## **FDS**

## **Executive Summary**

HDR Engineering, Inc. (HDR) conducted a Phase I Environmental Site Assessment (Phase I ESA) of the proposed Big Rock 2 Cluster Solar and Storage Project (Project) located in unincorporated Imperial County, south of Interstate 8, approximately one mile southwest of the town of Seeley, California, and approximately six miles north of the United States International Border with Mexico. This Phase I ESA has been prepared at the request of Imperial County California Planning and Development Services Department, in support of project development, environmental documentation, and due diligence.

The Project Area is defined in this report as an irregularly shaped Project Area totaling approximately 1,849 acres. The proposed project consists of a 500-megawatt (MW) solar photovoltaic facility and a 500 MW battery energy storage system (BESS). The property is currently privately owned cropland, orchards and pastureland that is surrounded by agricultural use to the north, east, west, and south. The area is adjacent to or near the Laurel Cluster Solar facility, VEGA SES solar facility, and Campo Verde solar facility. The New River is adjacent to the northeast corner of the Project Area and the Imperial Irrigation District (IID) Westside Main Canal is located along the west and southern edges of the Project Area. Figures 1 and 2 provide further details regarding project limits and location.

The purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) that may adversely affect the Project Area. This Phase I ESA was conducted in accordance with the scope and limitations of ASTM International (ASTM) Standard Practice E1527-21, which currently meets the United States Environmental Protection Agency (USEPA) definition of All Appropriate Inquiry (AAI). This report includes a summary of the site reconnaissance conducted on October 22, 2024, landowner interviews, a review of environmental databases, and a review of historical data sources. Any exceptions to or deletions from these ASTM practices are described later in this report.

#### **Findings**

General findings of this assessment include the following:

- The Project Area is located within the Colorado Desert. The Project Area lies below mean sea level (bmsl), with elevations generally ranging from -30 ft bmsl in the southwest corner to -50 ft bmsl in the northeast corner. The Project Area vicinity slopes to the northeast and there are numerous irrigation canals and drains within proximity of the Project.
- The general lithology at the Project Area consists of Pleistocene aged marine and nonmarine sedimentary rocks in older alluvium, lake, playa, and terrace deposits.
- The groundwater flow direction within the Project Area vicinity is estimated to the northeast based on existing topography and surface waters. The nearest measured static water level was collected from a well located approximately 4 miles west of the Project Area and was reported at 52 ft below top of casing (btoc). However, this well is installed at a higher elevation; therefore, groundwater within the Project Area is likely shallower. There weren't any wells mapped within the Project Area.
- The environmental database search identified thirteen (13) mapped listings (for 8 sites) within the Project Area, and 11 listings within the 1-mile search buffer. The listings within the Project Area and many of the listings within the search buffer were determined to be mismapped outside the Project Area vicinity based on further review. The majority of these database listings were for the generation of regulated and/or hazardous wastes. Only one site, Jerry Preece Jr. Farms, located adjacent west of the Project Area had any reported violations associated with waste/chemical storage and disposal, including violations for open used oil filter containers, improper labeling, equipment testing failure, used oil spill, improper lead acid battery management, and not disposing of waste within the required time frames. Five violations remain open for this site, which is located adjacent to the northeast corner of CUP #4.
- Historical sources for the Project Area indicate it has been used for agriculture with irrigation canals since at least 1915. Construction of Interstate 8 adjacent north and additional

channelization throughout and adjacent to the Project Area occurred sometime between 1953 and 1976.

- Interviews were conducted with 8 out of 9 landowners (missing JR Preece Inc.) in the Project Area. The responding landowners indicated that the properties have only been used for agricultural purposes under their ownership and there were no environmental concerns identified in the surveys completed. However, Mrs. Susan Downs indicated that there was a homestead that burned down 20 years ago on their property, site cleanup details were not provided. Based on historical aerials, it appears the homestead was located on the northwest corner of parcel 051-290-019 (CUP #4). The site is currently graded; however, associated debris may have been buried in place.
- The site reconnaissance noted that the Project Area was a mix of fallow and agriculturally-developed parcels. Irrigation canals were noted throughout the Project Area vicinity. Two plastic above ground storage tanks (ASTs) and a tote associated with agricultural activity was present onsite. No indications of releases or spills was noted during the site reconnaissance. The only permanent structures within the Project Area were a residence and a metal shed with a concrete foundation located on the west side of the intersection of Jessup Road and Campbell Road (CUP #1).

#### **Opinions**

HDR has reviewed the stated data sources, which are part of the ASTM E 1527-21 assessment protocol. Based upon the review of the data, HDR has developed the following professional opinions:

- The footprint of a burned down structure was identified on the northeast corner of parcel 051-290-019. Burned debris may have been buried in-place, which may contain asbestos containing materials (ACM) or other hazardous building materials. The risk of encountering this debris does not meet the definition of a REC but is considered a Business Environmental Risk (BER) and should be considered during planning and construction of the solar and battery storage facility.
- Pesticides and herbicides have been applied to the agricultural fields in the Project Area for decades. However, normal application rates are not subject to CERCLA liability (Appendix X1.1.4.3 [4] ASTM 1527-21). Previous incident records of spills or potential over application within the Project Area or adjacent properties have all been closed. The use of pesticides and herbicides in the Project Area is not considered a REC.
- Per- and Polyfluoroalkyl Substances (PFAS) have been linked to insecticides, herbicides and biosolids. Two PFAS, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), are now listed as hazardous substances under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). The presence of PFAS in soil and/or groundwater in the Project Area is possible given the historical application of agricultural chemicals, but no reportable releases of insecticides or herbicides, or application of biosolids have been documented for the Project Area. The potential presence of PFAS is not currently a REC. It is a BER as PFAS regulations are rapidly evolving.
- Several open violations were reported on an adjacent property to the Project Area, owned by one
  of the participating landowners. A review of the violations indicates that conditions noted are
  generally localized to this property and are unlikely to impact the Project Area. Therefore, this is
  not considered a REC.

#### **Conclusions**

Based upon the above-detailed Findings and Opinions, HDR concludes that no RECs have been identified for the Project Area. The following statement is required by ASTM E 1527-21:

HDR has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-21 of Big Rock 2 Cluster Solar & Storage Project, located in Imperial County, California. Any exceptions to

or deletions from ASTM E 1527-21 are described in this Report. This report has revealed no evidence of recognized environmental conditions in connection with the Property.

#### Recommendations

Recommendations included in this Report were developed through the investigative procedures described in the Scope of Services, Significant Assumptions, and Limitations sections of this Report. These findings should be reviewed within the context of the limitations provided in the Limitations section.

HDR makes following recommendations:

#### Recommendation 1

If construction occurs within the footprint of the burned structure than HDR recommends onsite personnel be made aware of the risk of encountering burned debris during construction. Safety protocols can include worker awareness training, an outlined plan in the event that potential ACM/burned debris is discovered, and an environmental technician on standby to respond if suspected ACM is encountered during fieldwork.

#### Recommendation 2

HDR recommends that the User consider the "shelf life" of Phase I documents in determining risk. ASTM E 1527-21 states that a conforming "Phase I" report is valid for a period of 180 days and may be updated during the 180 days to 1-year timeframe. The report is valid for use in any of the CERCLA defenses ONLY if it is updated within this time frame. If greater than one year passes from the final report date, the Phase I effort would need to be repeated to remain in compliance with ASTM and the "All Appropriate Inquiry" protections.

#### **Report Viability Dates**

PHASE I ESA COMPONENT	DATE COLLECTED
Database Search	September 30, 2024
Interview(s)	August 29, 2024 to September 6, 2024
Site Reconnaissance	October 22, 2024
AUL and Environmental Lien Search	User Provided
<b>Environmental Professional Declaration</b>	Report Date
Report Expiration	February 25, 2025

## 1.0 Introduction

## 1.1 Purpose

The purpose of this Phase I ESA is to document the evaluation of the Project Area for indications of "recognized environmental conditions."

ASTM Practice E 1527-21 defines the following categories of recognized environmental condition (REC):

#### REC:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions (see definition below).

ASTM E 1527-21 defines release as a release of any hazardous substance or petroleum product shall have the same meaning as the definition of "release" in CERCLA 42 U.S.C. § 9601(22)).

