1 INTRODUCTION

Precision Civil Engineering, Inc. (PCE) has prepared this Initial Study/Mitigated Negative Declaration (IS/MND) on behalf of City of Fresno (City) to address the environmental effects of the Proposed Fresno Senior Center (P24-00678) and Affordable Housing (P24-00214) Project ("Project" or "proposed Project"). This document has been prepared in accordance with the California Environmental Quality Act (CEQA), Public Resources Code Section 21000 et. seq and its implementing guidelines (14 CCR 15000, et seq. ("CEQA Guidelines"). The City of Fresno is the Lead Agency for this proposed Project. The site and the proposed Project are described in detail in SECTION 2 PROJECT DESCRIPTION.

1.1 Regulatory Information

An Initial Study (IS) is a document prepared by a lead agency to determine whether a project may have a significant effect on the environment. In accordance with California Code of Regulations Title 14 (Chapter 3, Section 15000, et seq.), also known as the CEQA Guidelines, Section 15064 (a)(1) states that an environmental impact report (EIR) must be prepared if there is substantial evidence in light of the whole record that the proposed Project under review may have a significant effect on the environment and should be further analyzed to determine mitigation measures or project alternatives that might avoid or reduce project impacts to less than significant levels. A negative declaration (ND) may be prepared instead if the lead agency finds that there is no substantial evidence in light of the whole record that the project may have a significant effect on the environment. An ND is a written statement describing the reasons why a proposed Project, not otherwise exempt from CEQA, would not have a significant effect on the environment and, therefore, why it would not require the preparation of an EIR (CEQA Guidelines Section 15371). According to CEQA Guidelines Section 15070, a ND or mitigated ND shall be prepared for a project subject to CEQA when either:

a. The IS shows there is no substantial evidence, in light of the whole record before the agency, that the proposed Project may have a significant effect on the environment, or

b. The IS identified potentially significant effects, but:

> *1. Revisions in the project plans or proposals made by or agreed to by the applicant before the proposed MND and IS is released for public review would avoid the effects or mitigate the effects to a point where clearly no significant effects would occur is prepared, and*
>
> *2. There is no substantial evidence, in light of the whole record before the agency, that the proposed Project as revised may have a significant effect on the environment.*

1.2 Document Format

This IS/MND contains five sections plus appendices. SECTION 1 INTRODUCTION provides bases of the IS/MND's regulatory information and an overview of the proposed Project. SECTION 2 PROJECT DESCRIPTION provides a detailed description of proposed Project components. SECTION 3 DETERMINATION concludes that the Initial Study is a mitigated negative declaration, identifies the environmental factors potentially affected based on the analyses contained in this IS, and includes with the Lead Agency's determination based upon those analyses. SECTION 4 EVALUATION OF ENVIRONMENTAL IMPACTS presents the CEQA checklist and environmental analyses for all impact areas and the mandatory findings of significance. A brief discussion of the reasons why the Project impact is

anticipated to be potentially significant, less than significant with mitigation incorporated, less than significant, or why no impacts are expected is included. SECTION 0

MITIGATION MONITORING AND REPORTING PROGRAM presents the mitigation measures recommended in the IS/MND for the Project. The CalEEMod Output Files, CHRIS Record Search Results, and Phase I ESA/Pre-Demolition Survey are provided as Appendix A, Appendix B, and Appendix C respectively, at the end of this document.

2 PROJECT DESCRIPTION

This section describes the components of the proposed Project in more detail, including project location, project objectives, and required project approvals.

2.1 Project Title

City of Fresno Senior Center (P24-00678) and Affordable Housing (P24-00214) Project ("Project" or "proposed Project")

2.2 Lead Agency Name and Address

City of Fresno
2600 Fresno Street
Fresno, CA 93721

2.3 Contact Person and Phone Number

Lead Agency
City of Fresno
Mike Mooneyham, PE
Licensed Professional Engineer
Capital Projects Department
(559) 621-8623

Applicant
City of Fresno
Parks, After School, Recreation, and Community Services
1515 E. Divisadero Street
Fresno, CA 93721

2.4 Study Prepared By

Precision Civil Engineering
1234 O Street
Fresno, CA 93721

2.5 Project Location

The Project site is located on the west side of North Blackstone Avenue between East Holland Avenue and East Swift Avenue at 4343 North Blackstone Avenue, Fresno, CA 93726, and 4323-4333 North Blackstone Avenue, Fresno, CA 93726, approximately 0.29 miles west of State Route (SR)-41 (see Figure 2-1). The site consists of two (2) parcels identified as Fresno County Assessor Parcel Numbers (APNs) 426-253-17 (4.25 acres) and 426-253-19 (1.26 acres), totaling approximately 5.51 acres. The site is a portion of Section 16, Township 13 South, Range 20 East, Mount Diablo Base and Meridian. Figure 2-2 and Figure 2-3 show the Project vicinity.

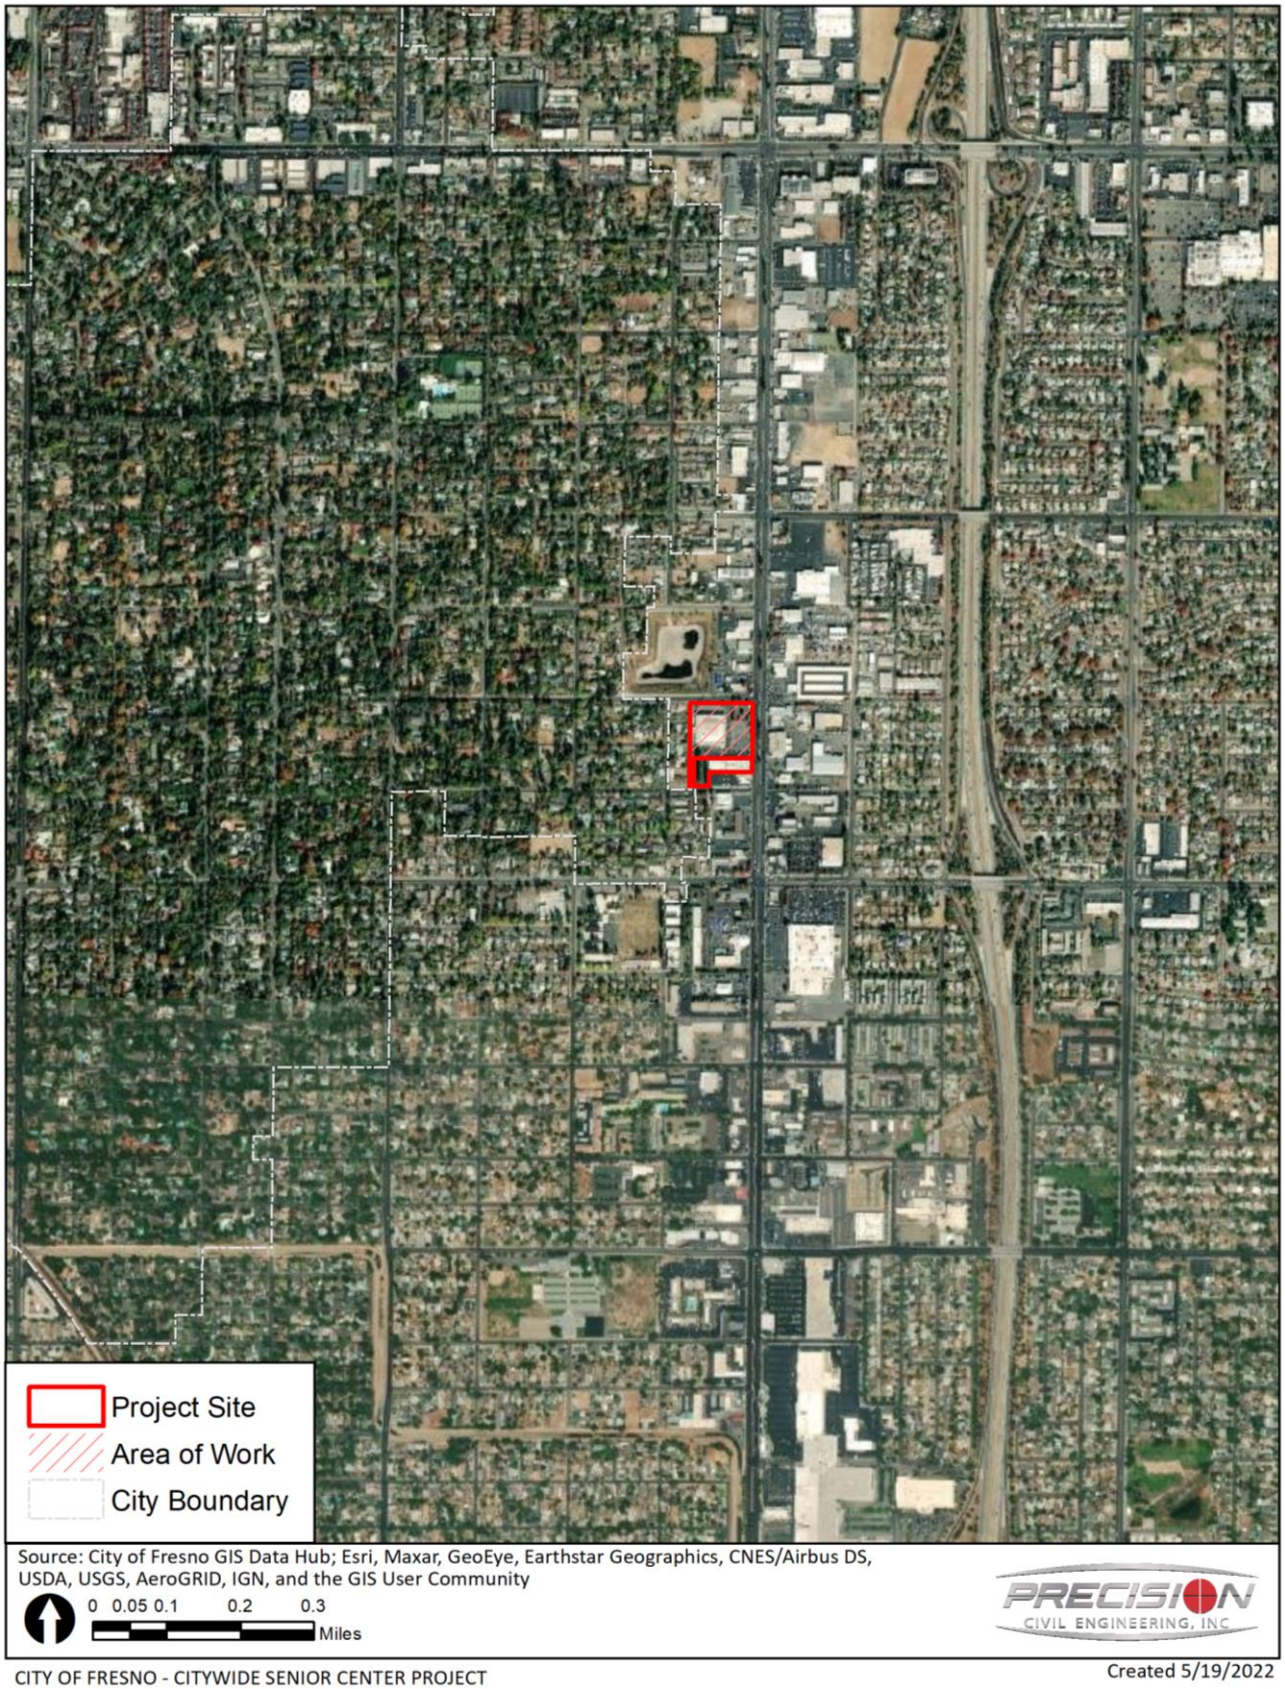

Figure 2-1 Regional Location Map

Figure 2-2 Project Site Aerial

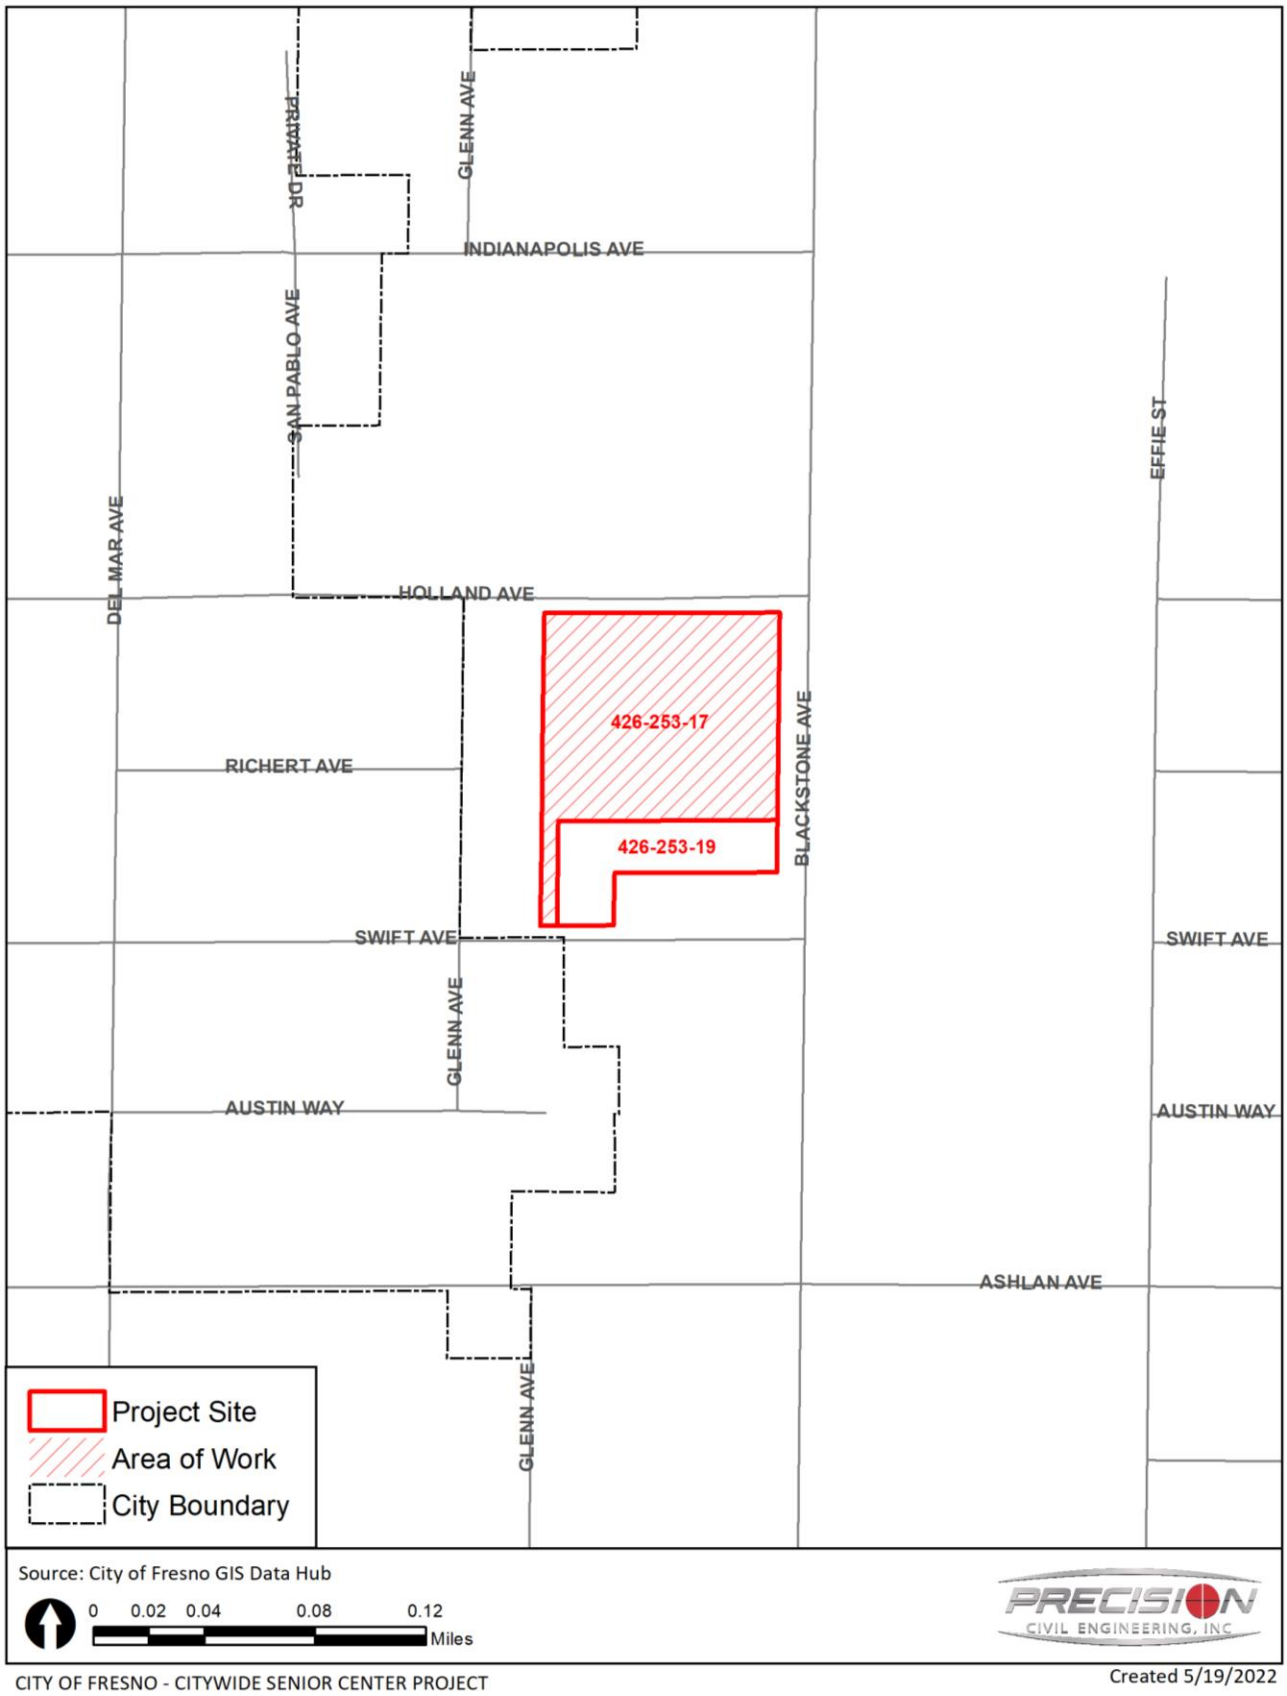

Figure 2-3 Project APN Map

2.6 Latitude and Longitude

The centroid of the Project area is 36.79683597136937, -119.79146471497464.

2.7 General Plan Designation

The Project site has Fresno General Plan land use designation of Corridor/Center Mixed Use (see Figure 2-4). According to the General Plan, Corridor/Center Mixed Use is intended to allow for horizontal and vertical mixed-use development in multiple story buildings along key circulation corridors (i.e., Blackstone Avenue Corridor) where height and density can be easily accommodated. Primary uses include ground-floor retail and upper-floor residential or offices, with supporting uses including personal and business services and public and institutional space. Permitted residential densities range between 16 and 30 units per acre with a minimum 40 percent residential uses. The maximum floor area ratio (FAR) is 1.5. No change in land use is proposed by the Project.

2.8 Zoning

The Project site is in the CMX – Corridor/Center Mixed Use zone district (see Figure 2-5). According to the Fresno Municipal Code (FMC), the purpose of the CMX Zone District is to provide mixed-use development along key circulation corridors, including retail, office, residential, etc. No change in zoning is proposed by the Project.

