FSSD is proposing to replace the existing Suisun Force Main, which was constructed in the late 1970s, with two new parallel force mains to ensure service reliability. The existing force main would be inspected after the new parallel force mains are installed and either abandoned, repurposed, or rehabilitated as a separate project based on the inspection results. The project would also include installation of appurtenant infrastructure necessary for operation and maintenance of the force mains. The project alignment would extend between the Suisun Pump Station and the Central Pump Station, paralleling the existing alignment where possible, but would follow a different alignment compared to the existing force main.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
