SIGNATURE AND ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1. SUMMARY OF CONCLUSIONS

Ramboll US Corporation (Ramboll) was retained by Northgate Gonzalez RE, LLC (Northgate) to perform a Phase I Environmental Site Assessment (ESA) of the properties located at 2212, 2218, and 2226 North Rosemead Boulevard in South El Monte, California (herein referred to as the "site" or the "facility;" Figures 1 and 2). Ramboll's assessment was conducted in connection with a potential purchase of the site. The objective of the Phase I ESA, which was conducted in conformance with the scope and limitations of ASTM International's *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* E1527-13 (the "ASTM Standard") and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312, was to identify Recognized Environmental Conditions (RECs), as defined in the ASTM Standard (see Section 2.1).

1.1 Site Summary

The approximately 2.33-acre site is located in the City of South El Monte, Los Angeles County, California. The site is occupied by three tenants: DreamWorks Auto Center (2212 North Rosemead Boulevard), used for office space and an auto body repair shop, which is shared with the adjoining property to the south (2200 North Rosemead Boulevard); BJ's Tire Spot (2218 North Rosemead Boulevard), used for tire and truck tire repairs; and Ditty Container, Inc. ("Ditty" or "Ditty Container") (2226 North Rosemead Boulevard), a company that reconditions steel drums and plastic totes.

The site was agricultural land from at least 1928 until 1948. The 2218 North Rosemead Boulevard building has been occupied by truck and tire repair businesses since at least 1981. Previous site uses of the 2212 North Rosemead Boulevard parcel have included office and storage space as early as 1951, a tire company in 1957, and as A&D Auto Body in 1996. Currently, this parcel is used for office space and for auto body repair associated with the adjoining property to the south, DreamWorks autobody repair, since at least 1996. Ditty Container has occupied the 2226 North Rosemead Boulevard building since 1996. Prior to that time, Pacific Coast Drum (PCD) occupied the 2226 North Rosemead Boulevard parcel since the 1940s and also operated as a drum reconditioning/cooperage company.

The current owner of the site is Alisal Hills, LLC, Monfort, LLC, and Gemini, LLC. According to the Assessor's Office, the assessor's parcel numbers (APN) for the site are: 8102-039-035 (2212 North Rosemead Boulevard), 8102-039-029 (2218 North Rosemead Boulevard), and 8102-039-031 (2226 North Rosemead Boulevard

1.2 Recognized Environmental Conditions

Ramboll performed a Phase I ESA of the site at 2212, 2218, and 2226 North Rosemead Boulevard, South El Monte, California in conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 6.2 of this report. This assessment has revealed no evidence of RECs in connection with the site, except for the following:

- **Location of Facility within San Gabriel Valley Superfund Site** The site is located within an area of contaminated groundwater underlying the San Gabriel Valley designated by the United States Environmental Protection Agency (USEPA) as the San Gabriel Valley Superfund site (Area 1, including the South El Monte Operable Unit), in which groundwater is contaminated with volatile organic compounds (VOCs), in particular, trichloroethene (TCE), perchloroethene (PCE), and carbon tetrachloride; perchlorate; 1,4-dioxane; and n-nitrosodimethylamine (NDMA). The San Gabriel Valley Superfund site is listed on numerous databases in the EDR, Inc. (EDR) database report. According to the EDR database report, the site (former occupant PCD with the primary address of 2200 N. Rosemead Boulevard) and numerous surrounding properties and other

properties in the vicinity listed on the Spills, Leaks, Investigation, and Cleanup (SLIC) and Well Investigation Program Case List (WIP) databases are located within San Gabriel Valley Area 1 and are listed as potentially responsible parties (PRPs) for contributing to the groundwater contaminant plume, comprising an area of approximately 11 square miles.

Numerous subsurface investigations consisting of soil, soil vapor, and groundwater sampling were conducted in connection with the WIP at the site and adjoining properties historically occupied by PCD. The investigations revealed contamination that was determined by the Regional Water Quality Control Board – Los Angeles Region (LARWQCB) to be sourced on-site. However, site-specific cleanup actions were not required by the LARWQCB, administrator of the WIP program. As a result of PCD demonstrating stable or declining concentrations of VOCs in soil vapor, the LARWQCB did not require additional investigation or remediation work at the site. The case was closed with a no Further Action (NFA) designation on March 17, 1998 and is listed as "case closed" in the Geotracker database as of November 17, 2014. However, the closure letter made it clear that PCD was considered a PRP with regard to the South El Monte Operable Unit and was urged to continue to cooperate with USEPA's requirements.

A consent agreement between USEPA/California Department of Toxic Substances Control (DTSC) and various parties in the area (including PCD) was signed in 2012 pertaining to the South El Monte Operable Unit of the San Gabriel Valley Area 1 Superfund site. The consent agreement stated that contaminant concentrations exceed maximum contaminant levels (MCLs) throughout a large portion of the South El Monte Operable Unit, including areas used for sources of drinking water, and filed a complaint seeking reimbursement of response costs incurred for response action taken in connection with releases of hazardous substances in the South El Monte Operable Unit; the defendants (including PCD) entered into this agreement to protect public health but did not admit liability arising out of any previous or current releases.

Cleanup actions performed in relation to the San Gabriel Valley Area 1 Superfund site, including the South El Monte Operable Unit, are ongoing. Remediation of impacted groundwater within the area-wide plume commenced in 2008 with the installation and operation of four separate groundwater pump and treat systems. Based on the current status of the response action and the continuing use of the site as a drum recycling facility, Ramboll considers this issue to be a REC.

- **Onsite Soil Vapor and Groundwater Contamination and Historical Industrial Uses of the Site.** Investigations conducted from the 1980s through early 2000s have revealed the presence of soil vapor and likely groundwater contamination at the site, which was found to consist of generally low to moderate concentrations of VOCs (specifically, chlorinated solvents) and other compounds. Detected concentrations of various compounds detected in soil vapor and likely in groundwater exceed current regulatory thresholds (it is noted that although no groundwater sampling has been performed at the site to date, groundwater is known to be impacted both immediately upgradient and downgradient of the site).

  The site (2212, 2218, and 2226 North Rosemead Boulevard) and adjoining property to the south (2200 North Rosemead Boulevard) have a long history of use as a steel drum and tote reconditioning business, which operated since 1959 by PCD and continues to operate at the 2226 North Rosemead Boulevard portion of the site as Ditty Container since the mid-1990s. In addition, the 2218 North Rosemead Boulevard parcel historically has been occupied by a tire repair shop, and the 2212 North Rosemead Boulevard parcel historically has been occupied by a tire shop and auto body repair shop (other historical uses of these parcels are unknown). Operations have involved the use and storage of a variety of chemicals (e.g., paints, resins, varnishes, cleaners, degreasers, etc.) and generated a variety of hazardous wastes (solvents, oils). Ramboll cannot

rule out the potential that historical and current uses of the site have resulted in subsurface impacts to the site. Ramboll's assessment has identified the presence of several areas of environmental concerns at the site, including the following: the paint storage area, hydraulic lifts, truck maintenance area, trench drain, drum and tote storage areas, and areas of surficial staining amongst others. In addition, environmental compliance audits conducted by Ditty revealed numerous violations with regard to the maintenance and disposal of hazardous materials, and storm water, as well as poor housekeeping issues that have the potential to have caused impacts to the subsurface.

Because no soil vapor sampling activities reportedly have been conducted at the site for approximately 15 - 20 years (while aforementioned industrial uses were ongoing), and no groundwater sampling has r been performed at the site to date, current subsurface conditions are not known. However, groundwater sampled upgradient and downgradient of the site in monitoring wells installed by PCD during the 1990s revealed groundwater contamination in all three monitoring wells, indicating that groundwater beneath the site is similarly impacted. As a result, and because concentrations of various compounds detected in soil vapor and likely groundwater historically exceed current regulatory thresholds, this issue is characterized as a REC. Furthermore, the potential that on-site soil vapor concentrations present a possible vapor encroachment condition (VEC), cannot be ruled out at this time.

- **Adjoining Property Uses.** The properties to the north and south of the site (2310 North Rosemead Boulevard and 2200 North Rosemead Boulevard) historically were occupied by PCD and have had documented releases of hazardous substances that impacted soil, soil vapor, and groundwater beneath the properties. In addition, the property located at 2128 North Rosemead Boulevard, identified as the former Chemrite facility, was found to have soil and groundwater impacts that appeared to be sourced on that property. Prior correspondence with the LARWQCB suggested that the 2128 North Rosemead Boulevard property could be a possible source of chlorinated solvent contamination previously detected at the 2200 North Rosemead Boulevard property Based on the long-term industrial use and known/suspected sources of contamination, these facilities are considered to present a REC in connection with the site.

1.2 Other Findings

In addition to the RECs discussed in this report, the following additional finding related to potential contamination concerns was identified:

- **Underground Storage Tank (UST) Removal and Closure.** In 1986, one 12,000-gallon gasoline UST was removed from the 2226 North Rosemead Boulevard parcel. On its removal, two soil samples were collected and analyzed for total petroleum hydrocarbons (TPH). The two soil samples reported non-detect concentrations of TPH. A NFA letter was issued by the County of Los Angeles, Department of Public Works (DPW) on October 6, 1986 regarding the 12,000-gallon UST removal (Closure Permit 1862-B).
- **Asbestos, Lead-Based Paint and Universal Wastes.** Based age of the facility and likelihood of past modifications and/or additions, it is likely that asbestos and lead-based paint are present within interior and exterior building surfaces and building materials. Additionally, the facility is likely to contain universal wastes, such as light ballasts and window putty containing compounds such as polychlorinated biphenyls (PCBs). An evaluation of such materials is outside the scope of work for a Phase I ESA. However, given the size of the facility, Ramboll recommends that a pre-demolition survey for these materials be conducted in order to evaluate the potential abatement costs associated with these issues.

2. INTRODUCTION

2.1 Purpose

Ramboll was retained by Northgate to conduct a Phase I ESA of the site located in South El Monte, California. Ramboll's assessment was conducted in connection with potential redevelopment of the site. The purpose of the assessment was to identify RECs, which are defined in the ASTM Standard as follows:

> "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions."

2.2 Scope of the Assessment

Ramboll consulted the references noted below and performed the following tasks, in completion of the Phase I ESA of the site:

- A visit to the site by Denisse Hernandez of Ramboll on June 26 and 29, 2020, to observe the exterior and interior features of the site and to identify the uses and conditions specified in the ASTM Standard. In addition, Ramboll observed the adjoining properties from the site or adjacent public thoroughfares. Photographs taken during the site visit are presented in Appendix A.
- An interview during the site visit with the property manager, Mr. Gary Mearns, who has been the facility operations manager since 1993, at which time the facility was occupied by PDC. The aforementioned individual is referred to herein as "facility personnel." The facility personnel interviewed by Ramboll was identified by the Company as having good knowledge of the uses and physical characteristics of the site.
- A review of information contained in federal and state environmental databases, as obtained from the sources noted below:
  - A radius report prepared by EDR (see Appendix B), which presents the results of searches of federal and state databases for the subject site, as well as properties near the site. The radius searched for each database, as well as the databases themselves, was selected in accordance with the ASTM Standard.
  - The USEPA's Envirofacts database, which provides site information contained in multiple USEPA regulatory databases.
  - The State Water Resources Control Board (SWRCB) GeoTracker database (GeoTracker), which provides information regarding groundwater assessments and cleanups.
  - The DTSC EnviroStor database (EnviroStor), which provides information regarding property investigations and clean-ups.
  - The California Geologic Energy Management Division (CalGEM) mapping system, which provides locations of oil and gas wells in California.
- A review of standard historical sources (included as Appendix C) and local agency inquiries, as defined in the ASTM Standard. The following resources were reviewed:
  - Readily available historical sources (as identified in Section 4.2 of this report and included as Appendix C) to develop a history of the previous uses of the site and surrounding area.

  - Historical and site-specific information obtained from the following local agencies: the Los Angeles County Assessor's Office (Assessor's Office), City of El Monte Building Department (Building Department), and Los Angeles County Public Works – Waste Management Division (Public Works). Additionally, Ramboll requested information from the Los Angeles County Fire Department – Health Hazardous Materials Division (Fire Department); however, the Fire Department indicated that no records were available for the site. Finally, Ramboll requested information from the Los Angeles County Public Health Investigator (PHI); however, the agency referred Ramboll to the Fire Department.

- Ramboll was provided with numerous environmental assessment reports, permits, audit reports, and soil, soil vapor, and groundwater analytical reports in connection with the site and the adjoining properties occupied by PCD. Key documents reviewed are summarized in Section 4.4 and are included as Appendix D. Information obtained from other documents reviewed has been incorporated into the applicable sections of this report. It should be noted that, due to the nature of the PCD operations that encompassed several properties, the environmental reports reviewed cover the address of the site (2212, 2218, and 2226 North Rosemead Boulevard) as well as the other addresses occupied by PCD (2200 and 2310 North Rosemead Boulevard) that are no longer part of the drum reconditioning facility operated by Ditty.
- A review of physical setting sources, as defined in the ASTM Standard, including:
- The current United States Geological Survey (USGS) 7.5-minute topographic map that shows the area on which the site is located.
- Geologic, hydrogeologic, or hydrologic sources as provided in the environmental database report and in the previous environmental reports for the site, as listed above.

This assessment was conducted in accordance with the methodology specified in ASTM Standard E1527-13, as agreed upon by Ramboll and Northgate in June 2020. Asbestos and lead-based paint surveys of the site buildings were performed concurrently with the Phase I ESA, the results of which will be provided under separate cover.

2.3 Significant Assumptions

In conducting this review, no significant assumptions were made.

2.4 Reliance and General Limitations

This report has been prepared for the exclusive use of Northgate Gonzalez RE, LLC and may not be relied upon by any other person or entity without Ramboll's prior express written permission.

This report is considered current only for a period of 180 days from the site inspection. The conclusions presented in this report represent Ramboll's professional judgment based upon the information available and conditions existing as of the date of this report. In performing its assignment, Ramboll must consult publicly available information, information provided by the client, and information provided by third parties. Ramboll can neither warrant nor guarantee the accuracy or completeness of such information, however. This review is not intended as legal advice, nor is it an exhaustive review of site conditions or facility compliance. Ramboll makes no representations or warranties, expressed or implied, about the conditions of the site.

Ramboll's scope of work for this assignment did not include collecting samples of any environmental media. As such, this review cannot rule out the existence of latent conditions including contamination not identified and defined by the data and information available for Ramboll's review; however, this

report is intended, consistent with normal standards of practice and care, to assist the client in identifying the risks of such latent conditions.

Other issues considered outside the scope of the ASTM Standard and this review include regulatory compliance, asbestos-containing materials, radon, lead-based paint, mold, lead in drinking water, wetlands, PCBs in building materials, cultural and historic resources, ecological resources, endangered species, and high voltage power lines. Asbestos and lead-based paint surveys were performed as a separate scope of work concurrent with this Phase I ESA report, the results of will be provided under separate cover.

3. SITE DESCRIPTION

3.1 Site Setting

The site is occupied by three businesses: DreamWorks Auto Center (2212 North Rosemead Boulevard), used for office space and auto body repair shop which is shared with the adjoining property to the south (2200 North Rosemead Boulevard); BJ's Tire Spot (2218 North Rosemead Boulevard), used for tire and truck tire repairs; and Ditty Container (2226 North Rosemead Boulevard), a company that reconditions steel drums and plastic totes, in South El Monte, Los Angeles County, California. The approximately 2.33-acre (101,495 square feet) site is located approximately 13 miles east of Los Angeles, California (Figure 1).

According to the Assessor's Office, the APNs for the site are: 8102-039-035 (2212 North Rosemead Boulevard; 0.33-acre), 8102-039-029 (2218 North Rosemead Boulevard; 0.33-acre), and 8102-039-031 (2226 North Rosemead Boulevard; 1.67-acre).

The 2212 North Rosemead Boulevard parcel is developed with a single story approximately 6,000-square-foot building. The 2218 North Rosemead Boulevard parcel is developed with an approximately 3,289-square-foot single story building. The 2226 North Rosemead Boulevard parcel is developed with three separate structures of approximately 7,200 square feet, 7,560 square feet, and 2,400 square feet in size (Figure 2).

The primary site access is via North Rosemead Boulevard at the western site boundary. The site is fully paved with asphalt and surrounded with fencing. There are no on-site surface water bodies.

Table 1 provides an overview of physical setting and utility information for the site.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Topography		
Elevation [(AMSL (above mean sea level)]	USGS topographic map; Google Earth	Ranges from approximately 226 and 228 feet AMSL.
Topographic Gradient	USGS topographic map; visual observations	Relatively flat on-site, with a gentle downward slope to the southwest. Regional topography slopes gently downward to the southwest.
Hydrology		
Storm Water Runoff	Visual observations	Runs off discharge to the municipal storm sewer system on North Rosemead Boulevard.
Nearest Surface Water Body to the Site	USGS topographic map	The Rio Hondo is located approximately 2,385 feet west of the site.
Flood Plain	FEMA*	The site is not located within a 500-year flood zone. No incidents of flooding were reported.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description
Wetlands	NWI*; Visual observations	There are no federally designated wetlands on-site.
Geology and Hydrogeology		
Presumed Direction of Shallow Groundwater Flow	2019 Annual Groundwater Monitoring Report**	Based on data from a 2019 groundwater monitoring report for a property 1,310 feet southeast of the site, groundwater flow was calculated to be to the south-southwest but reportedly it has also been to the south-southeast historically.
Depth to Groundwater	2002 Technical Report	Based on data from a 2002 Technical Report from the property adjacent to the south, shallow groundwater was encountered between approximately 32 and 34 feet below ground surface (bgs).
On-site Wells	Visual observations; CalGEM	There are no production or monitoring wells onsite. There are no oil or gas wells onsite.
Nearest Groundwater Supply Wells	Database report	Approximately two state-registered private or municipal wells that may be used for water supply are located between one-half and one mile southwest and southeast of the site.
Geologic Conditions	1991, Soil Gas Survey Report; NCSS*	The soil beneath the site includes recent and older alluvium which include interbedded layers of clays, silts, sands, pebble gravel, cobles, and boulders. NCSS classifies regional soils as "urban land" and no additional details regarding soil components and types are provided.
Site Utility Information		
Heating and Cooling Equipment	Facility personnel	Heating, ventilation, and/or air conditioning units are located on rooftops.
Natural Gas Service	Facility personnel	The site is not provided with natural gas service.
Use of Fuel Oil for Building Heat	Facility personnel	No current or former use of fuel oil reported.
Water Supply	San Gabriel Valley Water Department website	San Gabriel Valley Water Company.
Sanitary Sewer	Facility personnel	The facility discharges wastewater to the municipal sanitary sewer system.
Septic Systems	Facility personnel	No identified current or former septic systems.

Table 1: Physical Setting and Utility Information

Conditions	Source	Description

Notes:

DOGGR = Division of Oil, Gas & Geothermal Resources (DOGGR); FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey ; NWI = National Wetlands Inventory

* - Source was provided in the environmental database report.

** - Annual Groundwater Monitoring Report, Ted Levine Drum Company, 1729, 1807, 1817 Chico Avenue, South El Monte, California, dated May 24, 2019.

3.2 Current Use of Site

3.2.1 Current Operations

The site is occupied by three businesses, each of which is described below.

2212 North Rosemead Boulevard:

The parcel is divided into two areas, the western portion of the building is used for office space and the eastern portion of the building is a shared space with the adjoining property to the south, DreamWorks Auto Center (2200 North Rosemead Boulevard), which conducts auto body repairs. As part of DreamWorks Auto Center operations, damaged or old parts are removed from vehicles needing auto body repair. Auto body painting is conducted in the spray paint booth and a storage area containing paints and solvents also is located in this area. According to facility personnel, the site's operations have remained generally consistent during its period of occupancy at the facility.

2218 North Rosemead Boulevard

This parcel is currently occupied by BJ's Tire Spot, which conducts tire and truck tire repairs and is also used for tire storage (inside of the building and on the outside patio area). According to facility personnel, no solvents have been used at this parcel and the site's operations have remained generally consistent during its period of occupancy at the facility.

2226 North Rosemead Boulevard

This parcel is occupied by Ditty Container, a drum and tote refurbisher. Ditty also occupies the adjoining property to the south (2200 North Rosemead) where some of the refurbishing operations are conducted. The 2226 North Rosemead Boulevard parcel is occupied by office space, warehouse, empty drum storage areas, and a portion of the production building where drum cleaning occurs. No refurbishing (i.e., painting) operations occur on this parcel; these operations are conducted on the adjacent property to the south.

According to facility personnel, no solvents have been used at this parcel and the site's operations have remained generally consistent during its period of occupancy at the facility

3.2.2 Waste Management

Presumed hazardous wastes based on Ramboll's observations includes paint and solvent waste from painting operations at the 2212 North Rosemead parcel. In addition, Ditty's waste shotblast material is stored in a roll-off bin located on the northeastern portion of the site.

Nonhazardous waste generated at the site consists of general trash. General facility trash generated from BJs Tires is collected in trash bins stored on the eastern portion of the site. Trash generated at the 2212 North Rosemead parcel is collected in an on-site covered dumpster on the southern portion of the site, pending offsite removal and disposal by Waste Management. Trash generated at Ditty Container is collected in an onsite covered dumpster placed on the southern portion of the site.

3.2.3 Wastewater and Storm Water

Sanitary wastewater, which includes wastewater from bathroom and sink areas is discharged to the municipal sanitary sewer system.

A drainage trench collects wastewater generated during the drum cleaning process in the southeastern portion of the 2226 North Rosemead Boulevard parcel and discharges to a wastewater pretreatment system located at the adjoining property to the south before its discharged to the municipal sewer system.

Storm water at the site runs off into the street and enters municipal storm sewer system located on North Rosemead Boulevard.

3.2.4 Air Emissions

Based on field observations air emissions at the site consist primarily of particulate matter (PM) and VOCs from painting operations at the 2212 North Rosemead Boulevard parcel and combustion products from the facility's heating system at the 2212 North Rosemead parcel and the Ditty facility. Various notice of violations were listed for the Ditty parcel at 2226 North Rosemead Boulevard parcel for administrative violations, including not submitting proper monitoring documentation in 2003, 2006, 2009, for failing to use emission control system to reduce VOC emissions in 2005, and for causing odors and nuisances to the public in 2003 and 2004. Violations were resolved. The 2212 and 2218 North Rosemead Boulevard parcels were not listed in the website.

3.3 Current Uses of Adjoining Properties

The site is located in a mixed commercial/light industrial and residential land use area. The nearest residential area is located approximately 300 feet south of the site. Based on discussions with facility personnel, Ramboll's visual observations from the site boundary and public rights-of-way, and a limited review of publicly available information, a general determination of the current use of adjacent properties was developed, as described Table 2.

Table 2: Current Use of Adjacent Properties

Direction	Property/Land Use	Ramboll's Observations
North	168 ACE Lumber & Supply, beyond which are more commercial business.	No apparent exterior manufacturing or chemical storage operations were observed. No environmental concerns were noted.
East	Multi-tenant light industrial/commercial business park.	No environmental concerns were noted.
South	DreamWorks Auto Center and the former Pacific Coast Drum facility (Ditty Container)	DreamWorks Auto Center conducts auto body repairs. The former Pacific Coast Drum (current Ditty Container) maintains a wastewater treatment system and clarifier system and stores various drums and totes on the property.

Table 2: Current Use of Adjacent Properties

Direction	Property/Land Use	Ramboll's Observations
West	North Rosemead Boulevard, beyond which are commercial businesses including (Title Depot and Highway Machinery, Inc.	No environmental concerns were noted.

Notes:

During the site visit, Ramboll walked or drove by the borders of these properties that are adjacent to the site. Ramboll did not enter the neighboring properties.

4. REVIEW OF PUBLIC RECORDS AND OTHER INFORMATION SOURCES

4.1 Environmental Regulatory Database Review

Ramboll contracted with EDR in June 2020 to prepare a summary of listings in federal and state agency databases for the site and facilities within applicable radii of the site, as specified by the ASTM standard.[1] A copy of the environmental database search report is presented in Appendix B.

4.1.1 Database Review for Site

Ramboll reviewed the results of the state and federal environmental database searches performed by EDR (see Appendix B) and also reviewed information available in the California GeoTracker and EnviroStor databases. According to the EDR database report, the site is located in an "area of concern" designated by the RWQCB as such as a result of historical industrial uses in the site vicinity and PCE and TCE releases that have impacted groundwater. The site is also listed as being within the San Gabriel Valley Superfund site (Area 1) and is listed on several environmental databases, as discussed in Table 3.

Table 3: Summary of Environmental Database Listings for the Site

Summary of Information Contained in Database	Ramboll's Comments
The site is listed as being located within Area 1 of the San Gabriel Valley Superfund site. The San Gabriel Valley Superfund site is listed on the National Priorities List (NPL) (as of May 1984), Superfund Enterprise Management System SEMS, Engineering Controls Sites List (US ENG Controls), Record of Decision (ROD), Potentially Responsible Party (PRP), and Superfund (CERCLA) Consent Decrees (Consent) databases for a plume of groundwater impacted with TCE, PCE, and carbon tetrachloride at concentrations exceeding regulatory thresholds. The groundwater plume is approximately 4 miles long by 1.5 miles wide and is present along the axis of the Rio Hondo Wash and the Sand Pit Wash and parallels the San Gabriel River. Remediation of impacted groundwater included the installation and operation of four separate groundwater pump and treat systems by 2008. According to the *First Five-Year Review Report for San Gabriel Valley Area 1 Superfund Site*, prepared by the USEPA, and dated September 11, 2013, PCE was detected in the closest well to the site (SEMMW05; located approximately 1,000 feet to the northeast of the site) at a concentration of 96 µg/l in the upper intermediate aquifer and at a concentration of 67 µg/l in the intermediate aquifer in 2012. No current groundwater monitoring data were available for review on the USEPA website. According to the First Five-Year Review report, USEPA was in the process of conducting a vapor intrusion investigation at and near source areas throughout Area 1 at that time, an evaluation that was anticipated to take three years to complete. The results of that evaluation also were not available for review on the USEPA website.	This issue is discussed further in the ensuing sections of this report.

[1] EDR uses the term "radii" to refer to the ASTM terminology "approximate minimum search distance" in the environmental database report.

Table 3: Summary of Environmental Database Listings for the Site

Summary of Information Contained in Database	Ramboll's Comments
The Pacific Coast Drums (2212 North Rosemead Boulevard) parcel is listed in the HAZNET and Hazardous Waste Tracking System (HWTS) databases as generating asbestos containing waste in 2015. No other information was provided.	These listings alone do not suggest a contamination concern to the site.
Ditty Container Inc. (2226 North Rosemead Boulevard) is listed in the UST database with no additional information and in other regulatory compliance databases representing no subsurface concern to the site. This facility was listed as an industrial machinery and equipment facility, with an industrial facility storm water permit. Various administrative violations were reported for not submitting annual reports, not implementing spill prevention control measures, as well as for poor housekeeping, failure to provide secondary containment to storage containers, maintaining proper information regarding chemicals to manage waste accordingly, failure to separate incompatible materials, and failure to determine if wastes generated were hazardous waste by using generator knowledge or applying testing method. The parcel is also listed as a hazardous waste generator and as having above ground petroleum storage tanks, with the, number of tanks not listed. Other pertinent information was not provided.	The various listings for this facility do not represent an environmental concern to the site. For additional information regarding the onsite UST, refer to Sections 4.4 and/or 5.2
The Rosemead Truck Tire (2118 North Rosemead Boulevard) is listed on WIP database with no pertinent information available.	The WIP database listing appears to indicate that the RWQCB sent an inquiry to the site to evaluate potential sources of groundwater contamination to the San Gabriel Valley Superfund Site, discussed above.

Notes:

* The site is also listed on the following databases related to regulatory compliance: the Los Angeles County Hazardous Materials System (HMS), California Integrated Water Quality System (CIWQS), Air Emissions (EMI), National Pollutant Discharge Elimination System (NPDES), California Environmental Reporting System (CERS) Hazardous Waste, Waste Data System (WDS), and Facility Index System/Facility Registration System (FINDS). Listings on these databases, by themselves, are not necessarily indicative of contamination.

The database search report includes listings for past site occupants that may indicate past use or storage of chemicals or petroleum products.

4.1.2 Database Review for Adjoining Properties

Based on a review of the EDR database search report, Ramboll identified the adjoining properties listed in Table 4 on databases indicative of a potential contamination concern.

Table 4: Contamination-Related Database Listings for Adjoining Properties [1]

Listing Name or Address and Location Relative to the Site	Summary of Information Contained in Database	Ramboll's Comments
Pacific Coast Drum 2200 North Rosemead Boulevard (Adjoining to the south)	Pacific Coast Drums is listed in the Statewide Environmental Evaluation and Planning System. Underground Storage Tank (SWEEPS UST UST) database and lists three tanks onsite. The Cleanup Program Sites - Spills, Leaks, Investigations, and Cleanups (CPS-SLIC) database lists the site with a "completed – Case Closed" status as of 11/17/2014 and as part of the cleanup program site. The RGA[1] LUST database lists the site but with no additional information. Additionally, the site is listed in the HAZNET database as generating the following waste in the mid-1990s: adhesives, waste oil and mixed oil, paint sludge, sludge waste, and other organic solids. Pacific Coast Drums/Ditty Container was listed in the California Environmental Reporting System (CERS), CERS Hazardous Waste, and Resource Conservation and Recovery Act – Small Quantity Generator (RCRA-SQG) databases as a hazardous waste generator, no violations were reported. The business is also listed in the LUST database with a status of "Pollution Characterization" regarding solvents, no additional information was reported. The business was listed in the RCRA Non-generator/NLR database as a non-generator, no violations were listed. The Integrated Compliance Information System (ICIS) database list the business as having various administrative enforcement actions in 2003, 2004, and 2008 due to air quality concerns, no additional information was provided. Certified Auto Collision is listed in the Historical (HIST) UST database with no additional information. The HAZNET database lists the site as generating the following waste: waste oil in 2000 and 2001, unspecified solvent in 1999, 2001, 2002, and 2003. Ranz Motor Sports was listed in the Facility Index System/Facility Registration System (FINDS) database as a body and upholstery repair shop and paint shop. The business was listed as being part of the hazardous waste program in 2013. The HWTS and HAZNET databases list the business as generating the following waste: unspecified solvents in 2006, unspecified organic	Although the site is listed in the CPS-SLIC database, the case was closed with a No Further Action Letter dated March 17, 1998 and listed as a case closed in the Geotracker database as of November 17, 2014. The LUST case with a status of "Pollution Characterization" remains open. However, as this property is located to the south and downgradient of the site, this listing is not anticipated to be of environmental concern to the site.

Table 4: Contamination-Related Database Listings for Adjoining Properties [1]

Listing Name or Address and Location Relative to the Site	Summary of Information Contained in Database	Ramboll's Comments
	liquids in 2008, unspecified solvents in 2009, and oxygenated solvents (acetone butanol, ethyl acetate) in 2011. Dreamworks Automotive was listed in the RCRA Nongen/NLR database as a non-generator, no violations were listed.	
Woods Jack Union Service 2305 S. Rosemead Boulevard (Adjoining to the west)	This property is listed in the Historical Auto database as a gasoline station in 1956, no other information was provided.	These listing alone does not represent a contamination concern to the site.
Budco 2310 Rosemead Boulevard (Adjoining to the north	This property is listed in the WIP database. No other information was provided.	The WIP database listing appears to indicate that the RWQCB sent an inquiry to the site to evaluate potential sources of groundwater contamination to the San Gabriel Valley Superfund Site, discussed above.

Notes:

[1] Ramboll's analysis of adjoining properties was based on observations made during the site reconnaissance (as discussed in Table 2) and location information for off-site listings as presented in the database report. Also, for purposes of this analysis, Ramboll considers as "adjoining" properties that are adjacent, even if separated by a road or other physical barrier. Ramboll has not included a discussion of compliance-related databases in this table, as Ramboll considers it unlikely that off-site properties listed on compliance-related databases without indication of a release or chemical mishandling represent a potential risk for contamination to the site.

[2] The RGA databases are EDR proprietary databases that identify prior versions of the database in which a site was listed.

4.1.3 Database Review for Other Surrounding Properties

Ramboll has identified a number of non-adjoining properties that represent a potential contamination concern to the site due to past releases on these properties and possible migration onto the site, as detailed in Table 5.[2]

[2] In its evaluation, Ramboll considered only non-adjoining sites listed on databases indicative of contamination, with open status, located potentially upgradient of the site to represent a potential risk for contamination to the site (as the issuance of regulatory closure suggests that impacts to the subject site from the noted off-site property are unlikely).

Table 5: Summary of Environmental Database Listings for Surrounding Properties that Represent a Potential Contamination Concern

Listing Name or Address and Location Relative to the Site	Summary of Information Contained in Database	Ramboll's Comments
Various Historical and recent Dry Cleaners (2411 & 2461 Chico Avenue)	A number of properties are listed on EDR's Historical and recent Dry Cleaners databases, as locations having conducted dry cleaning operations.	These locations are not listed on other databases indicative of releases.
Monterey Casket Co., Inc. 2461 Chico Ave (807 feet northeast of the site)	THE CPS-SLIC database lists this property with a "Open – Inactive" status as of 10/29/2014 and as part of the cleanup program site. No other pertinent information was provided.	Although the status is listed as "Open – Inactive," based on records available on GeoTracker, it appears that this property was issued a No Further Action letter on June 13, 1995 under the WIP. As such, it does not appear that this property represents a significant contamination concern to the site.
American General Business System 2430 Chico Ave (1,066 feet northeast of the site)	THE CPS-SLIC database lists this property with a "Open – Inactive" status as of 10/29/2014 and as part of the cleanup program site. No other pertinent information was provided.	Due to the distance from this property to the site, and the inactive status of the listing, this property does not appear to present a significant environmental concern to the site.
Manufacturers Service Inc. 2210 Chico Ave (723 feet east the site)	THE CPS-SLIC database lists this property with a "Open – Inactive" status as of 10/29/2014 and as part of the cleanup program site. No other pertinent information was provided. The RCRA-SQG list the property as having various violations for not maintaining records and in 5/14/02 for failure to implement approved groundwater Remedial Action Plan.	Due to the distance from this property to the site, the inactive status of the listing, and the crossgradient location of this property to the site, this property does not appear to present a significant environmental concern to the site

The database report indicates that poor or inadequate address information was available for three properties located in the vicinity of the site; therefore, these properties could not be readily mapped by EDR. Because the location of these properties with respect to the site could not be evaluated, Ramboll is limited in its ability to express an opinion regarding the potential for impact to the site from these properties. It was beyond the scope of this review to accurately locate each of the unmapped properties identified by EDR; however, Ramboll reviewed the list of unmapped properties and verified

that none appeared to be adjacent to the site. The lack of further information does not represent a significant data gap.

4.2 Historical Uses of the Site and Adjacent Properties

4.2.1 Past Uses of the Site

The site appears as agricultural land from 1928 until 1948 when two rectangular buildings are present on the western and northern portions of the site; it appears the buildings correspond to the 2218 North Rosemead Boulevard and 2226 North Rosemead Boulevard parcels, respectively. By 1951, the 2212 North Rosemead Boulevard structure was constructed just south of the 2218 North Rosemead Boulevard building. The building was identified as an office and warehouse building in Building Department records. By 1977, the 2226 North Rosemead Boulevard building was expanded east to its current configuration. From 1979 to the present, the site appears to have remained in its current configuration. The 2218 North Rosemead Boulevard building has been occupied by truck and tire repair businesses since at least 1981. Previous occupants of the 2212 North Rosemead Boulevard building are not known, but this parcel has been associated with adjoining property to the south, DreamWorks Autobody Repair, since at least 1996. Ditty Container has occupied the 2226 North Rosemead Boulevard building since the mid-1990s.

A summary of Ramboll's key observations from the available historical sources is presented in Table 6.

Table 6: Summary of Key Observations from Historical Sources for the Site

Historical Source	Key Observations Regarding Site History
Aerial Photographs (1928, 1938, 1948, 1952, 1964, 1977, 1979, 1983, 1989, 1994, 2002, 2005, 2009, 2012, 2016) Satellite Imagery[1] (1994 to 2019)	The site appears as agricultural land from 1928 until 1948 when two rectangular structures are first observed on the western and northern portions of the site; it appears the buildings correspond to the 2218 North Rosemead Boulevard and 2226 North Rosemead Boulevard parcels, respectively. By 1952, the 2212 North Rosemead Boulevard structure is observed just south of the 2218 North Rosemead Boulevard building. By 1977, the 2226 North Rosemead Boulevard building has expanded to the east, consistent with its current footprint. From 1979 to the present, the site appears to have remained in its current configuration.
Topographic Maps (1894 to 2012)	No development or specific structures are depicted at the site on any of the topographic maps. By 1923, Rio Hondo Avenue to the west and Rush Avenue to the south are visible, and a few scattered structures are observed to the east and southeast. By 1948, the areas to the west north and east of the site appear developed; Rio Hondo Avenue is now Rosemead Boulevard.

Table 6: Summary of Key Observations from Historical Sources for the Site

Historical Source	Key Observations Regarding Site History
City Directory Abstracts (1920, 1921, 1923-1940, 1942, 1944-1952,1954-1958,1960-1972, 1975, 1976, 1980, 1981, 1985, 1986,1990, 1991, 1992, 1994, 1995, 1996, 1999, 2001, 2000, 2003, 2004, 2006, 2009, 2014)	The occupants of the site are listed as follow: 2212 North Rosemead Boulevard: No listings. 2218 North Rosemead Boulevard: Rosemead Truck and Tire Repair and Sales South El Monte (1981), Rosemead Truck and Tire Repair and Sales (1981, 1985, 1986, 1995), Vasily Sam J Rosemead Truck Tire Repairs & Sale, Vasily Stanley Rosemead Truck Tire Repairs & Sale (1981 and 1986), Rosemead Truck & Auto Tire Center (1994 and 1999), Occupant Unknown, BJ Tire Spot (2004) Auto Tire Center (2006), Rosemead Truck, Rosemead Truck and Auto Tire Center (2006), BJs Tire Spot (2014) 2226 North Rosemead Boulevard: Occupant unknown (2004), Ditty Container and Inc. Ditty Container (1999, 2004, 2006, 2009).

Notes:

[1] In addition to aerial photographs provided by the third-party provider, Ramboll viewed historical satellite imagery provided via Google Earth and www.historicaerials.com. Printed copies were not obtained, and imagery dates were not independently verified.

The third-party provider reported that Sanborn fire insurance map coverage is not available for the site.

4.2.2 Past Uses of Adjacent Properties

The adjacent area appears as agricultural land prior to 1923. By 1923, Rio Hondo Avenue to the west and Rush Avenue to the south are visible, and a few scattered structures are observed to the east and southeast of the site. By 1948 the area to the west, north and east appear developed; Rio Hondo Avenue is now Rosemead Boulevard. By 1948, a rectangular structure was first observed on the adjacent property to the south and it appears fully developed by 1979.

4.3 Review of Local and State Agency Information

Ramboll visited or otherwise contacted local governmental agencies and regulatory bodies for information relating to the site. An overview of the findings of this review is presented in Table 7.

Table 7: Local Agency Information for the Site

Agency Contacted/ Document Reviewed	Information Obtained
Los Angeles County Assessor's Office (Assessor's Office)	Based on information available online from the Assessor's Office, the site consists of three parcels with APNs 8102-039-035 (2212 North Rosemead Boulevard), 8102-039-029 (2218 North Rosemead Boulevard), and 8102-039-031 (2226 North Rosemead Boulevard). The 2212 North Rosemead Boulevard parcel is developed with a single building, approximately 6,000 square feet in size. The 2218 North Rosemead Boulevard parcel is developed with a single building approximately 2,289 square feet in size. The 2226 North Rosemead Boulevard parcel is developed with three separate structures of approximately 7,200 square feet, 7,560 square feet, and 2,400 square feet.

Table 7: Local Agency Information for the Site

Agency Contacted/ Document Reviewed	Information Obtained
City of South El Monte Building Department (Building Department)	Ramboll requested records from the Building Department related to the site. No records were available for 2218 North Rosemead Boulevard. Key documents included: • A building permit dated 1951 for construction of office and warehouse at 2212 North Rosemead Boulevard. Site owner is listed as Sam Vasily. • A building permit for grading dated 1957 at 2212 North Rosemead Boulevard. Site owner is listed as Serberling Tire Co. • A 1972 permit for occupancy inspection for a warehouse to be used for storage at 2226 North Rosemead Boulevard. Site owner is listed as Geno Bartolotti. • A building permit for the installation of a spray paint booth inside the building at 2212 North Rosemead Boulevard dated 1996. Site owner is listed as A&D Auto Body Inc. • A 1996 Certificate of Occupancy for a body shop at 2212 North Rosemead Boulevard. Site owner is listed as A&D Body.
Los Angeles County Public Works – Waste Management Division (Public Works)	Ramboll received records from Public Works related to the site. No records were found for the 2212 and 2218 North Rosemead Boulevard parcel. Key documents included: <u>2226 North Rosemead:</u> • An official Registration Form for a Hazardous Substance Storage Statement in 1984 for a 12,000-gallon single walled gasoline UST*. • Application for Closure in 1986 of a 12,000-gallon gasoline UST*. • A Site Integrity Report dated September 29, 1986 (Closure Permit No. 1862-B) for the removal of the 12,000-gallon gasoline UST in September 1986. Described tank removal, tanks inspections, and soil sampling. Two soil samples were collected and analyzed for TPHs. The two soil samples reported non-detect concentrations. • A "no further action" letter from the County of Los Angeles, Department of Public Works, dated October 6, 1986 regarding the 12,000-gallon UST removal (Closure permit 1862-B).* • Various inspection forms, UST permits, UST application forms, closure form, pertaining to the USTs (wastewater treatment sumps) located at the 2200 North Rosemead Boulevard parcel.
Los Angeles County Fire Department – Health Hazardous Materials Division (Fire Department)	Ramboll requested information from the Fire Department; however, the Fire Department indicated that no records were available for the site.

Table 7: Local Agency Information for the Site

Agency Contacted/ Document Reviewed	Information Obtained
Los Angeles County Public Health Investigator (PHI)	Ramboll requested information from PHI; however, the agency referred Ramboll to the Fire Department.
City of South El Monte Industrial Waste Department	Ramboll received records from the City of South El Monte related to the site. These documents which pertained to the 2226 North Rosemead Boulevard parcel included wastewater discharge permits, inspections, testing records, and violations. These, however, are related to the wastewater treatment system and clarifier discharges which is owned by Ditty at 2226 North Rosemead but located at the adjoining property to the south, 2200 North Rosemead property, and as such not discussed here.

*The 12,000-gallon gasoline UST was listed as being located at the 2200 North Rosemead Boulevard address; However, it was formerly located at the 2226 North Rosemead Boulevard facility located to the south of the site. The address 2200 North Rosemead Boulevard was used by PCD historically as the main operating address and is the main address used in correspondence with the regulatory agencies.

4.4 Previous Environmental Assessments and Activities

Ramboll was provided with numerous environmental assessment reports, permits, audit reports, and soil, soil vapor, and groundwater analytical reports in connection with the site and the adjoining properties occupied by PCD. Key documents reviewed are summarized below and are included as Appendix D. Information obtained from other documents reviewed has been incorporated into the applicable sections of this report. It should be noted that, due to the nature of the PCD operations that encompassed several properties, the environmental reports reviewed cover the footprint of the historical operations by PCD are not necessarily limited to the site. However, due to the close proximity of the historical operations on adjacent properties, the reports are considered relevant for the purpose of this environmental analysis.

- **1981 Official Notice, County of Los Angeles Department of Health Services, March 25 –** Official Notice directing PCD to "*Discontinue all deposits of chemical and other hazardous materials on the ground in the empty drum storage area. Eliminate all contaminated material from your premises. Present a clean-up plan and state how future spills will be controlled.*" Report cites "*Extensive spillage of hazardous chemicals on the ground in the empty drum storage a yard.*" Report indicates that raw materials include sodium hydroxide, L.15 Product, epoxy-modified phenolic, and drum enamel. Disposal method indicated is "*run through settling tanks. Over-flow discharged into sewer (San District) under permit. Sludge pumped by Chandler & Ogden Disposal. Wet sludge stored in bins and picked up by El Monte Disposal Co and manifested to BKK landfill*."
- **1981 Results of Soil Sampling of Drum Storage Areas, Associated Laboratories, August 14 -** Associated Laboratories performed a survey of the area where drums were stored at the site prior to being cleaned and recycled. The storage area (which appears to be on the 2200 North Rosemead Boulevard property) was divided into five sections for sampling purposes: (1) a drum storage area that had been used since 1975 to store drums that had been used for food storage, (2) a drum storage area for drums historically used to store chemicals (paint, resin, varnish), (3) a drum storage area used since 1971 where drums formerly contained chemicals such as paints

and perfumes, and food products, (4) an area used by "L. Rubin" (no other information provided), and (5) an area used for drum storage of food products (not accessible during sampling). Composite soil samples collected from the surface to 1.5 feet bgs and were laboratory-analyzed for a suite of chemicals listed by the USEPA Protocols (Federal Register, Vol 45, No. 98, 5/19/80, Pages 33127 et seq.) for evaluating hazardous wastes including metals, organics (including dieldrin, lindane, methoxychlor, toxaphene, 2,4-dichlorophenoxyacetic acid, 2,4,5-trichlorophenoxyacetic acid but excluding volatile organic compounds), and PCBs. Elevated concentrations of the listed constituents were not reported, except for low detections of PCBs (non-detect to 29 mg/kg) in areas of chemical storage but at concentrations below screening levels. At the time, a screening threshold for PCBs in soil had not been established and as a result, the screening threshold of 50 mg/kg for transformer oil was used for comparison purposes. However, a screening threshold for PCBs in soil assuming commercial/industrial land use has now been established with a DTSC-SL[3] of 0.58 mg/kg and as such, the maximum detected concentration of 4.38 mg/kg exceeds the PCB screening level for soil.

- **1981 Letter, Pacific Coast Drum Company, Drum Storage, Conservtech, September 17 –** Report to Los Angeles County DPW providing the results of the Associated Laboratories independent soil sampling activities and procedures implemented to address the concerns of the 1981 Official Notice. Conservtech had the following conclusions: "*a) there appears to be no deposits of chemical or hazardous materials on the ground in the empty drum storage area; b) there was no evidence that contaminated materials mentioned in your official Notice No. 2257 needed to be removed from the premises; c) PCD has instigated an effective program for containment and disposal of any accidental spills*."
- **1988 LDP/TMP Interim Report, Conservtech, December 5 -** Report issued by PCD's consultant to Los Angeles County DPW as a status update on the LDP portion of the program under the tanks program. Conservtech oversaw the completion of three soil borings and the installation of two monitoring wells (MW-1 and MW-2; both located on the adjacent parcel to the south at 2200 North Rosemead Boulevard). Conservtech concluded that the analysis of soils " *do not indicate that the underground tanks at this property have created problems in the subsurface*" and that "*concentrations of TPH, toluene, total xylenes and ethylbenzene….have been found to be substantially below the guidelines [of the Leaking Underground Fuel Tank Manual].*" Conservtech also stated that the compounds found occur near the surface and that there is a 15-foot separation between those compounds detected in the soil and the water table. Conservtech then states that concentrations of several of the compounds found in the groundwater samples were not found in soils immediately above the water table and that those compounds have reached the water table from a source other than the underground tanks at this site. The report also copies the RWQCB indicating that it was done "*in accordance with earlier discussions with the RWQCB and the Waste Management Division.*"
- **1989 LACDPW Site Investigation Report, August 7 –** referral of the site to the RWQCB with the box checked "*There is significant contamination at this site…we are referring the matter to the State Water Quality Control Board*".
- **1990 RWQCB Correspondence, March 29 –** Letter to PCD citing that TPH was "*pervasive to forty feet…in soil borings performed in October 1988.*" Groundwater beneath the (2200 North Rosemead Boulevard) site was reported to be impacted by methylene chloride, trans-1,2-

[3] Human Helath Risk Assessment (HHRA) Note Number 3, DTSC Modified Screening Levels (DTSC-SLs), Updated April 2019.

dichloroethylene, TCE, toluene, PCE, 1,4-dichlorobenzene, 1,2-dichlorobenzene, benzene, cis-1,3-dichloropropene, chlorobenzene, ethylbenzene, and a variety of trihalomethanes. LARWQCB states "*many of these compounds are not common groundwater contaminants and may be emanating from the confirmed soil contamination at your facility.*" The report references a March 22, 1990 inspection by LARWQCB staff where the following areas of concern were noted: 1)integrity of the waste clarifier or collection sump, 2) a drainage trench at the north edge of the open drum reconditioning area which drains runoff from the operation to the street, possibly "*acting as a conduit to soils, groundwater and surface waters*," 3) an outlet pipe from the southwest bermed area surrounding the compressor drains overflow from the compressor and sump to open soils under the conveyor, possibly impacting soils and groundwater, and 4) "empty" drums awaiting reconditioning are stored on asphalt paving or on open ground. A work plan was required to be prepared to determine if these areas of concern have impacted groundwater.

- **1990 Subsurface Investigation/Ground Water Monitoring Program, Conservtech, May 22 -** In response to a March 29,1990 letter from the LARWQCB requesting additional site investigation, Conservtech sampled existing monitoring wells MW-1 and MW-2 (located on the adjacent property to the south at 2200 North Rosemead Boulevard). The LARWQCB's request followed a site visit it conducted on March 22, 1990 to identify possible sources of contamination to regional groundwater. MW-1 and MW-2 were first installed in 1988, as noted above. Results were as follows: nondetectable concentrations of BTEX, 8 to 20 µg/l TCE in MW-2, and a maximum concentration of 100 µg/l PCE in MW-2.
- **1990 Groundwater Results Report, Conservtech, July 16 -** Monitoring wells MW-1 and MW-2 were sampled and the results indicated 2,900 to 3,500 µg/l hydrocarbons in MW-2, nondetectable concentrations to 10 µg/l PCE in MW-2, 2 to 10 µg/l TCE concentrations in MW-2, nondetectable to 2 µg/l benzene concentrations in MW-2, and nondetectable to 3 µg/l toluene concentrations in MW-2. Wells MW-1 and MW-3 are located on the adjacent property to the south at 2200 North Rosemead Boulevard.
- **1990 RWQCB Correspondence, July 13 –** Review of work plan for installation of upgradient monitoring well (MW-3) on the adjacent property to the north and requiring soil vapor survey before commencing with the soil boring program proposed in the referenced July 6, 1990 work plan.
- **1990 Well Investigation Program Letter, Conservtech, October 1 -** On August 21, 1990, Conservtech conducted a site investigation, during which upgradient monitoring well MW-3 (installed on the property formerly operated by PDC and now property to the north of the site) was installed to a depth of approximately 55 feet bgs (it is noted that the parcel on which this well was installed is not part of the current site). Depth to groundwater was measured at 34.5 feet bgs. Soil samples were collected at 2.5, 5, 10, and 30 feet and analyzed for TPH (hydrocarbon range not provided). Soil samples reported nondetectable concentrations of TPH and BTEX, non-detect to 900 µg/kg methyl chloride, and non-detect to 780 µg/kg 1,2-dichloroethane (DCA). Groundwater concentrations reported maximum TCE concentrations of 37 µg/l, 91 µg/l PCE, 180 cis-1,2 dichloroethene (DCE), and 9.1 µg/l vinyl chloride in MW-2. A fourth monitoring well was recommended to further characterize impacted groundwater.
- **1991 Soil Gas Survey, November 29 -** Inland Empire Environmental Services (IEES)oversaw the installation and sampling of 85 soil vapor probes at the site (and properties to the north and south of the site that are no longer part of the site) in September 1991, in response to the July 13, 1990 RWQCB directive. The results indicated the following: methane concentrations ranged from non-detect to 43 µg/l and vinyl chloride concentrations ranged from non-detect to 30 µg/l.

Methane and vinyl chloride were the most prevalently detected compounds. Other detection compounds included: TCE (2 µg/l), methylene chloride (2 to 13 µg/l), benzene (non-detect to 17 µg/l), and bromodichloromethane (1.5 to 4 µg/l). It was noted that the presence of chlorinated hydrocarbons in groundwater is common within the San Gabriel Valley and that the most common chlorinated solvent detected in soil and groundwater in the San Gabriel Valley is TCE. Based on the results of the soil vapor sampling, areas of elevated chlorinated VOCs were identified at the site in the vicinity of soil vapor point 85 (vicinity of MW-3, property to the north of the site), vicinity of vapor point 44 (the site), MW-2 (southern portion of the adjacent property to the south of the site), and vapor point 58 (southeastern portion of the adjacent property to the south of the site). Based on the results, Conservtech recommended targeted shallow soil sampling in the suspect areas, and analyzing soil samples for chlorinated hydrocarbons.

- **1992 Letter RE Potential Sources of 1,2-DCE from Properties in the Vicinity of 2200 N. Rosemead Ave., Conservtech, February 28 -** Conservtech investigated potential sources of 1,2 DCE as it was determined to be of particular concern because it was found at elevated concentrations in various groundwater samples, but was not found in soils immediately above the water table in the vicinity of the in-ground storage tanks. Conservtech indicated that 1,2-DCE and other compounds have been detected in groundwater throughout this area of South El Monte. The report a) illustrated the presence of leaking UST sites within a ¼ mile and ½ mile radius of the site, b) shows the site location in relation to the nearest upgradient facility with groundwater wells, c) presents the groundwater flow gradient as being to the southeast based on groundwater elevations measured from September to November 1987, d) presents groundwater flow direction in the vicinity of the upgradient property known as Champ Corporation to be to the southwest, e) indicates that soil samples collected on June 6, 1990 at the 2828 North Rosemead Boulevard property to the southwest of the site, approximately 75 feet from MW-2, were found to have concentrations of trans-1,2-DCE of 190 µg/kg, and f) provides inspection information from the LARWQCB regarding the adjacent 2828 North Rosemead Boulevard property indicating that the property had a long history of solvent usage and had areas of deteriorated flooring and conduits for contaminants to reach the subsurface.
- **1992 LARWQCB Correspondence, March 6 –** Letter from the LARWQCB concurring with the recommendations from Conservtech to submit a work plan for additional soils work. LARWQCB indicated that 1) all areas that displayed elevated VOC levels should be included in the sampling plan, 2) site wide soil sampling for metals and other non- or semi-volatile contaminants was still required, 3) the work plan needs to address RWQCB requirements for conducting initial subsurface engineering/geological investigation and 4) RWQCB disagreed with Conservtech's conclusion that vinyl chloride detected in soil vapor was off-gassing from groundwater and suggested that it was likely associated with soil contamination at the site.
- **1992 Work Plan, Subsurface Investigations, Conservtech, May -** Presents work plan for requested soil investigation.
- **1992 Letter to LARWQCB from Bartolotti Family Trust -** Letter to LARWQCB from owner of site explaining the intent to redevelop the site in light of new metal building ordinance from the City of South El Monte. The letter seeks LARWQCB guidance in moving forward and requests LARWQCB "*to review our file and evaluate our situation relative to our need to comply with the metal building ordinance.*"

- **1994 LARWQCB Correspondence, April 13 –** Letter regarding Chemrite property located at 2128 North Rosemead Boulevard (southwest of the site) requiring that Chemrite prepare a work plan for further delineation of soil and soil vapor impacts of PCE and methylene chloride, which were detected at maximum concentrations of 120 µg/kg and 170 µg/kg, respectively.
- **1994 LARWQCB Correspondence, May 11 –** Letter stating that the LARWQCB could not find the results of the required investigations in its files and requested submittal of the results.
- **1994 Letter to RWQCB, Conservtech, June 8** – Letter providing rationale for why the Chemrite work plan was not implemented. Letter clarifies that the property owner, Mr. Bartolotti, had sought guidance from the LARWQCB regarding the timing and scope of remediation in relation to the planned redevelopment of the site.
- **1994 LARWQCB Correspondence, June 23 –** Letter memorializing June 14, 1994 telephone conversation with Conservtech providing verbal authorization to implement the work plan for the additional soil borings.
- **1994 Internal Memorandum of Monitoring Well Water Quality Comparisons, Conservtech to Gary Mearns, August 31 –** Provides a summary of groundwater contaminants measured in the three wells MW-1 and MW-2 (located on the adjacent property to the south of the site) and MW-3 (located on the adjacent property to the north of the site) over the reporting period spanning from October 1993 through July 1994. Concentrations of various constituents are present in groundwater at concentrations above the maximum contaminant levels (MCLs). While some reduction in several constituents were noted, Conservtech indicated that "*overall....it does not appear that there has been any substantial change in concentrations of regulated compounds in the three MWs over the period of reporting*."
- **1995 LARWQCB Correspondence, Additional Soil Gas Survey and Groundwater Sampling, Conservtech, February 23 -** Letter presents LARWQCB's review of the January 2015 report. Letter states that sixteen 25-foot soil borings were drilled at the site. 1,1-DCA (5 µg/kg), PCE (150 µg/kg), and TCE (20 µg/kg) were detected near the USTs to a depth of 3 feet bgs. LARWQCB concluded that the USTs and clarifier at the site have caused VOC contamination in the soil, and that the vertical and lateral extent of the contamination has not yet been fully defined. LARWQCB required that a multi-depth survey be conducted. In addition, LARWQCB disagreed with Conservtech's conclusion that that the observed groundwater contamination underlying the site resulted from the regional groundwater contamination, citing that VOCs in groundwater in the two downgradient wells (MW-1 and MW-2) are two orders of magnitude higher than that of the upgradient well MW-3. LARWQCB required continued quarterly groundwater monitoring.
- **1995 LARWQCB Correspondence, Additional Soil Gas Survey, July 12 –** Letter responding to transmittal of an April 5, 1995 soil gas survey by Environmental Support Technologies (EST). Based on information reviewed, LARWQCB identified the following areas as not having been adequately addressed: 1) former 12,000 gallon gasoline UST – former probes installed only at 5 feet bgs (2200 North Rosemead Boulevard), 2) northeast corner of the site (now property to the north of the site near MW-3) where 1,2 DCA was detected in soil at depths up to 30 feet bgs and at a maximum concentration of 780 µg/kg, 3) the open dirt area south of MW-1 and MW-2 and east of Chemrite. LARWQCB indicated that the area was used for drum storage and reference was made that the area may have been used for chlorinated solvents prior to being received by PCD, and 4) the paint booth in the open top processing department.

- **1995 Letter to LARWQCB, Loeb and Loeb, August 8 –** Letter indicating that Pacific Coast Drum is a likely source of PCE and that prior investigations of the site has confirmed release of PCE to soil. Letter indicates that Chemrite was not named as a PRP in the South El Monte OU. Loeb and Loeb requested an extension to implement the additional work required by the LARWQCB.
- **1995 LARWQCB Correspondence, August 18 –** Letter granting extension request but warned that "*that the status of the Chemrite site should not be used as an excuse by your company to delay the required investigation of identified potential sources of contamination at your site.*"
- **1995 LARWQCB Correspondence, October 26 –** Response to letter from PCD's attorney requesting reconsideration/reductions of certain sampling requirements, based on additional information submitted for consideration. In particular, PCD petitioned to not sample three of the four areas targeted for additional sampling by the LARWQCB in the July 12 letter: a) the former UST, b) the paint booth and c) the former food drum storage area. LARWQCB concurred with some of the requested changes to the sampling program but required sampling of the paint booth area and the vicinity of MW-3.
- **1996 LARWQCB Correspondence, July 22 – LARWQCB review of soil gas surveys dated September 6, 1995 and February 14, 1996 -** LARWQCB concluded that based on the soil vapor surveys performed, 1) the active paint booth/painting operation did pose a threat to the environment, 2) the soil gas survey in the vicinity of MW-3 (now property to the north of the site) confirmed VOC contamination is present to a depth of at least 15 feet bgs and 3) lateral and vertical delineation is required by completion of an additional soil gas survey.
- **1996 LARWQCB Correspondence, December 9 – LARWQCB review of November 1, 1996 soil gas survey -** Based on the results, LARQCB provided 3 options with regard to the soil vapor plume identified in the vicinity of MW-3 (now upgradient of the site), including 1) submitting a remedial action plan, 2) submitting a work plan to monitoring the soil vapor concentration for a period of 1 year, and 3) performing a risk assessment and/or fate and transport modeling to demonstrate that the existing VOC concentrations in the soil will not impact the underlying groundwater.
- **1995-1998 Soil Vapor Sampling Events.** Various soil vapor sampling events took place from 1995 to 1998 throughout the entire site and on the adjacent property to the south (2200 North Rosemead Boulevard) and adjacent property to the north (2310 North Rosemead Boulevard). During the most recent round of sampling conducted in January 1998 for which data were provided, PCE and TCE were detected at maximum concentrations of 38 µg/l and 4.6 µg/l, respectively, in the soil vapor samples collected on the offsite property located at 2310 North Rosemead Boulevard. On February 21, 2018, citing stable and decreasing concentration trends, the consultant recommended that the RWQCB case be closed with no further action.
- **1997 Environmental Audit Report, Ditty Container, Michael Wolff, Inc., December 4 –** Report states that the site is owned by Pacific Coast Drum, Inc. and the Batolotti Family Trust and is leased to Ditty Container. The scope of the environmental audit was focused on the those issues which could affect the physical property; e.g., practices which could lead to contamination of the site improvements, or the underlying soil or groundwater. The audit also intended to serve as a baseline on the apparent site condition as of the date of the audit and to identify existing conditions such that Ditty and the owner could agree on responsibility for conditions existing at the time of the audit. The audit describes the process for processing incoming drums. Observations:

- Drums a tight-head drums, open drums are not accepted.
- Some evidence of minor spillage and staining was observed.
- Drums are exposed to weather.
- Asphalt driveway at the rear of 2226 North Rosemead was badly broken, exposing the underlying soil.
- Refurbishing operations are conducted above ground level.
- Residues from flushing are collected in above-ground bins, which when full are moved to the waste storage area.
- No solvents are reportedly used in the cleaning process (limited to caustic soda).
- Extensive etching was observed – reportedly from operations pre-dating Ditty's operations (PCD previously used acid washing for many years).
- Paint removal from drums is by "blasting" – shot dust observed in several areas. Recommendation was made to test shallow soil in areas where shot dust accumulates.
- Drums are painted; thinning of paint is reportedly not conducted. However, the audit reported the presence of thinners and other solvents in use at the site.
- Wastewater treatment area comprises two sub-grade tanks. Tank No. 1 collects wastewater from drains in the process area and is pumped to the wastewater treatment system. The smaller tank (Tank No. 2) is for the sole purpose of collecting boiler blowdown water. The audit notes that these tanks have secondary containment, but that these systems do not meet new regulations for USTs and should be considered for replacement with flow-through devises rather than USTs.
- No chlorinated solvents are used in any maintenance operations.
- Oil drum was observed on top of a drainage trench that dumps out onto the ground in front of the property.
- Waste storage area is a fenced area and is bermed to contain spills but has been notched apparently to allow rain water to escape. The area is uncovered at the time of the audit.
- Tank No. 3 was identified as not being in-use by Ditty and does not meet regulations; therefore, was recommended for closure.

- **1998 LARWQCB Correspondence - No Further Requirements, March 17 -** LARWQCB issued the No Further Requirements letter in connection with the former PCD Co. property, which included property addresses to the north and south of the site for those properties occupied by PCD's operations. The letter presents the chronology of the investigations conducted at the site. The letter states that "*the above site assessment data demonstrated that releases of liquid wastes from the subject site impacted the soil and groundwater beneath the site. A soil cleanup was not required. Instead, four nested soil vapor probes were sampled four times between April 1997 and January 1998 to monitor the trend of VOC vapor concentrations in the vadose zone over a year [refers to the property to the north of the site, previously occupied by PCD]. Such monitoring data suggested that residual VOC concentrations in the vadose zone stabilized or declined over the monitoring period. Therefore, we do not believe that further vapor monitoring is warranted. To date, the subject site has completed Regional Board staff requirements and we will not require any further remedial and investigative work with regard to the soil contamination. Because past*

operations have impacted groundwater beneath this facility, you remain a responsible party for the regional groundwater cleanup which is being led by USEPA. This Regional Board encourages you to continue to participate and cooperate in the ongoing regional groundwater cleanup. Sampling of the three existing monitoring wells required by this Regional Board can be discontinued. However, all monitoring wells must be property maintained and made available for possible future sampling that may be required by USEPA."

- **1999 Environmental Audit for Ditty Container, 2226 North Rosemead Boulevard, April 23 -** SCS performed an environmental audit of the site in April 1999. The purpose of the audit was to assess the potential for environmental impacts from Ditty's operations. Observations included the following:
    - Minor staining was observed surrounding several areas of stockpiled empty drums.
    - The concrete lining of the drum cleaning line appeared to be heavily etched and degraded in several areas.
    - Dust, potentially containing metals, was observed adjacent to the shot blast line. SCS concluded that it is possible that residues containing metals could infiltrate cracks and degraded pavement in the area.
    - Along the painting line, the paint supply area was observed to be highly stained with paint. Although lined and bermed, SCS concluded that paints, thinners, and/or solvents in this area could infiltrate through cracks in the pavement into subsurface soils.
- **1999 Soil Assessment Report -** Environmental Support Technologies conducted a soil assessment onsite to assess potential impact of previous site usage in the vicinity of the 3,300-gallon sump/UST (2200 North Rosemead Boulevard) and to assess depth to groundwater. The sump/UST (Tank No. 3), which was part of the cooling water system historically used by PCD, was cleaned out in 1993 and covered with a metal plate [the Los Angeles County DPW treated the sump as a UST for closure purposes]. In order to assess any potential subsurface impacts, two borings were advanced in proximity to the UST in March 1999 to 21 feet bgs. Samples were collected at 5, 10, and 20 feet bgs; select soil samples were analyzed for TPH and VOCs. Total recoverable petroleum hydrocarbons (TRPH; not the same analysis as TPH) reportedly was detected in one sample at 273 milligrams per kilogram (mg/kg) at 20 feet bgs. One sample indicated a toluene concentration of 6,300 µg/kg at 5 feet, and xylene concentrations in two samples at 43,000 µg/kg at 5 feet and 8,100 µg/kg at 20 feet.
- **2002 LARWQCB Correspondence regarding directive on emergent chemical sampling, July 19 -** LARWQCB responded to PCD's letter claiming that it should not be required to conduct sampling for emergent chemicals on account of financial hardship and the fact that none of the emergent chemicals were ever detected on the site. LARWQCB reiterated its requirement to perform the testing of groundwater for emergent chemicals.
- **2002 Technical Report, Emergent Chemical Sampling, SCS Engineers, August 29** - In August 2002, SCE Engineers sampled MW-1, MW-2, and MW-3 for emerging compounds perchlorate, NDMA, 1,4-dioxane, and total and hexavalent chromium. Results are as follow: nondetectable concentrations for perchlorate and hexavalent chromium, non-detect to 0.0024 µg/l NDMA in MW-2 (MCL of 0.2 µg/L), 4 to 22 µg/l 1,4-dioxane in MW-1 (MCL of 3 µg/l), and non-detect to 1.8 µg/l total chromium in MW-2 (MCL of 50 µg/l). The detected concentration of 1,4-dioxane exceeds current regulatory thresholds.

- **2004 Site Assessment Report, EST, March 8 -** EST conducted additional sampling (pursuant to the 1999 sampling program described above) to fulfill requirements by the Los Angeles County DPW to close "in place" the 3,300-gallon sump/UST (Tank No 3), located in the southeastern portion of the adjacent property to the south of the site in the vicinity of MW-1. One boring (DCSB-3) was advanced to 40 feet bgs. Soil samples were collected at 5-foot intervals and analyzed for VOCs, BTEX, and TPH. Reported concentrations of TPHg ranged from non-detect to 0.079 mg/kg at 35 feet bgs. TPHd was non-detect and toluene concentrations ranged from non-detect to 5.5 µg/kg at 20 feet. Because the historical use of the UST was as a cooling water sump and analytical results "indicated only minor impact to soil and groundwater,"[4] no additional sampling was recommended by the consultant, and closure was requested. Closure in place was completed on September 4, 2004 when the tank was filled with slurry. New concrete was poured over the concrete sump. Closure of the sump/UST was granted by the Los Angeles County DPW on September 8, 2004.
- **1986 Site Integrity Report**. The report dated September 29, 1986 (pertaining to Closure Permit No. 1862-B) for the removal of the 12,000-gallon gasoline UST in September 1986, described tank removal, tanks inspections, and soil sampling. Two soil samples were collected and analyzed for TPH. The two soil samples reported non-detect concentrations of TPH.
- **2012 Partial Consent Agreement -** A consent agreement between USEPA/DTSC and various parties in the area (including PCD) was signed in 2012 pertaining to the San Gabriel Valley Superfund site, South El Monte Operable Unit. The consent agreement stated contaminant concentrations exceed MCLs throughout a large portion of the South El Monte Operable Unit, including groundwater regions used for sources of drinking water. The USEPA determined that actual or threatened releases of hazardous substances at the various party properties, if not addressed, may present an imminent and substantial endangerment to the public and the environment. The DTSC filed a complaint seeking reimbursement of response costs incurred for response action taken in connection with releases of hazardous substances in the South El Monte Operable Unit; the defendants (including PCD) entered into this agreement to protect public health but did not admit liability arising out of any previous or current releases. The Consent Agreement indicates that USEPA will be implementing a remedial action which will not entail an actual mass removal, but instead focuses on the following objectives:
    - Prevent exposure of contaminated groundwater to the public;
    - Contain further migration of contaminated groundwater from more highly contaminated portions of the aquifer;
    - Reduce impact of continued contaminant migration on downgradient water supply wells; and
    - Protect future uses of less contaminated and uncontaminated groundwater
- **2018 Environmental Compliance Recommendations for Ditty Container, Inc., SCS Engineers, March 9 -** On January 27, 2017 SCS conducted an environmental compliance audit of the Ditty facility. The observations and compliance recommendations made include the following:

[4] It is noted that it does not appear that groundwater samples were collected; no groundwater sampling results were provided in the information reviewed.

- Steel and plastic drums and storage totes are reconditioned at the facility, with 95% consisting of drums that formerly contained petroleum product, with the remainder reportedly comprising drums containing food-grade chemical materials.
- Production areas are surrounding by spill containment berm/cur or designed with concrete flooring that slopes towards collection sumps. Concrete floor was observed to have cracks, joints, and degraded concrete that could present potential pathways for liquids to infiltrate to the subsurface. SCS recommended routine inspections and consider application of a sealer or other materials to the surface or concrete.
- Numerous drums were observed in areas of the site outside of secondary containment areas, including areas where rainwater accumulates. A sump on the northern side of the bermed paint area was filled with rainwater. SCS recommended implementation of stricter management procedures for drums to be stored within bermed areas and for rainwater that contacts paint to be pumped to the wastewater treatment facility.
- Ditty had removed a secondary containment wall as part of its improvements to the wastewater treatment facility. SCS recommend that the secondary containment be put back into place following completion of the improvements.
- Poor housekeeping was observed in the area of the hazardous and non-hazardous waste storage area, and stormwater and spills from this area flow overland to trenches and sumps and ultimately to the wastewater treatment facility.
- Universal waste management was identified to an issue requiring implementation of a formal management program.
- The facility generates a monthly volume of 1,660,000 gallons of industrial wastewater. Based on the self-monitoring reports reviewed for 2016, the facility appeared to be in compliance for measured discharges that have a permit limit.
- During 2016, Ditty exceeded stormwater discharge exceedances for total suspended solids (TSS) at both of its discharge points. The facility reportedly prepare a stormwater pollution prevention plan (SWPPP) Addendum and a Level 1 Exceedance Response Action (ERA) report. The facility employed additional employee training and improved best management practices (BMPs) to address the sources of the TSS. The current status of SWPPP compliance is unknown.
- Los Angeles County Fire Department had requested, based on reported higher pH testing results, that the facility implement changes to the wastewater treatment plant and comply with DTSC Permit by Rule (PBR) as an operator of a fixed treatment unit (FTU). According to SCS, Ditty was out of compliance by not previously operating under a PBR tiered permit. At the time of the audit, Ditty was preparing the PBR tiered permit application. As part of the PBR application, Ditty would have to provide financial assurance, tank integrity testing and an assessment and possible remediation of any existing contamination that poses risk to public health or the environment, prior to being issued a permit. The status of the PBR tiered permit is unknown

4.5 User-Provided Information

Ramboll provided the Client with a User Questionnaire (consistent with Appendix X3 of the ASTM Standard) that requested information relating to environmental liens, AULs, specialized knowledge of the site, property value diminution, chain-of-title, or any other commonly known or obvious indications of site contamination, that was not otherwise provided to Ramboll. Based on the

responses to the User Questionnaire, Northgate Gonzalez RE, LLC does not have specialized knowledge of the site environmental conditions other than being aware that the site has had a history of environmental issues and is part of the South El Monte OU. Northgate is not aware of any AULs or liens filed against the site. Northgate is in the process of evaluating the cost of the environmental liabilities in relation to the purchase price.

4.6 Interviews

Interview with Mr. Gary Mearns – Facility Operations Manager

Ramboll conducted an interview with facility personal during the site reconnaissance on June 26 and 29, 2020. Mr. Gary Mearns, facility manager who has been working in his position since 1993 and has been the addressee for much of the regulatory correspondence between PCD and the LARWQCB. Mr. Mearns escorted Ms. Hernandez throughout the site and pointed out drum storage areas, monitoring wells, the wastewater treatment system, and paint booth areas. Mr. Mearns was not aware of previous spills at or violations for the site.

Interview with Ms. Malissa McKeith, Environmental Advisor to PCD/Bartolotti Trust

Ramboll interviewed Ms. Malissa McKeith who has been involved with the environmental aspects of the site since the early to mid-1990s. Ms. McKeith was familiar with the USEPA South El Monte Operable Unit issues and the site's involvement. Ms. McKeith indicated that her recollection of the details were vague in light of the nearly 30 years that have lapsed since the matter was being addressed by the LARWQCB and the USEPA. She indicated that extensive soil vapor investigations were conducted during the 1990s in connection with the site and that, to the best of her recollection, some contamination was found but that it did not rise to a level of significant concern that required immediate response actions. Ms. McKeith indicated that she has not been involved with the site since Ditty began operating at the site in 1996 and is not able to comment with regard to the nature of Ditty's operations or tenure at the site.

5. SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Ramboll conducted visits to the site on June 26 and 29, 2020. During the site visits, observations of the exterior and interior portions of the site, when accessible, were made to evaluate if any RECs, as defined in Section 2, are present. Ramboll did not observe the roof of the buildings.

5.2 General Site Setting and Observations

Ramboll made observations concerning all of the interior and exterior issues specified in Sections 9.4.2 through 9.4.4 of the ASTM E1527-13 Standard. The presence or absence of each issue of environmental interest or concern is noted in Table 8. Additional information regarding observed and historical items is provided in the sections following the table.

Table 8: Summary of Site Reconnaissance Observations

ASTM Section	Issue	Observation
Interior and Exterior Issues		
9.4.2.1	Current use(s) of the site	See Section 3.2
9.4.2.2	Past use(s) of the site	See Section 4.2
9.4.2.3	Hazardous substances and petroleum products used, treated, stored, disposed of, or generated on the property in connection with identified present or past uses	**Present** (see Section 5.2.1)
9.4.2.4	Storage tanks: Underground storage tanks (fill ports, vent pipes, manholes) Aboveground storage tanks	(see Section 5.2.2) **Formerly Present** Absent
9.4.2.5	Odors (strong, pungent or noxious)	Absent
9.4.2.6	Pools of liquid, standing surface water or sumps	Absent
9.4.2.7	Drums of hazardous substances or petroleum products (five-gallon, 55-gallon or totes)	**Present** (see Section 5.2.1)
9.4.2.8	Hazardous substance and petroleum product containers (not necessarily in connection with identified uses)	Absent
9.4.2.9	Unidentified substance containers suspected of containing hazardous substances or petroleum products	Absent

Table 8: Summary of Site Reconnaissance Observations

ASTM Section	Issue	Observation
9.4.2.10	Polychlorinated biphenyls (PCBs) Electrical equipment on-site (e.g., transformers, capacitors) Electrical equipment known or likely to contain PCBs Hydraulic equipment on-site (e.g., elevators, truck dock lifts) Hydraulic equipment known or likely to contain PCBs	(see Section 5.2.3) **Present** Possible **Present** Unlikely
Interior Issues		
9.4.3.1	Heating/cooling systems	**Present** (see Table 1)
9.4.3.2	Stains or corrosion on interior floors, walls or ceilings (except for staining from water)	Not identified
9.4.3.3	Floor drains and interior sumps	Not identified
Exterior Issues		
9.4.4.1	Pits, ponds or lagoons on site or adjacent properties	Absent
9.4.4.2	Stained soil or pavement	**Present** (see Section 5.2.4)
9.4.4.3	Stressed vegetation (from other than insufficient water)	Absent
9.4.4.4	On-site solid waste disposal; areas apparently filled or graded by non-natural causes; or mounds or depressions suggesting solid waste disposal	Absent
9.4.4.5	Wastewater or other liquid (including storm water) or any discharge into a drain, ditch, underground injection system or stream on or adjacent to the site	**Present** (see Section 3.2.3)
9.4.4.6	Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	Absent
9.4.4.7	Septic systems or cesspools	Absent

Notes:

Observations noted in this table and discussed further below are based on information obtained during the site visit and from a review of the sources summarized in Section 4.

See the ASTM Standard for a detailed description of the issues included in each referenced ASTM section.

Per the ASTM Standard, fluorescent light ballasts likely to contain PCBs are not considered.

N/A – Not applicable.

5.2.1 Hazardous Substances and Petroleum Products

Chemical storage at the 2212 Parcel was limited to automobile paints, typically in containers one-gallon or less in size, and five-gallon containers of solvents. Small quantities of hardeners and other paint additives were also observed. Chemical storage at the 2218 parcel included one unlabeled 55-gallon drum that appeared to contain used oil, two one-gallon containers of motor oil, one five-gallon container of lacquer thinner, and approximately five containers less than two-gallons in size with unknown contents. Ditty Container was observed to have two 55-gallon drums of oils/lubricants, four five-gallon containers of oils/lubricants, welding gases, and four 55-gallon blue poly drums with unknown contents.

5.2.2 Underground Storage Tanks

In 1986, one 12,000-gallon gasoline UST was removed from the northwestern portion of the Ditty parcel. Two soil samples were collected and analyzed for TPH. The two soil samples reported non-detect concentrations of TPH. A No Further Action letter was issued by the County of Los Angeles, Department of Public Works, dated October 6, 1986 regarding the 12,000-gallon UST removal (Closure Permit 1862-B).

5.2.3 Polychlorinated Biphenyls (PCBs)

Facility personnel were not aware of on-site equipment that is known to contain polychlorinated biphenyls (PCBs). Three pole-mounted transformers are present on the 2226 North Rosemead Boulevard parcel and are owned by the local electrical utility. No labels with respect to the PCB content of the units were visible. Ramboll saw no visual indication of significant leaks or releases from electrical equipment observed during the site visit. Because the installation date of the units is unknown and may predate the 1979 federal ban on the manufacture of PCBs, it is possible that the transformer oils contain PCBs.

Additionally, four above ground hydraulic lifts were observed inside the 2212 North Rosemead Boulevard building. Ramboll saw no visual indication of significant leaks or releases from the equipment.

Because the buildings were constructed prior to the 1979 federal ban on the manufacture of PCBs, it is possible that hydraulic oils or other types of electrical equipment, such as capacitors or light ballasts if present, contain PCBs. Ramboll observed no indication of leaks or releases from electrical equipment during the site visit.

5.2.4 Stained Soil or Pavement

Ramboll observed some staining on the pavement west of both the 2212 and 2218 North Rosemead Boulevard parcels. Pavement onsite was in fair condition with some visual evidence of cracking.

6. FINDINGS, OPINION, AND CONCLUSIONS

Ramboll performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the site located at 2212, 2218, and 2226 North Rosemead Boulevard, South El Monte, California in July 2020. The objective of the ESA was to identify RECs, as defined in the ASTM Standard. A list of key definitions presented in the ASTM Standard is provided in Section 7 at the end of this report. Any exceptions to, or deletions from, this practice are described in Section 6.2.

6.1 Findings, Opinions, and Conclusions

6.1.1 Recognized Environmental Conditions

Ramboll has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the site located at 2212, 2218, and 2226 North Rosemead Boulevard, South El Monte, California. Any exceptions to, or deletions from, this practice are described in Section 6.2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the site, except for the following.

- **Location of Facility within San Gabriel Valley Superfund Site.** The site is located within an area of contaminated groundwater underlying the San Gabriel Valley designated by the USEPA as the San Gabriel Valley Superfund site (Area 1, including the South El Monte Operable Unit), in which groundwater is contaminated with VOCs, in particular, TCE, PCE, and carbon tetrachloride; perchlorate; 1,4-dioxane; and NDMA. The San Gabriel Valley Superfund site is listed on numerous databases in the EDR database report. According to the EDR database report, the site (former occupant PCD with the primary address of 2200 N. Rosemead Boulevard) and numerous surrounding properties and other properties in the vicinity listed on the SLIC and WIP databases are located within San Gabriel Valley Area 1 and are listed as PRPs for contributing to the groundwater contaminant plume, comprising an area of approximately 11 square miles.

  Numerous subsurface investigations consisting of soil, soil vapor, and groundwater sampling were conducted in connection with the WIP at the site and adjoining properties historically occupied by PCD. The investigations revealed contamination that was determined by the LARWQCB to be sourced on-site. However, site-specific cleanup actions were not required by the LARWQCB, administrator of the WIP program. As a result of PCD demonstrating stable or declining concentrations of VOCs in soil vapor, the LARWQCB did not require additional investigation or remediation work at the site. The case was closed with a no NFA designation on March 17, 1998 and is listed as "case closed" in the Geotracker database as of November 17, 2014. However, the closure letter made it clear that PCD was considered a PRP with regard to the South El Monte Operable Unit and was urged to continue to cooperate with USEPA's requirements.

  A consent agreement between USEPA/DTSC and various parties in the area (including PCD) was signed in 2012 pertaining to the South El Monte Operable Unit of the San Gabriel Valley Area 1 Superfund site. The consent agreement stated that contaminant concentrations exceed MCLs throughout a large portion of the South El Monte Operable Unit, including areas used for sources of drinking water, and filed a complaint seeking reimbursement of response costs incurred for response action taken in connection with releases of hazardous substances in the South El Monte Operable Unit; the defendants (including PCD) entered into this agreement to protect public health but did not admit liability arising out of any previous or current releases.

  Cleanup actions performed in relation to the San Gabriel Valley Area 1 Superfund site, including the South El Monte Operable Unit, are ongoing. Remediation of impacted groundwater within the

area-wide plume commenced in 2008 with the installation and operation of four separate groundwater pump and treat systems. Based on the current status of the response action and the continuing use of the site as a drum recycling facility, Ramboll considers this issue to be a REC.

- **Onsite Soil Vapor and Groundwater Contamination and Historical Industrial Uses of the Site.** Investigations conducted from the 1980s through early 2000s have revealed the presence of soil vapor and likely groundwater contamination at the site, which was found to consist of generally low to moderate concentrations of VOCs (specifically, chlorinated solvents) and other compounds. Detected concentrations of various compounds detected in soil vapor and likely in groundwater exceed current regulatory thresholds (it is noted that although no groundwater sampling has been performed at the site to date, groundwater is known to be impacted both immediately upgradient and downgradient of the site).

  The site (2212, 2218, and 2226 North Rosemead Boulevard) and adjoining property to the south (2200 North Rosemead Boulevard) have a long history of use as a steel drum and tote reconditioning business, which operated since 1959 by PCD and continues to operate at the 2226 North Rosemead Boulevard portion of the site as Ditty Container since the mid-1990s. In addition, the 2218 North Rosemead Boulevard parcel historically has been occupied by a tire repair shop, and the 2212 North Rosemead Boulevard parcel historically has been occupied by a tire shop and auto body repair shop (other historical uses of these parcels are unknown). Operations have involved the use and storage of a variety of chemicals (e.g., paints, resins, varnishes, cleaners, degreasers, etc.) and generated a variety of hazardous wastes (solvents, oils). Ramboll cannot rule out the potential that historical and current uses of the site have resulted in subsurface impacts to the site. Ramboll's assessment has identified the presence of several areas of environmental concerns at the site, including the following: the paint storage area, hydraulic lifts, truck maintenance area, trench drain, drum and tote storage areas, and areas of surficial staining amongst others. In addition, environmental compliance audits conducted by Ditty revealed numerous violations with regard to the maintenance and disposal of hazardous materials, and storm water, as well as poor housekeeping issues that have the potential to have caused impacts to the subsurface.

  Because no soil vapor sampling activities reportedly have been conducted at the site for approximately 15 - 20 years (while aforementioned industrial uses were ongoing), and no groundwater sampling has r been performed at the site to date, current subsurface conditions are not known. However, groundwater sampled upgradient and downgradient of the site in monitoring wells installed by PCD during the 1990s revealed groundwater contamination in all three monitoring wells, indicating that groundwater beneath the site is similarly impacted. As a result, and because concentrations of various compounds detected in soil vapor and likely groundwater historically exceed current regulatory thresholds, this issue is characterized as a REC. Furthermore, the potential that on-site soil vapor concentrations present a possible vapor encroachment condition (VEC), cannot be ruled out at this time.

- **Adjoining Property Uses.** The properties to the north and south of the site (2310 North Rosemead Boulevard and 2200 North Rosemead Boulevard) historically were occupied by PCD and have had documented releases of hazardous substances that impacted soil, soil vapor, and groundwater beneath the properties. In addition, the property located at 2128 North Rosemead Boulevard, identified as the former Chemrite facility, was found to have soil and groundwater impacts that appeared to be sourced on that property. Prior correspondence with the LARWQCB suggested that the 2128 North Rosemead Boulevard property could be a possible source of chlorinated solvent contamination previously detected at the 2200 North Rosemead Boulevard

property Based on the long-term industrial use and known/suspected sources of contamination, these facilities are considered to present a REC in connection with the site.

6.1.2 Other Findings

In addition to the RECs discussed in this report, the following additional findings related to potential contamination concerns were identified:

- **UST Removal and Closure.** In 1986, one 12,000-gallon gasoline UST was removed from the 2226 North Rosemead Boulevard parcel. On its removal, two soil samples were collected and analyzed for TPH. The two soil samples reported non-detect concentrations of TPH. A NFA letter was issued by the County of Los Angeles DPW on October 6, 1986 regarding the 12,000-gallon UST removal (Closure Permit 1862-B).
- **Asbestos, Lead-Based Paint and Universal Wastes.** Based age of the facility and likelihood of past modifications and/or additions, it is likely that asbestos and lead-based paint are present within interior and exterior building surfaces and building materials. Additionally, the facility is likely to contain universal wastes, such as light ballasts and window putty containing compounds such as PCBs. An evaluation of such materials is outside the scope of work for a Phase I ESA. However, given the size of the facility, Ramboll recommends that a pre-demolition survey for these materials be conducted in order to evaluate the potential abatement costs associated with these issues

6.1.3 *De Minimis* Conditions

De minimis conditions are those that do not represent a material risk of harm to public health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies. Ramboll identified the following de minimis conditions during the course of this assessment.

- **Pavement and Floor Staining.** Ramboll observed several exterior areas west of the 2212 and 2218 North Rosemead Boulevard buildings where oil stains were apparent, possibly from vehicles parking in the area. The stains were limited in areal extent, and no stains appeared to reach floor drains or storm water drains. As such, Ramboll considers this matter to represent a *de minimis* condition.
- **Historical Agricultural Use of the Site.** Based on Ramboll's review of historical information sources, the site may historically have been used for agricultural purposes from 1928 until 1948. Ramboll was not provided with any specific information regarding historical agricultural chemical use, but pesticides or other agricultural chemicals may have been applied on the site. It is possible that residual concentrations of agricultural chemicals may be present in the subsurface. If residual concentrations of these chemicals are present, it is unlikely that they would be the subject of regulatory scrutiny in the context of a non-residential land use scenario. As such, Ramboll characterizes this finding as a de minimis condition, provided the site use remains industrial (commercial) and the property is not re-zoned for residential use.

6.2 Analysis of Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps.

Limiting conditions and deviations to the ASTM Standard for the assessment are discussed below.

- As it is a User requirement, Ramboll did not conduct a review of records to identify whether any environmental liens or activity and use limitations (AULs) have been imposed on the site. However, based on the document research, environmental liens or land use restrictions have not been filed against the site in the past.
- Facility personnel did not have current contact information for representatives of former site owners/occupants. Thus, Ramboll was unable to interview former owners/occupants about historical operations and site conditions. However, Ramboll conducted an interview with a representative of the site management company with tenure at the site dating back to 1993 and reviewed other historical sources regarding former uses of the site.
- Historical information, such as aerial photographs, was not readily available to characterize the site from the present back to the site's obvious first developed use or 1940, whichever is earlier. The earliest readily available historical source that would indicate specific site uses is a aerial photograph dated 1948, which shows that at least a portion of the site was already developed for agricultural uses. ASTM defines agricultural site use as a "developed" site use.

None of the exceptions, deletions, deviations, or site reconnaissance limitations noted above are considered to represent significant data gaps.

7. ASTM DEFINITIONS

The following definitions are presented in the ASTM Standard:

REC - Recognized Environmental Condition:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

CREC - Controlled Recognized Environmental Condition:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

HREC - Historical Recognized Environmental Condition:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

***De minimis* Condition:**

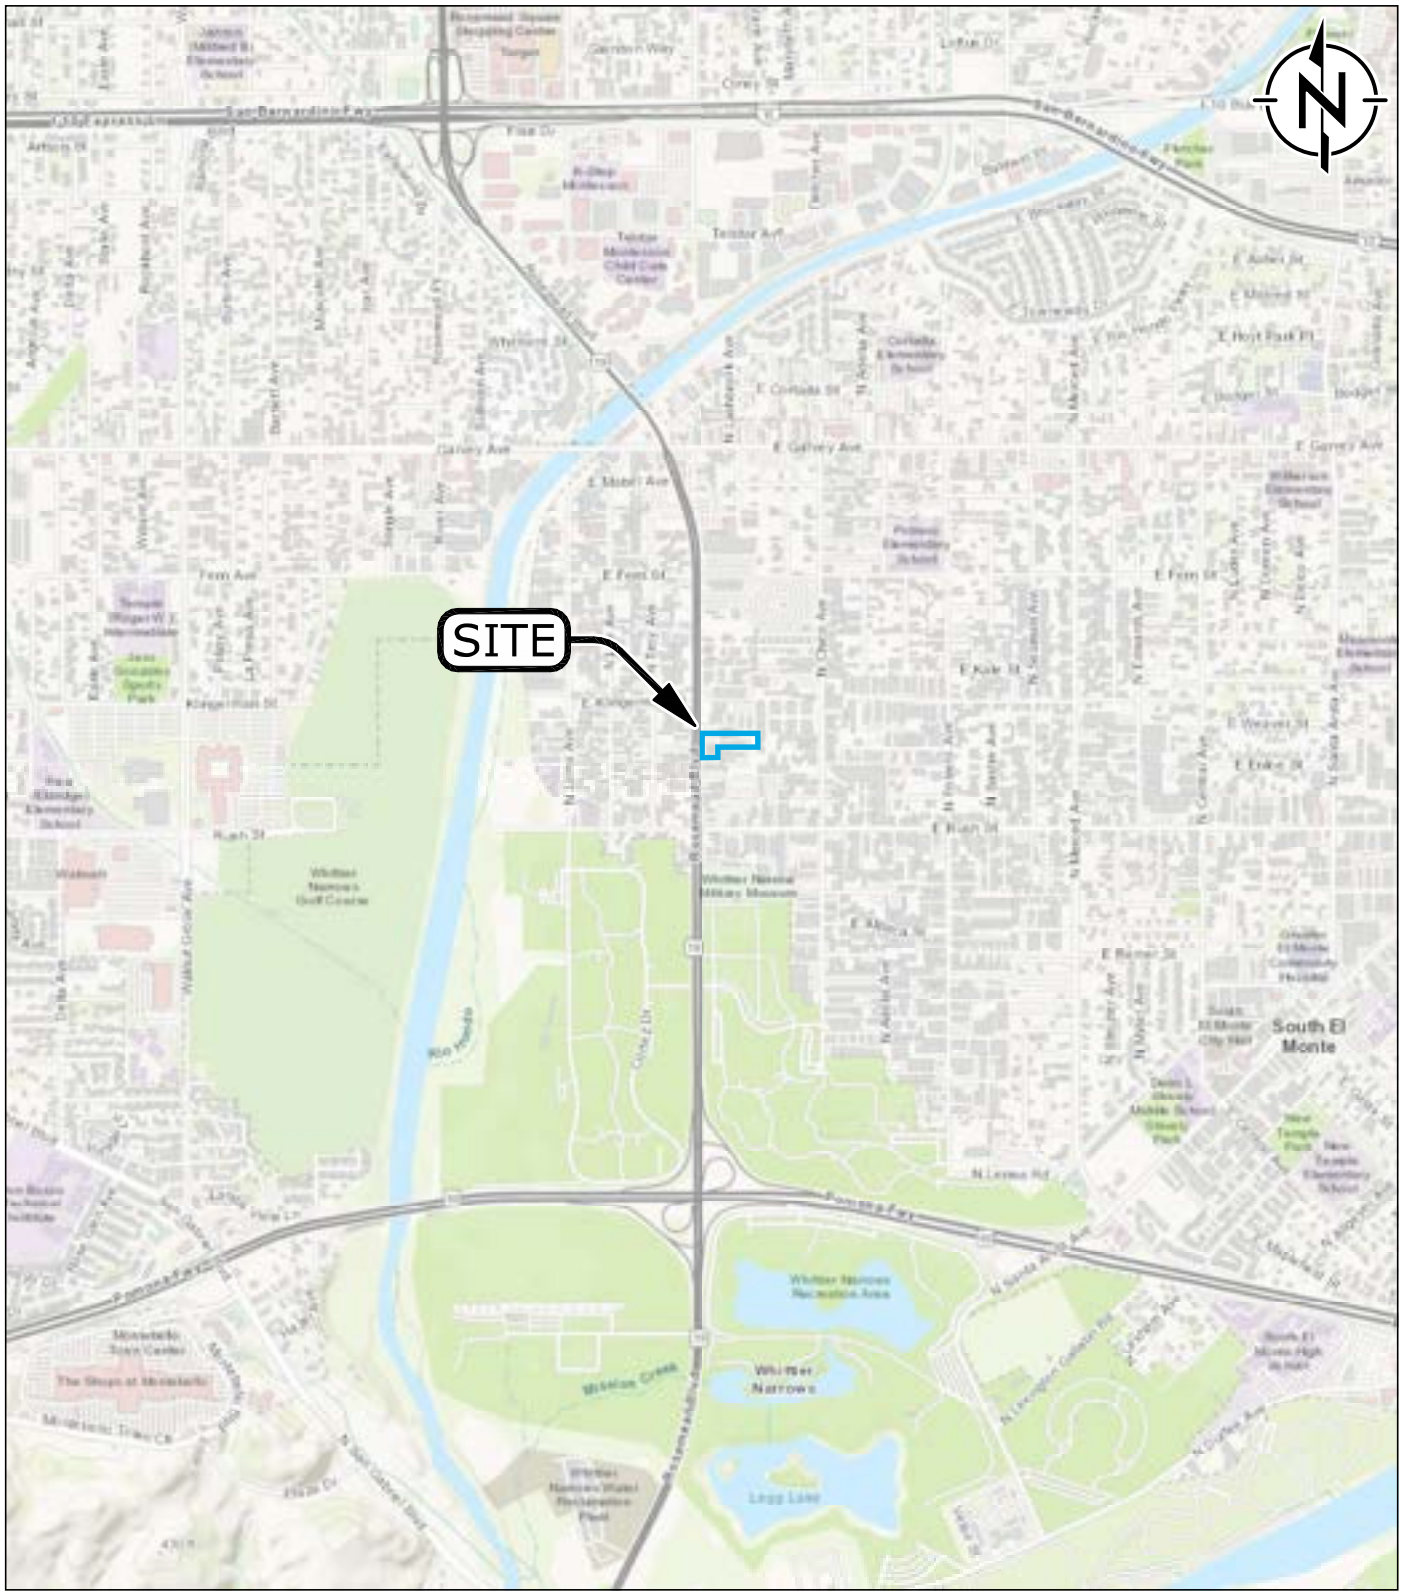

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Data Gap / Significant Data Gap:

A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap is significant if other information and/or professional experience raises concerns involving the data gap.

Please note that the term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

APPENDIX B
ENVIRONMENTAL DATABASE REPORT

NOTES ON ENVIRONMENTAL DATABASE REPORT

The third-party provider conducted its searches for the standard environmental record sources and the minimum search distances, as specified by the ASTM Standard. The ASTM Standard uses the terminology "approximate minimum search distance" to refer to the radii searched in the environmental database report.

The third-party provider conducted the search of environmental databases in August 2019. Because the environmental databases themselves are sometimes not updated by the specific regulatory agencies for periods of up to one year or more (depending on the database and the state), the database search conducted herein will not necessarily list any facility or site for which an environmental investigation/listing has been initiated subsequent to the last update.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SAN GABRIEL VALLEY (Cerclis ID:: 901951 EPA Id: CAD980677355	***PECK RD & REAL***	***0 - 1/8 (0.000 mi.)***	***0***	***9***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains

data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2020 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 23 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 10 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 9 UST sites within

approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 28 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 40 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there is 1 US AIRS site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there are 5 FINDS sites within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 5 HAZNET sites within approximately 0.001 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 04/30/2012 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a

list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the RGA LUST list, as provided by EDR, has revealed that there are 3 RGA LUST sites within approximately 0.001 miles of the target property.

Substance: TRICHLOROETHYLENE (TCE)
CAS #: 79-01-6
Pathway: GROUND WATER PATHWAY
Scoring: 2

NPL:
EPA ID: CAD980677355
Summary: Conditions at listing September 1983): San Gabriel Valley Area 1) is a ground water plume that runs along the axis of the Rio Hondo Wash and the Salt Pit Wash in the San Gabriel ground water basin in El Monte, Los Angeles County, California

EPA ID: CAD980677355
Summary: . The plume also parallels the San Gabriel River to the east. It is approximately 4 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene TCE), perchloroethylene PCE), and carbon tetrachloride CTC) accord

EPA ID: CAD980677355
Summary: ing to analyses by State agencies and local water companies. Many public wells in this area exceed the EPA Suggested No Adverse Response Levels SNARL) for TCE and PCE. Approximately 200,000 people are affected. Cities and public water compan

EPA ID: CAD980677355
Summary: ies in the area have tested to ensure that their water supplies contain less than 5 parts per billion ppb) of TCE and 4 ppb PCE, levels considered safe for human consumption. When alternative methods of reducing the TCE and PCE levels below su

EPA ID: CAD980677355
Summary: ch levels are not effective, wells are removed from service. Currently, three small mutual water companies have no alternate water supply and have advised their customers to use bottled water. Status June 1984): As a result of EP

SAN GABRIEL VALLEY (AREA 1) (Continued) **1000114959**

EPA ID: CAD980677355
Summary: A s analysis of initial remedial measures, completed in December l983, EPA will install water treatment systems to provide clean water to two of the three companies that have no alternate supply. The third company has already purchased a treat

EPA ID: CAD980677355
Summary: ment system and will begin operation of the system soon. A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are

EPA ID: CAD980677355
Summary: preparing to initiate a remedial investigation/feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to iden

EPA ID: CAD980677355
Summary: tify sources of contamination. This site, along with the three other San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Environmental Interest/Information System:
SUPERFUND NPL
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Latitude in Decimal Degrees: 34.05373
Longitude in Decimal Degrees: -118.06422
Permit Type Desc: Not reported
Program System Acronym: CASCA0000603700986
Facility NAICS Code: 332439
Tribal Land Code: Not reported

US AIRS (AFS):
Envid: 1000249956
Region Code: 09
County Code: CA037
Programmatic ID: AIR CASCA0000603700986
Facility Registry ID: 110009529616
D and B Number: Not reported
Facility Site Name: DITTY CONTAINER
Primary SIC Code: 3412
NAICS Code: 332439
Default Air Classification Code: MAJ
Facility Type of Ownership Code: POF
Air CMS Category Code: TVM
HPV Status: Not reported

US AIRS (AFS):
Region Code: 09
Programmatic ID: AIR CASCA0000603700986
Facility Registry ID: 110009529616
Air Operating Status Code: OPR
Default Air Classification Code: MAJ
Air Program: State Implementation Plan for National Primary and Secondary Ambient Air Quality Standards
Activity Date: Not reported
Activity Status Date: 2005-03-01 00:00:00
Activity Group: Case File
Activity Type: Case File
Activity Status: Resolved

Region Code: 09
Programmatic ID: AIR CASCA0000603700986
Facility Registry ID: 110009529616
Air Operating Status Code: OPR
Default Air Classification Code: MAJ

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110009529616

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 111789
Site Name: DITTY CONTAINER INC
Violation Date: 08-26-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide bulk storage containers with adequate secondary containment large enough to contain the entire capacity of the largest container plus additional capacity to contain precipitation when applicable, and/or failure to position/locate mobile or portable containers to prevent a discharge.
Violation Notes: Returned to compliance on 11/12/2019. OBSERVATION: Bulk storage containers do not have adequate secondary containment. Tote bins were found in the oil-water separation area and behind the storage cage without secondary containment. CORRECTIVE ACTION: Provide secondary containment for each bulk storage container or relocate them within containment berms. Submit photos within 30 days.

Violation Date: 08-09-2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 09/08/2016. OBSERVATION: Sludge (resin waste) from treatment tank and stripper; wastewater from collection sump (2,000-gal below-grade sump); shot blast dust; and wastewater from hard-flush collection sumps did not have any recent analysis or hazardous waste determination. Any person who generates a waste shall determine if the waste is a hazardous waste and keep a record of any test results, waste analyses, or other determinations made in accordance with hazardous waste regulations for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. CORRECTIVE ACTION: Immediately make a hazardous waste determination for pH, %-weight of base in the wastewater, and Title 22 heavy metals using TTLC/STLC as applicable and manage it according the Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed 30 days from now.

Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 09/08/2016. OBSERVATION: Sludge (resin waste) from treatment tank and stripper; wastewater from collection sump (2,000-gal below-grade sump); shot blast dust; and wastewater from hard-flush collection sumps did not have any recent analysis or hazardous waste determination. Any person who generates a waste shall determine if the waste is a hazardous waste and keep a record of any test results, waste analyses, or other determinations made in accordance with hazardous waste regulations for at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal. CORRECTIVE ACTION: Immediately make a hazardous waste determination for pH, %-weight of base in the wastewater, and Title 22 heavy metals using TTLC/STLC as applicable and manage it according the Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed 30 days from now.

DITTY CONTAINER INC (Continued) **1005775808**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
STATE MASTER
UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Name: D & C AUTO BODY SHOP
Address: 2121 N ROSEMEAD BLVD
City,State,Zip: SOUTH EL MONTE, CA 91733
Site ID: 128652
CERS ID: 10298038
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 128652
Site Name: D & C AUTO BODY SHOP
Violation Date: 06-16-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 05/23/2019. OBSERVATION: Waste waterborne paint solution and solvent- based waste (30-gal each) were found stored >180 days. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA 30 days from now.
Violation Division: Los Angeles County Fire Department

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

LONGS AUTOBODY (Continued) **S113125900**

Violation Notes:	Returned to compliance on 05/23/2019. OBSERVATION: The clarifier wastewater and sludge located in the west end of the driveway were observed being stored in small barrels lined with trash bags and a proper waste determination has not been made. Spent spray booth filters were thrown in the trash according to the manager without a proper waste determination. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the wastewater and sludge have been properly characterized to determine if it is a hazardous waste. Perform a proper waste determination on future spent spray booth filters. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.

Violations:

Site ID:	10541
Site Name:	BACHMANN PRECISION MACHINE
Violation Date:	09-18-2015
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 12/15/2015. OBSERVATION: Three out of four HW containers did not have HW labels; 4th container was missing an accumulation date. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.
Violation Division:	Los Angeles County Fire Department

Site Name: KIM SE'S AUTO
Violation Date: 05-18-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Training - General
Violation Notes: Returned to compliance on 03/06/2017. OBSERVATION: This facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the CUPA 30 days from now.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 41687
Site Name: KIM SE'S AUTO
Violation Date: 05-18-2016
Citation: 22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description: Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment

KIM SE'S AUTO (Continued) **S123518357**

of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.

Violation Notes: Returned to compliance on 08/10/2017. OBSERVATION: Waste coolant and waste paint thinner drums were missing Hazardous Waste labels. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Violation Source: CERS

Site ID: 143636
Site Name: PHIL'S CERTIFIED AUTO CENTER
Violation Date: 10-18-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 01/08/2018. OBSERVATION: The business failed to establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material. CORRECTIVE ACTION: Establish and electronically submit adequate emergency response procedures for a release or threatened release of a hazardous material within 30 days.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 143636
Site Name: PHIL'S CERTIFIED AUTO CENTER
Violation Date: 10-18-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 01/08/2018. OBSERVATION: 6 x 55 gallon steel drums of used oil located at the hazarodus waste storage area was observed without a hazardous waste label which shall include an accumulation start date and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of the 6 x 55 gallon steel drums of used oil and submit a copy of the manifest/receipt to the CUPA.

Violation Date: 10-18-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/08/2018. OBSERVATION: 6 x 55 gallon steel drums of used oil located at the hazarodus waste storage area was observed without proper hazardous waste labels which shall include the accumulation start date. Label all empty containers as "empty". Observed 5 empty 55 gallon steel drums without an "empty" label. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 93163
Site Name: South El Monte Arco Am Pm
Violation Date: 09-25-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Date: 08-02-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide appropriate secondary containment and/or diversionary structures or equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas, equipment and activities and ensure that the entire containment system, including walls and floor, are capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs.
Violation Notes: Returned to compliance on 10/05/2018. OBSERVATION: Failure to provide the appropriate containment/diversionary structures/equipment for the following: bulk storage containers, mobile or portable containers, oil-filled equipment, piping and related appurtenances, mobile refuelers or non-transportation-related tank cars, and transfer areas. CORRECTIVE ACTION: Provide appropriate containment measures and/or diversionary structures/equipment capable of containing oil and constructed so that any discharge will not escape the containment system before cleanup occurs.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Hazardous Waste Generator

Violations:

Site ID: 3159
Site Name: Advance Automotive Group
Violation Date: 08-11-2017
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency. REPORTABLE HAZ MAT: used oil - 2 x 55gal drums
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 3159
Site Name: Advance Automotive Group
Violation Date: 08-11-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 01/12/2018. OBSERVATION: The generator's EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 75823.2

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 75823.2

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:
Registry ID: 110008267295
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110008267295

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	05-30-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	OBSERVATION: Finely divided metal dust generated from laser fume filtration are being rinsed out of reusable filters in the sink into local sewer. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the finely divided metal dust has been properly characterized to determine if it is a hazardous waste due to Title 22 metal concentrations via TTLC method, and if necessary STLC. If determined to be hazardous submit manifests/receipts documenting

Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 10/19/2016. OBSERVATION: Seven drums of waste hydraulic oil were found stored >180 days. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA 30 days from now.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 09/25/2017. OBSERVATION: The wiping rags used to dry the newly plated metal parts located across from the brass and copper solution sinks are, according to Mr. Perez, being disposed of in the trash. A proper waste determination has not been made. Hazardous waste determination required on sand blast media and paint spray filters prior to disposal. If a waste determination is not obtained the waste shall be classified as hazardous waste and disposed of as hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that the brass and copper solution saturated wiping rags, the sand blast media, and the paint filters have been properly characterized to determine if it is a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002825694

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOLDEN COLOR PRINTING INC (Continued) **S123513242**

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/17/2016. OBSERVATION: There were no labels on the used oil drum and waste ink in the Safety Kleen parts washing equipment (approx 20-gal tank). All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 364908
Site Name: GOLDEN COLOR PRINTING INC
Violation Date: 02-02-2016
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 10/17/2016. OBSERVATION: A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately. Reportable Haz Mat: used oil-1x55gal drum, waste ink 1x55gal drum from 2012; MRC 4X55gal drums; fountain solution 1x55gal drum; alcohol substitute 1x55gal drum; oil1x55gal drum; propane-2x8-gal cylinders; approx 20x55-gal drums of coating
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364908
Site Name: GOLDEN COLOR PRINTING INC
Violation Date: 02-02-2016
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 10/17/2016. OBSERVATION: Waste ink in a 55-gal drum from 2012 was observed inside the printing shop next to the Safety Kleen parts washing equipment (sink). Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA 30 days from now.
Violation Division: Los Angeles County Fire Department

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:
Registry ID: 110002885851
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002885851

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

	11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 01/03/2019. OBSERVATION: 5+ empty 55 gallon drums were observed near building 1 an 2 without proper labels. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

Registry ID: 110002677540
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002677540

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

COAST MACHINERY MOVERS (Continued) **S112884711**

Violation Description:	Failure to obtain and/or maintain an Active EPA ID.
Violation Notes:	Returned to compliance on 01/12/2016. OBSERVATION: Per your submittal in CERS, this facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the CUPA by [date, 30 days from now].

Site ID:	390271
Site Name:	COAST MACHINERY MOVERS
Violation Date:	10-02-2015
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 01/12/2016. OBSERVATION: At the time of inspection, it could not be demonstrated (not necessarily documented) that employees who handle hazardous waste were properly trained. HW drums inside a HW trailer did not have proper labels and were stored greater than 180 days; no employee training records were available. The generator must ensure that all employees who handle hazardous waste are thoroughly familiar with proper waste handling and emergency procedures. CORRECTIVE ACTION: Immediately provide training to all employees who handle hazardous waste and submit a copy of the training records to the CUPA 30 days from now.

CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	28833
Site Name:	EUROPEAN AUTOMOTIVE TECHNOLOGY
Violation Date:	10-16-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 01/03/2018. OBSERVATION: 4 x 30 gallon transfer containers of used oil located in the work areas was observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Violation Program:	HW
Violation Source:	CERS

Site ID: 28833

EL MONTE STEEL TREATING (Continued) **1000301744**

Site Name:	EUROPEAN AUTOMOTIVE TECHNOLOGY
Violation Date:	10-16-2017
Citation:	22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 01/03/2018. OBSERVATION: 3 x 55 gallon steel drums of used transmission fluid located at the rear hazardous waste storage area was observed without an accumulation start date. Observed 1 x 55 gallon steel drum of used oil filter mssing a hazardous waste label and a manifest/receipt demonstrating disposal within the past 180 days was not available. CORRECTIVE ACTION: Dispose of used oil filters and submit a copy of the manifest/receipt to the CUPA.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	28833
Site Name:	EUROPEAN AUTOMOTIVE TECHNOLOGY
Violation Date:	10-16-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/03/2018. OBSERVATION: 4 x 30 gallon transfer containers of used oil located in the work areas ,1 x 55 gallon steel drum of used oil filters at hazardous waste storage area, and 3 x 55 gallon steel drums of used antifreeze at hazardous waste storage area was observed without a hazardous waste label. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 400628
Site Name: REMINGTON ROLL FORMING INC
Violation Date: 06-25-2015
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/03/2017. OBSERVATION: Observed four 55 gallon containers of waste oil without a labels. CORRECTIVE ACTION: Owner/Operator shall immediately comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil. Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. Label information shall include: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date. If the materials is used oil, the containers, above ground storage tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words G Used OilG . The operator corrected the violation on site by attaching a properly filled out label at the time of the inspection. Properly fill out labels. .

Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: OBSERVATION: This facility has not annually reviewed and certified that the business plan is complete, accurate, and up-to-date. A review of CERS, revealed that the last submittal of HMBP was done on 06/11/2013. The due date for the annual submittal for the HMBP to CERS was 04/01/2015. CORRECTIVE ACTION: Go to CERS internet website (http://cers.calepa.ca.gov/) and provide updates to your Hazardous Materials Business Plan - (Business Activities, Business Owner/Operator Identification). If you need assistance, contact the Los Angeles County Fire Department Data Operations section at 323-890-4000. .
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 400628
Site Name: REMINGTON ROLL FORMING INC
Violation Date: 01-03-2019

REMINGTON ROLL FORMING INC (Continued) **S110070523**

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/04/2019. OBSERVATION: observed several 55 gallon containers for coolant oil waste the back of the building without labels. Per owner previous containers with labels were recently picked up. CORRECTIVE ACTION: Correction made at end of inspection.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 400628
Site Name: REMINGTON ROLL FORMING INC
Violation Date: 06-25-2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: OBSERVATION: A review of CERS, revealed that the facility has not accurately submitted the facility site map to the CUPA. Observed the facility site map was G ExemptG . CORRECTIVE ACTION: Site Map cannot be G ExemptG . The site map must be an overhead drawing. The map should include: Adjacent street/alleys, adjacent properties, storm or sewer drains, access and egress points, parking lots, hazardous materials handling and storage areas (propane tank, gas and waste oil storage areas), locations of emergency response equipment, North direction. Once completed, go to the California Environmental Reporting System (CERS) internet website (http://cers.calepa.ca.gov/) and upload the site map. Resubmit this section/page. If you need assistance, contact the Los Angeles County Fire Department Data Operations section at 323-890-4000. .

Potential Media Affected:	Aquifer used for drinking water supply, Soil, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Soil vapor extraction (SVE) system consisted of three extraction well

TED LEVINE DRUM - GROUNDWATER (SITE 3) (Continued) **S122853911**

zones (Well Unit 1, 2, and 3). Each unit contained three or four SVE/monitoring wells. All SVE/monitoring wells had a total depth of 15 feet below ground surface (bgs). The SVE system operated intermittently between January 1999 and March 2000. In Well Unit 1, the soil vapor concentrations from the SVE/monitoring wells ranged from 3 to 33 micrograms per liter ("g/L) of trichloroethene (TCE) and from 27 to 77 "g/L of tetrachloroethene (PCE) on December 15, 1998. On March 29, 2000, the soil vapor concentrations ranged from 5 to 59 "g/L of TCE and from 6 to 91 "g/L of PCE. In Well Unit 2, the soil vapor concentrations from the SVE/monitoring wells ranged from 6 to 29 "g/L of TCE and from 2 to 36 "g/L of PCE on December 15 and 16, 1998. On November 30, 2000, the soil vapor concentrations ranged from 10 to 31 "g/L of TCE and from 10 to 44 "g/L of PCE. In Well Unit 3, the soil vapor concentrations from the SVE/monitoring wells ranged from <1 to 12 "g/L of TCE and from 10 to 121 "g/L of PCE on December 14 and 15, 1998. On November 30, 2000, the soil vapor concentrations ranged from 5 to 19 "g/L of TCE and from 23 to 82 "g/L of PCE. Several soil gas monitoring probes were also installed in each extraction well zone. The depth of all SVE probes is 15 feet bgs, except for two probes in Unit 2 and one probe in Unit 3 whose depth is 5 feet bgs. In Well Unit 1, the soil gas concentrations from the soil gas monitoring probes ranged from <1 to 11 "g/L of TCE and from 2 to 38 "g/L of PCE on December 14, 15, and 16, 1998. On March 28, 2000, the soil gas concentrations ranged from 40 to 49 "g/L of TCE and from 57 to 61 "g/L of PCE. In Well Unit 2, the soil gas concentrations from the soil gas monitoring probes ranged from <1 to 112 "g/L of TCE and from <1 to 109 "g/L of PCE on December 14, 15, and 16, 1998. On November 30, 2000, the soil gas concentrations ranged from 106 to 207 "g/L of TCE and from 61 to 94 "g/L of PCE. In Well Unit 3, the soil gas concentrations from the soil gas monitoring probes ranged from <1 to 8 "g/L of TCE and from <1 to 77 "g/L of PCE on December 14, 15, and 16, 1998. On November 30, 2000, the soil gas concentrations ranged from 2 to 477 "g/L of TCE and from 27 to 3,390 "g/L of PCE. Annual groundwater monitoring and emergent chemical sampling activities were performed at the site on October 24, 2002. Groundwater samples were collected from wells LW-1, LW-4, LW-6, LW-7, LW-8, LW-9, and LW-10 and analyzed for VOCs using USEPA Test Method 8010B. Additionally, the sample collected from well LW-10 was analyzed for ammonium perchlorate using USEPA Test Method 314, NDMA using USEPA Test Method 1625M, 1,4-dioxane using USEPA Test Method 8270C, and total and hexavalent chromium using USEPA Test Methods 200.9 and 7199, respectively. The Groundwater Monitoring Report also indicated that groundwater was not present in monitoring wells LW-2 and LW-3, therefore, water levels were not obtained. Well LW-5 was not sampled due to an insufficient quantity of groundwater present in the well. Thus, no groundwater samples were collected from wells LW-2, LW-3, and LW-5. Significant VOCs concentration levels were detected in the groundwater samples. PCE concentrations ranged from 40 to 110 "g/L. TCE concentrations ranged from 15 to 230 "g/L. Cis-1,2-dichloroethylene (cis-1,2-DCE) concentrations ranged from 4.7 to 250 "g/L. 1,1-dichloroethane (1,1-DCA) concentrations ranged from 3.6 to 37 "g/L. The emergent chemical concentrations detected in groundwater samples were 0.012 "g/L of n-nitrosodimethylamine (NDMA), 1.7 "g/L of 1,4-dioxane, 4.6 "g/L of total chromium, and 3.8 .g/L of hexavalent chromium.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002898703
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002898703

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:

Site ID:	426201
Site Name:	BELL CRAFT OFFICE FURNITURE, INC.
Violation Date:	05-14-2018
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 07/18/2018. OBSERVATION: Uniform Hazardous Waste Manifests for [LIST HAZARDOUS WASTES] were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for [LIST HAZARDOUS WASTES] and submit copies to the CUPA.

Violation Date: 08-31-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/27/2016. OBSERVATION: Large tanks (wastewater and oily water) at steel drum waste treatment area were marked with contents that appeared to be inconsistent with submitted process diagrams/flowcharts. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

TED LEVINE DRUM CO (Continued) **S105939902**

	12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	OBSERVATION: 1. Observed (8) x 275-gallon totes containing spent solution from the caustic flusher, near the waste oil storage tanks. The totes were labeled as non-hazardous. 2. Observed (15) x 275 -gallon totes containing waste water solution to be processed near the IBC/poly drum waste water treatment system. The totes were labeled as non- hazardous. CORRECTIVE ACTION: Provide hazardous waste determination on the contents of the totes. Test for CAM 17 metals, toxicity and pH. If determined to be hazardous waste then you must manage it as such.

Violation Description:	Failure to permanently mark the exterior of each Fixed TU with the name of the person which owns or operates the FTU, facility identification number and an individual serial number.
Violation Notes:	Returned to compliance on 10/18/2016. OBSERVATION: The owner or operator failed to permanently mark the exterior of the treatment unit. The owner or operator of a treatment unit deemed to hold a permit by rule shall permanently mark the exterior of each treatment unit with the name of the person which owns or operates the treatment unit, facility identification number and an individual serial number. CORRECTIVE ACTIONS: Ensure that the HW treatment unit meets all of the requirements listed. Provide supporting documentation that demonstrates compliance with the requirements to the CUPA.

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer’s assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes:	OBSERVATION: A hazardous waste tank reassessment has not been conducted within 5 years of the previous tank system assessment or within the remaining service life of the tank system as stated in the engineer’s report, whichever is less. CORRECTIVE ACTION: Obtain a written hazardous waste tank system reassessment in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

Violation Date: 08-31-2016
Citation: 22 CCR 12 66262.27(b) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.27(b)
Violation Description: Failure of a small quantity hazardous waste generator to certify to the following statement on the Uniform Hazardous Waste Manifest: "I am a small quantity generator. I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford."
Violation Notes: Returned to compliance on 09/20/2016. OBSERVATION: The facility did not have recent records (lab analysis) to determine if the following wastes are hazardous: aqueous waste caustic flush in holding tank #7 (from poly drum pre-flusher); waste caustic solution from poly drum stripper; wastewater in Holding Tank #3 (from IBC/food grade wash); waste sludge from treatment tank; waste process water from IBC/poly drum line and steel drum line; waste aqueous caustic solution in holding tank #2 and waste sludge from treatment tank at the steel drum line. Any person who generates a waste shall determine if the waste is a hazardous waste. CORRECTIVE ACTION: Conduct a hazardous waste determination on the aforementioned waste caustic solution holding tanks and stripper waste, wastewater, and sludge. Have a California certified laboratory perform a pH test and Total Threshold Limit Concentration (TTLC) and Soluble Threshold Limit Concentration (STLC)(if required) analysis and a fluoride salts test. The waste caustic [Truncated]

Site Name:	TED LEVINE DRUM CO
Violation Date:	08-31-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the

TED LEVINE DRUM CO (Continued) **S105939902**

	generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 09/27/2016. OBSERVATION: Large tanks (wastewater and oily water) at steel drum waste treatment area were marked with contents that appeared to be inconsistent with submitted process diagrams/flowcharts. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 10/20/2016. OBSERVATION: The business plan has not been updated and submitted to this department within 30 days of change of address, undisclosed material, and increase in inventory. CORRECTIVE ACTION: Review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS).

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	OBSERVATION: 1. Observed (8) x 275-gallon totes containing spent solution from the caustic flusher, near the waste oil storage tanks. The totes were labeled as non-hazardous. 2. Observed (15) x 275 -gallon totes containing waste water solution to be processed near the IBC/poly drum waste water treatment system. The totes were labeled as non- hazardous. CORRECTIVE ACTION: Provide hazardous waste determination on the contents of the totes. Test for CAM 17 metals, toxicity and pH. If determined to be hazardous waste then you must manage it as such.

TED LEVINE DRUM CO (Continued) **S105939902**

Chapter 45, Section(s) 67450.3(c)(7)

Violation Description: Failure to permanently mark the exterior of each Fixed TU with the name of the person which owns or operates the FTU, facility identification number and an individual serial number.

Violation Notes: Returned to compliance on 10/18/2016. OBSERVATION: The owner or operator failed to permanently mark the exterior of the treatment unit. The owner or operator of a treatment unit deemed to hold a permit by rule shall permanently mark the exterior of each treatment unit with the name of the person which owns or operates the treatment unit, facility identification number and an individual serial number. CORRECTIVE ACTIONS: Ensure that the HW treatment unit meets all of the requirements listed. Provide supporting documentation that demonstrates compliance with the requirements to the CUPA.

Site ID: 403587
Site Name: TED LEVINE DRUM CO
Violation Date: 11-05-2019
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.

Violation Notes: OBSERVATION: A hazardous waste tank reassessment has not been conducted within 5 years of the previous tank system assessment or within the remaining service life of the tank system as stated in the engineer's report, whichever is less. CORRECTIVE ACTION: Obtain a written hazardous waste tank system reassessment in accordance with 22 CCR 15 66265.192 and submit a copy to the CUPA.

Citation: 22 CCR 12 66262.27(b) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.27(b)

Violation Description: Failure of a small quantity hazardous waste generator to certify to the following statement on the Uniform Hazardous Waste Manifest: "I am a small quantity generator. I have made a good faith effort to minimize my waste generation and select the best waste management method that is available to me and that I can afford."

Violation Notes: Returned to compliance on 09/20/2016. OBSERVATION: The facility did not have recent records (lab analysis) to determine if the following wastes are hazardous: aqueous waste caustic flush in holding tank #7 (from poly drum pre-flusher); waste caustic solution from poly drum stripper; wastewater in Holding Tank #3 (from IBC/food grade wash); waste sludge from treatment tank; waste process water from IBC/poly drum line and steel drum line; waste aqueous caustic solution in holding tank #2 and waste sludge from treatment tank at the steel drum

TED LEVINE DRUM CO (Continued) **S105939902**

line. Any person who generates a waste shall determine if the waste is a hazardous waste. CORRECTIVE ACTION: Conduct a hazardous waste determination on the aforementioned waste caustic solution holding tanks and stripper waste, wastewater, and sludge. Have a California certified laboratory perform a pH test and Total Threshold Limit Concentration (TTLC) and Soluble Threshold Limit Concentration (STLC)(if required) analysis and a fluoride salts test. The waste caustic [Truncated]

FORMER COOPER DRUM CO. FACILITY, SUB-AREA 3A (Continued) **S106765211**

Local Agency:	Not reported
RB Case Number:	107.0096
File Location:	Archived
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Acetone, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium, Copper, Lead, Benzene, Xylene
Site History:	The facility was a steel drum reconditioning plant. The plant received, cleaned, repaired, and painted metal drums. Drums were stored on dirt lot prior to be reconditioned and cleaned. Inside the plant, southeast portion, a pit collected residues from the drums. The plant had a concrete floor and spills were noticed everywhere according to a inspection on July 2, 1987. A blast furnace was located at the facility where drums were cooked followed by sandblasting and painting. The facility contained a large aboveground tank located in a concrete containment structure. The facility had numerous subsurface concrete filled vaults which appeared to have been used for storing old machinery. Cooper Drum began operations on June 30, 1983.

FINDS:

Registry ID: 110002794593
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002794593

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SUNRISE INDUSTRIES (Continued) **S106484620**

Violation Date:	03-31-2015
Citation:	HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description:	Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/02/2017. OBSERVATION: A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.
Violation Division:	Los Angeles County Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	96305
Site Name:	AUTOPRO BODY & PAINT INC
Violation Date:	03-31-2015
Citation:	22 CCR 23 66273.40(a)(3) - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.40(a)(3)
Violation Description:	Failure of the universal waste handler who sends electronic devices, CRTs, and/or CRT glass to any foreign destination to complete the following: (1) Notify the Department 60 days prior to the intended export before any electronic devices, CRTs, and/or CRT glass are scheduled to leave the United States and cover all export activities extending over the next twelve (12) month or lesser period; (2) Concurrently send a copy of the notification required pursuant to subsection of this section, to the CUPA having jurisdiction over the universal waste handlerG s facility.
Violation Notes:	Returned to compliance on 08/02/2017. OBSERVATION: Copies of hazardous waste disposal records for waste solvent were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by April 30, 2015.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2020

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

UTM Y (Meters):	3768393.0
Elevation:	237 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

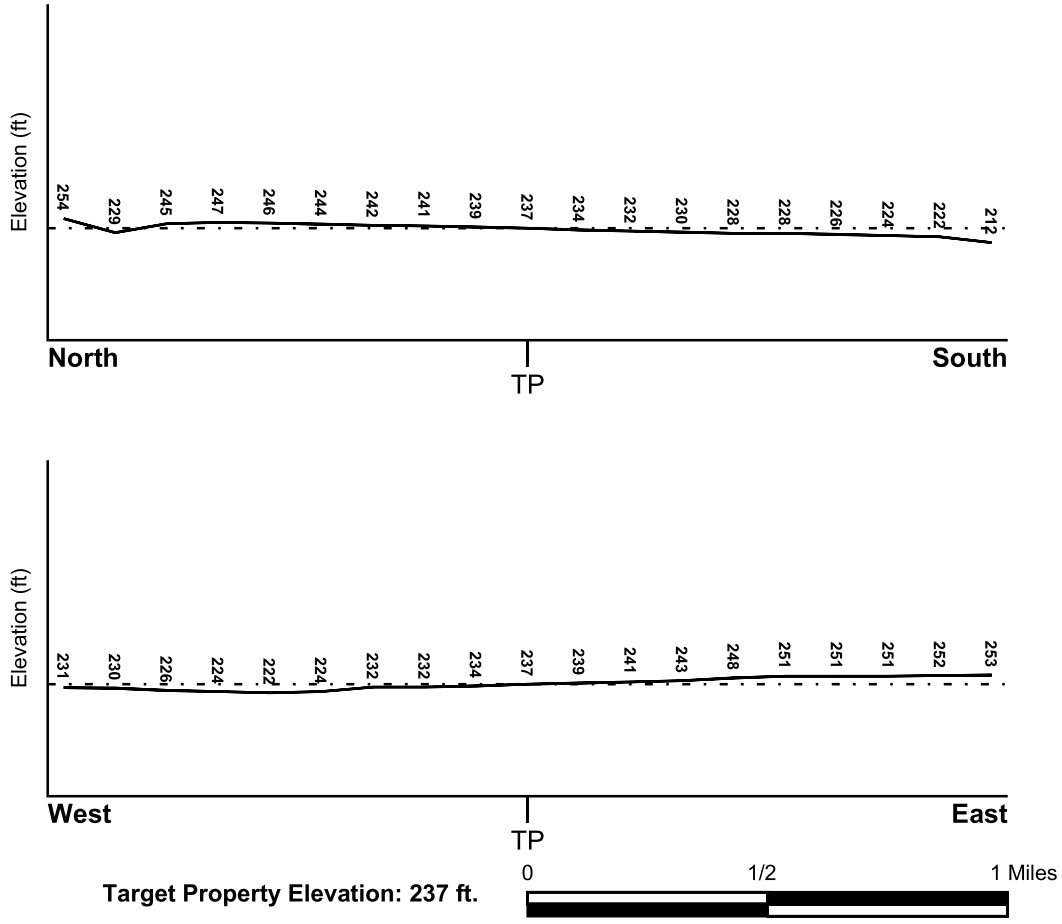

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1665F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1675F	FEMA FIRM Flood data
06037C1670F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL MONTE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 5875-4F2F-99B5

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Ramboll (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

APPENDIX E
QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

LEO REBELE

Principal

Mr. Rebele is a Principal in the Irvine office of Ramboll, with responsibilities that include business development, client liaison, senior oversight and execution on projects involving environmental site investigation, litigation, remediation, environmental permitting and natural resource management. Experience includes the following:

- Supported private industry for more than 25 years by delivering solutions to problems involving real estate due diligence, waterfront and brownfield redevelopment, transit-oriented development, and ports/harbors and watershed-related services. Project experience has been split between managing uplands projects focusing on property transfer/redevelopment and assisting private and port clients with aquatic-related environmental issues.
- Provided high-level strategic redevelopment consulting services to municipalities and private developers in connection with the transfer and redevelopment of contaminated real estate. Clients include residential, commercial and industrial developers, land owners, attorneys, and real estate brokers. Implementing cost recovery actions by providing environmental litigation support services; designing and implementing environmental liability transfer programs including guaranteed fixed-price remediation (GFPR) contracts.
- Provided environmental litigation support services in matters involving cost recovery actions against responsible parties. Deposition and trial experience including a landmark litigation case 3000 E. Imperial v. Robertshaw Controls et al. Routinely conducts environmental forensics analyses with a specialty in compound-specific isotope analysis (CSIA). Develops and applies multi-media video and animation for purposes of trial exhibits and mediation settlement discussions.
- Managed and supervised dozens of Phase I and II environmental site assessments (ESAs) and remediation projects throughout the western United States, Canada, and Mexico; assessed sites affected by landfill materials, chlorinated solvents, heavy metals, petroleum hydrocarbons (including free product), polychlorinated biphenyls (PCBs), and strong acids; prepared site conceptual models; performed remedial investigation/feasibility studies (RI/FSs); managed the completion of human health risk assessments; and evaluated remedial action alternatives under the Comprehensive

Environmental Response, Compensation, and Liability Act (CERCLA) and ensuring compliance with the National Contingency Plan (NCP). Regulatory negotiation/site closure experience with various jurisdictional offices of the Regional Water Quality Control Board (CRWQCB) and the California Department of Toxic Substances Control (DTSC), Orange County (California) Health Care Agency, the City and County Fire Departments of Los Angeles and the San Diego County of Environmental Health.

- Managed and provided oversight for projects involving natural resource management issues, including wetland evaluations and permitting, marine benthological studies, sediment and water quality monitoring, and underwater and eelgrass surveys. Experience has also included developing public outreach materials on behalf of private-sector clients, conducting resource mapping using Global Positioning System (GPS) software and geographic information system (GIS) technology.
- Served as program manager for several environmental impact assessments under National Environmental Policy Act (NEPA) and California Environmental Quality Act. Projects include environmental assessments (EAs) for proposed telecommunication sites on federal land, municipal well installations, private urban infill developments and mega-scale solar facilities located in Los Angeles County and San Bernardino County.

EDUCATION

1997
MS, Marine Resource Management (Minor, Aquatic Toxicology)
Oregon State University

1994
BS, Biological Oceanography (Honors)
University of British Columbia

PROJECTS

2016-2017
Environmental Oversight
Mr. Rebele served as the principal-in-charge for the environmental oversight of a sewer line replacement in an area where groundwater impacted by chlorinated volatile organic compounds (cVOCs) associated with a State Superfund site may be encountered by city workers. The scope of work involves navigating concerns of a contentious community group and ensuring the protection of City workers through the development and implementation of a field monitoring program during sewer line construction activities.

2017
Due Diligence and Environmental Compliance Review
Mr. Rebele lead a due diligence and environmental compliance team in support of an acquisition of a 700-acre terminal in the Port of Los Angeles. The work involved a comprehensive assessment of current practices involving the use, storage and disposal of hazardous materials, compliance with air and stormwater regulations, and a review of historical spills and cleanup activities. A Phase I Environmental Site Assessment was conducted as part of the review. A review of California Environmental Quality Act (CEQA) permitting issues was also performed to evaluate the potential for terminal expansion onto an unoccupied portion of the facility.

2017-present
Pilot Testing and Support of Guaranteed Fixed Price Remediation Program
Mr. Rebele is heading a comprehensive site investigation and pilot test to evaluate a proposed groundwater and soil remediation strategy in support of a guaranteed fixed-price remediation (GFPR) strategy. The property, which is being sold to an industrial developer, is impacted by moderated levels of trichloroethylene and perchloroethylene in groundwater, with impacts extending off-site. Concentrations of chlorinated VOCs in soil vapor beneath the manufacturing facility were found to be very high, requiring immediate mitigation. Mr. Rebele is leading the project team to develop a groundwater remedy under a possible GFPR contract option while designing soil vapor extraction and vapor mitigation system that can be implemented in the short term.

2016-present
Implementation of Mitigation Monitoring, New Residential Development
Mr. Rebele served as principal-in-charge for a project involving implementing mitigation monitoring requirements for biological and cultural resources under California Environmental Quality Act (CEQA). Work included conducting ongoing monitoring for cultural and biological resources during disturbance of native soils during grading for a new residential development. Challenges included working with changing client schedules and interfacing with regulatory personnel to keep the project on-track on-schedule.

2016-present
Redevelopment of former ITT Site into new Industrial Complex
Lead consultant for a high-profile industrial redevelopment project in Santa Ana, California. The project involves assisting the prospective developer with the pre-bid due diligence during the seller's auction, evaluating seller's proposed remedial strategy in the context of the proposed development, performing Phase I and II environmental assessments, regulatory agency negotiation, and the design of a vapor mitigation system. Complexities in the due diligence activities include the integration of a polychlorinated biphenyl (PCB) cap into the proposed development and integrating the proposed electrical resistance heating/steam injection remedial program with client's development plans.

2016-2017
Implementation of Soil Management Plan and Soil Stockpile Profiling for Residential Development Project
Mr. Rebele served as client services manager for a project involving the redevelopment of a former foundry and iron works facility. The soils beneath the property were identified though a combined Phase I/II Environmental Site Assessment to be impacted with Cal-Hazardous levels of lead. A combination of field screening using a portable X-Ray Fluorescence (XRF) meter and confirmation soil sampling with formal laboratory analysis in order to profile soils to be exported and to establish residual concentrations in soils. Cost effective management of soils was achieved through carefully interfacing with the client's grading contractor and project phasing.

2015-present
Innovative In-Situ Remediation of Chlorinated Solvents
Account manager for Griffon Corporation to remediate a chlorinated VOC plume in groundwater which is commingled with chlorinated solvent plumes on adjacent properties. The remediation is confounded by access restrictions associated with a storm channel and two sewer lines. In addition two distinct groundwater mounds resulting from leaks in the sewer lines are affecting the groundwater flow and distribution of the contamination. Mr. Rebele is overseeing the forensic evaluation of sources of VOCs, general strategy, remedial approach and is leading regulatory negotiations.

2015-2017
In-situ Capping of Heavy Metal Impacted Soils
For this former tool manufacturing facility (Union Fork and Hoe Company) in upstate New York, Mr. Rebele served as project principal and client service manager. The site, which has been under the

oversight of the New York State Department of Environmental Conservation (NYSDEC) and Department of Environmental Health. Mr. Rebele helped Griffon negotiate a capping remedy of the heavy metals impacted soil. A significant component of the work has been negotiating with NYSDEC and DOH to eliminate a mature wooded area from the remediation area and to reduce the long-term groundwater monitoring obligations.

2005->>>

Ongoing Brownfield Advisory and Consulting Services

Serves in a strategic consulting role on behalf of the City for the remediation and brownfield planning of a 170-acre downtown core area targeted for redevelopment. Work to date has included federal and state brownfield grant procurement and execution, brownfield inventory, development of a GIS system, development of an area-wide brownfield remediation strategy, Phase I and II Environmental Site Assessments, development of multiple remedial action plans under the oversight of the Department of Toxic Substances Control, litigation support for cleanup cost recovery, and waste to energy (WTE) consulting.

2007->>>

Alameda Triangle Redevelopment

Provided oversight and consulting services for an 11.2 acre project comprised of 5 parcels with multiple ownerships and a history of manufacture use dating to World War II. The property uses identified including a former Witco chemical facility located on Caltrans property, a Magnetek transformer repair and refurbishment business, two auto-wrecking yards, a former railroad right-of-way, and a variety of other uses involving the manufacture and use of various chemical materials. The chemicals detected on-site during Gannett Fleming and other site investigations included organochlorine pesticides, PCBs, free product petroleum hydrocarbons in groundwater and soil, chlorinated VOCs in soil and soil vapor, heavy metals and polynuclear aromatic hydrocarbons. The City is in the process of marketing the site for development. Following a multi-media investigation involving substantial site access coordination, Gannett Fleming prepared a Site Investigation Report, Feasibility Study and a Remedial Action Plan (RAP) for the entire Site. The reports were submitted to Department of Toxic Substances Control (DTSC) for review. Gannett Fleming is working with city's environmental counsel to develop a cost recovery strategy.

2017

Economic Development Department

Mr. Rebele is working with the City of South Gate Economic Development Department and their economic development consultant, Rosenow Spivasek Group (RSG,) in addressing environmental impacts associated with a historical gasoline service station. Mr. Rebele and his team were retained to take over all aspects of the assessment and cleanup activities from a prior consultant due to a stalled remedial program.

2015-2016

Operational Transition/Environmental Compliance

Project Principal for an operational transition project involving all aspects of environmental compliance as Bombardier took over rail service and maintenance responsibilities for all rail facilities from the prior operators of the North County Transit District (NCTD) facilities at the Escondido and Oceanside yards. Work involved initial consultation, environmental compliance audits, permitting, preparation of spill prevention control and countermeasure (SPCC) plans, stormwater pollution prevention plans (SWPPS) and environmental compliance plans for ongoing rail operations and facility maintenance.

2014->>>

Remediation of Organochlorine Pesticide Impacted Soils in Support of Residential Development

Mr. Rebele serves as the principal-in-charge for a residential development project involving the remediation of organochlorine pesticides (OCPs) and closure of historical underground storage tanks

(USTs), irrigation wells and low-level volatile organic compounds (VOCs). In his role, Mr. Rebele is served in a strategic capacity to result in a fast-track review and approval of a remedial action plan by transferring the open case file from a local oversight agency to the Santa Ana Regional Water Quality Control Board.

2014-present
Remediation of Groundwater at Logistically Constrained Shopping Center
Mr. Rebele has been serving as principal-in-charge for a complex gasoline remediation project involving very high concentrations of gasoline at a commercial shopping center where site access precludes implementation of many traditional remedies. Mr. Rebele serves as senior technical advisor to the client's environmental counsel and is working to reduce the environmental liabilities of the property owner. Mr. Rebele helped devise a two-part strategy aimed at protecting the current tenants against indoor air intrusion through the development of vapor mitigation systems while conducting an aggressive groundwater remedial program consisting of trenching/product removal followed by in-situ chemical oxidation of groundwater.

2014-present
Environmental Remediation Consulting in Support of Residential Development
Mr. Rebele served in a strategic consulting role for New Urban West, Inc. (NUWI) to support the redevelopment of infill properties throughout southern California. Projects have included former nursery/greenhouse areas, manufacturing operations and properties and areas impacted by fill materials. Currently executing several cleanup programs under a California Land Reuse and Revitalization Act (CLRRA) agreement with the Department of Toxic Substances Control.

2014-2017
Redevelopment Consulting and Remediation
Mr. Rebele serves as the project principal for a residential redevelopment project at a former Teledyne research and development facility and historical agricultural operation. Work has involved several phases of soil, soil vapor and groundwater investigation that included multiple degreaser locations, additional potential source areas of metals and petroleum hydrocarbons and organochlorine pesticides associated with the historical agricultural use. A soil vapor extraction (SVE) was implemented to reduce elevated concentrations of PCE to acceptable levels in order to prepare the Site for residential occupancy. The site is currently undergoing redevelopment.

REBEKAH J WALE

Managing Consultant

Rebekah Wale has more than 30 years of experience conducting and managing Phase I environmental site assessments and Phase II subsurface investigations. She is a senior practitioner in Ramboll's Merger & Acquisition Due Diligence practice. Her work has included conducting and/or managing numerous property transfer Phase I and Phase II investigations, property redevelopment, site and facility closure activities, California Class I and Class III landfill investigations, compliance groundwater monitoring, state and federal Superfund site assessments, underground storage tank assessments, and litigation support.

CAREER

1990-Present
Senior Manager, Ramboll
Environmental due diligence, Phase II subsurface investigations; prepare various reports, work plans, and results reports; manage clients and staff; coordinate with regulatory personnel.

1985-1990
Field Geologist, Hart Environmental Management Corporation
Perform Phase II subsurface investigations; prepare various reports, work plans, and results reports; oversee subcontractors manage clients.

PROJECTS

2005-2015
Due Diligence Manager
Managed hundreds of single and multiple property Phase I environmental site assessments at various locations throughout the United States and in other countries (e.g., Canada, Mexico, Europe, Asia, Africa).

2002-2004
Property Redevelopment Manager
Managed several property redevelopment projects of former aerospace facilities in Burbank, California. Responsible for preparing and implementing dust control plans, sampling plans, and health and safety plans during construction activities, and supervised construction personnel to ensure compliance with plans. Prepared weekly reports for submittal to the local agency.

1983-1985
MA, Environmental Science Montclair State College Montclair, New Jersey United States

1979-1981
BS, Geology
Eastern Michigan University
Ypsilanti, Michigan
United States

2000
Litigation Support
Manager
Managed day to day activities in a large litigation support case involving an industrial facility. Assisted with preparation of expert opinions, including a cost allocation model.

1999-2015
Site Investigation
Manager
Managed numerous Phase II subsurface investigations related to property transfer projects; including soil gas surveys, soil sampling, grab groundwater sampling, and indoor air sampling.

Managed a large multi-phase remedial investigation at a testing facility in southern California. Responsible for coordinating and directing field staff, preparing technical memorandums and data transmittals, preparing large remedial investigation reports, and communicating and responding to regulatory agency personnel.

Designed and managed soil gas, soil, and ground water investigation programs at a plating facility near Los Angeles, California.

Managed several tasks associated with the sale of a hotel in Los Angeles, California, including underground storage tank removals and investigation of a dry cleaning plant in the hotel.

1998-2005
Property Development
Manager
Managed several property redevelopment projects of former aerospace facilities in Burbank, California. Responsible for preparing and implementing dust control plans, sampling plans, and health and safety plans during construction activities, and supervised construction personnel to ensure compliance with plans. Prepared weekly reports for submittal to the local agency.

1997-1998
Site Investigation
Manager
Managed several tasks associated with investigation and closure of an industrial facility in Los Angeles County, California, including sump removal and a soil boring and sampling program. Prepared sampling plans and results reports.

Designed and managed soil gas, soil, and ground water investigation programs at a shopping center property in Ventura County, California. Prepared sampling plans and results reports, participated in regulatory interaction.

Designed and manage a site investigation of a former dry cleaning facility in Orange County, California, that included soil gas, soil, and ground water sampling programs, and installation of a Soil Vapor Extraction (SVE) remediation system.

1994-1996
Site Investigation
Field Geologist
Managed a Phase II site investigation of an industrial facility in Commerce, California. Prepared a sampling plan, supervised soil boring and sampling activities, reported findings, and participated in regulatory interaction.

Supervised the drilling of soil borings and collected soil samples at a metals recycling facility in Los Angeles, California. Prepared a report on remedial options for soils.

Supervised the installation of five deep aquifer monitoring wells drilled as part of a regional ground water contamination study in northern California.

1993-1995
Geologic Evaluation
Researched and evaluated three properties in the Imperial Valley with regard to geologic, seismic, and flood hazards. The properties were being considered as potential industrial facility sites.

Researched and evaluated the landslide potential of a property for a private client in Los Angeles, California.

1990-2004
Routine Monitoring
Manager
Conducted an evaluation of ground water sampling practices and prepared an environmental technician training seminar for a Class III landfill in Orange County, California.

Managed a large regional quarterly ground water monitoring compliance program in a municipality in Los Angeles County, California. Responsible for oversight of field staff and regulatory compliance. Prepared quarterly monitoring reports.

Managed a large quarterly ground water monitoring compliance program at a Class I landfill in California. Responsible for oversight of field staff and regulatory compliance. Prepared quarterly monitoring reports.

1988-1994
Site Investigation
Field Geologist
Prepared cross sections and isopach maps for several sites as part of a regional ground water study in northern California.

Participated in step-testing and a long-term pumping test of a shallow well at a chemical manufacturing facility.

Managed two multiphased ECRA projects at large industrial facilities in northern New Jersey for a Fortune 100 company. Directed implementation of multiple sampling plans involving soil borings; well installation; ground water, soil, sediment and air sampling; geophysical logging; and aquifer (packer) testing.

1988-1991
Site Investigation
Prepared a site-wide Sampling and Analysis Plan for a Class III landfill in southern California.

Provided technical field oversight services to a group of PRPs at a landfill under investigation in New Jersey.

Provided closure activities at a stamping facility in Alabama, including installing overburden and cored bedrock wells, and conducting ground water and potable well sampling and a soil investigation (soil gas survey and soil sampling).

Assisted with rock coring and the installation of bedrock wells at an incinerator fabrication facility in Pennsylvania. Also participated in slug testing the wells.

Directed an expansion investigation in New Jersey for a warehouse facility that was formerly part of a municipal landfill. Oversaw soil borings and soil sampling, monitoring well installation, and ground water sampling. Prepared sampling results reports, including recommended remedial options and strategic planning.

1986-1988
Site Investigation
Managed three multifaceted site investigations for a gas station chain/fuel transfer facility company in New Jersey. Prepared sampling plans, supervised tank and soil removal and well installation and sampling efforts, completed permit applications for both sites, prepared reports of findings, and provided remedial recommendations.

Managed a planned subdivision site in New Jersey located adjacent to a gasoline spill area. Prepared sampling plans and results reports, supervised a soil gas survey and soil sampling activities, and participated in local government meetings to obtain approvals for building at the site.

Managed a major ECRA investigation of a dye and pigment manufacturing facility in New Jersey. Prepared sampling plans; drilled and sampled soil borings; conducted ground water sampling, pump-in (pressure) testing, discrete interval sampling (packer testing); and oversaw test pit construction and downhole geophysical logging.

1985-1986
Site Investigation
Field Geologist
Managed a multiphased ECRA investigation at an electric motor repair plant in New Jersey. Installed overburden and bedrock wells, collected soil and ground water samples, and oversaw soil excavation activities. Negotiated for off-site access. Planned and implemented aquifer testing through a series of short duration step tests, followed by a 72-hour pumping test.

Conducted potable well and surface water sampling at four Superfund asbestos disposal sites in New Jersey. Prepared sampling results report.

Assisted with rock coring and the installation of bedrock wells at an incinerator fabrication facility in Pennsylvania. Also participated in slug testing the wells.

Assisted in the remedial investigation of a metals-contaminated soils problem in Colorado, including grid layout, soil sample collection, test pit construction, and soil mapping.

RAMBOLL

ENVIRONMENT & HEALTH

DENISSE HERNANDEZ

Senior Consultant 1

Environmental Site Assessments, Soil and Groundwater Investigations, Soil Logging

CAREER

2014-2018

Senior Staff Geologist, Ninyo & Moore

Provided project management support and coordination related to planning and regulatory compliance for various projects including public and private owned project sites. Conducted field oversight, geological logging, soil/soil vapor/groundwater sampling, drinking water surveys, data evaluation, and reporting. Applied scientific principles by interpreting and evaluating laboratory data collected during field activities to prepare recommendations and conclusions.

2014

Staff Geologist, ERM

Provided project management support related to planning and regulatory compliance for various projects. Duties consisted of drafting environmental documents and permit applications, site research and due diligence.

2012-2014

Staff Geologist, Cardno ERI

Oversight of drilling activities for ExxonMobil retail sites. Drafted permitting applications and coordinated field activities with local agencies and subcontractors. Evaluated of technical reports to determine which cases qualified for closure under the California Regional Water Quality Control Board's Low Threat Closure Policy and prepared site assessment reports, work plans, corrective action plans, groundwater and quarterly reports.

2011-2012

Environmental Geologist Intern, Sullivan International Group

Environmental Protection Agency contractor supporting the Los Angeles Regional Water Quality Control Board (LARWQCB) and the City of Los Angeles Fire Department UST Program. Assisted staff at the Los Angeles Fire Department and the LARWQCB by reviewing open UST cases and determining whether a case is ready for closure, if it required remediation, and/or further monitoring.

Los Angeles, CA 90071
United States of America

2010-2011
Graduate Student Assistant, California Regional Water Quality Control Board
Reviewed and assessed technical reports, including quarterly groundwater monitoring reports, well installation reports, work plans, site assessment reports and remediation reports.
Assisted technical staff in reviewing cases that were ready for closure and prepared closure packages; as well as uploading reports and data posting onto GeoTracker.

EDUCATION

2009-2011
Master's Degree
California State University, Los Angeles, Los Angeles

2002-2006
Bachelor's Degree
University of California, Santa Barbara, Santa Barbara

LANGUAGE SKILLS

Spanish (mother tongue)
