity and use limitations were identified in connection with the subject site in the process of preparing this report.

5.0 USER-PROVIDED INFORMATION

A review of User-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Final Title Report and Environmental Lien Search

A Final Title Report or Environmental Lien Search were not prepared by, or provided to, Krazan during the course of this assessment. Therefore, the absence of a Final Title Report or Environmental Lien Search represents a data gap.

5.2 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site.
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.
4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
5. Commonly known or *reasonably ascertainable* information about the *property*.

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
7. The reason for preparation of this Phase I ESA.

On November 17, 2020, Krazan received a completed user questionnaire for the subject site from Mr. Julian Torkan with Westlanc Partners, LLC, the Phase I ESA user. Please refer to Appendix A for a copy of the completed Phase I ESA User Questionnaire.

According to the questionnaire responses, Mr. Torkan, to the best of his knowledge as the user of this Phase I ESA and the owner of the subject site, was not aware of any environmental cleanup liens and activity or land use limitations which have been filed or recorded against the subject site. Mr. Torkan has no specialized knowledge or experience of the prior nature of the chemical utilization on the subject site or nearby properties. Mr. Torkan indicated that he did not have knowledge of the past or current presence of unauthorized spills or chemical releases or of any environmental cleanups in connection with the subject site. Additionally, Mr. Torkan indicated that the reason for preparation of this Phase I ESA is related to a requirement by the City of Lancaster for development of the subject site and that the question regarding the purchase price is not applicable.

In addition to the user questionnaire, Mr. Torkan completed an owner questionnaire that is also presented in Appendix A. According to Mr. Torkan's responses to the owner questionnaire, he acquired the vacant property in 2014 and, prior to his ownership, the subject site included a small house and storage building that were permitted and demolished approximately 10 years ago and that the subject site has remained undeveloped since that time. Additionally, Mr. Torkan informed Krazan via email, that asbestos-containing building materials were removed and properly disposed to the appropriate facility during the demolition of the former dwelling.

6.0 SITE USAGE SURVEY

The property usage survey included assessing property history, and reviewing local, state, and federal regulatory agency records.

6.1 Site History

A review was conducted of historical aerial photographs, City of Lancaster Building Department (CPBD) records, reasonably ascertainable Haines Criss-Cross Directories (HCCDs) and Polk Guide Directories

(PGDs), Sanborn Fire Insurance Maps (SFIMs), and a Phase I ESA interview was conducted with the present owner to assess the history of the subject site.

Previous Environmental Assessment

Krazan has conducted two previous Phase I ESAs for the subject site. The reports are titled *Proposed Commercial Property located at 1340 West Avenue L, Los Angeles County Assessor's Parcel Numbers 3109-026-32, -40, -42 and -44, in Lancaster, California* and are dated October 20, 2014 and October 3, 2018. In summary, the 2014 and 2018 Phase I ESAs identified no RECs, HREC or CRECs in association with the subject site. All pertinent information from the 2014 and 2018 Phase I ESAs has been included in this report and its appendices.

Aerial Photograph Interpretation

Historical aerial photographs dated 1948, 1953, 1968, 1972, 1983, 1989, 1994, 2009, 2012, and 2016 were reviewed to assess property history. These photographs were provided by EDR. Aerial photograph coverage for the years prior to 1948 was not reasonably ascertainable or available. The aerial photograph summary is provided in the following Table IV. Please refer to Appendix B for a copy of the Historical Aerial Photographs.

TABLE IV
Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1948 1" = 500'	Undeveloped Land	The subject site and all adjoining properties appear to be undeveloped native desert land. West Avenue L is located adjacent to the north.
1953 1" = 500'	Rural Residential	The subject site appears to be developed within the northwestern portion with a rural residential structure and outbuilding. The property adjacent to the east is developed with several buildings. Adjacent properties to the west and south are undeveloped. The adjacent property to the north, across West Avenue L is in agricultural use.
1968 1" = 666'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1953 aerial photograph with the exception of additional features or outbuildings on the subject site and rural residential development of the southwest and southern adjacent properties. Additionally, the eastern adjacent property is being developed as the Antelope Freeway.
1972 1" = 500'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1968 aerial photograph except for the construction of the Antelope Freeway and southbound onramp.
1983 1" = 500'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1972 aerial photograph except for residential development of the northwest adjacent property.
1989 1" = 666'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1983 aerial photograph.

TABLE IV (continued)
Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1994 1" = 666'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1989 aerial photograph.
2009 1" = 666'	Rural Residential	Conditions on the subject site and adjacent properties appear similar to the 1994 aerial photograph.
2012 1" = 666'	Vacant	The subject site appears to be vacant with the exception of the footprint of two former buildings. Adjacent properties appear similar to the 2009 aerial photograph.
2016 1" = 666'	Vacant	Conditions on the subject site and adjacent properties appear similar to the 2012 aerial photograph.