#### Historical REC (HREC):

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority. The property is not subject to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

#### Controlled REC (CREC):

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as documented by the issuance of a No Further Action [NFA] letter or equivalent, or meeting risk-based criteria established by the regulatory authority). Hazardous substances or petroleum products are allowed to remain in place, subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Additional conditions that are not included under the definitions of a REC, but are defined by ASTM Practice E 1527-21 include:

#### De minimis:

A condition that generally does not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs, historical RECs nor CRECs.

#### **Business Environmental Risk:**

A risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.

Consideration of business environmental risk issues may involve addressing one or more non-scope considerations.

## 1.2 Report Users

HDR received authorization from 90FI 8me, LLC (User), to conduct a Phase I ESA of the Project Area defined as an irregularly shaped area totaling 1,849-acres located near Seeley, Imperial County, California. This Phase I ESA has been prepared for the Imperial County California Planning and Development Services Department and only the Imperial County California Planning and Development Services Department has the right to rely on the contents of this Phase I ESA without written authorization.

# 1.3 Scope of Services, Significant Assumptions, and Limitations

The services provided for this Project consisted of the following:

- Provide a description of the Project Area including current land uses (Section 2.2)
- Provide a general description of the topography, soils, geology, and groundwater flow direction (Section 2.4)
- Review reasonably ascertainable and reviewable regulatory information published by federal, state, local, tribal, health, and/or environmental agencies pertaining to the Project Area (Sections 4.1 and 4.2)
- Review historical data sources for the Project Area, including aerial photographs, topographic maps, fire insurance maps, city directories, and other readily available development data (Section 4.3)
- Interviews with persons with knowledge of the development history of the Project Area (Section 4.6)
- Site reconnaissance and review of areas of environmental interest—including a visual review of
  adjoining properties—with a focus on indications of hazardous substances, petroleum products,
  polychlorinated biphenyls (PCBs), wells, storage tanks, solid waste disposal pits and sumps, and
  utilities (Section 4.7)
- Determine data gaps in the information obtained and comment on their significance in identifying RECs for the Project Area (Section 5.0)
- Prepare a written report of methods, findings, opinions, and conclusions (Section 6.0).

The goal of this scope of services is to assist the user in identifying conditions in the Project Area that may indicate risks regarding hazardous materials storage, disposal, or other impacts. The resulting report may qualify the user for relief from liabilities as one of three "defenses" identified in the 2002 Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 9607 (All Appropriate Inquiry subsections). These three defenses include:

- 1. The "innocent landowner" defense to potential liabilities under 42 United States Code [U.S.C.] § 9601
- 2. The "contiguous property owner" defense pursuant to 42 U.S.C. § 9607q
- 3. The "bona fide prospective purchaser" defense pursuant to 42 U.S.C. § 9607r

Federal regulations at (42 U.S.C § 9601(35)(A) & (B) § 9607(b)(3), § 9607(q); and § 9607(r)), promulgated by the United States (U.S.) Environmental Protection Agency (EPA), require that liability release be based (in part) on completion of All Appropriate Inquiries (AAI) prior to purchase of a property. Those inquiries are documented by Phase I reports, or Environmental Site Assessments (ESAs). EPA has agreed that the ASTM E 1527-21 specifies and interprets AAI requirements.

A user is defined by ASTM E 1527-21: as the party seeking to use ASTM E 2247 to complete an ESA of the Project Area and may include a potential purchaser of land in the Project Area, a potential tenant of the Project Area, an owner of land in the Project Area, a lender, or a Project Area manager. Investigative areas

not included in the standard ASTM ESA scope include asbestos, lead-based paint, lead in drinking water, radon or urea formaldehyde, wetland issues, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, and high voltage power lines.

Indoor air quality from sources such as mold and asbestos are not included in the ASTM standard except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion).

The potential for vapor encroachment or intrusion into structures in the Project Area are considered and identified from onsite or offsite sources based on the experience of the Environmental Professional.

The scope of services for ESA projects also does not include the completion of soil borings, the installation of groundwater monitoring wells, or the collection of soil or groundwater samples. State and national policies and standards relevant to vapor intrusion are in flux and subject to change.

HDR has made certain assumptions in preparing the scope of this assessment:

- Data gathered from public information sources (i.e., libraries or public regulatory agencies) are accurate and reliable.
- Site operations reflect site conditions relative to potential releases and no intentional concealment of environmental conditions or releases has occurred.
- Interview information is directly reported as gathered by the assessor and is limited by the accuracy of the interviewee's recollection and experience.
- Published geologic information and site observations made by the environmental professional are used to estimate likely contaminant migration pathways in the subsurface. These estimates by the environmental professional are limited in accuracy and are generally cross-referenced with existing information about similar sites and environmental releases in the area.
- Regulatory information is limited to sites identified after the late 1980s because reliable records were not kept by regulatory agencies prior to that time frame.

The findings and conclusions presented in this Report are based on the procedures described in ASTM E 1527-21, informal discussions with various agencies, a review of the available literature cited in this report, conditions noted at the time of this Phase I ESA, and HDR's interpretation of the information obtained as part of this Phase I ESA. The findings and conclusions are limited to this Project and properties described in this Report, and by the accuracy and completeness of the information provided by others.

A Phase I ESA cannot entirely eliminate uncertainty regarding the potential for RECs. Conducting this assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Project Area within reasonable limits of time and cost. In conducting its services, HDR used a degree of care and skill ordinarily exercised under similar circumstances by reputable members of its profession practicing in the same locality. This Phase I ESA conforms to the level of documentation required in ASTM E 1527-21. However, HDR may omit discussion of certain records, i.e., sources deemed in HDR's professional opinion to be inapplicable or of limited value, to meet the specific needs of this client. In accordance with ASTM E 1527-21, however, if the lack of available documentation results in a data gap, this data gap is identified herein, and its significance is discussed.

## 2.0 Site Description

## 2.1 Legal Description and Location

The Project Area lies in the southern portion of the state of California. It is located in unincorporated Imperial County, south of Interstate 8, approximately one mile southwest of the town of Seeley, and approximately six miles north of the United States International Border with Mexico. The Project Area is irregularly shaped and encompasses an area of approximately 1,849 acres. It is comprised of 25 parcels as described in Table 1 below.

**Table 1. Property Ownership** 

Parcel	CUP	Assessor's Parcel Number (APN)	Acres	Property Owner

25		051-320-007	35.3	Thomas B Brandy & 17 B Raich

The Project Area is located in all or portions of Sections 14, 15, 16, 20, 21, 22, 23, 26, 27, 28 29, 33, and 34, Township 16 South, Range 12 East, San Bernardino Meridian, in the County of Imperial, State of California. Please refer to Figures 1 and 2 for further details regarding the project location and details.

## 2.2 Site and Vicinity Characteristics

The property is currently privately owned cropland, orchards and pastureland that is surrounded by agricultural use to the north, east, west, and south. The area is adjacent to or near the Laurel Cluster Solar facility, VEGA SES solar facility, and Campo Verde solar facility. The New River is adjacent to the northeast corner of the Project Area and the Imperial Irrigation District (IID) Westside Main Canal is located along the west and southern edges of the Project Area.

According to the United States Geological Survey (USGS) 7.5-minute series topographic map for Seeley, Mount Signal, Yuha Basin, and Plaster City, California (2021), the Project Area ranges in elevation from approximately -30 ft below mean sea level (bmsl) in the southwest corner to -50 ft bmsl in the northeast. The entire Project Area lies below sea level and the topography slopes to the northeast toward the New River.

# 2.3 Description of Structures, Roads, and Other Site Improvements

Major roadways in the Project Area include Interstate 8 (CA-86) (oriented east-west), which borders the Project Area to the north; several asphalt paved and unimproved roads are present throughout the Project Area. Due to the extensive irrigated farming history within the Project Area, as well as locally high-water table, many irrigation canals and drains occur within proximity of the Project Area. These include a segment of the New River adjacent to the northeast corner of the Project Area, and the Imperial Irrigation District (IID) Westside Main Canal which is located along the west and southern edges of the Project Area. In addition, multiple named irrigation canals and drains are located adjacent to the unimproved roadways in the Project Area, including Fern Canal and Sidemain, Foxglove Canal, Wixom and Fig Drains, and Dixie Drains Two, Three, Three A and Three B.

