Attention: Mr. Nolan Leggio

Subject: **Phase I Environmental Site Assessment; *Wineville Market and Villages,* Tentative Map 36846, 33 Acres of Vacant Land at the Southeast Corner of Wineville Avenue and Limonite Avenue, City of Jurupa Valley, Riverside County, California 91752**

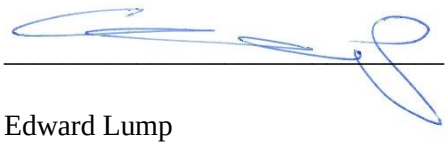

Dear Mr. Leggio:

Petra Geosciences, Inc. (Petra) presents this Phase I Environmental Site Assessment for the above-referenced site. This assessment has been conducted in accordance with our proposal P.N. 21-392P, dated September 30, 2021, and in conformance with the scope and limitations of the standards set forth in the American Society for Testing and Materials (ASTM) Practice E 1527-13 and the EPA's All Appropriate Inquiry (AAI) regulations 40 CFR Part 312. This assessment has revealed recognized environmental conditions on the subject property related to minor to moderate surface soil staining underlying dumped waste oil containers along the north boundary of the west parcel.

This opportunity to be of service to you is sincerely appreciated. Please do not hesitate to call this office if you have questions pertaining to this report.

Respectfully submitted,

PETRA GEOSCIENCES, INC.

Edward Lump
Associate Geologist

Siamak Jafroudi, PhD
Senior Principal Engineer

EXECUTIVE SUMMARY

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Wineville Market and Villages, Tentative Map 36846
33 Acres of Vacant Land at the Southeast Corner of
Wineville Avenue and Limonite Avenue
City of Jurupa Valley, Riverside County, California 91752

INTRODUCTION

The information presented in this report includes the results of our recent site reconnaissance, a review of pertinent literature, and recent federal, state, and local government agency records. Our field reconnaissance, data gathering, and compilation was performed by Mr. Edward Lump, Associate Geologist, with oversight by Dr. Siamak Jafroudi President and Principal Engineer.

SITE DESCRIPTION AND GENERAL INFORMATION

1. The subject property consists of two discontinuous parcels of vacant land located at the southeast corner of Limonite Avenue and Wineville Avenue in the City of Jurupa Valley, Riverside County, California. The property is bounded on the south by 63rd Street and existing commercial development on the east. A site location map is included as Figure 1.

2. The subject property is a rectangular shaped parcel comprised of approximately 32-acres of land identified by Assessor Parcel Numbers (APNs) 157-250-011 and -13. Improved Day Creek Channel (APN 157-250-012) divides the subject property. Topographically, the subject site slopes toward Day Creek Channel with central elevation of approximately 630 feet above mean sea level (msl). A knoll is located in the western end of the subject property with an elevation of approximately 660 feet above msl. The eastern portion of the subject property slopes upward from the improved drainage channel to approximately 660 feet above msl within the east central portion of the subject site.

3. The subject property is vacant land covered with a variable concentration of weeds and native vegetation. The site is bounded along the north by Limonite Avenue; along the east by commercial development; along the south by 63rd Street; and along the west by Wineville Avenue. Fencing in various stages of disrepair or non-existent is located along the southern edge of the property. Chain link fencing hinders access to both sides of Day Creek Channel. A short block wall supporting fencing comprises the east site boundary. A short wooden fence was observed along the west side of the subject property. Fencing along the north side of the subject site is localized to Day Creek Channel and a portion of the west half. Dirt roads into or through the subject property are present. An off-road dirt track was observed near the east side of the channel. Street improvements to the edge of perimeter streets do not exist, except for an asphalt curb along Limonite Avenue.

4. At the time of our site reconnaissance, a light amount of vegetation covered most of the site with isolated moderately dense areas of vegetation. The vegetation included weeds, thick grass, and minor bushes. Dumped trash/debris is locally common along the southern portion of the subject property, including dumped piles of livestock manure. Overall, the dumped debris appears to be non-hazardous waste; however, dumped plastic petroleum hydrocarbon containers (19 empty one-gallon containers) labeled as heavy-duty engine oil were observed along Limonite Avenue (Appendix A, Photos and 28, 29, and 30), and two, 5-gallon buckets (¾ full) of used motor oil was observed along Limonite Avenue, inside the chain link fence line on the parcel west of Day Creek Channel (Appendix A, Photos 24, 25, and 26). Minor to moderate staining was observed around the two buckets of used motor oil. Minor soil staining was noted around the plastic engine oil containers.

5. Wooden pole electrical lines were observed along the western and southern edges of the subject site. No pole-mounted or pad mounted transformers were observed on site during our reconnaissance.

6. Based on information obtained during this assessment, the subject site appears to have been utilized for dry land farming from at least 1931 to sometime after 1967 and prior to 1975. Except for construction of Day Creek Channel between the two subject property parcels in the mid 1980's, the northeast portion of the west subject parcel was used for stockpile materials in 2005 through 2007, the southeastern portion of the subject west parcel was used as a construction storage yard for offsite sewer main construction in 2017/2018, and construction of a sewer main through the west subject parcel in 2017/2018, the subject property appears to have been vacant undeveloped land from at least 1975 to present day. Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1901), and interviews. EDR reports that fire insurance maps covering the target property were not found. Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1902), and interviews. EDR reports that fire insurance maps covering the target property were not found.

7. No wells were observed on site during our reconnaissance, except, a 4-inch diameter PVC riser observed on the parcel east of Day Creek Channel (Appendix A, Photo 9). There were no ground improvements associated with this riser, which could be a monitoring well or an irrigation riser; however, there were no signs or markings, and we were unable to remove the cap. The existing property owner should be questioned on the purpose of this riser pipe.

8. Dumped soil piles were observed throughout the property, concentrated mostly along the southeast side, the south side along 63rd Street, and along the central portion of the north side of the property. These piles also contained rebar, horse manure, yard waste, irrigation pipe and tubing, concrete fragments, and other construction waste materials. No discoloration of soils within the soil piles was observed.

9. Trash and debris were observed dumped throughout the site and consists of scattered concrete fragments, tires, manure, pieces of wood, metal pipe fragments, plastic PVC pipes and fragments, plastic cups, piles of discarded concrete, asphalt, rubber tires, plastic water bottles, metal grocery cart, clothing and shoes, and other miscellaneous household trash and minor amounts of windblown trash. Additionally, what appeared to be localized surface soil staining, associated with multiple dumped plastic oil containers and two 5-gallon plastic buckets, was observed on the west parcel south of Limonite Avenue.

10. No surrounding sites were identified in our search of various government agency database records, which appear to have impacted soil or groundwater beneath the subject site.

11. There was no evidence of drums, sumps, pits, pools, or lagoons identified on site during our site reconnaissance. What appear to be shallow basins are located on the east and west sides of Day Creek Channel. It is anticipated that these are detention basins for storm water runoff.

RECOGNIZED ENVIRONMENTAL CONDITIONS

Recognized environmental conditions are defined by the American Society of Testing and Materials (ASTM) as any hazardous substance or petroleum product under conditions that indicate an existing, past, or material threat of release into the structures, ground, groundwater, or surface water at the subject site. If the presences of recognized environmental conditions are identified on a subject site, it may warrant additional research, site assessment, and/or action.

Controlled recognized environmental conditions (CREC'S) are defined by the American Society of Testing and Materials (ASTM) Practice E 1527-13 as a recognized environmental condition resulting from the past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (i.e., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls. For example, if a leaking underground storage tank has been cleaned up to a commercial use standard but does not meet unrestricted residential cleanup criteria; this would be considered a controlled recognized environmental condition. The "control" is represented by the (inferred) restriction that the property remains commercial.

Historical recognized environmental conditions (HREC'S) are defined by the American Society of Testing and Materials (ASTM) Practice E 1527-13 as a past release of any *hazardous substances or petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory , without subjecting the *property* to any required controls (i.e., *property* use restrictions, *activity and use limitations*, *institutional controls* or *engineering controls*).

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527 for the proposed Wineville Market and Villages project, Tentative Map 36846 located in Jurupa Valley, Riverside County, California. Any exceptions to, or deletions from, this practice are described in the section titled data gaps of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except the following:

1. Multiple quart and 5-gallon containers of what appears to be used petroleum hydrocarbon products (i.e., waste oil) have been dumped inside the fence line along the north central boundary of the subject property with Limonite Avenue (Appendix A, Photographs 25, 26, 27, 29, 30, and 31). Localized surface staining was observed.

The containers and liquid product should be carefully removed to limit additional spills and disposed of offsite following local or county requirements by a licensed environmental contractor. Stained soils should be excavated and disposed of offsite following local or county requirements by a licensed environmental contractor. An experienced environmental professional, such as Petra, should monitor the removal of containers and excavation of stained soils to verify complete removal and offsite disposal of elevated petroleum hydrocarbon soil residues. This verification would also consist of soil sampling and laboratory analysis of the bottom and sidewalls of the excavation(s).

2. Surficial piles of dumped fill materials were observed within the subject property during our recent site walk. Given the history of the subject property, there is a potential for additional fill materials to have been placed onsite that have been leveled and not readily detected by visual observation of the existing ground surface. Due to the unknown source of the stockpiled materials and unknown location(s) of possible leveled fill materials onsite, a limited Phase II Environmental Soil Residue Survey is recommended to assess the limits of leveled undocumented fill materials and the existence of elevated soil residues from anthropogenic sources (i.e., manmade). Petra has provided a proposal for a limited Phase II Environmental Soil Residue Survey under a separate document.

SITE CONSIDERATIONS

The items presented below are not considered recognized environmental conditions in accordance with ASTM E 1527-13. Although these items may warrant consideration in conjunction with any planned development activities, they are not recognized environmental conditions. The information regarding possible actions relative to these items has been provided as guidance.

1. With development of any vacant property which has had fill placed overtime from an unknown source, a certain amount of unknown subsurface conditions should be anticipated. Any discolored soils, noxious odors, and/or buried objects/debris encountered during clearing and grubbing or future grading and development should be left in place until an experienced environmental professional (such as Petra) has had the opportunity to evaluate the conditions, and provide recommendations if needed.

2. It is recommended that all trash, debris, and waste material observed on the site be removed and disposed in accordance with current local, state and federal disposal regulations.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Wineville Market and Villages, Tentative Map 36846
33 Acres of Vacant Land at the Southeast Corner of
Wineville Avenue and Limonite Avenue
City of Jurupa Valley, Riverside County, California 91752

INTRODUCTION

The information presented in this report includes the results of our recent field reconnaissance, a review of various federal, state, and local government agency records, and a review of historic aerial photographs and topographic maps for the site and vicinity. This report includes a summary of our findings, our opinion as to the current environmental condition of the site, and recommendations for additional work, if needed.

Purpose

This assessment was conducted to determine if any recognized environmental conditions exist on the subject site. Recognized environmental conditions are defined by the American Society for Testing and Materials (ASTM) as any hazardous substance or petroleum product under conditions that indicate an existing, past, or material threat of release into the structures, ground, groundwater, or surface water at the subject site.

This assessment is also intended to satisfy the requirement for conducting all appropriate inquiries into the previous ownership and uses of a property for the purposes of meeting the all appropriate inquiries provisions necessary to qualify for certain landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

We have performed this assessment in general conformance with the scope and limitations of the standards set forth in the ASTM Practice E 1527-13 and the EPA's All Appropriate Inquiry (AAI) regulations 40 CFR Part 312.

Involved Parties

This report was prepared by Petra Geosciences, Inc. (Petra) at the request of Diversified Pacific Communities for their exclusive use. Use of this report or reliance thereon by other parties or projects is not authorized. The report may not be suitable for other parties or other purposes.

SCOPE OF ASSESSMENT

The scope of this assessment included the following:

1. Performing a site reconnaissance to identify the current conditions and land use of the subject site and adjoining properties, during which visual evidence of prior uses of the subject site and adjoining properties were noted. The site reconnaissance included an observation of the site surface and the site perimeter.

2. Researching historical land use of the subject site and vicinity by reviewing available historical aerial photographs, United States Geologic Survey (USGS) topographic maps, fire insurance maps, city directories, and other reasonably ascertainable maps and data.

3. Conducting a search for environmental liens and Activities and Use Limitations (AULs) for the subject property.

4. Performing a cursory review of local and regional geological conditions as they pertain solely to commenting of recognized environmental conditions for the site.

5. Obtaining and reviewing a search of pertinent federal, state, and local regulatory agency databases concerning environmental conditions on and in the vicinity of the site. As specified in the ASTM and AAI standards, the following databases were searched using, at a minimum, the recommended search radius:

   - Federal National Priority List (NPL) site list,
   - Federal Delisted NPL site list,
   - Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) site list,
   - Federal CERCLIS- No Further Remedial Action Planned (CERC-NFRAP) site list,
   - Federal Resource Conservation and Recovery Act Information (RCRA) Corrective Action Report (CORRACTS) facilities list,
   - Federal RCRA non-CORRACTS Treat, Store and Dispose (RCRA-TSD) facilities list,
   - Federal RCRA generators list,
   - Federal institutional control/engineering control registries,
   - Federal Emergency Response Notification System (ERNS) list,
   - State and tribal lists of hazardous waste sites identified for investigation or remediation including: State- and tribal-equivalent NPL, State, and tribal-equivalent CERCLIS lists,
   - State and tribal landfill and/or solid waste disposal site lists,
   - State and tribal leaking storage tank lists,
   - State and tribal registered storage tank lists,
   - State and tribal institutional control/engineering control registries,
   - State and tribal voluntary cleanup sites, and
   - State and tribal Brownfield sites.

   In the interest of thoroughness, numerous non-ASTM and non-AAI required databases were also searched. These databases are listed and discussed in the database search included within this report.

6. Contacting and interviewing knowledgeable persons, such as property owners, managers, and representatives of local government agencies regarding historical site use and current site conditions, if possible.

7. Evaluating the presence of recognized environmental conditions at the subject site through visual observation and research of reasonably ascertainable records. Recognized environmental conditions may include the presence of hazardous materials, petroleum products, underground storage tanks, above ground storage tanks, drums, chemical containers, polychlorinated biphenyls (PCB's), liquid or solid wastes, oil wells, and areas indicative of potential contamination including stained soils and/or pavement, stressed vegetation, drains, drums, sumps, pits, ponds, lagoons, odors, and septic systems.

8. Preparing this report presenting the results of our assessment.

9. Non-Scope Items. In addition to those items discussed above, several items outside the scope of ASTM Standard E 1527-13 and AAI will be addressed in this assessment. The non-scope items include:

    a. Cursory visual examination of the site for the potential presence of asbestos containing materials. Please note this is not a survey for these materials.

    b. Cursory visual examination of the site for the potential presence of lead-based paint. Please note this is not a survey for these materials.

Unless listed above, this assessment does not include any testing or sampling of materials (such as an assessment for the potential presence of methane or radon, or the sampling and testing of soil, soil vapor, air, surface water, or groundwater). This assessment does not include evaluating the site for the presence of wetlands, regulatory compliance, or other items beyond the scope of ASTM E 1527-13 or 40 CFR Part 312, nor is it an assessment for vapor intrusion as defined by ASTM E 2600-15.

SITE OVERVIEW

According to the California Department of Conservation, Geologic Energy Management Division (CalGEM) Online Mapping System (2021), the site is in Section 29, Township 02 South, Range 06 West, San Bernardino Base and Meridian. Topographically, the subject site slopes toward Day Creek Channel with a central rim elevation of approximately 645 feet above mean sea level (msl). A knoll is located on the western end of the subject property with an elevation of approximately 665 feet above msl. The eastern portion of the subject property slopes upward from the improved drainage channel to approximately 660 feet above msl within the east central portion of the subject site. A site location map is included as Figure 1.

The rectangular subject site is located at southeast corner of Limonite Avenue and Wineville Avenue in the City of Jurupa Valley, Riverside County, California. The site is comprised of approximately 33-acres of vacant land with Assessor Parcel Numbers (APNs) 157-250-011 and -13. A thin to locally thick layer of

native vegetation covers most of the subject property. Dirt roads exist in proximity to Day Creek Channel, including an off-road track. Vegetation clearings were observed along the northern and southern edges of the subject site. A sewer main with manholes exists within a raised fill embankment extending north from Dana Avenue on the south to Limonite Avenue on the north. The subject property is bounded 63 Street to the south, Wineville Avenue to the west and by Limonite Avenue to the north, with by residential development beyond. Commercial development bounds the subject property on the east. A plan showing the current configuration of the site is included as Figure 2.

PREVIOUS LAND USE

Based on information obtained during this assessment, portions of the subject site appear to have been utilized for dry land farming from at least 1931 to sometime after 1967 and before 1975. In the 1930's, isolated dirt roads were noted on the subject property extending offsite to the north. No structures were readily noted. In the 1938 aerial photograph is appears that the west central portion of the subject property was affected by drainage from the north. In the late 1940's, the subject site was a part of a large dry land farmed area extending from 63rd Street to the north, east and west. The alignment of Limonite Avenue was constructed along the north side of the subject property sometime after 1953 and before 1959, as was the alignment of Wineville Ave. The 1959 aerial photograph depicted a dirt road extending north from Dana Avenue through the subject property and the northeast portion of the west parcel appeared to be cleared of vegetation. By 1975 dry land farming of the subject property was not readily discernable. Sometime after 1975 and before 1985 Dry Creek Channel was constructed between the western and eastern portions of the subject site. By 1985 residential development to the north was either constructed or in the home building phase. Many dumped piles of what appeared to be earth materials were stockpiled on the east end of the west parcel in 2006. By 2009 the stockpile materials were not readily visible. Except for dirt road activity, the subject property appeared vacant from 2009 to late 2017 or early 2018. Brush clearing and construction activity related to the sewer main embankment construction located west of Day Creek Channel was noted in February 2018.

Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1901), and interviews. EDR reports that fire insurance maps covering the target property were not found.

PREVIOUS REPORTS

Petra was provided a Phase I Environmental Site Assessment report by LGC Inland, Inc. (dated October 12, 2005) for the subject property by the client. A summary of this report is provided below.

LGC Inland, Inc. (LGC), 2005

The Phase I Environmental Site Assessment and Preliminary Methane Analysis was performed in accordance with ASTM Standard E1527-00 and Riverside County Department of Environmental Health (RCDEH) Preliminary Methane Investigation Protocol.

General Site Description

LGC Inland, Inc. (LGC) was retained by the BEN CHAI GROUP (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA or Assessment) and Preliminary Methane Analysis for a 34.07-acre proposed commercial and residential development site located along the south side of Limonite A venue between Wineville Avenue and Loren Avenue in the Mira Loma Area of Riverside County, California. At the time of the September 30, 2005 site visit the subject property was generally bounded by Limonite Avenue to the north, vacant land to the east, unimproved 63rd Street to the south and Wineville Avenue to the west.

During the site visit, the LGC Assessor was unaccompanied. The subject property was separated from surrounding properties by existing improved and unimproved roadways and an approximately 6-foot-high chain-link fence to the east. Also, LGC obtained an Assessor's Parcel Map as well as maps supplied by the Client that delineated the subject property boundaries, sufficient for the purposes of this Assessment.

Previous Environmental Documentation

The Client has not provided or reported to LGC any information which indicates the subject property is being sold or purchased at a significantly reduced price due to outstanding environmental issues. Nor has the Client provided or reported to LGC information indicating a specific knowledge of RECs, historic RECs or Environmental Deed Restrictions related to the subject property.

In addition, no previous environmental documentation (Phase I ESAs, Phase II ESAs, etc.) concerning the subject property was provided to LGC or reported to exist by the Client. It is possible information contained in prior reports (if any) could change LGC's conclusions or recommendations herein. If previous environmental documentation becomes available to the Client or subject property owner, a copy should be provided to LGC for evaluation.

Entities seeking a land entitlement with Riverside County shall conduct a preliminary analysis pertaining to site use and possible presence of methane gas. Soils testing is not initially required and is not a part of the scope of work of this report. Post-grading testing may only be waived if it can be established to Riverside County's satisfaction that the subject property was never used as a dairy, poultry ranch, hog ranch, livestock feed operation, manure stockpile site, manure burial site, or for any other purpose that might result in the deposition of significant methane.

Applicants shall provide to the Riverside County Departments of Planning, Building and Safety and Environmental Health a report addressing whether the subject property in question (Tentative Tract Map 33258) was ever used as a dairy, poultry ranch, hog ranch, livestock feed operation, manure stockpile site, manure burial site, agricultural pond or for any other purpose that might result in the deposition of materials which could produce significant methane. The report shall be prepared and signed by a licensed registered environmental assessor.

Historical Review Summary

From the historical information reviewed, LGC concludes that in the 1933 aerial photograph the subject property was undeveloped land. The subject property appeared to have an agricultural use (dry-land

farming) from approximately 1948 to 1974. Aerial photographs from 1986 to 2002 show that the subject property was undeveloped land. LGC did not observe any dry cleaners, dairies, hog ranches, poultry ranches, livestock feed operations, agricultural ponds, gasoline stations, military bases, or major manufacturing businesses on the subject property.

Interviews

A copy of an Environmental Site Assessment Key Site Manager (KSM) Questionnaire was sent via the mail to the property owner listed in the Riverside County Tax Assessor records, Kimble Chai. To date, the KSM Questionnaire has not been received by LGC. No other KSM was identified for LGC to interview.

Surface Characterization

At the time of the October 11, 2005 site visit, the subject property comprised a total of 34.07-acres of undeveloped land consisting of two (2) rectangular-shaped tax parcels located to the south of Limonite A avenue and east of Wineville Avenue in the Mira Loma area of Riverside County, California. The Day Creek flood control channel bisects the subject property. Numerous stockpiles of gravel excavated from the San Sevaine Channel were being deposited by Riverside County Flood Control personnel and equipment on-site in a 450' by 275' cleared area in the eastern portion of the western half of the subject property during the site visit.

The topography of the site is relatively flat, with slopes descending into Day Creek between Dana A venue and Lucretia A venue. The general elevation of the property ranges approximately from 657 to 675 feet above mean sea level (MSL), with local drainage generally being directed to the south. Vegetation primarily consisted of a cover of annual waist-high weeds and grasses on the subject property. Weather conditions at the time of the site visit consisted of sunny skies, with temperatures in the 80s. The subject property was generally bounded by Limonite Avenue to the north, vacant land to the east, unimproved 63rd Street to the south and Wineville Avenue to the west.

Hazardous Materials Handling and Storage

Based upon the past use of the subject property for agricultural purposes there is a potential for historically restricted agricultural chemicals to have been applied on-site. Typical pesticides historically applied to agricultural land have included fungicides, herbicides, and nematocides. LGC recommends a limited surface soil sampling investigation for pesticides and herbicides.

There are three areas of abandoned manure stockpiles located on each side of the subject property. The manure appears to have been dumped on-site from other locations because the subject property has never been a dairy, poultry ranch, hog ranch or livestock feed operation. There are other areas on-site where it appears that manure has been distributed throughout the surface soils due to past discing of the subject property. There may also be additional areas of stockpiled manure on-site that are not readily observable due to the overgrown conditions of some areas of the subject property. Based on these observations, Riverside County may require a methane investigation for the subject property.

Four (4) areas of soil staining were noted in the eastern half of the subject prope1iy that ranged in size from 3' by 6' to 5' by 15'. LGC recommends sampling these stained soil areas to determine their lateral and vertical extent. These stained soil areas are located on a Site Plan included as Plate No. 1 at the rear of this report. In addition, four (4) one-gallon containers of used oil were observed on-site. These containers of used oil should be properly disposed of or recycled according to current regulations.

Numerous piles of abandoned debris observed on-site included wood, a wood power pole, metal utility poles, green waste, concrete, used tires, PVC piping, concrete conduit and concrete encased steel piping, household trash, car parts, a shower stall, a dog carcass, furniture and tree stumps.

During the site visit, no stained or discolored sinks, drains, catch basins, drip pads, or sumps were observed. During the site inspection, no municipal waste dumpsters were observed at the subject property. Based on observations made during the site visit, it is possible that amounts of buried debris may be encountered on-site due to overgrown conditions or due to previous site activities. One (1) blue, plastic 55-gallon drum was observed near the southern property line. The drum was empty and there was no apparent staining adjoining the drum. No ASTs were observed at the subject property. No USTs were reported at the subject property. In addition, no visual or physical evidence of current or past USTs was discovered during the site visit. In particular, LGC searched for: fill pipes, vent pipes, manways, manholes, access covers, and concrete pads not homogeneous with surrounding surfaces, concrete build-up areas potentially indicating pump islands, abandoned pumping equipment, or fuel pumps. No electrical transformers were observed at the subject property.

Executive Summary and Recommendations

Based upon the site visit, historical review, regulato1y records review, and other information detailed within this report, LGC stated that this Assessment identified no evidence of ASTM Recognized Environmental Conditions (RECs) in connection with the subject prope1ty. However, other non-REC issues were identified as discussed below. With the possible exception of the items below, no further investigation is recommended at this time.

- Based on a review of aerial photographs, the subject site was d1y-farmed agricultural land between approximately 1948 and 1974. The subject prope1ty is currently undeveloped land. LGC recommends a limited surface soil sampling investigation for pesticides and herbicides.

- The subject property has areas of abandoned manure stockpiles that have been dumped on-site, apparently from other off-site locations, and areas where manure has been distributed in the surface soils due to discing activity. Riverside County may require a methane investigation for the subject property.

- Four (4) areas of soil staining were noted in the eastern half of the subject property that ranged in size from 3' by 6' to 5' by 15'. LGC recommends sampling these stained soil areas to determine their lateral and ve1tical extent.

- No structures containing suspect asbestos containing materials (ACMs) were identified on the subject prope1ty. LGC's scope of work did not include a suspect asbestos-containing materials (ACMs) inspection or survey. However, suspect ACMs likely located on the subject prope1ty may include, but are not necessarily limited to, an abandoned stockpile of roofing materials located in the northeast corner of the subject property on APN 157-250-011. Suspect ACM testing was not included in the scope of work. However, as defined in NESHAPs Section 61.141, the observed materials may be classified as suspect regulated ACMs. Prior to any demolition, renovation, or any other activity that may disturb these materials, either an inspection should be performed by an accredited Building Inspector, or the affected materials should be handled as asbestos containing. If future sampling identifies any such materials as ACMs, they should be properly abated and disposed of by a state-licensed abatement contractor prior to disturbance or demolition.

- All used tires, used oil and hazardous materials located on-site should be properly disposed of or recycled according to current regulations.

ENVIRONMENTAL SETTING

The following section provides an overview of the regional and local geologic setting and includes information pertaining to groundwater conditions in the vicinity of the subject site. Geotechnical hazard information (faults, landslides, etc.) is not part of this assessment. This section does not constitute a geotechnical investigation of the subject site and should not be taken as such.

Geology

Geologically, the site lies within the northern portion of the Peninsular Ranges Geomorphic Province (CGS, 2002). The Peninsular Range Province extends from the tip of Baja California north to the Transverse Ranges Geomorphic Province and is characterized by northwest trending mountain ranges separated by subparallel fault zones. The San Bernardino Mountains, located north of the site, provides the boundary between the Peninsula Range Province and the Transverse Ranges Province. In general, the province is underlain primarily of plutonic rock of the Southern California Batholith. The Peninsular Range Geomorphic Province is generally characterized by alleviated basins and elevated erosion surfaces.

More specifically, the subject site lies within the northern portion of the Perris Block. The Perris Block is an internally unfaulted, eroded mass of Cretaceous age and older granitic rocks of the Southern California Batholith and metasedimentary basement rocks bounded by the San Jacinto Fault Zone to the northeast, the Elsinore Fault Zone to the southwest, the Cucamonga Fault Zone to the northwest, and the Temecula Basin to the southeast. The interior of the Perris Block has various low bedrock mountains, hills and bedrock plains with intervening sediment-filled valleys, that make up six erosional surfaces sculpted by the effects of the vertical oscillation of the block during the Plio-Pleistocene era.

According to the Geologic Map of the Corona North 7.5' Quadrangle, Riverside and San Bernardino County, California, Version 1.0, the site is underlain by one unit of Holocene and two units of late to middle Pleistocene age deposits. The Holocene unit, Young Alluvial Channel deposits, is described as unconsolidated alluvium consisting of medium- to fine-grain sand and lesser silt (Morton and Gray, 2002). This unit is mapped in the central portion of the subject property. The unit on the east portion of the subject property, Old Alluvial Fan deposits, is described as indurated sandy deposits. The oldest unit, Old Alluvial Channel deposits, mapped on the west portion of the subject property, is described as unconsolidated to indurated deposits consisting mainly of sand, with minor gravel and silt.

Surface Water

No indication of surface water was observed on the site at the time of our site reconnaissance.

The subject property is covered by two Flood Insurance Maps (FIRMs). The west parcel and a portion of the east parcel are within FIRM 06065C0681G. Much of the east parcel is within FIRM 06065C0682G. Except for Day Creek Channel, which is not a part of the subject property, the subject site is mapped within Zone X. In this case, Zone X is defined as areas of 0.2 percent annual chance flood; areas of 1 percent chance flood with average depths of less than 1 foot or with drainage areas less than 1 square mile. A copy of the FIRM maps (Effective date August 28, 2008) is provided in Appendix B.

North of Limonite Avenue, Day Creek Channel is mapped as Special Flood Hazard Area Zone A without base flood elevation. Between the two subject property parcels, the channel is not mapped within Zone A; however, a note indicates the channel has a "1 percent annual chance flood discharge contained in structure."

Groundwater

The site is located within the Upper Santa Ana River - Chino (8-002.01) Groundwater Basin, (California Department of Water Resources, [CDWR], 2021). No groundwater wells were listed within the subject site on the CDWR Water Data Library (CDWR, 2021). The closest mapped public well to the subject property, approximately 4,130 feet northwest, was mapped near the northwest corner of I-15 and Limonite Avenue. Groundwater depths reported from October 2010 to March 2021 ranged from approximately 104 to 110 feet bgs.

A 1994 Case Closure Summary by the Riverside County Department of Environmental Health related to a leaking underground storage tank (LUST) case east of the subject site at 10565 Limonite Avenue, Norco, listed the highest groundwater depth below the ground surface as 20 to 30 feet. No flow direction was reported. A 2013 Case Closure Summary related to a LUST case further east of the subject property, at 6190 Etiwanda Avenue, Mira Loma, listed historical depth to groundwater as 71.21 feet to 83.19 feet below the ground surface (bgs). The summary reported a flow direction to the northwest. A Tank Removal/Excavation Geologic Report for a facility east of the subject property at 10960 Limonite Avenue, Mira Loma, referenced a USGS groundwater map depicting groundwater at a depth of approximately 48 feet bgs with a flow direction south-southeast (PIC, 1989). However, there was no reference provided to the date.

Groundwater depth varies within the area and is generally on the order of 50 to 70 feet below ground surface (bgs). Though flow direction beneath the subject site is unknown it is believed to be in a southerly direction based on topography. The memorandum documenting this inquiry is included in Appendix B.

RESULTS OF ASSESSMENT

The results of our site reconnaissance and assessment of adjacent sites, agency database review, and historical land use study are presented in the following sections.

Site Observation

Petra conducted a reconnaissance of the subject site on October 12, 2021. Site photographs are included in Appendix B. Our site observations are summarized below.

Site Description and General Information

- The subject property consists of two discontinuous parcels of vacant land located at the southeast corner of Limonite Avenue and Wineville Avenue in the City of Jurupa Valley, Riverside County, California. The property is bounded on the south by 63rd Street and existing commercial development on the east. A site location map is included as Figure 1.

- The subject property is a rectangular shaped parcel comprised of approximately 32-acres of land identified by Assessor Parcel Numbers (APNs) 157-250-011 and -13. Improved Day Creek Channel (APN 157-250-012) divides the subject property. Topographically, the subject site slopes toward Day Creek Channel with central elevation of approximately 630 feet above mean sea level (msl). A knoll is in the western end of the subject property with an elevation of approximately 660 feet above msl. The eastern portion of the subject property slopes upward from the improved drainage channel to approximately 660 feet above msl within the east central portion of the subject site.

- The site is bounded along the north by Limonite Avenue; along the east by commercial development; along the south by 63rd Street; and along the west by Wineville Avenue. Fencing in various stages of disrepair or non-existent is located along the southern edge of the property. Chain link fencing hinders access to both sides of Day Creek Channel. A short block wall supporting fencing comprises the east site boundary. A short wooden fence was observed along the west side of the subject property. Fencing along the north side of the subject site is localized to Day Creek Channel and a portion of the west half. Dirt roads into or through the subject property are present. An off-road dirt track was observed near the east side of the channel. Street improvements to the edge of perimeter streets do not exist, except for asphalt curb along Limonite Avenue.

- At the time of our site reconnaissance, a light amount of vegetation covered most of the site with isolated moderately dense areas of vegetation. The vegetation included weeds, thick grass, and minor bushes. Dumped trash/debris is locally common along the southern portion of the subject property, including dumped piles of livestock manure. Overall, the dumped debris appears to be non-hazardous waste; however, dumped plastic petroleum hydrocarbon containers (19 empty one-gallon containers) labeled as heavy-duty engine oil were observed along Limonite Avenue (Appendix A, Photos and 28, 29, and 30), and two, 5-gallon buckets (¾ full) of used motor oil was observed along Limonite Avenue,

inside the chain link fence line on the parcel west of Day Creek Channel (Appendix A, Photos 24, 25, and 26). Minor to moderate staining was observed around the two buckets of used motor oil. Minor soil staining was noted around the plastic engine oil containers.

- Wooden pole electrical lines were observed along the western and southern edges of the subject site. No pole-mounted or pad mounted transformers were observed on site during our reconnaissance.

- No wells were observed on site during our reconnaissance, except, a 4-inch diameter PVC riser observed on the parcel east of Day Creek Channel (Appendix A, Photo 9). There were no ground improvements associated with this riser, which could be a monitoring well or an irrigation riser; however, there were no signs or markings, and we were unable to remove the cap. The existing property owner should be questioned on the purpose of this riser pipe.

- Dumped soil piles were observed throughout the property, concentrated mostly along the southeast side, the south side along 63rd Street, and along the central portion of the north side of the property. These piles also contained rebar, horse manure, yard waste, irrigation pipe and tubing, concrete fragments, and other construction waste materials. No discoloration of soils within the soil piles was observed.

- Trash and debris were observed dumped throughout the site and consists of scattered concrete fragments, tires, manure, pieces of wood, metal pipe fragments, plastic PVC pipes and fragments, plastic cups, piles of discarded concrete, asphalt, rubber tires, plastic water bottles, metal grocery cart, clothing and shoes, and other miscellaneous household trash and minor amounts of windblown trash. Additionally, what appeared to be localized surface soil staining, associated with multiple dumped plastic oil containers and 5-gallon plastic buckets, was observed along Limonite Avenue.

- There was no evidence of drums, sumps, pits, pools, or lagoons identified on site during our site reconnaissance. What appeared to be shallow storm water basins were noted on the east and west side of Day Creek Channel.