Figure 2-4 City of Fresno General Plan Land Use Map for Project site

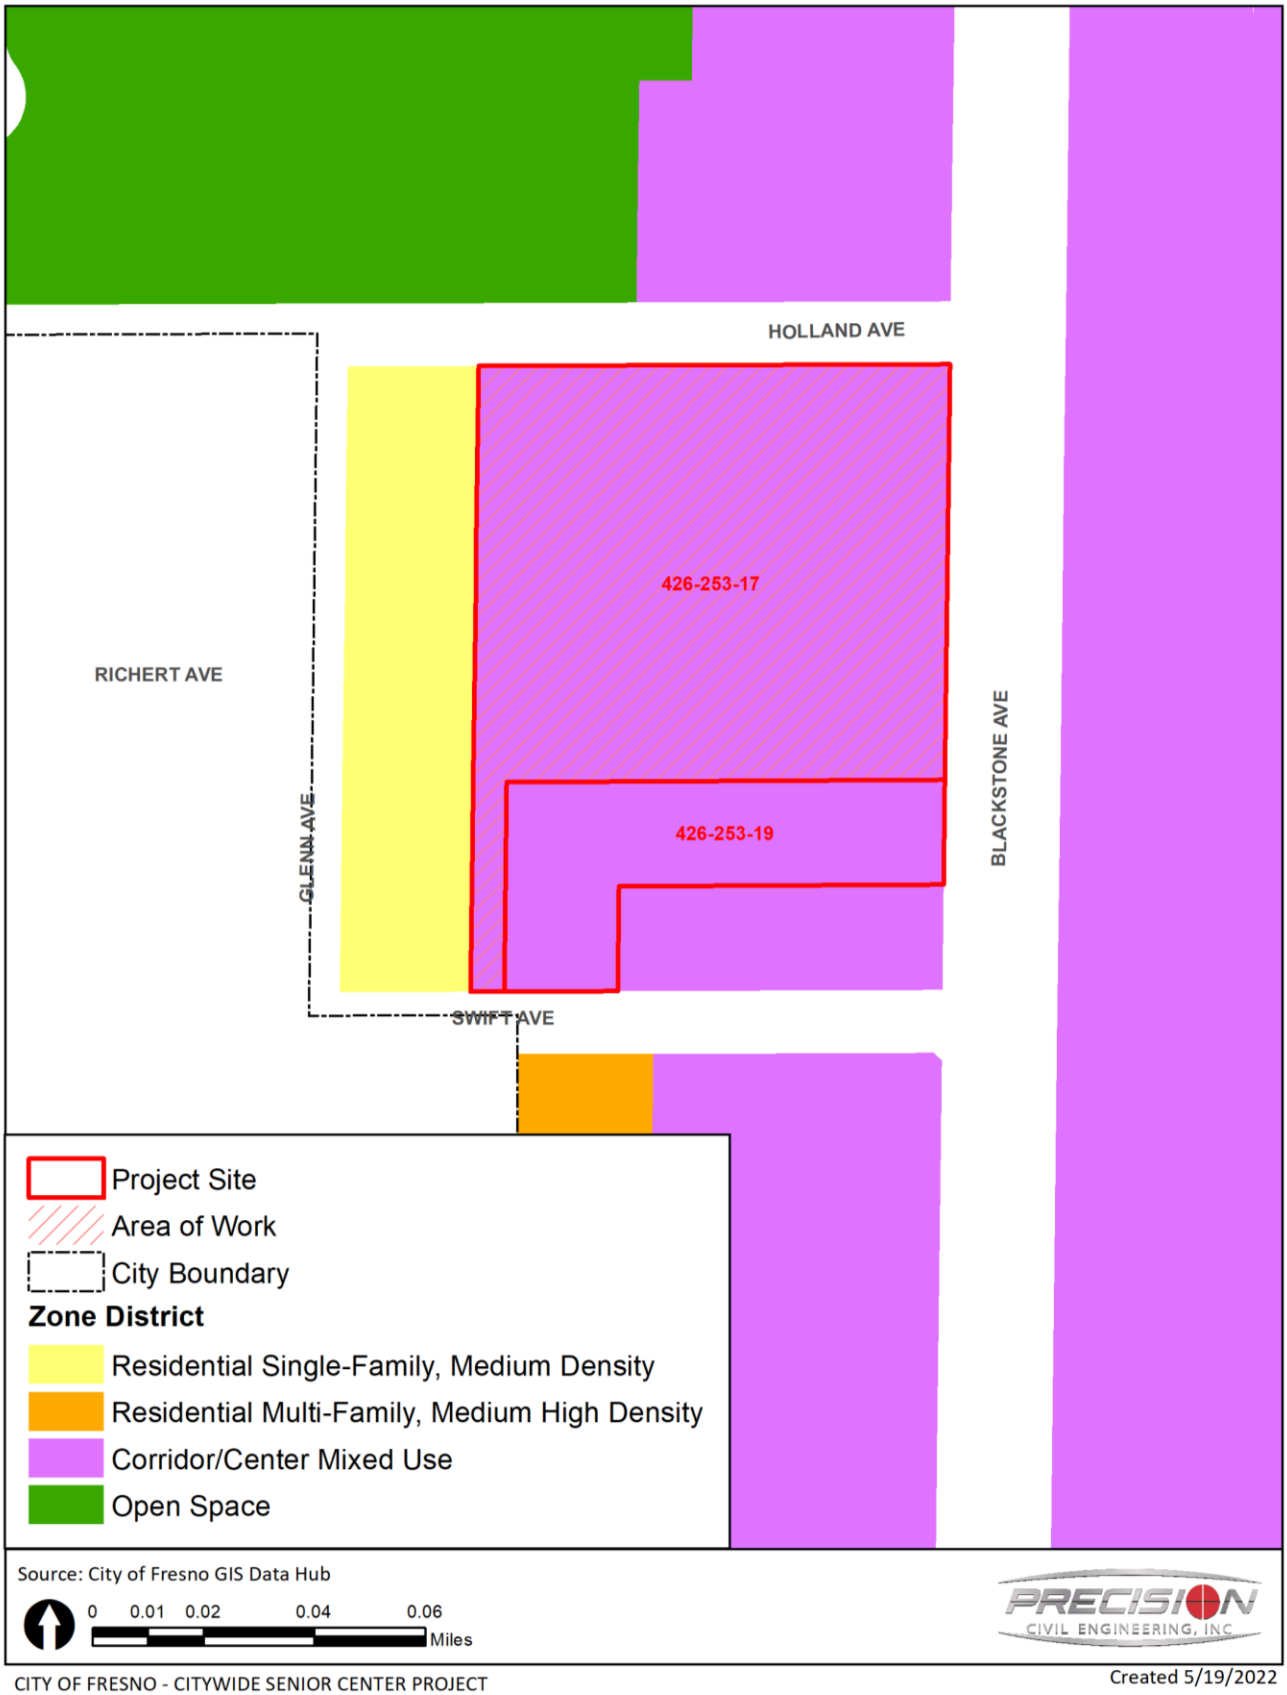

Figure 2-5 City of Fresno Zone District Map for Project site

2.9 Description of Project

The City of Fresno (Applicant) proposes the development of a Senior Center and Affordable Housing Project ("Project" or "proposed Project") on two (2) parcels located on the west side of North Blackstone Avenue between East Holland Avenue and East Swift Avenue at 4343 North Blackstone Avenue and 4233-4333 North Blackstone Avenue (APNs 426-253-17 and 426-253-19) totaling approximately 5.51 acres. The Senior Center would be located on the parcel identified as APN 426-253-17 and the Senior Affordable Housing would be located on the parcel identified as APN 426-253-19. The proposed Project consists of an approximately 35,000 square foot, two (2) story Senior Center and approximately 100 affordable housing units for seniors, which will be prefabricated, modular construction. Additional on-site improvements include parking, open space, recreational amenities (e.g., swimming pool, pickle ball courts, bocci ball courts), landscape and garden areas, pedestrian walkways, trash enclosures, drive aisles, and driveways. The Project would also construct 12 ft. sidewalks and reconstruct existing driveway approaches to City Standards. The Senior Center would provide programs and services for senior residents including, but not limited to, meal and nutrition programs, information and assistance, health and fitness programs, wellness programs, recreation activities, educational and arts programs, etc. to serve approximately 1,162 to 2,323 seniors a year. The Senior Center would operate from 9 am to 6 pm daily.

2.10 Site and Surrounding Land Uses and Setting

Project Setting

The Project site was previously developed with a former grocery store and paved parking lot, that has been demolished. The site is currently vacant and undeveloped with no structures or on-site improvements. Topography of the Project site is generally flat as it has been previously developed and therefore graded and paved. The existing biotic conditions and resources of the Project site is composed of shrubs and trees as part of the site's urban landscaping.

East Holland Avenue, a two (2)-lane, east-west collector forms the northerly site boundary and North Blackstone Avenue, a six (6)-lane, north-south arterial forms the easterly site boundary. Existing street frontage improvements include curb, gutter, sidewalk, storm-drains, streetlights, etc.

The Blackstone Avenue Corridor is classified by the Fresno General Plan as a Bus Rapid Transit (BRT) Corridor and Activity Corridor that is targeted for increased urban development through infill, rehabilitation, and mixed uses.

Surrounding Land Uses and Setting

The Project site is in Fresno city limits and is within an established urban neighborhood. The neighborhood has been within city limits since 1978. As referenced in Table 2-1, surrounding existing uses and structures include commercial (north, south, east) and residential (west). Beyond the adjacent parcels, Fresno County Island is located approximately 145 feet west and 35 feet south of the Project site.

Table 2-1 Existing Uses, General Plan Designations, and Zone Districts of Surrounding Properties

Direction from the Project site	Existing Use	General Plan Designation	Zone District
North	Commercial, ponding basin	Corridor/Center Mixed Use; Open Space – Ponding Basin	CMX Corridor/Center Mixed Use; OS Open Space
East	Commercial	Corridor/Center Mixed Use	CMX Corridor/Center Mixed Use

South	Restaurant, Church	Corridor/Center Mixed Use; Residential - Medium High Density	CMX Corridor/Center Mixed Use; RM-1 Residential Multi-Family, Medium High Density
West	Residential	Residential - Medium Density	RS-5 Residential Single-Family, Medium Density

2.11 Site Preparation

Site preparation would include demolition, grading and minor excavation for installation of utility infrastructure for conveyance of water, sewer, stormwater, and irrigation. Building, grading, encroachment, site utilities, landscaping, solar, and FMFCD permits would be subject to review and approval by the appropriate agency and/or department to ensure compliance with applicable codes and regulations.

2.12 Project Construction and Phasing

Construction would take place following review and approval of the associated entitlement by the City of Fresno. It is estimated that construction for the Senior Center would begin in December 2024 with completion by August 2026. Operations would begin shortly after construction is completed. An estimated construction timeline for the affordable housing units is unknown at this time.

2.13 Project Components

This section describes the overall components of the Project, such as the proposed buildings, landscaping, vehicle and pedestrian circulation, and utilities.

Site Layout and Elevations

As shown in Figure 2-6, the Project proposes a 35,000 square foot, two (2)-story Senior Center with related on-site improvements including a paved parking lot providing 153 parking spaces, 100,000 square feet of open space with recreational amenities including a swimming pool, pickle ball courts, bocci ball court, and garden area, landscape areas, pedestrian walkways, trash enclosures, and drive aisles and driveways.

Conceptual elevations for the Senior Center are shown in Figure 2-9. As shown, the Senior Center is a two (2)-story building that would reach a maximum height of 38 feet, six (6) inches. The exterior walls would be covered in cement plaster, with cement board accents around building entrances. Bronze-framed aluminum storefront windows would also provide visual distinction.

A six (6) foot high wrought iron fence is proposed at the north and east side property lines, as well as interior to the site around landscaped and parking areas. Several pedestrian gates are proposed to provide access within and outside the site.

The site layout and elevations for the affordable housing units is unknown at this time but would be in accordance with FMC requirements as verified and ensured through the entitlement and building permit processes.

Building and Site Design Features

The Project would meet all mandatory requirements for residential and non-residential buildings as outlined in the 2022 Energy Code and verified through the building permit process. Mandatory requirements that would be met include building ventilation and indoor air quality, space conditioning systems, water heating systems, electric power distribution, and electric ready buildings. The Project would not follow any other GreenPoint ratings.

Mandatory requirements apply to building ventilation and indoor air quality, space conditioning systems, water heating systems, electric power distribution, and electric ready buildings.

The Project would be built in accordance with all mandatory indoor water use requirements as outlined in the 2022 California Green Building Standards Code, Title 24, Part 11, Section 4.303 – Indoor Water Use and verified through the building permit process. As a building that contains plumbing fixtures and fittings, the Project shall comply with water-conserving measures for water closets, urinals, showerheads, and faucets. In addition, the Project would be required to install submeters to measure water usage accordance with the California Plumbing Code.

The Project would also be built in accordance with all mandatory outdoor water use requirements as outlined in the 2022 California Green Building Standards Code, Title 24, Part 11, Section 4.304 – Outdoor Water Use and verified through the building permit process. As a development that contains landscaping the Project shall comply with the updated Model Water Efficient Landscape Ordinance (MWELO) (California Code of Regulations, Title 23, Chapter 2.7, Division 2), as implemented and enforced through the building permit process. As proposed, the Project meets the MWELO requirements.

Site Circulation and Parking

As shown in Figure 2-6, the Senior Center would be accessible via three (3) point of ingress/egress and one (1) non-through delivery access road for the pantry/kitchen. One (1) point of ingress/egress would be located on the eastern property line on North Blackstone Avenue, one (1) point of ingress/egress and the access road would be located on the north side of the property on East Holland Avenue, and one (1) point of ingress/egress would be located on the south side of the property on East Swift Avenue. The Project proposes a paved parking lot with 153 parking stalls, in addition to a bicycle rack with space for six (6) bicycles. Of the 153 proposed parking spaces, 35 would be "EV Capable" (i.e., a parking space linked to a listed electrical panel with sufficient capacity to provide at least 110/120 volts and 20 amperes to the parking space) and nine (9) would be with electric vehicle service equipment (EVSE), accounting for 25% of the parking spaces in accordance with the 2022 California Green Building Standards Code, Title 24, Part 11. Additionally, 13 EVCS parking spaces, one (1) EVCS standard accessible space, and one (1) EVCS van accessible space would be provided on-site. Inside/outside turning radii are also proposed per City of Fresno Standards for fire and solid waste vehicle access.

The site circulation and parking for the affordable housing units is unknown at this time but would be in accordance with FMC requirements as verified and ensured through the entitlement and building permit processes.

Open Space and Landscaping

Proposed open space is depicted in Figure 2-6. As shown, the Project proposes 100,000 square feet of open space with on-site recreational amenities including a swimming pool, pickle ball courts, bocci ball court garden area, landscape areas, and pedestrian walkways.

Open space and landscaping for the affordable housing units is unknown at this time but would be in accordance with FMC requirements as verified and ensured through the entitlement and building permit processes.

Public Services and Utilities

The Project site is within city limits and thus, would be required to connect to water, wastewater, and stormwater services. Natural gas, electricity, telecommunications, and solid waste services are provided by private companies.

In addition, the Project would be subject to fees for the construction, acquisition, and improvements for public services including but not limited to: Fire Protection Services, Police Protection Services, and Schools.

2.14 Required Project Approvals

The City of Fresno requires the following review, permits, and/or approvals for the proposed Project. Other approvals not listed below may be required as identified through the entitlement process. In addition, other agencies may have the authority to issue permits prior to implementation of the Project as listed below.

- Development Permit
- Building Permit
- Grading Permit
- Site Utilities Permit
- Encroachment Permit
- Solar Permit
- Landscaping Permit
- Fresno Metropolitan Flood Control District
- Fresno County Department of Public Health
- San Joaquin Valley Air Pollution Control District
- California Regional Water Quality Control Board

2.15 Technical Studies

The analysis of the Project throughout this Initial Study relied in part on the technical studies listed below prepared for the Project, as well as other sources, including the City of Fresno General Plan and Fresno Municipal Code. Technical studies conducted for this Project are incorporated throughout the IS and provided in the following appendices.

- Appendix A: CalEEMod Output Files (Annual)
- Appendix B: CHRIS Record Search Results
- Appendix C: Phase I ESA and Pre-Demolition Survey