## 2.4 Area Geology and Hydrogeology

#### 2.4.1 Geology

The Project Area is located within the Colorado Desert. The Colorado Desert is located between the Mojave and Sonoran Deserts to the north and east, respectively, and the Peninsular Ranges to the west. The landscape is mostly below sea level and is dominated by the Salton Sea. The Colorado Desert is a depressed block between active branches of alluvium-covered San Andreas Faults. The geology is characterized by silt deposits of extinct Lake Cahuilla (California Department of Conservation, 2002).

The general lithology at the Project Area consists of Pleistocene aged marine and nonmarine sedimentary rocks in older alluvium, lake, playa, and terrace deposits. The Project Area is located in the seismically-active Imperial Valley in Southern California and considered likely to be subjected to moderate to strong ground motion from earthquakes in the region. The closest mapped earthquake fault zone is an unnamed fault located approximately 2.1 miles west of the Project Area.

#### 2.4.2 Hydrogeology

The Project Area is located within the Imperial Valley Groundwater Basin (7-30) which covers approximately 1,870 square miles in Imperial County, California. The Imperial Valley Groundwater Basin

lies within the southern part of the Colorado Desert Hydrologic Region, south of the Salton Sea. The basin is bounded on the east by the Sand Hills and on the west by the impermeable rocks of the Fish Creek and Coyote Mountains. To the north the basin is bounded by the Salton Sea, which is the discharge point for groundwater in the basin (DWR, 2004). Water levels vary widely within the basin due to differing hydraulic heads and the localized confining clay beds in the area (Brown, 1923). The Project Area is within the Colorado River hydrologic region and the Imperial Irrigation District is the local water agency.

#### 2.4.3 Groundwater and Well Information

Groundwater flow direction in the general vicinity of the Project Area is presumed to be to the northeast based on existing topography and surface waters and the nearest measured static water level was collected from a well located approximately 4 miles west of the Project Area and was reported at 52 ft below top of casing (btoc). However, this well is installed at a higher elevation; therefore, groundwater within the Project Area is likely shallower. Local groundwater levels and flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, seasonality and nearby wells.

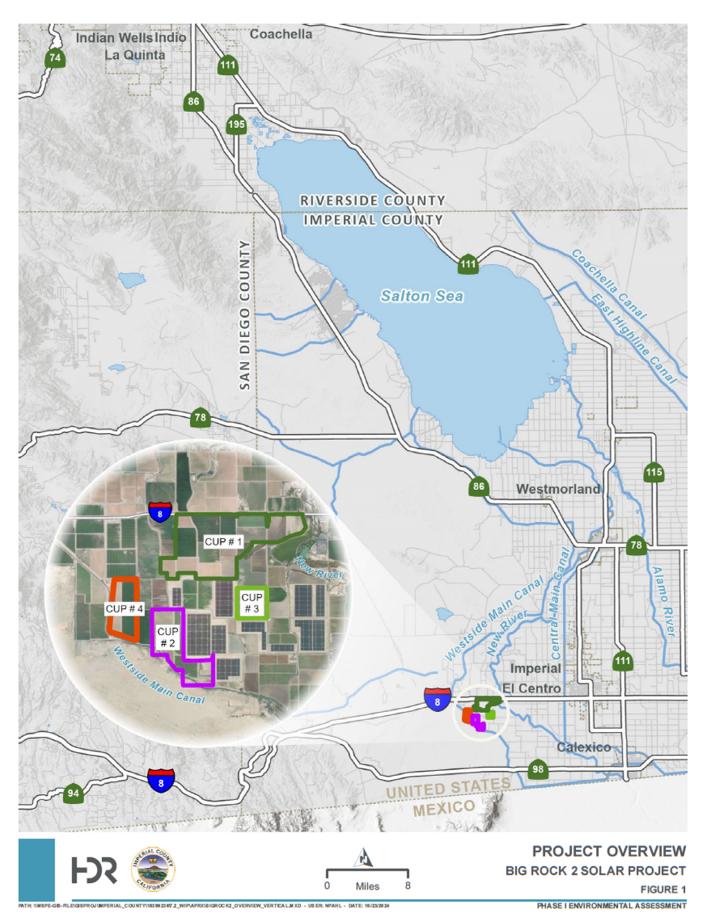

A search for water wells in the Project Area was conducted. The search identified no water wells within the Project Area sections and the nearest wells were located 1.25 miles southeast and 4 miles west of the Project Area.

Table 1. Water Wells

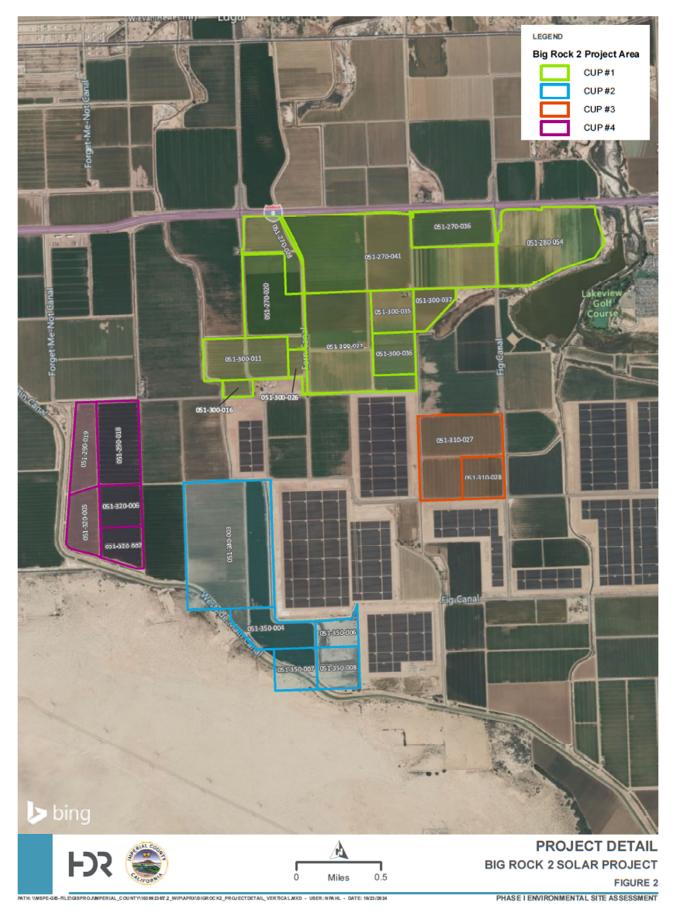

Well ID	Location (Latitude, Longitude)	Date Drilled	Well Depth (ft)	Water Level (ft bgs)	Notes
16S12E36E001S	32.7368, -115.692	7/9/62	Unk	Unk	Water Supply
16S11E23B001S	32.7675, -115.801	3/19/64	114.7	52	USGS Observation

Notes: Unk = unknown; ft = feet; bgs = below ground surface

## 3.0 User-Provided Information

A questionnaire was completed by Mr. Bill Metcalfe, Senior Director-Land Acquisition, on behalf of the User, to collect pre-existing information regarding the Project Area that might aid in the Phase I ESA investigation. Mr. Metcalfe provided the following responses to the questionnaire on October 18, 2024.

- No identification of any environmental liens or activity and use limitations (AUL) against the Project Area;
- No specialized knowledge related to the property;
- The Project Area purchase price reflects fair market value;
- No known past uses of the property;
- Farming/agricultural chemicals are present on the property;
- No knowledge of any spills or chemical releases on the property;
- No knowledge of any environmental cleanups that may have taken place on the property; and
- No obvious indicators that point to the presence of contamination on the property.

## 4.0 Records Review

#### 4.1 Environmental Records Review

EDR was contracted by HDR to complete a database search of federal, state, local, and tribal environmental records for the Project Area. The database search was performed for the Project Area by EDR on September 30, 2024. The databases searched included federal, state, local, tribal, and EDR proprietary databases for listings located within the Project Area, and an additional 1-mile search buffer zone. A complete copy of the EDR environmental database report and detailed maps are included in Appendix A. The database search area and buffer are shown in Figure 3.

Table 2. Summary of Environmental Database Search Results

Database	Description	Listings in the Project Area	Listings within the Search Distances
	Standard Environmental Databases

The results of the database search identified thirteen (13) mapped listings (for 8 sites) within the Project Area, and 11 listings within the 1-mile search buffer.