Adjacent Site and Vicinity Observations

The site is situated in a mixed-use area with vacant land, residential and commercial properties. Our specific observations are noted below:

North — To the north of the subject site is Limonite Avenue with residential development beyond.

East — To the east of the subject site is commercial development with a self-storage facility, with Stater Bro. Market, a commercial shopping center and Etiwanda Avenue beyond. East of Etiwanda Avenue is rural residential development.

South — To the south of the subject site is 63rd Street with rural residential development beyond.

West — To the west of the subject site is Wineville Avenue with a mix of commercial and residential development, with residential tract development and the I-15 Freeway beyond.

Government Agency Database Research

A search of federal, state, and local government listings was performed by Environmental Data Resources, Inc. (EDR) for the purposes of this report. The search radius used for all government databases meets or exceeds the standard search distance adopted by ASTM and AAI.

Results of Agency Records Search

A data search of the various government agency records listed in Appendix B revealed one listing for the subject site, identified as Sky Country Trunk Sewer Project (Limonite Ave., Sky Country Dr., Smith, 64th, and Wineville, Jurupa Valley, CA 91752). The site was reported under the National Pollution Discharge Elimination System (NPDES) and California Integrated Water Quality System (CIWQS) databases. A summary of information from these databases, associated with storm water protection during construction services, is provided below.

The EDR report shows 25 surrounding sites, many with multiple listing for the same address, within the requested search radii. Two of the sites are listed within a leaking underground storage tank (LUST) database but are mapped outside the area of concern for cross-gradient sites. Four orphan sites (sites with inadequate address information to be mapped by EDR) were identified during the agency database search. Refer to the EDR Report in Appendix C for the search radii completed for this assessment.

The linear distance and groundwater gradient guidelines provided in ASTM E2600-15 (Tier 1 Areas of Concern) are used as a reasonable screening tool for groundwater and vapor migration to identify a recognized environmental condition (REC) associated with the subject site (ASTM, 2015; Buonicore, 2014). For contaminated sources (such as a dry cleaner with a PCE release or a gas station with a leaking underground storage tank releasing BTEX) located up-gradient of the Target Property (TP), the focus would be on those contaminated sites within the AOC distance of 1,760 feet. The AOC search distance in the cross-gradient quadrant is reduced from 1,760 feet to 365 feet, and the AOC for contaminated sites down-gradient from the TP is reduced from 1,760 feet to 100 feet. A copy of the *EDR Lightbox* plan showing the AOC boundaries can be found in Appendix B. A brief description of the sites listed in the EDR report, which are of potential concern due to the nature of the listing or their proximity to the site (within the AOC), is provided below:

TARGET SITE 1: Sky Country Trunk Sewer Project, Limonite Ave., Sky Country Dr., Smith, 64th, Wineville, Jurupa Valley, CA, 91752: This site is on the subject property. This site is listed on the National Pollution Discharge Elimination System Permits (NPDES) and California Integrated Water Quality System (CIWQS) databases. Under NPDES, the Regulatory Measure Type is reported as "construction." The Status dates are listed as March 23, 2017 and March 27, 2018. The Operator name is reported as "Jurupa

Community Services District." The Termination date of the Regulatory Measure is listed as September 20, 2018. Under CIWQS, the Regulatory Measure Type is reported as "storm water construction." The Regulatory Measure Status is listed as "Terminated" on September 20, 2018. Based upon these listing associated solely with storm water protection during temporary construction activity, these listings do not currently appear to represent a recognized environmental condition with regards to the subject site at this time.

Sites A2 & A3: Dons ARCO & Raul Hermosillo, 11155 Sky Country Dr., Mira Loma, CA, 91752: This site is reported <1/8 of a mile east-northeast of, and at a higher elevation than the subject site. *Dons ARCO* is listed on the EDR Historical Auto database. This address is reported as a gasoline service station in 1991, 1992, and 1993. *Raul Hermosillo* is listed on the Resource Conservation and Recovery Act (RCRA) Non-Generator of Hazardous Waste/No Longer Regulated (RCRA NonGen/NLR). The Federal Waste Generator Description is listed as "not a generator, verified." No violations or evaluations are reported to be found. Based on the lack of recorded violations or evaluations and no dual listings for the address, this listing does not appear to represent a recognized environmental condition with regards to the subject site at this time.

Site B5: Stater Bros. Markets 088, 11070 Limonite Ave., Mira Loma, CA, 91752: This site is reported <1/8 of a mile east-northeast of, and at a higher elevation than the subject site. This site is listed on Cal EPA's California Environmental Reporting System-Hazardous Waste (CERS HAZ WASTE), CalEPA's Facility and Manifest Data (HAZNET), California Environmental Reporting System (CERS), and the DTSC's Hazardous Waste Tracking System (HWTS) databases. The CERS HAZ WASTE database describes the facility as a "hazardous waste generator." HAZNET refers to multiple years of hazardous waste disposal manifests regarding "other organic solids", "off-specification, aged or surplus organics", "asbestos containing waste", and "aqueous solution with total organic residues less than 10 percent." These materials are reported as being recovered and/or recycled offsite. Under CERS, this site is listed as a "chemical storage facility." Multiple administrative violations were listed. Multiple evaluations done by a local agency reported no violations. The HWTS database reported a Create Date of July 2008. No other pertinent information is provided. Based on the lack of recorded violations or evaluations associated with a spill, leak, or unauthorized release of hazardous waste, this listing does not appear to represent a recognized environmental condition with regards to the subject site at this time.

Sites B7 & B8: Sky Country & Sky Country Cleaners, 11034 Limonite Ave., Mira Loma, CA, 91752: This site is reported between 1/8 to 1/4 of a mile east of, and at a higher elevation than the subject site. This site is listed on the RCRA Large Quantity Generator (RCRA-LQG), the EPA's Facility Index System/Facility Registry System (FINDS), DTSC's Cleaner Facility (DRYCLEANERS), and the California Air Resources Board's Emission Inventory Data (EMI) databases. Under RCRA-LQG no violations were reportedly found. The DRYCLEANERS database described this facility as dry cleaning and laundry services (except coin-operated." This site was active as of April 1987. "Dry cleaning equipment with perchloroethylene" with a "vapor recovery unit compress & condense" was reported at this facility. Under EMI, the volume of "total organic hydrocarbon gases" and "reactive organic gases" emissions were listed as one ton per year in 1987. The volume of "total organic hydrocarbon gases" emissions were listed as one ton per year in 1990. No additional pertinent information was listed.

This site is considered at a cross-gradient from the subject property. Based upon approximately 900 feet from the dry cleaner to the east subject site boundary (measured on Google Earth), this facility exceeds the AOC distance for cross-gradient sites of 365 feet. Based solely upon this distance, this facility does not appear to represent a recognized environmental condition with regards to the subject site at this time.

Site 22: Etiwanda Recycling, 6102 Etiwanda Ave., Jurupa Valley, CA, 91752: This site is reported between 1/4 to 1/2 of a mile east-northeast of, and at a higher elevation than the subject site. This site is listed on the State Department of Conservation Recycler (SWRCY), NPDES, CIWQS, CERS, HWTS, and the State Water Resources Control Board's Hazardous Substance Storage Container (HIST UST) databases. No pertinent information is listed under the SWRCY database. Under HIST UST, the name of the facility was reported as King Tool & Equipment Rental. Two, 5,000-gallon USTs were listed for this address in 1982: one unleaded product and one diesel. An industrial NPDES permit was issued for the recycling facility in September 2015. The status of the permit is listed as "active." The facility is reported as 1.13 acres in area. The CIWQS database listed the recycling facility as "industrial – scrap and waste materials." The Regulatory Measure type was listed as "storm water industrial." The Regulatory Measure status was reported as "active." CERS described the recycling business as "industrial facility storm water." No additional pertinent information was provided under the HWTS database.

This site is considered to be at a cross-gradient from the subject property. Based upon a distance of approximately 1,320 feet from the recycling facility and the former equipment rental site with underground storage tanks (USTs) to the northeast corner of the subject site boundary (measured on Google Earth), this facility exceeds the AOC distance for cross-gradient sites of 365 feet. Based solely upon this distance, this facility does not appear to represent a recognized environmental condition with regards to the subject site at this time.

All site listings in the EDR report do not currently appear to represent a recognized environmental condition with regards to the subject site, due to the nature of the listings, the oversight agency having granted no further action, the site being outside the AOC from the subject site, and/or their distance from the subject site.

Orphan Sites

Orphan sites are unable to be located or categorized due to lack of complete address and/or environmental information. Orphan sites may appear on more than one database. Four orphan sites, described as residential tracts near the intersection of Wineville Avenue and Bellegrave Avenue, were listed in the EDR report under the CIWQS, FINDS and ECHO databases. This intersection is approximately 1.3 miles north of the subject property. Based upon the CIWQS database listing, the tracts have NPDES permits for construction activities. None of the orphan sites listed in the EDR report are considered recognized environmental conditions, with regards to the subject site, due to the nature of the listings and/or their distance from the subject site.

Local Agencies

Petra reviewed information held by the agencies listed below during the course of this assessment.

Riverside County

The Riverside County Department of Environmental Health maintains records related to underground storage tanks and tank cleanup sites in the County of Riverside. Records held by this agency were accessed by EDR during the government database search. No listing for the subject site was reported by EDR.

California Regional Water Quality Control Board

The California Regional Water Quality Control Board-Santa Ana Region (RWQCB) maintains records of leaking underground storage tank sites and groundwater cleanups for sites in the Santa Ana Region. Records held by the RWQCB were accessed by EDR during the government database search. No listings for the subject site were reported by EDR.

GeoTracker

The GeoTracker website maintains a record of environmental data for regulated facilities in California. No database listings for the subject site were reported on GeoTracker. The memorandum documenting this inquiry is included in Appendix B.

California Department of Conservation, Geologic Energy Management Division (CalGEM)

According to the California Department of Conservation, Geologic Energy Management Division (CalGEM), there are no active or abandoned oil or gas wells located on the subject site. Further, there were no indications of any such wells found during our reconnaissance of the subject site. A copy of this map is included in Appendix B.

Department of Toxic Substances Control

The online database EnviroStor (DTSC, 2021), which provides records on LUSTs, SLICs, Priority cleanup sites and states sites, is maintained by the Department of Toxic Substances Control (DTSC). No database listings for the subject site were reported on EnviroStor. The memorandum documenting this inquiry is included in Appendix B.

National Pipeline Mapping System

Petra reviewed the National Pipeline Mapping System (NPMS, 2021) public viewer website for gas transmission pipelines and hazardous liquid trunk lines on or close to the subject property. Due to security purposes, close-up map views are not available. According to the information reviewed, no pipelines extend through or are adjacent to the site. The memorandum documenting this inquiry is included in Appendix B.

Vapor Migration

Recent standard revisions presented in ASTM E1527-13, considers the assessment of vapor migration similar to that of groundwater contamination. As a result, Petra reviewed documentation regarding surrounding sites near the subject property with known soil and groundwater contamination to preliminarily evaluate potential areas of concern for vapor migration/encroachment onto the subject property. An area of concern typically includes active or abandoned gas stations and dry cleaners, industrial facilities, and hazardous waste disposal and landfill facilities with known or suspected soil and/or groundwater contamination.

For vapor encroachment to represent a potential for vapor intrusion to structures within the subject property, vapors must have a pathway to create an indoor air quality condition (i.e., Recognized Environmental Condition). As a result, vapor encroachment from an offsite release onto the subject property does not immediately equate to vapor intrusion into existing or proposed structures within the subject property and cannot be ascertained without additional field work.

In the absence of specific criteria within ASTM Standard E1527-13, Petra considered the linear distance and groundwater gradient guidelines provided in ASTM E2600-15 (Tier 1 Areas of Concern) as a reasonable screening tool for vapor migration to identify a recognized environmental condition (REC) associated with the subject site (ASTM, 2010; Buonicore, 2014). No surrounding sites have been identified during this assessment which would represent a concern in regard to vapor encroachment onto the subject site at this time.

Evaluation of Records Search Results

In summary, no sites were identified in our search of various government agency database records, which may have impacted the soils or water beneath the subject site at this time.

Results of Aerial Photo Analysis

Although aerial photographs can often be a valuable source of information in the assessment of historical land usage, it should be understood that information extrapolated from photographic images is strictly interpretation and not necessarily fact. For this reason, it may not be appropriate to draw conclusions regarding previous site activities based solely upon aerial photograph analysis.

In order to provide a complete assessment of historical land usage on and in the vicinity of the subject site, aerial photographs with coverage of the subject site and vicinity were obtained from EDR and viewed by a representative of this firm. Photographs from the years 1931, 1938, 1948, 1953, 1959, 1967, 1975, 1985, 1990, 1994, 2002, 2006, 2009, 2012, and 2016 were provided by EDR. A summary of the information obtained during the aerial photograph review follows. Copies of the aerial photographs obtained from EDR are included in Appendix C.

1931 and 1938 Photographs

In the 1931 and 1938 photographs, the subject property appears to be developed for agricultural purposes in the form of dry land farming within the western and eastern portions in 1931, and the western portion in 1938. The central portions of the subject site appeared to be mantled with native vegetation within a broad, linear natural drainage. A small drainage is visible through the eastern portion of the subject site. Roughly

north-south orientated dirt roads are limited through the subject property. The alignment of 63rd Street is visible with large rural parcels beyond to the south.

1948, 1953 and 1959 Photographs

In the 1948 and 1953 photographs, the subject site appears to be completely developed with dry land farming as a part of land to the north, west and east. In 1949, the eastern portion of the subject property is dry land farmed and what appears to be native vegetation mantles most of the west parcel, except possibly the west edge. The improved alignment of Limonite Avenue is first visible in 1959. A dirt road dissects the property from north of Limonite Ave to Lucrecia Avenue. The northeasterly portion of the property west of this dirt road is cleared of vegetation. No structures are readily detectable within the subject property boundary.

1967, 1975, and 1985 Photographs

In the 1967 photograph, surface vegetation patterns suggest that the subject site is no longer actively dry land farmed; however, if dry land farming is ongoing, it is visible on the east and west portions of the subject property only. The 1975 infrared aerial photograph suggests that the subject property is no longer activity farmed. In 1975, the northwest quadrant of the subject property east of the aforementioned dirt road has been cleared of vegetation. Residential development continues, as agricultural land diminishes to the south. By 1985, the subject site appears to be vacant undeveloped land, except Day Creek Channel has been constructed along the boundary of the east and west halves of the subject property. Two intersection dirt road are noted east of the improved channel. Property north across Limonite Avenue is developed with tract homes of in the construction phase of home building.

1990, 1994 and 2002 Photographs

In the 1990, 1994 and 2002 photographs, the subject site appears to be vacant undeveloped land. Surface vegetation patterns differ across the subject property with dirt road activity common on the east parcel. Dark colored surface patterns visible directly west of the channel suggest burn areas. Two, circular features are visible directly west of the channel in the 1994 photo only. What appears to be a small shadow is present on the south feature suggesting vertical edges. No shadow is visible on the north feature. The use of these features, no longer visible by 2002, is not determined.

2006, 2009, 2012 and 2016 Photographs

In the 2006, 2009, 2012 and 2016 photographs the site appears generally the same as in the prior photographs, except numerous, closely spaced dumped piles of light-colored material is visible in 2006 only, in a cleared area west of the channel. Also in 2006, residential tract homes are visible to the west. By

2009, surface vegetation is mottled within the west parcel (suggesting burn areas) and dirt road activity increased. Photographs from 2012 and 2016 depict very minimal changes to the subject property. The self-storage facility directly east of the subject property was constructed sometime after 2012 and before 2016.

2016 to 2020 Google Earth Photographs

In February 2018, stockpiled soils, heavy construction equipment, trench shoring boxes and PVC pipes are visible in a clearing onsite directly north of 63rd Street and Lucrecia Avenue. What appears to be an elevated linear fill is noted just west of the channel, extending from63rd Street and Lucrecia Avenue to Limonite Avenue. This is now known as a fill containing a sewer main. By August 2018, the construction storage yard was vacant. No readily detectable changes were noted to the subject property from August 2012 to November 2020.

Historical USGS Topographic Maps

Petra reviewed the historical USGS topographic maps of the site and vicinity provided by EDR which included Target Quad's: dated 1902, 1942, 1947, 1954, 1967, 1973, 1981 and 2012. No land use is shown for the subject site on any of the Historical Topographic Maps reviewed. The 1947 map labels the current alignment of 63rd Street as Obern Avenue. The 1954 map refers to 63rd Street. The 1967 map depicts Limonite Avenue along the north boundary of the subject property. No structures are shown within the subject property on any of the Historical Topographic Maps. These maps generally support observations made from the aerial photographs reviewed. Copies of the maps reviewed are provided in Appendix C.

Environmental Liens & Activity and Use Limitations

Environmental Liens and Activity and Use Limitations (AUL) indicate restrictions on a property, which may represent a recognized environmental condition for the subject site. A search for Environmental Liens and AULs was conducted by EDR as part of this assessment. The Assessor Parcel Number (APN) used for this search was APN 170-270-017. The results from this search indicated that there were no recorded Environmental Liens or AULs listed for the APN within the subject site. A Quitclaim Deed was provided for APN 170-270-017 with this lien search and shows the title is vested in Darin Wate Erin Holquin Wate Kerry Wate et al, recorded on 6/4/2010. A copy of the lien and AUL search report is provided in Appendix C.