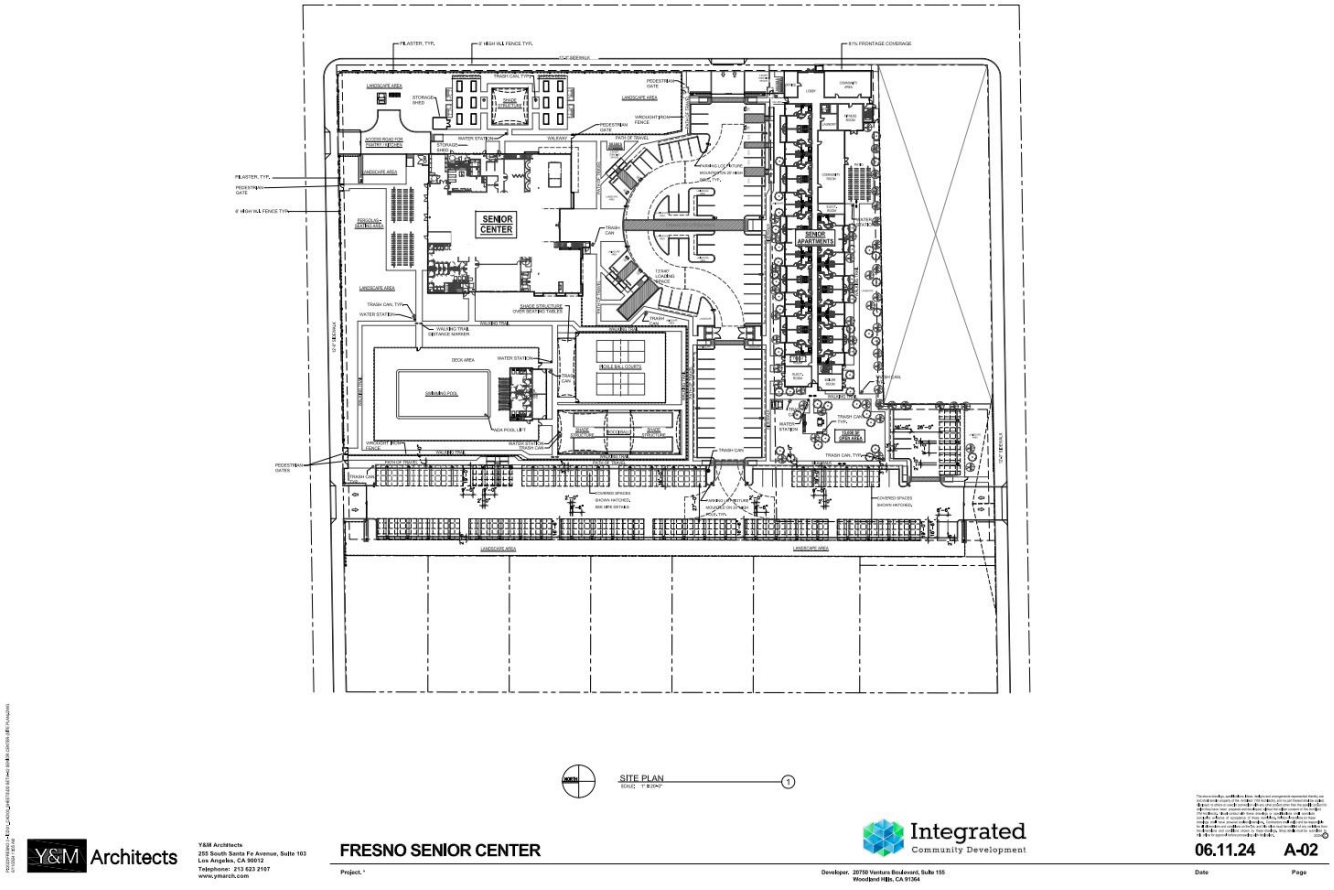

Figure 2-6 Site Plan for Senior Center

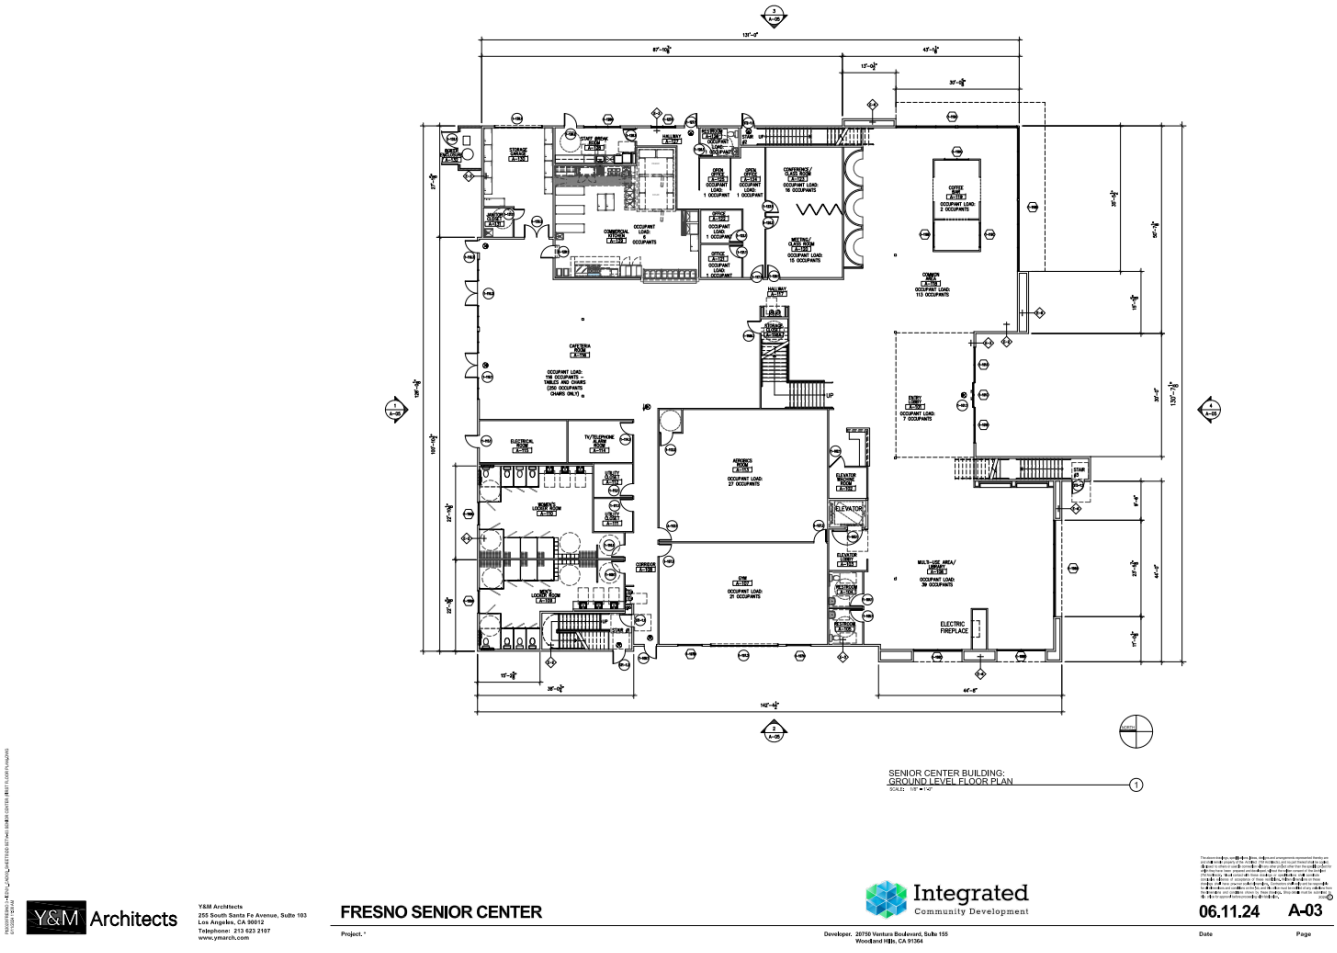

Figure 2-7 Senior Center Ground Level Floor Plan

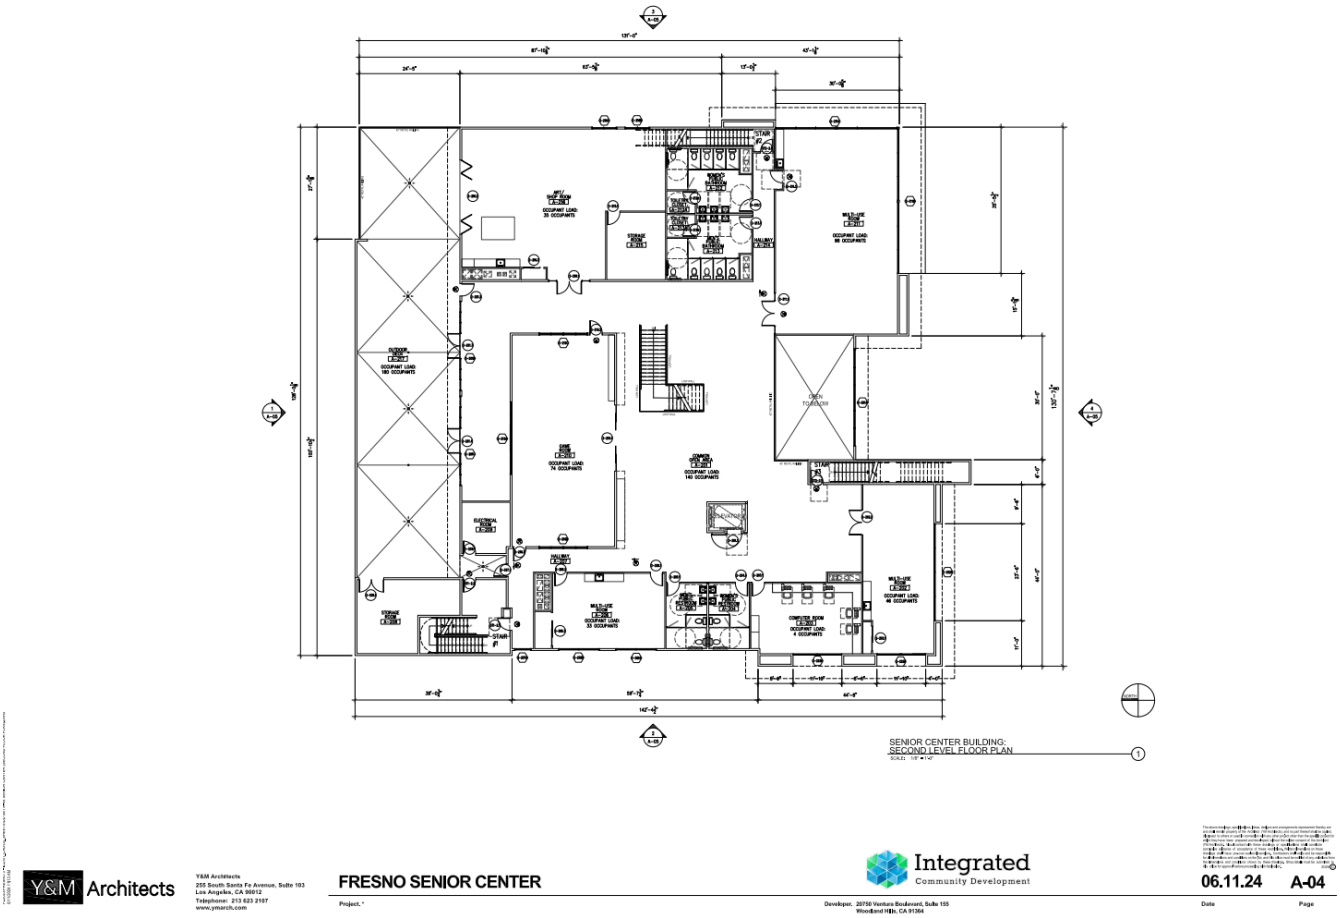

Figure 2-8 Senior Center Second Level Floor Plan

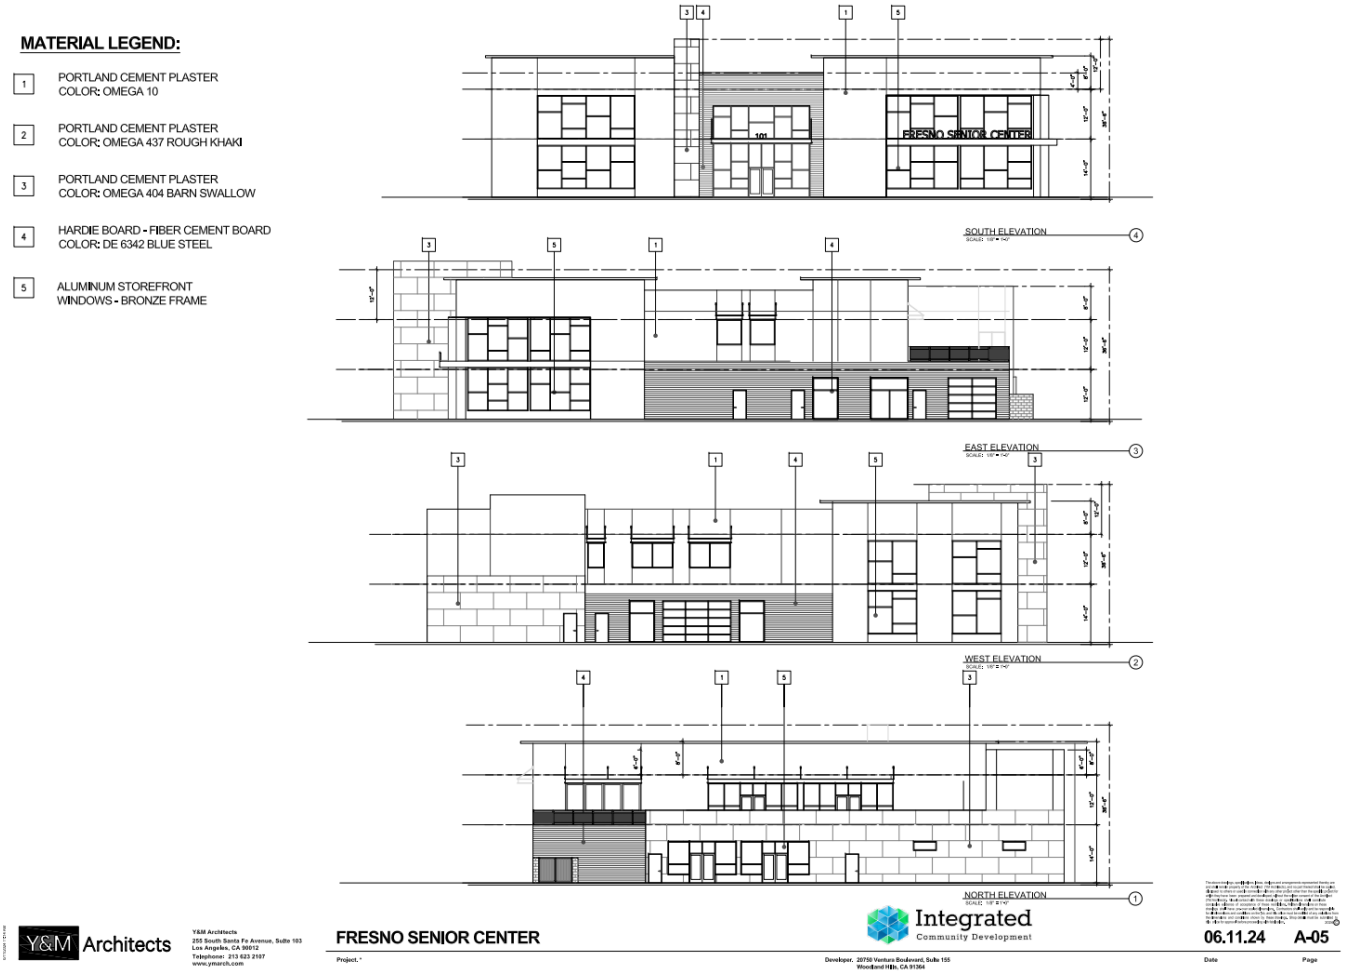

Figure 2-9 Senior Center Exterior Elevations

2.16 Consultation with California Native American Tribes

The State requires lead agencies to consider the potential effects of proposed projects and consult with California Native American tribes during the local planning process for the purpose of protecting Traditional Tribal Cultural Resources through the California Environmental Quality Act (CEQA) Guidelines. Pursuant to PRC Section 21080.3.1, the lead agency shall begin consultation with the California Native American tribe that is traditionally and culturally affiliated with the geographical area of the proposed project. Such significant cultural resources are either sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a tribe which is either on or eligible for inclusion in the California Historic Register or local historic register, or, the lead agency, at its discretion, and support by substantial evidence, choose to treat the resources as a Tribal Cultural Resources (PRC Section 21074(a)(1-2)). According to the most recent census data, California is home to 109 currently recognized Indian tribes. Tribes in California currently have nearly 100 separate reservations or Rancherias. Fresno County has a number of Rancherias such as Table Mountain Rancheria, Millerton Rancheria, Big Sandy Rancheria, Cold Springs Rancheria, and Squaw Valley Rancheria. These Rancherias are not located within the city limits.

Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See PRC Section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per PRC Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that PRC Section 21082.3(c) contains provisions specific to confidentiality.

Currently, the Table Mountain Rancheria Tribe and the Dumna Wo Wah Tribe have requested to be notified pursuant to Assembly Bill 52 (AB 52). A certified letter was mailed to the above-mentioned tribes on June 7, 2022. The 30-day period for the tribes to request consultation ended on July 7, 2022. Neither tribe requested consultation.

3 DETERMINATION

3.1 Environmental Factors Potentially Affected

As indicated by the discussions of existing and baseline conditions, and impact analyses that follow in this Chapter, environmental factors not checked below would have no impacts or less than significant impacts resulting from the project. The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages. Mitigation measures are recommended for each of the potentially significant impacts that would reduce the impact to less than significant.

- ☐ Aesthetics
- ☐ Agriculture and Forestry Resources
- ☐ Air Quality
- ☐ Biological Resources
- ☒ Cultural Resources
- ☐ Energy
- ☒ Geology and Soils
- ☐ Greenhouse Gas Emissions
- ☐ Hazards and Hazardous Materials
- ☐ Hydrology and Water Quality
- ☐ Land Use Planning
- ☐ Mineral Resources
- ☒ Noise
- ☐ Population and Housing
- ☐ Public Services
- ☐ Recreation
- ☐ Transportation
- ☒ Tribal and Cultural Resources
- ☐ Utilities and Service Systems
- ☐ Wildfire

The analyses of environmental impacts in SECTION 4 EVALUATION OF ENVIRONMENTAL IMPACTS result in an impact statement, which shall have the following meanings.

Potentially Significant Impact. This category is applicable if there is substantial evidence that an effect may be significant, and no feasible mitigation measures can be identified to reduce impacts to a less than significant level. If there are one or more “Potentially Significant Impact” entries when the determination is made, an EIR is required.

Less than Significant with Mitigation Incorporated. This category applies where the incorporation of mitigation measures would reduce an effect from a “Potentially Significant Impact” to a “Less Than Significant Impact.” The lead agency must describe the mitigation measure(s), and briefly explain how they would reduce the effect to a less than significant level (mitigation measures from earlier analyses may be cross-referenced).

Less Than Significant Impact. This category is identified when the proposed Project would result in impacts below the threshold of significance, and no mitigation measures are required.

No Impact. This category applies when a project would not create an impact in the specific environmental issue area. “No Impact” answers do not require a detailed explanation if they are adequately supported by the information sources cited by the lead agency, which show that the impact does not apply to the specific project (e.g., the project falls outside a fault rupture zone). A “No Impact” answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).

3.2 Determination

On the basis of this initial evaluation (to be completed by the Lead Agency):

☐ *I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.*

☒ *I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.*

☐ *I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT (EIR) is required.*

☐ *I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An EIR is required, but it must analyze only the effects that remain to be addressed.*

☐ *I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.*

Approved By:

October 28, 2024

Mike Mooneyham, PE, Licensed Professional Engineer — Date
City of Fresno, Capital Projects Department

4 EVALUATION OF ENVIRONMENTAL IMPACTS

4.1 AESTHETICS

Except as provided in Public Resources Code Section 21099, **would the project:**		Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Have a substantial adverse effect on a scenic vista?				X
b)	Substantially damage scenic resources, including, but not limited to, trees, rock out-croppings, and historic buildings within a state scenic highway?				X
c)	In non-urbanized areas, substantially degrade the existing visual character or quality public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X	
d)	Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X	

4.1.1 Environmental Setting

The city of Fresno is located within Fresno County in the San Joaquin Valley in central California. The Project site is located in the central area of the city of Fresno. The Project site is within a fully developed, urban neighborhood surrounded by a mix of existing land uses including commercial (north, east, and west), residential (west), and ponding basin (north). The area contains existing infrastructure including roadways, streetlights, parking lot lights, and ambient light sources.

4.1.2 Impact Assessment

a) Have a substantial adverse effect on a scenic vista?

No Impact. The Project site does not contain nor is it near any scenic vistas including but not limited to vista points or scenic corridors. The Fresno General Plan identifies “Vista Points” and “Scenic Corridors” within the Fresno Sphere of Influence. Identified Vista Points are situated near and along the San Joaquin River, which is more than

four (4) miles north of the Project site. Van Ness Boulevard is identified as a Scenic Corridor and is approximately 0.5 miles west of the Project site. Thus, because the scenic vistas are not on or near the Project site, it can be determined that the Project would have no impact on a scenic vista.

b) Substantially damage scenic resources, including, but not limited to, trees, rock out-croppings, and historic buildings within a state scenic highway?

No Impact. According to the California Scenic Highway Program, the nearest eligible state scenic highway (State Route 168) is approximately 2.3 miles northeast of the Project site.[1] As such, the Project would not damage scenic resources, including trees, rock outcroppings, and historic buildings within a state scenic highway and no impact would occur because of the Project.

c) In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

Less than Significant Impact. The Project site is within an urbanized area surrounded by commercial and residential uses. According to the Fresno General Plan, the Project site has a planned land use designation of Corridor/Center Mixed Use. The Corridor/Center Mixed-Use land use designation is intended to allow for horizontal and vertical mixed-use development in multiple story buildings along key circulation corridors (i.e., Blackstone Avenue Corridor) where height and density can be easily accommodated. Primary uses include ground-floor retail and upper-floor residential or offices, with personal and business services and public and institutional space as supportive uses. The General Plan provides specific policies and objectives for the Corridor/Center Mixed Use land use designation including Implementing Policies UF-12-a. BRT Corridors, UF-12-b. Activity Centers, UF-12-c. Local-Serving Neighborhood Centers, UF-12-d. Appropriate Mixed-Use, LU-2-a. Infill Development and Redevelopment, and LU-5-i. Housing for Seniors. Compliance with these policies would ensure that the Project would not conflict with regulations governing scenic quality.

The Project site is within the CMX – Corridor/Center Mixed Use Zone District. According to Section 15-1101 of the Fresno Municipal Code, the CMX Corridor/Center Mixed-Use Zone District is intended to allow for either horizontal or vertical mixed-use development along key circulation corridors (i.e., Blackstone Avenue Corridor) in the city where height and density can be easily accommodated. Development of the Project site is subject to the City of Fresno entitlement and building permit process for review and approval by the City. Through this process, the Project shall meet all applicable zoning regulations including but not limited to density, intensity, and massing development standards (FMC Section 15-1103), site design development standards (FMC Section 15-1104), façade design development standards (FMC Section 15-1105), and other policies and regulations governing scenic quality (i.e., General Plan, Building Code).

[1] Caltrans. California State Scenic Highway System Map. Accessed on September 12, 2024, https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa

Through compliance with the General Plan and Zoning Ordinance, it can be determined that the visual character of the Project would be compatible with the existing commercial development in the area and thus would not substantially degrade existing visual character due to its size and character. Impacts would be less than significant.

d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

Less than Significant Impact. Generally, lighting impacts are associated with artificial lighting in evening hours either through interior lighting from windows or exterior lighting (e.g., street lighting, parking lot lighting, landscape lighting, cars, and trucks). The Project site is previously developed and is located within an urban neighborhood. As such, the site and the area contain existing infrastructure including roadways, streetlights, parking lot lights, and ambient light sources. Re-development of the Project site would not result in significant increases in the amount of light from streetlights, exterior lighting, and vehicular headlights that otherwise already occur in the area.

Project construction may introduce light and glare resulting from construction activities that could adversely affect day or nighttime views. Although construction activities are anticipated to occur primarily during daylight hours, it is possible that some activities could occur during dusk or early evening hours. Section 10-109 of the FMC permits construction work to take place between 7:00 am and 10:00 pm on any day except Sunday, for work that is accomplished pursuant to a building permit. Construction during these time periods could result in temporary and short-term light and glare from construction vehicles or equipment. However, once construction is completed, any light and glare from these activities would cease to occur.

Once developed, the Project would be required to comply with the General Plan and Fresno Municipal Code, which contain specific, enforceable requirements and/or restrictions intended to prevent light and glare impacts. Conceptual elevations for the Senior Center are shown in Figure 2-9. As shown, the Senior Center is a two (2)-story building that would reach a maximum height of 38 feet, six (6) inches. The exterior walls would be covered in cement plaster, with cement board accents around building entrances. Bronze-framed aluminum storefront windows would also provide visual distinction. These materials are non-reflective. The affordable housing units would be developed in accordance with FMC requirements, which ensure project design features that would prevent light and glare impacts.

Further, compliance with Title 24 lighting requirements would reduce impacts related to nighttime light. The lighting requirements cover outdoor spaces including regulations for mounted luminaires (i.e., high efficacy, motion sensor controlled, time clocks, energy management control systems, etc.). As such, conditions imposed on the Project by the City pursuant to Title 24 would reduce light and glare impacts to a less than significant impact.

4.1.3 Mitigation Measures

None required.

4.2 AGRICULTURE AND FORESTRY RESOURCES

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farm-land), as shown on the maps prepared pursuant to the Farmland Mapping and Monito-ring Program of the California Resources Agency, to non-agricultural use?				X
b)	Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c)	Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d)	Result in the loss of forest land or conversion of forest land to non-forest use?				X
e)	Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				X

4.2.1 Environmental Setting

The Project site is located within the city limits of Fresno. The Project site is zoned CMX – Corridor/Center Mixed Use and has a planned land use designation of Corridor/Center Mixed Use. The site was previously developed with a 40,564-square foot (sf.) grocery store, strip mall, and improvements such as paved parking lot, curb, gutter, sidewalks, landscaping, etc. The existing biotic site conditions and resources of the site can be defined primarily as urban landscaping with trees and shrubs. There are no water features on site. The Project site does not contain any agricultural lands or operations nor forestry resources such as forest land or timberland.

Farmland Monitoring and Mapping Program

The California Department of Conservation manages the Farmland Mapping and Monitoring Program (FMMP) that provides maps and data for analyzing land use impacts to farmland. The FMMP produces the Important Farmland Finder as a resource map that shows quality (soils) and land use information. Agricultural land is rated according to soil quality and irrigation status, in addition to many other physical and chemical characteristics. The highest quality land is called "Prime Farmland." Maps are updated every two years. According to the Farmland Monitoring and Mapping Program, California Important Farmland Finder, the Project site is categorized as "Urban and Built-Up Land" as of 2018.[2]

California Land Conservation Act

The California Land Conservation Act of 1965 (i.e., the Williamson Act) allows local governments to enter contracts with private landowners to restrict parcels of land agricultural or open space uses. In return, property tax assessments of the restricted parcels are lower than full market value. The minimum length of a Williamson Act contract is 10 years and automatically renews upon its anniversary date; as such, the contract length is essentially indefinite. The Project site nor the surrounding properties are subject to the Williamson Act Contract.

4.2.2 Impact Assessment

*a) Conv*ert *Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farm*land *Mapping and Monitoring Program of the California Resources Agency, to non-agricultural* use?

No Impact. The Project site is designated as "Urban and Built-Up Land" and lands in its immediate vicinity are mostly designated as "Urban and Built-Up Land" according to the FMMP. As such, the Project site is not located on lands designated as "Prime Farmland," "Unique Farmland," or "Farmland of Statewide Importance." For this reason, the Project would result in no impact.

[2] California Department of Conservation. (2018). California Important Farmland Finder. Accessed on September 12, 2024, https://maps.conservation.ca.gov/DLRP/CIFF/

b) Conflict with existing zoning for agricultural use or a Williamson Act contract?