#### **Project Area Listings**

- Imperial Solar Energy/First Solar ISECW (Map ID A) Imperial Solar Energy (3020 W. County Rd 16) is listed in the HWTS database and First Solar ISECW (3020 W. County Rd 16) is listed in the HWTS and HAZNET databases. Based on the mapped location, these sites are likely associated with the solar development adjacent south of the Project Area. The First Solar ISECW site was listed as a generator of multiple regulated and hazardous waste streams including oil-containing waste, waste solvents, asbestos containing waste, organic and inorganic solid wastes, chromium waste (D007), and ignitable waste (D001). No violations were reported for these listings.
- Pioneer Harvesting South (Map ID A) Pioneer Harvesting (2004 Evans Hewes Hwy) is listed in the HWTS database. The listing appears to be mismapped and the address provided is located outside the Project Area boundary. No violations were reported for this listing.
- Mike Cameron (Map ID A) This site (1750 Drew Rd) is listed in the HWTS and HAZNET databases.
  The listing appears to be mismapped and the address provided is located outside the Project Area
  boundary. This site was listed as a generator of asbestos containing wastes. No violations were
  reported for this listing.
- Therma Source Inc (Map ID A) This site is listed in the HWTS and HAZNET databases. The listing appears to be mismapped and the latitude and longitude provided is located outside the Project Area boundary. This site was listed as a generator of organic solid wastes. No violations were reported for this listing.
- Seeley Food Market (Map ID A) This site was listed in the HWTS database. No specific location information was provided but the listing appears to be mismapped. The address for this business (1805 W Evan Hewes Hwy, Seeley, CA) indicates that it is over 1 mile northeast of the Project Area.
- Seeley Union School (Map ID A) This site was listed in the HWTS database. No specific location information was provided but the listing appears to be mismapped. The address for this school is (1812 West Rio Vista Seeley, CA) located over 1 mile northeast of the Project Area.
- Joe Datson (Map ID A) This site (1722 West Evans Hewes Hwy) is listed in the HWTS database. The listing appears to be mismapped and the address provided is located outside the Project Area boundary. No violations were reported for this listing.
- Wells Fargo Bank (Map ID A) This site (2630 West Evans Hewes Hwy) is listed in the HWTS database. The listing appears to be mismapped and the address provided is located outside the Project Area boundary. No violations were reported for this listing.

#### **Search Area Listings**

The following listings were identified adjacent to the Project Area.

 Miles Preservation LLC (Map ID 11) – This site (1651 Westside Rd) is listed in the HWTS and HAZNET database and located adjacent to the northwest corner of the Project Area. The HAZNET

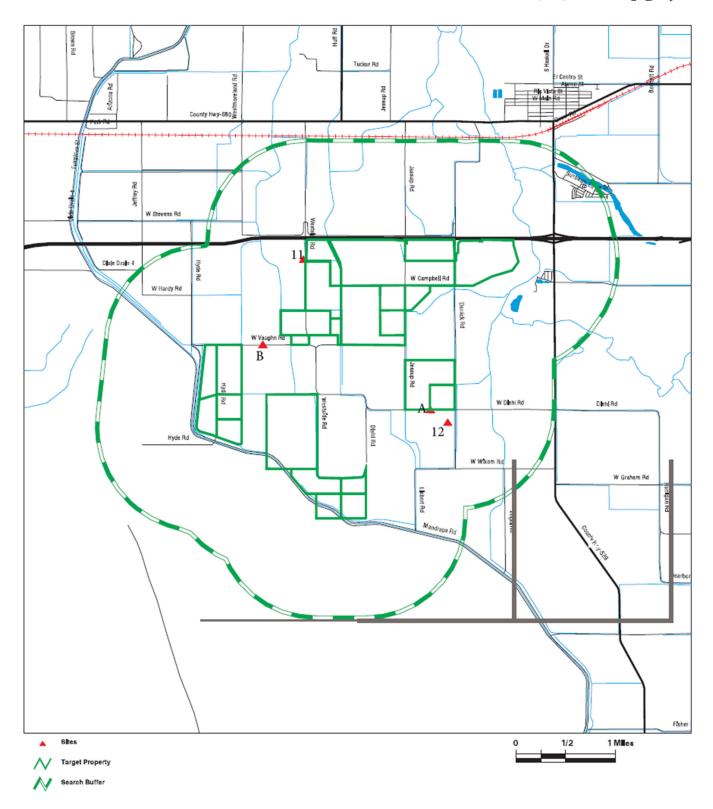

w FJK

listing indicated that household waste was generated and disposed of from this site. No violations were reported for this listing.

- Campo Verde Solar LLC (Map ID 12) Campo Verde Solar (2007 West Diehl Rd) is listed in the
  HWTS and HAZNET database and located adjacent south of the Project Area. This site was listed
  as a generator of multiple regulated and hazardous waste streams including waste oil, inorganic
  and organic solid waste, and hexachloroethane waste (D035). No violations were reported for
  these listings.
- Jerry Preece Jr. Farms (Map ID B) This site (2396 West Vaughn Road) is listed in the AST, RCRA NonGen/NLR, E Manifest, CERS Haz Waste, Hist UST, CERS Tanks, CUPA Listings, HWTS, HAZNET, and CERS databases and is located adjacent west of the Project Area. The AST and CERS Tanks databases indicate at least one 1,320 gallon AST is registered to the site; however, no additional details on contents or location were provided. The RCRA NonGen/NLR, E Manifest, HWTS, and HAZNET databases indicate that the facility is not a federally regulated hazardous waste generator but does manage universal and other regulated wastes including used oil filters and other organic solids. The CERS database is associated with the site being a chemical storage facility and California regulated hazardous waste generator and there were multiple violations reported including open used oil filter containers, improper labeling, equipment testing failure, used oil spill, improper lead acid battery management, and not disposing of waste within the required time frames. The Hist UST database is for a site at the same address but under the name John H Borchard Ranches and is associated with a 2,000-gallon fiberglass storage tank that contains gasoline and was installed in 1974. There was no indication if tank was ever removed; however, no violations or releases were reported in association with the tank.

Twenty-two orphan listings were identified in the Project zip codes. Orphan listings are sites that could not be mapped by EDR, based on limited or incomplete location information provided for a given listing. Based on the information provided, none of the sites are likely located in the Project Area or search buffer.

#### **ENVIRONMENTAL DATABASE SEARCH RESULTS**

BIG ROCK 2 CLUSTER SOLAR & STORAGE PROJECT FIGURE 3

## 4.2 Additional Regulatory Information

#### 4.2.1 Online Sources

Relevant information collected and review from the following supplemental online sources is provided in Appendix B.

#### Cal EPA

A search of the California EPA Regulated Site Portal was conducted to locate any additional sites/listings not found in the EDR database search. A cluster of 6 sites were identified on the east side of the Wixom Drain, approximately 1/2- to 1/3-mile away from the eastern boundary of CUP #1. A review of the listings did not find any sites of concern based on the type of listing, severity of violations, and distance from the Project Area.

The listing for Jerry Preece Jr. Farms (identified in Section 4.1 as Map ID B) was the only duplicate listing identified in the vicinity of the Project Area. This listing was associated with a farm operation located diagonal to the northeast corner of CUP #4. Listings for ASTs, chemical storage, and hazardous waste generation were found in association with the site. Chemicals listed onsite included: used oil filters, used oil, motor oil, hydraulic oil, diesel, diesel exhaust fluid, argon gas, and acetylene gas. Five open violations and one resolved violation was reported. The violations were under the hazardous waste generator program and the following violations from March 3, 2020, are still reported as open:

- Used oil spill. Requested corrective action: submit photos to CUPA demonstrating the spill had been properly removed and managed.
- Open used oil and oil filter containers. Requested corrective action: submit photo showing the containers were closed.
- Eye wash station has not been tested. Requested corrective action: Submit photo/documentation.
- Failure to send hazardous waste offsite for treatment or disposal within 180 days or has stored hazardous waste over 90 days. Requested corrective action: dispose of hazardous waste stored over the applicable time limit.
- Failure to meet spent lead acid battery management requirements. Requested corrective action: Owner/operator shall immediately begin to handle, store, and/or transport lead acid batteries in accordance with Title 22 regulations.

#### Formerly Used Defense Sites (FUDS) Viewer

An online GIS search of FUDS sites near the Project Area was conducted. Multiple FUDS sites associated with Camp Seeley and Ordinance Training Centers were located 2 to 3 miles north, west, and south of the property; however, these sites boundaries are all over a mile away from the Project Area and from review of the files have limited to no risk of unexploded ordinances or contamination.

