Summary of Violations & Notice to Comply

Program: COZXNCMQ8 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: COMPLAINT INVESTIGATION

Comments / Observations

On-site to investigate a complaint that the facility is using "non-compliant paint". A hazardous waste permit investigation was already completed on 4/6/17 and any non-compliance with the Hazardous Materials Business Plan or with hazardous waste generation regulations was fully detailed on this report. Facility response to this report is not yet due. After inspection of the flammables cabinet and waste disposal containers, inspector determined that this complaint should be referred to Bay Area Air Quality Management District for any further follow-up, if deemed to be necessary. Mr. Cartelli stated that he buys all of his paints from Santa Clara County suppliers to ensure that paints are compliant with local air quality requirements. Complaint was referred to BAAQMD on 4/17/17, and no further action will be taken by HMCD at this time.

Inspected By: EE0010436 - ROBIN WARD

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Summary of Violations & Notice to Comply

Program: SRFFKRSIL - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G003	M	**HAZARDOUS WASTE GENERATOR PERMIT [3015]]** Facility failed to obtain, or keep valid through payment of fees, a Hazardous Waste Generator Permit from HMCD. ***Facility does not currently have a permit to generate hazardous waste. A permit application was completed at the time of inspection.*** Submit, via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities. Indicate "YES" to activities question asking if you generate hazardous waste. Pay the annual permit fee, if required, upon receipt of an invoice. [SCCO B11-422]	
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***In the past, paint booth filters have been managed as non-hazardous. Paint booth filters may contain regulated metals and may be hazardous waste. Make a determination on how paint booth filters will be managed in the future.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Facility has been disposing of soiled absorbent and oily rags to trash, and both soiled materials were observed in dumpsters during the inspection. Begin collecting these materials as hazardous waste oily solids. Ms. Thompson was advised that rags may be commercially laundered by a facility with a proper permit to do so, or they may be managed as hazardous waste.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G201	II	**ACCUMULATION TIME: CESQG [3030009]** Facility failed to dispose of hazardous waste within a 180/270 day (or 90 day for acutely hazardous wastes) period after the first 100-kilogram threshold amount was accumulated. ***Facility has been accumulating 40 gallons of antifreeze for over 2 years.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 180 days (or 90 days for acutely hazardous wastes) after the first 100 kg of waste are accumulated. [HSC 25123.3(c); CCR 66262.34(b)(1)]	

Comments: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner. Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have been managed as non-hazardous by Corrick. Parts washer is topped-off as needed. Containers of waste are inspected weekly and employees are trained in hazardous waste management. Fire extinguishers were recently purchased, spill kit and emergency aisle space are adequate, eyewash is maintained, and EPA ID number CAL000418621 is currently active.

Facility had the following wastes at the time of inspection:
30 gallons of used oil
40 gallons of used antifreeze
5 gallons of oil filters
oily solids
30 gallons of paint waste
55 gallon drum of solid paint waste

Generator status:
Facility generated 55 gallons of used oil from start of operations to August of 2016. In the past 8 months, facility has generated 30 gallons of used oil. In two years of operation, facility has generated roughly 40 gallons of used antifreeze. In 8 months of painting, facility has generated 1x55 gallon drum of paint solids and less than 30 gallons of paint waste liquids. Total average waste per month: 10 gallons per month of liquids, excluding solid paint waste and oily solids.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 15 gallon mobile oil container with no hazardous waste label. Observed 55 gallon solid paint waste drum with a label for Excluded recyclable materials. Observed 30 gallon paint waste liquids drum with no hazardous waste label. All three labels were corrected at the time of inspection and Excluded recyclable materials label was replaced with a proper hazardous waste label.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.
G412 Container marking (used oil/fuel filters): 1x5 gallon container of used oil filters had no accumulation start date. Accumulation start date was added at the time of inspection.
G413 Container requirements (used oil/fuel filters): Observed one used oil filter out of containment. Filter was placed in the appropriate container during the inspection.

NOTES:
1.) Facility was advised to accumulate waste in smaller containers to avoid violating accumulation times in the future. Facility was also given information on county hazardous waste disposal services available to small businesses (CESQG) in the county.
2.) Facility has not generated the following wastes yet, but was advised that they could be hazardous wastes when

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 180 days (or 90 days for acutely hazardous wastes) after the first 100 kg of waste are accumulated [HSC 25123.3(c), CCR 66262.34(b)(1)]	We will be arranging Pick-ups likely every 6 months no greater than 12 months ✓

Comments: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner, Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have been managed as non-hazardous by Corrick. Parts washer is topped-off as needed. Containers of waste are inspected weekly and employees are trained in hazardous waste management. Fire extinguishers were recently purchased, spill kit and emergency aisle space are adequate, eyewash is maintained, and EPA ID number CAL000418621 is currently active.

Facility had the following wastes at the time of inspection:
30 gallons of used oil
40 gallons of used antifreeze
5 gallons of oil filters
oily solids
30 gallons of paint waste
55 gallon drum of solid paint waste

Generator status:
Facility generated 55 gallons of used oil from start of operations to August of 2016. In the past 8 months, facility has generated 30 gallons of used oil. In two years of operation, facility has generated roughly 40 gallons of used antifreeze. In 8 months of painting, facility has generated 1x55 gallon drum of paint solids and less than 30 gallons of paint waste liquids. Total average waste per month: 10 gallons per month of liquids, excluding solid paint waste and oily solids.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 15 gallon mobile oil container with no hazardous waste label. Observed 55 gallon solid paint waste drum with a label for Excluded recyclable materials. Observed 30 gallon paint waste liquids drum with no hazardous waste label. All three labels were corrected at the time of inspection and Excluded recyclable materials label was replaced with a proper hazardous waste label.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.
G412 Container marking (used oil/fuel filters): 1x5 gallon container of used oil filters had no accumulation start date. Accumulation start date was added at the time of inspection.
G413 Container requirements (used oil/fuel filters): Observed one used oil filter out of containment. Filter was placed in the appropriate container during the inspection.

NOTES:
1.) Facility was advised to accumulate waste in smaller containers to avoid violating accumulation times in the future. Facility was also given information on county hazardous waste disposal services available to small businesses (CESQG) in the county.
2.) Facility has not generated the following wastes yet, but was advised that they could be hazardous wastes when

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: Skunkworks
Site Address: 210 E Alma AV, SAN JOSE, CA 95112

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

generated: sand blast media, filter sludge for the parts washer.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Program: SRU00JZ4E - HAZARDOUS MATERIALS BUSINESS PLAN - BP01
Inspection Type: ROUTINE INSPECTION

Verified on follow-up after inspection that facility switched to smaller containers and is below HMBP quantities

VC	Class	Violation	Corrective Actions Taken
B100	II	**HMBP NOT SUBMITTED [1010002]** Facility operator failed to complete and submit a Hazardous Materials Business Plan (HMBP) when storing or handling hazardous materials at or above HMBP reporting thresholds ***Facility has never submitted a hazardous materials business plan.*** Within 30 days, electronically submit a HMBP through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.scgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a), 25508(a)(1), 25508(b)]	Currently under requirements for this. No liquid storage. 750 gallons on property ✓
B126	M	**HMBP COPY FOR PROPERTY OWNER [1010012]** Facility operator failed to provide a copy of the Hazardous Materials Business Plan (HMBP) to the property owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent. ***Facility has not notified the owner in writing of their compliance with the hazardous materials business plan. A template letter was provided at the time of inspection.*** Provide a copy of the HMBP to the owner or the owner's agent. [HSC 25505.1]	currently under requirements for this ✓
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Facility does not currently document any annual emergency response training.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make training records available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	currently under requirments for this we do keep a training and into binder to keep track of all trainings. ✓

Comments: On-site for a hazardous materials business plan permit investigation. At this time, facility requires a hazardous materials business plan.

Facility has the following reportable hazardous materials:
1x55 gallons of new acetone
2x85 + 15 gallons of used oil

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: Skunkworks
Site Address: 210 E Alma AV, SAN JOSE, CA 95112

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

1x200 gallons of used antifreeze

Facility has the following hazardous materials below reporting thresholds:
less than 500 pounds of solid paint waste
30 gallons of paint waste liquids
5 gallon bucket of used oil filters
10 gallon container of oily solids
less than 1000 cf of argon/carbon dioxide gas
less than 100 cf of acetylene
120 cf of oxygen gas
20 gallons of parts washing solution

NOTES:
Facility owner plans to downsize the containers used on-site so he will no longer be subject to this permit. If facility does this in the future, notify HMCD of any changes so that permit status can be re-evaluated.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. HAZARDOUS MATERIALS/WASTE REGISTRATION FORM

(Individual quantities less than state Hazardous Materials Business Plan reporting requirements) 43-066-41127

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction

Authority Cited: California Fire Code; Hazardous Materials Storage Ordinance 4-30-2007

A. General Information

This registration form is to be completed and returned to the appropriate local agency if your facility has hazardous materials and none of the individual hazardous materials quantities equals or exceeds 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for gases. If, at any time, any of your individual hazardous materials quantities equals or exceeds the above amounts, a Hazardous Materials Business Plan (HMBP) may be required (pursuant to Chapter 6.95 of the California Health & Safety Code). If you must submit a HMBP, this registration form is not required.

B. Facility Information

Business Name: San Jose Harley Davidson Type of Business: Repair Garage

Site Address: 210 Alma Ave City: San Jose Zip: 95112

Mailing/Billing Address: 1551 Parkmoor City: San Jose Zip: 95125
(If different from site address)

Business Owner/Contact Person: Brian Cardozo Phone No.: (408) 998-1464

Property Owner: Barry Swenson Phone No.: (408) 938 6314

EPA ID Number (if applicable): _____ SIC Code: _____

C. Non-Waste Inventory Information

Complete the table below for all non-waste inventory. Use additional pages if necessary.

Hazard Class	Chemical/Common Name	Max. Qty. (at any one time)	Container Size (single largest container)	Location(s) (see section F)

		☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal	☐ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs. ☐ cu. ft.	
		☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal	☐ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs. ☐ cu. ft.	

E. Additional Disposal Information

For the following questions, check the appropriate box:

1. Does this facility discharge process waste waters to sanitary sewer? ☐ Yes; ☒ No
2. Does this facility generate infectious/biomedical wastes? ☐ Yes; ☒ No
3. Does this facility store/handle radioactive materials? ☐ Yes; ☒ No

F. Facility Site Plan/Storage Map

Prepare and submit with this Registration Form a simple site map (see next page) which shows the following information:

- North direction • Street(s) adjacent to facility • Location of storm drains • Electrical, water, and gas shutoff valves
- Basic floor plan for each building containing hazardous materials/wastes which indicates building entrance(s) and hazardous material/waste storage locations (use grid locations or assign a code - A, B, C, etc. - to clearly identify each storage location for use in the above inventories).

I declare that the above information is true and correct to the best of my knowledge. I agree to comply with all applicable regulations regarding storage, handling, and disposal of hazardous materials and hazardous or biomedical wastes.

MIKE FERNANDEZ — Owner/Operator's Name (Print)

Owner/Operator's Signature

4/30/07 — Date

Definitions of Treatment/Disposal Methods

Recycled on-site - The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site - The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume. (e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.) If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal - The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.

Date: 4-30-2007

HAZARDOUS MATERIALS/WASTE REGISTRATION FORM

New 2403

(Individual quantities less than state Hazardous Materials Business Plan reporting requirements)

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction 4-17-2007

Authority Cited: California Fire Code; Hazardous Materials Storage Ordinance

43-060-411333

A. General Information

This registration form is to be completed and returned to the appropriate local agency if your facility has hazardous materials and none of the individual hazardous materials quantities equals or exceeds 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for gases. If, at any time, any of your individual hazardous materials quantities equals or exceeds the above amounts, a Hazardous Materials Business Plan (HMBP) may be required (pursuant to Chapter 6.95 of the California Health & Safety Code). If you must submit a HMBP, this registration form is not required.

B. Facility Information

Business Name: DOUBLE R CYCLES

Site Address: 210 EAST ALMA AVE.

Type of Business: Repair / Retail

Mailing/Billing Address: _____ (If different from site address)

City: SAN JOSE Zip: 95112

City: _____ Zip: _____

Business Owner/Contact Person: PETER McDONALD

Property Owner: _____

Phone No.: (408) 241-9850

Phone No.: (___) _____

EPA ID Number (if applicable): _____

SIC Code: _____

C. Non-Waste Inventory Information

Complete the table below for all non-waste inventory. Use additional pages if necessary.

Hazard Class	Chemical/Common Name	Max. Qty. (at any one time)	Container Size (single largest container)	Location(s) (see section F)
3	OIL	10 ☑ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs. ☐ cu. ft.

D. Hazardous Waste Inventory Information (Hazardous Waste Generator Permit Application/Amendment)

Complete the table below for all waste inventory. Use additional pages if needed.

Hazard Class	Name of Hazardous Waste	Treatment/Disposal Method(s) (Definitions provided on bottom of page)	Max. Qty. (at any one time)	Annual Qty. Generated	Location(s) (see Section F)
9	OIL	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal	30 ☒ gal. ☐ lbs. ☐ cu. ft.	50 ☒ gal. ☐ lbs. ☐ cu. ft.	
9	OIL FILTERS	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal	20 ☒ gal. ☐ lbs. ☐ cu. ft.	10 ☒ gal. ☐ lbs. ☐ cu. ft.	
3	GAS	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal	30 ☒ gal. ☐ lbs. ☐ cu. ft.	10 ☒ gal. ☐ lbs. ☐ cu. ft.	
8	COOLANT.	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal	30 ☒ gal. ☐ lbs. ☐ cu. ft.	10 ☒ gal. ☐ lbs. ☐ cu. ft.	
		☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal	☐ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs. ☐ cu. ft.	
		☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal	☐ gal. ☐ lbs. ☐ cu. ft.	☐ gal. ☐ lbs. ☐ cu. ft.	

E. Additional Disposal Information

For the following questions, check the appropriate box:

1. Does this facility discharge process waste waters to sanitary sewer? ☐ Yes; ☒ No
2. Does this facility generate infectious/biomedical wastes? ☐ Yes; ☒ No
3. Does this facility store/handle radioactive materials? ☐ Yes; ☒ No

F. Facility Site Plan/Storage Map

Prepare and submit with this Registration Form a simple site map (see next page) which shows the following information:

- North direction • Street(s) adjacent to facility • Location of storm drains • Electrical, water, and gas shutoff valves
- Basic floor plan for each building containing hazardous materials/wastes which indicates building entrance(s) and hazardous material/waste storage locations (use grid locations or assign a code - A, B, C, etc. - to clearly identify each storage location for use in the above inventories).

I declare that the above information is true and correct to the best of my knowledge. I agree to comply with all applicable regulations regarding storage, handling, and disposal of hazardous materials and hazardous or biomedical wastes.

PETER McDONALD
Owner/Operator's Name (Print)

Owner/Operator's Signature

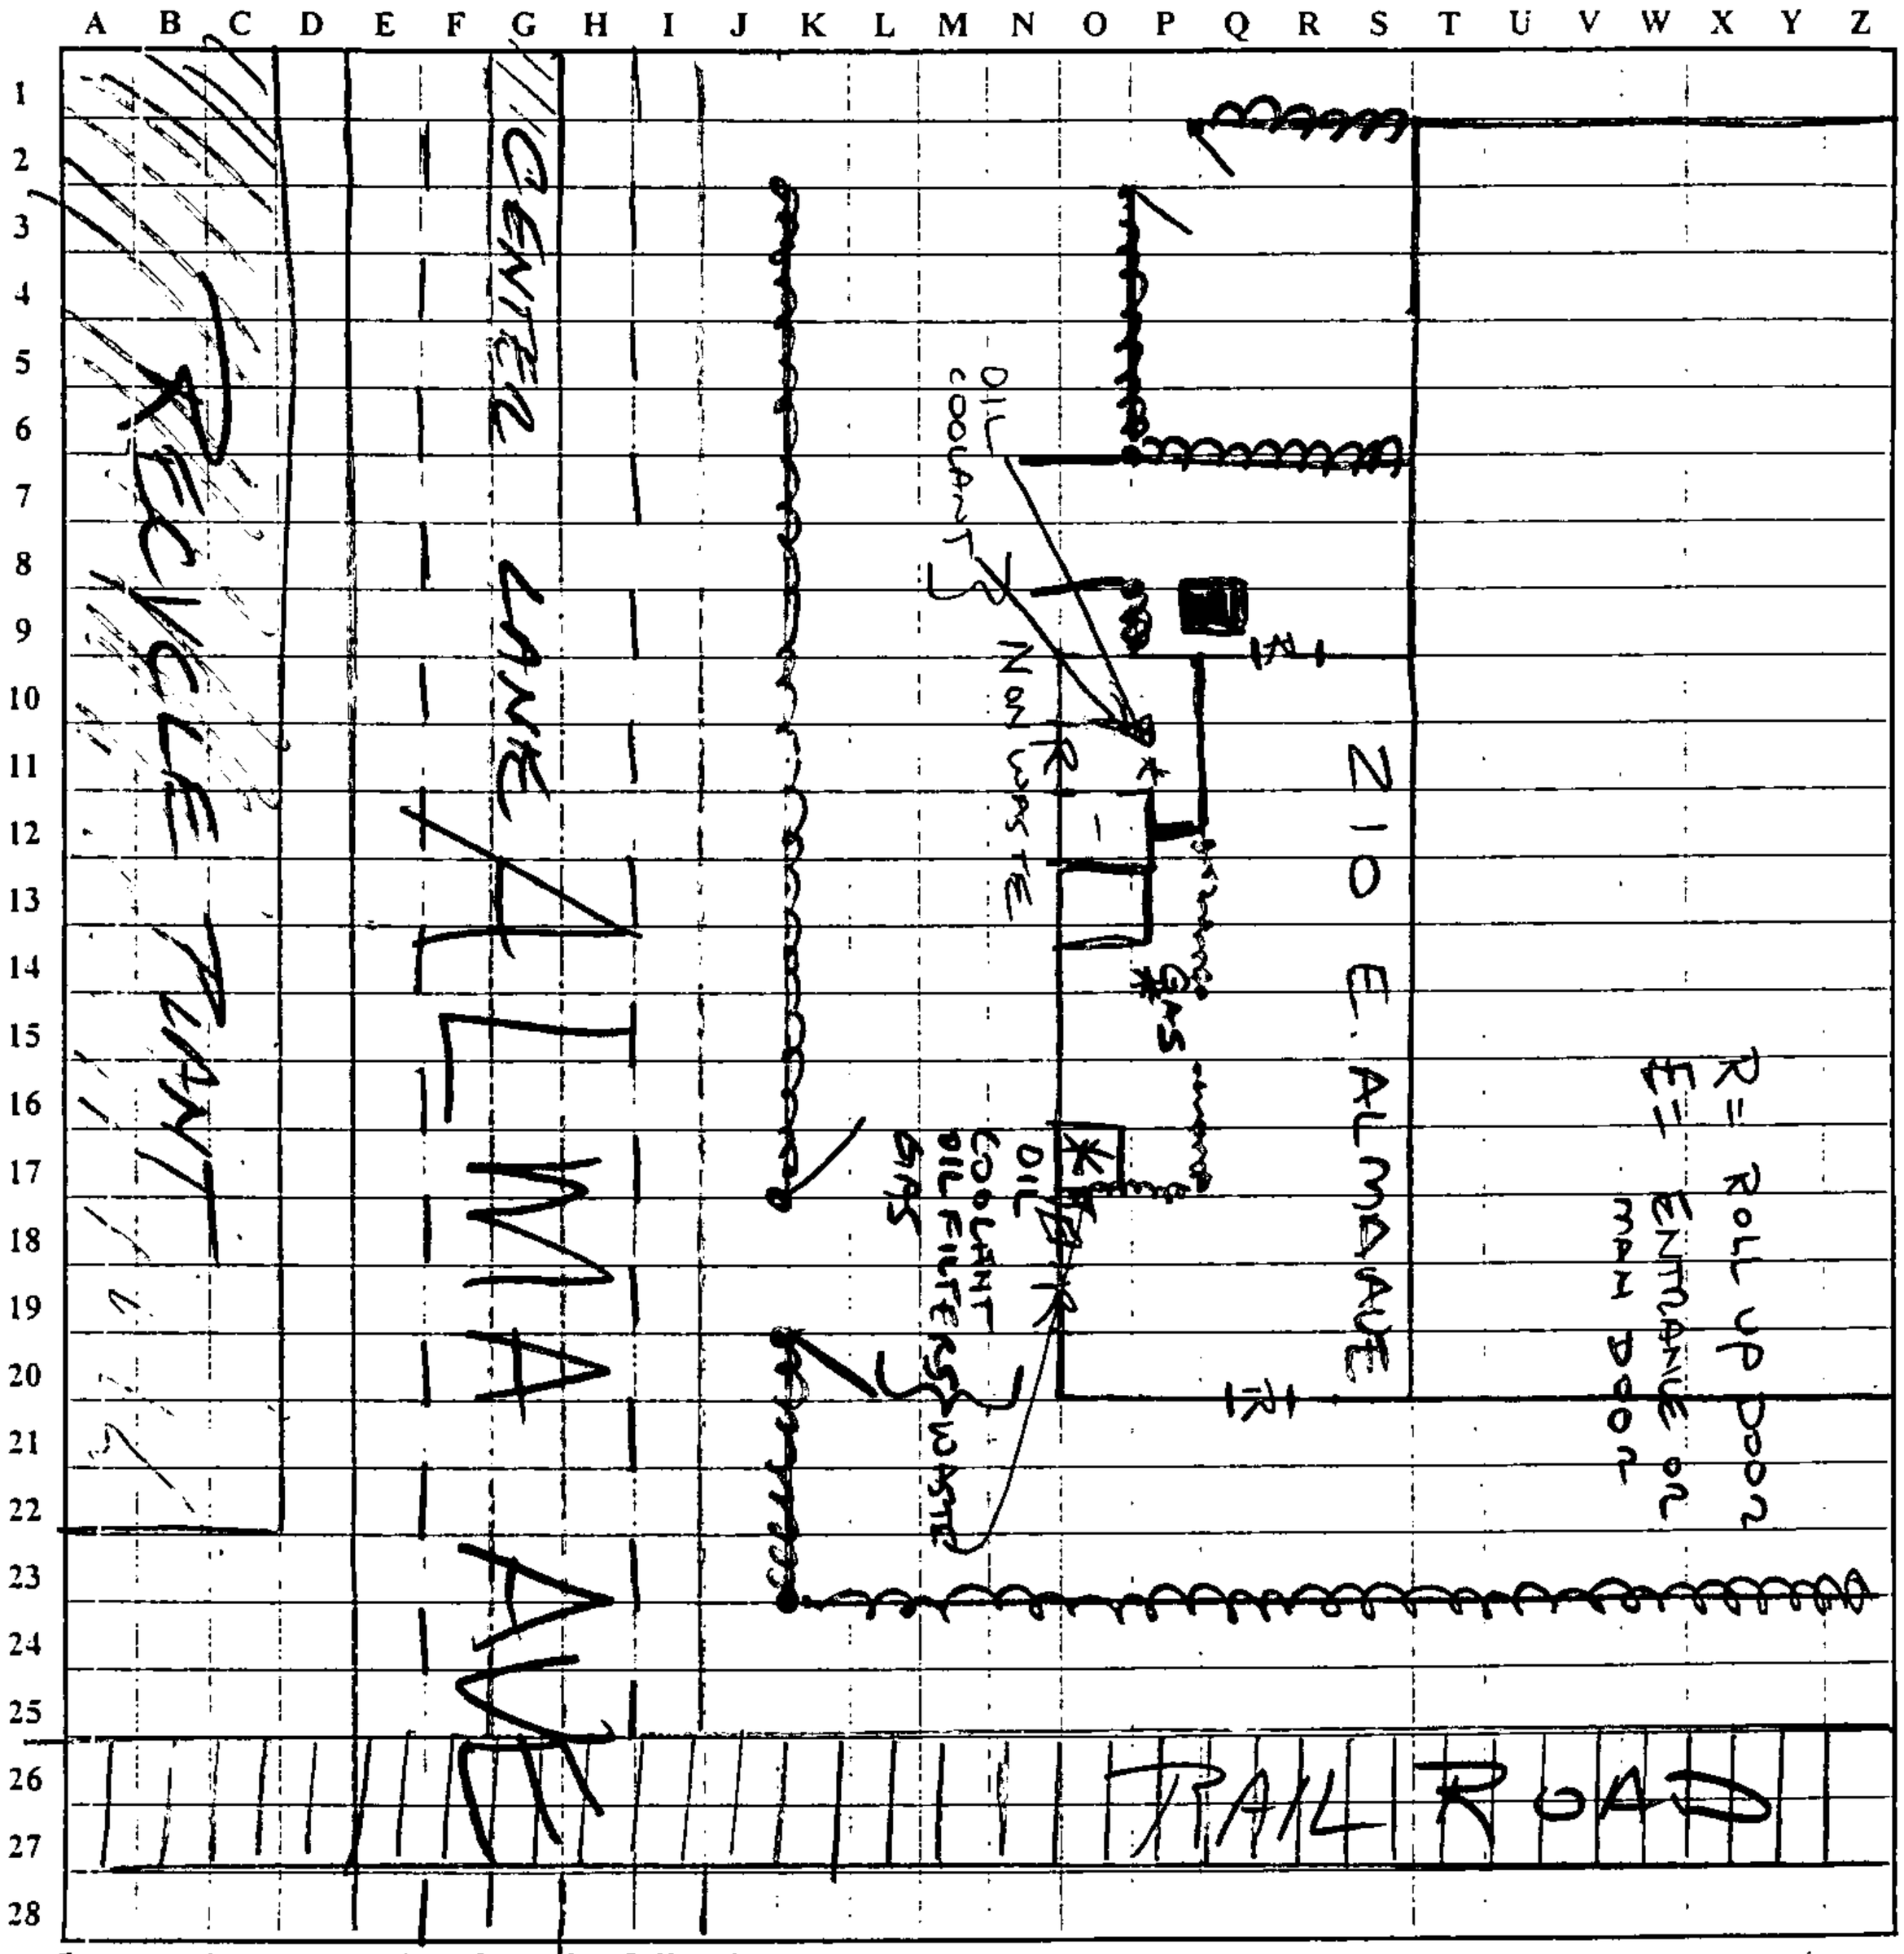
3-2-07
Date

Definitions of Treatment/Disposal Methods

Recycled on-site - The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site - The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume. (e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.) If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal - The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).



Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply All applicable boxes in column 2 of the waste inventory table should be checked.

An inspection of your facility on Thursday February 17, 2011 revealed the violations listed below

Violation Code	Article	Division	Page	Count
904 (2) Standpipe Systems Service	Article 4	Chapter 5	0	0

Recheck violation record auto-generated from inspection on 01/06/2011.
Standpipe systems shall be serviced at least every five (5) years.
Repaired 05/02/2011

304.1 Waste accumulation prohibited. 0 0

Recheck violation record auto-generated from inspection on 01/06/2011.
Combustible waste material creating a fire hazard shall not be allowed to accumulate in buildings or structures or upon premises.

Clear outside area of waste.
Repaired 02/17/2011

3205.4 Aisle maintenance. 0 0

Recheck violation record auto-generated from inspection on 01/06/2011.
When restocking is not being conducted, aisles shall be kept clear of storage, waste material and debris. Fire department access doors, aisles and exit doors shall not be obstructed. During restocking operations using manual stocking methods, a minimum unobstructed aisle width of 24 inches (610 mm) shall be maintained in 48-inch (1219 mm) or smaller aisles, and a minimum unobstructed aisle width of one-half of the required aisle width shall be maintained in aisles greater than 48 inches (1219 mm). During mechanical stocking operations, a minimum unobstructed aisle width of 44 inches (1118 mm) shall be maintained in accordance with Section 2306.9.

Pertains to files upstairs.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please complete the appropriate OES Form 2730).

Does your facility...		If Yes, please complete these pages of the UPCF...
A. HAZARDOUS MATERIALS		
Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☑ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY - CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs)		
1. Own or operate underground storage tanks?	☐ YES ☑ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ☑ NO 6.	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ☑ NO 7.	UST TANK (closure portion - one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	☐ YES ☑ NO 8.	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE		
1. Generate hazardous waste?	☑ YES ☐ NO 9.	EPA ID NUMBER - provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per H&SC §25143.2)?	☐ YES ☐ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☑ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT - FACILITY (Formerly DTSC Forms 1772) ONSITE HAZARDOUS WASTE TREATMENT - UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☑ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☑ NO 13.	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☑ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)

15.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☑ Verbal *(i.e. shouting)*; ☑ Other *(specify)* Warehouse Paging System

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance ..... Phone No. **911**

State Office of Emergency Services ..... Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program ..... Phone No.: (____) _____

Santa Clara County Hazardous Materials Compliance Division ..... Phone No. **(408) 299-6930**

California EPA Department of Toxic Substances Control ..... Phone No. **(510) 540-3739**

Cal-OSHA Division of Occupational Safety and Health ..... Phone No. **(408) 452-7288**

Bay Area Air Quality Management District ..... Phone No. **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center ..... Phone No. **(800) 876-4766**

Nearest Hospital: Name: San Jose Medical Center Phone No.: (408) 977-4444

Address: 675 E. Santa Clara St. City: San Jose

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☑ Internal alarm/notification *
☑ Evacuation/re-entry procedures & assembly point locations*
☐ Emergency incident reporting
☐ External emergency response organization notification
☐ Location(s) and contents of Emergency Response/Contingency Plan
☑ Facility evacuation drills, that are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☑ Safe methods for handling and storage of hazardous materials *
☑ Location(s) and proper use of fire and spill control equipment
☑ Spill procedures/emergency procedures
☑ Proper use of personal protective equipment *
☑ Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☑ **Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐ Personnel rescue procedures
☑ Shutdown of operations
☑ Liaison with responding agencies
☑ Use, maintenance, and replacement of emergency response equipment
☑ Refresher training, which is provided at least annually *
☑ Emergency response drills, which are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☑	Current employees' training records *(to be retained until closure of the facility)* *
☑	Former employees' training records *(to be r at least three years after of employment)* *
☑	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☑	Current copy of this Emergency Response/Contingency Plan *
☑	Record of recordable/reportable hazardous material/waste releases *
☑	Record of hazardous material/waste storage area inspections *
☑	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☑	We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
☐	We will use our own documents to record inspections. *(A copy of each used must be attached to this HMBP.)*

Safety

August 1, 1989

Dear Ms. McCarron,

I am writing to you in response to your letter of July 21st.

We are ready to pay the fees for Fire Safety and Hazardous Materials Storage Permits at our San Jose locations as they come due.

We would like to claim a "Retail Exemption" from a submission of a Hazardous Materials Management Plan/Business Plan under San Jose Fire Code Part 17.68.110 Section "B". All of our locations handle only products packaged for sale or distribution to retail customers.

We have no underground tanks at the 1555 S. Seventh St. warehouse or any other location that I am aware of and a Mr. Firth was already in possession of a Form "A" and a Form "B" when I called him to check the file.

Please contact me if there are any questions or anything I can do to help. We desire to be in compliance at all times.

SAN JOSE, CA 95110

FIRE PROTECTION EQUIPMENT PERFORMANCE CERTIFICATE

L OUT FORM IN BALLPOINT PEN ONLY

DATE 7/28/78

Address: 1501-1555 South 7th Street

Cross Street: Alma Street UBC Occupancy: E-3

DBA: ORCHARD SUPPLY HARDWARE CO Phone: 292-6282
(Name of Business)

Responsible Person: J. A. SCHRAUB

Mailing Address: 1555 South 7th Street

City, State, Zip Code: San Jose, California 95110

(The above address will appear in envelope window)

Phone 277-5357

Test required by:

CAPTAIN JACK OLIVETTI
(Print name and rank)

Order to Comply:
As noted on a separate document, in compliance with San Jose Municipal Code, Section 3101.1 (w), (Article 14.8 Fire Prevention Code) the fire protection equipment checked below shall be tested to ensure its proper operation in case of fire (testing shall be performed by qualified persons, as noted):

Equipment:	License Required:
☒ Automatic Fire Sprinklers	C-16, C-36, or C-61
☐ Dry Standpipes	C-16, C-36, or C-61
☐ Wet Standpipes	C-16, C-36, or C-61
☐ Combination Standpipes	C-16, C-36, or C-61
☐ Fire Pumps	C-16, C-36, or C-61
☐ Fire Alarm & Warning System	C-10, C-61
☐ Emergency Lighting	C-10, C-61
☐ Fire Escape Drop Ladders	C-23, C-61
☐ Fire Protection Assemblies*	Appropriate License Required

* This includes fire doors, ventilation ducts, fire dampers, laundry & rubbish chute doors, elevator and dumbwaiter doors, fire windows and fire doors.

Who may be contacted at: ☐ Fire Station No.___Shift___Phone: 277-_____
☒ Bureau of Fire Prevention, Phone: 277-4656

For Contractor's Use:

Notify S.J.F.D. Engineering Section at 277-4656 twenty-four hours in advance that test will be made. A Fire Department representative may witness test. Test procedures (Fire Prevention Code, Article 14.8) are printed on the reverse side of this form. If your firm uses its own inspection report form, please attach one completed copy as a supplement to this report.

Type of System Tested: (14) Wet pipe fire sprinkler systems with mechanical alarms supervised by Pacific Fire Extinguisher Co.

Defects Found: (See continuation sheets attached)

Repairs Made: None

Dry Standpipes Cross Connected: ☐ Yes ☐ No ☒ Not Applicable

Initial Test Date: 7-18-78 Final Test Date: 7-24-78

☐ The above system has been tested and, to the best of my knowledge, is in good operating condition. An approved service tag has been applied in a manner approved by San Jose Fire Department.

☐ The above system contains the defect(s) noted and has not been repaired at this time.

Signature of Person Performing Test: Jim Forsythe Date: 7/28/78

Print Name: JIM FORSYTHE, Pres. Title: Pres.

License No.: 342649 Type: C-16, C-36

Phone:

Service Firm: ADVANCE ENGINEERING CO., INC.

Mailing Address: 10218 Imperial Avenue

City, State, Zip Code: Cupertino, California 95014

(The above address will appear in envelope window)

Mail this entire form (four copies) to San Jose Fire Department, Attention: Fire Protection Engineering Section, for approval. Appropriate copies will be distributed.

SJFD Approval: Clark Oxnevad

Date: 10-25-78

(Copies: White—Engineering Section, Yellow—Building File, Pink—Contractor, Golden Rod—Occupant)

c. General Requirements

1. Tests of systems or devices herein sh[redacted] conducted at least every five (5) years. Tests at shorter intervals may be required whenever an inspection by the Chief of the Bureau of Fire Prevention indicates that there is substantial reason to believe that the system or device would fail to operate properly in an emergency.
2. The tests to be established by this subsection, when required, shall be conducted by a person qualified to perform the full testing procedure for the particular system or device being tested.
3. The Chief of the Bureau of Fire Prevention shall be notified at least one (1) working day in advance of the performance of any required test in order that his representative may witness the test.
4. At the conclusion of each test, the Chief of the Bureau of Fire Prevention shall be notified of any fire protection equipment that was determined to be inoperable.
5. When it is determined that any fire protection equipment is operable, the owner of the premises or his agent, shall certify its condition to the Chief of the Bureau of Fire Prevention.
6. The following fire hose connections must be equipped with American National Standard hose coupling screw heads, and shall be tested with "Go or No-Go" gauges, or with fittings approved by the Chief of the Bureau of Fire Prevention:
   a. All Fire Department inlet connections on automatic sprinkler systems, dry standpipe systems, combination standpipe systems and refrigerant discharge systems,
   b. All Fire Department outlet connections on wet, dry or combination standpipe systems.
7. All Fire Department inlets and outlets must be equipped with approved plugs or caps.

d. Test Procedures

1. Automatic Sprinkler Systems.
   a. Fire Department connection piping from the check valve to the inlet connections shall be flushed by disassembling the check valve or by blocking the check valve open so that water will flow back out of the Fire Department connections. On check valves with fittings on the dry side of the system, tests shall be made by connecting to such fittings and flowing water back through the system from the check valve to the Fire Department connections. Clapper valves on Fire Department connections may be blocked open, to allow water to flow out.
   b. Flow tests shall be done by opening the test pipe valve at the topmost or most distant location from the main control valve of the system, by opening the main drain valve and noting pressure gauge readings with valve open to indicate closed valves or obstructions in water supply lines. Operation of the water flow alarm must be activated by operating the inspector's test valve. Electric alarm devices shall be tested by means of a test switch or contact.
   c. A test gauge shall be connected at each test gauge opening in order to test the reliability of all existing gauges.
   d. Automatic sprinkler systems, other than wet systems, shall be tested as required by the Chief of the Bureau of Fire Prevention.
   e. The Fire Department, City Communications, and all private alarm companies concerned must be notified in advance of any test of a supervised system.
2. Fire Alarm and Fire Warning System.
   a. Test for operation of trouble signal by disconnecting fire alarm operating power. Operate the trouble signal silencing switch. Restore power and trouble light switch to normal position. When a ringback system is provided, the trouble light switch must be reset.
   b. To test supervision on signal initiating circuits, disconnect a box or the thermostat circuit.
   c. A thermostat, smoke detector or pull station must be tested in each zone. Sounding devices should operate, and if an annunciator is provided, it must indicate the correct zone. When testing a combination rate of rise and fixed temperature head, heat should be applied on the side opposite the fuse plug. The fuse plug must be protected during tests.
   d. Trouble signal and lights must operate when the sounding device is disconnected. If there are two or more separate circuits (not required to be supervised), disconnect each circuit and operate other circuits. The remaining sounding devices must be audible throughout the structure.
3. Fire Escape Drop Ladders.
   Fire escape drop ladders shall be tested by activating the ladder release mechanism, which must operate easily. The ladder must travel to the ground without hesitation and must be stable and firm in its position after release.
4. Fire Protection Assemblies.
   a. Swinging fire doors shall be tested by releasing the closing device of each, by unfastening the fusible link. Each door must close completely and latch.
   b. Sliding doors on inclined tracks must be tested by releasing the suspended weight to allow each door to travel down the inclined track to the closed position. Each such door must close completely and be held firmly in place by the binders. Pairs of sliding doors on an inclined track must butt together without gaps or excessive effect from each other.
   c. Sliding doors on level tracks shall be tested by unfastening the fusible link supporting the closing weight drops, the door must close the opening completely.
   d. Telescoping vertically sliding doors shall be tested by unfastening the smaller counterweight. The larger counterweight must operate the door closing completely.
   e. Vertical sliding doors shall be tested by unfastening the fusible link which supports the suspended weight. The door must close the opening completely.
   f. Rolling steel doors shall be tested by unfastening the restraining cable or fusible [redacted] and dropping the restraining trigger quickly. The door must completely close the opening. After test, such doors must be reset only by persons qualified to do work thereon.
   g. Ventilation and air duct dampers shall be tested by disconnecting the fusible link or activating device to the damper control. The damper must automatically travel to a position which closes the opening and must latch.
   h. Laundry and rubbish chute doors shall be tested by operating the door assemblies. The doors must reclose automatically either by means of a counterbalance or a spring load mechanism.
   i. Detectors shall be tested to ascertain that they will activate fire protection assemblies to which they are connected such as magnetic door holders, fire pumps, ventilating systems and air conditioning controls.
   j. Dumbwaiter doors, access doors and fire windows shall be tested to determine that the automatic operation of such assemblies will function upon release of the weights or heat acutated devices. Electrically operated devices shall be activated by opening or closing the contacts, whichever is applicable. The opening must be entirely closed.
   k. Elevator doors that are controlled by photoelectric tube devices shall be tested by obscuring the photoelectric tube and then pressing the button that is labeled 'To be used in case of fire only.' The doors must then close and the elevator must be operable.
   l. Automatic or self-closing fire shutters shall be tested by activating the same to determine that they close the opening completely.
5. Standpipe Systems.
   a. Wet Standpipe
      1. A flow test shall be made to detemine that the system and its water supply will meet one of the following standards according to the date of installation of the system. Test gauges shall be used to measure residual pressures and a recognized method shall be used to measure water flow quantities. The required water flow must be maintained for at least thirty (30) seconds from systems supplied by street mains or gravity tanks, and at least two (2) minutes from systems supplied by booster pumps or pressure tanks.
         Systems installed prior to 1948 shall have residual pressures of not less than eight (8) pounds per square inch (psi) at the topmost outlet when twenty (20) gallons per minute (gpm) are flowing from the system. All roof outlets shall be flow-tested individually.
         Systems installed after 1947 shall have residual pressures of not less than twelve (12) psi at the topmost outlet when thirty-five (35) gpm are flowing from each of two (2) outlets simultaneously.
      2. If the system is supplied by gravity tank, the automatic filling system must operate.
      3. If the system is supplied by pressure tank, the automatic filling system must operate when the flow test is conducted. Air pressure and water supply apparatus, if any, must be checked for proper operation.
      4. Each outlet must be checked for signs of corrosion or leakage.
      5. Hoses must be removed from outlets and examined for mildew, cuts, abrasions and other deterioration. Hose couplings, gaskets and nozzle must be examined for evidence of damage or obstructions.
   b. Combination Systems
      1. Flow tests shall be made by flowing 500 gpm through each riser from the uppermost outlets. The system must maintain a residual pressure of at least 50 psi at the level of that outlet. Test gauges shall be used to measure residual pressures and a recognized method to measure water quantities.
      2. Fire pumps shall be tested by being operated at 100% of their rated capacity, and at pressures not less than 65% of their rated pressure for a minimum of 10 minutes. Each pump must start automatically when roof level flow tests are made.
      3. Water shall be flowed from each outlet in the system in a manner that will indicate that the valves are fully operable and that there is water pressure at that outlet.
      4. Hoses shall be removed from outlet and rack or reel, and the full length of the hose shall be examined for mildew, cuts, abrasions and other deterioration. Hose couplings, gaskets and nozzles shall be examined for damage and obstructions.
   c. Dry Standpipe Systems
      1. The system shall be air-tested at 25 psi to determine if the system leaks, so as to avoid water damage to the building in the event that any of the piping has been broken off or disconnected.
      2. A hydrostatic test shall be performed filling the system completely with water and noting the static pressure (head) on a test gauge installed on the lowest inlet connection. The hydrostatic test of the system shall be made at a pressure of 50 psi greater than the head pressure.
      3. The system shall be flow-tested by flowing 100 gpm of water through the standpipe system to the roof outlet. A separate flow test shall be conducted through each inlet. A test shall be conducted through each inlet. A test gauge shall be installed at the inlet being used to measure the inlet pressure. The maximum allowable pressure loss due to friction within the system shall be 15 psi. Friction loss shall be determined by subtracting the static pressure (head) and outlet pressure, from the inlet pressure; while 100 gpm are flowing.
      4. Each outlet valve in the system shall be operated to determine that it will function peoperly.
6. Emergency Lighting and Power Systems.
   Each such system shall be tested for compliance with the requirements of applicable law.

San Jose, Ca. 95110

Dear Jack:

Enclosed is correspondence received from our insurance company, Kemper, showing record of a test on our sprinkler system done 10-14-77. Would you please evaluate and inform me to what extent this test meets the requirement for the five year test required by "Fire Protection Equipment Performance Certificate." Tim Mealiffe requested this certification be done by Orchard Supply for our 1555 So. 7th facility.

Thanks.

San Jose, CA 95150

Dear Tony:

Per your request, enclosed you will find a copy of the Flowing Pressure Test Report that we discussed during our recent telephone conversation. The data featured on this report is the recorded results of the 2" drain test conducted at your location during the past two years. The 2" drain test is a rough means for detecting closed valves or blockages in the underground main.

I hope this information is helpful in completing your report for the fire department. Should you have any further questions that require our services, please do not hesitate in contacting this office.

Sincerely,

Craig S. Shibata

John Paye

TO: Ed Alvarado, Warehouse Manager

FROM: Tony Schraub

SUBJECT: Minutes from Fire Department Tour of 11-16-77

A tour of about 20 fireman led by Battalion Chief LeJames E. Suess was conducted today to familiarize the fire department with the Prune Palace facility and our new surveillance system. Miscellaneous "suggestions" made which you are to assure are done are:

1. Fuseable lengths should be replaced on fire doors. Some are missing altogether. Fire doors should be tested to assure they would close if fuse broke.

2. Clean up back dock (bad housekeeping back there)!

3. Must not store muriatic acid and chlorine together. (If they mix, very dangerous hydrochloric acid is formed).

4. Cleanup break room.

5. New wiring for copy machine.

6. Put merchandise on pallets in Building B. If sprinkler went off for any reason in B, much merchandise will be damaged. We should gradually put pallets under floor merchandise.

7. Must put fire doors on new interior doors.

8. Put Fire Extinguishers up high so they can be seen from all around building. Chief Suess indicated no more 5' above ground,

9. Label building room saying what is stored (eg., records, etc).

10. Don't tape any breakers - paint or guard so that they will be able to work properly (if tape open then they can't operate). Inspect all breakers to assure not taped.

Please give me a written response to this letter documenting that each item is done.

SUBJECT: Orchard Supply Hardware Warehouse Storage of Flammable Liquids

Dear Mr. Santos,

Thank you for coming at our invitation to inspect our 7th and Alma Street Warehouse. We believe in preventing fires before they happen and we have therefore instituted the following changes in accordance with your recommendations:

1. Obtained combustible fibers, flammable liquids and hazardous chemical storage permits,
2. Separated all "oxidizers" per your dimensions,
3. Upgraded Fire Extinguishers,
4. Prohibit Smoking in these areas (always have),
5. Maintain storage more than 3' below sprinklers,
6. Provide 5" lettered signs as you suggested:
   "Stop Motor, No Smoking" - near gas pump
   "Flammable Liquids" - near liquids
   "Hazardous Chemicals" - on fertilizer building
7. Posted Exit signs on office building,
8. Moving flammable liquids to separate building.

Item 8 requires this clarification: We will move our class 1, 2 and 3 flammable liquids to a separate, unsprinkled, wood-framed, but metal wall and metal roof 400 ft^2 building with 4 x 8 doors on either end which is located more than 50' from any building and 20' from property line where Southern Pacific railroad tracks go (no buildings will be put there.) The materials will be neatly stacked to assure stability, and 3' aisles will be provided.

292-7902

Main offices at 720 W. San Carlos o San Jose, California o (408) 292-6282

I believe this meets the major requirements of Fire Prevention Codes.

Sincerely,

F. A. Schraub
Vice President

Sunsweet Packing Corp.
7th and Alma
San Jose, CA

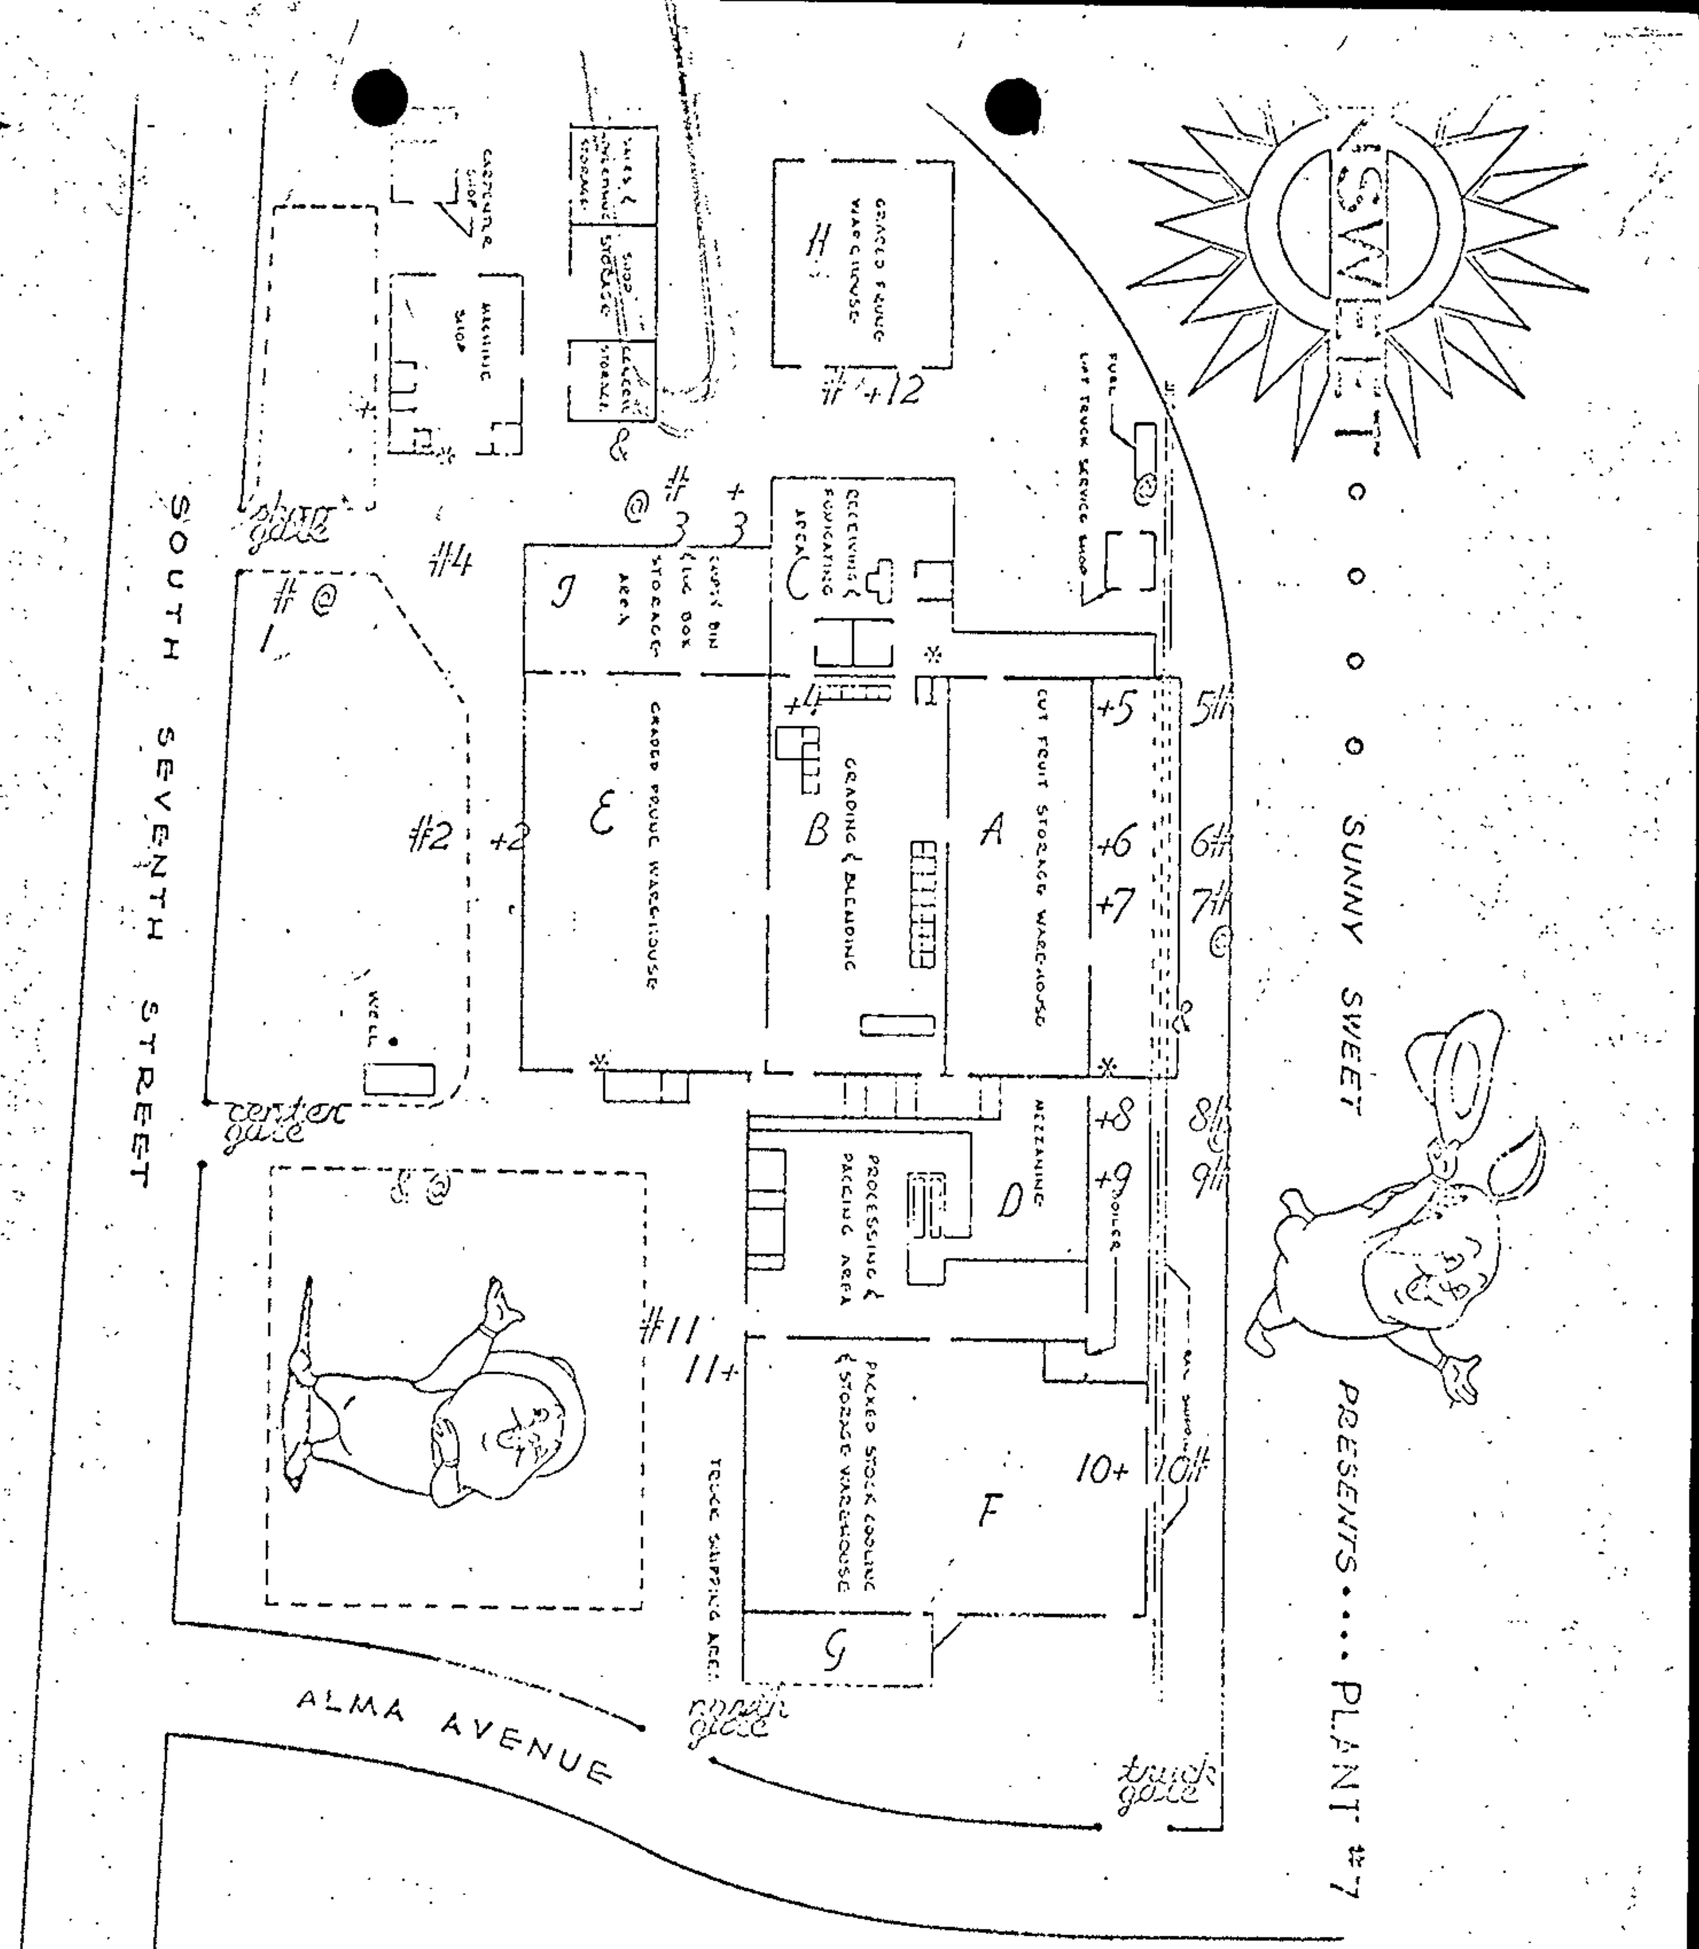
Gentlemen:

The City of San Jose has adopted ordinance No. 16287 relating to regulatory permit fees. Fumigation Companies are now required to file an application for inspection with the Bureau of Fire Prevention, secure a valid permit and pay a required fee.

An application form must be obtained from the Bureau of Fire Prevention at 476 Park Avenue and the required fee paid at that time.

If you have any questions concerning the above, please feel free to call this office, 277-4000, extension 4656.

The fee for your permit application is $30.00.



Very truly yours,

John K. Gerhard, Fire Marshal
Bureau of Fire Prevention

Thomas D. Hooks

Thomas D. Hooks, Senior Inspector
Bureau of Fire Prevention

ORDER TO COMPLY:

As such conditions are contrary to law, you are hereby required to correct said conditions immediately upon receipt of this notice.

An inspection to determine whether or not you have complied with this notice will be conducted on or after 15 days.

Failure to comply with the foregoing order by the date of reinspection may cause a **CITATION** to be issued for the penalties provided by law for such violations and may also render you liable for all suppression costs that might occur in the event of a fire.

List any permit(s) you currently have for the storage, treatment and/or disposal of hazardous waste:_____
_____

The annual Hazardous Waste Generator Permit fee is determined by the quantity of hazardous waste generated per year. Check [X] the one line below that best describes the amount and kind of waste generated by your business over the past year.

Hazardous Waste Generated

[ ] Recycles waste oil only any amount

[ ] Generates <100 kg/yr (Approx. 27 gallons)

[ ] Generates <5 tons/yr

[ ] Generates 5 to <25 tons/yr

[ ] Generates 25 to <50 tons/yr

[ ] Generates 50 to <250 tons/yr

[ ] Generates 250 to <500 tons/yr

[ ] Generates 500 to <1,000 tons/yr

[ ] Generates 1,000 to <2,000 tons/yr

[ ] Generates 2,000 or more tons/yr

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara and agrees to comply with all applicable hazardous waste regulations and with inspection procedures needed to insure compliance.

