TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

AEI Project No. 383394

Dear Jean Hughes:

AEI Consultants is pleased to provide the results of the Government Agency Limited Environmental SIte Assessment (LESA) report of the above referenced address (the "subject property"). This assessment was authorized and performed in accordance with the scope requirements set forth by ZB, N.A. dba California Bank & Trust (Bank).

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we may assist you in any other matter, please contact me at (925) 746-6000 or OAlcalay@aeiconsultants.com.

Sincerely,

Orion Alcalay, REPA, M.S.
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by ZB, N.A. dba California Bank & Trust to conduct a Government Agency Limited Environmental Site Assessment (LESA) for the property located at 1555 South 7th Street, San Jose, Santa Clara County, California. AEI completed this project in conformance with the scope requirements set forth by ZB, N.A. dba California Bank & Trust. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 of this report.

PROPERTY DESCRIPTION

PROPERTY INFORMATION	
Property Name	Piedmont Industrial Park
Street Address(es)	1555 South 7th Street
City	San Jose
State	California
Location	South of the intersection of East Alma Avenue and South 7th Street
Vicinity Characteristics	Mixed commercial and industrial
Approximate Site Acreage/Source	17.34/Assessor's Office
Property Type	Industrial
Subject Property Use(s)	Storage, retail sales, cabinetry manufacturing, auto restoration, offices, recycling center, artist studio, party supplies storage
Assessor Parcel Number(s)	477-08-001
SITE AND BUILDING INFORMATION	
Number of Buildings	7
Year(s) of Construction	Prior to 1980
Number of Floors/Stories	One and two
Basement or Subgrade Area(s)	None identified
Number of Units	14
Building Area (SF)/Source	307,000/2007 LESA Report
Building Description(s)	Five single-story mixed use warehouse, manufacturing and office buildings; one two-story office building; and one single-story mixed use office, storage and manufacturing building with a mezzanine
Building Occupant(s)	Unit A, B, E: Piedmont Moving Systems - offices and storage warehouse, small scale auto maintenance Unit C: Miller Recycling - recycling storage warehouse Unit 4D: Excess Solutions - retail and storage warehouse Unit F: Amberwood Products - cabinetry manufacturing warehouse, storage, offices Unit 4D, 6H: Piedmont Moving Systems - storage warehouse Unit K: Alano Club West - offices (second story vacant) Unit L: James Moore - artist studio Unit M, N, O: DiMattia Construction - fencing company, storage warehouse and storage yard 210 East Alma Avenue: Cillan Group/Skunkwood Performance & Restoration - offices, auto repair/restoration shop
Additional Improvements	Paved parking lots, storage yards, landscaping
Current On-site Operations	Refer to Building Occupants above

Current Use of Hazardous Substances	Yes; Refer to Section 5.1.
UTILITY PROVIDER INFORMATION	
Natural Gas Provider	PG&E
Electricity Provider	PG&E
Heating System Fuel Source	Natural gas
Cooling System Power Source	Electricity
Potable Water Provider or Source	San Jose Water Company
Sewage Disposal Provider or Treatment System	City of San Jose
REGULATORY INFORMATION	
Regulatory Database Listings	FINDS (4), CA EMI (2), CA HAZNET (7), CA CUPA LISTINGS (4), CA LUST (2), CA NPDES, CA SAN JOSE HAZMAT (2), ECHO (2), RCRA-SQG, CA HIST LUST, CA HIST CORTESE, CA RGA LUST (2), RCRA-LQG

Utility provider information listed in the table above is provided by Ms. Tina Viglizzo, Key Site Manager, unless otherwise noted above.

Based on a review of regulatory agency files, the current improvements on the subject property were present by 1952. The subject property has been occupied by the following former and current tenants:

- Sunsweet Growers Inc/Sunset Growers: (dry fruit packaging and storage facility) 1969-1976
- Orchard Supply Hardware: (packaging and distribution warehouse) 1977-1994
- Amberwood Products: 1995-Present
- Cal Air Inc/Johnson Controls: (refrigerant equipment repair) 1995-2009
- Piedmont Moving Systems: 1997-Present
- Green Waste Disposal/Miller Recycling: 2007-Present
- James Moore: 2014-Present
- DiMattia Construction: 2014-Present
- Excess Solutions: 2014-Present
- Cilian Group: 2014-Present
- Alano Club West: 2018
- Double R Cycles: 2006-2007
- San Jose Harley Davidson: (motorcycle repair) 2007
- TG Motor Co In: (auto repair) 2011
- Skunkworks Performance and Restoration: 2018

The following historical addresses were associated with the subject property: 1605 South 7th Street, 210 East Alma Avenue. These addresses were also researched as part of this assessment.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	The intersection of East Alma Avenue and South 7th Street followed by the CEFCU Stadium (1257 South 10th Street)	None identified
Northeast	South 7th Street followed by: Star Concrete (1404-1510 South 7th Street) Student Transportation-America (1540 South 7th Street) Unmarked Commercial Building (1596 South 7th Street	HIST UST (2), CA HAZNET, CA SWEEPS UST (1596 South 7th Street CA HIST CORTESE, RCRA-SQG, FINDS, ECHO, CA LUST, CA HIST LUST, CA CUPA LISTINGS, CA NPDES, CA SAN JOSE HAZMAT, CA WDS (1540 South 7th Street) US MINES, CA EMI, CA UST, CA CUPA LISTINGS, CA SAN JOSE HAZMAT (1404-1510 South 7th Street)
Southeast	Parking lot/storage yard (no listed address)	None identified
Southwest	Railroad tracks followed by Big 5 Sporting Goods, Walmart, MoneyGram, Teletron (1450 Monterey Road)	None identified
Northwest	East Alma Avenue followed by Railroad tracks; Smurfit Recycling (205 East Alma Avenue); and San Jose State University Spartan Ticket Office (1393 South 7th Street)	CA HAZNET, CA SAN JOSE HAZMAT (205 East Alma Avenue)

If the surrounding properties are listed in the regulatory database, please refer to Section 4.1 for discussion.

Based on groundwater monitoring data for the subject property and a nearby site at 1540 South 7th Street (located approximately 0.024 mile east of the subject property) obtained from GeoTracker, the direction of groundwater flow beneath the subject property is inferred to be to the north and groundwater is presumed to be present at an estimated depth of 12 to 16 feet bgs.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- The subject property was identified as having a closed LUST case. According to records on file with the Santa Clara County Environmental Health Department-Local Oversight Program (SCCEHD-LOP) and the GeoTracker database, the subject property was formerly equipped with four USTs, including one 550-gallon gasoline UST (Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C), and one 10,000-gallon methanol UST (Tank M). The three gasoline USTs were reportedly constructed of steel and were removed in April 1989. Tank M was removed in March 1989. Upon removal of the USTs, Tanks A, C, and M were noted to be in good condition; however, Tank B was noted with several small holes visible and soil contamination was noted beneath Tank B. Following removal of the USTs in April 1989, a total of seven soil samples were collected from the tank pits and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G) and benzene, toluene, ethylbenzene and xylenes (BTEX). Soil contamination was analyzed to be at concentrations up to 8,700 parts per million (ppm) of TPH-G, 16 ppm of benzene, 260 ppm of toluene, 170 ppm of ethylbenzene, and 740 ppm of xylenes from beneath Tank B. Based on this information, soil was over-excavated from the former area of Tank B to a depth of 13.5 feet bgs in order to remove any further contamination and until soil samples showed non-detect levels of TPH-G and BTEX. Verification samples collected at 13.5 feet bgs did not contain detectable levels of TPH-G or BTEX. A four-part composite soil sample was collected from the stockpiled soil and was analyzed to have non-detect concentrations of TPH-G and BTEX. The UST pit was then backfilled with the stockpiled soil. Groundwater samples were collected from June 1990 to July 1992 from one groundwater monitoring well MW-1 and no groundwater contamination was detected. Based on the laboratory results and work performed at the subject property, the Santa Clara Valley Water District concluded that any residual soil contamination was limited and contamination had not affected the groundwater and therefore case closure was granted in May 1993. In the case closure letter, it was requested that MW-1 be decommissioned. According to SCVWD records, the well was decommissioned. Based on this information, the former presence of USTs and the closed LUST incident represents an HREC.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold,

and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- According to records on file with the San Jose Fire Department (SJFD), the former tenant Cal Air-Johnson Controls stored and used chlorinated solvents containing trichlorethane from at least 2001 to 2005. Other former and current tenants have produced hazardous wastes including oxygenated solvents, hydrocarbon solvents, and halogenated solvents since 1996. Based on a review of regulatory agency records, tenant violations at the subject property have generally been limited to paperwork and labeling issues. No instances of spills or a release were noted during the review of agency records.
- Due to the age of the subject property buildings, there is a potential that ACMs are present. All observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

This environmental assessment report is intended for the sole use of ZB, N.A. dba California Bank & Trust (Bank) to assist in its underwriting and approval of a loan to be secured by the real property which is the subject of the report. No republication, copying, or distribution of any part of this report is authorized without the written consent of the Bank and the company preparing the report. Bank makes no representation as to the accuracy or completeness of any information or conclusion in the report including, without limitation, whether the report complies with regulation governing (environmental) All Appropriate Inquires or the qualifications of the preparer of the report and no person, other than the Bank, is entitled to rely on the report.

1.0 INTRODUCTION

This report documents the methods and findings of the LESA performed in conformance with the project award for the property located at 1555 South 7th Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of this LESA is to identify potential environmental liabilities at the subject property arising from past or present practices in the handling, storage or disposal of hazardous materials or petroleum products on site or at neighboring sites. This is an abbreviated assessment based on the following activities:

- Site inspection and interviews;
- Database search of local, state, and federal databases to identify known or suspected hazardous sites within a one-mile radius of the subject property; and
- Agency records review.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I ESA as defined by ASTM 1527-13. Based upon the agreed-on scope of services this LESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

AEI has performed this LESA in accordance with generally accepted environmental property assessment practices. Unless otherwise stated, no environmental hazards were found which would warrant a Phase I ESA. However, AEI must state that this screen may not identify all environmental impacts or potential impacts which may be identified in a full Phase I ESA.

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

1.5 LIMITING CONDITIONS/DEVIATIONS

The scope of work for this project is limited and is not intended to serve as an ASTM-standard Phase I ESA. The performance of this LESA was limited by the following:

- AEI was not granted access to Units 4D and 6H (storage building occupied by Piedmont Moving Systems), Unit L (artist studio occupied by James Moore), and the sub-tenant spaces of Units M, N, O (party supply companies). Based on the nature of occupancy, the limited access is not expected to significantly alter the findings of this assessment.
- Due to the large volume of stored products within the warehouse portions of the buildings, direct visual observation of many of the floor and wall areas of the buildings was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

1.6 RELIANCE

This environmental assessment report is intended for the sole use of ZB, N.A. dba California Bank & Trust (Bank) to assist in its underwriting and approval of a loan to be secured by the real property which is the subject of the report. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's project award and Standard Terms and Conditions executed by ZB, N.A.

dba California Bank & Trust on January 25, 2018. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 GOVERNMENT AGENCY RECORDS REVIEW

2.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

On January 29, 2018, AEI contacted the Santa Clara County Department of Environmental Health (SCCDEH) via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

According to Ms. Melissa Belloso, the following information was on file for the subject property:

1555 South 7th Street

Date	Occupant	Document Type	Document Notes/Violations
2000	Piedmont Moving Systems	Hazardous Material Business Plan (HMBP)	Facility stores 55 gallons antifreeze/coolant, auto/truck batteries, lubricants, spray paints, engine starting fluid, truck tires, propane, 185 gallons motor oil, 5 gallons gear oil, 5 gallons gasoline, 5 gallons diesel fuel, argon gas, oxygen, acetylene, brake cleaner solvent, brake fluid, engine degreaser, 100 gallons used oil, 55 gallons used antifreeze, 20 gallons mineral spirits/spent solvent
2007	Johnson Controls	Notice of Inspection	Used oil observed to have spilled into secondary containment, other minor violations listed, all fixed
2007	Piedmont Transfer & Storage	Hazardous Waste Generator Permit Application	Facility produces 600 gallons used motor oil, 330 gallons used antifreeze, 100 gallons used oil filters, 5 gallons used absorbent, 30 gallons parts washer waste
2007	Piedmont Transfer & Storage	Notice of Inspection	Minor violations noted and fixed
2008	Johnston Controls	Hazardous Waste Generator Permit Application	Facility conducts refrigerant equipment repair. Facility produces 1,140 gallons used oil, 220 gallons waste paint, 167 pounds waste aerosols, 370 pounds waste corrosives, 20 pounds waste oxidizers, 130 pounds waste gases, and 436 pounds hazardous waste/ toxic solids (refrigerants, methanol, acetone)
2009	Johnson Controls	Notice of Inspection	This facility is closing in April 2009.
2009	Johnson Controls	Internal Document	Facility closed

Date	Occupant	Document Type	Document Notes/Violations
2011	Piedmont Moving Systems	Notice of Inspection	Oil, used absorbent, used oil filters, antifreeze, used motor oil, propane on site. No violations noted
2012	Amberwood Products Inc	HMBP	Facility stores various lacquers, thinners, dye stains, propane, compressed gases, acetone and paint waste
2012	Amberwood Products Inc	Notice of Inspection	Facility stores acrylic lacquer, catalized lacquer, stains, vinyl sealer, acetone and paint waste, and a propane tank, no violations noted
2017	Amberwood Products Inc	Notice of Inspection	Minor violations noted and corrective actions taken. Facility is a single warehouse with two outdoor storage areas and two internal spray booths. Facility does basic fleet service for on-site vehicles but does not do wood finishing work off -site. Fleet services include basic oil changes.
2017	Amberwood Products Inc	CERS	Facility stores 450 gallons LPG, 2275 pounds floor scrapings and waste paint pucks, 65 gallons used lubricating oils, 65 gallons acetone, 110 gallons vinyl paint and acetone paint waste, 110 gallons top coat conversion varnish
2017	Piedmont Moving Systems	CERS	Facility stores propane, 500 pounds used absobant, 110 gallons used motor oil, 200 pounds used oil filters, 55 gallons antifreeze/ coolant, 180 gallons oil
2017	Piedmont Moving Systems	Notice of Inspection	Minor violations noted, all fixed. Facility is a trucking transport company and generates wastes related to limited truck service including waste aerosol cans, used oil, used antifreeze, oily solids, and waste parts washing solution. Trucks do not use diesel exhaust fluid and all other services that may generate waste (like brake service and filter cleaning) are done out-of-house.
2017	Excess Solutions	Notice of Inspection	Minor violations noted, quantities of hazardous materials are below HMBP-reportable thresholds
2017	Skunkworks	Internal document	New owner and facility
2017	Skunkworks	Notice of Inspection	Minor violations noted

Date	Occupant	Document Type	Document Notes/Violations
2017	Skunkworks	Hazardous Waste Generator Permit Application	Facility stores 48 gallons used oil, 20 gallons used antifreeze, 45 gallons waste paint, 300 pounds waste paint solids and paint booth filters and oily solids

It should be noted that the SCCDEH no longer maintains files that are five years and older related to hazardous substance use and storage as of 2015.

Refer to Section 2.2 for information regarding the operations associated with these businesses.

2.2 FIRE DEPARTMENT

On January 29, 2018, AEI contacted the San Jose Fire Department (SJFD) via office visit for information on the subject property to identify any evidence of previous or current hazardous substance usage, and/or for any historical information available for the subject property.

The following information was on file for the subject property:

Date	Occupant	Document Type	Document Notes/Violations
1969	Sunsweet Growers Inc	Building Inspection Record	Fire investigation, inspected and approved 550 gallon diesel AST in shop area
1972	Sunsweet Growers Inc	Permit	Permit for fumigation
1973	Sunsweet Growers Inc	Permit	Permit for storage of combustible bins
1974	Sunsweet Growers Inc	Flammable Liquid Tank Application	Permit for a new 1,000 gallon UST, add to existing 550 gallon UST
1974	Sunsweet Growers Inc	Notice of Violations	Obtain permit for following: flammable liquids (gasoline, diesel, LPG) holding and dispensing, cutting and welding. Facility is a dry fruit package and storage business.
1974	Sunsweet Growers Inc	Building Inspection Record	No violations, okay to issue permit
1974	Sunsweet Growers Inc	Permit	Facility is permitted for fumigants methyl bromide and phostoxin, flammable liquids holding and dispensing, cutting and welding
1975	Sunset Growers	Record of Inspection	No violations noted
1976	Sunset Growers	Record of Inspection	Plant closed down. Plant was permitted for a repair garage, compressed gases, hazardous chemical storage, welding and cutting, flammable liquids, fumigation and therm insect fog
1977	Orchard Supply Building CO	Permit	Permit to store combustible fibers, flammable liquids, hazardous chemicals

Date	Occupant	Document Type	Document Notes/Violations
1977, 1978, 1979, 1980, 1981, 1990	Orchard Supply Hardware/ OSH Warehouse	Record of Inspection	Minor violations noted
1984	Orchard Supply Hardware Distribution Center	HMBP Short Form	Facility uses a UST
1990	Orchard Supply Hardware Distribution Center	HMBP	Facility stores used motor oil, solvent/brake fluid, kerosene, motor oil, propane, oxygen. No USTs noted
1992	Orchard Supply Hardware	Record of Inspection	No violations, noted as vacant
1995, 1996, 1997	Cal Air Inc	HMBP	No USTs operated by facility. Facility generates waste oil
1995, 1996, 2002, 2007, 2008, 2011	Amberwood Products	Record of Inspection	Minor violations noted
1995, 1998, 2007, 2008, 2011, 2012	Amberwood Products	HMBP	55-gallons drums of lacquer-based sanding sealer, lacquer-based stain, lacquer-based top coats, water-based sanding sealer, water-based stain and water-based top coats were stored at the subject property
1996, 1999	Cal Air Inc	Record of Inspection	Details illegible
1997	Piedmont Transfer and Storage (also known as Piedmont Moving)	HMBP	150 gallons of motor oil, an auto parts cleaner containing 30 gallons of solvent, as well as small quantities (less than 15 gallons) of carburetor cleaner, brake cleaner, antifreeze, and spray paint were stored on the subject property
1998, 1999, 2001, 2002, 2005	Cal Air Inc	Record of Inspection	Minor violations noted
2000	Piedmont Transfer and Storage (also known as Piedmont Moving)	HMBP	Facility stores 55 gallons of antifreeze/coolant, 185 gallons of motor oil, 5 gallons of gear oil, 5 gallons of gasoline, 5 gallons of diesel fuel, 100 gallons of used oil, 55 gallons of used antifreeze and 20 gallons of spent solvent (petroleum-based only), automotive batteries, 50 gallons of propane, as well as small quantities of lubricant, spray paint and starting fluid and truck tires.
2000	Piedmont Moving	Record of Inspection	Minor violations noted

Date	Occupant	Document Type	Document Notes/Violations
2001, 2002, 2004, 2005	Cal Air-Johnson Controls	HMBP	55 gallons of waste oils, 10 gallons of chlorinated hydrocarbon solvent (containing trichlorethane), as well as Freon, refrigerant oils, duct sealer, paints, petroleum based oils, water treatment chemicals, acids and gases were stored at the subject property.
2007	Double R Cycles	Hazardous Materials Waste Registration Form	Facility stores oil, coolant, gas, waste oil, oil filters (less than 100 gallons total)
2007	Double R Cycles	Record of Inspection	Minor violations noted
2007	San Jose Harley Davidson	Hazardous Materials Waste Registration Form	Facility stores oil, spray paint, gas, propane, glue/adhesive, lubricants, assorted cleaners, pipe sealant, gasket sealer (all under 35 gallons each)
2007	San Jose Harley Davidson	Record of Inspection	Minor violations noted
2011	TG Motor Co Inc	Violation Notice	Minor violations listed

According to records on file with the San Jose Fire Department (SJFD), the former tenant Cal Air-Johnson Controls stored and used chlorinated solvents containing trichlorethane from at least 2001 to 2005. Other former and current tenants have produced hazardous wastes including oxygenated solvents, hydrocarbon solvents, and halogenated solvents since 1996. Based on a review of regulatory agency records, tenant violations at the subject property have generally been limited to paperwork and labeling issues. No major instances of spills or a release were noted during the review of agency records. Based on the lack of documented evidence indicating a release of hazardous materials or petroleum products at the site, the presence and former presence of hazardous materials and petroleum products as well as the generation and storage of hazardous waste on the subject property represents an other environmental consideration.

2.3 BUILDING DEPARTMENT

On January 29, 2018, AEI contacted the San Jose Building Department (SJBD) via office visit for information on the subject property in order to identify historical tenants, features of concern and property use.

Please refer to the following table for a listing of permits reviewed:

Year(s)	Owner/Applicant	Description of Permit and Building Use
1977	Orchard Supply Hardware	Electrical permit for warehouse, alter in floor conveyor, alter loading dock
1978	Orchard Supply Hardware	Re-roof for finished product storage warehouse
1980	Orchard Supply Hardware	Alter interior of office
1980	Orchard Supply Hardware	Certificate of Occupancy/Packaging Room

Year(s)	Owner/Applicant	Description of Permit and Building Use
1988, 1989	Orchard Supply Hardware	Re-Roof/Warehouse
1994	Orchard Supply Hardware	Plumbing Permit/Commercial
1995	Orchard Supply Hardware	Re-roof/Warehouse; Repair Structural Damage/Cal Air Office; Interior Remodel/Cal Air Office; Electrical Improvements/Cal Air Office; AC Unit Replacement/Cal Air Office; Improve Roof Materials; Relocate Electrical Panel/Amberwood Cabinet Shop
1995	The Sparta Group	Demolish Restrooms and Replace/Cal Air
1995	Amberwood	Interior and Exterior Alterations/Office; Plumbing Permit/Amberwood Cabinet Shop
1997	Barry Swenson	Re-roof Commercial Building
1997	Piedmont Partners	Exit Doors and Signs; Install Two Air Conditioning Units; Tenant Improvements/Office Space; Restroom Improvements/Piedmont Moving and Storage; Interior Alterations/Office and Warehouse
1999, 2000	Cal Air	New mechanical exhaust hood
2003	Amberwood Products	Install spray paint booth
2008	Amberwood Products	Reroof
2012	Piedmont Partners	Replace sewer line
2016	Green Valley Corp	New industrial building

Please refer to Sections 2.1 and 2.2 for information regarding the underground storage tanks and hazardous materials associated with these businesses.

2.4 PLANNING DEPARTMENT

On January 29, 2018, AEI contacted the San Jose Planning Department (SJPD) via office visit for information on the subject property in order to identify any evidence of previous or current hazardous material usage.

Evidence indicating the existence of any USTs or any current or historical storage of hazardous materials was not on file for the subject property with the San Jose Planning Department (SJPD).

2.5 OTHER AGENCIES SEARCHED

On January 29, 2018, AEI contacted the **Bay Area Air Quality Management District (BAAQMD)** via email for information on the property. The BAAQMD maintains records related to permitted air emissions.

According to Ms. Rochelle Reed, Amberwood Products Inc was permitted for two spray booths in 2014, a spray booth in 1995, and wood working in 1995. Please refer to Sections 2.1 and 2.2 for information regarding the operations associated with this business.

On February 13, 2018, AEI accessed the **California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)** online database for

information pertaining to hazardous waste disposal associated with the subject property. The HWTS generates reports on hazardous waste shipments for generators, transporters, and treatment, storage or disposal facilities (TSDFs).

The following information was on file for the subject property:

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generator	Amount (Tons)
Cal-Air	1996	Hydrocarbon solvents, waste oil and mixed oil	0.68
Amberwood Products Inc	2007, 2008	Halogenated solvents, hydrocarbon solvents, latex waste	Less than 6 per year
Cal-Air	1996-2005	Notable wastes include: halogenated solvents, halogens, etc. Refer to the appendices for the complete manifest	Less than 6 per year
Piedmont Transfer & Storage DBA	2008-2017	Unspecified oil-containing waste, off-spec, aged or surplus organics, other organic solids, methyl ethyl ketone	Less than 1 per year
Amberwood Products Inc	2002-2017	Notable wastes include: oxygenated solvents, halogenated solvents, non-halogented solvents, etc. Refer to the appendices for the complete manifest	Less than 8 per year
Johnson Controls	2005-2009	Notable wastes include: halogenated solvents, oxygenated solvents, etc. Refer to the appendices for the complete manifest	Less than 8 per year
Orchard Supply Hardware/1-Time	1983	No information	N/A
Double R Cycles	2006	No information	N/A
Skunkworks Performance and Restortation	2016	No information	N/A

Refer to Section 2.2 for additional information.

On February 13, 2018, AEI accessed the **California Department of Toxic Substances Control (DTSC) EnviroStor** database, which contains information of investigation, cleanup, permitting, and/or corrective actions that are planned, being conducted or have been completed under DTSC oversight.

No information was on file for the subject property.

On February 13, 2018, AEI accessed the **Regional Water Quality Control Board (RWQCB) GeoTracker** database, a data management system for managing sites that impact groundwater, especially those requiring groundwater cleanup [USTs, Department of Defense, Site Cleanup Program] as well as permitted facilities such as operating USTs and land disposal sites.

The subject property is listed as a closed LUST case. According to records on file with the Santa Clara County Environmental Health Department-Local Oversight Program (SCCEHD-LOP) and the GeoTracker database, the subject property was formerly equipped with a total of four

USTs, including one 550-gallon gasoline UST (Tank A), one 1,000-gallon gasoline UST (Tank B), one 2,000-gallon gasoline UST (Tank C), and one 10,000-gallon methanol UST (Tank M). The three gasoline USTs were reportedly constructed of steel and were removed in April 1989. Tank M was removed in March 1989. No further information regarding leak detection monitoring or construction types of the USTs was available. Upon removal of the USTs, Tanks A, C, and M were noted to be in good condition; however, Tank B was noted with several small holes visible and soil contamination was noted beneath Tank B. Following removal of the USTs in April 1989, a total of seven soil samples were collected from the tank pits and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPH-G) and benzene, toluene, ethylbenzene and xylenes (BTEX). Soil contamination was analyzed to be at concentrations up to 8,700 parts per million (ppm) of TPH-G, 16 ppm of benzene, 260 ppm of toluene, 170 ppm of ethylbenzene, and 740 ppm of xylenes from beneath Tank B. Based on this information, soil was over-excavated from the former area of Tank B to a depth of 13.5 feet bgs in order to remove any further contamination and until soil samples showed non-detect levels of TPH-G and BTEX. Verification samples collected at 13.5 feet bgs did not contain detectable levels of TPH-G or BTEX. A four-part composite soil sample was collected from the stockpiled soil and was analyzed to have non-detect concentrations of TPH-G and BTEX. The UST pit was then backfilled with the stockpiled soil. Groundwater samples were collected from June 1990 to July 1992 from one groundwater monitoring well MW-1 and no groundwater contamination was detected. Based on the laboratory results and work performed at the subject property, the Santa Clara Valley Water District concluded that any residual soil contamination was limited and contamination had not affected the groundwater and therefore case closure was granted in May 1993. In the case closure letter, it was requested that MW-1 be decommissioned. According to SCVWD records, the well was decommissioned. Based on this information, the former presence of USTs and closed LUST incident at the subject property represents an HREC.

On January 29, 2018, AEI contacted the **Santa Clara Valley Water District's (SCVWD) Well Division** to determine the presence of onsite wells.

AEI was informed by SCVWD staff that three destroyed wells exist on the subject property parcel. Well 1 was associated with the former closed LUST case (MW-1). Well 2 was noted as a deep water well in a building plan dated 1976. Well 3 was also noted as "MW-1", however it is unclear what the well was used for. Based on the status of the wells, they are not expected to represent a significant environmental concern at this time.

On February 13, 2018, AEI accessed the **SCVWD's online Solvents database** for information on the subject property. Files at this agency may contain information regarding hazardous materials storage, as well as information regarding unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area.

The subject property was not listed on the SCVWD's online solvents database.

3.0 INTERVIEWS AND PROVIDED DOCUMENTATION

3.1 INTERVIEWS

The Key Site Manager, Ms. Tina Viglizzo, was interviewed and completed AEI's ASTM Standard ETS Questionnaire (see Section 3.2 and Appendix D).

The preparer of this report also completed AEI's ASTM Standard ETS Questionnaire.

A copy of the completed questionnaire(s) is included in Appendix D.

3.2 ENVIRONMENTAL QUESTIONNAIRE

Pursuant to ASTM 1528-14, comments are provided in the table below for the questions denoted as "yes" in AEI's ASTM Standard ETS Questionnaire.

Question	Response	Comments to Affirmative Answers
1. Is the property or any adjoining property used for an industrial use?	Yes	Environmental concerns associated with the industrial tenants are further discussed in Section 2.2.
2. Did you observe evidence or do you have any prior knowledge that the property or any adjoining property has been used for an industrial use in the past?	Yes	Environmental concerns associated with the industrial tenants are further discussed in Section 2.2.
3. Is the property or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	Environmental concerns associated with the industrial tenants are further discussed in Section 2.2.
4. Did you observe evidence or do you have any prior knowledge that the property or any adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	Environmental concerns associated with the industrial tenants are further discussed in Section 2.2.
5. Did you observe evidence or do you have any current or prior knowledge that there are/have been any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gallons in volume or 50 gallons in the aggregate, stored on or used at the property or at the facility?	No	N/A

Question	Response	Comments to Affirmative Answers
6. Did you observe evidence or do you have any prior knowledge that there are/have been previously any industrial drums (typically 55 gallons) or sacks of chemicals located on the property or at the facility?	No	N/A
7. Did you observe evidence, or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site or is of an unknown origin?	No	N/A
8. Did you observe evidence or do you have any current or prior knowledge that there are/have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	No	N/A
9. Did you observe evidence or do you have any current or prior knowledge that there is/has been any stained soil on the property?	No	N/A
10. Did you observe evidence or do you have any current or prior knowledge that there are/ have been any registered or unregistered storage tanks (above or underground) located on the property?	Yes	Environmental concerns associated with the closed LUST case are further discussed in Section 2.5.
11. Did you observe evidence or do you have any current or prior knowledge that there are/ have been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	No	N/A
12. Is there currently evidence of, or did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	No	N/A
13. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system, or that the well has been designated as contaminated by any government environmental/health agency?	No	N/A
14. Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	No	N/A

Question	Response	Comments to Affirmative Answers
15a. Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	No	N/A
15b.Has the owner or occupant of the property been informed of the past or current environmental violations with respect to the property or any facility located on the property?	No	N/A
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	No	N/A
17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	No	N/A
18. Does the property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	No	N/A
19. Did you observe evidence, or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials been dumped above grade, buried and/or burned, on the property?	No	N/A
20. Is there a transformer, capacitor, or any hydraulic equipment [such as elevators and auto lifts] for which there are any records indicating the presence of PCBs?	No	N/A

3.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by the client during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (1555 South 7th Street, San Jose, California 95115), prepared by AEI Consultants (December 28, 2007)

This report describes the subject property generally consistent with current conditions. The buildings were occupied by Cal Air-Johnson Controls, Green Waste Disposal, Piedmont Moving Systems and Amberwood Products. On-site operations consisted of heating and air-conditioning

equipment assembly, warehouse and storage, truck repair, and cabinet making activities. Pertinent information has been included in various sections of this report. AEI did not identify any RECs for the subject property. AEI identified an HREC for the closed LUST case, and four Environmental Issues for former/current hazardous material use (further discussed in the Findings Section). AEI recommended no further action for the subject property at that time.