#### 4.2.2 Agency File Reviews

No formal Freedom of Information Act (FOIA) requests were made to government agencies due to the readily available documents available for download from relevant database websites.

### 4.3 Historical Use Information

The objective of reviewing historical use information is to develop a history of previous land uses at, and in the vicinity of, the Project Area, and to assess these uses for potential hazardous materials impacts that may affect the Project Area. HDR reviewed those historical sources that were reasonably ascertainable and likely to provide useful information, as defined by ASTM E 1527-21.

#### 4.3.1 Fire Insurance Maps

Fire insurance maps are produced by private fire insurance companies to indicate uses of properties within the Project Area, originally to develop fire ratings for insurance companies. Sanborn fire insurance map coverage for the Project Area was not available.

#### 4.3.2 City Directory

Due to the undeveloped nature and lack of roads within the Project Area, City Directory coverage was not available.

#### 4.3.3 Historical Aerial Photographs

Historical aerial photographs are valuable for the environmental assessor to review features of the Project Area over a long period of time. Copies of the historical aerial photographs for the Project Area (discussed below) are provided in Appendix C.

Historical aerial photographs were reviewed from the EDR Aerial Photo Decade Package for the following years: 1937, 1949, 1953, 1976, 1985, 1996, 2002, 2006, 2009, 2012, 2016, and 2020. Information relating to observed features for the Project Area and adjacent properties is presented below.

**Table 3. Historical Aerial Photographs** 

Year	Source	Project Area*	Adjacent Area*	Notable Feature or Change
1937	EDR	NA	NA	The Project Area and Adjacent Properties were used for agricultural practices or were undeveloped floodplains/sloughs, alluvial fans/terraces, and arid shrublands. A portion of the north-central Project Area was located within the floodplain/slough and alluvial fan/terrace deposit areas of the New River. Multiple irrigation canals and ditches were located in alignment with the irrigation features within and adjacent to the Project Area today. Farmsteads adjacent to the Project Area were visible in alignment with many of the farmsteads existing today; however a farmstead on the central portion of the Project Area (parcel 051-300-032) was visible that isn't present today.
1949	EDR	NC	NC	No substantial changes.
1953	EDR	С	С	The floodplain/slough areas located in the north-central portion of the Project Area and on adjacent properties were starting to be converted to agricultural land. Some of the undeveloped arid shrubland in the southwest portion of the Project Area was being converted to agricultural land.
1976	EDR	С	С	The Project Area and surrounding properties appeared similar to the current agricultural use. The irrigation canals in the north-central and eastern portions of the Project Area had been modified and the floodplain/slough deposits had been modified to agricultural use. The arid shrubland in the southwest portion of the Project Area had been converted to agricultural use. The farmstead that was located on the central portion of the Project Area was no longer visible. A 2-lane roadway was now visible in alignment with the existing Interstate 8.

1984	EDR	NC	NC	No substantial changes.
1996	EDR	NC	NC	No substantial changes.
2002	EDR	С	NC	It appeared that the property located on the western boundary of the Project Area that burned down (see Section 3) was no longer visible.
2006	EDR	NC	NC	No substantial changes.
2009	EDR	NC	NC	No substantial changes.
2012	EDR	NC	NC	No substantial changes.
2016	EDR	NC	С	Solar developments in alignment with the existing solar farms were visible.
2020	EDR	NC	NC	No substantial changes.

<sup>\* &</sup>quot;C" Indicates that a change since the previous year was noted.

#### 4.3.4 Historical Topographic Maps

Historical topographic maps provide an overview of the area relative to potential previous land uses. HDR reviewed USGS 7.5-minute historical topographic maps of the Project Area. The USGS 7.5-minute series topographic maps were reviewed for Seeley, Mount Signal, Yuha Basin, and Plaster City, California for 1957, 2012, 2015, and 2021. Additional larger scale topographic maps for El Centro (1:125,000, 1915), El Centro (1:250,000, 1942 and 1955), and El Centro (1:100,000, 1989), California were also included in the review.

These maps served to augment information that was gathered in the historical aerial photograph review. Copies of the historical topographic maps are included in Appendix D.

A review of the topographic maps concluded that the Project Area had historically been ditched by irrigation canals likely for agricultural use back to 1915. Canaled agricultural land is depicted adjacent north of the Project Area, the New River is depicted adjacent east, and the west side canal and undeveloped vacant land is depicted adjacent south and west. No other relevant features were shown on these maps. Interstate 8 was first depicted on the 1989 map.

# 4.4 Environmental Liens, Activity Use Limitations (AULs) and Additional Information

A search for Environmental Liens and AULs associated with leased parcels within the Project Area back to at least 1980 is designated by ASTM as a User-responsibility. The User has not provided HDR with a copy of the search at the time of this report.

The government database search conducted for the Project Area included a search of the following databases:

- NPL Lien and Lien 2 Federal superfund liens.
- Liens Environmental liens for California where the Department of Toxic Substance Control (DTSC) is the lien holder.
- DEED Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction.

No listings were identified within the Project Area or search buffer in these databases.

<sup>&</sup>quot;NC" Indicates no change was noted from the previous year.

## 4.5 Summary of Previous Environmental Investigations

HDR was unaware of previous environmental investigations for the Project Area at the time of this report.

#### 4.6 Landowner Interviews

The Project Area is currently owned by nine (9) separate landowners or entities as detailed previously in Table 1. A landowner questionnaire was given to all the landowners to provide information regarding their participating parcels. Responses from all but one party (JR Preece Inc.) was received between August 29 to September 6, 2024.

The landowner questionnaires indicated "no" or "unknown" to all the questions regarding the site history and current conditions with the exception of a fire that occurred on Mrs. Downs' Property. Mrs. Downs indicated that there was a homestead that burned down 20 years ago on the property, site cleanup details were not provided. Based on historical aerials, it appeared the homestead was located on the northwest corner of parcel 051-290-019. The site is currently graded; however, debris may have been buried in place. Burn debris associated with residential structures may contain asbestos containing materials and/or other hazardous building materials.

Additional details regarding the questionnaires can be found in Appendix E.

#### 4.7 Site Reconnaissance

On October 22, 2024, HDR conducted a site reconnaissance of the Project Area and surrounding properties. The Project Area consisted of various plots of agricultural land. Small portions of undeveloped land associated with the Project Area were also located on the southwest side of the Westside Main Canal, which borders the southwest side of the Project Area. The Project Area was mostly flat, with little changes in elevation throughout.

All the plots observed appeared to be fallow or actively cultivated. Features observed throughout the plots included unlined or concrete-lined canals with water control gates, sprinklers, unpaved roads, an electrical pump, two approximately 1,600-gallon ASTs labelled "Green Touch" (likely an agrichemical), a 275-gallon tote, and piles of hay. The electrical pump and storage containers were noted on the southeastern portion of the Project Area. Although the exact contents of the ASTs and storage tote could not be specified, due to the lack of spills or leakage observed in the vicinity of the containers and the use of the Project Area for agricultural purposes, the presence of the ASTs did not represent an environmental concern.

Other features observed within the Project Area included asphalt-paved roads, creeks, and a few structures. A residence was noted on the southwest side of the intersection of Jessup Road and Campbell Road, and a metal shed was present on the northwest side of the intersection. Nothing was stored along the exterior areas of the shed. Access to the interior of the shed or residence was not provided. It was noted that the metal shed was built above a concrete foundation.

Properties surrounding the Project Area consist of agricultural land, solar farms, and undeveloped land. The Interstate 8 Highway bordered the Project Area to the north. A golf resort, RV Park, and an industrial farm were located approximately 0.25 miles to the west.

Due to the size of the property, HDR was unable to inspect the entirety of the property. However, due to the agricultural and undeveloped nature of the property, this limitation does not represent a significant data gap.

Photographs taken during the site reconnaissance are located in Appendix F.

#### 4.8 Utilities and PCBs

HDR noted transmission lines, pole-mounted transformers, and signs indicating the presence of underground utilities owned by AT&T. The pole-mounted transformers were located near the metal shed and the electrical pump. The installation date of the transformers is unknown; therefore, the transformers could contain PCBs due to their age. However, no evidence of leaks, spills, or corrosion was observed in the vicinity of the transformers. Based on their good condition, the pole-mounted transformers were not an environmental concern.