EMERGENCY RESPONSE/CONTINGENCY PLAN

Section V

The plan must be implemented immediately whenever there is a fire explosion or release of hazardous waste constituents which could threaten health and/or the environment. Submit a written report to the San Jose Fire Department, Hazardous Materials Program and the County Health Department, Office of Toxics Enforcement within 15 days of an emergency incident at your facility.

Facility Name AMBERWOOD PRODUCTS, INC. Address 1555 S. 7th Street
Emergency Coordinator_____ Title_____ Phone_____
Alternate Emergency Coordinator_____ Title_____ Phone_____
Location of ERT Plan_____

Emergency Response Plan & Training

All Personnel

All employees are trained in the following procedurcs:
✓ Internal/alarm notification.
✓ External emergency response organization notification.
✓ Locations and contents of emergency response plan.
✓ Evacuation procedures.
___ Spill procedures/ emergency procedures.
___ Emergency incident reporting.

Chemical Handlers

Chemical handlers are additionally trained in the following:
✓ Safe Method for handling and storage of hazardous materials.
✓ Proper use of personal protective equipment.
___ Locations and proper use of fire and spill control equipment.
___ Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team

Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
___ Personnel rescue procedures.
✓ Shutdown of operations.
___ Use, maintenance, and replacement of emergency response equipment.
___ Emergency response drills, which are held _____ (frequency).
___ Refresher training is provided at least annually.

Emergency Response Documents

The following training records are maintained for each employee:
___ Verification of date that training was completed.
___ Description of introductory and continuing training.
___ Former employee's training records are retained at least three years.
✓ Current employees's training records are retained until the facility's closure.
___ Description and documents of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department and the County of Santa Clara Health Department.

SECTION VII. - RECORDKEEPING

You are required to keep inspection logs or checksheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

[✓] We will use the attached sample forms in our routine inspection program.

[ ] We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.)

The following personnel will be responsible for monitoring and/or maintaining equipment.

Name Terrie M. Dudley Title Vice President

Name Margaret G Cervelli Title Secretary

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the Fire Prevention Bureau upon request.

HAZARDOUS MATERIAL PLAN CHECK

May 16, 1995

Installation Location:	1555 S. 7th Street.
Facility Name:	Amberwood Products
Plan Date:	05/16/95
Installation Contractor:	Ambiance Associates
Type of Work	TI - Spray Booth Installation

_____ Plan is approved as submitted.
__X__ Plan is approved with the following requirements.
_____ Plan is disapproved for the reasons listed below.

1) Provide secondary containment for the sealers and top coat that contain over 1% ethylene glycol monobutyl ether. The secondary containment must be compatible with these chemicals and must be able to contain either 150% of the largest single container or 10% of the aggregate whichever is larger. In addition, the secondary containment must be able to contain the amount of water that would collect in the containment from 20 minutes of sprinkler flow.

2) Submit an updated Hazardous Materials Management Plan/Business Plan to address the storage/usage of the sealers and top coat.

If you have any questions regarding this project, please contact Inspector Mike Randolph at (408) 277-4659.

RE: Amberwood Products Tenant Improvements

COMMENTS:
Per our conversation, attached is a letter relating to the type of materials that will be used in the spray booths for this project. Also attached are two letters relating to exiting from the space.

It is important to note that this space is classified as an H-2 occupancy due to the presence of combustible dust, not because of the presence of materials or chemicals that one would typically think of as hazardous.

If there are any questions, or if additional information is required, please contact me at 415-966-8980 at your very earliest convenience. Thank you.

Re: Spray Booths/Proposed Tenant Improvements
Amberwood Products, Inc.
7th Alma Streets
San Jose, CA

We propose to install two spray booth into this space. The finishing system to be installed will involve the spraying of these water-based products: stain, sealer, and top coat. All these products have flash points above 600 degrees F. and are considered non-flammable by most standards. These products contain less than two and one half pounds of solvent per gallon. This solvent is commonly found in many commercially available household cleaners, such as Formula 409.

This compound, especially at its very low concentration, will not present any appreciable toxicity to humans or the environment. Attached are the specifications for the spray booths. We hope the Building Department will find this information helpful. Should there be any questions please give me a call.

Respectfully,

Frank Guidace

Re: Proposed Tenant Improvements/Exit Area
Amberwood Products, Inc.
7th Alma Streets
San Jose, CA

We would like to obtain a building permit for the proposed tenant improvements at this location. Per our previous discussion, the shop area personnel will not use the office corridor as a path of egress. They will exit completely separately from the office area. We look forward to working with the Building Department to assist us with our move to San Jose. If there are any questions please give me a call.

Respectfully,

Frank Guidace

Re: Proposed Tenant Improvements/Exit Area
Amberwood Products, Inc.
7th Alma Streets
San Jose, CA

We are looking forward to obtaining a building permit for the proposed tenant improvement at this location. In regards to the exit pattern for this space, the rear exterior exit area, formerly a loading dock, will not be used as an exit for loading trucks. It will be reserved for egress purposes. This is the area adjacent to the new man door that is being installed into a portion of an existing barn-type door opening. Please call me with any questions that you may have.

Respectfully,

Frank Guidace

Dear Ms. McCarron,

Enclosed are the Hazardous Materials Management Plans for our store at 1751 E. Capitol Expressway, and the Distribution Center at 1555 S. 7th St.,both in San Jose.

I am returning the forms for our locations at 3000 Alum Rock Ave. and 720 West San Carlos, as we would like to claim a "Retail Exemption" from submission of a HMMP under the San Jose Fire Code Part 17.68.110 Section "B" and the California Health and Safety Code Section 25503.55 [B] [1].

All the products handled at these locations are packaged for sale or distribution to retail customers. There is no bulk storage of any hazardous material.

Please contact me if there are any questions. We desire to be in compliance at all times.

Thank you.

Steve Taylor
Safety Manager

OFFICIAL NOTICE

SUBJECT: Hazardous Materials Management Plan/Business Plan (HMMP)

The City of San Jose Hazardous Materials Storage Ordinance (HMSO) and Chapter 6.95 of the California Health and Safety Code require each business that uses or stores regulated hazardous materials to periodically submit updated HMMP's, including inventories of hazardous materials to the City. Recent legislation, i.e., AB 2189, requiring submittal of SARA Title III information; Ordinance No. 23450, regulating Toxic Gas use; and AB 1030, regulating underground storage tanks; require that the Fire Department make modifications to the HMMP format and collect this additional information.

The modifications include additional general information and additional inventory, monitoring, emergency response and training information. The inventory must now list all Extremely Hazardous Substances (EHS's) above the threshold planning quantity from the Federal list (40 CFR 355) (enclosed). Petroleum marketing firms must complete a new section on Financial Responsibility. Samples of acceptable financial responsibility forms which must be kept on site are enclosed. In a separate letter, we will be notifying businesses regulated by the Toxic Gas Ordinance.

To satisfy the State and Federal reporting requirements, please review and complete the following Sections, as appropriate:

Section	I.	General Information and Certification
Section	II.	Facility Site Plan and Storage Maps
Section	III.	Hazardous Materials Inventory Statement (HMIS)
Section	IV.	Emergency Response, Equipment, and Training
Section	V.	Separation, Containment, and Monitoring
Section	VI.	Record Keeping
Section	VII.	Waste Disposal
Section	VIII.	Statement of Financial Responsibility

If you review these forms and determine that no additional information is required and the HMMP previously submitted is current, the HMMP Certification of Review Form (enclosed) may be returned in lieu of completing Sections IV through VIII. SECTIONS I THROUGH III MUST BE RETURNED. ALTERNATE FORMS, E.G., COMPUTER GENERATED HMMP'S MAY BE USED IN LIEU OF OR TO SUPPLEMENT THESE FORMS, BUT THE SAME FORMAT MUST BE FOLLOWED.

THE CITY'S HAZARDOUS INCIDENT RESPONSE TEAM (HIT) ALSO USES THE HMMP'S FOR EMERGENCY RESPONSE. SUBMITTAL OF THE HMMP ON A DISC COMPATIBLE WITH HIT'S MCINTOSH SE-30 COMPUTER AND CAMEO PROGRAM WILL INSURE THAT THE FIRE DEPARTMENT WILL PROVIDE THE BEST SERVICE TO YOUR COMPANY IN THE EVENT OF FIRE OR OTHER EMERGENCY AT YOUR BUSINESS OR YOUR NEIGHBOR'S BUSINESS. SUBMITTAL OF BOTH HARD COPY AND DISC HMMP'S ARE ENCOURAGED.

If you have any questions, please contact the Hazardous Materials Division at (408) 277-4659 and ask to speak to a Hazardous Materials Inspector. Thank you for your cooperation.

HAZARDOUS MATERIALS MANAGEMENT PLAN/BUSINESS PLAN

CERTIFICATION OF REVIEW

I have reviewed the current Hazardous Materials Management Plan/Business Plan for:

Orchard Supply Hardware Distribution Center
Facility Name

1555 S. 7th San Jose Ca 95112
Facility Address

10/15/90
Date of Current Plan

I certify that:

☐ (1) I have personally reviewed the Plan and certify that the Plan is complete, accurate, and is being implemented.

☒ (2) Revisions to the Plan are necessary. The Plan as revised is being implemented. A copy of the revisions is enclosed.

☐ (3) A new Plan is being implemented. A copy of the new Plan is enclosed.

NOTE: After review and acceptance of the HMMP or HMMP revisions by the Hazardous Materials Division, you will be required to provide one additional copy of the HMMP for use by the City's Hazardous Incident Team.

INSTRUCTIONS FOR COMPLETING THE LONG FORM HAZARDOUS MATERIALS MANAGEMENT PLAN

San Jose Municipal Code Section 17.68 provides that any person, firm or corporation which stores any regulated hazardous material shall obtain and keep current a hazardous materials storage permit. Each applicant for a Hazardous Materials Storage Permit must submit a Hazardous Materials Management Plan (HMMP). A separate HMMP must be submitted for each facility. The HMMP should provide general information about the facility and describe how hazardous materials are handled, stored, and monitored. It must be reviewed and revised annually, or whenever there is substantial change in the quantity, type or method of storage of hazardous materials. The inventory statement must list all extremely hazardous substances above the threshold planning quantity. This list is attached behind the HMMP. The inventory must also include all other regulated materials not found on this list.

This permit is not intended to replace other permits that may be required by the City, fire department, or other regulatory agencies. You are responsible for obtaining all permits necessary to make changes or modifications to your facility or operation (i.e., building permits, plumbing permits, electrical permits, etc.).

INSTRUCTIONS

1. Complete the attached form. Type or print legibly. Provide complete responses for each section; duplicate or attach additional pages as necessary. Incomplete HMMP's will be returned.

2. Sign the certification and the declaration in Section III.

3. Attach a copy of the Carcinogen Registration Form for any Carcinogens used or stored at your facility if applicable.

4. Retain a copy of the HMMP at your facility.

5. Mail the signed HMMP to:

San Jose Fire Department
Hazardous Materials Program
4 N. Second Street, Suite 1100
San Jose, CA 95113-1305

NOTE: After review and acceptance of the HMMP by the Hazardous Materials Division, you will be required to provide one additional copy of the HMMP for use by the City's Hazardous Incident Team or an acceptable computer disc of the HMMP.

Hazardous Materials Management Plan
Section II
Instructions

Facility Site Plan

1. Provide an overview site plan of the facility which shows the following:

- Closest bordering streets to the site
- Location of all structures on the site
- Any outside chemical storage or use areas
- Parking lots
- Internal roads
- Storm and sanitary sewers
- Wells

2. Also, please show:

- Approximate scale
- Northern direction
- Date drawing completed

You may use the enclosed form, or you may create your own which includes this information.

Facility Storage Map (Confidential Information)

1. Provide a floor plan of each building which shows the following:

- General purpose of each section within the building or area
- The location of each storage system/area identified by an I.D. number, letter, or name. This would include all aboveground and underground tanks as well as sumps, vaults, below grade treatment systems, cabinets, etc.
- Clearly mark the facility map "Confidential"

2. Show on the map or list on a separate map key, the hazardous materials stored at each storage system/area. Include the chemical name, common or trade name, hazard class and the maximum quantity stored. **NOTE:** If the quantity of hazardous materials in a storage system/area is less than 55 gallons for liquids, 500 lbs. for

solids or 200 cubic feet at STP for gases, and no extremely hazardous substances (see attached list) are stored, you need only list the hazard class and maximum quantity.

Use the following abbreviations to identify the DOT Hazard Class:

EXP A	Explosive A
EXP B	Explosive B
EXP C	Explosive C
BLST	Blasting Agent
FG	Flammable Gas
NFG	Nonflammable Gas
POIS A	Poison A
POIS B	Poison B
FL	Flammable Liquid
CL	Combustible Liquid
FS	Flammable Solid
RAD	Radioactive Material
OXY	Oxidizer
PEROX	Organic Peroxide
ETI	Etiological Agent
ORM A	Other Regulated Material A
ORM B	Other Regulated Material B
ORM C	Other Regulated Material C
ORM D	Other Regulated Material D
ORM E	Other Regulated Material E

3. Provide the following additional information on the map when applicable to the facility:

- The control points for the utility systems (water, gas and electricity) within the building or area.
- The drainage system for the facility, including inside sanitary sewer and outside storm drains. The type of system, entry points, piping locations and control points (valves) should be indicated.
- The fume or chemical vapor handling systems for the facility, including information on the type of system, ducting locations, control points or dampers, special protection (sprinklers) and detection devices installed in the system and the type of scrubber, if any.
- The fixed fire protection systems for the facility, including information on the type of system, riser locations, control valves and fire department connection.
- The in-house emergency response equipment, storage locations nad the type of equipment stored; i.e., absorbents, breathing apparatus, etc.
- Location of vapor and groundwater wells used for monitoring underground tanks and piping.

SECTION III - Hazardous Materials Inventory Statement (HMIS)

Although the HMIS is a part of your Hazardous Materials Management Plan, it must be a separate document. This Section (Inventory Statement), when completed, will satisfy the HMIS requirement.

Part A - Declaration

1. Business Name: OSH Distribution Center
2. Facility Address: 1555 South 7th Street San Jose Ca 95112
3. Date: 10/15/96
4. Do you have underground tanks, sumps, vaults, below grade treatment systems, etc ☐ Yes ☒ No
5. Do you store any Carcinogens listed under Title 8, California Administrative Code? (If yes, attach a list of all carcinogens, the quantity range and a copy of the Carcinogen registration form for each). ☐ Yes ☒ No
6. Do you claim any hazardous materials to be trade secrets? (If yes, you must submit a declaration under penalty of perjury. You must also provide on this form the number of materials claimed to be trade secrets, their hazard class, and quantity range for each hazard class). Trade secret information must be submitted on a separate inventory form. ☐ Yes ☒ No

7. You must complete a separate inventory sheet for non-waste and waste hazardous materials that you handle at your facility in amounts equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure). You must also list each extremely hazardous substance handled in amounts greater than the federal threshold planning quantity (TPG) listed in the Code of Federal Regulations, or in amounts equal to or greater than 500 pounds, whichever is less. List all chemicals in alphabetical order by hazard class.

8. Declaration (must be signed by executive officer or his authorized representative):

Under penalty of perjury, I declare that the information provided as part of this hazardous materials inventory statement is true and correct.

Print Name: Steve Taylor Signature: Steve Taylor

Print Title: Facility Manager Date Signed: 10/15/96

HMMP Section III

INVENTORY STATEMENT INSTRUCTIONS

Column — Information Required

(1) Location - Enter the map number(s) and location number(s) where the material is stored.

(2) Provide the hazard class for each material as described in the Section II Instructions.

(3) Non-Waste - Provide the common or trade name of the regulated material. This is the name provided on the label or the container.

Waste - Provide the waste category, found on the back of California Hazardous Waste Manifest.

(4) Provide the chemical name and constituents of mixtures for each component present in quantities equal to or greater than the regulated amount (ie: 200 cu. ft. or 500 lb., 55 gallons, or the TPQ)

(5) Enter the Chemical Abstract Service Number (CAS # found on the MSDS or in 29 CFR). For mixtures, enter the CAS number of the mixture as a whole, if it has been assigned a number distinct from its components. For a mixture that has no CAS number, report CAS numbers of major constituents (3).

(6) Enter the following descriptive codes as they apply to each material. You may list more than one code, if applicable.

P,S - Pure Solid	M,S - Mixture Solid
P,L - Pure Liquid	M,L - Mixture Liquid
P,G - Pure Gas	M,G - Mixture Gas

(7) a) Provide the maximum quantity of each material on site at any one time by the business.

b) Enter the estimated average daily amount on site during the past year.

c) Provide the largest container size.

d) Waste Only- Provide the total estimated amount of each hazardous waste handled throughout the course of the year.

INVENTORY STATEMENT INSTRUCTIONS
(continued)

(8) Enter the units used in Column 6 as:

LB = Pounds
GL = Gallons
CF = Cubic Feet

(9) Enter the number of days that the material was present on site (during the last year).

(10) Enter the storage codes below for type, pressure and temperature.

Type

A = Aboveground Tank
B = Belowground Tank
C = Tank Inside Building
D = Steel Drum
E = Plastic or Non-Metal Drum
F = Can
G = Carboy
H = Silo
I = Fiberdrum
J = Bag
K = Box
L = Cylinder
M = Glass Bottle or Jug
N = Plastic Bottle or Jug
0 = Tote Bin
P =Tank Wagon
Q = Rail Car
R = Other

Pressure

1 = Ambient (Atmospheric)
2 = Greater than Ambient (Atmospheric)
3 = Less than Ambient (Atmoshperic)

Temperature

4 = Ambient
5 = Greater than Ambient
6 = Less than Ambient, but not Cryogenic
7 = Cryogenic

(11) For each material listed, provide the "SARA Hazard Class" as listed below. You may list more than one class.

Physical Hazards

F = Fire
P = Sudden Release of Pressure
R = Reactivity
N = None

Health Hazards

I = Immediate (Acute)
D = Delayed (Chronic)

Non-Waste Hazardous Material Inventory Statement

Location of ERT Plan Office

Emergency Response Training

All Personnel See Enclosed Plans
All employees are trained in the following procedures:
✓ Internal/alarm notification.
✓ External emergency response organization notification.
✓ Locations and content of emergency response plan.
✓ Evacuation procedures.
✓ Spill procedures.

Chemical Handlers
Chemical handlers are additionally trained in the following:
✓ Safe method for handling and storage of hazardous materials.
✓ Proper use of personal protection equipment.
✓ Locations and proper use of fire and spill control equipment.
✓ Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team Management Staff
Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
____ Personnel rescue procedures.
____ Shutdown of operations.
____ Use, maintenance, and replacement of emergency response equipment.
____ Emergency response drills, which are held _____ (frequency).
____ Refresher training is provided at least annually.

Emergency Response Documents
The following training records are maintained for each employee:
____ Verification of date that training was completed.
____ Description of introductory and continuing training.
____ Employee's training records are retained at least three years.
____ Description and documentation of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department.

ORCHARD SUPPLY HARDWARE
DISTRIBUTION CENTER
EMERGENCY PLANS

FIRE OR BOMB THREAT

General Comments

1) In our operation, the most common types of fires are small electric motor, waste can, or A/C forklift fires that can be promptly and easily extinguished even before notification can be given.

2) A fire emergency should be put into effect wherever any doubt exists about promptly putting the fire out.

3) A bomb threat automatically puts the emergency plan into effect.

4) If doubt exists, notification must be given by authorized personnel.

5) Be sure the proper authorities are notified. Telephone numbers must be posted at each strategic telephone.

6) The intercom will automatically put the procedures into effect.

7) The Vice President of Distribution, Warehouse Manager or other authorized personnel can terminate a fire or bomb emergency and resume operations.

Procedures

1) Upon notification of an emergency the following procedures are to be followed:

   A) The Vice President, Warehouse Manager, or Supervisors are to inform employees to leave the building.

   B) After all employees clear the building they are to assemble in the north parking lot.

2) Supervisors are to check all areas to be sure everyone is out of the building. Area assignments for all emergency plans are as follows:

   Warehouse #1 - Mark Ryser

   Warehouse #3 - Bob Hagman

   Warehouse #4 - John Salazar

   Warehouse #5 - Robin Bell

   Warehouse #6 - Jim Jolley

   Warehouse #7 - Rhonda Ebersole

MR/RS & Loading Dock - Steve Lockhart

Dispatch Office Area, Breakroom, and Restrooms - Michael Haynes

Distribution Office, Breakroom, and Restrooms - Ed Alvarado

Maintenance Area - Bob Smoot

Manufacturing & Annex - Suzanne DiTullio

Warehouse Office & Restroom - Edna Toledo

3) John Salazar will stand by to assure nobody returns through the North Yard Area. Ed Alvarado will stand by to assure nobody returns through the Distribution Office Area. Jim Van Hoy will stand by to assure nobody returns through the Receiving Area. Steve Lockhart will stand by to assure nobody returns through the Loading Dock area.

Fire Fighting

1) Only small fires using fire extinguishers are to be fought by staff. Leave the rest to the professionals.

2) All properly trained employees should proceed to the area bringing fire extinguishers with them. Extinguisher locations are identified throughout the facility.

Bomb Search

1) All activities relating to bomb search are to be conducted by local authorities.

2) Management staff may accompany local authorities but are not to conduct independent searches.

EARTHQUAKE

General Comments

1) The Distribution Center is located in an area where earthquakes occasionally occur. Although predicting the time and strength of a tremor is not possible, we need to develop a plan to reduce effects on our employees. Following a tremor, only the Vice President, Warehouse Manager or other person in charge can authorize continuing operation.

Procedures

1) During Tremor:

   A) If a tremor starts and builds up in strength, get the message across to employees the best way possible, shouting if necessary "get under cover" and do so yourself.

   B) If possible - the recommended procedure is to get under cover, but the urge is to get out. If employees panic and go for the doors, don't restrain them.

2) Post tremor:

   A) Shut off gas and sprinkler systems (unless minor tremor). Check for leaks in the sprinkler system and gas lines.

   B) If serious damage is evident, consider securing electrical power.

   C) Vice President, Warehouse Manager or other person in charge shall check outside to be sure it is safe (power lines down, etc.). Hazardous areas are to be blocked off to avoid contact.

   D) All Supervisors and Managers will participate in a check of their areas for the following conditions, make immediate corrections if necessary.

      Broken or cracked water or gas lines.

      Broken or cracked glass.

      Loose fixtures.

      Fallen or misaligned racks or merchandise.

      Structural damage.

   E) Do not allow employees to enter building until all areas are cleared by management staff.

EVACUATION PLANS

Warehouse #1 - Exit through the receiving doors, or the emergency exit at the east end of the building, or the emergency exit at the west end near the pool staging areas.

Warehouse #2 - Exit through the loading dock, or raildock roll-up door at the west end of the building, or through warehouse #4 to the raildock.

Warehouse #3 - Exit through the receiving doors, or through warehouse #4 to the raildock, or warehouse #5 emergency exit near the Quality Control area.

Warehouse #4 - Exit through the Warehouse Office, or exit to the raildock.

Warehouse #5 - Use the emergency exit near Quality Control, or through warehouse #1 to the receiving doors, or the emergency exit at the east end of the building.

Warehouse #6 - Exit through receiving door #1 at the east end of the building, or the roll-up door at the west end of the receiving area.

Warehouse #7 - Exit through the east end of the building near the north yard, or at the west end near the raildock.

Manufacturing - Exit through the Warehouse Office, or through warehouse #4 to the raildock.

Dispatch/Transportation Offices and Breakroom - Exit through the receiving doors or loading dock doors. Dispatch and Transportation Clerks are to take their dispatch logs with them.

Distribution and Warehouse Offices - Exit to the parking lot east of the building.

SECTION V. - SEPARATION, CONTAINMENT AND MONITORING
(continued)

Part B - Underground Storage No underground Tanks

For underground tanks, sumps, vaults, below grade treatment systems, etc., Complete a separate page for each tank.

Check the type of tank and method(s) that applies to your tank(s) and piping and answer the appropriate questions. Provide any additional information in the space provided or on a separate sheet.

Single Wall Tanks & Piping - Tank Facility Map I.d. _____

☐ 1. Vapor Wells ☐ Inside Backfill ☐ Outside Backfill Model
Manufacturer of Monitoring Equipment: _____
Continuous or weekly testing: _____

☐ 2. Groundwater Monitering Wells (Location must be shown on Facility Map).

☐ 3. Monthly Precision Tank Test

☐ 4. Piping (List Method and Frequency of Monitoring) _____

☐ 5. In Tank Monitoring System - List Model and Manufacturer _____

☐ 6. Other - Describe in detail. _____

☐ 7. Maintenance Schedule - All monitoring equipment will be serviced (frequency) _____

==========

☐ Double Contained Tanks - Tank Facility Map I.D. _____
(Including vaulted tanks and tanks within a liner.)

1. Type of Secondary Containment ☐ Double wall tank ☐ Vaulted tank
☐ Tank in a liner ☐ Other (Describe)

2. List method of monitoring annular space between primary and secondary containment:

---

3. Frequency: ☐ Continuous ☐ Daily ☐ Weekly ☐ Other (List):

---

4. List type of secondary containment for piping:

---

5. List method and frequency of monitoring piping secondary containment:

---

6. Are there any incompatible materials within the same vault? If so, explain how separate secondary containment is provided.

---

7. Maintenance Schedule - All monitoring equipment will be serviced (frequency)

SECTION VI. - RECORDKEEPING

You are required to keep inspection logs or checksheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

☒ We will use the attached sample forms in our routine inspection program.

☐ We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.)

The following personnel will be responsible for monitoring and/or maintaining equipment.

Name John Salazar Title R.C. Safety

Name _____ Title _____

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the Fire Prevention Bureau upon request.

SECTION VII - WASTE DISPOSAL

Check all that apply and list the wastes for each methond checked.

METHOD	WASTES
1. ☐ No Waste	
2. ☐ Discharge to Sanitary	
3. ☐ Pretreatment	
4. ☒ Recycle	Pesticides Herbicides Used Oil Solvents Anti-Freeze
5. ☐ Licensed Waste Hauler	
6. ☐ Other Disposal Describe the method:

May 24, 1989

Mr. Dan Firth
City of San Jose
Bureau of Fire Prevention
4 North 2nd Street
San Jose, CA 95113-1305

Dear Mr. Firth,

This letter is to advise you of the change in ownership of the Orchard Supply Hardware facilities located in San Jose.

The name and address of the new owner is:

OSH Acquisition Corporation
(to be changed 6/1/89 to
Orchard Supply Hardware Corporation)
P.O. Box 49027
San Jose, California 95161-9027

Federal I.D. # 95-4214111

This change will be effective May 30, 1989.

We agree to be bound by the same restrictions and limitations imposed upon the previous owner, Wickes Companies, Inc. Please advise us of any additional requirements.

Thank you for your help. If you have any questions, please call me at (408) 365-2613.

Sincerely,

Joseph Doetsch
Controller

HAZARDOUS
MATERIALS

HAZARDOUS MATERIALS MANAGEMENT PLAN
SHORT FORM

INSTRUCTIONS: WHO SHOULD USE THE SHORT FORM?

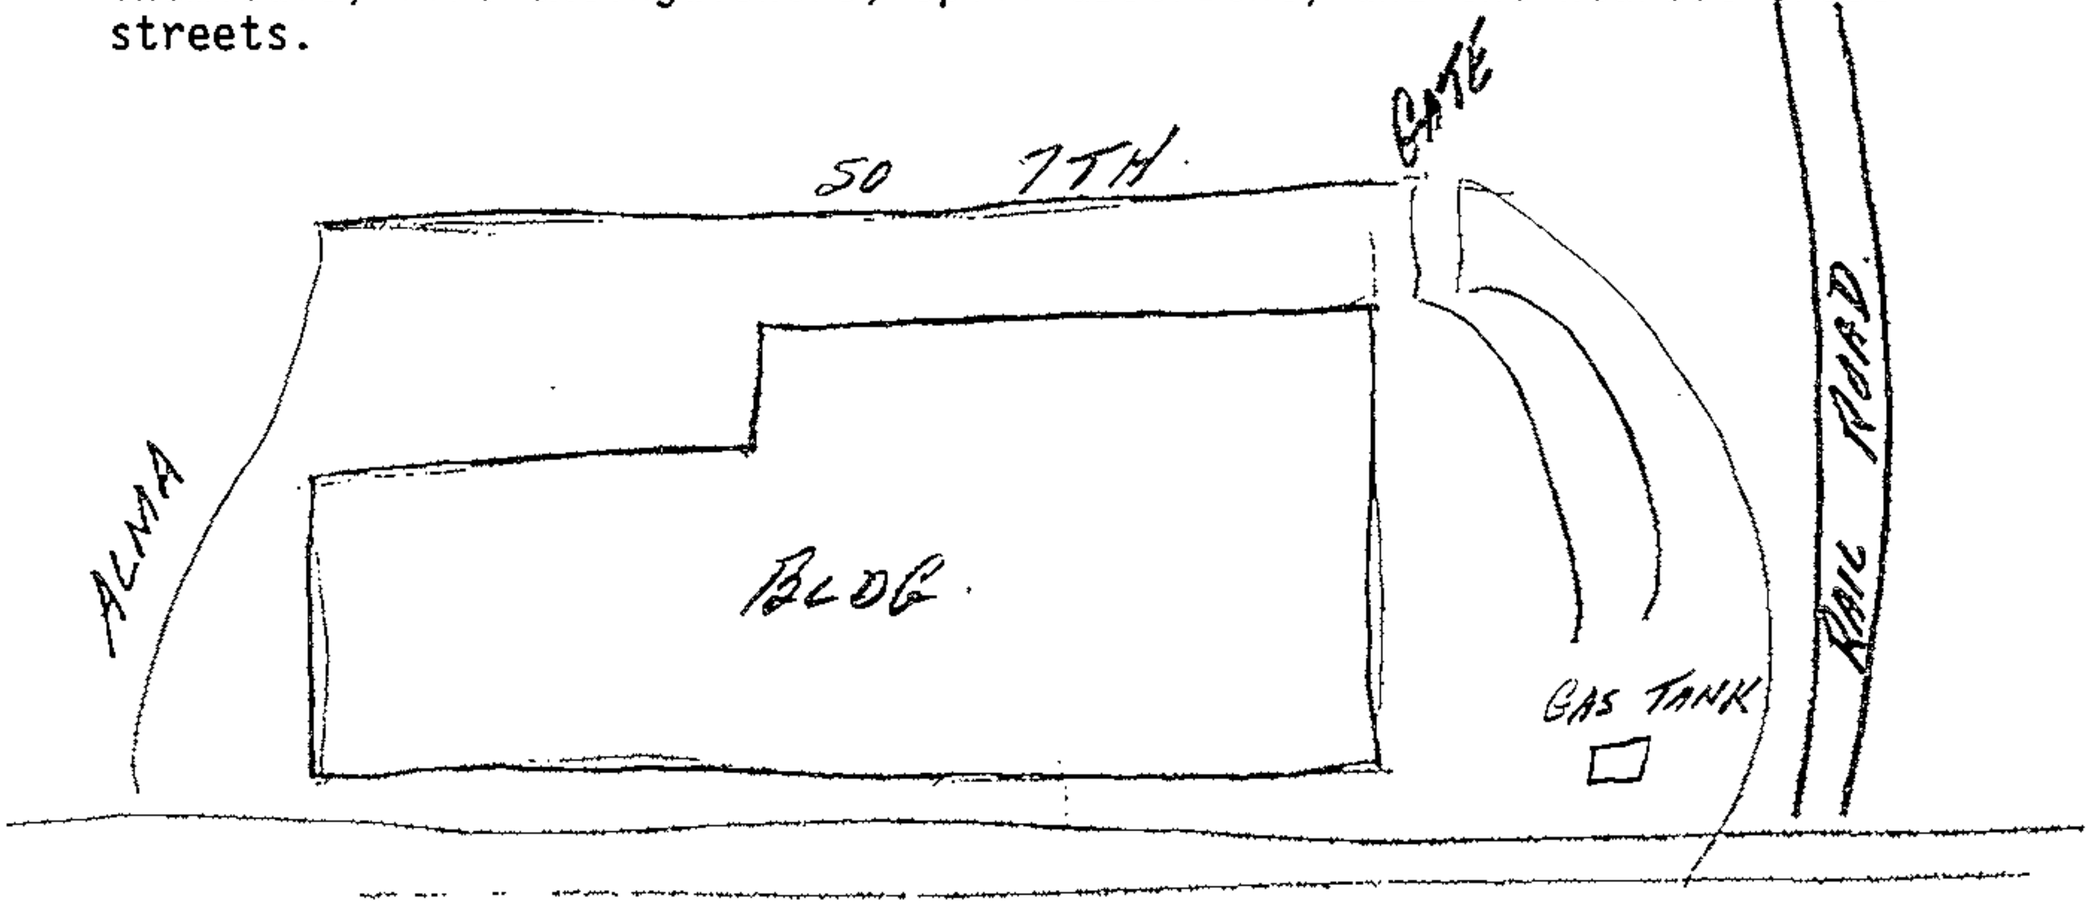
You may use the Short Form HMMP if you store total amounts of hazardous materials that do not exceed any of the following: 500 pounds of solids; 55 gallons of liquids; 200 cubic feet of compressed gases at standard temperature and pressure. After review, the City may require a Long Form HMMP due to complex circumstances.

1. Address 1555 South Seventh St. Phone _____
2. Name of Business Orchard Supply Hardware
3. Owner, Responsible Employee Orchard Supply Hardware
4. Type of Business Hardware Warehouse

5. Two people that could respond in an emergency when the facility is closed (weekends, holidays, etc.)

	NAME	ADDRESS	PHONE NUMBER
A.	EDNA TOLEDO	2129 BARRETT AVE SAN JOSE	(408) 559-1875
B.	GEORGE DONALDSON	10071 ROEHAMPTON AVE SJ	408-255-6740

6. Describe how the hazardous material will be:
   A. Stored (such as factory container, 55-gallon drum, underground tank)
   Underground tank approx 75' from building
   Waste oil in 55 gallon drums - Second Containment
   B. Secondarily Contained (such as concrete pad, metal cabinet, soil)
   ~~Soil~~ Sand, Asphalt pad
   C. Monitored (how you are able to detect a leak)
   Visual - Daily Monday - ~~Sunday~~ Friday Also monitored by Azonic ER-400 monitoring system. see Attached
7. After the hazardous materials have been used, how is the spent material or waste handled and disposed of? Gasoline is used for own tools - Oil is recycled
8. Write below or attach a list of the names, hazard classes, and quantities of each chemical.



Examples of Chemical and Hazard Classes include:

- o Flammable/Combustible Liquids (FL/CL): Gasoline, Diesel, Cleaning Solvents, Paint, Thinner, Waste Oil
- o Corrosives: Hydrochloric Acid, Sodium Hydroxide Hot Tank
- o Gases: Acetylene, Hydrogen
- o Oxidizers: Hydrogen Peroxide, Ammonium Nitrate
- o Other Regulated Materials: Anti-Freeze

Hazard Class	Chemical Name	Quantity
FL/CL	Gasoline	500 GAL.
FL/CL	Waste oil	200 Gal
FL/CL	solvent 360	55 Gal

OVER

9. Provide a sketch of the facility in the space provided below, or on an accompanying sheet of paper, including the location and quantity of all chemicals, fire extinguishers, spill absorbent, and the nearest cross streets.

10. Complete Sections VII through XIII of the enclosed HMMP/Business Plan in accordance with the Instructions and attach them to this Short Form.

11. Submit the signed HMMP/Business Plan to:

San Jose Fire Department
Hazardous Materials Program
4 North Second St., Suite 1100
San Jose, CA 95113-1305

THE DEADLINE FOR YOUR NEW HMMP SUBMITTAL IS JANUARY 15, 1988.

12. If there is any change which would materially affect any answer above, I will inform the City and apply for an appropriate amendment to this permit. **I declare under penalty of perjury that the foregoing information is true and correct.**

ADDITIONAL COMMENTS:

EMERGENCY EVACUATION PLANS FOR ORCHARD SUPPLY HARDWARE DISTRIBUTION CENTER

1) Warehouse #1 - Use receiving doors, alternate route emergency exit east end or emergency exit west end near pool area.

2) Warehouse #2 - Use loading dock exits, alternate route through warehouse #4 to raildock.

3) Warehouse #3 - Use receiving doors, alternate route through warehouse #4 to rail dock or warehouse #5 emergency exit near Quality Control area.

4) Warehouse #4 - Exit through Distribution Office, alternate route exit to rail dock but move towards the loading dock due to hazardous materials in the Maintenance area.

5) Warehouse #5 - Use emergency exit near Quality Control, alternate route through warehouse #1 either receiving doors at the east end of the building or the emergency exits near pool on the west end.

6) Warehouse #6 - Exit through receiving door #1 on the east end of the building or roll up door on the west end of the receiving area near the U.P.S. area.

7) Warehouse #7 - Exit through the east end of the building near the north pipe yard or on the west end near the raildock.

8) Manufacturing/Packaging - Exit through Distribution office, alternate route exit to raildock in warehouse #4.

9) Dispatch and Transportation Office, Breakroom - Use receiving doors, alternate use loading dock doors. Dispatch and Transportation Clerks are to take their dispatch logs with them.

10) Distribution Office (upstairs) - Exit to the parking lot east of the building.

11) Print Shop - Exit to the parking lot east of the building.

FIRE AND BOMB THREAT EMERGENCY
PLANS FOR ORCHARD SUPPLY DISTRIBUTION CENTER

A) GENERAL COMMENTS

1) In our operation, the most common types of fires are small electric motor, waste can, or A/C forklift fires that can be promptly and easily extinguished even before notification can be given.

2) A fire emergency should be put into effect whenever any doubt exists about promptly putting the fire out.

3) A bomb threat automatically puts plan into effect.

4) If doubt exists, notification must be given.

5) Be sure the proper authorities are notified. Telephone numbers must be posted at each strategic telephone.

6) The intercom will automatically put the procedures into effect.

7) The Vice President of Distribution, Warehouse Manager or other person in charge can terminate a fire or bomb emergency and resume operations.

B) PROCEDURES

1) On hearing the intercom or when notification is given:

A) Vice President, Warehouse Manager and Supervisors inform employees to leave the building.

B) Once clear of the building all employees are to assemble in the north parking lot.

2) Make final area sweeps to be sure everyone is out and no one returns, as follows:

A) Warehouse #1 - Mark Ryser

B) Warehouse #2 - Steve Lockhart

C) Warehouse #3 - Bob Hagman

D) Warehouse #4 - John Salazar

E) Warehouse #5 - Robin Bell

F) Warehouse #6 - Jim Jolley

G) Warehouse #7 - Rhonda Ebersole

H) Manufacturing - Suzanne DiTullio

I) Dispatch, Transportation Office, Breakroom, and Restrooms - Michael Haynes

J) Distribution Office - Ed Alvarado

K) Print Shop - Earl Foster

L) Fixture Shop - George Donaldson

M) Maintenance - Bob Smoot

The Operations Supervisor will stand by and assure no one returns through the north yard area. The Inventory Control Director will stand by and assure no one returns through the Distribution Office area. The Traffic Manager will stand by and assure no one returns through the receiving area. The Transportation Manager will stand by and assure no one returns through the loading dock area.

3) Fire Fighting

A) Only small fires using fire extinguishers are to be fought by staff. Leave the rest to the professionals.

B) Vice President, Warehouse Manager, Supervisors and trained employees proceed to the area bringing extinguishers with them. Extinguisher locations are identified throughout the facility.

1) Fight fire if small.

2) Evacuate and guide firefighters to the scene.

4) Bomb Search

A) All activities relating to bomb search are to be conducted by local authorities.

B) Staff may accompany local authorities but are not to conduct independent searches.

EARTHQUAKE EMERGENCY PLANS FOR ORCHARD SUPPLY DISTRIBUTION CENTER

A) COMMENTS

The Distribution Center is located in an area where earthquakes occasionally occur. Although predicting the time and strength of a tremor is not possible, we need to develop a plan to reduce effects on our employees. Following a tremor, only the Vice President, Warehouse Manager or other person in charge can authorize continuing operation.

B) PROCEDURE

1) During Tremor

A) If a tremor starts and builds up in strength, get the message across to employees the best way possible, shouting if necessary "get under cover" and do so yourself.

B) If possible - the recommended procedure is to get under cover, but the urge is to get out. If employees panic and go for the doors, don't restrain them.

2) Post Tremor

A) Shut off gas and sprinkler systems (unless minor tremor). Check for broken lines. If starting up again, turn on gas and spend whatever time is necessary checking for leaks by brushing on soap and water.

B) If serious damage, consider securing electrical power.

C) Vice President, Warehouse Manager or other person in charge shall check outside to be sure it is safe, power lines down, etc. Hazardous areas are to be blocked off to avoid contact.

D) All Supervisors and Managers will participate in a check of their areas for:

1) Broken or cracked water or gas lines.

2) Broken or cracked glass.

3) Loose fixtures.

Dear Dr. Jones:

We are in receipt of a second violation notice as to the ordinance requiring filing of a Hazardous Materials Management Plan.

Some months ago, I discussed our operations with you and reached a mutual agreement that our facility operations are exempt from this particular ordinance.

This letter will serve to confirm the exempt agreement we have.

Our complex consists of numbers 1501 to 1555 South Seventh Street. Please update your information file in this respect.

Thank you and if I may supply any further information, please let me know.

Respectfully,

Robert L. Pflieger
Operator of Safety

Subject: Claim for Exemption
San Jose Municipal Code
Title 17.68

Dear Dr. Jones:

Per our recent discussion please be advised we understand ourselves to be exempt from the present San Jose City Ordinance with respect to reporting requirements.

At present we comply and will continue to do so with respect to fire, safety, health and hazard conditions that may apply to any hazardous materials we are involved with.

Thank you very much for the courtesies you extended to us during our visit.

Sincerely,

Robert L. Pflieger

SECTION IV - FIRE AND EXPLOSION HAZARD DATA

FLAMMABILITY	IF YES, UNDER WHAT CONDITIONS
Not Flammable	

FLASHPOINT	AUTOIGNITION TEMPERATURE	LOWER FLAMMABLE LIMIT	UPPER FLAMMABLE LIMIT
None	Not Applicable	Not Applicable	Not Applicable

HAZARDOUS COMBUSTION PRODUCTS

Combustion may yield normal combustion byproducts: carbon dioxide, carbon monoxide, or nitrous oxides.

EXTINGUISHING MEDIA

None needed for liquid. For dry film, use water, foam, Carbon dioxide, or dry chemical

SPECIAL FIREFIGHTING PROCEDURES

Follow normal fire fighting procedures. Firefighters should wear self-contained breathing apparatus, especially in enclosed areas. Cool drums and minimize vapor with water spray.

UNUSUAL FIRE & EXPLOSION HAZARDS

This product is not sensitive to physical shock or static discharge. Emulsion will not burn. Exposure of closed container to temperatures above the boiling point could cause pressure buildup and container rupture. Dry mastic is capable of burning.

SECTION V - REACTIVITY DATA

This product is chemically stable.
Hazardous polymerization will not occur.

CONDITIONS TO AVOID

Freezing or boiling.

INCOMPATIBILITY

Materials that react with water such as concentrated acids, calcium carbide, sodium.

DECOMPOSITION PRODUCTS

Combustion may yield carbon dioxide, carbon monoxide, or nitrous oxides.

SECTION VI - TOXICOLOGICAL PROPERTIES

EFFECTS OF ACUTE EXPOSURE TO PRODUCT

Due to concentration, ingestion, skin contact, or inhalation of sufficient quantities to induce symptoms unlikely.
Eye Contact: This material may cause eye irritation. Direct contact with liquid may cause stinging, tearing, redness.
Skin Contact: This material is not expected to be a skin irritant. Skin absorption is unlikely. If left on skin, a film will form. Based on method of removal, slight irritation may result.
Ingestion of sufficient quantities to induce symptoms unlikely.
Ingestion: Low degree of oral toxicity. Ingestion of excess quantities may cause irritation of GI tract.

SECTION VI - TOXICOLOGICAL PROPERTIES - continued

Inhalation of sufficient quantities to induce symptoms unlikely.
Inhalation: Breathing high concentrations of vapors may cause nausea & irritation of nose, throat, & respiratory tract.
Respiratory symptoms associated with preexisting lung disorders may be aggravated by exposure to this mat'l.

EFFECTS OF CHRONIC EXPOSURE TO PRODUCT
None known

EXPOSURE LIMITS	SENSITIZATION TO PRODUCT	IRRITANCY OF PRODUCT	SYNERGISTIC PRODUCTS
None established	May cause skin sensitization in some individuals.	May irritate skin, eyes, and respiratory tract.	None known
CARCINOGENICITY	**MUTAGENICITY & TUMORIGENICITY**	**REPRODUCTIVE TOXICITY**	**TERATOGENICITY**
No evidence	No evidence	No evidence	No evidence

SECTION VII - PREVENTIVE MEASURES

EYE PROTECTION	GLOVES
Glasses or goggles	No special protection necessary
RESPIRATOR	**FOOTWEAR**
No special protection necessary	No special protection necessary

OTHER
Avoid unnecessary contact with this and any other chemical. Wash thoroughly after handling all chemicals.
No special protection necessary. Source of clean water should be available for flushing eyes and washing skin.

ENGINEERING CONTROLS
No special control measures necessary under normal conditions of use.

LEAK OR SPILL PROCEDURE
Contain & remove with inert absorbent material.

WASTE DISPOSAL
Dispose of in accordance with all local, state, and federal regulations.

HANDLING PROCEDURES & EQUIPMENT
Keep out of reach of children. Launder contaminated clothing.
Wash with soap and water after use, especially before eating or drinking.

STORAGE REQUIREMENTS
Store in a cool, dry location away from heat. Keep containers tightly closed and store with adequate ventilation.
Do not pressurize, cut weld or grind the containers or empty containers which may contain residual product & vapors.

SPECIAL SHIPPING INFORMATION
Avoid freezing & subjecting this product to temperature extremes. Class 60 Item Number 4620 Sub 5

SECTION VIII - FIRST AID MEASURES

EYE CONTACT
Immediately flush with running water for at least 15 minutes. Get medical attention if irritation persists.

SKIN CONTACT
Wash exposed area with soap and water. Get medical attention is irritation persists.

INHALATION
Remove to fresh air. If symptoms persist, seek medical attention. If necessary, give artificial respiration.

INGESTION
Do not induce vomiting. Get medical attention.

SECTION IX - SARA SECTION 313 SUPPLIER NOTIFICATION

This product contains the following toxic chemicals subject to the reporting requirements of Section 313 of the Emergency Planning & Community Right-to-Know Act of 1986 & of 40 CFR 372.

CHEMICAL NAME	CAS #	%	CHEMICAL NAME	CAS #	%
Ammonia	7664-41-7	0.1

SECTION V HEALTH HAZARD DATA

THRESHOLD LIMIT VALUE
Not established.

EFFECTS OF OVEREXPOSURE
Ammonia levels are low enough to comply with government standards.

EMERGENCY AND FIRST AID PROCEDURES
In case of contact, flush eyes with water for 15 minutes and wash skin with soap and water.

SECTION VI REACTIVITY DATA

STABILITY	UNSTABLE		
	STABLE	x	

INCOMPATIBILITY (Materials to avoid)
Materials that react with water.

HAZARDOUS DECOMPOSITION PRODUCTS
Nitrogen oxides, hydrogen chloride, formaldehyde.

HAZARDOUS POLYMERIZATION	MAY OCCUR		
	WILL NOT OCCUR	x	

SECTION VII SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED
Collect for disposal.

WASTE DISPOSAL METHOD
Dispose of in accordance with federal, state and local regulations.

SECTION VIII SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION (Specify Type)
Not required under normal processing conditions.

VENTILATION	LOCAL EXHAUST	SPECIAL
	MECHANICAL (General)	OTHER

PROTECTIVE GLOVES
Rubber or plastic gloves

EYE PROTECTION
Safety glasses. Do not wear contact lenses.

OTHER PROTECTIVE EQUIPMENT

SECTION IX SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORING
Keep containers closed. Store away from heat and flames.

Emergency Response Training

All Personnel
All employees are trained in the following procedures:
X Internal/alarm notification.
X External emergency response organization notification.
X Locations and content of emergency response plan.
X Evacuation procedures.
X Spill procedures.

Chemical Handlers
Chemical handlers are additionally trained in the following:
X Safe method for handling and storage of hazardous materials.
X Proper use of personal protection equipment.
X Locations and proper use of fire and spill control equipment.
X Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team
Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
n/a Personnel rescue procedures.
n/a Shutdown of operations.
n/a Use, maintenance, and replacement of emergency response equipment.
n/a Emergency response drills, which are held _____ (frequency).
n/a Refresher training is provided at least annually.

Emergency Response Documents
The following training records are maintained for each employee:
n/a Verification of date that training was completed.
n/a Description of introductory and continuing training.
n/a Employee's training records are retained at least three years.
n/a Description and documentation of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department.

I. Emergency Response Plan and Procedures

A. General

In terms of the prevention of hazardous material spills or releases it is our intent to maintain minimum quantities of these materials in our inventory and ensure they are stored in the properly labeled containers as required by the Federal, State, Local laws.

In case an incident should occur, our personnel (or if required a qualified contractor), will immediately commence containment and clean-up of the spill or release.

In addition, we will take all necessary action to minimize the hazard to persons, property, or the environment.

B. Duties and Responsibilities

These statements are intended as a guide to fulfill duties and responsibilities. They are not intended to limit use of initiative where the need is clearly indicated.

C. Reporting and Notification

A. In the event of a spill, release, or threatened release, regardless of size involving a hazardous material, the event will be reported immediately to the Division Manager in the facility.

B. The Division Manager will determine if the spill, release, or threatened release is reportable. If it is determined to be reportable, this person will immediately report the release or spill to the emergency response agency by calling 911. He/she will also notify the administering agency (San Jose Fire Department).

C. Who Must Report - Definitions

1. "Person" means any employee, authorized representative, agent or designee of a handler.

2. "Handler" means any business that handles a hazardous material.

D. Determining what releases are immediately reportable.

1. Defined

A. A release is defined in AB2185 as any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment unless permitted or authorized by a regulatory agency.

San Jose Fire Department
Hazardous Materials Program
4 North Second Street, Suite 1100
San Jose, Ca. 95113-1305

EMERGENCY RESPONSE/CONTINGENCY PLAN

Section V

The plan must be implemented immediately whenever there is a fire explosion or release of hazardous waste constituents which could threaten health and/or the environment. Submit a written report to the San Jose Fire Department, Hazardous Materials Program and the County Health Department, Office of Toxics Enforcement within 15 days of an emergency incident at your facility.

Emergency Response Plan & Training

SEE ATTACHED

All Personnel

All employees are trained in the following procedures:

____ Internal/alarm notification.
____ External emergency response organization notification.
____ Locations and contents of emergency response plan.
____ Evacuation procedures.
____ Spill procedures/ emergency procedures.
____ Emergency incident reporting.

Chemical Handlers

Chemical handlers are additionally trained in the following:

____ Safe Method for handling and storage of hazardous materials.
____ Proper use of personal protective equipment.
____ Locations and proper use of fire and spill control equipment.
____ Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team

Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:

____ Personnel rescue procedures.
____ Shutdown of operations.
____ Use, maintenance, and replacement of emergency response equipment.
____ Emergency response drills, which are held _____ (frequency).
____ Refresher training is provided at least annually.

Emergency Response Documents

The following training records are maintained for each employee:

____ Verification of date that training was completed.
____ Description of introductory and continuing training.
____ Former employee's training records are retained at least three years.
____ Current employees's training records are retained until the facility's closure.
____ Description and documents of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department and the County of Santa Clara Health Department.

B. A "threatened release" means a condition creating a substantial probability of harm, when the probability and potential extent of harm make it reasonably necessary to take immediate action to prevent, reduce, or mitigate damages to persons, property, or the environment.

E. Immediate reporting of a release or a threatened release.

1. A person shall provide an immediate verbal report of any release or threatened release of a hazardous material to the administering agency (San Jose Fire Department) and the Office of Emergency Services as soon as:

a. The person has knowledge of the release or threatened release;

b. Notification can be provided without impending immediate control of the release or threatened release.

c. Notification can be provided without impeding immediate emergency medical measures.

F. The immediate reporting shall include, as a minimum:

a. The exact location of the release or threatened release;

b. The name of the person reporting;

c. The hazardous material involved;

d. An estimate of the quantity of hazardous material involved; and;

e. If known, the potential hazards presented by the hazards presented by the hazardous material involved in the release or threatened release.

D. Evacuation Procedures

1. Should it become necessary to evacuate the premises, the order will be given over the facility paging system.

2. All employees upon receipt of the evacuation order will then cease whatever operation they are involved in, secure machinery or equipment as necessary and proceed to the nearest exit. (See attachment #1 & #2)

3. All employees will be directed to the east side of the building and congregate on the sidewalk upwind from the facility.

Evacuation Procedure-Continued

4. Supervisors will account for all employees they are responsible for to ensure that no employee is left in the facility.

5. The Division Manager or his designee shall be responsible to act as liaison for the company upon arrival of public emergency response agencies.

Note: The immediate reporting shall not be required if there is reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety, property, and the environment.

I. Emergency Response Training Plan

A. Training

1. All employees have received Federal Communication Standard training.

2. Employees have been provided training on interrupting information on Material Safety Data Sheets.

3. Training videos on chemical hazards have been presented to employees.

4. Individual supervisor's train their employees on chemicals they use or may be exposed to.

Note: All employees upon receipt of hazardous materials training are required to submit a signed acknowledgement that they have received training.

Training records are maintained by the Safety Manager.

B. Emergency Response Plan copies are maintained by the Division's Service and Warehouse Managers.

C. The company does not have an emergency response team as no chemical processing is done at the facility.

D. Cal-Air Inc. HCS Plan has been prepared.

E. All supervisors have been provided with a Hazard Communication Standard Guide for use in training and documentation of all employees they are responsible for.

F. Training is required for all new employees and annual refresher training is to be completed by each supervisor. Documentation of training is forwarded to the Safety Manager who is responsible to maintain training records on all corporation employees.

III Emergency Equipment

A. General

The company does not process any hazardous chemicals at its facility, therefore, no specialized emergency equipment is maintained.

The facility is protected by an overhead sprinkler system and these are fire extinguishers placed throughout the facility for emergency use.

PART B - Not Applicable

This facility has no underground storage tanks.

SECTION VI SEPARATION, CONTAINMENT AND MONITORING

Part A - Aboveground Storage Areas

Complete one column for each storage system/area shown on the facility map - use additional copies of this part as needed.

SECTION VII. - RECORDKEEPING

You are required to keep inspection logs or checksheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

[X] We will use the attached sample forms in our routine inspection program.

[ ] We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.)

The following personnel will be responsible for monitoring and/or maintaining equipment.

Name John Sprague Title Shop Foreman

Name John Ridnour Title Journeyman

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the Fire Prevention Bureau upon request.

Attention: Peggy Hornung

Dear Ms. Hornung,

Enclosed are two copies of our revised Hazardous Materials Management Plan as per your most recent inspection.

Please contact me with a date for your final inspections during which time we can clear up any remaining deficiencies.

Very Truly Yours,

Ed Winters
Director of Safety

Emergency Response Plan & Training

SEE ATTACHED

All Personnel
All employees are trained in the following procedures:
____ Internal/alarm notification.
____ External emergency response organization notification.
____ Locations and contents of emergency response plan.
____ Evacuation procedures.
____ Spill procedures/ emergency procedures.
____ Emergency incident reporting.

Chemical Handlers
Chemical handlers are additionally trained in the following:
____ Safe Method for handling and storage of hazardous materials.
____ Proper use of personal protective equipment.
____ Locations and proper use of fire and spill control equipment.
____ Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team
Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
____ Personnel rescue procedures.
____ Shutdown of operations.
____ Use, maintenance, and replacement of emergency response equipment.
____ Emergency response drills, which are held _____ (frequency).
____ Refresher training is provided at least annually.

Emergency Response Documents
The following training records are maintained for each employee:
____ Verification of date that training was completed.
____ Description of introductory and continuing training.
____ Former employee's training records are retained at least three years.
____ Current employees's training records are retained until the facility's closure.
____ Description and documents of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department and the County of Santa Clara Health Department.

I. Emergency Response Plan and Procedures

A. General

In terms of the prevention of hazardous material spills or releases it is our intent to maintain minimum quantities of these materials in our inventory and ensure they are stored in the properly labeled containers as required by the Federal, State, Local laws.

In case an incident should occur, our personnel (or if required a qualified contractor), will immediately commence containment and clean-up of the spill or release.

In addition, we will take all necessary action to minimize the hazard to persons, property, or the environment.

B. Duties and Responsibilities

These statements are intended as a guide to fulfill duties and responsibilities. They are not intended to limit use of initiative where the need is clearly indicated.

C. Reporting and Notification

A. In the event of a spill, release, or threatened release, regardless of size involving a hazardous material, the event will be reported immediately to the Division Manager in the facility.

B. The Division Manager will determine if the spill, release, or threatened release is reportable. If it is determined to be reportable, this person will immediately report the release or spill to the emergency response agency by calling 911. He/she will also notify the administering agency (San Jose Fire Department).

C. Who Must Report - Definitions

1. "Person" means any employee, authorized representative, agent or designee of a handler.

2. "Handler" means any business that handles a hazardous material.

D. Determining what releases are immediately reportable.

1. Defined

A. A release is defined in AB2185 as any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment unless permitted or authorized by a regulatory agency.

B. A "threatened release" means a condition creating a substantial probability of harm, when the probability and potential extent of harm make it reasonably necessary to take immediate action to prevent, reduce, or mitigate damages to persons, property, or the environment.

E. Immediate reporting of a release or a threatened release.

1. A person shall provide an immediate verbal report of any release or threatened release of a hazardous material to the administering agency (San Jose Fire Department) and the Office of Emergency Services as soon as:

a. The person has knowledge of the release or threatened release;

b. Notification can be provided without impending immediate control of the release or threatened release.

c. Notification can be provided without impeding immediate emergency medical measures.

F. The immediate reporting shall include, as a minimum:

a. The exact location of the release or threatened release;

b. The name of the person reporting;

c. The hazardous material involved;

d. An estimate of the quantity of hazardous material involved; and;

e. If known, the potential hazards presented by the hazards presented by the hazardous material involved in the release or threatened release.

D. Evacuation Procedures

1. Should it become necessary to evacuate the premises, the order will be given over the facility paging system.

2. All employees upon receipt of the evacuation order will then cease whatever operation they are involved in, secure machinery or equipment as necessary and proceed to the nearest exit. (See attachment #1 & #2)

3. All employees will be directed to the east side of the building and congregate on the sidewalk upwind from the facility.

