RE: DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE CITY OF RIO VISTA 2045
GENERAL PLAN UPDATE DATED AUGUST 15, 2025, STATE CLEARINGHOUSE
NUMBER [2024101291](#)

Dear Krystine Ball,

The Department of Toxic Substances Control (DTSC) reviewed the Draft Environmental Impact Report (DEIR) for the City of Rio Vista 2045 General Plan Update. The 2045 General Plan Update is an update to the City of Rio Vista's adopted General Plan. The General Plan Update includes comprehensive updates to the required elements under the State Planning and Zoning Law, as well as other optional elements that the City has elected to include in its General Plan. The updated plan consolidates goals and policies in order to guide development and conservation in Rio Vista through 2045. DTSC recommends and requests consideration of the following comments:

1. When agricultural crops and/or land uses are proposed or rezoned for residential use, several contaminants of concern (COCs) can be present. The Lead Agency shall identify the amounts of Pesticides and Organochlorine Pesticides (OCPs) historically used on the property. If present, OCPs requiring further analysis are dichloro-diphenyl-trichloroethane, toxaphene, and dieldrin. Additionally, any level of arsenic present would require further analysis and sampling and must meet

approved local area baselines or thresholds. If they do not, remedial action must take place to mitigate them below those thresholds. Additional COCs may be found in mixing/loading/storage areas, drainage ditches, farmhouses, or any other outbuildings and should be sampled and analyzed. If smudge pots had been routinely utilized, additional sampling for Polycyclic Aromatic Hydrocarbons and/or Total Petroleum Hydrocarbons may be required. These recommendations should be adhered to and become part of the environmental document. Please refer to the [DTSC's Human and Ecological Risk Office \(HERO\) webpage](#) for the most recent guidance and screening levels.

2. All imported soil/fill material should be tested to assess any contaminants of concern meet screening levels as outlined in [DTSC's Preliminary Endangerment Assessment Guidance Manual](#). Additionally, DTSC advises referencing the [DTSC Information Advisory Clean Imported Fill Material Fact Sheet](#) if importing fill is necessary. To minimize the possibility of introducing contaminated soil/fill material, there should be documentation of the origins of the soil/fill material and, if applicable, sampling be conducted to ensure that the imported soil/fill material are suitable for the intended land use. The soil sampling should include analysis based on the source of the soil/fill and knowledge of prior land use.

DTSC would like to thank you for the opportunity to comment on the DEIR for the City of Rio Vista 2045 General Plan Update. Thank you for your assistance in protecting California's people and environment from the harmful effects of toxic substances. If you have any questions or would like clarification on DTSC's comments, please respond to this letter or via our [CEQA Review email](#) for additional guidance.

Sincerely,

Tamara Purvis
