EXECUTIVE SUMMARY

Langan Engineering & Environmental Services, Inc. (Langan) has prepared this report for the purpose of updating the 2020 Phase I Environmental Site Assessment (Phase I ESA) to incorporate the results of the 2020 Phase II Environmental Site Investigation (Phase II ESI) completed on behalf of Amazon (the "User") for the DFA8 property located at 1605 South 7th Street, San Jose, Santa Clara County, California (the "Site"). Alternative addresses for the Site include 1555 South 7th Street and 210 East Alma Avenue. The Site is identified as Santa Clara County's Assessor Parcel Number (APN) 47708037.

The initial June 30, 2020 Phase I ESA of the Site, prepared by Langan, identified three Recognized Environmental Conditions (RECs). Based off the findings of the June 30, 2020 Phase I ESA, Langan conducted a Phase II ESI, to evaluate whether the environmental conditions identified in the June 30, 2020 Phase I ESA have impacted soil, groundwater and/or soil gas quality at the Site. The Phase II ESI was completed between August 17 and August 25, 2020 and included the sampling of 10 soil borings to 4 feet below ground surface (bgs), 5 grab groundwater samples, and 6 temporary soil gas points. The findings of the Phase II ESI have altered the conclusions of the previous, June 30, 2020 report because soil, groundwater and soil gas conditions at the Site were generally shown to be below USEPA Risk Screening Level (RSLs) for commercial/industrial sites.

The Langan Phase II ESI did not detect field indications of environmental impacts in Site soils. No volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total petroleum hydrocarbon (TPH), or polychlorinated biphenyls (PCBs) were detected in excess of the California Regional Water Quality Control Board (CA RWQCB) Environmental Screening Levels (ESLs) commercial/industrial uses in any of the soil samples analyzed. No VOCs, SVOCs, TPH, or dissolved metals were detected at concentrations in excess of the applicable CA RWQCB ESLs in groundwater samples collected. The Phase II ESI identified arsenic in Site soils consistent with background concentrations for San Francisco Bay Area. Total mercury was detected in one groundwater sample GW-1 (2.49 µg/L), in excess of USEPA RSLs of 2.0 µg/L. Benzene was detected in three soil gas samples at concentrations between 15 micrograms per cubic meter (µg/m3) and 17 µg/m3, which exceeds the CA RWQCB ESL for commercial/industrial land use of 14 µg/m3, but are well below the USEPA Vapor Intrusion Levels (VISLs) 52.4 µg/m3 for commercial/industrial sites. Given the absence of detectable benzene in groundwater, the low level detections of benzene in soil vapor are expected to be attributable to de minimis staining on the overlying concrete surface.

The approximately 17.34-acre Site is currently occupied by a multi-unit warehouse building, a two-story office building, four warehouses, storage yards, parking lots, and truck parking/loading areas. The multi-unit building consists of adjoining and connected warehouses (some of which are two-story), occupies the western portion of the Site, and was built between 1948 and 1974. The two-story office building is located in the central-eastern portion of the Site, and was built

between 1968 and 1974. Three one-story warehouses and one two-story warehouse occupy the southeastern portion of the Site; the northern-most warehouse was built prior to 1948, the eastern-most warehouse was built between 1961 and 1963, the western-most warehouse was built between 1950 and 1956, and the southern warehouse was built between 1948 and 1950.

The Site is bound by Alma Avenue to the north, South 7th Avenue to the east, an industrial property to the south, and railroad tracks and Cottage Grove Avenue to the west. The Site is located in an area zoned HI for heavy industrial use.

Future site development includes the construction of a large delivery station equipped with high ceilings, heavy duty slab, and ventilation. Site preparation activities will include demolition of existing structures and pavement, scarification and re-compaction of Site soils, and import/placement of clean fill soil to support the installation of a commercial slab-on-grade foundation. The future development activities are expected to result in the removal and volatilization of the minor concentrations of benzene detected in soil vapor. Further, no potable wells currently exist at the Site and none are planned to be advanced as part of future development activities.

The objective of this Report is to identify any remaining Recognized Environmental Conditions (RECs) by summarizing the Phase I ESA and the findings from the Phase II ESI.

The following off-Site RECs were identified for the Site:

REC 1 – Current and Historical Uses of Surrounding Properties: Current and historical uses on surrounding properties include metal recycling, manufacturing, a bus yard, a concrete company, drum recycling and trucking companies. These facilities are identified in hazardous waste, LUST, National Priorities List (NPL) and/or the Resource Conservation and Recovery Act Corrective Action databases. Some of these properties are located in the inferred hydraulically up-gradient direction of the Site and have documented releases of regulated substances.

Based off the findings of the Phase II ESI, soil, groundwater, and soil vapor constituents potentially attributable to off-Site releases are below USEPA RSLs and VISLs except in the case of one anomalous groundwater sample (GW-1), where total mercury was identified at 2.49 µg/L, which slightly exceeds the USEPA RSL/Maximum Contaminant Level (MCL) for drinking water of 2.0 µg/L.

The following on-Site Historical REC (HREC) was identified for the Site:

- **HREC-1 – Historical Leaking Underground Storage Tank Case:** The Site previously housed four underground storage tanks (USTs), including one 550-gallon gasoline UST (referred to as Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C) and one 10,00-gallon methanol UST (Tank M). Tank B was discovered to be leaking after its removal in 1989, and remediation began in 1990. The exact location of

this tank is unknown; however, it is assumed to be in the southwestern portion of the Site, due to the adjacent location of a former monitoring well. Remediation actions consisted of soil excavation, soil sampling, monitoring well installation, and groundwater sampling. According to database records, the LUST case is closed without any activity and use limitations on the Site.

The Phase II ESI did not identify field indicators of environmental impacts in site soils. Further, soil, groundwater and soil vapor analytical results do not indicate that residual impacts from the historical LUST event remain at the Site at concentrations exceeding USEPA RSLs or VISLs for commercial/industrial land use.

The following de minimis conditions was identified for the Site:

- **De Minimis Condition 1 – Amberwood Products, Inc. Violation:** Amberwood Products, Inc. violated a California Health and Safety Code in 2010, which incited a complaint against the operator. Inspections performed by the HMCD in 2008 and 2009 indicated that Amberwood Products, Inc. had illegally disposed of containers of flammable liquids into a dumpster. The location of the dumpster was not specified in the complaint.

Although this violation indicates that Amberwood Products, Inc. has exhibited poor housekeeping practices, the results of the Phase II ESI did not identify impacts to Site soils, groundwater, or soil vapor consistent with a release of hazardous substances to Site media. Therefore, this violation is considered a de minimis condition.

No CRECs were identified in connection with the Site.

Additional information related to the above listed RECs, HRECs, and de minimis condition can be found within the body of this Report.

1.0 INTRODUCTION

Langan Engineering & Environmental Services, Inc. (Langan) has prepared this Report for the purpose of updating the 2020 Phase I Environmental Site Assessment (Phase I ESA) with the results of the 2020 Phase II Environmental Site Investigation (ESI) on behalf of Amazon (the "User") for the DFA8 property located at 1605 South 7th Street, San Jose, Santa Clara County, California (the "Site"). The Site is identified as Santa Clara County's Assessor Parcel Number (APN) 47708037. A United States Geological Survey (USGS) Site Location Map is included as Figure 1.

This Report includes and update to the 2020 Phase I ESA with the findings of the Phase II but is not in full compliance with the ASTM standard as the report over a year old.

A June 30, 2020 Phase I ESA of the Site, prepared by Langan, identified three Recognized Environmental Conditions (RECs). Based off the findings of the June 30, 2020 Phase I ESA, Langan performed a Phase II ESI to evaluate whether the environmental conditions identified in the June 30, 2020 Phase I ESA have impacted soil, groundwater and/or soil gas quality at the Site. The Phase II investigation was completed between August 17 and August 25, 2020 and included the sampling of 10 soil borings to 4 feet below ground surface (bgs), 5 grab groundwater samples, and 6 temporary soil gas points. The findings of the Phase II ESI have altered the conclusions of the previous, June 30, 2020 Phase I ESA because soil, groundwater, and soil gas conditions at the Site were generally shown to be below USEPA Risk Screening Level (RSLs) for commercial/industrial sites.

1.1 Phase I ESA Summary

The Phase I ESA was completed in advance of Amazon's proposed purchase of the Site for use as a distribution facility.

The purpose of the Phase I ESA was to identify Recognized Environmental Conditions (RECs) in connection with the Site using the methodology recommended by ASTM and the AAI Rule.

> For the purpose of a Phase I ESA, a REC is defined as follows:
>
> "*The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*"

A Historical REC (HREC) is defined as follows:

"A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A Controlled REC (CREC) is defined as follows:

"A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

A de minimis conditions is defined as follows:

"A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The scope of a Phase I ESA consists of reviewing readily available information and environmental data relating to the Site; conducting interviews with individuals knowledgeable about the Site; reviewing readily available maps and records maintained by federal, state, and local regulatory agencies; and conducting a Site reconnaissance.

2.0 SITE DESCRIPTION

2.1 Site Use

The Site is currently improved with a multi-unit warehouse building, a two-story office building, three one-story warehouses and one two-story warehouse with construction dates ranging from pre-1948 to as late as 1974. A parking lot with truck parking is located in the northeastern portion of the Site, loading docks and storage yards are located in the southern portion of the Site, and paved driveways connect the various buildings. The Site is completely paved. The building IDs listed in the table below were found based on Langan's review of the 2018 Government Agency Limited Environmental Site Assessment completed by AEI Consultants (AEI). The exact locations and labels of Buildings B, C, E, M, and O were not specified in the previous report by AEI, nor were they explicitly identified by the Site representative in 2020 during the site reconnaissance; therefore, the IDs for those buildings were assigned by Langan. Building IDs A, 4D, F, K, L, and

N were confirmed during the 2020 Site reconnaissance. The exact size of buildings K, L, M, N, and O were also confirmed during the 2020 Site reconnaissance and by a Site survey provided by the Site representative during the preparation of the 2020 Phase I ESA. The Site buildings are labeled on Figure 2.

ID	Description	Size (Square Feet)	Construction Date	Occupant(s)
A	Central eastern warehouse in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1950 to 1956	Piedmont Moving Systems (office, storage warehouse)
B	Warehouse in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1939 to 1948	Piedmont Moving Systems (warehouse)
C	Southern connected warehouses in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1948 to 1950	Vacant (formerly occupied by Miller Recycling)
4D	Northern two-story warehouse in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1950 to 1956	Excess Solutions (electronics shop)
E	One/two-story warehouse in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1939 to 1948	Piedmont Moving Systems (storage warehouse)
F	Northern warehouse in the western multi-unit building	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1950 to 1963	Piedmont Moving Systems (storage warehouse) (formerly occupied by Amberwood Products, Inc.
K	Two-story office building	8,040	1968 to 1974	Alano West Club (office space)
L	Eastern-most southeastern one-	3,220	1961 to 1963	James Moore (art studio)

ID	Description	Size (Square Feet)	Construction Date	Occupant(s)
	story warehouse			
M	Central southeastern one-story warehouse	2,340	1948 to 1950	Fence 4 Rent (welding-/work- shop)
N	Northern-most southeastern two-story warehouse	8,245	1939 to 1948	iCelebrate Event Rentals and Fence 4 Rent
O	Western-most southeastern one-story warehouse	4,000	1950 to 1956	iCelebrate Event Rentals (storage warehouse)
210 East Alma Avenue	One-story warehouse	A, B, C, 4D, E, F, and 210 East Alma: total of 269,706	1968 to 1974	SpeedySkunk Performance & Restoration (automotive repair shop)

Improvements at the Site are summarized in the following table:

Site Improvements	
Size of the Site	Approximately 17.34 acres
Buildings/Spaces/Structures	On-Site buildings and spaces include: three one-story buildings; two two-story buildings, and one two-story office building. See table above for a detailed description.
Unimproved Areas	None
Surface Water	None
Potable Water Source	San Jose Water
Sanitary and Storm Sewer Utilities	San Jose Water
Electrical Utilities	Pacific Gas and Electric (PG&E)
Construction Completion Date	Pre-1948 to as late as 1974, see above table
General Construction Type	The Site ALTA survey indicates all buildings are metal. All buildings are concrete slab on grade. Some have concrete walls, block walls, or corrugated metals walls.
Cooling and Ventilation System Type	Present; type unknown
Heating System Type	Present; type unknown
Emergency Power	None

2.2 Surrounding Land Use

Based on visual observations of the surrounding area during the 2020 Site reconnaissance, the Site is located within an urban area characterized by commercial and light industrial buildings. Adjoining and surrounding property usage is summarized in the following table and shown on Figure 3:

Direction	Parcel Number	Adjoining Properties	Surrounding Properties
North	East Alma Avenue		South Bridle Path and East Frontage Road followed by Speedway filling station and Pilot Travel filling station
	47706053	Pearlite Fixture Group/ALUXO (123 East Alma Avenue)	
	47706017	Elite Roofing Supply (215 East Alma Avenue)	
	47706003	San Jose State University (SJSU) Spartan Ticket Office (1393 South 7th Street)	
	47705003	Citizens Equity First Credit Union (CEFCU) Stadium (1257 South 10th Street)	
South	47708032	C&D Recycling (1611 South 7th Street)	Industrial properties
East	South 7th Street		Industrial properties
	47709046	Star Quality Concrete (1404 S 7th Street) Prestamo por Titulo de Auto MVP San Jose, loan agency (1510 South 7th Street)	
	47709019	Student Transportation America (1540 South 7th Street)	
	47709018 47709047	R&L Recycle Inc (1596 South 7th Street)	
West	Railroad tracks and Cottage Grove Avenue		Commercial/retail businesses and restaurants, and associated parking lot
	47707012	DCP El Camino Middle School (1402 Monterey Road)	
	47707018	Walmart and MoneyGram (1450 Monterey Road)	
	47708034	Big 5 Sporting Goods (1472 Monterey Road) Teletron (1462 Monterey Road)	
	47708035	San Jose Police Department Property and Evidence Facility (1588 Monterey Road)	

2.3 Physical Setting

2.3.1 Topography

The Site appears on the 2012 USGS 7.5-minute series topographic quadrangle map for San Jose East. According to the USGS quadrangle map, the elevation of the Site is approximately 110 feet above mean sea level. Based on Site observations and the topographic quadrangle map, the Site is characterized by generally level terrain with a gentle slope to the southwest.

2.3.2 Geology

According to the California Geologic Survey (2002), the Site lies with California's Coast Ranges geomorphic province, which is characterize by northwest-trending mountain ranges and valleys. The Site is within the Santa Clara Valley. According to review of the California Department of Conservation's on-line interactive 2010 Geologic Map of California, the Site is underlain by Quaternary alluvium, lake, playa, and terrace deposits. The Silver Creek Fault is mapped approximately 1.5 miles northeast of the Site.

The Phase II ESI conducted by Langan on August 17 and August 25, 2020 indicated that Soil at the Site primarily consisted of clayey and sandy silts. Also, fill material, consisting of wood fragments, was observed at depths between 0.5 to 3 bgs at eight boring locations.

2.3.3 Hydrogeology

According to the 2018 Government Agency Limited Environmental Site Assessment completed by AEI, groundwater monitoring data for the Site and eastern adjoining property indicate that groundwater flow direction is to the north, and groundwater depth is between 12 to 16 feet bgs.

During a Phase II ESI conducted by Langan on August 17 and August 25, 2020 five temporary groundwater wells were advanced at the Site. Groundwater was encountered in the temporary wells at depths ranging between 12 and 16 feet bgs.

The closest surface water body is Coyote Creek located approximately 3,000 feet northeast of the Site (Figure 1). According to EDR Report for the Site there are no mapped wetlands at or within a quarter mile of the Site. According to the Federal Emergency Management Agency (FEMA) Flood Map Service Center website, the Site is not within a mapped flood hazard zone, as shown on Figures 2 and 3, but is designated as Flood Zone D, which is defined as an area with possible but undetermined flood risk.

3.0 RECORDS REVIEW

3.1 Historical Use Information

Langan reviewed historical documents during the Phase I ESA referenced below for the Site and surrounding area

Reference	Dates
Aerial Photographs	1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1993, 2006, 2009, 2012, and 2016
Historical Sanborn Maps	1961 and 1966
Historical USGS Topographic Quadrangles	1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, and 2012
City Directory Abstract (available business directories, including city, cross-reference, and telephone directories)	1927 through 2014
Santa Clara County Real Property Search (SCCMap)	Searched on June 15, 2020
City of San Jose – Land Use Zoning Map	Searched on June 15, 2020
Google Earth Imagery	1998 through 2020

The following is a summary of relevant information for the Site, adjoining properties, and surrounding area based on our review of the above historical references.

3.1.1 Site

Based on a review of the above references, Site use and other pertinent information is summarized below.

- Late 1880s to late 1930s: From 1889 to 1899, scarce development was evident at the Site and surrounding areas; two structures and a road appeared to be present in the northwestern section of the Site (USGS Topographic Maps, 1889). By 1939, the houses and road were no longer present on the Site, and the Site appears to contain a field (Aerial Photograph).
- Late 1940s to late 1960s: By 1948, a warehouse and smaller building was present in the central-western section of the Site, and another warehouse and two smaller buildings were present in the southeastern section of the Site (Aerial Photograph, 1948). In 1950, the western warehouse was expanded to the south; two new warehouses were present in the southeastern portion of the Site; and eight smaller buildings were present in the central-southern portion of the Site (Aerial Photograph). The two smaller buildings previously present in the vicinity of the western and the southeastern warehouses were no longer present. The Southern Pacific railroad directly adjoins the Site to the west with a spur along the southern Site boundary 1950 Aerial Photograph and 1953 Topographic Map). In 1956, two warehouse expansions

were added north of the western building, and one warehouse was added to the east; the collection of eight southern small buildings were replaced with one larger warehouse; and the westernmost of the southeastern buildings was expanded to the north. According to the 1961 and 1966 Sanborn Maps, the Site was occupied by Sunsweet Growers Inc./Sunset Growers' dried fruit production operations; the northern warehouses contained canned goods and fruit packing operations, the central buildings were dried fruit warehouses, the southernmost buildings contained a loading shed and empty bin storage warehouses, and the southeastern warehouses contained woodworking, machine and carpentry shops. A gasoline pump, lift truck greaser, and steel butane tank were all present near the southwestern Site boundary; an electric deep well pump and transformers were present near the center of the Site; and an oil house was present south of the southeastern warehouses. The deep well pump was 'for domestic use only', had a pumping rate of 1,000-gallons per minute, and was associated with a 10,000-gallon pressure tank. In 1963, the western building was further expanded in the north and in the south; the easternmost of the southeastern warehouses was also constructed; the northeastern section of the Site appears to be a parking lot, and the southern portion of the Site appears to be used for storage (Aerial Photographs). According to Aerial Photographs, the Site appeared in a similar configuration in 1968.

- Early 1970s to 1990s: In 1974, an additional standalone building was present in the central-eastern portion of the Site, and an additional warehouse was present in the northwestern-most section (Aerial Photographs). The Site configuration appeared similar in 1982; truck loading docks were present in the southern portion of the Site; parking was present throughout the eastern portion of the Site; and the northeastern corner of the Site appeared to contain parked trucks. According to the City Directory, Orchard Supply Hardware Stores was present at the Site from 1980 to 1991, 'Esecutive Ofc' was present at the Site from 1980 to 1986. By 1993, an additional warehouse area was constructed, connecting the northern western warehouse buildings with the southern-most warehouse (Aerial Photographs). According to the City Directory, Cal Air Service/Cal Air Conditioning Inc./Cal Air Construction was present at the Site starting in 1996, and Piedmont Moving Systems was present at the Site starting in 1999.
- 2000s to late 2010s: The Site appeared in a similar configuration from the 1990s through 2016; loading docks and storage areas were present in the southern portion of the Site, parking lots were present in the western portion of the Site, and the truck parking was present in the northeastern corner of the Site. According to the 2012 Topographic Maps, the railroad spur along the western portion of the Site was no longer in operation and was not depicted in the map; however a portion of the railroad spur was observed to still be present in the area adjoining the westernmost warehouses during the Site Recon. According to the City Directory, the following

businesses were listed at the Site in 2004: Frank Alvar, Lupe DeLeon, Paramount Systems and Cadeco. 'Agncy 6 Rtls Mvg', 'STORAGE INC. UNITDVAN LNS', 'TRANSFER&' were listed under the Site address in 2006; California Coast Van & Storage and Charlton Chiropractic were present at the Site in 2009. Cal Air Service was present at the Site through 2006; Mayflower was present at the Site until 2006; James Moore Sculptures/Black Oak Studios was present at the Site from 2014 to 2017; Bartels Moving Systems Inc. was present at the Site from 2004 to 2017; Amberwood Products was present at the Site from 2009 to 2019; Miller Recycling was present at the Site from 2017 to 2019; Alano Club/Alano Club West was present at the Site from 2014 to present; and Piedmont Moving Systems operated through the present (City Directory and Site Reconnaissance).

- Current: According to the Site contact, Piedmont Partners LLC currently owns the Site. The full list of Site owners was not obtained due to the California Government Code 6254.21 that prevents the state and local agencies from posting information without written permission from an individual, and the cost to collect the information is prohibitive. The Site is located in an area zoned HI for heavy industrial use (San Jose Land Use Zoning, 2018).