Evacuation Procedure-Continued

4. Supervisors will account for all employees they are responsible for to ensure that no employee is left in the facility.

5. The Division Manager or his designee shall be responsible to act as liaison for the company upon arrival of public emergency response agencies.

Note: The immediate reporting shall not be required if there is reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety, property, and the environment.

I Emergency Response Training Plan

A. Training

1. All employees have received Federal Communication Standard training.

2. Employees have been provided training on interrupting information on Material Safety Data Sheets.

3. Training videos on chemical hazards have been presented to employees.

4. Individual supervisor's train their employees on chemicals they use or may be exposed to.

Note: All employees upon receipt of hazardous materials training are required to submit a signed acknowledgement that they have received training.

Training records are maintained by the Safety Manager.

B. Emergency Response Plan copies are maintained by the Division's Service and Warehouse Managers.

C. The company does not have an emergency response team as no chemical processing is done at the facility.

D. Cal-Air Inc. HCS Plan has been prepared.

E. All supervisors have been provided with a Hazard Communication Standard Guide for use in training and documentation of all employees they are responsible for.

F. Training is required for all new employees and annual refresher training is to be completed by each supervisor. Documentation of training is forwarded to the Safety Manager who is responsible to maintain training records on all corporation employees.

III Emergency Equipment

A. General

The company does not process any hazardous chemicals at its facility, therefore, no specialized emergency equipment is maintained.

The facility is protected by an overhead sprinkler system and these are fire extinguishers placed throughout the facility for emergency use.

SECTION VI SEPARATION, CONTAINMENT AND MONITORING

Part A - Aboveground Storage Areas

Complete one column for each storage system/area shown on the facility map - use additional copies of this part as needed.

PART B - Not Applicable

This facility has no underground storage tanks.

SECTION VII. - RECORDKEEPING

You are required to keep inspection logs or checksheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

[X] We will use the attached sample forms in our routine inspection program.

[ ] We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.)

The following personnel will be responsible for monitoring and/or maintaining equipment.

Name DON SANCHEZ Title SERVICE MANAGER

Name RON HILLYER Title WAREHOUSEMAN

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the Fire Prevention Bureau upon request.

I. Emergency Response Plan and Procedures

A. General

In terms of the prevention of hazardous material spills or releases it is our intent to maintain minimum quantities of these materials in our inventory and ensure they are stored in the properly labeled containers as required by the Federal, State, Local laws.

In case an incident should occur, our personnel (or if required a qualified contractor), will immediately commence containment and clean-up of the spill or release.

In addition, we will take all necessary action to minimize the hazard to persons, property, or the environment.

B. Duties and Responsibilities

These statements are intended as a guide to fulfill duties and responsibilities. They are not intended to limit use of initiative where the need is clearly indicated.

C. Reporting and Notification

A. In the event of a spill, release, or threatened release, regardless of size involving a hazardous material, the event will be reported immediately to the Division Manager in the facility.

B. The Division Manager will determine if the spill, release, or threatened release is reportable. If it is determined to be reportable, this person will immediately report the release or spill to the emergency response agency by calling 911. He/she will also notify the administering agency (San Jose Fire Department).

C. Who Must Report - Definitions

1. "Person" means any employee, authorized representative, agent or designee of a handler.

2. "Handler" means any business that handles a hazardous material.

D. Determining what releases are immediately reportable.

1. Defined

A. A release is defined in AB2185 as any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment unless permitted or authorized by a regulatory agency.

B. A "threatened release" means a condition creating a substantial probability of harm, when the probability and potential extent of harm make it réasonably necessary to take immediate action to prevent, reduce, or mitigate damages to persons, property, or the environment.

E. Immediate reporting of a release or a threatened release.

1. A person shall provide an immediate verbal report of any release or threatened release of a hazardous material to the administering agency (San Jose Fire Department) and the Office of Emergency Services as soon as:

a. The person has knowledge of the release or threatened release;

b. Notification can be provided without impending immediate control of the release or threatened release.

c. Notification can be provided without impeding immediate emergency medical measures.

F. The immediate reporting shall include, as a minimum:

a. The exact location of the release or threatened release;

b. The name of the person reporting;

c. The hazardous material involved;

d. An estimate of the quantity of hazardous material involved; and;

e. If known, the potential hazards presented by the hazards presented by the hazardous material involved in the release or threatened release.

D. Evacuation Procedures

1. Should it become necessary to evacuate the premises, the order will be given over the facility paging system.

2. All employees upon receipt of the evacuation order will then cease whatever operation they are involved in, secure machinery or equipment as necessary and proceed to the nearest exit. (See attachment #1 & #2)
3. All employees will be directed to the east side of the building and congregate on the sidewalk upwind from the facility.

Evacuation Procedure-Continued

4. Supervisors will account for all employees they are responsible for to ensure that no employee is left in the facility.

5. The Division Manager or his designee shall be responsible to act as liaison for the company upon arrival of public emergency response agencies.

Note: The immediate reporting shall not be required if there is reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety, property, and the environment.

II Emergency Response Training Plan

A. Training

1. All employees have received Federal Communication Standard training.

2. Employees have been provided training on interrupting information on Material Safety Data Sheets.

3. Training videos on chemical hazards have been presented to employees.

4. Individual supervisor's train their employees on chemicals they use or may be exposed to.

Note: All employees upon receipt of hazardous materials training are required to submit a signed acknowledgement that they have received training.

Training records are maintained by the Safety Manager.

B. Emergency Response Plan copies are maintained by the Division's Service and Warehouse Managers.

C. The company does not have an emergency response team as no chemical processing is done at the facility.

D. Cal-Air Inc. HCS Plan has been prepared.

E. All supervisors have been provided with a Hazard Communication Standard Guide for use in training and documentation of all employees they are responsible for.

F. Training is required for all new employees and annual refresher training is to be completed by each supervisor. Documentation of training is forwarded to the Safety Manager who is responsible to maintain training records on all corporation employees.

III Emergency Equipment

A. General

The company does not process any hazardous chemicals at its facility, therefore, no specialized emergency equipment is maintained.

The facility is protected by an overhead sprinkler system and these are fire extinguishers placed throughout the facility for emergency use.

SECTION VI SEPARATION, CONTAINMENT AND MONITORING

Emergency Response Training

All Personnel
All employees are trained in the following procedures:
X Internal/alarm notification.
X External emergency response organization notification.
X Locations and content of emergency response plan.
X Evacuation procedures.
X Spill procedures.

Chemical Handlers
Chemical handlers are additionally trained in the following:
X Safe method for handling and storage of hazardous materials.
X Proper use of personal protection equipment.
X Locations and proper use of fire and spill control equipment.
X Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team
Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
n/a Personnel rescue procedures.
n/a Shutdown of operations.
n/a Use, maintenance, and replacement of emergency response equipment.
n/a Emergency response drills, which are held _____ (frequency).
n/a Refresher training is provided at least annually.

Emergency Response Documents
The following training records are maintained for each employee:
n/a Verification of date that training was completed.
n/a Description of introductory and continuing training.
n/a Employee's training records are retained at least three years.
n/a Description and documentation of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department.

SECTION IV - WASTE DISPOSAL

Facility Name:
Proprietor Name:
Billing Address for County Use:

List the wastes for each disposal method and provide the disposal code.

METHOD	DISPOSAL CODE*	WASTES
1. No Waste		
2. Discharge to Sanitary		
3. Pretreatment		
4. Recycle	C/L	USED REFRIGERANT OIL
5. Licensed Waste Hauler		
6. Other Disposal Describe the method:		

List any permit(s) you currently have for the storage, treatment and/or disposal of hazardous waste: NONE

The annual Hazardous Waste Generator Permit fee is determined by the quantity of hazardous waste generated per year. Check [X] the one line below that best describes the amount and kind of waste generated by your business over the past year.

Hazardous Waste Generated

[X] Recycles waste oil only any amount

[ ] Generates <100 kg/yr (Approx. 27 gallons)

[ ] Generates <5 tons/yr

[ ] Generates 5 to <25 tons/yr

[ ] Generates 25 to <50 tons/yr

[ ] Generates 50 to <250 tons/yr

[ ] Generates 250 to <500 tons/yr

[ ] Generates 500 to <1,000 tons/yr

[ ] Generates 1,000 to <2,000 tons/yr

[ ] Generates 2,000 or more tons/yr

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara and agrees to comply with all applicable hazardous waste regulations and with inspection procedures needed to insure compliance.

___ Verification of date that training was completed.
___ Description of introductory and continuing training.
___ Former employee's training records are retained at least three years.
___ Current employees's training records are retained until the facility's closure.
___ Description and documents of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department and the County of Santa Clara Health Department.

I. Emergency Response Plan and Procedures

A. General

In terms of the prevention of hazardous material spills or releases it is our intent to maintain minimum quantities of these materials in our inventory and ensure they are stored in the properly labeled containers as required by the Federal, State, Local laws.

In case an incident should occur, our personnel (or if required a qualified contractor), will immediately commence containment and clean-up of the spill or release.

In addition, we will take all necessary action to minimize the hazard to persons, property, or the environment.

B. Duties and Responsibilities

These statements are intended as a guide to fulfill duties and responsibilities. They are not intended to limit use of initiative where the need is clearly indicated.

C. Reporting and Notification

A. In the event of a spill, release, or threatened release, regardless of size involving a hazardous material, the event will be reported immediately to the Division Manager in the facility.

B. The Division Manager will determine if the spill, release, or threatened release is reportable. If it is determined to be reportable, this person will immediately report the release or spill to the emergency response agency by calling 911. He/she will also notify the administering agency (San Jose Fire Department).

C. Who Must Report - Definitions

1. "Person" means any employee, authorized representative, agent or designee of a handler.

2. "Handler" means any business that handles a hazardous material.

D. Determining what releases are immediately reportable.

1. Defined

A. A release is defined in AB2185 as any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment unless permitted or authorized by a regulatory agency.

B. A "threatened release" means a condition creating a substantial probability of harm, when the probability and potential extent of harm make it reasonably necessary to take immediate action to prevent, reduce, or mitigate damages to persons, property, or the environment.

E. Immediate reporting of a release or a threatened release.

1. A person shall provide an immediate verbal report of any release or threatened release of a hazardous material to the administering agency (San Jose Fire Department) and the Office of Emergency Services as soon as:

a. The person has knowledge of the release or threatened release;

b. Notification can be provided without impending immediate control of the release or threatened release.

c. Notification can be provided without impeding immediate emergency medical measures.

F. The immediate reporting shall include, as a minimum:

a. The exact location of the release or threatened release;

b. The name of the person reporting;

c. The hazardous material involved;

d. An estimate of the quantity of hazardous material involved; and;

e. If known, the potential hazards presented by the hazards presented by the hazardous material involved in the release or threatened release.

D. Evacuation Procedures

1. Should it become necessary to evacuate the premises, the order will be given over the facility paging system.

2. All employees upon receipt of the evacuation order will then cease whatever operation they are involved in, secure machinery or equipment as necessary and proceed to the nearest exit. (See attachment #1 & #2)

3. All employees will be directed to the east side of the building and congregate on the sidewalk upwind from the facility.

Evacuation Procedure-Continued

4. Supervisors will account for all employees they are responsible for to ensure that no employee is left in the facility.

5. The Division Manager or his designee shall be responsible to act as liaison for the company upon arrival of public emergency response agencies.

Note: The immediate reporting shall not be required if there is reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety, property, and the environment.

II Emergency Response Training Plan

A. Training

1. All employees have received Federal Communication Standard training.

2. Employees have been provided training on interrupting information on Material Safety Data Sheets.

3. Training videos on chemical hazards have been presented to employees.

4. Individual supervisor's train their employees on chemicals they use or may be exposed to.

Note: All employees upon receipt of hazardous materials training are required to submit a signed acknowledgement that they have received training.

Training records are maintained by the Safety Manager.

B. Emergency Response Plan copies are maintained by the Division's Service and Warehouse Managers.

C. The company does not have an emergency response team as no chemical processing is done at the facility.

D. Cal-Air Inc. HCS Plan has been prepared.

E. All supervisors have been provided with a Hazard Communication Standard Guide for use in training and documentation of all employees they are responsible for.

F. Training is required for all new employees and annual refresher training is to be completed by each supervisor. Documentation of training is forwarded to the Safety Manager who is responsible to maintain training records on all corporation employees.

III Emergency Equipment

A. General

The company does not process any hazardous chemicals at its facility, therefore, no specialized emergency equipment is maintained.

The facility is protected by an overhead sprinkler system and these are fire extinguishers placed throughout the facility for emergency use.

Re: Your file 402312, your invoice 475104, dated 4/1/96

I am in receipt of the subject invoice in which late charges in the amount of $350.18 have been included. The original fee for hazardous material storage was $1400.00 and paid. However, due to our relocation to a new address and changes occurring in our inventory and storage sites, we were instructed to hold payment until a adjusted invoice was presented. Also we were awaiting a schedule for the initial inspection of our new premises.

For the above reasons, we are requesting relief from the late charges.

Very Truly Yours,

Edward G. Winters
Director of Regulatory Affairs

Andrew Dyer

Application for Permits

WHEN THE PERMIT ON THE BACK SIDE IS PROPERLY FILLED OUT AND SIGNED THIS WILL BE YOUR APPLICATION FOR A PERMIT

APPLICANT MUST ACKNOWLEDGE READING BY SIGNING BELOW.
THIS PERMIT WILL EXPIRE IF WORK IS NOT STARTED IN 180 DAYS FROM THE DATE OF ISSUANCE AND IF SUBSTANTIAL PROGRESS HAS NOT BEEN MADE AND VERIFIED BY AN INSPECTION EVERY 180 DAYS. DO NOT CONCEAL OR COVER ANY CONSTRUCTION UNTIL THE WORK IS INSPECTED AND WRITTEN APPROVAL HAS BEEN DOCUMENTED ON THE APPLICANT'S COPY OF THIS PERMIT. THE ISSUANCE OF A PERMIT SHALL NOT CONSTITUTE AN APPROVAL OF ANY VIOLATION OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES. ANY PERMIT PRESUMING TO GIVE AUTHORITY TO VIOLATIONS OF THE CODES OR FEDERAL, STATE AND CITY LAWS AND ORDINANCES WILL BE INVALID. CITY CODES DO NOT EXEMPT YOU FROM COMPLIANCE WITH ANY DEED RESTRICTIONS OR RESTRICTIONS OF YOUR HOMEOWNERS ASSOCIATION. THESE RESTRICTIONS MAY LIMIT OR PROHIBIT WHAT YOU MAY WISH TO DO ON YOUR PROPERTY.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Business License: 000386 CA License: 137195 Class: C20

Termite Operator No.: _____ Registered Company No.: _____

Contractor's Signature: DMcDermott Date: 9/2/99

OWNER-BUILDER DECLARATION

Section 7031.5 I hereby affirm under penalty of perjury that I am exempt from the Contractors License Laws for the following reason (Sec. 7031.5). Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).).

☐ Section 7044 I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he/she did not build or improve for the purpose of sale).

☐ Section 7044 I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor License Law):

☐ I am exempt under Sec. _____, Business and Professions Code for this reason:

_____

Owner: _____ Date: _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a Certificate of Consent to self-insure for Worker's Compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain Worker's Compensation Insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My Worker's Compensation Insurance carrier and Policy number are:

Carrier: Liberty Policy No.: WC7510258 70

(THIS SECTION NEED NOT BE COMPLETED IF THE PERMIT IS FOR ONE HUNDRED DOLLARS ($100) OR LESS)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California, and agree that if I should become subject to the Worker's Compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: _____ Applicant: _____

NOTE: WARNING: FAILURE TO SECURE WORKER'S COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's Name: _____

Lender's Address: _____

CERTIFICATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☒ Other *(specify* Public Address System

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance ..... Phone No.: **911**

California Emergency Management Agency ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 918-3400**

Local Hazardous Materials Program ..... Phone No.: **(408) 277-4659**

California Department of Toxic Substances Control (DTSC) ..... Phone No.: **(510) 540-3739**

Cal/OSHA Division of Occupational Safety and Health ..... Phone No.: **(510) 794-2521**

Air Quality Management District ..... Phone No.: **(415) 749-5022**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **Regional Medical Center of San Jose** Phone No.: **(408) 259-5000**

Address: **225 North Jackson Avenue** City: **San Jose 95116**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Clean Harbors Environmental Services 1030 Commercial Street, Suite 107 San Jose, CA 95112 Phone 408800-645-8265

Provides Emergency Chemical Spill Response service in the event of a major chemical spill

ECR, Inc 800-800-7644 Provide Safety & Environmental Consulting service..

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

SECTION 6 EARTHQUAKE VULNERABILITY

In the event of an earthquake, the following areas must be inspected to ensure the workplace is safe for occupancy and the equipment is running properly:

Outdoors

1) Inspect the Main Dust Collector structure is intact and that the motor/vacuum is functioning correctly.

Indoors

1) Inspect the rafters and roof structure is intact. Look for cracks or other defects in the rafters. Check the roof/ceiling for any damage or collapse.
2) Inspect both of the spray booths are intact. Check the ventilation exhaust duct is intact and has not been damaged or collapsed. Check the ventilation motor/vacuum is functioning. Inspect the spray booth interior for any chemical spills.
3) Inspect the virgin chemical storage area (A) for any chemical spills.
4) Inspect the hazardous waste storage area (B) for any chemical spills.
5) Inspect the 5 flammable materials cabinets within the facility for chemical spills.
6) Inspect the facility for any broken water lines. Shut off water supply if possible.
7) Inspect the facility for any broken/exposed electrical lines. Do not approach down power lines or exposed wiring. Shut down power if safely possible.
8) Inspect the entire facility for any other problems. This may include: fallen objects, blocked exits, damaged equipment, or any other items that are not normal.

SECTION 7 HAZARD MITIGATION/PREVENTION/ABATEMENT

In order to reduce the risk hazards in the facility, the following practices are followed:

1) Maintain the minimal amount of chemical and lumber/panel inventory on site at all times to meet production needs.
2) Prevent the accumulation of sawdust by having the employees spend the last 15 minutes of each work day cleaning the equipment and sweeping the floors.
3) Conduct periodic Safety Training on general and job specific topics.
4) Conduct periodic safety inspections of the facility (daily, monthly, quarterly).

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☒ Other *(specify* Public Address System

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance Phone No.: **911**

California Emergency Management Agency Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Certified Unified Program Agency (CUPA) Phone No.: **(408) 918-3400**

Local Hazardous Materials Program Phone No.: **(408) ~~277-4659~~ 535-5750**

California Department of Toxic Substances Control (DTSC) Phone No.: **(510) 540-3739**

Cal/OSHA Division of Occupational Safety and Health Phone No.: **(510) 794-2521**

Air Quality Management District Phone No.: **(415) 749-5022**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **Regional Medical Center of San Jose** Phone No.: **(408) 259-5000**

Address: **225 North Jackson Avenue** City: **San Jose 95116**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Clean Harbors Environmental Services 1030 Commercial Street, Suite 107 San Jose, CA 95112 Phone 408800-645-8265

Provides Emergency Chemical Spill Response service in the event of a major chemical spill

ECR, Inc 800-800-7644 Provide Safety & Environmental Consulting service..

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.).*
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911).*
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance witb requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

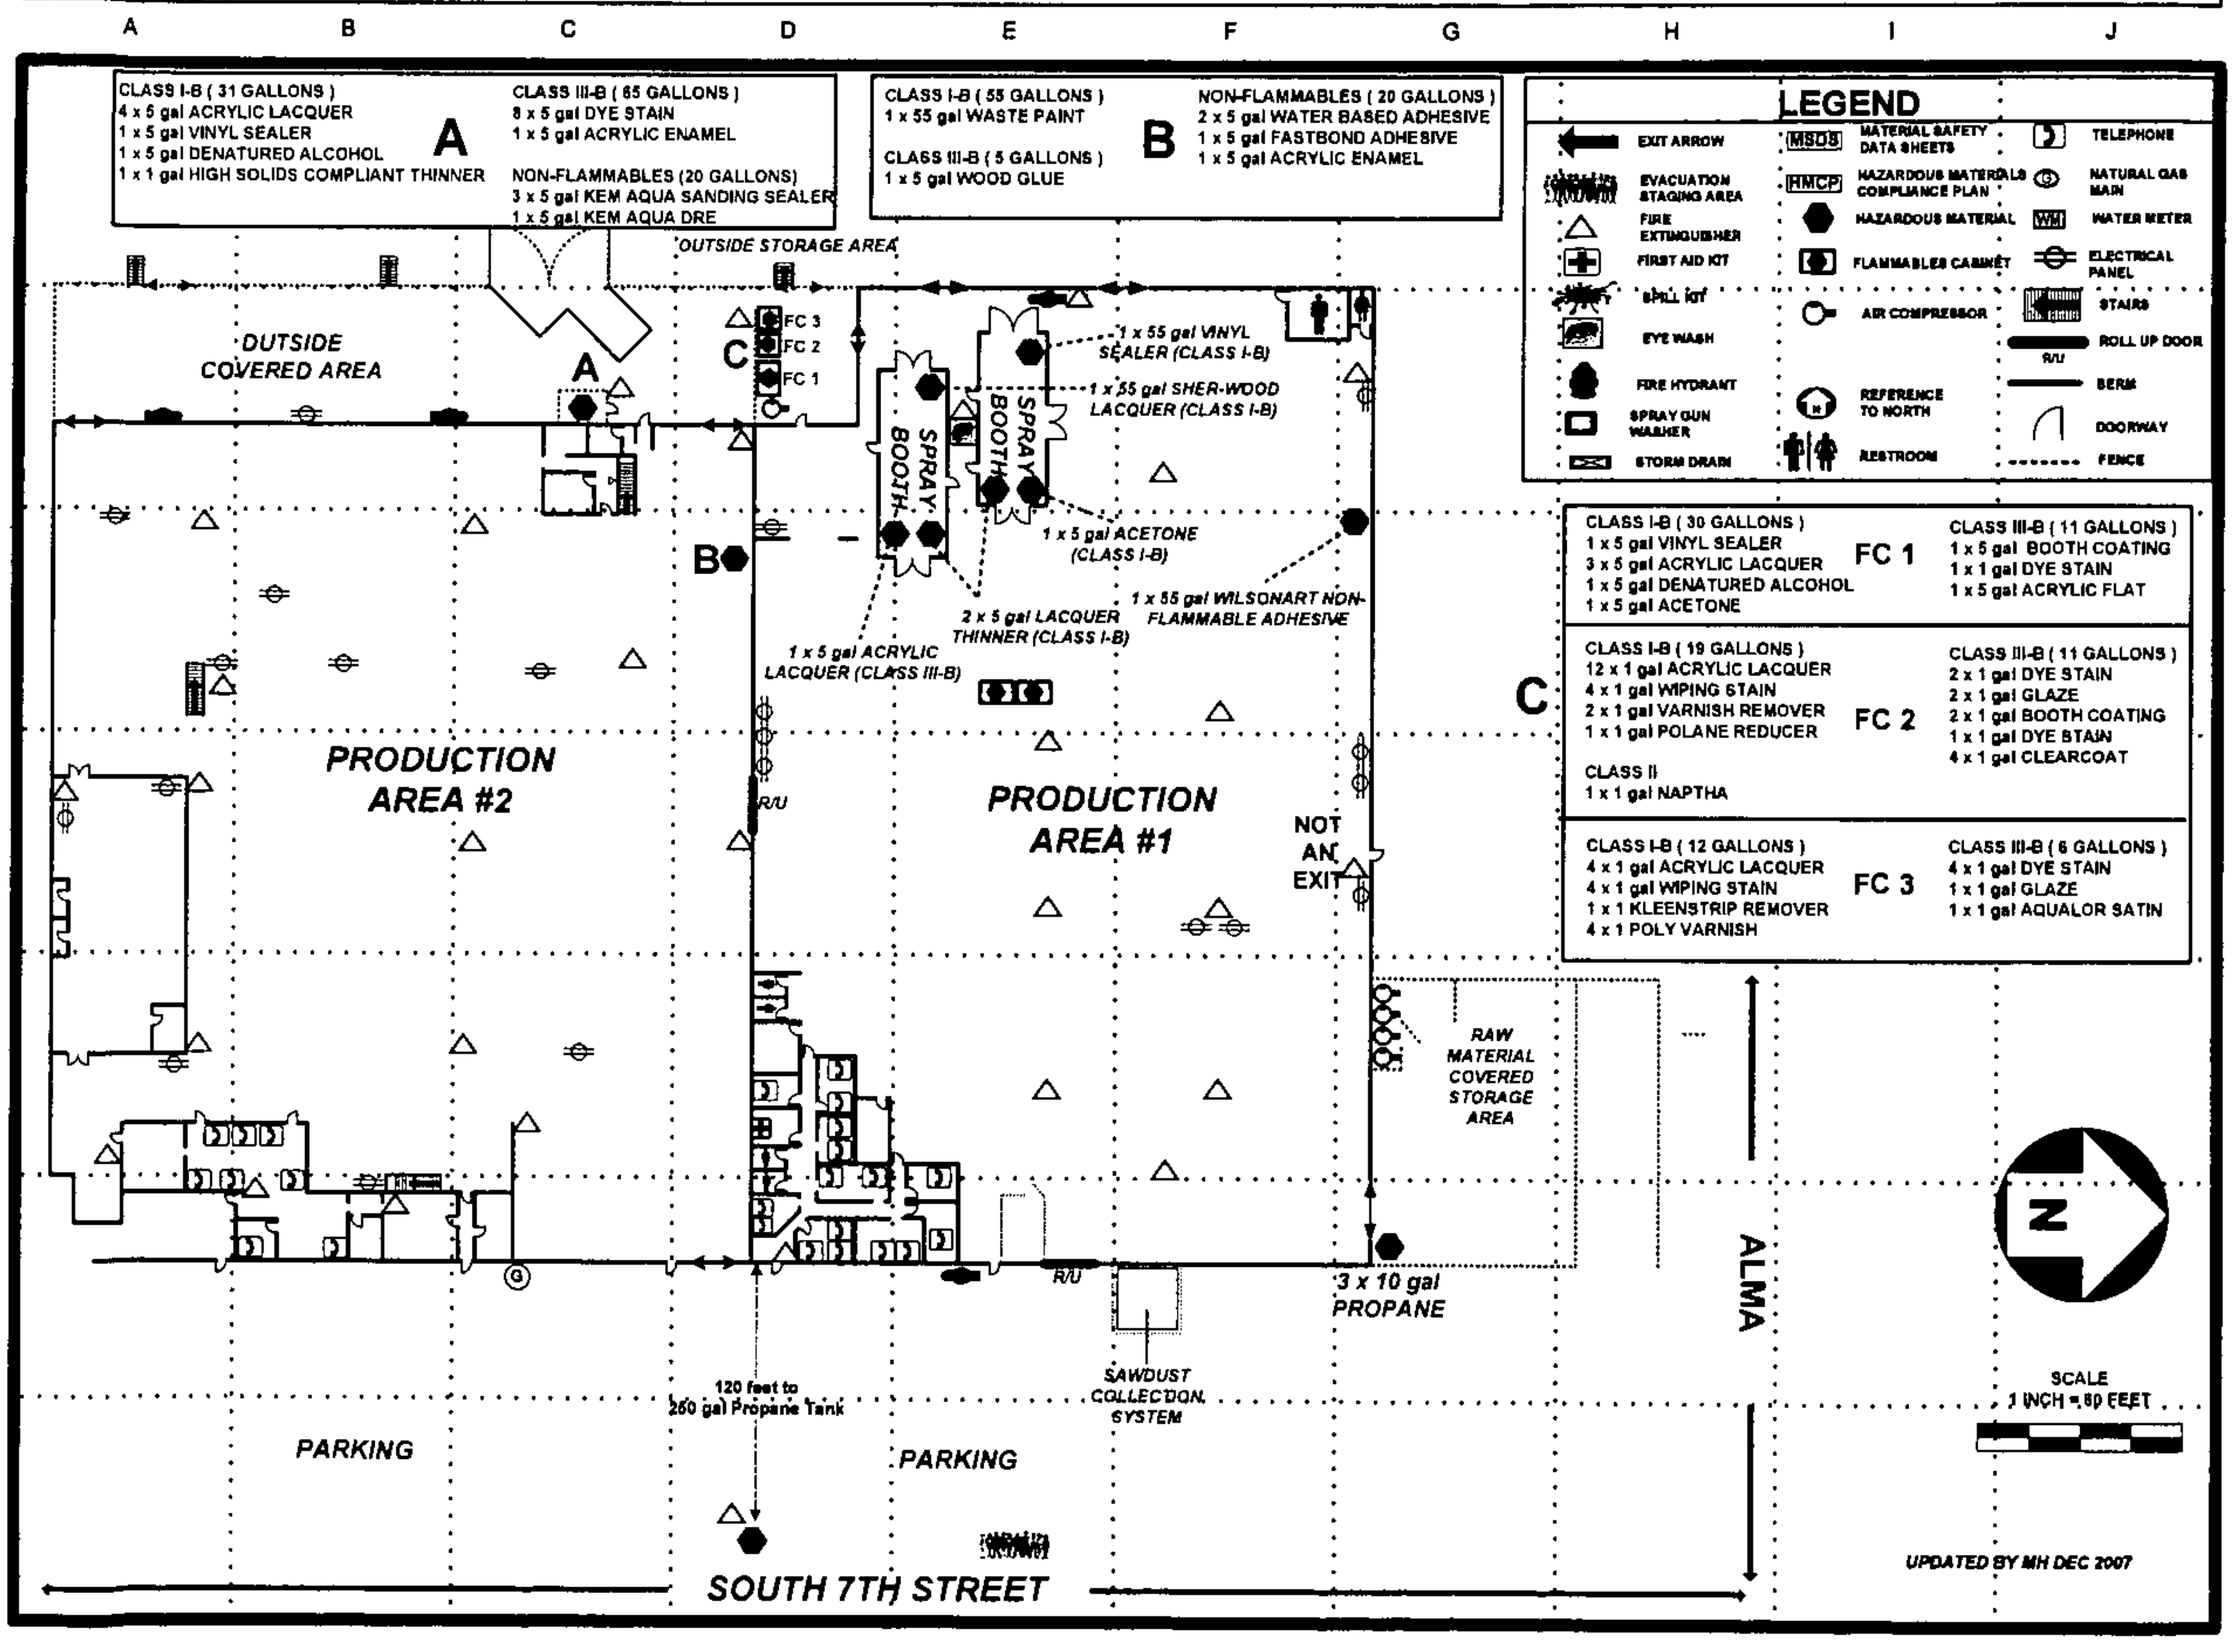
SECTION 6 EARTHQUAKE VULNERABILITY

In the event of an earthquake, the following areas must be inspected to ensure the workplace is safe for occupancy and the equipment is running properly:

Outdoors

1) Inspect the Main Dust Collector structure is intact and that the motor/vacuum is functioning correctly.

Indoors



1) Inspect the rafters and roof structure is intact. Look for cracks or other defects in the rafters. Check the roof/ceiling for any damage or collapse.
2) Inspect both of the spray booths are intact. Check the ventilation exhaust duct is intact and has not been damaged or collapsed. Check the ventilation motor/vacuum is functioning. Inspect the spray booth interior for any chemical spills.
3) Inspect the virgin chemical storage area (A) for any chemical spills.
4) Inspect the hazardous waste storage area (B) for any chemical spills.
5) Inspect the 5 flammable materials cabinets within the facility for chemical spills.
6) Inspect the facility for any broken water lines. Shut off water supply if possible.
7) Inspect the facility for any broken/exposed electrical lines. Do not approach down power lines or exposed wiring. Shut down power if safely possible.
8) Inspect the entire facility for any other problems. This may include: fallen objects, blocked exits, damaged equipment, or any other items that are not normal.

SECTION 7 HAZARD MITIGATION/PREVENTION/ABATEMENT

In order to reduce the risk hazards in the facility, the following practices are followed:

1) Maintain the minimal amount of chemical and lumber/panel inventory on site at all times to meet production needs.
2) Prevent the accumulation of sawdust by having the employees spend the last 15 minutes of each work day cleaning the equipment and sweeping the floors.
3) Conduct periodic Safety Training on general and job specific topics.
4) Conduct periodic safety inspections of the facility (daily, monthly, quarterly).

CALIFORNIA ANNOTATED SITE MAP | BUSINESS NAME: **AMBERWOOD PRODUCTS** | SITE ADDRESS **1555 SOUTH 7TH STREET SAN JOSE, CA 95112** | MAP # : **1**

HAZARD COMMUNICATION PLAN

INTRODUCTION

It is the policy of Amberwood Products, Inc. to provide its employees with information concerning the hazardous nature of chemicals or substances that the employees may encounter in the workplace. This transmittal of information is accomplished by this comprehensive hazard communication program, which includes container labeling and other forms of warning, material safety data sheets, and employee training. The program will ensure that all employees receive adequate information relevant to potential hazards of various chemicals used in Amberwood Products, Inc.'s operations.

Evaluating the potential hazards of chemicals, and communicating information concerning hazards and appropriate protective measures to employees is accomplished by maintaining a written hazard communication program for the workplace. This plan includes, but is not limited to :

* List of hazardous chemicals present
* Preparation and distribution of material safety data sheets to employees
* Labels and other forms of warning
* Development and implementation of employee training programs regarding hazards of chemicals and protective measures

Amberwood Products, Inc.'s Environmental Compliance program meets the requirements of OSHA, Hazard Communication Standard (29 CFR 1910.1200). The following sections outline the steps Amberwood Products, Inc. has taken to meet these requirements.

GENERAL COMPANY POLICY

The Hazard Communication Plan applies to all personnel at Amberwood Products, Inc., including any administrative or managerial staff who are involved in hazardous material policy (i.e. hazardous waste manifests). Copies of this Plan will be made available to all employees or contract employees who may be exposed to hazardous substances while performing duties at the facility.

The initial employee training will be provided by Environmental Compliance and Remediation Inc. "ECR", with supplemental training programs administered by the management of the facility.

The Program Administrator is the program coordinator, who has overall responsibility for the program. The Program Administrator will review and update the program with ECR's consultation as necessary. Copies of the written program may be obtained from the Program Administrator.

Under this program employees will be informed of the contents of the Hazard Communications Standard, the hazardous properties of chemicals with which employees work, safe handling procedures, and measures to take to protect employees from these chemicals. Employees will also be informed of the hazards associated with non-routine tasks, and the hazards associated with unlabeled pipes.

Hazardous Chemical Identification:

The responsibility for determining whether a chemical is hazardous lies with the chemical manufacturer or importer of a chemical. As a user of chemicals, Amberwood Products, Inc. relies on the evaluation received from these suppliers through labels on containers and material safety data sheets (MSDS's.)

Chemicals considered to be hazardous are those:

- regulated by OSHA in 29 CFR Part 1910, Subpart Z, Toxic and Hazardous Substances;
- included in the American Conference of Governmental Industrial Hygienists (ACGIH) latest edition of Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment;
- found to be suspected or confirmed carcinogens by the National Toxicology Program in the latest edition of the Annual Report on Carcinogens, or by the International Agency for Research on Cancer (IARC) in the latest edition of their IARC monographs.

Exceptions:

In paragraph (b)(6) of the rule, OSHA has listed a number of items that are excluded. For example, rubbing alcohol maintained in a first-aid station would be exempt under paragraph (b)(6)(vi) because it is intended for personal use by employees. In some cases, an exempt material may be listed; in general, if there is any question regarding a particular chemical, it is best to include that chemical in the hazard communication program.

This list is to be an inventory of everything for which a material safety data sheet must be obtained. It is part of the written program, and must be made available to employees upon request.

List of Hazardous Chemicals

The list of all hazardous chemicals used in the facility can be found in section 22 of this binder. This list identifies all of the chemicals used in our work process areas. A separate list is available for each work area. A master list of these chemicals will be maintained by, and is available, from the Program Administrator.

The following list identifies some types of potentially hazardous chemicals that may be present in the workplace:

Acids
Adhesives
Aerosols
Asbestos
Battery fluids
Cleaning agents
Coatings
Catalysts
Caustics
Degreasing agents
Detergents
Dusts
Etching agents
Fiberglass
Flammable
Foaming resins
Fuels
Gasoline
Greases
Industrial oils
Janitorial supplies
Kerosene
Lacquers
Lead
Paints
Process chemicals
Resins
Sealers
Solders
Solvents
Strippers
Surfactants
Thinners
Water treatments
Xylene

MATERIAL SAFETY DATA SHEETS "MSDS"

The Material Safety Data Sheet (MSDS) is a detailed information bulletin prepared by the manufacturer or importer of a chemical that describes the physical and chemical properties, physical and health hazards, routes of exposure, precautions for safe handling and use, emergency and first-aid procedures, and control measures. Information on an MSDS aids in the selection of safe products and helps prepare employers and employees to respond effectively to daily exposure situations as well as emergency situations.

The MSDS's are a comprehensive source of information for all types of employers. There may be information on the MSDS that is not useful to the safety and health in Amberwood Products, Inc.. Generally, hazard information and protective measures should be the focus of concern.

Requirements

Amberwood Products, Inc. will maintain a complete and accurate MSDS for each hazardous chemical that is used in the facility. Amberwood Products, Inc. is entitled to obtain this information automatically upon purchase of the material. When new and significant information becomes available concerning a product's hazards or ways to protect against the hazards, chemical manufactures, importers, or distributors must add to their MSDS within three months and provide it to their customers with the net shipment of the chemical. Amberwood Products, Inc. must have a MSDS for each hazardous chemical used in the workplace. If there are multiple suppliers of the same chemical, no need to retain multiple MSDS's for that chemical.

While MSDS's are not required to be physically attached to the shipment, they must accompany or precede the shipment. When the manufacturer/supplier fails to send an MSDS with a shipment labeled as a hazardous chemical, Amberwood Products, Inc. shall obtain one from the manufacturer, importer, or distributor as soon as possible. Similarly, if the MSDS is incomplete or unclear, Amberwood Products, Inc. should contact the manufacturer or importer to get clarification or obtain missing information. (See sample letter for requesting an MSDS or additional information on the next page).

MSDS REQUEST

From:

_____

Amberwood Products, Inc.

1555 S. 7th St.
San Jose, CA 95112

1st Request Date _____

2nd Request Date _____

3rd Request Date _____

To: _____
(Company)

_____
(Company Adress)

_____
(City, State, Zip)

_____
(A/C) (Phone)

Please send us a Material Safety Data Sheet (MSDS) on approved OSHA MSDS Form 174, for each of the products listed below, within (15) days of the date of this request. The MSDS(s) are required by the California State Worker and Community Right to Know Act (CCR 8, Sec 5194, Hazard Communication Standard). Please consider this letter a standing request with your company for updated information concerning the safety and health aspects of using this product that may become known in the future. ***Delays of more than twenty (20) days in receiving the MSDS(s) requested may require us to notify OSHA of our inability to obtain this information.***

Product Name	Product Number

Thank you for your cooperation. Should you have any questions regarding this request, please contact me at the phone number listed above.

Respectfully,

Permissible Exposure Limit (PEL) or Threshold Limit Value (TLV) or present a health risk to exposed employees in these concentrations.

Section III. Physical and Chemical Characteristics

- The physical and chemical characteristics of the hazardous substance must be listed. These include items such as boiling and freezing points, density, vapor pressure, specific gravity, solubility, volatility, and the product's general appearance and odor. These characteristics provide important information for designing safe and healthful work practices.

Section IV. Fire and Explosion Hazard Data

- The compound's potential for fire and explosion must be described. Also, the fire hazards of the chemical and the conditions under which it could ignite or explode must be identified. Recommended extinguishing agents and fire-fighting methods must be described.

Section V. Reactivity Data

- This section presents information about other chemicals and substances with which the chemical is incompatible, or with which it reacts. Information on any hazardous decomposition products, such as carbon monoxide, must be included.

Section VI. Health Hazards

- The acute and chronic health hazards of the chemical, together with signs and symptoms of exposure, must be listed. In addition, any medical conditions that are aggravated by exposure to the compound must be included. The specific types of chemical health hazards defined in the standard include carcinogens, corrosives, toxins, irritants, sensitizers, mutagens, teratogens, and effects on target organs (i.e. liver, kidney, nervous system, blood, lungs, mucous membranes, reproductive system, skin, eyes, etc.)
- The route of entry section describes the primary pathway by which the chemical enters the body. There are three principle routes of entry: inhalation, skin, and ingestion.
- This section of the MSDS supplies the OSHA PEL, the ACGIH TLV, and other exposure levels used or recommended by the chemical manufacturer.

- If the compound is listed as a carcinogen (cancer-causing agent) by OSHA, the National Toxicology Program (NTP), or the International Agency for Research on Cancer (IARC), this information must be indicated on the MSDS.

Section VII. Precautions for Safe Handling and Use

- The standard requires the preparer to describe the precautions for safe handling and use. These include recommended industrial hygiene practices, precautions to be taken during repair and maintenance of equipment, and procedures for cleaning up spills and leaks. Some manufacturers also use this section to include useful information not specifically required by the standard, such as EPA waste disposal methods and state and local requirements.

Section VIII. Control Measures

- The standard requires the preparer of the MSDS to list any generally applicable control measures. These include engineering controls, safe handling procedures, and personal protective equipment. Information is often included on the use of goggles, gloves, body suits, respirators, and face shields.

Amberwood Products, Inc.'s Responsibilities

Employers must ensure that each employee has a basic knowledge of how to find information on an MSDS and how to properly make use of that information. Employers also must ensure the following:

- Complete and accurate MSDS's are made available during each work shift to employees when they are in their work areas.
- Information is provided for each hazardous chemical.

MATERIAL SAFETY DATA SHEET CHECKLIST

MSDS must contain the following information:

1. Product or chemical identity used on the label.
2. Manufacturer's name and address.
3. Chemical and common names of each hazardous ingredient.
4. Name, address, and phone number for hazard and emergency information.
5. Preparation or revision date.
6. The hazardous chemical's physical and chemical characteristics, such as vapor pressure and flash point
7. Physical hazards, including the potential for fire, explosion, and reactivity.
8. Known health hazards.
9. OSHA permissible exposure limit (PEL), ACGIH threshold limit value (TLV) or other exposure limits.
10. Emergency and first-aid procedures.
11. Whether OSHA, NTP or IARC lists the ingredient as a carcinogen.
12. Precautions for safe handling and use.
13. Control measures such as engineering controls, work practices, hygienic practices or personal protective equipment required.
14. Primary routes of entry.
15. Procedures for spills, leaks, and clean-up.

LABELS AND OTHER FORMS OF WARNING

The Program Administrator will ensure that all hazardous chemicals in the plant are properly labeled and updated, as necessary. Containers that are shipped from this facility should be checked to ensure that all containers are properly labeled.

The employer is not required to label portable containers into which hazardous substances are transferred from labeled containers, and which are intended only for the immediate use of the employee who performs the transfer.

The Numerically ranked, color coded diamond system of the National Fire Protection Association (NFPA) or the HMIS color bar type labels are also useful in obtaining quick information about the hazards associated with chemicals in the workplace. The colors represent the kind of hazards; blue is associated with the health hazards, red with its flammability characteristics and yellow dealing with the chemical's reactivity. The white diamond is keyed to specific hazards such as corrosive, acid or oxidizer on the NFPA type label or information on specific personal protective gear on the color bar type label. Hazard warning information such as target organ effects by the chemical will usually be shown. The numbers in the color bar or diamond area show the degree of hazard, with zero representing a minimal hazard and increasing to the highest action level of four, which indicates a severe hazard. This labeling system quickly identifies the hazards associated with a particular chemical and informs the worker on how it should be handled. A lot of valuable information can be found on a label. But if you don't find everything you need, refer to the Material Safety Data Sheet or MSDS for more information. Please look at next page for a sample of the NFPA and HMIS labeling system.

NON-ROUTINE TASKS

When employees are required to perform new hazardous tasks that are not part of their ordinary routine . Before starting such work, the employees will be given information on:

* Specific hazards both chemical and physical
* Personal protective and safety equipment and measures
* Emergency procedures

At Amberwood Products, Inc. it is the Program Administrator's responsibility that the employees are informed about non-routine hazardous tasks.

EMERGENCY & FIRE PREVENTION PLAN

Section 3220 of the California Code of Regulations Title 8:

Emergency Action Plan.

(a) Scope and Application. This section applies to all emergency action plans. The emergency action plan shall be in writing, except as provided in the last sentence of subsection (e)(3) of this section, and shall cover those designated actions employers and employees must take to ensure those designated actions employers and employees must take to ensure employee safety from fire and other emergencies.

(b) Elements. The following elements, at a minimum, shall be included in the plan:

(1) Emergency escape procedures and emergency escape route assignments;

(2) Procedures to be followed by employees who remain to operate critical plant operations before they evacuate;

(3) Procedures to account for all employees after emergency evacuation has been completed;

(4) Rescue and medical duties for those employees who are to perform them;

(5) The preferred means of reporting fires and other emergencies; and

(6) Names or regular job titles of persons or departments who can be contacted for further information or explanation of duties under the plan.

(c) Alarm System.

(1) The employer shall establish an employee alarm system which complies with Article 165.

(2) If the employee alarm system is used for alerting fire brigade members, or for other purposes, a distinctive signal for each purpose shall be used.

(d) Evacuation. The employer shall establish in the emergency action plan the types of evacuation to be used in emergency circumstances.

(e) Training.

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,

(B) Whenever the employee's responsibilities or designated actions under the plan change, and

(C) Whenever the plan is changed.

(3) The employer shall review with each employee upon intitial assignment of those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review. For those employers with 10 or fewer employees the plan may be communicated orally to employees and the employer need not maintain a written plan.

NOTE: Authority and reference cited: Section 142.3, Labor Code.

HISTORY

1. New section filed 9-8-81; effective thiriteth day thereafter (Register 81, No. 37).

Section 3221 of the California Code of Regulations Title 8:

Fire Prevention Plan.

(a) Scope and Application. This section applies to all fire prevention plans. The fire prevention plan shall be in writing, except as provided in the last sentence of subsection (d)(2) of this section.

(b) Elements. The following elelments, at a minimum, shall be included in the fire prevention plan:

(1) Potential fire hazards and their proper handling and storage procedures, potential ignition sources (such as welding, smoking and others) and their control procedures, and the type of fire protection equipment or systems which can control a fire involving them;

(2) Names or regular job titles of those responsible for maintenance of equipment and systems installed to prevent or control ignitions or fires; and

(3) Names or regular job titles of those responsible for the control of accumulation of flammable or combustible waste materials.

(c) Housekeeping. The employer shall control accumulations of flammable and combustible waste materials and residues so that they do not contribute to a fire emergency. The housekeeping procedures shall be included in the written fire prevention plan.

(d) Training.

(1) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

FIRE PREVENTION

What would happen if a fire occurred at this facility? Would you know what to do? Often in a fire people panic because they don't know the proper procedures and/or how to use the proper equipment. When this happens, additional damage that may have been avoided can occur. And what's worse, panic can also lead to avoidable injury and/or death. If this facility is destroyed, or heavily damaged, by fire, everyone loses. From the owners, to the employees, to the distributors, and especially the valued customers of Amberwood Products, Inc. are all effected by the change in the goods or services that are no longer available. It is for these reasons, for the health and safety of our employees and for the good of our customers, that Amberwood Products, Inc. has developed this Fire Prevention program.

Your **FIRST** response in a fire must be to set off the alarm (if there is one) and **CALL 911**. Never assume that this is going to be done by someone else. The second is to leave the area if the fire is too big to handle. To deal with a small fire, you must know what class it belongs to (A, B, C, or D) based on the kind of material that is burning. Using the wrong type of extinguisher, or using one improperly, could result in additional property damage and/or injury.

The Three Essentials Elements:

Fire control of any ordinary fire depends on controlling one of the following essentials:

FUEL	FUEL can be paper, wood, oil, solvents, gas, and so on.
HEAT	HEAT is the degree necessary to vaporize fuel according to its nature.
OXYGEN	OXYGEN helps a fire to breathe. Normally at least 15% of the surrounding air must be made up of oxygen in order for a fire to continue to

burn. The greater the concentration of oxygen, the brighter the blaze and the more rapid the combustion.

Remove only one of these essentials and a fire can be extinguished by:

ISOLATING	Fuel control.
COOLING	Temperature and heat control.
SMOTHERING	Oxygen control.

In certain types of fires, the method of ***INTERRUPTING*** can be used to stop a chemical chain reaction that is helping the fire to burn.

KNOW WHAT YOU'RE DEALING WITH!

In general, there are four different classifications of fires. Knowing which kind you're dealing with will aid you in choosing the right type of fire extinguisher, as well the correct method for fighting the fire.

Class A Fires:

Generally, a Class A Fire consists of general combustibles such as wood, cloth, paper, or rubbish and is usually controlled by **cooling,** for instance by using water to cool the material.

When fighting a Class A fire, get as close to the fire as possible without endangering yourself, and aim the nozzle of the fire extinguisher toward the base of the flames. Continue spraying until all smoldering material is wet down. Deep-seated fires, such as those that occur in baled materials, must be thoroughly soaked and may have to be pulled apart to reach smoldering matter inside.

Another option for a Class A fire is to use a multipurpose dry-chemical extinguisher. With this type of extinguisher, start at the edge of the fire and spray in a sweeping motion. The powdered chemical in the extinguisher becomes sticky when heated, allowing it to form a film that clings to the heated material and **smothers** the fire.

Preventing Fires:

Knowing how to deal with a fire is important, but knowing how to prevent one is just as important. The following is a list of ways that every Amberwood Products, Inc. employee can help prevent fires:

* Know where fire extinguishers are kept, what each is for, and how to use them.

* Maintain a neat, clean work area, and prevent accumulation of rubbish.

* Put oil-soaked and paint-soaked rags in covered metal containers.

* Observe all "No Smoking" signs.

* Keep fire doors, exits, stairs, fire lanes, and fire-fighting equipment clear of obstructions.

* Keep all flammable materials away from furnaces or other sources of ignition.

* Report any fire hazards you see that are beyond your control, especially electrical hazards, which are the sources of many fires.

An Important Note about Combustibles:

Combustible materials and fumes from paint, solvents, and other flammable substances are responsible for many fires in industry. Fumes can reach out a considerable distance and become ignited by a furnace, stove, electrical equipment, or even a lit cigarette.

GENERAL BUSINESS INFORMATION

SECTION I
FACILITY IDENTIFICATION

Business Name: Amberwood Products, Inc.

Business / Site Address: 1555 S. 7th St., San Jose, CA 95112

Business Phone Number : 408-938-1600

Department of Fire Prevention	408-277-4363
Bay Area Air Quality Management District	800-334-6367
California Highway Patrol Headquarters	916-657-7261
Environmental Protection Agency (General Information)	916-445-3846
Poison Control Center	800-523-2222

FACILITY EMERGENCY COORDINATOR

The Facility Emergency Coordinator is the person designated in the Emergency Response Plan as the person responsible for coordinating all the emergency response measures at the facility. He/she is responsible for serving as liaison with the local emergency response personnel during an incident. Either he/she or his/her alternate must be available on a 24-hr basis. The **Program Administrator** is the **Emergency Coordinator** at **Amberwood Products, Inc.** and his/her duties include:

a) The Emergency Coordinator will have familiarity with the site, its layout, operations, and emergency response plan.

b) The Emergency Coordinator will have the authority to commit resources.

c) The Emergency Coordinator activates internal alarms to alert facility personnel of an actual or impending emergency.

d) The Emergency Coordinator notifies external emergency response forces when their assistance is required.

e) The Emergency Coordinator provides immediate information of discharged material and assessment of the possible hazards to human health and the environment outside the facility and the transmittal of the assessment to the appropriate authorities.

f) The Emergency Coordinator will take all reasonable measures to insure that the affected area does not spread to other areas.

g) If the facility shuts down, the Emergency Coordinator will maintain surveillance on other areas to insure that they are not affected.

PROCEDURES FOR EVACUATION OF FACILITY

In the event of an emergency, a **verbal alarm** will be sounded by the Emergency Coordinator or his/her alternate. The Emergency Coordinator will notify the occupants of the facility the nature of the emergency and instructions for response. If there is an emergency situation that requires an evacuation, the Emergency Coordinator will announce to all persons at the facility that there is an emergency. The initial response to any emergency will be to protect human safety and health then the environment.

The Emergency Coordinator will take the following steps in an emergency situation that requires an evacuation:

* Announce to all occupants of the facility that there is an emergency.

* Clear the corridor leading to the emergency exits. Direct the occupants to leave the facility through the designated emergency exits.

* Check all rooms of the facility to make sure that everyone has left, particularly those who may need assistance or those who did not hear the announcement.

* Assist anyone having difficulty leaving the facility area, or anyone who may be injured.

* Give instructions to move quickly but calmly. Have all personnel including any customers or visitors meet at the pre-arranged location outside the building.(see attached evacuation map)

* Account for all occupants of the facility at the time of the evacuation. This is the responsibility of the Emergency Coordinator.

* Re-entry to the facility will occur after the Emergency Coordinator has determined that the facility is safe to resume operations.

The Emergency Coordinator will be responsible for a successful evacuation. This will include providing training to employees who will be involved in the evacuation. It will be the policy of this facility to have personnel engaged in simulated training for the potential emergencies to assess the effectiveness of its response.

PROCEDURES FOR RESPONDING TO FIRE AND/OR EXPLOSION

The Emergency Coordinator will be on standby during all facility emergencies. If a fire should break out, a concentrated effort will be placed on preventing the fire from spreading to nearby areas. The fire fighting effort will be carried out by personnel trained in techniques used to fight fires until outside assistance has arrived. Fires involving hazardous materials may produce special health and safety risks and it is important to consult the Material Safety Data Sheets (MSDS) for unusual fire or explosion hazards and special fire fighting procedures.

The following actions will be taken in the areas affected by the fire or explosion:

* The area should be cleared of all personnel not actively involved in requirements.

* Regardless of the size or nature of fire, the Fire Department requires the facility to call **911**.

* The Emergency Coordinator will meet the arriving emergency response services and brief them on the location, size, and nature of the fire. This will include type of hazardous material involved.

Fire is always a potential hazard when spills of flammable material occurs. For this reason, all possible sources of ignition will be eliminated with this type of spill. **(see Procedures for Responding to a Chemical Spill or Release)** If a highly flammable material is released (e.g., propane or acetylene) where there is a potential for an explosion, all persons within a quarter-mile radius of the release will be notified. All ignition sources within this area will be eliminated. Use of motor vehicles will be restricted to avoid ignition of the vapor because it can cause a flashback to the source and a explosion or fire of even wider dimensions.

Fire fighting will not be done at the risk of injury to the personnel involved; however, early containment of fires can significantly decrease total damage.

Facility evacuation will be necessary in the case of a major fire or explosion. All facility personnel have been trained in evacuation procedure and know routes from their respective work areas.

The Emergency Coordinator will be responsible for all fire fighting efforts until outside help arrives. An "all clear" signal will be given when the fire has been extinguished and the safety of personnel is no longer endangered. All emergency equipment used in the emergency must be cleaned and fit for its intended use prior to resumption of operations at the facility.

IMMEDIATE REPORTING OF A RELEASE OR A THREATENED RELEASE GUIDELINES

(A) A person shall provide an immediate, verbal report of any release or threatened release of a hazardous material to **911-Emergency**, the **Santa Clara County Environmental Health (408) 299-6930** and then to **California Office of Emergency Services (800) 852-7550** as soon as :

(1) a person has knowledge of the release or threatened release
(2) notification can be provided without impeding immediate control of the release or threatened release; and
(3) notification can be provided without impeding immediate emergency medical measures

(B) The immediate reporting pursuant to subsection (a) of this section shall include, at a minimum :

(1) the exact location of the release or threatened release ;
(2) the name of the person reporting the release or threatened release
(3) the hazardous material involved in the release or threatened release
(4) an estimate of the quantity of hazardous materials involved ; and
(5) if known , the potential hazards presented by the hazardous material involved in the release or threatened release.

(C) The immediate reporting pursuant to subsection (a) of this section shall not be required if there is a reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety , property , or the environment.

The following criteria to use for determining if notifications need to be made by your business are recommended by the Office of Emergency Services :

(1) Quantity of released or potentially released material
(2) Offsite consequences
(3) Employee safety

(4) Public safety
(5) Environmental concerns
(6) Material type and condition of release (i.e. flammable liquid released into storm drain)

Extremely Hazardous Substances (EHS) which are released at the Reportable Quantity (RQ) or greater must be reported to Office of Emergency Services regardless of the circumstances surrounding the incident

If in doubt , please call Office of Emergency Services . The staff at the Office of Emergency Services will assist you in determining if the release is significant or not.

Businesses which fail to make proper notifications may be liable for up to $25,000 for each day of the violation, or by imprisonment in the county jail for not more than one year, or by both the fine and imprisonment.

PROCEDURES FOR RESPONDING TO A CHEMICAL SPILL OR RELEASE

In the event of a major emergency situation involving a chemical spill the following general procedures will be used by this facility for rapid and safe control of the area. If an employee discovers a chemical spill or a release of a hazardous substance, he/she will immediately report the incident to the facility Emergency Coordinator . When contacted, the Emergency Coordinator will obtain the following information:

* The material spilled or released.
* The location of the release or spillage of hazardous material.
* An estimate of the quantity and the rate at which it is being released.
* The direction in which the spill, vapor, or smoke release is headed.
* Any injuries involved.
* Fire and /or explosion or the possibility of these events occurring.
* The area and materials involved and the intensity of the fire or explosion.

This information will help the Emergency Coordinator assess the magnitude and the potential seriousness of the spill or release. If the accident is determined to be within the facility's emergency response capabilities, the Emergency Coordinator will contact and deploy the necessary facility personnel trained in hazardous material spill response. If the release is beyond the facility's capabilities, the Emergency Coordinator will contact appropriate emergency agencies (i.e., fire department).

The initial response to any emergency will be to protect human health and safety and then the environment. Identification, containment, treatments, and disposal assessment will be the secondary response.

The emergency response team must be prepared to handle the spill or release before it happens. The information contained on the Material Safety Data Sheets (MSDS) will give pertinent data on containment, hazards, cleanup and proper disposal. The response team is familiar with the information contained on the Material Safety Data Sheets ,and how to respond to a release of the hazardous materials located at the facility.

For large spills or releases of hazardous material, the following guidelines will be followed by the employees of the facility.

A. If a leak develops or spill occurs from a hazardous material container or storage tank, the person discovering the discharge will leave the area and contact the Emergency Coordinator. The Emergency Coordinator will obtain the following information:

* Person (s) injured and the seriousness of the injury.

* Location of the spill or leak, material involved and the source (tank, drum, etc.).