Appraisal of Piedmont Industrial Park (1555 S. 7th Street, San Jose, California 95112), prepared by The Fillmore Group (December 26, 2007)

This appraisal noted that the original portion of the shell improvements were reportedly constructed in 1952 with various additions completed after 1960. No environmental concerns were noted in the report.

Copies of the reports are included in the appendices.

Note: If the above report(s) were not prepared by AEI, the information obtained was not verified for accuracy and a critique of the report(s) is beyond the scope of this assessment.

4.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Data Resources, Inc. (EDR) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1528-14 is summarized in Section 4.1, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix C of this report.

The subject property was identified in the regulatory database report as follows: FINDS (4), CA EMI (2), CA HAZNET (7), CA CUPA LISTINGS (4), CA LUST (2), CA NPDES, CA SAN JOSE HAZMAT (2), ECHO (2), RCRA-SQG, CA HIST LUST, CA HIST CORTESE, CA RGA LUST (2), RCRA-LQG. See Section 4.1 for additional discussion.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

4.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Potential Environmental Concern or Other Environmental Consideration (Yes or No)
NPL	1	No	1	No
DELISTED NPL	0.5	No	0	No
SEMS (formerly CERCLIS)	0.5	No	1	No
SEMS-ARCHIVE (formerly CERCLIS NFRAP)	0.5	No	2	No
RCRA CORRACTS	1	No	1	No
RCRA-TSDF	0.5	No	1	No
RCRA LQG, SQG, CESQGs, VGN, NLR	SP/ADJ	**Yes**	3	No; however, the subject property and one other site is further discussed below
US ENG CONTROLS	SP	No	0	No
US INST CONTROLS	SP	No	0	No
ERNS	SP	No	0	No
STATE/TRIBAL HWS	1	No	27	No

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Potential Environmental Concern or Other Environmental Consideration (Yes or No)
STATE/TRIBAL SWLF	0.5	No	5	No
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	No	1	A site is further discussed below
STATE/TRIBAL LUST	0.5	**Yes**	72	No; however, the subject property and one other site is further discussed below
STATE/TRIBAL EC and IC	SP	No	0	No
STATE/TRIBAL VCP	0.5	No	1	No
STATE/TRIBAL BROWNFIELD	0.5	No	0	No
ORPHAN	N/A	No	4	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	**Yes**	44	No; however, the subject property and four other sites are further discussed below

Facility Name: AMBERWOOD PRODUCTS, INC, PIEDMONT TRANSFER & STORAGE DBA, ORCHARD SUPPLY HARDWARE, PIEDMONT MOVING SYSTEMS, MILLER RECYCLING, 1X ORCHARD SUPPLY HARDWARE, ORCHARD SUPPLY HARDWARE CORP, CAL AIR INC., JOHNSON CONTROLS, SKUNKWORKS
Database(s): FINDS (4), CA EMI (2), CA HAZNET (7), CA CUPA LISTINGS (4), CA LUST (2), CA NPDES, CA SAN JOSE HAZMAT (2), ECHO (2), RCRA-SQG, CA HIST LUST, CA HIST CORTESE, CA RGA LUST (2), RCRA-LQG Address: 1555 South 7th Street Distance: Subject Property
Comments: The subject property is listed as producing hazardous wastes, being permitted for air emissions, and as having a closed LUST case, which are all further discussed in Section 2.5. The subject property is listed as a FINDS site in association with the above listings. Based on the nature of this listing, it is not expected to represent a significant environmental concern. According to the regulatory database, this site is identified as an ECHO site in association with the above listings. Information on the EPA website ECHO indicates that the facility is currently in compliance with no outstanding violations. The subject property is also listed as having an active NPDES permit under Miller Recycling for a basic industrial storm water discharge permit which was issued in 2017. No violations are reported in association with this permit. Based on the lack of reported violations, this listing is not expected to represent a significant environmental concern.

Facility Name: VALLEY RELOCATION & STORAGE
Database(s): CA HAZNET, CA SAN JOSE HAZMAT Address: 205 East Alma Avenue Distance: Adjacent (0.010 mile) Direction: Northwest (hydrologically cross-gradient)
Comments: This site is listed as producing hazardous wastes including unspecified oil-containing waste, off-spec, aged or surplus organics, other organic solids, PCBs, and waste oil and mixed oil. The facility is also listed as a "misc. complex firms and labs". Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the listings are not expected to represent a significant environmental concern.

Facility Name: SAUSEDO METAL PRODUCTS, SERENDIPITY LAND YACHT, LEONARD REZENDES
Database(s): HIST UST (2), CA HAZNET, CA SWEEPS UST Address: 1596 South 7th Street Distance: Adjacent (0.023 mile) Direction: Southeast (hydrologically cross-gradient)
Comments: This site is listed as having a 1,000 gallon waste and/or gasoline UST that was installed in 1979. No additional information pertaining to the UST was listed. The site was also listed as producing hydrocarbon solvent waste in 2010. Based on the relative distance, groundwater gradient, and the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the listings are not expected to represent a significant environmental concern.

Facility Name: SOMMER PROPERTY, MALONEY SERV. CO, STUDENTTRANS OF AMERICA SAN JOSE
Database(s): CA HIST CORTESE, RCRA-SQG, FINDS, ECHO, CA LUST, CA HIST LUST, CA CUPA LISTINGS, CA NPDES, CA SAN JOSE HAZMAT, CA WDS Address: 1540 South 7th Street Distance: Adjacent (0.024 mile) Direction: Southeast (hydrologically cross-gradient)
Comments: According to records on GeoTracker, a 500-gallon gasoline UST was removed from the property in 1985. Groundwater samples contained elevated concentrations of TPH-G, xylenes, and ethylbezene; however groundwater contamination was believed to be localized to the area adjacent to the former tank pit. Though no remedial action took place at the site, regulatory case closure was granted in January 2000 based on the limited extent of groundwater and soil contamination and the natural attenuation that had taken place. Based on the current regulatory status and the inferred direction of groundwater flow, this site is not expected to represent a significant environmental concern. This site is also listed as producing hazardous wastes and having a NPDES discharge permit for industrial operations. This property is listed as a FINDS and ECHO site in association with the above listings. Based on the nature of these listings, they are not expected to represent a significant environmental concern.

Facility Name: STAR CONCRETE
Database(s): US MINES, CA EMI, CA UST, CA CUPA LISTINGS, CA SAN JOSE HAZMAT Address: 1510 South 7th Street Distance: Adjacent (0.024 mile) Direction: Northeast (hydrologically cross-gradient)
Comments: This site is listed as having a UST. No information regarding the size of contents of the UST were noted. This site is also listed as producing hazardous waste, being permitted for air emissions, and waste water discharges. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the listings are not expected to represent a significant environmental concern.

5.0 SITE RECONNAISSANCE

Site Reconnaissance Date	February 13, 2018
AEI Site Assessor(s)	Megan Nolet
Property Escort(s)/Relationship(s) to Property	Ms. Tina Viglizzo, Key Site Manager
Units/Areas Observed	Representative portions of the interiors of the buildings on site including Units A, B, E, C, 4D, F, K, M, N, O, and 210 East Alma Avenue
Area(s) not accessed and reason(s)	AEI was not granted access to Units 4D and 6H (storage building occupied by Piedmont Moving Systems), Unit L (artist studio occupied by James Moore), and the sub-tenant spaces of Units M, N, O (party supply companies). Based on the nature of occupancy, the limited access is not expected to significantly alter the findings of this assessment. Due to the large volume of stored products within the warehouse portions of the buildings, direct visual observation of many of the floor and wall areas of the buildings was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
Weather	75° Fahrenheit and sunny

5.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
✔		Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
✔		Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
✔		Interior Stains or Corrosion
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
✔		Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
	✔	Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
	✔	Biomedical Wastes

Yes	No	Observation
✔		Other

Refer to the Executive Summary for a list of on-site tenants.

REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

Regulated Hazardous Substances/Wastes (size/ quantity)	Location	Operations Associated with Material	Secondary Containment	Staining / Spills
New motor oil (200 gallon AST)	Piedmont Moving Systems warehouse	Small scale auto repairs	No	Yes
Diesel fuel (55 gallon drum)	Piedmont Moving Systems warehouse	Small scale auto repairs	No	No
Used oil filters (55 gallon drum)	Piedmont Moving Systems warehouse	Small scale auto repairs	Yes	No
Used oily absorbent (55 gallon drum)	Piedmont Moving Systems warehouse	Small scale auto repairs	Yes	No
Used oil (three 55 gallon drums)	Piedmont Moving Systems warehouse	Small scale auto repairs	Yes	No
Propane (one 500 gallon AST, 10 gallon containers)	Parking lot, interiors of Excess Solutions, Amberwood Products, Miller Recycling, DiMattia Construction	Fueling forklifts	No	No
Top coat varnish (three 55 gallon drums)	Amberwood Products warehouse	Cabinetry manufacturing	No	No
Paints, spray paints, varnished, lacquers, acetone (200 <10 gallon containers)	Amberwood Products warehouse	Cabinetry manufacturing	No	No
Waste liquids, rags, powder, spray booth filters, spray paint cans (four 55 gallon drums)	Amberwood Products warehouse	Cabinetry manufacturing	Yes	No
Waste antifreeze (one 30 gallon drum)	Skunkworks warehouse	Auto restoration	No	No
Waste oil (one 55 gallon drum, one 30 gallon mobile caddy)	Skunkworks warehouse	Auto restoration	No	No
ZEP Formula 15282 parts washer detergent	Skunkworks warehouse	Auto restoration	No	No
Waste paints (three 55 gallon drum)	Skunkworks warehouse	Auto restoration	No	No
Spray paints, lacquer thinner, acetone (<5 gallon containers)	Skunkworks warehouse	Auto restoration	No	No
Hydraulic fluid (9 55 gallon drums)	Miller Recycling warehouse	Tractor/forklift maintenance	Yes and no	Yes

Regulated Hazardous Substances/Wastes (size/ quantity)	Location	Operations Associated with Material	Secondary Containment	Staining / Spills
Paints (<10 gallon containers)	Storage yard of DiMattia Construction	Unknown	No	No

Some evidence of minor staining associated with leakage from some of the above mentioned containers was observed. However, no storm or floor drains were located in the immediate vicinity of the stains. Based on the relatively small size and the fact that the staining was located on the concrete floor, it appears that the staining is surficial in nature and thus is not expected to represent a significant environmental concern.

ABOVEGROUND/UNDERGROUND HAZARDOUS SUBSTANCE OR PETROLEUM PRODUCT STORAGE TANKS (ASTS/USTS)

The ASTs are further discussed above.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/No)
Pad-Mounted	1	PG&E	Post 1952	No	No
Pole-Mounted	2	PG&E	Post 1952	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Hydraulic Lifts

The interior of Skunkworks is equipped with three aboveground lifts. Each of the lifts is equipped

with a container of hydraulic fluid totaling approximately ten gallons situated approximately four feet above the ground surface. No evidence of stains or leakage from the units was observed, and the lifts are therefore not expected to represent a significant environmental concern.

INTERIOR STAINS OR CORROSION

Refer to the sections above.

DRAINS, SUMPS, AND CLARIFIERS

Multiple storm drains were observed in the parking area of the subject property. According to Ms. Viglizzo, multiple sump pumps are located on the property, specifically in the areas of the loading docks. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

A former trench drain was observed in Skunkworks unit. According to an on-site employee, the drain was installed for a former tenant, a brewery, and was subsequently capped and filled in with concrete when the brewery tenant vacated the property and Skunkworks moved in. Based on this information, the former drain is not expected to represent a significant environmental concern.

OTHER

Cleaning supplies and detergents are stored in the kitchens and in various storage rooms in the units. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

Railroad tracks are located on the western portion of the subject property. Railroad tracks and spurs can represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. However, the area of the former rail tracks and/or spurs is currently paved over, prohibiting any direct contact with near surface soils.

5.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	✔	Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✔	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
	✔	Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
	✔	Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
✔		Other

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Transformers

Multiple pole-mounted and pad-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

OTHER

Railroad tracks are located adjacent to the southwest of the subject property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. The railroad tracks located adjacent to the direction of the subject property are surrounded by gravel. Based on the presence of gravel, the use of oils, arsenic, and herbicides associated with weed or pest control is expected to be minimal, and therefore does not represent a significant environmental concern.

6.0 OTHER ENVIRONMENTAL CONSIDERATIONS

6.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific, and building products.

At the federal level, asbestos is primarily regulated by the United States EPA primarily through the EPA's NESHAP (Standard 40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard, and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state, or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls, Floors, and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape, and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

All observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

6.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LCP is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LCP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

7.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

AEI Consultants performed this LESA of the property located at 1555 South 7th Street, San Jose, Santa Clara County, California, in conformance with our project award and the scope and limitations of ASTM Standard Practice E1528-14. Any exceptions to, or deletions from, this practice are described in Sections 1.4 and 1.5 of this report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

Federal CERCLIS list

FEDERAL FACILITY ---------- Federal Facility Site Information listing

Federal RCRA generators list

RCRA-CESQG ---------- RCRA - Conditionally Exempt Small Quantity Generator

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System

Federal ERNS list

ERNS ---------- Emergency Response Notification System

State and tribal leaking storage tank lists

INDIAN LUST ---------- Leaking Underground Storage Tanks on Indian Land

State and tribal registered storage tank lists

FEMA UST ---------- Underground Storage Tank Listing
INDIAN UST ---------- Underground Storage Tanks on Indian Land

State and tribal voluntary cleanup sites

INDIAN VCP ---------- Voluntary Cleanup Priority Listing

State and tribal Brownfields sites

CA BROWNFIELDS ---------- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---------- A Listing of Brownfields Sites

EXECUTIVE SUMMARY

Local Lists of Landfill / Solid Waste Disposal Sites

CA WMUDS/SWAT ---- Waste Management Unit Database
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
CA SCH ---- School Property Evaluation Program
CA CDL ---- Clandestine Drug Labs
CA Toxic Pits ---- Toxic Pits Cleanup Act Sites
US CDL ---- National Clandestine Laboratory Register

Local Lists of Registered Storage Tanks

CA FID UST ---- Facility Inventory Database

Local Land Records

CA LIENS ---- Environmental Liens Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System
CA LDS ---- Land Disposal Sites Listing
CA MCS ---- Military Cleanup Sites Listing
CA SPILLS 90 ---- SPILLS 90 data from FirstSearch

Other Ascertainable Records

FUDS ---- Formerly Used Defense Sites
DOD ---- Department of Defense Sites
SCRD DRYCLEANERS ---- State Coalition for Remediation of Drycleaners Listing
EPA WATCH LIST ---- EPA WATCH LIST
TSCA ---- Toxic Substances Control Act
TRIS ---- Toxic Chemical Release Inventory System
SSTS ---- Section 7 Tracking Systems
RMP ---- Risk Management Plans
RAATS ---- RCRA Administrative Action Tracking System
PADS ---- PCB Activity Database System
FTTS ---- FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
MLTS ---- Material Licensing Tracking System
COAL ASH DOE ---- Steam-Electric Plant Operation Data
COAL ASH EPA ---- Coal Combustion Residues Surface Impoundments List
PCB TRANSFORMER ---- PCB Transformer Registration Database
RADINFO ---- Radiation Information Database
HIST FTTS ---- FIFRA/TSCA Tracking System Administrative Case Listing
DOT OPS ---- Incident and Accident Data
INDIAN RESERV ---- Indian Reservations
FUSRAP ---- Formerly Utilized Sites Remedial Action Program

UMTRA ---- Uranium Mill Tailings Sites
LEAD SMELTERS ---- Lead Smelter Sites
US AIRS ---- Aerometric Information Retrieval System Facility Subsystem
ABANDONED MINES ---- Abandoned Mines
UXO ---- Unexploded Ordnance Sites
DOCKET HWC ---- Hazardous Waste Compliance Docket Listing
FUELS PROGRAM ---- EPA Fuels Program Registered Listing
CA DRYCLEANERS ---- Cleaner Facilities
CA HWT ---- Registered Hazardous Waste Transporter Database
CA MINES ---- Mines Site Location Listing
CA MWMP ---- Medical Waste Management Program Listing
CA PEST LIC ---- Pesticide Regulation Licenses Listing
CA UIC ---- UIC Listing
CA WASTEWATER PITS ---- Oil Wastewater Pits Listing
CA WIP ---- Well Investigation Program Case List

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP ---- EDR Proprietary Manufactured Gas Plants
EDR Hist Cleaner ---- EDR Exclusive Historical Cleaners

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LF ---- Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1

CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 08/10/2017 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 14 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA SLIC list, as provided by EDR, has revealed that there are 10 CA SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 3 CA UST sites within

approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Cleanup Status: ACTIVE - LAND USE RESTRICTIONS				

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 57 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at proposal October 15, 1984): Lorent Barrel Drum Co. recycles drums at a plant in San Jose, Santa Clara County, California. The 5-acre site is surrounded by residential, industrial, and business areas. On-site monitoring wells are contaminated with trichloroethane, trichloroethylene, 1,1-dichloroethylene, and tetrachloroethylene, according to analyses conducted by a consultant to Lorent . Contamination is believed to have resulted from overflowing sumps and spills. About 250,000 people obtain drinking water from wells within 3 miles of the site. Lorent is working with the California Regional Water Quality Control Board CRWQCB) to determine the extent of ground water contamination. The board issued a Cleanup and Abatement Order to the company in August 1983. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act RCRA) when the company filed Part A of a permit application. On March 25,1981, EPA removed the facility as a treatment, storage, or disposal facility because it was not engaged in ha ardous waste activities. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): In March 1985, EPA and the California Department of Health Services CDHS) discovered over 300 drums containing phenols, methylene chloride, and PCBs stored on the Lorent property. In responseto action by the Santa Clara District Attorney, the company removed the drums. CRWQCB is overseeing the Lorent investigation to determine the extent of ground water contamination. CDHS will oversee the investigation of soil contamination.On February 7, 1986, the Santa Clara County District Attorney filed a complaint against the company for violation of State ha ardous waste

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

laws. The facility has been shut down until procedures for compliance are developed. Status June24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. The company is classified as a non-filer. Hence, it satisfies a component of EPA s NPL/RCRA policy. In July 1987, the owner of the Lorent site was ordered to shut it down permanently, sentenced to 2 years in jail, and fined 2.04 million. Recent sampling by CDHS consultants has shown extensive contamination in soil and ground water, both on- and off-site. In addition to the chlorinated organics identified earlier, pesticides, metals, and PCBs are present. On December 1, 1987, EPA took over as lead agency for a remedial investigation/feasibility study RI/FS) at the site. In February 1988, CDHS completed an expedited response action consisting of excavating soil with high concentrations of PCBs. In March 1988, EPA and CDHS completed removal of 1,000 drums of ha ardous materials. All materials were transported to regulated disposal facilities. The site was then graded and the surface sealed to control drainage. In May 1988, EPA completed an engineering evaluation cost analysis for systems to pump and treat shallow contaminated ground water. Status October 4, 1989): EPA has placed this site on the NPL. EPA completed the RI/FS. Following a period of public comment, a Record of Decision was signed in September 1988 finali ing the remedy as treatment of ground water with an o one ultraviolet light oxidation system. EPA is currently designing an off-site extraction system and an on-site treatment facility. EPA is also investigating the extent of the contamination in soils and on structures and expects to complete an RI/FS for the overall site in early 1990.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 06/10/2005
Comments: Deed restriction recorded for property currently owned by the Newark Group. Residences, hospitals, day care facilities, food cultivation, and groundwater extraction are prohibited at the site. Cap interference is also prohibited.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 02/23/1987
Comments: DTSC issued RAO for soil and groundwater contamination resulting from drum reconditioning business.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Settlement - Administrative
Completed Date: 04/22/2005
Comments: Consent Order signed. The Newark Group argeed to pay response costs incurred by DTSC and to abide by the terms of the site deed restriction.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision - Amendment
Completed Date: 03/10/1998
Comments: US EPA approved a ROD amendment for groundwater treatment process.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 05/21/1998
Comments: US-EPA approved an ESD for soil remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/28/1998
Comments: Preliminary close-out report finalized. Report documents completion of construction activities for OU1 and OU2. Remaining response consists of operation and maintenance of groundwater treatment system, soil vapor extraction system, and cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Completed Date:	05/15/1998
Comments:	Cap design completed. Design calls for 229,000 square feet of 3" asphalt concrete pavement with 6" layer of aggregate base.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	05/15/1998
Comments:	Remedial design report approved. Report outlines plans for design, installation, and O&M of SVE system and asphalt cap.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	09/30/1994
Comments:	EPA completed 3 separate removal actions: (1) Removal of 5 buildings and the process equipment and scrap within including 17 sumps, 7 tanks and several debris stockpiled. At the end of this RA, 1033 tons of industrial wastes, 15 tons of liquid hazardous was and 73 tons of solid hazardous waste was shipped off-site for disposal. (2) Removal of 1200 drums, 150 drums containing solvents, 350 drums containing debris, and 23 drums containing ash and liquids. Removal of tanks, vats, sumps, and process equipment. Removal of 1.18 tons of asbestos containing building materials. (3) Paving of previously and newly exposed surface soil resulting from the above removal actions. Paving used a chip seal material. Approximately 4-1/4 acres were sealed.
Completed Area Name:	PROJECT WIDE

Completed Document Type:	Removal Action Workplan
Completed Date:	10/15/1993
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision
Completed Date:	08/26/1993
Comments:	EPA issued ROD for soil operable unit. The ROD addresses soil/source remediation.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation / Feasibility Study
Completed Date:	04/22/1993
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	03/30/1992
Comments:	Shallow groundwater treatment system completed.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	06/28/1991
Comments:	Remedial design for groundwater completed.

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision
Completed Date:	09/30/1988
Comments:	EPA issued a ROD for the shallow groundwater operable unit. The remedy includes extraction/treatment of shallow groundwater and discharge of treated water to the storm sewer.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	08/30/1988
Comments:	Completed EE/CA for shallow groundwater expedited response action. Groundwater pump-and-treat system was determined to be an effective method for remediating the shallow groundwater.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	03/30/1988
Comments:	Implemented an Expedited Response Action (ERA). The ERA consisted of the following activities: drum inventory; construction of decontamination facilities; removal of polychlorinated biphenyl (PCB) contaminated pits, which were later backfilled with clean soil and capped; removal, recycling, or treatment of thousands of gallons of processed plant liquids; removal of 15 tons of contaminated scrap; and design of a surface water control plan, which was submitted to EPA for implementation. EPA installed a chip seal over approximately two thirds of the five-acre site. Demobilization occurred at the end of March 1988. A total of 21,286 drums, 1,330 tons of scrap metal, and 2,982 cubic yards of contaminated soil were removed from the site. Not reported

Completed Date:	01/27/2004
Comments:	Public notice announced lodging of proposed consent decree.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	05/15/1998
Comments:	SVE system design completed. Design includes submersible pumps, equalization tank, air-water separator, centrifugal transfer pump,

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

positive displacement blower, air-to-air heat exchanger, liquid phase GAC, and vapor phase GAC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 07/27/1990
Comments: Remedial Investigation Report approved. Nature and extent of contamination in surface soils, subsurface soils, groundwater, surface water, air, and structures evaluated. Fate and transport of PCBs, pesticides, VOCs, base/neutral and acid extractable compounds, metals, and dioxins/furans discussed. Current and future exposure pathways included in baseline risk assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/01/1987
Comments: Preliminary Site Assessment completed. Report summarizes site characteristics, site history, known soil and groundwater conditions, hydrogeology, surface hydrology, and risks to nearby receptors.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 06/19/1992
Comments: Six addenda to the Remedial Investigation include: report of monitoring well installations in Zone B, C, and D aquifers; results of shallow soil investigation on Recycled Fibers, Inc. property; update to the risk assessment for soils; results of the investigation of four conduits near the leading edge of the plume; results of soil sampling; results of installation and sampling of a monitoring well in the Zone C aquifer.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Plan Amendment
Completed Date: 08/01/2006
Comments: Soil investigation concluded that pesticides, PCE, TCE, and metals including arsenic were present in soil, however, all contaminants were present at concentrations below human health screening levels (or established background). The proposed design for the repairs includes removal of 1,424 square feet of concrete and asphalt, replacement of the cap in these areas with slab and AC over 12" of aggregate, and sealing of 4,000 linear feet of less severe cracks with joint sealant.

Completed Area Name: Shallow Groundwater
Completed Sub Area Name: Not reported
Completed Document Type: Long Term Monitoring Report
Completed Date: 12/27/2007
Comments: 2007 GW monitoring report reviewed by DTSC and found to be adequate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/21/2010

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Comments:	DTSC reviewed the 5-year report and did not have any comments and concurs with the USEPA recommendations in the report and the finding that the selected remedy continues to be protective in the short-term. Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	07/30/2010
Comments:	DTSC have reviewed the shallow groundwater treatment monitoring report and has no comments. This is a USEPA and WaterBoard lead site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Workplan
Completed Date:	12/19/2011
Comments:	The USEPA has approved the feasibility study workplan for Lorentz Barrel and Drum. The draft Sampling and Analysis Plan and the draft Quality Assurance Project Plan is due January 4th, 2012.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	12/20/2011
Comments:	Lorentz Barrel and Drum submitted the 2011 Annual Groundwater Monitoring Report No. 43.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	01/31/2012
Comments:	Groundwater treatment report for September 2011 - December 2011.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Long Term Monitoring Report
Completed Date:	12/16/2011
Comments:	Annual groundwater monitoring report from December 1, 2010 through November 30, 2011.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision w/ESD
Completed Date:	11/22/2013
Comments:	Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	5 Year Review Reports
Completed Date:	09/01/2015
Comments:	The Fourth Five-Year Review Report identified as a remedy performance issue that the migration of 1,4-dioxane may not be controlled and there is continued diffusion of contamination from the A/B aquitard to Zone A soil vapor and Zone B groundwater. The remedies for OU-1 and OU-2 were determined to be protective of human health and the environment; however, in order for the remedies to be protective in the long-term, the Focused Feasibility Study needs to be completed in

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

order to evaluate the current remedies for both OU-1 and OU-2 and make recommendations to modify the existing remedies or select new remedies for both OUs. .

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/27/2004
Comments: Consent decree signed to recover DTSC response costs from the primary large quantity generators.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 05/23/1995
Comments: Administrative order on consent signed for de minimis settlement. The settlement pertains to 89 parties, each contributing less than 1% of the drums recycled at the facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/23/1996
Comments: Administrative consent order signed for the 2nd round of cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/16/1997
Comments: Administrative consent order signed for the 3rd round of the cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/23/2002
Comments: DTSC signed Prospective Purchaser Agreement with 10th Street Land Management. Property will be used as a long-term storage yard for commercial and construction vehicles. Settling respondent to maintain site cap and enter into a land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Environmental Interest/Information System
SUPERFUND NPL

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Status:	Completed - Case Closed
Status Date:	07/28/2016
Case Worker:	AC
RB Case Number:	14-749
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21B07f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	In May 1994 one 550 gallon underground storage tank (UST) was removed from the site. Soils from the UST pit were excavated; however the quantity of soil removed was not reported. On September 18 and 19, 1995, three borings (SB-1 through SB-3) were advanced. Three additional borings were installed and converted to 2-inch diameter monitoring wells (MW-1 through MW-3). Total Petroleum Hydrocarbons (TPH) as gasoline and TPH as diesel in soil were detected in the vicinity of the former dispenser. Based on analytical results of groundwater samples from monitoring wells and grab groundwater samples from soil borings, diesel fuel was determined to be the predominant groundwater contaminant at the site. Routine groundwater monitoring has been conducted since March 1998. July 2001 A workplan to perform an additional round of groundwater sampling and further define soil and groundwater contamination south and southeast of the former 550-gallon gasoline UST and soil boring SB-2. September 2002 Three additional soil borings (SB-4 through SB-6) were advanced. On

G I TRUCKING (Continued) **S104396980**

August 20, 2003, monitoring wells MW-1 through MW-3 were sampled and reported minimal contamination. Routine groundwater monitoring continued from 2002 to 2010. On October 18, 2010, the DEH issued a No Further Action letter stating no further action was required at the site while the case was reviewed for closure 2013 The County of Santa Clara Department of Environmental Health (DEH) performed a review of the G.I. Trucking, Inc. case against the Low-Threat Closure Policy (LTCP) and determined that additional data was needed to evaluate the site data against all of the LTCP criteria. On June 7, 2013, DEH issued a directive requiring an Additional Site Assessment Work Plan (Workplan) to delineate soil and groundwater contamination, a sensitive receptor survey, and a report summarizing the site assessment work. 2014 Three additional soil borings and one additional monitoring well (MW-5) were installed. Soil samples were collected from the soil borings at various depths and groundwater samples were collected from the five site monitoring wells. 2015 Based on the results of the 2014 investigation, groundwater beneath the site meets the LTCP criteria for case closure.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

WALMART NEIGHBORHOOD MARKET NO 4174 (Continued) **1016955268**

Contact address:	PO BOX 8041 BENTONVILLE, AR 72712-8041
Contact country:	US
Contact telephone:	479-277-8972
Contact email:	ROSE.ARNOLD@WALMART.COM
EPA Region:	09
Classification:	Small Small Quantity Generator
Description:	Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name:	WAL MART STORES INC
Owner/operator address:	Not reported Not reported
Owner/operator country:	US
Owner/operator telephone:	Not reported
Owner/operator email:	Not reported
Owner/operator fax:	Not reported
Owner/operator extension:	Not reported
Legal status:	Private
Owner/Operator Type:	Operator
Owner/Op start date:	12/10/2014
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Latitude: 37.314651
Longitude: -121.864684
Status: Completed - Case Closed
Status Date: 11/06/2014
Case Worker: AC
RB Case Number: Not reported
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E21B06f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Gasoline
Site History: This site use was a wholesale roofing company in 1992 when the tanks were removed. A well company (C&N Pump) and a masonry contractor (E&T Masonry) presentlly occupy the site. The fuel tanks, two 500 gallon gasoline, were removed in July 1992 by Trump Brothers. Soil samples indicated that soil below the fuel tanks contained gasoline.
Available information did not indicate that the additional excavation was performed to removed soil impact and the excavated soil had been returned to the tank excavation. Since the tank removal, various investigative and remedial activities have been performed at the site as listed in the preceding report summary. The surrounding parcels are used for commercial purposes. An appliance company (Horbat Corporation) currently occupies the adjacent building southwest of the site at 325 Phelan Avenue (APN 477-09-023). Adjoining the site to the northwest is the rear of the property at 1670 S. 7th Street (APN 477-09-30) which is an open storage area. Another open area lies to the northeast and is identified as 345 Phelan Avenue (APN 477-09-13). Southeast of the site is Phelan Ave. across which lie properties that are occupied by various commercial businesses (APN numbers 477-26-6,7,43, and 50).