No Impact. The Project site is not zoned for or located within an area zoned for agricultural uses and is not under Williamson Act contract. Thus, the Project would not conflict with existing zoning for agricultural use, or a Williamson Act contract and no impact would occur.

c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

No Impact. The Project site is not planned or zoned for forest land, timberland, or timberland zoned Timberland Production. Further, the Project site would not cause the rezoning of forest land, timberland, or timberland zoned Timberland Production. As a result, the Project would not conflict with existing zoning for, or cause rezoning of, forest land, timberland, or timberland zoned Timberland Production and no impact would occur.

d) Result in the loss of forest land or conversion of forest land to non-forest use?

No Impact. The Project site does not contain forest land and is not planned or zoned for forest land or forest uses. Implementation of the Project would therefore not result in the loss of forest land or conversion of forest land to non-forest use. As a result, no impact would occur.

e) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?

No Impact. The Project site is in a developed and urbanized neighborhood within the Fresno city limits. The site nor adjacent properties contain farmland, agricultural uses, or forest land. Implementation of the Project would therefore not result in changes in the existing environment that would result in the conversion of farmland or forest land. No impact would occur.

4.2.3 Mitigation Measures

None required

4.3 AIR QUALITY

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Conflict with or obstruct implementation of the applicable air quality plan (e.g., by having potential emissions of regulated criterion pollutants which exceed the San Joaquin Valley Air Pollution Control Districts (SJVAPCD) adopted thresholds for these pollutants)?			X	
b)	Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?			X	
c)	Expose sensitive receptors to substantial pollutant concentrations?			X	
d)	Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?			X	

4.3.1 Environmental Setting

The Project is located within the San Joaquin Valley Air Basin (SJVAB). The San Joaquin Valley Air Pollution Control District (SJVAPCD) regulates air quality in eight (8) counties including: Fresno, Kern, Kings, Madera, Merced, San Joaquin, Stanislaus, and Tulare. The San Joaquin Valley Air Pollution Control District (SJVAPCD) oversees the San Joaquin Valley Air Basin.

Impacts on air quality result from emissions generated during short-term activities (construction) and long-term activities (operations). Construction-related emissions consist mainly of exhaust emissions (NOx and PM) from construction equipment and other mobile sources, and fugitive dust (PM) emissions from earth moving activities. Operational emissions are source specific and consist of permitted equipment and activities and non-permitted equipment and activities.

Air pollution in the SJVAB can be attributed to both human-related (anthropogenic) and natural (non-anthropogenic) activities that produce emissions. Air pollution from significant anthropogenic activities in the SJVAB includes a variety of industrial-based sources as well as on- and off-road mobile sources. Four main sources of air pollutant emissions in the SJVAB are motor vehicles, industrial plants, agricultural activities, and construction activities. All four of the major pollutant sources affect ambient air quality throughout the Air Basin. These sources, coupled with geographical and meteorological conditions unique to the area, stimulate the formation of unhealthy

air. Air pollutants can remain in the atmosphere for long periods and can build to unhealthful levels when stagnant conditions that are common in the San Joaquin Valley occur. Pollutants are transported downwind from urban areas with many emission sources which are also recirculated back to the urban areas.

Further, the SJVAB is in non-attainment for ozone, PM_{10}, and $PM_{2.5}$, which means that certain pollutants' exposure levels are often higher than the normal air quality requirements. The air quality standards have been set to protect public health, particularly the health of vulnerable people. Therefore, if the concentration of those contaminants exceeds the norm, some susceptible individuals in the population are likely to experience health effects. Concentration of the pollutant in the air, the length of time exposed and the individual's reaction are factors that affect the extent and nature of the health effects.

San Joaquin Valley Air Pollution Control District

The SJVAPCD is the agency primarily responsible for ensuring that NAAQS and CAAQS are not exceeded and that air quality conditions are maintained in the SJVAB, within which the Project is located. Responsibilities of the SJVAPCD include, but are not limited to, preparing plans for the attainment of ambient air quality standards, adopting and enforcing rules and regulations concerning sources of air pollution, issuing permits for stationary sources of air pollution, inspecting stationary sources of air pollution and responding to citizen complaints, monitoring ambient air quality and meteorological conditions, and implementing programs and regulations required by the FCAA and the CCAA.

The SJVAPCD rules and regulations that may apply to projects that will occur during buildout of the Project include but are not limited to the following:

Rule 2010 – Permits Required. *The purpose of this rule is to require any person constructing, altering, replacing or operating any source operation which emits, may emit, or may reduce emissions to obtain an Authority to Construct or a Permit to Operate. This rule also explains the posting requirements for a Permit to Operate and the illegality of a person willfully altering, defacing, forging, counterfeiting or falsifying any Permit to Operate.*

Rule 2201 – New and Modified Stationary Source Review Rule. *The purpose of this rule is to provide for the following:*

The review of new and modified Stationary Sources of air pollution and to provide mechanisms including emission trade-offs by which Authorities to Construct such sources may be granted, without interfering with the attainment or maintenance of Ambient Air Quality Standards; and

No net increase in emissions above specified thresholds from new and modified Stationary Sources of all nonattainment pollutants and their precursors.

Rule 4001 – New Source Performance Standards. *This rule incorporates the New Source Performance Standards from Part 60, Chapter 1, Title 40, Code of Federal Regulations (CFR).*

Rule 4002 – National Emission Standards for Hazardous Air Pollutants. *This rule incorporates the National Emission Standards for Hazardous Air Pollutants from Part 61, Chapter I, Subchapter C, Title 40, Code of Federal Regulations (CFR) and the National Emission Standards for Hazardous Air Pollutants for Source Categories from Part 63, Chapter I, Subchapter C, Title 40, Code of Federal Regulations (CFR).*

Rule 4102 – Nuisance. *The purpose of this rule is to protect the health and safety of the public and applies to any source operation that emits or may emit air contaminants or other materials.*

Rule 4601 – Architectural Coatings. *The purpose of this rule is to limit VOC emissions from architectural coatings. This rule specifies architectural coatings storage, cleanup, and labeling requirements.*

Rule 4641 – Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations. *The purpose of this rule is to limit VOC emissions from asphalt paving and maintenance operations. This rule applies to the manufacture and use of cutback asphalt, slow cure asphalt and emulsified asphalt for paving and maintenance operations.*

Regulation VIII – Fugitive PM10 Prohibitions. *The purpose of Regulation VIII (Fugitive PM10 Prohibitions) is to reduce ambient concentrations of fine particulate matter (PM10) by requiring actions to prevent, reduce or mitigate anthropogenic fugitive dust emissions.*

Rule 9510 – Indirect Source Review. *The purposes of this rule are to:*

1. Fulfill the District's emission reduction commitments in the PM10 and Ozone Attainment Plans.

2. Achieve emission reductions from the construction and use of development projects through design features and on-site measures.

3. Provide a mechanism for reducing emissions from the construction of and use of development projects through off-site measures.

Fresno General Plan

In regard to local measures and thresholds for air quality impacts, the Fresno General Resource and Conservation Element outlines goals, objectives, and policies for addressing air quality. A sample of applicable goals and policies are as follows:

Objective RC-4: *In cooperation with other jurisdictions and agencies in the San Joaquin Valley Air Basin, take necessary actions to achieve and maintain compliance with State and federal air quality standards for criteria pollutants.*

> ***Policy RC-4-a: Support Regional Efforts.*** *Support and lead, where appropriate, regional, State and federal programs and actions for the improvement of air quality, especially the SJVAPCD's efforts to monitor and control air pollutants from both stationary and mobile sources and implement Reasonably Available Control Measures in the Ozone Attainment Plan.*
>
> ***Policy RC-4-b: Conditions of Approval.*** *Develop and incorporate air quality maintenance requirements, compatible with Air Quality Attainment and Maintenance Plans, as conditions of approval for General Plan amendments, community plans, Specific Plans, neighborhood plans, Concept Plans, and development proposals.*

Policy RC-4-c: Evaluate Impacts with Models. *Continue to require the use of computer models used by SJVAPCD to evaluate the air quality impacts of plans and projects that require such environmental review by the City.*

4.3.2 Thresholds of Significance

To assist local jurisdictions in the evaluation of air quality impacts, the SJVAPCD has published the *Guide for Assessing and Mitigating Air Quality Impacts* (GAMAQI). This guidance document includes recommended thresholds of significance to be used for the evaluation of short-term construction, long-term operational, odor,

toxic air contaminant, and cumulative air quality impacts. Accordingly, the SJVAPCD-recommended thresholds of significance are used to determine whether implementation of the proposed Project would result in a significant air quality impact. Projects that exceed these recommended thresholds would be considered to have a potentially significant impact to human health and welfare. The thresholds of significance are summarized, as follows:

(1) Criteria Air Pollutants: SJVAPCD adopted thresholds of significance for criteria air pollutants, as shown in Table 4-1. The thresholds of significance are based on a calendar year basis. For construction emissions, the annual emissions are evaluated on a rolling 12-month period. The following summarizes these thresholds:

Short-Term Emissions of Particulate Matter (PM10): Construction impacts associated with the proposed Project would be considered significant if the feasible control measures for construction in compliance with Regulation VIII as listed in the SJVAPCD guidelines are not incorporated or implemented, or if project-generated emissions would exceed 15 tons per year (TPY).

Short-Term Emissions of Ozone Precursors (ROG and NOX): Construction impacts associated with the proposed Project would be considered significant if the project generates emissions of Reactive Organic Gases (ROG) or NO_X that exceeds 10 TPY.

Long-Term Emissions of Particulate Matter (PM10): Operational impacts associated with the proposed Project would be considered significant if the project generates emissions of PM_{10} that exceed 15 TPY.

Long-Term Emissions of Ozone Precursors (ROG and NOX): Operational impacts associated with the proposed Project would be considered significant if the project generates emissions of ROG or NOX that exceeds 10 TPY.

Table 4-1 SJVAPCD Recommended Air Quality Thresholds of Significance[3]

Pollutant	Significance Threshold	
	Construction Emissions (tons/year)	Operational Emission (tons/year)
CO	100	100
NO_X	10	10
ROG	10	10
SO_X	27	27
PM_{10}	15	15
$PM_{2.5}$	15	15

(2) Conflict with or Obstruct Implementation of Applicable Air Quality Plan: Due to the region's nonattainment status for ozone, $PM_{2.5}$, and PM_{10}, if the Project-generated emissions of either of the ozone precursor pollutants (i.e., ROG and NO_x) or PM_{10} would exceed the SJVAPCD's significance thresholds, then the Project would be considered to conflict with the attainment plans. In addition, if the Project would result in a change in land use and

[3] SJVAPCD. (2015). Guidance for Assessing and Mitigating Air Quality Impacts. Accessed on September 12, 2024, https://www.valleyair.org/transportation/GAMAQI-2015/FINAL-DRAFT-GAMAQI.PDF

corresponding increases in vehicle miles traveled, the Project may result in an increase in vehicle miles traveled that is unaccounted for in regional emissions inventories contained in regional air quality control plans.

(3) Local Mobile-Source CO Concentrations: Local mobile source impacts associated with the proposed Project would be considered significant if the project contributes to CO concentrations at receptor locations in excess of the CAAQS (i.e., 9.0 ppm for 8 hours or 20 ppm for 1 hour).

(4) Toxic Air Contaminants: Exposure to toxic air contaminants (TAC) would be considered significant if the probability of contracting cancer for the Maximally Exposed Individual (i.e., maximum individual risk) would exceed 10 in 1 million or would result in a Hazard Index greater than one (1).

As recommended by the SJVAPCD, the latest approved California Air Pollution Control Officer's Association (CAPCOA) methodology was utilized as the TAC screening methodology. According to the CAPCOA Guidance Document titled "Health Risk Assessments for Proposed Land Use Projects," there are two (2) types of land use project that have the potential to cause long-term public health risk impacts. These project types are as follows:

- *Type A: Land use projects with toxic emissions that impact receptors, and*
- *Type B: Land use project that will place receptors in the vicinity of existing toxics sources.*

In this Guidance document, Type A projects examples are (project impacts receptors):

- combustion related power plants,
- gasoline dispensing facilities,
- asphalt batch plants,
- warehouse distribution centers,
- quarry operations, and
- other stationary sources that emit toxic substances.

(5) Odor: The intensity of an odor source's operations and its proximity to sensitive receptors influences the potential significance of odor emissions. Specific land uses that are considered sources of undesirable odors include landfills, transfer stations, composting facilities, sewage treatment plants, wastewater pump stations, asphalt batch plants and rendering plants. The SJVAPCD has identified these common types of facilities that have been known to produce odors in the San Joaquin Valley Air Basin and has prepared screening levels for potential odor sources ranging from one (1) to two (2) miles of distance from the odor-producing facility to sensitive receptors. Odor impacts associated with the proposed Project would be considered significant if the project has the potential to frequently expose members of the public to objectionable odors.

(6) Ambient Air Quality: The SJVAPCD applies the following guidance in determining whether an ambient air quality analysis should be performed: when assessing the significance of project-related impacts on air quality, it should be noted that the impacts may be significant when on-site emission increases from construction activities or operational activities exceed the 100 pounds per day screening level of any criteria pollutant after implementation of all enforceable mitigation measures. Under such circumstances, the SJVAPCD recommends that an ambient air quality analysis be performed.

4.3.3 Impact Assessment

a) Would the project conflict with or obstruct implementation of the applicable air quality plan (e.g., by having potential emissions of regulated criterion pollutants which exceed the San Joaquin Valley Air Pollution Control Districts (SJVAPCD) adopted thresholds for these pollutants)?

Less than Significant Impact. According to the GAMAQI, projects with emissions below the thresholds of significance for criteria pollutants would be determined to *"not conflict or obstruct implementation of the District's air quality plan."* The following analysis estimates criteria pollutants for buildout under the proposed Project using CalEEMod™ (Version 2022.1.1.26) that was modeled on October 7, 2024. Output files are provided in Appendix A.

Construction Emissions

Construction activities associated with Project development would generally include demolition, site preparation, grading, building construction, paving, and architectural coating. Table 4-2 provides the estimated construction criteria pollutant emissions of Project buildout. As shown, all estimated emissions are below significance thresholds. As a result, it can be anticipated that construction emissions as a result of the implementation of the Project would be less than significant.

Table 4-2 Construction Emissions of Criteria Air Pollutants, Unmitigated

Emissions Source (Tons Per Year)	CO	NO_x	ROG	PM_{10}	$PM_{2.5}$
Construction Year 2024	0.23	0.26	0.03	0.02	0.01
Construction Year 2025	2.16	1.59	0.20	0.29	0.16
Construction Year 2026	0.13	0.08	0.42	0.01	<0.005
Maximum Year of Emissions	**2.16**	**1.59**	**0.42**	**0.29**	**0.16**
Significance Threshold	100	10	10	15	15
Exceed Threshold?	**No**	**No**	**No**	**No**	**No**

Source: *CalEEMod, Version 2022.1.1.26, ran on October 7, 2024. See Appendix A.*

Operational Emissions

Pollutants of concern include ROG, NO_X, CO, PM_{10}, and $PM_{2.5}$. Table 4-3 provides the estimated operational criteria pollutant emissions of Project buildout. As shown, all estimated emissions are below significance thresholds. Therefore, the operational emissions would be less than significant.

Table 4-3 Operational Emissions of Criteria Air Pollutants, Unmitigated

Emissions Source (Tons Per Year)	CO	NO_x	ROG	PM_{10}	$PM_{2.5}$
Area	5.27	0.77	0.86	1.07	0.28
Energy	1.59	0.06	0.76	0.14	0.13
Mobile	0.11	0.20	0.01	0.02	0.02
Total Operational Emissions	**6.97**	**1.02**	**1.63**	**1.22**	**0.42**
Significance Threshold	100	10	10	15	15
Exceed Threshold?	**No**	**No**	**No**	**No**	**No**

Source: *CalEEMod, Version 2022.1.1.26, ran on October 7, 2024. See Appendix A.*

Toxic Air Contaminants

Regarding TAC, the proposed Project does not consist of any Type A land uses that have the potential to produce toxic emissions, including combustion related power plants, asphalt batch plants, and quarry operations. In

addition, the Project does not propose facilities for gasoline dispensing, warehouse distribution centers, or other stationary sources that emit toxic substances. Thus, based on this analysis utilizing the methodology outlined by the CAPCOA Guidelines, the proposed project is screened out and does not require a Health Risk Assessment and would not result in production of significant Toxic Air Contaminants (TACs).

Lastly, the Project shall comply with all rules and regulations administered by the SJVAPCD including but not limited to *Rule 9510* (Indirect Source Review) and *Regulation VIII* (Fugitive PM_{10} Prohibitions), which requires the approval of a Dust Control Plan prior to construction. The Project may also be subject to *Rule 2010* (Permits Required), *Rule 2201* (New and Modified Stationary Source Review), *Rule 4402* (Nuisance), *Rule 4601* (Architectural Coatings), and *Rule 4641* (Cutback, Slow Cure, and Emulsified Asphalt, Paving and Maintenance Operations). The Project design anticipates such requirements and incorporates the measures regarding air quality impacts. Thus, any impacts related to construction activities of the Project would be regulated through SJVAPCD regulations and requirements.

Overall, the Project would not have potential emissions of regulated criterion pollutants that exceed the SJVAPCD adopted thresholds. In addition, the Project shall be conditioned to meet additional rules and regulations administered by the SJVAPCD to minimize and mitigate on-site emissions. Consequently, the Project would result in a less than significant impact.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

Less than Significant Impact. The SJVAB is in non-attainment for ozone, PM_{10}, and $PM_{2.5}$, which means that certain pollutants' exposure levels are often higher than the normal air quality requirements. The requirements have been set to protect public health, particularly the health of vulnerable populations. Therefore, if the concentration of those contaminants exceeds the norm, some susceptible individuals in the population are likely to experience health effects. Concentration of the pollutant in the air, the length of time exposed and the individual's reaction are factors that affect the extent and nature of the health effects as analyzed in criterion a) above, the Project would have a less than significant impact on air quality and are excluded from quantifying criteria pollutant emissions for CEQA purposes. Therefore, the Project would not result in significant cumulative health impacts because the emissions are not at a level that would be considered cumulatively significant. As such, the Project would have a less than significant impact.

c) Expose sensitive receptors to substantial pollutant concentrations?

Less than Significant Impact. Sensitive receptors are defined as people that have an increased sensitivity to air pollution or environmental contaminants. Sensitive receptor locations include schools, parks and playgrounds, day care centers, nursing homes, hospitals, and residential dwelling unit(s). Sensitive receptors in proximity to the Project site, includes residential dwellings adjacent to the west and Del Mar Elementary School 0.10 miles southwest of the site. As stated under criterion a) above, emissions during construction or operations of individual projects would not reach the significance thresholds and are not anticipated to result in concentrations that reach or surpass ambient air quality requirements. In addition, implementation of the proposed Project would facilitate the development of a senior center and residential units, which is not a use which results in excessive pollutant concentrations which could impact sensitive receptors. Therefore, the Project would have a less than significant impact on nearby sensitive receptors.

d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less than Significant Impact. Specific land uses that are considered sources of undesirable odors include landfills, transfer stations, composting facilities, sewage treatment plants, wastewater pump stations, asphalt batch plants and rendering plants. The Project would not consist of such land uses; rather, implementation of the proposed Project consists of a senior center, and thus is unlikely to produce odors that would be considered to adversely affect a substantial number of people. Further, there are no major odor-generating sources within the Project vicinity. Although some odors may be emitted during construction of the site (i.e., through diesel fuel and exhaust from equipment), these odors would be temporary and last only during construction activities. For these reasons, any odor impacts associated with the Project would be less than significant.

4.3.4 Mitigation Measures

None required.

4.4 BIOLOGICAL RESOURCES

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
b)	Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?				X
c)	Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X
d)	Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				X
e)	Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				X
f)	Conflict with provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.				X

4.4.1 Environmental Setting

The Project site is within city limits and is surrounded by urbanized land uses. The site has been previously developed with commercial uses.

U.S. Fish and Wildlife – Special-Status Species Database

The U.S. Fish and Wildlife Service (USFWS) operates an "Information for Planning and Consultation" (IPaC) database, which is a project planning tool for the environmental review process that provides general information on the location of special-status species that are "known" or "expected" to occur (**note:** the database does not provide occurrences; refer to the California Department of Fish and Wildlife – Natural Diversity Database below).[4] Specifically, the database identifies 40 endangered species, 13 critical habitats, and 27 migratory birds that are potentially affected in Fresno County.[5] The database identified 16 endangered species, no critical habitats, and 16 migratory birds in Fresno City.

U.S. Fish and Wildlife – Critical Habitat Report

Once a species is listed under the federal Endangered Species Act, NOAA Fisheries is required to determine whether there are areas that meet the definition of Critical Habitat. Per NOAA Fisheries, Critical Habitat is defined as:

- *Specific areas within the geographical area occupied by the species at the time of listing that contain physical or biological features essential to conservation of the species and that may require special management considerations or protection; and*
- *Specific areas outside the geographical area occupied by the species if the agency determines that the area itself is essential for conservation.*[6]

The process of Critical Habitat designation is complex and involves the consideration of scientific data, public and peer review, economic, national security, and other relevant impacts.