* The approximate amount spilled, an estimate of the liquid and/or gas discharge rate, and the direction the liquid flow or gaseous cloud is moving.

* Whether or not a fire is involved.

B. Next, the Emergency Coordinator will :

* Initiate evacuation of the hazard area. For small spills or leaks, isolate at least 50 feet in all directions. For large spills, initially isolate 100 feet in all directions and keep all persons upwind of spill.

* Dispatch emergency personnel to the site to take the appropriate action.

* Call the fire department if a fire is involved that cannot be extinguished by facility response personnel. Fight small fires with dry chemical, CO_2, or foam extinguishers (refer to MSDS). Keep heat exposed containers cooled with water spray and remove them from the fire if possible. **IF A**

RISING SOUND COMES FROM A VENTING DEVICE OR THE TANK BEGINS TO DISCOLOR. WITHDRAW FROM THE AREA IMMEDIATELY.

* Contact the proper authorities if the spill or release is large. Notify them of the seriousness of the release and whether any evacuation of nearby areas is necessary.

C. Cleanup personnel will:

* Make sure all unnecessary persons are removed from the hazard area.

* Put on protective clothing and equipment

* If flammable waste is involved, remove all ignition sources, and use spark and explosion proof equipment and clothing in containment and cleanup.

* If possible, try to stop the leak and perform special repairs.

* Remove all surrounding material that could be especially reactive with materials in the waste. Determine the major components in the hazardous material at the time of the spill.

* Use inert absorbent material to contain, divert and cleanup a spill if it has not been held by secondary containment or dike. Most spills held by a dike or secondary containment and be pumped back into the appropriate storage tank or drum.

* Place all containment materials and waste in drums for removal as hazardous waste. Use proper hazardous waste hauler and manifest procedures.

* If the spilled hazardous materials enter into the sewer system, the Emergency Coordinator will be responsible for notifying the Department of Public Works.

EARTHQUAKE RESPONSE

Earthquake:

The earth is divided into three main layers-a hard outer crust, a softer middle layer, and a central core. The crust is broken into massive, irregular pieces called "plates," which have been moving very slowly over the earth's surface for billions of years, driven by energy forces deep within the earth. It is this movement which has shaped the physical features of the earth-its mountains, valleys, plains, and plateaus. Earthquakes occur when these moving plates grind and scrape against each other.

On the Pacific Coast, two of these plates meet-the Pacific Plate and the North American Plate. The Pacific Plate consists of most of the Pacific Ocean floor and the Pacific coastline. The North American Plate comprises the North American continent and parts of the Atlantic Ocean floor.

The Pacific Plate grinds northwestward past the North American Plate at a rate of about 2 inches per year. Parts of Pacific fault system adapt to this movement by constant "creep," resulting in relatively frequent, but moderate, earth tremors. In other areas, movement is not constant, and strain can build up for hundreds of years, producing great earthquakes when it is finally released.

A damaging quake can occur virtually anywhere in the state. Earthquakes cannot be prevented; however, damage, destruction, and loss of life can be significantly reduced if all residents sufficiently prepare themselves, their homes, workplaces, and communities for a major earthquake.

Earthquake Injuries:

Movement of the ground is seldom the actual cause of death or injury. Injuries are commonly caused by:

* Building collapse or damage, such as toppling chimneys, falling bricks from wall facings and roof parapets, collapsing walls, falling ceiling plaster, light fixtures, and pictures.

* Flying glass from broken windows. (This danger may be greater in modern, high-rise structures.)

* Overturned bookcases.

* Fires from broken chimneys, and ruptured gas and electrical lines. The danger may be aggravated by a lack of water caused by broken mains.

* Fallen power lines.

* Drastic human actions resulting from fear.

PREPAREDNESS

Before an Earthquake:

Because earthquakes occur without warning, it's important to take steps to prepare constructive protective action to reduce damages and injuries from a potential earthquake. The following is part of the Amberwood Products, Inc.'s earthquake preparedness:

* Since defective electrical wiring and leaky gas or inflexible connections are very dangerous in the event of an earthquake. All defective electrical wiring and/or leaky gas pipes should be fixed immediately. Furthermore, all inflexible lines will be identified and retrofitted.

* The Program Administrator has identified the locations and is prepared to shut off electricity, gas, and water at main switches and valves.

* At Amberwood Products, Inc. we place large heavy objects on lower shelves. Securely fasten shelves to walls. Brace or anchor high or top-heavy objects.

* Bottled chemicals, glass, and other breakables are stored in low or closed cabinets. Deep plaster cracks in ceilings and foundations will be investigated and repaired.

During an Earthquake:

The following instruction should be followed by all Amberwood Products, Inc. employees at the time of an earthquake to reduce injuries and damages:

* First and foremost, stay calm. Think through the consequences of any action you take.

* If you are inside, stay inside; if you are outdoors, stay there. In earthquakes, most injuries occur as people are entering or leaving buildings.

* If outdoors, move away from buildings and utility wires. The greatest danger from falling debris is just outside doorways and close to outer walls. Once in the open, stay there until the shaking stops.

* If in a moving car, stop as quickly as safety permits, but stay in the vehicle. A car may jiggle violently on its springs, but it is a good place to stay until the shaking stops. When you drive on, watch for hazards created by the earthquake, such as fallen or falling objects, downed electric wires, or broken or undermined roadways.

* If indoors, take cover under a heavy desk, table, bench, in a supported doorway, or along an inside wall. Stay away from glass. Don't use candles, matches, or other open flame either during or after the tremor because of possible gas leaks. Douse all fires.

In short when an earthquake strikes:

Duck, Cover & Hold

DUCK DUCK or drop down to the floor.

COVER Take COVER under a sturdy desk, table, or other furniture. If that is not possible. Seek COVER against an interior wall and protect your head and neck with your arms. Avoid danger spots near windows, hanging objects, mirrors, or tall furniture.

HOLD If you take cover under a sturdy piece of furniture, HOLD on to it and be prepared to move with it. HOLD the position until the ground stops shaking and it is safe to move.

After the Earthquake:

After an earthquake, be prepared for additional earthquake shocks called "aftershocks." Although most of these are smaller than the main shock, some may be large enough to cause additional damage or bring weakened structures down.

When it feels safe after the earthquake, the following steps should be taken:

* It will be the responsibility of the emergency coordinator or the alternate to initiate the emergency response procedures. The emergency coordinator will first make a quick assessment of the damage to the facility. If it has been determined to be unsafe, it will be necessary to follow evacuation procedures to the predetermined location (see evacuation procedures). The emergency coordinator to help in the evacuation.

* Seriously injured persons should not be removed unless they are in the immediate danger of further injury.

* Check the utilities. The earthquake may break gas, electrical, and water lines. If there is a gas odor, windows should be opened and main gas valve will be shut off. Employees leave the building and

report the leakage to authorities. Employees should not reenter the building until a utility official says its it safe. If electrical wiring is shorting out, electricity should be shut off at the main meter box. If water pipes are damaged, main valve should be shut off. Emergency water may be obtained from hot water tanks, toilet tanks (not bowls), and melted ice cubes.

* Check to see that sewage lines are intact before using sanitary facilities.

* Do not touch downed power lines or objects in contact with downed lines.

* If possible, assess damage to storage areas, especially where hazardous chemicals, hazardous waste and compressed gas cylinders are located.

* Immediately clean up spilled chemicals, flammable liquids, and other potentially hazardous materials, if possible. Procedures for these responses are available in other sections of this Emergency Response Plan. Take corrective action whenever possible. Assume that demand for emergency medical, fire fighting, and other governmental services will be overwhelmed and will be unable to respond.

* Use the telephone only for genuine emergency calls.

* Don't spread rumors, they often do great harm after disasters.

* Stay away from damage areas. Your presence could hamper emergency relief efforts and you could be putting yourself in personal danger. Cooperate fully with public safety officials. Respond to requests for volunteer assistance from police, fire fighting, civil defense, and relief organizations, but do not go in to damaged areas unless your assistance has been requested.

Information from emergency broadcasting will be helpful to assess damage to utilities, communication lines, and transportation routes. It may be necessary to remain at the facility until it is feasible for employees to return home safely.

EMERGENCY RESPONSE AND SAFETY EQUIPMENT

Equipment Schedule	Location	Inspection
Spill Control Equipment: a) inert absorbents b) disposal drum c) barrier tape/hazard cones d) broom and scoop	see facility map	check weekly
Personal Protective Equipment a) neoprene gloves b) chemical splash goggles c) coveralls d) respirators (NIOSH)	In shop	check weekly
First Aid Equipment a) first aid kit b) eye wash	see facility map	checked periodically by medical supplier
Fire extinguishers	see facility map	check monthly (certified yearly)
Communication Devices a) telephones	office	check daily

EMPLOYEE TRAINING REQUIREMENTS

A) Facility personnel must successfully complete a program of training that teaches them to perform their duties in a way that ensures the facility's compliance with the requirements.

B) This program is directed by a person trained in hazardous materials management procedures and must include instruction relevant to the positions which they are employed.

C) At a minimum, the training program must be designed to ensure that facility personnel are able to respond effectively to emergencies.

D) Facility personnel must successfully complete the program within six months after the effective date of their employment or assignment to a facility, or to a new position at the facility.

E) Facility personnel must take part in an annual review of the initial training.

F) The owner or operator must maintain the following documents at the facility:

(1) Records documenting that the training or job experience requirements have been met.

(2) The job title for each position related to hazardous material management, and the name of the employee;

(3) A written description of the type and amount of both introductory and continuing training that will be given to each person.

G) Training records on current personnel must be kept until closure of the facility. Training records on former employees must be kept for at least three years from the date the employee last worked at the facility.

NEW EMPLOYEE TRAINING

Section 3220 of the California Code of Regulations Title 8 states:

(e) Training

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,
(B) Whenever the employee's responsibilities or designated actions under the plan change, and
(C) Whenever the plan is changed.

Section 3221 of the California Code of Regulations Title 8 states:

(d) Training

(1) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

(2) The employer shall review with each employee upon initial assignment those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review. For those employers with 10 or fewer employees the plan may be communicated orally to employees and the employer need not maintain a written plan.

The following contains new employee training documentation forms, per above mentioned requirements.

EMPLOYEE TRAINING FORM
Per Requirements of
Emergency & Fire Prevention Plan

Business Name:	Business Address:
Amberwood Products, Inc.	**1555 S. 7th St., San Jose, CA 95112**
Employee's Name:	Training Date:
Department:	Trained By: **ECR (800) 800-7644**

Subjects Covered:

1) Location / content of facility Emergency & Fire Prevention Plan.

2) Procedure for internal alarms and facility personnel notification of emergencies.

3) Evacuation and re-entry procedures.

4) Procedures for responding to fire or explosion involving hazardous material.

5) Emergency response equipment.

6) Procedures for responding to an earthquake.

7) Procedures for mitigation of chemical spills & material releases.

8) Operation shut-down procedures.

I hereby certify that I have received the above mentioned training.

Employee's Signature :_____ Date :_____

REFRESHER TRAINING

Section 3221 of the California Code of Regulations Title 8 states:

(e) Training

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,
(B) Whenever the employee's responsibilities or designated actions under the plan at the following times:
(C) Whenever the plan is changed.

The following contains new employee training documentation forms, per above mentioned requirements.

QUARTERLY SELF INSPECTION

Sections 3220 & 3221 of the California Code of Regulations Title 8 require:

The Emergency & Fire Prevention Plan be reviewed periodically and updated to maintain adequate response personnel and program efficiency.

The following **QUARTERLY SELF-INSPECTION** checklist has been provided to insure compliance with the various regulatory requirements concerning emergency planning .

QUARTERLY INSPECTION CHECKLIST

Amberwood Products, Inc.

Emergency & Fire Prevention Plan	**Yes**	**No**
a) The plan is up to date	____	____
b) All employees have received training	____	____
c) All employees have received the annual refresher	____	____
d) All employees have signed the training roster	____	____
e) Other	____	____

Fire Protection		
a) Extinguishers are mounted in accessible locations	____	____
b) Extinguishers are inspected and recharged annually	____	____
c) Combustible scrap, debris and waste are stored in an approved metal container	____	____
d) All exit routes are free of obstructions	____	____
e) Other	____	____

Housekeeping		
a) All areas are clean and orderly	____	____
b) Food and beverage are stored and consumed away from hazardous materials	____	____
c) Eyewash / showers are checked periodically	____	____
d) Are all worksites clean and orderly ?	____	____
e) Are work surfaces kept dry, or appropriate means taken to assure the surfaces are slip-resistant?	____	____
f) Are all spilled materials or liquids cleaned up immediately ?	____	____
g) Are the minimum number of toilets and washing facilities provided ?	____	____
h) Are all work areas adequately illuminated ?	____	____
i) Other	____	____

First Aid		
a) If medical and first aid facilities are not in proximity of the work place, is at least one employee on each shift currently qualified to render first aid ?	____	____
b) Are medical personnel readily available for advice and consultation on matters of employee health ?	____	____
c) Are emergency phone numbers posted ?	____	____
d) Are first aid kits easily accessible to each work area, with necessary supplies available, periodically inspected and replenished as needed ?	____	____
e) Have first aid kits supplies been approved by a physician, indicating they are adequate for a particular area or operation ?	____	____
f) Are aisles and passageways kept clear ?	____	____
g) Are aisles and walkways marked as appropriate ?	____	____

Hazardous Material Storage	**Yes**	**No**
a) Inventory is up to date	____	____
b) Material Safety Data Sheets are available	____	____
c) Facility map is up to date	____	____
d) All hazardous materials / waste are properly labeled	____	____
e) All hazardous materials are capped when not in use	____	____
f) Incompatible materials are segregated to prevent accidental mixing (acid / base / poison / flammable)	____	____
g) Oxidizers are separated from flammable materials	____	____
h) Hazardous materials / waste adequately contained	____	____
i) Compressed gas cylinders are clearly labeled	____	____
j) Compressed gas cylinders are properly secured	____	____
k) Compressed gas cylinders are capped when not in use	____	____
l) Oxygen and fuel gas cylinders are stored 20' apart or with a one hour fire wall	____	____
m) Hazardous materials storage area are clearly marked	____	____
n) Flammable liquids greater than 10 gallons are stored in an approved Flammable Storage Cabinet	____	____
o) Flammable liquid dispensing equipment is properly grounded	____	____
p) Containers of hazardous materials are properly stacked and stored		
1) Materials under 30 gallons are stacked no greater than two container high	____	____
2) Materials greater than 30 gallons are stacked no more one container high	____	____
3) Containers are stored in upright condition	____	____
q) There is 36" of clearance around all electrical shutoffs	____	____
r) Spill equipment is available and in a ready condition	____	____
s) Other	____	____

NOTICE OF FIRE AND SAFETY HAZARDS AND/OR PERMITS REQUIRED:
You are hereby notified that an inspection of your premises has disclosed that the following permits are required and/or that corrections are required for the following violations of the following provisions of Title 19, Title 23, Title 24, or Title 25 of the California Code of Regulations, Chapter 6.7 and 6.95 of the California Health and Safety Code, or the San Jose Municipal Code.

CODE SECTION	P/V	DESCRIPTION	APPR	DATE
	V	Update / Correct HMIS for marking ~~to~~ paint / spray paints. Distad 4,000 gallons + 3 cabinets of aerosols Bldg N		9/28/05
Bldg O	→	Note: Removed HCL from flammable cabinet + ~~on~~ Unlabeled 1 gallon container in cabinet		
	J	Note: Warehouse - Correct NFPA placard "3" for ~~the~~ flammable but only motor oil + few aerosols		
		Reinspect Wednesday 9/28/05		
		Excellent facility housekeeping		

TIME | DATE | BILL? Y/N | O C C INIT | NO FEE

ORDER TO COMPLY:

As such conditions are contrary to law, you are hereby required to correct said conditions immediately upon receipt of this notice.

An inspection to determine whether or not you have complied with this notice will be conducted on or after _____ days.

Failure to comply with the foregoing order by the date of reinspection may cause a **CITATION** to be issued for the penalties provided by law for such violations and may also render you liable for all suppression costs that might occur in the event of a fire.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility…		If Yes, please complete these pages of the UPCF…
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☐ YES ☒ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6.	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ☒ NO 7.	UST TANK (closure portion – one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: —any tank capacity is greater than 660 gallons, or —the total capacity for the facility is greater than 1,320 gallons?	☐ YES ☒ NO 8.	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE 1. Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY (Formerly DTSC Forms 1772)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12.	ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L) CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR Page ___ of ___

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☒ Other *(specify)* **PA System: Dial 87 for Bldg "K", Dial 89 for Shop**

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. **Post-Incident Contacts*:**

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4656**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 299-6930**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Bay Area Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center			Phone No. **(800) 876-4766**
Nearest Hospital:	Name:	**Regional Medical Center of San Jose**	Phone No.: **(408) 259-5000**
	Address:	**225 N Jackson Ave**	City: **San Jose, CA**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

43-060-462312

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☒ Cartridge Respirators	Bldg "L"	Both 1/2 and Full-Face respirators
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☒ Chemical Protective Boots	Bldg "L"	
	☒ Chemical Protective Gloves	Bldg "L"	
	☒ Chemical Protective Suits *(describe)*	Bldg "L"	Kappler polyethylene lined suits
	☒ Face Shields	Bldg "L"	
	☒ First Aid Kits/Stations *(describe)*	Bldg "L"	Complete kits are located in each building
	☒ Hard Hats		
	☐ Plumbed Eye Wash Stations		
	☒ Portable Eye Wash Kits *(i.e. bottle type)*	Bldg "N"	Located on the site map
	☒ Respirator Cartridges *(describe)*	Bldg "L"	North "Defender" cartridges
	☒ Safety Glasses/Splash Goggles	Bldg "L"	
	☒ Safety Showers	Bldg "N"	Shop bathroom
	☐ Self-Contained Breathing Apparatuses (SCBA)		
	☐ Other *(describe)*		
Fire Extinguishing Systems	☒ Automatic Fire Sprinkler Systems		
	☐ Fire Alarm Boxes/Stations		
	☒ Fire Extinguisher Systems *(describe)*	All bldgs	Hand held extinguishers for small fires
	☐ Other *(describe)*		
Spill Control Equipment and Decontamination Equipment	☒ Absorbents *(describe)*	Bldg "L"	Per facility map, for oil and acid
	☒ Berms/Dikes *(describe)*	Bldg "L"	Containment materials, as per facility map
	☐ Decontamination Equipment *(describe)*		
	☐ Emergency Tanks *(describe)*		
	☐ Exhaust Hoods		
	☐ Gas Cylinder Leak Repair Kits *(describe)*		
	☐ Neutralizers *(describe)*		
	☐ Overpack Drums		
	☐ Sumps *(describe)*		
	☐ Other *(describe)*		
Communications and Alarm Systems	☐ Chemical Alarms *(describe)*		
	☒ Intercoms/ PA Systems	All bldgs	Placed throughout the building
	☒ Portable Radios	All bldgs	Nextel radios are carried by each supervisor
	☒ Telephones	All bldgs	Placed throughout the building
	☐ Underground Tank Leak Detection Monitors		
	☐ Other *(describe)*		
Additional Equipment *(Use Additional Pages if Needed.)*	☐		
	☐		
	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

43-060-402312

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

- ☒ Internal alarm/notification *
- ☒ Evacuation/re-entry procedures & assembly point locations*
- ☒ Emergency incident reporting
- ☒ External emergency response organization notification
- ☒ Location(s) and contents of Emergency Response/Contingency Plan
- ☒ Facility evacuation drills, that are conducted at least *(specify)* Annually, as a minimum *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

- ☒ Safe methods for handling and storage of hazardous materials *
- ☒ Location(s) and proper use of fire and spill control equipment
- ☒ Spill procedures/emergency procedures
- ☒ Proper use of personal protective equipment *
- ☒ Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
- ☒ **Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

- ☐ Personnel rescue procedures
- ☒ Shutdown of operations
- ☒ Liaison with responding agencies
- ☒ Use, maintenance, and replacement of emergency response equipment
- ☒ Refresher training, which is provided at least annually *
- ☒ Emergency response drills, which are conducted at least *(specify)* Annually, as a minimum *(e.g. "Quarterly", etc.)*

43-060-402312

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

- ☒ Current employees' training records *(to be retained until closure of the facility)* *
- ☒ Former employees' training records *(to be retained at least three years after termination of employment)* *
- ☒ Training Program(s) *(i.e. written description of introductory and continuing training)* *
- ☒ Current copy of this Emergency Response/Contingency Plan *
- ☒ Record of recordable/reportable hazardous material/waste releases *
- ☒ Record of hazardous material/waste storage area inspections *
- ☒ Record of hazardous waste tank daily inspections *
- ☒ Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

- ☒ We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
- ☐ We will use our own documents to record inspections. ***(A blank copy of each document used is attached to this HMBP.)***

43-060-402312

CAL-AIR
WEEKLY HAZARDOUS WASTE SITE INSPECTION

Date _____ Inspectors Name _____

#	Description	YES √	NO √	Corrective Actions / Comments
1	Verify weekly site inspections for signs of leaks, open containers, spills, corrosion, or other deterioration are documented.			
2	Inspect emergency spill control, containment and PPE equipment, fire extinguisher and emergency eyewash. Verify sufficient types and quantities for existing hazards.			
3	Inspect housekeeping in buildings, equipment and storage areas.			
4	Inspect containment and surrounding areas for signs of chemical spills.			
5	Verify accumulation area is controlled (locked) and that access is limited to authorized personnel.			
6	Verify area is neat and orderly and minimize the potential for spills or fire.			
7	Containers shall be kept closed when not in use.			
8	Inspect chemical waste containers for no visible sign of contamination.			
9	Verify Hazardous Waste containers are placed on secondary containment and that secondary containment is kept clean.			
10	Verify Hazardous Waste containers have not been accumulated for more than 90 days.			
11	Inspect containers to verify Hazardous Waste labels include the following proper information. Company information Facility EPA I.D number Manifest document number EPA waste number / CA waste number Accumulation start date			
12	Verify waste is separated by hazard class and that incompatibles are separated.			

43-060-402312

CAL-AIR
HAZARDOUS WASTE ACCUMULATION SITE INSPECTION

Month _____ Inspectors Name _____

#	Description	YES √	NO √	Corrective Actions / Comments
1	Verify hazardous waste signs with 1" lettering are posted outside containment area, verify emergency numbers are posted. Verify Universal Waste Accumulation area is labeled as such.			
2	Verify weekly site inspections for signs of leaks, open containers, spills, corrosion, or other deterioration are documented.			
3	Observe waste management practices including containment, storage and labeling.			
4	Inspect emergency spill control, containment and PPE equipment, fire extinguisher and emergency eyewash. Verify sufficient types and quantities for existing hazards.			
5	Verify MSDS book and the facilities Emergency Action Plan are available, current and complete.			
6	Inspect housekeeping in buildings, equipment and storage areas.			
7	Inspect containment and surrounding areas for signs of chemical spills.			
8	Verify accumulation area is controlled (locked) and that access is limited to authorized personnel.			
9	Verify area is neat and orderly and minimize the potential for spills or fire.			

43-060 -462312

10	Inspect containers are in good condition and the correct type for the waste being accumulated.			
11	Containers shall be kept closed when not in use.			
12	Containers shall not be opened handed, transferred or stored in a manner that might rupture the container and cause a leak.			
13	Containers must have at least 10% headspace to compensate for expansion.			
14	Observe dispensing practice and verify they do not increase the risk of a spill.			
15	Inspect chemical waste containers for no visible sign of contamination.			
16	Verify Hazardous Waste containers are placed on secondary containment and that secondary containment is kept clean.			
17	Verify secondary containment is sufficient to contain 110% of the accumulation of a single container and 150% if more than one container is stored.			
19	Verify Hazardous Waste containers have not been accumulated for more than 90 days.			
20	Inspect containers to verify Hazardous Waste labels include the following proper information. Company information Facility EPA I.D number Manifest document number EPA waste number / CA waste number Accumulation start date Physical state / hazardous property DOT shipping name / un number			
21	Verify waste is separated by hazard class and that incompatibles are separated.			
21	Verify flammable rags are accumulated in Flammable Rag storage cans.			
23	Review Hazardous Waste Manifest. Verify employees signing for waste have been trained.			

43-060-402312

24	Hazardous Waste Manifest Verify page 8 is maintained on site. Verify page 7 is sent to the DTSC (within 30 day) Verify page 6 is sent to the waste destination state (where applicable).			
	Annual Verifications			
1	Verify any new waste streams have been properly characterized.			
2	Verify hazardous waste handlers have been RCRA trained.			
3	Verify Hazardous Waste Contingency Plan is current and that a copy has been sent to the city CUPA or local fire department.			
4	Verify record keeping is maintained for 3 years			
5	Verify the facility has attempted to make contact with local emergency services to apprise them of the facility and potential emergency situations.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility...		If Yes, please complete these pages of the UPCF...
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY - CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☐ YES ☒ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6.	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ☒ NO 7.	UST TANK (closure portion - one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	☐ YES ☒ NO 8.	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE 1. Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER - provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per H&SC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT - FACILITY (Formerly DTSC Forms 1772) ONSITE HAZARDOUS WASTE TREATMENT - UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)

E. LOCAL REQUIREMENTS 15.

(You may also be required to provide additional information by your CUPA or local agency.)

APPROVED FOR COMPLIANCE WITH HAZ MAT REQUIREMENTS.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☒ Other *(specify)* **PA System: Dial 87 for Bldg "K", Dial 89 for Shop**

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4656**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 299-6930**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Bay Area Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Center**	Phone No.: **(408) 977-4666**
	Address: **675 East Santa Clara**	City: **San Jose, CA**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☒ Cartridge Respirators	Bldg "L"	Both 1/2 and Full-Face respirators

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☒	Emergency incident reporting
☒	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☒	Facility evacuation drills, that are conducted at least *(specify)* Annually, as a minimum *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☒	Shutdown of operations
☒	Liaison with responding agencies
☒	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☒	Emergency response drills, which are conducted at least *(specify)* Annually, as a minimum *(e.g. "Quarterly", etc.)*

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒ Current employees' training records *(to be retained until closure of the facility)* *
☒ Former employees' training records *(to be retained at least three years after termination of employment)* *
☒ Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒ Current copy of this Emergency Response/Contingency Plan *
☒ Record of recordable/reportable hazardous material/waste releases *
☒ Record of hazardous material/waste storage area inspections *
☒ Record of hazardous waste tank daily inspections *
☒ Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒ We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
☐ We will use our own documents to record inspections. ***(A blank copy of each document used is attached to this HMBP.)***

Cal-Air, Inc.
Hazardous Materials Business Plan
Safety Training Topics

To All Employees:

As required by state law: Any company that has or uses hazardous materials (in any form) must complete a "Hazardous Materials Business Plan" (HMBP). The main goal of the HMBP is to promote safety by enforcing appropriate storage of hazardous materials through implementation of the fire codes. In addition, this document can provide valuable information (regarding chemical storage issues) to both employees and outside agencies, including emergency responders, in case of a real emergency. For most jurisdictions, the local fire department oversees the management of this plan.

On 11/1/02, the San Jose Fire Department, Hazardous Materials Division completed an audit of our facility. Everything considered, we were in very good shape. Actually, "better than most" according to our inspector. However, we still have some issues that need to be addressed, and we are currently in the process of correcting the items. This training is a portion of the responsibilities outlined within our HMBP.

Additionally, all Hazardous Materials Business Plans are considered "public record." Copies of our plan are available for review and two (2) have been provided today.

I. Emergency Response/Contingency Plan:

A. Evacuation Plan: (Tab #3)

1. Type of Alarm Signal:
   a. Verbal
   b. Public Address System

2. All Emergency Evacuation Maps are posted near each doorway. This identifies the route to the assembly location, for a roll count of all employees.

B. Emergency Contact Telephone Numbers: (Tab #3)

1. Emergency Contacts

2. Post-Incident Contacts

3. Emergency Resources

C. Arrangements With Emergency Responders: (Tab #3)

Currently, Cal-Air, Inc. does not have any special arrangement(s) with any emergency responders.

D. Emergency Procedures: (Tab #3)

The Shop Superintendent will coordinate our response to an imminent or actual emergency. Safety Services, in conjunction with the Operation Managers or Production Manager will assist on an "as needed" basis.

E. **Post-Incident Reporting/Recording: (Tab #3)**

Cal-Air, Inc. is required to report any hazardous materials incident that mandates implementation of the HMBP. Normally, events need to be reported within 15 working days to the appropriate agencies.

F. **Emergency Equipment: (Tab #3)**

Please note the location of the Personal Protective Equipment, Fire Extinguishers, Spill Control Equipment, and Communication Items, which may be needed for an emergency event.

II. Employee Training Plan:

A. **Personnel: (Tab #4)**

1. **Internal Alarm/Notification.**

2. **Evacuation/Re-entry Procedures & Assembly Point Locations.**

3. **Emergency Incident Reporting.**

4. **External Emergency Response Organization Notification.**

5. **Location(s) and Contents of the Emergency Response/Contingency Plan.**

6. **Facility Evacuation Drills, which need to be conducted at least annually.**

B. Chemical Handlers: (Tab #4)

1. Safe Methods of Handling and Storage of Hazardous Materials.

2. Location(s) and proper use of Fire Extinguishers and Spill Containment Equipment.

3. Spill Procedures and/or Emergency Procedures.

4. Use of Personal Protective Equipment.

5. Specific Hazard(s) using the MSDS as a source of information.

C. Emergency Response Team Members: (Tab #4)

1. Shutdown of Operations.

2. Liaison with Responding Agencies.

3. Use, Maintenance, and Replacement of Emergency Response equipment.

4. Refresher Training, which needs to be conducted at least annually.

5. Emergency Response Drills, which need to be conducted at least annually.

III. Recordkeeping:

A. Current Employees' Training Records (which need to be retained until facility closure). (Tab #5)

B. Former Employees' Training Records (which need to be retained three (3) years after termination of employment. (Tab #5)

D. Training Program(s), (i.e. this training program): (Tab #5)

E. Current copy of this Emergency Response/Contingency Plan: (Tab #5)

F. Records of Recordable/Reportable Hazardous Materials Incidents Releases: (Tab #5)

G. Records of Hazardous Materials/Waste Storage Area Inspections: (Tab #5)

H. Records of Daily Inspections of the Hazardous Waste Tank(s): (Tab #5)

I. Description and Documentation of Facility Emergency Response Drills: (Tab #5)

J. Cal-Air, Inc. uses the "Hazardous Materials/Waste Storage Area Inspection Form" (Document Number UN-023): (Tab #5)

IV. Hazardous Material/Waste Aboveground Storage Area Inspection Form: (Tab #6)

The Shop Superintendent conducts Inspection of the Waste Storage Areas.

V. General Facility Buildings Layout Plans

Tab #7 of the HMBP indicates a general layout of the facility buildings, and their associated utility connections. Other buildings are labeled accordingly:

Tab #8	**Building "L"**
Tab #9	**Building "M"**
Tab #10	**Building "N"**
Tab #11	**Building "O"**
Tab #12	**Building "Warehouse"**

VI. Chemical Storage Maps, with Itemized List of Chemicals

See each tab associated with each particular building. As noted:

Tab #8	**Building "L"**
Tab #9	**Building "M"**
Tab #10	**Building "N"**
Tab #11	**Building "O"**
Tab #12	**Building "Warehouse"**

VII. Material Safety Data Sheets (MSDS)

The MSDS Sheets are located in the main office. Each building has an individual MSDS book for easy access to any needed MSDS sheets.

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies.
This facility may be subject to reinspection at any time. Consent to Inspect Given By: John Ball

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Focused inspection in response to call from Rachael Remy-Curtis of San Jose Fire Dept. noting liquid in containers that appeared to be paint related/thinner that were in garage (roll off).	
	Roll off container and 1x5 gal container were photographed & marked with quarantine labels and evidence tape.	
	Waste may not be added or removed from either of these items. Neither item may be moved.	
	Notice of Quarantine rules (Notification of Order of Quarantine) left with facility.	
	Facility was advised of rules of quarantine and rights of appeal	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

NOTIFICATION OF ORDER OF QUARANTINE

Pursuant to California Health and Safety Code (HSC), Division 20, Chapter 6.5, Article 8, Section 25187.6(b), upon issuing an order of quarantine pursuant to Section 25187.6(a), the owner of the hazardous waste or the owner or lessee of the vehicle in which the hazardous wastes are transported must be notified of all of the following:

(1) The hazardous waste has been subject to a quarantine order because the hazardous waste is, or is suspected of being, stored, transported, disposed of, or handled in violation of this chapter.

(2) No person shall remove, transfer, or dispose of the hazardous waste until permission for removal, transfer, or disposal is given by an authorized agent of the department or by a court.

(3) The person so notified may request, and shall be granted, an immediate hearing before a person designated by the director to review the validity of the authorized agent's order. For purposes of this section, an immediate hearing shall be held within 24 hours after a hearing is requested by the person subject to the order.

Per HSC Section 25187.6(c), any order of quarantine issued pursuant to Section 25187.6(a) shall take effect upon issuance and shall remain effective for 30 days thereafter, until an authorized agent removes the quarantine order pursuant to Section 25187.6(d), or until the quarantine order is revoked pursuant to a hearing conducted in accordance with Section 25187.6(b)(3), whichever event occurs first.

Note: If you have any questions regarding this Order of Quarantine, contact the Santa Clara County Department of Environmental Health's Hazardous Materials Compliance Division at (408) 918-3400 and ask to speak to the Hazardous Materials Program Manager.

FILE NO. 40/205

FACILITY EMERGENCY COORDINATOR

The Facility Emergency Coordinator is the person designated in the Emergency Response Plan as the person responsible for coordinating all the emergency response measures at the facility. He/she is responsible for serving as liaison with the local emergency response personnel during an incident. Either he/she or his/her alternate must be available on a 24-hr basis. The **Program Administrator** is the **Emergency Coordinator** at **Amberwood Products, Inc.** and his/her duties include:

a) The Emergency Coordinator will have familiarity with the site, its layout, operations, and emergency response plan.

b) The Emergency Coordinator will have the authority to commit resources.

c) The Emergency Coordinator activates internal alarms to alert facility personnel of an actual or impending emergency.

d) The Emergency Coordinator notifies external emergency response forces when their assistance is required.

e) The Emergency Coordinator provides immediate information of discharged material and assessment of the possible hazards to human health and the environment outside the facility and the transmittal of the assessment to the appropriate authorities.

f) The Emergency Coordinator will take all reasonable measures to insure that the affected area does not spread to other areas.

g) If the facility shuts down, the Emergency Coordinator will maintain surveillance on other areas to insure that they are not affected.

FILE NO. 40/205

h) After the emergency is over, the Emergency Coordinator will provide for clean-up, treatment and disposal of affected materials and insure that no hazardous materials are discharged.

i) Prior to resuming operations, the Emergency Coordinator will submit all required reports to the appropriate authorities within specified time.

j) The Emergency Coordinator will be responsible for pre-emergency contacts with emergency services to familiarize them with the layout of the facility, nature of operations, and the type of hazardous material handled.

FILE NO. 40/205

PROCEDURES FOR EVACUATION OF FACILITY

In the event of an emergency, a **verbal alarm** will be sounded by the Emergency Coordinator or his/her alternate. The Emergency Coordinator will notify the occupants of the facility the nature of the emergency and instructions for response. If there is an emergency situation that requires an evacuation, the Emergency Coordinator will announce to all persons at the facility that there is an emergency. The initial response to any emergency will be to protect human safety and health then the environment.

The Emergency Coordinator will take the following steps in an emergency situation that requires an evacuation:

* Announce to all occupants of the facility that there is an emergency.

* Clear the corridor leading to the emergency exits. Direct the occupants to leave the facility through the designated emergency exits.

* Check all rooms of the facility to make sure that everyone has left, particularly those who may need assistance or those who did not hear the announcement.

* Assist anyone having difficulty leaving the facility area, or anyone who may be injured.

* Give instructions to move quickly but calmly. Have all personnel including any customers or visitors meet at the pre-arranged location outside the building.(see attached evacuation map)

* Account for all occupants of the facility at the time of the evacuation. This is the responsibility of the Emergency Coordinator.

* Re-entry to the facility will occur after the Emergency Coordinator has determined that the facility is safe to resume operations.

FILE NO. 40/205

The Emergency Coordinator will be responsible for a successful evacuation. This will include providing training to employees who will be involved in the evacuation. It will be the policy of this facility to have personnel engaged in simulated training for the potential emergencies to assess the effectiveness of its response.

FILE NO. 407205

PROCEDURES FOR RESPONDING TO FIRE AND/OR EXPLOSION

The Emergency Coordinator will be on standby during all facility emergencies. If a fire should break out, a concentrated effort will be placed on preventing the fire from spreading to nearby areas. The fire fighting effort will be carried out by personnel trained in techniques used to fight fires until outside assistance has arrived. Fires involving hazardous materials may produce special health and safety risks and it is important to consult the Material Safety Data Sheets (MSDS) for unusual fire or explosion hazards and special fire fighting procedures.

The following actions will be taken in the areas affected by the fire or explosion:

* The area should be cleared of all personnel not actively involved in requirements.

* Regardless of the size or nature of fire, the Fire Department requires the facility to call **911**.

* The Emergency Coordinator will meet the arriving emergency response services and brief them on the location, size, and nature of the fire. This will include type of hazardous material involved.

Fire is always a potential hazard when spills of flammable material occurs. For this reason, all possible sources of ignition will be eliminated with this type of spill. **(see Procedures for Responding to a Chemical Spill or Release)** If a highly flammable material is released (e.g., propane or acetylene) where there is a potential for an explosion, all persons within a quarter-mile radius of the release will be notified. All ignition sources within this area will be eliminated. Use of motor vehicles will be restricted to avoid ignition of the vapor because it can cause a flashback to the source and a explosion or fire of even wider dimensions.

Fire fighting will not be done at the risk of injury to the personnel involved; however, early containment of fires can significantly decrease total damage.

FILE NO. 40/205

Facility evacuation will be necessary in the case of a major fire or explosion. All facility personnel have been trained in evacuation procedure and know routes from their respective work areas.

The Emergency Coordinator will be responsible for all fire fighting efforts until outside help arrives. An "all clear" signal will be given when the fire has been extinguished and the safety of personnel is no longer endangered. All emergency equipment used in the emergency must be cleaned and fit for its intended use prior to resumption of operations at the facility.

FILE NO. 40/205

IMMEDIATE REPORTING OF A RELEASE OR A THREATENED RELEASE GUIDELINES

(A) A person shall provide an immediate, verbal report of any release or threatened release of a hazardous material to **911-Emergency**, the **Santa Clara County Environmental Health (408) 299-6930** and then to **California Office of Emergency Services (800) 852-7550** as soon as :

(1) a person has knowledge of the release or threatened release
(2) notification can be provided without impeding immediate control of the release or threatened release; and
(3) notification can be provided without impeding immediate emergency medical measures

(B) The immediate reporting pursuant to subsection (a) of this section shall include, at a minimum :

(1) the exact location of the release or threatened release ;
(2) the name of the person reporting the release or threatened release
(3) the hazardous material involved in the release or threatened release
(4) an estimate of the quantity of hazardous materials involved ; and
(5) if known , the potential hazards presented by the hazardous material involved in the release or threatened release.

(C) The immediate reporting pursuant to subsection (a) of this section shall not be required if there is a reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety , property , or the environment.

The following criteria to use for determining if notifications need to be made by your business are recommended by the Office of Emergency Services :

(1) Quantity of released or potentially released material
(2) Offsite consequences
(3) Employee safety

FILE NO. 40/205

(4) Public safety
(5) Environmental concerns
(6) Material type and condition of release (i.e. flammable liquid released into storm drain)

Extremely Hazardous Substances (EHS) which are released at the Reportable Quantity (RQ) or greater must be reported to Office of Emergency Services regardless of the circumstances surrounding the incident

If in doubt , please call Office of Emergency Services . The staff at the Office of Emergency Services will assist you in determining if the release is significant or not.

Businesses which fail to make proper notifications may be liable for up to $25,000 for each day of the violation, or by imprisonment in the county jail for not more than one year, or by both the fine and imprisonment.

FILE NO. 40/205

PROCEDURES FOR RESPONDING TO A CHEMICAL SPILL OR RELEASE

In the event of a major emergency situation involving a chemical spill the following general procedures will be used by this facility for rapid and safe control of the area. If an employee discovers a chemical spill or a release of a hazardous substance, he/she will immediately report the incident to the facility Emergency Coordinator . When contacted, the Emergency Coordinator will obtain the following information:

* The material spilled or released.
* The location of the release or spillage of hazardous material.
* An estimate of the quantity and the rate at which it is being released.
* The direction in which the spill, vapor, or smoke release is headed.
* Any injuries involved.
* Fire and /or explosion or the possibility of these events occurring.
* The area and materials involved and the intensity of the fire or explosion.

This information will help the Emergency Coordinator assess the magnitude and the potential seriousness of the spill or release. If the accident is determined to be within the facility's emergency response capabilities, the Emergency Coordinator will contact and deploy the necessary facility personnel trained in hazardous material spill response. If the release is beyond the facility's capabilities, the Emergency Coordinator will contact appropriate emergency agencies (i.e., fire department).

FILE NO. 407205

The initial response to any emergency will be to protect human health and safety and then the environment. Identification, containment, treatments, and disposal assessment will be the secondary response.

The emergency response team must be prepared to handle the spill or release before it happens. The information contained on the Material Safety Data Sheets (MSDS) will give pertinent data on containment, hazards, cleanup and proper disposal. The response team is familiar with the information contained on the Material Safety Data Sheets ,and how to respond to a release of the hazardous materials located at the facility.

For large spills or releases of hazardous material, the following guidelines will be followed by the employees of the facility.

A. If a leak develops or spill occurs from a hazardous material container or storage tank, the person discovering the discharge will leave the area and contact the Emergency Coordinator. The Emergency Coordinator will obtain the following information:

* Person (s) injured and the seriousness of the injury.

* Location of the spill or leak, material involved and the source (tank, drum, etc.).

* The approximate amount spilled, an estimate of the liquid and/or gas discharge rate, and the direction the liquid flow or gaseous cloud is moving.

* Whether or not a fire is involved.

B. Next, the Emergency Coordinator will :

* Initiate evacuation of the hazard area. For small spills or leaks, isolate at least 50 feet in all directions. For large spills, initially isolate 100 feet in all directions and keep all persons upwind of spill.

* Dispatch emergency personnel to the site to take the appropriate action.

* Call the fire department if a fire is involved that cannot be extinguished by facility response personnel. Fight small fires with dry chemical, CO_2, or foam extinguishers (refer to MSDS). Keep heat exposed containers cooled with water spray and remove them from the fire if possible. **IF A**

FILE NO. 40/205

RISING SOUND COMES FROM A VENTING DEVICE OR THE TANK BEGINS TO DISCOLOR. WITHDRAW FROM THE AREA IMMEDIATELY.

* Contact the proper authorities if the spill or release is large. Notify them of the seriousness of the release and whether any evacuation of nearby areas is necessary.

C. Cleanup personnel will:

* Make sure all unnecessary persons are removed from the hazard area.

* Put on protective clothing and equipment

* If flammable waste is involved, remove all ignition sources, and use spark and explosion proof equipment and clothing in containment and cleanup.

* If possible, try to stop the leak and perform special repairs.

* Remove all surrounding material that could be especially reactive with materials in the waste. Determine the major components in the hazardous material at the time of the spill.

* Use inert absorbent material to contain, divert and cleanup a spill if it has not been held by secondary containment or dike. Most spills held by a dike or secondary containment and be pumped back into the appropriate storage tank or drum.

* Place all containment materials and waste in drums for removal as hazardous waste. Use proper hazardous waste hauler and manifest procedures.

* If the spilled hazardous materials enter into the sewer system, the Emergency Coordinator will be responsible for notifying the Department of Public Works.

FILE NO. 40/205

EARTHQUAKE RESPONSE

Earthquake:

The earth is divided into three main layers-a hard outer crust, a softer middle layer, and a central core. The crust is broken into massive, irregular pieces called "plates," which have been moving very slowly over the earth's surface for billions of years, driven by energy forces deep within the earth. It is this movement which has shaped the physical features of the earth-its mountains, valleys, plains, and plateaus. Earthquakes occur when these moving plates grind and scrape against each other.

On the Pacific Coast, two of these plates meet-the Pacific Plate and the North American Plate. The Pacific Plate consists of most of the Pacific Ocean floor and the Pacific coastline. The North American Plate comprises the North American continent and parts of the Atlantic Ocean floor.

The Pacific Plate grinds northwestward past the North American Plate at a rate of about 2 inches per year. Parts of Pacific fault system adapt to this movement by constant "creep," resulting in relatively frequent, but moderate, earth tremors. In other areas, movement is <u>not</u> constant, and strain can build up for hundreds of years, producing great earthquakes when it is finally released.

A damaging quake can occur virtually anywhere in the state. Earthquakes cannot be prevented; however, damage, destruction, and loss of life can be significantly reduced if all residents sufficiently prepare themselves, their homes, workplaces, and communities for a major earthquake.

FILE NO. 40/205

Earthquake Injuries:

Movement of the ground is seldom the actual cause of death or injury. Injuries are commonly caused by:

* Building collapse or damage, such as toppling chimneys, falling bricks from wall facings and roof parapets, collapsing walls, falling ceiling plaster, light fixtures, and pictures.

* Flying glass from broken windows. (This danger may be greater in modern, high-rise structures.)

* Overturned bookcases.

* Fires from broken chimneys, and ruptured gas and electrical lines. The danger may be aggravated by a lack of water caused by broken mains.

* Fallen power lines.

* Drastic human actions resulting from fear.

PREPAREDNESS

Before an Earthquake:

Because earthquakes occur without warning, it's important to take steps to prepare constructive protective action to reduce damages and injuries from a potential earthquake. The following is part of the Amberwood Products, Inc.'s earthquake preparedness:

* Since defective electrical wiring and leaky gas or inflexible connections are very dangerous in the event of an earthquake. All defective electrical wiring and/or leaky gas pipes should be fixed immediately. Furthermore, all inflexible lines will be identified and retrofitted.

FILE NO. 40/205

* The Program Administrator has identified the locations and is prepared to shut off electricity, gas, and water at main switches and valves.

* At Amberwood Products, Inc. we place large heavy objects on lower shelves. Securely fasten shelves to walls. Brace or anchor high or top-heavy objects.

* Bottled chemicals, glass, and other breakables are stored in low or closed cabinets. Deep plaster cracks in ceilings and foundations will be investigated and repaired.

During an Earthquake:

The following instruction should be followed by all Amberwood Products, Inc. employees at the time of an earthquake to reduce injuries and damages:

* First and foremost, stay calm. Think through the consequences of any action you take.

* If you are inside, stay inside; if you are outdoors, stay there. In earthquakes, most injuries occur as people are entering or leaving buildings.

* If outdoors, move away from buildings and utility wires. The greatest danger from falling debris is just outside doorways and close to outer walls. Once in the open, stay there until the shaking stops.

* If in a moving car, stop as quickly as safety permits, but stay in the vehicle. A car may jiggle violently on its springs, but it is a good place to stay until the shaking stops. When you drive on, watch for hazards created by the earthquake, such as fallen or falling objects, downed electric wires, or broken or undermined roadways.

* If indoors, take cover under a heavy desk, table, bench, in a supported doorway, or along an inside wall. Stay away from glass. Don't use candles, matches, or other open flame either during or after the tremor because of possible gas leaks. Douse all fires.

FILE NO. 40/205

In short when an earthquake strikes:

Duck, Cover & Hold

DUCK DUCK or drop down to the floor.

COVER Take COVER under a sturdy desk, table, or other furniture. If that is not possible. Seek COVER against an interior wall and protect your head and neck with your arms. Avoid danger spots near windows, hanging objects, mirrors, or tall furniture.

HOLD If you take cover under a sturdy piece of furniture, HOLD on to it and be prepared to move with it. HOLD the position until the ground stops shaking and it is safe to move.

After the Earthquake:

After an earthquake, be prepared for additional earthquake shocks called "aftershocks." Although most of these are smaller than the main shock, some may be large enough to cause additional damage or bring weakened structures down.

When it feels safe after the earthquake, the following steps should be taken:

* It will be the responsibility of the emergency coordinator or the alternate to initiate the emergency response procedures. The emergency coordinator will first make a quick assessment of the damage to the facility. If it has been determined to be unsafe, it will be necessary to follow evacuation procedures to the predetermined location (see evacuation procedures). The emergency coordinator to help in the evacuation.

* Seriously injured persons should not be removed unless they are in the immediate danger of further injury.

* Check the utilities. The earthquake may break gas, electrical, and water lines. If there is a gas odor, windows should be opened and main gas valve will be shut off. Employees leave the building and

FILE NO. 40/205

report the leakage to authorities. Employees should not reenter the building until a utility official says its it safe. If electrical wiring is shorting out, electricity should be shut off at the main meter box. If water pipes are damaged, main valve should be shut off. Emergency water may be obtained from hot water tanks, toilet tanks (not bowls), and melted ice cubes.

* Check to see that sewage lines are intact before using sanitary facilities.

* Do not touch downed power lines or objects in contact with downed lines.

* If possible, assess damage to storage areas, especially where hazardous chemicals, hazardous waste and compressed gas cylinders are located.

* Immediately clean up spilled chemicals, flammable liquids, and other potentially hazardous materials, if possible. Procedures for these responses are available in other sections of this Emergency Response Plan. Take corrective action whenever possible. Assume that demand for emergency medical, fire fighting, and other governmental services will be overwhelmed and will be unable to respond.

* Use the telephone only for genuine emergency calls.

* Don't spread rumors, they often do great harm after disasters.

* Stay away from damage areas. Your presence could hamper emergency relief efforts and you could be putting yourself in personal danger. Cooperate fully with public safety officials. Respond to requests for volunteer assistance from police, fire fighting, civil defense, and relief organizations, but do not go in to damaged areas unless your assistance has been requested.

Information from emergency broadcasting will be helpful to assess damage to utilities, communication lines, and transportation routes. It may be necessary to remain at the facility until it is feasible for employees to return home safely.

FILE NO. 40/205

EMERGENCY RESPONSE AND SAFETY EQUIPMENT

Equipment Schedule	Location	Inspection
Spill Control Equipment: a) inert absorbents b) disposal drum c) barrier tape/hazard cones d) broom and scoop	see facility map	check weekly
Personal Protective Equipment a) neoprene gloves b) chemical splash goggles c) coveralls d) respirators (NIOSH)	In shop	check weekly
First Aid Equipment a) first aid kit b) eye wash	see facility map	checked periodically by medical supplier
Fire extinguishers	see facility map	check monthly (certified yearly)
Communication Devices a) telephones	office	check daily

FILE NO. 40/205

EMPLOYEE TRAINING REQUIREMENTS

A) Facility personnel must successfully complete a program of training that teaches them to perform their duties in a way that ensures the facility's compliance with the requirements.

B) This program is directed by a person trained in hazardous materials management procedures and must include instruction relevant to the positions which they are employed.

C) At a minimum, the training program must be designed to ensure that facility personnel are able to respond effectively to emergencies.

D) Facility personnel must successfully complete the program within six months after the effective date of their employment or assignment to a facility, or to a new position at the facility.

E) Facility personnel must take part in an annual review of the initial training.

F) The owner or operator must maintain the following documents at the facility:

(1) Records documenting that the training or job experience requirements have been met.

(2) The job title for each position related to hazardous material management, and the name of the employee;

(3) A written description of the type and amount of both introductory and continuing training that will be given to each person.

G) Training records on current personnel must be kept until closure of the facility. Training records on former employees must be kept for at least three years from the date the employee last worked at the facility.

FILE NO. 40-205

NEW EMPLOYEE TRAINING

Section 3220 of the California Code of Regulations Title 8 states:

(e) Training

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,
(B) Whenever the employee's responsibilities or designated actions under the plan change, and
(C) Whenever the plan is changed.

Section 3221 of the California Code of Regulations Title 8 states:

(d) Training

(1) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

(2) The employer shall review with each employee upon initial assignment those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review. For those employers with 10 or fewer employees the plan may be communicated orally to employees and the employer need not maintain a written plan.

The following contains new employee training documentation forms, per above mentioned requirements.

FILE NO. 40/205

FILE NO. 40/205

HAZARD COMMUNICATION PLAN

INTRODUCTION

It is the policy of Amberwood Products, Inc. to provide its employees with information concerning the hazardous nature of chemicals or substances that the employees may encounter in the workplace. This transmittal of information is accomplished by this comprehensive hazard communication program, which includes container labeling and other forms of warning, material safety data sheets, and employee training. The program will ensure that all employees receive adequate information relevant to potential hazards of various chemicals used in Amberwood Products, Inc.'s operations.

Evaluating the potential hazards of chemicals, and communicating information concerning hazards and appropriate protective measures to employees is accomplished by maintaining a written hazard communication program for the workplace. This plan includes, but is not limited to :

* List of hazardous chemicals present

* Preparation and distribution of material safety data sheets to employees

* Labels and other forms of warning

* Development and implementation of employee training programs regarding hazards of chemicals and protective measures

Amberwood Products, Inc.'s Environmental Compliance program meets the requirements of OSHA, Hazard Communication Standard (29 CFR 1910.1200). The following sections outline the steps Amberwood Products, Inc. has taken to meet these requirements.

GENERAL COMPANY POLICY FILE NO. 40/205

The Hazard Communication Plan applies to all personnel at Amberwood Products, Inc., including any administrative or managerial staff who are involved in hazardous material policy (i.e. hazardous waste manifests). Copies of this Plan will be made available to all employees or contract employees who may be exposed to hazardous substances while performing duties at the facility.

The initial employee training will be provided by Environmental Compliance and Remediation Inc. "ECR", with supplemental training programs administered by the management of the facility.

The Program Administrator is the program coordinator, who has overall responsibility for the program. The Program Administrator will review and update the program with ECR's consultation as necessary. Copies of the written program may be obtained from the Program Administrator.

Under this program employees will be informed of the contents of the Hazard Communications Standard, the hazardous properties of chemicals with which employees work, safe handling procedures, and measures to take to protect employees from these chemicals. Employees will also be informed of the hazards associated with non-routine tasks, and the hazards associated with unlabeled pipes.

Hazardous Chemical Identification:

The responsibility for determining whether a chemical is hazardous lies with the chemical manufacturer or importer of a chemical. As a user of chemicals, Amberwood Products, Inc. relies on the evaluation received from these suppliers through labels on containers and material safety data sheets (MSDS's.)

Chemicals considered to be hazardous are those:

- regulated by OSHA in 29 CFR Part 1910, Subpart Z, Toxic and Hazardous Substances;
- included in the American Conference of Governmental Industrial Hygienists (ACGIH) latest edition of Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment;
- found to be suspected or confirmed carcinogens by the National Toxicology Program in the latest edition of the Annual Report on Carcinogens, or by the International Agency for Research on Cancer (IARC) in the latest edition of their IARC monographs.

FILE NO. 40/205

Exceptions:

In paragraph (b)(6) of the rule, OSHA has listed a number of items that are excluded. For example; rubbing alcohol maintained in a first-aid station would be exempt under paragraph (b)(6)(vi) because it is intended for personal use by employees. In some cases, an exempt material may be listed; in general, if there is any question regarding a particular chemical, it is best to include that chemical in the hazard communication program.

This list is to be an inventory of everything for which a material safety data sheet must be obtained. It is part of the written program, and must be made available to employees upon request.

List of Hazardous Chemicals

The list of all hazardous chemicals used in the facility can be found in section 22 of this binder. This list identifies all of the chemicals used in our work process areas. A separate list is available for each work area. A master list of these chemicals will be maintained by, and is available, from the Program Administrator.

The following list identifies some types of potentially hazardous chemicals that may be present in the workplace:

Acids
Adhesives
Aerosols
Asbestos
Battery fluids
Cleaning agents
Coatings
Catalysts
Caustics
Degreasing agents
Detergents
Dusts
Etching agents
Fiberglass
Flammable
Foaming resins
Fuels
Gasoline
Greases
Industrial oils
Janitorial supplies
Kerosene
Lacquers
Lead
Paints
Process chemicals
Resins
Sealers
Solders
Solvents
Strippers
Surfactants
Thinners
Water treatments
Xylene

FILE NO. 40.205

MATERIAL SAFETY DATA SHEETS "MSDS"

The Material Safety Data Sheet (MSDS) is a detailed information bulletin prepared by the manufacturer or importer of a chemical that describes the physical and chemical properties, physical and health hazards, routes of exposure, precautions for safe handling and use, emergency and first-aid procedures, and control measures. Information on an MSDS aids in the selection of safe products and helps prepare employers and employees to respond effectively to daily exposure situations as well as emergency situations.

The MSDS's are a comprehensive source of information for all types of employers. There may be information on the MSDS that is not useful to the safety and health in Amberwood Products, Inc.. Generally, hazard information and protective measures should be the focus of concern.

Requirements

Amberwood Products, Inc. will maintain a complete and accurate MSDS for each hazardous chemical that is used in the facility. Amberwood Products, Inc. is entitled to obtain this information automatically upon purchase of the material. When new and significant information becomes available concerning a product's hazards or ways to protect against the hazards, chemical manufactures, importers, or distributors must add to their MSDS within three months and provide it to their customers with the net shipment of the chemical. Amberwood Products, Inc. must have a MSDS for each hazardous chemical used in the workplace. If there are multiple suppliers of the same chemical, no need to retain multiple MSDS's for that chemical.

While MSDS's are not required to be physically attached to the shipment, they must accompany or precede the shipment. When the manufacturer/supplier fails to send an MSDS with a shipment labeled as a hazardous chemical, Amberwood Products, Inc. shall obtain one from the manufacturer, importer, or distributor as soon as possible. Similarly, if the MSDS is incomplete or unclear, Amberwood Products, Inc. should contact the manufacturer or importer to get clarification or obtain missing information. (See sample letter for requesting an MSDS or additional information on the next page).

MSDS REQUEST

FILE NO. 40/205

From:

Amberwood Products, Inc.

1555 S. 7th St.
San Jose, CA 95112

1st Request Date _____

2nd Request Date _____

3rd Request Date _____

To:

_____ (Company)

_____ (Company Adress)

_____ (City, State, Zip)

_____ (A/C) (Phone)

Please send us a Material Safety Data Sheet (MSDS) on approved OSHA MSDS Form 174, for each of the products listed below, within (15) days of the date of this request. The MSDS(s) are required by the California State Worker and Community Right to Know Act (CCR 8, Sec 5194, Hazard Communication Standard). Please consider this letter a standing request with your company for updated information concerning the safety and health aspects of using this product that may become known in the future. ***Delays of more than twenty (20) days in receiving the MSDS(s) requested may require us to notify OSHA of our inability to obtain this information.***

Product Name	Product Number

Thank you for your cooperation. Should you have any questions regarding this request, please contact me at the phone number listed above.

