Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-20-2016
Violations Found:	Yes

C&H AUTO (Continued) **S101309408**

Eval Type:	Routine done by local agency
Eval Notes:	Facility does auto repair and no auto body work. Facility generates used oil, used antifreeze, metal oil liters, and oily solids. Rags are commercially laundered, batteries are exchanged for their cores when purchased, and receipts for these were reviewed. Did not observe any aerosol cans in trash. Facility has 2 parts washers, 1 of which is serviced by SafetyKleen and the other is topped off as needed. Inspection included walk-through included inspection of work areas, trashcans, waste storage containers, and review of all available manifest for 2013- present. Fire extinguishers are annually serviced, spill kit/ aisle space is adequate, emergency post is up to date, and EPA ID number CAL 000294177 is currently active. Hazardous waste containers are inspected weekly. 1x55 gallon used antifreeze container was empty at the time of inspection. The following violations were corrected at the time of inspection: G023 Container open: All containers were open at the time of [Truncated]

SAN JOSE HAZMAT:

Name:	3M UNITED AUTO PARTS
Address:	1726 SMITH AV A
City,State,Zip:	SAN JOSE, CA 95112
Region:	SAN JOSE
File Num:	400342
Class:	Auto Wrecking/Misc Simple Facility

WDS:

Name:	3M AUTO DISMANTLERS

THREE M AUTO WRECKERS (Continued) **S102423421**

Address:	1726 Smith Ave
City:	SAN JOSE
Facility ID:	San Francisco Bay 43I015351
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	4089988661
Facility Contact:	TRUC VUU
Agency Name:	TRUC VUU
Agency Address:	1726 Smith Ave
Agency City,St,Zip:	San Jose 951124122

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site ID: 618
Site Name: 3M UNITED AUTO PARTS
Violation Date: 08-27-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 09/19/2018. Facility owner Truc Vu stated

3M UNITED AUTO PARTS (Continued) **S113106359**

that on occasion airbags that are not under recall are deployed in order for it to be sent to the recycler. Airbag inflators often meet hazardous waste criteria due to nitrates (D001 oxidizers) and due to its reactivity (D003) and deployment of these airbags are considered treatment.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 618
Site Name: 3M UNITED AUTO PARTS
Violation Date: 08-27-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 09/19/2018. In order to relocate full used oil drums to a location where a truck can access them to vacuum out the fluids, seat belts have been tied through the bung holes and used as a harness that a forklift can utilize to lift them out of their secondary containment metal trough. Lifting these open drums in this manner presents a potential for serious damage or release of oil. Determine a different manner to relocate drums to an accessible point.

with a rust-colored solidified material also in the back. Determine whether this is a hazardous waste, and if so, dispose of it immediately.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 132123
Site Name: MAC PEREZ & SON STREET RODS
Violation Date: 08-27-2019
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Facility does not have a hazardous waste ID.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 132123
Site Name: MAC PEREZ & SON STREET RODS
Violation Date: 08-02-2018
Citation: Un-Specified
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General Local Ordinance
Violation Notes: Business generates hazardous waste and is currently operating without a valid Hazardous Waste Generator permit from our office due to unpaid permit fees in the amount of $1,343.50. Upon receipt of payment of permit fees, the permit will be issued and mailed to the facility mailing address.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 06-12-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site with Ethan McDermott, Hazardous Materials Technician, to perform a permit investigation as a result of unpaid permit fees. Perez and Son, is an auto body repair shop. The Owner Mac Perez, states that he does not generate hazardous waste anymore. Mr. Perez states that he was originally permitted for unused paint; however, he has downsized his business. Mr. Perez states that he now gives the unused paint product to his customers after the completion of the repair job. At the time of inspection I observed a step can of used towels. Mr. Perez states that he uses the towels to wipe down the cars before he paints and polish the vehicles. Mr. Perez launders the rags himself. Additionally, I observed one cylinder of oxygen at 284 csf. Mr Perez states that he will downsize the cylinder within 30 days. Mr. Perez does not currently have an EPA ID number. Further investigation is needed to determine if a Hazardous Waste Permit is still required.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW

MAC PEREZ & SON STREET RODS (Continued) **S105109382**

Eval General Type: Other/Unknown
Eval Date: 08-02-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site with Xavier Dupree of HMCD to perform a Hazardous Waste Generator permit investigation in response to the owner stating that business operations have decreased. Mac Perez and Son Street Rods does auto body and painting. Consent for a facility walk-through was obtained from Owner, Mac Perez. No hazardous waste containers were observed, however due to the nature of the business, it is determined that a hazardous waste generator permit is needed. Observed various non-empty plastic paint cups with miscellaneous paints and liquids. Observed approx. 3 x 5 gal cans of paint thinner as open, contents unknown. Observed various aerosol cans that may or may not be in use. Observed other paint contaminated materials such as paint sticks and rags. Based on these observations, the business is correctly permitted as a Hazardous Waste Generator, <10 gal/ year. Notes: - No EPA ID number. DTSC Form 1358 was provided and Mr. Perez was given guidance on how to fill it [Truncated]
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-27-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to perform a routine hazardous waste inspection. NOTES: - Facility is a one-man auto restoration shop which rarely does small paint jobs. - Containers are inspected weekly. - Fire extinguishers were serviced 11/29/18. - Absorbent is available. - This shop has an oxygen/acetylene torch, with the oxygen cylinder at 282 cubic feet. Mr. Perez stated that he intends to dispose of this as soon as possible. Please contact HMCD within 30 days to verify that the cylinder is gone, or this facility will be permitted for a Hazardous Materials Business Plan. The following documents were provided today: - UN-051 (Emergency Procedures) - DTSC Form 1358 - A hazardous waste label Per HSC - 25187.8, the following minor violations were corrected during this inspection: G020: MARKING OF HAZARDOUS WASTE Observed 1x 5-gallon can of waste thinner without any hazardous waste markings. A completed hazardous waste label was attached during the inspection. G211: [Truncated]

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 162
. Waste name: Other spent catalyst

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 223

GLENCORE RECYCLING LLC (Continued) **1000366157**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 150.1

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 53082.6

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 43376.1

Waste code: D004

Contact email: JOY.AUSTIN-LANE@GLENCORE.US
EPA Region: 09
Land type: Private
Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 162
. Waste name: Other spent catalyst

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214

GLENCORE RECYCLING LLC (Continued) **1000366157**

. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 272
. Waste name: Polymeric resin waste

. Waste code: 281
. Waste name: Adhesives

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 411
. Waste name: Alum and gypsum sludge

. Waste code: 421
. Waste name: Lime sludge

. Waste code: 431
. Waste name: Phosphate sludge

. Waste code: 441
. Waste name: Sulfur sludge

. Waste code: 491
. Waste name: Unspecified sludge waste

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 571
. Waste name: Fly ash, bottom ash, and retort ash

. Waste code: 581
. Waste name: Gas scrubber waste

. Waste code: 591

GLENCORE RECYCLING LLC (Continued) **1000366157**

. Waste name: Baghouse waste

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 721
. Waste name: Liquids with arsenic > 500 mg/l

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 724
. Waste name: Liquids with lead > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 727
. Waste name: Liquids with selenium > 100 mg/l

. Waste code: 728
. Waste name: Liquids with thallium > 130 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 150.1

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 53082.6

GLENCORE RECYCLING LLC (Continued) **1000366157**

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 43376.1

Waste code: D004

GLENCORE RECYCLING LLC (Continued) **1000366157**

Longitude:	-121.86943
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	2189
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Cyanide
Site History:	Micro Metallics operated as an electronic, scrap metal recycling center. On October 29, 1981, ponded rainwater was pumped from a processing area into an unpaved area. Upon realization that the discharged water contained cyanide, the Regional Water Quality Control Board was notified of the release. Micro Metallics took steps to conceptualize the lateral and vertical extent of the release and remediate contamination. In this process, 230 cubic yards of contaminated soil was removed in February and May of 1982. Monitoring wells were installed and sampled regularly showing a decline in contamination, below maximum contaminant levels. A new occupant is currently at the site, Xstrata, they conduct the same operations as the former Micro Metallics.

Local Agency: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E21A08f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Trichloroethylene (TCE), Diesel
Site History: Phase II investigation submitted that included a soil boring adjacent to what appears to be a fill port for an underground storage tank. Records indicate a gasoline UST was present onsite and was reported to have been taken out of service circa 1988. The UST was to be filled with slurry due to its close proximity to a building. There is no documentation of the UST being properly closed in place. Soil and groundwater samples were reported to have concentrations of Diesel. Groundwater samples were also reported to contain 1,2-Dichloroethane and Trichloroethane.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	1988 In January, 2 soil samples (1A and 1B) were collected from borings advanced at either end of an underground storage tank (UST) at the site. The samples were collected between 7.5 and 8 feet below the ground surface (ft bgs). The samples were composited prior to being analyzed and were reported to contain 6.1 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 0.24 ppm Toluene, and 0.16 ppm Xylenes. These soil samples were collected

PACIFIC SHEET METAL SHOP (Continued) **S101309413**

prior to abandoning the UST in place. It was reported that the UST was removed from service in November 1987 when during a scheduled test a leak occurred. An unknown quantity of fuel was lost and the contents of UST were removed. 1991 In September, an angled boring was advanced to 10.5 feet at an angle of 53 degrees in order to obtain a sample from beneath the abandoned UST. Soils encountered were reported to have a distinct fuel odor. A soil sample (Soil, #1) is estimated to have been collected from 8.5 ft bgs and was reported to contain 550 ppm TPHg, 0.53 ppm Ethylbenzene, and 0.77 ppm Xylenes. 1995 In October, 2 borings (SB-A and SB-B) were advanced onsite to 18.5 and 15.5 ft bgs, respectively. Groundwater was encountered between 11 and 14 ft bgs. 3 soil samples were collected and reported to have maximum concentrations of 320 ppm TPHg, 3.2 ppm Benzene, 2.1 ppm Toluene, 4.9 ppm Ethylbenzene, and 16 ppm Xylenes. Grab groundwater samples were collected from each boring. SB-A was reported to contain 110,000 part per billion (ppb) TPHg, 9,600 ppb Benzene, 1,100 ppb Toluene, 3,500 ppb Ethylbenzene, and 13,000 ppb Xylenes. Sample SB-B collected approximately 42 feet downgradient of the UST was reported to contain very low concentrations of Toluene and Xylenes. TPHg and Benzene were not reported to be present above the laboratory reporting limits. 1997 In July, 3 monitoring wells (MW1 through MW3) were installed to 23 ft bgs onsite. 6 soil samples were collected and reported to contain maximum concentrations of 360 ppm TPHg, 1 ppm Benzene, 0.48 ppm Toluene, 5.1 ppm Ethylbenzene, and 12 ppm Xylenes in the sample collected from MW2 at 15.5 ft bgs. Well MW2 is located downgradient of the UST. Initial samples collected from the monitoring wells reported maximum concentrations of 36,000 ppb TPHg, 3,800 ppb Benzene, 230 ppb Toluene, 1,600 ppb Ethylbenzene, and 3,700 ppb Xylenes. Routine monitoring of the wells began at this time. 1999 In April, 5 hydropunch borings (SB2-A through SB2-E) were advanced to 28-40 ft bgs. Soil samples were collected from boring SB2-A only and reported to contain maximum concentrations of 320 ppm TPHg, 2.1 ppm Benzene, 0.9 ppm Toluene, 7.9 ppm Ethylbenzene and 19 ppm Xylenes. These concentrations decrease with depth to below the laboratory reporting limits for all constituents in the deepest sample collected at 35.5 ft bgs. 13 depth discrete grab groundwater samples were collected from the borings and reported to have maximum concentrations of 88,000 ppb TPHg, 18,000 ppb Benzene, 1,900 ppb Toluene, 3,800 ppb Ethylbenzene, 12,000 ppb Xylenes, and 160 ppb Methyl tert-Butyl Ether (MtBE) in the sample collected at 18 ft bgs in boring SB2-A. In August, 1 monitoring well (MW4) was installed offsite to 20 ft bgs. No soil samples were reported to have been submitted for chemical analysis. 2002 In September and October, 7% hydrogen peroxide solution was added to wells MW1 through MW3 on a weekly basis. Approximately 185 gallons of solution were added during this time. Rebound was observed within 2 quarters in well MW2. 2003 In July and August, hydrogen peroxide solution was added to well MW2 on a weekly basis. Approximately 95 gallons of solution were added. Again, rebound was observed within 2 quarters in well MW2. 2006 In April, 2 wells (MW5 and EW1) were installed to 22-25 ft bgs. 7 soil samples were collected and reported maximum concentrations of 1,600 ppm TPHg, 8 ppm Benzene, 1.9 ppm Toluene, 27 ppm Ethylbenzene, and 42 ppm Xylenes. MtBE was not reported to be present in any of the samples above the laboratory reporting limits. The maximum concentrations were reported for the sample collected in EW1 at 16.5 feet and concentrations decreased in deeper samples. In July, a two-phase extraction (TPE) test was conducted on wells EW1 and MW2.

PACIFIC SHEET METAL SHOP (Continued) **S101309413**

Based on the test, it was recommended to implement dual phase extraction (DPE) with down-well pumps coupled with soil vapor extraction (SVE). 2007 In January, well MW2 was drilled out and re-installed as a 4-inch extraction well MW2A to 30 ft bgs. 2009 In June, a soil vapor survey was conducted.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E16L02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Soil and groundwater beneath the Site have been contaminated by petroleum hydrocarbons from leaking USTs. The November 14, 2008, Regional Water Board Order No. R2-2008-0093 sets cleanup standards for the Site, requires the responsible parties to propose and implement a revised corrective action plan to cleanup the remaining contamination, and requires the responsible parties to comply with the Site monitoring requirements. Several remedial investigations to delineate this contamination have occurred between 1986 and 2006. Twenty groundwater monitoring wells have been installed at the Site. Quarterly groundwater monitoring has been performed since 1999. Soil samples collected during Site investigations contained the following maximum concentrations: 5,900 milligrams per kilogram (mg/kg) Total Petroleum Hydrocarbons as diesel (TPH-d), 4,600 mg/kg Total Petroleum Hydrocarbons as gasoline (TPH-g), 70 mg/kg Methyl-tert butyl ether (MtBE), and 13 mg/kg benzene. Soil samples collected during a Site investigation conducted in January/February 2006 contained the following maximum concentrations: 3,300 mg/kg TPH-g, 1.2 mg/kg benzene, 12 mg/kg MtBE, and 3 mg/kg tertiary butyl alcohol (TBA). Groundwater samples collected during Site investigations contained the following maximum concentrations: 560,000 micrograms per kilogram (a%g/l) TPH-d; 440,000 a%g/l MtBE; 250,000 a%g/l TPH-g; 26,000 a%g/l benzene; 27 a%g/l TBA, and; 5.9 a%g/l tertiary amyl methyl ether. Groundwater samples recently collected at the Site during the first quarter 2008 monitoring event contained the following maximum concentrations: 28,000 a%g/l TBA, 15,000 a%g/l TPH-g, 13,000 a%g/l MtBE, 3,100 a%g/l benzene and 1,200 a%g/l TPH-d. One 12,000-gallon and two 10,000-gallon gasoline USTs and two 10,000-gallon and one 2,000-gallon diesel UST, and associated piping and dispensers were removed and replaced at the Site in September/October 1997. A groundwater extraction and treatment system has operated sporadically at the Site since December 2002. The system consists of four shallow extraction wells with granular activated carbon treatment. A total of 1,165,000 gallons of groundwater were treated as of February 2008. Approximately 40 pounds of gasoline were removed by groundwater extraction. A SVE system was installed at the Site and operated sporadically from May 2006 to December 2007. An internal combustion engine extracted and treated hydrocarbon contaminated vapor from four groundwater monitoring wells and six vapor extraction wells. However, to date, corrective efforts have not resulted in reducing the residual contamination to acceptable levels. Accurate hydrocarbon mass removal estimation is not possible due to incomplete record

PETE'S STOP (Continued) **S101304132**

keeping. Soil and groundwater remediation has not been completed at the Site. Additional soil and groundwater remediation is needed to meet cleanup standards. Regional Water Board Order No. R2-2009-0054 rescinds Site Cleanup Requirements Order No.R2-2008-0093. The case was transferred to the Santa Clara County Department of Environmental Health since the Dischargers were complying with Regional Water Board requirements. In September 2010, a SVE with air sparge system began operations onsite. SVE was shut down in July 2012 and the air sparge system was shut down in September 2012. Following completion of verification groundwater monitoring, the site was found to meet the LTCP.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	CNWTRS
Waste Type2:	Not reported
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	De-Certification
Completed Date:	05/21/2002
Comments:	DTSC conducted a Preliminary Assessment under the PA/SI Grant which found the above described contamination. The site was de-certified based on the results of this assessment.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Certification
Completed Date:	12/01/1984
Comments:	Our records do not indicate the actual date this site was certified. Our records show 12/1984. We have used the date 12/01/1984 because this gives us the earliest statute of limitations.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	05/21/2002
Comments:	DTSC conducted a Preliminary Assessment under the PA/SI Grant which found the above described contamination. Between September 1998 and May 2000, soil and groundwater samples were tested for plating shop related compounds. Also, the soil was tested to determine the disposal profile from regrading and placement of concrete pavement across the site. April 2000 soil sampling results showed chromium (250 thru 320 ppm. April 1999 groundwater sampling results showed

SPARTAN PLATING (Continued) **S111216954**

Chromium (0.84 thru 14 ppm), lead (0.051 thru 5.4 ppm), and nickel (0.46 thru 25 ppm). The 1998 and 1999 soil and groundwater sampling also detected Tetrachloroethene (PCE). The concentration of PCE in soil ranged from 13 to 190 ppm. The concentration of PCE in groundwater ranged from 2.7 to 200 ppb. The site was de-certified based on the results of this assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 07/17/2007
Comments: No Further Action letter was issued. Sump was removed in 2000 followed by a soil removal. Sampling data indicates contaminant concentrations below screening levels.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address:	245 LEO AV
City,State,Zip:	SAN JOSE, CA 95112
Site ID:	10500
CERS ID:	10350292
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description:	Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes:	Returned to compliance on 11/13/2018. Used oil and antifreeze drums are obstructed by items on the floor and accumulated on the sides of the storage locations by items such as suspension components (shocks/struts).

SCHERMAN PROPERTY (Continued) **S101303957**

Violation Program:	HW
Violation Source:	CERS
Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 11/13/2018. As evident by number and type of violations, personnel are not sufficiently trained on managing hazardous waste. Additionally, some vehicles (domestic 2003 and earlier) may contain mercury switches for lighting in trunk, hood, interior lights, and ABS system. Staff must be trained on how to recognize and remove these items.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	40 CFR 1 265.174 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.174
Violation Description:	Failure to inspect hazardous waste storage areas at least weekly and look for leaking and deteriorating containers.
Violation Notes:	Returned to compliance on 11/13/2018. Facility is unable to perform inspections of waste storage containers due to blocked access to drums and accumulation of metal components around the floor immediately surrounding the drums.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 11/13/2018. The following containers of hazardous waste were unmarked or insufficiently marked: 5x55 gal drums of used oil in waste storage area - no marking except for words "used oil". 1x55 gal used antifreeze in waste storage area - marking faded/illegible except for words "hazardous waste".

SCHERMAN PROPERTY (Continued) **S101303957**

Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 11/13/2018. Observed 1x55 gal drum of used antifreeze/windshield washer fluid being stored open (no lid).

Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33
Violation Description:	Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.
Violation Notes:	Returned to compliance on 11/13/2018. Facility has 1 eyewash that was reported as never being used. When tested to demonstrate it still operates, no water came out as a result of the reservoir (approximately 10 gallons) being empty.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 11/13/2018. Facility does not have any documented training as it relates to response to a release or threatened release of a hazardous material.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	10500
Site Name:	B-2 AUTO DISMANTLER
Violation Date:	10-15-2018
Citation:	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description:	Failure to provide a copy of the business plan to the owner or the owner’s agent within five working days after receiving a request for a copy from the owner or the owner’s agent.

SCHERMAN PROPERTY (Continued) **S101303957**

Violation Notes:	Returned to compliance on 11/13/2018. Facility has not notified the property owner in writing that they are subject to and in compliance with the hazardous materials business plan requirements.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-15-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility most recently electronically submitted a Hazardous Materials Business Plan (HMBP) on 3-9-2018. Reportable hazardous materials include but are not limited to: Used Oil Antifreeze
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-15-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility performs auto dismantling and sells used auto parts. Dismantled vehicles are sent to scrap metal recycler for crushing and recycling. Facility manages the following items in the following manner: Airbags - if deployed, sent to scrap metal recycler. Non deployed airbags are removed and stored on-site and available for resale. Some recall airbags are picked up by manufacturer. Mercury Switches - Employees are not aware of where mercury switches would be in a vehicle. Staff Indicated that most vehicles are 2005-current. Used oil - removed and managed as hazardous waste. Used coolant - removed and managed as hazardous waste. Lead acid batteries - removed and sold to recycler. Refrigerants - freon is removed from vehicles and available for resale. Gasoline - removed from gas tanks and reused in vehicles. Fuel filters - Gas drained from fuel filters and fuel reused on-site. Filter in filter housing is sold as an auto part. Oil filters - Left on transmissions [Truncated]

Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance

SPARTAN SERVICE STATION (Continued) **S104162847**

with the requirements.
Violation Notes: Returned to compliance on 08/09/2019. 1x 55-gallon drum of drained used oil filters was not marked with the accumulation start date.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 41579
Site Name: KEYES AUTO REPAIRS
Violation Date: 06-28-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 08/01/2016. Observed 1x55 gallon used oil drum with no bung cap and 2x5 gallon containers of antifreeze with open tops. Order a screw cap for the bung hole and ensure all containers are kept closed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 41579
Site Name: KEYES AUTO REPAIRS
Violation Date: 07-11-2019
Citation: HSC 6.5 25163(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25163(a)
Violation Description: Failure to use a DTSC registered hazardous waste transporter to transport hazardous waste or transporting hazardous waste without being a DTSC registered hazardous waste transporter.
Violation Notes: Returned to compliance on 08/09/2019. According to Mr. Nguyen, paper oil filters are transported to Pick-N-Pull. Ensure that filters are picked up by a registered waste hauler.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 41579
Site Name: KEYES AUTO REPAIRS
Violation Date: 06-28-2016
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: Returned to compliance on 08/01/2016. Mr. Nguyen stated that brake shavings are currently being disposed of with trash. Observed several non-empty oil quarts containers in trash that still contained free-flowing liquids. Ensure that oil quarts are drained thoroughly before placing in trash cans.

Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 08/01/2016. SORTING OF PAPER AND METAL OIL FILTERS Observed paper and metal filters in the "drained used oil and fuel filters" container. Per section 66266.130, only metal-cased filters are exempt from regulation as a hazardous waste under the scrap metal provision found in federal law. All paper filters must be disposed as hazardous waste and may be sent off with other oil contaminated solids (saturated absorbents, saturated cardboard on shop floor, and saturated rags on top of drums).

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E16M07f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Trichloroethylene (TCE), Gasoline
Site History:	In 2002, a Phase I Assessment was completed and identified a 1,000-gallon gasoline UST that had been filled with sand slurry in 1985. The site was formerly used for fiberglass manufacturing associated with a pool company. A subsurface investigation was conducted in the area of the UST in 2002 and reported TPHg of up to 1,000 ppm in soil and 300,000 ppb in groundwater. In 2003, the UST

ANCEWICZ PROPERTY (Continued) **S105691046**

was removed and a monitoring well was installed. Additional wells were installed between 2003 and 2004. Between 2004 and 2005, approximately 1,500 tons of soil were removed from the site. The soil excavation activities were conducted prior to the planned re-development of the site. The site has been re-developed with multi-residential structure. Dual Phase Extraction commenced in March 2006 and continued through July 2009. A new consultant has been retained and they are trying to bring the remediation system back online. TCE was detected in soil and groundwater at the site, but not investigated in association with the release from the UST. The TCE may be present from the former pool construction company that was located onsite.

Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 11/27/2018. Facility is conducting regular safety meetings and evacuation drills, but has not had training on response procedures in case of a release of hazardous materials into the envirionment. Ensure that training is given to all relevant employees on response and safety procedures in accordance with the HMBP. Once completed, provide the training agenda and roster to the inspector that the training was completed.

- RB Case Number: 06-077
- Local Agency: SANTA CLARA COUNTY LOP
- File Location: All Files are on GeoTracker or in the Local Agency Database
- Local Case Number: 07S1E16E01f
- Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
- Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
- Site History: Site History: One 1,000-gallon gasoline fuel underground storage tank (UST) was removed from the site in 1989. Limited excavation of approximately 40 cubic yards of contaminated soil was completed in 1990; however, according to records, the excavated soil was aerated on site and reused as backfill. Investigative work at the site has included soil, groundwater, and soil vapor investigations. Site Management Requirements: The site is located at the end of Smith Avenue in a heavy commercial/light industrial area of San Jose. Residual contamination in soil, groundwater, and soil vapor remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the potential disturbance of any residual contamination or the installation of water well(s) near the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. The DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions,

STAPLETON-SPENCE (Continued) **1001611212**

if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

SIMSMETAL AMERICA (Continued) **1000124101**

File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E21G02f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel
Site History: Six (6) underground storage tanks (USTs) were removed from the Subject Site between 1987 and 1989, including two gasoline and four diesel USTs. The USTs are identified as a 2,000-gallon diesel removed September 21, 1987; 1,000-gallon gasoline removed February 13, 1988; 550-gallon diesel removed April 19, 1989; 5,000-gallon diesel removed on December 15, 1989; 2,000-gallon unleaded gasoline removed on December 28, 1989; and a 7,000-gallon diesel removed on December 28, 1989. Subsurface investigations began in January 1988 with the installation of groundwater monitoring well (MW-1) following the removal of a UST in September 1987 and subsequent installation of three additional groundwater monitoring wells (MW-2 through MW-4) in February 1990 following the removal of four additional USTs in April and December 1989. The USTs were not replaced. From January 1988 to April 2015, periodic groundwater monitoring and sampling events were conducted. Twenty-three sampling events were conducted in wells MW-5 through MW-7 from July 2003 to April 2015. Ongoing groundwater monitoring demonstrated that no significant sources exist in soil and significant natural attenuation of residual petroleum hydrocarbons in groundwater has occurred. The most recent subsurface investigation results were reported in the Limited Assessment and Groundwater Monitoring Well Sampling Report dated May 15, 2015. Exploratory soil borings advanced specifically to further delineate suspect subsurface impacts away from the former USTs demonstrated that residual hydrocarbon impacts in soil and groundwater are localized and relatively low. Historical investigation data conclusively demonstrates that the Site meets criteria for regulatory closure under criteria summarized in the States Low Threat Closure Policy.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 08-23-2017
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes: TITLE 22 HAZARDOUS WASTE MANAGEMENT TRAINING IS GIVEN TO ALL NEW EMPLOYEES AND THIS TRAINING IS DOCUMENTED. ANNUAL REFRESHER TRAINING IS GIVEN TO ALL EMPLOYEES WHO HANDLE OR MANAGE HAZARDOUS WASTE AND THIS TRAINING IS ALSO DOCUMENTED. THESE TITLE 22 HAZARDOUS WASTE TRAINING RECORDS WERE REVIEWED AT THE TIME OF THE INSPECTION. HOWEVER IT WAS NOTED TO DURING THE REVIEW OF THESE TRAINING RECORDS A WRITTEN JOB DESCRIPTION FOR EACH OF THE EMPLOYEE JOB DESCRIPTIONS DID NOT ADEQUATELY DESCRIBE THE JOB DUTIES AND THE SKILLS, EDUCATION, AND OTHER QUALIFICATIONS REQUIRED OF PERSONNEL ASSIGNED TO EACH POSITION: A WRITTEN DESCRIPTION OF THE TYPE AND AMOUNT OF BOTH INTRODUCTORY AND CONTINUING TRAINING THAT WILL BE GIVEN TO EACH PERSON FILLING THE ABOVE EMPLOYEE JOB DESCRIPTION AND TITLE. (CCR 66265.16 (e). I PROVIDED THE FACILITY WITH A SAMPLE TRAINING RECORD. THIS TRAiNING RECORD FORM CAN BE DOWNLOADED FROM THE WEBSITE: www.unidocs.org UN-074 FORM.

Eval Notes: A ABOVEGROUND PETROLEUM STORAGE ACT INSPECTION WAS CONDUCTED WITH MR. MANNY RUIZ-OPERATIONS SUPERVISOR, MR. MATT ZEITER-REGIONAL ENVIRONMENTAL SUPERVISOR AND MR. KEITH MUNDY-OPERATIONS MANAGER WITH SIMS METAL MANAGEMENT ON AUGUST 22, 2017 AND THE OFFICIAL NOTICE OF INSPECTION WAS ISSUED ON AUGUST 24 ,2017. THE FACILITY SPILL PREVENTION, CONTROL AND COUNTERMEASURES PLAN (SPCC) DATED JANUARY 5, 2016 WAS REVIEWED ON-SITE AND SIGNED BY COMPANY MANAGEMENT AND CERTIFIED BY A PROFESSIONAL ENGINEER. I VERIFIED THE SPCC PLAN EMERGENCY CONTACTS ARE STILL EMPLOYED IN THIS ROLE. I REVIEWED INSPECTION RECORDS AND LOGS AND VERIFIED THE INSPECTIONS WERE BEING CONDUCTED IN ACCORDANCE WITH THE WRITTEN SPCC PLAN. ALL PETROLEUM TANKS/CONTAINERS HAD SECONDARY CONTAINMENT AND THE SECONDARY CONTAINMENT WAS FREE OF LEAKS AND SPILLS. ALL PETROLEUM TANKS HAD VISUAL OR ALARM MONITORING OVERFLOW PREVENTION DEVICES. THE FACILITY

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

JESSE TRANSMISSION (Continued) **S107996451**

Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Returned to compliance on 07/13/2017. Facility generates a stripper/thinner waste stream using 10% or greater methylene chloride (before use) as a solvent however no F002 codes have been placed on any uniform hazardous waste manifests. Revise profile to include this waste code.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 31674
Site Name: FREEMAN FINISHING
Violation Date: 06-21-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 07/13/2017. Facility solidifies some types of unwanted and left over paint waste using absorbent. While these paints do not appear to have regulated metals, some have a flashpoint lower than 140 degrees fahrenheit. Before solidifying any non empty (as defined in 66261.7 of CCR) paint containers, determine if it meets hazardous waste criteria and if action would meet the definition of treatment.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-21-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility paints cabinets and other wood items. Facility generates the following hazardous waste stream: Paint related material (acetone, thinner, paint) Spent spray booth filters are disposed of in the trash. Facility provided data on the paints and reviewed for regulated california metals. Reviewed multiple paints and confirmed that none had any level of regulated metals. Note: Cabinetry paint colors are generally in non-bright colors and these paints often lack metal oxides that are required in the automotive industry to provide a bright colored finish. Facility strips painted surfaces using methylene chloride followed by a thinner wash. stripper and thinner is applied with cloth or sponge and performed over an easel style stand that has a drain that can collect spent stripper/thinner waste that drips down the easel into a 5 gallon container. 5 gallon container is consolidated into paint related material waste drum. EPA ID # CAL000123529 is active however ID [Truncated]

WESTERN STATES OIL CO (Continued) **U001602675**

Local Case Number: 07S1E21A07f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Benzene, Diesel, MTBE / TBA / Other Fuel Oxygenates
Site History: The Site is located on the north corner of Needles Avenue and South Tenth Street at 1790 South Tenth Street in San Jose, California. The Site currently operates as a retail fuel station and bulk storage plant for petroleum products. In 1989, five underground storage tanks (USTs) four 12,000-gallon gasoline and one 12,000-gallon diesel were removed from the subject facility. Soil samples collected following UST removal activities indicated soil beneath the Site was impacted by total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as gasoline (TPHg) and total petroleum hydrocarbons as diesel (TPHd). In 1990, four diesel USTs (two 10,000-gallon, one 12,000-gallon, and one 16,000-gallon) were removed from the Site. Soil analytical results indicated the presence of TPHd and benzene. Additionally, three monitoring wells (B-5 through B-7) were installed at the Site. In 1991, thirty-eight soil borings and three monitoring wells (MW-101 through MW-103) were installed at the Site. Results of the investigation indicated the presence of free product in subsurface soils and groundwater analytical results up to 62,000 parts per billion (ppb) of TPHg. In 1999, the Santa Clara Valley Water District reviewed the Site for case closure. On December 1, 1999 the case was closed despite the presence of residual petroleum hydrocarbons in groundwater. Between June 2003 and May 2004, fuel dispenser closure activities were performed at the Site. Soil samples collected during dispensers. Based on these results, the SCCDEH required a site assessment be performed to characterize petroleum hydrocarbons in soil and groundwater beneath the Site. In 2005, a Preliminary Site Assessment Report was prepared to document the results of a site investigation indicated that residual petroleum hydrocarbons remained in groundwater beneath the Site. In 2010, the SCCDEH requested that quarterly groundwater monitoring be reinitiated.

Violation Date:	06-07-2017
Citation:	HSC 6.7 25298 - California Health and Safety Code, Chapter 6.7, Section(s) 25298
Violation Description:	UST system was abandoned or not properly closed, or failure to comply with all permanent closure requirements.
Violation Notes:	1) Tank 4: A pressurized product pipe that is not in-use is only being monitored by a 208 sensor that provides audible and visual (A/V) alarm in the STP G AG sump. The piping is still connected to a high flow turbine in the sump, but electricity to the turbine has been disconnected and a line leak detector is not connected. 2) Tank 6: A pressurized product pipe that is not in-use is only being monitored by a 208 sensor that provides audible and visual (A/V) alarm in the STP G AG sump. The piping is still connected to a high flow turbine in the sump, but electricity to the turbine has been disconnected and a line leak detector is not connected. While piping layouts could not be confirmed during inspection, Mr. Sanchez stated that the piping runs only go to the capped off piping between dispensers 21/22 and 23/24 (a not in-use dispenser location) and do not manifold with the second product piping run monitored in STP G BG sump. Mr. Sanchez stated that the facility does [Truncated]

Violation Date:	07-14-2017
Citation:	22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description:	Failure of the operator for placing wastes or treatment reagents in a tank system that could cause the tank , its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail; and for not using appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. (Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure).
Violation Notes:	The facility uses an automatic pump to feed used oil into the used oil tank. The automatic feed does not have an automatic cut-offs and the tank does not have a liquid level sensor or an audible/visual alarm. Mr. Sanchez stated that the facility G eye ballsG when the automatic feed should be shut off. Used oil and used oily sludge were observed in the visible portion of the non-integral secondary structure and on top of the tank, indicating that the facilityG s current practices are not preventing spills and overflows from the tank.

Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 06/23/2017. Gasoline and water contaminated with fuel is frequently removed from the UST spill buckets. Per the

WESTERN STATES OIL CO (Continued) **U001602675**

Designated Underground Storage Tank Operator (DUSTO) monthly inspection reports, the facility is instructed to remove the fuel-contaminated liquid and accumulate the liquid in the G hazG drum. A gallon of gasoline was also observed in the Tank 3 STP sump during the 2016 monitoring system certification and documented in the Official Notice of Inspection Report issued on 6/16/2016. However, no Uniform Hazardous Waste Manifests or consolidated manifests from the past 3 years identify a waste fuel or fuel and water mixture waste stream. A waste determination pursuant to 22CCR 66261.2 and a hazardous waste determination, as identified below, must be conducted on all unsaleable fuel and water contaminated with fuel generated (e.g. removed from sumps and spill buckets). Provide documentation of the determinations and how the facility will collect and manage these liquids to HMCD [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Not reported
Violation Notes: Returned to compliance on 02/08/2017. Noted diesel fuel floating on rain water standing in the "equator" containment area (left bay/pod), standing oily sludge in the "equator" containment area (middle bay/pod) at loading area, and standing oily sludge in containment in the "south pole" containment area. Source of leak that caused diesel in "equator" was identified, and active efforts were being taken to separate the fuel from the rainwater at the time of the inspection.

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 08/11/2017. 1) Fuel dispenser hoses and nozzles removed from service wereobserved on the ground in the back drum storage area. Upon inquiry as to how the waste dispenser hoses and nozzles are managed, Mr. Sanchez stated that the waste hoses are disposed of to the trash and the dispenser nozzles are taken apart and recycled as scrap metal. Upon inquiry as to how frequently Western States Oil generates waste dispenser hoses, Mr. Sanchez stated that the gasoline dispenser hoses require removal every week, the diesel dispenser hoses require removal less frequently than the gasoline hoses, but still require frequent replacement, and the used oil dispenser hoses require replacement approximately every two years. Dispenser hoses may meet hazardous waste criteria (e.g. toxicity, benzene contamination, etc.), upon their removal from service. A hazardous waste determination using generator knowledge or laboratory testing, as outlined below, must be conducted for the gasoline

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to design drainage from undiked areas to either: 1. Flow into catchment basins, ponds, or lagoons to retain oil or return it to the facility. OR 2. Equip the facility with a diversion system that would retain oil in the facility.
Violation Notes:	Returned to compliance on 02/08/2017. The SPCC plan describes measures to be implemented to prevent release, but these procedures do not appear to be implemented or adequate as noted by the ability of releases and or rainwater runoff with a sheen to flow unobstructed from the oil handling areas between and around tank containment and load/packaging areas to the storm drain located in the parking lot behind the office building. Additionally, the described method of removing liquid from containment refers to a gated ball valve where I observed a screwed in cap and pipe system and use of a submursible pump to remove water.

Violation Notes:	Returned to compliance on 06/09/2017. Tank 3 (Regular Gasoline): The Vaporless Manufacturing Vaporless LD-2000 mechanical line leak detector (MLLD) failed to detect a simulated 3.0 gallon per hour leak at 10 p.s.i.g. when functionally tested. The service technician adjusted the MLLD a quarter turn and re-tested the MLLD. Upon re-testing, the MLLD detected a simulated 3.0 gallon per hour leak at 10 p.s.i.g. and passed functional testing. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Site was unable to demonstrate that overfill prevention equipment was tested by date of inspection.

Citation:	22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description:	Failure to meet required secondary containment requirements for hazardous waste tank systems or components.
Violation Notes:	The 550 gallon single-walled, used oil accumulation tank is surrounded by a non-integral secondary structure. Mr. Sanchez confirmed that the tank is single-walled. There is only an approximately 2 inch wide gap between the tank and the secondary structure on 2-3 sides of the tank. Holes, vent slats, and a small access opening are located in the secondary structure just above the top of the single-walled tank. Based on the measurements taken and observations made during inspection, the secondary structure does not provide adequate secondary containment and the tank requires an external liner system or vault system designed or operated to contain 100 percent of the capacity of the tank, and meet all other standards of 22CCR 66265.193(e)(1) or (e)(2) respectively, or the tank needs to be replaced with a tank that has integral secondary containment and meets the standards of 22CCR 66265.193(e)(3).

Eval Notes:	The following minor violations were observed, but corrected at the time of inspection: G023C: Container Open: Two drums of G oily solids" were observed to be open when waste waste not being added or removed. NOTES TO FACILITY: 1) While the facilityG s Hazardous Waste Contingency Plan has been submitted via CERS, upon multiple requests to review it on-site, Mr. Sanchez only provided the SPCC Plan for review. The SPCC Plan does not satisfy the hazardous waste Contingency Plan requirement. STRONGLY RECOMMEND ENSURING THAT THE HAZARDOUS WASTE CONTINGENCY PLAN IS ON-SITE IN A READILY AVAILABLE LOCATION AND THAT ALL EMERGENCY COORDINATORS ARE FAMILIAR WITH WHERE IT IS STORED. 2) Three spent fluorescent tubes (i.e. G universal waste-lampsG) were observed in the warehouse of the facility. ENSURE THAT ALL UNIVERSAL WASTES (e.g. fluorescent lamp tubes, batteries, electronic devices or G e-wasteG) ARE MANAGED AS UNIVERSAL WASTE OR HAZARDOUS WASTE AND ARE NOT DISPOSED OF 3) [Truncated]

Eval Notes:	Inspection took place on 1/11, report delivered 1/17. Plan developed 2003. Revised 2004 due to facility modifications. Plan next reviewed 5 years from modified date (2009). Plan modified again 2013 due to modifications. Plan reviewed again 5 years after modification. Noted that federally required portions of plan are missing: The tanker truck used to store bio-diesel (100% per Mr. Sanchez) prior to blending is not addressed in the plan. This is not required to be addressed under APSA as the material is not petroleum, but as an oil is required to be included in the plan under 40 CFR 112. Noted that integrity documentation for the tank "Indiana" was labeled tank "India" by the certifying engineer. Per Mr. Sanchez, tanks in the "south pole" were generally installed in 1987/88, those in the "north pole" in 1992/1993, and those in the "equator" between 1995 and 1997. Loading connections are all female with spring loaded interior poppets. Areas not in use were noted as [Truncated]

Eval Notes:	Follow up inspection to routine inspection conducted on 7/14/17. The following violations were responded to by the facility, but the responses were either found to be not sufficient to document compliance or included a workplan by which compliance would be met and no documentation of meeting that workplan has been provided: G114: Providing aisle space for access to waste and emergency equipment -WSO response: Aisle space will be cleared ASAP, no later than 8/11/17. G320: Personnel training -WSO response: Facility personnel will enroll in County training ASAP G341: Used oil tank assessment -WSO response: Tank system assessment will be scheduled ASAP G342: Used oil tank overfill prevention -WSO response: Following the tank assessment, will retrofit or replace the tank. Observed correction of G112. All fire extinguishers noted had been serviced in either August 2017 or 2018. During inspection, observed three 55-gallon drums, each marked with a hazardous and [Truncated]

Eval Notes: Inspection began on Monday 5/20, continued on 5/21, and concluded today. Onsite for oversight of UST monitoring system certification conducted by Service Stations Systems. Technician Steve Parmenter had valid ICC, Veeder Root, VMI tester, and Franklin Fueling/Beaudreau certifications. Site has ten tanks, one a three chambered tank. All tank annular sensors provided audible and visual alarms at the monitoring panels. Each sensor used to monitor a turbine or piping sump provided audible and visual alarms as well as shutdown of the turbine. Additional sensors in sumps (T7 - high flow, T6, T5, and T4 secondary sumps with turbines removed, T8- remote fill transition sump) all provided audible and visual alarms at the monitoring panel. UDCs each provided shutdown of the dispenser (except as noted above). UDC 31, 33, and 35 float and chain assemblies activated upon addition of water (except as noted above). UDC sensors in 32 and 34 activated alarms at monitoring panel and [Truncated]

Violation Description: Failure to maintain monitoring and maintenance records (e.g., alarm logs) and/or maintain records of appropriate follow-up actions.
Violation Notes: Returned to compliance on 06/23/2017. A Beaudreau 522 Remote monitoring system provides audible and visual alarm when any of the 22 Beaudreau 406 sensors detect liquid in the UDC pan, but the monitoring consoles does not provide a print-out of the alarms and no alarm log is maintained by the facility. Leak detection alarm logs and documentation of appropriate follow-up actions must be maintained on-site for three years. NOTE: The leak detection alarm log for the Beaudreau 522 Remote monitoring system must also be reviewed by the Designated Underground Storage Tank Operator (DUSTO) each month and attached to the monthly DUSTO inspection report [23CCR 2715(c)(1)].

Violation Date: 06-08-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 06/23/2017. Gasoline and water contaminated with fuel is frequently removed from the UST spill buckets. Per the Designated Underground Storage Tank Operator (DUSTO) monthly inspection reports, the facility is instructed to remove the fuel-contaminated liquid and accumulate the liquid in the G hazG drum. A gallon of gasoline was also observed in the Tank 3 STP sump during the 2016 monitoring system certification and documented in the Official Notice of Inspection Report issued on 6/16/2016. However, no Uniform Hazardous Waste Manifests or consolidated manifests from the past 3 years identify a waste fuel or fuel and water mixture waste stream. A waste determination pursuant to 22CCR 66261.2 and a hazardous waste determination, as identified below, must be conducted on all unsaleable fuel and water contaminated with fuel generated (e.g. removed from sumps and spill buckets). Provide documentation of the determinations and how the facility will collect and manage these liquids to HMCD [Truncated]

Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 08/11/2017. An employee training record pertaining solely to the underground storage tank systems (DUSTO Employee Training Record) from the past 3 years was available for review during inspection, but the records do not include all employees and the training does not encompass the safety procedures in the event of a release or threatened release of a hazardous material from other portions of the facility. An HMBP employee training record template will be provided with this inspection report.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to maintain adequate records of drainage when there is drainage of uncontaminated rainwater from diked areas into a storm drain or open watercourse; for example, records required under NPDES permit.
Violation Notes: Returned to compliance on 02/08/2017. Discharge logs for release of rainwater from containment areas is not maintained for each rain event. Per Mr. Sanchez, if no sheen is noted on the rainwater in containment, the plug is removed allowing water to flow to a sump located outside of the containment. This sump is them emptied to the general paved area using a submursible pump. It appears that all general paved areas flow to the storm drain in the southwest corner of the property.

Violation Description:	Failure to prevent intentional contamination of used oil with other hazardous waste other than minimal amounts of vehicle fuel.
Violation Notes:	Returned to compliance on 08/11/2017. Mr. Sanchez confirmed that the

WESTERN STATES OIL CO (Continued) **U001602675**

following hazardous wastes are being deposited into the used oil accumulation tank for management as G used oil.G - The contents of punctured aerosol cans, such as parts brake cleaner - The residual contents of the drums returned to Western States from customers, including but not limited to antifreeze/coolant, kerosene, red diesel, brake fluid, brake cleaner, and other non-used oil wastes. A pink liquid was observed in the used oil drain tray during inspection. Hazardous waste and used oil cannot be commingled for management as G used oilG and must be managed separately as hazardous waste. Otherwise, the commingled waste stream must be managed as fully-regulated hazardous waste.

Citation:	22 CCR 15 66265.193 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.193
Violation Description:	Failure to meet required secondary containment requirements for hazardous waste tank systems or components.
Violation Notes:	The 550 gallon single-walled, used oil accumulation tank is surrounded by a non-integral secondary structure. Mr. Sanchez confirmed that the tank is single-walled. There is only an approximately 2 inch wide gap between the tank and the secondary structure on 2-3 sides of the tank. Holes, vent slats, and a small access opening are located in the secondary structure just above the top of the single-walled tank. Based on the measurements taken and observations made during inspection, the secondary structure does not provide adequate secondary containment and the tank requires an external liner system or vault system designed or operated to contain 100 percent of the capacity of the tank, and meet all other standards of 22CCR 66265.193(e)(1) or (e)(2) respectively, or the tank needs to be replaced with a tank that has integral secondary containment and meets the standards of 22CCR 66265.193(e)(3).

RB Case Number:	19-011
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E17J01f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	1984 In February, four fuel underground storage tanks (UTSs) were removed from the site. One UST was 8,000-gallon, one was 7,500-gallon and two USTs were 5,000-gallon in capacity. There are no reports on USTs contents, and soil removal and disposal volumes and activities. A UST removal report shows the former USTs, the excavated soil stockpiles, the locations of soil samples collected from the UST excavations and the analytical results of the soil samples. Up to 15,000 milligrams per kilogram (mg/Kg) of petroleum hydrocarbons as gasoline were detected in the soil samples collected from the USTs excavations. In July, four borings were drilled at the site and converted the borings to monitoring wells E-2 through E-4. A soil sample collected from Boring E-3 at 15 feet below ground surface (bgs), contained 5,200 mg/kg TPH-gasoline. In August, a groundwater sample collected from E-3, contained 4,800 micrograms per liter (ug/L) benzene, 6,500 ug/L toluene and 8,800 ug/L xylenes and ethylbenzene. 1987 In March, groundwater samples from monitoring wells E- 2, E- 3 and E-4. Well E-3 contained 9,300 mg/L TPH-gasoline, 390 ug/L benzene, 44 ug/L toluene and 300 ug/L xylenes and ethylbenzene. 1988 In October, three monitoring wells S-5 through S-7 were installed at the site. 1989 In September the Santa Clara Valley Water District published a memorandum about the site. The memorandum summarized the UST removal and site investigation activities conducted to date. 1990 In February, two groundwater monitoring wells S-8 and S-9 were installed and soil boring S-A was drilled. In August, groundwater samples were collected from the wells in the monitoring network. The highest TPH-gasoline and BTEX concentrations were detected in monitoring well S-9. In September four soil vapor monitoring wells were installed (SV-1 through SV-4), and a conduit study was conducted for the areas surrounding the site. TPH-gasoline was detected in all soil samples collected from these borings at concentrations ranging from 5 mg/Kg to 1,000 mg/Kg. 1992 Soil vapor extraction and treatment system (SVET) was installed at the site. Soil vapor was extracted from wells SV-1, SV-3 and SV-4 between May 1992 and June 1993. 1993 In May, a progress report on groundwater monitoring and soil vapor extraction was submitted. Approximately 4,800 pounds of petroleum hydrocarbons as gasoline were removed by the SVET system. Maximum concentrations of TPH-gasoline and benzene detected in influent soil vapor were 38,000 ppmv and 780 ppmv, respectively. 1995 Oxygen release compound (ORC) socks were installed

SHELL - 1098 FIRST ST (Continued) **S105193302**

in wells SV-1 through SV-4, E-3, S-8 and S-9 to enhance the degradation of TPH-gasoline in groundwater. 2000 In April, an excavation for the installation of the new underground fuel storage tanks at the site was completed. A 550-gallon waste oil tank was discovered during the excavation activities. The waste oil UST was removed under permit from the City of San Jose Fire Department, and 44 tons of visibly impacted soil was excavated to a depth of 12 feet below ground surface. Soil samples were collected from both ends of the excavation. TPH-gasoline concentrations in soil samples WO-B1 and WO-B2 were 566 mg/Kg and 860 mg/kg, respectively. TPH-diesel concentrations were 2,980 mg/kg and 7,100 mg/kg, and TRPH concentrations in soil samples were 20,300 mg/Kg and 11,000 mg/kg, respectively. The waste oil UST excavation was backfilled with pea gravel and compacted. Approximately 2,000 pounds of ORC was distributed at multiple locations in the excavations to enhance the biodegradation of TPH-impacted soil and groundwater beneath the site. 2001 In April, groundwater samples were collected from wells E-2, E-3, S-8 and S-9 to evaluate the impact of the former waste oil UST to groundwater beneath the site. The following maximum concentrations of TPH compounds were detected in wells E-2 and S-9: TPH-diesel 660 ug/L, TPH-gasoline 6,200 ug/L, TRPH 2,700 ug/L, TEPH 740 ug/L and MTBE 280 ug/L. 2002 In May, a corrective action plan (CAP) was submitted which recommended periodic soil vapor extraction as a method to further reduce contamination. The Santa Clara Valley Water District approved the CAP on 8/9/2002. 2003 In March, the CAP was implemented and an SVE event was completed using wells S-9, SV-1, SV-3, and SV-4. 2005 Biosparging events were conducted at well S-9 from December 2003 to March 2005 to reduce TPH-gasoline and benzene concentrations in groundwater. Dissolved oxygen readings were taken in monitoring well S-9 and SV-4 to monitor oxygen transfer to groundwater. Groundwater samples were collected from S-9 prior to and after each biosparging events analyzed TPH gasoline and BTX. The results are reported in the Shaw Environmental June 1, 2005, quarterly monitoring report. TPH-gasoline, Benzene and MTBE concentrations in December 2003 were 21,000 ug/L, 10,000 ug/L and 340 ug/L, respectively. TPH-gasoline, Benzene and MTBE concentrations in March 2005 were 11,000 ug/L, 4,000 ug/L and 150 ug/L, respectively. 2005 2012 Groundwater monitoring occurred on a quarterly or semi-annual basis until the last monitoring event on 5/31/2012.

CERS ID: 10344430
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 29156
Site Name: EXPRESS GAS & AUTO SERVICE
Violation Date: 04-27-2017
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 06/05/2017. Uncorrected violation from 4/29/2016. This is a Significant UST Violation. The diesel and 87 spill buckets failed testing in 2016 and again today. The 91 spill bucket also showed a loss over the testing period. Submit a permit application to our office for the replacement of all three spill buckets. This permit application may be combined with UDC containment repairs.

Violation Date: 04-10-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 05/04/2019. UST overfill inspection was conducted today, which is passed the 10/13/2018 deadline. Your next overfill inspection is due before 10/13/2021. The 87 and 91 drop tubes were stuck and were unable to be inspected. The diesel drop tube was removed and functioned as required.

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Steven Parmenter (certifications current) of Service Station Systems. The annular spaces, sumps, and Under Dispenser Containment (UDC) are monitored by a Veeder-Root (VR) TLS-350 panel. The annular, sump, and UDC sensors were tested in water and provided audible and visible alarms. The sump and UDC sensors also provided positive shutdown of the turbines. NOTE: The 91 sump sensor failed initial testing. It was replaced like for like, retested and functioned properly. See violation above. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The mechanical line leak detectors (MLLD) were tested and detected a simulated 3 gph leak at 10 PSI and held slow flow. Overfill protection is provided in all tanks by a flapper valve in the fill riser. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance [Truncated]

Eval Notes: Conducted a follow-up inspection with Ut Quach to document the progress on open UST violations. UST violation T560 (SPILL CONTAINMENT NOT INSTALLED / FUNCTIONAL) was observed to be corrected by the installation of a new spill bucket on the 87-fill, under SR0857181. The facility has an open Class I Violation; T530 (SECONDARY CONTAINMENT) regarding regulated piping that is outside the confines of the UDCs. During today's follow-up inspection Mrs. Quach showed me email communications from Armer / Norman & Associates and Petroleum Marketing Equipment regarding the purchase and installation of Bravo deflection plates. Although forward progress in correcting violation T530 has been demonstrated, the facility remains subject to enforcement proceedings, including placement of Red Tags on all fuel fill caps as well as monetary penalties. By July 15, 2018, the facility must provide proof to this office in the form of a signed contract with a deposit paid to a [Truncated]

Site Name:	MANTREX INC. dba WIT Sales & Refining
Violation Date:	02-17-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 05/11/2016. Map submitted is incomplete, does not include all items noted in corrective action text below. Additionally, the "location" of materials in the inventroy does not coordinate with "locations" on the map. Please ensure that these two items are identical/cross referenced.

Violation Date:	02-17-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Small containers (2 gallon) in the recovery area and 1x5 gallon bucket in acid room used to transfer sludge, debris and other miscellaneous potentially acid or cyanide contaminated debris to accumulation drums were not marked/labeled.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	46348
Site Name:	MANTREX INC. dba WIT Sales & Refining
Violation Date:	07-23-2019
Citation:	HSC 6.5 25143.10 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.10
Violation Description:	Failure of any person who recycles more than 100 kilograms per month of recyclable material under a claim that the material qualifies for exclusion or exemption, to submit recyclable materials report every two years.
Violation Notes:	Returned to compliance on 08/19/2019. A Recyclable Materials Report has not been completed and uploaded to CERS for the 7/1/16 to 6/30/18 reporting period. Site is receiving ERM router dust (copper containing) and terminating the shipping documents for these materials. Site then introduces new shipping documents for transfer of these materials to end processor. As such, materials should be counted as ERMs managed by WIT.

Case Type:	Cleanup Program Site
Case Worker:	AC
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Asbestos - Naturally Occurring Asbestos (NOA), Lead
Site History:	The site is comprised of the following properties: 164, 170 and 198 W. Alma Avenue and 1424 and 1438 Little Orchard Street. This is the southeast corner of the intersection of W. Alma Avenue and Little Orchard Street. It is believed that the property address following

ROCKETSHIP SEVEN (Continued) **S111711564**

re-development will be 198 W. Alma Avenue. All parcels are being combined and redeveloped as a K-5 public elementary school. Sampling reported the presence of lead and naturally occuring asbestos (NOA). The lead appears to be related to debris and lead-based paint used on the structures, which date back to circa 1915. Soil with Lead concentrations exceeding TTLC to be removed from the site. Soil with lead exceeding 80 ppm will be placed in a consolidation cell under the planned parking lot. Impacted soil to be capped with soil and asphalt. NOA concentrations did not exceed hazardous waste levels and will be handled in accordance with the DTSC advisor for schools.

Violation Date:	05-03-2018
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	(Outside Building B) - Observed 1 blue 32gal., plastic tote with what appeared to be oily-water and 1 x 5 gal., Drive seal bucket. Facility contact was unsure as to where these came from. (Inside Building B-Flammable Cabinet closest to the door to the wood shop area) - Observed various aerosol cans, 1 gal., paint cans, etc., which some appeared not be in use or not in good condition. (HVAC) - 1 small container with unknown. Make a hazardous waste on all of the above. Determined if it's a hazardous waste by using generator knowledge or by having these tested by a registered lab. If it is a hazardous waste, manage it as such. Provide to our office in writing a response on the disposition of all of the above.

BEECHNUT NUTRITION CORP. (Continued) **S101304067**

15, Section(s) 66265.16

Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 06/03/2014. BASED ON MY OBSERVATIONS AND TYPE OF INSPECTIONS PERSONNEL HANDLING HAZARDOUS WASTE ARE NOT ADEQUATELY TRAINED IN HAZARDOUS WASTE MANAGEMENT AND EMERGENCY PROCEDURES. PROVIDE TRAINING IMMEDIATELY.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-04-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility walk-through was conducted on 4/26/18 and inspection report was issued today via e-mail to Ms. Shaw. The following people were present during this inspection; Christy Shaw, Nasario (Doc) Flores, Steven Brasil, Richard Ramirez all with employees of the City of San Jose. Mindy Nguyen and Thao Ha, Environmental Specialists with the County of Santa Clara Department of Environmental Health. Notes; - No hazardous waste violations were observed during this inspection. - No hazardous waste were stored in this building during this inspection. Therefore, your hazardous waste permit with our Department will be inactivated.

RB Case Number: 14-481
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E16M08f
Potential Media Affect: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Ethylbenzene, Gasoline, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History: In 2015, one 1,000 gallon gasoline Underground Storage Tank (UST) was removed from the facility. The tank was not replaced. During tank removal activities, approximately 100 gallons of residual gasoline and 700 gallons of groundwater was removed. In addition, the tank pit was excavated to a depth of 18 feet below ground surface (bgs) and the soil was disposed of offsite. No additional details regarding the soil excavation and disposal was available for review. In July 2016, soil and groundwater samples were collected and five groundwater monitoring wells were installed. Soil vapor sampling was conducted in November and December 2016. During the latest groundwater monitoring event in 2016, the highest detections were 11,000 parts per billion (ppb) TPH-g; 240 ppb benzene; 5.3 ppb toluene, 610 ppb ethylbenzene, 58 ppb xylenes; and below detection limits for Methyl Tertiary Butyl Ether (MTBE). Soil vapor sampling conducted in 2016 had maximum detections of benzene at 25 micrograms per cubic meter (a%g/m3), toluene at 71 a%g/m3, ethylbenzene at 13 a%g/m3, xylenes at 66 a%g/m3, Tetrachloroethylene (PCE) at 1,200 a%g/m3, and Trichloroethylene (TCE) at 280 a%g/m3.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Type:	Cleanup Program Site
Case Worker:	REG
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	43S1131
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Trichloroethylene (TCE), Diesel
Site History:	The Site is located on the northwest corner of Pomona Avenue and Banard Avenue in a light industrial/commercial area. A large building in the front of the Site was formerly used as an auto repair shop and a wrecking yard (All Stick and Gears). The Site is now used primarily for storage of nursery plants and potted trees. Two 1000-gallon underground storage tanks (USTs) were excavated in 2003. During excavation, it was noted that each USTs had holes in the ends, and that soil beneath the USTs was discolored and smelled of petroleum hydrocarbons. Soil samples collected beneath the tanks contained low concentrations of petroleum hydrocarbons (primarily as diesel). Tricholorethene (TCE), a solvent, was also detected in soil samples collected from the excavation. Groundwater samples collected from site monitoring wells during March 2005 contained concentrations of gasoline and TCE. Concetrations of TCE detected in groundwater samples collected in 2015 indicate that the site meets the criteria in he Assessment too for Closure of low-Threat Chlorniate Sites (July 31, 2009.low treat cloure The Santa Clara Valley Water District

FORMER ALL STICK AND GEARS (Continued) **S106118084**

provided oversight at the site to January 2005, at which time the case was transferred to the County of Santa Clara Environmental Health Department. The case was transferred from the County to the Regional Water Board in August 2005. Groundwater samples collected in 2015 indicated that the site is a candidate for case closure as the conctrations of TCE & other VOCs are below ESLs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 10/15/1999
Comments: Agreement signed with Opus West for review of existing documents and a workplan for remedial activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Consultation
Completed Date: 08/02/2000
Comments: Only received one comment during the comment period for the PPA from Stauffer management Company indicating that they uprchased the proeprty in 1973 and sold the property "as is" to Regency Monarch Development Corporation in 1985. Regency Monarch is obligated to idemnify Stauffer for any claims relating to environmental probvlems or hazardous materials. Stauffer and its successor corporations reserve their rights to contest any liability connected to the Site. DTSC did ot receive any other comments which would cause the agreement to be amended. Therefore, with this clarification, DTSC considers the PPA final.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Prospective Purchaser Agreement
Completed Date: 05/30/2000
Comments: Signed PPA with 1931 Monterey, L.L.C. that provided for cleanup of the property to unrestricted land use standards.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 12/23/2004
Comments: DTSC staff researched, inspected and wrote report to document that existing site conditions conform to the land use conditions of the Prospectlve Purchaser Agreement.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 08/28/1995
Comments: Completed Site Screening. In August 1985, the two underground storage tanks (USTs) were removed. Soil and groundwater beneath these tanks were sampled and found to be contaminated with a variety of solvents. The SF Regional Water Quality Control Board (RWQCB) began oversight of the site in July 1986. In August 1991, approximately 3,700 cubic yards of contaminated soil was removed. In-situ bioremediation was implemented in 1995 as a means of meeting drinking water standard. The RWQCB rescinded its cleanup order on June 18, 1997 when drinking water standards were attained.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002638227

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	This site has been proposed for listing on the NPL. At this time, DHS believes that the responsible parties will be unable to pay for the cleanup. Therefore, it is expected that EPA will fund 90 percent of the final remedial action and DHS will be required to fund the remaining 10 percent.
Site Description:	Located one block from Kelly Park, this facility had been operating as a drum collecting, reconditioning and resale business between 1946 and 1987. Drums, formerly containing solvents, pesticides and other materials from numerous sources were cleaned, recoated and sold for reuse.
Hazardous Waste Desc:	Chlorinated organic solvents, polychlorinated biphenyls and vinyl chloride have been detected in the ground water and surface water. Approximately 5,000 cubic yards of contaminated soils containing hazardous concentration of heavy metals (copper, nickel, lead, zinc, chromium, cadmium) and pesticides (DDT, DDD and DDE) are still present.
Threat To Public Health & Env:	The primary threats to the public health and environment are exposure to contaminated ground water, contaminated surface water runoff, contaminated airborne dust, and exposure and direct contact with contaminated soil. Three public water supply systems are within 2,000 feet of the contamination.
Site Activity Status:	RI/FS work plan prepared by DHS have been turned over to EPA for implementaion. DHS implemented expedited response actions (ERAs) at a cost of $4 million. The ERAs included construction of decontamination facilities; removal of 24,615 steel drums and 2,000 polyethylene drums, several budles of containers marked radioactive, contaminated debris and 4 tons of scrap metal. The hot spot ERA removed was 4,500 cubic yards of contaminated soil. In addition, EPA and DHS disposed of 2,100 drums containing hazardous waste liquids. The DHS surface

LORENTZ BARREL AND DRUM COMPANY (Continued) **S100833435**

water control plan and site cap was implemented by EPA's Emergency Response Team. As of December 1987, EPA agreed to accept lead responsibility for long term site cleanup. The imminent and substantial endangerment posed by the Lorentz site was completely abated by DHS. EPA is currently proceeding with treatment of the shallow ground water. Long term remediation will be done by EPA.

Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) The plan shall describe arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) The plan shall list names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) The plan shall include a list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) The plan shall include an evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan shall describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires). 6) The plan shall include the current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the re
Violation Notes: Returned to compliance on 12/16/2015. Contingency plan is not complete in that emergency contacts are out of date and do not include 24 contact numbers for all contacts, does not contain the OES emergency phone number and has questionable information about the types of emergency equipment onsite.

UNI FLEX CIRCUITS (Continued) **S103993118**

Violation Notes: Site failed to submit a complete HMBP in 2017. The inventory and map elements of the HMBP were not submitted. PLEASE ENSURE THAT ALL ELEMENTS OF A HMBP ARE ANNUALLY SUBMITTED. ALSO, SUBMITTAL SHOULD OCCUR AT LEAST EVERY 12 MONTHS, SO PLEASE TARGET THE ANNIVERSARY MONTH OF JANUARY 2019 FOR NEXT CERTIFICATION/UPDATE TO MAINTAIN THE REQUIRED FREQUENCY.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 404803
Site Name: UNI-FLEX CIRCUITS
Violation Date: 07-20-2016
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes: Training plan presented (that which was posted to CERS) is incomplete (does not have all elements and does not specifically address hazardous waste) and records of hazardous waste specific training were not available.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Treatment system is 4 tanks with associated sludge filter press. Feed sources include circuit prep rinse waters (pH), copper plating rinse water, pumice rinse water (with copper), screen wash (glycol based solution) Batch treat up to 6 times a month, batches of approximately 100 gal each. pH adjust solution , add precipitant, skim water to holding tank to bring pH back up to meet POTW discharge. Sludge to press. Water off press returned to holding tank. Keep logs of treatment showing dates of testing prior to discharge, pH and copper ranges at discharge. Annual submittal on CERS submitted 1/22/18, complete, accepted 2/15/18. Reviewed tank assessment (complete 6/11/16), Closure cost estimate ($5750, exempt from needing mechanism) Onsite reviewed closure plan, waste analysis plan, inspection logs, training logs.

Eval Date: 12-17-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Walkthrough of facility took place 12/13/18 with Mr. Ramirez. Review

UNI FLEX CIRCUITS (Continued) **S103993118**

of paperwork took place 12/17/18. ID number CAL000172088, active as of inspection. Site is flexible circuitry manufacturer with onsite copper plating, developing, etching and cleaning (pumice) Walked through Silk screening, router/drilling, QC, Dry film development, plating shop (includes pumice scrub and silk screen cleaning stations as well as etching and plating of electroless and acid copper) areas. Waste etch is poured from 5 gallon buckets to 55 gallon drums. Noted 5 drums of spent etch onsite with start dates of 7/3/18, 11/21/18, 11/22/18, 12/8/18 and 12/14/18. D004 waste code on manifests is included becasue part of the binding process for lay of copper to resist uses material that has variable arsenic content. As appears in etch, concentrations vary, and to side with caution, include D004 in case exceeds 5 mg/l regulatory limit. Reviewed manifests 2018-2016 reviewed inspection logs [Truncated]

Eval Notes: Facility produces flexible circuitry as a job shop Generate waste waters from plating and cleaning which are treated onsite. Generate ammonia waste and sludge. Plate copper both electroless and electoplated (acid copper- no CN) Have ammonia etch line for copper circuitry. Reviewed the following: manifests for 2013-2015, inspection records, training plan and records, contingency plan, SB14 plan, NOTE: Waste sludge from ammonia line is shipped as D002/D004. No arsenic noted in process (D004). PLEASE INVESTIGATE WHY WASTE IS BEING SHIPPED WITH THIS WASTE CODE. NOTE: It was indicated that soldermask waste is bagged and placed in the sludge drum for disposal. PLEASE ENSURE THAT THE WASTE PROFILE FOR THE WASTE IN WHICH IT IT BEING PLACED ACCOUNTS FOR THIS WASTE. No bagged soldermask waste was noted in the waste drums on the day of inspection.

Eval Notes: Limited re-inspection to confirm that compliance actions represented in response to November 12, 2015 inspection have been completed. 2015

UNI FLEX CIRCUITS (Continued) **S103993118**

NOI G321: Lack of HW specific training documentation RTC: Specific training and job description has been added to records for te WWTS. Available onsite for inspection. Re-inspection observation: Not corrected. See observations above. 2015 NOI G340 Tank assessment RTC: Tank assessment is being completed by John Standberg PE for Uni-flex. Re-inspection observation: Copy of assessment provided to inspctor on day of inspection. Cursory review of assessment demonstrated that it had identitied deficiencies in system, which were corrected. Assessment also included PE stamp, seismic calculations, containment calculations and addressed overfill and ancillary equipment as required. Assessment done to 66265.192 and .193 standards as required. 2015 NOI G343 Tank inspections RTC: New log for PBR inspection has been created and is [Truncated]

VIASYSTEMS TECHNOLOGIES CORP DBA TTM TECHNOLOGIES INC (Continued) **1000141855**

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1025

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 204432.9

Environmental Interest/Information System:
TSCA SUBMITTER
US EPA TRIS (Toxics Release Inventory System) contains information

VIASYSTEMS TECHNOLOGIES CORP DBA TTM TECHNOLOGIES INC (Continued) **1000141855**

from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	03/29/1985
Comments:	General Electric sent a letter to the Department of Health Services,

GE NUCLEAR ENERGY (Continued) **1000323216**

Toxic Substances Control Division (DHS) requesting withdrawal of their Part A Permit Application for status as a treatment, storage, and disposal facility. GE stated that they did not store wastes on-site for more than 90 days, did not treat wastes on-site, did not dispose of wastes on-site, and did not accept wastes from other sites. As such, they requested that their status be changed to that of solely a generator of hazardous wastes since their operations at the site were on-going.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/02/1988
Comments: The U.S. Environmental Protection Agency (EPA) requested that the California Department of Health Services, Toxic Substances Control Division (DHS) send more information about General Electric's (GE) facility in order for them to update their records. U.S. EPA had received the letter sent by DHS to GE on March 2, 1987, stating that DHS recognized GE as solely a generator and rescinding their Interim Status Document. U.S. EPA indicated that they were unable to make the final determination on GE's status as a treatment, storage, and disposal facility or change the Hazardous Waste Management Data System database to reflect any change in their status until they had sufficient information.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/02/1987
Comments: The Department of Health Services, Toxic Substance Control Division (DHS) responded to General Electric's (GE) request for withdrawal of their Part A Permit Application and rescission of their Interim Status Document. This correspondence notified GE that DHS no longer considered them as a treatment, storage, or disposal facility and that GE's Interim Status Document had been rescinded. The letter also notified GE that they must continue to comply with applicable regulations as a generator of hazardous wastes, and that they must file a new facility permit if they wish to operate a hazardous waste facility in the future.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/08/1988
Comments: The U.S. Environmental Protection Agency (EPA) received and reviewed additional information sent by the California Department of Health Services, Toxic Substances Control Division (DHS) in response to EPA's previous request dated February 29, 1988. DHS presented EPA with the previous General Electric (GE) facility inspection reports and a notification of hazardous waste activity indicating generator only status on June 7, 1988. U.S. EPA stated that they recognized GE as solely a generator, and indicated that they would update their database accordingly.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

West Map:	5640416 SAN JOSE WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

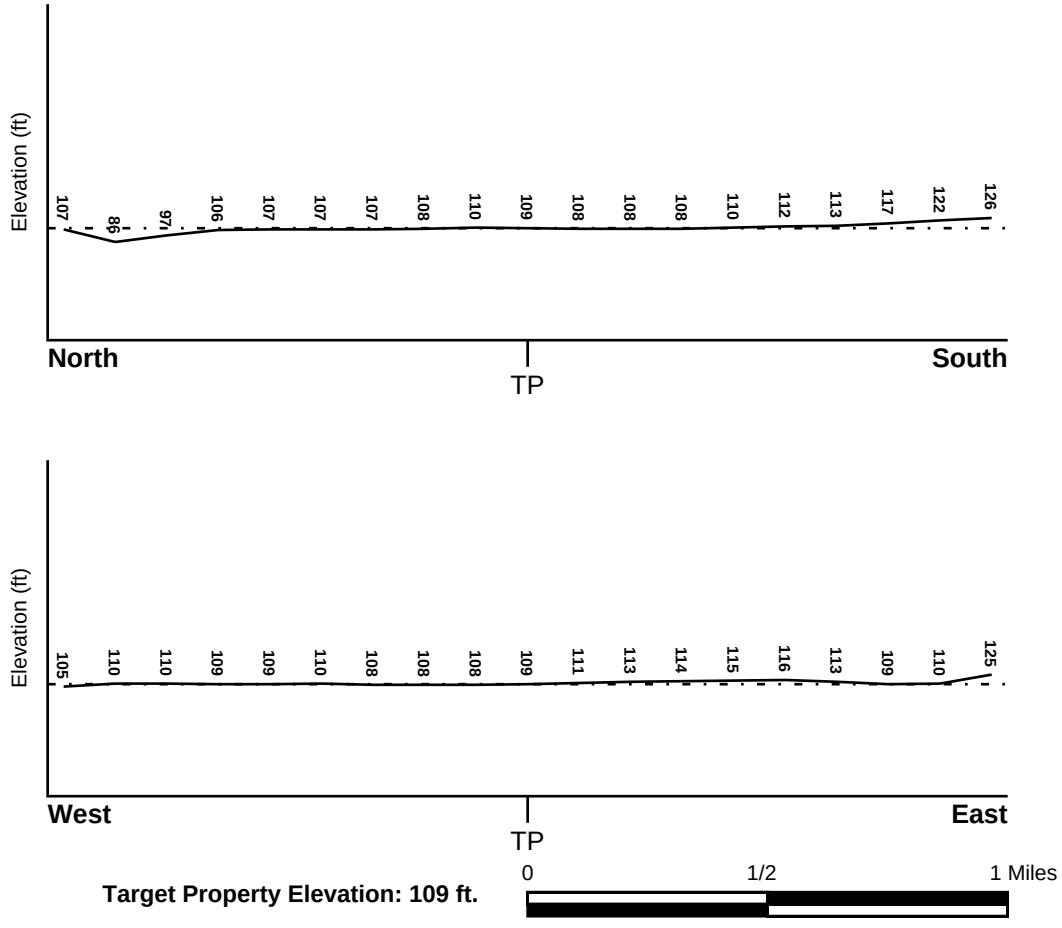
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 109 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

SAN JOSE EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/8 - 1/4 Mile NE
Site Name:	Lorentz Barrel & Drum Co
Site EPA ID Number:	CAD029295706
Groundwater Flow Direction:	North-Northeast
Measured Depth to Water:	25 feet to 40 feet.
Hydraulic Connection:	Aquitards separate the aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Organization ID:	USGS-CA		
Organization Name:	USGS California Water Science Center		
Monitor Location:	007S001E16C011M	Type:	Well
Description:	Not Reported	HUC:	18050003
Drainage Area:	Not Reported	Drainage Area Units:	Not Reported
Contrib Drainage Area:	Not Reported	Contrib Drainage Area Unts:	Not Reported
Aquifer:	California Coastal Basin aquifers		
Formation Type:	Not Reported	Aquifer Type:	Not Reported
Construction Date:	19681101	Well Depth:	Not Reported
Well Depth Units:	Not Reported	Well Hole Depth:	1004
Well Hole Depth Units:	ft		

Ground water levels,Number of Measurements:	464	Level reading date:	1983-01-10
Feet below surface:	77.7	Feet to sea level:	Not Reported
Note:	Not Reported		

Level reading date:	1983-01-09	Feet below surface:	81.6
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	1983-01-08	Feet below surface:	80.6
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	1983-01-07	Feet below surface:	80.6
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	1983-01-06	Feet below surface:	80.7
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	1983-01-05	Feet below surface:	80.6
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	1983-01-04	Feet below surface:	80.0