Based on our review of the historical references, the presence of a gasoline pump in the southwestern portion of the Site, an oil house in the southeastern portion of the Site, and potentially polychlorinated biphenyl (PCB) containing transformers located in the central portion of the Site are considered a potential environmental concerns. The historical records did not indicate whether any underground storage tanks (USTs) or aboveground storage tanks (ASTs) were associated with the gasoline pump, and a review of the regulatory review and use/owner provided information did not indicate whether the gasoline pump was properly abandoned. The concerns related to the current and former industrial use of the Site are further discussed in Sections 3.2 and Section 3.3.

3.1.2 Adjoining and Surrounding Properties

Scarce development was evident at the Site and surrounding areas in the late 1800s. By 1939, the northeast adjoining property was developed into the SJSU Spartan Field and Stadium (later known as CEFCU Stadium), and the properties west of the Site are developed into various large and small buildings. Starting in 1948, the areas south and north of the Site begin to be developed. According to the 1953, Topographic Map, the Site is directly adjoined to the west by the Southern Pacific Railroad. By 1993, the Site and adjoining property are fully developed and appear similar to the current-day configuration. The Site was adjoined by the following properties: to the north by large, flat-roof industrial/commercial buildings and the SJSU Spartan Field and Stadium that is now known as the CEFCU Stadium; to the south by vacant/commercial/industrial properties; and to the east and west by large, flat-roof industrial/commercial buildings (Aerial Photograph). The following adjoining or surrounding area properties are of

environmental interest based on their current or historical use.

Adjoining Properties

- 1596 South 7th Street (eastern adjoining property) includes a pipe supply company from the early 1950s to early 1960s, a tool die manufacturer from late 1960s to early 1970s, a metal products company from early 1970s to mid-1990s, and a storage and moving company from the mid-1990s to at least 2006.
- 1566 South 7th Street (eastern adjoining property) includes an alcohol distributor from the early 1950s to early 1980s, a metal fabricator from the mid-1980s to early 2000s, and a scissor lift manufacturer from the mid-2000s to at least 2017.
- 1540 South 7th Street (eastern adjoining property) includes a variety of industrial and commercial operations (printing equipment supply manufacturer, masonry contractor, lumber and paint supply contractor, a vinyl shop, and a machine works company) from the early 1950s to the mid-1990s, and a fleet and trucking supplier from the mid-1990s to at least 2017.
- 1510 South 7th Street (eastern adjoining property) includes a paper warehouse from the mid-1960s to mid-1970s, and a concrete company from the late 1970s to at least 2014.

Surrounding Properties

- 1634 South 7th Street (approximately 300 feet southeast and inferred up-gradient) includes a motor company (fleet supply and potentially auto repair) from the early 1950s to mid-1980s, and a trucking supply company from the late 1980s to at least 2017.
- 1615 South 7th Street (approximately 200 feet southeast and inferred up-gradient) includes a lumber products manufacturer from the early 1950s to mid-1970s, a construction and storage company from the late 1970s to mid-1990s, a trucking repair service shop from the mid-1990s to late 1990s, and a recycling and roofing service shop from the late 1990s to at least 2017.
- 1418 to 1600 Monterey Road (approximately 900 feet southwest and inferred up-gradient) includes a stretch of parcels that were developed as early as 1939. The development appears to be commercial, and increased in size overtime until the late 1990s or early 2000s when a majority of the buildings were demolished. The parcels have since been redeveloped into a shopping center.

Potential releases of hazardous substances and/or petroleum products at the above adjoining and surrounding area properties may have adversely impacted groundwater and/or soil vapor quality at the Site. One or more of these properties may be discussed in Section 3.2 below.

3.2 Regulatory Review

Langan reviewed an environmental database search report, prepared by EDR, for the Site and surrounding area. The EDR report is a listing of properties identified on select federal and state standard source environmental databases within the approximate search radius. The following is a summary of records for the Site, adjoining properties, and surrounding properties with potential environmental concerns. The EDR is included as Appendix A.

3.2.1 Site

This Site is listed under two separate addresses at the same parcel: 1555 South 7th Street and 210 East Alma Avenue. The database listings will be summarized by address.

1555 South 7th Street

The Site is listed under this address in the Certified Unified Program Agency (CUPA) Listings, Resource Conservation Recovery Act (RCRA) Non-generator (NonGen)/No Longer Regulated (NLR), RCRA Small Quantity Generator (RCRA-SQG), RCRA Large Quantity Generator (LQG), Leaking Underground Storage Tank (LUST), Historic Lust (HIST LUST), Facility Index System/Facility Registry System (FINDS), Enforcement and Compliance History Information (ECHO), Hazardous Waste Substance Site List (CORTESE), Historic Hazardous Waste Substance Site List (HIST CORTESE), Hazardous Waste Tracking System (HWTS), Facility and Manifest Data (HAZNET), RCRA Large Quantity Generator (RCRA-LQG), National Pollutant Discharge Elimination System (NPDES), Hazardous Material Facilities (HAZMAT), California Integrated Water Quality System (CIWQS), California Environmental Protection Agency (CalEPA) Regulated Site Portal Data (CERS), and CalEPA Hazardous Chemical Management Facilities (CERS HAZ WASTE) databases under the names Piedmont Moving Systems, Amberwood Products Inc., Orchard Hardware Supply, Johnson Controls, Cal-Air, and Miller Recycling.

Piedmont Moving Systems is listed in the CERS database as a chemical storage facility, and currently generates wastes limited to trucking services, such as waste oil, motor oil, antifreeze, aerosols, and batteries. Services like brake services and filter cleaning are done off-Site. The facility has historically received eight violations. The violations consisted of the facility's failure to submit a hazardous materials inventory, submit a site map, provide hazardous materials training to employees in the event of a spill or release, place paper filters in the correct oily solids container, complete a Hazardous Material Business Plan, and the facility accumulated generated waste for longer than the regulated time of one year and six months. The facility has returned to compliance for all of the listed violations, has not received new violations since. As of 2000, the facility was listed as a non-generator of hazardous wastes; no historically generated wastes were specified in the RCRA NonGen/NLR database.

Amberwood Products Inc. has been listed as a LQG generator since 1995 for the generation of hazardous wastes, such as metals, ignitable wastes, methyl ethyl ketone, and spent non-halogenated solvents; no violations were listed in association with the LQG database. This facility is also associated with a HIST LUST closed case under the operator Orchard Supply Hardware. Further discussion regarding the LUST case is provided in the discussion of the previous environmental reports section 3.3.1 below. Orchard Supply Hardware was also listed as a SQG from 1986 to 1996 for the generation of ignitable wastes. No violations were listed for Orchard Supply Hardware.

Langan received a FOIA response from Santa Clara County Department of Environmental Health (DEH), which provided 28 documents for review. One of the 28 documents provided was an enforcement document related to Amberwood Products, Inc., a former operator at 1555 South 7th Street. This enforcement document indicates that in 2010, the People of the State of California filed complaint against Amberwood Products, Inc. for admitting to one violation of the CA Health and Safety Code after the SCC Department of Environmental Health Hazardous Materials Compliance Division (HMCD) performed inspections at the Site in 2008 and 2009. The violation indicated that Amberwood Products, Inc. disposed of various containers of flammable liquids into a dumpster and that $11,000 in fines must be paid. The complaint did not specify the location of the dumpster. Amberwood Products, Inc. paid this fee in 2010. The violation indicates that Amberwood Products, Inc. has had poor housekeeping practices in the past which could have impacted Site soil, soil gas and/or groundwater. Although this violation indicates that Amberwood Products, Inc. has exhibited poor housekeeping practices, the findings of the Phase II ESI, discussed in Section 3.3.1, did not identify impacts to Site soils, groundwater or soil vapor consistent with a release of hazardous substances to Site media. Therefore, this violation is considered a de minimis condition.

Johnson Controls/Cal-Air operated at the Site between 2001 and 2005. During this time, Johnson Controls generated hazardous wastes, including volatile organic compounds (VOCs), chlorinated VOCs (CVOCs), polychlorinated biphenyls (PCBs), and metals. Of the CVOCs generated, perchloroethylene (PCE) was generated.

Miller Recycling formerly operated at the Site as a scrap yard, and had active NPDES and CIWQS permits for industrial releases to stormwater. Both permits were active between 2017 and 2019. According to the Site Reconnaissance, Miller Recycling is no longer operating at the Site. The LUST case associated with the Miller Recycling listing is the same LUST case Orchard Supply Hardware.

210 East Alma Avenue

The Site is listed in the HAZMAT, CERS HAZ WASTE, CUPA LISTINGS, CERS, and RCRA NonGen/NLR databases under the names TG Motor Co. Inc., Speedy Skunk, and

Skunkworks Performance and Restoration. TG Motor Co. Inc. is listed as an auto repair shop. No further information was provided. Speedy Skunk/Skunkworks Performance and Restoration is an auto restoration shop, and generates used oil, used coolant, drained used oil filters, waste paint-related materials, and contaminated sand from sand blasting. This facility received five violations in 2017. The violations consisted of the facility's failure to properly dispose of oily rags (they were previously disposed into a dumpster on-Site), provide a Hazardous Materials Business Plan, determine if paint booth filters wastes were hazardous, apply for a hazardous waste generation permit, and the facility accumulated generated waste for longer than the regulated time of one year and six months. The facility has returned to compliance for all of the listed violations. No further violations were listed. Skunkworks Performance and Restoration has been listed in the RCRA non-generator/NLR database since 2018; no hazardous wastes were listed in association with this database, and no violations were recorded.

Environmental concerns related to the historical use of solvents and the closed LUST case at the Site are further discussed in Section 3.3.1.

3.2.2 Adjoining Properties

Below are summaries of adjoining properties of concern regarding possible contamination at the Site. The western and southern adjoining properties were not identified in any of the EDR databases.

Northeastern Adjoining – Smurfit Recycling Company/Rock-Tenn Company, Smurfit-Stone Container Enterprises (205 East Alma Avenue – inferred down-gradient)

This facility is listed in the CUPA Listings, HWTS, HAZNET, and HAZMAT databases. This facility has generated waste oil, mixed oil, and PCBs from 1999 to 2011. Disposal methods include transportation off-Site or discharge to sewer/potable water or NPDES permitted stormwater (with or without prior treatment. This facility has not received any violations, and is not considered a REC.

Eastern Adjoining – Serendipity Land Yacht/Leonard Rezendes/A & A Recycling/Sausedo Metal Products (1596 South 7th Street – inferred cross-gradient)

This facility is listed in the HWTS, HIST UST, HAZNET, CUPA LISTINGS, and The Statewide Environmental Evaluation and Planning System (SWEEPS) UST databases. This facility is listed as a metal product manufacturer that has generated waste oil, mixed oil, and other hydrocarbon solvents in 2010 and 2013. One UST installed in 1979 is currently in-use at the facility. The UST is a 1,000-gallon tank potentially containing waste oil or leaded motor vehicle fuel. This facility has not received any violations, and is not considered a REC.

Eastern Adjoining – Profess Publications/American Scissor Lift/AC Machining (1566 South 7th Street – inferred cross-gradient)

This facility is listed in the CUPA LISTINGS, HWTS, HAZNET, and HAZMAT databases. The facility is listed as an out-of-business auto repair shop, and generated waste and mixed oil in 1997 and 1998. The facility also has generated silver waste; however, the years of generation were not provided. No violations were found and no further information was provided. This facility is not considered a REC.

Eastern Adjoining – Sommer Property/Maloney Serv. Co./Student Transportation of America/Robert Sommer Property/Laidlaw Transit Services Inc. (1540 South 7th Street – inferred cross-gradient)

This facility is listed in the HIST CORTESE, RCRA-SQG, FINDS, ECHO, RCRA NonGen/NLR, LUST, HIST LUST, CERS HAZ WASTE, CORTESE, CUPA LISTINGS, NPDES, HAZMAT, Waste Discharge System (WDS), CIWQS, and CERS databases. Maloney Serv. Co. has been listed as a SQG as early as 1986; the generated hazardous wastes and violations were not listed. Student Transportation of America has been listed as a non-generator/NLR as early as 2005; the generated hazardous wastes and violations were not listed. Robert Sommer Property is associated with a LUST case regarding a leaking gasoline tank that was discovered in 1994. The listed remedial action is excavation, and the potential media affected is listed as groundwater. The case received a No Further Action (NFA) and was closed in 2000. A NPDES permit for industrial releases to stormwater was active from 2016 to 2018. It is unknown whether the permit has been renewed. The facility has historically received six violations. The violations consisted of the failure to: complete a hazardous material inventory, have an active EPA ID prior to treating, storing, and disposing of hazardous waste, to update hazardous waste pickup receipt, to provide a site map and legible waste manifest, and to log all emergency response training to employees. The facility has not achieved compliance for the six violations. No further information was provided. Based off the nature of the violations, this facility is not considered to constitute a REC for the Site.

Eastern Adjoining – Star Concrete/Sandman Inc. (1510 South 7th Street – inferred cross-gradient)

This facility is listed in the Underground Storage Tank (UST), US Mines, Emissions Inventory (EMI), CERS, CERS HAZ WASTE, CERS TANKS, CUPA LISTINGS, HAZMAT, CIWQS, and RCRA NonGen/NLR databases. This facility was listed in the US Mines database in 1997, and had an active NPDES permit for industrial releases to stormwater from 2000 to 2002. This facility has been listed in the USEPA Air Emission Inventory System from 1997 to 2017. This facility has received 35 violations, and compliance has been achieved for 33 out of 35 violations. The two violations that have not received

compliance consist of the failure of a diesel UST spill bucket that requires repairs, and the failure of an overfill prevention device for a 1,000-gallon red dye diesel tank that requires a new permit for the replacement of a drop tube. Based off the nature of the violations, this facility is not considered to constitute a REC for the Site.

3.2.3 Surrounding Area Properties

Based on our review of surrounding area property listings, most of the nearby listings were either: (1) closed by the regulatory agency, (2) located in the inferred hydrologically down-gradient direction from the Site, (3) determined to be a significant distance from the Site, and/or 4) determined not to have a potential impact on the Site based on our review of available database information. However, the following properties in the surrounding area are of environmental interest.

Lorentz Barrel & Drum Co. (1515 South 10th Street – Approximately 850 feet east and inferred cross-gradient)

This facility is listed in the National Priorities List (NPL), Superfund Enterprise Management System (SEMS), US Engineering (ENG) CONTROLS, US Institutional (INST) CONTROL, ENVIROSTOR, California State Water Resources Control Board data management system GeoTracker (GEOTRACKER), HIST Cal-Sites, HIST UST, LIENS 2, DEED, RCRA NonGen, Record of Decision (ROD), Potentially Responsible Parties (PRP), Integrated Compliance Information System (ICIS), Superfund Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Consent Decrees (CONSENT), FINDS, ECHO, and CORTESE databases. The facility is a former waste drum reconditioning and recycling facility which operated from 1947 to 1987. The drum contents included a variety of aqueous wastes including solvents, acids, oxidizers, and oil. Former operations included drum cleaning using heat, caustics, acids, steam, and/or mechanical methods. The drums were repainted, resealed, and shipped off-property. Processed liquid wastes generated from operation activities were discharged into sumps and basins located at the facility, which leached into soil and groundwater. The facility was added to NPL on October 4, 1989, and subsurface investigations began. Initial investigations included the removal of PCB contaminated pits; removal, recycling or treatment of thousands of gallons of processed plant liquids; and removal of 15 tons of contaminated scrap. The excavated PCB-contaminated pits were backfilled with clean fill and capped. Additional remedial actions included soil excavation, soil sampling, installation of monitoring wells, groundwater sampling, installation of a groundwater pump and treat system, installation of a soil vapor extraction system, implementation of a surface water control plan, and the installation of a chip seal over approximately two thirds of the five-acre property. Remedial investigations identified VOCs, pesticides, herbicides, PCBs, heavy metals, dioxins, and furans in soils at the facility. In addition, heavy metals have been found in the shallow groundwater originating at the facility and migrating approximately 2,000 feet to the northwest, away from the Site.

The major contaminants of concern include:

- 1,1,1-trichloroethane (1,1,1-TCA),
- PCE,
- TCE,
- Cis-1,2-dichloroethene (cis-1,2-DCE),
- Vinyl chloride,
- 1,1-dichloroethane (1,1-DCA),
- 1,2-dichloroethane (1,2-DCA),
- 1,1-dichloroethene (1,1-DCE),
- 1,2-dichloropropane (1,2-DCPA),
- PCBs, and
- 1,4-dioxane.

A summary of the facility's cleanup activities and progress on the USEPA Superfund Site indicates that contamination remains in the clay aquitard that is contaminating groundwater. A Focused Feasibility Study (FFS) was started in 2011 to evaluate the existing soil and groundwater remedies to determine if efficiency and effectiveness were adequate. FFS data collection consisted of soil and groundwater sampling (to close existing data gaps), soil gas sampling to investigate vapor intrusion, and groundwater sampling to determine the horizontal and vertical extent of the contaminated groundwater plume. The USEPA summary states that all contaminated soils are located beneath an asphalt cap surrounded by fencing, and groundwater contamination is limited to a zone that is not used for drinking water in the South Bay area. The USEPA summary indicates that a risk of vapor intrusion exists if the contaminated groundwater were to bypass the extraction network and migrate to the northwest; however, all groundwater sampling has indicates that this has not occurred. The EDR database summarizes the Five-Year Review Report, submitted in 2015, and indicates that 1,4-dioxane migration in groundwater may not be controlled and there is continued diffusion of contamination between the groundwater and soil vapor zone. Since the property is down-gradient relative to the Site, it is not considered a REC for the Site.

<u>Estes Express West/G.I. Trucking Company (1634 South 7th Street – Approximately 300 feet southeast and inferred up-gradient)</u>

This facility is listed in the UST, HIST UST, RCRA NonGen/NLR, LUST, HIST LUST, CORTESE, HIST CORTESE, CERS, CERS HAZ WASTE, SWEEPS UST, CERS TANKS, CUPA LISTINGS, NPDES, HAZMAT, WDS, and CIWQS databases. A LUST case was opened in 1994 when contaminated soil was detected after a 550-gallon unspecified petroleum UST was removed from the facility. This LUST case was closed in 2016.

According to the HIST UST, UST, and SWEEPS UST databases, the facility is associated with the following tanks:

Inactive or Active	Tank Number	Year Installed	Size	Contents
Inactive	001	1984	10,000-gallons	Diesel
Inactive	001	Unknown	10,000-gallons	'Regular Fuel'
Inactive	002	Unknown	10,000-gallons	Diesel
Inactive	1-D	Unknown	10,000-gallons	Diesel
Inactive	1-G	Unknown	10,000-gallons	Diesel
Active	Unknown	Unknown	10,000-gallons	Diesel

This facility has obtained a NPDES industrial releases to stormwater permit since 1992. The most recent listed NPDES permit began in 2015, and it is unknown whether the facility currently has an active permit. This facility has historically received 35 violations. Compliance has been achieved for 30 out of 35 violations. The five violations that have not achieved compliance consist of the failure to: apply for a general industrial permit, establish an emergency response plan, repair a leaking pipe detection system, and have approved UST monitoring plans. Due to the proximity of this facility to the Site, the nature of its operations and its current open violations that have not achieved compliance, this facility is considered a REC.

Valley Recycling (1615 South 7th Street – Approximately 200 feet southeast and inferred up-gradient)

This facility is listed in the Solid Waste Facility/Landfill (SWF/LF) and CERS databases. Valley Recycling accepts demolition and construction wastes for transfer and processing. No further information was provided. This facility is not considered to constitute a REC for the Site.

Sun Garden/Sungarden Chevron (1418 to 1600 Monterey Road – Approximately 900 feet southwest and inferred up-gradient)

This facility is listed in the CPS-SLIC, CERS, CERS HAZ WASTE, CERS TANKS, CUPA LISTINGS, HAZMAT, UST, HWTS, LUST, HIST LUST, SWEEPS UST, CORTESE, HAZNET, and HIST CORTESE databases. According to GeoTracker, this facility currently has an open case regarding soil contamination due to historic use of the properties ranging from 1418 to 1600 Monterey Road. The total area of concern is approximately 20 acres, and historic operations include automotive repair, auto wrecking yard, and a canning plant.

Contaminants of concern in soil include arsenic, diesel, lead, nickel, and PCBs. This facility has also received closure for three historic UST fuel leaks. No remedial actions have been recorded to date. This facility is considered a REC due to its current open remediation case, up-gradient location, and proximity to the Site.

Glencore Recycling LLC (1695 Monterey Highway – Approximately 1,500 feet south and inferred up-gradient)

This facility is listed in the SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-LQG, ENVIROSTOR, CPS-SLIC, CERS HAZ WASTE, US FIN ASSUR, 2020 COR ACTION, CUPA LISTINGS, EMI, ICE, MANIFEST, NPDES, CERS, HWP, and CIWQS databases. This facility is a recyclable material merchant wholesaler that handles scrap and waste materials from secondary smelting and refining of nonferrous metals. The RCRA database indicates that this facility has generated, stored, or transported hazardous wastes since at least 1964. Hazardous wastes include alkaline solutions with metals, aqueous solutions containing reactive anions, metal sludge and dust, waste and mixed oil, resin waste, solvent mixtures, ash, photochemicals, laboratory waste, ignitable wastes, lime sludge, phosphorous sludge, sulfur sludge, alum and gypsum sludge, gas scrubber waste, non-halogenated solvents, electroplating wastewater, etc. The database indicates that this facility has received four violations in 2017, and has achieved compliance for all four. This facility is listed in the US EPA AIR Emissions database for regularly emitting ozone, particulate matter, lead, carbon monoxide, nitrogen dioxide, and sulfur dioxide. Additionally, this facility has been an active permitted industrial stormwater generator in since 1992.