Respectfully,

FILE NO. 40/205

When Amberwood Products, Inc. is unable to obtain an MSDS from a supplier or manufacturer, Amberwood Products, Inc. could submit a written complaint, with complete background information, to the nearest OSHA office. (Although written complaints do not have to be submitted on an OSHA-7 Form, one is included and may be reproduced for your convenience). OSHA will then, at the same time, call and send a certified letter to the supplier or manufacturer to obtain the needed information. If the supplier or manufacturer still fails to respond within a reasonable time, OSHA will inspect the supplier or manufacturer and take appropriate enforcement action.

SECTIONS OF AN MSDS AND THEIR SIGNIFICANCE

OSHA specifies the information to be included on an MSDS, but does not prescribe the precise format for an MSDS. A non-mandatory MSDS form that meets the Hazard Communication Standard requirements is the blank OSHA Form 174 (a copy of this form is attached at the end of this section).

Section I. Chemical Identity

- The chemical and common name(s) must be provided for single chemical substances.
- An identity on the MSDS must be cross-referenced to the identity found on the label.

Section II. Hazardous Ingredients

- For a hazardous chemical mixture that has been tested as a whole to determine its hazards, the chemical and common names of the ingredients that are associated with the hazards, and the common name of the mixture must be listed.
- If the chemical is a mixture that has not been tested as a whole, the chemical and common names of all ingredients determined to be health hazards and comprising 1 percent or greater of the composition must be listed.
- Chemical and common names of carcinogens must be listed if they are present in the mixture at levels of 0.1 percent or greater.
- All components of a mixture that have been determined to present a physical hazard must be listed.
- Chemical and common names of all ingredients determined to be health hazards and comprising less than 1 percent (0.1 percent for carcinogens) of the mixture must also be listed if they can still exceed an established

Permissible Exposure Limit (PEL) or Threshold Limit Value (TLV) or present a health risk to exposed employees in these concentrations.

FILE NO. 40/205

Section III. Physical and Chemical Characteristics

- The physical and chemical characteristics of the hazardous substance must be listed. These include items such as boiling and freezing points, density, vapor pressure, specific gravity, solubility, volatility, and the product's general appearance and odor. These characteristics provide important information for designing safe and healthful work practices.

Section IV. Fire and Explosion Hazard Data

- The compound's potential for fire and explosion must be described. Also, the fire hazards of the chemical and the conditions under which it could ignite or explode must be identified. Recommended extinguishing agents and fire-fighting methods must be described.

Section V. Reactivity Data

- This section presents information about other chemicals and substances with which the chemical is incompatible, or with which it reacts. Information on any hazardous decomposition products, such as carbon monoxide, must be included.

Section VI. Health Hazards

- The acute and chronic health hazards of the chemical, together with signs and symptoms of exposure, must be listed. In addition, any medical conditions that are aggravated by exposure to the compound must be included. The specific types of chemical health hazards defined in the standard include carcinogens, corrosives, toxins, irritants, sensitizers, mutagens, teratogens, and effects on target organs (i.e. liver, kidney, nervous system, blood, lungs, mucous membranes, reproductive system, skin, eyes, etc.)
- The route of entry section describes the primary pathway by which the chemical enters the body. There are three principle routes of entry: inhalation, skin, and ingestion.
- This section of the MSDS supplies the OSHA PEL, the ACGIH TLV, and other exposure levels used or recommended by the chemical manufacturer.

FILE NO. 40/205

- If the compound is listed as a carcinogen (cancer-causing agent) by OSHA, the National Toxicology Program (NTP), or the International Agency for Research on Cancer (IARC), this information must be indicated on the MSDS.

Section VII. Precautions for Safe Handling and Use

- The standard requires the preparer to describe the precautions for safe handling and use. These include recommended industrial hygiene practices, precautions to be taken during repair and maintenance of equipment, and procedures for cleaning up spills and leaks. Some manufacturers also use this section to include useful information not specifically required by the standard, such as EPA waste disposal methods and state and local requirements.

Section VIII. Control Measures

- The standard requires the preparer of the MSDS to list any generally applicable control measures. These include engineering controls, safe handling procedures, and personal protective equipment. Information is often included on the use of goggles, gloves, body suits, respirators, and face shields.

Amberwood Products, Inc.'s Responsibilities

Employers must ensure that each employee has a basic knowledge of how to find information on an MSDS and how to properly make use of that information. Employers also must ensure the following:

- Complete and accurate MSDS's are made available during each work shift to employees when they are in their work areas.
- Information is provided for each hazardous chemical.

MATERIAL SAFETY DATA SHEET CHECKLIST

MSDS must contain the following information: FILE NO. 40/205

1. Product or chemical identity used on the label.
2. Manufacturer's name and address.
3. Chemical and common names of each hazardous ingredient.
4. Name, address, and phone number for hazard and emergency information.
5. Preparation or revision date.
6. The hazardous chemical's physical and chemical characteristics, such as vapor pressure and flash point
7. Physical hazards, including the potential for fire, explosion, and reactivity.
8. Known health hazards.
9. OSHA permissible exposure limit (PEL), ACGIH threshold limit value (TLV) or other exposure limits.
10. Emergency and first-aid procedures.
11. Whether OSHA, NTP or IARC lists the ingredient as a carcinogen.
12. Precautions for safe handling and use.
13. Control measures such as engineering controls, work practices, hygienic practices or personal protective equipment required.
14. Primary routes of entry.
15. Procedures for spills, leaks, and clean-up.

FILE NO. 40/ 20=

FILE NO. 40/205

LABELS AND OTHER FORMS OF WARNING

The Program Administrator will ensure that all hazardous chemicals in the plant are properly labeled and updated, as necessary. Containers that are shipped from this facility should be checked to ensure that all containers are properly labeled.

The employer is not required to label portable containers into which hazardous substances are transferred from labeled containers, and which are intended only for the immediate use of the employee who performs the transfer.

The Numerically ranked, color coded diamond system of the National Fire Protection Association (NFPA) or the HMIS color bar type labels are also useful in obtaining quick information about the hazards associated with chemicals in the workplace. The colors represent the kind of hazards; blue is associated with the health hazards, red with its flammability characteristics and yellow dealing with the chemical's reactivity. The white diamond is keyed to specific hazards such as corrosive, acid or oxidizer on the NFPA type label or information on specific personal protective gear on the color bar type label. Hazard warning information such as target organ effects by the chemical will usually be shown. The numbers in the color bar or diamond area show the degree of hazard, with zero representing a minimal hazard and increasing to the highest action level of four, which indicates a severe hazard. This labeling system quickly identifies the hazards associated with a particular chemical and informs the worker on how it should be handled. A lot of valuable information can be found on a label. But if you don't find everything you need, refer to the Material Safety Data Sheet or MSDS for more information. Please look at next page for a sample of the NFPA and HMIS labeling system.

TRAINING

Employees of Amberwood Products, Inc. who work with, or one who is potentially exposed to, hazardous chemicals will receive initial training on the Hazard Communication Standard and the safe use of those hazardous chemicals. A program that uses both audiovisual materials and classroom type training has been prepared for this purpose. Whenever a new hazard is introduced, additional training will be provided. Regular safety meetings will also be used to review the information presented in the initial training. Management of Amberwood Products, Inc. are extensively trained regarding hazards and appropriate protective measures so they will be available to answer questions from employees and provide daily monitoring of safe work practices.

The training plan will emphasize these items:

- Summary of the standard and this written program.

- Chemical and physical properties of hazardous materials (e.g. flash point, reactivity) and methods that can be used to detect the presence or release of chemicals (including chemicals in unlabeled pipes).

- Physical hazards of chemicals (e.g. potential for fire, explosion, etc.)

- Health hazards, including signs and symptoms of exposure, associated with exposure to chemicals and any medical condition known to be aggravated by exposure to the chemical.

- Procedures to protect against hazards (e.g. personal protective equipment required, proper use, and maintenance; work practices or methods to assure proper use and handling of chemicals; and procedures for emergency response).

- Work procedures to follow to assure protection when cleaning hazardous chemical spills and leaks.

- Where MSDS's are located, how to read and interpret the information on both labels and MSDS's, and how employees may obtain additional hazard information.

FILE NO. 40/205

The Program Administrator in consultation with "ECR" will review employee training program and will make the appropriate changes, as necessary, on training or retraining needs. Retraining is required when the hazard changes or when a new hazard is introduced into the workplace, but it will be company policy to provide training regularly in safety meetings to ensure the effectiveness of the program. As part of the assessment of the training program, Amberwood Products, Inc. will obtain input from employees regarding the training they have received, and their suggestions for improving it.

Contractors

The Program Administrator will advise outside contractors of any chemical hazards that may be encountered in the normal course of their work on the premises, the labeling system in use, the protective measures to be taken, and the safe handling procedures to be used. In addition, the safety and health manager will notify these individuals of the location and availability of MSDS's. Each contractor bringing chemicals on-site must provide Amberwood Products, Inc. with the appropriate hazard information on these substances, including the labels used and the precautionary measures to be taken in working with these chemicals.

Non-Routine Tasks

When employees are required to perform hazardous non-routine tasks (e.g. cleaning tanks, entering confined spaces, etc.), a special training session will be conducted to inform you regarding the hazardous chemicals to which you might be exposed and the proper precautions to take to reduce or avoid exposure

Additional Information

All employees, or their designated representatives, can obtain further information on this written program, the hazard communication standard, applicable MSDS's, and chemical information lists from the Program Administrator or by calling Environmental Compliance & Remediation, Inc. "ECR" at (800) 800-7644.

GENERAL BUSINESS INFORMATION

SECTION I
FACILITY IDENTIFICATION

Business Name: Amberwood Products, Inc.

Business / Site Address: 1555 S. 7th St., San Jose, CA 95112

Business Phone Number : 408-938-1600

Business Fax Number: 408-938-1606

Business Type (sole proprietor, corporation, etc.): Corporation

Property Owner Name: Piedmont Partners

Property Owner Address: 777 N. 1st St., 5th Floor, San Jose, CA 95112

Property Owner Phone Number: 408-287-0246

SECTION II
FACILITY CONTACT INFORMATION

Contact Name: John Ball Phone: 408-938-1600

Mailing Address: 1555 S. 7th St., San Jose, CA 95112

Business Owner Name: Frank Guidace Phone: 408-938-1600

SECTION III
BUSINESS INFORMATION

Business Description: Commercial Residential Casework

Business Hours: Mon – Fri: 7:00 am – 3:30 pm

# of Shifts: 1

Number of Employees: 80

Facility Square Footage: 50,000

Dun & Bradstreet #: N/A

Federal Tax ID #: 94-2714656

Standard Industrial Classification (SIC): 1751

EPA Identification # : CAL000250974

BAAQMD Plant #.: 10546

Sewer / Waste Water Permit: N/A

Are there any schools, hospitals, health care facilities or other sensitive receptor sites within 1000 feet of the business ? Yes / No X

Name of the Facility : N/A

Location of Hazardous Material Business Plan: Office (see map)

Location of Material Safety Data Sheets (MSDS): In Office

SECTION IV
EMERGENCY RESPONSE INFORMATION

Primary Emergency Coordinator: John Ball

Title: Safety Director

Day Phone: 408-938-1600 Night Phone: (650) 961-2651

Alternate Emergency Coordinator: Terrie Field

Title: Vice President

Day Phone: 408-938-1600 Night Phone: 408-595-7856

Emergency Clean-up Contractor: Evergreen Environmental Services

Address: 6880 Smith Ave. Newark, CA 94560

24 hr Phone: 510-795-4400

Hospital: Kaiser San Jose Medical Center

Address: 250 Hospital Parkway San Jose, CA 95119

Regional Water Quality Control Board 510-622-2300

FACILITY EMERGENCY COORDINATOR

The Facility Emergency Coordinator is the person designated in the Emergency Response Plan as the person responsible for coordinating all the emergency response measures at the facility. He/she is responsible for serving as liaison with the local emergency response personnel during an incident. Either he/she or his/her alternate must be available on a 24-hr basis. The **Program Administrator** is the **Emergency Coordinator** at **Amberwood Products, Inc.** and his/her duties include:

a) The Emergency Coordinator will have familiarity with the site, its layout, operations, and emergency response plan.

b) The Emergency Coordinator will have the authority to commit resources.

c) The Emergency Coordinator activates internal alarms to alert facility personnel of an actual or impending emergency.

d) The Emergency Coordinator notifies external emergency response forces when their assistance is required.

e) The Emergency Coordinator provides immediate information of discharged material and assessment of the possible hazards to human health and the environment outside the facility and the transmittal of the assessment to the appropriate authorities.

f) The Emergency Coordinator will take all reasonable measures to insure that the affected area does not spread to other areas.

g) If the facility shuts down, the Emergency Coordinator will maintain surveillance on other areas to insure that they are not affected.

h) After the emergency is over, the Emergency Coordinator will provide for clean-up, treatment and disposal of affected materials and insure that no hazardous materials are discharged.

i) Prior to resuming operations, the Emergency Coordinator will submit all required reports to the appropriate authorities within specified time.

j) The Emergency Coordinator will be responsible for pre-emergency contacts with emergency services to familiarize them with the layout of the facility, nature of operations, and the type of hazardous material handled.

PROCEDURES FOR EVACUATION OF FACILITY

In the event of an emergency, a **verbal alarm** will be sounded by the Emergency Coordinator or his/her alternate. The Emergency Coordinator will notify the occupants of the facility the nature of the emergency and instructions for response. If there is an emergency situation that requires an evacuation, the Emergency Coordinator will announce to all persons at the facility that there is an emergency. The initial response to any emergency will be to protect human safety and health then the environment.

The Emergency Coordinator will take the following steps in an emergency situation that requires an evacuation:

* Announce to all occupants of the facility that there is an emergency.

* Clear the corridor leading to the emergency exits. Direct the occupants to leave the facility through the designated emergency exits.

* Check all rooms of the facility to make sure that everyone has left, particularly those who may need assistance or those who did not hear the announcement.

* Assist anyone having difficulty leaving the facility area, or anyone who may be injured.

* Give instructions to move quickly but calmly. Have all personnel including any customers or visitors meet at the pre-arranged location outside the building.(see attached evacuation map)

* Account for all occupants of the facility at the time of the evacuation. This is the responsibility of the Emergency Coordinator.

* Re-entry to the facility will occur after the Emergency Coordinator has determined that the facility is safe to resume operations.

The Emergency Coordinator will be responsible for a successful evacuation. This will include providing training to employees who will be involved in the evacuation. It will be the policy of this facility to have personnel engaged in simulated training for the potential emergencies to assess the effectiveness of its response.

PROCEDURES FOR RESPONDING TO FIRE AND/OR EXPLOSION

The Emergency Coordinator will be on standby during all facility emergencies. If a fire should break out, a concentrated effort will be placed on preventing the fire from spreading to nearby areas. The fire fighting effort will be carried out by personnel trained in techniques used to fight fires until outside assistance has arrived. Fires involving hazardous materials may produce special health and safety risks and it is important to consult the Material Safety Data Sheets (MSDS) for unusual fire or explosion hazards and special fire fighting procedures.

The following actions will be taken in the areas affected by the fire or explosion:

* The area should be cleared of all personnel not actively involved in requirements.

* Regardless of the size or nature of fire, the Fire Department requires the facility to call **911**.

* The Emergency Coordinator will meet the arriving emergency response services and brief them on the location, size, and nature of the fire. This will include type of hazardous material involved.

Fire is always a potential hazard when spills of flammable material occurs. For this reason, all possible sources of ignition will be eliminated with this type of spill. **(see Procedures for Responding to a Chemical Spill or Release)** If a highly flammable material is released (e.g., propane or acetylene) where there is a potential for an explosion, all persons within a quarter-mile radius of the release will be notified. All ignition sources within this area will be eliminated. Use of motor vehicles will be restricted to avoid ignition of the vapor because it can cause a flashback to the source and a explosion or fire of even wider dimensions.

Fire fighting will not be done at the risk of injury to the personnel involved; however, early containment of fires can significantly decrease total damage.

Facility evacuation will be necessary in the case of a major fire or explosion. All facility personnel have been trained in evacuation procedure and know routes from their respective work areas.

The Emergency Coordinator will be responsible for all fire fighting efforts until outside help arrives. An "all clear" signal will be given when the fire has been extinguished and the safety of personnel is no longer endangered. All emergency equipment used in the emergency must be cleaned and fit for its intended use prior to resumption of operations at the facility.

IMMEDIATE REPORTING OF A RELEASE OR A THREATENED RELEASE GUIDELINES

(A) A person shall provide an immediate, verbal report of any release or threatened release of a hazardous material to **911-Emergency**, the **Santa Clara County Environmental Health (408) 299-6930** and then to **California Office of Emergency Services (800) 852-7550** as soon as :

(1) a person has knowledge of the release or threatened release
(2) notification can be provided without impeding immediate control of the release or threatened release; and
(3) notification can be provided without impeding immediate emergency medical measures

(B) The immediate reporting pursuant to subsection (a) of this section shall include, at a minimum :

(1) the exact location of the release or threatened release ;
(2) the name of the person reporting the release or threatened release
(3) the hazardous material involved in the release or threatened release
(4) an estimate of the quantity of hazardous materials involved ; and
(5) if known , the potential hazards presented by the hazardous material involved in the release or threatened release.

(C) The immediate reporting pursuant to subsection (a) of this section shall not be required if there is a reasonable belief that the release or threatened release poses no significant present or potential hazard to human health and safety , property , or the environment.

The following criteria to use for determining if notifications need to be made by your business are recommended by the Office of Emergency Services :

(1) Quantity of released or potentially released material
(2) Offsite consequences
(3) Employee safety

(4) Public safety
(5) Environmental concerns
(6) Material type and condition of release (i.e. flammable liquid released into storm drain)

Extremely Hazardous Substances (EHS) which are released at the Reportable Quantity (RQ) or greater must be reported to Office of Emergency Services regardless of the circumstances surrounding the incident

If in doubt , please call Office of Emergency Services . The staff at the Office of Emergency Services will assist you in determining if the release is significant or not.

Businesses which fail to make proper notifications may be liable for up to $25,000 for each day of the violation, or by imprisonment in the county jail for not more than one year, or by both the fine and imprisonment.

PROCEDURES FOR RESPONDING TO A CHEMICAL SPILL OR RELEASE

In the event of a major emergency situation involving a chemical spill the following general procedures will be used by this facility for rapid and safe control of the area. If an employee discovers a chemical spill or a release of a hazardous substance, he/she will immediately report the incident to the facility Emergency Coordinator . When contacted, the Emergency Coordinator will obtain the following information:

* The material spilled or released.
* The location of the release or spillage of hazardous material.
* An estimate of the quantity and the rate at which it is being released.
* The direction in which the spill, vapor, or smoke release is headed.
* Any injuries involved.
* Fire and /or explosion or the possibility of these events occurring.
* The area and materials involved and the intensity of the fire or explosion.

This information will help the Emergency Coordinator assess the magnitude and the potential seriousness of the spill or release. If the accident is determined to be within the facility's emergency response capabilities, the Emergency Coordinator will contact and deploy the necessary facility personnel trained in hazardous material spill response. If the release is beyond the facility's capabilities, the Emergency Coordinator will contact appropriate emergency agencies (i.e., fire department).

The initial response to any emergency will be to protect human health and safety and then the environment. Identification, containment, treatments, and disposal assessment will be the secondary response.

The emergency response team must be prepared to handle the spill or release before it happens. The information contained on the Material Safety Data Sheets (MSDS) will give pertinent data on containment, hazards, cleanup and proper disposal. The response team is familiar with the information contained on the Material Safety Data Sheets ,and how to respond to a release of the hazardous materials located at the facility.

For large spills or releases of hazardous material, the following guidelines will be followed by the employees of the facility.

A. If a leak develops or spill occurs from a hazardous material container or storage tank, the person discovering the discharge will leave the area and contact the Emergency Coordinator. The Emergency Coordinator will obtain the following information:

* Person (s) injured and the seriousness of the injury.

* Location of the spill or leak, material involved and the source (tank, drum, etc.).

* The approximate amount spilled, an estimate of the liquid and/or gas discharge rate, and the direction the liquid flow or gaseous cloud is moving.

* Whether or not a fire is involved.

B. Next, the Emergency Coordinator will :

* Initiate evacuation of the hazard area. For small spills or leaks, isolate at least 50 feet in all directions. For large spills, initially isolate 100 feet in all directions and keep all persons upwind of spill.

* Dispatch emergency personnel to the site to take the appropriate action.

* Call the fire department if a fire is involved that cannot be extinguished by facility response personnel. Fight small fires with dry chemical, CO_2, or foam extinguishers (refer to MSDS). Keep heat exposed containers cooled with water spray and remove them from the fire if possible. **IF A**

RISING SOUND COMES FROM A VENTING DEVICE OR THE TANK BEGINS TO DISCOLOR. WITHDRAW FROM THE AREA IMMEDIATELY.

* Contact the proper authorities if the spill or release is large. Notify them of the seriousness of the release and whether any evacuation of nearby areas is necessary.

C. Cleanup personnel will:

* Make sure all unnecessary persons are removed from the hazard area.

* Put on protective clothing and equipment

* If flammable waste is involved, remove all ignition sources, and use spark and explosion proof equipment and clothing in containment and cleanup.

* If possible, try to stop the leak and perform special repairs.

* Remove all surrounding material that could be especially reactive with materials in the waste. Determine the major components in the hazardous material at the time of the spill.

* Use inert absorbent material to contain, divert and cleanup a spill if it has not been held by secondary containment or dike. Most spills held by a dike or secondary containment and be pumped back into the appropriate storage tank or drum.

* Place all containment materials and waste in drums for removal as hazardous waste. Use proper hazardous waste hauler and manifest procedures.

* If the spilled hazardous materials enter into the sewer system, the Emergency Coordinator will be responsible for notifying the Department of Public Works.

EARTHQUAKE RESPONSE

Earthquake:

The earth is divided into three main layers-a hard outer crust, a softer middle layer, and a central core. The crust is broken into massive, irregular pieces called "plates," which have been moving very slowly over the earth's surface for billions of years, driven by energy forces deep within the earth. It is this movement which has shaped the physical features of the earth-its mountains, valleys, plains, and plateaus. Earthquakes occur when these moving plates grind and scrape against each other.

On the Pacific Coast, two of these plates meet-the Pacific Plate and the North American Plate. The Pacific Plate consists of most of the Pacific Ocean floor and the Pacific coastline. The North American Plate comprises the North American continent and parts of the Atlantic Ocean floor.

The Pacific Plate grinds northwestward past the North American Plate at a rate of about 2 inches per year. Parts of Pacific fault system adapt to this movement by constant "creep," resulting in relatively frequent, but moderate, earth tremors. In other areas, movement is not constant, and strain can build up for hundreds of years, producing great earthquakes when it is finally released.

A damaging quake can occur virtually anywhere in the state. Earthquakes cannot be prevented; however, damage, destruction, and loss of life can be significantly reduced if all residents sufficiently prepare themselves, their homes, workplaces, and communities for a major earthquake.

Earthquake Injuries:

Movement of the ground is seldom the actual cause of death or injury. Injuries are commonly caused by:

* Building collapse or damage, such as toppling chimneys, falling bricks from wall facings and roof parapets, collapsing walls, falling ceiling plaster, light fixtures, and pictures.

* Flying glass from broken windows. (This danger may be greater in modern, high-rise structures.)

* Overturned bookcases.

* Fires from broken chimneys, and ruptured gas and electrical lines. The danger may be aggravated by a lack of water caused by broken mains.

* Fallen power lines.

* Drastic human actions resulting from fear.

PREPAREDNESS

Before an Earthquake:

Because earthquakes occur without warning, it's important to take steps to prepare constructive protective action to reduce damages and injuries from a potential earthquake. The following is part of the Amberwood Products, Inc.'s earthquake preparedness:

* Since defective electrical wiring and leaky gas or inflexible connections are very dangerous in the event of an earthquake. All defective electrical wiring and/or leaky gas pipes should be fixed immediately. Furthermore, all inflexible lines will be identified and retrofitted.

* The Program Administrator has identified the locations and is prepared to shut off electricity, gas, and water at main switches and valves.

* At Amberwood Products, Inc. we place large heavy objects on lower shelves. Securely fasten shelves to walls. Brace or anchor high or top-heavy objects.

* Bottled chemicals, glass, and other breakables are stored in low or closed cabinets. Deep plaster cracks in ceilings and foundations will be investigated and repaired.

During an Earthquake:

The following instruction should be followed by all Amberwood Products, Inc. employees at the time of an earthquake to reduce injuries and damages:

* First and foremost, stay calm. Think through the consequences of any action you take.

* If you are inside, stay inside; if you are outdoors, stay there. In earthquakes, most injuries occur as people are entering or leaving buildings.

* If outdoors, move away from buildings and utility wires. The greatest danger from falling debris is just outside doorways and close to outer walls. Once in the open, stay there until the shaking stops.

* If in a moving car, stop as quickly as safety permits, but stay in the vehicle. A car may jiggle violently on its springs, but it is a good place to stay until the shaking stops. When you drive on, watch for hazards created by the earthquake, such as fallen or falling objects, downed electric wires, or broken or undermined roadways.

* If indoors, take cover under a heavy desk, table, bench, in a supported doorway, or along an inside wall. Stay away from glass. Don't use candles, matches, or other open flame either during or after the tremor because of possible gas leaks. Douse all fires.

In short when an earthquake strikes:

Duck, Cover & Hold

DUCK DUCK or drop down to the floor.

COVER Take COVER under a sturdy desk, table, or other furniture. If that is not possible. Seek COVER against an interior wall and protect your head and neck with your arms. Avoid danger spots near windows, hanging objects, mirrors, or tall furniture.

HOLD If you take cover under a sturdy piece of furniture, HOLD on to it and be prepared to move with it. HOLD the position until the ground stops shaking and it is safe to move.

After the Earthquake:

After an earthquake, be prepared for additional earthquake shocks called "aftershocks." Although most of these are smaller than the main shock, some may be large enough to cause additional damage or bring weakened structures down.

When it feels safe after the earthquake, the following steps should be taken:

* It will be the responsibility of the emergency coordinator or the alternate to initiate the emergency response procedures. The emergency coordinator will first make a quick assessment of the damage to the facility. If it has been determined to be unsafe, it will be necessary to follow evacuation procedures to the predetermined location (see evacuation procedures). The emergency coordinator to help in the evacuation.

* Seriously injured persons should not be removed unless they are in the immediate danger of further injury.

* Check the utilities. The earthquake may break gas, electrical, and water lines. If there is a gas odor, windows should be opened and main gas valve will be shut off. Employees leave the building and

report the leakage to authorities. Employees should not reenter the building until a utility official says its it safe. If electrical wiring is shorting out, electricity should be shut off at the main meter box. If water pipes are damaged, main valve should be shut off. Emergency water may be obtained from hot water tanks, toilet tanks (not bowls), and melted ice cubes.

* Check to see that sewage lines are intact before using sanitary facilities.

* Do not touch downed power lines or objects in contact with downed lines.

* If possible, assess damage to storage areas, especially where hazardous chemicals, hazardous waste and compressed gas cylinders are located.

* Immediately clean up spilled chemicals, flammable liquids, and other potentially hazardous materials, if possible. Procedures for these responses are available in other sections of this Emergency Response Plan. Take corrective action whenever possible. Assume that demand for emergency medical, fire fighting, and other governmental services will be overwhelmed and will be unable to respond.

* Use the telephone only for genuine emergency calls.

* Don't spread rumors, they often do great harm after disasters.

* Stay away from damage areas. Your presence could hamper emergency relief efforts and you could be putting yourself in personal danger. Cooperate fully with public safety officials. Respond to requests for volunteer assistance from police, fire fighting, civil defense, and relief organizations, but do not go in to damaged areas unless your assistance has been requested.

Information from emergency broadcasting will be helpful to assess damage to utilities, communication lines, and transportation routes. It may be necessary to remain at the facility until it is feasible for employees to return home safely.

EMERGENCY RESPONSE AND SAFETY EQUIPMENT

Equipment Schedule	**Location**	**Inspection**
Spill Control Equipment: a) inert absorbents b) disposal drum c) barrier tape/hazard cones d) broom and scoop	see facility map	check weekly
Personal Protective Equipment a) neoprene gloves b) chemical splash goggles c) coveralls d) respirators (NIOSH)	In shop	check weekly
First Aid Equipment a) first aid kit b) eye wash	see facility map	checked periodically by medical supplier
Fire extinguishers	see facility map	check monthly (certified yearly)
Communication Devices a) telephones	office	check daily

EMPLOYEE TRAINING REQUIREMENTS

A) Facility personnel must successfully complete a program of training that teaches them to perform their duties in a way that ensures the facility's compliance with the requirements.

B) This program is directed by a person trained in hazardous materials management procedures and must include instruction relevant to the positions which they are employed.

C) At a minimum, the training program must be designed to ensure that facility personnel are able to respond effectively to emergencies.

D) Facility personnel must successfully complete the program within six months after the effective date of their employment or assignment to a facility, or to a new position at the facility.

E) Facility personnel must take part in an annual review of the initial training.

F) The owner or operator must maintain the following documents at the facility:

(1) Records documenting that the training or job experience requirements have been met.

(2) The job title for each position related to hazardous material management, and the name of the employee;

(3) A written description of the type and amount of both introductory and continuing training that will be given to each person.

G) Training records on current personnel must be kept until closure of the facility. Training records on former employees must be kept for at least three years from the date the employee last worked at the facility.

NEW EMPLOYEE TRAINING

Section 3220 of the California Code of Regulations Title 8 states:

(e) Training

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,
(B) Whenever the employee's responsibilities or designated actions under the plan change, and
(C) Whenever the plan is changed.

Section 3221 of the California Code of Regulations Title 8 states:

(d) Training

(1) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

(2) The employer shall review with each employee upon initial assignment those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review. For those employers with 10 or fewer employees the plan may be communicated orally to employees and the employer need not maintain a written plan.

The following contains new employee training documentation forms, per above mentioned requirements.

REFRESHER TRAINING

Section 3221 of the California Code of Regulations Title 8 states:

(e) Training

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,
(B) Whenever the employee's responsibilities or designated actions under the plan at the following times:
(C) Whenever the plan is changed.

The following contains new employee training documentation forms, per above mentioned requirements.

QUARTERLY SELF INSPECTION

Sections 3220 & 3221 of the California Code of Regulations Title 8 require:

The Emergency & Fire Prevention Plan be reviewed periodically and updated to maintain adequate response personnel and program efficiency.

The following **QUARTERLY SELF-INSPECTION** checklist has been provided to insure compliance with the various regulatory requirements concerning emergency planning .

EMPLOYEE TRAINING FORM
Per Requirements of
Emergency & Fire Prevention Plan

Business Name: **Amberwood Products, Inc.**	Business Address: **1555 S. 7th St., San Jose, CA 95112**
Employee's Name:	Training Date:
Department:	Trained By: **ECR (800) 800-7644**

Subjects Covered:

1) Location / content of facility Emergency & Fire Prevention Plan.

2) Procedure for internal alarms and facility personnel notification of emergencies.

3) Evacuation and re-entry procedures.

4) Procedures for responding to fire or explosion involving hazardous material.

5) Emergency response equipment.

6) Procedures for responding to an earthquake.

7) Procedures for mitigation of chemical spills & material releases.

8) Operation shut-down procedures.

I hereby certify that I have received the above mentioned training.

Employee's Signature :_____ Date :_____

REFRESHER TRAINING FORM
Per Requirements of
Emergency & Fire Prevention Plan

Business Name:	Business Address:
Amberwood Products, Inc.	**1555 S. 7th St., San Jose, CA 95112**
Employee's Name:	Training Date:

MONTHLY SELF INSPECTION

Sections 3220 & 3221 of the California Code of Regulations Title 8 require:

The Emergency & Fire Prevention Plan be reviewed periodically and updated to maintain adequate response personnel and program efficiency.

The following **MONTHLY SELF-INSPECTION** checklist has been provided to insure compliance with the various regulatory requirements concerning emergency planning .

MONTHLY INSPECTION CHECKLIST

Amberwood Products, Inc.

Emergency & Fire Prevention Plan	**Yes**	**No**
a) The plan is up to date	____	____
b) All employees have received training	____	____
c) All employees have received the annual refresher	____	____
d) All employees have signed the training roster	____	____
e) Other	____	____

Fire Protection		
a) Extinguishers are mounted in accessible locations	____	____
b) Extinguishers are inspected and recharged annually	____	____
c) Combustible scrap, debris and waste are stored in an approved metal container	____	____
d) All exit routes are free of obstructions	____	____
e) Other	____	____

Housekeeping		
a) All areas are clean and orderly	____	____
b) Food and beverage are stored and consumed away from hazardous materials	____	____
c) Eyewash / showers are checked periodically	____	____
d) Are all worksites clean and orderly ?	____	____
e) Are work surfaces kept dry, or appropriate means taken to assure the surfaces are slip-resistant?	____	____
f) Are all spilled materials or liquids cleaned up immediately ?	____	____
g) Are the minimum number of toilets and washing facilities provided ?	____	____
h) Are all work areas adequately illuminated ?	____	____
i) Other	____	____

First Aid		
a) If medical and first aid facilities are not in proximity of the work place, is at least one employee on each shift currently qualified to render first aid ?	____	____
b) Are medical personnel readily available for advice and consultation on matters of employee health ?	____	____
c) Are emergency phone numbers posted ?	____	____
d) Are first aid kits easily accessible to each work area, with necessary supplies available, periodically inspected and replenished as needed ?	____	____
e) Have first aid kits supplies been approved by a physician, indicating they are adequate for a particular area or operation ?	____	____
f) Are aisles and passageways kept clear ?	____	____
g) Are aisles and walkways marked as appropriate ?	____	____

Hazardous Material Storage		**Yes**	**No**
a)	Inventory is up to date	____	____
b)	Material Safety Data Sheets are available	____	____
c)	Facility map is up to date	____	____
d)	All hazardous materials / waste are properly labeled	____	____
e)	All hazardous materials are capped when not in use	____	____
f)	Incompatible materials are segregated to prevent accidental mixing (acid / base / poison / flammable)	____	____
g)	Oxidizers are separated from flammable materials	____	____
h)	Hazardous materials / waste adequately contained	____	____
i)	Compressed gas cylinders are clearly labeled	____	____
j)	Compressed gas cylinders are properly secured	____	____
k)	Compressed gas cylinders are capped when not in use	____	____
l)	Oxygen and fuel gas cylinders are stored 20' apart or with a one hour fire wall	____	____
m)	Hazardous materials storage area are clearly marked	____	____
n)	Flammable liquids greater than 10 gallons are stored in an approved Flammable Storage Cabinet	____	____
o)	Flammable liquid dispensing equipment is properly grounded	____	____
p)	Containers of hazardous materials are properly stacked and stored		
	1) Materials under 30 gallons are stacked no greater than two container high	____	____
	2) Materials greater than 30 gallons are stacked no more one container high	____	____
	3) Containers are stored in upright condition	____	____
q)	There is 36" of clearance around all electrical shutoffs	____	____
r)	Spill equipment is available and in a ready condition	____	____
s)	Other	____	____

HAZARD COMMUNICATION PLAN

INTRODUCTION

It is the policy of Amberwood Products, Inc. to provide its employees with information concerning the hazardous nature of chemicals or substances that the employees may encounter in the workplace. This transmittal of information is accomplished by this comprehensive hazard communication program, which includes container labeling and other forms of warning, material safety data sheets, and employee training. The program will ensure that all employees receive adequate information relevant to potential hazards of various chemicals used in Amberwood Products, Inc.'s operations.

Evaluating the potential hazards of chemicals, and communicating information concerning hazards and appropriate protective measures to employees is accomplished by maintaining a written hazard communication program for the workplace. This plan includes, but is not limited to :

* List of hazardous chemicals present

* Preparation and distribution of material safety data sheets to employees

* Labels and other forms of warning

* Development and implementation of employee training programs regarding hazards of chemicals and protective measures

Amberwood Products, Inc.'s Environmental Compliance program meets the requirements of OSHA, Hazard Communication Standard (29 CFR 1910.1200). The following sections outline the steps Amberwood Products, Inc. has taken to meet these requirements.

GENERAL COMPANY POLICY

The Hazard Communication Plan applies to all personnel at Amberwood Products, Inc., including any administrative or managerial staff who are involved in hazardous material policy (i.e. hazardous waste manifests). Copies of this Plan will be made available to all employees or contract employees who may be exposed to hazardous substances while performing duties at the facility.

The initial employee training will be provided by Environmental Compliance and Remediation Inc. "ECR", with supplemental training programs administered by the management of the facility.

The Program Administrator is the program coordinator, who has overall responsibility for the program. The Program Administrator will review and update the program with ECR's consultation as necessary. Copies of the written program may be obtained from the Program Administrator.

Under this program employees will be informed of the contents of the Hazard Communications Standard, the hazardous properties of chemicals with which employees work, safe handling procedures, and measures to take to protect employees from these chemicals. Employees will also be informed of the hazards associated with non-routine tasks, and the hazards associated with unlabeled pipes.

Hazardous Chemical Identification:

The responsibility for determining whether a chemical is hazardous lies with the chemical manufacturer or importer of a chemical. As a user of chemicals, Amberwood Products, Inc. relies on the evaluation received from these suppliers through labels on containers and material safety data sheets (MSDS's.)

Chemicals considered to be hazardous are those:

- regulated by OSHA in 29 CFR Part 1910, Subpart Z, Toxic and Hazardous Substances;
- included in the American Conference of Governmental Industrial Hygienists (ACGIH) latest edition of Threshold Limit Values for Chemical Substances and Physical Agents in the Work Environment;
- found to be suspected or confirmed carcinogens by the National Toxicology Program in the latest edition of the Annual Report on Carcinogens, or by the International Agency for Research on Cancer (IARC) in the latest edition of their IARC monographs.

Exceptions:

In paragraph (b)(6) of the rule, OSHA has listed a number of items that are excluded. For example, rubbing alcohol maintained in a first-aid station would be exempt under paragraph (b)(6)(vi) because it is intended for personal use by employees. In some cases, an exempt material may be listed; in general, if there is any question regarding a particular chemical, it is best to include that chemical in the hazard communication program.

This list is to be an inventory of everything for which a material safety data sheet must be obtained. It is part of the written program, and must be made available to employees upon request.

List of Hazardous Chemicals

The list of all hazardous chemicals used in the facility can be found in section 22 of this binder. This list identifies all of the chemicals used in our work process areas. A separate list is available for each work area. A master list of these chemicals will be maintained by, and is available, from the Program Administrator.

The following list identifies some types of potentially hazardous chemicals that may be present in the workplace:

Acids
Adhesives
Aerosols
Asbestos
Battery fluids
Cleaning agents
Coatings
Catalysts
Caustics
Degreasing agents
Detergents
Dusts
Etching agents
Fiberglass
Flammable
Foaming resins
Fuels
Gasoline
Greases
Industrial oils
Janitorial supplies
Kerosene
Lacquers
Lead
Paints
Process chemicals
Resins
Sealers
Solders
Solvents
Strippers
Surfactants
Thinners
Water treatments
Xylene

MATERIAL SAFETY DATA SHEETS "MSDS"

The Material Safety Data Sheet (MSDS) is a detailed information bulletin prepared by the manufacturer or importer of a chemical that describes the physical and chemical properties, physical and health hazards, routes of exposure, precautions for safe handling and use, emergency and first-aid procedures, and control measures. Information on an MSDS aids in the selection of safe products and helps prepare employers and employees to respond effectively to daily exposure situations as well as emergency situations.

The MSDS's are a comprehensive source of information for all types of employers. There may be information on the MSDS that is not useful to the safety and health in Amberwood Products, Inc.. Generally, hazard information and protective measures should be the focus of concern.

Requirements

Amberwood Products, Inc. will maintain a complete and accurate MSDS for each hazardous chemical that is used in the facility. Amberwood Products, Inc. is entitled to obtain this information automatically upon purchase of the material. When new and significant information becomes available concerning a product's hazards or ways to protect against the hazards, chemical manufactures, importers, or distributors must add to their MSDS within three months and provide it to their customers with the net shipment of the chemical. Amberwood Products, Inc. must have a MSDS for each hazardous chemical used in the workplace. If there are multiple suppliers of the same chemical, no need to retain multiple MSDS's for that chemical.

While MSDS's are not required to be physically attached to the shipment, they must accompany or precede the shipment. When the manufacturer/supplier fails to send an MSDS with a shipment labeled as a hazardous chemical, Amberwood Products, Inc. shall obtain one from the manufacturer, importer, or distributor as soon as possible. Similarly, if the MSDS is incomplete or unclear, Amberwood Products, Inc. should contact the manufacturer or importer to get clarification or obtain missing information. (See sample letter for requesting an MSDS or additional information on the next page).

MSDS REQUEST

From:

_____

Amberwood Products, Inc.

1555 S. 7th St.
San Jose, CA 95112

1st Request Date _____

2nd Request Date _____

3rd Request Date _____

To: _____
(Company)

_____
(Company Adress)

_____
(City, State, Zip)

_____
(A/C) (Phone)

Please send us a Material Safety Data Sheet (MSDS) on approved OSHA MSDS Form 174, for each of the products listed below, within (15) days of the date of this request. The MSDS(s) are required by the California State Worker and Community Right to Know Act (CCR 8, Sec 5194, Hazard Communication Standard). Please consider this letter a standing request with your company for updated information concerning the safety and health aspects of using this product that may become known in the future. ***Delays of more than twenty (20) days in receiving the MSDS(s) requested may require us to notify OSHA of our inability to obtain this information.***

Product Name	Product Number

Thank you for your cooperation. Should you have any questions regarding this request, please contact me at the phone number listed above.

Respectfully,

When Amberwood Products, Inc. is unable to obtain an MSDS from a supplier or manufacturer, Amberwood Products, Inc. could submit a written complaint, with complete background information, to the nearest OSHA office. (Although written complaints do not have to be submitted on an OSHA-7 Form, one is included and may be reproduced for your convenience). OSHA will then, at the same time, call and send a certified letter to the supplier or manufacturer to obtain the needed information. If the supplier or manufacturer still fails to respond within a reasonable time, OSHA will inspect the supplier or manufacturer and take appropriate enforcement action.

SECTIONS OF AN MSDS AND THEIR SIGNIFICANCE

OSHA specifies the information to be included on an MSDS, but does not prescribe the precise format for an MSDS. A non-mandatory MSDS form that meets the Hazard Communication Standard requirements is the blank OSHA Form 174 (a copy of this form is attached at the end of this section).

Section I. Chemical Identity

- The chemical and common name(s) must be provided for single chemical substances.
- An identity on the MSDS must be cross-referenced to the identity found on the label.

Section II. Hazardous Ingredients

- For a hazardous chemical mixture that has been tested as a whole to determine its hazards, the chemical and common names of the ingredients that are associated with the hazards, and the common name of the mixture must be listed.
- If the chemical is a mixture that has not been tested as a whole, the chemical and common names of all ingredients determined to be health hazards and comprising 1 percent or greater of the composition must be listed.
- Chemical and common names of carcinogens must be listed if they are present in the mixture at levels of 0.1 percent or greater.
- All components of a mixture that have been determined to present a physical hazard must be listed.
- Chemical and common names of all ingredients determined to be health hazards and comprising less than 1 percent (0.1 percent for carcinogens) of the mixture must also be listed if they can still exceed an established

Permissible Exposure Limit (PEL) or Threshold Limit Value (TLV) or present a health risk to exposed employees in these concentrations.

Section III. Physical and Chemical Characteristics

- The physical and chemical characteristics of the hazardous substance must be listed. These include items such as boiling and freezing points, density, vapor pressure, specific gravity, solubility, volatility, and the product's general appearance and odor. These characteristics provide important information for designing safe and healthful work practices.

Section IV. Fire and Explosion Hazard Data

- The compound's potential for fire and explosion must be described. Also, the fire hazards of the chemical and the conditions under which it could ignite or explode must be identified. Recommended extinguishing agents and fire-fighting methods must be described.

Section V. Reactivity Data

- This section presents information about other chemicals and substances with which the chemical is incompatible, or with which it reacts. Information on any hazardous decomposition products, such as carbon monoxide, must be included.

Section VI. Health Hazards

- The acute and chronic health hazards of the chemical, together with signs and symptoms of exposure, must be listed. In addition, any medical conditions that are aggravated by exposure to the compound must be included. The specific types of chemical health hazards defined in the standard include carcinogens, corrosives, toxins, irritants, sensitizers, mutagens, teratogens, and effects on target organs (i.e. liver, kidney, nervous system, blood, lungs, mucous membranes, reproductive system, skin, eyes, etc.)
- The route of entry section describes the primary pathway by which the chemical enters the body. There are three principle routes of entry: inhalation, skin, and ingestion.
- This section of the MSDS supplies the OSHA PEL, the ACGIH TLV, and other exposure levels used or recommended by the chemical manufacturer.

- If the compound is listed as a carcinogen (cancer-causing agent) by OSHA, the National Toxicology Program (NTP), or the International Agency for Research on Cancer (IARC), this information must be indicated on the MSDS.

Section VII. Precautions for Safe Handling and Use

- The standard requires the preparer to describe the precautions for safe handling and use. These include recommended industrial hygiene practices, precautions to be taken during repair and maintenance of equipment, and procedures for cleaning up spills and leaks. Some manufacturers also use this section to include useful information not specifically required by the standard, such as EPA waste disposal methods and state and local requirements.

Section VIII. Control Measures

- The standard requires the preparer of the MSDS to list any generally applicable control measures. These include engineering controls, safe handling procedures, and personal protective equipment. Information is often included on the use of goggles, gloves, body suits, respirators, and face shields.

Amberwood Products, Inc.'s Responsibilities

Employers must ensure that each employee has a basic knowledge of how to find information on an MSDS and how to properly make use of that information. Employers also must ensure the following:

- Complete and accurate MSDS's are made available during each work shift to employees when they are in their work areas.
- Information is provided for each hazardous chemical.

MATERIAL SAFETY DATA SHEET CHECKLIST

MSDS must contain the following information:

1. Product or chemical identity used on the label.
2. Manufacturer's name and address.
3. Chemical and common names of each hazardous ingredient.
4. Name, address, and phone number for hazard and emergency information.
5. Preparation or revision date.
6. The hazardous chemical's physical and chemical characteristics, such as vapor pressure and flash point
7. Physical hazards, including the potential for fire, explosion, and reactivity.
8. Known health hazards.
9. OSHA permissible exposure limit (PEL), ACGIH threshold limit value (TLV) or other exposure limits.
10. Emergency and first-aid procedures.
11. Whether OSHA, NTP or IARC lists the ingredient as a carcinogen.
12. Precautions for safe handling and use.
13. Control measures such as engineering controls, work practices, hygienic practices or personal protective equipment required.
14. Primary routes of entry.
15. Procedures for spills, leaks, and clean-up.

LABELS AND OTHER FORMS OF WARNING

The Program Administrator will ensure that all hazardous chemicals in the plant are properly labeled and updated, as necessary. Containers that are shipped from this facility should be checked to ensure that all containers are properly labeled.

The employer is not required to label portable containers into which hazardous substances are transferred from labeled containers, and which are intended only for the immediate use of the employee who performs the transfer.

The Numerically ranked, color coded diamond system of the National Fire Protection Association (NFPA) or the HMIS color bar type labels are also useful in obtaining quick information about the hazards associated with chemicals in the workplace. The colors represent the kind of hazards; blue is associated with the health hazards, red with its flammability characteristics and yellow dealing with the chemical's reactivity. The white diamond is keyed to specific hazards such as corrosive, acid or oxidizer on the NFPA type label or information on specific personal protective gear on the color bar type label. Hazard warning information such as target organ effects by the chemical will usually be shown. The numbers in the color bar or diamond area show the degree of hazard, with zero representing a minimal hazard and increasing to the highest action level of four, which indicates a severe hazard. This labeling system quickly identifies the hazards associated with a particular chemical and informs the worker on how it should be handled. A lot of valuable information can be found on a label. But if you don't find everything you need, refer to the Material Safety Data Sheet or MSDS for more information. Please look at next page for a sample of the NFPA and HMIS labeling system.

TRAINING

Employees of Amberwood Products, Inc. who work with, or one who is potentially exposed to, hazardous chemicals will receive initial training on the Hazard Communication Standard and the safe use of those hazardous chemicals. A program that uses both audiovisual materials and classroom type training has been prepared for this purpose. Whenever a new hazard is introduced, additional training will be provided. Regular safety meetings will also be used to review the information presented in the initial training. Management of Amberwood Products, Inc. are extensively trained regarding hazards and appropriate protective measures so they will be available to answer questions from employees and provide daily monitoring of safe work practices.

The training plan will emphasize these items:

- Summary of the standard and this written program.

- Chemical and physical properties of hazardous materials (e.g. flash point, reactivity) and methods that can be used to detect the presence or release of chemicals (including chemicals in unlabeled pipes).

- Physical hazards of chemicals (e.g. potential for fire, explosion, etc.)

- Health hazards, including signs and symptoms of exposure, associated with exposure to chemicals and any medical condition known to be aggravated by exposure to the chemical.

- Procedures to protect against hazards (e.g. personal protective equipment required, proper use, and maintenance; work practices or methods to assure proper use and handling of chemicals; and procedures for emergency response).

- Work procedures to follow to assure protection when cleaning hazardous chemical spills and leaks.

- Where MSDS's are located, how to read and interpret the information on both labels and MSDS's, and how employees may obtain additional hazard information.

The Program Administrator in consultation with "ECR" will review employee training program and will make the appropriate changes, as necessary, on training or retraining needs. Retraining is required when the hazard changes or when a new hazard is introduced into the workplace, but it will be company policy to provide training regularly in safety meetings to ensure the effectiveness of the program. As part of the assessment of the training program, Amberwood Products, Inc. will obtain input from employees regarding the training they have received, and their suggestions for improving it.

Contractors

The Program Administrator will advise outside contractors of any chemical hazards that may be encountered in the normal course of their work on the premises, the labeling system in use, the protective measures to be taken, and the safe handling procedures to be used. In addition, the safety and health manager will notify these individuals of the location and availability of MSDS's. Each contractor bringing chemicals on-site must provide Amberwood Products, Inc. with the appropriate hazard information on these substances, including the labels used and the precautionary measures to be taken in working with these chemicals.

Non-Routine Tasks

When employees are required to perform hazardous non-routine tasks (e.g. cleaning tanks, entering confined spaces, etc.), a special training session will be conducted to inform you regarding the hazardous chemicals to which you might be exposed and the proper precautions to take to reduce or avoid exposure

Additional Information

All employees, or their designated representatives, can obtain further information on this written program, the hazard communication standard, applicable MSDS's, and chemical information lists from the Program Administrator or by calling Environmental Compliance & Remediation, Inc. "ECR" at (800) 800-7644.

NEW EMPLOYEE TRAINING

Section 5194 Title 8 of the California Code of Regulation requires:

> **Training for all new employees with information on hazardous substances in their work area at the time of their initial assignment or whenever a new hazard is introduced into their work area.**

The following contains new employee training documentation forms, per above mentioned requirements.

ANNUAL REFRESHER TRAINING

Section 5194 Title 8 of the California Code of Regulation requires:

Annual refresher training for all employees with information on hazardous substances in their work area.

The following contains new employee training documentation forms, per above mentioned requirements.

CONTRACTORS NOTIFICATION

The Program Administrator will ensure that outside contractors have been notified about the hazardous materials present at this site and how to protect themselves from possible exposure to these hazardous materials while working at this facility.

The Program Administrator accomplishes this task by showing the contractors our Material Safety Data Sheets and the location of emergency response and protective equipment. Furthermore contractors will be informed about our labeling system and the evacuation procedures.

Contractors will inform the employees at this site about hazardous materials they use and how to protect themselves from possible exposure to the hazardous material.

NON-ROUTINE TASKS

When employees are required to perform new hazardous tasks that are not part of their ordinary routine . Before starting such work, the employees will be given information on:

* Specific hazards both chemical and physical
* Personal protective and safety equipment and measures
* Emergency procedures

At Amberwood Products, Inc. it is the Program Administrator's responsibility that the employees are informed about non-routine hazardous tasks.

EMPLOYEE HAZARD COMMUNICATION TRAINING FORM

Business Name: **Amberwood Products, Inc.**	Business Address: **1555 S. 7th St., San Jose, CA 95112**
Employee's Name:	Training Date:

CONTRACTOR'S CONSENT

In accordance with **Amberwood Products, Inc.** hazardous material communication program, the emergency coordinator is required to notify all the outside contractors and their employees who may be performing work or service at this site that we use certain hazardous materials.

By signing this document you hereby acknowledge that, you have been notified about the presence of these hazardous materials and you have received information about how to protect yourself and your employees from possible exposure to these materials. Furthermore, you certify that information regarding our evacuation procedures, material safety data sheets, labeling system , the location of personal protective equipment and emergency response have been furnished to you and your employees.

I hereby acknowledge the receipt of the above mentioned information.

EMERGENCY & FIRE PREVENTION PLAN

Section 3220 of the California Code of Regulations Title 8:

Emergency Action Plan.

(a) Scope and Application. This section applies to all emergency action plans. The emergency action plan shall be in writing, except as provided in the last sentence of subsection (e)(3) of this section, and shall cover those designated actions employers and employees must take to ensure those designated actions employers and employees must take to ensure employee safety from fire and other emergencies.

(b) Elements. The following elements, at a minimum, shall be included in the plan:

(1) Emergency escape procedures and emergency escape route assignments;

(2) Procedures to be followed by employees who remain to operate critical plant operations before they evacuate;

(3) Procedures to account for all employees after emergency evacuation has been completed;

(4) Rescue and medical duties for those employees who are to perform them;

(5) The preferred means of reporting fires and other emergencies; and

(6) Names or regular job titles of persons or departments who can be contacted for further information or explanation of duties under the plan.

(c) Alarm System.

(1) The employer shall establish an employee alarm system which complies with Article 165.

(2) If the employee alarm system is used for alerting fire brigade members, or for other purposes, a distinctive signal for each purpose shall be used.

(d) Evacuation. The employer shall establish in the emergency action plan the types of evacuation to be used in emergency circumstances.

(e) Training.

(1) Before implementing the emergency action plan, the employer shall designate and train a sufficient number of persons to assist in the safe and orderly emergency evacuation of employees.

(2) The employer shall advise each employee of his/her responsibility under the plan at the following times:

(A) Initially when the plan is developed,

(B) Whenever the employee's responsibilities or designated actions under the plan change, and

(C) Whenever the plan is changed.

(3) The employer shall review with each employee upon intitial assignment of those parts of the plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept at the workplace and made available for employee review. For those employers with 10 or fewer employees the plan may be communicated orally to employees and the employer need not maintain a written plan.

NOTE: Authority and reference cited: Section 142.3, Labor Code.

HISTORY

1. New section filed 9-8-81; effective thiriteth day thereafter (Register 81, No. 37).

Section 3221 of the California Code of Regulations Title 8:

Fire Prevention Plan.

(a) Scope and Application. This section applies to all fire prevention plans. The fire prevention plan shall be in writing, except as provided in the last sentence of subsection (d)(2) of this section.

(b) Elements. The following elelments, at a minimum, shall be included in the fire prevention plan:

(1) Potential fire hazards and their proper handling and storage procedures, potential ignition sources (such as welding, smoking and others) and their control procedures, and the type of fire protection equipment or systems which can control a fire involving them;

(2) Names or regular job titles of those responsible for maintenance of equipment and systems installed to prevent or control ignitions or fires; and

(3) Names or regular job titles of those responsible for the control of accumulation of flammable or combustible waste materials.

(c) Housekeeping. The employer shall control accumulations of flammable and combustible waste materials and residues so that they do not contribute to a fire emergency. The housekeeping procedures shall be included in the written fire prevention plan.

(d) Training.

(1) The employer shall apprise employees of the fire hazards of the materials and processes to which they are exposed.

(2) The employer shall review with each employee upon initial assignment those parts of the fire prevention plan which the employee must know to protect the employee in the event of an emergency. The written plan shall be kept in the workplace and made available for employee review. For those employers with 10 or fewer employees, the plan may be communicated orally to employees and the employer need not maintain a written plan.

(e) Maintenance. The employer shall regularly and properly maintain, according to established procedures, equipment and systems installed in the workplace to prevent accidental ignition of combustible materials.

NOTE: Authority and reference cited: Section 142.3, Labor Code.

HISTORY

1. New section filed 9-8-81; effective thirtieth day thereafter (Register 81, No. 37). For prior history, see Registers 77, No. 20; 76, No. 29; and 75, No. 25.

FIRE PREVENTION

What would happen if a fire occurred at this facility? Would you know what to do? Often in a fire people panic because they don't know the proper procedures and/or how to use the proper equipment. When this happens, additional damage that may have been avoided can occur. And what's worse, panic can also lead to avoidable injury and/or death. If this facility is destroyed, or heavily damaged, by fire, everyone loses. From the owners, to the employees, to the distributors, and especially the valued customers of Amberwood Products, Inc. are all effected by the change in the goods or services that are no longer available. It is for these reasons, for the health and safety of our employees and for the good of our customers, that Amberwood Products, Inc. has developed this Fire Prevention program.

Your **FIRST** response in a fire must be to set off the alarm (if there is one) and **CALL 911**. Never assume that this is going to be done by someone else. The second is to leave the area if the fire is too big to handle. To deal with a small fire, you must know what class it belongs to (A, B, C, or D) based on the kind of material that is burning. Using the wrong type of extinguisher, or using one improperly, could result in additional property damage and/or injury.

The Three Essentials Elements:

Fire control of any ordinary fire depends on controlling one of the following essentials:

FUEL	FUEL can be paper, wood, oil, solvents, gas, and so on.
HEAT	HEAT is the degree necessary to vaporize fuel according to its nature.
OXYGEN	OXYGEN helps a fire to breathe. Normally at least 15% of the surrounding air must be made up of oxygen in order for a fire to continue to

burn. The greater the concentration of oxygen, the brighter the blaze and the more rapid the combustion.

Remove only one of these essentials and a fire can be extinguished by:

ISOLATING Fuel control.

COOLING Temperature and heat control.

SMOTHERING Oxygen control.

In certain types of fires, the method of ***INTERRUPTING*** can be used to stop a chemical chain reaction that is helping the fire to burn.

KNOW WHAT YOU'RE DEALING WITH!

In general, there are four different classifications of fires. Knowing which kind you're dealing with will aid you in choosing the right type of fire extinguisher, as well the correct method for fighting the fire.