Lead Agency:	SANTA CLARA COUNTY LOP
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501343
Global Id:	T0608501343
Latitude:	37.3137414744535
Longitude:	-121.864750385284
Status:	Completed - Case Closed
Status Date:	01/12/2017
Case Worker:	GOR
RB Case Number:	12-037
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21B04f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Based on the May 2012 groundwater monitoring event and data for the site, Allterra concluded the following: During this monitoring event, the groundwater flow direction was to the northeast at a gradient of approximately 0.0129 ft/ft, which is generally consistent with previous monitoring events. The highest levels of dissolved TPHg and benzene in groundwater were detected in MW- 1 at concentrations of 930 "g/L and 6.4 "g/L, respectively. The highest concentration of TPHd was found in EW-1 (970 "g/L). Petroleum constituents continue to generally show a stable to decreasing trend in each well at the Site. Based on the conclusions presented above, Allterra recommended the following: Continue with the current semi-annual groundwater monitoring program at the Site to evaluate groundwater quality under varying seasonal conditions. Evaluate the Site for potential low-risk case closure.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

EUROPEAN SPECIALTY (Continued) **S106101996**

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE

GLENCORE RECYCLING (Continued) **1000366157**

USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: K069
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

GLENCORE RECYCLING (Continued) **1000366157**

. Waste code: P099
. Waste name: ARGENTATE (1-), BIS(CYANO-C)-, POTASSIUM (OR) POTASSIUM SILVER CYANIDE

. Waste code: P104
. Waste name: SILVER CYANIDE (OR) SILVER CYANIDE AG(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Historical Generators:
Date form received by agency: 03/01/2014
Site name: GLENCORE RECYCLING, INC.
Classification: Large Quantity Generator

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 162
. Waste name: Other spent catalyst

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

GLENCORE RECYCLING (Continued) **1000366157**

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 272
. Waste name: Polymeric resin waste

. Waste code: 281
. Waste name: Adhesives

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 411
. Waste name: Alum and gypsum sludge

. Waste code: 421
. Waste name: Lime sludge

. Waste code: 431
. Waste name: Phosphate sludge

. Waste code: 441
. Waste name: Sulfur sludge

. Waste code: 491
. Waste name: Unspecified sludge waste

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 571
. Waste name: Fly ash, bottom ash, and retort ash

. Waste code: 581
. Waste name: Gas scrubber waste

. Waste code: 591
. Waste name: Baghouse waste

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 721
. Waste name: Liquids with arsenic > 500 mg/l

GLENCORE RECYCLING (Continued) **1000366157**

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 724
. Waste name: Liquids with lead > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 727
. Waste name: Liquids with selenium > 100 mg/l

. Waste code: 728
. Waste name: Liquids with thallium > 130 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

GLENCORE RECYCLING (Continued) **1000366157**

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: K069
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

Date form received by agency: 05/01/1990
Site name: MICRO METALLICS CORP
Classification: Large Quantity Generator

Date form received by agency: 08/15/1980
Site name: MICRO METALLICS CORP
Classification: Not a generator, verified

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 150.1

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 53082.6

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 43376.1

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 53082.6

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 9706.4

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 37772.4

Waste code: D008
Waste name: LEAD
Amount (Lbs): 31478.8

Waste code: D011

GLENCORE RECYCLING (Continued) **1000366157**

Waste name: SILVER
Amount (Lbs): 38277

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 150.1

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS
Amount (Lbs): 30825.7

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.
Amount (Lbs): 12550.5

Corrective Action Summary:

Event date: 06/01/1993
Event: RFA COMPLETED

Event date: 06/01/1993
Event: RFA COMPLETED-ASSESSMENT WAS A RFA

Event date: 06/01/1993
Event: DETERMINATION OF NEED FOR AN INVESTIGATION-INVESTIGATION IS NOT NECESSARY

Event date: 12/23/1994
Event: INVESTIGATION WORKPLAN RECEIVED

Event date: 01/01/1995
Event: INVESTIGATION IMPOSITION

Event date: 05/04/1995
Event: INVESTIGATION WORKPLAN RECEIVED

Event date: 05/17/1995
Event: INVESTIGATION WORKPLAN APPROVED

Event date: 06/14/1996

Global Id:	T10000009004
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.31061
Longitude:	-121.86943
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	2189
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Cyanide
Site History:	Micro Metallics operated as an electronic, scrap metal recycling center. On October 29, 1981, ponded rainwater was pumped from a processing area into an unpaved area. Upon realization that the discharged water contained cyanide, the Regional Water Quality Control Board was notified of the release. Micro Metallics took steps to conceptualize the lateral and vertical extent of the release and remediate contamination. In this process, 230 cubic yards of contaminated soil was removed in February and May of 1982. Monitoring wells were installed and sampled regularly showing a decline in contamination, below maximum contaminant levels. A new occupant is currently at the site, Xstrata, they conduct the same operations as the former Micro Metallics.

Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21A08f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Trichloroethylene (TCE), Diesel
Site History:	Phase II investigation submitted that included a soil boring adjacent to what appears to be a fill port for an underground storage tank. Records indicate a gasoline UST was present onsite and was reported to have been taken out of service circa 1988. The UST was to be filled with slurry due to its close proximity to a building. There is no documentation of the UST being properly closed in place. Soil and groundwater samples were reported to have concentrations of Diesel. Groundwater samples were also reported to contain 1,2-Dichloroethane and Trichloroethane.

Case Worker:	Not reported
RB Case Number:	14-071
Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21H03f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	1988 In January, 2 soil samples (1A and 1B) were collected from borings advanced at either end of an underground storage tank (UST) at the site. The samples were collected between 7.5 and 8 feet below the ground surface (ft bgs). The samples were composited prior to being analyzed and were reported to contain 6.1 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 0.24 ppm Toluene, and 0.16 ppm Xylenes. These soil samples were collected prior to abandoning the UST in place. It was reported that the UST was removed from service in November 1987 when during a scheduled test a leak occurred. An unknown quantity of fuel was lost and the contents of UST were removed. 1991 In September, an angled boring was advanced to 10.5 feet at an angle of 53 degrees in order to obtain a sample from beneath the abandoned UST. Soils encountered were reported to have a distinct fuel odor. A soil sample (Soil, #1) is estimated to have been collected from 8.5 ft bgs and was reported to contain 550 ppm TPHg, 0.53 ppm Ethylbenzene, and 0.77 ppm Xylenes. 1995 In October, 2 borings (SB-A and SB-B) were advanced onsite to 18.5 and 15.5 ft bgs, respectively. Groundwater was encountered between 11 and 14 ft bgs. 3 soil samples were collected and reported to have maximum concentrations of 320 ppm TPHg, 3.2 ppm Benzene, 2.1 ppm Toluene, 4.9 ppm Ethylbenzene, and 16 ppm Xylenes. Grab groundwater samples were collected from each boring. SB-A was reported to contain 110,000 part per billion (ppb) TPHg, 9,600 ppb Benzene, 1,100 ppb Toluene, 3,500 ppb Ethylbenzene, and 13,000 ppb Xylenes. Sample SB-B collected approximately 42 feet downgradient of the UST was reported to contain very low concentrations of Toluene and Xylenes. TPHg and Benzene were not reported to be present above the laboratory reporting limits. 1997 In July, 3 monitoring wells (MW1 through MW3) were installed to 23 ft bgs onsite. 6 soil samples were collected and reported to contain maximum concentrations of 360 ppm TPHg, 1 ppm Benzene, 0.48 ppm Toluene, 5.1 ppm Ethylbenzene, and 12 ppm Xylenes in the sample collected from MW2 at 15.5 ft bgs. Well MW2 is located downgradient of the UST. Initial samples collected from the monitoring wells reported maximum concentrations of 36,000 ppb TPHg, 3,800 ppb Benzene, 230 ppb Toluene, 1,600 ppb Ethylbenzene, and 3,700 ppb Xylenes. Routine monitoring of the wells began at this time. 1999 In April, 5 hydropunch borings (SB2-A through SB2-E) were advanced to 28-40 ft bgs. Soil samples were collected from boring SB2-A only and reported to contain maximum concentrations of 320 ppm TPHg, 2.1 ppm Benzene, 0.9 ppm Toluene, 7.9 ppm Ethylbenzene and 19 ppm Xylenes. These concentrations decrease with depth to below the laboratory reporting limits for all constituents in the deepest sample collected at 35.5 ft bgs. 13 depth discrete grab groundwater samples were collected from the borings and reported to have maximum concentrations of 88,000 ppb TPHg, 18,000 ppb Benzene, 1,900 ppb Toluene, 3,800 ppb Ethylbenzene, 12,000 ppb Xylenes, and 160 ppb Methyl tert-Butyl Ether (MtBE) in the sample collected at 18 ft bgs in boring SB2-A. In August, 1 monitoring well (MW4) was installed offsite to 20 ft bgs. No soil samples were reported to have been submitted for chemical analysis. 2002 In September and October, 7%

PACIFIC SHEET METAL SHOP (Continued) **S101309413**

hydrogen peroxide solution was added to wells MW1 through MW3 on a weekly basis. Approximately 185 gallons of solution were added during this time. Rebound was observed within 2 quarters in well MW2. 2003 In July and August, hydrogen peroxide solution was added to well MW2 on a weekly basis. Approximately 95 gallons of solution were added. Again, rebound was observed within 2 quarters in well MW2. 2006 In April, 2 wells (MW5 and EW1) were installed to 22-25 ft bgs. 7 soil samples were collected and reported maximum concentrations of 1,600 ppm TPHg, 8 ppm Benzene, 1.9 ppm Toluene, 27 ppm Ethylbenzene, and 42 ppm Xylenes. MtBE was not reported to be present in any of the samples above the laboratory reporting limits. The maximum concentrations were reported for the sample collected in EW1 at 16.5 feet and concentrations decreased in deeper samples. In July, a two-phase extraction (TPE) test was conducted on wells EW1 and MW2. Based on the test, it was recommended to implement dual phase extraction (DPE) with down-well pumps coupled with soil vapor extraction (SVE). 2007 In January, well MW2 was drilled out and re-installed as a 4-inch extraction well MW2A to 30 ft bgs. 2009 In June, a soil vapor survey was conducted.

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: Soil and groundwater beneath the Site have been contaminated by petroleum hydrocarbons from leaking USTs. The November 14, 2008, Regional Water Board Order No. R2-2008-0093 sets cleanup standards for the Site, requires the responsible parties to propose and implement a revised corrective action plan to cleanup the remaining contamination, and requires the responsible parties to comply with the Site monitoring requirements. Several remedial investigations to delineate this contamination have occurred between 1986 and 2006. Twenty groundwater monitoring wells have been installed at the Site. Quarterly groundwater monitoring has been performed since 1999. Soil samples collected during Site investigations contained the following maximum concentrations: 5,900 milligrams per kilogram (mg/kg) Total Petroleum Hydrocarbons as diesel (TPH-d), 4,600 mg/kg Total Petroleum Hydrocarbons as gasoline (TPH-g), 70 mg/kg Methyl-tert butyl ether (MtBE), and 13 mg/kg benzene. Soil samples collected during a Site investigation conducted in January/February 2006 contained the following maximum concentrations: 3,300 mg/kg TPH-g, 1.2 mg/kg benzene, 12 mg/kg MtBE, and 3 mg/kg tertiary butyl alcohol (TBA). Groundwater samples collected during Site investigations contained the following maximum concentrations: 560,000 micrograms per kilogram (a%g/l) TPH-d; 440,000 a%g/l MtBE; 250,000 a%g/l TPH-g; 26,000 a%g/l benzene; 27 a%g/l TBA, and; 5.9 a%g/l tertiary amyl methyl ether. Groundwater samples recently collected at the Site during the first quarter 2008 monitoring event contained the following maximum concentrations: 28,000 a%g/l TBA, 15,000 a%g/l TPH-g, 13,000 a%g/l MtBE, 3,100 a%g/l benzene and 1,200 a%g/l TPH-d. One 12,000-gallon and two 10,000-gallon gasoline USTs and two 10,000-gallon and one 2,000-gallon diesel UST, and associated piping and dispensers were removed and replaced at the Site in September/October 1997. A groundwater extraction and treatment system has operated sporadically at the Site since December 2002. The system consists of four shallow extraction wells with granular activated carbon treatment. A total of 1,165,000 gallons of groundwater were treated as of February 2008. Approximately 40 pounds of gasoline were removed by groundwater extraction. A SVE system was installed at the Site and operated sporadically from May 2006 to December 2007. An internal combustion engine extracted and treated hydrocarbon contaminated vapor from four groundwater monitoring wells and six vapor extraction wells. However, to date, corrective efforts have not resulted in reducing the residual contamination to acceptable levels. Accurate hydrocarbon mass removal estimation is not possible due to incomplete record keeping. Soil and groundwater remediation has not been completed at the Site. Additional soil and groundwater remediation is needed to meet cleanup standards. Regional Water Board Order No. R2-2009-0054 rescinds Site Cleanup Requirements Order No.R2-2008-0093. The case was transferred to the Santa Clara County Department of Environmental Health since the Dischargers were complying with Regional Water Board requirements. In September 2010, a SVE with air sparge system began operations onsite. SVE was shut down in July 2012 and the air sparge system was shut down in September 2012. Following completion of verification groundwater monitoring, the site was found to meet the LTCP.

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0

290 KEYES ST., PETE'S STOP (Continued) **S101304132**

Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

SPARTAN PLATING (Continued) **S111216954**

Comments: Results showed Chromium in soil at 435 ug/g and hexavalent chromium in the sump at 62 ug/ml.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/21/2002
Comments: DTSC conducted a Preliminary Assessment under the PA/SI Grant which found the above described contamination. Between September 1998 and May 2000, soil and groundwater samples were tested for plating shop related compounds. Also, the soil was tested to determine the disposal profile from regrading and placement of concrete pavement across the site. April 2000 soil sampling results showed chromium (250 thru 320 ppm. April 1999 groundwater sampling results showed Chromium (0.84 thru 14 ppm), lead (0.051 thru 5.4 ppm), and nickel (0.46 thru 25 ppm). The 1998 and 1999 soil and groundwater sampling also detected Tetrachloroethene (PCE). The concentration of PCE in soil ranged from 13 to 190 ppm. The concentration of PCE in groundwater ranged from 2.7 to 200 ppb. The site was de-certified based on the results of this assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/17/2007
Comments: No Further Action letter was issued. Sump was removed in 2000 followed by a soil removal. Sampling data indicates contaminant concentrations below screening levels.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

1098 S. 5TH ST, SAN JOSE - FORMER ANCEWICZ (Continued) **S105691046**

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Trichloroethylene (TCE), Gasoline
Site History: In 2002, a Phase I Assessment was completed and identified a 1,000-gallon gasoline UST that had been filled with sand slurry in 1985. The site was formerly used for fiberglass manufacturing associated with a pool company. A subsurface investigation was conducted in the area of the UST in 2002 and reported TPHg of up to 1,000 ppm in soil and 300,000 ppb in groundwater. In 2003, the UST was removed and a monitoring well was installed. Additional wells were installed between 2003 and 2004. Between 2004 and 2005, approximately 1,500 tons of soil were removed from the site. The soil excavation activities were conducted prior to the planned re-development of the site. The site has been re-developed with multi-residential structure. Dual Phase Extraction commenced in March 2006 and continued through July 2009. A new consultant has been retained and they are trying to bring the remediation system back online. TCE was detected in soil and groundwater at the site, but not investigated in association with the release from the UST. The TCE may be present from the former pool construction company that was located onsite.

RB Case Number:	06-077
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E16E01f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Results of laboratory analyses for the June 9, 2011 sampling event conducted by WELLTEST, Inc. are summarized below: TPHg (Gasoline): Up to 3,900 "g/L of TPHg was detected in the samples. TPHg concentrations exceed the ESL of 100 "g/L in wells MW-2, MW-5, MW-6, and GDMW-2. Benzene: Up to 510 "g/L of benzene was detected in the samples. Benzene concentrations exceed the ESL of 1 "g/L in wells MW-2, MW-5, MW-6, MW-8, MW-9, and GDMW-2. Toluene: Up to 0.8 "g/L of toluene was detected in the samples. Toluene concentrations did not exceed the ESL of 40 "g/L in any of the seven wells sampled. The sample from MW-6 had a detection limit of 12 "g/L. Ethylbenzene: Up to 110 "g/L of ethylbenzene was detected in the samples. Ethylbenzene concentrations exceed the ESL of 30 "g/L in well MW-6. Xylenes: Up to 3.6 "g/L of xylenes were detected in the samples. Total Xylenes concentrations did not exceed the ESL of 20 "g/L in any of the seven wells sampled. The sample from MW-6 had a detection limit of 12 "g/L. MTBE: Up to 18 "g/L of MTBE was detected in the samples. MTBE concentrations exceed the ESL of 5 "g/L in wells MW-2, MW-3, and MW-8. The sample from MW-6 had a laboratory detection limit of 12 "g/L. WELLTEST offers the following comments and recommendations: The site appears to meet the San Francisco Bay Regional Water Quality Control Board (SFRWQBC) definition of a low-risk fuel site, as described in their memorandum Interim Guidance of Required Cleanup at Low-Risk Fuel Sites, dated December 8, 1995.

Lead Agency:	SANTA CLARA COUNTY LOP
Case Type:	LUST Cleanup Site
Geo Track:	http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608500837
Global Id:	T0608500837
Latitude:	37.3092018106368
Longitude:	-121.866145133972
Status:	Completed - Case Closed
Status Date:	11/09/2017
Case Worker:	TF
RB Case Number:	11-029
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E21G02f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Diesel
Site History:	Six (6) underground storage tanks (USTs) were removed from the Subject Site between 1987 and 1989, including two gasoline and four diesel USTs. The USTs are identified as a 2,000-gallon diesel removed September 21, 1987; 1,000-gallon gasoline removed February 13, 1988; 550-gallon diesel removed April 19, 1989; 5,000-gallon diesel removed on December 15, 1989; 2,000-gallon unleaded gasoline removed on December 28, 1989; and a 7,000-gallon diesel removed on December 28, 1989. Subsurface investigations began in January 1988 with the installation of groundwater monitoring well (MW-1) following the removal of a UST in September 1987 and subsequent installation of three additional groundwater monitoring wells (MW-2 through MW-4) in February 1990 following the removal of four additional USTs in April and December 1989. The USTs were not replaced. From January 1988 to April 2015, periodic groundwater monitoring and sampling events were conducted. Twenty-three sampling events were conducted in wells MW-5 through MW-7 from July 2003 to April 2015. Ongoing groundwater monitoring demonstrated that no significant sources exist in soil and significant natural attenuation of residual petroleum hydrocarbons in groundwater has occurred. The most recent subsurface investigation results were reported in the Limited Assessment and Groundwater Monitoring Well Sampling Report dated May 15, 2015. Exploratory soil borings advanced specifically to further delineate suspect subsurface impacts away from the former USTs demonstrated that residual

SIMS LMC RECYCLERS (Continued) **1000124101**

hydrocarbon impacts in soil and groundwater are localized and relatively low. Historical investigation data conclusively demonstrates that the Site meets criteria for regulatory closure under criteria summarized in the States Low Threat Closure Policy.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Local Case Number: 07S1E21A07f
Potential Media Affect: Other Groundwater (uses other than drinking water)

WESTERN STATES OIL CO (Continued) **U001602675**

Potential Contaminants of Concern: Benzene, Diesel, MTBE / TBA / Other Fuel Oxygenates
Site History: The Site is located on the north corner of Needles Avenue and South Tenth Street at 1790 South Tenth Street in San Jose, California. The Site currently operates as a retail fuel station and bulk storage plant for petroleum products. In 1989, five underground storage tanks (USTs) four 12,000-gallon gasoline and one 12,000-gallon diesel were removed from the subject facility. Soil samples collected following UST removal activities indicated soil beneath the Site was impacted by total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as diesel (TPHd). In 1990, four diesel USTs (two 10,000-gallon, one 12,000-gallon, and one 16,000-gallon) were removed from the Site. Soil analytical results indicated the presence of TPHd and benzene. Additionally, three monitoring wells (B-5 through B-7) were installed at the Site. In 1991, thirty-eight soil borings and three monitoring wells (MW-101 through MW-103) were installed at the Site. Results of the investigation indicated the presence of free product in subsurface soils and groundwater analytical results up to 62,000 parts per billion (ppb) of TPHg. In 1999, the Santa Clara Valley Water District reviewed the Site for case closure. On December 1, 1999 the case was closed despite the presence of residual petroleum hydrocarbons in groundwater. Between June 2003 and May 2004, fuel dispenser closure activities were performed at the Site. Soil samples collected during dispensers. Based on these results, the SCCDEH required a site assessment be performed to characterize petroleum hydrocarbons in soil and groundwater beneath the Site. In 2005, a Preliminary Site Assessment Report was prepared to document the results of a site investigation indicated that residual petroleum hydrocarbons remained in groundwater beneath the Site. In 2010, the SCCDEH requested that quarterly groundwater monitoring be reinitiated.

RB Case Number: 19-011
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E17J01f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 1984 In February, four fuel underground storage tanks (UTSs) were removed from the site. One UST was 8,000-gallon, one was 7,500-gallon and two USTs were 5,000-gallon in capacity. There are no reports on USTs contents, and soil removal and disposal volumes and activities.

EXPRESS GAS & AUTO SERVICE (Continued) **S105193302**

A UST removal report shows the former USTs, the excavated soil stockpiles, the locations of soil samples collected from the UST excavations and the analytical results of the soil samples. Up to 15,000 milligrams per kilogram (mg/Kg) of petroleum hydrocarbons as gasoline were detected in the soil samples collected from the USTs excavations. In July, four borings were drilled at the site and converted the borings to monitoring wells E-2 through E-4. A soil sample collected from Boring E-3 at 15 feet below ground surface (bgs), contained 5,200 mg/kg TPH-gasoline. In August, a groundwater sample collected from E-3, contained 4,800 micrograms per liter (ug/L) benzene, 6,500 ug/L toluene and 8,800 ug/L xylenes and ethylbenzene. 1987 In March, groundwater samples from monitoring wells E- 2, E- 3 and E-4. Well E-3 contained 9,300 mg/L TPH-gasoline, 390 ug/L benzene, 44 ug/L toluene and 300 ug/L xylenes and ethylbenzene. 1988 In October, three monitoring wells S-5 through S-7 were installed at the site. 1989 In September the Santa Clara Valley Water District published a memorandum about the site. The memorandum summarized the UST removal and site investigation activities conducted to date. 1990 In February, two groundwater monitoring wells S-8 and S-9 were installed and soil boring S-A was drilled. In August, groundwater samples were collected from the wells in the monitoring network. The highest TPH-gasoline and BTEX concentrations were detected in monitoring well S-9. In September four soil vapor monitoring wells were installed (SV-1 through SV-4), and a conduit study was conducted for the areas surrounding the site. TPH-gasoline was detected in all soil samples collected from these borings at concentrations ranging from 5 mg/Kg to 1,000 mg/Kg. 1992 Soil vapor extraction and treatment system (SVET) was installed at the site. Soil vapor was extracted from wells SV-1, SV-3 and SV-4 between May 1992 and June 1993. 1993 In May, a progress report on groundwater monitoring and soil vapor extraction was submitted. Approximately 4,800 pounds of petroleum hydrocarbons as gasoline were removed by the SVET system. Maximum concentrations of TPH-gasoline and benzene detected in influent soil vapor were 38,000 ppmv and 780 ppmv, respectively. 1995 Oxygen release compound (ORC) socks were installed in wells SV-1 through SV-4, E-3, S-8 and S-9 to enhance the degradation of TPH-gasoline in groundwater. 2000 In April, an excavation for the installation of the new underground fuel storage tanks at the site was completed. A 550-gallon waste oil tank was discovered during the excavation activities. The waste oil UST was removed under permit from the City of San Jose Fire Department, and 44 tons of visibly impacted soil was excavated to a depth of 12 feet below ground surface. Soil samples were collected from both ends of the excavation. TPH-gasoline concentrations in soil samples WO-B1 and WO-B2 were 566 mg/Kg and 860 mg/kg, respectively. TPH-diesel concentrations were 2,980 mg/kg and 7,100 mg/kg, and TRPH concentrations in soil samples were 20,300 mg/Kg and 11,000 mg/kg, respectively. The waste oil UST excavation was backfilled with pea gravel and compacted. Approximately 2,000 pounds of ORC was distributed at multiple locations in the excavations to enhance the biodegradation of TPH-impacted soil and groundwater beneath the site. 2001 In April, groundwater samples were collected from wells E-2, E-3, S-8 and S-9 to evaluate the impact of the former waste oil UST to groundwater beneath the site. The following maximum concentrations of TPH compounds were detected in wells E-2 and S-9: TPH-diesel 660 ug/L, TPH-gasoline 6,200 ug/L, TRPH 2,700 ug/L, TEPH 740 ug/L and MTBE 280 ug/L. 2002 In May, a corrective action plan (CAP) was

EXPRESS GAS & AUTO SERVICE (Continued) **S105193302**

submitted which recommended periodic soil vapor extraction as a method to further reduce contamination. The Santa Clara Valley Water District approved the CAP on 8/9/2002. 2003 In March, the CAP was implemented and an SVE event was completed using wells S-9, SV-1, SV-3, and SV-4. 2005 Biosparging events were conducted at well S-9 from December 2003 to March 2005 to reduce TPH-gasoline and benzene concentrations in groundwater. Dissolved oxygen readings were taken in monitoring well S-9 and SV-4 to monitor oxygen transfer to groundwater. Groundwater samples were collected from S-9 prior to and after each biosparging events analyzed TPH gasoline and BTX. The results are reported in the Shaw Environmental June 1, 2005, quarterly monitoring report. TPH-gasoline, Benzene and MTBE concentrations in December 2003 were 21,000 ug/L, 10,000 ug/L and 340 ug/L, respectively. TPH-gasoline, Benzene and MTBE concentrations in March 2005 were 11,000 ug/L, 4,000 ug/L and 150 ug/L, respectively. 2005 2012 Groundwater monitoring occurred on a quarterly or semi-annual basis until the last monitoring event on 5/31/2012.

Latitude: 37.32053
Longitude: -121.86116
Case Type: Cleanup Program Site
Case Worker: GOR
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil
Potential Contaminants of Concern: Arsenic, Lead
Site History: A triangular strip of land that has a former rail spur is proposed to be redeveloped into a self-storage facility and public walk/bike path. Elevated concentrations of arsenic and lead were detected in soil samples in the upper 5 feet.

Local Agency:	Not reported
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Asbestos - Naturally Occurring Asbestos (NOA), Lead
Site History:	The site is comprised of the following properties: 164, 170 and 198 W. Alma Avenue and 1424 and 1438 Little Orchard Street. This is the southeast corner of the intersection of W. Alma Avenue and Little Orchard Street. It is believed that the property address following re-development will be 198 W. Alma Avenue. All parcels are being combined and redeveloped as a K-5 public elementary school. Sampling reported the presence of lead and naturally occuring asbestos (NOA). The lead appears to be related to debris and lead-based paint used on the structures, which date back to circa 1915. Soil with Lead concentrations exceeding TTLC to be removed from the site. Soil with lead exceeding 80 ppm will be placed in a consolidation cell under the planned parking lot. Impacted soil to be capped with soil and asphalt. NOA concentrations did not exceed hazardous waste levels and will be handled in accordance with the DTSC advisor for schools.

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E16M08f
Potential Media Affect:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Ethylbenzene, Gasoline, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	In 2015, one 1,000 gallon gasoline Underground Storage Tank (UST) was removed from the facility. The tank was not replaced. During tank removal activities, approximately 100 gallons of residual gasoline and 700 gallons of groundwater was removed. In addition, the tank pit was excavated to a depth of 18 feet below ground surface (bgs) and the soil was disposed of offsite. No additional details regarding the soil excavation and disposal was available for review. In July 2016, soil and groundwater samples were collected and five groundwater monitoring wells were installed. Soil vapor sampling was conducted in November and December 2016. During the latest groundwater monitoring event in 2016, the highest detections were 11,000 parts per billion (ppb) TPH-g; 240 ppb benzene; 5.3 ppb toluene, 610 ppb ethylbenzene, 58 ppb xylenes; and below detection limits for Methyl Tertiary Butyl Ether (MTBE). Soil vapor sampling conducted in 2016 had maximum detections of benzene at 25 micrograms per cubic meter (a%g/m3), toluene at 71 a%g/m3, ethylbenzene at 13 a%g/m3, xylenes at 66 a%g/m3, Tetrachloroethylene (PCE) at 1,200 a%g/m3, and Trichloroethylene (TCE) at 280 a%g/m3.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Type: Cleanup Program Site
Case Worker: REG
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: 43S1131
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Trichloroethylene (TCE), Diesel
Site History: The Site is located on the northwest corner of Pomona Avenue and Banard Avenue in a light industrial/commercial area. A large building

ALL STICK AND GEARS (Continued) **S106118084**

in the front of the Site was formerly used as an auto repair shop and a wrecking yard (All Stick and Gears). The Site is now used primarily for storage of nursery plants and potted trees. Two 1000-gallon underground storage tanks (USTs) were excavated in 2003. During excavation, it was noted that each USTs had holes in the ends, and that soil beneath the USTs was discolored and smelled of petroleum hydrocarbons. Soil samples collected beneath the tanks contained low concentrations of petroleum hydrocarbons (primarily as diesel). Tricholorethene (TCE), a solvent, was also detected in soil samples collected from the excavation. Groundwater samples collected from site monitoring wells during March 2005 contained concentrations of gasoline and TCE. Concetrations of TCE detected in groundwater samples collected in 2015 indicate that the site meets the criteria in he Assessment too for Closure of low-Threat Chlorniate Sites (July 31, 2009.low treat cloure The Santa Clara Valley Water District provided oversight at the site to January 2005, at which time the case was transferred to the County of Santa Clara Environmental Health Department. The case was transferred from the County to the Regional Water Board in August 2005. Groundwater samples collected in 2015 indicated that the site is a candidate for case closure as the conctrations of TCE & other VOCs are below ESLs.

Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 10/15/1999
Comments: Agreement signed with Opus West for review of existing documents and a workplan for remedial activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Consultation
Completed Date: 08/02/2000
Comments: Only received one comment during the comment period for the PPA from Stauffer management Company indicating that they uprchased the proeprty in 1973 and sold the property "as is" to Regency Monarch Development Corporation in 1985. Regency Monarch is obligated to idemnify Stauffer for any claims relating to environmental probvlems or hazardous materials. Stauffer and its successor corporations reserve their rights to contest any liability connected to the Site. DTSC did ot receive any other comments which would cause the agreement to be amended. Therefore, with this clarification, DTSC considers the PPA final.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Prospective Purchaser Agreement
Completed Date: 05/30/2000
Comments: Signed PPA with 1931 Monterey, L.L.C. that provided for cleanup of the property to unrestricted land use standards.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 12/23/2004
Comments: DTSC staff researched, inspected and wrote report to document that existing site conditions conform to the land use conditions of the Prospectlve Purchaser Agreement.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/28/1995
Comments: Completed Site Screening. In August 1985, the two underground storage tanks (USTs) were removed. Soil and groundwater beneath these tanks were sampled and found to be contaminated with a variety of solvents. The SF Regional Water Quality Control Board (RWQCB) began oversight of the site in July 1986. In August 1991, approximately 3,700 cubic yards of contaminated soil was removed. In-situ bioremediation was implemented in 1995 as a means of meeting drinking water standard. The RWQCB rescinded its cleanup order on June 18, 1997 when drinking water standards were attained.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	This site has been proposed for listing on the NPL. At this time, DHS believes that the responsible parties will be unable to pay for the cleanup. Therefore, it is expected that EPA will fund 90 percent of the final remedial action and DHS will be required to fund the remaining 10 percent.
Site Description:	Located one block from Kelly Park, this facility had been operating as a drum collecting, reconditioning and resale business between 1946 and 1987. Drums, formerly containing solvents, pesticides and other materials from numerous sources were cleaned, recoated and sold for reuse.
Hazardous Waste Desc:	Chlorinated organic solvents, polychlorinated biphenyls and vinyl chloride have been detected in the ground water and surface water. Approximately 5,000 cubic yards of contaminated soils containing hazardous concentration of heavy metals (copper, nickel, lead, zinc, chromium, cadmium) and pesticides (DDT, DDD and DDE) are still present.
Threat To Public Health & Env:	The primary threats to the public health and environment are exposure to contaminated ground water, contaminated surface water runoff, contaminated airborne dust, and exposure and direct contact with contaminated soil. Three public water supply systems are within 2,000 feet of the contamination.
Site Activity Status:	RI/FS work plan prepared by DHS have been turned over to EPA for implementaion. DHS implemented expedited response actions (ERAs) at a cost of $4 million. The ERAs included construction of decontamination facilities; removal of 24,615 steel drums and 2,000 polyethylene drums, several budles of containers marked radioactive, contaminated debris and 4 tons of scrap metal. The hot spot ERA removed was 4,500 cubic yards of contaminated soil. In addition, EPA and DHS disposed of 2,100 drums containing hazardous waste liquids. The DHS surface water control plan and site cap was implemented by EPA's Emergency Response Team. As of December 1987, EPA agreed to accept lead responsibility for long term site cleanup. The imminent and substantial endangerment posed by the Lorentz site was completely abated by DHS. EPA is currently proceeding with treatment of the shallow ground water. Long term remediation will be done by EPA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No

VIASYSTEMS TECHNOLOGIES CORP LLC (Continued) **1000141855**

Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1025

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 204432.9

FINDS:

Registry ID: 110000770906

Environmental Interest/Information System
TSCA SUBMITTER

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/29/1985
Comments: General Electric sent a letter to the Department of Health Services, Toxic Substances Control Division (DHS) requesting withdrawal of their Part A Permit Application for status as a treatment, storage, and disposal facility. GE stated that they did not store wastes on-site for more than 90 days, did not treat wastes on-site, did not dispose of wastes on-site, and did not accept wastes from other sites. As such, they requested that their status be changed to that of solely a generator of hazardous wastes since their operations at the site were on-going.

Completed Document Type: Correspondence
Completed Date: 03/02/1988
Comments: The U.S. Environmental Protection Agency (EPA) requested that the California Department of Health Services, Toxic Substances Control

GE NUCLEAR ENERGY (Continued) **1000323216**

Division (DHS) send more information about General Electric's (GE) facility in order for them to update their records. U.S. EPA had received the letter sent by DHS to GE on March 2, 1987, stating that DHS recognized GE as solely a generator and rescinding their Interim Status Document. U.S. EPA indicated that they were unable to make the final determination on GE's status as a treatment, storage, and disposal facility or change the Hazardous Waste Management Data System database to reflect any change in their status until they had sufficient information.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/02/1987
Comments: The Department of Health Services, Toxic Substance Control Division (DHS) responded to General Electric's (GE) request for withdrawal of their Part A Permit Application and rescission of their Interim Status Document. This correspondence notified GE that DHS no longer considered them as a treatment, storage, or disposal facility and that GE's Interim Status Document had been rescinded. The letter also notified GE that they must continue to comply with applicable regulations as a generator of hazardous wastes, and that they must file a new facility permit if they wish to operate a hazardous waste facility in the future.

Completed Document Type: Correspondence
Completed Date: 07/08/1988
Comments: The U.S. Environmental Protection Agency (EPA) received and reviewed additional information sent by the California Department of Health Services, Toxic Substances Control Division (DHS) in response to EPA's previous request dated February 29, 1988. DHS presented EPA with the previous General Electric (GE) facility inspection reports and a notification of hazardous waste activity indicating generator only status on June 7, 1988. U.S. EPA stated that they recognized GE as solely a generator, and indicated that they would update their database accordingly.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248

APPENDIX D

ENVIRONMENTAL QUESTIONNAIRE

Environmental Transaction Screen Questionnaire

Property Address: 1555 South 7th Street, San Jose CA 95112

Instructions: For the questions listed in the table below, please answer "yes", "no" or "unknown" in the appropriate column to the best of your actual knowledge and in good faith. Notes/comments can be provided on page 4. If filling out the form electronically, please note that <tab> advances to the next content control box (drop down).

	Question	Owner	Occupant (if applicable)	Observed During Site Visit
1	Is the **property** or **any adjoining property** used for an industrial[1] use?	(Yes) / No / Unk	Yes / No / Unk	Yes / No / Unk
2	Did you observe evidence or do you have any prior knowledge that the **property** or **any adjoining property** has been used for an industrial use in the past?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
3	Is the **property** or **any adjoining property** used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	(Yes) / No / Unk Recycle: Cardboard and metal	Yes / No / Unk	Yes / No / Unk
4	Did you observe evidence or do you have any prior knowledge that the **property** or **any adjoining property** has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
5	Did you observe evidence or do you have any current or prior knowledge that there are/have been any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gallons in volume or 50 gallons in the aggregate, stored on or used at the property or at the facility[2]?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
6	Did you observe evidence or do you have any prior knowledge that there are/have been previously any industrial drums (typically 55 gallons) or sacks of chemicals located on the property or at the facility?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
7	Did you observe evidence, or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site or is of an unknown origin?[3]	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
8	Did you observe evidence or do you have any current or prior knowledge that there are/have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
9	Did you observe evidence or do you have any current or prior knowledge that there is/has been any stained soil on the property?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
10	Did you observe evidence or do you have any current or prior knowledge that there are/have been any registered or unregistered storage tanks (above or underground) located on the property?	Yes / No / (Unk)	Yes / No / Unk	Yes / No / Unk

AEI Consultants

	Question	Owner	Occupant (if applicable)	Observed During Site Visit
11	Did you observe evidence or do you have any current or prior knowledge that there are/have been any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
12	Did you observe evidence or do you have any current or prior knowledge that there are/have been any leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
13	If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system, or that the well has been designated as contaminated by any government environmental/health agency?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
14	Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes / (No) / Unk	Yes / No / Unk	N/A
15a	Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes / (No) / Unk	Yes / No / Unk	N/A
15b	Has the owner or occupant of the property been informed of the past or current environmental violations with respect to the property or any facility located on the property?	Yes / (No) / Unk	Yes / No / Unk	N/A
16	Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes / (No) / Unk	Yes / No / Unk	N/A
17	Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes / (No) / Unk	Yes / No / Unk	N/A
18	Does the property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk
19	Did you observe evidence, or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials been dumped above grade, buried and/or burned, on the property?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk

AEI Consultants

	Question	Owner	Occupant (if applicable)	Observed During Site Visit
20	Is there a transformer, capacitor, or any hydraulic equipment [such as elevators and auto lifts] for which there are any records indicating the presence of polychlorinated biphenyls (PCBs)?	Yes / (No) / Unk	Yes / No / Unk	Yes / No / Unk

[1] Industrial use is an activity requiring the application of labor and capital for the production or distribution of a product or article, including, without limitation, manufacturing, processing, extraction, refining, warehousing, transportation, and utilities. Manufacturing is defined as a process or operation of producing by hand, machinery, or other means a finished product or article from raw material. Industrial uses may be categorized as light or heavy industrial uses, depending upon the scale of the operations and the impact upon surrounding *property* in terms of smoke, fumes, and noise.

[2] If the answer to this question is "yes," list the items and the location(s) where they are stored. If unfamiliar with the contents of any container located on the site, the question must be answered "yes" until the materials are identified.

[3] If any structures have been demolished on the *property*, the *preparer* should investigate whether the structures were demolished in place and *fill dirt* compacted over them.

The **Owner** questionnaire answers were provided by:

Name: Tina Viglizzo

Title: Asset Manager / Development Manager

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN

Prior to completing this Plan, please refer to the INSTRUCTIONS FOR COMPLETING A CONSOLIDATED CONTINGENCY PLAN

A. FACILITY IDENTIFICATION AND OPERATIONS OVERVIEW

FACILITY ID #	1. CERS ID	A1. DATE OF PLAN PREPARATION/REVISION A2.
FA0255392	10473313	3/14/2017

BUSINESS NAME *(Same as Facility Name or DBA - Doing Business As)* 3.
AMBERWOOD PRODUCTS INC

BUSINESS SITE ADDRESS 103.
1555 S 7TH ST

BUSINESS SITE CITY 104.		ZIP CODE 105.
SAN JOSE	CA	95112

TYPE OF BUSINESS (e.g., Painting Contractor) A3.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A4.

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5.

☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1.

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☐ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☐ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1.

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☐ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY: (Check all that apply) C2.

☒ 1. VERBAL WARNINGS; ☐ 2. PUBLIC ADDRESS OR INTERCOM SYSTEM; ☐ 3. TELEPHONE;
☐ 4. PAGERS; ☐ 5. ALARM SYSTEM; ☐ 6. PORTABLE RADIO

EMERGENCY RESPONSE PHONE NUMBERS:

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

SPILL PREVENTION, CONTAINMENT, AND CLEANUP PROCEDURES: (Check all boxes that apply to indicate your procedures for containing spills, releases, fires or explosions; and. preventing and mitigating associated harm to persons, property, and the environment.)

D1.

- [x] 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- [x] 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls);
- [ ] 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, pigs, pillows);
- [ ] 4. COVER OR BLOCK FLOOR AND/ OR STORM DRAINS;
- [ ] 5. BUILT-IN BERM IN WORK / STORAGE AREA;
- [ ] 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- [ ] 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS (e.g. Flammable liquids, Propane);
- [x] 8. STOP PROCESSES AND/OR OPERATIONS;
- [ ] 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- [ ] 10. SHUT-OFF WATER, GAS, ELECTRICAL UTILITIES AS APPROPRIATE;
- [x] 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE / MEDICAL AID;
- [x] 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AREAS;
- [x] 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION CALL;
- [ ] 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE RESPONSE TEAM;
- [ ] 15. REMOVE OR ISOLATE CONTAINERS / AREA AS APPROPRIATE;
- [ ] 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- [x] 17. USE ABSORBENT MATERIAL FOR SPILLS WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- [ ] 18. SUCTION USING SHOP VACUUM WITH SUBSEQUENT PROPER LABELING, STORAGE, AND HAZARDOUS WASTE DISPOSAL AS APPROPRIATE;
- [ ] 19. WASH / DECONTAMINATE EQUIPMENT W/ CONTAINMENT and DISPOSAL OF EFFLUENT / RINSATE AS HAZARDOUS WASTE;
- [ ] 20. PROVIDE SAFE TEMPORARY STORAGE OF EMERGENCY-GENERATED WASTES;
- [ ] 21. OTHER (Specify):

D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (CHECK ALL THAT APPLY): E1.

- [x] 1. BELLS;
- [ ] 2. HORNS/SIRENS;
- [ ] 3. VERBAL (I.E., SHOUTING);
- [x] 4. OTHER (Specify): PA SYSTEM

E2.

THE FOLLOWING LOCATION(S) IS/ARE EVACUEE EMERGENCY ASSEMBLY AREA(S) (i.e., Front parking lot, specific street corner, etc.) E3.

Note: The Emergency Coordinator must account for all on site employees and/or site visitors after evacuation.

- [x] EVACUATION ROUTE MAP(S) POSTED AS REQUIRED E4.

Note: The map(s) must show primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas, and must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

Explanation of Requirement: Advance arrangements with local fire and police departments, hospitals, and/or emergency services contractors should be made as appropriate for your facility. You may determine that such arrangements are not necessary.

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following) F1.

- [x] 1. HAVE BEEN DETERMINED NOT NECESSARY; *or*
- [ ] 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify):

F2.

G. EMERGENCY EQUIPMENT

Check all boxes that apply to list emergency response equipment available at the facility and identify the location(s) where the equipment is kept and the equipment's capability, if applicable. [e.g., ☒ CHEMICAL PROTECTIVE GLOVES | Spill response kit | One time use, Oil & solvent resistant only.]

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION	CAPABILITY *(If applicable)*
Safety and First Aid	1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, OR VESTS	G2. SHOP	G3.
	2. ☒ CHEMICAL PROTECTIVE GLOVES	G4. SHOP	G5.
	3. ☐ CHEMICAL PROTECTIVE BOOTS	G6.	G7.

	35. ☐ OTHER	G70.	G71.

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS: (Check all that apply) H1.	LOCATIONS (e.g., shop, outdoor shed, forensic lab)
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA	WASTE STORAGE AREA H2.
☐ 2. PROCESS LINES / PIPING	H3.
☐ 3. LABORATORY	H4.
☐ 4. WASTE TREATMENT AREA	H5.

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS: (Check all that apply) H6.	LOCATIONS
☒ 1. SHELVES, CABINETS AND RACKS	SHOP H7.
☐ 2. TANKS (EMERGENCY SHUTOFF)	H8.
☒ 3. PORTABLE GAS CYLINDERS	SHOP H9.
☐ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES	H10.
☒ 5. SPRINKLER SYSTEMS	THROUGHOUT H11.
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)	H12.

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. This facility may be subject to reinspection at any time. Consent to Inspect Given By: Mark Beltramo

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
2200	Currently this facility is generating hazardous waste from their operations (used oil, drained used oil filters, waste antifreeze, etc), and is not permitted with our Agency for the hazardous waste generation. A permit application was obtained during this inspection.	Completed Hazardous Waste Generator Permit application with the assistance of Ms. Ortiz.
2206	The following containers were storing hazardous waste and were missing required information on the label or a label; -2x55 gal. used oil drums -1x55 gal. waste antifreeze drum All containers storing hazardous waste must be labeled as required	Installed labels provided by Ms. Ortiz

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

2041 REV 8/06

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

THE OFFICIAL NOTICE OF INSPECTION EXPLAINED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations. All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI. **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716. The effective date of the certification that any violation has been corrected is the date that it is postmarked.

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection. Definitions of Violation Codes are listed on the attached Violation Codes document(s).

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected. Additionally, the inspector may use this space to note any additional observations resulting from the inspection.

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation. Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected. If more space is needed, attach additional pages.

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD. **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist. If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations.

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request. Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available. A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request. Other pertinent information derived from the inspection is attached to this NOI. Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation.

Hazardous Waste Inventory Information:

The annual permit fee is determined by the total quantity of hazardous waste generated per year. Complete the table below for all hazardous waste inventory *(e.g. used oil, used parts cleaning solvent, used oil filters, waste paint, spent fixer, etc.)*.

Name of Hazardous Waste	Treatment/Disposal Method(s) *(Definitions provided on back of form.)*	Annual Quantity Generated*
USED MOTOR OIL	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	~~300~~ ~~250~~ 660 ☐ gal. ☐ lbs.
USED Anti Freeze	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	~~200~~ 330 ☐ gal. ☐ lbs.
USED OIL FILTERS	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	100 ☐ gal. ☐ lbs.
USED OIL Asorbent	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	~~100~~ 5 ☒ gal. ☐ ~~lbs.~~
Parts Washer	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	30 ☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.

* *Solids must be reported in pounds. Liquids may be reported in either pounds or gallons.*

The undersigned hereby applies for a hazardous waste generator permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator: [signature] Title: Gen. Mgr Date: 1/26/07

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g. pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e. red bag) wastes on this form.

VIOLATIONS: Codes noted below in the "Violation Codes" column represent specific violations of State law and/or local Ordinance. These codes are defined in the attached Violation Codes document(s). Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies.

This facility may be subject to reinspection at any time. Consent to Inspect Given By **Obediah Garcia**

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
	Walkthrough of the facility was conducted on 11/13/2007 and inspection	
	report was submitted today 11/27/07	
G010	Observed about 5X 5 gallon pink metal containers labeled Genetron 113	
	Biocide which appeared to have been stored for awhile. If this material is	
	no longer usable disposed of it as hazardous waste and keep hazardous	
	waste manifest for your records.	
G012	Observed a 4X4 metal box filled with miscellaneous hazardous waste	
	(i.e. pait cans, household cleaners, aerosol cans, etc.) stored at the yard	
	which was brought out from a job site by a field technician. It it is illegal	
	to transport hazardous waste unless that driver holds a valid transporter	
	registration issued by the Department Toxic Substances Control (DTSC).	
	Used oil generated during the maintenance operations may be transferred	
	from it's point of generation to the maintenance person's place of	
	business, other than a residence for the purpose of consolidation in a tank	
	or container and meeting the conditions set in the California Health &	
	Safety Code, Section 25250.12 (See attached). Cease this practice	
	immediately. This is a class II violation.	

All violations must be corrected within 30 days of the inspection date unless noted otherwise, above. Section 25404.1.2(c)(1) of California Health and Safety Code (HSC) requires that you write a brief description of the corrective actions you have taken to bring this facility into compliance and submit it to HMCD within 5 days of achieving compliance, or within 35 days of the inspection date, whichever comes first. ***(Note: Detailed instructions on actions you must take are printed on the reverse side of this page.)***

Received by Obediah P. Ga~~~~ Inspected by **Ana Ortiz** A-O. Entered by 10071

Certification: I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator _____ Title _____ Date ___/___/___

FACILITY SENDS YELLOW COPY TO AGENCY, KEEPS PINK COPY.

THE OFFI IOTICE OF INSPECTION EX. ED

This Official Notice of Inspection (NOI) describes the findings made during the inspection, including all violations and any actions that must be taken by the facility to correct the violations All violations must be corrected within 30 days of the inspection date unless noted otherwise by the inspector.

Within five working days of achieving compliance, or within 35 days of the inspection, whichever comes first, you must submit a written response which describes the corrective actions you have taken or — for those violations which are impossible to correct within 30 days — propose to take in order to bring your facility into compliance Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected After you have addressed each violation, complete the certification box located at the bottom of page 1 of the NOI **Your description of corrective actions taken, along with your signed certification of the NOI and any required supporting documents, will serve as your written response to this Notice to Comply.** Your response must be mailed to Santa Clara County Hazardous Materials Compliance Division (HMCD) at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716 The effective date of the certification that any violation has been corrected is the date that it is postmarked

What Does the Information in Each Column Mean?

Violation Code: Codes listed in this column identify specific violations of laws, regulations, or codes which were observed during this inspection Definitions of Violation Codes are listed on the attached Violation Codes document(s)

Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions: Information noted in this column describes the circumstances of any violations noted in the first column and describes how the violations may be corrected Additionally, the inspector may use this space to note any additional observations resulting from the inspection

Corrective Actions Taken: This column on the NOI has been provided so that you can note how you have corrected or propose to correct each violation Where proposed corrective actions are described, you must specify a date by which you expect each violation to be corrected If more space is needed, attach additional pages

Why Were Two Copies of the Notice of Inspection Given to Me?

You have been given two copies so you will have a copy for your own records after you submit your written response to HMCD **Do not separate the copies until you have described all of your corrective actions and signed the certification box on page 1. The yellow copy of each page must be returned to HMCD. The pink copy is for your records.**

What if I Disagree With a Violation Noted on the Notice of Inspection?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date Address such notices to the attention of the inspector who cited the violation In your Notice of Disagreement, you must explain in detail why you believe the violation does not exist If there is sufficient space, you may use the "Corrective Actions Taken" column of this NOI to dispute violations

What About Photographs or Samples Taken During the Inspection?

If samples were taken, split samples will be given to you upon request Since this NOI was prepared and given to you at the end of the inspection, any photographs and sampling or laboratory results associated with the inspection were not yet available A copy of any photographs and/or analytical results from sampling taken during this inspection will be provided to you upon written request Other pertinent information derived from the inspection is attached to this NOI Photographs and sample results may be withheld in the event of a criminal investigation or other ongoing investigation

****

- **Per HSC §§25187.8(b) and 25404.1.2(c), failure to sign the certification on this Notice to Comply and return it to HMCD is a violation of State law.**
- **Per HSC §25404.1.2(c)(2), a false statement that compliance has been achieved is a misdemeanor.**
- **Per HSC §25191(b), a false statement that hazardous waste compliance has been achieved is a violation of State law punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year.**
- **Per HSC §§25299(a)(8) and (b)(7), a false statement that underground storage tank compliance has been achieved is a violation of State law punishable by a fine of not less than $500 or more than $5,000.**
- **Per HSC §§25187.8(i), HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility.**

OFFICIAL NOTICE OF INSPECTION

(Continuation Page)

Facility Name: Johnson Controls **Inspection Date:** 11/~~16~~27/2007

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
G020	The following containers were storing hazardous waste and were not	
G023	labeled with required information and in some instances some of the	
	containers were open:	
	- 1X55 gal. used oil container; missing accumulation start date	
	- 9X5 gal. containers storing used oil; no hazardous waste label and	
	one of them was open	
	- 1X1 gal. container storing used oil; no hazardous waste label	
	- 1X5 gal. and 1X1 gal. storing waste corrosive cleaner; no hazardous	
	waste label.	
	- 4X5 gal. waste corrosive containers; no hazardous waste label.	
	- 1X55 gal. drum with oily water; no hazardous waste label and open.	
	- A 4X4 metal box storing miscellaneous hazardous waste (i.e. paint	
	cans, household cleaners, aerosol cans, etc.); not labeled as hazardous	
	waste.	
	- 1X10 gal. black container storing miscellaneous hazardous waste (i.e	
	pait cans, aerosol cans, etc.); not labeled as hazardous waste.	
	- 1X5 gal. bucket inside a plastic pan storing used oil and water; open	
	and not labeled as hazardous waste.	
	- 2X55 gal metal drums storing waste ethylene glycol; not labeled as	
	hazardous waste.	
	- 1X10 gal. red step on can storing contaminated rags; not labeled as	
	hazardous waste.	
	Label all containers mentioned above as stated on the violation code	
	sheet (see attached) and keep all containers storing hazardous waste	
	closed at all times unless when adding or removing waste. Labels	
	were provided during this inspection.	
G101	Based on my observations and the type of violations hazardous waste	
	storage areas are not being inspected weekly. Begin conducting weekly	
	inspections. It is recommended that you keep a log of the weekly

Facility Name: Johnson Controls **Inspection Date:** 11/~~16~~27/2007

Violation Codes	Summary of Violations, Notice to Comply, Observations, and Required Corrective Actions	Corrective Actions Taken
Cont..	in order to document that weekly inspections are taking place. A	
	sample form was provided.	
G110	Observed used oil inside the secondary containment where used oil	
	containers are being stored. Clean up spill immediately and in the	
	future keep secondary containtment dry.	
G211	Emergency information was not posted next to a telephone. Post	
	emergency information. A sample form was provided.	
G220	Based on the type and number of violations employees handling	
	hazardous waste are not thoroughly familiar with proper waste	
	handling and emergency procedures. Provide training to your	
	employees immediately. A self audit brochure was provided.	
G400	Observed 15X10 gal. metal drums, and 1X30 gal. metal drum that	
	were empty and previously held a hazardous waste that were missing	
	the date they became empty. Empty containers larger than 5 gallons	
	that previously held a hazardous waste shall be managed with the date	
	it has been emptied and shall be managed within one year of being	
	emptied by either reusing them on-site or by reclaimining it for it's	
	scrap metal value. Notify our Agency in writing how these drums were	
	managed.	
G443	In the universal waste accumulation area observed 2-3 boxes storing	
	used lamps, aerosol cans, and about 6-12 used mercury switches not	
	labeled with required information. Label all waste mentioned above	
	with required information as stated on the violation checklist (see	
	attached). A copy of the Universal Waste Management Requirements	
	guidance document was provided.

RE: Response to Johnson Controls San Jose, California HMCD inspection

Dear Ms. Ortiz:

The following letter is our follow-up response of your visit to the Johnson Controls office located at 1555 S. 7th Street, San Jose, California on November 27, 2007. The attached table contains a list of the corrective actions that have been taken to address the observations from your recent inspection.

Johnson Controls corporate culture dictates that its operations comply with all regulatory requirements. Based on your visit to the Johnson Controls office in San Jose, California, the company's program to assure compliance with the requirements of Hazardous Materials Regulations has been revisited. We appreciate the opportunity to address this issue and to improve in those areas that were brought to our attention.

Please feel free to contact me at 414/524-7168 if I can be of further assistance.

Sincerely:

HMCD Inspection Checklist 1555 S 7th St San Jose, Ca		
Violation Codes	**Summary of Violations, Notice to Comply, Observations and Required Corrective Action**	**Corrective Actions Taken**
G010	Observed five 5-gallon pink metal containers labeled Genetron 113 Biocide which appear to have been stored for awhile	This material is not a waste and will be moved away from the hazardous waste area
G012	Observed a 4x4 metal box filled with miscellaneous hazardous waste (i e paint cans, aerosols cans, etc) stored at the yard which was brought out from a job site by a field technician	A majority of the materials in the metal box are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07 Employees who handle hazardous materials will be reminded that hazardous wastes generated from jobsites cannot be brought back to the office for disposal
G020/G023	The following containers were storing Hazardous waste and were not properly labeled with required information and in some instances some of the containers were open	
	* One 55-gallon container of used oil missing accumulation start date	Start date was placed on container
	* Nine 5-gallon containers of used oil, no hazardous waste labels and one container was found open	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 1-gallon container storing used oil missing hazardous waste label	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 5-gallon and one 1-gallon container storing waste corrosive cleaner missing hazardous waste label	Issue resolved Removed from site by North State Environmental on 11/29/07
	* Four 5-gallon waste corrosive containers missing hazardous waste labels	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 55-gallon drum with oily water found open and missing hazardous waste label	Issue resolved Barrel emptied and cleaned out for scrap metal
	* A 4x4 metal box storing miscellaneous hazardous waste (i e paint cans, household cleaners, aerosol cans etc), not labeled as hazardous waste	A majority of the materials in the metal box are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07
	* One 10-gallon black container storing miscellaneous waste (i e paint cans, aerosol cans, etc), not labeled as hazardous waste	A majority of the materials in the black container are reusable, and are not considered a hazardous waste These items have been placed back into stock for future use A few materials in the box were waste materials, and these were removed by North State Environmental on 12/6/07
	* One 5-gallon bucket inside a plastic pan storing used oil and water was found open and missing a hazardous waste label	Issue resolved Oil transferred into waste oil barrel
	* Two 55-gallon metal drums storing waste ethylene glycol missing hazardous waste labels	Issue resolved Removed from site by North State Environmental on 11/29/07
	* One 10-gallon red step on can storing contaminated rags missing hazardous waste label	Container labeled as hazardous waste
G101	Based on observations by HMCD inspector, the hazardous waste storage area is not being inspected on a weekly basis as required Begin conducting weekly inspections	Issue resolved The facility is now performing inspections of the hazardous waste area
G110	Observed Used oil in secondary containment where oil containers are stored Clean up spilled oil immediately and in the future keep secondary containment dry	Issue resolved Secondary containment basins have has been cleaned out In addition, employees transferring oils will be informed to clean up overspills immediately

Violation Codes	Summary of Violations, Notice to Comply, Observations and Required Corrective Action	Corrective Actions Taken
G211	Emergency Information was not posted next to telephone Post emergency information	Emergency telephone numbers have been posted in the hazardous waste storage area and the closest telephone
G220	Based on the type and number of violations, employees handling hazardous waste are not thoroughly familiar with proper waste handling and emergency procedures Provide training immediately	In response to this event, Johnson Controls will be conducting Hazardous Materials Training during the month of February 2008, for all employees that handle hazardous waste We will forward you a copy of the training roster from all participants in this training class within 10 days of their completing the class
G400	Observed fifteen 10-gallon metal containers and one 30-gallon metal drum that were empty and previously held a hazardous waste These containers were missing the date when they became empty	Issue resolved Removed from site by North State Environmental on 11/29/07
G443	In the universal waste accumulation area, Inspector observed 2-3 boxes storing used lamps, aerosol cans, and about 6-12 used mercury switches not labeled with required information Label all waste	All containers of universal wastes have been properly labeled
G240	There were several copies of the hazardous waste manifest for 2006 and 2007 that were missing the signed copies from the designated facility within 60 days of waste shipment	The facility has contacted North State and ACT for copies of signed manifest showing signatures from designated waste facilities The facility is still waiting to receive a few of the signed manifests
G446	Records of Universal waste shipments were not available for 2006 and 2007 during inspection Provide copies of records to HMCD inspector for these years	The facility will submit records of Universal waste shipments for 2006 and 2007 by 2/1/08
Note	Provide a copy of the updated hazardous waste generator permit	The facility will submit an updated hazardous waste generator permit application by 2/1/08

RE: Response to Johnson Controls San Jose, California HMCD inspection

Dear Ms. Ortiz:

This letter identifies the remaining items that needed to be addressed as a follow-up of your visit to the Johnson Controls office located at 1555 S. 7th Street, San Jose, California on November 27, 2007. The remaining items are as follows:

Training – Two employees from the San Jose office have signed up for your hazardous materials training course scheduled for February 28th.