According to EnviroStor, this property has been used for heavy manufacturing operations as early as the 1930s, and has since been used as a metal recycling facility. Current facility operations include the use of cyanide/caustic container storage, acid and solid waste container storage, spent cyanide treatment and storage tanks, acid processing tanks, tray furnaces, crucible furnaces, refinery furnaces, a ball mill, and mechanical processing equipment.

According to GeoTracker, a remediation case was opened at the facility in 1981 due to the pumping of ponded rainwater from a processing area into an unpaved area. The pumped water contained cyanide. Contaminated soil and groundwater was discovered, and led to soil excavation, soil sampling, monitoring well installation, and groundwater sampling events. The groundwater monitoring results indicated that contamination was declining regularly, and later results were below the maximum contaminant levels. This case was closed in 2016.

Due to this facility's up-gradient location, and current and historic industrial operations, it is considered a REC.

3.2.4 Orphan Listings

According to EDR, an orphan listing is a property that cannot be mapped due to poor or inadequate address information. Upon further research, Langan concluded that the four orphan listings are not considered properties of concern for one or more of the following reasons: (1) closed by the regulatory agency, (2) located in the inferred hydrologically down-gradient direction from the Site, (3) determined to be a significant distance from the Site, and/or 4) determined not to have a potential impact on the Site based on our review of available regulatory database information.

3.2.5 Water Wells, Injection Wells and Oil and Gas Wells and Facilities

A review of the Geocheck section of the EDR Regulatory Database Report (Appendix A) identified one inactive municipal supply water well. The address listed for the well is 1221 South Bascom Avenue in San Jose, California, which is located approximately five miles southwest of the Site. A review of the California Water Boards Groundwater Information System Groundwater Ambient Monitoring and Assessment Program (GAMA) did not identify any water wells on-Site. A review of the California Geologic Energy Management Division (CalGEM) WellSTAR Well Finder did not identify any injection or gas wells on or within one mile of the Site. The 2018 previous report by AEI also identified a monitoring well in the southwestern portion of the Site that was installed to determine potential contamination regarding a LUST case on-Site. The monitoring well has since been decommissioned. The 1961 and 1966 Sanborn Maps indicated the presence of a deep well pump and 10,000-gallon pressure tank in the center of the Site. The previous environmental report prepared by AEI includes a map from 1976 that indicates the presence of a storage tank and 756-foot deep water well in the same location as the deep well pump and pressure tank featured in the Sanborn Maps. This well was not observed during the Site reconnaissance and it is unknown if it has been properly abandoned. The presence of the well was investigated as part of the 2020 Phase II ESI by conducting a geophysical survey of the potential deep water well location. No evidence of a deep water well was found with the magnetometer in the suspected area of the Site.

3.3 User/Owner Provided Information

3.3.1 Previous Environmental Reports – Langan Phase II ESI

Langan Phase II ESI

A June 30, 2020 Phase I ESA was prepared by Langan for the Subject Property that identified three RECs associated with the Subject Property. Based on the findings of the June 30, 2020 Phase I ESA, a Phase II ESI was performed by Langan on August 17 and August 25, 2020 that included sampling 10 soil borings to 4 feet bgs, 5 grab groundwater samples, and 6 temporary soil gas points. The locations of the sampling points are shown in Figure 4 – Sample Location Map.

Soil Findings

The soil sample analytical results were screened against the USEPA RSLs for commercial/industrial sites and California Regional Water Quality Control Board (CA RWQCB) Environmental Screening Levels (ESLs) for commercial/industrial direct exposure criteria. The analytical results are summarized on Table 1 and any exceedances of applicable standards are shown on Figure 5. A summary of the soil investigation findings is presented below:

- No field indications of environmental impacts (i.e. staining, odors, and/or elevated photoionization detector [PID] readings) were observed in borings SB-1 through SB-10. All PID readings were between 0.0 and 0.4 parts per million (ppm).
- No VOCs, SVOCs, TPH, or PCBs were detected at concentrations in excess of the applicable screening levels in any of the soil samples analyzed.
- Concentrations of one metal exceeded screening levels in 10 samples:
    - Arsenic was detected in the 10 soil samples at concentrations ranging from 2.0 to 6.2 milligrams per kilograms (mg/kg) that exceed the CA RWQCB ESL for commercial/industrial land use of 0.31 mg/kg. These concentrations exceed the commercial/industrial CA RWQCB ESL, but concentrations of this magnitude are generally considered to be background for San Francisco Bay Area soils. Two published sources of natural concentrations metals in California soils include Kearney (1996) and Hunter et. al (2005), both of which report background concentrations of arsenic ranging between 0.6 and 11 mg/kg and up to 12.7 mg/kg (a 95th percentile value), respectively.
- No other exceedances of screening levels were identified

Groundwater Findings

The groundwater analytical data was screened against the USEPA RSLs commercial/industrial sites and against the CA RWQCB ESLs for groundwater vapor intrusion residential and commercial human health risk. The groundwater analytical data is provided on Table 2 and any exceedances of the applicable standards are shown on Figure 6. A summary of the investigation findings is provided below:

- No VOCs, SVOCs, TPH, or dissolved metals were detected at concentrations in excess of the applicable ESLs.

- Concentrations of one metal was detected in one of the five groundwater samples in the total metal analyses:
    - Total mercury was detected in sample GW-1 at a concentration of 2.49 µg/L, which exceeds the USEPA RSL/Maximum Contaminant Level (MCL) for drinking water (2.0 µg/L).
- No other exceedances of screening levels were identified.

The detection of total mercury at a concentration slightly above the RSL/MCL is anomalous. Based on the lack of detectable concentrations of mercury in site soil, no known historical uses of mercury onsite, and no use of onsite or nearby groundwater as a drinking water source, the anomalous detection of total mercury is insignificant.

Soil Gas Findings

The sub-slab soil gas results are summarized in Table 3 and any exceedances of the applicable standards are shown on Figure 7. The soil gas sample analytical results were screened against the CA RWQCB ESLs for Sub-Slab/ Soil Gas Vapor Minimum for residential and commercial/industrial sites, and the USEPA Vapor Intrusion Screening Level (VISL) for residential and commercial/industrial sites. Langan calculated the USEPA VISLs using a Total Cancer Risk (TCR) of 1x10-6 and Target Hazard Quotient (THQ) of 1. A summary of the investigation findings is provided below:

- Benzene was detected in samples SG-3, SG-4, and SG-6 at concentrations of 17 µg/m^3, 17 µg/m3, and 15 µg/m^3, respectively, which are well below the USEPA VISL (52.4 µg/m3) for commercial/industrial sites, although minimally exceed the CA RWQCB ESL for commercial/industrial land use of 14 µg/m3.
- No other exceedances of screening levels were identified.

Phase II ESI Conclusions:

Based off the findings of the Phase II ESI, soil, groundwater and soil gas conditions at the Site were generally shown to be below USEPA RSLs for commercial/industrial sites. The Phase II ESI did not identify gross residual impacts associated with the closed LUST listing. Therefore the closed LUST case is considered and HREC.

Total mercury exceeded the USEPA RSL/MCL in one groundwater sample (GW-1), and are potentially associated with documented releases of hazardous substances at surrounding properties and operations at off-Site facilities. Although operations at adjoining and surrounding properties are identified as a REC for the Site, since no potable wells currently exist at the Site, or are planned as part of future development activities, the groundwater conditions at the Site are unlikely to pose a threat to health and environment.

Soil gas quality conditions at the Site are minimally impacted with benzene (concentrations ranged in three samples from 15 micrograms per cubic meter (µg/m^3) to 17 µg/m^3), but are well below the USEPA VISLs 52.4 µg/m^3 for commercial/industrial sites. Given the absence of detectable benzene in groundwater or soil at the site, the low level detections of benzene in soil vapor are expected to be attributable to de minimis staining on the overlying concrete surface. Further, soil gas conditions at the Site are expected to be mitigated by future development activities that will address potential indoor air impacts from vapor intrusion. Future site development includes the construction of a large delivery station equipped with high ceilings, heavy duty slab, and ventilation. Site preparation activities will include demolition of existing structures and pavement, scarification and re-compaction of Site soils, and import/placement of clean fill soil to support the installation of a commercial slab-on-grade foundation. The future development activities are expected to result in the removal and volatilization of the minor concentrations of benzene detected in soil vapor.

3.3.1 Previous Environmental Reports – 2018 Limited Environmental Site Assessment (AEI)

Two environmental reports, 2018 and 2007 Government Limited Environmental Site Assessment Reports, both prepared by AEI, were available for review and are provided in Appendix B. AEI prepared this report for the Site, referred to as 1555 South 7th Street, San Jose. The findings of the 2007 report were consistent with the findings of the 2018 report; therefore, a summary of the most recent report is provided below.

The 2018 Limited Environmental Site Assessment identified the following HREC and other environmental concerns applicable to the Site:

- The Site was identified as having a closed LUST case. The Site previously housed four USTs, including one 550-gallon gasoline UST (referred to as Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C) and one 10,00-gallon methanol UST (Tank M). The methanol UST was removed in March 1989 and the three gasoline USTs were removed in April 1989; during removal, Tank B was noted to be in poor condition with visible holes. Soil samples collected from the Tank B excavation yielded detections of 8,700 mg/kg TPH from gasoline (TPHg), 16 mg/kg benzene, 260 mg/kg toluene, 170 mg/kg ethylbenzene, and 740 mg/kg xylenes. According to the 2019 San Francisco Bay Regional Water Quality Control Board Environmental Screening Level Guide for Non-Cancer Hazard Shallow Soil Exposure in Commercial/Industrial risk levels, the benzene, toluene, ethylbenzene, xylene results were below the screening levels; however, TPHg was not below the 2,000 mg/kg screening level. Soil was over-excavated from the Tank B pit, and confirmation samples collected at 13.5 feet bgs did not yield detections of TPHg or benzene, toluene, ethylbenzene, and xylenes (BTEX). The stockpiled soil reused as backfill for the excavation after a four-part composite sample yielded non-detects of TPHg and

BTEX. Additionally, groundwater sampling conducted at a nearby monitoring well (MW-1) from June 1990 to July 1992 yielded no detections of the contaminants of concern. Subsequently, the case was granted closure by the Santa Clara Valley Water District in May 1993. The former UST areas are shown on Figure 2. The September 10, 2020 Phase II ESI, performed by Langan did not identify field indicators of environmental impacts in site soils; i.e. staining, odors, and/or elevated photoionization detector [PID] readings) were not observed in borings advanced at the Site. Further, soil, groundwater and soil vapor analytical results do not indicate that residual impacts from the historical LUST event remain at the Site at concentrations exceeding USEPA RSLs or VISLs for commercial/industrial land use. Based off the closure status and the findings of the Langan Phase II ESI, this LUST case is considered an HREC

- The Site previously housed tenants with documented storage and generation of hazardous materials that contained chlorinated, oxygenated, hydrocarbon and halogenated solvents. Cal Air-Johnson Controls was documented to have stored and used chlorinated solvents containing TCE from 2001 to 2005; other former and current tenants were documented generators of oxygenated, hydrocarbon, and halogenated solvents since 1996. Violations involving paperwork and hazardous materials labeling issues were documented for the various tenants.

Additional relevant information based on our review of the above-listed report is summarized below.

- Amberwood Products Inc., which operated in the second warehouse from the north from 2014 to 2019, was noted to have stored various wood furniture products, such as lacquers, thinners, dye stains, acetone, and paint, as well as compressed gases, motor oil and propane. The report also noted that Amberwood housed two internal spray booths for their cabinet production operations.

- San Jose Harley Davidson, which operated at the Site from 2007 to an unknown date, was documented to have stored motorcycle maintenance materials, including: oil, spray paint, gas, propane, adhesives, lubricants, cleaners, pipe sealant, and gasket sealers.

- Double R Cycles, which operated at the Site from 2006 to 2007, was documented to have stored oil, coolant, gas, waste oil, and oil filters.

- According to the AEI's 2018 Phase I ESA, multiple sump pumps are located within the loading dock areas of the Site. Langan did not observe any sump pumps during the 2020 Site reconnaissance.

4.0 2020 SITE RECONNAISSANCE

A Site reconnaissance was conducted in 2020 that focused on the spatial extent of the Site and then progressed to the adjacent and surrounding properties. Several areas that were not accessed during the first Site reconnaissance visit due to access and time constraints were revisited during a second Site visit. The assessment of the adjacent and surrounding properties was limited to identifying, if possible, any indications of past or current use that may involve the use, storage, disposal, or generation of hazardous substances or petroleum products; noting the general type of current use; the general topography of the surrounding area; and providing a general description of adjoining or adjacent structures. The adjacent properties were observed from an on-Site vantage point.

A Site reconnaissance was performed by Stephanie Lee of Langan on June 16, 2020 and June 26, 2020. Ms. Lee was accompanied by Mark Beltramo, President of Piedmont Moving Systems during the first Site reconnaissance, was unaccompanied during the second visit. The weather at the time of the inspections was overcast and approximately 73 degrees Fahrenheit on June 16, and sunny and approximately 75 degrees Fahrenheit on June 26. Langan was not able to access Building O, operated by iCelebrate Event Rentals, because the iCelebrate personnel present did not have the key to those buildings, which are reportedly used to store party rental supplies.

General Site Setting Information	
Current use(s) of the property	As shown on Figure 2, the Site is a developed property with a multi-unit warehouse building, a two-story office building, three one-story warehouses, one two-story warehouse, parking lots and truck parking/loading areas. The four southeastern one- and two-story warehouses are occupied by iCelebrate Event Rentals, James Moore Art Studio, and Fence 4 Rent; the central eastern two-story office building is occupied by Alano Club West; and the remaining western multi-unit building is occupied by Piedmont Moving Systems storage and transport, Excess Solutions electronics retailer, and SpeedySkunk Performance & Restoration automobile repair shop.
Past use(s) of the property	The Site was previously occupied by: • Sunsweet Growers Inc./Sunset Growers dried fruit packaging facility from 1969 to 1976; • Orchard Supply Hardware from 1977 to 1994; • Cal Air Inc./Johnson Controls from 1995 to 2009; • DiMattia Construction from 2014 to unknown date; • Excess Solutions from 2014 to present; • Cilian Group from 2014 to unknown date; • Alano Club West from 2018 to present; • Double R Cycles from 2006 to 2007; • San Jose Harley Davidson in 2007; • TG Motor Co Inc. in 2011. • Green Waste Disposal/Miller Recycling from 2007 to 2019; and

General Site Setting Information	
	• Amberwood Products in the second warehouse unit to the north from 1995 to 2019;
Current use(s) of adjoining properties	Current and past uses in the surrounding area are further described in Section 3.1.2.
Past use(s) of adjoining properties	Langan did not observe visible indications of past uses at adjoining properties.
Current or past uses in the surrounding area	Surrounding properties consist of commercial and industrial uses.
Geologic, hydrogeologic, hydrologic, and topographic conditions	Geologic, hydrogeologic, hydrologic and topographic conditions are further described in Section 2.3.
General description of structures	The Site is improved with the following buildings; the Site representative was unable to provide exact IDs and sizes for all buildings. Building IDs A, 4D, F, K, L, and N were confirmed during the Site reconnaissance. The exact size of buildings K, L, M, N, and O were also confirmed during the Site reconnaissance and by a Site survey provided by the Site representative. • Building N: A two-story 8,245 square feet building located in the southeastern portion of the Site; • Building L: A one-story 3,220 square-foot building located in the southeastern portion of the Site; • Building M: A one-story 2,340 square feet building located in the southeastern portion of the Site; • Building O: A one-story 4,000 square feet building located in the southeastern portion of the Site; • Building K: A two-story 8,040 square feet building located in the central-eastern portion of the Site; and • Buildings A, B, C, 4D, E, F, and 210 East Alma: A two-story, approximately 269,706 square-foot building) located in the majority of the Site in the west.
Roads	The Site is adjoined by East Alma Avenue to the north, South 7th Street to the east, and railroad tracks followed by Cottage Grove Avenue to the west.
Potable water supply	The City of San Jose provides the potable water supply.
Sewage disposal system (including septic systems and drainfields)	The City of San Jose provides the sewage disposal system.

Feature	Observed?		Description
	Yes	No	
Interior Observations			
Hazardous substances and petroleum products	X		Various automobile maintenance materials were observed in Piedmont Moving System's truck maintenance area (Unit A, western building), Speedyskunk Performance & Restoration (northernmost unit of western building), and James Moore Art

Feature	Observed?		Description
	Yes	No	
in connection with identified uses			Studios, Fence 4 Rent, and iCelebrate (southeastern buildings). Welding materials were observed in the James Moore Art Studio and Fence 4 Rent workshops. Painting materials were observed in James Moore Art Studios and auto body painting materials were observed in Speedyskunk Performance & Restoration. Forklift and associated propane use was observed in Piedmont Moving Systems, Fence 4 Rent, Alano Club West, and iCelebrate Event Rentals. Standard cleaning materials were observed in all occupied tenant spaces at the Site. The materials associated with Piedmont Moving Systems include: • Drums containing diesel, used motor oil, and oil filters • An AST containing motor oil • Containers of coolant • Spill absorbent material The materials associated with Speedyskunk Performance & Restoration include: • Drums containing waste oil, antifreeze, used containers of motor oil, used containers of paint cans, and acetone • Automatic transmission, starting, brake and carburetor cleaning fluids, • Compressor oil • Coolants • Spray/gasket sealants • Wheel bearing grease • Containers of motor oil • Cans of spray paint The materials associated with James Moore Art Studio include: • Three 262 cubic feet containers of compressed argon and carbon dioxide gas (for welding) • Three gallons of all purpose degreaser • Water-based paints • Two cans of brake fluid • Motor oil • Spill absorbent material The materials associated with Fence 4 Rent include: • 30 gallons of gasoline • 10 262 cubic feet containers of compressed carbon dioxide, argon and oxygen gas (for welding) • Paint thinner • Simple Green cleaning detergent • Propane tanks (for forklifts)

Feature	Observed?		Description
	Yes	No	
			The materials associated with iCelebrate Event Rentals include: • Propane tanks (for forklifts) • Motor oil
Storage tanks	X		Langan observed one motor oil AST in Piedmont Moving System's truck maintenance area, located in Unit A of the western warehouse. The AST was observed to be in good condition; however, staining at least one square foot in size and spill absorbent material was observed in the immediate vicinity of the AST and adjoining drums of waste oil.
Strong, pungent, or noxious odors	X		Langan identified odors related to auto body painting operations within SpeedySkunk Performance & Restoration. These odors were generated from an autobody paint booth in the southeastern corner of the building occupied by SpeedySkunk Performance & Restoration.
Pools of liquid, standing surface water, sumps containing liquids.		X	Langan did not observe any pools of liquid, standing surface water or sumps containing liquids at the Site.
Drums or other containers, including unidentified substance containers	X		Langan observed the drums and containers of diesel, used oil, and other petroleum products and hazardous wastes (described above).
Electrical or hydraulic equipment that may contain PCBs (including electrical transformers)	X		Langan observed several potentially PCB-containing equipment or transformers on the Site, including: • Three transformers northwest of the central warehouse • Several possible transformers indoors, including within the former Amberwood Products warehouse Langan also observed three hydraulic lifts in the Speedyskunk Performance & Restoration warehouse. Staining was not observed in the area directly underneath the hydraulic oil tank; however, stains ranging from one to several square feet in size were observed under the center of the lift, presumably from hoisted vehicles.
Heating/Cooling System			Langan noted HVAC ventilation piping throughout the various warehouses, and observed a heat pump on the eastern side of building A, near the Piedmont Moving Systems offices.
Stains or corrosion		X	Langan observed staining ranging from one-to-several square feet within the Speedyskunk vehicle maintenance and hazardous materials storage areas, and within the Piedmont Moving Systems truck maintenance areas in the vicinity of the hazardous materials storage area. Floor drains were not observed in the vicinity of the observed stains. Floors in the vicinity of the stains were observed to be in good condition.