According to the Critical Habitat for Threatened & Endangered Species Report updated September 12, 2024, the Project area and its immediate vicinity (0.50-mile radius from the site) are not located within a federally designated Critical Habitat. [7]

California Department of Fish and Wildlife – Natural Diversity Database

The California Department of Fish and Wildlife (CDFW) operates the California Natural Diversity Database (CNDDB), which is an inventory of the status and locations of special-status plants and animals in California in addition to the reported occurrences of such species. [8] According to the CDFW CNDDB Rarefind database, there are 24 species and 36 species occurrences that have been observed and reported to the CDFW in the Fresno North Quad as designated by the United States Geological Survey (USGS): tricolored blackbird, California tiger salamander, Northern California legless lizard, great egret, California glossy snake, Crotch bumble bee, Swainson's hawk, succulent owl's clover, California jewelflower, Fresno kangaroo rat, Antioch efferian robbergfly, snowy egret, western mastiff bat, California satintail, Madera leptosiphon, molestan blister beetle, Hurd's metapogon robberfly, Northern Claypan Vernal Pool, black-crowned night heron, San Joaquin Valley Orcutt grass, San Joaquin pocket mouse, coast horned lizard, Sanford's arrowhead, and western spadefoot.[9] Of the species, seven (7) species are federally and/or state-listed special-status species. The CNDDB also provides CNDDB-known occurrences within a set geographic location feature, as shown in Figure 4-1. Table 4-4 lists all species CNDDB-known occurrences within the five (5)-mile radius of the Project site. Since the Project site is fully developed, mostly paved, and does not include water bodies, it does not provide essential habitat for any of the species listed.

Table 4-4 Special-status Species Occurrences with 5-mile Radius of the Project Site

Special-status species	Date	Presence	Location
Sanford's arrowhead	1980/x/x	Presumed Extant*	0.4 miles west
western mastiff bat	1958/11/20	Presumed Extant*	1.2 miles west
Sanford's arrowhead	1980/x/x	Presumed Extant*	2.8 miles northwest
Fresno kangaroo rat	1898/4/23	Extirpated**	3.1 miles southwest
tricolored blackbird	1975/4/9	Presumed Extant*	2.8 miles northeast
Sanford's arrowhead	1980/9/11	Presumed Extant*	3.2 miles northeast
tricolored blackbird	1975/7/x	Extirpated**	2.9 miles northeast
Sanford's arrowhead	1993/9/23	Presumed Extant*	2.6 miles east
double-crested cormorant	2012/5/11	Presumed Extant*	3.1 miles southeast
burrowing owl	1990/x/x	Presumed Extant*	3.5 miles southeast
western mastiff bat	1991/4/17	Presumed Extant*	3.3 miles south
pallid bat	1909/10/6	Presumed Extant*	3.4 miles south
snowy egret	2012/5/10	Presumed Extant*	3.5 miles southwest
Sanford's arrowhead	2018/11/4	Presumed Extant*	3.8 miles northeast
Sanford's arrowhead	2018/11/4	Presumed Extant*	4.0 miles northeast
western mastiff bat	1991/4/17	Presumed Extant*	4.5 miles southwest
California tiger salamander	2017/2/10	Presumed Extant*	4.4 miles west

Sanford's arrowhead	1953/9/9	Presumed Extant*	4.9 miles northwest
Sanford's arrowhead	1954/5/23	Presumed Extant*	4.5 miles north
Northern Claypan Vernal Pool	1980/1/x	Presumed Extant*	4.9 miles north
San Joaquin Valley Orcutt grass	1987/6/1	Extirpated**	4.9 miles north
succulent owl's-clover	1981/6/2	Possibly Extirpated***	
western spadefoot	1995/3/3	Presumed Extant*	5.0 miles north
Multiple (5-mile accuracy): molestan blister beetle, Swainson's hawk, California jewelflower, coast horned lizard, Antioch efferian robberfly, California satintail, Crotch bumble bee, California tiger salamander, Madera leptosiphon, California glossy snake, Hurd's metapogon robberfly, Northern California legless lizard	188x-19xx	Multiple	N/A (5-mile accuracy)

** The most common entry. An occurrence is presumed to still be in existence until evidence to the contrary is received by the CNDDB.*

*** Only used when the element has been searched for but not seen for many years or when the habitat is destroyed at this site.*

**** Evidence of habitat destruction, or population extirpation has been received by the CNDDB for this site, but questions remain as to whether the element still exists.*

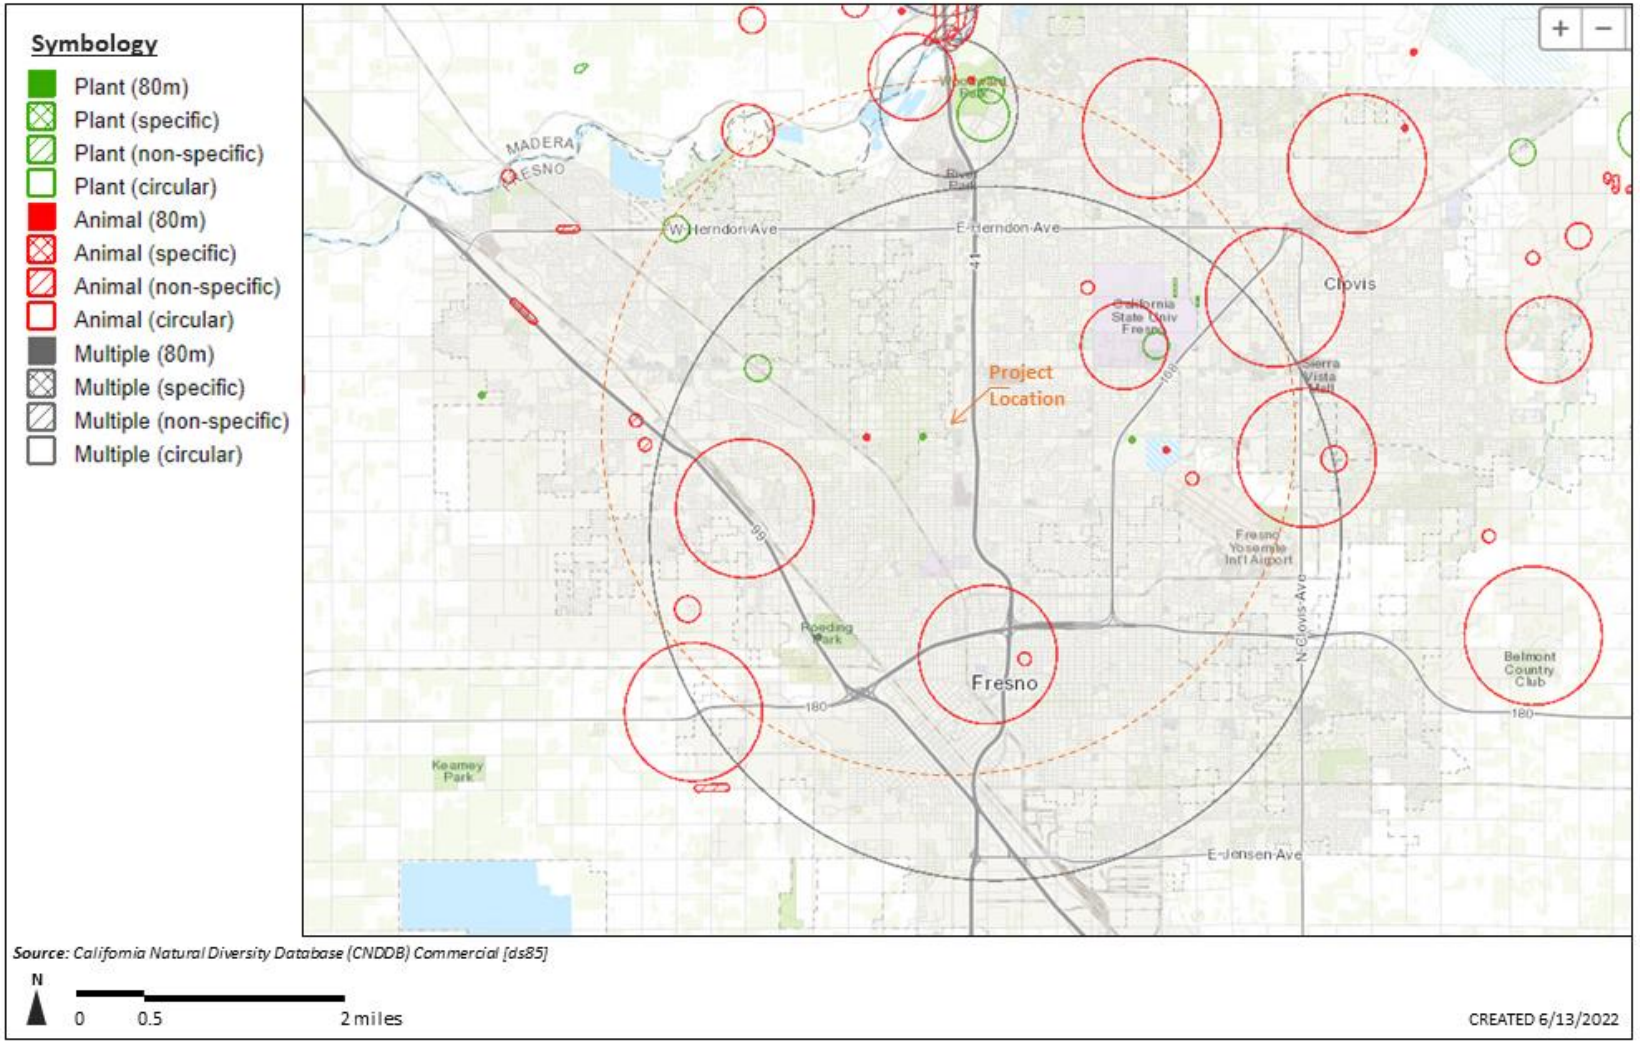

Figure 4-1 CNDDB Occurrences

U.S. Fish & Wildlife Service – National Wetlands Inventory

The USFWS provides a National Wetlands Inventory (NWI) with detailed information on the abundance, characteristics, and distribution of U.S. wetlands. A search of the USFWS NWI shows no federally protected wetlands (including but not limited to marsh, vernal pool, coastal, etc.) on the Project site or within the immediate vicinity (0.50-mile radius) of the Project site.[10]

Environmental Protection Agency – WATERS Geoviewer

The U.S. Environmental Protection Agency (EPA) WATERS GeoViewer provides a GeoPlatform based web mapping application of water features by location. According to the WATERS GeoViewer. According to the Waters GeoViewer, there are no surface water features on or in immediate vicinity (0.50-mile radius) of the Project site. [11]

4.4.2 Impact Assessment

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service?

No Impact. The Project site is within the city limits in an urban neighborhood. Topography of the site is generally flat. There is no site vegetation. There are no water features present. Further, there are no recorded occurrences of special-status or critical habitats on the Project site or within the immediate vicinity of the Project. For these reasons, the site conditions do not provide essential habitat for any candidate, sensitive, or special status species that may occur within the Project area. As a result, no impact would occur because of the Project.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service?

No Impact. According to the Fresno General Plan, California Department of Fish and Wildlife, and U.S. Fish and Wildlife Service, there are no known riparian habitats or other sensitive natural communities identified on the Project site or within the immediate vicinity. In addition, the site does not contain any water features that would provide habitat for such species. Further, the site is heavily impacted with very little vegetation which would not provide essential habitat. For these reasons, it can be determined that the Project site does not provide any riparian habitat and thus, no impact would occur because of the Project.

[10] U.S. Fish & Wildlife Service. National Wetlands Inventory. Accessed September 12, 2024, https://www.fws.gov/wetlands/data/Mapper.html

[11] Environmental Protection Agency. WATERS GeoViewer. Accessed on September 12, 2024, https://epa.maps.arcgis.com/apps/webappviewer/index.html?id=ada349b90c26496ea52aab66a092593b

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

No Impact. A search of the NWI shows no federally protected wetlands (including but not limited to marsh, vernal pool, coastal, etc.) on the Project site. Typically, the primary wetland indicators include hydrophytic vegetation, hydric soils, and surface hydrology. The on-site topography consists of developed and paved land with no water features, including ponds or standing water. The site comprises the following soil types, which are subject to low frequency of flooding and ponding: *SdA* – San Joaquin sandy loam (no flooding, no ponding).[12] Lastly, the site is designated as Zone X on the most recent FEMA Flood Insurance Rate Map (FIRM) No. 0601901570H dated 2/18/2009.[13] Zone X is an area of minimal flood hazards with a 0.2 percent-annual-chance of flood (i.e., 500-year flood). For these reasons, it can be determined that the Project site would not result in any impact on state or federally protected wetlands.

d) Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

No Impact. Wildlife movement corridors are linear habitats that function to connect two (2) or more areas of significant wildlife habitat. These corridors may function on a local level as links between small habitat patches (e.g., streams in urban settings) or may provide critical connections between regionally significant habitats (e.g., deer movement corridors).

Wildlife corridors typically include vegetation and topography that facilitate the movements of wild animals from one area of suitable habitat to another, in order to fulfill foraging, breeding, and territorial needs. These corridors often provide cover and protection from predators that may be lacking in surrounding habitats. Wildlife corridors generally include riparian zones and similar linear expanses of contiguous habitat.

As previously mentioned, the Project site does not contain habitat that could support wildlife species in nesting, foraging, or escaping from predators. This is based on the existing conditions of the site including the site's heavy alteration and no cover, vegetation, or water features. Due to these conditions, it can be determined that the Project would not interfere with wildlife movement and no impact would occur as a result of the Project.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

No Impact. While the Fresno General Plan calls for the protection of biological resources, the Project site does not indicate the presence of any sensitive habitat for wildlife features. In addition, the Fresno Municipal Code identifies tree protection and street tree policies. When the Project goes through the City of Fresno entitlement process, the Public Works Department will review the development for compliance with street trees standards and establish

[12] United States Department of Agriculture Natural Resources Conservation Service. Web Soil Survey. Accessed on September 12, 2024, https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx

[13] FEMA. FEMA Flood Map Service Center. Accessed September 12, 2024, https://msc.fema.gov/portal/home

conditions during project approval. Due to the lack of any identified special-status species or habitat for special-status species, the Project would not conflict with any local policies or ordinances protecting biological resources. Thus, the Project would have no impact.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

No Impact. The Project site is within the PG&E San Joaquin Valley Operation and Maintenance Habitat Conservation Plan (HCP). The HCP covers PG&E's routine operations and maintenance activities and minor new construction, on any PG&E gas and electrical transmission and distribution facilities, easements, private access routes, or lands owned by PG&E. The Project would not conflict or interfere with HCP. The Project is also located in the planning area of the Recovery Plan for Upland Species of the San Joaquin Valley, which addresses recovery goals for several species. The Project would not conflict with the plan since the site does not provide appropriate habitat for the species mentioned. In addition, the City, County, and Regional Planning Agency do not have any adopted or approved plans for habitat or natural community conservation. For these reasons, the Project would have no impact, and no mitigation measures are required.

4.4.3 Mitigation Measures

None required.

4.5 CULTURAL RESOURCES

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?		X		
b)	Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?		X		
c)	Disturb any human remains, including those interred outside of formal cemeteries?		X		

4.5.1 Environmental Setting

Generally, the term 'cultural resources' describes property types such as prehistoric and historical archaeological sites, buildings, bridges, roadways, and tribal cultural resources. As defined by CEQA, historical resources include sites, structures, objects, or districts that may have historical, prehistoric, architectural, archaeological, cultural, or scientific importance.

The city of Fresno has one (1) National Historical Landmark and 31 individual properties listed on the National Register of Historic Places as of 2019, including the Fresno Memorial Auditorium, Old Fresno Water Tower, Thomas R. Meux Home, Tower Theatre, etc., There are 31 properties listed in the California Register of Historic Resources.

The City of Fresno adopted the Historic Preservation Ordinance in 1979 and maintains a Local Register of Historic Resources that includes places in the National Register, buildings, structures, objects, sites, and districts that have sufficient integrity and are significant in Fresno's history. There are currently 277 individual properties listed on the Local Register of Historic Resources, including Fresno Buddhist Temple, Fresno Memorial Auditorium, and Helm Building.[14] In addition, Fresno also designates four (4) official local historic districts: the Porter Tract, the Wilson Island, Chandler Airfield/Fresno Municipal Airport, and Huntington Boulevard. There are also six (6) districts in Downtown and four (4) districts in the Tower District that have been proposed as historic districts.[15]

[14] City of Fresno. Historic Preservation Database. Accessed on September 12, 2024, https://cityoffresno.maps.arcgis.com/apps/webappviewer/index.html?id=80d8d181234a46a6a102460db2e9a57a

[15] City of Fresno. A Guide to Historic Architecture in Fresno, California. Accessed on September 12, 2024, http://www.historicfresno.org/districts/index.htm

Tribal Consultation

Currently, the Table Mountain Rancheria Tribe and the Dumna Wo Wah Tribe have requested to be notified pursuant to Assembly Bill 52 (AB 52). A certified letter was mailed to the above-mentioned tribes on June 7, 2022. The 30-day period for the tribes to request consultation ended on July 7, 2022. Neither tribe requested consultation.

Record Search

The Southern San Joaquin Information Center (SSJIC) conducted a California Historical Resources Information System (CHRIS) Record Search for the Project site and surrounding area (0.50-mile radius) on June 20, 2022 (Record Search File Number 22-238). The search results do not show any formally recorded prehistoric or historic archeological resources or historic buildings within the Project area or within the 0.5-mile radius. There are no cultural resources within the Project area or 0.5-mile radius listed in the National Register of Historic Places, the California Register of Historical Resources, the California Points of Historical Interest, California Inventory of Historic Resources, or the California State Historic Landmarks. The SSJIC Correspondence is provided in Appendix B.

4.5.2 Impact Assessment

a) Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?

Less than Significant with Mitigation Incorporated. Based on the CHRIS Records Search conducted on June 20, 2022, there are no known local, state, or federal designated historical resources on the Project site or within the Project area. However, while there is no evidence that historical resources exist on the Project site, there is some possibility that hidden and buried resources may exist on the Project site with no surface evidence. Thus, to further assure construction activities do not result in significant impacts to any potential cultural resources discovered below ground surface, the Project shall incorporate Mitigation Measure CUL-1. Thus, if such resources were discovered, implementation of the required mitigation measure would reduce the impact to less than significant. As a result, the Project will have a less than significant impact with mitigation incorporated.

> *Mitigation Measure CUL-1: If previously unknown resources are encountered before or during grading activities, construction shall stop in the immediate vicinity of the find and a qualified historical resources specialist shall be consulted to determine whether the resource requires further study. The qualified historical resources specialist shall make recommendations to the City on the measures that shall be implemented to protect the discovered resources, including but not limited to excavation of the finds and evaluation of the finds in accordance with Section 15064.5 of the CEQA Guidelines and the City's Historic Preservation Ordinance. If the resources are determined to be unique historical resources as defined under Section 15064.5 of the CEQA Guidelines, measures shall be identified by the monitor and recommended to the Lead Agency. Appropriate measures for significant resources could include avoidance or capping, incorporation of the site in green space, parks, or open space, or data recovery excavations of the finds.*
>
> *No further grading shall occur in the area of the discovery until the Lead Agency approves the measures to protect these resources. Any historical artifacts recovered as a result of mitigation shall be provided to a City-approved institution or person who is capable of providing long-term preservation to allow future scientific study.*

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

Less than Significant Impact with Mitigation Incorporated. Based on the CHRIS Records Search conducted on June 20, 2022, there is no evidence that cultural resources of any type (including historical, archaeological, paleontological, or unique geologic features) exist on the Project site. Nevertheless, there is some possibility that a non-visible, buried archeological resource may exist and may be uncovered during ground disturbing construction activities which would constitute a significant impact. To mitigate the event of the accidental discovery and recognition of previously unknown resources before or during grading activities, the Project incorporates Mitigation Measure CUL-1 to reduce any potentially significant impacts to a less than significant impact.

c) Disturb any human remains, including those interred outside of formal cemeteries?

Less than Significant with Mitigation Incorporated. There is no evidence that human remains exist on the Project site. Nevertheless, there is some possibility that a non-visible buried site may exist and may be uncovered during ground disturbing construction activities which would constitute a significant impact. If any human remains are discovered during construction, CCR Section 15064.5(e), PRC Section 5097.98, and California Health and Safety Code Section 7050.5 will mitigate for the impacts. To further ensure future construction activities do not result in significant impacts to any potential resources or human remains discovered below ground surface, the Project shall incorporate Mitigation Measure CUL-2. Therefore, if any human remains were discovered, implementation of this mitigation and referenced regulations would reduce the Project's impact to less than significant. Therefore, if any human remains were discovered, implementation of this mitigation and referenced regulations would reduce the Project's impact to less than significant.

> *Mitigation Measure CUL-2: In the event that human remains are unearthed during excavation and grading activities of any future development project, all activity shall cease immediately. Pursuant to Health and Safety Code (HSC) Section 7050.5, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98(a). If the remains are determined to be of Native American descent, the coroner shall within 24 hours notify the Native American Heritage Commission (NAHC). The NAHC shall then contact the most likely descendent of the deceased Native American, who shall then serve as the consultant on how to proceed with the remains. Pursuant to PRC Section 5097.98(b), upon the discovery of Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment.*

4.5.3 Mitigation Measures

The proposed Project shall implement and incorporate, as applicable, the cultural resources related mitigation measures as identified in the attached Mitigation Monitoring and Reporting Program dated October 2024.

Mitigation Measure CUL-1: *If previously unknown resources are encountered before or during grading activities, construction shall stop in the immediate vicinity of the find and a qualified historical resources specialist shall be consulted to determine whether the resource requires further study. The qualified historical resources specialist shall make recommendations to the City on the measures that shall be implemented to protect the discovered resources, including but not limited to excavation of the finds and evaluation of the finds in accordance with Section 15064.5 of the CEQA Guidelines and the City's Historic Preservation Ordinance. If the resources are determined to be unique historical resources as defined under Section 15064.5 of the CEQA Guidelines, measures shall be identified by the monitor and recommended to the Lead Agency. Appropriate measures for significant resources could include avoidance or capping, incorporation of the site in green space, parks, or open space, or data recovery excavations of the finds.*

No further grading shall occur in the area of the discovery until the Lead Agency approves the measures to protect these resources. Any historical artifacts recovered as a result of mitigation shall be provided to a City-approved institution or person who is capable of providing long-term preservation to allow future scientific study.