Universal Waste Records – Records of Universal waste shipments have been attached to this letter. (records were reviewed & discarded) A.O.

Hazardous Waste Manifests – The facility has received all signed copies of hazardous waste manifests from the waste disposal facilities that were missing.

Hazardous Waste Generator Permit Application – A signed copy of the updated permit application has been attached to this letter.

Please feel free to contact me at 414/524-7168 if I can be of further assistance.

AMBERWOOD PRODUCTS INC
1555 S 7TH ST BLDG # 7
SAN JOSE, CA 95112

Owner ID: OW0157573
PIN: 414444

Re: Failure to Electronically Submit a Hazardous Materials Business Plan (HMBP) for AMBERWOOD PRODUCTS INC, 1555 S 7TH ST BLD 7, SAN JOSE CA 95112.

Dear Business Owner/Operator,

Our records indicate that you have a Hazardous Materials Business Plan (HMBP) permit with our office because your facility handles hazardous materials above State reporting thresholds. However, your business has not submitted or recertified your facility's HMBP annually, as required by California Health and Safety Code section 25508(a)(1)(A).

Effective January 1, 2013, HMBPs are required to be submitted electronically. You may satisfy this requirement by using our local electronic reporting website, FrontCounter (https://frontcounter.sccgov.org/). Within 30 days, complete your annual submission using FrontCounter.

To request access to FrontCounter, visit the website and click "Sign up now." Complete the form using your Owner ID Number and PIN, provided above. As long as the information is entered correctly, you should receive an e-mail within minutes containing your username and password. Check your spam/junk e-mail folder for automated messages from DEH.HMCD@deh.sccgov.org if you have not received a response within 24 hours.

It is important that you respond to this notice. Failure to electronically submit your HMBP within 30 days may result in penalties of up to *$5000 per violation per day* pursuant to California Health and Safety Code sections 25508(b) and 25515(b).

To learn more about Hazardous Materials Business Plan requirements and electronic reporting, visit our website at www.ehinfo.org/hazmat, and select "Hazardous Materials Business Plans" from the Programs and Services menu. If you require assistance, please contact Myra Reichardt by phone at (408) 918-1984, or via e-mail at hmcd.cers@cep.sccgov.org.

Sincerely,
Richard Owens

Re: Amberwood Products, Inc.

Dear Mr. Blamey:

I am writing to inform you of the outcome of the above-entitled case. The People and Amberwood Products, Inc. entered into a stipulated resolution, the terms of which are enumerated in the Stipulated Final Judgment. Pursuant to the stipulation, Amberwood Products, Inc. shall pay $11,000 in fines. $6,574.19 is to be disbursed to the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division (HMCD). Of that total, $1,475.27 represents HMCD's portion of civil penalties, and $5,098.92 is reimbursement for costs HMCD incurred during the investigation of the matter. The Santa Clara County District Attorney's Office will disburse said sum to you. The Court has also issued a permanent injunction requiring Amberwood Products, Inc. to comply with all California Hazardous Waste Control Laws.

Thank you for bringing this matter to our attention. The thorough investigation and report by Ana Bui, and the continued cooperation of your office, led to the successful resolution of this case. Should you have any questions or concerns, please feel free to contact me at (408) 792-2780 or by e-mail at Niravanisani@da.sccgov.org.

Sincerely,

Nahal Iravani-Sani

MEMORANDUM

February 3, 2010

To: Louisa Wong
From: Kenneth Rosenblatt
Re: Deposit of check in *People v. Amberwood Products, Inc.*, # 110CV161751

Dora gave you a check yesterday for $11,000 from Amberwood Products, Inc.

We keep $1,475.27 of this amount, to be deposited into the 0264 Fund, Cost Center 9842.

The remainder is to be distributed per the attached judgment as follows:

- $2,950.54 goes to the State of California. Please provide a check in that amount made out to "Department of Toxic Substances Control", and send it to:

Karen Poon, Chief of Accounting
Department of Toxic Substances Control Account
1001 I Street, P.O. Box 806
Sacramento, CA 95812.

- $6,574.19 is to be disbursed to the County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division. Of that total, $1,475.27 is civil penalties, and the other $5,098.92 represents costs.

A copy of the judgment is attached.

PEOPLE OF THE STATE OF CALIFORNIA,

Plaintiff,

v.

AMBERWOOD PRODUCTS, INC.,

Defendant

Case No.: 110CV161751

STIPULATED FINAL JUDGMENT

Plaintiff, THE PEOPLE OF THE STATE OF CALIFORNIA, having filed its complaint herein and appearing through its attorneys, Dolores A. Carr, District Attorney of the County of Santa Clara, Nahal Iravani-Sani, Deputy District Attorney, and Defendant Amberwood Products, Inc., (hereinafter "Amberwood"), appearing by and through Mark Freschi, Attorney at Law.

It appearing to the Court that said parties have stipulated and consented to the entry of this Stipulated Final Judgment without the taking of any proof and without trial or adjudication

8) Defendants shall not construe, misrepresent or present this Judgment to anyone as constituting an endorsement or approval of defendant or any business practice of any defendant.

9) The court shall retain jurisdiction for the purposes of enabling any party to this final Judgment to apply to the Court at any time for such further orders and directions as may be necessary and appropriate for the construction or carrying out of this Judgment, for the modification of any of the injunctive thereof, for the enforcement of compliance herewith, or for the punishment of violations hereof. The Court's jurisdiction shall end five years after the entry of this judgment unless the parties agree to extend this date, or the court does so on its own motion.

10) The parties hereto waive the right to appeal this Stipulated Final Judgment, both as to form and content, and waive the filing and service of Notice of Entry of Stipulated Final Judgment. This judgment shall take effect immediately.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA, Plaintiff, v. AMBERWOOD PRODUCTS, INC., Defendant	Case No.: STIPULATED FINAL JUDGMENT

Plaintiff, THE PEOPLE OF THE STATE OF CALIFORNIA, having filed its complaint herein and appearing through its attorneys, Dolores A. Carr, District Attorney of the County of Santa Clara, Nahal Iravani-Sani, Deputy District Attorney, and Defendant Amberwood Products, Inc., (hereinafter "Amberwood"), appearing by and through Mark Freschi, Attorney at Law.

It appearing to the Court that said parties have stipulated and consented to the entry of this Stipulated Final Judgment without the taking of any proof and without trial or adjudication

of any factual or legal issue herein, and the parties having waived the filing of notice of entry of said judgment and agreed that said judgment shall become effective upon being entered; the Court having considered the matter and good cause appearing therefore;

IT IS HEREBY ORDERED, ADJUDGED, AND DECREED that:

1) This Court has jurisdiction over the subject matter of the Complaint and over the parties hereto.

2) Defendant admits to one violation of California Health and Safety Code §25189.2(c).

3) Defendant consents to entry of this judgment.

4) Defendant and Plaintiff agree that the injunctive provisions in paragraphs 5 and 6 shall apply to defendant Amberwood Products.

5) Defendant shall not in the future violate California Health & Safety Code Section 25189.2(c).

6) Defendant shall pay contemporaneously with the execution of this Stipulation the amount of $11,000.00 by forwarding to the Santa Clara County District Attorney's Office a check for that sum payable to the Santa Clara County District Attorney's Office. Said sum shall satisfy all civil penalties and investigative costs as alleged by plaintiff in its Complaint and be accounted for and disbursed as follows:

   a) $5,901.08 of that amount represents civil penalties pursuant to California Health & Safety Code Section 25189;

   b) $5,098.92 of that amount represents costs incurred by the Santa Clara County Department of Environmental Health, Hazardous Materials Compliance Division (HMCD) for investigative costs. The Santa Clara County District Attorney Office shall disburse that sum to the HMCD.

7) Defendant shall enclose a separate check in the amount of $355.00 made payable to the Clerk of the Court. This amount represents the defendant's filing fees required by the Santa Clara County Superior Court fee schedule for this stipulated judgment.

8) Defendants shall not construe, misrepresent or present this Judgment to anyone as constituting an endorsement or approval of defendant or any business practice of any defendant.

9) The court shall retain jurisdiction for the purposes of enabling any party to this final Judgment to apply to the Court at any time for such further orders and directions as may be necessary and appropriate for the construction or carrying out of this Judgment, for the modification of any of the injunctive thereof, for the enforcement of compliance herewith, or for the punishment of violations hereof. The Court's jurisdiction shall end five years after the entry of this judgment unless the parties agree to extend this date, or the court does so on its own motion.

10) The parties hereto waive the right to appeal this Stipulated Final Judgment, both as to form and content, and waive the filing and service of Notice of Entry of Stipulated Final Judgment. This judgment shall take effect immediately.

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF SANTA CLARA

PEOPLE OF THE STATE OF CALIFORNIA,

Plaintiff,

v.

AMBERWOOD PRODUCTS, INC.,

Defendant

Case No.: 110CV161751

COMPLAINT FOR INJUNCTION, CIVIL PENALTIES, AND OTHER RELIEF

The People of the State of California, by and through Dolores A. Carr, District Attorney for the County of Santa Clara, allege upon information and belief the following:

JURISDICTION AND VENUE

1. Dolores A. Carr, as District Attorney for the County of Santa Clara, State of California, acting to protect the environment from spoliation, brings this action in the public interest in the name of The People of the State of California.

2. The authority of the District Attorney to bring this action in the name of and on behalf of The People of the State of California is derived from the statutory and decisional law of the State of California, specifically included but not limited to California Health and Safety Code Sections 25181 and 25182.

3. Defendant Amberwood Products, Inc. (hereinafter "Amberwood") is a corporation transacting business within Santa Clara County. The violations of law herein described occurred within the County of Santa Clara.

FACTUAL ALLEGATIONS

4. Whenever in this complaint reference is made to any act of the defendant, Amberwood, such allegation shall be deemed to mean that the employees of Amberwood did or authorized such act, while engaged in the affairs of said defendant, and did so while acting in the course and scope of their employment.

5. Defendant Amberwood is engaged in the architectural casework and millwork business within the County of Santa Clara.

6. As part of that business, defendant has operated and continues to operate a cabinet and millwork manufacturing and production facility (hereinafter "the facility") in San Jose, California, within the County of Santa Clara.

7. As a generator of hazardous waste, Amberwood must comply at its Santa Clara County facility with the California Hazardous Waste Control Law ("HWCL"), Chapter 6.5 of the Health and Safety Code (Section 25100 et seq.) and those regulations adopted pursuant to that law; those regulations are set forth in Title 22 of the California Code of Regulations ("CCR").

8. The County of Santa Clara is authorized to enforce the HWCL within Santa Clara County pursuant to Health and Safety Code Section 25180.

9. The Santa Clara County Department of Environmental Health, Hazardous Materials Compliance Division ("HMCD") is the agency within its respective jurisdiction which implements the HWCL county-wide.

10. On October 28, 2008 and June 9, 2009, HMCD performed inspections of Amberwood's facility located at 1555 S. 7th Street, Bldg.7, San Jose, California, in the County of Santa Clara.

11. HMCD discovered violations of CCR's and Health and Safety Code Section 25189.5(b) at that facility.

FIRST CAUSE OF ACTION
(Violation of Health and Safety Code Section 25189.2(c))

12. Plaintiff realleges and incorporates by reference, as though set forth in full herein, the allegations contained in paragraphs 1 through 11, inclusive, of this Complaint.

13. The County of Santa Clara has authorized Plaintiff to bring this cause of action.

14. Within and including the five years prior to the filing of this Complaint, Amberwood violated California Health and Safety Code Section 25189.2(c) by disposing hazardous waste at an unauthorized point, namely disposal of various containers of flammable liquids into a dumpster.

15. Photographs demonstrate that liquid material was present inside the containers at the time of the disposal.

16. Amberwood's disposal of hazardous waste necessitated the area to be quarantined by the HMCD.

17. Amberwood knew or should have known that it was disposing hazardous waste in a manner not authorized by the HWCL.

PRAYER

WHEREFORE, Plaintiff prays for judgment against the defendant as follows:

1. That the Court issue a permanent injunction requiring Amberwood to comply with California Hazardous Waste Control Laws.

2. That the permanent injunction will expire in five years.

3. That the Court impose other terms as part of an injunction against defendant as appropriate.

4. That the Court order defendant to pay a civil penalty of no less than $25,000.00 per violation for each of the violations of hazardous waste and hazardous materials laws and regulations pleaded herein.

5. That Plaintiff recover its costs of suit.

6. That Plaintiff recover its costs of investigation.

7. That Plaintiff be given such other and further relief as the Court deems just and proper.

Dated this 4th day of December, 2009

DOLORES A. CARR,
DISTRICT ATTORNEY

BY: Nahal Iravani

Nahal Iravani-Sani
Deputy District Attorney

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility...	If Yes, please complete these pages of the UPCF...	
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release Prevention Program (CalARP)?	☐ YES ☒ NO 4a.	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5.	UST OPERATING PERMIT APPLICATION – FACILITY INFORMATION UST OPERATING PERMIT APPLICATION – TANK INFORMATION
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers?	☐ YES ☒ NO 8.	No form required to CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER – provide at top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste onsite?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT NOTIFICATION – FACILITY PAGE ONSITE HAZARDOUS WASTE TREATMENT NOTIFICATION – UNIT PAGE (one page per unit)
Perform treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more then 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste?	☐ YES ☒ NO 14a.	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Serve as a Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b.	See CUPA for required forms.

F. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.) 15.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☒ Other *(specify* Public Address System

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance Phone No.: **911**

California Emergency Management Agency Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Certified Unified Program Agency (CUPA) Phone No.: **(408) 918-3400**

Local Hazardous Materials Program Phone No.: **(408) 277-4659**

California Department of Toxic Substances Control (DTSC) Phone No.: **(510) 540-3739**

Air Quality Management District Phone No.: **(415) 749-5022**

Regional Water Quality Control Board Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **Regional Medical Center of San Jose** Phone No.: **(408) 259-5000**

Address: **225 North Jackson Avenue** City: **San Jose 95116**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

Clean Harbors Environmental Services 1030 Commercial Street, Suite 107 San Jose, CA 95112 Phone 408800-645-8265

Provides Emergency Chemical Spill Response service in the event of a major chemical spill

CR, Inc 800-800-7644 Provide Safety & Environmental Consulting service..

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☒ Cartridge Respirators	E3	Chemical Cartridge Respirators
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☒ Chemical Protective Gloves	D5, D6	Latex, Nitrile & Silver Shield Gloves
	☒ Chemical Protective Suits *(describe)*	D5	Tyvek Suits
	☒ Face Shields	C3	
	☒ First Aid Kits/Stations *(describe)*	D4	General Purpose 1st Aid Kit
	☒ Hard Hats	D6	Construction Site Approved
	☐ Plumbed Eye Wash Stations		
	☒ Portable Eye Wash Kits *(i.e., bottle type)*	E3	Non-plumbed Eyewash Station
	☐ Respirator Cartridges *(describe)*		
	☒ Safety Glasses/Splash Goggles	D6	Regular & Foam Sealed Safety Glasses
	☐ Safety Showers		
	☐ Self-Contained Breathing Apparatuses (SCBA)		
	☐ Other *(describe)*		
Fire Extinguishing Systems	☒ Automatic Fire Sprinkler Systems	All	Sprinklers throughout facility
	☐ Fire Alarm Boxes/Stations		
	☐ Fire Extinguisher Systems *(describe)*		
	☒ Fire Extinguishers *(describe)*	All	ABC Type
	☐ Other *(describe)*		
Spill Control Equipment and Decontamination Equipment	☒ Absorbents *(describe)*	D3	Absorbant Sand
	☐ Berms/Dikes *(describe)*		
	☐ Decontamination Equipment *(describe)*		
	☐ Emergency Tanks *(describe)*		
	☐ Exhaust Hoods		
	☐ Gas Cylinder Leak Repair Kits *(describe)*		
	☐ Neutralizers *(describe)*		
	☐ Overpack Drums		
	☐ Sumps *(describe)*		
	☐ Other *(describe)*		
Communications and Alarm	☐ Chemical Alarms *(describe)*		
	☒ Intercoms/ PA Systems		
	☒ Portable Radios		

SECTION 6 EARTHQUAKE VULNERABILITY

In the event of an earthquake, the following areas must be inspected to ensure the workplace is safe for occupancy and the equipment is running properly:

Outdoors

1) Inspect the Main Dust Collector structure is intact and that the motor/vacuum is functioning correctly.

Indoors

1) Inspect the rafters and roof structure is intact. Look for cracks or other defects in the rafters. Check the roof/ceiling for any damage or collapse.
2) Inspect both of the spray booths are intact. Check the ventilation exhaust duct is intact and has not been damaged or collapsed. Check the ventilation motor/vacuum is functioning. Inspect the spray booth interior for any chemical spills.
3) Inspect the virgin chemical storage area (A) for any chemical spills.
4) Inspect the hazardous waste storage area (B) for any chemical spills.
5) Inspect the 5 flammable materials cabinets within the facility for chemical spills.
6) Inspect the facility for any broken water lines. Shut off water supply if possible.
7) Inspect the facility for any broken/exposed electrical lines. Do not approach down power lines or exposed wiring. Shut down power if safely possible.
8) Inspect the entire facility for any other problems. This may include: fallen objects, blocked exits, damaged equipment, or any other items that are not normal.

SECTION 7 HAZARD MITIGATION/PREVENTION/ABATEMENT

In order to reduce the risk hazards in the facility, the following practices are followed:

1) Maintain the minimal amount of chemical and lumber/panel inventory on site at all times to meet production needs.
2) Prevent the accumulation of sawdust by having the employees spend the last 15 minutes of each work day cleaning the equipment and sweeping the floors.
3) Conduct periodic Safety Training on general and job specific topics.
4) Conduct periodic safety inspections of the facility (daily, monthly, quarterly).

Summary of Violations & Notice to Comply

Program: PR0372930 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Observed the following materials on-site that were declared to be a waste by Mr. Parker:*** ***1x5 gallon bucket with 2 inches of black sludge in the bottom*** ***1x5 gallon grey metal bucket of unknown material*** ***1x1 gallon container of solidified white paint*** ***1 gallon container of open brown liquid in varnish/catalyst mixing cabinet*** ***Observed approximately 10 gallons of floor sealers in flammables cabinet by storage cage that Mr. Parker indicated were unusable.*** ***In the adjacent cabinet, Mr. Parked identified a 1x5 gallon propane-type cylinder with adhesive and 1x5 gallon container of Ethanol as items that were no longer used.*** ***Determine if these wastes are hazardous waste and manage them accordingly.*** ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. Determine how much of this material is generated and explain how it has been managed.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed the following non-empty containers in facility trash cans:*** ***1 full can of minwax wood filler (flammable)*** ***multiple 500 mL glass jars (varying from empty to 1/4 full) with flammable white paint (dried or semi-dried)*** ***1 gallon container of melamine vinyl adhesive with approximately 300 mL of liquid inside*** ***2x 1 quart containers of dried flammable paint materials (approximately 1/4 full)*** ***1 can containing approximately 1 inch of Premium Kelly Moore Acry-Plex interior latex semi-gloss enamel paint (1650-23 swiss coffee) that was mostly dried. SDS indicates that this paint should not be released to water-ways.*** ***2x1 gallon containers holding 1 inch of partially dried white paints*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	
G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL [3050]** Facility failed to obtain a permit or authorization from HMCD for the treatment of an on-site generated hazardous waste, or from DTSC for the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***Mr. Parked stated that paint from a damaged container was intentionally left to dry in the waste storage area. This one gallon container had a label that indicated that it was flammable. Mr. Parker indicated that this was a general practice for non-recycled paints and multiple paint cans with died or semi-dried paint in the bottom were observed in trash cans next to the waste storage cage.*** ***Because the inspection could not be finished on 2/14/17, final documents were reviewed on 2/15/17. At the time of the second visit, a number of additional open containers with flammable liquids were observed in the waste storage area with open lids, drying. Open containers observed on the previous day still had not been closed.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. For wastes generated treated onsite, obtain a permit from HMCD by submitting the required information/permit application as directed above. [HSC 25189.5, CCR 66270.1]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G014	M	**WASTE DETERMINATION DOCUMENTATION [3030053]** Facility failed to keep copies of test results, waste analyses or other hazardous waste determination records. ***Prior to changing transporters in September 2016, floor scrapings were RCRA hazardous waste and disposal receipts used waste codes D001 and F003. After switching transporters, waste was determined to be non-RCRA and waste code331 was incorrectly applied. Facility does not have any waste profiles available to show why waste codes were changed for this waste stream.*** Re-determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G020	II	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed the following containers of hazardous waste with missing or inadequate labels:*** ***1x55 gallon container of used oil in fleet services shop (no label)*** ***1x5 gallon container of used oil (no label)*** ***1x5 gallon container of waste paint machine flush material under the varnish/catalyst mixing machine*** ***1x2 gallon drip container of used oil in outdoor forklift area (no label)*** ***1x55 gallon drum of paint booth filters (no label)*** ***1x55 gallon drum of solid waste paint pucks with no accumulation date*** ***1x5 gallon container half-full of used oil in storage cage (no label)*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage (no label)*** ***2x55 gallon containers of paint booth floor scrapings in paint booths (no label)*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G023	M	**CONTAINER OPEN [3030017]** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***Observed the following containers of hazardous waste with no lids or unsecured drum rings while not in use:*** ***1x55 gallon container of used oil in fleet service area*** ***1x2 gallon drip container of used oil near forklifts*** ***1x5 gallon container 1/2 full of used oil in waste storage cage*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G041	M	**MANIFEST PROPERLY COMPLETED [3010008]** Facility failed to properly complete a Uniform Hazardous Waste Manifest in accordance with manifest instructions. ***Facility is using waste code 331 on later 2016 manifests to describe paint booth floor scrapings and paint booth filters which are not off-spec, aged, or surplus material. See hazardous waste determination documentation violation and comments section for more information about how this waste was previously identified.*** ***Manifests for vinyl-based paint/ acetone paint waste show that this material was regularly disposed of up until 5/3/16. The only container of this waste observed on-site was dated as 11/16/16, indicating that the facility did not generate any of this waste between may of 2016 and November of 2016. Concurrently, manifests for disposal show 55 gallon disposals of waste paint with a 331 waste code. Mr. Parker stated that this was likely a mistake, and that this code was probably applied to the non-recyclable waste. Ensure that waste acetone and vinyl paint carry an F003 and D001 waste code, and that the 331 waste code is only applied to unused paints.*** Submit a manifest correction letter to: DTSC, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806, Attn: Manifest Corrections. Instructions on how to submit a manifest correction letter are available upon request. [CCR 66262.23]	
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Facility housekeeping practices do not minimize releases of hazardous waste to the environment. Observed 1x5 gallon container of flammable paint that stacked halfway off the secondary containment pallet in a way that allowed it to leak flammable paint to the floor of the waste storage cage. This spill was cleaned up during the inspection after being brought to the attention of Mr. Parker. Observed paint spray stains and releases on walls around connection points for acetone spray hoses outside of both spray booths.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G200	II	**ACCUMULATION TIME: SQG [3030010]** Facility accumulated hazardous waste on-site for longer than the time allowed for a small quantity generator of hazardous waste. ***Disposal records show that between 12/2012 and 6/2014, facility accumulated 50 gallons of used oil. Since then, no disposals have occurred and facility has been accumulating used oil for too long. Container does not meet exemptions for extended accumulation times for point of generation and waste may be accumulated in this container for a maximum of 180 days. Disposed of this waste within 30 days and provide a disposal receipt for review.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 180 days when transported up to 200 miles, or 270 days when transported over 200 miles. [CCR 66262.34(d)]	
G211	M	**EMERGENCY INFORMATION POSTED: SQG [3010022]** Facility failed to post emergency response information next to the telephone, as required. ***Facility did not have emergency contact numbers posted at the time of inspection. Mr. Parker was given a posting template to post on the wall.*** Post the following information: 1) the name and phone number of all emergency coordinators; 2) the location of fire extinguishers, spill control materials, and any fire alarms; and 3) the phone number for the fire department. A sample poster (UN-051) is available at www.unidocs.org. [CFR 262.34(d)(5)(ii)]	
G220	M	**TRAINING: SQG [3020001]** Personnel are not adequately trained on managing hazardous waste. ***Nature and number of violations indicate that employee training in hazardous waste management has not been effective. Mr. Parker was given a link to free county training courses provided by the county.*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	
G411	II	**ACCUMULATION TIME: USED OIL/FUEL FILTERS [3030004]** Facility held drained used oil/fuel filters on-site for longer than the allowed time limit. ***Mr. Parker stated that used oil filters observed on-site have been there for greater than one year. No manifests show disposal of this waste for the past three years.*** Make arrangements for the immediate removal of the filters. Submit to HMCD a copy of the bill of lading demonstrating that the filters were removed. Ensure that drained used oil/fuel filters are not held on-site for longer than one year when storing less than a ton of filters, or 180 days when storing a ton or more of filters. [Note: 1 ton = 2,000 lbs. = approx. 8 drums uncrushed filters or 4 drums crushed filters.] [CCR 66266.130(c)(4), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Cardboard box of used oil filters was not labeled.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 saturated oily cardboard box (approximately 10 gallon capacity) holding metal- cased used oil filters. Filters must be kept in a closed, labeled, non-absorptive container.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE [3050003]** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed 1 non-empty aerosol can of BrakeKleen in fleet maintenance shop trash can.*** ***Observed 8 non-empty Prevail Sprayer propellant cannisters in trashcans next to waste storage cage.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, visit www.hhw.org. [CCR 66273.31(a)]	
G442	II	**ACCUMULATION TIME: UNIVERSAL WASTE [3030011]** Facility held Universal Waste on-site for longer than the allowed time limit or was unable to demonstrate the length of time that universal waste was held on-site. ***Mr. Parker stated that universal waste aerosol cans had been accumulating on-site for more than one year. No manifests detail the disposal of this waste in the past three years.*** Make arrangements for the immediate removal of the Universal Waste (see www.hhw.org). Ensure that Universal Waste is not held on-site for longer than one year. Demonstrate that you are meeting this requirement by marking the container, keeping a log, maintaining an inventory system, or by using another method that clearly demonstrates the length of time the waste has been accumulated on-site. [CCR 66273.35]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G443	M	**CONTAINER MARKING: UNIVERSAL WASTE [3030008]** Facility failed to properly label Universal Waste. ***Observed 2 unlabeled cardboard boxes holding non-empty waste aerosol cans without labels. Observed 1x55 gallon drum for universal waste aerosol cans with a label that did not include the word "aerosol". Observed container of fluorescent light tubes with no label.*** Clearly identify the waste type on all Universal Wastes or Universal Waste containers. The label wording must match that listed in the law or regulation for the type of Universal Waste. The labeling requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [Note: Areas that have clear boundaries and are designated for the storage of electronic devices or CRT materials may be labeled in lieu of labeling individual wastes or waste containers.] [CCR 66273.34 HSC 25201.16(f)(6)]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed spent fluorescent tubes outside of proper containment in the outdoor forklift area. One tube was leaning against a wall and another was found in a pile of unwanted equipment.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G445	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***Observed universal waste aerosol cans in multiple cardboard boxes without labels, awaiting transfer into a designated container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G450	M	**RECORDS: UNIVERSAL WASTE HANDLER TRAINING [3010]** Training records for Universal Waste handlers are not being kept as required. ***Mr. Parker is the employee designated to handle universal waste but stated that he has not received annual refresher training and does not keep a record of this training. Mr. Parker to date has been unaware that his facility was subject to universal waste handling requirements such as accumulation time lines, training, and container requirements.*** Maintain records documenting that Universal Waste handlers have received initial and annual training on proper handling and emergency response procedures related to Universal Wastes. Keep current employee training records until the facility is closed. Keep records on former employees for at least 3 years from the date the employee last worked at the facility. [CCR 66273.36(c) & (d)]	
G470	II	**REPORTING: RECYCLABLE MATERIALS [3010016]** Facility recycled more than 100 kg (220 pounds) per month of a recyclable material but failed to submit to HMCD a Recyclable Materials Report as required. The report is due by July 1 of each even numbered year, and covers the prior 2 calendar years. ***The painter on-site at the time of inspection indicated that he recycles about 10 gallons of paint thinner waste per week. Facility was unaware of reporting requirements. This is a repeat violation first cited in a 2009 enforcement inspection.*** Submit via the California Environmental Reporting System (CERS) a Recyclable Materials Report. Ensure that the "Facility Information- Business Activities" page is modified to indicate "YES" under "Excluded and/or Exempted Materials". The Recyclable Materials Report should be downloaded from CERS, completed and then uploaded . [HSC 25143.10]	
G471	M	**RECORDS: RECYCLABLE MATERIALS [3050005]** Facility failed to maintain adequate records regarding a material that is recycled under a claim that the material qualifies for exclusion or exemption from hazardous waste requirements. ***Facility has not maintained any records to demonstrate that they meet the conditions of this recycling exemption.*** Maintain records that demonstrate to the satisfaction of the requesting agency that there is a known market or disposition for the material, and that the requirements of any exemption or exclusion are met. [HSC 25143.2(f)]	
G473	II	**MARKING OF EXCLUDED RECYCLABLE MATERIALS [3030]** Facility failed to properly mark a tank or container holding an excluded recyclable material. ***Observed 4x5 gallon containers of paint waste wash in paint booths without proper labels declaring the materials as Excluded Recyclable Materials.*** Mark each tank and container holding excluded recyclable materials with the words "EXCLUDED RECYCLABLE MATERIAL" and the accumulation start date. Additionally, clearly mark each container and portable tank with the name and address of the generator, and the composition, physical state, and hazardous properties of the material. [HSC 25143.9(a)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G474	M	**EMERGENCY PROCEDURES: EXCLUDED RECYCLABLE MATERIAL [3010]** Facility manages a waste as an excluded recyclable material, but does not have a Hazardous Materials Business Plan (HMBP) that adequately addresses the recyclable material. ***Facility has not addressed this material in their hazardous materials business plan.*** Begin managing the waste as a hazardous waste, or prepare an HMBP that contains emergency response plans and procedures that specifically address excluded recyclable materials. [HSC 25143.9(b)]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. This is a regular waste stream for most fleet maintenance shops.*** ***Determine how much of this material is generated and explain how it has been managed. If facility claims not to generate this material, explain why this material is not generated on-site.*** ***Provide information on how this will be managed if it is generated in the future.*** ***[CCR 66261.2 (g)]***	

Comments: Inspection commenced on 2/14/17 and concluded on 2/15/17.
Facility does wood finishing and generates the following wastes:
- Vinyl paint and acetone waste -D001, 343
- Soild paint waste (pucks from thinner recycler, debris, and scrapings from paint booth floor)- F003, D001, 352
- Contaminated rags (used oil and thinner)- 352
- Paint booth filters- 352
- Expired or off-spec paints- D001, 331
- Metal-cased oil filters
- Used oil
- Universal waste fluorescent light bulbs and non-empty aerosol cans

Facility is a single warehouse with two outdoor storage areas and two internal spray booths. Facility does basic fleet service for on-site vehicles but does not do wood finishing work off-site. Fleet services include basic oil changes. Facility uses a vinyl base coat and finish that cannot be recycled and is collected as hazardous waste. All other non-vinyl dye stains can be recycled for their acetone in an on-site thinner recycler located in the back waste storage area. Facility stated that this machine runs about 10 gallons per week, and solid pucks are placed into a 55 gallon solid paint waste container. Conversion varnish top coat is not catalyzed before arrival and catalyst is stored in 5 gallon containers in waste storage cage. Mr. Parker stated that varnish is pumped into a machine outside of the paint booth from a 55 gallon drum inside, and catalyst and varnish are mixed in the machine before being pumped back to the spray booth for use. Spray guns are cleaned with acetone in the paint booth by scrubbing with a brush and spraying waste acetone into 5 gallon buckets located in the paint booth. Non-recyclable paint waste is transfered to the waste storage drum after use. Unused dye stains that can be recycled for their thinner content are stored in flammable cabinets until it has been determined that they are no longer needed for a job. Once this determination is made, these bases are combined into a 5 gallon bucket and poured into the recycler. Paint booth floors are swept a scraped clean of dust which is managed as hazardous waste. Previous manifests listed this material as "Waste solids containing flammable liquid" but once the facility changed transporters in September of 2016, this material was referred to as "Non RCRA Hazardous Waste Solid (paint waste powder)". CAM17 tests conducted in 2016 indicate that paint booth filter samples and paint residue samples both show that xylene and acetone is detectable in the sample (thus the F003 waste code that was applied in the past).
Generator status: Overall waste from this facility has decreased from 2014 to 2016. In 2016, facility disposed of a maximum of 929 kg of RCRA waste in one month. Facility has the potential to become an episodic Large Quantity Generator in the future, and should this occur, facility will be subject to all Large Quantity Generator standards. Mr. Parker was advised that generator status is based on waste generated in a month, rather than waste shipped per month, and that large clean outs of waste can result in a change in status.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

Facility inspection included walk-through of 1 paint booth, work floor, outside waste storage cage, and outdoor fenced storage area next to skunk works. Facility dumpsters had been empty prior to arrival on 2/15/17 but trashcans on shop floors were inspected. Documents for all hazardous waste disposals for the past three years were reviewed. Fire extinguishers are annually serviced, spill kit and aisle space is adequate, and waste storage areas are inspected weekly (checklist completed by Mr. Parker). EPA ID CAL000250974 is currently active.

NOTES:
1.) Manifests in 2014 (ex 006976955FLE) list waste as " waste flammable liquids N.O.S. (Acetone)". Wastes solutions N.O.S. must include two descriptors that describe the waste stream. This error was observed to be corrected on future manifest in 2015 and 2016.
2.) Facility has a number of air compressors, large CNC machines, and automated mixing machine for conversion varnish and catalyst. Mr. Parker was advised that if any of these machines have filters that must be changed, filters may qualify as hazardous waste. Conversion varnish machine was put in place around 2014, according to Mr. Parker.
3.) Mr. Parker was given labels for each waste noted on-site, training log templates, and information about where to find guidance on handling universal waste.

Program: PR0396879 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B105	**M**	**HMBP FACILITY INFORMATION MISSING / INCOMPLETE [1010003]** Facility operator failed to electronically submit and/or maintain accurate and complete Facility Information (i.e., Business Activities and Business Owner/Operator Identification) as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility has not disclosed on their facility information page that they recycle more than 100 kg of paint thinner waste per month.*** Within 30 days, amend and electronically submit a HMBP, including accurate Facility Information, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1), 25508(a)(1), 19 CCR 2652]	
B106	**M**	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***INventory submitted in CERS does not match inventory observed at the time of inspection. See comments for a complete listing.*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
B107	**M**	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit and/or maintain an accurate and complete Site Map as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility site map does not include locations of emergency eye wash or facility storm drains. Not all hazardous materials and hazardous waste areas are located on the map. Location of propane tank is not identified on map.*** Within 30 days, electronically submit a HMBP, including accurate facility Site Map(s), through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25404(e), 25501(s), 25505(a)(2), 25508(a)(1), 19 CCR 2652]	
B125	**M**	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. Mr. Parker was given a sample notification letter at the time of inspection.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	

Comments: Facility last submitted their Hazardous Materials Business Plan on 10/07/16 using CERS ID 10473313. Facility has annual training logs detailing emergency response training attendance.

Facility has the following reportable quantities of hazardous materials:
450 gallons of liquid propane
65 gallons of used oil
65 gallons of acetone
110 gallons of top coat conversion varnish
2275 pounds of floor scrapings and waste paint pucks (7x325 pounds each)
110 gallons of vinyl paint and acetone paint waste

Facility has the following hazardous materials below reporting thresholds:
45 gallons of vinyl base coat
40 gallons of conversion varnish catalyst
10 gallons of grey base coat
20 gallons of black base coat
20 gallons of espresso base coat
5 gallons of walnut base coat
30 gallons of WilsonArt paint material
10 gallons of used oil filters
less than gallons of new oils, various types

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

various thinners, floor sealers,glues, and alcohols (each type less than 55 gallons)
65 gallons of misc. dye stains, paints and (each type less than 55 gallons)
300 pounds of paint booth filter waste (6x50 pounds each)
160 pounds of rags contaminated with oil and paint (2x80 pounds)
141 cf of argon/carbon dioxide gas
less than 500 pounds of each universal waste (aerosol cans and light tubes)

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/18/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

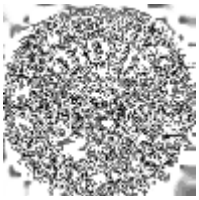
What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms



XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Observed the following materials on-site that were declared to be a waste by Mr. Parker:*** ***1x5 gallon bucket with 2 inches of black sludge in the bottom*** ***1x5 gallon grey metal bucket of unknown material*** ***1x1 gallon container of solidified white paint*** ***1 gallon container of open brown liquid in varnish/catalyst mixing cabinet*** ***Observed approximately 10 gallons of floor sealers in flammables cabinet by storage cage that Mr. Parker indicated were unusable.*** ***In the adjacent cabinet, Mr. Parked identified a 1x5 gallon propane-type cylinder with adhesive and 1x5 gallon container of Ethanol as items that were no longer used.*** ***Determine if these wastes are hazardous waste and manage them accordingly.*** ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. Determine how much of this material is generated and explain how it has been managed.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	 See attached correspondence for determination. Test results reviewed during inspection. See all other supporting documents attached at the end or report. All waste profiles, training logs, and other requested documents not attached have been reviewed and removed by inspector.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed the following non-empty containers in facility trash cans:*** ***1 full can of minwax wood filler (flammable)*** ***multiple 500 mL glass jars (varying from empty to 1/4 full) with flammable white paint (dried or semi-dried)*** ***1 gallon container of melamine vinyl adhesive with approximately 300 mL of liquid inside*** ***2x 1 quart containers of dried flammable paint materials (approximately 1/4 full)*** ***1 can containing approximately 1 inch of Premium Kelly Moore Acry-Plex interior latex semi-gloss enamel paint (1650-23 swiss coffee) that was mostly dried. SDS indicates that this paint should not be released to water-ways.*** ***2x1 gallon containers holding 1 inch of partially dried white paints*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	
G013	II	**ILLEGAL TRANSFER/TREATMENT/STORAGE/DISPOSAL [3050]** Facility failed to obtain a permit or authorization from HMCD for the treatment of an on-site generated hazardous waste, or from DTSC for the transfer, treatment, storage or disposal of an off-site generated hazardous waste. ***Mr. Parked stated that paint from a damaged container was intentionally left to dry in the waste storage area. This one gallon container had a label that indicated that it was flammable. Mr. Parker indicated that this was a general practice for non-recycled paints and multiple paint cans with died or semi-dried paint in the bottom were observed in trash cans next to the waste storage cage.*** ***Because the inspection could not be finished on 2/14/17, final documents were reviewed on 2/15/17. At the time of the second visit, a number of additional open containers with flammable liquids were observed in the waste storage area with open lids, drying. Open containers observed on the previous day still had not been closed.*** Immediately cease the illegal transfer, treatment, storage, or disposal of hazardous waste. For wastes generated treated onsite, obtain a permit from HMCD by submitting the required information/permit application as directed above. [HSC 25189.5, CCR 66270.1]

VC	Class	Violation	Corrective Actions Taken
G014	M	**WASTE DETERMINATION DOCUMENTATION [3030053]** Facility failed to keep copies of test results, waste analyses or other hazardous waste determination records. ***Prior to changing transporters in September 2016, floor scrapings were RCRA hazardous waste and disposal receipts used waste codes D001 and F003. After switching transporters, waste was determined to be non-RCRA and waste code331 was incorrectly applied. Facility does not have any waste profiles available to show why waste codes were changed for this waste stream.*** Re-determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G020	II	**MARKING OF HAZARDOUS WASTE [3030007]** Facility failed to properly mark a hazardous waste tank and/or container. ***Observed the following containers of hazardous waste with missing or inadequate labels:*** ***1x55 gallon container of used oil in fleet services shop (no label)*** ***1x5 gallon container of used oil (no label)*** ***1x5 gallon container of waste paint machine flush material under the varnish/catalyst mixing machine*** ***1x2 gallon drip container of used oil in outdoor forklift area (no label)*** ***1x55 gallon drum of paint booth filters (no label)*** ***1x55 gallon drum of solid waste paint pucks with no accumulation date*** ***1x5 gallon container half-full of used oil in storage cage (no label)*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage (no label)*** ***2x55 gallon containers of paint booth floor scrapings in paint booths (no label)*** Mark all hazardous waste tanks with the words "HAZARDOUS WASTE" and the accumulation start date. Mark all hazardous waste containers and portable tanks with the words "HAZARDOUS WASTE;" the accumulation start date; the name and address of the generator; and the composition, physical state, and hazardous properties of the waste. Additionally, mark used oil containers, aboveground tanks, and fill pipes for underground tanks with the words "USED OIL." [CCR 66262.34(f), 66279.21(b)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G023	M	**CONTAINER OPEN [3030017]** Facility failed to keep a hazardous waste container closed at a time when it was not necessary to add or remove waste. ***Observed the following containers of hazardous waste with no lids or unsecured drum rings while not in use:*** ***1x55 gallon container of used oil in fleet service area*** ***1x2 gallon drip container of used oil near forklifts*** ***1x5 gallon container 1/2 full of used oil in waste storage cage*** ***2x55 gallon drums of black paint booth floor scrapings by outdoor storage cage*** Tightly close all hazardous waste containers. Ensure that they remain closed, except when it is necessary to add or remove waste. Containers are considered closed when all lids, gaskets, and locking rings are in place and secured. [CCR 66265.173(a), CFR 265.173(a)]	
G041	M	**MANIFEST PROPERLY COMPLETED [3010008]** Facility failed to properly complete a Uniform Hazardous Waste Manifest in accordance with manifest instructions. ***Facility is using waste code 331 on later 2016 manifests to describe paint booth floor scrapings and paint booth filters which are not off-spec, aged, or surplus material. See hazardous waste determination documentation violation and comments section for more information about how this waste was previously identified.*** ***Manifests for vinyl-based paint/ acetone paint waste show that this material was regularly disposed of up until 5/3/16. The only container of this waste observed on-site was dated as 11/16/16, indicating that the facility did not generate any of this waste between may of 2016 and November of 2016. Concurrently, manifests for disposal show 55 gallon disposals of waste paint with a 331 waste code. Mr. Parker stated that this was likely a mistake, and that this code was probably applied to the non-recyclable waste. Ensure that waste acetone and vinyl paint carry an F003 and D001 waste code, and that the 331 waste code is only applied to unused paints.*** Submit a manifest correction letter to: DTSC, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806, Attn: Manifest Corrections. Instructions on how to submit a manifest correction letter are available upon request. [CCR 66262.23]	
G110	M	**MAINTENANCE AND OPERATION OF FACILITY [3030030]** Facility is not maintained or operated in a manner to minimize the possibility of a fire, explosion, or any unplanned release of hazardous waste to air, soil, or surface water that could threaten human health or the environment. ***Facility housekeeping practices do not minimize releases of hazardous waste to the environment. Observed 1x5 gallon container of flammable paint that stacked halfway off the secondary containment pallet in a way that allowed it to leak flammable paint to the floor of the waste storage cage. This spill was cleaned up during the inspection after being brought to the attention of Mr. Parker. Observed paint spray stains and releases on walls around connection points for acetone spray hoses outside of both spray booths.*** Maintain and operate the facility in a manner that minimizes potential emergencies and unplanned releases. [CCR 66265.31, CFR 265.31]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G200	II	**ACCUMULATION TIME: SQG [3030010]** Facility accumulated hazardous waste on-site for longer than the time allowed for a small quantity generator of hazardous waste. ***Disposal records show that between 12/2012 and 6/2014, facility accumulated 50 gallons of used oil. Since then, no disposals have occurred and facility has been accumulating used oil for too long. Container does not meet exemptions for extended accumulation times for point of generation and waste may be accumulated in this container for a maximum of 180 days. Disposed of this waste within 30 days and provide a disposal receipt for review.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not held on-site for longer than 180 days when transported up to 200 miles, or 270 days when transported over 200 miles. [CCR 66262.34(d)]	
G211	M	**EMERGENCY INFORMATION POSTED: SQG [3010022]** Facility failed to post emergency response information next to the telephone, as required. ***Facility did not have emergency contact numbers posted at the time of inspection. Mr. Parker was given a posting template to post on the wall.*** Post the following information: 1) the name and phone number of all emergency coordinators; 2) the location of fire extinguishers, spill control materials, and any fire alarms; and 3) the phone number for the fire department. A sample poster (UN-051) is available at www.unidocs.org. [CFR 262.34(d)(5)(ii)]	
G220	M	**TRAINING: SQG [3020001]** Personnel are not adequately trained on managing hazardous waste. ***Nature and number of violations indicate that employee training in hazardous waste management has not been effective. Mr. Parker was given a link to free county training courses provided by the county.*** Provide training to ensure that all personnel are thoroughly familiar with proper waste handling and emergency response procedures relevant to their responsibilities during normal facility operations and emergencies. [CFR 262.34(d)(5)(iii)]	
G411	II	**ACCUMULATION TIME: USED OIL/FUEL FILTERS [3030004]** Facility held drained used oil/fuel filters on-site for longer than the allowed time limit. ***Mr. Parker stated that used oil filters observed on-site have been there for greater than one year. No manifests show disposal of this waste for the past three years.*** Make arrangements for the immediate removal of the filters. Submit to HMCD a copy of the bill of lading demonstrating that the filters were removed. Ensure that drained used oil/fuel filters are not held on-site for longer than one year when storing less than a ton of filters, or 180 days when storing a ton or more of filters. [Note: 1 ton = 2,000 lbs. = approx. 8 drums uncrushed filters or 4 drums crushed filters.] [CCR 66266.130(c)(4), HSC 25250.22]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G412	M	**CONTAINER MARKING: USED OIL/FUEL FILTERS [3030004]** Facility failed to properly mark a container of drained used oil/fuel filters. ***Cardboard box of used oil filters was not labeled.*** Mark the initial date of accumulation on the container. If the container holds any gasoline filters, mark it with the words "DRAINED USED OIL AND GASOLINE FILTERS". Otherwise mark the container with the words "DRAINED USED OIL FILTERS". [CCR 66266.130(c)(3), HSC 25250.22]	
G413	M	**CONTAINER REQUIREMENTS: USED OIL/FUEL FILTERS [3030004]** A container used to hold drained used oil/fuel filters was not closed, rainproof, capable of containing oil/fuel, and/or designed to prevent the ignition of gasoline vapors when holding gasoline filters. ***Observed 1 saturated oily cardboard box (approximately 10 gallon capacity) holding metal- cased used oil filters. Filters must be kept in a closed, labeled, non-absorptive container.*** Ensure that drained use oil/fuel filter containers are closed and meet the above requirements. Confirm that filter containers are sealed during transfer so that no oil and/or fuel can leak out when they are laid on their sides. [CCR 66266.130(c)(3), HSC 25250.22]	
G440	II	**ILLEGAL DISPOSAL OF UNIVERSAL WASTE [3050003]** Facility disposed of Universal Waste to an unauthorized facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Observed 1 non-empty aerosol can of BrakeKleen in fleet maintenance shop trash can.*** ***Observed 8 non-empty Prevail Sprayer propellant cannisters in trashcans next to waste storage cage.*** Immediately cease illegal disposal activities. Make arrangements to transfer the waste to another Universal Waste handler or an appropriate recycling or disposal facility. For assistance in locating an appropriate destination facility, visit www.hhw.org. [CCR 66273.31(a)]	
G442	II	**ACCUMULATION TIME: UNIVERSAL WASTE [3030011]** Facility held Universal Waste on-site for longer than the allowed time limit or was unable to demonstrate the length of time that universal waste was held on-site. ***Mr. Parker stated that universal waste aerosol cans had been accumulating on-site for more than one year. No manifests detail the disposal of this waste in the past three years.*** Make arrangements for the immediate removal of the Universal Waste (see www.hhw.org). Ensure that Universal Waste is not held on-site for longer than one year. Demonstrate that you are meeting this requirement by marking the container, keeping a log, maintaining an inventory system, or by using another method that clearly demonstrates the length of time the waste has been accumulated on-site. [CCR 66273.35]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G443	M	**CONTAINER MARKING: UNIVERSAL WASTE [3030008]** Facility failed to properly label Universal Waste. ***Observed 2 unlabeled cardboard boxes holding non-empty waste aerosol cans without labels. Observed 1x55 gallon drum for universal waste aerosol cans with a label that did not include the word "aerosol". Observed container of fluorescent light tubes with no label.*** Clearly identify the waste type on all Universal Wastes or Universal Waste containers. The label wording must match that listed in the law or regulation for the type of Universal Waste. The labeling requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [Note: Areas that have clear boundaries and are designated for the storage of electronic devices or CRT materials may be labeled in lieu of labeling individual wastes or waste containers.] [CCR 66273.34 HSC 25201.16(f)(6)]	
G444	M	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE [3030]** Facility failed to contain Universal Waste in a manner that prevents breakage and the release of Universal Waste or waste residues. ***Observed spent fluorescent tubes outside of proper containment in the outdoor forklift area. One tube was leaning against a wall and another was found in a pile of unwanted equipment.*** Properly contain the waste, as required for the type of Universal Waste. Container requirements are summarized in the Universal Waste Management Requirements document (HMCD-108) available at www.ehinfo.org/hazmat. [CCR 66273.33, 66273.33.5, HSC 25201.16(f)-(g)]	
G445	II	**CONTAINER REQUIREMENTS: UNIVERSAL WASTE AEROSOL CANS [3030051]** Facility failed to meet the accumulation standards for universal waste aerosol cans. ***Observed universal waste aerosol cans in multiple cardboard boxes without labels, awaiting transfer into a designated container.*** Ensure that containers holding UW aerosol cans are labeled or marked clearly with one of the following phrases: "Universal Waste-Aerosol Cans", "Waste Aerosol Cans", or "Used Aerosol Cans"; structurally sound, and compatible with the contents of the universal waste aerosol can; show no evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; are provided with a lid so that the container can (and shall) be covered at the end of each workday; are placed in a location that has sufficient ventilation to avoid formation of an explosive atmosphere; and are placed on or above a floor or other surface that is free of cracks or gaps and is sufficiently impervious and bermed to contain leaks and spills. If holding flammable wastes shall be kept at a safe distance from heat and open flames. Incompatible materials shall be kept segregated and managed appropriately in separate containers. [HSC 25201.16(f)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G450	M	**RECORDS: UNIVERSAL WASTE HANDLER TRAINING [3010]** Training records for Universal Waste handlers are not being kept as required. ***Mr. Parker is the employee designated to handle universal waste but stated that he has not received annual refresher training and does not keep a record of this training. Mr. Parker to date has been unaware that his facility was subject to universal waste handling requirements such as accumulation time lines, training, and container requirements.*** Maintain records documenting that Universal Waste handlers have received initial and annual training on proper handling and emergency response procedures related to Universal Wastes. Keep current employee training records until the facility is closed. Keep records on former employees for at least 3 years from the date the employee last worked at the facility. [CCR 66273.36(c) & (d)]	
G470	II	**REPORTING: RECYCLABLE MATERIALS [3010016]** Facility recycled more than 100 kg (220 pounds) per month of a recyclable material but failed to submit to HMCD a Recyclable Materials Report as required. The report is due by July 1 of each even numbered year, and covers the prior 2 calendar years. ***The painter on-site at the time of inspection indicated that he recycles about 10 gallons of paint thinner waste per week. Facility was unaware of reporting requirements. This is a repeat violation first cited in a 2009 enforcement inspection.*** Submit via the California Environmental Reporting System (CERS) a Recyclable Materials Report. Ensure that the "Facility Information- Business Activities" page is modified to indicate "YES" under "Excluded and/or Exempted Materials". The Recyclable Materials Report should be downloaded from CERS, completed and then uploaded . [HSC 25143.10]	see facility response 
G471	M	**RECORDS: RECYCLABLE MATERIALS [3050005]** Facility failed to maintain adequate records regarding a material that is recycled under a claim that the material qualifies for exclusion or exemption from hazardous waste requirements. ***Facility has not maintained any records to demonstrate that they meet the conditions of this recycling exemption.*** Maintain records that demonstrate to the satisfaction of the requesting agency that there is a known market or disposition for the material, and that the requirements of any exemption or exclusion are met. [HSC 25143.2(f)]	
G473	II	**MARKING OF EXCLUDED RECYCLABLE MATERIALS [3030]** Facility failed to properly mark a tank or container holding an excluded recyclable material. ***Observed 4x5 gallon containers of paint waste wash in paint booths without proper labels declaring the materials as Excluded Recyclable Materials.*** Mark each tank and container holding excluded recyclable materials with the words "EXCLUDED RECYCLABLE MATERIAL" and the accumulation start date. Additionally, clearly mark each container and portable tank with the name and address of the generator, and the composition, physical state, and hazardous properties of the material. [HSC 25143.9(a)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G474	M	**EMERGENCY PROCEDURES: EXCLUDED RECYCLABLE MATERIAL [3010]** Facility manages a waste as an excluded recyclable material, but does not have a Hazardous Materials Business Plan (HMBP) that adequately addresses the recyclable material. ***Facility has not addressed this material in their hazardous materials business plan.*** Begin managing the waste as a hazardous waste, or prepare an HMBP that contains emergency response plans and procedures that specifically address excluded recyclable materials. [HSC 25143.9(b)]	✓
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility does fleet maintenance on-site but records do not show disposal of used antifreeze or brake fluid. This is a regular waste stream for most fleet maintenance shops.*** ***Determine how much of this material is generated and explain how it has been managed. If facility claims not to generate this material, explain why this material is not generated on-site.*** ***Provide information on how this will be managed if it is generated in the future.*** ***[CCR 66261.2 (g)]***	✓

Comments: Inspection commenced on 2/14/17 and concluded on 2/15/17.
Facility does wood finishing and generates the following wastes:
- Vinyl paint and acetone waste -D001, 343
- Soild paint waste (pucks from thinner recycler, debris, and scrapings from paint booth floor)- F003, D001, 352
- Contaminated rags (used oil and thinner)- 352
- Paint booth filters- 352
- Expired or off-spec paints- D001, 331
- Metal-cased oil filters
- Used oil
- Universal waste fluorescent light bulbs and non-empty aerosol cans

Facility is a single warehouse with two outdoor storage areas and two internal spray booths. Facility does basic fleet service for on-site vehicles but does not do wood finishing work off-site. Fleet services include basic oil changes. Facility uses a vinyl base coat and finish that cannot be recycled and is collected as hazardous waste. All other non-vinyl dye stains can be recycled for their acetone in an on-site thinner recycler located in the back waste storage area. Facility stated that this machine runs about 10 gallons per week, and solid pucks are placed into a 55 gallon solid paint waste container. Conversion varnish top coat is not catalyzed before arrival and catalyst is stored in 5 gallon containers in waste storage cage. Mr. Parker stated that varnish is pumped into a machine outside of the paint booth from a 55 gallon drum inside, and catalyst and varnish are mixed in the machine before being pumped back to the spray booth for use. Spray guns are cleaned with acetone in the paint booth by scrubbing with a brush and spraying waste acetone into 5 gallon buckets located in the paint booth. Non-recyclable paint waste is transfered to the waste storage drum after use. Unused dye stains that can be recycled for their thinner content are stored in flammable cabinets until it has been determined that they are no longer needed for a job. Once this determination is made, these bases are combined into a 5 gallon bucket and poured into the recycler. Paint booth floors are swept a scraped clean of dust which is managed as hazardous waste. Previous manifests listed this material as "Waste solids containing flammable liquid" but once the facility changed transporters in September of 2016, this material was referred to as "Non RCRA Hazardous Waste Solid (paint waste powder)". CAM17 tests conducted in 2016 indicate that paint booth filter samples and paint residue samples both show that xylene and acetone is detectable in the sample (thus the F003 waste code that was applied in the past).
Generator status: Overall waste from this facility has decreased from 2014 to 2016. In 2016, facility disposed of a maximum of 929 kg of RCRA waste in one month. Facility has the potential to become an episodic Large Quantity Generator in the future, and should this occur, facility will be subject to all Large Quantity Generator standards. Mr. Parker was advised that generator status is based on waste generated in a month, rather than waste shipped per month, and that large clean outs of waste can result in a change in status.

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112
Inspection Date: 02/16/2017

Summary of Violations & Notice to Comply

Facility inspection included walk-through of 1 paint booth, work floor, outside waste storage cage, and outdoor fenced storage area next to skunk works. Facility dumpsters had been empty prior to arrival on 2/15/17 but trashcans on shop floors were inspected. Documents for all hazardous waste disposals for the past three years were reviewed. Fire extinguishers are annually serviced, spill kit and aisle space is adequate, and waste storage areas are inspected weekly (checklist completed by Mr. Parker). EPA ID CAL000250974 is currently active.

NOTES:
1.) Manifests in 2014 (ex 006976955FLE) list waste as " waste flammable liquids N.O.S. (Acetone)". Wastes solutions N.O.S. must include two descriptors that describe the waste stream. This error was observed to be corrected on future manifest in 2015 and 2016.
2.) Facility has a number of air compressors, large CNC machines, and automated mixing machine for conversion varnish and catalyst. Mr. Parker was advised that if any of these machines have filters that must be changed, filters may qualify as hazardous waste. Conversion varnish machine was put in place around 2014, according to Mr. Parker.
3.) Mr. Parker was given labels for each waste noted on-site, training log templates, and information about where to find guidance on handling universal waste.

Program: PR0396879 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B105	M	**HMBP FACILITY INFORMATION MISSING / INCOMPLETE [1010003]** Facility operator failed to electronically submit and/or maintain accurate and complete Facility Information (i.e., Business Activities and Business Owner/Operator Identification) as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility has not disclosed on their facility information page that they recycle more than 100 kg of paint thinner waste per month.*** Within 30 days, amend and electronically submit a HMBP, including accurate Facility Information, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1), 25508(a)(1), 19 CCR 2652]	
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility operator failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***INventory submitted in CERS does not match inventory observed at the time of inspection. See comments for a complete listing.*** Within 30 days, electronically submit a HMBP, including an accurate Hazardous Materials Inventory, through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to electronically submit and/or maintain an accurate and complete Site Map as part of the facility's Hazardous Materials Business Plan (HMBP). ***Facility site map does not include locations of emergency eye wash or facility storm drains. Not all hazardous materials and hazardous waste areas are located on the map. Location of propane tank is not identified on map.*** Within 30 days, electronically submit a HMBP, including accurate facility Site Map(s), through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. The map must contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25404(e), 25501(s), 25505(a)(2), 25508(a)(1), 19 CCR 2652]	
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. Mr. Parker was given a sample notification letter at the time of inspection.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	

Comments: Facility last submitted their Hazardous Materials Business Plan on 10/07/16 using CERS ID 10473313. Facility has annual training logs detailing emergency response training attendance.

Facility has the following reportable quantities of hazardous materials:
450 gallons of liquid propane
65 gallons of used oil
65 gallons of acetone
110 gallons of top coat conversion varnish
2275 pounds of floor scrapings and waste paint pucks (7x325 pounds each)
110 gallons of vinyl paint and acetone paint waste

Facility has the following hazardous materials below reporting thresholds:
45 gallons of vinyl base coat
40 gallons of conversion varnish catalyst
10 gallons of grey base coat
20 gallons of black base coat
20 gallons of espresso base coat
5 gallons of walnut base coat
30 gallons of WilsonArt paint material
10 gallons of used oil filters
less than gallons of new oils, various types

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0255392 **Inspection Date:** 02/16/2017
Facility Name: AMBERWOOD PRODUCTS INC
Site Address: 1555 S 7TH ST BLD 7, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

various thinners, floor sealers,glues, and alcohols (each type less than 55 gallons)
65 gallons of misc. dye stains, paints and (each type less than 55 gallons)
300 pounds of paint booth filter waste (6x50 pounds each)
160 pounds of rags contaminated with oil and paint (2x80 pounds)
141 cf of argon/carbon dioxide gas
less than 500 pounds of each universal waste (aerosol cans and light tubes)

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 03/18/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. Hazardous Materials Compliance Inspection Corrections
(Inspection Date 2/17/17)

Violation Code and Corrections Made

G010 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood performs only minor fleet maintenance, such as oil changes or adding fluids when necessary. The violation questions why there are no records of engine coolant or brake fluid disposal. Amberwood does not flush its vehicle radiators as part of servicing its vehicles, therefore no coolants are generated for disposal. Amberwood may replace brake pads on its vehicles, but only minute amounts of brake fluid are generated when the brakes are bled, and would be collected on a shop rag. The contaminated rag would then be disposed of in the contaminated rags drum for proper disposal.

G011 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G013 All materials indicated in the inspection were disposed of as hazardous waste. The materials were Lab Packed and disposed of by Patriot Environmental Services on 3/1/17.

Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G014 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. See attached Curtis and Thompkins Analytical Report.

Amberwood filed a Notice of Disagreement for this violation by e-mail to the inspector. Amberwood has received a response from the inspector requesting/requiring additional proof of why this material does not require a D001 or F003 code on the manifest. Amberwood will abide by this request/requirement until such time as proof can be obtained verifying the waste codes are appropriate for the material.

G413 The Used Oil Filters were disposed of on 3/1/17 by Patriot Environmental Services. In future, the used oil filters will be collected in a proper container that has the correct labeling.

G440 Amberwood has created a central collection container (tub) for all empty or partially emptied containers generated in production. The collected containers are examined and any hazardous residue material is poured or scraped into the correct waste drum and the container wiped with a shop rag. Any non-hazardous residue material is wiped out of the container using a shop rag. All contaminated rags would then be disposed of in the contaminated rags drum for proper disposal.

G442 The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

G443 The 2 cardboard boxes of aerosol cans were collected but had not yet been placed in the Universal Waste Aerosol Can drum at the time of inspection. The word "Aerosol" was added to the drum label. The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

A label was attached to the spent Fluorescent Lamps container.

G444 The spent fluorescent lamp found outside and the other tube seen leaning against a wall were placed in a proper fluorescent lamp collection container.

G445 The 2 cardboard boxes of aerosol cans were collected but had not yet been placed in the Universal Waste Aerosol Can drum at the time of inspection. The word "Aerosol" was added to the drum label. The Universal Waste Aerosol Cans were disposed of by Patriot Environmental Services on 2/16/17.

G450 The Safety Director and the Spray Booth Manager attended the "Hazardous Waste Management Training for Small Quantity Generators" presented at the county offices by the SCC Department of Environmental Health on 3/23/17.

G470 Amberwood recycles any used acetone and leftover dye stain material in order to extract the acetone. The recycled acetone is used by Amberwood in the spray booths to clean the spray guns at the end of the work shift. Amberwood does not offer the recycled acetone to any outside company. It is all used in house.

Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

G999 Amberwood performs only minor fleet maintenance, such as oil changes or adding fluids when necessary. The violation questions why there are no records of engine coolant or brake fluid disposal. Amberwood does not flush its vehicle radiators as part of servicing its vehicles, therefore no coolants are generated for disposal. Amberwood may replace brake pads on its vehicles, but only minute amounts of brake fluid are generated when the brakes are bled, and would be collected on a shop rag. The contaminated rag would then be disposed of in the contaminated rags drum for proper disposal.

If in the future Amberwood has a need to collect and dispose of antifreeze or brake fluid, a waste drum labeled antifreeze or brake fluid (depending on material) will be created, and the material collected. Amberwood will contact the current hazardous waste disposal vendor (at that time) so that they may create a profile, and the material will be disposed of in a timely manner.

B105 Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

Amberwood has ceased operating the acetone recycling unit until such time it can determine that Amberwood has addressed all the legal requirements necessary to operate the unit.

Until such time when Amberwood begins operating the acetone recycling unit, the satellite material collection containers (buckets) will have a "Hazardous Was

B106 Myra Reichardt (SCC DEH) Hazardous Materials Technician, was requested to come to the Amberwood facility to assist in updating the missing information on the HMBP and posted the updates onto the Amberwood account on the CERS system. She came to the facility on 3/14/17 and did the updating and posting to CERS.

B107 Hazardous Materials Technician Myra Reichardt came to the Amberwood facility on 3/14/17 and assisted in updating the facility map based upon the inspection report. Once the map was updated with the missing information, she posted the updated map to the CERS system.

B125 Using the sample notification letter (Form UN-053) that was provided by the inspector, a letter was generated and mailed to the property manager on 3/15/17.

Please print or type. (Form designed for use on elite (12-pitch) typewriter.)

RE: Hazardous Materials Business Plan Notification

Dear Ms. Viglizzo:

State law (California Health and Safety Code, Division 20, Chapter 6.95, Article 1) requires that the owner/operator of any facility which must establish and implement a Hazardous Materials Business Plan (HMBP), and is located on leased or rented real property, must provide the owner of the property with written notification that the facility is subject to and in compliance with HMBP requirements (i.e. HSC 25501.1).

Please note that a HMBP has been prepared for the following facility:

Amberwood Products, Inc
1555 South 7th Street, Bldg 7F
San Jose, CA
95112

If you would like a copy of the HMBP, one will be provided to you within 5 working days after receipt of your request. A copy of this notification letter will be kept at our facility.

If you have questions, please contact the undersigned.

Sincerely,
Douglas Parker
Douglas Parker
Safety Director

CASE NARRATIVE

Laboratory number:	**277114**
Client:	**Amberwood Products, Inc.**
Location:	**Spray Booth CAM17 Test**
Request Date:	**05/24/16**
Samples Received:	**05/24/16**

This data package contains sample and QC results for two paint samples, requested for the above referenced project on 05/24/16. The samples were received intact.

Volatile Organics by GC/MS (EPA 8260B):
SAMPLE #1 - PAINT RESIDUE (lab # 277114-001) and SAMPLE #2 - FILTER W/ RESIDUE (lab # 277114-002) were diluted due to high non-target analytes. No other analytical problems were encountered.

Metals (EPA 6010B and EPA 7471A):
Low recoveries were observed for silver in the MS/MSD for batch 235626; the parent sample was not a project sample. High RPD was also observed for silver; the RPD was acceptable in the BS/BSD, and this analyte was not detected at or above the RL in the associated samples. No other analytical problems were encountered.

From:	Doug Parker
To:	Ward, Robin
Subject:	RE: updates on report response
Date:	Wednesday, April 26, 2017 7:00:43 AM

Ms Ward,

Here is the status of the 2 items you have requested an update on:

1) I went back and reviewed the manifests for the last 3 years. I noticed on the Clean Harbors manifests that the filters did not have the D or F coding, only the drums with the powder did they code with a D or F. According to your logic, since there was not a change in coding when we switched from Clean Harbors to Patriot as our hazardous waste disposal vendor, the filters do not need to have a D or F code. However, Clean Harbors did have the D and F coding for the drums of powder material. I can only assume that when Clean Harbors first did the profile on the powder they must have found some flammable liquid content in the drums they tested, and therefore determined the D and F coding was required.

I am still struggling to understand the example you sent about the cotton balls and tissue paper contaminated with acetone, and they are not required to have the D or F coding. I know both cotton balls and tissues will burn once ignited, even without acetone, so why do they not require the D or F coding??? If it is because the acetone has evaporated and there is no longer any left on the cotton balls, then I can understand why the coding would not be required.

I am working on our reasoning why the powder does not require the D or F coding. Quite frankly, I don't know what to say except the powder is dry to the touch and Amberwood has never had an incident where the powder material spontaneously combusted. We have also never heard from Clean Harbors or Patriot that the powder material has spontaneously combusted while in their possession or during transportation. This, along with the test results conducted on the powder, I hope would satisfy your requirements.

Is this the answer that would satisfy the requirement to not require the D or F coding on the powder material???

2) Regarding the acetone recycling unit, we have not used it since the day of your inspection of Amberwood. I have not had a chance to investigate what legal requirements Amberwood must meet to operate the recycling machine. I am sure it goes beyond just marking a box on the CERS documents.

I believe I sent you in a previous e-mail a copy of the form that Amberwood created to log the usage of the acetone recycling machine. I can send you that again, but it would be blank as the machine has not been used since the inspection.

If you wish, I can notify you once we again begin using the acetone recycling unit.

In conclusion, if what I said above about the powder not spontaneously combusting is an acceptable, please let me know and I can finish writing our official reply to "why the powder does not require a D or F code on the manifest". If this is not acceptable, then I will need further explanation in how to determine whether the material requires the D or F coding on the manifests.

I look forward to your response as I wish to get this completed as soon as possible as I am sure you do.

Thanks,

Doug Parker

Subject: RE: updates on report response

Thank you Mr. Parker,
The information provided has answered items 1-3 that you included below. To close the final two violations:

1. Please update me on how you will proceed with filters and include the documentation requested previously.
2. Please include your most recent recycling log since the time that you started recycling again.

I will work on closing other violations on the report in the meantime.

Ms Ward,

Please find attached the information you requested regarding the March Lab Packed Waste Shipment of the misc chemicals Amberwood disposed of with Patriot Environmental.

Just to note, the fluorescent tubes were not disposed in February. The tubes found during your inspection were placed in the fluorescent tube collection container.

Subject: RE: updates on report response

1.) Please clarify which waste stream the oil filters were shipped with on the manifest from 3/1/17. Were they consolidated with another waste stream? **(see attached lab pack sheets specifically LP51878-02 which has oil filters on it)**
2.) Please send the bill of lading for the disposal of the fluorescent tubes and aerosol cans shipped in February **(manifest for aerosols attached –it is part of invoice packet attached patriot did not haul any fluorescent lamps)**
3.) Please send the waste profiles identifying the inventory list for the lab packs shipped on 3/1/17 **(all lab pack sheets attached).**

To: "Doug Parker"
Subject: Response to Notice of Disagreement
Date: Thursday, March 23, 2017 4:51:02 PM

Mr. Parker,

The following is a formal written response to the Notice of Disagreement submitted by Amberwood Products via email on 3/16/2017. For clarity, each violation has been addressed individually, including the original violation text, your exact response on 3/16/2017, and HMCD's response.

G014: Waste Determination Documentation
Report Text:
"***Prior to changing transporters in September 2016, floor scrapings were RCRA hazardous waste and disposal receipts used waste codes D001 and F003. After switching transporters, waste was determined to be non-RCRA and waste code331 was incorrectly applied. Facility does not have any waste profiles available to show why waste codes were changed for this waste stream."***

Facility Response:
"VC#: G014 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. I have sent you a copy of the Curtis and Thompkins Anaylitic Report for the material in question in May 2016 in a previous e-mail."

HMCD Response:
Per federal regulations, when a listed waste is contained in a final waste, the resulting waste will carry the original waste code unless the final waste no longer exhibits the characteristics for which the waste was originally listed. Thus, a waste paint booth filter containing waste flammable liquids originally carrying D001 and F003 waste codes will also bear a D001 and F003 waste code unless these filters are not ignitable at the point of generation. While a CAM 17 test can detect if filters have other F-listed solvents or regulated metals, it cannot determine if waste paint filters are ignitable. A waste determination is required, either using generator knowledge or additional testing. Provide more information to HMCD regarding the determination for this waste and how it was made. Please be advised that waste code 331 is reserved for "off-specification, aged, or surplus organics" and is therefore not applicable to any waste paint filter contaminated with waste paint materials.

G041: Manifest Properly Completed
Report Text:
"***Facility is using waste code 331 on later 2016 manifests to describe paint booth floor scrapings and paint booth filters which are not off -spec, aged, or surplus material. See hazardous waste determination documentation violation and comments section for more information about how this waste was previously identified.***

Manifests for vinyl-based paint/ acetone paint waste show that this material was regularly disposed of up until 5/3/16. The only container of this waste observed on-site was dated as 11/16/16, indicating that the facility did not generate any of this waste between May of 2016 and November of 2016. Concurrently, manifests for disposal show 55 gallon disposals of waste paint with a 331 waste code. Mr. Parker stated that this was likely a mistake, and that this code was probably applied to the non-recyclable waste. Ensure that waste acetone and vinyl paint carry an F003 and D001 waste code, and that the 331 waste code is only applied to unused paints."

Facility Response:
"VC#: G041 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. I have sent you a copy of the Curtis and Thompkins Anaylitic Report for the material in question in May 2016 in a previous e-mail."

HMCD Response:

As previously stated, waste code 331 does not most accurately describe waste paint booth filters. For that paint booth filters in question, either waste code 331 was incorrectly applied when D001 and F003 should have been applied, or D001 and F003 code do not apply and waste paint booth filters have been described inaccurately on all manifests. HMCD respectfully requests that facility acknowledge that 331 is not a proper description for this waste and that facility will accurately describe waste on all future manifests (either by using D001 and F003 or by using a waste code that more accurately describes the waste).

G470: Reporting: Recyclable Materials

Report Text:

The painter on-site at the time of inspection indicated that he recycles about 10 gallons of paint thinner waste per week. Facility was unaware of reporting requirements. This is a repeat violation first cited in a 2009 enforcement inspection."

Facility Response:

"VC#: G470 Amberwood recycles any used acetone and leftover dye stain material in order to extract the acetone. The recycled acetone is used by Amberwood in the spray booths to clean the spray guns at the end of the work shift. Amberwood does not offer the recycled acetone to any outside company. It is all used in house.

Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

However, I did create a log sheet for when the recycling machine is used. The log will record the date the machine is started, the number of gallons of material put into the machine to start the recycle process, the date the recycling machine has finished a cycle, and the number of gallons of recycled acetone that is removed from the machine at the end of the cycle. See attached sample log sheet."

HMCD Response:

At the time of inspection, 4x5 gallon buckets were designated in paint booths for the collection of waste acetone. In addition, facility had 2 cabinets dedicated to the storage of paints and dye stains being held pending a waste determination, some of which are ultimately destined for recycling. A 2009 report noted that the facility recycled greater than 27 gallons per month (an average of 6.75 gallons per week) and a statement from the facility's painter in 2017 is consistent with this 2009 determination. HMCD will file in the facility's record that Mr. Parker states that facility is not now and has never recycled 27 gallons of waste in *any* given month since 2009. Facility will be expected to maintain detailed logs and to ensure that this reporting requirement is met should it be applicable at any time on the future. Please be advised that this is a Class II violation, and that should this violation be recited in the future, it will automatically be escalated to a Class I violation, requiring immediate enforcement.

Subject: Notice of Disagreement

Ms. Ward,

According to the Notice of Inspection – Supplemental Information, I am to submit to you (HMCD) a Notice of Disagreement within 30 days of the inspection date if Amberwood disagrees with any of the inspection violations in the NOI. Below are the Violation Codes (VC) from our NOI that we believe are not in violation:

VC#: G014 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. I have sent you a copy of the Curtis and Thompkins Anaylitic Report for the material in question in May 2016 in a previous e-mail.

VC#: G041 Amberwood stipulates that the material in question does not require a D001 or F003 code on the manifest. Amberwood had this material tested in May 2016 for CAM17 and 8260B. I have sent you a copy of the Curtis and Thompkins Anaylitic Report for the material in question in May 2016 in a previous e-mail.

VC#: G470 Amberwood recycles any used acetone and leftover dye stain material in order to extract the acetone. The recycled acetone is used by Amberwood in the spray booths to clean the spray guns at the end of the work shift. Amberwood does not offer the recycled acetone to any outside company. It is all used in house.

Amberwood does not recycle 100 kg (220 lbs) per month as stated in the report. The on-site painter does not speak English as a first language, and I believe he did not understand the question about how many gallons of material are recycled each month. I questioned the painter that was asked and he said we recycle maybe 10 gallons a month, not per week.

However, I did create a log sheet for when the recycling machine is used. The log will record the date the machine is started, the number of gallons of material put into the machine to start the recycle process, the date the recycling machine has finished a cycle, and the number of gallons of recycled acetone that is removed from the machine at the end of the cycle. See attached sample log sheet.

Re: Failure to Electronically Submit a Hazardous Materials Business Plan (HMBP) for PIEDMONT MOVING SYSTEMS, 1555 S 7TH ST A, SAN JOSE CA 95112.

Dear Business Owner/Operator,

Our records indicate that you have a Hazardous Materials Business Plan (HMBP) permit with our office because your facility handles hazardous materials above State reporting thresholds. However, your business has not submitted or recertified your facility's HMBP annually, as required by California Health and Safety Code section 25508(a)(1)(A).

Effective January 1, 2013, HMBPs are required to be submitted electronically. You may satisfy this requirement by using our local electronic reporting website, FrontCounter (https://frontcounter.sccgov.org/). Within 30 days, complete your annual submission using FrontCounter.

To request access to FrontCounter, visit the website and click "Sign up now." Complete the form using your Owner ID Number and PIN, provided above. As long as the information is entered correctly, you should receive an e-mail within minutes containing your username and password. Check your spam/junk e-mail folder for automated messages from DEH.HMCD@deh.sccgov.org if you have not received a response within 24 hours.

It is important that you respond to this notice. Failure to electronically submit your HMBP within 30 days may result in penalties of up to *$5000 per violation per day* pursuant to California Health and Safety Code sections 25508(b) and 25515(b).

To learn more about Hazardous Materials Business Plan requirements and electronic reporting, visit our website at www.ehinfo.org/hazmat, and select "Hazardous Materials Business Plans" from the Programs and Services menu. If you require assistance, please contact Myra Reichardt by phone at (408) 918-1984, or via e-mail at hmcd.cers@cep.sccgov.org.

Sincerely,
Richard Owens

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR Page ___ of ___

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below).*

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☑ Verbal *(i.e. shouting)*; ☑ Other *(specify)* Warehouse Paging System

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: (___) _____
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 299-6930**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Bay Area Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

**** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.***

c. Emergency Resources:

Poison Control Center	Phone No. **(800) 876-4766**
Nearest Hospital: Name: San Jose Medical Center	Phone No.: (408) 977-4444
Address: 675 E. Santa Clara St.	City: San Jose

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

6. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: H&SC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. If you already have a training plan, you are not required to complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☑	Internal alarm/notification *
☑	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☐	Location(s) and contents of Emergency Response/Contingency Plan
☑	Facility evacuation drills, that are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☑	Safe methods for handling and storage of hazardous materials *
☑	Location(s) and proper use of fire and spill control equipment
☑	Spill procedures/emergency procedures
☑	Proper use of personal protective equipment *
☑	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☑	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☑	Shutdown of operations
☑	Liaison with responding agencies
☑	Use, maintenance, and replacement of emergency response equipment
☑	Refresher training, which is provided at least annually *
☑	Emergency response drills, which are conducted at least *(specify)* Quarterly *(e.g. "Quarterly", etc.)*

Recordkeeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☑ Current employees' training records *(to be retained until closure of the facility)* *
☑ Former employees' training records *(to be retained at least three years after termination of employment)* *
☑ Training Program(s) *(i.e. written description of introductory and continuing training)* *
☑ Current copy of this Emergency Response/Contingency Plan *
☑ Record of recordable/reportable hazardous material/waste releases *
☑ Record of hazardous material/waste storage area inspections *
☑ Record of hazardous waste tank daily inspections *
☐ Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☑ We will use the "Hazardous Materials/Waste Storage Area Inspection Form" (Document No. UN-023) to document inspections.
☐ We will use our own documents to record inspections. *(A blank copy of each document used must be attached to this HMBP.)*

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

To: Agency Name: **Santa Clara County Hazardous Materials Compliance Division (HMCD)**
Agency Mailing Address: **1555 Berger Drive, Suite 300**
San Jose, CA 95112-2716

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: Piedmont Moving Systems
Facility Street Address: 1555 S 7th St Bldg A City: San Jose
Date of Current HMBP: 10/6/00

I certify that: *(Check the appropriate box.)*

☐ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☒ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Mark Beltrano Title: General Manager
Phone: 408 288 5600 Signature: Mark Beltrano Date: 10/3/2011

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; **and**
- The most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

Summary of Violations & Notice to Comply

Program: PR0381593 - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G034	M	**POINT OF GENERATION ACCUMULATION [3030057]** A hazardous waste container managed under point of generation accumulation rules was not at or near the point of generation and/or under the control of the operator. ***No documents could be found to confirm that antifreeze has been disposed of in the past three years. Shop mechanic states that the container was picked up last on 11/3/13, consistent with the container label. Oily solids were accumulated for over 1 year from 10/15/14 to 5/12/16. No documents for the disposal of aerosols could be located, and no disposal date was found on the container. Shop mechanic states that this hazardous waste container has been in use for several years. These wastes may be accumulated for a maximum of 1 year, or 6 months from the date containers are filled. Provide receipts showing the disposal of each waste, or provide historic receipts showing that these wastes were disposed of within the 1 year period.*** Move the container(s) to a location that is at or near the point of generation and ensure that the waste is under the control of the operator that is generating the waste. If the above conditions cannot be met, begin managing the waste in accordance with standard hazardous waste accumulation requirements. [CCR 66262.34(e)(1)(A)]	
G240	M	**MANIFEST EXCEPTION REPORTING: SQG [3010030]** Facility failed to submit an exception report to DTSC when they did not receive the TSDF-signed copy of a manifest within 60 days of a waste shipment. ***Facility has not received TSDF-signed copies of manifests for oily solids shipped on 5/12/16 (005370382SKS) and 10/15/14 (004405202SKS). Obtain TSDF-signed copies for each shipping date or complete a manifest exception report.*** Submit an exception report to: DTSC Report Repository, Generator Information Services Section, P.O. Box 806, Sacramento, CA 95812-0806. Include a legible copy of the manifest and indicate that you have not received confirmation of waste delivery. [HSC 25123.3(h)(2); CCR 66262.42(a), (c), (d)]	

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0260362
Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112
Inspection Date: 01/10/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G410	II	**MANAGEMENT OF USED OIL/FUEL FILTERS [3030004]** Used oil/fuel filters were not drained of free-flowing liquids and/or sent for metal recycling in accordance with filter requirements, nor were they managed as hazardous waste. ***Observed metal-cased and paper filters in a container marked as recyclable metal oil filters. Facility mechanic stated that he would place all paper-cased filters in the oily solids container already available.*** Drain the filters of free-flowing oil and fuel, and send them for metal recycling. Otherwise, begin managing the filters per standard hazardous waste requirements. [CCR 66266.130, HSC 25250.22]	

Comments: Facility is a trucking transport company and generates wastes related to limited truck service including waste aerosol cans, used oil, used antifreeze, oily solids, and waste parts washing solution. Battery cores are exchanged when spent (receipts reviewed) and rags are disposed of as hazardous waste. Light bulbs are recycled by the contractor that replaces them. Trucks do not use diesel exhaust fluid and all other services that may generate waste (like brake service and filter cleaning) are done out-of-house. Inspection included walk-through of warehouse storage areas, inspection of truck service and hazardous waste storage area, inspection of hazardous waste documents for the past 3 years, and inspection of trashcans. Fire extinguishers are annually serviced, spill kit is adequate, and EPA ID CAL000218734 is currently active. Shop mechanic is trained in hazardous waste management and he inspects all containers weekly.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 2x55 gallon containers of used oil and 1x55 gallon container of waste coolant that did not have the most current accumulation start dates. Observed 1x55 gallon container of waste aerosol cans with no date. Observed 1x55 gallon oily solids container with an illegible start date. Used oil and antifreeze containers were missing the hazardous characteristic. All labels were corrected at the time of inspection.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.

Program: PR0397097 - HAZARDOUS MATERIALS BUSINESS PLAN - BP02
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B106	M	**HMBP INVENTORY INFORMATION MISSING / INCOMPLETE [1010004]** Facility failed to electronically submit accurate and complete Hazardous Materials Inventory information for all hazardous materials on-site that are required to be reported in the facility's Hazardous Materials Business Plan (HMBP). ***Facility inventory does not report the correct amount of propane. Oil filters are incorrectly reported as 500 pounds, but shipping documents show the container is 200 pounds.*** Within 30 days, electronically submit complete Hazardous Materials Inventory information via either the Santa Clara County CUPA electronic reporting portal at http://FrontCounter.sccgov.org or the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a)(1); 25506; 25508(a)(1)]	

OFFICIAL NOTICE OF INSPECTION

Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to submit and/or maintain an accurate and complete Site Map with the facility's Hazardous Materials Business Plan (HMBP). ***Site map is missing locations of hazardous materials, emergency response equipment, locations of storm drains, and emergency assembly area.*** Within 30 days, electronically submit the Site Map(s) via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. The map must contain north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25505(a)(2), 25508(a)(1)]	
B108	M	**HMBP EMERGENCY RESPONSE PLANS AND PROCEDURES MISSING / INCOMPLETE [1010010]** Facility operator failed to submit and/or maintain accurate and complete emergency response plans and procedures with the facility's Hazardous Materials Business Plan (HMBP). ***Emergency response plan has a blank earthquake vulnerability section.*** Within 30 days, electronically submit an Emergency Response/Contingency Plan via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. [HSC 25505(a)(3), 25508(a)(1)]	
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. A template letter was provided during the inspection.*** Provide written notification to the property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Operator of facility subject to Hazardous Materials Business Plan (HMBP) requirements failed to document training of employees in safety procedures in the event of a release or threatened release of a hazardous material. ***Facility currently does not log annual emergency response training. A training log template was provided during the inspection.*** Provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP . Training must be documented electronically or by hard copy. Training records must be kept available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	

Comments: Facility last submitted their HMBP on 9/15/16 on Front Counter using owner ID OW0163754.

Facility has the following REPORTABLE materials:
180 gallons of 15w40 motor oil
55 gallons of used antifreeze
110 gallons of used oil
96 gallons of liquid propane

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0260362
Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112

Inspection Date: 01/10/2017

Summary of Violations & Notice to Comply

Facility has the following hazardous materials BELOW REPORTING THRESHOLDS:
misc gear oils and lubes (less than 55 gallons per type)
1x55 gallon container of uncrushed oil filters
1x55 gallon container of oily solids (less than 500 pounds)
1x55 gallons of hazardous waste aerosol containers (less than 55 pounds)
20 gallons of partswashing solution
128 cf of oxygen gas
127 cf of acetylene gas
280 cf of argon/carbon dioxide gas

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 02/09/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

Inspected By: EE0010436 - ROBIN WARD

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator | **Date**

Printed Name of Owner/Operator | **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC § §25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
B107	M	**HMBP SITE MAP MISSING / INCOMPLETE [1010005]** Facility operator failed to submit and/or maintain an accurate and complete Site Map with the facility's Hazardous Materials Business Plan (HMBP). ***Site map is missing locations of hazardous materials, emergency response equipment, locations of storm drains, and emergency assembly area.*** Within 30 days, electronically submit the Site Map(s) via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. The map must contain north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. [HSC 25505(a)(2), 25508(a)(1)]	Site Map has been updated to include missing information and has been updated to Front Counter website as directed. Map is called: 1555 S. 7th St. Site Map. ✓
B108	M	**HMBP EMERGENCY RESPONSE PLANS AND PROCEDURES MISSING/ INCOMPLETE [1010010]** Facility operator failed to submit and/or maintain accurate and complete emergency response plans and procedures with the facility's Hazardous Materials Business Plan (HMBP). ***Emergency response plan has a blank earthquake vulnerability section.*** Within 30 days, electronically submit an Emergency Response/Contingency Plan via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov. [HSC 25505(a)(3), 25508(a)(1)]	Earthquake section of HMPB has been updated at Front Counter website. ✓
B125	M	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***Facility has not notified their landlord in writing of their compliance with the Hazardous Materials Business Plan. A template letter was provided during the inspection.*** Provide written notification to the property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	Notification letter has been created and submitted to property owner. (See attached copy) Document reviewed and removed. ✓
B130	II	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Operator of facility subject to Hazardous Materials Business Plan (HMBP) requirements failed to document training of employees in safety procedures in the event of a release or threatened release of a hazardous material. ***Facility currently does not log annual emergency response training. A training log template was provided during the inspection.*** Provide initial training for new employees and annual refresher training for all employees in safety procedures in the event of a release or threatened release of a hazardous material, including, but not limited to, the emergency response plans and procedures included in the facility's HMBP . Training must be documented electronically or by hard copy. Training records must be kept available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4),25507.1(a)(3)]	Safety class that included facility emergency response conducted 1/20/2017. Documentation attached. Documents reviewed and removed. ✓

Comments: Facility last submitted their HMBP on 9/15/16 on Front Counter using owner ID OW 0163754.

Facility has the following REPORTABLE materials:
180 gallons of 15w40 motor oil
55 gallons of used antifreeze
110 gallons of used oil
96 gallons of liquid propane

OFFICIAL NOTICE OF INSPECTION

Facility ID: FA0260362
Facility Name: PIEDMONT MOVING SYSTEMS
Site Address: 1555 S 7TH ST A, SAN JOSE, CA 95112

Inspection Date: 01/10/2017

Summary of Violations & Notice to Comply

Facility has the following hazardous materials BELOW REPORTING THRESHOLDS:
misc gear oils and lubes (less than 55 gallons per type)
1x55 gallon container of uncrushed oil filters
1x55 gallon container of oily solids (less than 500 pounds)
1x55 gallons of hazardous waste aerosol containers (less than 55 pounds)
20 gallons of partswashing solution
128 cf of oxygen gas
127 cf of acetylene
gas

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 02/09/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action by HMCD or other agencies. This facility may be subject to reinspection at any time. [Authority: HSC 25185(c), 25187.8, 25404.1.2(c)]

GENERATOR STATUS
0-220 lbs/month

Customer certifies that (i) the above-named materials are properly classified, packaged, marked and labeled, and are in proper condition for transportation according to the applicable regulations of the Department of Transportation (ii) no material change has occurred either in the characteristics of the waste/material or in the process generating the waste/material, and (iii) the above referenced Generator Status is correct. Customer agrees to pay the above charges and to be bound by the terms and conditions (1) set forth in (a) the General Terms and Conditions provided separately to Customer or (b) any SK agreement signed by Customer and SK, and (2) incorporated herein by reference. Unless otherwise indicated in the payment received section, SK is authorized to charge Customer's account for this transaction. If Customer fails to make payment when due, an amount equal to the lesser of (i) 1.5% per month (18% per annum) or (ii) the maximum amount allowed by law, will be added to all unpaid amounts outstanding. Customer certifies that the individual signing this Service Acknowledgement is duly authorized to sign and bind Customer. Customer acknowledges that it is responsible for maintaining its Generator Status and obtaining an EPA ID number if required by applicable law. The following provision is applicable to Safety-Kleen's parts cleaner and paint gun cleaner services: Customer agrees that it will not introduce any substance into the solvent or aqueous cleaning solution, including without limitation any hazardous waste or hazardous waste constituent, except to the extent such introduction is incidental to the normal use of the machine. Customer further agrees that it will not clean parts/paint guns that have been contaminated with or otherwise introduce polychlorinated biphenyls (PCB's), herbicides, pesticides, dioxins or listed hazardous waste into the solvent or aqueous cleaning solution. Safety-Kleen has the capacity and is permitted to accept, store, and/or reclaim the spent parts washer solvent; paint thinners, solvents and paints generated by customer; or dry cleaning filter cartridges, powder, and still residues containing perchloroethylene, petroleum naphtha, or trifluorotrichloroethane dry cleaning solvents. Customer agrees that it is responsible for properly classifying its waste streams as Used Oil or Nonhazardous Waste in accordance with the provision of 40 CFR 262.11 and applicable state laws. Customer agrees that it will not introduce any non-conforming substance into the SK Property.

In the event of the introduction of such non-conforming hazardous waste, Customer agrees that it will be responsible for all costs and remediation expenses related to or arising from the proper management and disposal of the non-conforming waste, including the cost of equipment decontamination and subsequent disposal. Final invoicing will be based on the actual services provided, which may include additional charges for off specification waste and surcharges. Final invoice amount may be more than the amount listed on the printed receipt. If any legal action is commenced because of an alleged dispute, breach, default or misrepresentation, the Customer also agrees that the prevailing party will be entitled to recover reasonable attorney's fees and costs associated with the non-conforming contamination event. Safety-Kleen's failure to screen Customer's material or take a retain sample, in no way constitutes a waiver of Customer's obligation to properly classify its materials. Safety-Kleen relies on Customer's representations and Customer is responsible for informing Safety-Kleen of any process changes that may alter the characteristics of the materials provided. IN THE EVENT OF AN EMERGENCY CALL **24-HR NUMBER** 1-800-468-1760 (Safety-Kleen)
I have established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree to be economically practicable.

Tina Viglizzo
Barry Swenson / Piedmont Partners
777 N. 1st. St. 5th Floor
San Jose, CA 95112

Re: Hazardous Materials Business Plan Notification

Dear Ms. Viglizzo:

State law (California Health and Safety Code, Division 20, Chapter 6.95, Article 1) requires that the owner/operator of any facility which must establish and implement a Hazardous Materials Business Plan (HMBP), and is located on leased or rented real property, must provide the owner of the property with written notification that the facility is subject to and in compliance with HMBP requirements (i.e. HSC §25501.1).

Please note that a HMBP has been prepared for the following facility:

Piedmont Moving Systems
1555 S. 7th St. Bldg. A
San Jose, CA 95112

If you would like a copy of the HMBP, one will be provided to you within five working days after receipt of your request. A copy of this notification letter will be kept at our facility.

If you have questions, please contact the undersigned.

Sincerely,

Mark Beltramo
President

Subject: RE: Notice of Inspection for Piedmont Moving Systems

Mr. Beltramo,
Below are items that require follow-up:

1. The report requests disposal receipts for antifreeze and for aerosols. These do not appear on disposal documents included. Please provide more information.
   A pick-up for aerosols and solids was completed by Safety Kleen on 2.9.17. The activity receipt is attached.
   Concerning the anti-freeze: we do not have any on-site that is available for pick-up (our drum is empty) and Safety-Kleen will not issue a receipt unless they actually pick something up. We cannot locate any relevant receipts for previous pick-ups. Going forward, we will continue to collect any available used anti-freeze and will maintain the appropriate receipts on-site.
2. Please indicate in FrontCounter that your antifreeze is a waste. (This can be done next year at your annual re-certification, or this year if you have the time). Otherwise, your submittals look sufficient and have been approved.
   I have attempted to update the website as suggested, but continually find the Front Counter website very difficult to manage. I was not successful in making the change as suggested. Please make this change for us or call me or provide to me the specific instructions for managing and updating the website.

Once you are able to respond to the first item, I will be able to finish filing the paperwork. All of the other violations will be closed immediately. Thank you.

Subject: Notice of Inspection for Piedmont Moving Systems

Robin,
Attached you will find the completed Notice of Inspection. Please review and let me know if I need to update or correct in some way.
Please confirm that you received this note.
Thank you for your help.

Summary of Violations & Notice to Comply

Program: SRZEKXNVI - ANCILLARY WASTE ACTIVITIES - 2242
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***Metal-containg electronic wiring and other metal-containing small components were observed in the 1 gallon trash bin located in the corner of the facility's retail floor. Metals that are regulated as hazardous waste by RCRA (e.g. chromium, silver, lead, cadmium) must be managed as hazardous waste or recycled for their scrap metal value.*** ***A hazardous waste determination must be conducted on scrap wiring and other solid metal components prior to disposal. If determined to contain RCRA-regulated metals in hazardous waste concentrations, the scrap metal components must be collected, managed, and disposed of as hazardous waste or recycled for their scrap metal value. Provide documentation of the hazardous waste determination to HMCD for review.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf . Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	
G999	M	**OTHER HAZARDOUS WASTE VIOLATION** See inspector's comments below for details. ***Facility failed to demonstrate that the facility is a "Conditionally Exempt Small Quantity Universal Waste Generator" (CESQUWG), as defined by 22CCR 67283.9, and is not subject to all applicable universal waste handling requirements.*** ***----*** ***The facility accepts universal waste-electronic devices, universal waste-cathode ray tubes, and other mercury-containing wastes from the general public and from businesses, but records demonstrating the amount of universal waste generated per month were not available for review. For general public universal waste drop-offs, the facility does not record the quantity or type of universal waste collected unless the person relinquishes "greater than five televisions or computer monitors." If greater than five televisions or computer monitors are dropped off, the facility stated that they record the name of the person and their phone number. However, the records were also not available for review at the time of inspection.*** ***While less than 100kg of RCRA-regulated hazardous waste and RCRA-regulated universal waste was observed on-site during inspection, it was unable to be determined how much RCRA-regulated universal waste the facility generates each month and if the facility meets the exemption requirements of a CESQUWG.***	

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified **Inspection Date:** 03/07/2017
Facility Name: EXCESS SOLUTIONS
Site Address: 1555 S 7TH ST 4D, SAN JOSE, CA 95112

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
		---- ***Provide documentation demonstrating the quantity of RCRA-regulated hazardous and universal waste generated per month, including but not limited to mercury-containing wastes, cathode ray tube wastes, and waste batteries or begin managing all universal waste streams in accordance with all applicable universal waste handling requirements [22CCR 67283.8(b)].***	

Comments: UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: Mr. Giordano stated that all universal waste-electronic devices and universal waste-cathode ray tubes are taken to different facilities for "recycling" along with the facility's scrap metal, but no documentation pertaining to or a means to verify how the universal waste is being "recycled" or disposed of was available for review during inspection. Mr. Giordano stated that only his secretary has access to the recycling records and it will take her a week to compile them. WITHIN 7 BUSINESS DAYS, PROVIDE RECORDS OR DOCUMENTATION PERTAINING TO THE DISPOSAL/RECYCLING OF ALL UNIVERSAL WASTE STREAMS FROM THE PAST YEAR FOR HMCD TO REVIEW [22CCR 67283.8(a)(1-2), 22CCR 66261.2(g)].

While on-site to conduct a routine hazardous materials inspection, it was observed that the facility accepts universal waste-electronic devices or "e-waste" from the public and is therefore is a "universal waste handler" [22CCR 66273.9]. The facility's primary business activities include buying and selling excess or discarded items from businesses, then re-selling the items to the general public or other businesses. Items are sold at the store location (on-site) or through a variety of online stores operated by the facility. Mr. Giordano stated that the facility specializes in electronics and small metal parts, but items such as appliances, desks, chairs, lights, watches, vacuum pumps, and a variety of other product categories were also observed during inspection.

All machine equipment and other products that may contain hazardous materials or hazardous waste residues are said to be emptied and fully decontaminated by the former owner prior to their acceptance at Excess Solutions. Mr. Giordano stated that no equipment maintenance or repair activities are conducted in any form and all products are either sold in the condition in which they were recovered or managed as waste. Per Mr. Giordano the facility does not routinely accept or sell aqueous products, but it is of note that Instapak Part A and Part B was observed on-site at the time of inspection. However, the Instapak is for sale with its corresponding equipment and not for store use. A pallet of 5 gallon containers of floor primer was also observed.

Hazardous wastes routinely generated are confined to universal waste streams, including waste electronic devices, mercury containing wastes, waste cathode ray tubes, and waste batteries.
- One approximately four feet by three feet metal bin for "e-waste" or waste electronic device collection from the public was observed at the front entrance.
- One approximately 400 pound Gaylord box of waste electronic devices commingled with items that would be defined as "scrap metal" (e.g. metal wiring) was observed in the back of the facility near the trash dumpster.
- One pallet of printers and one waste cathode ray tube-television was observed next to the pallet of printers in the back of the facility.
- Two 8 foot waste fluorescent lamps were observed in the cardboard storage area on the second floor of the facility.

- Mr. Giordano stated that the facility does not conduct any electronic waste dismantling, assembly, or other forms of "processing" (i.e. no "e-waste" treatment activities) and all waste electronics are taken to a facility for "recycling." Upon inquiry as to the names recycling facilities the facility waste-electronic devices and waste cathode ray tube devices, Mr. Giordano stated that he does not remember the facility names and it depends on which recycling facility is providing the best price.
- All batteries are said to be removed from battery containing equipment prior to recycling/disposing of the equipment. The waste batteries are said to be collected for "recycling." No waste batteries were observed on-site at the time of inspection.
- Mercury containing wastes are stated to be transferred to the separate business that operates within the same warehouse, Arc-Lite, for "recycling" or to another business for "recycling." It is of note that a significant quantity of waste lamps were observed on-site at the time of inspection, but were stated to belong to Arc-List.
- This inspection was conducted on 3/6/2017 and the inspection report issued on 3/7/2017.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action HMCD or other agencies. This facility may be subject to reinspection at any time. Summary of Violations & Notice to Comply

Program: SRM7MOUPM - HAZARDOUS MATERIALS BUSINESS PLAN - BP01
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
B100	**II**	**HMBP NOT SUBMITTED [1010002]** Facility operator failed to complete and submit a Hazardous Materials Business Plan (HMBP) when storing or handling hazardous materials at or above HMBP reporting thresholds. ***The facility handles hazardous materials/wastes in quantities at and above HMBP-reportable thresholds, but has not completed or submitted a Hazardous Materials Business Plan (HMBP). The hazardous materials/wastes observed in HMBP-reportable quantities during the inspection are outlined in the Comments section of this report.*** Within 30 days, electronically submit a HMBP through either the Santa Clara County CUPA electronic reporting portal (http://FrontCounter.sccgov.org) or the California Environmental Reporting System (http://cers.calepa.ca.gov). Be sure to submit all of the elements that comprise a complete HMBP (i.e., Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans). See www.sccgov.org/sites/hazmat/programs/Pages/ereporting.aspx for more details on electronic reporting. [HSC 25404(e), 25501(s), 25505(a), 25508(a)(1), 25508(b)]	
B125	**M**	**HMBP FACILITY PROPERTY OWNER NOTIFICATION [1010011]** Operator of a facility located on leased or rented real property failed to notify the property owner in writing that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. ***The facility has not provided written notification to the property owner that the facility is subject to HMBP reporting requirements.*** Comply with all other HMBP violations noted in this inspection report and then provide written notification of compliance to your property owner. Submit a copy of the notification to HMCD and keep a copy for your records. A sample notification letter (Form UN-053) is available at www.EHinfo.org/hazmat. [HSC 25505.1]	
B130	**II**	**HMBP EMERGENCY RESPONSE TRAINING DOCUMENTATION [1020002]** Facility operator failed to provide initial and annual training to all employees in emergency response and safety procedures or failed to document and maintain training records for a minimum of three years. ***Employees have not been provided with any training related to emergency response and safety procedures in the event of a release or threatened release of a hazardous material/waste.*** Provide initial training for new employees and annual refresher training for all employees. The training shall cover emergency and safety procedures in the event of a release or threatened release of a hazardous material, as described in the facility's Hazardous Materials Business Plan. Training must be documented electronically or by hard copy. Make training records available for inspection by HMCD for a minimum of three years. [HSC 25505(a)(4), 25507.1(a)(3)]	

Comments: On-site to conduct a routine hazardous materials business plan (HMBP) inspection. The following hazardous materials/wastes were observed at or above HMBP-reportable thresholds:

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: EXCESS SOLUTIONS
Site Address: 1555 S 7TH ST 4D, SAN JOSE, CA 95112
Inspection Date: 03/07/2017

Summary of Violations & Notice to Comply

1) 3 x 8 gallon Liquified Petroleum Gas (Propane) cylinders: 24 gallons total*
2) 3 x 30 pound net weight (105 cubic feet) Freon 134A cylinders: 315 cubic feet total
3) 1 x Gaylord cardboard box and one 4 feet by 3 feet bin of Universal Waste - Electronic Devices: approximately 600 pounds total
****Compressed gases are counted in cubic feet for the purpose of quantity determination, but shall be reported in the physical state in which they are stored (e.g. liquid = gallons)[HSC 25507(a)(1)(B)].***

It is of note that one 55 gallon drum of Instapak Part A, one 55 gallon drum of Instapak Part B, approximately 30 gallons of floor primer, approximately 100 cubic feet of carbon dioxide compressed gas, and approximately 30 cubic feet of medical grade oxygen compressed gas were observed during inspection, but are exempted under the retail HMBP exclusion pursuant to HSC 25507(b(5). Furthermore, approximately 25 gallons of battery-electrolyte was observed during inspection, but in quantities below HMBP-reportable thresholds.

- This inspection was conducted on 3/6/2017 and the inspection report issued on 3/7/2017.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Received By: Michael Giordano
President/CEO

Inspected By: EE0010420 - MOLLY PRITZ
CA UST Inspector #8406296, Exp. 12/13/2017

Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]
DTSC	California Department of Toxic Substances Control
EPA	U.S. Environmental Protection Agency
HMCD	County of Santa Clara, Department of Environmental Health, Hazardous Materials Compliance Division
HSC	California Health and Safety Code
RCRA	Resource Conservation and Recovery Act
SCCO	Santa Clara County Ordinance Code
TSDF	Hazardous waste treatment, storage or disposal facility
UPCF	Unified Program Consolidated Form
UST	Underground storage tank
VC	HMCD violation code

Warning:

- It is a violation of State law to make a false statement that a facility has returned to compliance [HSC §25404.1.2(c)(2)].
- Making a false statement regarding a hazardous waste violation is punishable by a fine of not less than $2,000 or more than $25,000 and/or imprisonment in the county jail for up to one year [HSC §25191(b)].
- Making a false statement regarding an underground storage tank violation is punishable by a fine of not less than $500 or more than $5,000 [HSC §§25299(a)(8), 25299(b)(7)].
- HMCD has the right to require the submittal of reasonable and necessary documentation in support of any claim of compliance made by your facility [HSC §25187.8(i)].

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
		---- ***Provide documentation demonstrating the quantity of RCRA-regulated hazardous and universal waste generated per month, including but not limited to mercury-containing wastes, cathode ray tube wastes, and waste batteries or begin managing all universal waste streams in accordance with all applicable universal waste handling requirements [22CCR 67283.8(b)].***	

Comments: UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: Mr. Giordano stated that all universal waste-electronic devices and universal waste-cathode ray tubes are taken to different facilities for "recycling" along with the facility's scrap metal, but no documentation pertaining to or a means to verify how the universal waste is being "recycled" or disposed of was available for review during inspection. Mr. Giordano stated that only his secretary has access to the recycling records and it will take her a week to compile them. WITHIN 7 BUSINESS DAYS, PROVIDE RECORDS OR DOCUMENTATION PERTAINING TO THE DISPOSAL/RECYCLING OF ALL UNIVERSAL WASTE STREAMS FROM THE PAST YEAR FOR HMCD TO REVIEW [22CCR 67283.8(a)(1-2), 22CCR 66261.2(g)].

While on-site to conduct a routine hazardous materials inspection, it was observed that the facility accepts universal waste-electronic devices or "e-waste" from the public and is therefore is a "universal waste handler" [22CCR 66273.9]. The facility's primary business activities include buying and selling excess or discarded items from businesses, then re-selling the items to the general public or other businesses. Items are sold at the store location (on-site) or through a variety of online stores operated by the facility. Mr. Giordano stated that the facility specializes in electronics and small metal parts, but items such as appliances, desks, chairs, lights, watches, vacuum pumps, and a variety of other product categories were also observed during inspection.

All machine equipment and other products that may contain hazardous materials or hazardous waste residues are said to be emptied and fully decontaminated by the former owner prior to their acceptance at Excess Solutions. Mr. Giordano stated that no equipment maintenance or repair activities are conducted in any form and all products are either sold in the condition in which they were recovered or managed as waste. Per Mr. Giordano the facility does not routinely accept or sell aqueous products, but it is of note that Instapak Part A and Part B was observed on-site at the time of inspection. However, the Instapak is for sale with its corresponding equipment and not for store use. A pallet of 5 gallon containers of floor primer was also observed.

Hazardous wastes routinely generated are confined to universal waste streams, including waste electronic devices, mercury containing wastes, waste cathode ray tubes, and waste batteries.
- One approximately four feet by three feet metal bin for "e-waste" or waste electronic device collection from the public was observed at the front entrance.
- One approximately 400 pound Gaylord box of waste electronic devices commingled with items that would be defined as "scrap metal" (e.g. metal wiring) was observed in the back of the facility near the trash dumpster.
- One pallet of printers and one waste cathode ray tube-television was observed next to the pallet of printers in the back of the facility.
- Two 8 foot waste fluorescent lamps were observed in the cardboard storage area on the second floor of the facility.

- Mr. Giordano stated that the facility does not conduct any electronic waste dismantling, assembly, or other forms of "processing" (i.e. no "e-waste" treatment activities) and all waste electronics are taken to a facility for "recycling." Upon inquiry as to the names recycling facilities the facility waste-electronic devices and waste cathode ray tube devices, Mr. Giordano stated that he does not remember the facility names and it depends on which recycling facility is providing the best price.
- All batteries are said to be removed from battery containing equipment prior to recycling/disposing of the equipment. The waste batteries are said to be collected for "recycling." No waste batteries were observed on-site at the time of inspection.
- Mercury containing wastes are stated to be transferred to the separate business that operates within the same warehouse, Arc-Lite, for "recycling" or to another business for "recycling." It is of note that a significant quantity of waste lamps were observed on-site at the time of inspection, but were stated to belong to Arc-List.
- This inspection was conducted on 3/6/2017 and the inspection report issued on 3/7/2017.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 04/06/2017, unless otherwise noted by the inspector.

Using the space provided, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed. Within 5 days of achieving compliance or within 35 days of the inspection date, whichever comes first, sign the certification statement below and return a copy of this report to HMCD. Time granted for correction of violations does not preclude any enforcement action HMCD or other agencies. This facility may be subject to reinspection at any time. Certification of Compliance

I certify under penalty of perjury that this facility has complied with directives specified in this Notice to Comply.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Key to Acronyms and Regulatory Terms

XX CCR	California Code of Regulations, Title XX
XX CFR	Code of Federal Regulations, Title XX
Class	Violation classification: I = Class I violation, II = Class II violation, M = Minor violation, C = Corrected minor violation [HSC §25110.8.5, HSC §25117.6, CCR §66260.10]

Comments: On-site for a hazardous materials business plan permit investigation. At this time, facility requires a hazardous materials business plan.

Facility has the following reportable hazardous materials:
1x55 gallons of new acetone
2x85 + 15 gallons of used oil

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: Skunkworks
Site Address: 210 E Alma AV, SAN JOSE, CA 95112

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

1x200 gallons of used antifreeze

Facility has the following hazardous materials below reporting thresholds:
less than 500 pounds of solid paint waste
30 gallons of paint waste liquids
5 gallon bucket of used oil filters
10 gallon container of oily solids
less than 1000 cf of argon/carbon dioxide gas
less than 100 cf of acetylene
120 cf of oxygen gas
20 gallons of parts washing solution

NOTES:
Facility owner plans to downsize the containers used on-site so he will no longer be subject to this permit. If facility does this in the future, notify HMCD of any changes so that permit status can be re-evaluated.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/06/2017, unless otherwise noted by the inspector.

Signature of Owner/Operator **Date**

Printed Name of Owner/Operator **Title**

OFFICIAL NOTICE OF INSPECTION - SUPPLEMENTAL INFORMATION

This Official Notice of Inspection (NOI) documents the results of an inspection by HMCD, including a list of alleged violations, evidence in support of the alleged violations, corrective actions that must be taken by the facility, and general observations.

What am I supposed to do upon receiving a NOI?

- Correct the violations within 30 days of the inspection date, unless otherwise noted.
- In the "Corrective Actions Taken" column, write a brief description of the actions taken by the facility to correct each violation. Attach additional pages if more space is needed.
- Certify that the facility has returned to compliance by signing and dating the certification statement at the end of the report.
- Make a photocopy of the NOI and any attachments for your records.
- Within 5 days of achieving compliance or 35 days of the inspection date, whichever comes first, return the original copy of the report and any attachments to HMCD at 1555 Berger Drive, Suite 300, San Jose, CA 95112-2716.

What if there are violations that cannot be corrected within 30 days?

For each violation that cannot be corrected within 30 days, submit a written Compliance Plan describing the corrective actions you propose to take and the date by which the actions will be completed. State law grants up to 30 days to correct minor violations without penalty. Minor violations that are uncorrected after 30 days, and class I and II violations may be subject to enforcement action. To lessen the possibility of enforcement action, correct all violations as soon as possible.

What if I disagree with a violation on the NOI?

If you disagree with any violation listed in this NOI, you must submit a written Notice of Disagreement to HMCD within 30 days of the inspection date. Address such notices to the attention of the inspector who cited the violation. In your Notice of Disagreement, explain in detail why you believe the alleged violation was incorrectly cited.

What about photographs or samples taken during the inspection?

A co-located sample will be given to you upon request if adequate sample volume is available. Photographs and sample analytical results will not generally be available until after the inspection has been concluded. A copy of photographs and/or analytical results will be provided to you upon written request. Photographs and sample analytical results may be withheld in the event of a criminal investigation or other ongoing investigation.

Hazardous Waste Inventory Information:

The annual permit fee is determined by the total quantity of hazardous waste generated per year. Complete the table below for all hazardous waste inventory *(e.g., used oil, used parts cleaning solvent, waste paint, spent fixer, etc.).*

Name of Hazardous Waste	Treatment/Disposal Method(s) *(Definitions provided on back of form.)*	Annual Quantity Generated*
used oil	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	48 ☒ gal. ☐ lbs.
used anti freeze	☐ Recycled on-site. ☐ Treated on-site. ☒ Shipped off-site for recycling/treatment/disposal.	20 ☒ gal. ☐ lbs.
waste paint-	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	45 ☒ gal. ☐ lbs.
paint solids	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	825 ☒ gal. ☐ lbs. → estimated to be 330 lbs
paint booth filters	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.
oily solids	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	unknown, will be determined upon next inspection ☐ gal. ☐ lbs.
	☐ Recycled on-site. ☐ Treated on-site. ☐ Shipped off-site for recycling/treatment/disposal.	☐ gal. ☐ lbs.

* *Solids must be reported in pounds. Liquids may be reported in either pounds or gallons.*

The undersigned hereby applies for a Hazardous Waste Generator Permit from the County of Santa Clara. I hereby certify that the submitted information is true, accurate, and complete. I understand that a new application will be required if this facility changes ownership, moves, or begins generating hazardous wastes which are not listed on this application.

Signature of Owner/Operator: _____ Title: Owner Date: 4/6/17

Definitions of Treatment/Disposal Methods

Recycled on-site: The facility takes the waste or any constituent of the waste, treated or not, and reuses it on-site or ships it off-site as an Excluded Recyclable Material.

Treated on-site: The facility employs any method, technique, or process which changes or is designed to change the physical, chemical, or biological character or composition of the hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose including, but not limited to, energy recovery, material recovery, or reduction in volume *(e.g., pH adjustment, evaporation, precipitation, filtration, distillation, compacting, etc.)*. If, after treatment, the material is reused at the facility, the "Recycled on-site" box in the waste inventory table should be checked.

Shipped off-site for recycling/treatment/disposal: The facility sends the waste, or any hazardous treatment residual, to an off-site permitted treatment, storage, or disposal facility (TSDF).

Note: Depending on how a waste or its constituents are recycled and/or treated, more than one treatment/disposal category may apply. All applicable boxes in column 2 of the waste inventory table should be checked.
Note to medical facilities: Do not list medical (i.e., red bag) wastes on this form.

Summary of Violations & Notice to Comply

Program: SRFFKRSIL - HAZARDOUS WASTE GENERATOR - 2205
Inspection Type: ROUTINE INSPECTION

VC	Class	Violation	Corrective Actions Taken
G003	M	**HAZARDOUS WASTE GENERATOR PERMIT [3015]]** Facility failed to obtain, or keep valid through payment of fees, a Hazardous Waste Generator Permit from HMCD. ***Facility does not currently have a permit to generate hazardous waste. A permit application was completed at the time of inspection.*** Submit, via the California Environmental Reporting System (CERS- available at http://cers.calepa.ca.gov), your business information and activities. Indicate "YES" to activities question asking if you generate hazardous waste. Pay the annual permit fee, if required, upon receipt of an invoice. [SCCO B11-422]	✓
G010	II	**HAZARDOUS WASTE DETERMINATION [3030005]** Facility failed to determine whether a waste is a hazardous waste. ***In the past, paint booth filters have been managed as non-hazardous. Paint booth filters may contain regulated metals and may be hazardous waste. Make a determination on how paint booth filters will be managed in the future.*** Determine whether the waste is hazardous using generator knowledge, or by having the waste analyzed by a state-certified environmental laboratory. Submit the results of your determination, including any laboratory reports, to HMCD. A list of state-certified laboratories is available at www.waterboards.ca.gov/drinking_water/certlic/labs/documents/elap_certified_hazardous_waste_labs.pdf. Cease any disposal of the waste as non-hazardous waste until the determination is complete. Keep all hazardous waste determination documents for at least 3 years from the date the waste was last shipped. [CCR 66262.11]	Paint booth filters will be managed as hazardous waste we plan to use the CESQG program for disposal ✓
G011	II	**ILLEGAL DISPOSAL OF HAZARDOUS WASTE [3050002]** Facility disposed of hazardous waste at an unpermitted facility or at an unauthorized location, such as the sewer, storm drain, trash can, trash dumpster, or ground. ***Facility has been disposing of soiled absorbent and oily rags to trash, and both soiled materials were observed in dumpsters during the inspection. Begin collecting these materials as hazardous waste oily solids. Ms. Thompson was advised that rags may be commercially laundered by a facility with a proper permit to do so, or they may be managed as hazardous waste.*** Immediately cease illegal disposal activities. Make arrangements for the proper disposal of all hazardous waste. [HSC 25189.5(a), 25501(a)]	Oily Solids will be stored in a designated container and treated as hazardous waste we plan to use the CESQG program for disposal ✓

OFFICIAL NOTICE OF INSPECTION

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

VC	Class	Violation	Corrective Actions Taken
G201	II	**ACCUMULATION TIME: CESQG [3030009]** Facility failed to dispose of hazardous waste within a 180/270 day (or 90 day for acutely hazardous wastes) period after the first 100-kilogram threshold amount was accumulated. ***Facility has been accumulating 40 gallons of antifreeze for over 2 years.*** Make arrangements for the immediate removal of the waste. Submit to HMCD a copy of the manifest(s) or consolidated manifest receipt(s) demonstrating that the waste has been removed. Ensure that hazardous wastes are not accumulated on-site for longer than 180 days (or 90 days for acutely hazardous wastes) after the first 100 kg of waste are accumulated [HSC 25123.3(c), CCR 66262.34(b)(1)]	We will be arranging Pick-ups likely every 6 months no greater than 12 months ✓

Comments: Inspection commenced on 3/30/17 with Denina Thompson and Jim Cartelli for the hazardous materials business plan permit investigation and hazardous waste permit investigation was conducted on 4/6/17 after more information could be gathered from the owner, Tony Cartelli. Facility has been operating at this address and began working on cars about 2 years ago. Nearly eight months ago, facility added a paint booth and began painting vehicles. Facility naturally has a low volume of hazardous waste since a restoration project for a single vehicle can take a long time and Ms. Thompson explained that facility currently restores fewer than 50 cars in a year. Facility requires a hazardous waste permit. Facility generates used oil, used antifreeze, used oil filters, oily solids, paint booth filters, paint waste solids, and liquid paint waste. Facility also occasionally generates sandblasting media waste and spent battery cores (receipts reviewed). In the past, paint booth filters have been managed as non-hazardous by Corrick. Parts washer is topped-off as needed. Containers of waste are inspected weekly and employees are trained in hazardous waste management. Fire extinguishers were recently purchased, spill kit and emergency aisle space are adequate, eyewash is maintained, and EPA ID number CAL000418621 is currently active.

Facility had the following wastes at the time of inspection:
30 gallons of used oil
40 gallons of used antifreeze
5 gallons of oil filters
oily solids
30 gallons of paint waste
55 gallon drum of solid paint waste

Generator status:
Facility generated 55 gallons of used oil from start of operations to August of 2016. In the past 8 months, facility has generated 30 gallons of used oil. In two years of operation, facility has generated roughly 40 gallons of used antifreeze. In 8 months of painting, facility has generated 1x55 gallon drum of paint solids and less than 30 gallons of paint waste liquids. Total average waste per month: 10 gallons per month of liquids, excluding solid paint waste and oily solids.

The following violations were corrected at the time of inspection:
G020 Marking of hazardous waste: Observed 15 gallon mobile oil container with no hazardous waste label. Observed 55 gallon solid paint waste drum with a label for Excluded recyclable materials. Observed 30 gallon paint waste liquids drum with no hazardous waste label. All three labels were corrected at the time of inspection and Excluded recyclable materials label was replaced with a proper hazardous waste label.
G211 Emergency Information Posted (SQG): Emergency information was not posted at the time of inspection. A complete emergency posting was created at the time of inspection.
G412 Container marking (used oil/fuel filters): 1x5 gallon container of used oil filters had no accumulation start date. Accumulation start date was added at the time of inspection.
G413 Container requirements (used oil/fuel filters): Observed one used oil filter out of containment. Filter was placed in the appropriate container during the inspection.

NOTES:
1.) Facility was advised to accumulate waste in smaller containers to avoid violating accumulation times in the future. Facility was also given information on county hazardous waste disposal services available to small businesses (CESQG) in the county.
2.) Facility has not generated the following wastes yet, but was advised that they could be hazardous wastes when

OFFICIAL NOTICE OF INSPECTION

Facility ID: Not Specified
Facility Name: Skunkworks
Site Address: 210 E Alma AV, SAN JOSE, CA 95112

Inspection Date: 04/06/2017

Summary of Violations & Notice to Comply

generated: sand blast media, filter sludge for the parts washer.

Immediately correct any violation designated as a Class I or Class II violation. Correct all other violations no later than 05/06/2017, unless otherwise noted by the inspector.