Fire Insurance Maps and City Directories

Fire Insurance Maps provide information on structure locations and operations, which were present at the time of the survey. These maps were completed for most major cities and metropolitan areas, dating from

1867, and provide information into past usage of buildings and how commercial and industrial zoning has changed over time. Sanborn™ Fire Insurance maps were requested for this study. EDR reports that fire insurance maps covering the target property were not found. The memorandum documenting this inquiry is included in Appendix C.

City Directory

City Directories provide information for a specific address at a specific time. A search of city directories, dating back to 1921 was conducted by EDR for this assessment. The search was conducted for the target property and adjoining property. There were no listings for the target property or the adjacent property which would indicate a potential environmental concern for the subject site based on the name of the listing, included in The EDR-City Directory Abstract. A copy of this search is presented in Appendix C.

EDR Property Tax Map Report

Petra reviewed EDR's Property Tax Map report which includes information on boundaries for the parcels within the site along with parcel identification numbers. A copy of the EDR report is provided in Appendix C.

Building Permits

Building Permit data provides information to identify current and/or former operations and structures/features which may represent a recognized environmental condition for the subject site. There were no permits found for the target property and no permits found for the adjoining property. A copy of this search is presented in Appendix C.

Interviews

Petra provided an owner interview questionnaire form to Mr. Nolan Leggio, Director of Forward Planning with Diversified Pacific Communities. The Interview Questionnaire was forwarded to Mr. John Russo, shareholder in Wineville Marketplace, LLC, regarding his knowledge of the subject site. A summary of the response to questions is provided below.

1. According to Mr. Russo, he does have a good knowledge regarding the uses and physical characteristics of the property and does have good knowledge regarding the activities/processes conducted at the property.

2. Mr. Russo stated that, to the best of his knowledge, the previous site is unknown, and that it has been vacant property since they have owned the property (1986 to present).

3. Mr. Russo indicated that, to the best of his knowledge, there are no hazardous substances or petroleum products present on the site. Additionally, he indicated that there are no potential recognized environmental conditions within or adjacent to the site.

4. According to Mr. Russo, based on his knowledge and experience related to the property, there are no notices or other correspondence from any government agency relating to past or current violations of environmental laws.

5. According to Mr. Russo, there are no utility corridors, water wells, clarifiers, disposal wells, or underground irrigation systems on the property.

6. According to Mr. Russo, there are no notices or other correspondence from any governmental agency relating to environmental liens encumbering the property.

7. According to Mr. Russo, there are no pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.

8. According to Mr. Russo, there are no notices from any governmental entity regarding any possible violations of environmental laws, or possible liability relating to hazardous substances or petroleum products.

A copy of the complete Owner Questionnaire is provided in Appendix D.

Client Knowledge

In compliance with AAI, Petra sent a Client Questionnaire form to Mr. Nolan Leggio, Director of Forward Planning with Diversified Pacific Communities, regarding his knowledge of the subject site. A brief summary of the pertinent questions is provided below.

1. According to Mr. Leggio, he is not aware of any environmental clean-up liens against the property that are filed or recorded under federal, tribal, state of local law.

2. According to Mr. Leggio, he is not aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place on or for the site, and/or have been filed or that environmental cleanup liens against the property that are filed or recorded under federal, tribal, state of local law. Mr. Leggio stated that a title report can be provided. A title report was subsequently provided to Petra for each of the two subject parcels.

3. According to Mr. Leggio, he does not have any specialized knowledge or experience related to the property or nearby properties.

4. Mr. Leggio indicated that the price being paid for this property reasonably reflect the fair market value of the property.

5. According to Mr. Leggio, he is not aware of commonly known or reasonably ascertainable information about the property that would help identify conditions indicative of hazardous materials/chemical releases or threatened releases.

6. According to Mr. Leggio, he is not aware of specific chemicals that are present or once were present on the property.

7. According to Mr. Leggio, he is not aware of spills or other chemical releases that have taken place at the property.

8. According to Mr. Leggio, he is not aware of any environmental cleanups that have taken place on the property or adjacent property.

9. According to Mr. Leggio, based on his knowledge and experience related to the property, there are no obvious indicators that point to the presence of likely presence of contamination at the property.

A copy of the complete client questionnaire is provided in Appendix D.

Data Failures and Data Gaps

In the event that data gaps are identified, the Environmental Professional (EP) will endeavor to comment on the significance of those data gaps. However, the EP cannot, and does not warrant or guarantee that no significant events, releases, or conditions arose, during periods such as data gaps.

Petra reviewed several sources for historical information regarding the subject site. These sources included a government agency database search, a city directory search, a review of historical aerial photographs and historical USGS topographic maps, and interviews. Some of the gaps between historical topographic maps exceeded 10 years, fire insurance maps covering the target property were not found.

Data gaps exist in the historic information reviewed. These gaps are due to the limited records and resources available, which are reasonably ascertainable and practically reviewable in the local area. However, it is our opinion that if additional historic information were to become available, it is not likely to change the conclusions or recommendations of this assessment.

DISCUSSION OF POTENTIAL ENVIRONMENTAL CONCERNS

The following discussions of potential environmental concerns are presented to inform the client as to the existence, or lack thereof, of recognized environmental conditions present on the subject site.

Regulatory Actions

Based upon a thorough search of available federal, state, and local records, no known current regulatory action is pending with respect to the subject site.

Adjacent and Nearby Properties

No information has been obtained during this assessment which would indicate the presence of recognized environmental conditions adjacent to the subject site that are considered likely to pose a significant impact to soils beneath the subject site at this time.

Polychlorinated Biphenyls (PCB's)

Polychlorinated biphenyls (PCB's) are historically linked to electrical equipment, such as capacitors and transformers, due to their physical and chemical characteristics. PCB's, persistent in the environment, are known to accumulate in organisms and the food chain.

Any electrical equipment (i.e., transformers, capacitors, and fluorescent light fittings) containing dielectric insulating fluids or coolants, manufactured prior to 1976, should be considered to potentially contain PCB's. PCB's may also be found in older lubricating oils, cutting oils, hydraulic fluids, paints, sealants, and flame retardants (UNEP, 2002).

Wooden power poles were observed along the east side of Wineville Avenue, the south side of 63rd Street west of Day Creek Channel. No pole-mounted transformers and no pad-mounted ground transformers were observed onsite during our site reconnaissance. As a result, no structures that appeared to contain PCB's were observed onsite during our site reconnaissance.

Underground Storage Tanks

No information has been obtained during this assessment, which would indicate fuel underground storage tanks (UST's) to be located on the subject site currently nor are UST's reported to have been located on site in the past. Further, no surface indications of UST's were observed on the subject site during the site reconnaissance.

Above Ground Storage Tanks

No information has been obtained during this assessment, which would indicate above ground fuel storage tanks (AST's) to be located on the subject site currently, nor are AST's reported to have been located on the site in the past.

Storm Water and Waste Water Discharge

At this time, storm water discharge from the site appears to be limited to surface water runoff. It is anticipated that precipitation falling on the site would infiltrate site soils. Water which does not infiltrate

site soils would be expected to flow off the site following the surface topography. Furthermore, Day Creek Channel is located between the two subject site parcels.

Pesticide and Herbicide Residue

Based on information obtained during this assessment, the subject site appears to have been utilized for dry land farming from at least 1931 to sometime after 1959 and prior to 1967. Typically, dry land farming is not well irrigated (if at all), which does not attract pests; therefore, pesticide use is not common. Furthermore, is has been at least 54 years since farming activity was observed within the subject property boundary, and if any pesticide use had occurred, sufficient time has passed for decomposition of soil residues to very low levels.

Herbicide use is not uncommon in dryland farming; however, herbicides are not typically persistent because it is not desirable for them to affect subsequent crop growth. Ideally, a herbicide should persist just long enough to control the target weed(s) and then be rapidly degraded to its constituent molecules. Herbicides are typically inactivated in the environment by biological, chemical, and physical means (Ashton, 1982). It is our opinion, therefore, that due to the passing of at least 54 years since dry land farming activity was observed within the subject property, any herbicide use would have had sufficient time for decomposition of soil residues to very low levels.

Therefore, pesticide and herbicide residues do not appear to represent a recognized environmental condition with regards to the subject site. Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1901), and interviews. EDR reports that fire insurance maps covering the target property were not found.

Asbestos-Containing Materials

No information has been obtained during this assessment, which would indicate asbestos-containing materials (ACM's) are located on the subject site currently nor are ACM's reported to have been located on site in the past. Further, no structures were known to exist on the subject site and there are no surface indications of ACM's observed on the subject site during the site reconnaissance.

The previous Phase I ESA on the subject property (LGC, 2005) noted that suspect ACMs may be located on the subject prope1ty consisting of an abandoned stockpile of roofing materials located in the northeast corner of the east subject property parcel (APN 157-250-011). If encountered during clearing and grubbing operations onsite, these materials should be completely removed and disposed of offsite following local or county guidelines.

Lead-Based Paints

No information has been obtained during this assessment, which would indicate lead-based paints (LBP's) are located on the subject site currently nor are LBP's reported to have been located on site in the past. Further, no structures were known to exist on the subject site and there are no surface indications of LBP's observed on the subject site during the site reconnaissance.

Landfills

The EDR report does not list any known landfills within the search radius conducted for this assessment. Therefore, landfills do not appear to represent a recognized environmental condition with regards to the subject site.

Water Supplies

No water wells were observed on the site at the time of our reconnaissance, except for a white, PVC riser pipe in the central portion of the east parcel. There were no ground improvements associated with this riser, which could be a monitoring well or an irrigation riser; however, there were no signs or markings, and we were unable to remove the cap. The existing property owner should be questioned on the purpose of this riser pipe.

Waste Generation and Storage

No waste generation or storage was observed; however, debris was observed throughout the site and typically consists of non-hazardous trash, such as dumped tires, manure, pieces of wood, metal pipe fragments, PVC pipes and fragments, mattress, piles of discarded concrete, plastic water bottles, metal grocery cart, clothing and shoes, and other miscellaneous household trash and minor amounts of windblown trash. No discoloration of soils within the dumped debris was observed, except for localized surface soil staining, associated with multiple dumped 1-gallon plastic oil containers and 5-gallon plastic buckets observed along Limonite Avenue. It is recommended that all dumped trash/debris be removed from the subject property and disposed of offsite, in accordance with current regulations.

CONCLUSIONS

General Site Information

1. The subject property consists of two discontinuous parcels of vacant land located at the southeast corner of Limonite Avenue and Wineville Avenue in the City of Jurupa Valley, Riverside County, California. The property is bounded on the south by 63rd Street and existing commercial development on the east. A site location map is included as Figure 1.

2. The subject property is a rectangular shaped parcel comprised of approximately 32-acres of land identified by Assessor Parcel Numbers (APNs) 157-250-011 and -13. Improved Day Creek Channel (APN 157-250-012) divides the subject property. Topographically, the subject site slopes toward Day Creek Channel with central elevation of approximately 630 feet above mean sea level (msl). A knoll is located in the western end of the subject property with an elevation of approximately 660 feet above msl. The eastern portion of the subject property slopes upward from the improved drainage channel to approximately 660 feet above msl within the east central portion of the subject site.

3. The subject property is vacant land covered with a variable concentration of weeds and native vegetation. The site is bounded along the north by Limonite Avenue; along the east by commercial development; along the south by 63rd Street; and along the west by Wineville Avenue. Fencing in various stages of disrepair or non-existent is located along the southern edge of the property. Chain link fencing hinders access to both sides of Day Creek Channel. A short block wall supporting fencing comprises the east site boundary. A short wooden fence was observed along the west side of the subject property. Fencing along the north side of the subject site is localized to Day Creek Channel and a portion of the west half. Dirt roads into or through the subject property are present. An off-road dirt track was observed near the east side of the channel. Street improvements to the edge of perimeter streets do not exist, except for an asphalt curb along Limonite Avenue.

4. At the time of our site reconnaissance, a light amount of vegetation covered most of the site with isolated moderately dense areas of vegetation. The vegetation included weeds, thick grass, and minor bushes. Dumped trash/debris is locally common along the southern portion of the subject property, including dumped piles of livestock manure. Overall, the dumped debris appears to be non-hazardous waste; however, dumped plastic petroleum hydrocarbon containers (19 empty one-gallon containers) labeled as heavy-duty engine oil were observed along Limonite Avenue (Appendix A, Photos and 28, 29, and 30), and two, 5-gallon buckets (¾ full) of used motor oil was observed along Limonite Avenue, inside the chain link fence line on the parcel west of Day Creek Channel (Appendix A, Photos 24, 25, and 26). Minor to moderate staining was observed around the two buckets of used motor oil. Minor soil staining was noted around the plastic engine oil containers.

5. Wooden pole electrical lines were observed along the western and the west end of the southern boundaries of the subject site. No pole-mounted or pad mounted transformers were observed on site during our reconnaissance.

6. Based on information obtained during this assessment, the subject site appears to have been utilized for dry land farming from at least 1931 to sometime after 1967 and prior to 1975. Except for construction of Day Creek Channel between the two subject property parcels in the mid 1980's, the northeast portion of the west subject parcel was used for stockpile materials in 2005 through 2007, the southeastern portion of the subject west parcel was used as a construction storage yard for offsite sewer main construction in 2017/2018, and construction of a sewer main through the west subject parcel in 2017/2018, the subject property appears to have been vacant undeveloped land from at least 1975 to present day. Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1901), and interviews. EDR reports that fire insurance maps covering the target property were not found. Historical information reviewed during this assessment includes aerial photographs (dating back to 1931), USGS topographical maps (dating back to 1902), and interviews. EDR reports that fire insurance maps covering the target property were not found.

7. No wells were observed on site during our reconnaissance, except, a 4-inch diameter PVC riser observed on the parcel east of Day Creek Channel (Appendix A, Photo 9). There were no ground improvements associated with this riser, which could be a monitoring well or an irrigation riser; however, there were no signs or markings, and we were unable to remove the cap. The existing property owner should be questioned on the purpose of this riser pipe.

8. Dumped soil piles were observed throughout the property, concentrated mostly along the southeast side, the south side along 63rd Street, and along the central portion of the north side of the property. These piles also contained rebar, horse manure, yard waste, irrigation pipe and tubing, concrete fragments, and other construction waste materials. No discoloration of soils within the soil piles was observed.

9. Trash and debris were observed dumped throughout the site and consists of scattered concrete fragments, tires, manure, pieces of wood, metal pipe fragments, plastic PVC pipes and fragments, plastic cups, piles of discarded concrete, asphalt, rubber tires, plastic water bottles, metal grocery cart, clothing and shoes, and other miscellaneous household trash and minor amounts of windblown trash. Additionally, what appeared to be localized surface soil staining, associated with multiple dumped plastic oil containers and two 5-gallon plastic buckets, was observed on the west parcel south of Limonite Avenue.

10. No surrounding sites were identified in our search of various government agency database records, which appear to have impacted soil or groundwater beneath the subject site.

11. There was no evidence of drums, sumps, pits, pools, or lagoons identified on site during our site reconnaissance. What appear to be shallow basins are located on the east and west sides of Day Creek Channel. It is anticipated that these are detention basins for storm water runoff.

RECOGNIZED ENVIRONMENTAL CONDITIONS

Recognized environmental conditions are defined by the American Society of Testing and Materials (ASTM) as any hazardous substance or petroleum product under conditions that indicate an existing, past, or material threat of release into the structures, ground, groundwater, or surface water at the subject site. If the presences of recognized environmental conditions are identified on a subject site, it may warrant additional research, site assessment, and/or action.

Controlled recognized environmental conditions (CREC'S) are defined by the American Society of Testing and Materials (ASTM) Practice E 1527-13 as a recognized environmental condition resulting from the past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (i.e., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls. For example, if a leaking underground storage tank has been cleaned up to a commercial use standard but does not meet

unrestricted residential cleanup criteria; this would be considered a controlled recognized environmental condition. The "control" is represented by the (inferred) restriction that the property remains commercial. Historical recognized environmental conditions (HREC'S) are defined by the American Society of Testing and Materials (ASTM) Practice E 1527-13 as a past release of any *hazardous substances or petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory , without subjecting the *property* to any required controls (i.e., *property* use restrictions, *activity and use limitations*, *institutional controls* or *engineering controls*).

We have performed a Phase I Environmental Site Assessment in general conformance with the scope and limitations of ASTM Practice E 1527 for the proposed Wineville Market and Villages project, Tentative Map 36846 located in Jurupa Valley, Riverside County, California. Any exceptions to, or deletions from, this practice are described in the section titled data gaps of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property, except the following:

- Multiple quart and 5-gallon containers of what appears to be used petroleum hydrocarbon products (i.e., waste oil) have been dumped inside the fence line along the north central boundary of the subject property with Limonite Avenue (Appendix A, Photographs 25, 26, 27, 29, 30, and 31). Localized surface staining was observed.

The containers and liquid product should be carefully removed to limit additional spills and disposed of offsite following local or county requirements by a licensed environmental contractor. Stained soils should be excavated and disposed of offsite following local or county requirements by a licensed environmental contractor. An experienced environmental professional, such as Petra, should monitor the removal of containers and excavation of stained soils to verify complete removal and offsite disposal of elevated petroleum hydrocarbon soil residues. This verification would also consist of soil sampling and laboratory analysis of the bottom and sidewalls of the excavation(s).

- Surficial piles of dumped fill materials were observed within the subject property during our recent site walk. Given the history of the subject property, there is a potential for additional fill materials to have been placed onsite that have been leveled and not readily detected by visual observation of the existing ground surface. Due to the unknown source of the stockpiled materials and unknown location(s) of possible leveled fill materials onsite, a limited Phase II Environmental Soil Residue Survey is recommended to assess the limits of leveled undocumented fill materials and the existence of elevated soil residues from anthropogenic sources (i.e., manmade). Petra has provided a proposal for a limited Phase II Environmental Soil Residue Survey under a separate document.

SITE CONSIDERATIONS

The items presented below are not considered recognized environmental conditions in accordance with ASTM E 1527-13. Although these items may warrant consideration in conjunction with any planned development activities, they are not recognized environmental conditions. The information regarding possible actions relative to these items has been provided as guidance.

1. With development of any vacant property which has had fill placed overtime from an unknown source, a certain amount of unknown subsurface conditions should be anticipated. Any discolored soils, noxious odors, and/or buried objects/debris encountered during clearing and grubbing or future grading and development should be left in place until an experienced environmental professional (such as Petra) has had the opportunity to evaluate the conditions, and provide recommendations if needed.

2. It is recommended that all trash, debris, and waste material observed on the site be removed and disposed in accordance with current local, state and federal disposal regulations.

LIMITATIONS

This assessment is based upon the project as described and the environmental data obtained from the field reconnaissance and research performed as outlined in this report. This report has not been prepared for use by parties or projects other than those named or described in this report, additional studies may be required.

Since our assessment is based upon a review of available data and visual assessment of the site, without any invasive assessment, the conclusions presented herein are professional opinions. These opinions have been derived in accordance with current standards of practice, and no warranty is expressed or implied.

This firm's evaluation of previous reports and/or subconsultant reports focuses on the completeness of the information presented in the document, in accordance with applicable rules and regulations, and does not include the establishment of data sufficiency or accuracy.

QUALIFICATIONS

Resumes for the staff who contributed to this report are presented in Appendix E.

“We the undersigned declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualification based on education, training, and experience to assess a property of the nature, history, and

setting of the subject site. We have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312".

Respectfully submitted,

- Area of Undetermined Flood Hazard *Zone D*
- Otherwise Protected Area
- Coastal Barrier Resource System Area

SPECIAL FLOOD HAZARD AREAS
- Without Base Flood Elevation (BFE) *Zone A, V, A99*
- With BFE or Depth
- Regulatory Floodway *Zone AE, AO, AH, VE, AR*

OTHER AREAS OF FLOOD HAZARD
- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile *Zone X*
- Future Conditions 1% Annual Chance Flood Hazard *Zone X*
- Area with Reduced Flood Risk due to Levee. See Notes. *Zone X*
- Area with Flood Risk due to Levee *Zone D*

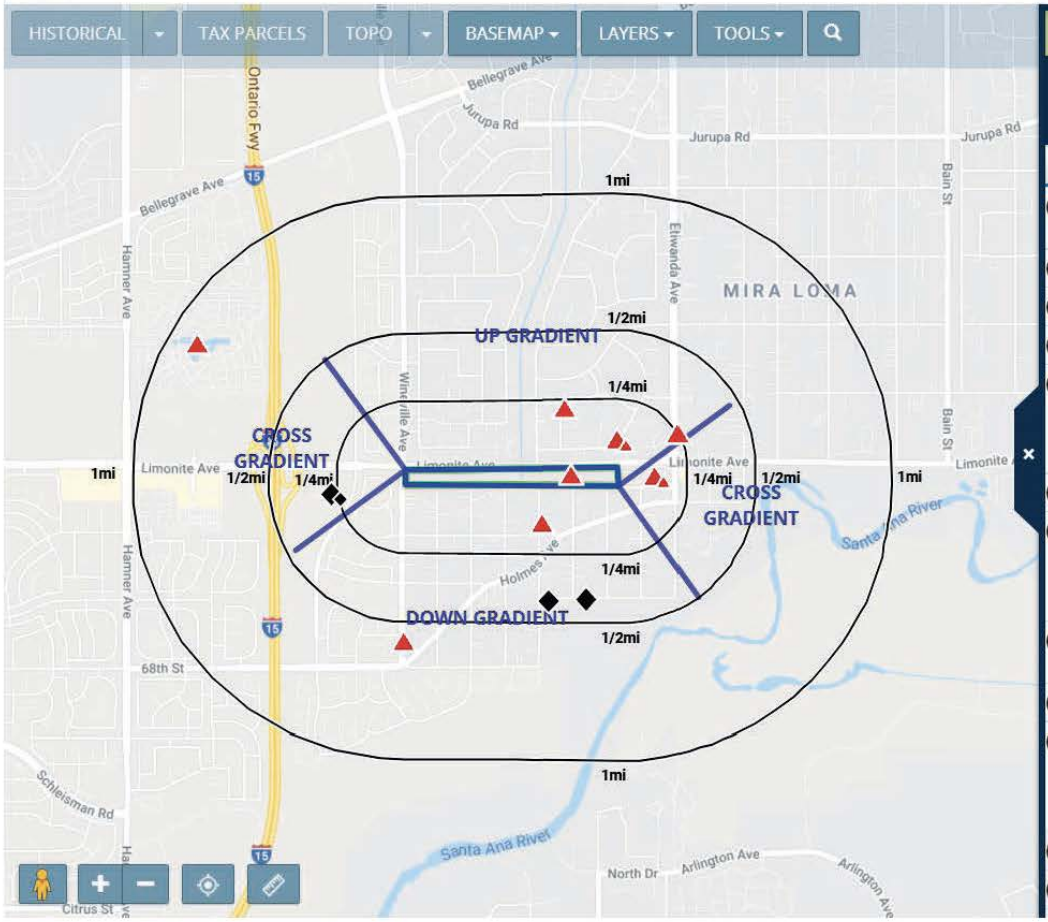

OTHER FEATURES
- 20.2 / 17.5 — Cross Sections with 1% Annual Chance Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

Mr. Tom Tatum
Tatum and Kaplan Financial Group
924 Westwood Blvd., Suite 910
Los Angeles, CA 90024

Dear Mr. Tatum:

Subject: Swan Lake at 5800 Hamner, Mira Loma

This letter confirms the completion of site investigation and remedial action for the underground storage tanks at the above site. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site, which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, contact this office at (714) 358-5055.

Sincerely

Sharon Boltinghouse
Hazardous Materials Specialist

Site History

The current environmental case opened June 2008 due to a baseline due diligence site assessment conducted November 2007 and an unauthorized release report that was filed on June 9, 2008.

On November 6, 2007, three soil samples D1, D2, and D3 were collected from beneath the dispensers at a depth of approximately 4 feet below grade (fbg) during dispenser upgrade activities. Sample D1 contained 57.2 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPHg) and 114 mg/kg xylenes. RCDEH requested additional assessment beneath the southernmost dispenser to determine the vertical and horizontal extent of contamination.

On March 26 and 27, 30 and 31, and April 1 and 8, 2009, CRA installed monitoring wells MW-1 through MW-4.The maximum concentrations detected in soil samples collected during this investigation were 44 mg/kg TPHd and 0.36 mg/kg TPHg in MW-4 at 16 fbg, 0.0056 mg/kg benzene in MW-3 at 11.5 fbg, 11 mg/kg TBA in MW-2 at 36.5 fbg, and 0.0061 mg/kg naphthalene in MW-2 at 66.5 fbg. All toluene, MTBE, and ETBE concentrations are estimated values between the laboratory method detection limit and the practical quantitation limit (PQL), and are flagged as such. No other concentrations were detected. Although 11 mg/kg TBA was detected at 36.5 fbg from MW-2, the next highest TBA concentration detected during this investigation was 0.059 mg/kg. The results of this assessment indicate that low levels of TPHg and TPHd are present in the vicinity of MW-2 and MW-4. TPHg and TPHd were not detected in any other wells or borings above the PQL.

Site History -

CURRENT SITE USE:

CURRENT SITE USE:

The Site is an active 76 service station located at the northeast corner of Etiwanda Avenue and Limonite Avenue in the City of Mira Loma, California. The station maintains three 10,000-gallon underground storage tanks (USTs) used to store gasoline, one dispenser island with three fuel dispensers, and a convenience store. The station is located within a mixed commercial and residential area.

SITE HISTORY and RELEASE INFORMATION:

In April 2008, it came to the attention of Riverside County Department of Environmental Health (RCDEH) and ConocoPhillips that the results for assessment activities associated with a property ownership transfer conducted in November 2007 were not submitted to RCDEH.

In June 2008, RCDEH reviewed the Due Diligence Site Assessment Report (SECOR, December 17, 2007). The report documented the results of a baseline due diligence site assessment conducted on November 26, 2007. Four (4) soil borings were advanced (B-1 through B-4) to approximately 35 feet below ground surface (bgs) in the vicinity of the USTs and dispenser islands. Groundwater (GW) was not encountered during drilling activities. A total of five soil samples were analyzed from the four borings. The maximum concentrations detected were: 650 ppm TPHg (B-3@10 ft bgs), 150 ppm TPHd (B-3@10 ft bgs), ND<0.28 ppm B, 1.2 ppm T (B-3@10 ft bgs), 3.7 ppm E (B-3@10 ft bgs), 33 ppm X (B-3@10 ft bgs), 0.46 ppm MTBE (B-3@25 ft bgs), 13 ppm TBA (B-2@35 ft), ND DIPE, ETBE, TAME, ethanol, 3.1 ppm n-Butylbenzene (B-3@10 ft bgs), 12 ppm naphthalene (B-3@10 ft bgs), 3.4 ppm n-Propylbenzene (B-3@10 ft bgs), 43 ppm 1,2,4-TMB (B-3@10 ft bgs), 45 ppm 1,3,5-TMB (B-3@10 ft bgs).

Based on the results of the site assessment report, the site was entered into RCDEH LOP for further investigation.

ADDITIONAL SITE RELEASE INFORMATION: PRIOR ASSESSMENT INFORMATION

On November 6, 2007, three soil samples (D1, D2, and D3) were collected below the dispenser piping (at approximately 4 feet bgs), as part of the electrical system upgrade. Samples were analyzed for TPHg, BTEX, oxygenates, ethanol and methanol. Soil sample D1 contained 57.2 ppm TPHg and 114 ppb Xylenes. No other constituents were detected in any of the soil samples. RCDEH inspectors requested additional vertical and horizontal assessment beneath the southernmost dispenser to determine the extent of contamination.

On November 20, 2007, impacted soils under dispenser #1 were over-excavated to 4 feet bgs using a hand shovel. Two samples were collected at depths of 3 feet and 4 feet bgs. All constituents were non-detect (ND) for the 3-foot sample, however the 4-foot sample had detections of 4400 ppm TPHg and 32 ppm xylenes. Further assessment was conducted in this area (B-7) and is discussed below.

ASSESSMENT:

ASSESSMENT:

In March/April 2009, four GW monitoring wells (MW-1 through MW-4) were installed and two soil borings (B-7 and B-10) were advanced to delineate the horizontal and vertical extent of hydrocarbon-impacted soil and to determine if GW was impacted. The monitoring wells were installed to depths between 85 and 86 feet bgs and soil borings B-7 and B-10 were drilled to 75 feet bgs. Maximum soil concentrations were: 0.36 ppm TPHg (MW-4@16'), 44 ppm TPHd (MW-4@16'), 0.0056 ppm B (MW-3@11.5'), 11 ppm TBA (MW-2@36.5'), 0.0028J ppm MTBE (MW-2@41.5'), 11 ppm TBA (MW-2@36.5'), 0.0061 ppm naphthalene (MW-2@66.5'). Soil samples were ND for all other constituents tested. GW was encountered in all borings between 71 and 73 feet bgs. Wells MW-1 and MW-2 were screened from 67 to 82 feet bgs and wells MW-3 and MW-4 were screened from 68 to 83 feet bgs. GW samples were not analyzed upon installation.

VERIFICATION:

On November 30, 2010, one soil boring was advanced to a depth of approximately 40 feet bgs. The boring was completed as a vapor extraction well (VEW-1) and screened from 10 to 40 feet bgs. Soil samples were collected at 5-foot intervals beginning at 10 feet bgs. Soil samples were analyzed for TPPH, BTEX, MTBE, TBA, ETBE, DIPE, TAME and ethanol. One soil sample (VEW-1d15) was additionally analyzed for full scan VOCs, oxygenates and ethanol. All soil samples were ND for all constituents analyzed.

January 6 and 7, 2011, a soil vapor extraction (SVE) test was conducted using SVE-1 for extraction. Based on field vapor PID readings during the first 8-hours of the test, the SVE test was extended for a second 8-hour period. SVE samples were collected at the beginning, middle and end of each 8-hour period. The vapor samples were analyzed for TPHg, and full scan VOCs. Maximum vapor concentrations were 13 ppmv TPHg, 0.0098 ppmv Benzene, 0.17 ppmv Toluene, 0.13 ppmv ethyl-benzene, 1.0 ppmv xylenes, 0.23 ppmv MTBE, 0.025 ppmv TBA. DIPE, ETBE, TAME and ethanol were all ND. The radius of influence was approximately 42 feet to 49 feet. Total mass removed: 0.378 lbs TPHg, 0.0002 lbs benzene, and 0.005 lbs MTBE.

GROUNDWATER MONITORING:

The GW monitoring wells were sampled for the following five quarters: Third Quarter 2009 (September 18, 2009), Fourth Quarter 2009 (November 14, 2009), and First Quarter 2010 (March 25, 2010), Second Quarter 2010 (May 28, 2010), and Third Quarter 2010 (September 8, 2010). Analytical results were ND for all constituents tested except for: 1.1 ppb bromoform (MW-1), 0.67 ppb chloroform (MW-1), 0.67 ppb dibromochloromethane (MW-1).

Other information: UST system currently installed and operating at the site.

Oct 2013 Well destroyed

RE: Underground Storage Tank Cleanup
76 Station #5204
6190 Etiwanda
Mira Loma, California
RCDEH Site # 200824960

Dear Responsible Parties:

This letter confirms the completion of a site investigation and corrective action for the underground storage tank(s) located at the above described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the underground storage tank(s) are greatly appreciated.

Based on the information in the above-referenced file, and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

Claims for reimbursement of corrective action costs submitted to the Underground Storage Tank Cleanup Fund more than 365 days after the date of this letter or issuance or activation of the Fund's Letter of Commitment, whichever occurs later, will not be reimbursed unless one of the following exceptions applies:

- Claims are submitted pursuant to Section 25299.57, subdivision (k) (reopened UST case); or
- Submission within the timeframe was beyond the claimant's reasonable control, ongoing work is required for closure that will result in the submission of claims beyond that time period, or that under the circumstances of the case, it would be unreasonable or inequitable to impose the 365-day time period.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. If you have any questions regarding this matter, please contact Sharon Boltinghouse at (951) 955-8982.

Sincerely,

Steve Van Stockum
Director, Environmental Health

VII. Additional Comments, Data, Etc.

CURRENT SITE USE:

The Site is an active 76 service station located at the northeast corner of Etiwanda Avenue and Limonite Avenue in the City of Mira Loma, California. The station maintains three 10,000-gallon underground storage tanks (USTs) used to store gasoline, one dispenser island with three fuel dispensers, and a convenience store. The station is located within a mixed commercial and residential area.

SITE HISTORY and RELEASE INFORMATION:

In April 2008, it came to the attention of Riverside County Department of Environmental Health (RCDEH) and ConocoPhillips that the results for assessment activities associated with a property ownership transfer conducted in November 2007 were not submitted to RCDEH.

In June 2008, RCDEH reviewed the *Due Diligence Site Assessment Report* (SECOR, December 17, 2007). The report documented the results of a baseline due diligence site assessment conducted on November 26, 2007. Four (4) soil borings were advanced (B-1 through B-4) to approximately 35 feet below ground surface (bgs) in the vicinity of

CURRENT SITE USE:

The Site is an active 76 service station located at the northeast corner of Etiwanda Avenue and Limonite Avenue in the City of Mira Loma, California. The station maintains three 10,000-gallon underground storage tanks (USTs) used to store gasoline, one dispenser island with three fuel dispensers, and a convenience store. The station is located within a mixed commercial and residential area.

SITE HISTORY and RELEASE INFORMATION:

In April 2008, it came to the attention of Riverside County Department of Environmental Health (RCDEH) and ConocoPhillips that the results for assessment activities associated with a property ownership transfer conducted in November 2007 were not submitted to RCDEH.

In June 2008, RCDEH reviewed the *Due Diligence Site Assessment Report* (SECOR, December 17, 2007). The report documented the results of a baseline due diligence site assessment conducted on November 26, 2007. Four (4) soil borings were advanced (B-1 through B-4) to approximately 35 feet below ground surface (bgs) in the vicinity of

the USTs and dispenser islands. Groundwater (GW) was not encountered during drilling activities. A total of five soil samples were analyzed from the four borings. The maximum concentrations detected were: 650 ppm TPHg (B-3@10 ft bgs), 150 ppm TPHd (B-3@10 ft bgs), ND<0.28 ppm B, 1.2 ppm T (B-3@10 ft bgs), 3.7 ppm E (B-3@10 ft bgs), 33 ppm X (B-3@10 ft bgs), 0.46 ppm MTBE (B-3@25 ft bgs), 13 ppm TBA (B-2@35 ft), ND DIPE, ETBE, TAME, ethanol, 3.1 ppm n-Butylbenzene (B-3@10 ft bgs), 12 ppm naphthalene (B-3@10 ft bgs), 3.4 ppm n-Propylbenzene (B-3@10 ft bgs), 43 ppm 1,2,4-TMB (B-3@10 ft bgs), 45 ppm 1,3,5-TMB (B-3@10 ft bgs).

Based on the results of the site assessment report, the site was entered into RCDEH LOP for further investigation.

ADDITIONAL SITE RELEASE INFORMATION: PRIOR ASSESSMENT INFORMATION

On November 6, 2007, three soil samples (D1, D2, and D3) were collected below the dispenser piping (at approximately 4 feet bgs), as part of the electrical system upgrade. Samples were analyzed for TPHg, BTEX, oxygenates, ethanol and methanol. Soil sample D1 contained 57.2 ppm TPHg and 114 ppb Xylenes. No other constituents were detected in any of the soil samples. RCDEH inspectors requested additional vertical and horizontal assessment beneath the southernmost dispenser to determine the extent of contamination.

On November 20, 2007, impacted soils under dispenser #1 were over-excavated to 4 feet bgs using a hand shovel. Two samples were collected at depths of 3 feet and 4 feet bgs. All constituents were non-detect (ND) for the 3-foot sample, however the 4-foot sample had detections of 4400 ppm TPHg and 32 ppm xylenes. Further assessment was conducted in this area (B-7) and is discussed below.

ASSESSMENT:

In March/April 2009, four GW monitoring wells (MW-1 through MW-4) were installed and two soil borings (B-7 and B-10) were advanced to delineate the horizontal and vertical extent of hydrocarbon-impacted soil and to determine if GW was impacted. The monitoring wells were installed to depths between 85 and 86 feet bgs and soil borings B-7 and B-10 were drilled to 75 feet bgs. Maximum soil concentrations were: 0.36 ppm TPHg (MW-4@16'), 44 ppm TPHd (MW-4@16'), 0.0056 ppm B (MW-3@11.5'), 11 ppm TBA (MW-2@36.5'), 0.0028J ppm MTBE (MW-2@41.5'), 11 ppm TBA (MW-2@36.5'), 0.0061 ppm naphthalene (MW-2@66.5'). Soil samples were ND for all other constituents tested. GW was encountered in all borings between 71 and 73 feet bgs. Wells MW-1 and MW-2 were screened from 67 to 82 feet bgs and wells MW-3 and MW-4 were screened from 68 to 83 feet bgs. GW samples were not analyzed upon installation.

VERIFICATION:

On November 30, 2010, one soil boring was advanced to a depth of approximately 40 feet bgs. The boring was completed as a vapor extraction well (VEW-1) and screened from 10 to 40 feet bgs. Soil samples were collected at 5-foot intervals beginning at 10 feet bgs. Soil samples were analyzed for TPPH, BTEX, MTBE, TBA, ETBE, DIPE, TAME and ethanol. One soil sample (VEW-1d15) was additionally analyzed for full scan VOCs, oxygenates and ethanol. All soil samples were ND for all constituents analyzed.

January 6 and 7, 2011, a soil vapor extraction (SVE) test was conducted using SVE-1 for extraction. Based on field vapor PID readings during the first 8-hours of the test, the SVE test was extended for a second 8-hour period. SVE samples were collected at the beginning, middle and end of each 8-hour period. The vapor samples were analyzed for TPHg, and full scan VOCs. Maximum vapor concentrations were 13 ppmv TPHg, 0.0098 ppmv Benzene, 0.17 ppmv Toluene, 0.13 ppmv ethyl-benzene, 1.0 ppmv xylenes, 0.23 ppmv MTBE, 0.025 ppmv TBA. DIPE, ETBE, TAME and ethanol were all ND. The radius of influence was approximately 42 feet to 49 feet. Total mass removed: 0.378 lbs TPHg, 0.0002 lbs benzene, and 0.005 lbs MTBE.

CASE CLOSURE SUMMARY
LEAKING UNDERGROUND FUEL STORAGE TANK PROGRAM

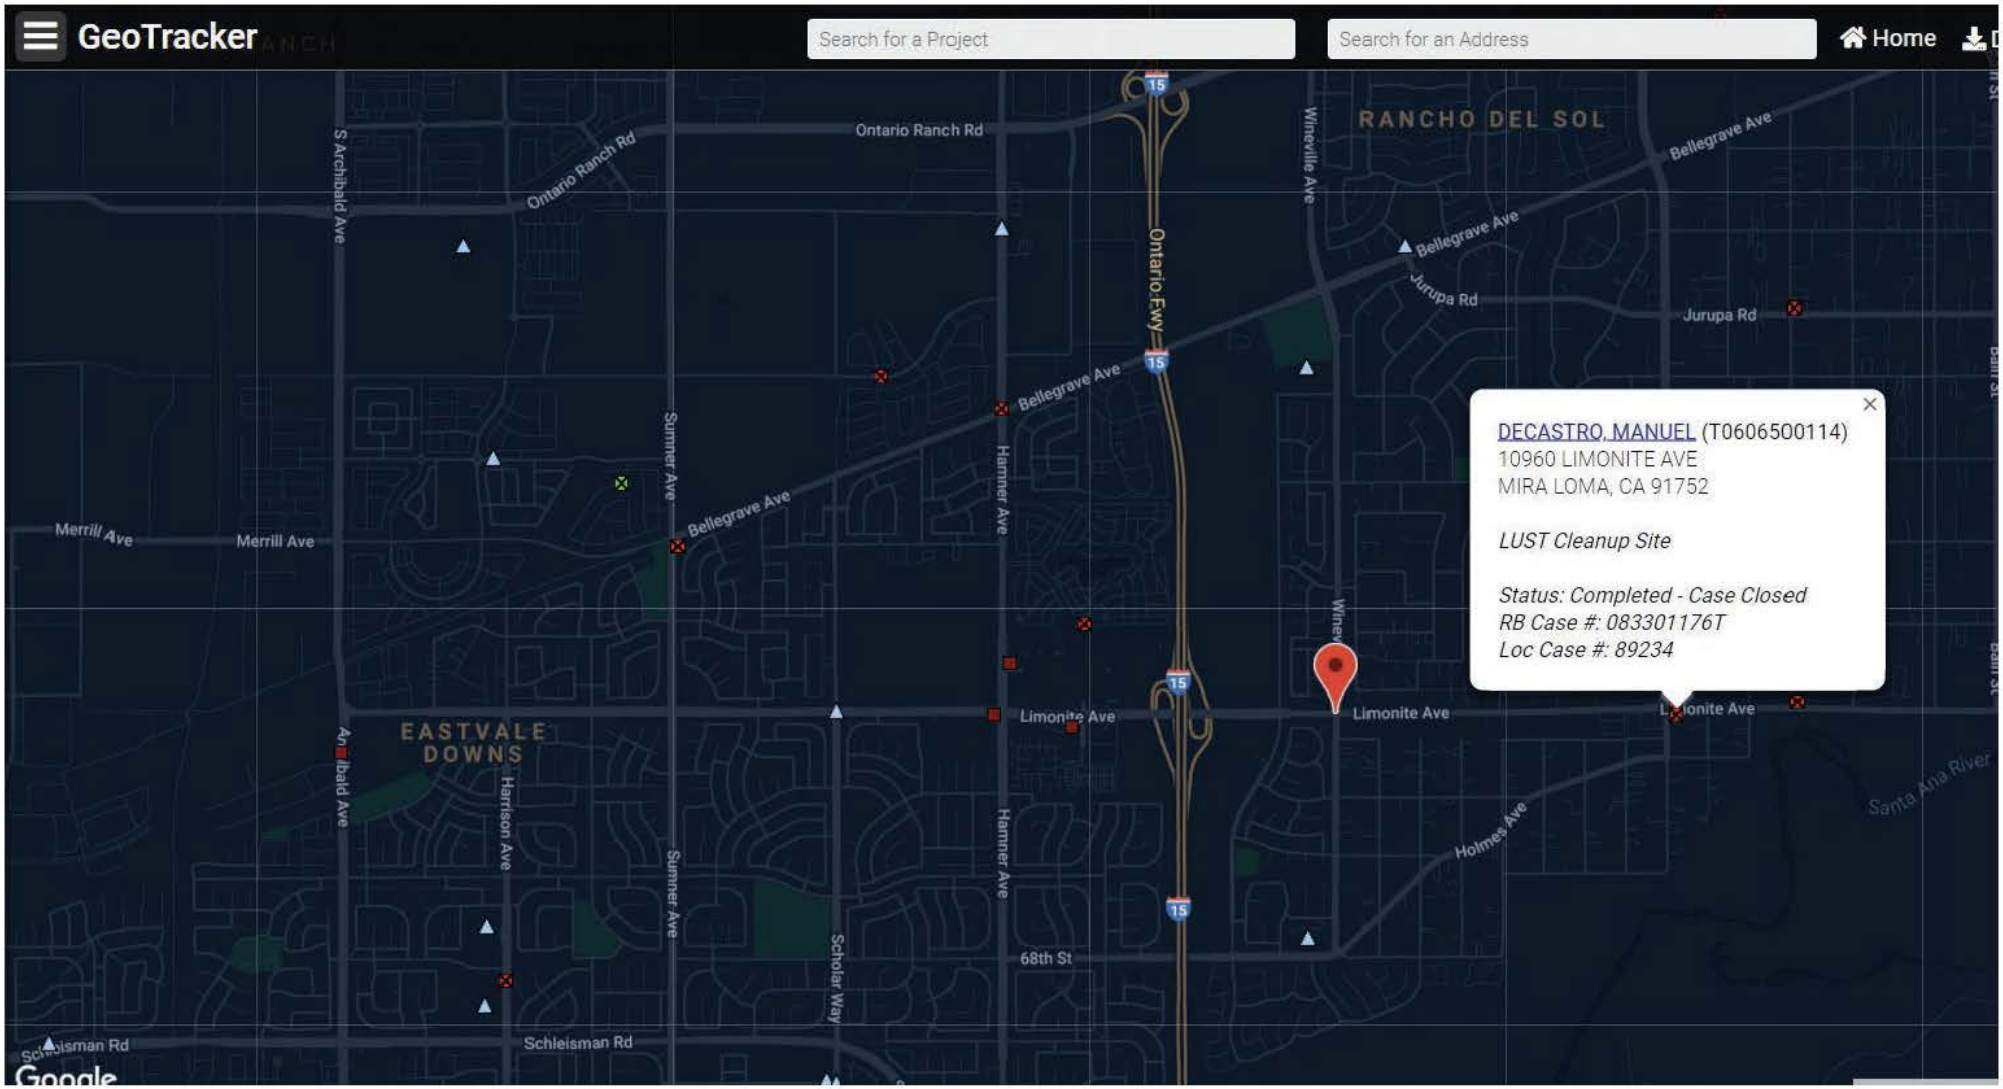

SITE NAME: 76 Station #5204 SITE NO: 200824960

GROUNDWATER MONITORING:

The GW monitoring wells were sampled for the following five quarters: Third Quarter 2009 (September 18, 2009), Fourth Quarter 2009 (November 14, 2009), and First Quarter 2010 (March 25, 2010), Second Quarter 2010 (May 28, 2010), and Third Quarter 2010 (September 8, 2010). Analytical results were ND for all constituents tested except for: 1.1 ppb bromoform (MW-1), 0.67 ppb chloroform (MW-1), 0.67 ppb dibromochloromethane (MW-1).

Other information: UST system currently installed and operating at the site.

NOTE: This closure summary does not include all of the data for this cleanup. It was prepared by the Riverside County DEH for the purpose of providing a brief summary for case closure evaluation. The *Request for Site Closure* (Antea Group, January 31, 2013) and all other environmental reports pertaining to this cleanup site should be reviewed to obtain further details regarding this cleanup.

POTENTIAL CONTAMINANTS OF CONCERN
METHANE

POTENTIAL MEDIA AFFECTED
SOIL

Site History

The Site has been historically utilized as part of a dairy and farming, indicating potential chemicals of concern. The Site is a 10 acre portion of a former dairy farm. Part of the adjacent property is agricultural land with residential dwellings along the eastern portion of the Site.

A Preliminary Environmental Assessment (PEA) was completed to present investigation activities to evaluate the residual OCPs and metals from previous agricultral uses onsite, and VOCs from a former UST. The PEA also included a limited subsurface mehtane gas survey was conducted on 10/7/2004 that detected methane concentrations between 5,000 ppmv and 100,000ppmv. The PEA was approved for further action to evaluate the biogenic methane previously detected onsite.

An Supplemental Site Investigation (SSI) was conducted to evaluate methane concentrations onsite. The Site was mass graded and was rested for a 30 day period. A four week (once a week) survey was conducted to collect methane at depths of 5, 20 and 40 feet below ground surface.

Site History

The 10-acre rectangular site is located at Wineville Road and Bellgrave Avenue. The site is part of a larger farm and located in an area of mixed residential and agricultural land use. The subject site and vicinity have been used as agricultural land since at least 1950. From 1955 to the present, the site has been used to grow alfalfa, barley, and black-eyed peas. No herbicides with a residual affect lasting longer than 60 days have been used for the last 50 years.
No pesticides have been used on the site.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SKY COUNTRY	***11034 LIMONITE***	***E 1/8 - 1/4 (0.148 mi.)***	***B7***	***29***
EPA ID:: CAD981615610				

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within

approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is

1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10326637
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 22166
Site Name: United #5204
Violation Date: 03-04-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 04/28/2020.

Citation: 23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Description: Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.
Violation Notes: Returned to compliance on 10/15/2015.
Violation Division: Riverside County Department of Env Health
Violation Program: UST

Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 12/19/2019. Spill Container on 91 UST requires replacement. Spill container failed hydrostatic testing

Case Worker:	AB
RB Case Number:	Not reported
Local Agency:	RIVERSIDE COUNTY LOP
File Location:	Local Agency
Local Case Number:	200824960
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	The current environmental case opened June 2008 due to a baseline due diligence site assessment conducted November 2007 and an unauthorized release report that was filed on June 9, 2008. On November 6, 2007, three soil samples D1, D2, and D3 were collected from beneath the dispensers at a depth of approximately 4 feet below grade (fbg) during dispenser upgrade activities. Sample D1 contained 57.2 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline (TPHg) and 114 mg/kg xylenes. RCDEH requested additional assessment beneath the southernmost dispenser to determine the vertical and horizontal extent of contamination. On March 26 and 27, 30 and 31, and April 1 and 8, 2009, CRA installed monitoring wells MW-1 through MW-4.The maximum concentrations detected in soil samples collected during this investigation were 44 mg/kg TPHd and 0.36 mg/kg TPHg in MW-4 at 16 fbg, 0.0056 mg/kg benzene in MW-3 at 11.5 fbg, 11 mg/kg TBA in MW-2 at 36.5 fbg, and 0.0061 mg/kg naphthalene in MW-2 at 66.5 fbg. All toluene, MTBE, and ETBE concentrations are estimated values between the laboratory method detection limit and the practical quantitation limit (PQL), and are flagged as such. No other

76 STATION 5204 (Continued) **S109280357**

concentrations were detected. Although 11 mg/kg TBA was detected at 36.5 fbg from MW-2, the next highest TBA concentration detected during this investigation was 0.059 mg/kg. The results of this assessment indicate that low levels of TPHg and TPHd are present in the vicinity of MW-2 and MW-4. TPHg and TPHd were not detected in any other wells or borings above the PQL. Site History - CURRENT SITE USE: The Site is an active 76 service station located at the northeast corner of Etiwanda Avenue and Limonite Avenue in the City of Mira Loma, California. The station maintains three 10,000-gallon underground storage tanks (USTs) used to store gasoline, one dispenser island with three fuel dispensers, and a convenience store. The station is located within a mixed commercial and residential area. SITE HISTORY and RELEASE INFORMATION: In April 2008, it came to the attention of Riverside County Department of Environmental Health (RCDEH) and ConocoPhillips that the results for assessment activities associated with a property ownership transfer conducted in November 2007 were not submitted to RCDEH. In June 2008, RCDEH reviewed the Due Diligence Site Assessment Report (SECOR, December 17, 2007). The report documented the results of a baseline due diligence site assessment conducted on November 26, 2007. Four (4) soil borings were advanced (B-1 through B-4) to approximately 35 feet below ground surface (bgs) in the vicinity of the USTs and dispenser islands. Groundwater (GW) was not encountered during drilling activities. A total of five soil samples were analyzed from the four borings. The maximum concentrations detected were: 650 ppm TPHg (B-3@10 ft bgs), 150 ppm TPHd (B-3@10 ft bgs), ND<0.28 ppm B, 1.2 ppm T (B-3@10 ft bgs), 3.7 ppm E (B-3@10 ft bgs), 33 ppm X (B-3@10 ft bgs), 0.46 ppm MTBE (B-3@25 ft bgs), 13 ppm TBA (B-2@35 ft), ND DIPE, ETBE, TAME, ethanol, 3.1 ppm n-Butylbenzene (B-3@10 ft bgs), 12 ppm naphthalene (B-3@10 ft bgs), 3.4 ppm n-Propylbenzene (B-3@10 ft bgs), 43 ppm 1,2,4-TMB (B-3@10 ft bgs), 45 ppm 1,3,5-TMB (B-3@10 ft bgs). Based on the results of the site assessment report, the site was entered into RCDEH LOP for further investigation. ADDITIONAL SITE RELEASE INFORMATION: PRIOR ASSESSMENT INFORMATION On November 6, 2007, three soil samples (D1, D2, and D3) were collected below the dispenser piping (at approximately 4 feet bgs), as part of the electrical system upgrade. Samples were analyzed for TPHg, BTEX, oxygenates, ethanol and methanol. Soil sample D1 contained 57.2 ppm TPHg and 114 ppb Xylenes. No other constituents were detected in any of the soil samples. RCDEH inspectors requested additional vertical and horizontal assessment beneath the southernmost dispenser to determine the extent of contamination. On November 20, 2007, impacted soils under dispenser #1 were over-excavated to 4 feet bgs using a hand shovel. Two samples were collected at depths of 3 feet and 4 feet bgs. All constituents were non-detect (ND) for the 3-foot sample, however the 4-foot sample had detections of 4400 ppm TPHg and 32 ppm xylenes. Further assessment was conducted in this area (B-7) and is discussed below. ASSESSMENT: In March/April 2009, four GW monitoring wells (MW-1 through MW-4) were installed and two soil borings (B-7 and B-10) were advanced to delineate the horizontal and vertical extent of hydrocarbon-impacted soil and to determine if GW was impacted. The monitoring wells were installed to depths between 85 and 86 feet bgs and soil borings B-7 and B-10 were drilled to 75 feet bgs. Maximum soil concentrations were: 0.36 ppm TPHg (MW-4@16), 44 ppm TPHd (MW-4@16), 0.0056 ppm B (MW-3@11.5), 11 ppm TBA (MW-2@36.5), 0.0028J ppm MTBE (MW-2@41.5), 11 ppm TBA (MW-2@36.5), 0.0061 ppm naphthalene (MW-2@66.5). Soil samples were ND for all other

76 STATION 5204 (Continued) **S109280357**

constituents tested. GW was encountered in all borings between 71 and 73 feet bgs. Wells MW-1 and MW-2 were screened from 67 to 82 feet bgs and wells MW-3 and MW-4 were screened from 68 to 83 feet bgs. GW samples were not analyzed upon installation. VERIFICATION: On November 30, 2010, one soil boring was advanced to a depth of approximately 40 feet bgs. The boring was completed as a vapor extraction well (VEW-1) and screened from 10 to 40 feet bgs. Soil samples were collected at 5-foot intervals beginning at 10 feet bgs. Soil samples were analyzed for TPPH, BTEX, MTBE, TBA, ETBE, DIPE, TAME and ethanol. One soil sample (VEW-1d15) was additionally analyzed for full scan VOCs, oxygenates and ethanol. All soil samples were ND for all constituents analyzed. January 6 and 7, 2011, a soil vapor extraction (SVE) test was conducted using SVE-1 for extraction. Based on field vapor PID readings during the first 8-hours of the test, the SVE test was extended for a second 8-hour period. SVE samples were collected at the beginning, middle and end of each 8-hour period. The vapor samples were analyzed for TPHg, and full scan VOCs. Maximum vapor concentrations were 13 ppmv TPHg, 0.0098 ppmv Benzene, 0.17 ppmv Toluene, 0.13 ppmv ethyl-benzene, 1.0 ppmv xylenes, 0.23 ppmv MTBE, 0.025 ppmv TBA. DIPE, ETBE, TAME and ethanol were all ND. The radius of influence was approximately 42 feet to 49 feet. Total mass removed: 0.378 lbs TPHg, 0.0002 lbs benzene, and 0.005 lbs MTBE. GROUNDWATER MONITORING: The GW monitoring wells were sampled for the following five quarters: Third Quarter 2009 (September 18, 2009), Fourth Quarter 2009 (November 14, 2009), and First Quarter 2010 (March 25, 2010), Second Quarter 2010 (May 28, 2010), and Third Quarter 2010 (September 8, 2010). Analytical results were ND for all constituents tested except for: 1.1 ppb bromoform (MW-1), 0.67 ppb chloroform (MW-1), 0.67 ppb dibromochloromethane (MW-1). Other information: UST system currently installed and operating at the site. Oct 2013 Well destroyed 11/1/1013 Case closure letter issued by RCDEH

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

TRACT 36846
SEC LIMONITE AVE. & WINEVILLE AVE.
MIRA LOMA, CA 91752

TARGET PROPERTY COORDINATES

Latitude (North):	33.974652 - 33° 58' 28.75''
Longitude (West):	117.533081 - 117° 31' 59.09''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	450755.1
UTM Y (Meters):	3759279.0
Elevation:	652 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640930 CORONA NORTH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

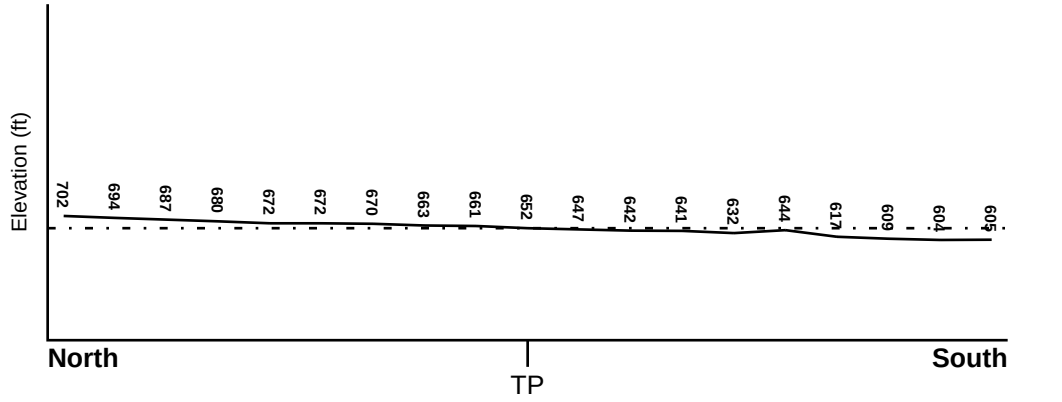

TOPOGRAPHIC INFORMATION

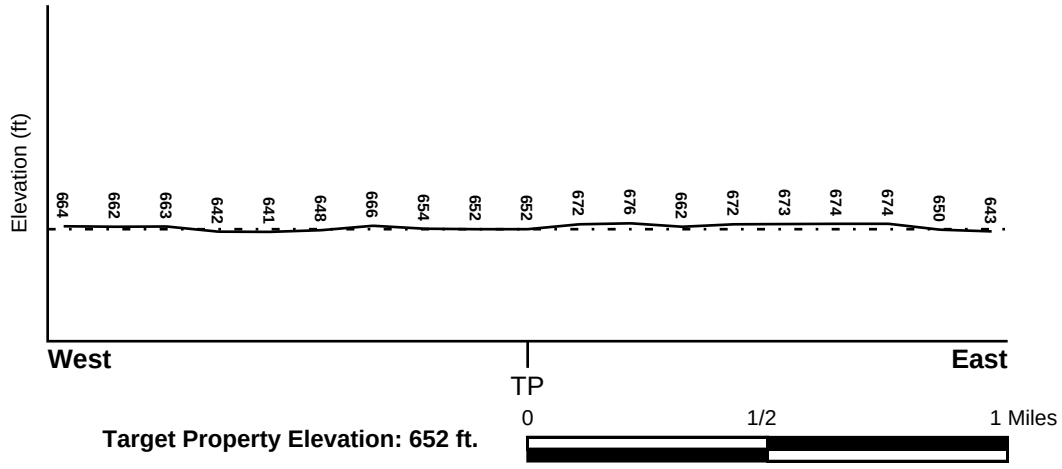

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

0 1/2 1 Miles

Target Property Elevation: 652 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C0681G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C9375H	FEMA FIRM Flood data
06065C0683G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CORONA NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	9 inches	48 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
3	48 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: DELHI

Soil Surface Texture: fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	9 inches	48 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
3	48 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 3

Soil Component Name: MONSERATE

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	9 inches	27 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 4

Soil Component Name: MONSERATE

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: PLACENTIA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
2	18 inches	38 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
3	38 inches	57 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9
4	57 inches	59 inches	gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.9

Soil Map ID: 6

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	7 inches	16 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	16 inches	68 inches	sandy clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
4	68 inches	74 inches	gravelly sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Petra Geotechnical Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The EDR Property Tax Map Report

Environmental Data Resources Inc

6 Armstrong Road
Shelton, CT 06484
800.352.0050
www.edrnet.com

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

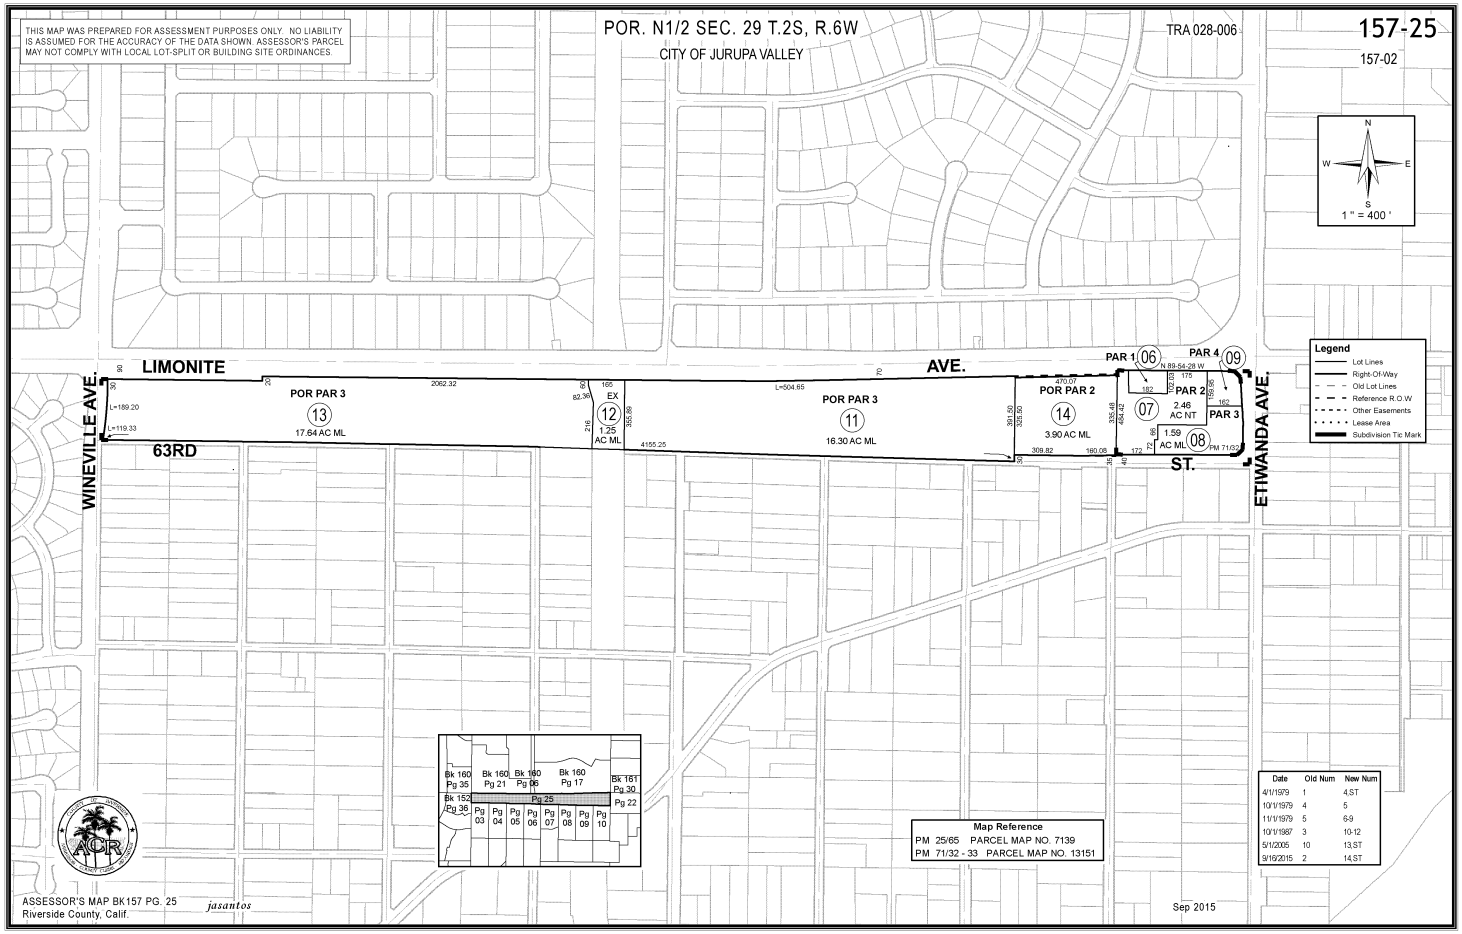

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

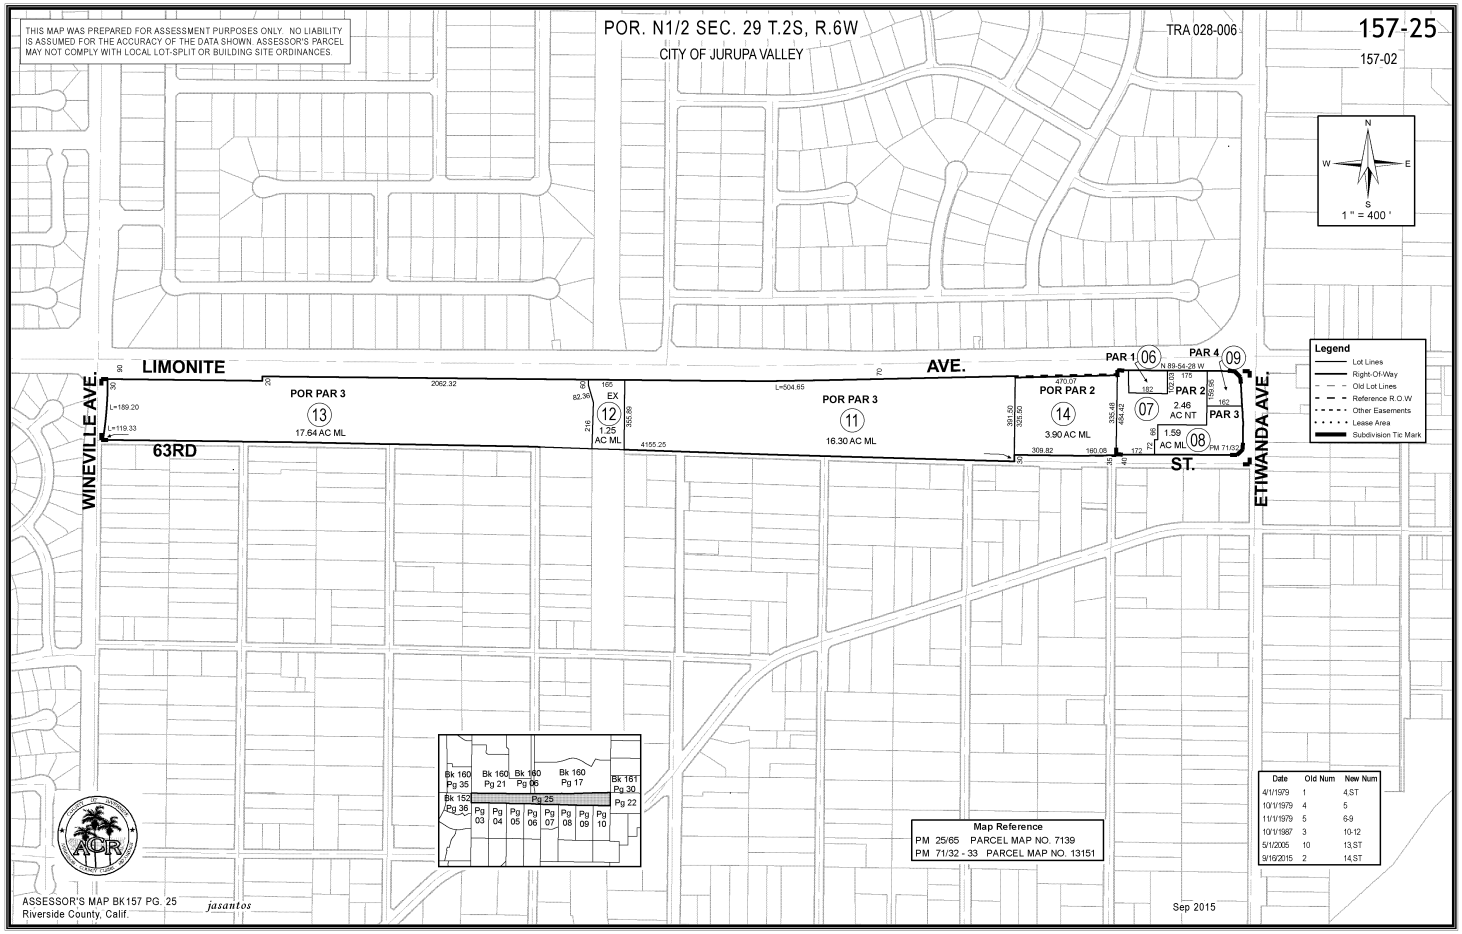

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

No Permits Found

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

APPENDIX D

INTERVIEWS

PETRA GEOSCIENCES, INC.
40880 County Center Dr., Suite M, Temecula, CA * (951) 600-9271 * (951) 719-1499

PHASE I USER/CLIENT QUESTIONNAIRE

The purpose of this questionnaire is to obtain information from the client regarding the Property.

Date Sent to Client October 5, 2021 Date Received from Client _____

A. SITE INFORMATION

1. Property Name/APN: Wineville Market & Villages, APN's 157-250-011 and -013, Jurupa Valley, Riverside Co., California

2. Location (If a map is available, please include it):

3. Why is the Phase I required? (Development as a residential parcel, protection from CERCLA liability, etc?): BUYER IS EXPERIENCED IN REAL ESTATE DEVELOPMENT AND SHOULD RELY ON BUYERS KNOWLEDGE AND NOT SELLERS. AND I BELIEVE BUYER IS REQUESTING.