### 4.9 Vapor Intrusion

According to EPA guidance, vapor intrusion is the general term for the migration of the vapor phase contaminants into buildings or structures. These contaminants are primarily volatile organic compounds (VOCs) and some heavy metals (mercury). These contaminants migrate from any subsurface contaminant source, such as contaminated soil or groundwater, through the soil and into an overlying building. The two general classes of VOCs that account for a large number of soil and groundwater contamination sites in the United States are petroleum hydrocarbons and non-petroleum hydrocarbon fuel additives, and chlorinated solvents (drycleaners and de-greasers.

The potential for vapor intrusion was evaluated for the Project Area. Based on the current and historical use of the Project Area, and the lack of VOC sources in the immediate vicinity, vapor intrusion is not considered to be of concern for the Project Area. In particular, this is also due to the proposed development of the site.

#### 4.10 **PFAS**

The USEPA finalized a rule on April 19, 2024, which added two Per- and Polyfluoroalkyl Substances (PFAS), perfluorooctanoic acids (PFOA) and perfluorooctanesulfonic acid (PFOS), to the list of hazardous substances under CERCLA. Therefore, a release of PFOA and/or PFOS, are now included in the definition of a REC. PFAS is a family of fluorinated chemicals that vary in chemical and physical properties and could include more than 12,000 chemical substances. Due to their mobility, persistence in the environment, and widespread use, trace amounts of PFAS chemicals have been found in environmental media across the globe. Sources of PFAS include firefighting foams, consumer products, mills (textiles, paper, etc.), metal plating, coatings, and even municipal biosolids.

Potential sources of PFAS were evaluated for the Project Area. Federal and state PFAS databases (refer to the database search in Appendix A) were reviewed for PFAS-related sites/sources within the Project Area search buffer. No listings were identified. However, the following PFAS sources could be associated with the Project Area given known or common practices with agricultural properties:

- Potential application of municipal biosolids in agricultural fields.
- Use of insecticides (pesticides) and herbicides.

## 5.0 Data Gap Analysis

The ASTM E 1527-21 standards require a listing of significant "data gaps," including data failure, encountered during the investigative process that may affect the ability of the environmental professional to identify recognized environmental conditions. The ASTM E 1527-21: 12.7 standard requires that the environmental professional estimate the relative importance of the data gaps. Generally, gaps in available data are related to the availability of historical data sources for specific sites of concern. The environmental professional uses multiple historical data sources as a method to provide coverage for data gaps. Historical information is collected on a recurring basis, and the passage of time between data sets may or may not constitute a significant gap in data coverage. For this project, the following data gap as defined by ASTM E 1527-21, were identified:

- HDR was unable to observe all portions of the Project Area due to the size of the property and/or lack of access to the interior of structures. However, based on the observed current land uses and lack of evidence of environmentally-sensitive operations in the surrounding properties, this limitation does not represent a significant concern.
- HDR did not receive a response from one of the landowners, JR Preece Inc. This is considered a data gap due to the lack of additional information regarding open violations associated with their facility located adjacent to the Project Area. However, this is not a significant data gap since the conditions related to these violations are unlikely to impact the Project Area.

## 6.0 Findings, Opinions, and Conclusions

This Phase I ESA was performed in accordance with the scope and limitations of ASTM Practice E 1527-21. Any exceptions to, or deletions from, this practice are described previously in this report. Included in this Phase I ESA is a summary of findings, opinions, and conclusions.

## 6.1 Findings

General findings of this assessment include the following:

- The Project Area is located within the Colorado Desert. The Project Area lies bmsl, with elevations
  generally ranging from -30 ft bmsl in the southwest corner to -50 ft bmsl in the northeast corner.
  The Project Area vicinity slopes to the northeast and there are numerous irrigation canals and
  drains within proximity of the Project.
- The general lithology at the Project Area consists of Pleistocene aged marine and nonmarine sedimentary rocks in older alluvium, lake, playa, and terrace deposits.
- The groundwater flow direction within the Project Area vicinity is estimated to the northeast based on existing topography and surface waters. The nearest measured static water level was collected from a well located approximately 4 miles west of the Project Area and was reported at 52 ft btoc. However, this well is installed at a higher elevation; therefore, groundwater within the Project Area is likely shallower. There weren't any wells mapped within the Project Area.
- The environmental database search identified thirteen (13) mapped listings (for 8 sites) within the Project Area, and 11 listings within the 1-mile search buffer. The listings within the Project Area and many of the listings within the search buffer were determined to be mismapped outside the Project Area vicinity based on further review. The majority of these database listings were for the generation of regulated and/or hazardous wastes. Only one site, Jerry Preece Jr. Farms, located adjacent west of the Project Area had any reported violations associated with waste/chemical storage and disposal, including violations for open used oil filter containers, improper labeling, equipment testing failure, used oil spill, improper lead acid battery management, and not disposing of waste within the required time frames. Five violations remain open for this site, which is located adjacent to the northeast corner of CUP #4.
- Historical sources for the Project Area indicate it has been used for agriculture with irrigation canals since at least 1915. Construction of Interstate 8 adjacent north and additional channelization throughout and adjacent to the Project Area occurred sometime between 1953 and 1976.
- Interviews were conducted with 8 out of 9 landowners (missing JR Preece Inc.) in the Project Area. The responding landowners indicated that the properties have only been used for agricultural purposes under their ownership and there were no environmental concerns identified in the surveys completed. However, Mrs. Susan Downs indicated that there was a homestead that burned down 20 years ago on their property, site cleanup details were not provided. Based on historical aerials, it appears the homestead was located on the northwest corner of parcel 051-290-019 (CUP #4). The site is currently graded; however, associated debris may have been buried in place.
- The site reconnaissance noted that the Project Area was a mix of fallow and agriculturally-developed parcels. Irrigation canals were noted throughout the Project Area vicinity. Two plastic ASTs and a tote associated with agricultural activity was present onsite. No indications of releases or spills was noted during the site reconnaissance. The only permanent structures within the Project Area were a residence and a metal shed with a concrete foundation located on the west side of the intersection of Jessup Road and Campbell Road (CUP #1).

#### **Opinions**

HDR has reviewed the stated data sources, which are part of the ASTM E 1527-21 assessment protocol. Based upon the review of the data, HDR has developed the following professional opinions:

- The footprint of a burned down structure was identified on the northeast corner of parcel 051-290-019. Burned debris may have been buried in-place, which may contain asbestos containing materials or other hazardous building materials. The risk of encountering this debris does not meet the definition of a REC but is considered a BER and should be considered during planning and construction of the solar and battery storage facility.
- Pesticides and herbicides have been applied to the agricultural fields in the Project Area for decades. However, normal application rates are not subject to CERCLA liability (Appendix X1.1.4.3 [4] ASTM 1527-21). Previous incident records of spills or potential over application within the Project Area or adjacent properties have all been closed. The use of pesticides and herbicides in the Project Area is not considered a REC.
- PFAS have been linked to insecticides, herbicides and biosolids. Two PFAS, PFOA and PFOS, are
  now listed as hazardous substances under the CERCLA. The presence of PFAS in soil and/or
  groundwater in the Project Area is possible given the historical application of agricultural
  chemicals, but no reportable releases of insecticides or herbicides or application of biosolids have
  been documented for the Project Area. The potential presence of PFAS is not currently a REC. It
  is a BER as PFAS regulations are rapidly evolving.
- Several open violations were reported on an adjacent property to the Project Area, owned by one
  of the participating landowners. A review of the violations indicates that conditions noted are
  generally localized to this property and are unlikely to impact the Project Area. Therefore, this is
  not considered a REC.

#### **Conclusions**

Based upon the above-detailed Findings and Opinions, HDR concludes that no RECs have been identified for the Project Area. The following statement is required by ASTM E 1527-21:

HDR has performed a Phase I ESA in conformance with the scope and limitations of ASTM E 1527-21 of Big Rock 2 Cluster Solar & Storage Project, located in Imperial County, California. Any exceptions to or deletions from ASTM E 1527-21 are described in this Report. This report has revealed no evidence of recognized environmental conditions in connection with the Property.

#### Recommendations

Recommendations included in this Report were developed through the investigative procedures described in the Scope of Services, Significant Assumptions, and Limitations sections of this Report. These findings should be reviewed within the context of the limitations provided in the Limitations section.