Mitigation Measure CUL-2: *In the event that human remains are unearthed during excavation and grading activities of any future development project, all activity shall cease immediately. Pursuant to Health and Safety Code (HSC) Section 7050.5, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98(a). If the remains are determined to be of Native American descent, the coroner shall within 24 hours notify the Native American Heritage Commission (NAHC). The NAHC shall then contact the most likely descendent of the deceased Native American, who shall then serve as the consultant on how to proceed with the remains. Pursuant to PRC Section 5097.98(b), upon the discovery of Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment.*

4.6 ENERGY

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?			X	
b)	Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X	

4.6.1 Environmental Setting

Appendix F of the CEQA Guidelines provides guidance in determining whether a project will result in the inefficient, wasteful, and unnecessary consumption of energy. According to Appendix F of the CEQA Guidelines, the goal of energy conservation implies the "wise and efficient use" of energy through 1) decreasing overall per capita energy consumption, 2) decreasing reliance on fossil fuels such as coal, natural gas, and oil, and 3) increasing reliance on renewable energy sources.

Per Appendix F, a project would be considered inefficient, wasteful, and unnecessary if it violated existing energy standards, had a negative effect on local and regional energy supplies and requirements for additional capacity, had a negative effect on peak and base period demands for electricity and other energy forms, and effected energy resources. Appendix F includes the following criteria to determine whether a threshold of significance is met:

1. *The project energy requirements and its energy use efficiencies by amount and fuel type for each stage of the project including construction, operation, maintenance and/or removal. If appropriate, the energy intensiveness of materials may be discussed.*
2. *The effects of the project on local and regional energy supplies and on requirements for additional capacity.*
3. *The effects of the project on peak and base period demands for electricity and other forms of energy.*
4. *The degree to which the project complies with existing energy standards.*
5. *The effects of the project on energy resources.*
6. *The project's projected transportation energy use requirements and its overall use of efficient transportation alternatives.*

Building Energy Efficiency Standards – Title 24

California's energy code is designed to reduce wasteful and unnecessary energy consumption in newly constructed and existing buildings. The Building Energy Efficiency Standards (Title 24, Parts 6 and 11 of the California Code of Regulations) are updated by the California Energy Commission every three years. The Standards relate to various

energy efficiency measures including but not limited to ventilation, air conditioning, and lighting. [16] The 2022 Building Energy Efficiency Standards became effective in January 2023. The state's "green building code" (i.e., CALGreen) is contained within the Building Energy Efficiency Standards, Title 24, Part 11. The CALGreen standards address environmental and sustainable practices during building construction including energy efficiency. CALGreen applies to the planning, design, operation, construction, use and occupancy of every newly constructed building or structure and additions and alterations on a statewide basis. Compliance with these energy efficiency regulations and programs reduces wasteful, inefficient, or unnecessary consumption of energy sources.

Fresno General Plan

Energy resources and conservation are discussed in the Resource Conservation and Resilience Section of the Fresno General Plan. The following objectives and policies of the Fresno General Plan relate to energy resources and conservation of development in order to reduce community-wide energy consumption:

Policy RC-2 *Promote land uses that conserve resources.*

> ***Policy RC-2-a Link Land Use to Transportation.*** *Promote mixed-use, higher density infill development in multi-modal corridors. Support land use patterns that make more efficient use of the transportation system and plan future transportation investments in areas of higher-intensity development. Discourage investment in infrastructure that would not meet these criteria.*

Policy RC-2-b Provide Infrastructure for Mixed-Use and Infill. *Promote investment in the public infrastructure needed to allow mixed-use and denser infill development to occur in targeted locations, such as expanded water and wastewater conveyance systems, complete streetscapes, parks and open space amenities, and trails. Discourage investment in infrastructure that would not meet these criteria.*

Objective RC-8 *Reduce the consumption of non-renewable energy resources by requiring and encouraging conservation measures and the use of alternative energy sources.*

> ***Policy RC-8-a Existing Standards and Programs.*** *Continue existing beneficial energy conservation programs, including adhering to the California Energy Code in new construction and major renovations.*
>
> ***Policy RC-8-b Energy Reduction Targets.*** *Strive to reduce per capita residential electricity use to 1,800 kWh per year and non-residential electricity use to 2,700 kWh per year per capita by developing and implementing incentives, design and operation standards, promoting alternative energy sources, and cost-effective savings.*
>
> ***Policy RC-8-c Energy Conservation in New Development.*** *Consider providing an incentive program for new buildings that exceed California Energy Code requirements by fifteen percent.*

[16] California Energy Commission. 2019 Building Energy Efficiency Standards. Accessed on September 12, 2024, https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2019-building-energy-efficiency

Policy RC-8-d Incentives. *Establish an incentive program for residential developers who commit to building all of their homes to ENERGY STAR performance guidelines.*

Policy RC-8-e Energy Use Disclosure. *Promote compliance with State law mandating disclosure of a building's energy data and rating of the previous year to prospective buyers and lessees of the entire building or lenders financing the entire building.*

Policy RC-8-h Solar Assistance. *Identify and publicize information about financial mechanisms for private solar installations and provide over-the-counter permitting for solar installations meeting specified standards, which may include maximum size (in kV) of units that can be so approved.*

4.6.2 Impact Assessment

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

Less than Significant Impact. The Project proposes the development of a senior center and affordable housing units for seniors. Energy would be consumed through Project construction and operations, further analyzed below.

Construction

Construction would be short-term and temporary. Construction activities include typical site preparation, grading, paving, architectural coating, and trenching. There are no unusual project characteristics or construction processes that would require the use of equipment that would be more energy intensive than is used for comparable activities. The primary source of energy for construction activities would be diesel and gasoline (i.e., petroleum fuels). All construction equipment shall conform to current emissions standards and related fuel efficiencies including applicable CARB regulations (Airborne Toxic Control Measure), California Code of Regulations (Title 13, Motor Vehicles), and Title 24 standards. Compliance with such regulations would ensure that the short-term, temporary construction activities do not result in wasteful, inefficient, or unnecessary consumption of energy resources.

Operations

Operations would involve heating, cooling, equipment, and vehicle trips. Energy consumption related to operations would be associated with natural gas, electricity, and fuel. Energy and natural gas consumption were estimated using CalEEMod (Appendix A). Traffic impacts related to vehicle trips were considered through a Vehicle Miles Traveled (VMT) analysis contained in Section 4.17. Results are summarized as follows.

The Project site would be served by PG&E for both electricity and natural gas. Table 4-5 shows the estimated electricity and natural gas consumption for the Project based on output from CalEEMod. Development of the Project would consume less than one (1) percent of the total electricity use and natural gas use in Fresno County in 2022. Furthermore, the Project would include the installation of on-site solar panels which would offset portions of the Project's electricity consumption. These results would not result in an increased level of significance. Additionally, future development would be required to comply with the regulations and standards of Title 24 and CALGreen to encourage energy efficient design. Through compliance, it can be determined that the proposed Project would not consume energy in a manner that is wasteful, inefficient, or unnecessary nor would the project conflict with any state or local plan for energy efficiency.

Table 4-5 Project Energy Consumption

Energy Type [1]	Project Annual Energy Consumption	Fresno County Annual Energy Consumption	Project Percentage of County Consumption
Electricity [2]	0.906735	8,384.408687	0.0108
Natural Gas [2]	0.04198979	319.435645	0.0131
1. Pacific Gas and Electric Company (PG&E) would serve the site for both electricity and natural gas. *2. Energy consumption data for Fresno County is provided by the California Energy Commission, "Electricity Consumption by County" accessed on September 16, 2024, http://ecdms.energy.ca.gov/elecbycounty.aspx and "Gas Consumption by County" accessed on September 16, 2024, https://ecdms.energy.ca.gov/gasbycounty.aspx*			

Regarding energy consumed through vehicle trips, redevelopment of the Project site would increase density and promote mixed-use development in an infill area and high-quality transit corridor. As a result, development would facilitate the usage of transportation modes such as walking, biking, and/or bus, decreasing vehicle fuel energy consumption in the city. Therefore, it can be determined that the proposed Project would not consume energy in a manner that is wasteful, inefficient, or unnecessary nor would the project conflict with any state or local plan for energy efficiency. Thus, the Project would have a less than significant impact.

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

Less than Significant Impact. As discussed under criterion a), the construction and operations of the Project would be subject to compliance with applicable energy efficiency regulations including CALGreen, Title 24, General Plan, and CARB. Thus, applicable state and local regulations and programs would be implemented to reduce energy waste from construction and operations. Therefore, through compliance, the Project would not conflict with or obstruct any state or local plan for energy efficiency and a less than significant impact would occur because of the Project.

4.6.3 Mitigation Measures

None Required.

4.7 GEOLOGY AND SOILS

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Directly or Indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: *i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.*				X
	ii. Strong seismic ground shaking?			X	
	iii. Seismic-related ground failure, including liquefaction?			X	
	iv. Landslides?			X	
b)	Result in substantial soil erosion or the loss of topsoil?			X	
c)	Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X	
d)	Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?				X

e)	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water?				X
f)	Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?		X		

4.7.1 Environmental Setting

The Project site is in the San Joaquin Valley which is one of the two large valleys comprising the Great Valley Geomorphic Province. The San Joaquin Valley is surrounded by Sierra Nevada (east), Coast Ranges (west), Tehachapi (south), and the Sacramento Valley (north). The Fresno area is set on gently southwest-sloping alluvial fans and plans formed by the San Joaquin and Kings Rivers. A brief discussion of the likelihood of seismic activities to occur in or affect Fresno is provided below.

Faulting

There are no active faults mapped within the city of Fresno. The Project site is not located in an Alquist-Priolo Earthquake Fault Zone as established by the Alquist-Priolo Fault Zoning Act (Section 2622 of Chapter 7.5, Division 2 of the California Public Resources Code). The nearest fault to the Project site is the Clovis Fault, which is approximately 9.5 miles northeast of the site. [17]

Subsurface Soils

According to the Geologic Hazards Investigation for the Fresno General Plan, the uppermost soils in the Fresno area (i.e., 6-12 inches) comprise very loose silty sand, silty sand with trace clay, sandy silt, clayey sand, or clayey gravel. These soils are disturbed, have low strength, and are highly compressible when saturated. Area soils between two (2) to four (4) feet below ground surface (bgs) range from loose/soft to very dense/hard clays, silts, sands, and gravels with the characteristics of moderately strong and moderately compressible. Three (3) to five (5) feet bgs soils are clays, silts, sands, and gravels that are moderately strong and slightly compressible.

A search of the Web Soil Survey by the USDA Natural Resources Conservation Service indicates that the following, stable, native soil comprises the Project site: [18]

[17] California Department of Conservation. Fault Activity Map of California. Accessed on September 12, 2024, https://maps.conservation.ca.gov/cgs/fam/

[18] United States Department of Agriculture Natural Resources Conservation Service. "Web Soil Survey." Accessed on September 12, 2024https://websoilsurvey.sc.egov.usda.gov/App/WebSoilSurvey.aspx

***SdA**: San Joquin sandy loam, shallow, 0 to 3 percent slopes, moderately well drained, very high runoff, with no potential of flooding or ponding. The depth to water table is more than 80 inches. The SdA soils account for 100% of the Project site.*

Strong Ground Shaking

The Fresno area is subject to low to moderate ground shaking. The Owens Valley Earthquake of 1872 and the Coalinga Earthquake of 1982 generated ground shaking of intensity VII of the 12-point Modified Mercalli Intensity (MMI) scale. Intensity VII earthquakes result in negligible damage to buildings, slight to moderate damage in well-built structures, considerable damage in poorly built or badly designed structures, and some broken chimneys.[19] Development of the Project site would be required to conform to current seismic protection standards in the California Building Code (CBC), which are intended to minimize potential risks.

Liquefaction

Liquefaction is a seismic phenomenon in which loose, saturated, fine-grained granular soils behave similarly to a fluid when subjected to high-intensity ground shaking. The potential for liquefaction in the city of Fresno is low to moderate, per the Fresno County Multi-Hazard Mitigation Plan. There has been no observed liquefaction from any historic earthquake. Additionally, ground shaking, seismic settlement, and lateral spreading are not considered to be significant hazards due to the stable area soils as observed in the Geologic Hazards Investigation for the Fresno General Plan.

Erosion

Wind and flowing water are the primary agents of erosion in the San Joaquin Valley. Two (2) types of areas with moderate to high erosion potential are identified by the Fresno County Multi-Hazard Mitigation Plan: soils in the Sierra Nevada and foothills on slopes over 30 percent and soils in the western San Joaquin Valley and Coast Ranges. According to the Fresno General Plan, the city of Fresno is not susceptible to soil erosion except for land within 300 feet of the toe of the San Joaquin River bluffs. However, the Project site is not a bluff area and is therefore not subject to the potential for moderate to high erosion.

Ground Subsidence

Ground subsidence is the settling or sinking of surface soil deposits with little or no horizontal motion. Soils with high silt or clay content are subject to subsidence. While the County of Fresno identifies a significant hazard significance for subsidence due to heavy groundwater withdrawal, the city of Fresno is not known to be subject to subsidence hazards. Areas with potential for subsidence hazards are in western Fresno County over 25 miles southwest from the Project site, as mapped in the Fresno County Multi-Hazard Mitigation Plan.

[19] US Geological Survey (USGS), 2017. The Modified Mercalli Intensity Scale, Accessed on September 12, 2024, https://www.usgs.gov/programs/earthquake-hazards/modified-mercalli-intensity-scale

Fresno General Plan

Geology and soils are discussed in the Noise and Safety Chapter of the Fresno General Plan. The following relevant policies of the Fresno General Plan:

Policy NS-2 *Minimize risks of property damage and personal injury posed by geologic and seismic risks.*

> ***Policy NS-2-a Seismic Protection.*** *Ensure seismic protection is incorporated into new and existing construction, consistent with the Fresno Municipal Code.*
>
> ***Policy NS-2-b Soil Analysis Requirement.*** *Identify areas with potential geologic and/or soils hazards, and require development in these areas to conduct a soil analysis and mitigation plan by a registered civil engineer (or engineering geologist specializing in soil geology) prior to allowing on-site drainage or disposal for wastewater, stormwater runoff, or swimming pool/spa water.*

4.7.2 Impact Assessment

a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.*

No Impact. There are no known active earthquake faults in Fresno (inclusive of the Project site), nor is Fresno within an Alquist-Priolo earthquake fault zone as established by the Alquist-Priolo Fault Zoning Act. Thus, the Project would not cause rupture of a known earthquake fault and therefore, would have no impact.

ii. *Strong seismic ground shaking?*

Less than Significant Impact. There are no known active earthquake faults in Fresno and Fresno has historically been subject to low to moderate ground shaking. The Fresno area, inclusive of the Project site, is classified by the State as being in a moderate seismic risk zone, Category "C" or "D," depending on the soils underlying the specific location being categorized and that location's proximity to the nearest known fault lines. The Project site is relatively flat and has stable, native soils and is not in close proximity to any fault lines. In addition, the Project would be required to conform to current seismic protection standards in the CBC. Therefore, because of the Project's stable soils and distance from active fault lines, conformance to CBC seismic safety standards, and compliance with General Plan policies, the Project does not have any aspect that could result in strong seismic ground shaking. Therefore, the Project would have a less than significant impact.

iii. *Seismic-related ground failure, including liquefaction?*

Less than Significant Impact. As previously discussed, Fresno has a low to moderate potential for seismic activities. Further, Fresno does not have significant liquefaction potential since it is in a stable geologic formation. There are also no geologic hazards or unstable soil conditions known to exist on the Project site. The site is relatively flat with stable soils and no apparent unique or significant landforms. For this reason, liquefaction or seismically induced settlement or bearing loss is considered unlikely, even if there should be a substantial increase in ground water

level. Further, development of the site would require compliance with the City's grading and drainage standards. Therefore, because of the Project's relatively flat topography, stability of soils, infrequency of seismic activity, and required compliance with City standards, the Project does not have any aspect that could result in seismic-related ground failure, including liquefaction. Therefore, the Project would result in a less than significant impact.

iv. *Landslides?*

Less than Significant Impact. The topography of the Project site is relatively flat with stable, native soils, in an area that is not susceptible to seismic activities, geologic instability, or landslides. Furthermore, the site is not in the immediate vicinity of rivers or creeks that would be more susceptible to landslides. Therefore, there would be a less than significant impact as a result of the Project.

b) Result in substantial soil erosion or the loss of topsoil?

Less Than Significant Impact. Development of the Project site would require typical site preparation activities such as demolition, grading, and trenching which may result in the potential for short-term soil disturbance or erosion impacts. Construction would also involve the use of water which may cause further soil disturbance. Such impacts would be addressed through compliance with regulations set by the State Water Resources Control Board (SWRCB). The SWRCB requires sites larger than one (1) acre to comply with the General Permit for Discharges of Storm Water Associated with Construction Activity (i.e., General Permit Order No. 2012-0006-DWQ). The General Permit requires the development of a Storm Water Pollution Prevention Plan (SWPPP) by a certified Qualified SWPPP Developer (QSD). The SWPPP estimates the sediment risk associated with construction activities and includes best management practices (BMP) to control erosion. BMPs specific to erosion control cover erosion, sediment, tracking, and waste management controls. Implementation of the SWPPP minimizes the potential for the Project to result in substantial soil erosion or loss of topsoil. With these provisions in place, impacts to soil and topsoil by the Project would be considered less than significant.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

Less than Significant Impact. The site is relatively flat with stable soils and no apparent unique or significant landforms. Furthermore, the Project site is in an area of infrequent and low historic seismic activity of nearby faults. Such factors minimize the potential for other geologic hazards such as landslides, lateral spreading, subsidence, liquefaction, or collapse. Therefore, any development on the native, stable soils is unlikely to become unstable and result in geologic hazards. In addition, the Project does not have any aspect that could result in a landslide, lateral spreading, subsidence, liquefaction, or collapse. As such, the Project would have a less than significant impact.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994, as updated), creating substantial direct or indirect risks to life or property?

No Impact. The Project site is relatively flat and stable, native soils of the SdA, San Joaquin sandy loam. Sandy loam soils are not classified as expansive soil, as defined in Table 18-1-B of the Uniform Building Code and would not create substantial direct or indirect risks to life or property. Thus, no impact would occur because of the Project.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?

No Impact. Since the Project site is within city limits and fully developed, the site is connected to the city's water and sewer systems. Thus, no septic tanks or alternative wastewater disposal systems would be installed, and no impact would occur because of the Project.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

Less than Significant Impact with Mitigation Incorporated. As discussed in the Cultural Resources section above, there are no known paleontological resources or unique geological features known to the City on this site. In addition, the Project site is previously disturbed with construction. Nevertheless, there is some possibility that a non-visible, buried site may exist and may be uncovered during ground disturbing construction activities which would constitute a significant impact. To further assure future development does not result in significant impacts to any potential resources, the Project shall incorporate ***Mitigation Measure GEO-1*** as described below. Therefore, if any paleontological resources or geologic features were discovered, implementation of MM GEO-1 would reduce the Project's impact to less than significant.

> ***Mitigation Measure GEO-1:*** *If any paleontological resources are encountered during ground-disturbance activities, all work within 25 feet of the find shall halt until a qualified paleontologist as defined by the Society of Vertebrate Paleontology Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources (2010), can evaluate the find and make recommendations regarding treatment. Paleontological resource materials may include resources such as fossils, plant impressions, or animal tracks preserved in rock. The qualified paleontologist shall contact the Natural History Museum of Los Angeles County or another appropriate facility regarding any discoveries of paleontological resources.*
>
> *If the qualified paleontologist determines that the discovery represents a potentially significant paleontological resource, additional investigations, and fossil recovery may be required to mitigate adverse impacts from Project implementation. If avoidance is not feasible, the paleontological resources shall be evaluated for their significance. If the resources are not significant, avoidance is not necessary. If the resources are significant, they shall be avoided to ensure no adverse effects or such effects must be mitigated. Construction in that area shall not resume until the resource-appropriate measures are recommended or the materials are determined to be less than significant. If the resource is significant and fossil recovery is the identified form of treatment, then the fossil shall be deposited in an accredited and permanent scientific institution. Copies of all correspondence and reports shall be submitted to the City of Fresno, Planning and Development Department.*

4.7.3 Mitigation Measures

The proposed Project shall implement and incorporate, as applicable, the geology and soils related mitigation measure as identified in the attached Mitigation Monitoring and Reporting Program dated October 2024.

Mitigation Measure GEO-1: *If any paleontological resources are encountered during ground-disturbance activities, all work within 25 feet of the find shall halt until a qualified paleontologist as defined by the Society of Vertebrate Paleontology Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological*

Resources (2010), can evaluate the find and make recommendations regarding treatment. Paleontological resource materials may include resources such as fossils, plant impressions, or animal tracks preserved in rock. The qualified paleontologist shall contact the Natural History Museum of Los Angeles County or another appropriate facility regarding any discoveries of paleontological resources.

If the qualified paleontologist determines that the discovery represents a potentially significant paleontological resource, additional investigations, and fossil recovery may be required to mitigate adverse impacts from Project implementation. If avoidance is not feasible, the paleontological resources shall be evaluated for their significance. If the resources are not significant, avoidance is not necessary. If the resources are significant, they shall be avoided to ensure no adverse effects or such effects must be mitigated. Construction in that area shall not resume until the resource-appropriate measures are recommended or the materials are determined to be less than significant. If the resource is significant and fossil recovery is the identified form of treatment, then the fossil shall be deposited in an accredited and permanent scientific institution. Copies of all correspondence and reports shall be submitted to the City of Fresno, Planning and Development Department.