Class A Fires:

Generally, a Class A Fire consists of general combustibles such as wood, cloth, paper, or rubbish and is usually controlled by **cooling,** for instance by using water to cool the material.

When fighting a Class A fire, get as close to the fire as possible without endangering yourself, and aim the nozzle of the fire extinguisher toward the base of the flames. Continue spraying until all smoldering material is wet down. Deep-seated fires, such as those that occur in baled materials, must be thoroughly soaked and may have to be pulled apart to reach smoldering matter inside.

Another option for a Class A fire is to use a multipurpose dry-chemical extinguisher. With this type of extinguisher, start at the edge of the fire and spray in a sweeping motion. The powdered chemical in the extinguisher becomes sticky when heated, allowing it to form a film that clings to the heated material and **smothers** the fire.

Class B Fires:

Another type, the Class B fire, burns flammable liquids such as gasoline, oil, grease, solvents, or paint. For this type of a fire, a dry chemical extinguisher is used.

To fight a Class B fire, start about 10 feet away from the fire and slowly begin to move closer. As you move toward the fire use a sweeping motion to apply the chemical across the fire's base.

Carbon dioxide extinguishers can also be used for Class B fires. However, they should only be used when you are able to stand near the edge of the fire and spray at close range in an area with no wind or drafts. Fires can spread with the presence of **oxygen**, but the carbon dioxide decreases the amount of **oxygen** surrounding the fire until the air can no longer support the combustion.

Class C Fires:

The third type of fire is a Class C fire. This type of fire involves fires that occur in energized electrical equipment. In a Class C fire, water cannot be used because it conducts electricity and can deliver a shock to the firefighter. If the equipment can be de-energized, extinguishers for Class A or B fires may be safely used. Otherwise, carbon dioxide and dry chemical extinguishers, that **smother** the fire, are best.

Class D Fires:

The last type of fire is a Class D fire. A Class D fire is one that involves combustible metals such as magnesium, lithium, potassium, or sodium. If water is used on this type of fire, it will cause the metal to release hydrogen and a large amount of heat, causing the hydrogen to ignite and explode.

For this type of fire, special dry-compound powders, such as powdered graphite and sodium chloride, powdered talc, soda ash, and limestone are used.

Preventing Fires:

Knowing how to deal with a fire is important, but knowing how to prevent one is just as important. The following is a list of ways that every Amberwood Products, Inc. employee can help prevent fires:

* Know where fire extinguishers are kept, what each is for, and how to use them.

* Maintain a neat, clean work area, and prevent accumulation of rubbish.

* Put oil-soaked and paint-soaked rags in covered metal containers.

* Observe all "No Smoking" signs.

* Keep fire doors, exits, stairs, fire lanes, and fire-fighting equipment clear of obstructions.

* Keep all flammable materials away from furnaces or other sources of ignition.

* Report any fire hazards you see that are beyond your control, especially electrical hazards, which are the sources of many fires.

An Important Note about Combustibles:

Combustible materials and fumes from paint, solvents, and other flammable substances are responsible for many fires in industry. Fumes can reach out a considerable distance and become ignited by a furnace, stove, electrical equipment, or even a lit cigarette.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Report Generation Date: 02/13/2018

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Calif. Code	Description	2007	2008
211	HALOGENATED SOLVENTS	0.30000	0.00000
213	HYDROCARBON SOLVENTS	5.50000	3.90000
291	LATEX WASTE	0.00000	0.20000
	Grand Totals	**5.80000**	**4.10000**

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by California Bank & Trust to conduct a Government Agency Limited Environmental Site Assessment for the property located at 1555 South 7th Street in San Jose, California. AEI completed this project in conformance with the scope requirements set forth by California Bank & Trust.

Property Description

The subject property is located on the south corner of the intersection of South 7th Street and East Alma Avenue in a mixed commercial and industrial area of San Jose, California. The property totals approximately 17.4 acres and is improved with five (5) single-story mixed use warehouse, manufacturing and office buildings; one (1) two-story office building; and one (1) single-story mixed use office, storage and manufacturing building with a mezzanine totaling approximately 307,000 square feet. The buildings are occupied by Cal Air-Johnson Controls, Green Waste Disposal, Piedmont Moving Systems and Amberwood Products. On-site operations consist of heating and air-conditioning equipment assembly, warehouse and storage, truck repair, and cabinet making activities. In addition to the subject property buildings, the property is improved with asphalt-paved parking areas and associated landscaping. The property was developed with the current buildings prior to 1980.

Based on a review of regulatory agency files, the current improvements on the subject property were occupied by Orchard Supply Hardware, which included packaging and warehouse operations from at least 1980 to 1994. Amberwood Products and Cal Air-Johnson Controls. have occupied the subject property since at least 1995, Piedmont Moving and Storage since at least 1997 and Green Waste Disposal since at least 2007.

The subject property was identified during the regulatory database search as a HAZNET, Leaking Underground Storage Tank (LUST), Resource Conservation and Recovery Act- Small Quantity Generator (RCRA-SQG), Facility Index (FINDS), Cortese, Historical Santa Clara LUST, Emissions Inventory Data (EMI) and San Jose Hazmat site. Please refer to Sections 2.1 and 2.2 for information regarding the former presence of underground storage tanks (USTs), and the current and former presence of hazardous materials, and petroleum products associated with the subject property.

The immediately surrounding properties consist of American Scissor Lift (1566 South 7th Street), ACG Van Lines, Golden State Trucking (1404 South 7th Street) and a moving company to the northeast beyond South 7th Street; abandoned railroad tracks and vacant land to the southeast; Southern Lumber Company (1402 Monterey Highway) to the southwest; and Smurfit-Recycling Center (205 East Alma Avenue) to the northwest beyond Alma Avenue.

The adjacent property (1540 South 7th Street) located to the northeast beyond South 7th Street was identified as a LUST site in the regulatory database and is further discussed in Section 3.3.

Based upon groundwater monitoring data for nearby sites, groundwater flow beneath the subject property is inferred to be to the north and the depth to groundwater is at approximately 12.5 feet below ground surface (bgs).

Findings

Recognized environmental conditions (RECs) are defined by the ASTM Standard as the presence or likely presence of any hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of a release into structures on the property or into the ground, groundwater, or surface water of the property. AEI's investigation has revealed the following recognized environmental conditions associated with the subject property or nearby properties:

- No on-site recognized environmental conditions were identified during the course of this investigation.

Historical recognized environmental conditions are defined by the ASTM Standard as an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently. AEI's investigation has revealed the following historical recognized environmental conditions associated with the subject property or nearby properties:

- The subject property was identified as a Leaking Underground Storage Tank (LUST) and Historical LUST site in the regulatory database. According to records on file with the Santa Clara County Environmental Health Department-Local Oversight Program (SCCEHD-LOP), the subject property was formerly equipped with a total of four USTs, including one 550-gallon gasoline UST (Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C), and one 10,000-gallon methanol UST (Tank M). The three gasoline USTs were reportedly constructed of steel and were removed in April 1989. Tank M was removed in March 1989. No further information regarding leak detection monitoring or construction types of the USTs was available. Upon removal of the USTs, Tanks A, C, and M were noted to be in good condition; however, Tank B was noted with several small holes visible and soil contamination was noted beneath Tank B. Following removal of the USTs in April 1989, a total of seven soil samples were collected from the tank pits and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G) and benzene, toluene, ethylbenzene and xylenes (BTEX). Soil contamination was analyzed to be at concentrations up to 8,700 parts per million (ppm) of TPH-G, 16 ppm of benzene, 260 ppm of toluene, 170 ppm of ethylbenzene, and 740 ppm of xylenes from beneath Tank B. Based on this information, soil was overexcavated from the former area of Tank B to a depth of 13.5 feet bgs in order to remove any further contamination and until soil samples showed non-detect levels of TPH-G and BTEX. Verification samples collected at 13.5 feet bgs did not contain detectable levels of TPH-G or BTEX. A four-part composite soil sample was collected from the stockpiled soil and was analyzed to have non-detect concentrations of TPH-G and BTEX. The UST pit was then backfilled with the stockpiled soil. Groundwater samples were collected from June 1990 to July 1992 from one groundwater monitoring well MW-1 and no groundwater contamination was detected. Based on the laboratory results and work performed at the subject property, the Santa Clara Valley Water District concluded that any residual soil contamination was limited and contamination had not affected the groundwater and therefore case closure was granted in May 1993. In the case closure letter, it was requested that MW-1 be decommissioned. No further documentation was found regarding the destruction of this

well; however, the well was not observed during the onsite reconnaissance. Based on this information, the former presence of USTs on the subject property are not expected to represent a significant concern.

Environmental issues include environmental concerns identified by AEI that warrant discussion but do not qualify as recognized environmental conditions, as defined by the ASTM Standard. AEI's investigation has revealed the following environmental issues associated with the subject property or nearby properties:

- During the onsite reconnaissance of the Piedmont Moving and Storage facility on the subject property, several containers of hazardous materials and petroleum products were observed, including two used motor oil 55-gallon drums, one new and one used antifreeze 55-gallon drums, one 55-gallon drum of citrus-based solvent, one 55-gallon drum of oil filters, one 55-gallon drum of diesel fuel, and one 55-gallon aboveground storage tank (AST) of new motor oil. Although minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface of the subject property. No floor drains, sumps, or other conduits to the subsurface of the subject property were observed. Based on a review of regulatory agency records, violations at the subject property have generally been limited to paperwork and labeling issues. Secondary containment is currently in place for the drums and larger containers in use at the property. Based on the presence of secondary containment, the lack of a documented release or significant violations, and the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern.

- During the onsite reconnaissance of the Cal Air-Johnson Controls facility on the subject property, several containers of hazardous materials were observed, including a 55-gallon drum of hazardous waste rags, two 55-gallon drums used in the storage of waste trichlorofluoromethane (Freon), several small (less than 15 gallons) drums of new Freon, and several small containers of refrigerant oils. All hazardous materials were noted to be stored within secondary containment atop an asphalt-paved area. Based on the lack of documented evidence indicating a release of hazardous materials or petroleum products at the site, the presence and former presence of hazardous materials and petroleum products as well as the generation and storage of hazardous waste on the subject property is not expected to represent a significant environmental concern to the subject property at this time.

- According to records on file with the San Jose Fire Department (SJFD), chlorinated solvents were stored on the property from at least 2001 to 2005. Based on a review of regulatory agency records, violations at the subject property have generally been limited to paperwork and labeling issues. Based on the relatively short amount of time the solvents were stored on the subject property and the lack of documented evidence indicating a release of hazardous materials or petroleum products at the site, the presence and former presence of hazardous materials and petroleum products as well as the generation and storage of hazardous waste on the subject property is not expected to represent a significant environmental concern to the subject property at this time.

- During the onsite reconnaissance of the Amberwood Products facility on the subject property, thirteen 55-gallon drums of sealants and lacquers and approximate 320 gallons of wood stain in smaller drums (less than 15 gallons) were observed. The containers were stored atop a cement pad and no drains or conduits to the subsurface were observed. Additionally, a 1998 *Hazardous Materials Business Plan* (HMBP) for the subject property occupant Amberwood Products indicated that 55-gallons drums of lacquer-based sanding sealer, lacquer-based stain, lacquer-based top coats, water-based sanding sealer, water-based stain and water-based top coats were stored at the subject property. Based on the nature of the hazardous materials, the lack of a documented release or significant violations, and the good housekeeping observed, the cabinet making operations at the subject property are not expected to represent a significant environmental concern.

Conclusions, Opinions, and Recommendations

AEI's investigation has revealed no evidence of recognized environmental conditions associated with the subject property or nearby properties. AEI recommends no further investigations for the subject property at this time.

The report is intended for the sole use of California Bank & Trust ("Bank"). No republication, copying or distribution of any part of this report is authorized without the Bank's express written consent. Bank makes no representation as to the accuracy of any information or conclusion in the report, and no person, other than Bank, is entitled to rely on the report

1.0 INTRODUCTION

This report documents the methods and findings of the Limited Environmental Site Assessment of the subject property located at 1555 South 7th Street in San Jose, California.

1.1 Purpose

The purpose of this Limited Environmental Site Assessment is to identify potential environmental liabilities at the subject property arising from past or present practices in the handling, storage or disposal of hazardous materials or petroleum products on-site or at neighboring sites. This is an abbreviated assessment based on the following activities:

- Site inspection and interviews;
- Database search of local, state, and federal databases to identify known or suspected hazardous sites within a one mile radius of the subject property; and
- Limited historical source review.

1.2 Limitations

AEI Consultants (AEI) has performed this environmental screen in accordance with generally accepted environmental property assessment practices. No environmental hazards were found which would warrant a Phase I Environmental Site Assessment. However, AEI must state that this screen may not identify all environmental impacts or potential impacts which may be identified in a full Phase I Environmental Site Assessment.

Property conditions, as well as local, state and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. No warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

For the purpose of this Limited Environmental Site Assessment, only the subject property and adjacent parcels were investigated. This investigation was prepared for the sole use and benefit of California Bank & Trust. Neither this report, nor any of the information contained herein shall be used or relied upon for any purpose by any person or entity other than California Bank & Trust.

1.3 Limiting Conditions

The Scope of Work for this project is limited and is not intended to serve as an ASTM-standard Phase I Assessment. The performance of this Limited Environmental Site Assessment was limited by the following conditions:

- Due to the size of the subject property, AEI performed a site inspection of the property utilizing a field technique of traversing the site in an attempt to provide an overlapping field of view. Due to the size of the property and the vehicles present onsite, isolated areas of the site may have not been accessible for direct observation during AEI's inspection.

- Due to the large volume of stored products within the warehouse portion of the building, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI's site inspection.

2.0 GOVERNMENT AGENCY RECORDS REVIEW

2.1 County or State Environmental Health Department

On December 19, 2007, the Santa Clara County Environmental Health Department (SCCEHD) was contacted to review files on the subject property. Files at the SCCEHD may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

According to records on file with the SCCEHD, as of January 2007, the subject property occupant Piedmont Transfer and Storage generates 660 gallons of used motor oil, 330 gallons of used antifreeze, 100 gallons of used oil filters, 5 gallons of used absorbent and 30 gallons of waste from the parts washer on an annual basis. Please refer to Section 2.2 for further information regarding the hazardous materials stored at the subject property.

On December 19, 2007, the SCCEHD Local Oversight Program (LOP) on-line files database was accessed to review files on the subject property and nearby sites of concern. Files at the SCCEHD-LOP may contain information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

- The subject property was identified as a Leaking Underground Storage Tank (LUST) and Historical LUST site in the regulatory database. According to records on file with the Santa Clara County Environmental Health Department-Local Oversight Program (SCCEHD-LOP), the subject property was formerly equipped with a total of four USTs, including one 550-gallon gasoline UST (Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C), and one 10,000-gallon methanol UST (Tank M). The three gasoline USTs were reportedly constructed of steel and were removed in April 1989. Tank M was removed in March 1989. No information regarding leak detection monitoring or construction types of the USTs was available. Upon removal of the USTs, Tanks A, C, and M were noted to be in good condition; however, Tank B was noted with several small holes visible and soil contamination was noted beneath Tank B. Following removal of the USTs, a total of seven soil samples were collected from the tank pits in April 1989 and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G) and benzene, toluene, ethylbenzene and xylenes (BTEX). Soil contamination was analyzed to be at concentrations up to 8,700 parts per million (ppm) of TPH-G, 16 ppm of benzene, 260 ppm of toluene, 170 ppm of ethylbenzene, and 740 ppm of xylenes from beneath Tank B. Based on this information, soil was overexcavated from the former area of Tank B to a depth of 13.5 feet bgs in order to remove any further contamination and until soil samples showed non-detect levels of TPH-G and BTEX. Verification samples collected at 13.5 feet bgs did not contain detectable levels of TPH-G or BTEX. A four-part composite soil sample was collected from the stockpiled soil and was analyzed to have non-detect concentrations of TPH-G and BTEX. The UST pit was then backfilled with the stockpiled soil. Groundwater samples were collected from June 1990 to July 1992 from one groundwater monitoring well MW-1 and no groundwater

contamination was detected. Based on the laboratory results and work performed at the subject property, the Santa Clara Valley Water District concluded that any residual soil contamination was limited and contamination had not affected the groundwater and therefore case closure was granted in May 1993. In the case closure letter, it was requested that MW-1 be decommissioned. No further documentation was found regarding the destruction of this well; however, the well was not observed during the onsite reconnaissance. Based on this information, the former presence of USTs on the subject property are not expected to represent a significant concern.

Information on file with the SCCEHD-LOP reviewed for nearby sites is further discussed in Section 3.0.

2.2 City Fire Department

On December 19, 2007, the San Jose Fire Department (SJFD) online database was visited for information on the subject property to identify any evidence of previous or current hazardous material usage.

According to records on file with the SJFD, a 1997 *Hazardous Material Business Plan* (HMBP) for the subject property occupant Piedmont Transfer and Storage (also known as Piedmont Moving), indicated that 150 gallons of motor oil, an auto parts cleaner containing 30 gallons of solvent, as well as small quantities (less than 15 gallons) of carburetor cleaner, brake cleaner, antifreeze, and spray paint were stored on the subject property. Additionally, a 2000 HMBP noted that hazardous materials stored on the property included 55 gallons of antifreeze/coolant, 185 gallons of motor oil, 5 gallons of gear oil, 5 gallons of gasoline, 5 gallons of diesel fuel, 100 gallons of used oil, 55 gallons of used antifreeze and 20 gallons of spent solvent (petroleum-based only), automotive batteries, 50 gallons of propane, as well as small quantities of lubricant, spray paint and starting fluid and truck tires. Please refer to Section 3.3 for further information regarding the storage of hazardous materials onsite.

Additionally, a 1998 *Hazardous Materials Business Plan* (HMBP) for the subject property occupant Amberwood Products indicated that 55-gallons drums of lacquer-based sanding sealer, lacquer-based stain, lacquer-based top coats, water-based sanding sealer, water-based stain and water-based top coats were stored at the subject property. Based on the nature of the hazardous materials, the lack of a documented release or significant violations, and the good housekeeping observed, the cabinet making operations at the subject property are not expected to represent a significant environmental concern.

HMBPs for 2001, 2002 and 2005 were also on file with the SJFD for the subject property occupant Cal Air-Johnson Controls indicated that 55 gallons of waste oils, 10 gallons of chlorinated hydrocarbon solvent (containing trichlorethane), as well as Freon, refrigerant oils, duct sealer, paints, petroleum based oils, water treatment chemicals, acids and gases were stored at the subject property. Based on the relatively short amount of time the solvents were stored on the subject property and the lack of documented evidence indicating a release of hazardous materials or petroleum products at the site, the presence and former presence of hazardous

materials and petroleum products as well as the generation and storage of hazardous waste on the subject property is not expected to represent a significant environmental concern to the subject property at this time.

2.3 City Building Department

On December 20, 2007, the San Jose Building Department (SJBD) online database was searched for information on the subject property in order to identify historical tenants and property use. Please refer to the following table for a listing of permits reviewed:

Building Permits Reviewed

Year(s)	Applicant	Description of Permit / Building Use
1980	Orchard Supply Hardware	Certificate of Occupancy/Packaging Room
1988	Orchard Supply Hardware	Re-Roof/Warehouse

		Restroom Improvements/Piedmont Moving and Storage
		Interior Alterations/Office and Warehouse

Based on a review of building department records, it appears the subject property was occupied by Orchard Supply Hardware, which included packaging and warehouse operations from at least 1980 to 1994. Amberwood Products and Cal Air-Johnson Controls. have occupied the subject property since at least 1995, Piedmont Moving and Storage since at least 1997 and Green Waste Disposal since at least 2007.

Please refer to Sections 2.1 and 2.2 for information regarding the underground storage tanks and hazardous materials associated with these businesses.

2.4 Previous Environmental Investigations or Client-Provided Information

No prior environmental reports in association with the subject property were made available to AEI during the course of this investigation.

3.0 REVIEW OF REGULATORY AGENCY RECORDS

The following information was obtained through a search of electronically compiled federal, state, county, and city databases provided by Environmental Data Resources. The database search includes regulatory agency lists of known or potential hazardous waste sites, landfills, hazardous waste generators, and disposal facilities in addition to sites under investigation. The information provided in this report was obtained from publicly available sources. The locations of the sites listed in this report are plotted with a geographic information system utilizing geocoding of site addresses. The accuracy of these locations is generally +/- 300 feet. AEI's field representative has attempted to confirm the locations of listings on or adjacent to the subject property. Refer to the radius map (Appendix B: Regulatory Database) for a location of the sites in relation to the subject property.

3.1 Records Summary

DATABASE REVIEWED	SUBJECT PROPERTY	ADJACENT PROPERTY
Identification as National Priorities List (NPL) "Superfund" site	No	No
Identification as RCRA CORRACTS site	No	No
Identification as Historical State (Historical CalSites SPL/SCL) site	No	No
Identification as a ENVIROSTOR site	No	No
Identification as CERCLIS and/or CERCLIS/NFRAP site	No	No
Reported as leaking underground storage tanks (LUST) site	**Yes**	**Yes**
Identification as solid waste landfill (SWLF)	No	No
Registered underground/aboveground storage tanks (UST/AST)	No	No
Identification as an Emergency Response Notification Systems (ERNS) site	No	No
Identification as hazardous waste handler and/or generator (RCRA-TSD, LQG and/or SQG)	**Yes**	No
Identification as SLIC Site	No	No
Identification as Additional Sites	**Yes**	No

The subject property was identified during the regulatory database search as a HAZNET, LUST, RCRA-SQG and associated FINDS site, Cortese, Historical Santa Clara LUST, EMI and San Jose Hazmat site and is further discussed in Section 3.3. The adjacent property (1540 South 7th

Street) located to the northeast beyond South 7th Street was identified as a LUST site in the regulatory database and is further discussed in Section 3.3.

3.2 Contaminant Migration

Migration of petroleum hydrocarbon or volatile organic compound (VOC) contamination is generally via groundwater. Therefore, only those contaminant release sites located hydrologically upgradient relative to the subject property are expected to represent a potential environmental concern to the subject property. Contaminated sites located hydrologically downgradient of the subject property are not expected to represent a potential threat to the groundwater quality beneath the subject property. Sites that are situated hydrologically cross-gradient relative to the subject property are not expected to represent a concern unless close proximity allows for the potential of lateral migration. As discussed in Section 2.3, groundwater in the vicinity of the subject property is inferred to flow to the north.

3.3 Record Details

National Priorities List (NPL) is EPA's national listing of contaminated sites targeted for cleanup because they pose a threat to human health and the environment. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or Superfund) authorizes and requires the EPA to investigate, categorize, and enforce the cleanup of hazardous waste sites on the NPL. An NPL site on or near a particular property may threaten the environmental integrity of the property or affect its marketability.

One site within a 1-mile radius of the subject property was identified during the NPL database search and is further discussed below.

- Lorentz Barrel and Drum Co. at 1515 South 10th Street is located approximately 632 feet to the east-northeast (hydrologically down- to cross-gradient) of the subject property. This site was also identified as a Historical Cal-Site, EnviroStor, US Institutional Control, US Engineering Control, DEED, Historical UST, Records of Decision (ROD), Consent, HAZNET and CERCLIS site. According to records on file with the Department of Toxic Substances and Control (DTSC), steel drums were recycled at the site from at least 1947 to 1987 and the shallow groundwater below the site was subsequently contaminated with chlorinated organic solvents, including trichloroethane, trichloroethylene, 1,1-dichloroethylene, and tetrachloroethylene. Based on the contamination present at the site, land use restrictions were put in place and a cap was installed on the site. The site was placed on the final NPL list on October 4, 1989. Based on the relative distance from the subject property and the inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern.

CORRACTS is an EPA-maintained database of Resource Conservation and Recovery Act (RCRA) facilities undergoing "corrective action". A "corrective action order" is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA

facility. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred, even if it predates RCRA.

No sites within a 1-mile radius of the subject property were identified during the CORRACTS database search.

Historical California Sites (CalSites) are provided by the California Environmental Protection Agency (EPA), Department of Toxic Substances Control (DTSC) and include state equivalent NPL (SPL) and CERCLIS (SCL) sites. The CalSites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the CalSites database. The database is no longer updated by the state agency and has been replaced by EnviroStor.

One site within a 1-mile radius of the subject property was identified during the Historical CalSites database search. This Site was identified as Lorentz Barrel and Drum Co. (1515 South 10th Street) and was previously discussed in the NPL segment of this section.

ENVIROSTOR is a database maintained by the DTSC Site Mitigation and Brownfields Reuse Program, which identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (NPL); States Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Seven sites within a 1-mile radius of the subject property were identified during the EnviroStor database search. Four of these sites were plotted over ½-mile from the subject property or are listed with No Further Action status, and are therefore not expected to represent a significant environmental concern. The remaining site was identified as Lorentz Barrel and Drum Co. (1515 South 10th Street) and was previously discussed in the NPL segment of this section.

CERCLIS and CERCLIS/NFRAP are lists of sites that the EPA has investigated or is presently investigating for release or threatened release of hazardous substances, which may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA, also known as Superfund). Sites listed on the "No Further Remedial Action Planned" (NFRAP) database are sites where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require federal Superfund or NPL consideration.

Two sites within a ½-mile radius of the subject property were identified during the CERCLIS/NFRAP database search. One of these sites was plotted over ¼-mile from the subject

property and is therefore not expected to represent a significant environmental concern. The remaining site was identified as Lorentz Barrel and Drum Co. (1515 South 10th Street) and was previously discussed in the NPL segment of this section.

Leaking Underground Storage Tanks (LUST) List is a list produced by the Regional Water Quality Control Board (RWQCB) of known sites with current or former leaking underground storage tanks on the premises.

The subject property was identified during the LUST database search, as well as the associated Historical LUST and Cortese database searches. These listings were previously discussed in Section 2.3.

Sixty one (61) sites within a ½-mile radius of the subject property were identified during the LUST database search. Five of these sites were plotted within ⅛-mile of the subject property; however, two of these sites are listed twice and therefore only three sites are discussed below.

- The Robert Sommer Property at 1540 South 7th Street is located adjacent to the west (hydrologically cross-gradient) of the subject property and was listed twice in the database. According to records on file with the SCCEHD, a 500-gallon gasoline UST was removed from the property in 1985. Groundwater samples contained elevated concentrations of TPH-G, xylenes, and ethylbezene; however groundwater contamination was believed to be localized to the area adjacent to the former tank pit. Though no remedial action took place at the site, regulatory case closure was granted in January 2000 based on the limited extent of groundwater and soil contamination and the natural attenuation that had taken place. Based on the current regulatory status and the inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern.

- W.H. Ebert Corporation, located at 1620 South 7th Street was plotted 347 feet south-southeast (hydrologically up-gradient) of the subject property and was listed twice in the database. According to records on file with the SCCEHD, a 10,000-gallon gasoline UST and a 10,000-gallon diesel UST were removed from the property in June 1999. Groundwater samples taken in August 2000 contained elevated concentrations of TPH-G, Total Petroleum Hydrocarbons as Diesel (TPH-D), benzene, and Methyl tert-butyl ether (MTBE). In 2002, groundwater contamination levels of MTBE and TPH-G had decreased and, as contamination was found to be limited to the areas directly adjacent to the former tank pit, regulatory case closure was granted in October 2002. Based on the current regulatory status and the limited extent of contamination, this site is not expected to represent a significant environmental concern.

- GI Trucking, located at 1634 South 7th Street was plotted 515 feet south-southeast of the subject property. According to records on file with the SCCEHD, groundwater at this site flows in the easterly direction making the site hydrologically down-gradient of the subject property. Based on the relative distance from the subject property and the direction of groundwater flow, this site is not expected to represent a significant environmental concern.

Of the remaining forty six (46) sites identified, forty one (41) are listed with regulatory case closed status. The remaining five sites were plotted over ⅛-mile and are located hydrologically cross- to down-gradient of the subject property. Based on the relative distance from the subject property, the current regulatory status and/or the inferred direction of groundwater flow, these sites are not expected to represent a significant environmental concern.

Solid Waste Landfills (SWLF) is a database generated by the State of California Solid Waste Information System (SWIS), which includes active and inactive landfills and transfer stations within the state maintained by the California Integrated Waste Management Board.

One site within a ½-mile radius of the subject property was identified during the SWLF database search; however, this site was plotted 2,086 feet hydrologically cross-gradient of the subject property and is therefore not expected to represent a significant environmental concern.

Underground/Aboveground Storage Tanks (UST/AST) List is a comprehensive listing of registered underground and aboveground storage tanks located within the State of California.

No sites within a ¼-mile radius of the subject property were identified during the UST/AST database search.

Emergency Response Notification Systems (ERNS) List is EPA's database of emergency response actions.

The subject property was not identified during the ERNS database search.

Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. Information from the RCRA database is divided into three categories: TSD, LQG and SQG. The TSD category is searched to a 1-mile radius and tracks facilities which treat, store and/or dispose of hazardous waste. LQG, or large generators, are facilities that generate more than 1000 kg of hazardous waste per month. SQG, or small generators, are facilities that generate between 100 and 1000 kg of hazardous waste per month. The LQG and SQG databases are searched up to a ⅛-mile radius from the subject property.

The subject property was identified during the RCRA-SQG database search and the associated FINDS and San Jose Hazmat database searches. The storage of hazardous materials and petroleum products and the generation of hazardous waste on the subject property was previously discussed in Section 2.3.

No sites within a 1-mile radius of the subject property were identified during the RCRA-TSD database search.

No sites within a ⅛-mile radius of the subject property were identified during the RCRA-LQG database search.

Two sites within a 1/8-mile radius of the subject property were identified during the RCRA-SQG database search.

The storage, treatment, disposal and/or generation of hazardous materials at these sites is not a significant environmental concern based on the lack of a documented release or factors discussed in prior segments of Section 3.3.

SLIC sites are provided by the Regional Water Quality Control Board (RWQCB). This list includes sites that have recorded spills, leaks, investigations, and cleanups.

No sites within a 1/8-mile radius of the subject property were identified during the SLIC database search.

HAZNET Sites database consists of data that is extracted from the copies of hazardous waste manifests received each year by the DTSC.

The subject property occupant Johnson Controls was identified during the HAZNET database search for the disposal of off-specification, aged, or surplus organics; and polychlorinated biphenyls; and material containing PCB's.

The subject property occupant Orchard Supply Hardware was identified during the HAZNET database search for the disposal of aqueous solution with less than 10% total organic residues, and photochemicals/photoprocessing waste.

The subject property occupant Cal Air, Inc. was identified during the HAZNET database search for the disposal of off-specification, aged, or surplus organics; solids or sludges with halogenated organic compounds greater than 1000mg/kg; liquids with halogenated organic compounds; other organic solids; other inorganic solid waste; asbestos-containing waste; liquids with polychlorinated biphenyls greater than 50 mg/l; halogenated solvents; waste oil and mixed oil; paint sludge; polychlorinated biphenyls and material containing PCB's; organic liquids (nonsolvents) with halogens; and latex waste.

The subject property occupant Amberwood Products, Inc. was identified during the HAZNET database search for the disposal of oxygenated solvents, other inorganic solid waste and unspecified solvent mixture waste.

Please refer to Section 2.3 for information regarding the hazardous materials stored at the subject property.

Emissions Inventory Data Sites (EMI) database consists of toxics and criteria pollutant emissions data collected by the Air Resources Board and local air pollution agencies.

The subject property occupant Amberwood Products, Inc. was identified during the EMI database search for the years 1997 through 2005. Based on the nature of this listing, it is not expected to represent a significant environmental concern.

4.0 SITE INSPECTION AND RECONNAISSANCE

On December 21, 2007, a site reconnaissance of the subject property and adjacent properties was conducted by Ms. Brie Solaegui of AEI in order to obtain information indicating the likelihood of recognized environmental conditions at the subject property and adjacent properties as specified in ASTM E1527 §8.4.2, 8.4.3 and 8.4.4.

☐	☒	Solid Waste Disposal or Evidence of Fill Materials
☐	☒	Waste Water Discharges
☐	☒	Wells
☐	☒	Septic Systems
☐	☒	Other

The subject property is currently occupied by Cal Air-Johnson Controls, Green Waste Disposal, Piedmont Moving Systems and Amberwood Products. On-site operations consist of heating and air-conditioning equipment assembly, warehouse, and storage, truck repair, and cabinet making activities. Hazardous materials utilized during these operations are discussed below.

Hazardous Substances and/or Petroleum Products in Connection with Property Use/ Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs / USTs)

During the onsite reconnaissance of the Piedmont Moving and Storage facility on the subject property, several containers of hazardous materials and petroleum products were observed, including two used motor oil 55-gallon drums, one new and one used antifreeze 55-gallon drums, one 55-gallon drum of citrus-based solvent, one 55-gallon drum of oil filters, one 55-gallon drum of diesel fuel, and one 55-gallon aboveground storage tank (AST) of new motor oil. Although

minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface of the subject property. No floor drains, sumps, or other conduits to the subsurface of the subject property were observed. Based on a review of regulatory agency records, violations at the subject property have generally been limited to paperwork and labeling issues. Secondary containment is currently in place for the drums and larger containers in use at the property. Based on the presence of secondary containment, the lack of a documented release or significant violations, and the good housekeeping observed, the auto repair operations at the subject property are not expected to represent a significant environmental concern.

During the onsite reconnaissance of the Cal Air-Johnson Controls facility on the subject property, several containers of hazardous materials were observed, including a 55-gallon drum of hazardous waste rags, two 55-gallon drums used in the storage of waste trichlorofluoromethane (Freon), several small (less than 15 gallons) drums of new Freon, and several small containers of refrigerant oils. All hazardous materials were noted to be stored within secondary containment atop an asphalt-paved area. Based on a review of regulatory agency records, violations at the subject property have generally been limited to paperwork and labeling issues. Based on the relatively short amount of time the solvents were stored on the subject property and the lack of documented evidence indicating a release of hazardous materials or petroleum products at the site, the presence and former presence of hazardous materials and petroleum products as well as the generation and storage of hazardous waste on the subject property is not expected to represent a significant environmental concern to the subject property at this time.

During the onsite reconnaissance of the Amberwood Products facility on the subject property, thirteen 55-gallon drums of sealants and lacquers and approximate 320 gallons of wood stain in smaller drums (less than 15 gallons) were observed. The containers were stored atop a cement pad and no drains or conduits to the subsurface were observed. Based on the nature of the hazardous materials, the lack of a documented release or significant violations, and the good housekeeping observed, the cabinet making operations at the subject property are not expected to represent a significant environmental concern.

Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic polychlorinated biphenyls (PCBs) were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

One pad-mounted transformer was observed on the subject property during the site inspection. The transformer is owned and operated by Pacific Gas & Electric (PG&E), and based on the presumed date of installation, may be PCB containing. No spills, staining or leaks were observed on or around the transformer. Based on the good condition of the equipment, the transformer is not expected to represent a significant environmental concern.

Interior Stains or Corrosion

Staining associated with the onsite use of wood stains and lacquers by the subject property occupant Amberwood Products were observed during the onsite reconnaissance. Based on the lack of conduits to the subsurface and the nature of the staining, it is not expected to represent a significant environmental concern.

During the onsite reconnaissance of Piedmont Moving and Storage, minor staining typical of auto repair operations was observed in several areas, overall housekeeping appeared adequate to prevent an impact to the subsurface of the subject property. No floor drains, sumps, or other conduits to the subsurface of the subject property were observed. Based on the lack of conduits to the subsurface and the nature of the staining, it is not expected to represent a significant environmental concern.

Strong, Pungent or Noxious Odors

Strong odors associated with the onsite use of stains and lacquers by the subject property occupant Amberwood Products were observed during the onsite reconnaissance. Based on the nature of the odor, it is not expected to represent a significant environmental concern.

Drains and Sumps

Several storm drains were observed in the parking area of the subject property. No hazardous substances or petroleum products were noted in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

A sump pump was noted in the warehouse area associated with Cal Air-Johnson Control. According to a representative of Cal Air, the sump pump is used when the warehouse floods due to the water runoff from the neighboring tenant, Green Waste Disposal. It was reported that Green Waste Disposal rinses the garbage bins on the property and the waste water subsequently floods Cal Air's warehouse building. However, based on the use of the sump pump for green waste water runoff only, the presence of the sump pump is not expected to represent a significant environmental concern.

4.2 Non-ASTM Services

Building Components

In general, building components that are in good condition are not expected to represent a health and safety concern to the occupants of a property. Please refer to the table below for a general description of the building components observed during AEI's site inspection.

Observed Building Components

Material	Location	Condition
Drywall Systems	Throughout Office Building Interiors	Good
2' x 4' Ceiling Tiles	Throughout Office Building Interiors	Fair
Roofing Systems	Roof	Not Inspected

Building components were observed to be in good to fair condition during AEI's site inspection.

Asbestos-Containing Building Materials

For buildings constructed prior to 1980, the Code of Federal Regulations (29 CFR 1926.1101) states that all thermal system insulation (boiler insulation, pipe lagging, and related materials) and surface materials must be designated as "presumed asbestos-containing material" (PACM) unless proven otherwise through sampling in accordance with the standards of the Asbestos Hazard Emergency Response Act.

Regardless of building construction date, the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP) requires that an asbestos survey adhering to AHERA sampling protocol be performed prior to demolition or renovation activities that may disturb ACMs. This requirement is typically enforced by the local air pollution control or air quality management district, and specifies that all suspect asbestos-containing materials (ACMs) be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

In general, the following commonly-encountered building components are considered to be friable materials: acoustical plaster, fireproofing, drywall systems, ceiling tiles, wall and ceiling texturing, thermal systems insulation (TSI), various mastics, and roofing products. The following commonly-encountered building materials are considered to be non-friable: vinyl floor tile, sheet vinyl flooring, and asbestos-cement products.

Lead-Based Paint

Lead-based paint is any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g by dry weight) or more of lead. In Section 1017 of the Housing and Urban Development Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", states that a lead-based paint hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its

condition monitored to ensure that it does not deteriorate and become a hazard. In buildings constructed after 1978, it is very unlikely that lead-based paint is present.

Due to the age of the subject property building, there is a potential that lead-based paint is present. Both interior and exterior painted surfaces were observed to be in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. However, actual material samples would need to be collected in order to determine if lead-based paint is present.

Local regulations may apply to lead-based paint in association with building renovation/demolition and worker/occupant protection. Actual material samples would need to be collected in order to determine if lead-based paint is present.

5.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

AEI Consultants performed this Limited Environmental Site Assessment of the property located at 1555 South 7th Street in San Jose, California, in conformance with the scope and limitations set forth by California Bank & Trust.

APPENDIX F

QUALIFICATIONS

Megan Nolet – Project Manager, Due Diligence

BA- Environmental Studies, Brown University, Providence, RI

Ms. Nolet provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Assessments, Environmental Transaction Screens, Regulatory Database Review, and Historical Records Review.

Project experience for Ms. Nolet includes:

- Phase I Environmental Site Assessments (PHI ESA)
- Environmental Transaction Screens (ETS)
- Regulatory Database Review
- Historical Records Review

In addition, prior to joining the environmental consulting industry, Ms. Nolet spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

Jeffery J. Smith – National Client Manager

BS - Environmental Engineering, Columbia Southern University
Hazardous Materials Technology, Front Range Community College

ASTM Update Training, 1997, 1998, 2000, 2010, 2014
ASTM All Appropriate Inquiry (AAI) Training, 2005, 2006, 2010
Accredited EPA Asbestos Hazard Emergency Response Act (AHERA) Inspector, 1992 – current
State of Colorado Licensed Asbestos Inspector, 1995 – current
HUD Visual Lead-Based-Paint Assessment Training, 2011
Wood Boring Organism Training – National Association of Certified Home Inspectors (NACHI), 2015

Mr. Smith's consulting experience began in 1993 in the environmental / hazardous materials management field servicing industry while conducting waste management / disposal and railroad emergency spill response activities. He subsequently evolved into a Project Manager position and has completed more than 1,000 Phase I Environmental Site Assessments (ESAs) and Property Condition Assessments (PCAs) on multi-family residential, healthcare, commercial / retail, industrial, and hotel properties in 38 states including Hawaii and Alaska, a limited number of mid-sized US ski resorts, and select coastal resort properties in Mexico. During that time, he was involved with asbestos containing material (ACM) / lead-based paint (LBP) / radon sample collection, Probable Maximum Loss (PML) seismic information collection, Fannie Mae / Freddie Mac / HUD agency inspections, Site Investigation / Phase II field work, Construction Report Monitoring, and new employee training / existing employee cross-training. Mr. Smith has conducted dual scope ESA / PCA report reviews and client management activities since 2011.

Project experience for Mr. Smith includes:

- Phase I ESAs, Real Estate Transaction Screens and PCAs
- Phase II site investigations / Limited Subsurface sampling projects for soils, groundwater, and soils vapor delineation for due diligence purposes
- ACM, LBP, and radon sampling
- Seismic assessment and site observations for PML assessments
- Hazardous materials management including: UST removal; emergency spill response coordination; train derailment hazardous materials spill response; sampling and packaging of hazardous wastes; implementation of confined space protocol

Public Records Request Number: 2-061220-01
Location(s): 1605 S. 7th Street, San Jose, CA (APN: 477-08-037)

Dear Ms. Lee:

We have received your Public Records Act Request at the Department of Toxic Substances Control (DTSC). Upon thorough review of our files, we found no records pertaining to the site(s) referenced above.

We have located the above address(es) associated with the APN(s) you provided by searching this county database:

https://www.sccassessor.org/index.php/online-services/property-search/real-property.

For information regarding public reports on hazardous waste shipments of generators, transporters, and TSDFs, you can access our Hazardous Waste Tracking System (HWTS) online at: https://hwts.dtsc.ca.gov/. Select the “Reports” tab for search options. If you are interested in retrieving detailed reports, please contact the HWTS unit via e-mail: hwtsreports@dtsc.ca.gov or phone: 1-800-618-6942. Customized reports may require a fee. For copies of manifests, please send an e-mail to mcr@dtsc.ca.gov.

In addition, the DTSC provides access to public records online via EnviroStor; another data management system that tracks our efforts in cleanup, permitting, enforcement, and investigation of known/suspected hazardous waste sites and facilities. The available data is updated in real-time. You can access Envirostor online at www.envirostor.dtsc.ca.gov. Navigate the website easily by clicking the "How to Use EnviroStor" tab, then selecting the option “Take a Tour”.

If you have any questions or would like further information regarding your request, please contact me via phone: 510-540-3800 or e-mail: Berkeleyfileroom@dtsc.ca.gov.

Sincerely,

Christina de la Vega
Regional Records Coordinator

Public Records Request Number: 1-061220-01
Location(s): 1605 S 7th Street, San Jose, CA

Dear Requestor:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

Your request has been forwarded to our office in Berkeley as they may have records. The phone number for the Berkeley office is 510-540-3800 and the e-mail address is Berkeleyfileroom@dtsc.ca.gov.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at 916-255-4159 or via email at PubReqAct@dtsc.ca.gov.

Sincerely,

Facility History

QUARTERLY UPDATE
Quarterly Update Period: January to March 2020

Permit maintenance: The Facility is currently operating under a permit that is effective through 2022.

FACILITY DESCRIPTION/ HISTORY

The Glencore Recycling LLC facility (Facility) is located at 1695 Monterey Highway, on the corner of Barnard Avenue and Monterey Highway, in San Jose, California. The site is bordere Barnard Avenue to the southeast and Monterey Highway to the northeast. The Facility is located on approximately 2.2 acres of land zoned Heavy Industrial (HI) by the City of San Jose.

The site was used for heavy manufacturing operations beginning in the 1930s. In the mid 1960s, several members of the Levin family acquired the property and operated a used equipm sales business affiliated with their nearby ferrous scrap yard. A metal recycling operation was established at this location under the name Micro Metallics Corporation in the early 1970s. owner sold the business to Noranda Inc., a publicly traded company, in 1984. The underlying property is still held by a private company associated with the Levin family. In 2003, Norand organized its US recycling operations under the name Noranda Recycling Inc. Noranda changed names to Falconbridge and then to Xstrata Copper Canada following a series of merge acquisitions. The Facility and business names were changed to Xstrata Recycling Inc. in August 2007 to conform to the new parent company. In July 2013, Xstrata Recycling Inc. chang legal name to Glencore Recycling Inc. In December 2015, Glencore Recycling Inc. changed its legal name to Glencore Recycling LLC.

Operations at the Facility include the processing of different types of materials for metals recovery including the following: electronic scrap, components, manufacturing byproducts, wast concentrates, and residues. Tray furnaces are used to bake materials into a dry friable ash prior to physical processing and sampling. Physical processing consists of shredding, screeni and blending the waste in order to prepare a representative sample of incoming solid materials. The solid materials are subsequently prepared, packaged, and transported off-site for re at a primary smelter. Processing of solutions includes chemical stripping, refining, precipitation, and neutralization. Melting is conducted in gas-fired crucible furnaces and used to partitic recoverable metals and slag.

PERMITTING REGULATORY DESCRIPTION/ HISTORY

On November 1, 1994, DTSC issued a Hazardous Waste Facility Permit to the owner/operator with an expiration date of October 30, 2005. The Permittee filed a timely application for a renewal in 2003, which was granted on May 6, 2012.

The Facility has undergone partial closures of units in 2012 and 2013.

Currently the Facility operates 5 storage units consisting of: cyanide/caustic container storage (maximum capacity 1760 gallons), acid waste container storage (maximum capacity 1540 gallons liquid and 660 gallons solid), solid waste container storage (maximum capacity 200 cubic yards), spent cyanide treatment and storage tanks, secondary waste container storage (maximum capacity 50 cubic yards). The Facility also operates treatment units that consist of: cyanide treatment tanks; acid processing in tanks (maximum capacity 665 gallons per mon tray furnaces; crucible furnaces; refinery furnaces; a ball mill, screen and sampler; and mechanical processing equipment.

X. GENERAL COMMENTS

Micro Metallics operated as an electronic, scrap metal recycling center. On October 29, 1981, ponded rainwater was pumped from a processing area into an unpaved area. Upon realization that the discharged water contained cyanide, the Regional Water Quality Control Board was notified of the release. Micro Metallics took steps to conceptualize the lateral and vertical extent of the release and remediate contamination. In this process, 230 cubic yards of contaminated soil was removed in February and May of 1982. Monitoring wells were installed and sampled regularly showing a decline in contamination, below maximum contaminant levels. A new occupant is currently at the site, Xstrata, they conduct the same operations as the former Micro Metallics.

AMBERWOOD PRODUCTS INC
1555 S 7TH ST BLDG # 7
SAN JOSE, CA 95112

Owner ID: OW0157573
PIN: 414444

Re: Failure to Electronically Submit a Hazardous Materials Business Plan (HMBP) for AMBERWOOD PRODUCTS INC, 1555 S 7TH ST BLD 7, SAN JOSE CA 95112.

Dear Business Owner/Operator,

Our records indicate that you have a Hazardous Materials Business Plan (HMBP) permit with our office because your facility handles hazardous materials above State reporting thresholds. However, your business has not submitted or recertified your facility's HMBP annually, as required by California Health and Safety Code section 25508(a)(1)(A).

Effective January 1, 2013, HMBPs are required to be submitted electronically. You may satisfy this requirement by using our local electronic reporting website, FrontCounter (https://frontcounter.sccgov.org/). Within 30 days, complete your annual submission using FrontCounter.

To request access to FrontCounter, visit the website and click "Sign up now." Complete the form using your Owner ID Number and PIN, provided above. As long as the information is entered correctly, you should receive an e-mail within minutes containing your username and password. Check your spam/junk e-mail folder for automated messages from DEH.HMCD@deh.sccgov.org if you have not received a response within 24 hours.

It is important that you respond to this notice. Failure to electronically submit your HMBP within 30 days may result in penalties of up to *$5000 per violation per day* pursuant to California Health and Safety Code sections 25508(b) and 25515(b).

To learn more about Hazardous Materials Business Plan requirements and electronic reporting, visit our website at www.ehinfo.org/hazmat, and select "Hazardous Materials Business Plans" from the Programs and Services menu. If you require assistance, please contact Myra Reichardt by phone at (408) 918-1984, or via e-mail at hmcd.cers@cep.sccgov.org.

Sincerely,
Richard Owens

Re: Amberwood Products, Inc.

Dear Mr. Blamey:

I am writing to inform you of the outcome of the above-entitled case. The People and Amberwood Products, Inc. entered into a stipulated resolution, the terms of which are enumerated in the Stipulated Final Judgment. Pursuant to the stipulation, Amberwood Products, Inc. shall pay $11,000 in fines. $6,574.19 is to be disbursed to the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division (HMCD). Of that total, $1,475.27 represents HMCD's portion of civil penalties, and $5,098.92 is reimbursement for costs HMCD incurred during the investigation of the matter. The Santa Clara County District Attorney's Office will disburse said sum to you. The Court has also issued a permanent injunction requiring Amberwood Products, Inc. to comply with all California Hazardous Waste Control Laws.

Thank you for bringing this matter to our attention. The thorough investigation and report by Ana Bui, and the continued cooperation of your office, led to the successful resolution of this case. Should you have any questions or concerns, please feel free to contact me at (408) 792-2780 or by e-mail at Niravanisani@da.sccgov.org.

Sincerely,

Nahal Iravani-Sani
Deputy District Attorney

MEMORANDUM

February 3, 2010

To: Louisa Wong
From: Kenneth Rosenblatt
Re: Deposit of check in *People v. Amberwood Products, Inc.*, # 110CV161751

Dora gave you a check yesterday for $11,000 from Amberwood Products, Inc.

We keep $1,475.27 of this amount, to be deposited into the 0264 Fund, Cost Center 9842.

The remainder is to be distributed per the attached judgment as follows:

- $2,950.54 goes to the State of California. Please provide a check in that amount made out to "Department of Toxic Substances Control", and send it to:

Karen Poon, Chief of Accounting
Department of Toxic Substances Control Account
1001 I Street, P.O. Box 806
Sacramento, CA 95812.

- $6,574.19 is to be disbursed to the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division. Of that total, $1,475.27 is civil penalties, and the other $5,098.92 represents costs.

A copy of the judgment is attached.

ENDORSED
2010 JAN 21 A 9:16
David H. Yamasaki, Clerk of the Superior Court
County of Santa Clara, California
By: _____ Deputy Clerk

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA,

Plaintiff,

v.

AMBERWOOD PRODUCTS, INC.,

Defendant

Case No.: 110CV161751

STIPULATED FINAL JUDGMENT

Plaintiff, THE PEOPLE OF THE STATE OF CALIFORNIA, having filed its complaint herein and appearing through its attorneys, Dolores A. Carr, District Attorney of the County of Santa Clara, Nahal Iravani-Sani, Deputy District Attorney, and Defendant Amberwood Products, Inc., (hereinafter "Amberwood"), appearing by and through Mark Freschi, Attorney at Law.

It appearing to the Court that said parties have stipulated and consented to the entry of this Stipulated Final Judgment without the taking of any proof and without trial or adjudication

8) Defendants shall not construe, misrepresent or present this Judgment to anyone as constituting an endorsement or approval of defendant or any business practice of any defendant.

9) The court shall retain jurisdiction for the purposes of enabling any party to this final Judgment to apply to the Court at any time for such further orders and directions as may be necessary and appropriate for the construction or carrying out of this Judgment, for the modification of any of the injunctive thereof, for the enforcement of compliance herewith, or for the punishment of violations hereof. The Court's jurisdiction shall end five years after the entry of this judgment unless the parties agree to extend this date, or the court does so on its own motion.

10) The parties hereto waive the right to appeal this Stipulated Final Judgment, both as to form and content, and waive the filing and service of Notice of Entry of Stipulated Final Judgment. This judgment shall take effect immediately.

Dated: JAN 21 2010

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA, Plaintiff, v. AMBERWOOD PRODUCTS, INC., Defendant	Case No.: 110CV161751 STIPULATION FOR ENTRY OF FINAL JUDGMENT

Plaintiff, The People of the State of California, appearing through its attorneys, Dolores A. Carr, District Attorney of the County of Santa Clara, and Nahal Iravani-Sani, Deputy District Attorney, and Defendant Amberwood Products, Inc., (hereinafter "Amberwood"), appearing by and through Mark B. Freschi, Attorney at Law, hereby stipulate and consent as follows:

1. Final judgment shall be entered in favor of plaintiff and against defendant without taking of proof and without a trial and adjudication of any factual or legal issues.

2. The parties hereto consent to entry of the Stipulated Final Judgment in the form filed herewith as Exhibit 1, which consists of three pages, and do hereby stipulate that same may be signed by any judge of the Superior Court of the State of California, County of Santa Clara, and entered by the Clerk as the Final Judgment in the above entitled matter, without further notice and without further filing of a Notice of Entry of Judgment.

3. The parties waive the right to appeal the Stipulated Final Judgment both as to form and content.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA, Plaintiff, v. AMBERWOOD PRODUCTS, INC., Defendant	Case No.: STIPULATED FINAL JUDGMENT

Plaintiff, THE PEOPLE OF THE STATE OF CALIFORNIA, having filed its complaint herein and appearing through its attorneys, Dolores A. Carr, District Attorney of the County of Santa Clara, Nahal Iravani-Sani, Deputy District Attorney, and Defendant Amberwood Products, Inc., (hereinafter "Amberwood"), appearing by and through Mark Freschi, Attorney at Law.

It appearing to the Court that said parties have stipulated and consented to the entry of this Stipulated Final Judgment without the taking of any proof and without trial or adjudication

of any factual or legal issue herein, and the parties having waived the filing of notice of entry of said judgment and agreed that said judgment shall become effective upon being entered; the Court having considered the matter and good cause appearing therefore;

IT IS HEREBY ORDERED, ADJUDGED, AND DECREED that:

1) This Court has jurisdiction over the subject matter of the Complaint and over the parties hereto.

2) Defendant admits to one violation of California Health and Safety Code §25189.2(c).

3) Defendant consents to entry of this judgment.

4) Defendant and Plaintiff agree that the injunctive provisions in paragraphs 5 and 6 shall apply to defendant Amberwood Products.

5) Defendant shall not in the future violate California Health & Safety Code Section 25189.2(c).

6) Defendant shall pay contemporaneously with the execution of this Stipulation the amount of $11,000.00 by forwarding to the Santa Clara County District Attorney's Office a check for that sum payable to the Santa Clara County District Attorney's Office. Said sum shall satisfy all civil penalties and investigative costs as alleged by plaintiff in its Complaint and be accounted for and disbursed as follows:

   a) $5,901.08 of that amount represents civil penalties pursuant to California Health & Safety Code Section 25189;

   b) $5,098.92 of that amount represents costs incurred by the Santa Clara County Department of Environmental Health, Hazardous Materials Compliance Division (HMCD) for investigative costs. The Santa Clara County District Attorney Office shall disburse that sum to the HMCD.

7) Defendant shall enclose a separate check in the amount of $355.00 made payable to the Clerk of the Court. This amount represents the defendant's filing fees required by the Santa Clara County Superior Court fee schedule for this stipulated judgment.

8) Defendants shall not construe, misrepresent or present this Judgment to anyone as constituting an endorsement or approval of defendant or any business practice of any defendant.

9) The court shall retain jurisdiction for the purposes of enabling any party to this final Judgment to apply to the Court at any time for such further orders and directions as may be necessary and appropriate for the construction or carrying out of this Judgment, for the modification of any of the injunctive thereof, for the enforcement of compliance herewith, or for the punishment of violations hereof. The Court's jurisdiction shall end five years after the entry of this judgment unless the parties agree to extend this date, or the court does so on its own motion.

10) The parties hereto waive the right to appeal this Stipulated Final Judgment, both as to form and content, and waive the filing and service of Notice of Entry of Stipulated Final Judgment. This judgment shall take effect immediately.

Dated:

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA,

Plaintiff,

v.

AMBERWOOD PRODUCTS, INC.,

Defendant

Case No.: 110CV161751

COMPLAINT FOR INJUNCTION, CIVIL PENALTIES, AND OTHER RELIEF

The People of the State of California, by and through Dolores A. Carr, District Attorney for the County of Santa Clara, allege upon information and belief the following:

JURISDICTION AND VENUE

1. Dolores A. Carr, as District Attorney for the County of Santa Clara, State of California, acting to protect the environment from spoliation, brings this action in the public interest in the name of The People of the State of California.

2. The authority of the District Attorney to bring this action in the name of and on behalf of The People of the State of California is derived from the statutory and decisional law of the State of California, specifically included but not limited to California Health and Safety Code Sections 25181 and 25182.

3. Defendant Amberwood Products, Inc. (hereinafter "Amberwood") is a corporation transacting business within Santa Clara County. The violations of law herein described occurred within the County of Santa Clara.

FACTUAL ALLEGATIONS

4. Whenever in this complaint reference is made to any act of the defendant, Amberwood, such allegation shall be deemed to mean that the employees of Amberwood did or authorized such act, while engaged in the affairs of said defendant, and did so while acting in the course and scope of their employment.

5. Defendant Amberwood is engaged in the architectural casework and millwork business within the County of Santa Clara.

6. As part of that business, defendant has operated and continues to operate a cabinet and millwork manufacturing and production facility (hereinafter "the facility") in San Jose, California, within the County of Santa Clara.

7. As a generator of hazardous waste, Amberwood must comply at its Santa Clara County facility with the California Hazardous Waste Control Law ("HWCL"), Chapter 6.5 of the Health and Safety Code (Section 25100 et seq.) and those regulations adopted pursuant to that law; those regulations are set forth in Title 22 of the California Code of Regulations ("CCR").

8. The County of Santa Clara is authorized to enforce the HWCL within Santa Clara County pursuant to Health and Safety Code Section 25180.

9. The Santa Clara County Department of Environmental Health, Hazardous Materials Compliance Division ("HMCD") is the agency within its respective jurisdiction which implements the HWCL county-wide.

10. On October 28, 2008 and June 9, 2009, HMCD performed inspections of Amberwood's facility located at 1555 S. 7th Street, Bldg.7, San Jose, California, in the County of Santa Clara.

11. HMCD discovered violations of CCR's and Health and Safety Code Section 25189.5(b) at that facility.

FIRST CAUSE OF ACTION
(Violation of Health and Safety Code Section 25189.2(c))

12. Plaintiff realleges and incorporates by reference, as though set forth in full herein, the allegations contained in paragraphs 1 through 11, inclusive, of this Complaint.

13. The County of Santa Clara has authorized Plaintiff to bring this cause of action.

14. Within and including the five years prior to the filing of this Complaint, Amberwood violated California Health and Safety Code Section 25189.2(c) by disposing hazardous waste at an unauthorized point, namely disposal of various containers of flammable liquids into a dumpster.

15. Photographs demonstrate that liquid material was present inside the containers at the time of the disposal.

16. Amberwood's disposal of hazardous waste necessitated the area to be quarantined by the HMCD.

17. Amberwood knew or should have known that it was disposing hazardous waste in a manner not authorized by the HWCL.

PRAYER

WHEREFORE, Plaintiff prays for judgment against the defendant as follows:

1. That the Court issue a permanent injunction requiring Amberwood to comply with California Hazardous Waste Control Laws.

2. That the permanent injunction will expire in five years.

3. That the Court impose other terms as part of an injunction against defendant as appropriate.

4. That the Court order defendant to pay a civil penalty of no less than $25,000.00 per violation for each of the violations of hazardous waste and hazardous materials laws and regulations pleaded herein.

5. That Plaintiff recover its costs of suit.

6. That Plaintiff recover its costs of investigation.

7. That Plaintiff be given such other and further relief as the Court deems just and proper.

Dated this 4th day of December, 2009

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☒ Other *(specify* Public Address System

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance Phone No.: **911**

California Emergency Management Agency Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Certified Unified Program Agency (CUPA) Phone No.: **(408) 918-3400**

Local Hazardous Materials Program Phone No.: **(408) 277-4659**

California Department of Toxic Substances Control (DTSC) Phone No.: **(510) 540-3739**

Cal/OSHA Division of Occupational Safety and Health Phone No.: **(510) 794-2521**

Air Quality Management District Phone No.: **(415) 749-5022**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **Regional Medical Center of San Jose** Phone No.: **(408) 259-5000**

Address: **225 North Jackson Avenue** City: **San Jose 95116**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Clean Harbors Environmental Services 1030 Commercial Street, Suite 107 San Jose, CA 95112 Phone 408800-645-8265

Provides Emergency Chemical Spill Response service in the event of a major chemical spill

CR, Inc 800-800-7644 Provide Safety & Environmental Consulting service..

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☒ Cartridge Respirators	E3	Chemical Cartridge Respirators
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats

	☒ Intercoms/ PA Systems		
	☒ Portable Radios		

SECTION 6 EARTHQUAKE VULNERABILITY

In the event of an earthquake, the following areas must be inspected to ensure the workplace is safe for occupancy and the equipment is running properly:

Outdoors

1) Inspect the Main Dust Collector structure is intact and that the motor/vacuum is functioning correctly.

Indoors

1) Inspect the rafters and roof structure is intact. Look for cracks or other defects in the rafters. Check the roof/ceiling for any damage or collapse.
2) Inspect both of the spray booths are intact. Check the ventilation exhaust duct is intact and has not been damaged or collapsed. Check the ventilation motor/vacuum is functioning. Inspect the spray booth interior for any chemical spills.
3) Inspect the virgin chemical storage area (A) for any chemical spills.
4) Inspect the hazardous waste storage area (B) for any chemical spills.
5) Inspect the 5 flammable materials cabinets within the facility for chemical spills.
6) Inspect the facility for any broken water lines. Shut off water supply if possible.
7) Inspect the facility for any broken/exposed electrical lines. Do not approach down power lines or exposed wiring. Shut down power if safely possible.
8) Inspect the entire facility for any other problems. This may include: fallen objects, blocked exits, damaged equipment, or any other items that are not normal.

SECTION 7 HAZARD MITIGATION/PREVENTION/ABATEMENT

In order to reduce the risk hazards in the facility, the following practices are followed:

1) Maintain the minimal amount of chemical and lumber/panel inventory on site at all times to meet production needs.
2) Prevent the accumulation of sawdust by having the employees spend the last 15 minutes of each work day cleaning the equipment and sweeping the floors.
3) Conduct periodic Safety Training on general and job specific topics.
4) Conduct periodic safety inspections of the facility (daily, monthly, quarterly).

Summary of Violations & Notice to Comply

Program: PR0372930 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Observed the following materials on-site that were declared to be a waste by Mr. Parker:*** ***1x5 gallon bucket with 2 inches of black sludge in the bottom*** ***1x5 gallon grey metal bucket of unknown material*** ***1x1 gallon container of solidified white paint*** ***1 gallon container of open brown liquid in varnish/catalyst mixing cabinet*** ***Observed approximately 10 gallons of floor sealers in flammables cabinet by storage cage that Mr. Parker indicated were unusable.*** ***In the adjacent cabinet, Mr. Parked identified a 1x5 gallon propane-type cylinder with adhesive and 1x5 gallon container of Ethanol as items that were no longer used.*** ***Determine if these wastes are hazardous waste and manage them accordingly.*** ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. Determine how much of this material is generated and explain how it has been managed.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed the following non-empty containers in facility trash cans:*** ***1 full can of minwax wood filler (flammable)*** ***multiple 500 mL glass jars (varying from empty to 1/4 full) with flammable white paint (dried or semi-dried)*** ***1 gallon container of melamine vinyl adhesive with approximately 300 mL of liquid inside*** ***2x 1 quart containers of dried flammable paint materials (approximately 1/4 full)*** ***1 can containing approximately 1 inch of Premium Kelly Moore Acry-Plex interior latex semi-gloss enamel paint (1650-23 swiss coffee) that was mostly dried. SDS indicates that this paint should not be released to water-ways.*** ***2x1 gallon containers holding 1 inch of partially dried white paints*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	
G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL [3050]** Facility failed to obtain a permit or authorization from HMCD for the treatment of an on-site generated hazardous waste, or from DTSC for the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***Mr. Parked stated that paint from a damaged container was intentionally left to dry in the waste storage area. This one gallon container had a label that indicated that it was flammable. Mr. Parker indicated that this was a general practice for non-recycled paints and multiple paint cans with died or semi-dried paint in the bottom were observed in trash cans next to the waste storage cage.*** ***Because the inspection could not be finished on 2/14/17, final documents were reviewed on 2/15/17. At the time of the second visit, a number of additional open containers with flammable liquids were observed in the waste storage area with open lids, drying. Open containers observed on the previous day still had not been closed.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. For wastes generated treated onsite, obtain a permit from HMCD by submitting the required information/permit application as directed above. [HSC 25189.5, CCR 66270.1]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G014	M	**WASTE DETERMINATION DOCUMENTATION [3030053]** Facility failed to keep copies of test results, waste analyses or other hazardous waste determination records. ***Prior to changing transporters in September 2016, floor scrapings were RCRA hazardous waste and disposal receipts used waste codes D001 and F003. After switching transporters, waste was determined to be non-RCRA and waste code331 was incorrectly applied. Facility does not have any waste profiles available to show why waste codes were changed for this waste stream.*** Re-determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G020	II	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed the following containers of hazardous waste with missing or inadequate labels:*** ***1x55 gallon container of used oil in fleet services shop (no label)*** ***1x5 gallon container of used oil (no label)*** ***1x5 gallon container of waste paint machine flush material under the varnish/catalyst mixing machine*** ***1x2 gallon drip container of used oil in outdoor forklift area (no label)*** ***1x55 gallon drum of paint booth filters (no label)*** ***1x55 gallon drum of solid waste paint pucks with no accumulation date*** ***1x5 gallon container half-full of used oil in storage cage (no label)*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage (no label)*** ***2x55 gallon containers of paint booth floor scrapings in paint booths (no label)*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G023	M	**CONTAINER OPEN [3030017]** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***Observed the following containers of hazardous waste with no lids or unsecured drum rings while not in use:*** ***1x55 gallon container of used oil in fleet service area*** ***1x2 gallon drip container of used oil near forklifts*** ***1x5 gallon container 1/2 full of used oil in waste storage cage*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G041	M	**MANIFEST PROPERLY COMPLETED [3010008]** Facility failed to properly complete a Uniform Hazardous Waste Manifest in accordance with manifest instructions. ***Facility is using waste code 331 on later 2016 manifests to describe paint booth floor scrapings and paint booth filters which are not off-spec, aged, or surplus material. See hazardous waste determination documentation violation and comments section for more information about how this waste was previously identified.*** ***Manifests for vinyl-based paint/ acetone paint waste show that this material was regularly disposed of up until 5/3/16. The only container of this waste observed on-site was dated as 11/16/16, indicating that the facility did not generate any of this waste between may of 2016 and November of 2016. Concurrently, manifests for disposal show 55 gallon disposals of waste paint with a 331 waste code. Mr. Parker stated that this was likely a mistake, and that this code was probably applied to the non-recyclable waste. Ensure that waste acetone and vinyl paint carry an F003 and D001 waste code, and that the 331 waste code is only applied to unused paints.*** Submit a manifest correction letter to: DTSC, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806, Attn: Manifest Corrections. Instructions on how to submit a manifest correction letter are available upon request. [CCR 66262.23]	
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Facility housekeeping practices do not minimize releases of hazardous waste to the environment. Observed 1x5 gallon container of flammable paint that stacked halfway off the secondary containment pallet in a way that allowed it to leak flammable paint to the floor of the waste storage cage. This spill was cleaned up during the inspection after being brought to the attention of Mr. Parker. Observed paint spray stains and releases on walls around connection points for acetone spray hoses outside of both spray booths.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G200	II	**ACCUMULATION TIME: SQG [3030010]** Facility accumulated hazardous waste on-site for longer than the time allowed for a small quantity generator of hazardous waste. ***Disposal records show that between 12/2012 and 6/2014, facility accumulated 50 gallons of used oil. Since then, no disposals have occurred and facility has been accumulating used oil for too long. Container does not meet exemptions for extended accumulation times for point of generation and waste may be accumulated in this container for a maximum of 180 days. Disposed of this waste within 30 days and provide a disposal receipt for review.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 180 days when transported up to 200 miles, or 270 days when transported over 200 miles. [CCR 66262.34(d)]	
G211	M	**EMERGENCY INFORMATION POSTED: SQG [3010022]** Facility failed to post emergency response information next to the telephone, as required. ***Facility did not have emergency contact numbers posted at the time of inspection. Mr. Parker was given a posting template to post on the wall.*** Post the following information: 1) the name and phone number of all emergency coordinators; 2) the location of fire extinguishers, spill control materials, and any fire alarms; and 3) the phone number for the fire department. A sample poster (UN-051) is available at www.unidocs.org. [CFR 262.34(d)(5)(ii)]	
G220	M	**TRAINING: SQG [3020001]** Personnel are not adequately trained on managing hazardous waste. ***Nature and number of violations indicate that employee training in hazardous waste management has not been effective. Mr. Parker was given a link to free county training courses provided by the county.*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	
G411	II	**ACCUMULATION TIME: USED OIL/FUEL FILTERS [3030004]** Facility held drained used oil/fuel filters on-site for longer than the allowed time limit. ***Mr. Parker stated that used oil filters observed on-site have been there for greater than one year. No manifests show disposal of this waste for the past three years.*** Make arrangements for the immediate removal of the filters. Submit to HMCD a copy of the bill of lading demonstrating that the filters were removed. Ensure that drained used oil/fuel filters are not held on-site for longer than one year when storing less than a ton of filters, or 180 days when storing a ton or more of filters. [Note: 1 ton = 2,000 lbs. = approx. 8 drums uncrushed filters or 4 drums crushed filters.] [CCR 66266.130(c)(4), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Cardboard box of used oil filters was not labeled.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 saturated oily cardboard box (approximately 10 gallon capacity) holding metal- cased used oil filters. Filters must be kept in a closed, labeled, non-absorptive container.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE [3050003]** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed 1 non-empty aerosol can of BrakeKleen in fleet maintenance shop trash can.*** ***Observed 8 non-empty Prevail Sprayer propellant cannisters in trashcans next to waste storage cage.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, visit www.hhw.org. [CCR 66273.31(a)]	
G442	II	**ACCUMULATION TIME: UNIVERSAL WASTE [3030011]** Facility held Universal Waste on-site for longer than the allowed time limit or was unable to demonstrate the length of time that universal waste was held on-site. ***Mr. Parker stated that universal waste aerosol cans had been accumulating on-site for more than one year. No manifests detail the disposal of this waste in the past three years.*** Make arrangements for the immediate removal of the Universal Waste (see www.hhw.org). Ensure that Universal Waste is not held on-site for longer than one year. Demonstrate that you are meeting this requirement by marking the container, keeping a log, maintaining an inventory system, or by using another method that clearly demonstrates the length of time the waste has been accumulated on-site. [CCR 66273.35]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G443	M	**CONTAINER MARKING: UNIVERSAL WASTE [3030008]** Facility failed to properly label Universal Waste. ***Observed 2 unlabeled cardboard boxes holding non-empty waste aerosol cans without labels. Observed 1x55 gallon drum for universal waste aerosol cans with a label that did not include the word "aerosol". Observed container of fluorescent light tubes with no label.*** Clearly identify the waste type on all Universal Wastes or Universal Waste containers. The label wording must match that listed in the law or regulation for the type of Universal Waste. The labeling requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [Note: Areas that have clear boundaries and are designated for the storage of electronic devices or CRT materials may be labeled in lieu of labeling individual wastes or waste containers.] [CCR 66273.34 HSC 25201.16(f)(6)]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed spent fluorescent tubes outside of proper containment in the outdoor forklift area. One tube was leaning against a wall and another was found in a pile of unwanted equipment.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G445	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***Observed universal waste aerosol cans in multiple cardboard boxes without labels, awaiting transfer into a designated container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G450	M	**RECORDS: UNIVERSAL WASTE HANDLER TRAINING [3010]** Training records for Universal Waste handlers are not being kept as required. ***Mr. Parker is the employee designated to handle universal waste but stated that he has not received annual refresher training and does not keep a record of this training. Mr. Parker to date has been unaware that his facility was subject to universal waste handling requirements such as accumulation time lines, training, and container requirements.*** Maintain records documenting that Universal Waste handlers have received initial and annual training on proper handling and emergency response procedures related to Universal Wastes. Keep current employee training records until the facility is closed. Keep records on former employees for at least 3 years from the date the employee last worked at the facility. [CCR 66273.36(c) & (d)]	
G470	II	**REPORTING: RECYCLABLE MATERIALS [3010016]** Facility recycled more than 100 kg (220 pounds) per month of a recyclable material but failed to submit to HMCD a Recyclable Materials Report as required. The report is due by July 1 of each even numbered year, and covers the prior 2 calendar years. ***The painter on-site at the time of inspection indicated that he recycles about 10 gallons of paint thinner waste per week. Facility was unaware of reporting requirements. This is a repeat violation first cited in a 2009 enforcement inspection.*** Submit via the California Environmental Reporting System (CERS) a Recyclable Materials Report. Ensure that the "Facility Information- Business Activities" page is modified to indicate "YES" under "Excluded and/or Exempted Materials". The Recyclable Materials Report should be downloaded from CERS, completed and then uploaded . [HSC 25143.10]	
G471	M	**RECORDS: RECYCLABLE MATERIALS [3050005]** Facility failed to maintain adequate records regarding a material that is recycled under a claim that the material qualifies for exclusion or exemption from hazardous waste requirements. ***Facility has not maintained any records to demonstrate that they meet the conditions of this recycling exemption.*** Maintain records that demonstrate to the satisfaction of the requesting agency that there is a known market or disposition for the material, and that the requirements of any exemption or exclusion are met. [HSC 25143.2(f)]	
G473	II	**MARKING OF EXCLUDED RECYCLABLE MATERIALS [3030]** Facility failed to properly mark a tank or container holding an excluded recyclable material. ***Observed 4x5 gallon containers of paint waste wash in paint booths without proper labels declaring the materials as Excluded Recyclable Materials.*** Mark each tank and container holding excluded recyclable materials with the words "EXCLUDED RECYCLABLE MATERIAL" and the accumulation start date. Additionally, clearly mark each container and portable tank with the name and address of the generator, and the composition, physical state, and hazardous properties of the material. [HSC 25143.9(a)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G474	M	**EMERGENCY PROCEDURES: EXCLUDED RECYCLABLE MATERIAL [3010]** Facility manages a waste as an excluded recyclable material, but does not have a Hazardous Materials Business Plan (HMBP) that adequately addresses the recyclable material. ***Facility has not addressed this material in their hazardous materials business plan.*** Begin managing the waste as a hazardous waste, or prepare an HMBP that contains emergency response plans and procedures that specifically address excluded recyclable materials. [HSC 25143.9(b)]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. This is a regular waste stream for most fleet maintenance shops.*** ***Determine how much of this material is generated and explain how it has been managed. If facility claims not to generate this material, explain why this material is not generated on-site.*** ***Provide information on how this will be managed if it is generated in the future.*** ***[CCR 66261.2 (g)]***	

Comments: Inspection commenced on 2/14/17 and concluded on 2/15/17.
Facility does wood finishing and generates the following wastes:
- Vinyl paint and acetone waste -D001, 343
- Soild paint waste (pucks from thinner recycler, debris, and scrapings from paint booth floor)- F003, D001, 352
- Contaminated rags (used oil and thinner)- 352
- Paint booth filters- 352
- Expired or off-spec paints- D001, 331
- Metal-cased oil filters
- Used oil
- Universal waste fluorescent light bulbs and non-empty aerosol cans

Facility is a single warehouse with two outdoor storage areas and two internal spray booths. Facility does basic fleet service for on-site vehicles but does not do wood finishing work off-site. Fleet services include basic oil changes. Facility uses a vinyl base coat and finish that cannot be recycled and is collected as hazardous waste. All other non-vinyl dye stains can be recycled for their acetone in an on-site thinner recycler located in the back waste storage area. Facility stated that this machine runs about 10 gallons per week, and solid pucks are placed into a 55 gallon solid paint waste container. Conversion varnish top coat is not catalyzed before arrival and catalyst is stored in 5 gallon containers in waste storage cage. Mr. Parker stated that varnish is pumped into a machine outside of the paint booth from a 55 gallon drum inside, and catalyst and varnish are mixed in the machine before being pumped back to the spray booth for use. Spray guns are cleaned with acetone in the paint booth by scrubbing with a brush and spraying waste acetone into 5 gallon buckets located in the paint booth. Non-recyclable paint waste is transfered to the waste storage drum after use. Unused dye stains that can be recycled for their thinner content are stored in flammable cabinets until it has been determined that they are no longer needed for a job. Once this determination is made, these bases are combined into a 5 gallon bucket and poured into the recycler. Paint booth floors are swept a scraped clean of dust which is managed as hazardous waste. Previous manifests listed this material as "Waste solids containing flammable liquid" but once the facility changed transporters in September of 2016, this material was referred to as "Non RCRA Hazardous Waste Solid (paint waste powder)". CAM17 tests conducted in 2016 indicate that paint booth filter samples and paint residue samples both show that xylene and acetone is detectable in the sample (thus the F003 waste code that was applied in the past).
Generator status: Overall waste from this facility has decreased from 2014 to 2016. In 2016, facility disposed of a maximum of 929 kg of RCRA waste in one month. Facility has the potential to become an episodic Large Quantity Generator in the future, and should this occur, facility will be subject to all Large Quantity Generator standards. Mr. Parker was advised that generator status is based on waste generated in a month, rather than waste shipped per month, and that large clean outs of waste can result in a change in status.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

Facility inspection included walk-through of 1 paint booth, work floor, outside waste storage cage, and outdoor fenced storage area next to skunk works. Facility dumpsters had been empty prior to arrival on 2/15/17 but trashcans on shop floors were inspected. Documents for all hazardous waste disposals for the past three years were reviewed. Fire extinguishers are annually serviced, spill kit and aisle space is adequate, and waste storage areas are inspected weekly (checklist completed by Mr. Parker). EPA ID CAL000250974 is currently active.

NOTES:
1.) Manifests in 2014 (ex 006976955FLE) list waste as " waste flammable liquids N.O.S. (Acetone)". Wastes solutions N.O.S. must include two descriptors that describe the waste stream. This error was observed to be corrected on future manifest in 2015 and 2016.
2.) Facility has a number of air compressors, large CNC machines, and automated mixing machine for conversion varnish and catalyst. Mr. Parker was advised that if any of these machines have filters that must be changed, filters may qualify as hazardous waste. Conversion varnish machine was put in place around 2014, according to Mr. Parker.
3.) Mr. Parker was given labels for each waste noted on-site, training log templates, and information about where to find guidance on handling universal waste.

Program: PR0396879 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B105	**M**	**HMBP FACILITY INFORMATION MISSING / INCOMPLETE [1010003]** Facility operator failed to electronically submit and/or maintain accurate and complete Facility Information (i.e., Business Activities and Business Owner/Operator Identification) as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility has not disclosed on their facility information page that they recycle more than 100 kg of paint thinner waste per month.*** Within 30 days, amend and electronically submit a HMBP, including accurate Facility Information, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1), 25508(a)(1), 19 CCR 2652]	
B106	**M**	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***INventory submitted in CERS does not match inventory observed at the time of inspection. See comments for a complete listing.*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]

B107	**M**	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit and/or maintain an accurate and complete Site Map as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility site map does not include locations of emergency eye wash or facility storm drains. Not all hazardous materials and hazardous waste areas are located on the map. Location of propane tank is not identified on map.*** Within 30 days, electronically submit a HMBP, including accurate facility Site Map(s), through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25404(e), 25501(s), 25505(a)(2), 25508(a)(1), 19 CCR 2652]	
B125	**M**	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. Mr. Parker was given a sample notification letter at the time of inspection.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	

Comments: Facility last submitted their Hazardous Materials Business Plan on 10/07/16 using CERS ID 10473313. Facility has annual training logs detailing emergency response training attendance.

Facility has the following reportable quantities of hazardous materials:
450 gallons of liquid propane
65 gallons of used oil
65 gallons of acetone
110 gallons of top coat conversion varnish
2275 pounds of floor scrapings and waste paint pucks (7x325 pounds each)
110 gallons of vinyl paint and acetone paint waste

Facility has the following hazardous materials below reporting thresholds:
45 gallons of vinyl base coat
40 gallons of conversion varnish catalyst
10 gallons of grey base coat
20 gallons of black base coat
20 gallons of espresso base coat
5 gallons of walnut base coat
30 gallons of WilsonArt paint material
10 gallons of used oil filters
less than gallons of new oils, various types

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

various thinners, floor sealers,glues, and alcohols (each type less than 55 gallons)
65 gallons of misc. dye stains, paints and (each type less than 55 gallons)
300 pounds of paint booth filter waste (6x50 pounds each)
160 pounds of rags contaminated with oil and paint (2x80 pounds)
141 cf of argon/carbon dioxide gas
less than 500 pounds of each universal waste (aerosol cans and light tubes)

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/18/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division

☐ **Samples Taken**

Summary of Violations & Notice to Comply

Program: PR0372930 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Observed the following materials on-site that were declared to be a waste by Mr. Parker:*** ***1x5 gallon bucket with 2 inches of black sludge in the bottom*** ***1x5 gallon grey metal bucket of unknown material*** ***1x1 gallon container of solidified white paint*** ***1 gallon container of open brown liquid in varnish/catalyst mixing cabinet*** ***Observed approximately 10 gallons of floor sealers in flammables cabinet by storage cage that Mr. Parker indicated were unusable.*** ***In the adjacent cabinet, Mr. Parked identified a 1x5 gallon propane-type cylinder with adhesive and 1x5 gallon container of Ethanol as items that were no longer used.*** ***Determine if these wastes are hazardous waste and manage them accordingly.*** ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. Determine how much of this material is generated and explain how it has been managed.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	 See attached correspondence for determination. Test results reviewed during inspection. See all other supporting documents attached at the end or report. All waste profiles, training logs, and other requested documents not attached have been reviewed and removed by inspector.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed the following non-empty containers in facility trash cans:*** ***1 full can of minwax wood filler (flammable)*** ***multiple 500 mL glass jars (varying from empty to 1/4 full) with flammable white paint (dried or semi-dried)*** ***1 gallon container of melamine vinyl adhesive with approximately 300 mL of liquid inside*** ***2x 1 quart containers of dried flammable paint materials (approximately 1/4 full)*** ***1 can containing approximately 1 inch of Premium Kelly Moore Acry-Plex interior latex semi-gloss enamel paint (1650-23 swiss coffee) that was mostly dried. SDS indicates that this paint should not be released to water-ways.*** ***2x1 gallon containers holding 1 inch of partially dried white paints*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	
G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL [3050]** Facility failed to obtain a permit or authorization from HMCD for the treatment of an on-site generated hazardous waste, or from DTSC for the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***Mr. Parked stated that paint from a damaged container was intentionally left to dry in the waste storage area. This one gallon container had a label that indicated that it was flammable. Mr. Parker indicated that this was a general practice for non-recycled paints and multiple paint cans with died or semi-dried paint in the bottom were observed in trash cans next to the waste storage cage.*** ***Because the inspection could not be finished on 2/14/17, final documents were reviewed on 2/15/17. At the time of the second visit, a number of additional open containers with flammable liquids were observed in the waste storage area with open lids, drying. Open containers observed on the previous day still had not been closed.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. For wastes generated treated onsite, obtain a permit from HMCD by submitting the required information/permit application as directed above. [HSC 25189.5, CCR 66270.1]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G014	M	**WASTE DETERMINATION DOCUMENTATION [3030053]** Facility failed to keep copies of test results, waste analyses or other hazardous waste determination records. ***Prior to changing transporters in September 2016, floor scrapings were RCRA hazardous waste and disposal receipts used waste codes D001 and F003. After switching transporters, waste was determined to be non-RCRA and waste code331 was incorrectly applied. Facility does not have any waste profiles available to show why waste codes were changed for this waste stream.*** Re-determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G020	II	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed the following containers of hazardous waste with missing or inadequate labels:*** ***1x55 gallon container of used oil in fleet services shop (no label)*** ***1x5 gallon container of used oil (no label)*** ***1x5 gallon container of waste paint machine flush material under the varnish/catalyst mixing machine*** ***1x2 gallon drip container of used oil in outdoor forklift area (no label)*** ***1x55 gallon drum of paint booth filters (no label)*** ***1x55 gallon drum of solid waste paint pucks with no accumulation date*** ***1x5 gallon container half-full of used oil in storage cage (no label)*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage (no label)*** ***2x55 gallon containers of paint booth floor scrapings in paint booths (no label)*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G023	M	**CONTAINER OPEN [3030017]** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***Observed the following containers of hazardous waste with no lids or unsecured drum rings while not in use:*** ***1x55 gallon container of used oil in fleet service area*** ***1x2 gallon drip container of used oil near forklifts*** ***1x5 gallon container 1/2 full of used oil in waste storage cage*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G041	M	**MANIFEST PROPERLY COMPLETED [3010008]** Facility failed to properly complete a Uniform Hazardous Waste Manifest in accordance with manifest instructions. ***Facility is using waste code 331 on later 2016 manifests to describe paint booth floor scrapings and paint booth filters which are not off-spec, aged, or surplus material. See hazardous waste determination documentation violation and comments section for more information about how this waste was previously identified.*** ***Manifests for vinyl-based paint/ acetone paint waste show that this material was regularly disposed of up until 5/3/16. The only container of this waste observed on-site was dated as 11/16/16, indicating that the facility did not generate any of this waste between may of 2016 and November of 2016. Concurrently, manifests for disposal show 55 gallon disposals of waste paint with a 331 waste code. Mr. Parker stated that this was likely a mistake, and that this code was probably applied to the non-recyclable waste. Ensure that waste acetone and vinyl paint carry an F003 and D001 waste code, and that the 331 waste code is only applied to unused paints.*** Submit a manifest correction letter to: DTSC, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806, Attn: Manifest Corrections. Instructions on how to submit a manifest correction letter are available upon request. [CCR 66262.23]	
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Facility housekeeping practices do not minimize releases of hazardous waste to the environment. Observed 1x5 gallon container of flammable paint that stacked halfway off the secondary containment pallet in a way that allowed it to leak flammable paint to the floor of the waste storage cage. This spill was cleaned up during the inspection after being brought to the attention of Mr. Parker. Observed paint spray stains and releases on walls around connection points for acetone spray hoses outside of both spray booths.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G200	II	**ACCUMULATION TIME: SQG [3030010]** Facility accumulated hazardous waste on-site for longer than the time allowed for a small quantity generator of hazardous waste. ***Disposal records show that between 12/2012 and 6/2014, facility accumulated 50 gallons of used oil. Since then, no disposals have occurred and facility has been accumulating used oil for too long. Container does not meet exemptions for extended accumulation times for point of generation and waste may be accumulated in this container for a maximum of 180 days. Disposed of this waste within 30 days and provide a disposal receipt for review.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 180 days when transported up to 200 miles, or 270 days when transported over 200 miles. [CCR 66262.34(d)]	
G211	M	**EMERGENCY INFORMATION POSTED: SQG [3010022]** Facility failed to post emergency response information next to the telephone, as required. ***Facility did not have emergency contact numbers posted at the time of inspection. Mr. Parker was given a posting template to post on the wall.*** Post the following information: 1) the name and phone number of all emergency coordinators; 2) the location of fire extinguishers, spill control materials, and any fire alarms; and 3) the phone number for the fire department. A sample poster (UN-051) is available at www.unidocs.org. [CFR 262.34(d)(5)(ii)]	
G220	M	**TRAINING: SQG [3020001]** Personnel are not adequately trained on managing hazardous waste. ***Nature and number of violations indicate that employee training in hazardous waste management has not been effective. Mr. Parker was given a link to free county training courses provided by the county.*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	
G411	II	**ACCUMULATION TIME: USED OIL/FUEL FILTERS [3030004]** Facility held drained used oil/fuel filters on-site for longer than the allowed time limit. ***Mr. Parker stated that used oil filters observed on-site have been there for greater than one year. No manifests show disposal of this waste for the past three years.*** Make arrangements for the immediate removal of the filters. Submit to HMCD a copy of the bill of lading demonstrating that the filters were removed. Ensure that drained used oil/fuel filters are not held on-site for longer than one year when storing less than a ton of filters, or 180 days when storing a ton or more of filters. [Note: 1 ton = 2,000 lbs. = approx. 8 drums uncrushed filters or 4 drums crushed filters.] [CCR 66266.130(c)(4), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Cardboard box of used oil filters was not labeled.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 saturated oily cardboard box (approximately 10 gallon capacity) holding metal- cased used oil filters. Filters must be kept in a closed, labeled, non-absorptive container.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE [3050003]** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed 1 non-empty aerosol can of BrakeKleen in fleet maintenance shop trash can.*** ***Observed 8 non-empty Prevail Sprayer propellant cannisters in trashcans next to waste storage cage.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, visit www.hhw.org. [CCR 66273.31(a)]	
G442	II	**ACCUMULATION TIME: UNIVERSAL WASTE [3030011]** Facility held Universal Waste on-site for longer than the allowed time limit or was unable to demonstrate the length of time that universal waste was held on-site. ***Mr. Parker stated that universal waste aerosol cans had been accumulating on-site for more than one year. No manifests detail the disposal of this waste in the past three years.*** Make arrangements for the immediate removal of the Universal Waste (see www.hhw.org). Ensure that Universal Waste is not held on-site for longer than one year. Demonstrate that you are meeting this requirement by marking the container, keeping a log, maintaining an inventory system, or by using another method that clearly demonstrates the length of time the waste has been accumulated on-site. [CCR 66273.35]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G443	M	**CONTAINER MARKING: UNIVERSAL WASTE [3030008]** Facility failed to properly label Universal Waste. ***Observed 2 unlabeled cardboard boxes holding non-empty waste aerosol cans without labels. Observed 1x55 gallon drum for universal waste aerosol cans with a label that did not include the word "aerosol". Observed container of fluorescent light tubes with no label.*** Clearly identify the waste type on all Universal Wastes or Universal Waste containers. The label wording must match that listed in the law or regulation for the type of Universal Waste. The labeling requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [Note: Areas that have clear boundaries and are designated for the storage of electronic devices or CRT materials may be labeled in lieu of labeling individual wastes or waste containers.] [CCR 66273.34 HSC 25201.16(f)(6)]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed spent fluorescent tubes outside of proper containment in the outdoor forklift area. One tube was leaning against a wall and another was found in a pile of unwanted equipment.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G445	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***Observed universal waste aerosol cans in multiple cardboard boxes without labels, awaiting transfer into a designated container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G450	M	**RECORDS: UNIVERSAL WASTE HANDLER TRAINING [3010]** Training records for Universal Waste handlers are not being kept as required. ***Mr. Parker is the employee designated to handle universal waste but stated that he has not received annual refresher training and does not keep a record of this training. Mr. Parker to date has been unaware that his facility was subject to universal waste handling requirements such as accumulation time lines, training, and container requirements.*** Maintain records documenting that Universal Waste handlers have received initial and annual training on proper handling and emergency response procedures related to Universal Wastes. Keep current employee training records until the facility is closed. Keep records on former employees for at least 3 years from the date the employee last worked at the facility. [CCR 66273.36(c) & (d)]	
G470	II	**REPORTING: RECYCLABLE MATERIALS [3010016]** Facility recycled more than 100 kg (220 pounds) per month of a recyclable material but failed to submit to HMCD a Recyclable Materials Report as required. The report is due by July 1 of each even numbered year, and covers the prior 2 calendar years. ***The painter on-site at the time of inspection indicated that he recycles about 10 gallons of paint thinner waste per week. Facility was unaware of reporting requirements. This is a repeat violation first cited in a 2009 enforcement inspection.*** Submit via the California Environmental Reporting System (CERS) a Recyclable Materials Report. Ensure that the "Facility Information- Business Activities" page is modified to indicate "YES" under "Excluded and/or Exempted Materials". The Recyclable Materials Report should be downloaded from CERS, completed and then uploaded . [HSC 25143.10]	see facility response 
G471	M	**RECORDS: RECYCLABLE MATERIALS [3050005]** Facility failed to maintain adequate records regarding a material that is recycled under a claim that the material qualifies for exclusion or exemption from hazardous waste requirements. ***Facility has not maintained any records to demonstrate that they meet the conditions of this recycling exemption.*** Maintain records that demonstrate to the satisfaction of the requesting agency that there is a known market or disposition for the material, and that the requirements of any exemption or exclusion are met. [HSC 25143.2(f)]	
G473	II	**MARKING OF EXCLUDED RECYCLABLE MATERIALS [3030]** Facility failed to properly mark a tank or container holding an excluded recyclable material. ***Observed 4x5 gallon containers of paint waste wash in paint booths without proper labels declaring the materials as Excluded Recyclable Materials.*** Mark each tank and container holding excluded recyclable materials with the words "EXCLUDED RECYCLABLE MATERIAL" and the accumulation start date. Additionally, clearly mark each container and portable tank with the name and address of the generator, and the composition, physical state, and hazardous properties of the material. [HSC 25143.9(a)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G474	M	**EMERGENCY PROCEDURES: EXCLUDED RECYCLABLE MATERIAL [3010]** Facility manages a waste as an excluded recyclable material, but does not have a Hazardous Materials Business Plan (HMBP) that adequately addresses the recyclable material. ***Facility has not addressed this material in their hazardous materials business plan.*** Begin managing the waste as a hazardous waste, or prepare an HMBP that contains emergency response plans and procedures that specifically address excluded recyclable materials. [HSC 25143.9(b)]	✓
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. This is a regular waste stream for most fleet maintenance shops.*** ***Determine how much of this material is generated and explain how it has been managed. If facility claims not to generate this material, explain why this material is not generated on-site.*** ***Provide information on how this will be managed if it is generated in the future.*** ***[CCR 66261.2 (g)]***	✓

Comments: Inspection commenced on 2/14/17 and concluded on 2/15/17.
Facility does wood finishing and generates the following wastes:
- Vinyl paint and acetone waste -D001, 343
- Soild paint waste (pucks from thinner recycler, debris, and scrapings from paint booth floor)- F003, D001, 352
- Contaminated rags (used oil and thinner)- 352
- Paint booth filters- 352
- Expired or off-spec paints- D001, 331
- Metal-cased oil filters
- Used oil
- Universal waste fluorescent light bulbs and non-empty aerosol cans

Facility is a single warehouse with two outdoor storage areas and two internal spray booths. Facility does basic fleet service for on-site vehicles but does not do wood finishing work off-site. Fleet services include basic oil changes. Facility uses a vinyl base coat and finish that cannot be recycled and is collected as hazardous waste. All other non-vinyl dye stains can be recycled for their acetone in an on-site thinner recycler located in the back waste storage area. Facility stated that this machine runs about 10 gallons per week, and solid pucks are placed into a 55 gallon solid paint waste container. Conversion varnish top coat is not catalyzed before arrival and catalyst is stored in 5 gallon containers in waste storage cage. Mr. Parker stated that varnish is pumped into a machine outside of the paint booth from a 55 gallon drum inside, and catalyst and varnish are mixed in the machine before being pumped back to the spray booth for use. Spray guns are cleaned with acetone in the paint booth by scrubbing with a brush and spraying waste acetone into 5 gallon buckets located in the paint booth. Non-recyclable paint waste is transfered to the waste storage drum after use. Unused dye stains that can be recycled for their thinner content are stored in flammable cabinets until it has been determined that they are no longer needed for a job. Once this determination is made, these bases are combined into a 5 gallon bucket and poured into the recycler. Paint booth floors are swept a scraped clean of dust which is managed as hazardous waste. Previous manifests listed this material as "Waste solids containing flammable liquid" but once the facility changed transporters in September of 2016, this material was referred to as "Non RCRA Hazardous Waste Solid (paint waste powder)". CAM17 tests conducted in 2016 indicate that paint booth filter samples and paint residue samples both show that xylene and acetone is detectable in the sample (thus the F003 waste code that was applied in the past).
Generator status: Overall waste from this facility has decreased from 2014 to 2016. In 2016, facility disposed of a maximum of 929 kg of RCRA waste in one month. Facility has the potential to become an episodic Large Quantity Generator in the future, and should this occur, facility will be subject to all Large Quantity Generator standards. Mr. Parker was advised that generator status is based on waste generated in a month, rather than waste shipped per month, and that large clean outs of waste can result in a change in status.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

Facility inspection included walk-through of 1 paint booth, work floor, outside waste storage cage, and outdoor fenced storage area next to skunk works. Facility dumpsters had been empty prior to arrival on 2/15/17 but trashcans on shop floors were inspected. Documents for all hazardous waste disposals for the past three years were reviewed. Fire extinguishers are annually serviced, spill kit and aisle space is adequate, and waste storage areas are inspected weekly (checklist completed by Mr. Parker). EPA ID CAL000250974 is currently active.

NOTES:
1.) Manifests in 2014 (ex 006976955FLE) list waste as " waste flammable liquids N.O.S. (Acetone)". Wastes solutions N.O.S. must include two descriptors that describe the waste stream. This error was observed to be corrected on future manifest in 2015 and 2016.
2.) Facility has a number of air compressors, large CNC machines, and automated mixing machine for conversion varnish and catalyst. Mr. Parker was advised that if any of these machines have filters that must be changed, filters may qualify as hazardous waste. Conversion varnish machine was put in place around 2014, according to Mr. Parker.
3.) Mr. Parker was given labels for each waste noted on-site, training log templates, and information about where to find guidance on handling universal waste.

Program: PR0396879 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B105	M	**HMBP FACILITY INFORMATION MISSING / INCOMPLETE [1010003]** Facility operator failed to electronically submit and/or maintain accurate and complete Facility Information (i.e., Business Activities and Business Owner/Operator Identification) as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility has not disclosed on their facility information page that they recycle more than 100 kg of paint thinner waste per month.*** Within 30 days, amend and electronically submit a HMBP, including accurate Facility Information, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1), 25508(a)(1), 19 CCR 2652]	
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***INventory submitted in CERS does not match inventory observed at the time of inspection. See comments for a complete listing.*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit and/or maintain an accurate and complete Site Map as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility site map does not include locations of emergency eye wash or facility storm drains. Not all hazardous materials and hazardous waste areas are located on the map. Location of propane tank is not identified on map.*** Within 30 days, electronically submit a HMBP, including accurate facility Site Map(s), through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25404(e), 25501(s), 25505(a)(2), 25508(a)(1), 19 CCR 2652]	
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. Mr. Parker was given a sample notification letter at the time of inspection.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	

Comments: Facility last submitted their Hazardous Materials Business Plan on 10/07/16 using CERS ID 10473313. Facility has annual training logs detailing emergency response training attendance.

Facility has the following reportable quantities of hazardous materials:
450 gallons of liquid propane
65 gallons of used oil
65 gallons of acetone
110 gallons of top coat conversion varnish
2275 pounds of floor scrapings and waste paint pucks (7x325 pounds each)
110 gallons of vinyl paint and acetone paint waste

Facility has the following hazardous materials below reporting thresholds:
45 gallons of vinyl base coat
40 gallons of conversion varnish catalyst
10 gallons of grey base coat
20 gallons of black base coat
20 gallons of espresso base coat
5 gallons of walnut base coat
30 gallons of WilsonArt paint material
10 gallons of used oil filters
less than gallons of new oils, various types

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

various thinners, floor sealers,glues, and alcohols (each type less than 55 gallons)
65 gallons of misc. dye stains, paints and (each type less than 55 gallons)
300 pounds of paint booth filter waste (6x50 pounds each)
160 pounds of rags contaminated with oil and paint (2x80 pounds)
141 cf of argon/carbon dioxide gas
less than 500 pounds of each universal waste (aerosol cans and light tubes)

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/18/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Hazardous Materials Compliance Inspection Corrections
(Inspection Date 2/17/17)

Violation Code and Corrections Made

G010 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood performs only minor fleet maintenance, such as oil changes or adding fluids when necessary. The violation questions why there are no records of engine coolant or brake fluid disposal. Amberwood does not flush its vehicle radiators as part of servicing its vehicles, therefore no coolants are generated for disposal. Amberwood may replace brake pads on its vehicles, but only minute amounts of brake fluid are generated when the brakes are bled, and would be collected on a shop rag. The contaminated rag would then be disposed of in the contaminated rags drum for proper disposal.

G011 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G013 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G014 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. See attached Curtis and Thompkins Analytical Report.

Amberwood filed a Notice of Disagreement for this violation by e-mail to the inspector. Amberwood has received a response from the inspector requesting/requiring additional proof of why this material does not require a D001 or F003 code on the manifest. Amberwood will abide by this request/requirement until such time as proof can be obtained verifying the waste codes are appropriate for the material.

G413 The Used Oil Filters were disposed of on 3/1/17 by Patriot Environmental Services. In future, the used oil filters will be collected in a proper container that has the correct labeling.

G440 Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G442 The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

G443 The 2 cardboard boxes of aerosol cans were collected but had not yet been placed in the Universal Waste Aerosol Can drum at the time of inspection. The word "Aerosol" was added to the drum label. The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

A label was attached to the spent Fluorescent Lamps container.

G444 The spent fluorescent lamp found outside and the other tube seen leaning against a wall were placed in a proper fluorescent lamp collection container.

G445 The 2 cardboard boxes of aerosol cans were collected but had not yet been placed in the Universal Waste Aerosol Can drum at the time of inspection. The word "Aerosol" was added to the drum label. The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

G450 The Safety Director and the Spray Booth Manager attended the "Hazardous Waste Management Training for Small Quantity Generators" presented at the county offices by the SCC Department of Environmental Health on 3/23/17.

G470 Amberwood recycles any used acetone and leftover dye stain material in order to extract the acetone. The recycled acetone is used by Amberwood in the spray booths to clean the spray guns at the end of the work shift. Amberwood does not offer the recycled acetone to any outside company. It is all used in house.

Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

G999 Amberwood performs only minor fleet maintenance, such as oil changes or adding fluids when necessary. The violation questions why there are no records of engine coolant or brake fluid disposal. Amberwood does not flush its vehicle radiators as part of servicing its vehicles, therefore no coolants are generated for disposal. Amberwood may replace brake pads on its vehicles, but only minute amounts of brake fluid are generated when the brakes are bled, and would be collected on a shop rag. The contaminated rag would then be disposed of in the contaminated rags drum for proper disposal.

If in the future Amberwood has a need to collect and dispose of antifreeze or brake fluid, a waste drum labeled antifreeze or brake fluid (depending on material) will be created, and the material collected. Amberwood will contact the current hazardous waste disposal vendor (at that time) so that they may create a profile, and the material will be disposed of in a timely manner.

B105 Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

Amberwood has ceased operating the acetone recycling unit until such time it can determine that Amberwood has addressed all the legal requirements necessary to operate the unit.

Until such time when Amberwood begins operating the acetone recycling unit, the satellite material collection containers (buckets) will have a "Hazardous Was

B106 Myra Reichardt (SCC DEH) Hazardous Materials Technician, was requested to come to the Amberwood facility to assist in updating the missing information on the HMBP and posted the updates onto the Amberwood account on the CERS system. She came to the facility on 3/14/17 and did the updating and posting to CERS.

B107 Hazardous Materials Technician Myra Reichardt came to the Amberwood facility on 3/14/17 and assisted in updating the facility map based upon the inspection report. Once the map was updated with the missing information, she posted the updated map to the CERS system.

B125 Using the sample notification letter (Form UN-053) that was provided by the inspector, a letter was generated and mailed to the property manager on 3/15/17.

RE: Hazardous Materials Business Plan Notification

Dear Ms. Viglizzo:

State law (California Health and Safety Code, Division 20, Chapter 6.95, Article 1) requires that the owner/operator of any facility which must establish and implement a Hazardous Materials Business Plan (HMBP), and is located on leased or rented real property, must provide the owner of the property with written notification that the facility is subject to and in compliance with HMBP requirements (i.e. HSC 25501.1).

Please note that a HMBP has been prepared for the following facility:

Amberwood Products, Inc
1555 South 7th Street, Bldg 7F
San Jose, CA
95112

If you would like a copy of the HMBP, one will be provided to you within 5 working days after receipt of your request. A copy of this notification letter will be kept at our facility.

If you have questions, please contact the undersigned.

Sincerely,
Douglas Parker

CASE NARRATIVE

Laboratory number:	**277114**
Client:	**Amberwood Products, Inc.**
Location:	**Spray Booth CAM17 Test**
Request Date:	**05/24/16**
Samples Received:	**05/24/16**

This data package contains sample and QC results for two paint samples, requested for the above referenced project on 05/24/16. The samples were received intact.

Volatile Organics by GC/MS (EPA 8260B):
SAMPLE #1 - PAINT RESIDUE (lab # 277114-001) and SAMPLE #2 - FILTER W/ RESIDUE (lab # 277114-002) were diluted due to high non-target analytes. No other analytical problems were encountered.

Metals (EPA 6010B and EPA 7471A):
Low recoveries were observed for silver in the MS/MSD for batch 235626; the parent sample was not a project sample. High RPD was also observed for silver; the RPD was acceptable in the BS/BSD, and this analyte was not detected at or above the RL in the associated samples. No other analytical problems were encountered.

☐ Bubble Wrap ☐ Foam blocks ☐ Bags ☐ None
☐ Cloth material ☒ Cardboard ☒ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☐ Wet ☐ Blue/Gel ☒ None Temp(°C)

☐ Temperature blank(s) included? ☐ Thermometer# ☐ IR Gun#

☐ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES NO
If YES, what time were they transferred to freezer?
9. Did all bottles arrive unbroken/unopened? YES NO
10. Are there any missing / extra samples? YES NO
11. Are samples in the appropriate containers for indicated tests? YES NO
12. Are sample labels present, in good condition and complete? YES NO
13. Do the sample labels agree with custody papers? YES NO
14. Was sufficient amount of sample sent for tests requested? YES NO
15. Are the samples appropriately preserved? YES NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO N/A
17. Did you document your preservative check? (pH strip lot#) YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? YES NO N/A
21. Was the client contacted concerning this sample delivery? YES NO
If YES, Who was called? By Date:

COMMENTS

Detections Summary for 277114

Results for any subcontracted analyses are not included in this summary.

Client : Amberwood Products, Inc.
Project : STANDARD
Location : Spray Booth CAM17 Test

Client Sample ID : SAMPLE #1 - PAINT RESIDUE Laboratory Sample ID : 277114-001

Analyte	Result	Flags	RL	Units	Basis	IDF	Method	Prep Method
Acetone	86,000		50,000	ug/Kg	As Recd	2500	EPA 8260B	EPA 5030B

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time. Consent to Inspect Given By: Mark Beltramo

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2200	Currently this facility is generating hazardous waste from their operations (used oil, drained used oil filters, waste antifreeze, etc), and is not permitted with our Agency for the hazardous waste generation. A permit application was obtained during this inspection.	Completed Hazardous Waste Generator Permit application with the assistance of Ms. Ortiz.
2206	The following containers were storing hazardous waste and were missing required information on the label or a label; - 2x55 gal. used oil drums - 1x55 gal. waste antifreeze drum All containers storing hazardous waste must be labeled as required	Installed labels provided by Ms. Ortiz

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

Received by: Mark Beltramo Inspected by: Ortiz Entered by:

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

2041 REV 8/06

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

Facility Name: Piedmont Transfer Storage **Inspection Date:** 1/26/07

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
cont...	on the violation code sheet (see attached)	
	Label drums as required. Labels were provided	
2209	Observed 2x 55 gal. used oil drums which were open. All containers storing hazardous waste must be closed at all times unless when adding or removing waste. Keep drums closed	Shop employees have been trained to keep containers closed.
22165	Observed 2x 55 gal drums which were empty and previously held hazardous materials. Empty drums were missing the date they became empty. Manage empty drums as required on the violation code sheet	Employees have been trained about procedures for empty drums. Empties have also been removed
	NOTE: Consolidated manifest (disposal reciepts) were not available during this inspection. Provide copies of disposal receipts for the past 3 years (2004, 2005, 2006) for the used oil, waste antifreeze, drained used oil filter and parts washer waste.	Sent in copies of manifest dating back to 2004. Will send copies of manifest received as they are received.
	- contaminated oil/debris which cannot be reused must be disposed of as hazardous waste - disposal receipts must be kept.	
	- Any universal waste (i.e. fluorescent lamps, consumer type batteries etc) must be recycled and records must be kept.

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

Facility Name: Piedmont Transper Storage **Inspection Date:** 1/26/07

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
cont...	on the violation code sheet. (See attached)	
	Label drums as required. Labels were provided	
2209	Observed 2x55gal. used oil drums which were open. All containers storing hazardous waste must be closed at all times unless when adding or removing waste. Keep drums closed	
2205	Observed 2x55gal drums which were empty and previously held hazardous materials. Empty drums were missing the date they became empty. Manage empty drums as required on the violation code sheet	
	NOTE: Consolidated manifest (disposal reciepts) were not available during this inspection. Provide copies of disposal receipts for the past 3 years (2004, 2005, 2006) for the used oil, waste antifreeze, drained used oil filter and parts washer waste.	
	- contaminated oily debris which cannot be reused must be disposed of as hazardous waste - disposal receipts must be kept.	
	- any "universal waste" i.e. fluorescent lamps, consumer type batteries etc must be recycled and records must be kept.

Hazardous Waste Inventory Information:

The annual permit fee is determined by the total quantity of hazardous waste generated per year. Complete the table below for all hazardous waste inventory *(e.g. used oil, used parts cleaning solvent, used oil filters, waste paint, spent fixer, etc.)*.

Name of Hazardous Waste	Treatment/Disposal Method(s) *(Definitions provided on back of form.)*	Annual Quantity Generated*
USED MOTOR OIL	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	~~300~~ ~~250~~ 660 ☐ gal. ☐ lbs.
USED Anti Freeze	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	330 ~~200~~ ☐ gal. ☐ lbs.
USED OIL FILTERS	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	100 ☐ gal. ☐ lbs.
USED OIL Asorbent	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	5 ~~100~~ ☑ gal. ☐ ~~lbs.~~
Parts Washer	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	30 ☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.

* *Solids must be reported in pounds. Liquids may be reported in either pounds or gallons.*

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator: [signature] Title: Gen. Mgr Date: 1/26/07

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e. red bag) wastes on this form.

Re: Failure to Electronically Submit a Hazardous Materials Business Plan (HMBP) for PIEDMONT MOVING SYSTEMS, 1555 S 7TH ST A, SAN JOSE CA 95112.

Dear Business Owner/Operator,

Our records indicate that you have a Hazardous Materials Business Plan (HMBP) permit with our office because your facility handles hazardous materials above State reporting thresholds. However, your business has not submitted or recertified your facility's HMBP annually, as required by California Health and Safety Code section 25508(a)(1)(A).

Effective January 1, 2013, HMBPs are required to be submitted electronically. You may satisfy this requirement by using our local electronic reporting website, FrontCounter (https://frontcounter.sccgov.org/). Within 30 days, complete your annual submission using FrontCounter.

To request access to FrontCounter, visit the website and click "Sign up now." Complete the form using your Owner ID Number and PIN, provided above. As long as the information is entered correctly, you should receive an e-mail within minutes containing your username and password. Check your spam/junk e-mail folder for automated messages from DEH.HMCD@deh.sccgov.org if you have not received a response within 24 hours.

It is important that you respond to this notice. Failure to electronically submit your HMBP within 30 days may result in penalties of up to *$5000 per violation per day* pursuant to California Health and Safety Code sections 25508(b) and 25515(b).

To learn more about Hazardous Materials Business Plan requirements and electronic reporting, visit our website at www.ehinfo.org/hazmat, and select "Hazardous Materials Business Plans" from the Programs and Services menu. If you require assistance, please contact Myra Reichardt by phone at (408) 918-1984, or via e-mail at hmcd.cers@cep.sccgov.org.

Sincerely,
Richard Owens

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☑ Verbal *(i.e. shouting)*; ☑ Other *(specify)* Warehouse Paging System

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: (___) _____
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 299-6930**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Bay Area Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

**** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.***

c. Emergency Resources:

Poison Control Center	Phone No. **(800) 876-4766**
Nearest Hospital: Name: San Jose Medical Center	Phone No.: (408) 977-4444
Address: 675 E. Santa Clara St.	City: San Jose

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**

	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☑	Internal alarm/notification *
☑	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☐	Location(s) and contents of Emergency Response/Contingency Plan
☑	Facility evacuation drills, that are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☑	Safe methods for handling and storage of hazardous materials *
☑	Location(s) and proper use of fire and spill control equipment
☑	Spill procedures/emergency procedures
☑	Proper use of personal protective equipment *
☑	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☑	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☑	Shutdown of operations
☑	Liaison with responding agencies
☑	Use, maintenance, and replacement of emergency response equipment
☑	Refresher training, which is provided at least annually *
☑	Emergency response drills, which are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☑ Current employees' training records *(to be retained until closure of the facility)* *
☑ Former employees' training records *(to be retained at least three years after termination of employment)* *
☑ Training Program(s) *(i.e. written description of introductory and continuing training)* *
☑ Current copy of this Emergency Response/Contingency Plan *
☑ Record of recordable/reportable hazardous material/waste releases *
☑ Record of hazardous material/waste storage area inspections *
☑ Record of hazardous waste tank daily inspections *
☐ Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☑ We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
☐ We will use our own documents to record inspections. *(A blank copy of each document used must be attached to this HMBP.)*

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

To: Agency Name: **Santa Clara County Hazardous Materials Compliance Division (HMCD)**
Agency Mailing Address: **1555 Berger Drive, Suite 300**
San Jose, CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: Piedmont Moving Systems
Facility Street Address: 1555 S 7th St. Bldg A City: San Jose
Date of Current HMBP: 10/6/00

I certify that: *(Check the appropriate box.)*

☐ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☒ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Mark Bertram Title: General Manager
Phone: 408 288 5600 Signature: [signature] Date: 10/3/2011

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

Summary of Violations & Notice to Comply

Program: PR0381593 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G034	M	**POINT OF GENERATION ACCUMULATION [3030057]** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***No documents could be found to confirm that antifreeze has been disposed of in the past three years. Shop mechanic states that the container was picked up last on 11/3/13, consistent with the container label. Oily solids were accumulated for over 1 year from 10/15/14 to 5/12/16. No documents for the disposal of aerosols could be located, and no disposal date was found on the container. Shop mechanic states that this hazardous waste container has been in use for several years. These wastes may be accumulated for a maximum of 1 year, or 6 months from the date containers are filled. Provide receipts showing the disposal of each waste, or provide historic receipts showing that these wastes were disposed of within the 1 year period.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	
G240	M	**MANIFEST EXCEPTION REPORTING: SQG [3010030]** Facility failed to submit an exception report to DTSC when they did not receive the TSDF-signed copy of a manifest within 60 days of a waste shipment. ***Facility has not received TSDF-signed copies of manifests for oily solids shipped on 5/12/16 (005370382SKS) and 10/15/14 (004405202SKS). Obtain TSDF-signed copies for each shipping date or complete a manifest exception report.*** Submit an exception report to: DTSC Report Repository, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806. Include a legible copy of the manifest and indicate that you have not received confirmation of waste delivery. [HSC 25123.3(h)(2); CCR 66262.42(a), (c), (d)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0260362
Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112
Inspection Date: 01/10/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G410	II	**MANAGEMENT OF USED OIL/FUEL FILTERS [3030004]** Used oil/fuel filters were not drained of free-flowing liquids and/or sent for metal recycling in accordance with filter requirements, nor were they managed as hazardous waste. ***Observed metal-cased and paper filters in a container marked as recyclable metal oil filters. Facility mechanic stated that he would place all paper-cased filters in the oily solids container already available.*** Drain the filters of free-flowing oil and fuel, and send them for metal recycling. Otherwise, begin managing the filters per standard hazardous waste requirements. [CCR 66266.130, HSC 25250.22]	

Comments: Facility is a trucking transport company and generates wastes related to limited truck service including waste aerosol cans, used oil, used antifreeze, oily solids, and waste parts washing solution. Battery cores are exchanged when spent (receipts reviewed) and rags are disposed of as hazardous waste. Light bulbs are recycled by the contractor that replaces them. Trucks do not use diesel exhaust fluid and all other services that may generate waste (like brake service and filter cleaning) are done out-of-house. Inspection included walk-through of warehouse storage areas, inspection of truck service and hazardous waste storage area, inspection of hazardous waste documents for the past 3 years, and inspection of trashcans. Fire extinguishers are annually serviced, spill kit is adequate, and EPA ID CAL000218734 is currently active. Shop mechanic is trained in hazardous waste management and he inspects all containers weekly.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 2x55 gallon containers of used oil and 1x55 gallon container of waste coolant that did not have the most current accumulation start dates. Observed 1x55 gallon container of waste aerosol cans with no date. Observed 1x55 gallon oily solids container with an illegible start date. Used oil and antifreeze containers were missing the hazardous characteristic. All labels were corrected at the time of inspection.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.

Program: PR0397097 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***Facility inventory does not report the correct amount of propane. Oil filters are incorrectly reported as 500 pounds, but shipping documents show the container is 200 pounds.*** Within 30 days, electronically submit complete Hazardous Materials Inventory information via either the Santa Clara County CUPA electronic reporting portal at http://FrontCounter.sccgov.org or the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]

B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to submit and/or maintain an accurate and complete Site Map with the facility's Hazardous Materials Business Plan (HMBP). ***Site map is missing locations of hazardous materials, emergency response equipment, locations of storm drains, and emergency assembly area.*** Within 30 days, electronically submit the Site Map(s) via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. The map must contain north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25505(a)(2), 25508(a)(1)]	
B108	M	**HMBP EMERGENCY RESPONSE PLANS AND PROCEDURES MISSING / INCOMPLETE [1010010]** Facility operator failed to submit and/or maintain accurate and complete emergency response plans and procedures with the facility's Hazardous Materials Business Plan (HMBP). ***Emergency response plan has a blank earthquake vulnerability section.*** Within 30 days, electronically submit an Emergency Response/Contingency Plan via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. [HSC 25505(a)(3), 25508(a)(1)]	
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. A template letter was provided during the inspection.*** Provide written notification to the property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Operator of facility subject to Hazardous Materials Business Plan (HMBP) requirements failed to document training of employees in safety procedures in the event of a release or threatened release of a hazardous material. ***Facility currently does not log annual emergency response training. A training log template was provided during the inspection.*** Provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP . Training must be documented electronically or by hard copy. Training records must be kept available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	

Comments: Facility last submitted their HMBP on 9/15/16 on Front Counter using owner ID OW0163754.

Facility has the following REPORTABLE materials:
180 gallons of 15w40 motor oil
55 gallons of used antifreeze
110 gallons of used oil
96 gallons of liquid propane

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0260362
Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112

Inspection Date: 01/10/2017

Summary of Violations & Notice to Comply

Facility has the following hazardous materials BELOW REPORTING THRESHOLDS:
misc gear oils and lubes (less than 55 gallons per type)
1x55 gallon container of uncrushed oil filters
1x55 gallon container of oily solids (less than 500 pounds)
1x55 gallons of hazardous waste aerosol containers (less than 55 pounds)
20 gallons of partswashing solution
128 cf of oxygen gas
127 cf of acetylene gas
280 cf of argon/carbon dioxide gas

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 02/09/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator | **Date**

Printed Name of Owner/Operator | **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

GENERATOR STATUS
0-220 lbs/month

Customer certifies that (i) the above-named materials are properly classified, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the Department of Transportation (ii) no material change has occurred either in the characteristics of the waste/material or in the process generating the waste/material, and (iii) the above referenced Generator Status is correct. Customer agrees to pay the above charges and to be bound by the terms and conditions (1) set forth in (a) the General Terms and Conditions provided separately to Customer or (b) any SK agreement signed by Customer and SK, and (2) incorporated herein by reference. Unless otherwise indicated in the payment received section, SK is authorized to charge Customer's account for this transaction. If Customer fails to make payment when due, an amount equal to the lesser of (i) 1.5% per month (18% per annum) or (ii) the maximum amount allowed by law, will be added to all unpaid amounts outstanding. Customer certifies that the individual signing this Service Acknowledgement is duly authorized to sign and bind Customer. Customer acknowledges that it is responsible for maintaining its Generator Status and obtaining an EPA ID number if required by applicable law. The following provision is applicable to Safety-Kleen's parts cleaner and paint gun cleaner services: Customer agrees that it will not introduce any substance into the solvent or aqueous cleaning solution, including without limitation any hazardous waste or hazardous waste constituent, except to the extent such introduction is incidental to the normal use of the machine. Customer further agrees that it will not clean parts/paint guns that have been contaminated with or otherwise introduce polychlorinated biphenyls (PCB's), herbicides, pesticides, dioxins or listed hazardous waste into the solvent or aqueous cleaning solution. Safety-Kleen has the capacity and is permitted to accept, store, and/or reclaim the spent parts washer solvent; paint thinners, solvents and paints generated by customer; or dry cleaning filter cartridges, powder, and still residues containing perchloroethylene, petroleum naphtha, or trifluorotrichloroethane dry cleaning solvents. Customer agrees that it is responsible for properly classifying its waste streams as Used Oil or Nonhazardous Waste in accordance with the provision of 40 CFR 262.11 and applicable state laws. Customer agrees that it will not introduce any non-conforming substance into the SK Property.

Customer certifies that (i) the above-named materials are properly classified, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the Department of Transportation (ii) no material change has occurred either in the characteristics of the waste/material or in the process generating the waste/material, and (iii) the above referenced Generator Status is correct. Customer agrees to pay the above charges and to be bound by the terms and conditions (1) set forth in (a) the General Terms and Conditions provided separately to Customer or (b) any SK Agreement signed by Customer and SK, and (2) incorporated herein by reference. Unless otherwise indicated in the payment received section, SK is authorized to charge Customer's account for this transaction. If Customer fails to make payment when due, an amount equal to the lesser of (i) 1.5% per month (18% per annum) or (ii) the maximum amount allowed by law, will be added to all unpaid amounts outstanding. Customer certifies that the individual signing this Service Acknowledgement is duly authorized to sign and bind Customer. Customer acknowledges that it is responsible for maintaining its Generator Status and obtaining an EPA ID number if required by applicable law. The following provision is applicable to Safety-Kleen's parts cleaner and paint gun cleaner services: Customer agrees that it will not introduce any substance into the solvent or aqueous cleaning solution, including without limitation any hazardous waste or hazardous waste constituent, except to the extent such introduction is incidental to the normal use of the machine. Customer further agrees that it will not clean parts/paint guns that have been contaminated with or otherwise introduce polychlorinated biphenyls (PCB's), herbicides, pesticides, dioxins or listed hazardous waste into the solvent or aqueous cleaning solution. Safety-Kleen has the capacity and is permitted to accept, store, and/or reclaim the spent parts washer solvent; paint thinners, solvents and paints generated by customer; or dry cleaning filter cartridges, powder, and still residues containing perchloroethylene, petroleum naphtha, or trifluorotrichloroethane dry cleaning solvents. Customer agrees that it is responsible for properly classifying its waste streams as Used Oil or Nonhazardous Waste in accordance with the provision of 40 CFR 262.11 and applicable state laws. Customer agrees that it will not introduce any non-conforming substance into the SK Property, including, without limitation, any hazardous waste or hazardous waste constituent, (i.e., polychlorinated biphenyls ("PCBs"), herbicides, pesticides, dioxins, or listed hazardous wastes) except to the extent such introduction is incidental to the normal use of the SK Property. In the event of the introduction of such non-conforming hazardous waste, Customer agrees that it will be responsible for all costs and remediation expenses related to or arising from the proper management and disposal of the non-conforming waste, including the cost of equipment decontamination and subsequent disposal. Final invoicing will be based on the actual services provided, which may include additional charges for off specification waste and surcharges. Final invoice amount may be more than the amount listed on the printed receipt. If any legal action is commenced because of an alleged dispute, breach, default or misrepresentation, the Customer also agrees that the prevailing party will be entitled to recover reasonable attorney's fees and costs associated with the non-conforming contamination event. Safety-Kleen's failure to screen Customer's material or take a retain sample, in no way constitutes a waiver of Customer's obligation to properly classify its materials. Safety-Kleen relies on Customer's representations and Customer is responsible for informing Safety-Kleen of any process changes that may alter the characteristics of the materials provided. IN THE EVENT OF AN EMERGENCY CALL **24-HR NUMBER** 1-800-468-1760 (Safety-Kleen)
I have established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree to be economically practicable.

Tina Viglizzo
Barry Swenson / Piedmont Partners
777 N. 1st. St. 5th Floor
San Jose, CA 95112

Re: Hazardous Materials Business Plan Notification

Dear Ms. Viglizzo:

State law (California Health and Safety Code, Division 20, Chapter 6.95, Article 1) requires that the owner/operator of any facility which must establish and implement a Hazardous Materials Business Plan (HMBP), and is located on leased or rented real property, must provide the owner of the property with written notification that the facility is subject to and in compliance with HMBP requirements (i.e. HSC §25501.1).

Please note that a HMBP has been prepared for the following facility:

Piedmont Moving Systems
1555 S. 7th St. Bldg. A
San Jose, CA 95112

If you would like a copy of the HMBP, one will be provided to you within five working days after receipt of your request. A copy of this notification letter will be kept at our facility.

If you have questions, please contact the undersigned.

Sincerely,

Mark Beltramo
President

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies.

This facility may be subject to reinspection at any time. Consent to Inspect Given By **Obediah Garcia**

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Walkthrough of the facility was conducted on 11/13/2007 and inspection	
	report was submitted today. 11/27/07	
G010	Observed about 5X 5 gallon pink metal containers labeled Genetron 113	
	Biocide which appeared to have been stored for awhile. If this material is	
	no longer usable disposed of it as hazardous waste and keep hazardous	
	waste manifest for your records.	
G012	Observed a 4X4 metal box filled with miscellaneous hazardous waste	
	(i.e. pait cans, household cleaners, aerosol cans, etc.) stored at the yard	
	which was brought out from a job site by a field technician. It it is illegal	
	to transport hazardous waste unless that driver holds a valid transporter	
	registration issued by the Department Toxic Substances Control (DTSC).	
	Used oil generated during the maintenance operations may be transferred	
	from it's point of generation to the maintenance person's place of	
	business, other than a residence for the purpose of consolidation in a tank	
	or container and meeting the conditions set in the California Health &	
	Safety Code, Section 25250.12 (See attached). Cease this practice	
	immediately. This is a class II violation.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

Received by x Obediah P. Ga~~~~ Inspected by **Ana Ortiz** A-O. Entered by 10071

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator _____ Title _____ Date ___/___/___

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFI NOTICE OF INSPECTION EX. ED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

Facility Name: Johnson Controls **Inspection Date:** 11/~~16~~27/2007

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
G020	The following containers were storing hazardous waste and were not	
G023	labeled with required information and in some instances some of the	
	containers were open:	
	- 1X55 gal. used oil container; missing accumulation start date	
	- 9X5 gal. containers storing used oil; no hazardous waste label and	
	one of them was open	
	- 1X1 gal. container storing used oil; no hazardous waste label	
	- 1X5 gal. and 1X1 gal. storing waste corrosive cleaner; no hazardous	
	waste label.	
	- 4X5 gal. waste corrosive containers; no hazardous waste label.	
	- 1X55 gal. drum with oily water; no hazardous waste label and open.	
	- A 4X4 metal box storing miscellaneous hazardous waste (i.e. paint	
	cans, household cleaners, aerosol cans, etc.); not labeled as hazardous	
	waste.	
	- 1X10 gal. black container storing miscellaneous hazardous waste (i.e	
	pait cans, aerosol cans, etc.); not labeled as hazardous waste.	
	- 1X5 gal. bucket inside a plastic pan storing used oil and water; open	
	and not labeled as hazardous waste.	
	- 2X55 gal metal drums storing waste ethylene glycol; not labeled as	
	hazardous waste.	
	- 1X10 gal. red step on can storing contaminated rags; not labeled as	
	hazardous waste.	
	Label all containers mentioned above as stated on the violation code	
	sheet (see attached) and keep all containers storing hazardous waste	
	closed at all times unless when adding or removing waste. Labels	
	were provided during this inspection.	
G101	Based on my observations and the type of violations hazardous waste	
	storage areas are not being inspected weekly. Begin conducting weekly	
	inspections. It is recommended that you keep a log of the weekly

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

Facility Name: Johnson Controls **Inspection Date:** 11/~~16~~27/2007

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
Cont..	in order to document that weekly inspections are taking place. A	
	sample form was provided.	
G110	Observed used oil inside the secondary containment where used oil	
	containers are being stored. Clean up spill immediately and in the	
	future keep secondary containtment dry.	
G211	Emergency information was not posted next to a telephone. Post	
	emergency information. A sample form was provided.	
G220	Based on the type and number of violations employees handling	
	hazardous waste are not thoroughly familiar with proper waste	
	handling and emergency procedures. Provide training to your	
	employees immediately. A self audit brochure was provided.	
G400	Observed 15X10 gal. metal drums, and 1X30 gal. metal drum that	
	were empty and previously held a hazardous waste that were missing	
	the date they became empty. Empty containers larger than 5 gallons	
	that previously held a hazardous waste shall be managed with the date	
	it has been emptied and shall be managed within one year of being	
	emptied by either reusing them on-site or by reclaimining it for it's	
	scrap metal value. Notify our Agency in writing how these drums were	
	managed.	
G443	In the universal waste accumulation area observed 2-3 boxes storing	
	used lamps, aerosol cans, and about 6-12 used mercury switches not	
	labeled with required information. Label all waste mentioned above	
	with required information as stated on the violation checklist (see	
	attached). A copy of the Universal Waste Management Requirements	
	guidance document was provided.

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFI IOTICE OF INSPECTION EX. ED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

RE: Response to Johnson Controls San Jose, California HMCD inspection

Dear Ms. Ortiz:

The following letter is our follow-up response of your visit to the Johnson Controls office located at 1555 S. 7th Street, San Jose, California on November 27, 2007. The attached table contains a list of the corrective actions that have been taken to address the observations from your recent inspection.

Johnson Controls corporate culture dictates that its operations comply with all regulatory requirements. Based on your visit to the Johnson Controls office in San Jose, California, the company's program to assure compliance with the requirements of Hazardous Materials Regulations has been revisited. We appreciate the opportunity to address this issue and to improve in those areas that were brought to our attention.

Please feel free to contact me at 414/524-7168 if I can be of further assistance.

Sincerely:

HMCD Inspection Checklist 1555 S 7th St San Jose, Ca		
Violation Codes	**Summary of Violations, Notice to Comply, Observations and Required Corrective Action**	**Corrective Actions Taken**
G010	Observed five 5-gallon pink metal containers labeled Genetron 113 Biocide which appear to have been stored for awhile	This material is not a waste and will be moved away from the hazardous waste area
G012	Observed a 4x4 metal box filled with miscellaneous hazardous waste (i e paint cans, aerosols cans, etc) stored at the yard which was brought out from a job site by a field technician	A majority of the materials in the metal box are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07 Employees who handle hazardous materials will be reminded that hazardous wastes generated from jobsites cannot be brought back to the office for disposal
G020/G023	The following containers were storing Hazardous waste and were not properly labeled with required information and in some instances some of the containers were open	
	* One 55-gallon container of used oil missing accumulation start date	Start date was placed on container
	* Nine 5-gallon containers of used oil, no hazardous waste labels and one container was found open	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 1-gallon container storing used oil missing hazardous waste label	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 5-gallon and one 1-gallon container storing waste corrosive cleaner missing hazardous waste label	Issue resolved Removed from site by North State Environmental on 11/29/07
	* Four 5-gallon waste corrosive containers missing hazardous waste labels	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 55-gallon drum with oily water found open and missing hazardous waste label	Issue resolved Barrel emptied and cleaned out for scrap metal
	* A 4x4 metal box storing miscellaneous hazardous waste (i e paint cans, household cleaners, aerosol cans etc), not labeled as hazardous waste	A majority of the materials in the metal box are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07
	* One 10-gallon black container storing miscellaneous waste (i e paint cans, aerosol cans, etc), not labeled as hazardous waste	A majority of the materials in the black container are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07
	* One 5-gallon bucket inside a plastic pan storing used oil and water was found open and missing a hazardous waste label	Issue resolved Oil transferred into waste oil barrel
	* Two 55-gallon metal drums storing waste ethylene glycol missing hazardous waste labels	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 10-gallon red step on can storing contaminated rags missing hazardous waste label	Container labeled as hazardous waste
G101	Based on observations by HMCD inspector, the hazardous waste storage area is not being inspected on a weekly basis as required Begin conducting weekly inspections	Issue resolved The facility is now performing inspections of the hazardous waste area
G110	Observed Used oil in secondary containment where oil containers are stored Clean up spilled oil immediately and in the future keep secondary containment dry	Issue resolved Secondary containment basins have has been cleaned out In addition, employees transferring oils will be informed to clean up overspills immediately

Violation Codes	Summary of Violations, Notice to Comply, Observations and Required Corrective Action	Corrective Actions Taken
G211	Emergency Information was not posted next to telephone Post emergency information	Emergency telephone numbers have been posted in the hazardous waste storage area and the closest telephone
G220	Based on the type and number of violations, employees handling hazardous waste are not thoroughly familiar with proper waste handling and emergency procedures Provide training immediately	In response to this event, Johnson Controls will be conducting Hazardous Materials Training during the month of February 2008, for all employees that handle hazardous waste We will forward you a copy of the training roster from all participants in this training class within 10 days of their completing the class
G400	Observed fifteen 10-gallon metal containers and one 30-gallon metal drum that were empty and previously held a hazardous waste These containers were missing the date when they became empty	Issue resolved Removed from site by North State Environmental on 11/29/07
G443	In the universal waste accumulation area, Inspector observed 2-3 boxes storing used lamps, aerosol cans, and about 6-12 used mercury switches not labeled with required information Label all waste	All containers of universal wastes have been properly labeled
G240	There were several copies of the hazardous waste manifest for 2006 and 2007 that were missing the signed copies from the designated facility within 60 days of waste shipment	The facility has contacted North State and ACT for copies of signed manifest showing signatures from designated waste facilities The facility is still waiting to receive a few of the signed manifests
G446	Records of Universal waste shipments were not available for 2006 and 2007 during inspection Provide copies of records to HMCD inspector for these years	The facility will submit records of Universal waste shipments for 2006 and 2007 by 2/1/08
Note	Provide a copy of the updated hazardous waste generator permit	The facility will submit an updated hazardous waste generator permit application by 2/1/08

RE: Response to Johnson Controls San Jose, California HMCD inspection

Dear Ms. Ortiz:

This letter identifies the remaining items that needed to be addressed as a follow-up of your visit to the Johnson Controls office located at 1555 S. 7th Street, San Jose, California on November 27, 2007. The remaining items are as follows:

Training – Two employees from the San Jose office have signed up for your hazardous materials training course scheduled for February 28th.

Universal Waste Records – Records of Universal waste shipments have been attached to this letter. (records were reviewed & discarded) A.O.

Hazardous Waste Manifests – The facility has received all signed copies of hazardous waste manifests from the waste disposal facilities that were missing.

Hazardous Waste Generator Permit Application – A signed copy of the updated permit application has been attached to this letter.

Please feel free to contact me at 414/524-7168 if I can be of further assistance.

Sincerely:

Summary of Violations & Notice to Comply

Program: SRZEKXNVI - ANCILLARY WASTE ACTIVITIES - 2242
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Metal-containg electronic wiring and other metal-containing small components were observed in the 1 gallon trash bin located in the corner of the facility's retail floor. Metals that are regulated as hazardous waste by RCRA (e.g. chromium, silver, lead, cadmium) must be managed as hazardous waste or recycled for their scrap metal value.*** ***A hazardous waste determination must be conducted on scrap wiring and other solid metal components prior to disposal. If determined to contain RCRA-regulated metals in hazardous waste concentrations, the scrap metal components must be collected, managed, and disposed of as hazardous waste or recycled for their scrap metal value. Provide documentation of the hazardous waste determination to HMCD for review.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility failed to demonstrate that the facility is a "Conditionally Exempt Small Quantity Universal Waste Generator" (CESQUWG), as defined by 22CCR 67283.9, and is not subject to all applicable universal waste handling requirements.*** ***----*** ***The facility accepts universal waste-electronic devices, universal waste-cathode ray tubes, and other mercury-containing wastes from the general public and from businesses, but records demonstrating the amount of universal waste generated per month were not available for review. For general public universal waste drop-offs, the facility does not record the quantity or type of universal waste collected unless the person relinquishes "greater than five televisions or computer monitors." If greater than five televisions or computer monitors are dropped off, the facility stated that they record the name of the person and their phone number. However, the records were also not available for review at the time of inspection.*** ***While less than 100kg of RCRA-regulated hazardous waste and RCRA-regulated universal waste was observed on-site during inspection, it was unable to be determined how much RCRA-regulated universal waste the facility generates each month and if the facility meets the exemption requirements of a CESQUWG.***	

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified **Inspection Date:** 03/07/2017
Facility Name: EXCESS SOLUTIONS
Site Address: 1555 S 7TH ST 4D, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
		---- ***Provide documentation demonstrating the quantity of RCRA-regulated hazardous and universal waste generated per month, including but not limited to mercury-containing wastes, cathode ray tube wastes, and waste batteries or begin managing all universal waste streams in accordance with all applicable universal waste handling requirements [22CCR 67283.8(b)].***	

Comments: UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: Mr. Giordano stated that all universal waste-electronic devices and universal waste-cathode ray tubes are taken to different facilities for "recycling" along with the facility's scrap metal, but no documentation pertaining to or a means to verify how the universal waste is being "recycled" or disposed of was available for review during inspection. Mr. Giordano stated that only his secretary has access to the recycling records and it will take her a week to compile them. WITHIN 7 BUSINESS DAYS, PROVIDE RECORDS OR DOCUMENTATION PERTAINING TO THE DISPOSAL/RECYCLING OF ALL UNIVERSAL WASTE STREAMS FROM THE PAST YEAR FOR HMCD TO REVIEW [22CCR 67283.8(a)(1-2), 22CCR 66261.2(g)].

While on-site to conduct a routine hazardous materials inspection, it was observed that the facility accepts universal waste-electronic devices or "e-waste" from the public and is therefore is a "universal waste handler" [22CCR 66273.9]. The facility's primary business activities include buying and selling excess or discarded items from businesses, then re-selling the items to the general public or other businesses. Items are sold at the store location (on-site) or through a variety of online stores operated by the facility. Mr. Giordano stated that the facility specializes in electronics and small metal parts, but items such as appliances, desks, chairs, lights, watches, vacuum pumps, and a variety of other product categories were also observed during inspection.

All machine equipment and other products that may contain hazardous materials or hazardous waste residues are said to be emptied and fully decontaminated by the former owner prior to their acceptance at Excess Solutions. Mr. Giordano stated that no equipment maintenance or repair activities are conducted in any form and all products are either sold in the condition in which they were recovered or managed as waste. Per Mr. Giordano the facility does not routinely accept or sell aqueous products, but it is of note that Instapak Part A and Part B was observed on-site at the time of inspection. However, the Instapak is for sale with its corresponding equipment and not for store use. A pallet of 5 gallon containers of floor primer was also observed.

Hazardous wastes routinely generated are confined to universal waste streams, including waste electronic devices, mercury containing wastes, waste cathode ray tubes, and waste batteries.
- One approximately four feet by three feet metal bin for "e-waste" or waste electronic device collection from the public was observed at the front entrance.
- One approximately 400 pound Gaylord box of waste electronic devices commingled with items that would be defined as "scrap metal" (e.g. metal wiring) was observed in the back of the facility near the trash dumpster.
- One pallet of printers and one waste cathode ray tube-television was observed next to the pallet of printers in the back of the facility.
- Two 8 foot waste fluorescent lamps were observed in the cardboard storage area on the second floor of the facility.

- Mr. Giordano stated that the facility does not conduct any electronic waste dismantling, assembly, or other forms of "processing" (i.e. no "e-waste" treatment activities) and all waste electronics are taken to a facility for "recycling." Upon inquiry as to the names recycling facilities the facility waste-electronic devices and waste cathode ray tube devices, Mr. Giordano stated that he does not remember the facility names and it depends on which recycling facility is providing the best price.
- All batteries are said to be removed from battery containing equipment prior to recycling/disposing of the equipment. The waste batteries are said to be collected for "recycling." No waste batteries were observed on-site at the time of inspection.
- Mercury containing wastes are stated to be transferred to the separate business that operates within the same warehouse, Arc-Lite, for "recycling" or to another business for "recycling." It is of note that a significant quantity of waste lamps were observed on-site at the time of inspection, but were stated to belong to Arc-List.
- This inspection was conducted on 3/6/2017 and the inspection report issued on 3/7/2017.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action HMCD or other agencies. This facility may be subject to reinspection at any time. Summary of Violations & Notice to Comply

Program: SRM7MOUPM - HAZARDOUS MATERIALS BUSINESS PLAN - BP01
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B100	**II**	**HMBP NOT SUBMITTED [1010002]** Facility operator failed to complete and submit a Hazardous Materials Business Plan (HMBP) when storing or handling hazardous materials at or above HMBP reporting thresholds. ***The facility handles hazardous materials/wastes in quantities at and above HMBP-reportable thresholds, but has not completed or submitted a Hazardous Materials Business Plan (HMBP). The hazardous materials/wastes observed in HMBP-reportable quantities during the inspection are outlined in the Comments section of this report.*** Within 30 days, electronically submit a HMBP through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a), 25508(a)(1), 25508(b)]	
B125	**M**	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***The facility has not provided written notification to the property owner that the facility is subject to HMBP reporting requirements.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	
B130	**II**	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Employees have not been provided with any training related to emergency response and safety procedures in the event of a release or threatened release of a hazardous material/waste.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make training records available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	

Comments: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed at or above HMBP-reportable thresholds:

OFFICIAL NOTICE OF INSPECTION

CA UST Inspector #8406296, Exp. 12/13/2017

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
		---- ***Provide documentation demonstrating the quantity of RCRA-regulated hazardous and universal waste generated per month, including but not limited to mercury-containing wastes, cathode ray tube wastes, and waste batteries or begin managing all universal waste streams in accordance with all applicable universal waste handling requirements [22CCR 67283.8(b)].***	

Comments: UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: Mr. Giordano stated that all universal waste-electronic devices and universal waste-cathode ray tubes are taken to different facilities for "recycling" along with the facility's scrap metal, but no documentation pertaining to or a means to verify how the universal waste is being "recycled" or disposed of was available for review during inspection. Mr. Giordano stated that only his secretary has access to the recycling records and it will take her a week to compile them. WITHIN 7 BUSINESS DAYS, PROVIDE RECORDS OR DOCUMENTATION PERTAINING TO THE DISPOSAL/RECYCLING OF ALL UNIVERSAL WASTE STREAMS FROM THE PAST YEAR FOR HMCD TO REVIEW [22CCR 67283.8(a)(1-2), 22CCR 66261.2(g)].

While on-site to conduct a routine hazardous materials inspection, it was observed that the facility accepts universal waste-electronic devices or "e-waste" from the public and is therefore is a "universal waste handler" [22CCR 66273.9]. The facility's primary business activities include buying and selling excess or discarded items from businesses, then re-selling the items to the general public or other businesses. Items are sold at the store location (on-site) or through a variety of online stores operated by the facility. Mr. Giordano stated that the facility specializes in electronics and small metal parts, but items such as appliances, desks, chairs, lights, watches, vacuum pumps, and a variety of other product categories were also observed during inspection.

All machine equipment and other products that may contain hazardous materials or hazardous waste residues are said to be emptied and fully decontaminated by the former owner prior to their acceptance at Excess Solutions. Mr. Giordano stated that no equipment maintenance or repair activities are conducted in any form and all products are either sold in the condition in which they were recovered or managed as waste. Per Mr. Giordano the facility does not routinely accept or sell aqueous products, but it is of note that Instapak Part A and Part B was observed on-site at the time of inspection. However, the Instapak is for sale with its corresponding equipment and not for store use. A pallet of 5 gallon containers of floor primer was also observed.

Hazardous wastes routinely generated are confined to universal waste streams, including waste electronic devices, mercury containing wastes, waste cathode ray tubes, and waste batteries.
- One approximately four feet by three feet metal bin for "e-waste" or waste electronic device collection from the public was observed at the front entrance.
- One approximately 400 pound Gaylord box of waste electronic devices commingled with items that would be defined as "scrap metal" (e.g. metal wiring) was observed in the back of the facility near the trash dumpster.
- One pallet of printers and one waste cathode ray tube-television was observed next to the pallet of printers in the back of the facility.
- Two 8 foot waste fluorescent lamps were observed in the cardboard storage area on the second floor of the facility.

- Mr. Giordano stated that the facility does not conduct any electronic waste dismantling, assembly, or other forms of "processing" (i.e. no "e-waste" treatment activities) and all waste electronics are taken to a facility for "recycling." Upon inquiry as to the names recycling facilities the facility waste-electronic devices and waste cathode ray tube devices, Mr. Giordano stated that he does not remember the facility names and it depends on which recycling facility is providing the best price.
- All batteries are said to be removed from battery containing equipment prior to recycling/disposing of the equipment. The waste batteries are said to be collected for "recycling." No waste batteries were observed on-site at the time of inspection.
- Mercury containing wastes are stated to be transferred to the separate business that operates within the same warehouse, Arc-Lite, for "recycling" or to another business for "recycling." It is of note that a significant quantity of waste lamps were observed on-site at the time of inspection, but were stated to belong to Arc-List.
- This inspection was conducted on 3/6/2017 and the inspection report issued on 3/7/2017.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action HMCD or other agencies. This facility may be subject to reinspection at any time. Program: SRM7MOUPM - HAZARDOUS MATERIALS BUSINESS PLAN - BP01
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B100	II	**HMBP NOT SUBMITTED [1010002]** Facility operator failed to complete and submit a Hazardous Materials Business Plan (HMBP) when storing or handling hazardous materials at or above HMBP reporting thresholds. ***The facility handles hazardous materials/wastes in quantities at and above HMBP-reportable thresholds, but has not completed or submitted a Hazardous Materials Business Plan (HMBP). The hazardous materials/wastes observed in HMBP-reportable quantities during the inspection are outlined in the Comments section of this report.*** Within 30 days, electronically submit a HMBP through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a), 25508(a)(1), 25508(b)]	
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***The facility has not provided written notification to the property owner that the facility is subject to HMBP reporting requirements.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Employees have not been provided with any training related to emergency response and safety procedures in the event of a release or threatened release of a hazardous material/waste.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make training records available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	

Comments: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed at or above HMBP-reportable thresholds:

OFFICIAL NOTICE OF INSPECTION

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Summary of Violations & Notice to Comply

Program: COZXNCMQ8 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: COMPLAINT INVESTIGATION

Comments / Observations

On-site to investigate a complaint that the facility is using "non-compliant paint". A hazardous waste permit investigation was already completed on 4/6/17 and any non-compliance with the Hazardous Materials Business Plan or with hazardous waste generation regulations was fully detailed on this report. Facility response to this report is not yet due. After inspection of the flammables cabinet and waste disposal containers, inspector determined that this complaint should be referred to Bay Area Air Quality Management District for any further follow-up, if deemed to be necessary. Mr. Cartelli stated that he buys all of his paints from Santa Clara County suppliers to ensure that paints are compliant with local air quality requirements. Complaint was referred to BAAQMD on 4/17/17, and no further action will be taken by HMCD at this time.

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e., red bag) wastes on this form.

Program: SRFFKRSIL - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G003	M	**HAZARDOUS WASTE GENERATOR PERMIT [3015]]** Facility failed to obtain, or keep valid through payment of fees, a Hazardous Waste Generator Permit from HMCD. ***Facility does not currently have a permit to generate hazardous waste. A permit application was completed at the time of inspection.*** Submit via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities. Indicate "YES" to activities question asking if you generate hazardous waste. Pay the annual permit fee, if required, upon receipt of an invoice. [SCCO B11-422]	
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***In the past, paint booth filters have been managed as non-hazardous. Paint booth filters may contain regulated metals and may be hazardous waste. Make a determination on how paint booth filters will be managed in the future.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	Paint booth filters will be managed as hazardous waste we plan to use the CESQG program for disposal ✓
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Facility has been disposing of soiled absorbent and oily rags to trash, and both solled materials were observed in dumpsters during the inspection. Begin collecting these materials as hazardous waste oily solids. Ms. Thompson was advised that rags may be commercially laundered by a facility with a proper permit to do so, or they may be managed as hazardous waste.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	Oily Solids will be stored in a designated container and treated as hazardous waste, we plan to use the CESQG program for disposal ✓

VC	Class	Violation	Corrective Actions Taken
G201	II	**ACCUMULATION TIME: CESQG [3030009]** Facility failed to dispose of hazardous waste within a 180/270 day (or 90 day for acutely hazardous wastes) period after the first 100-kilogram threshold amount was accumulated. ***Facility has been accumulating 40 gallons of antifreeze for over 2 years.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 180 days (or 90 days for acutely hazardous wastes) after the first 100 kg of waste are accumulated [HSC 25123.3(c); CCR 66262.34(b)(1)]	we will be arranging pick ups likely every 6 months NO grater than 12 months. ✓

Comments: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner. Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have been managed as non-hazardous by Corrick. Parts washer is topped-off as needed. Containers of waste are inspected weekly and employees are trained in hazardous waste management. Fire extinguishers were recently purchased, spill kit and emergency aisle space are adequate, eyewash is maintained, and EPA ID number CAL000418621 is currently active.

Facility had the following wastes at the time of inspection:
30 gallons of used oil
40 gallons of used antifreeze
5 gallons of oil filters
oily solids
30 gallons of paint waste
55 gallon drum of solid paint waste

Generator status:
Facility generated 55 gallons of used oil from start of operations to August of 2016. In the past 8 months, facility has generated 30 gallons of used oil. In two years of operation, facility has generated roughly 40 gallons of used antifreeze. In 8 months of painting, facility has generated 1x55 gallon drum of paint solids and less than 30 gallons of paint waste liquids. Total average waste per month: 10 gallons per month of liquids, excluding solid paint waste and oily solids.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 15 gallon mobile oil container with no hazardous waste label. Observed 55 gallon solid paint waste drum with a label for Excluded recyclable materials. Observed 30 gallon paint waste liquids drum with no hazardous waste label. All three labels were corrected at the time of inspection and Excluded recyclable materials label was replaced with a proper hazardous waste label.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.
G412 Container marking (used oil/fuel filters): 1x5 gallon container of used oil filters had no accumulation start date. Accumulation start date was added at the time of inspection.
G413 Container requirements (used oil/fuel filters): Observed one used oil filter out of containment. Filter was placed in the appropriate container during the inspection.

NOTES:
1.) Facility was advised to accumulate waste in smaller containers to avoid violating accumulation times in the future. Facility was also given information on county hazardous waste disposal services available to small businesses (CESQG) in the county.
2.) Facility has not generated the following wastes yet, but was advised that they could be hazardous wastes when

Summary of Violations & Notice to Comply

Program: COZXNCMQ8 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: COMPLAINT INVESTIGATION

Comments / Observations

On-site to investigate a complaint that the facility is using "non-compliant paint". A hazardous waste permit investigation was already completed on 4/6/17 and any non-compliance with the Hazardous Materials Business Plan or with hazardous waste generation regulations was fully detailed on this report. Facility response to this report is not yet due. After inspection of the flammables cabinet and waste disposal containers, inspector determined that this complaint should be referred to Bay Area Air Quality Management District for any further follow-up, if deemed to be necessary. Mr. Cartelli stated that he buys all of his paints from Santa Clara County suppliers to ensure that paints are compliant with local air quality requirements. Complaint was referred to BAAQMD on 4/17/17, and no further action will be taken by HMCD at this time.

Received By:

Inspected By: EE0010436 - ROBIN WARD

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Comments: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner. Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have been managed as non-hazardous by Corrick. Parts washer is topped-off as needed. Containers of waste are inspected weekly and employees are trained in hazardous waste management. Fire extinguishers were recently purchased, spill kit and emergency aisle space are adequate, eyewash is maintained, and EPA ID number CAL000418621 is currently active.

Facility had the following wastes at the time of inspection:
30 gallons of used oil
40 gallons of used antifreeze
5 gallons of oil filters
oily solids
30 gallons of paint waste
55 gallon drum of solid paint waste

Generator status:
Facility generated 55 gallons of used oil from start of operations to August of 2016. In the past 8 months, facility has generated 30 gallons of used oil. In two years of operation, facility has generated roughly 40 gallons of used antifreeze. In 8 months of painting, facility has generated 1x55 gallon drum of paint solids and less than 30 gallons of paint waste liquids. Total average waste per month: 10 gallons per month of liquids, excluding solid paint waste and oily solids.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 15 gallon mobile oil container with no hazardous waste label. Observed 55 gallon solid paint waste drum with a label for Excluded recyclable materials. Observed 30 gallon paint waste liquids drum with no hazardous waste label. All three labels were corrected at the time of inspection and Excluded recyclable materials label was replaced with a proper hazardous waste label.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.
G412 Container marking (used oil/fuel filters): 1x5 gallon container of used oil filters had no accumulation start date. Accumulation start date was added at the time of inspection.
G413 Container requirements (used oil/fuel filters): Observed one used oil filter out of containment. Filter was placed in the appropriate container during the inspection.

NOTES:
1.) Facility was advised to accumulate waste in smaller containers to avoid violating accumulation times in the future. Facility was also given information on county hazardous waste disposal services available to small businesses (CESQG) in the county.
2.) Facility has not generated the following wastes yet, but was advised that they could be hazardous wastes when

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: Skunkworks
Site Address: 210 E Alma AV, SAN JOSE, CA 95112

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

generated: sand blast media, filter sludge for the parts washer.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator | **Date**

Printed Name of Owner/Operator | **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

☐ **Samples Taken**

Summary of Violations & Notice to Comply

Program: PR0427429 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

Comments: On-site to perform a routine inspection for the following permits:
- 2205 (Hazardous waste generator: 100 kg to <5 tons/year)
- BP01 (Hazardous Materials Business Plan (HMBP): 1-3 chemicals)

NOTES:
- Facility is an auto restoration shop which generates used oil, used coolant, drained used oil filters, waste paint-related materials (liquid and solid), as well as contaminated sand from sand blasting.
- State ID CAL000441620 is active.
- Containers are inspected daily.
- Training is performed during tailgate meetings.
- Consolidated manifest receipts were reviewed (used oil, used coolant).
- Uniform manifests were reviewed (paint-related material).
- Fire extinguishers are serviced annually.
- Absorbent is available.
- Rags are commercially laundered.
- Emergency information is posted.

The following documents were provided today:
- UN-053 (HMBP Disclosure Letter)
- UN-103 (HMBP Training Record)

Per HSC §25187.8, the following minor violations were corrected during this inspection:
G020: MARKING OF HAZARDOUS WASTE
The following labels were not fully marked, but were corrected during the inspection:
- 1x 30-gallon drum of liquid paint and paint-related materials (missing accumulation start date)
- 1x 30-gallon portable drum of used oil (hazardous waste label was faded)

Program: PR0427430 - HAZARDOUS MATERIALS BUSINESS PLAN - BP01
Inspection Type: ROUTINE INSPECTION

Comments: - Permit level is consistent with hazardous materials observed on-site.
Used oil (1x 55-gallon drum)
Used coolant (1x 55-gallon drum)

- CERS ID 10741528.
- Mr. Orsburn stated that repeated calls to our office requesting HMBP assistance have not been returned. As such, no violation will be cited for failure to submit at this time. A Hazardous Materials Technician will reach out to assist with the facility's initial HMBP submittal.
- Discussed expectations for HMBP training and property owner notification.

Summary of Violations & Notice to Comply

Program: SRFFKRSIL - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G003	M	**HAZARDOUS WASTE GENERATOR PERMIT [3015]]** Facility failed to obtain, or keep valid through payment of fees, a Hazardous Waste Generator Permit from HMCD. ***Facility does not currently have a permit to generate hazardous waste. A permit application was completed at the time of inspection.*** Submit via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities. Indicate "YES" to activities question asking if you generate hazardous waste. Pay the annual permit fee, if required, upon receipt of an invoice. [SCCO B11-422]	
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***In the past, paint booth filters have been managed as non-hazardous. Paint booth filters may contain regulated metals and may be hazardous waste. Make a determination on how paint booth filters will be managed in the future.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	Paint booth filters will be managed as hazardous waste we plan to use the CESQG program for disposal ✓
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Facility has been disposing of soiled absorbent and oily rags to trash, and both solled materials were observed in dumpsters during the inspection. Begin collecting these materials as hazardous waste oily solids. Ms. Thompson was advised that rags may be commercially laundered by a facility with a proper permit to do so, or they may be managed as hazardous waste.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	Oily Solids will be stored in a designated container and treated as hazardous waste, we plan to use the CESQG program for disposal ✓

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Submittal Status

Submitted on 3/6/2019 by *Mark Beltramo* of PIEDMONT MOVING SYSTEMS (SAN JOSE, CA)
Submittal was ***Accepted***; Processed on 3/6/2019 by *NGUYEN, JEAN* for Santa Clara County Environmental Health
Comments by regulator: Accepted as administratively complete. For the inventory item "Propane," please ensure that the units of measurement reflect the physical state that the item is stored in. For example, if it is a liquefied gas, it should be reported in gallons. Upon your next submittal, please fill in the Location field for the Emergency Equipment list found in Section G of the Emergency Response and Training Plan. Also, please provide the Regional Water Quality Control phone number. It should be 510-622-2300. A technical review may be conducted subsequently as part of your next facility inspection.

Type of Business
Moving & Storage

Incidental Operations
vehicle repairs on c

This Plan Covers Chemical Spills, Fires, and Earthquakes Involving:
☒ 1. HAZARDOUS MATERIALS ☒ 2. HAZARDOUS WASTES

B. Internal Response

Internal Facility Emergency Response Will Occur Via:
☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. Emergency Communications, Phone Numbers and Notifications

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

Internal Facility Emergency Communications or Alarm Notification Will Occur Via:

☒ 1. VERBAL WARNINGS	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM	☒ 3. TELEPHONE
☐ 4. PAGERS	☐ 5. ALARM SYSTEM	☐ 6. PORTABLE RADIO

Notifications To Neighboring Facilities That May Be Affected By An Off-Site Release Will Occur By:

☒ 1. VERBAL WARNINGS	☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM	☒ 3. TELEPHONE
☐ 4. PAGERS	☐ 5. ALARM SYSTEM	☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

AMBULANCE, FIRE, POLICE AND CHP	9-1-1
CALIFORNIA EMERGENCY MANAGEMENT AGENCY (CAL/EMA)	(800) 852-7550
NATIONAL RESPONSE CENTER (NRC)	(800) 424-8802
POISON CONTROL CENTER	(800) 222-1222
LOCAL UNIFIED PROGRAM AGENCY (UPA/CUPA)	(408) 918-3400

NEAREST MEDICAL FACILITY/HOSPITAL NAME:

Valley Medical Center	408-885-5000

AGENCY NOTIFICATION PHONE NUMBERS:

CALIFORNIA DEPT. OF TOXIC SUBSTANCES CONTROL (DTSC)	(916) 255-3545
REGIONAL WATER QUALITY CONTROL BOARD	Local
U.S. ENVIRONMENTAL PROTECTION AGENCY (US EPA)	(800) 300-2193
CALIFORNIA DEPT. OF FISH AND GAME (DFG)	(916) 358-2900
U.S. COAST GUARD	(202) 267-2180
CAL/OSHA	(916) 263-2800
STATE FIRE MARSHAL	(916) 445-8200

D. Emergency Containment and Cleanup Procedures

Spill Prevention, Containment, and Cleanup Procedures:

- [x] 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.
- [x] 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., portable spill containment walls)
- [x] 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., pads, pigs, pillows)
- [ ] 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS
- [ ] 5. BUILT-IN BERM IN WORK/STORAGE AREA
- [x] 6. AUTOMATIC FIRE SUPPRESSION SYSTEM
- [x] 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. flammable liquids, propane)
- [x] 8. STOP PROCESSES AND/OR OPERATIONS
- [ ] 9. AUTOMATIC/ELECTRNOIC EQUIPMENT SHUT-OFF SYSTEM
- [ ] 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE
- [x] 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE/MEDICAL AID
- [x] 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS
- [x] 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL
- [ ] 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM
- [x] 15. REMOVE OR ISOLATE CONTAINERS/AREA AS APPROPRIATE
- [x] 16. HIRF LICENSED HAZARDOUS WASTE CONTRACTOR
- [x] 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE
- [x] 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE
- [ ] 19. WASH/DECONTAMINATE EQUIPMENT WITH CONTAINMENT and DISPOSAL OF EFFLUENT/RINSATE AS HAZARDOUS WASTE
- [ ] 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES
- [ ] 21. OTHER (Specify):

E. Facility Evacuation

The Following Alarm Signal(s) Will Be Used to Begin Evacuation of the Facility:

- [ ] 1. BELLS
- [ ] 2. HORNS/SIRENS
- [x] 3. VERBAL (i.e., SHOUTING)
- [ ] 4. OTHER (Specify):

The Following Location(s) is/are Evacuee Emergency Assembly Area(s):

The front parking lot

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

- [x] EVACUATION ROUTE MAP(S) POSTED AS REQUIRED

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. Arrangements For Emergency Services

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

Advance Arrangements For Local Emergency Services

- (●) 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- ( ) 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

G. Emergency Equipment			
TYPE	**EQUIPMENT AVAILABLE**	**LOCATION**	**CAPABILITY** *(If applicable)*
Safety and First Aid	☐ CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS		
	☐ CHEMICAL PROTECTIVE GLOVES		
	☐ CHEMICAL PROTECTIVE BOOTS		
	☒ SAFETY GLASSES/GOGGLES/SHIELDS		
	☐ HARD HATS		
	☐ CARTRIDGE RESPIRATORS		
	☐ SELF-CONTAINED BREATHING APPARATUS (SCBA)		
	☒ FIRST AID KITS/STATIONS		
	☐ PLUMBED EYEWASH FOUNTAIN/SHOWER		
	☐ PORTABLE EYEWASH KITS		
	☐ OTHER		
	☐ OTHER		
Fire Fighting	☐ PORTABLE FIRE EXTINGUISHERS		
	☒ FIXED FIRE SYSTEMS/SPRINKLERS/FIRE HOSES		
	☐ FIRE ALARM BOXES OR STATIONS		
	☐ OTHER		
Spill Control and Clean-Up	☐ ALL-IN-ONE SPILL KIT		
	☒ ABSORBENT MATERIAL		
	☐ CONTAINER FOR USED ABSORBENT		
	☐ BERMING/DIKING EQUIPMENT		
	☐ BROOM		
	☐ SHOVEL		
	☐ SHOP VAC		
	☐ EXHAUST HOOD		
	☐ EMERGENCY SUMP/HOLDING TANK		
	☐ CHEMICAL NEUTRALIZERS		
	☐ GAS CYLINDER LEAK REPAIR KIT		
	☐ SPILL OVERPACK DRUMS		
	☐ OTHER		
Commun-ications and Alarm Systems	☒ TELEPHONES (Includes cellular)		
	☒ INTERCOM/PA SYSTEM		
	☐ PORTABLE RADIOS		
	☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT		
Other	☐ OTHER		
	☐ OTHER		

H. Earthquake Vulnerability

Identify areas of the facility that are vulnerable to hazardous materials releases/spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply)	LOCATIONS (e.g., shop, outdoor shed, forensic lab)
☒ 1. HAZARDOUS MATERIALS/WASTE STORAGE AREA	mechanic shop
☐ 2. PROCESS LINES/PIPING	
☐ 3. LABORATORY	
☐ 4. WASTE TREATMENT AREA	

Identify mechanical systems vulnerable to releases/spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply)	LOCATIONS
☒ 1. SHELVES, CABINETS AND RACKS	Mechanic Shop
☐ 2. TANKS (EMERGENCY SHUTOFF)	
☒ 3. PORTABLE GAS CYLINDERS	mechanic shop
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES	
☐ 5. SPRINKLER SYSTEMS	
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., propane dispensing tank)	

I. Employee Training

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires
- Amended as necessary prior to change in process or work assignment
- Given upon modification to the Emergency Response/Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Safety Data Sheets
- Hazard communication related to health and safety
- Methods for safe handling of hazardous substances
- Fire hazards of materials/processes
- Conditions likely to worsen emergencies
- Coordination of emergency response
- Notification procedures
- Applicable laws and regulations
- Communication and alarm systems
- Personal protective equipment
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.)
- Decontamination procedures
- Evacuation procedures
- Control and containment procedures
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply):

☐ 1. FORMAL CLASSROOM ☐ 2. VIDEOS ☒ 3. SAFETY/TAILGATE MEETINGS

☒ 4. STUDY GUIDES/MANUALS (Specify): Company safety manual

☐ 5. OTHER (Specify):

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

J. List Of Attachments

(Check one of the following)

○ 1. NO ATTACHMENTS ARE REQUIRED; *or*

○ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED:

K. Signature/Certification

Certification: Based on my inquiry of those individuals responsible for obtaining the information, I certify under penalty of law that I have personally examined and am familiar with the information submitted and believe the information is true, accurate, and complete, and that a copy is available on site.

Submittal was ***Accepted***; Processed on 2/8/2018 by *Verna Dano* for Santa Clara County Environmental Health
Comments by regulator: Accepted as administratively complete. A technical review may be conducted subsequently as part of your next facility inspection.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

Contact Person: [illegible] Contact Phone No.: (408) [illegible] Ext. _____

Principal Type of Business (e.g. auto repair, photoprocessing): [illegible]

- ☐ Owned by Individual
- ☐ Partnership
- ☑ Corporation or LLC
- ☐ Other

EPA ID Number: CAL000229164 Primary Standard Industrial Classification (SIC) 4 Digit Code No.: 7538 Ble

Hazardous Waste Inventory Information:

The annual permit fee is determined by the total quantity of hazardous waste generated per year. Complete the table below for all hazardous waste inventory *(e.g. used oil, used parts cleaning solvent, used oil filters, waste paint, spent fixer, etc.)*.

Name of Hazardous Waste	Treatment/Disposal Method(s) *(Definitions provided on back of form.)*	Annual Quantity Generated*
[illegible]	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs. [illegible]
[illegible]	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	☑ gal. ☐ lbs. 55
X [illegible]	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	☑ gal. ☐ lbs. [illegible]
X [illegible] absorbent	☐ Recycled on-site. ☐ Treated on-site. ☑ Shipped off-site for recycling/treatment/disposal.	☑ gal. ☐ lbs. [illegible]
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.
20gal PE 2202	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.

* *Solids must be reported in pounds. Liquids may be reported in either pounds or gallons.*

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator: _____ Title: Supervisor Date: 3/20/06 MD

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e. red bag) wastes on this form.

To: Stephanie Lee
Subject: Automatic reply: Public Records Request - 1065 S 7th Street, San Jose

The City of San Jose has elevated to Stage 5 of its Pandemic Management Plan. In addition, the County of Santa Clara has issued a “shelter in place” order which is applicable to the City of San Jose. This emergency necessarily creates an unusual circumstance which impacts the City’s ability to provide services that are not immediately essential for the protection of public health and safety. The City is marshalling all of its resources to respond to COVID-19 and these actions have temporarily reduced the capacity of the City to respond to public records requests. The City will attempt to promptly respond to requests. However, until the City is back to full operational capacity, requests will be responded to as time, staffing, and prioritization allows.

PARCEL TWO:

BEGINNING AT THE POINT OF INTERSECTION OF THE SOUTHWESTERN LINE OF SEVENTH STREET 80 FEET WIDE, WITH THE SOUTHEASTERN LINE OF ALMA AVENUE AS SAID LINES OF SEVENTH STREET AND ALMA AVENUE ARE DESCRIBED IN THAT CERTAIN DECREE QUIETING TITLE HAD IN THE SUPERIOR COURT IN AND FOR THE COUNTY OF SANTA CLARA, CASE NO. 38526, ENTITLED "NOEL SULLIVAN, TRUSTEE, ET AL, PLAINTIFFS VS. THE CITY OF SAN JOSE, ET AL, DEFENDANTS", A CERTIFIED COPY OF WHICH IS RECORDED ON FEBRUARY 20, 1932 IN BOOK 603, PAGE 175, OFFICIAL RECORDS, RUNNING THENCE ALONG SAID LINE OF SEVENTH STREET SOUTH 30°40' EAST 336.84 FEET; THENCE CURVING TANGENTIALLY TO THE RIGHT ON A CURVE OF 15.13 FEET RADIUS THROUGH AN ANGLE OF 153°42' FOR AN ARC DISTANCE OF 40.59 FEET; THENCE NORTH 56°58' WEST 336.30 FEET; THENCE RUNNING TANGENTIALLY TO THE RIGHT ON A CURVE OF 950.0 FEET RADIUS THROUGH AN ANGLE OF 3°59'06" FOR AN ARC DISTANCE OF 66.07 FEET; THENCE CURVING TO THE RIGHT ON A CURVE OF 10.0 FEET, RADIUS THROUGH AN ANGLE OF 130°52' FOR AN ARC DISTANCE OF 22.84 FEET TO THE SOUTHEASTERN LINE OF ALMA AVENUE; THENCE ALONG THE SAID LINE OF ALMA AVENUE, CURVING TO THE LEFT ON A RADIUS OF 604.63 FEET FOR AN ARC DISTANCE OF 195.77 FEET TO THE POINT OF BEGINNING.

PARCEL THREE:

COMMENCING AT AN IRON PIPE SET IN THE WESTERLY LINE OF SEVENTH STREET (100 FEET WIDE) WHICH PIPE IS DISTANT NORTH 30°40' WEST 1098.81 FEET FROM AN IRON PIPE SET IN THE NORTHERLY LINE OF PHELAN AVENUE AT ITS POINT OF JUNCTURE WITH THE WESTERLY LINE OF SEVENTH STREET, (100 FEET WIDE), THENCE CURVING TANGENTIALLY TO THE LEFT ON A CURVE OF 950 FEET RADIUS THROUGH AN ANGLE OF 26°18' FOR AN ARC DISTANCE OF 436.07 FEET TO AN IRON PIPE; THENCE TANGENT TO SAID CURVE NORTH 56°58' WEST 336.30 FEET TO AN IRON PIPE; THENCE CURVING TANGENTIALLY TO THE RIGHT ON A CURVE OF 1050 FEET RADIUS THROUGH AN ANGLE OF 7°11'24" FOR AN ARC DISTANCE OF 131.76 FEET TO AN IRON PIPE; THENCE CURVING TANGENTIALLY TO THE LEFT ON A CURVE OF 150 FEET RADIUS THROUGH AN ANGLE OF 52°13'48" FOR AN ARC DISTANCE OF 136.73 FEET TO AN IRON PIPE SET IN SAID SOUTHERLY LINE OF ALMA AVENUE; THENCE EASTERLY ALONG SAID SOUTHERLY LINE OF ALMA AVENUE CURVING TO THE RIGHT ON A CURVE OF 510 FEET RADIUS (THE CENTER POINT OF WHICH CURVE BEARS SOUTH 12°00'24" EAST 510.00 FEET) THROUGH AN ANGLE OF 7°21'54" FOR AN ARC DISTANCE OF 65.56 FEET TO AN IRON PIPE; THENCE TANGENT TO SAID CURVE NORTH 85°21'30" EAST 95.90 FEET TO AN IRON PIPE; THENCE CURVING TANGENTIALLY TO THE LEFT ON A CURVE OF 604.63 FEET RADIUS THROUGH AN ANGLE OF 7°28'24" FOR AN ARC DISTANCE OF 78.87 FEET TO AN IRON PIPE; THENCE LEAVING SAID LINE OF ALMA AVENUE AND RUNNING SOUTHERLY CURVING TO THE LEFT ON A CURVE OF 10 FEET RADIUS (THE CENTER POINT OF WHICH CURVE BEARS SOUTH 12°06'54" EAST 10.00 FEET) THROUGH AN ANGLE OF 130°52' FOR AN ARC DISTANCE OF 22.84 FEET TO AN IRON PIPE; THENCE CURVING TANGENTIALLY TO THE LEFT ON A CURVE OF 950 FEET RADIUS THROUGH AN ANGLE OF 3°59'06" FOR AN ARC DISTANCE OF 66.07 FEET TO AN IRON PIPE; THENCE TANGENT TO SAID CURVE SOUTH 56°58' EAST 336.30 FEET TO AN IRON PIPE; THENCE CURVING TO THE LEFT WITH A RADIUS OF 15.13 FEET, THROUGH AN ANGLE OF 44°55'25" FOR AN ARC DISTANCE OF 11.86 FEET TO A PIPE IN THE WESTERLY LINE OF SEVENTH STREET (100 FEET WIDE) AND THENCE SOUTH 30°40' EAST 457.60 FEET ALONG SAID WESTERLY LINE OF SEVENTH STREET TO THE POINT OF BEGINNING, AND BEING A PORTION OF 500 ACRE LOT 9 OF THE PUEBLO LANDS TO THE CITY OF SAN JOSE.

PARCEL FOUR:

TOGETHER WITH THAT PORTION OF VACATED SOUTH SEVENTH STREET, PURSUANT TO THAT CERTAIN DOCUMENT ENTITLED RECORDED MAY 19, 2017 AS DOCUMENT NO. 23653818 OF OFFICIAL RECORDS.

THE PROPERTY DESCRIBED AND SHOWN HERON IS THE SAME PROPERTY AS DESCRIBED IN THE FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORT FOR TITLE INSURANCE NUMBER NCS-965130-SC DATED FEBRUARY 03, 2020.

NOTES AND COMMENTS:

1) PHYSICAL ACCESS TO PROPERTY VIA PUBLIC RIGHTS OF WAY:
SOUTH 7TH STREET & EAST ALMA AVENUE

2) EASEMENT RIGHTS: PLOTTABLE EASEMENTS ARE SHOWN FROM THE OWNER SUPPLIED TITLE REPORT. NON-PLOTTABLE EASEMENTS ARE NOTED ON THE SURVEY AS BEING "NOT PLOTTED". BECAUSE OUR SERVICE IS LIMITED TO REPORTING ON EASEMENT LOCATIONS, WE STRONGLY RECOMMEND LEGAL COUNSEL BE RETAINED TO REPORT ON TITLE PAPERS IN THEIR ENTIRETY.

3) AT THE TIME OF THE FIELD SURVEY, THERE WAS NO EVIDENCE OF SITE USE AS A CEMETERY OR BURIAL GROUND.

4) THE RECORD DESCRIPTION DOES MATHEMATICALLY CLOSE.

5) THERE ARE NO GAPS, GORES OR OVERLAPS BETWEEN THE SUBJECT PROPERTY AND THE ADJOINING PROPERTIES OR PUBLIC STREET RIGHTS OF WAY SHOWN ON THIS SURVEY.

6) TAX MAP PARCEL NO. 447-08-037

7) THIS IS AN AS-BUILT SURVEY PREPARED IN ACCORDANCE WITH THE MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS.

8) ALL DISTANCES AND DIMENSIONS ARE IN FEET AND DECIMALS THEREOF.

9) SANDIS ONLY ACKNOWLEDGES SIGNED AND STAMPED MAPS AND DRAWING. NO RESPONSIBILITY OR LIABILITY IS EXPRESSED OR IMPLIED FOR ELECTRONIC DATA AND/OR REPRODUCED MAPS AND DRAWINGS.

SURVEYOR'S CERTIFICATE:

TO: PIEDMONT PARTNERS LLC, A CALIFORNIA LIMITED LIABILITY COMPANY, SUCCESSOR IN INTEREST BY MERGER WITH PIEDMONT PARTNER, A CALIFORNIA GENERAL PARTNERSHIP, FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2016 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 1, 2, 3, 4, 7, 8, 9, 11, 13, 14, 16, 17, 18, 19, AND 20 OF TABLE "A" THEREOF. THE FIELD WORK WAS COMPLETED ON MAY 14, 2020.