HDR makes following recommendations:

#### Recommendation 1

If construction occurs within the footprint of the burned structure than HDR recommends onsite personnel be made aware of the risk of encountering burned debris during construction. Safety protocols can include worker awareness training, an outlined plan in the event that potential ACM/burned debris is discovered, and an environmental technician on standby to respond if suspected ACM is encountered during fieldwork.

#### Recommendation 2

HDR recommends that the User consider the "shelf life" of Phase I documents in determining risk. ASTM E 1527-21 states that a conforming "Phase I" report is valid for a period of 180 days and may be updated during the 180 days to 1-year timeframe. The report is valid for use in any of the CERCLA defenses ONLY if it is updated within this time frame. If greater than one year passes from the final

report date, the Phase I effort would need to be repeated to remain in compliance with ASTM and the "All Appropriate Inquiry" protections.

#### **Report Viability Dates**

PHASE I ESA COMPONENT	DATE COLLECTED

## 7.0 Qualifications of Environmental Professionals

## 7.1 Signatures and Qualifications

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations [C.F.R.] Section 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquires in conformance with standards and practices set forth in 40 CFR Part 312.

Qualified Environmental Professional

Ben Czeck, PG (MN)

Qualified Environmental Professional

Hong Spores, CPG

#### 7.1.1 Qualifications of Environmental Professionals

This Phase I ESA was performed by the following HDR personnel:

Mr. Ben Czeck, PG (MN), is a qualified environmental professional, as defined by ASTM Practice E 1527-21, with over 14 years of experience with environmental site assessments and remediation of impacted properties. He has a BS in Geology from the University of St. Thomas and a MS in Environmental Geology from the University of Hawaii. Mr. Czeck specializes in environmental due diligence and brownfield redevelopment as well as permitting and compliance with other federal, state, and local environmental regulations. Mr. Czeck developed and teaches an applied environmental policy course at the University of Saint Thomas and has worked as an environmental consultant and in-house environmental resource in the construction and energy utility industries.

**Ms. Hong T. Spores**, CPG, is a qualified environmental professional, as defined by ASTM Practice E 1527-21, and has 24 years of experience in the assessment and remediation of impacted properties and compliance with environmental regulations. She has a BS in Geology from the University of Minnesota and an MBA from the University of St. Thomas. Ms. Spores specializes in investigations of hazardous materials-impacted properties for public and private sector clients. She is highly knowledgeable of federal, state, and local environmental regulations and standards, along with environmental due diligence relating to real estate transactions. Her experience covers assessments ranging from agricultural properties to industrial facilities located internationally and in more than 30 states. Ms. Spores specializes in due diligence for alternative energy projects.

#### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIFECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

#### **EXECUTIVE SUMMARY**

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

#### SUBJECT PROPERTY INFORMATION

#### **ADDRESS**

BIG ROCK 2 SOLAR EL CENTRO, CA 92243

#### TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Other Ascertainable Records

HWTS: Hazardous Waste Tracking System

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there are 10 HWTS sites within the requested target property.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of state and tribal registered storage tanks

AST: Aboveground Petroleum Storage Tank Facilities

A review of the AST list, as provided by EDR, has revealed that there are 2 AST sites within approximately 0.25 miles of the requested target property.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter

6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month

if all of the following conditions are met: (1) The quantity of

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: Owner/Operator is a small quantity generator and failed

to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

## Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/27/2024 Date Data Arrived at EDR: 09/03/2024

Next Scheduled EDR Contact: 10/07/2024 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

## Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 08/27/2024 Date Data Arrived at EDR: 09/03/2024 Date Made Active in Reports: 09/19/2024

## Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/07/2024 Date Data Arrived at EDR: 06/25/2024 Date Made Active in Reports: 09/19/2024

Next Scheduled EDR Contact: 01/09/2025 Data Release Frequency: Varies

## SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/24/2024 Date Data Arrived at EDR: 08/01/2024 Date Made Active in Reports: 08/28/2024

#### Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024 Date Data Arrived at EDR: 06/07/2024 Date Made Active in Reports: 06/20/2024

Number of Days to Update: 13

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/03/2024 Date Data Arrived at EDR: 06/07/2024 Date Made Active in Reports: 06/20/2024

Next Scheduled EDR Contact: 12/30/2024 Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024 Date Data Arrived at EDR: 06/07/2024 Date Made Active in Reports: 06/20/2024

## Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/22/2024 Date Data Arrived at EDR: 04/23/2024 Date Made Active in Reports: 07/17/2024 Number of Days to Update: 85 Source: Department of Toxic Substances Control Telephone: 916-323-3400

Last EDR Contact: 07/22/2024

Next Scheduled EDR Contact: 11/04/2024 Data Release Frequency: Quarterly

## Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/20/2024 Date Data Arrived at EDR: 05/21/2024 Date Made Active in Reports: 08/08/2024

Number of Days to Update: 79

Source: Drug Enforcement Administration

Telephone: 202-307-1000 Last EDR Contact: 08/19/2024

Next Scheduled EDR Contact: 12/02/2024 Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006

Number of Days to Update: 21

Source: Department of Toxic Substance Control

Telephone: 916-323-3400 Last EDR Contact: 02/23/2009

Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/22/2024 Date Data Arrived at EDR: 04/23/2024 Date Made Active in Reports: 07/17/2024

Number of Days to Update: 85

Source: Department of Toxic Substances Control

Telephone: 916-323-3400 Last EDR Contact: 07/22/2024

Next Scheduled EDR Contact: 11/04/2024 Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2022 Date Data Arrived at EDR: 03/21/2024 Date Made Active in Reports: 06/12/2024

Number of Days to Update: 83

Source: Department of Toxic Substances Control

Telephone: 916-255-6504 Last EDR Contact: 08/07/2024

Next Scheduled EDR Contact: 11/11/2024

Data Release Frequency: Varies

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995

Number of Days to Update: 27

Source: State Water Resources Control Board

Telephone: 916-227-4364 Last EDR Contact: 01/26/2009

Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 07/10/2024 Date Data Arrived at EDR: 07/10/2024 Date Made Active in Reports: 07/12/2024

Number of Days to Update: 2

Source: CalEPA

Telephone: 916-323-2514 Last EDR Contact: 07/10/2024

Next Scheduled EDR Contact: 10/28/2024 Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/20/2024 Date Data Arrived at EDR: 05/21/2024 Date Made Active in Reports: 08/08/2024

Next Scheduled EDR Contact: 10/07/2024 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 05/28/2024 Date Data Arrived at EDR: 05/29/2024 Date Made Active in Reports: 08/20/2024

## Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

Number of Days to Update: 88

Next Scheduled EDR Contact: 11/11/2024 Data Release Frequency: No Update Planned

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

Next Scheduled EDR Contact: 12/09/2024 Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 04/01/2024 Date Data Arrived at EDR: 04/17/2024 Date Made Active in Reports: 07/12/2024

Number of Days to Update: 86

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

## PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes** 

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are

comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities Source: Department of Social Services

**Ⅲ** SEARCH RESULTS (7)

# **GETTING STARTED**

To find the site you are looking for, you can:

# Use the Search Bar above

Enter any identifying information into the search bar above, and both the Results list and the map will populate with any relevant results. This is a general search and will return results for each word in the search bar.

OR

# Manipulate the Map

Focus in on a specific location using a mouse and the zoom tools or click on a bubble and the map will zoom to the location.