4.8 GREENHOUSE GAS EMISSIONS

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?			X	
b)	Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X	

4.8.1 Environmental Setting

Various gases in the Earth's atmosphere, classified as atmospheric greenhouse gases (GHGs), play a critical role in determining the Earth's surface temperature. Solar radiation enters Earth's atmosphere from space, and a portion of the radiation is absorbed by the Earth's surface. The Earth emits this radiation back toward space, but the properties of the radiation change from high-frequency solar radiation to lower-frequency infrared radiation.

Naturally occurring greenhouse gases include water vapor (H_2O), carbon dioxide (CO_2), methane (CH_4), nitrous oxide (N_2O), and ozone (O_3). Several classes of halogenated substances that contain fluorine, chlorine, or bromine are also GHGs, but they are, for the most part, solely a product of industrial activities. Although the direct greenhouse gases CO_2, CH_4, and N_2O occur naturally in the atmosphere, human activities have changed their atmospheric concentrations. From the pre-industrial era (i.e., ending about 1750) to 2011, concentrations of these three GHGs have increased globally by 40, 150, and 20 percent, respectively (Intergovernmental Panel on Climate Change [IPCC], 2013).

GHGs, which are transparent to solar radiation, are effective in absorbing infrared radiation. As a result, this radiation that otherwise would have escaped back into space is now retained, resulting in a warming of the atmosphere. This phenomenon is known as the greenhouse effect. Among the prominent GHGs contributing to the greenhouse effect are carbon dioxide (CO_2), methane (CH_4), ozone (O_3), water vapor, nitrous oxide (N_2O), and chlorofluorocarbons (CFCs).

The emissions from a single project will not cause global climate change, however, GHG emissions from multiple projects throughout the world could result in a cumulative impact with respect to global climate change. Therefore, the analysis of GHGs and climate change presented in this section is presented in terms of the proposed project's contribution to cumulative impacts and potential to result in cumulatively considerable impacts related to GHGs and climate change.

Cumulative impacts are the collective impacts of one or more past, present, and future projects that, when combined, result in adverse changes to the environment. In determining the significance of a proposed project's contribution to anticipated adverse future conditions, a lead agency should generally undertake a two step

analysis. The first question is whether the combined effects from both the proposed project and other projects would be cumulatively significant. If the agency answers this inquiry in the affirmative, the second question is whether "the proposed project's incremental effects are cumulatively considerable" and thus significant in and of themselves.

The cumulative project list for this issue (climate change) comprises anthropogenic (i.e., human made) GHG emissions sources across the globe and no project alone would reasonably be expected to contribute to a noticeable incremental change to the global climate. However, legislation and executive orders on the subject of climate change in California have established a statewide context and process for developing an enforceable statewide cap on GHG emissions. Given the nature of environmental consequences from GHGs and global climate change, CEQA requires that lead agencies consider evaluating the cumulative impacts of GHGs. Small contributions to this cumulative impact (from which significant effects are occurring and are expected to worsen over time) may be potentially considerable and, therefore, significant.

The California Air Resources Board (CARB) 2022 Climate Change Scoping Plan and guidance from the SJVAPCD are discussed below and are utilized as thresholds of significance.

2022 Climate Change Scoping Plan

The CARB 2022 Climate Change Scoping Plan is the adopted statewide plan for reduction and mitigation of GHGs to implement Assembly Bill (AB) 1279. AB 1279 was issued on August 12, 2022, to require California to achieve "net zero greenhouse gas emissions" as soon as possible and to further reduce anthropogenic GHG emissions thereafter. It sets a statewide goal to reduce emissions 85% below 1990 levels no later than 2045.

Consequently, the Scoping Plan involves several measures for cost-effective reduction of GHG emissions, including continuing existing programs such as Renewable Portfolio Standard, Advanced Clean Cars, Low Carbon Fuel Standard, etc., and achieving new mandates to decarbonize several sectors. Along with reducing emissions, environmental justice policies are included to address the ongoing air quality disparities.

Appendix D of the 2022 Scoping Plan include recommendations to build momentum for local government actions to align with State goals, including through CEQA review. The Appendix outlines the priority GHG reduction strategies for local governments, including transportation electrification, VMT reduction, and building decarbonization. [20]

SJVAPCD CEQA Air Quality Guidelines

The SJVAPCD's Guidance for Valley Land Use Agencies in Addressing GHG Impacts for New Projects Under CEQA (2009) provides screening criteria for climate change analyses, as well as draft guidance for the determination of

[20] California Air Resources Board. (2022). 2022 Scoping Plan Appendix D. Accessed on September 17, 2024, https://ww2.arb.ca.gov/sites/default/files/2022-11/2022-sp-appendix-d-local-actions.pdf

significance.[21,22] These criteria are used to evaluate whether a project would result in a significant climate change impact (see below). Projects that meet one of these criteria would have less than significant impact on the global climate.

- *Does the project comply with an adopted statewide, regional, or local plan for reduction or mitigation of GHG emissions? If no, then:*
- *Does the project achieve 29% GHG reductions by using approved Best Performance Standards (BPS)? If no, then*
- *Does the project achieve AB 32 targeted 29% GHG emission reductions compared with Business As Usual (BAU)?*

Assembly Bill (AB) 32 was enacted by the California State legislature in 2006 with the aim to reduce GHG emissions to levels of 1990 by 2020. Recommended actions to achieve these aims were adopted by the California Air Resources Board (CARB) in 2008 (i.e., the Climate Change Scoping Plan). However, the 29% GHG emission reductions compared to BAU threshold is outdated since it is aimed to meet AB 32's 2020 goals, thus this threshold would not be used for analysis.

San Joaquin Valley Air Pollution Control District

SJVAPCD adopted *Guidance for Valley Land-use Agencies in Addressing GHG Emission Impacts for New Projects under CEQA* and the policy *District Policy—Addressing GHG Emission Impacts for Stationary Source Projects Under CEQA When Serving as the Lead Agency* in 2009. It recognized that project-specific emissions are cumulative and could be considered cumulatively considerable without mitigation. SJVAPCD suggested that the requirement to reduce GHG emissions for all projects is the best method to address this cumulative impact.

The SJVAPCD requires quantification of GHG emissions for all projects which the lead agency has determined that an EIR is required. Although an EIR is not required for the Project, the GHG emissions are quantified below. Short-term construction and long-term operational GHG emissions for project buildout were estimated using CalEEMod™ (version 2022.1.1.26). (See Appendix A). CalEEMod is a statewide model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify GHG emissions from land use projects. The model quantifies direct GHG emissions from construction and operation (including vehicle use), as well as indirect GHG emissions, such as GHG emissions from energy use, solid waste disposal, vegetation planting and/or removal, and water use. Emissions are expressed in annual metric tons of CO_2 equivalent units of measure (i.e., $MTCO_2e$), based on the global warming potential of the individual pollutants.

Accessed September 17, 2024, http://www.valleyair.org/Programs/CCAP/12-17-09/3%20CCAP%20-%20FINAL%20LU%20Guidance%20-%20Dec%2017%202009.pdf.

[22] San Joaquin Valley Air Pollution Control District. (2000). Environmental Review Guidelines: Procedures for Implementing the California Environmental Quality Act. Accessed September 17, 2024, http://www.valleyair.org/transportation/CEQA%20Rules/ERG%20Adopted%20_August%202000_.pdf

Thresholds of Significance

Since the SJVAPCD and the City of Fresno do not have established GHG significance emissions thresholds, the Project is assessed based on its consistency with the CARB's latest adopted Scoping Plan, including the Project's compliance with relevant Scoping Plan measures, in addition to the latest RTP/SCS for the region. Of note, the Scoping Plan is consistent with AB 1276 GHG reduction targets toward achieving carbon neutrality by 2045 and reducing anthropogenic emissions to 85% below 1990 levels by 2045. Therefore, consistency with CARB's Scoping Plan would also demonstrate consistency with carbon neutrality requirements of AB 1279. This analysis provides a qualitative assessment of the Project's compliance with the applicable plans, policies, and regulations for the purpose of reducing GHGs to determine whether the project would have a significant impact on the environment relative to GHGs. The Project's estimated construction and operation-related GHG emissions are provided for the purposes of disclosure

4.8.2 Impact Assessment

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Less than Significant Impact. The 2024 CEQA Guidelines do not establish a quantitative threshold of significance for GHG impacts, leaving lead agencies the discretion to establish such thresholds for their respective jurisdictions. The City of Fresno does not have an adopted climate action plan (CAP) that establishes thresholds for GHG emissions. As a result, since the SJVAPCD and the City of Fresno do not have established GHG significance emissions thresholds, the following utilizes qualitative analysis for GHG impacts. Short-term construction and long-term operational GHG emissions for project buildout were estimated using CalEEMod™ (version 2022.1.1.28). See Appendix A for output files.

Construction Emissions

Regarding construction, the SJVAPCD does not recommend assessing pollution associated with construction, as pollution-related construction will be temporary. These construction GHG emissions are a one-time release. As such, it can be anticipated that these construction emissions would not generate a significant contribution to global climate change over the lifetime of the Project. The overall construction GHG emissions associated with buildout of the Project is 429.3 MT CO2e based on the CalEEMod run.

Operational Emissions

Regarding the long-term operational related GHG emissions, the estimated operational emissions for buildout of the Project incorporates the potential area source and vehicle emissions, and emissions associated with utility and water usage, and wastewater and solid waste generation. The annual operational GHG emissions associated with buildout of the Project is 1,650 MT CO2e based on the CalEEMod run.

Further, the Project would not exceed the thresholds of significance for construction or operational emissions as discussed in Section 4.3. Additionally, as discussed in more detail below, the Project would be generally consistent with the applicable goals and policies related to GHG reduction measures, including CARB's 2022 Scoping Plan and SJVAPCD guidelines, and the City of Fresno General Plan goals and policies that aim to reduce air emissions and improve air quality, which reduces GHG emissions as a result. Cumulatively, these emissions would not generate a

significant contribution to global climate change over the lifetime of the proposed Project. As such, it can be determined that the Project would not occur at a scale or scope with potential to contribute substantially or cumulatively to the generation of GHG emissions and therefore the impact would be less than significant.

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

Less than Significant Impact. The compatibility of the Project with the 2022 Scoping Plan, Fresno Council of Governments (FCOG) Regional Transportation Plan / Sustainable Communities Strategy (RTP/SCS), and the City of Fresno General Plan.

Consistency with the 2022 Climate Change Scoping Plan

Based on the evaluation shown in Table 4-6, the Project is consistent with the reduction measures identified in the 2022 Scoping Plan. The reduction measures are derived from the 2022 Scoping Plan *Table 1 – Priority GHG Reduction Strategies*, which provides three (3) priority areas to assist jurisdictions with developing local climate action plans.

Table 4-6 Scoping Plan Priority GHG Reduction Strategies Consistency Analysis

Priority Areas	Priority GHG Reduction Strategies	Consistency/Applicability Determination
Transportation Electrification	Convert local government fleets to ZEVs and provide EV charging at public sites.	**Consistent.** The Project is a public site and would be subject to providing EV charging pursuant CalGreen mandatory measures. The Project proposes to provide 38 EV capable spaces and 13 EV capable spaces with electric vehicle service equipment (EVSE), or charging stations/receptacles.
	Create a jurisdiction-specific ZEV ecosystem to support deployment of ZEVs statewide (such as building standards that exceed state building codes, permit streamlining, infrastructure siting, consumer education, preferential parking policies, and ZEV readiness plans).	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project.
VMT Reduction	Reduce or eliminate minimum parking standards.	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project.
	Implement Complete Streets policies and investments, consistent with general plan circulation element requirements.	**Consistent.** The Project does not propose changes to existing roadway infrastructure. Road frontages along the site are designed to include curb, gutter, and sidewalks.
	Increase access to public transit by increasing density of development near transit, improving transit service by increasing service frequency, creating bus priority lanes, reducing or eliminating fares, microtransit, etc.	**Consistent.** The Project site proposes a senior center and affordable housing project that is approximately 820 feet to the nearest bus stop (Ashlan Station, Stop ID: 973).

	Increase public access to clean mobility options by planning for and investing in electric shuttles, bike share, car share, and walking.	**Consistent.** The Project proposes pedestrian facilities (i.e., sidewalks) within the site and connecting to adjacent properties. In addition, as described above, the Project is near an existing bus stop. As such, it increases public access to clean mobility options.
	Implement parking pricing or transportation demand management pricing strategies.	**Not Applicable.** The Project proposes a senior center and affordable housing project; thus, parking spaces and garages are provided at no additional cost for seniors.
	Amend zoning or development codes to enable mixed-use, walkable, transit-oriented, and compact infill development (such as increasing the allowable density of a neighborhood)	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project.
	Preserve natural and working lands by implementing land use policies that guide development toward infill areas and do not convert "greenfield" land to urban uses (e.g., green belts, strategic conservation easements)	**Consistent.** The Project site is previously developed with a former grocery store and paved parking lot, that has been demolished. As such, the site is not categorized as natural and working lands.
Building Decarbonization	Adopt all-electric new construction reach codes for residential and commercial uses.	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project.
	Adopt policies and incentive programs to implement energy efficiency retrofits for existing buildings, such as weatherization, lighting upgrades, and replacing energy-intensive appliances and equipment with more efficient systems (such as Energy Star-rated equipment and equipment controllers).	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project. In addition, the Project does not include retrofits for existing buildings.
	Adopt policies and incentive programs to electrify all appliances and equipment in existing buildings such as appliance rebates, existing building reach codes, or time of sale electrification ordinances	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project. In addition, the Project does not include retrofits for existing buildings.
	Facilitate deployment of renewable energy production and distribution and energy storage on privately owned land uses (e.g., permit streamlining, information sharing)	**Not Applicable.** This is a city-wide strategy thus is not applicable to the Project.
	Deploy renewable energy production and energy storage directly in new public projects and on existing public facilities (e.g., solar photovoltaic systems on	**Consistent.** The Project would install solar photovoltaic systems on carport structures on the west side of the property or on the building. This

	rooftops of municipal buildings and on canopies in public parking lots, battery storage systems in municipal buildings)	would be provided in compliance with the building code.

Consistency with the FCOG RTP/SCS

The FCOG 2022 RTP/SCS includes a series of goals for the region that would reduce GHG emissions based on the land use consistency and the reduction of vehicle trips through promoting intermodal transportation systems. Most goals and policies are implemented at the regional or city level. Since the proposed Project is an infill development (i.e., within city limits and generally surrounded by existing development), encourages active transportation through the installation of sidewalks, and would be subject to local regulations, the Project would be generally consistent with goals and policies identified in the RTP/SCS.

Consistency with the City of Fresno General Plan

The City of Fresno General Plan established several policies to reduce air emissions. All air quality and greenhouse gas emissions policies are implemented at the city level. Since the Project is compliant with CalGreen standards, Title 24, and does not propose a use that would generate excessive greenhouse gas emissions, the Project is generally consistent with the General Plan.

In conclusion, the Project contains features that would reduce GHG emissions in compliance with CARB 2022 Climate Change Scoping Plan, FCOG RTP/SCS, and the City of Fresno General Plan. As such, the Project would not conflict with any applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of GHGs, and therefore the impact would be less than significant.

4.8.3 Mitigation Measures

None required.

4.9 HAZARDS AND HAZARDOUS MATERIAL

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
b)	Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
c)	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
d)	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?			X	
f)	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
g)	Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?			X	

4.9.1 Environmental Setting

California Health and Safety Code Section 25501 defines a hazardous material as follows: "Hazardous material" means any material that, because of its quantity, concentration, or physical, or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. "Hazardous materials" include, but are not limited to, hazardous substances, hazardous waste, and any material which a handler or the administering agency has a reasonable basis for believing that it would be injurious to the health and safety of persons or harmful to the environment if released into the workplace or the environment.

"Hazardous wastes" are defined in California Health and Safety Code Section 25141(b) as wastes that: because of their quantity, concentration, or physical, chemical, or infectious characteristics, [may either] cause, or significantly contribute to an increase in mortality or an increase in serious illness [or] pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, disposed of, or otherwise managed.

Regulatory Setting

The California Environmental Protection Agency (CalEPA) was established in 1991 to protect the environment. CalEPA oversees the Unified Program through Certified Unified Program Agencies (CUPAs), which consolidates six (6) environmental programs to ensure the handling of hazardous waste and materials in California. The local CUPA in Fresno County, HazMat Compliance Program, oversees the following six (6) CUPA programs: [23]

- *Hazardous Materials Business Plan (HMBP)*
- *California Accidental Release Program (CalARP)*
- *Underground Storage Tank Program (UST)*
- *Aboveground Storage Tank Program (APSA)*
- *Hazardous Waste Generator Program*
- *Tiered Permitting Program*

The CalEPA Cortese List Data Resources compiles five (5) lists that provide information on hazardous materials facilities or sites meeting the Cortese List requirements.[24] The Cortese List is a database or list of hazardous waste sites in California that is distributed to each city and county. This database identifies hazardous waste facilities in accordance with Government Code *Section 65962.5*. The Cortese List includes:

- *List of Hazardous Waste and Substances sites from Department of Toxic Substances Control (DTSC) EnviroStor database.*
- *List of Leaking Underground Storage Tank Sites from the State Water Board's GeoTracker database.*
- *List of solid waste disposal sites identified by Water Board with waste constituents above hazardous waste levels outside the waste management unit.*

[23]County of Fresno. HazMat Compliance: The Designated CUPA. Accessed on September 17, 2024, https://www.fresnocountyca.gov/Departments/Public-Health/Environmental-Health/HazMat-Compliance-The-Designated-CUPA

[24] California Environmental Protection Agency. (2022). Cortese List Data Resources. Accessed on September 17, 2024, https://calepa.ca.gov/sitecleanup/corteselist/

- *List of "active" CDO and CAO from Water Board.*
- *List of hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code, identified by DTSC.*

According to the CCR Title 22, soils excavated from a site containing hazardous materials is considered hazardous waste, and remediation actions should be performed accordingly. Cleanup requirements are determined case-by-case by the jurisdiction.

The Department of Toxic Substances Control (DTSC) is another agency in California that regulates hazardous waste, conducts inspections, provides emergency response for hazardous materials-related emergencies, protects water resources from contamination, removing wastes, etc. DTSC acts under the authority of Resource Conservation and Recovery Act (RCRA) and California Health and Safety Code. The DTSC implements the California Code of Regulations (CCR) Title 22 Division 4.5 to manage hazardous waste. Government Code *Section 65962.5* requires that DTSC shall compile and update at least annually a list of:

> *(1) All hazardous waste facilities subject to corrective action pursuant to Section 25187.5 of the Health and Safety Code ("HSC").*
>
> *(2) All land designated as hazardous waste property or border zone property pursuant to Article 11 (commencing with Section 25220) of Chapter 6.5 of Division 20 of the Health and Safety Code.*
>
> *(3) All information received by the Department of Toxic Substances Control pursuant to Section 25242 of the Health and Safety Code on hazardous waste disposals on public land.*
>
> *(4) All sites listed pursuant to Section 25356 of the Health and Safety Code.*
>
> *(5) All sites included in the Abandoned Site Assessment Program.*

Record Search

The California Department of Toxic Substance Control's EnviroStor database[25] and the State Water Resources Control Board's GeoTracker database[26] include hazardous release and contamination sites. A search of each database was conducted on September 12, 2024. The searches revealed no active hazardous material release sites on or within a 0.5-mile radius of the Project site. There are nine (9) lust cleanup program site in the 0.5-mile radius of the Project site that are closed/cleaned up.

Phase I Environmental Site Assessment (ESA)

[25]California Department of Toxic Substances Control. Envirostor. Accessed September 12, 2024, https://www.envirostor.dtsc.ca.gov/public/

[26] California State Water Resources Control Board. GeoTracker. Accessed September 12, 2024, https://geotracker.waterboards.ca.gov/

Krazan and Associates, Inc. performed a Phase 1 ESA on the Project site (report dated July 16, 2024) (Appendix C). During this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the Project site as defined by ASTM E 1527-21. It should be noted that the Phase 1 ESA was conducted for the Project site and adjacent parcels; ATSM Non-Scope considerations contained in the Phase 1 ESA are only applicable to the parcel that contains existing structures. Prior to the demolition of the former grocery store, a pre-demolition asbestos and lead survey was conducted on September 16, 2022, and a lead-based paint inspection report was prepared (dated September 22, 2022). The building tested negative for asbestos and was found to contain lead in some amount, but the amount was under current Cal/OSHA regulations and considered non-trigger. An asbestos and lead survey was conducted for the parcel that contains existing structures (dated October 2, 2024), concluding the presence of asbestos and lead.

Fresno County Airport Land Use Compatibility Plan

The nearest public and public use airport is the Fresno Yosemite International Airport approximately ± 3.3-miles southeast of the Project site. The Fresno Yosemite International Airport is owned and operated by the City of Fresno and has one (1) runway that is 3,626 feet long and 75 feet wide. According to the Fresno County Airport Land Use Compatibility Plan (ALUCP), the 2017-2021 National Plan of Integrated Airport Systems classifies the Airport as a small hub primary facility, and the 2013 California Aviation System Plan considers it a primary small hub metropolitan airport. [27] The Project site is located within the Precision Approach Zone (PAZ) of the Airport Influence Area (AIA) of the Fresno Yosemite International Airport. The ALUCP has set "safety zone land use compatibility standards" that restrict the development of land uses that could pose hazards to the public or to vulnerable populations in case of an aircraft accident, as shown in Table 4-6.

