

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Canter Court Sewer Project

Lead Agency: City of Redding

Contact Name: Tiffany Lightle, Associate Environmental Specialist

Email: tlightle@cityofredding.org

Phone Number: 530.225.4171

Project Location: Redding

City

Shasta

County

Project Description (Proposed actions, location, and/or consequences).

The City of Redding (City) Canter Court Sewer Rent of two existing 6-inch-diameter sewer siphons that run under Churn Creek. The project would consist of the removal and replacement of the two existing 348-foot-long, 6-inch diameter concrete encased sewer siphons. Replacement of these siphons is needed to address afe-related deterioration. The siphons require a high level of maintenance and pose the risk of overflow contamination into Churn Creek and the vicinity.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential impacts to Archeological/Historical resources were identified in the report. Constituents were identified including several mining test pits and a concrete basin fragment. The resources are outside the area of direct impact and will be protected by implementing MM-8 which require high visibility fencing or like measures to be installed along the edges of the work zone to prevent damage to the artifacts. Impacts would be less than significant with mitigation incorporated.

Additionally, potential impacts to biological measures were identified and mitigation measures are proposed to avoid impacts. Special status species, such as Ringtail, Western Red Bat, Western Pond Turtle, Steelhead Trout, and migratory birds and raptors may be impacted. Proposed mitigation measures include dewatering if necessary, environmental awareness training, avoidance of construction during sensitive periods, and preconstruction surveys will reduce or avoid effects.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A.

Provide a list of the responsible or trustee agencies for the project.

U.S. Army Corps of Engineers
National Marine Fisheries Service
Central Valley Water Quality Control Board
California Department of Fish and Wildlife