City of Lancaster Building Department

As part of Krazan's October 2014 Phase I ESA, the City of Lancaster Building Department (CLBD) was contacted for information regarding the subject site address of 1340 West Avenue L and the associated subject site APNs. The Building permits on file for the subject site with CLBC are discussed below. Please refer to Appendix C for a copy of the Building Department Records.

According to the records received from CLBD, a demolition permit was finalized for the subject site address of 1340 West Avenue L on 04/25/2012 for demolition of a 1,350 sq. ft. structure and a 1,584 sq. ft. structure. The earliest permit on file for the subject site is issued on 06/27/51 and references construction of a dwelling, breezeway and garage. Subsequent permits from 1952 reference gas and electrical services and a septic tank for house sewer service. A 1979 permit and map drawn for the subject site indicate that a 1,000-gallon septic tank was installed adjacent to the east of a new garage. The map additionally indicates that a former cesspool was located south of the existing residence at that time. On November 12, 2020, Krazan contacted CLBD for any new information regarding the subject site since October 2014. According to a representative with CLBD, no permits have been issued for the subject site since at least 2014.

Haines Criss-Cross and Polk Guide Directories

Krazan contracted with EDR to provide a review of available city directories for the subject site address of 1340 West Avenue L utilizing approximately five-year intervals. According to the City Directory Report, the subject site address is not identified. However, no listings of an environmental concern were noted for the area of the subject site. Additionally, building permits discussed above indicate that the subject site address of 1340 West Avenue L was a residential home constructed in 1951 and demolished in 2012.

Sanborn Fire Insurance Maps

Krazan reviews SFIMs to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan contracted with EDR to provide copies of available SFIMs for the subject site and the adjacent properties as far back as 1867. EDR's search of SFIMs revealed no coverage for the subject site and the adjacent properties. Please refer to Appendix D for a copy of the EDR, *SFIM No Maps Available* Report.

6.2 Interviews

Krazan conducted an interview with the owner of the subject site. The interview is designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

Phase I Environmental Site Assessment Interview – Owner Representative

Mr. Julian Torkan, a representative of Westlanc Partners, LLC, the owner of the subject site, was interviewed as part of the October 2014 and October 2018 Phase I ESAs and Mr. Torkan has completed an owner questionnaire as part of this November 2020 Phase I ESA.

During the 2014 interview, Mr. Torkan indicated that a dwelling formerly occupied the subject site and that the building was demolished under a City of Lancaster permit during March 2012. According to Mr. Torkan, the dwelling was approximately 800 square feet in area and was located on the northern concrete pad within the northern portion of the subject site. Mr. Torkan stated that the property had been vacant land since the demolition of the dwelling. Mr. Torkan is not aware of specific chemicals, spills, releases or hazardous materials or wastes in connection with the subject site. Mr. Torkan also indicated that he is not aware of any obvious indicators that point to the presence or likely presence of contamination at the subject site. According to Mr. Torkan, to the best of his knowledge, no use, storage, or disposal of hazardous materials; no existing or former ASTs or USTs; no hazardous materials spills, no environmental cleanups, no on-site treatment and/or discharge of waste; no environmental liens, AULs, engineering or institutional controls, no on-site leach fields, dry wells, sumps, or disposal ponds; no buried materials; no monitoring, domestic, or irrigation wells; or any items of environmental concern are associated with the subject site. Mr. Torkan did not have a contact name or phone number for the previous owner(s).

As part of the 2018 Phase I ESA, Mr. Torkan stated that the subject site had remained undeveloped with no activities of any kind since 2014. On November 16, 2020, as part of this Phase I ESA, Mr. Torkan completed user and owner questionnaires that are discussed in Section 5.2 and are included in Appendix

A. In summary, Mr. Torkan reiterated that a dwelling formerly occupied the subject site and that the building was demolished under a City of Lancaster permit prior to his acquisition of the property in 2014 and that the subject site has remained undeveloped with no activities of any kind since 2014. Additionally, on November 18, 2020, Mr. Torkan informed Krazan via email, that asbestos-containing building materials were removed and properly disposed to the appropriate facility during the demolition of the former dwelling.

Previous Subject Site Owners/Occupants – An interview with a previous owner/occupant of the subject site was not reasonably ascertainable. Consequently, information regarding the history and historical uses of the subject site obtained from an interview of a previous owner and/or occupant constitutes a data gap.

6.3 Agricultural Chemicals

Review of historical aerial photographs indicates the subject site was not utilized for agricultural purposes from at least 1948 to present. Consequently, the use, storage and application of agricultural chemicals at the subject site are not considered an environmental concern.

6.4 Regulatory Agency Interface

A review of regulatory agency records was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses. Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

County of Los Angeles Public Works Department –Environmental Programs Division

The County of Los Angeles Public Works Department- Environmental Programs Division (EPD) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in Lancaster, California. As part of Krazan's October 2014 Phase I ESA, on October 10, 2014, Krazan submitted a records review request for hazardous materials records including USTs, leaking underground storage tanks (LUSTs), hazardous materials business plans (HMBPs), hazardous material releases, and/or environmental cleanup records for the subject site address of 1340 West Avenue L. On October 14, 2014, Krazan received a facsimile letter from EPD indicating no records were found for the subject site. Please refer to Appendix E for a copy of EPD's response. Based on Krazan's research and

statements from the owner of the subject site, no activities have been conducted at the subject site since 2014; therefore, no records are on file with EPD for the subject site.

State of California Regional Water Quality Control Board - Geotracker

Krazan's review of the State of California Regional Water Quality Control Board (RWQCB) Geotracker database available via the RWQCB Internet Website indicated that no LUST sites, land disposal sites, or military sites are listed for the subject site or adjacent properties. Additionally, no permitted UST sites were determined to be located on or adjacent to the subject site. RWQCB records document a farm tank UST within the vicinity of the subject site that is discussed below.

Herbert O Kellogg
42653 15th Street West
Lancaster, California

172 feet southwest

The RWQCB's Geotracker database identifies this property as the former location of a 1,000-gallon gasoline tank, identified as a farm tank. Geotracker and other databases do not identify spills, releases or investigations in association with this former farm tank. Based on the removal of the UST and the lack of evidence of a release, this former farm tank does not appear to represent a significant environmental concern to the subject site.

State of California Department of Toxic Substances Control - Envirostor

Krazan's review of the State of California Department of Toxic Substances Control (DTSC) Envirostor database available via the DTSC's Internet Website indicated that no State response sites, voluntary cleanup sites, school cleanup sites, or military or school evaluation sites are listed for the subject site, the adjacent properties, or properties located within 500 feet of the subject site. Additionally, no Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site.

California Department of Conservation, California Geologic Energy Management Division

Krazan's November 10, 2020 review of the State of California Department of Conservation, California Geologic Energy Management Division (CalGEM) Online Mapping System (DOMS) indicated that no plugged and abandoned or producing oil wells are located on or adjacent to the subject site.

Local Area Tribal Records

No Indian reservations, USTs on Indian land, or LUSTs on Indian land were reported on the subject site, adjacent properties, or vicinity properties in the EDR-provided database report.

6.5 Regulatory Agency Lists Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. Refer to the following Table V for a summary of the listed properties located within the specified ASTM Search Radii. The actual distances of the listed properties which are summarized in the table below, are based on observations during Krazan's site reconnaissance. No EDR-listed unmapped (non geocoded) sites were determined to be located on or adjacent to the subject site. Please refer to Appendix E for a copy of the EDR, Radius Map Report.

The subject site and a vicinity property were listed in the EDR-provided government database report and are discussed below:

Westlanc, Inc.

subject site

1340 West Avenue L

Lancaster, California

EDR identified the subject site address within the Hazardous Waste Tracking System (HWTS) database that is maintained by the Department of Toxic Substances Control (DTSC) and tracks the disposal of hazardous wastes. According to the property owner Mr. Torkan, during the demolition of the former dwelling, asbestos containing building material (ACBM) was identified and properly disposed of to the appropriate disposal facility. Based on the dates associated with the dwelling demolition and the date of the HWTS activity, this database listing appears to be confirmation of the disposal of ACBMs. The former presence and disposal of ACBMs does not pose a significant environmental concern to the subject site.

Herbert O Kellogg

172 feet southwest

42653 15th Street West

Lancaster, California

EDR identified this vicinity property in the Historical UST database maintained by the RWQCB. This historical farm tank was discussed in detail in Section 6.4. Based on the removal of the UST and the lack of evidence of a release, this former farm tank does not appear to represent a significant environmental concern to the subject site.

No sites with a reported release of hazardous materials to the subsurface were reported within a one-quarter mile radius of the subject site. In general, only potentially hazardous materials released from facilities located approximately up-gradient and within a few hundred feet of the site, or in a cross-gradient direction close to the site, are judged to have a reasonable potential of migrating to the site. This opinion is based on the assumption that materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow.

The remaining properties identified by EDR within the specified search radius of the subject site, which appeared on local, state, or federally published lists of sites that use of have had releases of hazardous materials, were determined through Krazan's field observations to be of sufficient distance and/or situated hydraulically cross/downgradient of the subject site, such that impacts to the subject site are not likely.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR database report.

Hazardous Materials Migration in Vapor

Hazardous materials or petroleum product vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or

groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on Krazan's observations and review of the EDR regulatory database report, no listings of concern were determined to be associated with the subject site, adjacent properties, or properties located within the subject site vicinity. However, the screening process for vapor migration in connection with the subject site is described in the ASTM E 2600-10 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, an industry consensus methodology to assess vapor migration which is not included in the scope of work of this Phase I ESA.

7.0 DISCUSSION OF FINDINGS

Historical Uses

Based on Krazan's review of historical aerial photographs, a site reconnaissance, and contacts with the local regulatory agencies and the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the historical uses of the subject site.

Current Uses

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with the owner of the subject site, there is no evidence that recognized environmental conditions exist in connection with the current uses of the subject site.

Adjacent or Vicinity Property Uses

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no evidence that RECs exist in connection with the subject site from adjacent property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-13 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are available and likely to be useful. Data failure is one type of data gap. The following is a summary of data gaps encountered in the process of preparing this report including an observation as to the presumed significance of that data gap to the conclusions of this assessment.

- Unknown History Back to 1940 (Section 6.1)

Historical uses of the subject site prior to 1948 back to 1940 were not reasonably ascertainable utilizing the standard historical sources consulted during this assessment. Taken in consideration with the available information obtained in the course of preparing this report in conjunction with professional experience, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, site history prior to 1948 is unknown.

- Absence of Final Title Report or Environmental Lien Search (Section 5.1)

A Final Title Report or Environmental Lien Search were not provided by the Phase I ESA user; therefore, a data gap exists. Taken in consideration with the available information obtained in the course of preparing this report, there is no evidence to suggest that this data gap might alter the conclusions of this assessment. However, the contents of a Final Title Report or Environmental Lien Search are unknown.

8.0 CONCLUSIONS/OPINIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report. During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in conjunction with the subject site.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM E 1527-13, and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used. The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historic uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used. This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan.

The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry.

11.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, and generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

If you have any questions or if we can be of further assistance, please do not hesitate to contact our office at (661) 837-9200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The “control” is represented by the restriction that the property use remain commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as an REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the User with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the User's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-13 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

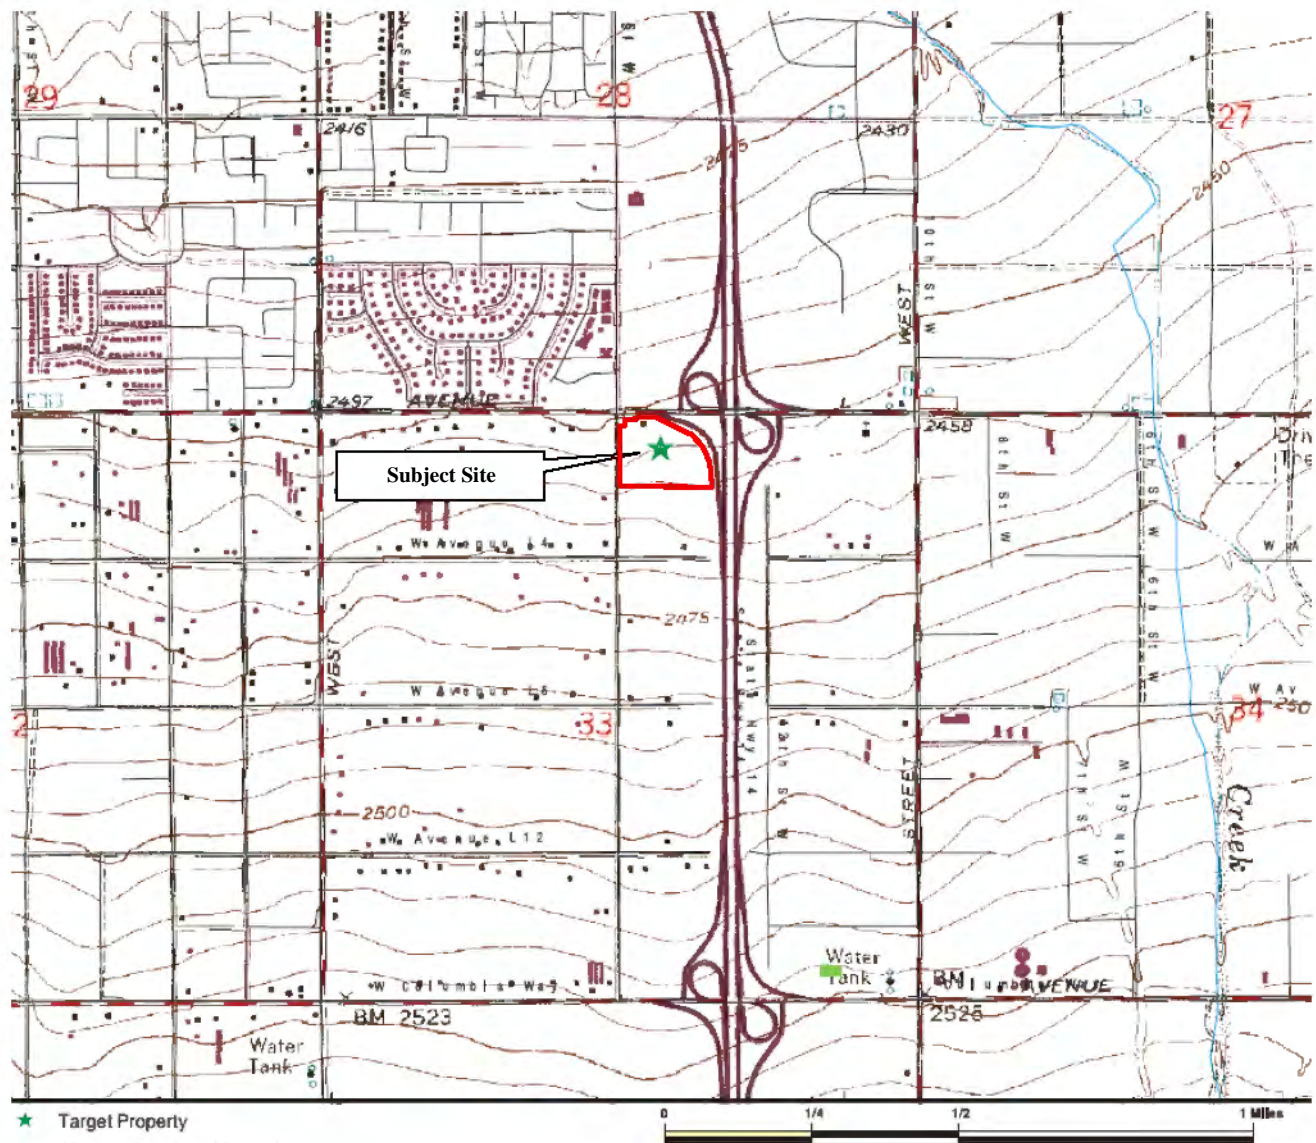

GLOSSARY OF TERMS (continued)

AAI	All Appropriate Inquiries	MTBE	Methyl Tertiary Butyl Ether
AC	Asphalt Concrete	MFR	Multi-Family Residential
ACM	Asbestos-Containing Materials	ND	Nondetectable
AOC	Area of Concern	NFA	No Further Action (letter)

Phase I ESA User Questionnaire

Project Information:

Project Name: Westlanc	Property Address: 1340 West Avenue L;
Krazan Project Number:024-20089	Parcel Number: APNs 3109-026-32, -40, -42 and -44

Questionnaire Completed By:

Name: Westlanc Partners, LLC	Address: 1401 Westwood Blvd., #230
User: Julian F. Torkan	City/State/Zip: Los Angeles, CA 90024
Title: Managing Member	Phone: 310-446-6614 x101
Date of Response: 11/16/2020	Email julian@mcgla.net

Introduction

"In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the 'Brownfields Amendments'), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that 'all appropriate inquiry' is not completed"- American Society for Testing and Materials (ASTM) E1527-13 Appendix X3: User Questionnaire

1. Are you aware of any environmental cleanup liens against the subject site that are filed or recorded under federal, tribal, state, or local law?

No

2. Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No

3. As the user of the Phase I Environmental Site Assessment (ESA), do you have any specialized knowledge or experience related to the subject site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No

4. Does the purchase price being paid for the subject site reasonably reflect the fair market value of the subject site? Yes

A. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject site?

5. Are you aware of commonly known or reasonably ascertainable information about the subject site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

A. Do you know the past uses of the subject site? If so, briefly explain. No, always been vacant land with a small house and small metal storage building.

B. Do you know of specific chemicals that are present or once were present at the subject site? If so, briefly explain.

No

C. Do you know of spills or other chemical releases that have taken place at the subject site? If so, briefly explain.

No

D. Do you know of any environmental cleanups that have taken place at the subject site? If so, briefly explain.

No

6. As the user of the Phase I ESA, based on your knowledge and experience related to the subject site, are there any obvious indicators that point to the presence or likely presence of contamination at the subject site?

None

7. What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development; etc.)

It's for the planning department of the city of Lancaster

I, the user of this Phase I ESA (or authorized representative of the User), do hereby attest that I have carefully considered the questions herein and have presented answers to the best of my knowledge and ability based upon the Responsibilities of the User as required within ASTM E1527-13 guidance.

Krazan Project No 024-20089**

Date 11/16/2020 Completed By: Julian F. Torkan, Managing Member

Site Location/Address: 1340 West Avenue L; APNs 3109-026-32, -40, -42 and -44

Owner's Name and Telephone No: Westlanc Partners, LLC Julian F. Torkan, Managing Member

Owner Email: julian@mcgla.net

How are you associated with the subject site? I'm the managing partner of the LLC

How long have you been associated with the subject site? 14+ years

What is the subject site currently used for? No use, only vacant land

Are there structures on the subject site? No How Many?

Do you know of any previous structures on the subject site? if so describe nature and uses A small house and a metal storage building which were demolished approximately 10 years ago.

Do you have any current or past knowledge of the presence of underground or aboveground storage tanks being located on the subject site? No

Do you know of any chemicals, hazardous materials, and/or pesticides/herbicides being used, stored or discharged on the subject site? No

Do you know of any buried materials such as garbage dumps or burn pits or underground pipelines located on the subject site? if so, please describe No

Knowledge of Previous Owner(s) and Phone Number? No

Are there currently or were there historically any septic systems? Yes No Unknown

If yes, how many? and where?

Are there currently or were there historically any water wells located on the subject site? Yes No

If yes, how many and where? Unknown

Are there currently or were there historically any dry wells located on the subject site? Yes No

If yes, how many and where? Unknown

Are there currently or were there historically any monitoring wells located on the subject site? Yes No

If yes, how many and where? Unknown

2205 Coy Avenue • Bakersfield, California 93307 • (661) 837-9200 • FAX 661) 837-9201

With Offices Serving the Western United States

Are there any drainage or disposal ponds located on the subject site? Yes No **XXNo**

If yes, how many and where? _____

Is the subject site connected to municipal water? Yes No **XXNo**

Is the subject site connected to municipal sewer systems? Yes No **XXNo**

Do you have obvious indications pointing to the presence or likely presence of contamination of the subject site?

No

Do you have any concerns about adjacent property usage such as gasoline stations, industrial uses, or USTs/ASTs on adjacent properties? No

Are you aware of any environmental cleanup liens against the subject site that are filed or recorded under federal, tribal, state, or local law?

No

Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

No

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

I am exempt under Sec. _____, B & P.C. for this reason _____

GENERAL PROVISIONS

Permittee shall comply with the provisions of the Standard Specification for Public Works Construction, latest edition. All work on public right of way shall be per City Standards, policies, and applicable Specifications. All work shall be done in accordance with the standards and specifications of the City Engineer or City Representative.

[illegible]

All persons working within the City right-of-way shall wear orange safety shirts, vests, or jackets identifying to motorists that they are performing public work. All shirts, vests or jackets worn at night must be reflective. All persons working within the right-of-way shall wear reflective safety vests at all times.

Traffic Control and E.M.T. Construction. The permittee shall comply with Section 7.10 of the Standard Specifications and provide safe and adequate passing sight distances at all times. The permittee shall provide and maintain an adequate right-of-way for the proposed project. The permittee shall comply with the California Department of Transportation Manual of Traffic Control for Construction and Maintenance Work. The permittee shall comply with the City Engineer's specifications for passing sight distances. The requirements specified in this section shall be in addition to the requirements of the Standard Specifications for Highway Construction, California Department of Transportation, and the City Engineer's specifications for passing sight distances.

directed by the City Engineer at permittee's expense

GENERAL PROVISIONS

Permittee shall comply with the provisions of the Standard Specifications for Public Works Construction, latest edition. All work in public right of-way shall be per City Standards, policies, codes, and these Special Provisions as well as these general conditions, and shall be done under the inspection of, and to the satisfaction of, the City Engineer or his Representative.

Work shall be done between the hours of 6:30 a.m. and 5:00 p.m. Monday through Friday. No work shall be performed at night, on Saturdays, Sundays or on holidays observed by the City of Lancaster, except work pertaining to the public safety, or with the written permission of the City Engineer, and in accordance with such regulation as he shall furnish in writing. Before performing any work at said times, except work pertaining to the public safety, the permittee shall give written notice to the City Engineer so that proper inspection may be provided. "Night" as used in this paragraph shall be deemed to include the hours from 5:00 p.m. to 6:30 a.m. of the next succeeding day.

All persons working within the City right-of way shall wear orange safety shirts, vests, or jackets (identifying to motorists that such personnel are part of an organized construction crew). All shirts, vests or jackets worn at night must be reflective. All persons working within City right-of way or on City property shall wear hard hats.

Traffic Control and Public Convenience. The permittee shall comply with Section 7.10 of the Standard Specification and provide safe and continuous passage for pedestrian and vehicular traffic at all times. The permittee shall provide and maintain all necessary flagmen, barricades, delineators, signs, flashers, and any other safety equipment as set forth in the latest publication of the State of California, Department of Transportation, "Manual of Traffic Controls for Construction and Maintenance Work Zones", or as required by the City Engineer to ensure safe passage of traffic. In addition to the requirements specified in subsection 7.10 of the Standard Specifications, the permittee shall maintain access to all adjacent properties. In no case shall traffic be diverted from the existing travel way without prior approval of the City Engineer. A detailed detour plan may be required by the City Engineer, where detours of more than four (4) hours are needed, from a Registered Traffic Engineer by the Contractor, for approval five working days prior to commencement of construction. Traffic blocks are required on all lanes of travel on major streets. Self powered lighted-associated arrow boards are required on overnight detours in residential areas. All associated costs are the permittee's responsibility.

All inspection costs incurred incidental to this work shall be the permittee's responsibility. Any trees, shrubbery or landscaping damaged shall be replaced to the satisfaction of their owner or as directed by the City Engineer at permittee's expense.

Trench backfilling and resurfacing shall comply with the City of Lancaster's "Street Opening and Pavement Restoration", which is available upon request. Permanent sidewalk, parkway and pavement repairs shall be completed within 30 days of installation of facilities covered under permit. Non compliance with these or other permit conditions may be cause for permit revocation.

SPECIAL PROVISIONS IF APPLICABLE

All trenches and/or open holes shall be filled, covered, or plated and adequately barricaded at the end of each day and whenever work is not in progress. One lane of traffic in each direction is to be kept open and clear at all times on street under construction. Permittee shall obtain a State Division of Industrial Safety Excavation Permit and file copy of same with the City Engineer prior to start of permitted work. Compaction in pavement and traffic areas shall be 90% min. with 95% in the upper three feet from the pavement surface or finished grade. Compaction tests required at locations and depths as determined by the City Engineer at cost of Permittee. Compaction in parkway and sidewalk areas shall be 85% min. relative compaction and shall be mechanically compacted. Concrete sidewalks or curbs shall be saw cut to the nearest score marks and replaced equal in dimensions to that removed with score marks matching existing score marks. Sidewalk shall be Class 520-C-2500 concrete 4" thick. Pipe bedding and backfill of excavations shall be in conformance with City Standards. Pavement replacement shall be in conformance with City Standards.

Re: Permit #: 92-6676
Address: 1340 W. Avenue L

Dear Sir / Madam:

In updating our records, we have discovered that it has been more than 180 days since any action was taken on the above referenced permit(s).

Your permit(s) will expire if no action is taken within 30 days from the date of this notice. This is per section 303.(d) of the Uniform Building Code.

Should it become necessary to expire your permit(s), you will be required to obtain new permit(s) with payment of new fees.

If you have any questions concerning this notice, or to request an inspection, please call (805) 723-6144.

Sincerely,

Don Ward
Building Inspector II

PERMIT APPROVAL AND ACCEPTANCE OF WORK

In compliance with the above application and subject to all the terms, conditions and restrictions written or printed as general or special provisions on any part of this form and attached hereto, permission is granted to encroach or perform work within public rights-of-way.

Approved by: _____ Date: _____

GENERAL PROVISIONS

All work in public right-of-way shall be per City standards, policies, codes, and these Special Provisions as well as these General Conditions, and shall be done under the supervision of, and to the satisfaction of, the City Engineer or his representatives.

All inspection costs incurred incidental to this work shall be the Permittee's responsibility. Any trees, shrubbery, or landscaping damaged shall be replaced to the satisfaction of their owners at Permittee's expense or as directed by the City Engineer.

Any concrete to be removed shall be saw cut and replaced as directed to match existing in color, finish and scoring. Pavement to be removed shall be saw cut. Permanent sidewalk, parkway and pavement repairs shall be completed within 30 days of installation of facilities covered under permit.

All traffic interference control, detours and lane closures shall be made in accordance with latest State "Manual of Warning Signs, Lights, and Devices" and are subject to the Traffic Engineer or City Engineer's prior review and approval. Costs of these warning devices shall be borne by the Permittee. Arrow boards are required on all lane closures on major streets.

Compaction tests are required and shall be performed at Permittee's expense by an approved soil testing agency.

Trench resurfacing shall be 1 inch greater in thickness than existing pavement. A-Base to be placed in the top 3 feet of all trenches.

Non-compliance with these or other permit conditions may be cause for permit revocation.

SPECIAL PROVISIONS IF APPLICABLE

All trenches and/or open holes shall be filled, covered, or plated and adequately barricaded at the end of each day and whenever work is not in progress. 1 lane(s) of traffic in each direction(s) is(are) to be kept open and clear at all times on street under construction. Work shall be done between the hours of 6:30 a.m. and 5:00 p.m. Permittee shall obtain a State Division of Industrial Safety Excavation permit and file copy of same with City Engineer prior to start of permitted work. Compaction in pavement and traffic areas shall be 90% min. with 95% in the upper three feet from the pavement surface or finished grade. Compaction tests required at locations and depths as determined by City Engineer at cost of Permittee. Compaction in parkway and sidewalk areas shall be 85% min. relative compaction and shall be mechanically compacted. Concrete sidewalks or curbs shall be saw cut to the nearest score marks and replaced equal in dimensions to that removed with score marks matching existing score marks. Sidewalk shall be Class 520-C-2500 concrete 4" thick. Pipe bedding and backfill of excavations shall be in conformance with City Standards. Pavement replacement shall be in conformance with City Standards.

OWNER/BUILDER DECLARATION

I, Dan W. Baer, declare under penalty of perjury under the laws of the State of California, that:

☒ I am the property owner, or

☐ I am an officer in responsible charge of _____ corporation that is the property owner, or

☐ I am the general partner of _____ partnership that is the property owner

of 1341 West Avenue "L", located in the City of Lancaster, County of Los Angeles, State of California, and I hereby authorize

Frank McCarahan as my agent to obtain on my behalf, or on behalf of the corporation, or on behalf of the partnership all necessary building permits for the work to be done at the above referenced property.

I understand that as an owner/builder, I am the responsible party of record on such permit. I further understand that if I employ or otherwise engage or cause to be engaged any persons, and the work (including materials and other costs) is \$200 or more for the entire project, and such persons are not licensed as contractors or subcontractors, then I may be an employer and become subject to State and Federal laws.

I further declare under penalty of perjury under the laws of the State of California that:

1. I am exempt from the Contractor's License Law.
2. In the performance of the work for which a permit is issued, I shall not employ or cause to be employed any person in any manner so as to become subject to the workers' compensation laws of California.

Pursuant to Health and Safety Code Section 19825, the following warning appears on the permit:

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

PRESENT ZONING A-2-2 USE metal storage bldg.

SIGNATURE OF APPLICANT 21 SEPT. 79
DATE

Part II - STATEMENT OF WATER SERVICE

This water system under normal operating conditions is capable of delivering 750 gpm at 20 psi residual for two hours at this location.

This service will be rendered from a 8 inch diameter water main located in Easement street, etc

The fire hydrant nearest to the proposed structure is within 750 feet via vehicular access:

White Horse Farms Mutual Water Co. S. Meltz (Pres. Secy) 9/21/79
WATER PURVEYOR SIGNATURE TITLE DATE

CONDITIONS FOR APPROVAL BY BUILDING & SAFETY DIVISION

The water supply may be approved for Group R-3 occupancies and Group B occupancies under 2500 square feet in area when the conditions listed below are met:

1. Part II is completed and shows that the following minimum requirements are met:
 - a. The water system is capable of delivering at least 1000 gpm in Fire Zones 4 and 5 and at least 750 gpm in other Fire Zones at 20 psi residual for two hours.
 - b. The distance from the structure to the fire hydrant does not exceed 450 feet via vehicular access.

APPROVED BY Inspr. Jack Frost 9-21-79 L.A. CO. F.D.
NAME DATE OFFICE

NOTE: Where the water service does not meet the above requirements, Fire Department approval will be required before the permit is issued. The water service for occupancies not listed on this sheet must be approved by the Fire Department before a building permit is issued.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

AST: A listing of aboveground storage tank petroleum storage tank locations.

A review of the AST list, as provided by EDR, has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
COSTCO WHOLESALE #76 Database: AST, Date of Government Version: 07/06/2016	1141 W AVENUE L	ENE 1/8 - 1/4 (0.196 mi.)	B4	10

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 07/20/2020 has revealed that there

EXECUTIVE SUMMARY

are 2 CERS HAZ WASTE sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 07/20/2020 has revealed that there is 1 CERS TANKS site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
NIBBELINK MASONRY CO	1120 W AVENUE L 8	ENE 1/8 - 1/4 (0.207 mi.)	C9	75

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Violations:
Site ID: 390648
Site Name: Costco Wholesale #762 (Warehouse)
Violation Date: 6/7/2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 06/19/2018. OBSERVATION: The business failed to update business plan within 30 days of any handling of a previously undisclosed hazardous material. Observed ~50-gal liquid CO2 tank inside the food court that is not disclosed on the inventory. ~50-gal of CO2 is equal to ~3,700-ft3 of CO2 which is a reportable quantity of CO2. CORRECTIVE ACTION: Update all submittal elements effected by the changes and electronically submit the update through CERS within 30 days. Liquid CO2 shall be reported on the inventory in its physical state at storage (gallons).

Waste Code:	D029
Waste Description:	1,1-DICHLOROETHYLENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	D040
Waste Description:	TRICHLOROETHYLENE
Waste Code:	D043
Waste Description:	VINYL CHLORIDE
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F005
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P001
Waste Description:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Waste Code:	P075

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: provide recent manifest for HW disposal

Violation Division: Los Angeles County Fire Department

Violation Program: HW

Violation Source: CERS

Site ID: 138297

Site Name: NIBBELINK MASONRY CONSTRUCTION

Violation Date: 3/10/2017

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan.

Violation Notes: Returned to compliance on 07/25/2019. OBSERVATION: Failure to prepare and implement SPCC. CORRECTIVE ACTION: Prepare and implement SPCC.

Violation Division: Los Angeles County Fire Department

Violation Program: APSA

Violation Source: CERS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Elevation:	2458 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630747 LANCASTER WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles

Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Cajon

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Hesperia

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	3 inches	53 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4
3	53 inches	77 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 3

Soil Component Name: Adelanto

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	16 inches	40 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
3	40 inches	79 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9
4	79 inches	85 inches	stratified loamy sand to coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: Rosamond

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United States Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Krazan & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

To Whom It May Concern:

Krazan & Associates, Inc., is conducting a Phase I Environmental Site Assessment of the referenced property. As a part of our project research, we wish to determine whether governmental agencies possess records for the referenced site that may include potential environmental concerns. These concerns include, but are not limited to, aboveground and/or underground storage tanks (ASTs/USTs), hazardous materials storage/releases/incidents, Notices of Violations (NOVs), septic systems, and water supply concerns for the referenced subject site or adjacent properties.

If you have any questions or if we can provide any additional information, please do not hesitate to contact me at (661) 837-9200 or by email at BillCooper@Krazan.com. If you have no information on the property, please fill in the box to the left and fax back to me at (661) 837-9201. Thanks for your assistance.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.
