Re: Update SCH: 2024100484 to include revised Notice of Availability indicating extension of comment period

Project: GWDRs for Commercial Lily Bulb Operations in the Smith River Plain
SCH No.: 2024100484

To whom it may concern:

The North Coast Regional Water Quality Control Board is submitting this memorandum to revise the Notice of Availability of Draft Environmental Impact Report for the above-referenced project.

The original Notice provided for a 45-day public review and comment period. The Regional Water Board has extended the public comment period to a total of 60 days. The revised comment period will now conclude on **March 30, 2026**.

This extension is intended to provide additional time for public agencies, stakeholders, and interested members of the public to review and provide comments on the Draft Environmental Impact Report and associated Draft General Waste Discharge Requirements.

Please update the State Clearinghouse records with the attached revised Notice of Availability that reflects the revised 60-day public comment period ending March 30, 2026.

If you have any questions, please contact Brenna Sullivan, Engineering Geologist at brenna.sullivan@waterboards.ca.gov.

Sincerely,

Brenna Sullivan
