Project Description (Proposed actions, location, and/or consequences).

The Proposed Project entails the construction of a new approximately 1.4-acre neighborhood park located at the southeast corner of 10th Street and Flower Street, just north of Civic Center Boulevard. The intent of this park is to provide the local community with access to open space, exercise, and recreation facilities. The Project components included within the park concept plan consist of a basketball court, skate park, playground area with rubberized play surface, an exercise area, canvas shade structures, turf play areas, new site lighting, water wise landscaping with shade trees, automated irrigation system, site furnishings including benches, bike racks, trash receptacles, drinking fountain and picnic tables, and a park monument sign. This park would be a walk-up, pedestrian park without a vehicle parking lot and would primarily serve the local neighborhood. No restrooms or staff would be present. The Project also includes a zone change from Professional (P) to Open Space (O).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.