Feature	Observed?		Description
	Yes	No	
Drains and sumps		X	Langan did not observe floor drains or sumps.
Other Equipment and Observations	X		Langan observed tracks from a floor conveyor/transport system in the central warehouses occupied by Piedmont Moving Systems within the multi-unit building. According to Mark Beltramo of Piedmont Moving Systems, the conveyor system was operated by Orchard Supply Hardware and is no longer in use.
Exterior Observations			
Pits, ponds, or lagoons		X	Langan did not observe pits, ponds, or lagoons at the Site or adjoining properties.
Stained soil or pavement	X		Langan observed at least five areas of staining from parked vehicles, ranging from one to several square feet throughout the parking and driveway areas. Some areas of staining were observed to be present on pavement with observed cracks presumably from general wear and tear. Staining was not observed in the direct vicinity of drains; however Langan was not able to observe all areas of pavement in the due to the presence of parked cars and trucks.
Stressed vegetation		X	Langan did not observe stressed vegetation at the Site.
Solid waste	X		Langan observed a stockpile of fill in the southwestern portion of the Site. According to Mark Beltramo of Piedmont Moving Systems, the stockpiled material consisted of excess fill used for subsurface utility repairs conducted in 2019. Langan also observed at least five 3-square-foot areas of what appeared to be bird and other animal waste in Unit C of the western warehouse..
Drums or other containers, including unidentified substance containers	X		Langan observed abandoned empty and potentially-filled buckets of diesel engine oil, hydraulic oil, and other car maintenance products in the southernmost area of the storage yard formerly occupied by Miller Recycling. One-to-several square feet-sized stains were observed in the vicinity of the abandoned materials. Pavement in the vicinity of the stains were observed to be in good condition. No drains were observed in the vicinity of the staining.
Wastewater	X		No cisterns, water wells, or wastewater discharges were observed at the Site; however, Langan did observe several storm drains in the driveway and storage areas throughout the Site, and a rip rap drainage swale in the southwestern section of the Site.
Wells		X	Langan did not observe any wells at the Site.
Septic Systems		X	The sanitary sewer system is provided by the City of San Jose; septic systems are not present at the Site.
Tanks		X	No storage tanks were identified in the exterior Site. However, Langan did observe a pavement cutout in the area proximate to

Feature	Observed?		Description
	Yes	No	
			a UST documented to have been previously located in the northwestern portion of the Site.
Other Equipment and Observations	X		Langan observed the following equipment throughout the Site: • Forklifts are used in the areas occupied by Piedmont Moving Systems, iCelebrate Event Rentals and Fence 4 Rent • Various kitchen, laboratory, medical, electronic, and other equipment is stored in the buildings occupied by Piedmont Moving Systems and Excess Solutions. • Railroad tracks were observed in the area directly west of the central western warehouse building occupied by Piedmont Moving Systems. Piedmont Moving Systems was unable to provide additional information on the history of the tracks. • Langan observed an air compressor and sand blaster in the eastern portion of the building occupied by SpeedySkunk, and an air compressor in the area occupied by Fence 4 Rent.

5.0 EVALUATION

5.1 Summary and Conclusions

Langan has identified one HREC, one de minimis condition, and off-Site RECs related to adjoining and surrounding property use (historical and current) after review of the Phase I ESA and Phase II ESI, and is discussed in detail below.

One on-Site HREC is related to a historic LUST case that is now closed. The Site previously housed four USTs, including one 550-gallon gasoline UST (referred to as Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C) and one 10,00-gallon methanol UST (Tank M). Tank B was discovered to be leaking after its removal in 1989, and remediation began in 1990. The exact location of this tank is unknown; however, it is assumed to be in the southwestern portion of the Site, due to the adjacent location of a former monitoring well. Remediation actions consisted of soil excavation, soil sampling, monitoring well installation, and groundwater sampling. AEI considered the closed case an HREC. The Langan Phase II ESI conducted on August 17 and August 25, 2020 did not identify gross residual impacts in site soils; i.e. staining, odors, and/or elevated photoionization detector [PID] readings) in borings advanced at the Site. Further, soil, groundwater and soil vapor analytical results do not indicate that residual impacts from the historical LUST event remain at the Site at concentrations exceeding USEPA RSLs or VISLs for commercial/industrial land use. Based off the closure status and the findings

of the Langan Phase II ESI, this LUST case is considered an HREC.

The second on-Site de minimis condition is related to a 2010 violation by Amberwood Products, Inc., which incited a complaint against the operator. Inspections performed by the HMCD in 2008 and 2009 indicated that Amberwood Products, Inc. had illegally disposed of containers of flammable liquids into a dumpster. The location of the dumpster was not specified in the complaint. This violation indicates that Amberwood Products, Inc. has exhibited poor housekeeping practices. Since the results of the Phase II ESI conducted on August 17 and August 25, 2020 did not identify impacts to Site soils, groundwater or soil vapor consistent with a release of hazardous substances to Site media, this violation is therefore considered a de minimis condition.

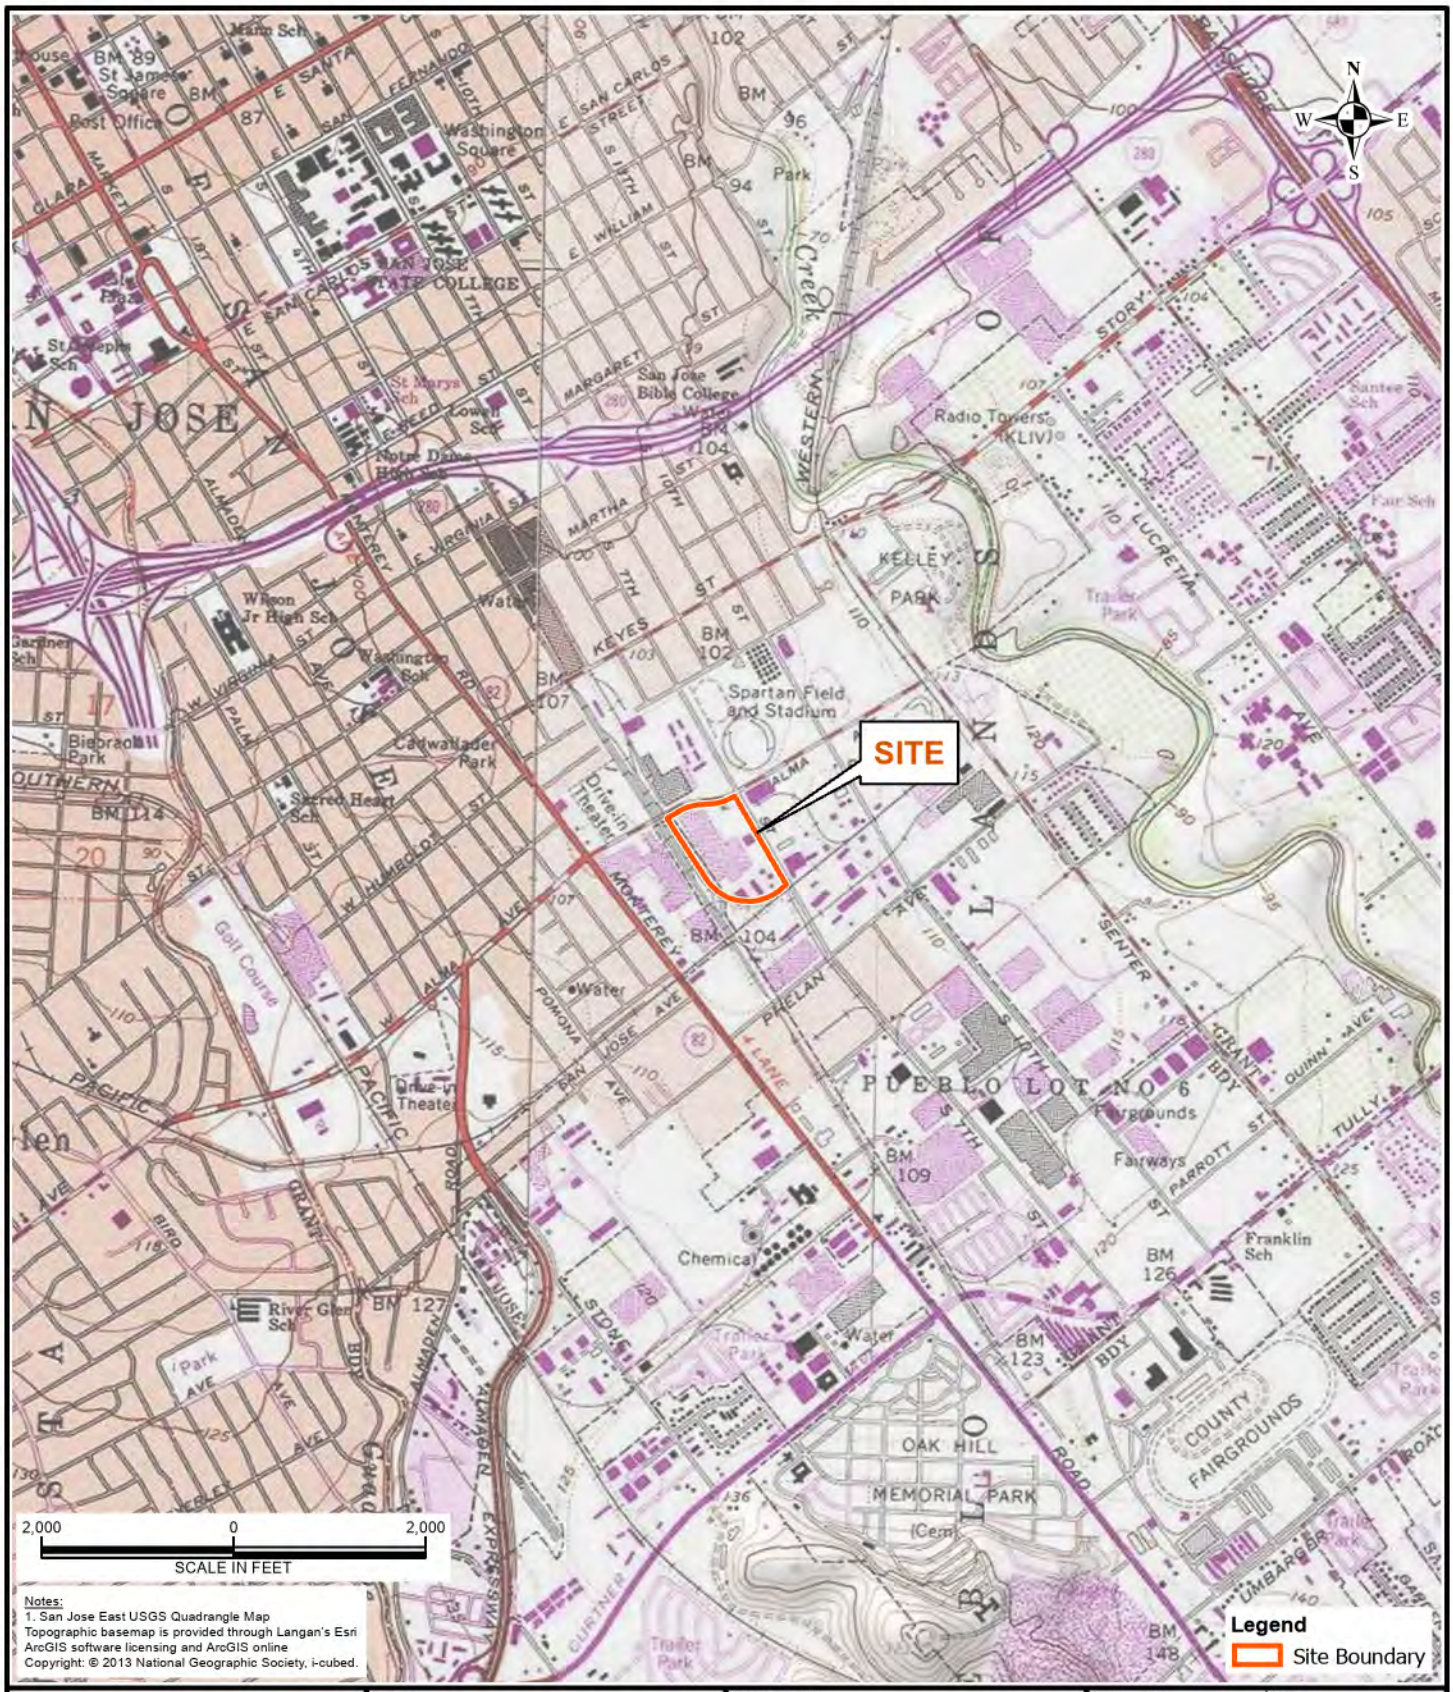
The off-Site RECs are related to adjoining and surrounding property uses that have the potential to affect the Site.

- Estes Express West/G.I. Trucking Company (1634 South 7th Street – Approximately 300 feet southeast and inferred up-gradient): has five open violations and is located up-gradient from the Site. The five open violations consist of the failure to: apply for a general industrial permit, establish an emergency response plan, repair a leaking pipe detection system, and have approved UST monitoring plans. Due to the proximity of this facility to the Site, the nature of its operations and its current open violations that have not achieved compliance, this facility is considered a REC.

- Sun Garden/Sungarden Chevron (1418 to 1600 Monterey Road – Approximately 900 feet southwest and inferred up-gradient): has an open remediation case, and is located up-gradient from the Site. The open case is regarding soil contamination due to historic use of the properties. Historic operations include automotive repair, auto wrecking yard, and a canning plant. Contaminants of concern in soil include arsenic, diesel, lead, nickel, and PCBs. This facility has also received closure for three historic fuel leaks. This facility is considered a REC due to its current open remediation case, up-gradient location, and proximity to the Site

- Glencore Recycling LLC (1695 Monterey Highway – Approximately 1,500 feet south and inferred up-gradient): has been used for heavy manufacturing operations as early as the 1930s, and has since been used as a metal recycling facility. This facility is considered a REC due to its up-gradient location, historic soil and groundwater cases that are now closed, and its current and historic industrial operations.

This report combines the findings of the Phase I ESA and the Phase II ESI completed for the site.



The June 30, 2020 Phase I ESA identified three on-Site RECs. However after Langan conducted the Phase II ESI it revised the conclusions of the Phase I ESA report. The soil, groundwater, and soil gas conditions at the Site were generally shown to be below USEPA RSLs for

commercial/industrial sites.

The Langan Phase II ESI did not detect field indications of environmental impacts in Site soils. No VOCs, SVOCs, TPH, or PCBs were detected in excess of the CA RWQCB ESLs commercial/industrial uses in any of the soil samples analyzed. No VOCs, SVOCs, TPH, or dissolved metals were detected at concentrations in excess of the applicable CA RWQCB ESLs in groundwater samples collected. The Phase II ESI identified arsenic in Site soils consistent with background concentrations for San Francisco Bay Area. Total mercury was detected in one groundwater sample GW-1 (2.49 µg/L), slightly above USEPA RSL/MCL for drinking water of 2.0 µg/L, however site is not planned for drinking water uses. Benzene was detected in three soil gas samples at concentrations between 15 µg/m^3 and 17 µg/m^3, which slightly exceeds the CA RWQCB ESL for commercial/industrial land use of 14 µg/ m^3, but are well below the USEPA VISLs 52.4 µg/m^3 for commercial/industrial sites.

Based on the absence of detectable benzene in groundwater or soil at the site, the low level detections of benzene in soil vapor are expected to be attributable to de minimis staining on the overlying concrete surface. Further, soil gas conditions at the Site are expected to be mitigated by future development activities that will address potential indoor air impacts from vapor intrusion. Future site development includes the construction of a large delivery station equipped with high ceilings, heavy duty slab, and ventilation. Site preparation activities will include demolition of existing structures and pavement, scarification and re-compaction of Site soils, and import/placement of clean fill soil to support the installation of a commercial slab-on-grade foundation. The future development activities are expected to result in the removal and volatilization of the minor concentrations of benzene detected in soil vapor.

Notes:
Soil results were compared to CA RWQCB ESLs for Soil Direct Exposure Human Health Risk Levels Residential and Commercial/Industrial (July 2019).
RWQCB - Regional Water Quality Control Board
ESL - Environmental Screening Level
CAS - Chemical Abstract Service
NS - No standard
mg/kg - Milligrams per kilogram
ND - Not detected
Q - Qualifier
MDL - Method detection limit
RL - Reporting Limit
DF - Dilution factor

Qualifiers:
U - The analyte was analyzed but not detected
J - Estimated value. The target analyte concentration is below the RL but above the MDL.

Exceedance Summary:
10 - Result exceeds CA RWQCB ESL for Soil Direct Exposure Human Health Risk Levels - Residential - Minimum
10 - Result exceeds CA RWQCB ESL for Soil Direct Exposure Human Health Risk Levels - Commercial/Industrial - Minimum
10 - MDL exceeds screening level

Notes:
Groundwater results were compared to CA RWQCB ESLs for Groundwater Vapor Intrusion Human Health Risk Levels Residential and Commercial/Industrial (July 2019).
RWQCB - Regional Water Quality Control Board
ESL - Environmental Screening Level
CAS - Chemical Abstract Service
NS - No standard
ug/L - Milligrams per kilogram
ND - Not detected
Q - Qualifier
MDL - Method detection limit
RL - Reporting Limit
DF - Dilution factor

Qualifiers:
U - The analyte was analyzed but not detected
J - Estimated value. The target analyte concentration is below the RL but above the MDL.

Exceedance Summary:
10 - Result exceeds CA RWQCB ESL for Groundwater Vapor Intrusion Human Health Risk Levels - Residential - Minimum
10 - Result exceeds CA RWQCB ESL for Groundwater Vapor Intrusion Human Health Risk Levels - Commercial - Minimum
10 - MDL exceeds screening level

Notes:
Soil gas results were compared to USEPA VISL Commercial/Industrial criteria using a TCR of 1x10-6 and a THQ of 1 May 2021).
USEPA - United States Environmental Protection Agency
VISL - Vapor Intrusion Screening Level
TCR - Target cancer risk
THQ - Target hazard quotient
CAS - Chemical Abstract Service
NS - No standard
µg/m³ - Micrograms per cubic meter
ND - Not detected
Q - Qualifier
MDL - Method detection limit
RL - Reporting Limit
DF - Dilution factor

Qualifiers:
U - The analyte was analyzed but not detected
J - Estimated value. The target analyte concentration is below the RL but above the MDL.

Exceedance Summary:
10 - Result exceeds USEPA VISL for Sub-Slab Vapor - Commercial/Industrial
10 - MDL exceeds screening level

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Cerclis ID:: 901287				
EPA Id: CAD029295706				

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 13 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 11 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

CA HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the CA HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 49 CA HIST LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 3 CA UST sites within

approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 01/27/2020 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 14 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 69 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 143 CA CUPA Listings sites within approximately 0.25 miles of the target property.

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 46 CA HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

DETAIL MAP - 6089298.2S

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- Sensitive Receptors
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Special Flood Hazard Area (1%)
- 0.2% Annual Chance Flood Hazard
- National Wetland Inventory
- State Wetlands
- Areas of Concern

This report includes Interactive Map Layers to display and/or hide map information. The legend includes only those icons for the default map view.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 02/23/1987
Comments: DTSC issued RAO for soil and groundwater contamination resulting from drum reconditioning business.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/27/2004
Comments: Consent decree signed to recover DTSC response costs from the primary large quantity generators.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 05/23/1995
Comments: Administrative order on consent signed for de minimis settlement. The settlement pertains to 89 parties, each contributing less than 1% of the drums recycled at the facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

Completed Document Type: Consent Decree
Completed Date: 09/23/1996
Comments: Administrative consent order signed for the 2nd round of cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/16/1997
Comments: Administrative consent order signed for the 3rd round of the cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/23/2002
Comments: DTSC signed Prospective Purchaser Agreement with 10th Street Land Management. Property will be used as a long-term storage yard for commercial and construction vehicles. Settling respondent to maintain site cap and enter into a land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 01/16/2008
Comments: Not reported

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on 10th Street Land Management property.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 03/06/2002
Comments: Deed restriction recorded for property owned by 10th Street Land Management. Residences, hospitals, day care facilities, food cultivation, and groundwater extraction are prohibited at the site. Interference with site cap and remediation system are also prohibited.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 10/07/1992
Comments: Seven respondents signed agreement to conduct a limited removal action at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/30/1989

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

Comments:	EPA issued a Consent Decree with 11 PRPs to implement the groundwater remediation recommended by the ROD. In May 1989, EPA conducted an investigation, identifying approximately 200 companies who had delivered drums and barrels to the former drum recycling facility.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date:	06/30/1987
Comments:	Determined noncompliance with the RAO issued in February 1987.
Completed Area Name:	Newark Group property
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	11/16/2006
Comments:	Site inspection found compliance with land use covenant on Newark Group property.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision - Amendment
Completed Date:	03/10/1998
Comments:	US EPA approved a ROD amendment for groundwater treatment process.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision w/ESD
Completed Date:	05/21/1998
Comments:	US-EPA approved an ESD for soil remediation.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Completion Report
Completed Date:	09/28/1998
Comments:	Preliminary close-out report finalized. Report documents completion of construction activities for OU1 and OU2. Remaining response consists of operation and maintenance of groundwater treatment system, soil vapor extraction system, and cap.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	05/15/1998
Comments:	Cap design completed. Design calls for 229,000 square feet of 3" asphalt concrete pavement with 6" layer of aggregate base.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	05/15/1998
Comments:	Remedial design report approved. Report outlines plans for design, installation, and O&M of SVE system and asphalt cap.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	09/30/1994

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

Comments:	EPA completed 3 separate removal actions: (1) Removal of 5 buildings and the process equipment and scrap within including 17 sumps, 7 tanks and several debris stockpiled. At the end of this RA, 1033 tons of industrial wastes, 15 tons of liquid hazardous was and 73 tons of solid hazardous waste was shipped off-site for disposal. (2) Removal of 1200 drums, 150 drums containing solvents, 350 drums containing debris, and 23 drums containing ash and liquids. Removal of tanks, vats, sumps, and process equipment. Removal of 1.18 tons of asbestos containing building materials. (3) Paving of previously and newly exposed surface soil resulting from the above removal actions. Paving used a chip seal material. Approximately 4-1/4 acres were sealed.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	10/15/1993
Comments:	Not reported

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision
Completed Date:	08/26/1993
Comments:	EPA issued ROD for soil operable unit. The ROD addresses soil/source remediation.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	04/22/1993
Comments:	Not reported

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	03/30/1992
Comments:	Shallow groundwater treatment system completed.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	06/28/1991
Comments:	Remedial design for groundwater completed.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision
Completed Date:	09/30/1988
Comments:	EPA issued a ROD for the shallow groundwater operable unit. The remedy includes extraction/treatment of shallow groundwater and discharge of treated water to the storm sewer.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/30/1988
Comments:	Completed EE/CA for shallow groundwater expedited response action. Groundwater pump-and-treat system was determined to be an effective

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

method for remediating the shallow groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/30/1988
Comments: Implemented an Expedited Response Action (ERA). The ERA consisted of the following activities: drum inventory; construction of decontamination facilities; removal of polychlorinated biphenyl (PCB) contaminated pits, which were later backfilled with clean soil and capped; removal, recycling, or treatment of thousands of gallons of processed plant liquids; removal of 15 tons of contaminated scrap; and design of a surface water control plan, which was submitted to EPA for implementation. EPA installed a chip seal over approximately two thirds of the five-acre site. Demobilization occurred at the end of March 1988. A total of 21,286 drums, 1,330 tons of scrap metal, and 2,982 cubic yards of contaminated soil were removed from the site.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 05/30/1987
Comments: Completed Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/13/2004
Comments: Public notice announced lodging of proposed consent decree.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 01/27/2004
Comments: Public notice announced lodging of proposed consent decree.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: SVE system design completed. Design includes submersible pumps, equalization tank, air-water separator, centrifugal transfer pump, positive displacement blower, air-to-air heat exchanger, liquid phase GAC, and vapor phase GAC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 07/27/1990
Comments: Remedial Investigation Report approved. Nature and extent of contamination in surface soils, subsurface soils, groundwater, surface water, air, and structures evaluated. Fate and transport of PCBs, pesticides, VOCs, base/neutral and acid extractable compounds, metals, and dioxins/furans discussed. Current and future exposure pathways included in baseline risk assessment.

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	02/01/1987
Comments:	Preliminary Site Assessment completed. Report summarizes site characteristics, site history, known soil and groundwater conditions, hydrogeology, surface hydrology, and risks to nearby receptors.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	06/19/1992
Comments:	Six addenda to the Remedial Investigation include: report of monitoring well installations in Zone B, C, and D aquifers; results of shallow soil investigation on Recycled Fibers, Inc. property; update to the risk assessment for soils; results of the investigation of four conduits near the leading edge of the plume; results of soil sampling; results of installation and sampling of a monitoring well in the Zone C aquifer.

Completed Area Name:	Newark Group property
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan Amendment
Completed Date:	08/01/2006
Comments:	Soil investigation concluded that pesticides, PCE, TCE, and metals including arsenic were present in soil, however, all contaminants were present at concentrations below human health screening levels (or established background). The proposed design for the repairs includes removal of 1,424 square feet of concrete and asphalt, replacement of the cap in these areas with slab and AC over 12" of aggregate, and sealing of 4,000 linear feet of less severe cracks with joint sealant.

Completed Area Name:	Shallow Groundwater
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	12/27/2007
Comments:	2007 GW monitoring report reviewed by DTSC and found to be adequate.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	5 Year Review Reports
Completed Date:	09/21/2010
Comments:	DTSC reviewed the 5-year report and did not have any comments and concurs with the USEPA recommendations in the report and the finding that the selected remedy continues to be protective in the short-term. Not reported

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	07/30/2010
Comments:	DTSC have reviewed the shallow groundwater treatment monitoring report and has no comments. This is a USEPA and WaterBoard lead site.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

Completed Document Type: Feasibility Study Workplan
Completed Date: 12/19/2011
Comments: The USEPA has approved the feasibility study workplan for Lorentz Barrel and Drum. The draft Sampling and Analysis Plan and the draft Quality Assurance Project Plan is due January 4th, 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/20/2011
Comments: Lorentz Barrel and Drum submitted the 2011 Annual Groundwater Monitoring Report No. 43.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/31/2012
Comments: Groundwater treatment report for September 2011 - December 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/16/2011
Comments: Annual groundwater monitoring report from December 1, 2010 through November 30, 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 11/22/2013
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/01/2015
Comments: The Fourth Five-Year Review Report identified as a remedy performance issue that the migration of 1,4-dioxane may not be controlled and there is continued diffusion of contamination from the A/B aquitard to Zone A soil vapor and Zone B groundwater. The remedies for OU-1 and OU-2 were determined to be protective of human health and the environment; however, in order for the remedies to be protective in the long-term, the Focused Feasibility Study needs to be completed in order to evaluate the current remedies for both OU-1 and OU-2 and make recommendations to modify the existing remedies or select new remedies for both OUs. .

Environmental Interest/Information System:
SUPERFUND NPL
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

LORENTZ BARREL & DRUM CO. (Continued) **1000208886**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Date:	01-10-2017
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: G accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of

PIEDMONT MOVING SYSTEMS (Continued) **S105109164**

	the operator G the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.
Violation Notes:	Returned to compliance on 02/28/2017. No documents could be found to confirm that antifreeze has been disposed of in the past three years. Shop mechanic states that the container was picked up last on 11/3/13, consistent with the container label. Oily solids were accumulated for over 1 year from 10/15/14 to 5/12/16. No documents for the disposal of aerosols could be located, and no disposal date was found on the container. Shop mechanic states that this hazardous waste container has been in use for several years. These wastes may be accumulated for a maximum of 1 year, or 6 months from the date containers are filled. Provide receipts showing the disposal of each waste, or provide historic receipts showing that these wastes were disposed of within the 1 year period.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	57547
Site Name:	PIEDMONT MOVING SYSTEMS
Violation Date:	01-10-2017
Citation:	HSC 6.5 25123.3(h) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)
Violation Description:	Failure to determine the status of any hazardous waste if a signed copy of the manifest isnG t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isnG t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes:	Returned to compliance on 01/26/2017. Facility has not received TSDF-signed copies of manifests for oily solids shipped on 5/12/16 (005370382SKS) and 10/15/14 (004405202SKS). Obtain TSDF-signed copies for each shipping date or complete a manifest exception report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted their HMBP on 9/15/16 on Front Counter using owner ID OW0163754. Facility has the following REPORTABLE materials: 180 gallons of 15w40 motor oil 55 gallons of used antifreeze 110 gallons of used oil 96 gallons of liquid propane Facility has the following hazardous materials BELOW REPORTING THRESHOLDS: misc gear oils and lubes (less than 55 gallons per type) 1x55 gallon container of uncrushed oil filters 1x55 gallon container of oily solids (less than 500 pounds) 1x55 gallons of hazardous waste aerosol containers (less than 55 pounds) 20 gallons of partswashing solution 128 cf of oxygen gas 127 cf of acetylene gas 280 cf of argon/carbon dioxide gas
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-10-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility is a trucking transport company and generates wastes related to limited truck service including waste aerosol cans, used oil, used antifreeze, oily solids, and waste parts washing solution. Battery cores are exchanged when spent (receipts reviewed) and rags are disposed of as hazardous waste. Light bulbs are recycled by the contractor that replaces them. Trucks do not use diesel exhaust fluid and all other services that may generate waste (like brake service and filter cleaning) are done out-of-house. Inspection included walk-through of warehouse storage areas, inspection of truck service and hazardous waste storage area, inspection of hazardous waste documents for the past 3 years, and inspection of trashcans. Fire extinguishers are annually serviced, spill kit is adequate, and EPA ID CAL000218734 is currently active. Shop mechanic is trained in hazardous waste management and he inspects all containers weekly. The following violations were corrected at the of [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SPEEDY SKUNK (Continued) **S124440905**

Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	04-06-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site for a hazardous materials business plan permit investigation. At this time, facility requires a hazardous materials business plan. Facility has the following reportable hazardous materials: 1x55 gallons of new acetone 2x85 + 15 gallons of used oil 1x200 gallons of used antifreeze Facility has the following hazardous materials below reporting thresholds: less than 500 pounds of solid paint waste 30 gallons of paint waste liquids 5 gallon bucket of used oil filters 10 gallon container of oily solids less than 1000 cf of argon/carbon dioxide gas less than 100 cf of acetylene 120 cf of oxygen gas 20 gallons of parts washing solution NOTES: Facility owner plans to downsize the containers used on-site so he will no longer be subject to this permit. If facility does this in the future, notify HMCD of any changes so that permit status can be re-evaluated.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-30-2019
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	- Permit level is consistent with hazardous materials observed on-site. Used oil (1x 55-gallon drum) Used coolant (1x 55-gallon drum) - CERS ID 10741528. - Mr. Orsburn stated that repeated calls to our office requesting HMBP assistance have not been returned. As such, no violation will be cited for failure to submit at this time. A Hazardous Materials Technician will reach out to assist with the facility's initial HMBP submittal. - Discussed expectations for HMBP training and property owner notification.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	04-17-2017
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to investigate a complaint that the facility is using "non-compliant paint". A hazardous waste permit investigation was already completed on 4/6/17 and any non-compliance with the Hazardous Materials Business Plan or with hazardous waste generation regulations was fully detailed on this report. Facility response to this report is not yet due. After inspection of the flammables cabinet and waste disposal containers, inspector determined that this complaint should be referred to Bay Area Air Quality Management District for any further follow-up, if deemed to be necessary. Mr. Cartelli stated that he buys all of his paints from Santa Clara County suppliers to ensure that paints are compliant with local air quality requirements. Complaint was referred to BAAQMD on 4/17/17, and no further action will be taken by HMCD at this time.

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-06-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner. Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have [Truncated]

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No

SKUNKWORKS PERFORMANCE AND RESTORATION (Continued) **1024872971**

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Source:	CERS
Site ID:	157644
Site Name:	STUDENT TRANS OF AMERICA
Violation Date:	12-22-2016
Citation:	HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description:	Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures.
Violation Notes:	Dates on antifreeze drum indicate that it was disposed of on 9/14/16 but no receipts since 2013 for the disposal of used antifreeze. Mr. Collins stated that he does not observe the transporter mixing these wastes during pickup. Generator must ensure that all wastes picked up are listed on hazardous waste pickup receipts. Used antifreeze must not be listed as used oil.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility does general fleet maintenance for school buses but does not do any painting or auto body work. Facility generates used oil, used antifreeze, used oil filters, oily solids, parts washing solution, hazardous waste aerosol cans, and brake shavings. Rags are commercially laundered and batteries are exchanged for their cores (receipts reviewed). Inspection included walk-through of shop, inspection of dumpsters and outdoor lot, and review of manifests for the past three years. Containers are inspected daily, employees are adequately trained, emergency postings are up to date, fire extinguishers are annually serviced, spill kit is adequate, and aisle space is sufficient. The following violations were corrected at the time of inspection: G020 Marking of hazardous waste: Observed 3x5 gallon mobile oil containers and 1x55 gallon used oil container with faded labels. G410 Management of used oil/fuel filters: Facility has 1x55 gallon container for oily solids and [Truncated]
Eval Division: Santa Clara County Environmental Health

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/01/2017. THE FOLLOWING CONTAINERS WERE STORING HAZARDOUS WASTES AND WERE MISSING THE REQUIRED MARKINGS: (SHOP) - 1 x 55 GAL., PAPER DRAINED USED OIL FILTERS (WAREHOUSE) - 2 X 55 GAL., USED HYDRAULIC OIL LABEL DRUMS AS REQUIRED. LABELS WERE PROVIDED DURING THIS INSPECTION.

Violation Date: 04-28-2016
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description: Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes: Returned to compliance on 06/06/2016. WHEN TECHNICIAN OPEN BOTH OF THE STP SUMPS, THE STP SENSORS WERE PLACED ON IT'S SIDE AND NOT IN THE UPRIGHT POSITION AT THE LOWEST POINT. SENSORS IN THIS POSITION WOULD NOT HAVE BEEN ABLE TO DETECT A LEAK. AFTER TECHNICIAN TESTED THESE SENSORS WITH WATER AND PASSED, THE TECHNICIAN PUT BOTH SENSORS BACK IN THE UPRIGHT POSITION AT THE LOWEST POINT AND HE USED A ZIP TIGHT TO KEEP THEM IN PLACE. THESE SENSORS MUST BE KEPT IN THIS POSITION AT ALL TIMES. NO FURTHER ACTION IS REQUIRED AT THIS TIME.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

RB Case Number:	14-749
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21B07f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	In May 1994 one 550 gallon underground storage tank (UST) was removed from the site. Soils from the UST pit were excavated; however the quantity of soil removed was not reported. On September 18 and 19, 1995, three borings (SB-1 through SB-3) were advanced. Three additional borings were installed and converted to 2-inch diameter monitoring wells (MW-1 through MW-3). Total Petroleum Hydrocarbons (TPH) as gasoline and TPH as diesel in soil were detected in the vicinity of the former dispenser. Based on analytical results of groundwater samples from monitoring wells and grab groundwater

GI TRUCKING COMPANY (Continued) **S104396980**

samples from soil borings, diesel fuel was determined to be the predominant groundwater contaminant at the site. Routine groundwater monitoring has been conducted since March 1998. July 2001 A workplan to perform an additional round of groundwater sampling and further define soil and groundwater contamination south and southeast of the former 550-gallon gasoline UST and soil boring SB-2. September 2002 Three additional soil borings (SB-4 through SB-6) were advanced. On August 20, 2003, monitoring wells MW-1 through MW-3 were sampled and reported minimal contamination. Routine groundwater monitoring continued from 2002 to 2010. On October 18, 2010, the DEH issued a No Further Action letter stating no further action was required at the site while the case was reviewed for closure 2013 The County of Santa Clara Department of Environmental Health (DEH) performed a review of the G.I. Trucking, Inc. case against the Low-Threat Closure Policy (LTCP) and determined that additional data was needed to evaluate the site data against all of the LTCP criteria. On June 7, 2013, DEH issued a directive requiring an Additional Site Assessment Work Plan (Workplan) to delineate soil and groundwater contamination, a sensitive receptor survey, and a report summarizing the site assessment work. 2014 Three additional soil borings and one additional monitoring well (MW-5) were installed. Soil samples were collected from the soil borings at various depths and groundwater samples were collected from the five site monitoring wells. 2015 Based on the results of the 2014 investigation, groundwater beneath the site meets the LTCP criteria for case closure.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 12-02-2014
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 12/15/2014. UST financial responsibility documentation submitted via CERS website on 6/18/2014 is incomplete, inconsistent, and contains errors. Section D of Certification of Financial Responsibility (CFR) form states, "See Attached" to identify facilities covered, but no list of facilities is attached. CFR form states that the State UST Cleanup Fund and a Chief Financial Officer (CFO) letter in support of the State Fund are the mechanisms used to provide financial responsibility, but the CFO letter submitted is a letter in support of a Financial Test of Self-Insurance (which is a different mechanism). Resubmit via CERS within 30 days with a list showing the facilities covered by the CFR and a properly worded CFO letter referencing the State Fund. Delete the obsolete CFO letter from CERS prior to submitting.

Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: S. Bravo Systems model B-2000 Float Trip Mechanism mechanical leak detection unit in the under dispenser containment (UDC) pan was repeatedly tested using water yesterday and failed to trip the shear valve despite multiple adjustments. The dispenser’s shear valve is installed 90 degrees offset from the orientation that would facilitate proper action of the Bravo Float Trip Mechanism. Obtain a UST Minor Retrofit/Repair permit from HMCD for one of the following 3 options: 1) Reinstall the shear valve to ensure proper functioning of the Bravo Float Trip Mechanism; 2) remove the Float Trip Mechanism and replace it with a liquid sensor connected to the TLS-300C monitoring console; or 3) remove the Float Trip Mechanism and replace it with a stand-alone sensor that will shut-off power to the fuel dispenser when liquid is detected in the UDC. [Note: Mr. Nimmo recommends option 3, using a Franklin Fueling Systems DC400 Dispensing Cutoff System.]

Site Name: ESTES WEST
Violation Date: 04-28-2016
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284
Violation Description: Failure to obtain and maintain a valid operation permit from the CUPA.
Violation Notes: Returned to compliance on 05/17/2016. The facility does not have a Permit to Operate the Underground Storage Tank (UST) system. To qualify for the UST Permit to Operate the facility must 1) correct all open violations and submit a response to all outstanding Notices of Inspection (NOI) including the one for today's inspection and 2) submit complete, correct and up-to-date UST information to CERS. Copies of the 3 prior NOIs that require responses were delivered during the inspection.

Violation Date: 04-28-2016
Citation: 23 CCR 16 2712(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(i)
Violation Description: Failure to maintain on site an approved monitoring plan.
Violation Notes: Returned to compliance on 05/17/2016. The UST Monitoring Plan lists Alan Wetzel rather than Jacob Valdez, the current terminal manager, as the First Responsible Person. Update the form and submit it to CERS. Ensure the UST Monitoring Plan is properly updated when there is a change of employees.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-12-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began yesterday and ended today. All underground storage tank (UST) system leak detection equipment was tested yesterday by UST Service Technician Zane Nimmo of Afforda-Test (CSLB Lic. # 341375) and functioned properly except as noted above. Mr. Nimmo has current ICC California UST Service Technician certification (exp. 6/2/2019) and Veeder-Root certification (exp. 9/28/2019). Veeder-Root model 794390-420 sensor monitoring the tank annular space was tested using water to obtain audible and visual Fuel Alarms. Veeder-Root model 794380-205 sensor monitoring the tank top piping was tested using water to obtain audible and visual Fuel Alarms. Piping is a conventional suction system, so fail-safe pump shutdown is not an issue. The Veeder-Root TLS-300C monitoring console is correctly programmed. The direct-buried UST fill spill bucket was hydrostatically tested for 1 hour and passed. Presence of mechanical overfill prevention valve in drop tube was visually [Truncated]

Eval Notes: Inspection to witness triennial testing of underground storage tank (UST) system secondary containment by State-licensed tank tester and UST Service technician Benjamin F. Duncan Jr. of R&D Compliance Testing (subcontracted by Afforda Test). Mr. Duncan has a current California Tank Tester license (exp. 12/31/2016), and current ICC UST Service Technician certification (exp. 4/11/2015) and Caldwell certification (issued July, 2014). Tank annular space was vacuum tested at 7.0" Hg for 1 hour and passed. Secondary piping was pressure tested using nitrogen at 3.0 p.s.i.g. for 1 hour and passed. [Testing was done at less than the standard 5.0 p.s.i.g. because the manufacturer of the under dispenser containment (UDC), S. Bravo Systems, recommends 3.0 p.s.i.g. maximum test pressure to avoid blowing loose the connection between the secondary piping flex boot and the penetration fitting at the bottom of the UDC pan.] Tank top piping sump was tested above highest using the [Truncated]

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Felix Ramirez (certifications current) of Afforda-Test. Suction System. Sump (VR 205) and annular (VR 420) monitored by VR TLS 300 Panel. Sensors tested in water and provided audible but not visible alarms (see violation above). The Bravo float and chain monitoring the under dispenser containment was tested with water and functioned properly. Overfill is provided by a flapper valve in the fill tube. The spill bucket is direct buried was hydrostatically tested for one hour with no loss. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation. DUSTO Training will be performed today for this year. Tank and monitoring system information submitted to the California Environmental Reporting System (CERS) on 3/7/2016 is generally as observed (see violations above). Submit a copy of the Monitoring Certification and Spill [Truncated]

Registry ID: 110002671957
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002671957

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 375181
Site Name: EL CAMINO ROOFING SYSTEMS
Violation Date: 05-18-2018
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 06/21/2018. Access to a number of propane cylinders between storage containers and to hazardous waste drums is blocked by equipment. Maintain aisle space as required to all hazardous materials and emergency response equipment. NOTE: Propane cyclinders were observed in piles of other materials throughout the facility. Strongly recommend having designated storage locations for all compressed gas cylinders.

Violation Date: 05-18-2018
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 06/21/2018. EPA ID number CAL000410662 is

EL CAMINO ROOFING SYSTEMS (Continued) **S115950368**

currently inactive. Fill out DTSC form 1358 to reactivate this number. This number is required on any disposal documents and must be kept active.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 375181
Site Name: EL CAMINO ROOFING SYSTEMS
Violation Date: 05-18-2018
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 06/21/2018. Observed the following containers that had unknown contents. Facility must determine if these wastes are hazardous wastes and must manage them accordingly. Provide information and documentation for how each waste was disposed: -1x3 gallon bucket of back sludge by hazardous waste storage pallets in back of the yard -1x5 gallon bucket of pink liquid in a grey storage cabinet blocked by cooler and paint bucket in the covered area behind the office -1x55 gallon white drum (LEAKING TO GROUND) with unknown contents. Leaking liquid was clear, but stains leading from bung hold down to dirt and pallet under the drum has dark staining that looked like used oil. Site employee was not sure if this drum contained used oil and water like the surrounding drums.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 375181
Site Name: EL CAMINO ROOFING SYSTEMS
Violation Date: 05-18-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 06/21/2018. Observed the following containers of hazardous waste open with no lids at the time of inspection: 1x5 gallon bucket of water and waste lacquer on the pallets in the back of the yard 1x5 gallon bucket of waste copper green liquid by the propane storage area between storage containers Ensure all containers of hazardous waste are tightly closed. NOTE: IF 55 GALLON WHITE DRUM HOLDS OILY WATER OR OTHER HAZARDOUS WASTE, IMMEDIATELY STOP CONTAINER FROM LEAKING, OR PLACE WASTE IN A CLOSED AND LABELED CONTAINER.

Citation:	22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Description:	Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.
Violation Notes:	Returned to compliance on 06/21/2018. Facility applied for an EPA ID to dispose of hazardous waste in 2015 but no manifests or consolidated manifests were available for inspection, and no manifests exist in the online tracking system. Begin documenting hazardous waste disposals as directed below and retain receipts for 3 years. Forward disposal receipts for all wastes noted on this report to HMCD office for review.

Site Name:	EL CAMINO ROOFING SYSTEMS
Violation Date:	05-18-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 06/21/2018. Facility site map does not show adjacent businesses and was not revised after areas of the yard were leased to other businesses. Map does not identify locations of hazardous waste and does not identify storage locations of all propane cylinders. Map does not identify locations of spill kit, fire extinguishers, or water utility shutoff. Make required revisions and reupload this map in FrontCounter.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	375181
Site Name:	EL CAMINO ROOFING SYSTEMS
Violation Date:	05-18-2018
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 06/21/2018. Observed staining on pallets and on the ground from used oil under used oil storage drums and under several trucks on the lots. Facility has allowed containers of hazardous materials to be stored in the open with no lids, allowing rain to accumulate and leading to releases of this waste to the soil. Manage the facility in a way that minimizes releases to the environment. NOTE: Hazardous materials drums out back are stored on pallets but do not have secondary containment.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site Name: EL CAMINO ROOFING SYSTEMS
Violation Date: 05-18-2018
Citation: 40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description: Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes: Observed 10 fire extinguishers outside by the back office door that had not been annually serviced as required. Ensure all fire extinguishers on-site are properly maintained.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-18-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Per a permit investigation, facility requires a hazardous waste generator's permit. Facility generates hazardous waste used oil and wastes from misc. unused, expired, or spilled roofing materials such as copper green/ contaminated rags/and paints and primers. At the time of inspection, facility employee identified the following containers as hazardous wastes: 2x55 black drums of used oil and water as hazardous wastes, and 1x5 gallon container of waste lacquer and water, and 1x5 gallon bucket of water and concentrated copper green waste. Facility uses the following materials on-site that may become hazardous wastes is discarded, spilled, or unusable: gasoline, primers, copper green coating, misc roofing chemicals, used oils, and various paints. NOTE: Facility employees stated that they do not have a dumpster or municipal trash service. No dumpster or trashcans were observed during the inspection. Facility employee stated that they used a wood-paneled truck to [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:
Site ID: 423382
Site Name: HERMITAGE BREWING CO
Violation Date: 04-07-2017
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 06/13/2017. Facility orders CIP chemicals, phosphoric, lactic acid, qauternary ammonia, and peracetic acid with 31 % hydrogen peroxide (acute oral toxicity LD50, and most hazardous liquids in plastic drums greater than 5 gallons. Once chemicals are used, employees stated that containers are rinsed and given to "random

Site Name:	HERMITAGE BREWING CO
Violation Date:	04-07-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 06/13/2017. Facility orders CIP chemicals, phosphoric, lactic acid, quaternary ammonia, and PAA peracetic acid with 31 % hydrogen peroxide (acute oral toxicity LD50 for rats= 650 mg/kg), and most hazardous liquids in plastic drums greater than 5 gallons. Employees stated that once chemicals are used, containers are rinsed and given to "random people" who will use them off-site or are cut and reused for other purposes on-site. Rinsing and cutting drums is a form of treatment that requires a permit. Apply for a permit to rinse and cut drums or cease this practice and ensure that empty drums are reused, recycled for their scrap, or are returned to the manufacturer within one year. Empty drums must have a date that they were emptied. Facility has 4x55 gallon empty PAA containers, 4x55 gallon empty Lerasept S10 containers, and 1x55 gallon empty Lerasept SR containers.

Eval Type: Routine done by local agency
Eval Notes: On-site for a hazardous waste permit investigation. Facility requires a hazardous waste permit. Facility brews and bottles beer, has a QA lab, and does maintenance on brewing equipment and machines. Maintenance activities generate oily water, oil filters, oily absorbent and rags, used oil, metal scraps, and aerosol cans. Facility has universal waste fluorescent light tubes which are recycled. The lab generates waste agar media plates containing cupric sulfate, non-saturated alcohol and sporicidin wipes, butane cyclinders, 0.1% methylene blue, and materials for gram staining. Autoclave is cleaned with Chamber Brite powder mixed with water. Facility has a glycol cooling system that has never been flushed or replaced. Facility has a mill, mash tank, kettle, and fermentation tanks. All of these tanks must be cleaned with caustics (CIP system). Facility has bulk 500

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site ID: 544253
Site Name: The Newark Group Inc
Violation Date: 08-15-2015
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Failure to Obtain Permit
Violation Notes: Failure to recertify permit coverage under IGP 2014-0057-DWQ
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-29-2019
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The facility is in Level 2 status for various parameters. Based on Mr. Colymore, facility is conducting sweeping. The storm drains were pressure washed, facility repositioned the raw material and waste streams, replacing the filters in the storm drains every 3 months. I observed the storm drains inlets have metal holding pans during dry weather season to collect shredded paper waste. The facility installed a new hydrodynamic separator. The sampling during the next QSE will determine the effectiveness of the newlly installed hydrodynamic separator

Violation Date: 11-29-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 12/11/2017. Facility address in CERS is listed as "490 Monterey" but should be listed at "1490 Monterey". Correct this typo and resubmit business information page.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 364288
Site Name: Jack in the Box #4408
Violation Date: 11-29-2017
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description: Failure to provide a copy of the business plan to the owner or the owner’s agent within five working days after receiving a request for a copy from the owner or the owner’s agent.
Violation Notes: Returned to compliance on 12/11/2017. Since ownership change, facility has not notified the property owner in writing of their compliance with the Hazardous Materials Business Plan. A template letter was provided via email with a copy of the report to Ali Navaie.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility changed ownership on 6/12/2017 and is now a franchise. CERS ID: 10658209 Last submittal: 7/25/17 Facility has the following reportable hazardous materials: 40 gallons of liquid carbon dioxide gas Site map and emergency response plan on CERS reviewed and complete. Unresolved Issue: Ms. Gamet produced two employee training logs dated for 3-17-17, but other logs were locked in the manager’s

AUTO WORLD (Continued) **S106922987**

files. Within 7 days, respond with a list of current employees and all training logs available. Ms. Gamet was given inspector's contact number at the time of inspection for follow-up.

Citation:	22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description:	Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes:	Returned to compliance on 04/25/2017. Observed multiple non-legible hazardous waste manifests that could not be read. Nearly all manifests denote some or all wastes with California state waste code 551 (Laboratory waste chemicals). Facility is not a lab and wastes should not carry the 551 waste code.
Violation Division:	Santa Clara County Environmental Health

Violation Date:	01-31-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 04/25/2017. Once items are determined to be a waste and suspected to be hazardous, they are placed in one of the 4 bins at the front of the warehouse and are grouped with similar looking items. A hazardous waste determination is delayed until the hazardous waste hauler arrives on-site to sort this material. A hazardous waste determination must be made at the point of generation.

Violation Date: 01-31-2017
Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 04/25/2017. Current practices make it possible that the facility will store incomparable materials together. Shipping documents show a wide variety of materials being shipped and facility does not currently have a system to separate materials based on their hazardous characteristics. Facility was given information about the different characteristics of hazardous waste and examples of incompatible materials.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-31-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility receives and stores property acquired by the police department that is being held to be returned to the owner, used as evidence, or auctioned. Facility generates e-waste, universal waste aerosol cans and batteries, and various hazardous wastes like acids, paints, and oils. All biohazardous materials are managed as biohazardous waste and sharps are managed in sharps containers. Any sharps containers holding medication or any prescription medication is sent off-site for management and storage with Narcotics. Occasionally some of these items are returned if they are over-the-counter medications and a hazardous waste determination is made upon return. Facility also stores some materials including fuel inside generators and compressed gases in the back of the warehouse until their use or status as a waste can be determined. These hazardous materials (which are being held because they could potentially be sold/retuned/used as evidence) appear to be below Hazardous [Truncated]

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 02/04/2016. The facilityG s current practice is to dispose of unidentifiable, loose pills in the G Side AG compartment of the pharmaceutical waste container. G Side AG waste is only identified by California waste code 311 (Pharmaceutical Waste) on the facilityG s uniform hazardous waste manifests. An almost completely full vial of insulin (Lantus), a RCRA-characteristic hazardous waste (EPA Waste Code: D024), was observed in the G Side AG pharmaceutical waste bin. The facilityG s pharmacy dispenses both RCRA and non-RCRA pharmaceuticals (CA-only regulated). The facilityG s current pharmaceutical disposal practices does not acquire sufficient generator knowledge prior to disposal. A hazardous waste determination needs to be conducted on the unidentifiable, loose pills prior to disposal as non-RCRA pharmaceutical waste. Provide documentation to HMCD as to how the facility ensures that RCRA pharmaceutical wastes are not disposed of as non-RCRA pharmaceutical waste.

Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Hazardous Waste manifest.
Violation Notes: Returned to compliance on 02/04/2016. 1. An almost completely full, insulin vial (Lantus) was observed in the facilityG s G Side AG pharmaceutical waste container. G Side AG pharmaceutical waste is disposed of as non-RCRA hazardous waste (CA Waste Code: 311). Lantus is a RCRA-characteristic hazardous waste and requires to be identified on a uniform hazardous waste manifest by EPA Waste Code: D024. Given the facilityG s current pharmaceutical disposal practice, hazardous wastes are not properly identified by their required waste codes on uniform hazardous waste manifests. 2. On the facility's uniform hazardous waste manifests, two waste streams are routinely listed as "non-RCRA hazardous waste, liquid (CA regulated)" and 'non-RCRA hazardous waste, solids (CA regulated). No additional description of the wastes are provided. Pursuant to CCR 66262.23(a)(5)(A), non-RCRA hazardous waste should be identified with a commonly recognized industrial name for the waste (e.g. "used oil") or a generic name for non-RCRA [Truncated]

Status: Completed - Case Closed
Status Date: 11/06/2014
Case Worker: AC
RB Case Number: Not reported
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E21B06f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: This site use was a wholesale roofing company in 1992 when the tanks were removed. A well company (C&N Pump) and a masonry contractor (E&T Masonry) presentlly occupy the site. The fuel tanks, two 500 gallon gasoline, were removed in July 1992 by Trump Brothers. Soil samples indicated that soil below the fuel tanks contained gasoline.
Available information did not indicate that the additional excavation was performed to removed soil impact and the excavated soil had been returned to the tank excavation. Since the tank removal, various investigative and remedial activities have been performed at the site as listed in the preceding report summary. The surrounding parcels are used for commercial purposes. An appliance company (Horbat Corporation) currently occupies the adjacent building southwest of the site at 325 Phelan Avenue (APN 477-09-023). Adjoining the site to the northwest is the rear of the property at 1670 S. 7th Street (APN 477-09-30) which is an open storage area. Another open area lies to the northeast and is identified as 345 Phelan Avenue (APN 477-09-13). Southeast of the site is Phelan Ave. across which lie properties that are occupied by various commercial businesses (APN numbers 477-26-6,7,43, and 50).

TECHNIC (Continued) **S102415125**

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site for a routine hazardous materials business plan inspection. Facility receives and resells chemicals used in electroplating and semiconductor industries. Facility has one forklift that is electric, does not dispense or used any chemicals on-site, and does not repackage or handle any materials before resale. Upon discussion with Facilities Manager, Michael Cortes, facility agreed to a physical inspection of the facility. Inspection included a physical walk-through of facility, observation of inventory, review of training records, and review of CERS submittal completed in March of 2016 using CERS ID 10093543. Training plan and training records are up-to-date and facility has adequate emergency response equipment and emergency evacuation maps posted. Unresolved issue: Facility inventory will be verified on 11/17/16.

SUNGARDEN CHEVRON (Continued) **S116599163**

Violation Description: Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.
Violation Notes: Returned to compliance on 09/12/2016. Observed red propylene glycol in the under dispenser containment pan for Dispenser 1/2. This was also noted by the Designated Operator in the monthly report for January 2016. Within 30 days troubleshoot where the leak is coming from and how to repair it. Apply for a permit from HMCD for the repair prior to beginning the work.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-26-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: All testing was completed by Greg Geltz from Central Petroleum Maintenance. Verified that Mr. Geltz had current ICC and Mfg. certifications. DO reports will be reviewed during a follow-up inspection. Observed the functional testing of all liquid sensors and smart sensors (S1, S2, S3, S4, S5, S6 and S7). All liquid sensors were hydrostatically tested with water and all functioned as required. All sensors monitoring pressurized piping initiated positive shut-down and produced an audible and visual alarm at the monitoring panel when tested. All programmable line leak detectors (PLLD) simulated slow-flow of 3-GPH at 10-psi when tested with a VMI LDT-890 Leak Detector Testing System that was calibrated on 8/19/15 at dispenser 9/10. Sensor out and fail-safe functioned as required. Smart sensors

Violation Date:	08-17-2016
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 09/06/2016. - 2 x paper-only used oil filters are accumulating in the 55 gallon drum labeled as "drained used oil filters." Paper-only filters cannot be recycled for their scrap metal content and cannot be managed under the exclusion management requirements for metal-encased used oil filters. Begin accumulating paper-used oil filters separately and manage as fully regulated hazardous waste (i.e. "debris saturated with used oil.")

Violations:
Site ID: 423603
Site Name: CLEVER AND QUICK MACHINE SHOP
Violation Date: 12-07-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 04/12/2018. Observed 1x30 gallon trashcan of bead blast waste from previous owner that may be hazardous due to toxic metal content. Determine if this container holds hazardous waste. If waste is hazardous, keep this waste in a closed and labeled container in good condition. Observed oily cardboard in trashcans. Determine if this cardboard is hazardous due to toxic metals from used oil. If hazardous, removed from trash and place in a closed, labeled hazardous waste container. Respond with information on how each waste was managed, and any disposal receipts for hazardous waste disposal, if applicable.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-18-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site for a permit investigation. Facility requires a hazardous materials business plan. See comments of hazardous waste report (SR7MST8NM) for more details.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 01-18-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility is a machine shop located at the back of an auto shop (Auto Mecanico Arandas). Facility generates the following wastes: sandblasting waste (~5gal/mo), oily saturated absorbent/rags/sludge (owner estimates it should be ~60 gal/yr), non-empty aerosol cans, scrap metal, commercially laundered oily rags, used oil (skimmed from parts washers), and oily water from cleaning out parts washers. Facility has 2x25 gallon parts washers for large parts, 1x20 gallon parts washer for smaller parts, and 1x80 gallon heated parts washer. 25 gallon washers have filters and oil skimmers but 80 gallon washer and 20 gallon washer must be cleaned out about once per year. Based on current estimates, facility generates about 15-25 gallons of waste per month. Containers are inspected weekly, facility has adequate spill kit, and employees were trained through industry experience. The following violations were corrected at the time of inspection: G020 Marking of hazardous waste: [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-07-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility changed ownership in September of 2017. New owners would like to get rid of waste parts washing liquids and bead blast dust abandoned by previous owner. After this point facility will have 2 parts washing machines (1 serviced by SafetyKleen on a regular schedule), and roughly 50 lbs of bead blast waste every 6 months. Facility also generates hazardous waste metal dust from grinding machine, oily rags (commercially laundered), and non-empty universal waste aerosol cans. No disposals of waste to date. Spill kit is adequate and emergency posting is up-to-date. NOTES: 1. Keep all laundry receipts and hazardous waste disposal records for 3 years. 2. Facility was advised on how to label all wastes and was given labels, training record templates, and weekly inspection templates for use. 3. Scrap metal must be sent to a metal recycler. 4. Non-empty universal waste aerosol cans may be held for up to one year. 5. Once facility

Violations:

Site ID:	136195
Site Name:	AUTO MECANICO ARANDAS
Violation Date:	01-12-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes:	Mr. Rizo claimed that he has disposed of anitfreeze in the past three years but no receipts were available to show proper disposal. Provide receipts for the disposal of antifreeze within the past three years.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	136195
Site Name:	AUTO MECANICO ARANDAS
Violation Date:	01-12-2017
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	EPA ID CAL000321928 is currently inactive. Mr. Rizo was given DTSC form 1358 at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	136195
Site Name:	AUTO MECANICO ARANDAS
Violation Date:	01-12-2017
Citation:	40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32
Violation Description:	Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes:	Observed fire extinguishers that were last serviced in January of 2016. Ensure all fire extinguishers are annually serviced.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-12-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted their Hazardous Materials Business Plan on FrontCounter on 9/7/16 using owner ID OW0182395. Mr. Rizo stated he and his partner (brother) are the only folks in the shop and that they do not have any employees. Facility has the following reportable quantities of hazardous materials: 280 gallons of used oil 55 gallons of used antifreeze 55 gallons of degreaser Facility has the following materials below reporting thresholds: 55 gallons of uncrushed oil filters 15 gallons of parts washing solution 128 cf of oxygen gas 187 cf of acetylene gas less than 55 gallons of any type of lubricating oil 55 gallons of used oily absorbent
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-12-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility does auto repair work in the front half of the back. Mr. Rizo stated that the back center and right side of the shop belongs to Clever Machine shop. The machine shop has multiple parts washers, metal working machines, and a bin of soiled absorbent. Mr. Rizo’s shop generates used oil, used antifreeze, used oily solids, and paper and

MONTEREY RADIATOR (Continued) **S113083924**

metal oil filters. Inspection included walk-through of the work bays in the single garage shop, walk-through of front lot, inspection of trashcans, and inspection of hazardous waste shipping documents from the past 3 years. Battery core exchange receipts and commercial laundry service receipts for rags were reviewed during the inspection. Facility has adequate spill kit. The following violations were corrected at the time of inspection: G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection. NOTES: 1. Mr. Rizo [Truncated]

Eval Division: Santa Clara County Environmental Health

Status:	Completed - Case Closed
Status Date:	01/12/2017
Case Worker:	GOR
RB Case Number:	12-037
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21B04f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Based on the May 2012 groundwater monitoring event and data for the site, Allterra concluded the following: During this monitoring event, the groundwater flow direction was to the northeast at a gradient of approximately 0.0129 ft/ft, which is generally consistent with previous monitoring events. The highest levels of dissolved TPHg and benzene in groundwater were detected in MW- 1 at concentrations of 930 "g/L and 6.4 "g/L, respectively. The highest concentration of TPHd was found in EW-1 (970 "g/L). Petroleum constituents continue to generally show a stable to decreasing trend in each well at the Site. Based on the conclusions presented above, Allterra recommended the following: Continue with the current semi-annual groundwater monitoring program at the Site to evaluate groundwater quality under varying seasonal conditions. Evaluate the Site for potential low-risk case closure.

	6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 08/23/2016. The facility stores hazardous materials/wastes at and above HMBP reportable thresholds, but has never submitted a HMBP. It is of note that the facility has already scheduled an appointment for HMBP-submittal assistance with HMCD later today (8/23/2016).

Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	145899
Site Name:	R A M PRODUCTS
Violation Date:	08-23-2016
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 08/23/2016. Employees are provided with initial and annual refresher training on safety procedures in the event of a release or threatened release of a hazardous material/waste, but the training is not documented. An employee training template will be provided with this inspection report.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-04-2019
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to perform a routine inspection for the following permits: - 2201 (Hazardous waste generator: waste oil only) - BP01 (Hazardous Materials Business Plan (HMBP): 1-3 chemicals) NOTES: - Facility is a one-man motorcycle repair shop. - State ID CAL000314783 is active. - Containers are inspected daily. - Consolidated manifest receipts were reviewed. - Fire extinguishers were serviced 4/8/19. - Absorbent is available. - Rags are commercially laundered. - Emergency information is posted. Per HSC - 25187.8, the following minor violations were corrected during this inspection: G020: MARKING OF HAZARDOUS WASTE 4x 15-gallon used oil drums had hazardous waste labels, but the markings were faded. These were all corrected during the inspection. G023: CONTAINER OPEN 4x 15-gallon used oil drums were open without active addition or removal of waste. The drums were closed during the inspection.

Violations Found:	No

R A M PRODUCTS (Continued) **S111217012**

Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. The facility conducts routine maintenance and repairs on Harley Davidson motorcycles. - Used oil is the only hazardous waste generated and accumulated by the facility. Used oil is collected in small trays that are placed underneath the bikes and immediately transferred into one of the four, 16 gallon drums used for used oil accumulation. The 2 x 16 gallon drums accumulating used oil are closed. ENSURE THAT ALL CONTAINERS USED TO ACCUMULATE HAZARDOUS WASTE ARE KEPT CLOSED WHEN WASTE IS NOT BEING ADDED OR REMOVED. - Metal-encased used oil filters are returned to the motorcycle owner for recycling. Discussed accumulation of metal-encased used oil filters as "drained used oil filters" for the scrap metal recycling value and provided a label for accumulation. - Used rags are collected for commercial laundering and documentation of laundering is available on-site. - Aerosol cans are completely empty of contents and [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-23-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes are stored in quantities at or above HMBP-reportable thresholds: 1. Used Oil (4 x 16 gallon metal drums): 64 gallons 2. 20W-50 Motor Oil (1 x 55 gallon metal drum): 55 gallons It is of note that small quantities of propane, brake cleaner aerosols, greases, and lubricants are on-site, but below HMBP-reportable thresholds. NOTES TO FACILITY: - Ensure that you certify that your HMBP is accurate and up-to-date and re-submit the HMBP via FrontCounter on an annual basis.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-04-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: - Permit level is consistent with hazardous materials observed on-site: -- Used oil (4x 15-gallon drums) -- Oil (1x 55-gallon drum) -- Propane (3x 10-gallon cylinders) - CERS ID 10355512. - Most recent HMBP electronically submitted on 11/1/18. - Property owner was notified after facility's previous inspection. Additionally observed 1x >200 cubic-foot cylinder of nitrous oxide. Mr. Williams stated that this belonged to a customer who had recently left it for temporary storage, and that the customer would be picking it up within a few days.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the

J'S FINISHING (Continued) **S121772193**

possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: HOUSEKEEPING WAS EXTREMELY POOR THROUGHOUT THE FACILITY AS EVIDENT BY OPEN CONTAINER VIOLATIONS AND PAINT ENCRUSTED PAPER SCATTERED THROUGHOUT THE FACILITY. EMPTY PAINT CANS, CLOTH RAGS AND PAINT DEBRIS WERE SCATTED THROUGHOUT THE SHOP. I TOLD MR. VILLARREAL HE NEEDED TO IMPROVE HOUSEKEEPING THROUGHOUT THE SHOP TO MINIMIZE THE POSSIBILITY OF A FIRE, EXPLOSION OR UNPLANNED RELEASE OF HAZARDOUS WASTE. I TOLD MR. VILLARREAL HE COULD DISPOSE OF HIS EMPTY PAINT AND SOLVENTS CANS IN THE SOLID DEBRIS DUMPSTER IF THEY WERE COMPLETELY EMPTY. DUE TO THE OPEN 55 GALLON PAINT SOLVENT DRUMS A STRONG SOLVENT SMELL PERMEATED THROUGHOUT THE FACILITY. THIS WAS A REPEAT VIOLATION FROM THE LAST INSPECTION CONDUCTED ON JUNE 8, 2015. IMMEDIATELY IMPROVE HOUSEKEEPING THROUGHOUT THE SHOP.

Violation Date: 06-08-2015
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: I OBSERVED TWO 55 GALLON DRUMS CONTAINING WASTE PAINT RELATED MATERIAL LIQUID THAT WERE LOCATED IN TWO FLAMMABLE LIQUID STORAGE CABINETS THAT WERE THERE SINCE THE JULY 12, 2012 HAZARDOUS WASTE GENERATOR INSPECTION AS EVIDENT BY THE HAZARDOUS WASTE MARKING LABELS I FILLED OUT AND PUT ON THE DRUMS DURING THE JULY 12, 2012 INSPECTION. I EXPLAINED TO MR. VILLARREAL THAT AS A SMALL QUANTITY GENERATOR HE HAD TO REMOVE ALL PAINT RELATED ACCUMULATED AT HIS FACILITY WITHIN 180 DAYS OF ACCUMULATION. I ASKED HIM WHEN WAS THE LAST HE HAD A HAZARDOUS WASTE PICK UP HE TOLD ME HE DIDN'T KNOW. I REVIEWED THE STATE'S DTSC DATA BASE HAZARDOUS WASTE TRACKING SYSTEM AND DISCOVERED THE LAST MANIFESTED HAZARDOUS WASTE SHIPMENT FROM HIS BUSINESS WAS ON AUGUST 24, 2010 FOR WASTE PAINT RELATED MATERIAL.

Citation:	22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description:	Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes:	Returned to compliance on 09/12/2017. Manifest # 005978456SKS was used to inadequately ship 5 drums of 300 lbs of Rags, solids, and absorbents contaminated aluminum oxide, diesel, and/or lapping oil as "UN1993, Waste Flammable LIquids, N.O.S, (Mineral spirits, petroleum distillates), 3, PG III. Owner confirmed this is not an accurate description of the waste being shipped. Additionally, manifest # 005786236SKS (and many others) were used to describe petroleum distillates parts washer liquid as "NA1993 Waste Combustible LIquid, N.O.S. (Petroleum Naphtha) PG III and EPA waste code D039. Owner

DAN CAPUTO CO (Continued) **S109936510**

confirmed there is no tetrachloroethylene/perchloroethylene in the waste. REVIEW MANIFEST AND PROFILES AND ENSURE SHIPPING DESCRIPTION REFLECTS ACTUAL WASTE STREAM.

Site Name: VALLEY LAPPING INC
Violation Date: 08-18-2017
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 09/12/2017. Facility does not have documented initial and annual training of employees as it relates to a hazardous materials emergency response.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 79932
Site Name: VALLEY LAPPING INC
Violation Date: 08-18-2017
Citation: HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description: Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes: Returned to compliance on 09/12/2017. Facility has not provided written notification to property owner.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 79932
Site Name: VALLEY LAPPING INC
Violation Date: 08-18-2017
Citation: 22 CCR 12 66262.23(a)(4) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)(4)
Violation Description: Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.
Violation Notes: Returned to compliance on 09/12/2017. Facility uses approximately 10-15 uniform hazardous waste manifest per year but has not been submitting the generator copy to DTSC.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 79932
Site Name: VALLEY LAPPING INC
Violation Date: 08-18-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the

DAN CAPUTO CO (Continued) **S109936510**

possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 09/12/2017. Observed significant amount of Solvent-based parts washer in the secondary containment that 2 solvent parts washer uses. Owner indicated that this is a chronic issue and some parts are too large to fit inside the parts washer so some cleaning solvent may fall outside of the parts washer unit. Solvent in secondary containment can present an air hazard and fire risk. Remove any unavoidable liquid accumulation in secondary containment consistent with the wet-floors guidance that directs cleanup to happen at end of shift or no later than daily.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-18-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted a complete hazardous materials business plan on 8-26-2016. Reportable Hazardous materials observed on-site include but are not limited to: Solvent (petroleum distillates) (2x30 gal, and 1x55 gal) Propane (4x5 gal size) NOTE: Report propane in next hazardous materials business plan submission on CERS.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-18-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility performs lapping on various components from various industries including aerospace, semiconductor, civil infrastructure, and medical. Lapping is performed with diesel or lapping oil. Post lapping parts cleaning generally performed in a solvent (petroleum distillate) parts washer. 1 aqueous parts washer is on-site for use on medical device related components. Petroleum Distillates are used via rags and applied to finished parts in order to help dry. Rags are reported to never be saturated or contain free liquids. Facility generates the following waste streams: Sludge and solids from maintenance and cleaning of lapping tables Rags, solids, and absorbents contaminated with petroleum distillates, aluminum oxide, diesel, and/or lapping oil Parts washers (solvent and aqueous based) Facility manages the following waste streams as hazardous wastes: Sludge and solids from maintenance and cleaning of lapping tables Rags, solids, and absorbents contaminated [Truncated]

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes:	Returned to compliance on 01/12/2018. No HMBP has been submitted electronically. Submit a HMBP electronically within 30 days. NOTES: -You may submit a HMBP electronically at https://frontcounter.sccgov.org by completing the following sections: G Regulated Activites G Owner Operator ID G Chemical Inventory G Emergency Response and Training Plan *Template available at: http://www.calepa.ca.gov/CUPA/Documents/eTemplates/Contingency.pdf G Facility Maps *Template available at: http://www.unidocs.org/hazmat/electronic_reporting/un-020cersmap.pdf -If you would like assistance with submitting your HMBP, you may contact Hazardous Materials Technician Michelle Santos at (408) 918-1981 or michelle.santos@dep.sccgov.org
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	98842
Site Name:	BILL BROWN CONSTRUCTIONS
Violation Date:	12-18-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 01/16/2018. Observed 3 x 55 gallon drums with open bung caps. Observed 1 x 55 gallon drum with a lid but that that did not have a locking ring in place. Within 30 days ensure all drums are closed unless used oil is being actively added or removed.

Violation Source:	CERS

Site ID:	98842
Site Name:	BILL BROWN CONSTRUCTIONS
Violation Date:	12-18-2017
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 02/05/2018. Observed 5 x 55 gallon drums of used oil and 2 x large wooden boxes of miscellaneous off-spec chemicals that haver been accumulated for longer than is allowed. Note that hazardous waste may only be accumulated for a maximum of 6 months. Make arrangements to have hazardous waste picked-up within 30 days and provide a copy of all disposal receipts to our agency.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID: 98842
Site Name: BILL BROWN CONSTRUCTIONS
Violation Date: 12-18-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/16/2018. Observed 5 x 55 gallon drums of used oil with blank hazardous waste labels. Within 30 days complete all labels. RECOMMENDATION: -Fill-out labels, then place them in plastic sleeves and affix to containers.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-18-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a construction company that generates hazardous waste in the form of used oil & used oil/fuel filters from vehicle maintenance (major auto repair is performed off-site) and off-spec chemicals that are left over from construction jobs. Performed a facility walk-through and observed the following hazardous waste in an outdoor storage area: -Used oil: 5 x 55 gallon drums -Used oil and fuel filters: Approximately 5-10 filters -Miscellaneous off-spec chemicals: 2 x large wooden boxes (totaling approximately 100-150 gallons) Miscellaneous off-spec chemicals are generated as a result of annual clean-ups of excess materials leftover from construction jobs. A major clean-up occurred in May 2016 with hazardous waste manifests showing that a total of 5 tons of hazardous waste was picked-up. WITHIN 3 BUSINESS DAYS: -Please provide details to our agency on how contaminated rags are being [Truncated]

CERS ID: 10346704
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 89800
Site Name: ADVANCE AUTO TECH
Violation Date: 08-17-2016
Citation: HSC 6.5 25250.7 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.7
Violation Description: Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes: Returned to compliance on 09/02/2016. The facility combines used brake fluid with the used oil for disposal as "used oil." Used brake fluid is not considered "used oil" and cannot be combined for disposal as "used oil." Begin collecting, managing, and disposing of the used brake fluid separately from used oil as hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 89800
Site Name: ADVANCE AUTO TECH
Violation Date: 08-17-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 09/02/2016. 1 x 30 gallon drum of used coolant has been accumulating on-site since 3/9/2013.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 89800
Site Name: ADVANCE AUTO TECH
Violation Date: 08-27-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/27/2019. The inventory submitted on 7/9/19 listed used coolant at a volume of 30 gallons, but the drum observed on-site was 55 gallons.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 89800
Site Name: ADVANCE AUTO TECH
Violation Date: 08-27-2019
Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Description: Failure to inspect hazardous waste tanks for the following, when present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction

ADVANCE AUTO TECH, INC (Continued) **S105109316**

	materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).
Violation Notes:	Returned to compliance on 09/26/2019. No weekly inspections are being done for the double-walled tank of used oil, as evidence by generator's lack of knowledge about a dip stick, port, or other method to monitor the interstitial space between the primary and secondary walls.

Violation Date:	08-27-2019
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 09/26/2019. 1x 55-gallon drum of drained used oil and fuel filters had an accumulation start date of 8/24/16. Ensure this drum is picked up immediately, and dispose of metal filters within one year of accumulation going forward.

ADVANCE AUTO TECH, INC (Continued) **S105109316**

Violation Date:	08-17-2016
Citation:	HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes:	Returned to compliance on 09/02/2016. Paper-only used oil filters are co-mingled with the metal-encased used oil filters in the 55 gallon drum labeled as "drained used oil filters." Paper-only filters cannot be recycled for their scrap metal content and therefore cannot be managed under the exclusion management requirements for metal-encased used oil filters. Begin accumulating paper-used oil filters separately from metal-encased used oil filters and manage the paper used oil filters as fully regulated hazardous waste (i.e. "debris saturated with used oil.")

Violation Date:	08-27-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 09/26/2019. 1x 55-gallon drum of used coolant had an accumulation start date of 8/25/16. 1x 30-gallon drum of oily solid debris (paper filters) had an accumulation start date of 8/17/16. The ~220-gallon tank of used oil had an accumulation start date of 4/4/18. Ensure these drums are picked up immediately, and continue to dispose of hazardous waste within 6 months of accumulation.

Violation Date:	08-27-2019
Citation:	40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description:	Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes:	Returned to compliance on 08/28/2019. Fire extinguishers were last serviced 2/23/18.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	89800
Site Name:	ADVANCE AUTO TECH
Violation Date:	08-27-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 09/25/2019. Sam Le stated that metal shavings are thrown into regular trash. No shavings were observed in the trash today, but recycling of metal shavings had been discussed during the last routine inspection at this facility on 8/17/16. If metal shavings meet hazardous waste criteria, they must be managed accordingly. Observed one 5-gallon bucket of ECO 290 vinyl sheet flooring adhesive next to the parking lot, which had leaked out of the bucket onto the ground into a semi-solid state (the safety data sheet describes the consistency as "buttery", and the color "white", which is consistent with what was observed). Owner, Hanson Le, stated that this did not belong to the shop, and was likely left here by an unknown party. This spill was cleaned up during the inspection. If the material is hazardous, dispose of it as such.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	89800
Site Name:	ADVANCE AUTO TECH
Violation Date:	08-27-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

ADVANCE AUTO TECH, INC (Continued) **S105109316**

Violation Notes:	Returned to compliance on 09/26/2019. The following hazardous waste containers were not fully marked: - 2x 30-gallon portable drums of used oil (hazardous waste labels were attached, but all written information was very faded)

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-17-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. The facility conducts general automotive repair work and routinely generates used oil, used antifreeze, metal-encased used oil filters, and paper-used oil filters. Used brake fluid is occasionally generated, but on a very infrequent basis. NOTES TO FACILITY: - Ensure that all containers that formerly held a hazardous material or hazardous waste are fully empty of all pourable or scrapable material prior to trash disposal/recycling. If the container cannot be fully emptied, then manage the contaminated container as hazardous waste. - Ensure that all aerosol cans are fully empty of contents and propellant if disposed of as trash/non-hazardous recycling. If the aerosol can cannot be completely emptied of contents or propellant, manage as universal waste or hazardous waste. - Ensure that all collected brake shavings are recycled and not disposed of as trash. Notes: - CA EPA ID Number: CAL0003224690 (ACTIVE) - [Truncated]

Violation Date:	08-14-2019
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Among various bottles (ranging in size from pint to gallon containers) of mostly expired waterborne material, there may be some materials which meet hazardous waste criteria. Additionally, there is a 55-gallon container labeled Visstar ALK-300E, a low-VOC enamel, which reportedly has been here since the business moved in (the previous owner was also an auto body supplier). Determine whether any of these materials are considered hazardous, either through laboratory testing or generator knowledge, and dispose of them appropriately.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-14-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine Hazardous Materials Business Plan (HMBP) inspection. During the walkthrough, it was discovered that this facility also generates hazardous waste in the form of paint-related materials from paint mixing as well as expired retail materials. Facility is an auto body supply store, selling paints and paint-related material, body filler, and other such materials. There is a paint mixing area as well. Expired retail materials include a variety of products, many of which are waterborne and may not be considered hazardous. A 55-gallon drum of solvent-based paint-related material is next to the mixing area - this is primarily for expired materials, and not otherwise generated as part of any processes at this facility. Mixing supplies, including cups and strainers, are left to dry before being disposed in the trash. Notes: - Mr. Scholl and the owner are reportedly trained on hazardous waste management. Employees are trained regularly. - Emergency [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-14-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: HMBP most recently submitted through CERS ID 10349776 on FrontCounter on 8/9/19. Hazardous materials at or above HMBP thresholds include: - Solvent-based paint-related material (55 gallons) - Paints (~80 gallons at the mixing station, with additional containers in stock for retail sale). Based on today’s inspection, the permit will be changed from BP02 to BP01 (1-3 HMBP chemicals).

Violation Date:	01-17-2017
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	Returned to compliance on 02/13/2017. Observations made during inspection, including the significant quantity of dried used oil observed in the hazardous waste container area's secondary containment trough, indicate that hazardous waste container area inspections are not being conducted weekly.
Violation Division:	Santa Clara County Environmental Health

Violation Date:	01-17-2017
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 02/13/2017. Used oil-saturated absorbent was observed on the floor of the facility surrounding the used oil drum that is not located within secondary containment. No berm or barrier is located between the floor and the outside environment, including the nearby storm drains. Used oil-saturated absorbent must be immediately collected and managed as hazardous waste in order to prevent the unplanned release of hazardous waste to the air, soil, or surface water.

Violation Date:	01-17-2017
Citation:	HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes:	Returned to compliance on 02/13/2017. 1) Used oil-saturated absorbent was observed on the floor of the facility next to the used oil drum that is not located within the secondary containment trough, but no container for debris saturated with used oil was observed on-site. Upon inquiry, Mr. Chow stated that used oil-saturated absorbent is disposed of to the trash. Used oil-saturated absorbent must be collected, managed, and disposed of as hazardous waste. 2) Paper-used oil filters were observed to be commingled with metal-encased used oil filters. While the drum and transfer pan accumulating the commingled used oil filters was observed to be un-labeled, a review of the facility's consolidated manifests confirmed that the commingled used filters are managed as "drained used oil filters" and not as hazardous waste. "Drained used oil filtersG are defined as filters which contain a residue of used oil and can be recycled for their scrap metal value (i.e. metal-encased used oil filters). Paper used oil filters [Truncated]

Violation Date:	01-17-2017
Citation:	HSC 6.5 25250.7 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.7
Violation Description:	Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes:	Returned to compliance on 02/13/2017. Used brake fluid is currently being commingled with used oil for management as "used oil." Used oil being managed and disposed of as "used oil" cannot be mixed with anything other than minimal amounts of vehicle fuel. Otherwise, the commingled waste (i.e. used oil and used brake fluid mixture) must be managed as a fully-regulated hazardous waste. Please note that "minimal amounts of vehicle fuel" refers to small amounts of engine blow-by from normal use and does not include the intentional mixing of vehicle fuel with used oil.

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 08/09/2019. The following hazardous waste containers were marked except as noted: - 1x 55-gallon drum of used oil (missing accumulation start date) - 2x 55-gallon drums of used oil (no markings) - 2x 30-gallon portable drums of used oil (no markings) - 1x 5-gallon bucket of used oil under a bench (no markings) - 1x 55-gallon drum of used coolant (accumulation start date was incorrect (dated 7/17 when the most recent pick-up receipt was from 6/12/19) - 1x 20-gallon drum of oily solid debris (paper filters) (label had another generator's information on it, and a 2012 date)

Violations:

Site ID:	149249
Site Name:	ROY MILLER FREIGHT LINES LLC
Violation Date:	12-02-2016
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: G accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator G the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.
Violation Notes:	Returned to compliance on 12/27/2016. Observed 1x55 gallon container of used antifreeze with 10 gallons of antifreeze in it, last picked up on 11/19/15. Mr. Pickens stated that used absorbent has been collected

ROY MILLER FREIGHT LINES LLC (Continued) **S121746123**

in a container but has not been picked up in the past year.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 149249
Site Name: ROY MILLER FREIGHT LINES LLC
Violation Date: 12-02-2016
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 12/27/2016. Observed liquid in the bottom of used oil filter container. Drain filters better to ensure that liquid does not collect in the bottom of the container. Suck out liquid before disposing of oil filters.

Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-02-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility last submitted on CERS on 1/6/2016 using CERS ID 10346791. Property owner and business owner are the same entitiy. Facility has the following reportable quantities of hazardous materials: 264 cf of oxygen gas 250 cf of acetylene gas 120 gallons of liquid propane 110 gallons of 15W40 motor oil 275 gallons of diesel exhaust fluid 110 gallons of used oil 55 gallons of used antifreeze Facility has the following materials below reporting thresholds: 264 cf of argon gas less than 55 gallons per type of misc lubes and grease 1x55 gallons of used absorbent 2x55 gallons of used oil filters NOTES: 1.) CERS submittal is due for recertification before 1/6/16. 2.) Facility reported an incorrect EPA ID number in the business activities section of their online submittal. Correct this typo upon next submittal.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-02-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility does fleet vehicle maintenance for large trucks. Facility generates used oil, used antifreeze, oily solids, and used oil filters. Facility does minimal brake work on-site and does not generate waste DEF. Rags are commercially laundered (receipts reviewed) and batteries are sent back to corporate as part of a core exchange program (receipts reviewed). EPA ID number CAL000135442 is currently active, fire extinguishers are annually serviced, and spill kit is adequate. Inspection included walk-through of work bay, waste

ROY MILLER FREIGHT LINES LLC (Continued) **S121746123**

oil storage trailer, DEF storage room, inspection of facility perimeter and trashcans, and review of waste shipping documents for the past three years. The following violations were corrected at the time of inspection by Mr. Pickens: G020 Marking of hazardous waste: Observed 1x55 gallon container of waste antifreeze with no label. Observed 2x55 gallon containers of used oil with inaccurate start dates. Observed 1x55 gallon container of oily solids [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CALIFORNIA ROOFING COMPANY (Continued) **S103945895**

	12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	A large number of containers on-site had no labels and Mr. Rebozzi claims that they do not generate hazardous waste. Mr. Rivera stated that they know not to throw many of the waste containers with liquid materials in the trash but could not confirm what happens to these containers. Facility has failed to determine what materials are hazardous wastes when they can no longer be used. Facility generates 3x250 gallon plastic totes and 1x55 gallon drums of milky white liquid that Mr. Rivera stated is waste water used to wash paint guns after use. Mr. Rivera was unsure of what types of paints were used in this process. These containers previously contained and still hold residues of emulsion clay and base coat. Observed wet rags in trashcan of the metal shop but Mr. Rivera and Mr. Rebozzi could not explain the process that generated these rags.

CALIFORNIA ROOFING COMPANY (Continued) **S103945895**

Violation Notes:	Facility does not have a hazardous waste permit and facility employees could not estimate the amount of hazardous waste generated per month. Facility has pallets of containers of waste, as indicated by Mr. Rivera. Some of the items noted in this pile included: phosphoric acid etcher, part a and part b waterborne epoxies, membrane adhesive, tremco sheeting bond, siloxane PD, containers of paint wash water used to wash painting guns off site, non-empty aerosol cans, non-empty vulkem 116 sealent tubes, and kerosene. Facility also has partially used 55 gallon drums of various materials that can no longer be used including: garlaprime 7612, asphault, and other roofing materials.

Violation Date: 11-14-2016
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: Observed multiple open contains filled with rain water or spilled. Observed 1x5 gallon white bucket overturned, and shape of dried material indicates that it contained a liquid material when spilled (no label). Observed 2 leaking 5 gallon containers that had spilled liquid materials to the ground outside. These containers were labeled as Tremco SP Waterbased Primer and PVC Adhesive low VOC. Observed non-empty containers with pliable Vulkem 116 sealant inside trash cans. Observed oily water on the ground with a rainbow sheen under one of the tar heating kettles. Observed lead solder flakes on a metal board outside and on the ground around the board. Mr. Rivera stated the the facility has been in the process of cleaning out old materials for over a year and that previously someone had taken their waste materials for reuse. Facility could not provide the name of the individual who took this material or documents showing this disposal.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility is a roofing contractor that installs roofing in the field. Facility has a metal shop, a soldering station, bonding materials, adhesives, epoxies, etching materials, paints, diesel fuel, and other roofing related materials. Facility was visited prior to 11/10/16 for a routine inspection but facility employee working at the time said that they could not provide access to the warehouse since they did not have keys. Inspection commenced on 11/10/16 and began as a hazardous materials business plan inspection. Once Mr. Rivera indicated that a large pile of containers were waste material, it was determined that the facility required a hazardous waste permit. Several questions about the metal working shop and access to the shipping container could not be immediately addressed and were scheduled to be addressed on 11/14/16. When visiting on 11/14/16, some containers of waste were moved and covered, but no additional access to employees working in the metal shop or to [Truncated]

Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-01-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility uses sand and epoxies to make floors and stores various sealers, epoxies, and tints. Facility generates some waste liquids from this production process, as well as used oil and oil filters from oil changes. Inspection included walk-through of facility work areas, 2 garage bays used for storage, the acetone storage shed, the perimeter of the lot, and inspection of trashcans. Fire extinguishers are annually serviced, spill kit is adequate, and EPA ID number CAL000067193 is currently active.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-01-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility submitted their hazardous materials business plan on CERS on 2/8/16 using CERS ID 10346854. Previously, the business owner and property owner were the same, until the business was sold by the property owner (business remains the same). Facility has the following reportable quantities of hazardous materials (31 reportable): 165 gallons of acetone 55 gallons of glycol ether 110 gallons of Teragem III flex B 55 gallons of Teragem III B DQ 110 gallons of used oil 80 gallons of 802RVOC 55 gallons of Teragem III CRS 3B 110 gallons of Teragem III CRS B 1100 gallons of RP70A 1100 gallons Teragem IIIA 110

Violations:
Site ID: 156862
Site Name: STAR AUTO SERVICES
Violation Date: 11-04-2016
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Returned to compliance on 12/05/2016. Observed several oil quart containers in trashcans and dumpsters that still contained pourable amounts of oil.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 156862
Site Name: STAR AUTO SERVICES
Violation Date: 11-04-2016
Citation: HSC 6.5 25250.7 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.7
Violation Description: Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes: Returned to compliance on 12/05/2016. Facility regularly mixes used brake fluid with used oil, according to Mr. Tran. Mr. Tran was advised that used brake fluid must be collected separately and managed as hazardous waste.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 12/15/2015. Access to breaker box in work area was blocked by containers and equipment.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 156862
Site Name: STAR AUTO SERVICES
Violation Date: 09-02-2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given

STAR AUTO SERVICES (Continued) **S103881041**

to each person filling a position.

Violation Notes: Returned to compliance on 12/15/2015. Due to the number and type of violations observed during inspection and confirmation from facility owner that employee training is not being conducted, personnel are not adequately trained on managing hazardous waste. Additionally, employee training is not being documented. Maintain training records that include: 1) the name and job title of each person in a position that has hazardous waste management responsibility; 2) a written job description that includes the duties, skills, education, or other qualifications required for each position described above; 3) a description of the type and amount of introductory and continuing training that will be given for each position; and 4) documentation that this training was completed by facility personnel. Keep current employee training records until facility closure. Keep records on former employee for at least 3 years from the date the employee last worked at the facility. [CCR 66265.16(e)]

Violation Date: 09-02-2015
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description: Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes: Returned to compliance on 12/15/2015. - Paper used oil filters were observed in 55 gallon drum marked "drained used oil filters." Owner confirmed that paper and metal used oil filters are combined. Paper and metal used oil filters cannot be combined for disposal as "drained used oil filters." Facility can either separate out paper used oil filters and manage them as a hazardous waste (ex. "Oily Debris") and continue to manage metal used oil filters accordingly or manage entire drum of used oil filters as a hazardous waste. - A paper used oil filter and oil-saturated rags were observed in dumpster. Used rags were observed in trash bins in facility. Oil covered cardboard was observed in trash bin near dumpster. Oil-contaminated debris (i.e. "Oily Debris") must be collected and managed as a hazardous waste. Used rags must be collected and commercially laundered or collected and managed as a hazardous waste.

Violation Description:	Haz Waste Generator Program - Administration/Documentation - General
Violation Notes:	- Employee confirmed that facility is combining waste diesel from parts washer with used oil. Corrective Text: Per HSC 25250.7, no person who generates, stores, or transfers used oil shall intentionally contaminate used oil with other hazardous waste other than minimal amounts of vehicle fuel. Corrective Action: Used oil and waste diesel from parts washer need to be collected separately and managed as hazardous wastes.

Eval Date: 09-15-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a routine hazardous waste inspection with the consent of Thanh Nguyen. The following waste containers were observed on-site: - 8 x 55 gallon drums of used oil - 1 x 55 gallon drum of used oil filters - 1 x 30 gallon drum of waste paint related material - 4 x open pans of used oil near and on top of used oil drums - 1 x parts washer with 20 gallon drum of waste diesel NOTES: - Facility is an auto body and auto repair shop that uses solvent and low VOC paint. Facility stated that they only have low VOC waste paint related material and collect the waste paint related material in a 30 gallon drum. Facility stated that they do not generate solvent waste paint related material. - Paint cups are emptied and re-used. Observations during inspection are consistent with this process. - Fire extinguishers with a current re-charge date of 3/20/2015 were located on facility walls. - Used rags are being collected and commercially laundered. Recent were [Truncated]

Site ID: 154656
Site Name: SONNY VAN AUTO BODY
Violation Date: 07-16-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/13/2019. The following hazardous waste containers were marked with the words G Hazardous WasteG , but no other required information: - 1x 55-gallon drum of used oil (label faded) The following hazardous waste containers were missing all required markings: - 1x 30-gallon drum of solvent-based paint-related material - 1x 30-gallon portable drum of used oil - 1x 5-gallon bucket of oily solid debris (paper filters) Additionally, 1x 55-gallon drum of drained used oil filters was marked with the composition and accumulation start date, but no other information.

Violation Date: 08-27-2015
Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: Returned to compliance on 12/31/2015. Used oil filter drum was labeled as "drained used oil filters," but is not marked with an initial date of accumulation.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 154656
Site Name: SONNY VAN AUTO BODY
Violation Date: 07-16-2019
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 08/13/2019. Paint booth filters are changed approximately twice a year. Mr. Huynh stated that used filters are thrown into the garbage dumpster. Either have the filters tested to see if they meet hazardous waste criteria, or manage them as hazardous waste. Similarly, paint strainers were observed in a trash can. Determine whether these strainers are hazardous waste, or manage them as such.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-16-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: CERS ID 10352257 was last submitted on 5/9/19. Hazardous materials at or above reportable thresholds include: - Used oil (1x 55-gallon drum, 1x 30-gallon portable drum [not emptied daily]) Notes: - Mr. Huynh was able to provide a copy of the most recent HMBP upon request. - Mr. Huynh has no employees. - IT IS RECOMMENDED THAT THIS FACILITY SWITCHES OUT THE USED OIL DRUM FOR A SMALLER ONE, AND EMPTY THE PORTABLE DRUM NIGHTLY, IN ORDER TO NOT MEET HMBP THRESHOLDS.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-16-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Onsite to conduct a routine Hazardous Materials Business Plan (HMBP) and hazardous waste inspection. This is an auto body shop with one paint booth. Mr. Huynh stated that some minor auto maintenance used to done in the facility, but those operations ceased a few years ago. Facility has used oil, drained used oil filters, oily solid debris (paper filters), water-based waste paint related material (PRM), and solvent-based PRM. Notes: - State ID CAL000138850 is active. - Fire extinguishers were serviced in June 2019. - Absorbent is available. - Consolidated manifest receipts for used oil for the last three years were reviewed. - No bills of lading for drained used oil filters were available, but the drum was dated 9/9/15 (>3 years). - No uniform

SONNY VAN AUTO BODY (Continued) **S103988468**

manifests for PRM were available for review. The date on the water-based PRM drum was 9/30/15. There was no date on the solvent-based PRM drum, but Mr. Huynh stated that both drums were picked up at the same time. - Rags [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-27-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility most recently electronically submitted a hazardous materials business plan (HMBP) on 5-16-18. Reportable hazardous materials include but are not limited to: Propane Sealant Adhesive part A (Isocyanate based) Adhesive Part B (propylene glycol/amine based) Acrylic coatings Reviewed some training and documentation regarding response to a release or threatened release of hazardous material. Training performed upon hire and at periodic tailgate meetings. REQUIRED ACTION: Within 30 days, submit to the County the most recent hazardous materials training as it relates to how to address a release or threatened release of a hazardous material (eg leaking adhesive drum, propane leak/fire etc). Include employee signatures or evidence demonstrating employee has received this training. NOTE 1: Location of adhesive A and adhesive B are identified on the site map at 21/H however the storage location at time of inspection appeared to be approximately 24/O. Update [Truncated]

Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-27-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Facility owner has stated he doesn't believe any hazardous waste was removed from the site in the last 3 years. CAL000371566 is active. Hazardous wastes generated on-site may include but are not limited to: Damaged/expired/unidentified Paint/sealant/adhesives etc that are no longer usable Aerosol cans (Universal waste) Fleet service is performed off-site. Facility is eligible to participate in the County's hazardous waste disposal program for small businesses, to participate, go to HHW.ORG. NOTE: Observed various aerosols containers that appeared to be in a discarded state on the concrete immediately behind the part a and part b adhesive. Ensure these aerosols, if no longer usable, are either 1)empty of gas and liquid components (CCR 66261.7) and discarded in the trash, or 2) managed as a hazardous waste or universal waste. Safety Coordinator Edward Brugge believed that the cans in the past have possible been returned to a participating paintcare location [Truncated]

SHARKS ICE OF SAN JOSE (Continued) **S109448818**

Eval Type: Routine done by local agency
Eval Notes: Property and facility are owned by the same entity. Facility last submitted their HMBP on FrontCounter on 9/3/2016. NOTE: The inventory listed online has a typo listing 150 gallons of IWC 270 instead of IWC 275. Please fix this typo Facility has the following materials above reporting thresholds: 8000 gallons of glycol coolant 150 gallons IWC 275 corrosion inhibitor 600 gallons of propane 1537 gallons of R22 refrigerant gas used to cool the ice rink Facility has the following materials below reporting thresholds: used metal oil filters various janitorial supplies and soaps less than 5000lbs of salts 10 gallons of IWC 255 900 cf of Nitrogen and Carbon Dioxide compressed gas 30 gallons of used oil 75 gallons of misc jet ice paint
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-04-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates hazardous waste from the zamboni maintenance and generates metal case oil filters and used oil. Batteries are exchanged for their cores and dirty rags are commercially laundered. Facility stores used oil in on 30 gallon container and has oil picked up every 9 to 12 months according to the mechanic on duty at the time of inspection. Drum contained about 5 gallons of used oil at the time of inspection. Inspection included walk-through of all zamboni service rooms, coolant storage rooms for each rink, inspection of trash, and review of documents for training. The following violations were corrected at the time of inspection: G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection NOTES: 1.) Mr. Maguire was given information about the small business program as an alternative way for him to dispose of hazardous waste. Ensure to give EPA [Truncated]

Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 11/16/2017. Per a review of consolidated manifests and bills of lading, last pickup of drained used oil filters occurred on 3-27-14. DO NOT ACCUMULATE LONGER THAN 1 YEAR.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	115728
Site Name:	FAIRGROUND AUTO
Violation Date:	06-12-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 11/16/2017. CONTAMINATION OF USED OIL Fuel filters are emptied into the used oil prior to managing the metal filter as a drained used gas filter. Per 25250.7 (a) of the California Health and Safety Code, "...no person who generates, stores, or transfers used oil shall intentionally contaminate used oil with other hazardous waste other than minimal amounts of vehicle fuel." Minimal amounts of vehicle fuel refers to contamination via engine "blow-by", whereas fuel can be forced through the rings and into the crankcase. Immediately cease addition of non-oil hazardous waste to the used oil

Site ID:	40868
Site Name:	K K PRECISION MACHINING INC
Violation Date:	10-13-2015
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 12/09/2015. Free flowing coolant was observed in 5 gallon buckets for collecting scrap metal, a mop bucket, and in 55 gallon drums for scrap metal accumulation throughout facility. A waste determination needs to be made in order to determine whether the coolant is usable or is a waste. If coolant is no longer usable, it must be collected and managed as hazardous waste. Provide documentation to inspector of waste determination.

KK PRECISION MACHINING, INC (Continued) **S112206452**

generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 10/10/2019. Observed a small amount of liquid in a trash can lid. Mr. Khuu stated this was coolant which spilled out during maintenance of the machine yesterday. The liquid had coloration which indicated it might have a small amount of tramp oil in it. Mr. Khuu stated this liquid was destined to be poured into a scrap metal drum. Determine whether this liquid is re-usable. If not, it must be collected and managed as hazardous waste. Aside from dragout in the metal chips, excess coolant such as this must either be re-used or collected and managed as waste. Some liquid was also observed at the base of a drill press. Determine whether this liquid contains any used oil, and if so, manage it as hazardous waste.

Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-19-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Onsite to perform a routine hazardous waste and Hazardous Materials Business Plan (HMBP) inspection with Hazardous Materials Specialist Jon Blazo from this office. Completed walkthrough with owner, Thien Khuu. Facility is a machine shop which manufactures parts for the semiconductor industry. Facility primarily uses 6061 aluminum. State ID CAL000283462 is active. All scrap metal is collected for recycling. No metal was observed in the trash dumpster. Mr. Khuu stated that coolant in the machines has never had to be replaced. Some manual deburring and sanding occurs; if any metal shavings from these processes generates particles less than 100 microns in size, it is not eligible for scrap metal recycling; if the shavings also meet hazardous waste criteria, then they must be managed as such. Employees are trained. Fire extinguishers are annually serviced.
Eval Division:	Santa Clara County Environmental Health

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-13-2015
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Onsite to conduct a routine hazardous waste inspection with the consent of owner, Thien Khuu. Facility is a small machine shop (five machines onsite) that manufactures metal parts with aluminum and other non-ferrous metals. Scrap metal is separated by metal and collected in 55 gallon drums throughout the facility for metal recycling. Receipts for scrap metal recycling for the last year were reviewed during the inspection. Owner stated that coolant in machines has never been emptied and replaced. Facility continues to re-use coolant in the machines with small amounts of new coolant being added as needed. Small, residual amounts of free flowing, used coolant was observed in 5 gallon buckets, small containers, a mop bucket, and 55 gallon drums throughout the facility. Owner was informed that any waste coolant that can no longer be used in the machining process must be collected and properly managed as hazardous waste. No waste coolant was accumulated onsite at the time of [Truncated]

CERS HAZ WASTE:

Name:	EMINENCE FRONTS GRAPHICS
Address:	115 PHELAN AV 9
City,State,Zip:	SAN JOSE, CA 95112
Site ID:	28217
CERS ID:	10344640
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	28217
Site Name:	EMINENCE FRONTS GRAPHICS
Violation Date:	12-02-2016
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 12/13/2016. Facility was missing one manifest from 12/17/2015 (manifest no. 005133007SKS). Obtain a copy of this manifest to retain on-site and forward a copy to our office for review.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-02-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility does screen printing and generates hazardous waste mineral spirits used to wash printer parts (30 gallon parts washer) which is delivered for disposal with the Household Hazardous Waste collection facility. Facility also uses wash booths to clean print screens. These booth catch ink, surfactant, and emulsion remover and their waste was sampled and sent for a 96 hour fish bioassay in 2004 with Block Environmental (LC50>750). Rags are commercially laundered by Aramark. Facility has an active EPA ID number (CAL 000286252), fire extinguishers are annually serviced, spill kit is adequate, and emergency posting is up to date. Inspection included walk-through of work areas with 2 printers, laser printing room, ink mixing station, printer parts washing station, upstairs screen washing station, and inspection of trashcans and disposal documentation for the past 3 years. Mr. Asciutto stated that employees are trained in hazardous waste management through meetings and that [Truncated]

Violations:
Site ID: 163224
Site Name: TRANSON AUTO BODY AND PAINT
Violation Date: 06-26-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using

TRANSON AUTO BODY AND PAINT (Continued) **S106916628**

generator knowledge or applying testing method.
Violation Notes: Observed approximately 5 -6 plastic cup liners that container approximately 1-2 inches of solidified clear coat resin. Determine if these are hazardous waste and if so manage as such. Do not dispose of in municipal trash without making a hazardous waste determination. Review chemical contents of waste and/or perform laboratory testing to confirm it is non hazardous.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 163224
Site Name: TRANSON AUTO BODY AND PAINT
Violation Date: 06-26-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Facility failed to retain the following Uniform Hazardous Waste Manifest: 006236999FLE shipped on 5-12-2015.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-26-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Performed a walk-through inspection in addition to a review of electronic submission performed on 3-14-17. Most recent submission was accurate and does not identify any hazardous materials above reporting threshold. Permit will be inactivated.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-26-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility uses an automated gun cleaning unit to clean spray gun. Facility accumulates gun cleaner and paint related waste in a 15 gal size container. Spent spray booth filters are collected in a 55 gal drum and reportedly disposed of as hazardous waste via Safety-Kleen. EPA ID # CAL000316418 is active. Generator manifest copies are sent to DTSC. The following minor violations were corrected at time of inspection: 1x55 gal paint booth filters - no hazardous waste marking. Marked. NOTE 1: Facility manager Than Tran indicated that spent spray booth filters are disposed of as hazardous waste by Safety-Kleen however last shipment observed of a solid material (identified as hazardous waste solid, nos) was performed on 1-29-2008. This shipment was likely spent filters or gun cleaner solids. DETERMINE IF MORE RECENT CONSOLIDATED MANIFEST RECEIPTS EXIST AND IF SO OBTAIN COPIES OF

TRANSON AUTO BODY AND PAINT (Continued) **S106916628**

THESE RECEIPTS. FILTERS MUST BE MANAGED AS HAZARDOUS WASTE OR BE EVALUATED VIA [Truncated]

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	The site map submitted on 1/29/19 is inaccurate: Adjacent streets identified include "West 7th Street" and "North Phelan Avenue" - 7th Street is not designated in the west-east direction, and Phelan Ave is not designated by any direction. In addition, Monterey Ave., which the

FINISHMASTER, INC. #233 (Continued) **S121739922**

storefront faces, is not identified on the map at all. The building itself is facing the wrong direction (the front door seems to be facing 7th St., and the back door faces where Monterey Rd. would be). Given the incorrect orientation of the building, it is unclear whether the evacuation staging area and storm drain shown on the map are accurate. Finally, internal roads (including the parking lot(s) are not identified; the map makes it appear that the building is directly adjacent to both 7th St. and Phelan Ave. (it should be noted that 7th St. is actually quite a distance away, with many buildings between this one and the street itself).

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 116480
Site Name: FinishMaster, Inc. #233
Violation Date: 09-04-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: A 55-gallon drum of liquid paint-related material has not been picked up in a number of years, according to Mr. Garcia. Immediately arrange for pick-up of this drum, and provide the hazardous waste manifest.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to perform a Hazardous Waste Generator permit investigation. Business does truck repair. A facility walk-through was conducted with vice president Sheri Lee and president Jim Lee. Both stated that the amount of hazardous materials they store has decreased, along with their operations. The following hazardous waste streams were observed: - used oil: 1 x 376 gal tank - used oil filters: 2 x 55 gal drums (crushed) - grease: 1 x 30 gal drum The following hazardous materials were also observed: - new oil/ ATF/ gear oil: approx. 120 gal - oxygen: 1 x 282 cubic ft cylinder - acetylene: 1 x < 200 cubic ft cylinder - Ar/ CO2: 2 x approx. 300 cubic ft cylinders Notes: - EPA ID CAL000371980 is active. - Mr. Lee stated that coolant is collected and reused, so they never generate any waste coolant. - Several empty cylinders, tanks, and drums were observed on-site, however Mr. Lee stated that they weren't in use and that he would sell them or get them up.