4. Is there an Interview Contact for this job? (A current owner, operator, or someone with knowledge of the history and/or processes occurring at the site). ☒ Yes ☐ No

   If yes, please provide the following information:
   Person to be interviewed: JOHN RUSSO
   Title/Company: MANAGING MEMBER
   Phone number and/or email address: (951) 836-0530 / JRUSSO@E-EQUITIES.COM

5. Do you have any reports for this job (such as previous Phase I's, biology reports, cultural resource reports, geotechnical reports, etc.) ☒ Yes ☐ No
   BRIAN BUSH SHALL PROVIDE TO PETRA.
   If yes, please provide them for ~~Petra~~ to review. *Date Received from Client* _____

6. As part of our assessment, Petra contacts local agencies to obtain miscellaneous information about the project site such as previous investigations, zoning, and flood zone. Do you have any current restrictions regarding Petra contacting these agencies?
   ☐ Yes ☒ No

   If yes, please contact us to discuss further.

B. SITE ACESS

1. Does Petra have access to the property at this time? ☒ Yes ☐ No

2. Are there any access restrictions such as a locked gate or required insurance forms? NONE

3. Is there a site manager that Petra needs to contact prior to visiting the site? NONE

PETRA GEOSCIENCES, INC.
40880 County Center Dr., Suite M, Temecula, CA * (951) 600-9271 * (951) 719-1499

C. LANDOWNER LIABILITY PROTECTIONS

In order to qualify for one of the Landowner Liability Protections offered by the Small Business liability Relief and Brownfields Revitalization of 2001 (the "Brownfields Amendments"), the client must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Are you aware of any environmental clean-up liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25) ☐ Yes ☒ No

   If no, have you or will you conduct a search for any environmental cleanup liens against the property that are filed or recorded in a registry? ☐ Yes ☒ No

   If yes, please provide Petra with this information. N/A

   If no, do you require Petra to complete this task? ☐ Yes ☐ No UP TO BUYER AT BUYERS EXPENSE

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place on or for the site and/or have been filed or that environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25) ☐ Yes ☒ No

   If no, have you or will you conduct a search for any AULs against the property that are filed or recorded in a registry? ☐ Yes ☒ No

   If yes, please provide Petra with this information. N/A

   If no, do you require Petra to complete this task? ☐ Yes ☐ No UP TO BUYER AT BUYERS EXPENSE.

3. As the user of this Environmental Site Assessment, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the potential chemicals and processes used by this type of business?
   ☐ Yes ☒ No

   If yes, please provide Petra with this information. N/A

PETRA GEOSCIENCES, INC.
40880 County Center Dr., Suite M, Temecula, CA * (951) 600-9271 * (951) 719-1499

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? ☒ Yes ☐ No

   If you conclude that there is a difference, have you considered whether the lower purchase price is because of any environmental concerns are known or believed to be present at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with that information. N/A

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of hazardous materials/chemical releases or threatened releases? For example,

   A. Do you know the past uses of the property? ☐ Yes ☒ No

   If yes, please provide Petra with the information. N/A

   B. Do you know of specific chemicals that are present or once were present at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. N/A

   C. Do you know of spills or other chemical releases that have taken place at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. N/A

   D. Do you know of any environmental cleanups that have taken place at the property or adjacent properties? ☐ Yes ☒ No

   If yes, please provide Petra with the information. N/A

6. As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. N/A

PHASE I PROPERTY OWNER INTERVIEW QUESTIONNAIRE

The purpose of this questionnaire is to obtain information from knowledgeable individuals regarding the Subject Site. This questionnaire will become part of the assessment report.

A. SITE INFORMATION

Project Number: 21-392 Property Location: 34± acres of undeveloped land at the SEC of Limonite Ave. & Wineville Ave., Jurupa Valley, CA

B. INTERVIEW INFORMATION

Date/Time: 6:10pm 10/6/21 ☐ In Person
Interviewer: _____ ☐ By Telephone, Number: _____
Person Interviewed: _____ ☐ By Facsimile, Number: _____
Title/Company: _____ ☒ Email: JRV530@E-EQUITIES.COM

1. What is your relationship to the property? SHAREHOLDER IN WINEVILLE MARKETPLACE, LLC.

2. Do you have good knowledge regarding the uses and physical characteristics of the property?
☒ Yes
☐ No If not, who does? N/A Phone Number: 951-836-0530

3. Do you have good knowledge regarding the activities/processes conducted at the property?
☒ Yes
☐ No If not, who does? N/A Phone Number: 951-836-0530

C. PROPERTY INFORMATION

1. To the best of your knowledge, what are the current and past uses of the property? Please describe with approximate dates.

UNKNOWN - IT'S BEEN VACANT LAND SINCE WE'VE OWNED THE PROPERTY: 1986 TO PRESENT

2. To your knowledge, are there:

Hazardous substances present on the site? ☐Yes ☒No
Petroleum products present on the site? ☐Yes ☒No

If the preceding items are present, are there indications of any of the following:

An existing release? ☐Yes ☒No
A past release? ☐Yes ☒No
A threat of their release? ☐Yes ☒No

If yes to any of the above, please describe: N/A

3. Are you aware of the presence of any of the following either currently or previously on the property or any nearby properties:

Potential Recognized Environmental Conditions	Site		Adjacent	
Hazardous substances?	☐ Yes	☒ No	☐ Yes	☒ No
Petroleum products?	☐ Yes	☒ No	☐ Yes	☒ No
Chemicals?	☐ Yes	☒ No	☐ Yes	☒ No
Asbestos or asbestos-containing materials?	☐ Yes	☒ No	☐ Yes	☒ No
Lead-based paints?	☐ Yes	☒ No	☐ Yes	☒ No
Underground storage tanks?	☐ Yes	☒ No	☐ Yes	☒ No
Above-ground storage tanks?	☐ Yes	☒ No	☐ Yes	☒ No
Oil Wells?	☐ Yes	☒ No	☐ Yes	☒ No
Sumps?	☐ Yes	☒ No	☐ Yes	☒ No

If yes to any of the above, please describe: N/A

4. Are you aware of any current or previous uses of the property or nearby properties that would suggest the presence of the foregoing items, substances, or materials? ☐Yes ☒No

If yes to any of the above, please describe: N/A

5. To your knowledge, are there any utility corridors on the property? ☐Yes ☒No

If yes to any of the above, please describe: N/A

6. To your knowledge, are you aware of any of the following on the property:

Water Wells? ☐Yes ☒No Disposal Wells? ☐Yes ☒No
Clarifiers? ☐Yes ☒No Underground Irrigation Systems? ☐Yes ☒No

If yes to any of the above, please describe: N/A

7. Are there any occupants on the property? ☐Yes ☒No

If yes to any of the above, please describe: N/A

8. Do you have good knowledge regarding the identity of any existing documents relating to the property?
☒Yes
☐No If not, who does? N/A Phone Number: 951-836-0530

9. To your knowledge, do any of the following documents exist with respect to the subject property? If yes, please name the document and comment upon whether it is available for review.

Document	Yes	No	Name/Availability
Environmental site assessment reports?	✓		PHASE I
Environmental audit reports?		✓	
Environmental permits?		✓	
Storage tank registration?		✓	
Material safety data sheets (MSDS)?		✓	
Community right-to-know plans?		✓	
Safety plans?		✓	
Spill Prevention, Countermeasure, & Control Plans?		✓	
Illness and Injury Prevention Plans?		✓	
Reports regarding hydrogeologic conditions on the property or surrounding area?	✓		WEBB ENG.
Hazardous waste generator notices or reports?		✓	
Geotechnical studies?	✓		SOILS REPORT

10. To your knowledge, do any of the following exist with respect to the subject property?

a. Notices or other correspondence from any government agency relating to past or current violations of environmental laws? ☐Yes ☒No

If yes to any of the above, please describe: N/A

b. Notices or other correspondence from any government agency relating to environmental liens encumbering the property? ☐Yes ☒No

If yes to any of the above, please describe: N/A

c. Pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances, or petroleum products in, on, or from the property? ☐Yes ☒No

If yes to any of the above, please describe: N/A

d. Notices from any government al entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? ☐Yes ☒No

If yes to any of the above, please describe: N/A

11. Please provide any additional information relative to this project.

BUYER IS ADVISED TO SEEK PROFESSIONAL ADVICE AS TO ALL ASPECTS ABOUT SUBJECT PROPERTY AND QUESTIONS PERTAINING TO THIS DOCUMENT.

PHASE I USER/CLIENT QUESTIONNAIRE

The purpose of this questionnaire is to obtain information from the client regarding the Property.

Date Sent to Client October 5, 2021 Date Received from Client _____

A. SITE INFORMATION

1. Property Name/APN: Wineville Market & Villages, APN's 157-250-011 and -013, Jurupa Valley, Riverside Co., California

2. Location (If a map is available, please include it):

3. Why is the Phase I required? (Development as a residential parcel, protection from CERCLA liability, etc?): Development as a residential project

4. Is there an Interview Contact for this job? (A current owner, operator, or someone with knowledge of the history and/or processes occurring at the site). ☒ Yes ☐ No

   If yes, please provide the following information:
   Person to be interviewed: John Russo
   Title/Company: Managing Member
   Phone number and/or email address: (951) 836-0530 / jrusso@e-equities.com

5. Do you have any reports for this job (such as previous Phase I's, biology reports, cultural resource reports, geotechnical reports, etc.) ☒ Yes ☐ No

   If yes, please provide them for Petra to review. *Date Received from Client* 10/4/21

6. As part of our assessment, Petra contacts local agencies to obtain miscellaneous information about the project site such as previous investigations, zoning, and flood zone. Do you have any current restrictions regarding Petra contacting these agencies?

   ☐ Yes ☒ No

   If yes, please contact us to discuss further.

B. SITE ACESS

1. Does Petra have access to the property at this time? ☒ Yes ☐ No

2. Are there any access restrictions such as a locked gate or required insurance forms? No

3. Is there a site manager that Petra needs to contact prior to visiting the site? No

PETRA GEOSCIENCES, INC.
40880 County Center Dr., Suite M, Temecula, CA * (951) 600-9271 * (951) 719-1499

C. LANDOWNER LIABILITY PROTECTIONS

In order to qualify for one of the Landowner Liability Protections offered by the Small Business liability Relief and Brownfields Revitalization of 2001 (the "Brownfields Amendments"), the client must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Are you aware of any environmental clean-up liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25) ☐ Yes ☒ No

   If no, have you or will you conduct a search for any environmental cleanup liens against the property that are filed or recorded in a registry? ☒ Yes ☐ No

   If yes, please provide Petra with this information. A title report can be provided.

   If no, do you require Petra to complete this task? ☐ Yes ☐ No

2. Are you aware of any activity and land use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place on or for the site and/or have been filed or that environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? (40 CFR 312.25) ☐ Yes ☒ No

   If no, have you or will you conduct a search for any AULs against the property that are filed or recorded in a registry? ☒ Yes ☐ No

   If yes, please provide Petra with this information. A title report can be provided.

   If no, do you require Petra to complete this task? ☐ Yes ☐ No

3. As the user of this Environmental Site Assessment, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the potential chemicals and processes used by this type of business?
   ☐ Yes ☒ No

   If yes, please provide Petra with this information. _____

PETRA GEOSCIENCES, INC.
40880 County Center Dr., Suite M, Temecula, CA * (951) 600-9271 * (951) 719-1499

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? ☒ Yes ☐ No

   If you conclude that there is a difference, have you considered whether the lower purchase price is because of any environmental concerns are known or believed to be present at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with that information. _____

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of hazardous materials/chemical releases or threatened releases? For example,

   A. Do you know the past uses of the property? ☐ Yes ☒ No

   If yes, please provide Petra with the information. _____

   B. Do you know of specific chemicals that are present or once were present at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. _____

   C. Do you know of spills or other chemical releases that have taken place at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. _____

   D. Do you know of any environmental cleanups that have taken place at the property or adjacent properties? ☐ Yes ☒ No

   If yes, please provide Petra with the information. _____

6. As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
   ☐ Yes ☒ No

   If yes, please provide Petra with the information. _____

APPENDIX E

RESUMES

ED LUMP

MR. ED LUMP
Associate Geologist

EDUCATION
B.Sc Geology, San Diego State University, San Diego, California

PROFESSIONAL SUMMARY
Mr. Lump has been in the field of Engineering Geology since 1984 and in the field of Environmental Assessment since 1990. Serving as a field technician, soils laboratory technician, and geologist he has gained field experience on numerous hillside and flatland residential and commercial developments throughout southern California. As an engineering geologist he supervised field personnel and conducted numerous geologic and geotechnical evaluations on residential, commercial and industrial developments in California, Arizona and Nevada. His projects have included landslide and fault evaluations, single and multi-tract residential properties, shopping centers/national chain retail developments, and forensic evaluations, as well as grading and construction oversight. Mr. Lump has also conducted and managed numerous Phase I Environmental Site Assessments and Phase II soil, groundwater and soil vapor assessments for vacant, agricultural, residential, commercial and industrial properties in California, Arizona and Nevada.

SELECTED PROJECT EXPERIENCE

Environmental Site Assessments
- Limited Phase II and Soil Vapor Survey, 2013, County of Riverside, future Eastvale fire station, Riverside County, CA
- Phase I ESA, 2013, Wakeland Housing Development, 10 apartment complex portfolio, San Diego County, CA
- Phase I ESA and Limited Phase II, 2013, William Lyon Homes, Upland Residential Development, San Bernardino County, CA
- Limited Phase II Assessment, 2013, KB Homes, Spring Mountain Ranch, Riverside County, CA
- Environmental demolition and grading oversight, 2011/2012, Standard Pacific Homes, Harmony Grove residential development, San Diego County, CA
- Groundwater Mounding Evaluation, 2008, Lowe's HIW, Lowe's of Pacoima, Los Angeles County, CA
- Phase I ESA, Pesticide Residue Survey, Remedial Earthwork Guidelines, and Final As-Built Assessment, 2003/2004, Lennar Homes, Bressi Ranch, San Diego County, CA

Geologic and Geotechnical Evaluations
- Lake Elsinore Marketplace, Diamond Development, Riverside County, CA
- Salton Sea Solar Plant, Chevron Solar, Inc., Imperial County, CA
- Lowe's of Sparks, Nevada, Lowe's HIW, Washoe County, NV
- Walmart Murrieta, Walmart, Inc., Riverside County, CA
- Santa Fe Hills/Paloma Residential Development, KB Homes, San Diego County, CA
- Carmel Mountain Ranch Residential Development, Presley of San Diego, San Diego County, CA
- Lowe's of Bullhead City, Arizona, Lowe's HIW, Mohave County, AZ

ED LUMP

Grading and Construction

- Discovery Hills Residential Development, Presley of San Diego, San Diego County, CA
- Lowe's of Prescott, Arizona, Lowe's HIW, Yavapai County, AZ
- Salt Creek Residential Development, KB Homes, San Diego County, CA
- Lowe's of Pacoima, Lowe's HIW, Los Angeles County, CA
- Lake Elsinore Marketplace, Diamond Development, Riverside County, CA
- Carmel Mountain Ranch Residential Development, Presley of San Diego, San Diego County, CA
- Santa Fe Hills/Paloma Residential Development, KB Homes, San Diego County, CA
- Cobra Golf Facility-Carlsbad, Cobra Golf, San Diego County, CA

SIAMAK JAFROUDI

DR. SIAMAK JAFROUDI
President
Principal-in-Charge

EDUCATION
PhD, Geotechnical Engineering, 1983,
UC Davis
MS, Civil Engineering, 1978, UC Davis

REGISTRATIONS
Civil Engineering, California, PE 36641
Geotechnical Engineer, California, GE 2024
Environmental Assessor, REA 01655

PROFESSIONAL SUMMARY
Dr. Jafroudi has over 34 years of professional experience in geotechnical engineering. His area of specialization is “material characterization” in relation to slope stability evaluation, liquefaction analysis, pavement design, collapse potential, earth retaining structures and earthquake engineering. Dr. Jafroudi’s experience encompasses the design and supervision of a multitude of soil mechanics laboratory tests and drilling programs. With a broad range of project experience, he has served as a Principal Engineer on several key projects for such clients as school, university and college districts, public agencies; transportation agencies; residential and commercial developers, as well as private sector clients.

Acquiring a doctorate degree in Geotechnical Engineering as well as a Master of Science degree in Civil Engineering, Dr. Jafroudi maintains extensive working knowledge and experience with respect to these challenging fields. Dr. Jafroudi is a Registered Geotechnical Engineer (GE), a Registered Environmental Assessor (REA), and is registered in Civil Engineering (PE), all in the state of California. Additionally, he is an active member of the American Society of Civil Engineers, the Earthquake Engineering Research Institute and California Geotechnical Engineering Association.

SELECTED PROJECT EXPERIENCE

Environmental Site Assessments
- KB Homes, Hollywood Beverly Christian Church, Hollywood
- Castle & Cooke, Lake Elsinore Outlet Mall, Lake Elsinore
- Covina Transit Plaza, Foothill Transit, Covina
- First Street Bridge Widening, Los Angeles County
- Overland Street Bridge Improvements, Los Angeles County
- 801 Office Tower, Mani Brothers, Los Angeles
- Harmony Grove Site Acquisition, New Urban West, San Diego County
- Site Acquisitions, County of Los Angeles Office of Education, Los Angeles
- Eleven Projects, City of Mission Viejo, Mission Viejo
- Site Acquisitions, Paramount USD, Paramount
- Site Acquisitions, Santa Ana USD, Santa Ana
- Site Acquisition, Nevis Construction, Chino Hills
- Site Acquisitions, Moreno Valley USD, Moreno Valley
- Corona Farms, Confidential Client, Corona
- Amusement Park, Confidential Client, Orange County
- Nursery Site, Confidential Client, Sylmar