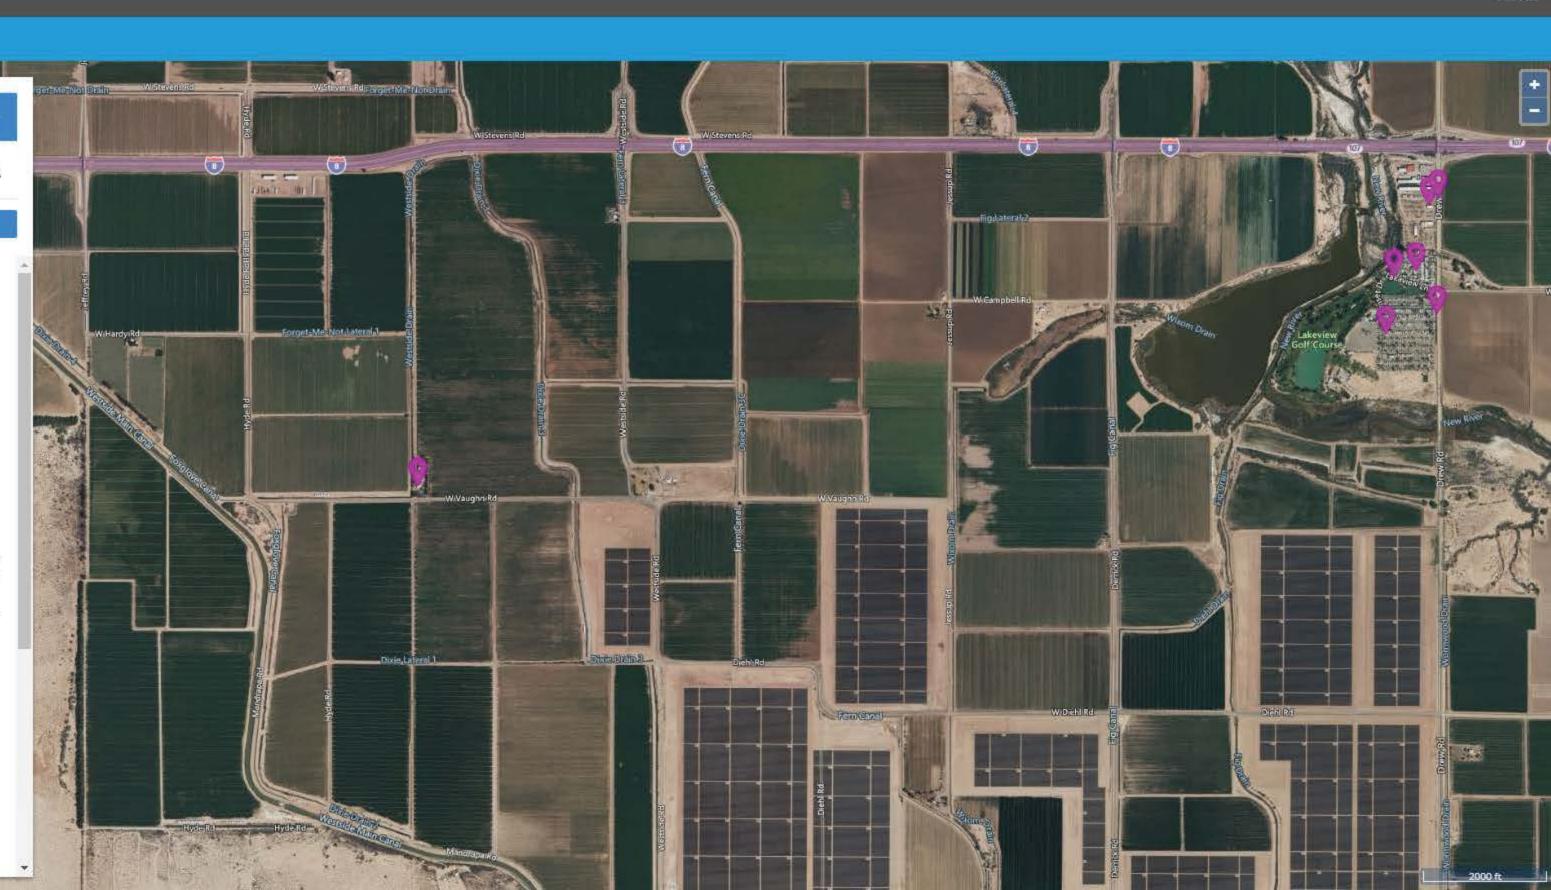

# ADDITIONAL HELP

# Q Simple Search

Enter any text into the keyword search. The results are based on each word. Using quotes does not create a phrase.

# Filter

Items listed under the Filter tab limit your search results to the selected items. Filtering is applied in addition to the text you enter in the search

# Landowner Interviews Big Rock 2 Cluster Solar & Storage Project

	Landowner Name	Interview Completed	Date
1	Tomlinson, William	Yes	8/29/24
2	Tomlinson, Frank	Yes, see William Tomlinson	8/29/24
3	JR Preece Inc.	No	
4	Kuhn, John R	Yes	9/6/24
5	F.C. & M.K. Tomlinson LLC	Yes, see William Tomlinson	8/29/24
6	La Valle Sabbia Inc.	Yes	8/29/24
7	Whitmer, Randall & Soknin	Yes	9/5/24
8	Brundy, Thomas & Karen, JT D	Yes	8/29/2024
9	Downs, Susan & Derrick, Timothy	Yes	9/1/24

The ASTM Standard (E 1527-21, Section 10) for Phase I Environmental Site Assessments requires interviews with past and present owners and occupants of the property in order to obtain information on the history and uses of the property. Please answer the questions below to the best of your knowledge. Please provide additional information for all YES answers.

addi	itional information for all YES answers.	
1.	Current Property Uses and Buildings: How long have you owned or occupied the property?	
	30 years	
	Describe the current uses of the property.	
	agriculture	
-	How long has the property been used for these purposes?	
	100 years	5 u
	Describe any buildings on the property and indicate the years they were constructed.	
	none	

			ab uso if known
Past Uses: Describe the past use(s) of the prop	erty and indicate tr	ne time period for ea	acti use, ii knowi
agriculture

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER/OCCUPANT/REPRESENTATIVE	
Have any spills occurred?	
Yes No Unknown	
If yes, please describe:	
10. Fill Dirt: Has fill dirt been brought onto the property from an off-site source?	
Yes No Unknown	
If yes, what was the source of fill dirt?	
in yes, what was the source of the dirt:	
If yes, was/is there evidence that the fill dirt in may be contaminated?	
Yes No Unknown	
If yes, please provide soil sampling data, if available, or describe other evidence:	
11. Pits, Ponds, and Lagoons: Are there currently any pits, ponds, or lagoons on the property?	
Yes No Unknown If yes, please describe:	
If yes, please describe:	

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER/OCCUPANT/REPRESENTATIVE
Have any pits, ponds, or lagoons previously existed on the property?
Yes No Unknown
If yes, please describe:
12. Stained Soil: Are there currently any areas on the property with stained soil?
Yes No Unknown
If yes, please describe where, the size of stain, if there were odors, etc.:
Has stained soil previously existed on the property?
Yes No Unknown
If yes, please describe where, size of stain, if there were odors, etc.:

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR PROPERTY OWNER/OCCUPANT/REPRESENTATIVE
Are contaminants known to exist in any private well or non-public water system serving the property?  Yes No Unknown If yes, please describe
17. Wastewater: Does the property discharge wastewater, other than domestic wastewater of stormwater, into the sewer?  Yes No Unknown If yes, please describe
Does a neighboring property discharge wastewater, other than stormwater, onto the property?  Yes No Unknown If yes, please describe
Other than permission for domestic hookup, has any type of permit(s) for wastewater discharge beer issued to the property?  Yes No Unknown  If yes, please describe
18. Septic Tank: Does a septic tank exist, or has one existed previously at the property?  Yes (currently exists)  Yes (previously existed, was removed)  No Unknown

19. Cesspools/Cisterns: Do cesspools or cisterns currently exist on the property?  Yes (cesspool) Yes (cistern) No Unknown
Have cesspools or cisterns previously existed on the property?  Yes (cesspool) Yes (cistern) No Unknown
20. Transformer/Capacitor: Is there a transformer or capacitor on the property?  Yes No Unknown
If yes, is it known to contain PCBs?  Yes No Unknown
21. Hydraulic Equipment: Is there any hydraulic equipment such as automobile lifts or elevators on the property?  Yes No Unknown  If yes, please describe type and number of equipment:
If yes, is the hydraulic oil known to contain PCBs?  Yes No Unknown
22. Surveys: Has an asbestos and/or lead based paint survey been conducted at the property?  Yes No Unknown  If yes, when was the survey(s) conducted? Please provide copies of the reports if available.

Sampling, Remediation, or Risk Assessment Reports

Hazardous Waste Generator Manifests

Geotechnical Reports

27. Environmental Assessments: Are there any other environmental assessments that identified hazardous substances or petroleum products on the property?	
Yes No Unknown	
If yes, please describe:	
28. Litigation/Administrative Proceedings: Is there any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products associated with the property?  Yes No Unknown	
If yes, please describe:	
29. Additional Knowledge: Are you aware of any other information (not provided above) about the property related to a releases or potential release of hazardous substances or petroleum products?  Yes No Unknown If yes, please describe:
