Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators,

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse

EBERS STREET GARAGE (Continued) **1000369352**

combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RWQCB Region:	SAN DIEGO RWQCB (REGION 9)
Site History:	The Site is located on the west/northwest corner of Mission Bay Drive and Magnolia Avenue. The Site consists of two parcels; the western

MISSION BAY PROPERTY (Continued) **S104751782**

parcel is an asphalt paved parking lot and the eastern parcel is a vacant commercial building formerly operated as a Salvation Army thrift store. In 2015, a Phase I Environmental Site Assessment (ESA) and a Phase II ESA were prepared for the Site. The Phase I ESA, specifically indicated that the eastern parcel comprising the Property was formerly occupied by a gas station from at least 1953 to 1970 but there is no documentation of removal of the former underground storage tanks (USTs) and fueling system or of any subsurface investigations conducted at the Property. As part of the Phase II ESA, seven borings were advanced and petroleum hydrocarbon impacts were detected in soil and groundwater. As a result, Unauthorized Release Case DEH2015-LSAM-000320 was opened. In April 2016, six sub slab soil gas probes and three groundwater monitoring wells were installed at the Site. In June 2016, a Human Health Risk Assessment Report was submitted. The result indicated that no further evaluation of vapor intrusion risk is warranted with regard to future commercial occupants of the existing Site building. A total of five groundwater monitoring wells were installed at the Site. Based on the assessment to date: The lateral extent of petroleum hydrocarbon impacted soil has been adequately assessed; Free product was not detected during groundwater monitoring and sampling events. The case was evaluated under the State s Low-Threat Underground Storage Tank Case Closure Policy (the Policy). DEH concurs that the case qualifies for a low-risk closure designation. Case closure notification was completed per the Policy. All monitoring wells associated with the case were destroyed under permit DEH2018-LMWP-003377.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

RWQCB Region:	SAN DIEGO RWQCB (REGION 9)
Site History:	The subject site is a former gasoline service station and mini-mart located at the northeast comer of Voltaire and Bacon Streets in San Diego, Caiifomia. Three 1,000 gallon USTs were removed from the Site in January 1988. Soil sample analytical results following the UST removal indicated impacted soils beneath the north end of the former waste only UST only. Concentrations of total recoverable petroleum hydrocarbons (TRPH) in soils ranged from 1,100 mg/kg al 10.5 ft bgs to 12,000 mg/kg at 8 ft bgs. Samples from beneath the other two removed 1,000 gallon tanks were "non-detect" for gasoline and its constituents.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

CA Water Watershed Name:	Penasquitos - Fiesta Island (906.70)
Dwr Groundwater Subbasin Name:	Mission Valley (9-014)
Disadvantaged Community:	Disadvantaged Community
CA Enviroscreen 3 Score:	36-40%
CA Enviroscreen 4 Score:	20-25%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN DIEGO RWQCB (REGION 9)
Site History:	The property has been used as a boatyard since at least the mid-1960s for boat repair and maintenance operations. Historical discharges of copper have resulted in contamination of sediments proximal to the shoreline. The current 3.5-acre Driscoll Mission Bay facility is used for boat repair and maintenance operations and includes two travel lifts. The facility is enrolled in the NPDES program.

WDS:

Name:	DRISCOLL MISSION BAY
Address:	1500 QUIVIRA WAY
City:	SAN DIEGO
Facility ID:	San Diego 000000305
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CA0109291 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	9
Facility Telephone:	6192218456
Facility Contact:	MICHAEL DRISCOLL
Agency Name:	DRISCOLL MISSION BAY LLC
Agency Address:	1500 QUIVIRA WAY
Agency City,St,Zip:	SAN DIEGO 92109
Agency Contact:	MICHAEL DRISCOLL
Agency Telephone:	6192218456
Agency Type:	Private
SIC Code:	3732
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	PROCES
Waste Type2:	D
Waste2:	Process Waste (Waste produced as part of the industrial/manufacturing process)
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Washwater Waste (Product washwater wastes: E.G., photo reuse

DRISCOLL MISSION BAY (Continued) **S102006434**

wastewater, vegetable washwater)
Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

DRISCOLL MISSION BAY (Continued) **S102006434**

greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 07/03/2019. Inspection Sequence ID:6153741

RWQCB Region:	SAN DIEGO RWQCB (REGION 9)
Site History:	A 12,000-square-foot property (the parcel) located near the intersection of Mission Boulevard and Feldspar Street in San Diego, California, was formerly occupied by a gasoline service station. The parcel is located on the southeast corner of the intersection in the Pacific Beach neighborhood of metropolitan San Diego. The station, which was located on the northern portion of the parcel, reportedly began operation in 1950. From 1955 to 1971, auto repair businesses were reported to have occupied the former service station area. A building formerly located in the northern portion of the parcel was demolished in early 2013; however, in the southeastern portion, one building remains that is currently occupied by two restaurants. In association with a pending real estate transaction, due diligence efforts revealed the possible presence of a UST system on the parcel.

JAMES HERVEY JOHNSON TRUST (Continued) **S111760480**

A consultant was retained by the prospective buyer to prepare a Phase I environmental site assessment (ESA) report. Based on the previous uses of the property, the consultant recommended that a geophysical survey be performed, followed by a subsurface soil investigation and a soil vapor survey. Total petroleum hydrocarbons (TPH) were not detected in soil samples collected from four borings advanced to a maximum depth of 15 feet below ground surface (bgs). Volatile organic compounds (VOCs) were not detected in soil vapor samples collected. TPH as gasoline was detected in a groundwater grab sample collected from one of the borings. Based on the analytical results for the groundwater grab sample, the consultant recommended further subsurface investigation. Exploratory excavation performed on March 9, 2012, confirmed that three USTs, with capacities of 3,000, 2,000, and 1,200 gallons, respectively, and associated piping remained in the northwestern corner of the property. Following over-excavation, the USTs and piping were removed under County permit on March 12, 2012. Analytical results for soil samples collected during the removal inspection included the detections of TPH as gasoline and as diesel in the western portion of the UST excavation. The volatile organic compounds (VOCs) ethylbenzene and xylenes were also detected. DEH opened an unauthorized release case on April 3, 2012. Three groundwater monitoring wells were installed on the parcel in February 2013 to a depth of approximately 31 feet below ground surface (bgs). During advancement of the well borings, soil samples were collected at various depths to a maximum depth of 24 feet bgs. TPH as diesel was detected in one soil sample, collected at a depth of 9 feet bgs. Measurement of water levels and the collection of groundwater samples were performed during the first and second quarters of 2013. The depth to groundwater in the wells stabilized at approximately 20 feet bgs. The groundwater samples were analyzed for TPH as gasoline and diesel, benzene, toluene, ethylbenzene, xylene, naphthalene, and fuel oxygenates, including methyl-tert-butyl ether. None of the analytes were detected in the samples collected during the two groundwater monitoring and sampling rounds. According to the consultant, the parcel is located in a hydrologic sub-basin with no designated beneficial uses. No impacts to groundwater were indicated by the TPH, VOC, and fuel oxygenate analytical results for groundwater samples collected during two monitoring and sampling rounds. VOCs were not detected in soil vapor samples. The majority of the parcel is paved, and the building remaining on the site is located approximately 150 feet from the UST excavation. Based on these findings, the consultant has recommended no further action and case closure. DEH concurs with these recommendations.