Table 4-7 Safety Zone Land Use Compatibility Standards

Zone	PAZ
Dwelling Units per Acre	No limit
Maximum Non-Residential Intensity	No limit
Required Open Land	0%
Prohibited Uses	Hazards to flight (i.e., physical (tall objects), visual, and electronic forms of interference with the safety of aircraft operations. Land use development, such as golf courses and certain types of crops that may cause the attraction of birds to increase is also prohibited).
Other Development Conditions	No object shall have a height that would penetrate the air- space protection surface of the airport. Any object that penetrates one of these surfaces is, by FAA definition, considered an obstruction. A proposed object having a height that exceeds the airport's airspace protection surface shall be allowed only if, upon conclusion of the FAA's 7460 review process, the FAA determines that the object would not be a hazard to air navigation.

[27] Fresno Council of Governments. (December 2023). Fresno County Airport Land Use Compatibility Plan. Accessed on September 12, 2024, https://www.fresnocog.org/project/airport-land-use-commission-of-fresno-county/

Fresno General Plan

The General Plan include objectives and policies relevant to hazards and hazardous materials, airport-related safety hazards, and emergency response in its Noise and Safety Element:

Objective NS-4 *Minimize the risk of loss of life, injury, serious illness, and damage to property resulting from the use, transport, treatment, and disposal of hazardous materials and hazardous wastes.*

> ***NS-4-a Processing and Storage.*** *Require safe processing and storage of hazardous materials, consistent with the California Building Code and the Uniform Fire Code, as adopted by the City.*
>
> ***NS-4-b Coordination.*** *Maintain a close liaison with the Fresno County Environmental Health Department, Cal-EPA Division of Toxics, and the State Office of Emergency Services to assist in developing and maintaining hazardous material business plans, inventory statements, risk management prevention plans, and contingency/emergency response action plans.*
>
> ***NS-4-c Soil and Groundwater Contamination Reports.*** *Require an investigation of potential soil or groundwater contamination whenever justified by past site uses. Require appropriate mitigation as a condition of project approval in the event soil or groundwater contamination is identified or could be encountered during site development.*
>
> ***NS-4-e Compliance with County Program.*** *Require that the production, use, storage, disposal, and transport of hazardous materials conform to the standards and procedures established by the County Division of Environmental Health. Require compliance with the County's Hazardous Waste Generator Program, including the submittal and implementation of a Hazardous Materials Business Plan, when applicable.*
>
> ***NS-4-f Hazardous Materials Facilities.*** *Require facilities that handle hazardous materials or hazardous wastes to be designed, constructed, and operated in accordance with applicable hazardous materials and waste management laws and regulations.*
>
> ***NS-4-h Household Collection.*** *Continue to support and assist with Fresno County's special household hazardous waste collection activities, to reduce the amount of this material being improperly discarded.*

Objective NS-5 *Protect the safety, health, and welfare of persons and property on the ground and in aircraft by minimizing exposure to airport-related hazards.*

> ***NS-5-a Land Use and Height.*** *Incorporate and enforce all applicable Airport Land Use Compatibility Plans (ALUCPs) through land use designations, zoning, and development standards to support the continued viability and flight operations of Fresno's airports and to protect public safety, health, and general welfare.*
>
> - *Limit land uses in airport safety zones to those uses listed in the applicable ALUCPs as compatible uses, and regulate compatibility in terms of location, height, and noise.*
> - *Ensure that development, including public infrastructure projects, within the airport approach and departure zones complies with Part 77 of the Federal Aviation Administration Regulations (Objects Affecting Navigable Airspace), particularly in terms of height.*

NS-5-b Airport Safety Hazards. Ensure that new development, including public infrastructure projects, does not create safety hazards such as glare from direct or reflective sources, smoke, electrical interference, hazardous chemicals, fuel storage, or from wildlife, in violation of adopted safety standards.

NS-5-c Avigation Easements. Employ avigation easements in order to secure and protect airspace required for unimpeded operation of publicly owned airports.

NS-5-d Disclosure. As a condition of approval for residential development projects, require sellers to prepare and provide State Department of Real Estate Disclosure statements to property buyers notifying of noise and safety issues related to airport operations.

NS-5-e Planned Expansion. Allow for the orderly expansion and improvement of publicly owned airports, while minimizing adverse environmental impacts associated with these facilities.

- *Periodically update airport facility master plans in accordance with FAA regulations.*
- *Require land use within the boundaries of the Fresno-Yosemite International Airport and Chandler Downtown Airport to conform to designations and policies specified in adopted City of Fresno compatible land use plans.*
- *Provide local jurisdictions surrounding the City's publicly owned airports with specific guidelines for effectively dealing with the presence and operation of these airports.*

OBJECTIVE NS-6 Foster an efficient and coordinated response to emergencies and natural disasters.

Policy NS-6-a County Multi-Jurisdiction Hazard Mitigation Plan. Adopt and implement the Fresno County Multi-Jurisdiction Hazard Mitigation Plan and City of Fresno Local Hazard Mitigation Plan Annex.

Policy NS-6-b Disaster Response Coordination. Maintain coordination with other local, State, and Federal agencies to provide coordinated disaster response.

Policy NS-6-c Emergency Operations Plan. Update the City's Emergency Operations Plan periodically, using a whole community approach which integrates considerations for People with access and functional needs in all aspects of planning.

Policy NS-6-d Evacuation Planning. Maintain an emergency evacuation plan in consultation with the Police and Fire Departments and other emergency service providers, which shows potential evacuation routes and a list of emergency shelters to be used in case of catastrophic emergencies.

Policy NS-6-e Critical Use Facilities. Ensure critical use facilities (e.g. City Hall, police and fire stations, schools, hospitals, public assembly facilities, transportation services) and other structures that are important to protecting health and safety in the community remain operational during an emergency.

- *Site and design these facilities to minimize their exposure and susceptibility to flooding, seismic and geological effects, fire, and explosions.*
- *Work with the owners and operators of critical use facilities to ensure they can provide alternate sources of electricity, water, and sewerage in the event that regular utilities are interrupted in a disaster.*

Policy NS-6-f Emergency Vehicle Access. Require adequate access for emergency vehicles in all new development, including adequate widths, turning radii, hard standing areas, and vertical clearance.

Policy NS-6-g Emergency Preparedness Public Awareness Programs. *Continue to conduct programs to inform the general public, including people with access and functional needs, of the City's emergency preparedness and disaster response procedures.*

4.9.2 Impact Assessment

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

Less than Significant Impact. The proposed Project consists of a senior center and affordable housing units for seniors. The type of hazardous materials that would be associated with Project operations would be cleaning supplies, HVAC equipment, etc. Because of the use, it is not expected that the Project would routinely transport, use, or dispose of hazardous materials other than those typical of recreational uses and such materials would not be of the type or quantity that would pose a significant hazard to the public.

Potential impacts during the construction of the Project could result from the use of fuels and lubricants for construction equipment. However, these impacts would be short-term and temporary and would be reduced to less than significant levels through compliance with local, state, and federal regulations in addition to standard equipment operating practices. As indicated in the lead and asbestos surveys conducted for the Project site, the existing buildings and development on the parcel identified as APN 426-253-19 contain both lead and asbestos, which could result in potentially significant impacts. Occupational exposure to lead is regulated by OSHA (26 CFR 1926.22) and California OSHA (Title 8, GISO 5198 and CSO 1532.1), which requires initial employee exposure monitoring to evaluate worker exposure during work that disturbs lead containing paint. The San Joaquin Valley Air Pollution Control District is the responsible agency on the local level to enforce and require that asbestos-containing materials be removed prior to renovation or demolition activities. Therefore, through compliance with federal regulations, potential impacts related to release of or exposure to these hazardous materials would be reduced to less than significant levels.

Overall, compliance with local, state, and federal regulations, including but not limited to compliance with EPA's oil spills prevention and preparedness regulations, OSHA, California OSHA, California Office of Emergency Services implementation of hazardous materials accident prevention, and California Department of Toxic Substance Control permitting, regulations as administered by Fresno County, San Joaquin Valley Air Pollution Control District rules and regulations, and Fresno General Plan policies under *Objective NS-4*, in addition to standard equipment operating practices as indicated in operator manuals, would minimize the potential for impacts. For these reasons, the Project would have a less than significant impact.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

Less than Significant Impact. As described under criterion a) above, it is not anticipated that the Project itself will involve any operations that would require routine transport, use, or disposal of hazardous materials and therefore is not anticipated to create a significant hazard to the public or the environment through release of hazardous materials. While potential impacts would occur through construction-related transport and disposal of hazardous materials, such impacts would be short-term and temporary and would be reduced to less than significant levels

through compliance with local, state, and federal regulations in addition to standard equipment operating practices. Therefore, the Project would have a less than significant impact.

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Less than Significant Impact. Schools within one-quarter mile of the Project site include Del Mar Elementary School, approximately 0.20 miles southwest of the site. As described under criteria a) and b) above, the Project is not anticipated to emit hazard emissions or handle hazardous materials, substances, or water that would pose a risk or threat to the school or surrounding area. Therefore, a less than significant impact would occur.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

No Impact. According to EnviroStor and GeoTracker, the Project is not located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. Therefore, the Project would not create a significant hazard to the public of the environment. For these reasons, there would be no impact.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

Less than Significant Impact. The Project site is located within the PAZ of the Fresno Yosemite International Airport AIA. Because it is within the AIA, City of Fresno Planning staff is required to review the Project for consistency with the ALUCP and General Plan. Review for consistency took place during the entitlement process. Therefore, through compliance with the ALUCP and General Plan, the Project would not result in a safety hazard for people residing or working in the area and impacts would be less than significant.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

Less than Significant Impact. The Project would not involve any new or altered infrastructure associated with evacuation, emergency response, and emergency access routes within the City or County of Fresno. Construction of frontage improvements may require lane closure; however, these activities would be short-term and access through East Holland Avenue or East Swift Avenue would be maintained through standard traffic control. Following construction, these streets would continue to provide access to the site. Furthermore, the Project would be subject to compliance with applicable standards for on-site emergency access including turn radii and fire access. In addition, development projects would not impede the implementation of General Plan objective *NS-6* policies *NS-6-a* to *NS-6-g*. Therefore, through the development review process and General Plan compliance, the Project would not impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan and impacts would be less than significant.

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?

Less than Significant Impact. According to the Fresno General Plan, wildfire threats to Fresno are minimal because the city is largely urbanized or working agricultural land and lacks steep topography. Although the city is proximate to high and very high fire hazard designated area, the urbanized area is categorized as little or no threat or moderate fire hazard which is attributed to its paved areas. Furthermore, the Project site is not identified by the California Department of Forestry and Fire Protection (Cal Fire) as a Very High Fire Hazard Severity Zone (VHFHSZ) within the Local Responsibility Area.[28] In addition, the Project proposes the construction of a senior center and affordable housing development that would be occupied by humans; as such, the structure shall be constructed in adherence to the Wildland Urban Interface Codes and Standards of the California Building Code Chapter 7A. Compliance with such regulations would ensure that the Project meets standards to help prevent loss, injury, or death involving wildland fires. For these reasons, the Project would have a less than significant impact.

4.9.3 Mitigation Measures

None required.

[28] California Department of Forestry and Fire Protection. FHSZ Viewer. Accessed on September 17, 2024, https://egis.fire.ca.gov/FHSZ/.

4.10 HYDROLOGY AND WATER QUALITY

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?			X	
b)	Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X	
c)	Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:			X	
	i. Result in a substantial erosion or siltation on- or off-site;			X	
	ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site:			X	
	iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			X	
	iv. Impede or redirect flood flows?			X	
d)	In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?			X	
e)	Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X	

4.10.1 Environmental Setting

Through the entitlement review process, the City and responsible agencies will review the Project to determine adequate capacity in these systems and ensure compliance with applicable connection and discharge requirements.

Water

The City of Fresno Water Division manages and operates the City of Fresno's water system. Fresno meets its demand for domestic water from a combination of groundwater, treated surface water, and reclaimed water sources. Groundwater is accessed from the Kings River Sub-basin of the San Joaquin Valley Groundwater Basin, while surface water from the Central Valley Project and Kings River are treated at the Northeast Surface Water Treatment Facility and Southeast Surface Water Treatment Facility. Surface water is also used to replace lost groundwater through Fresno's recharge program at the City-owned Leaky Acres, Nielsen Recharge Facility, and smaller facilities in southeast Fresno.

Stormwater

The Fresno Metropolitan Flood Control District (FMFCD) manages stormwater runoff in Fresno. The major elements of the FMFCD's flood control system include dams, reservoirs, and detention basins. The FMFCD is responsible for reviewing development proposals to assess drainage and flood control impacts and needs, in addition to determining applicable requirements and modifications needed in order to implement the Storm Drainage and Flood Control Master Plan.

4.10.2 Impact Assessment

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Less than Significant Impact. Because the Project site is greater than one (1) acre in size, the developer is required to prepare a SWPPP (Section 4.7) in compliance with the General Permit for Discharges of Storm Water Associated with Construction Activity (i.e., General Permit Order No. 2012-0006-DWQ). The SWPPP estimates the sediment risk associated with construction activities and includes best management practices (BMP) to control erosion. BMPs specific to erosion control cover erosion, sediment, tracking, and waste management controls. Implementation of the SWPPP minimizes the potential for the Project to result in substantial soil erosion or loss of topsoil. These provisions minimize the potential for the Project to violate any waste discharge requirements or otherwise substantially degrade surface or ground water quality. Further, runoff resulting from the Project would be managed by the FMFCD in compliance with the Storm Drainage and Flood Control Master Plan in addition to approved grading and drainage plans. Thus, compliance with existing regulations including the General Construction Permit, BMPs, and Storm Drainage and Flood Control Master Plan would reduce potential impacts related to water quality and waste discharge to less than significant levels.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

Less than Significant Impact. The City's long-term water resource planning for existing and future demand is addressed in the City's 2020 Urban Water Management Plan (UWMP).[29] According to the UWMP, water demand in the city has decreased over the past two (2) decades and is expected to grow at a slower rate than the anticipated population growth. This trend is captured by the daily per capita water use, measured as gallons per capita per day (GPCD). For 2020, water use averaged 198 GPCD based on 121,993 acre-feet (AF) of water production. Of note, this GPCD is below the 2020 daily per capita water use target of 247 GPCD, which the UWMP attributes to conservation efforts implemented by the City. According to the UWMP, the City's per capita water usage is projected to continue to decline through 2045 due to more water efficiency in future construction and passive conservation pursuant to requirements of the California Plumbing Code (e.g., use of higher efficiency appliances, water efficient landscaping, etc.).

Regarding water supply reliability, the City manages its surface water and groundwater supply by maximizing water for potable use and intentional recharge during wet and normal years and relies on groundwater during dry years. To optimize water supply reliability and resiliency, the City is currently undergoing an update of its Metro Plan which will identify projects and programs. Generally, the City's approach is to maximize local supplies and improve the storage of the groundwater basin through recharge, recycled water usage, and conservation.

The UWMP projects normal water year, single dry water year, and five-year consecutive drought period supplies based on historic water allocations, sustainable yields, and utilization of recycled water. Based on these projections, the UWMP found that groundwater supplies remain reliable in all hydrologic conditions, attributing the stability to intentional recharge. The projections also show that the City will have greater than 100,000 AF available supply in normal years after meeting demands. In a single dry year, surface water supplies will be reduced but the City would still be able to meet all potable demands. Lastly, for five-year consecutive drought periods, the City is projected to meet all demands with its existing supplies with reduced groundwater recharge in year three (3) and four (4) to accommodate reduced surface water allocations. Based on these projections, it can be inferred that future development, such as the proposed Project, will not negatively impact the City's ability to provide water assuming adherence to requirements and recommendations from the City's water resources planning efforts.

According to the UWMP, the Project site is located in the Highway 41 Pressure Zone and there is an active City well located approximately 0.10 miles north of the Project site. There are also existing six (6)-inch public water mains and public fire hydrants on all surrounding roadways that the existing buildings are already connected to. Figure 4-2 shows the location of existing water wells, water mains, fire hydrants, and sewer mains in the vicinity of the Project site.[30] Development of the Project site has been reviewed by the City through the entitlement process and must incorporate conditions such as installing water service and meter boxes to connect to the existing City facilities

[29] City of Fresno (2021). 2020 Urban Water Management Plan. Accessed September 12, 2024, https://www.fresno.gov/publicutilities/wp-content/uploads/sites/16/2021/06/Fresno-2020-UWMP_Public-Draft_2021-06-29.pdf

[30] City of Fresno. Iveiw Fresno. Accessed September 12, 2024, https://iviewfresno.ci.fresno.ca.us/iview/index.html#

and paying the Water Capacity Fee for installation. Collectively, these facilities will convey water to and from the Project site.

Potable water demands for the Project were estimated using land-use-based unit water demand factors last updated for the City in 2018. The Project site has an existing land use of a shopping center (Neighborhood Commercial land use classification) and proposes to develop the site with a senior center (Community Activity Center land use classification) and affordable housing (High Density Residential). According to the land-use-based unit water demand factors for the City, the proposed land use has an annual average (ac-ft/yr/acre) of 2.76., compared to 6.51 (High Density Residential) and 2.16 (Community Activity Center) for the proposed uses.

Table 4-8 summarizes the total water demands to be expected by land use, indicating that a proposed land use would generate a slightly higher demand for water than the existing land use. As shown, the proposed Project would result in an increase in water demand compared to existing uses. However, the proposed land use and development density is consistent with the planned land use designation in the General Plan and the underlying zoning district. As a result, it can be presumed that the existing and planned water distribution system and supplies should be adequate to serve the Project, and the Project would thereby not interfere substantially with groundwater recharge or impede sustainable groundwater management of the basin. In addition, adherence to connection requirements and recommendations pursuant to the City's water supply planning efforts (i.e., compliance with California Plumbing Code, efficient appliances, efficient landscaping, etc.) should not negatively impact the City's water provision. Impacts would be less than significant.

Table 4-8 Summary of Total Water Demands by Land Use

Land Use	Area (ac)	Annual Average (Ac-Ft/Yr/Acre)	Annual Average (AFY)
Existing			
Neighborhood Commercial	5.51	2.76	15.20
Proposed			
High Density Residential	1.26	6.51	8.20
Community Activity Center	4.25	2.16	9.18
Total	5.51	--	17.38

Figure 4-2 Existing Water and Sewer Infrastructure in the Project Vicinity

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:

i. Result in substantial erosion or siltation on- or off-site?

Less than Significant Impact. Erosion is a natural process in which soil is moved from place to place by wind or from flowing water. The effects of erosion can be accelerated by ground-disturbing activities associated with development. Siltation is the settling of sediment to the bed of a stream or lake which increases the turbidity of water. Turbid water can have harmful effects to aquatic life by clogging fish gills, reducing spawning habitat, and suppress aquatic vegetation growth.

Development of the Project site would occur on already developed and paved urban land, which is less susceptible to erosion than land with bare soils, thus it is expected that minimal erosion would occur on-site. During construction activities, and in compliance with the Project's Stormwater Pollution Prevention Plan (SWPPP), construction-related erosion controls and BMPs would be implemented to reduce potential impacts related to erosion and siltation. These BMPs would include, but are not limited to, covering and/or binding soil surfaces to prevent soil from being detached and transported by water or wind, and the use of barriers such as straw bales and sandbags to control sediment. Together, the controls and BMPs are intended to limit soil transportation and erosion.

In addition, development of the Project has been reviewed and conditioned by the FMFCD to ensure adequately discharged and captured stormwater runoff. The proposed drainage pattern is required to be constructed per regulations of the Storm Drainage and Flood Control Master Plan and will be reviewed by the FMFCD to ensure proper drainage. Consequently, review and approval by the FMFCD and compliance with standard requirements would result in a less than significant impact.

d) Substantially increase the rate or amount of surface runoff in a manner, which would result in flooding on- or off-site?

Less than Significant Impact. Development of the Project, including grading and drainage plans, has been reviewed, and conditioned by the FMFCD prior to the final development approval to ensure that surface runoff is controlled in a manner which would not result in flooding on- or off-site. For this reason, a less than significant impact would occur because of the Project.

e) Create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

Less than Significant Impact. As previously mentioned, the FMFCD has reviewed the Project to ensure that surface runoff is controlled in a manner which would not result in the creation or contribution of runoff water that would exceed the capacity of existing or planned stormwater drainage services or provide substantial additional sources of polluted runoff. For this reason, a less than significant impact would occur because of the Project.

f) Impede or redirect flood flows?

Less than Significant Impact. Although the construction of the proposed Project would increase impervious surfaces compared to the presently vacant site, the Project would not alter drainage patterns because Project-specific

grading and drainage plans are required to be reviewed by the FMFCD before building permit approval. Additionally, the overall Project would decrease impervious surfaces when compared to the now demolished, former grocery store and paved parking lot. Further, the Project site is currently connected to existing facilities. As a result, the Project would not impede or redirect flood flows and a less than significant impact would occur as a result.

g) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

Less than Significant Impact. The Project site is not in a flood hazard, tsunami, or seiche zone (i.e., standing waves on river, reservoirs, ponds, and lakes); there are no oceans, rivers, reservoirs, ponds, or lakes on or within the site and its vicinity. The Project site is designated as Zone X on the most recent Flood Insurance Rate Map (FIRM) No. 0601901570H dated February 18, 2009. Zone X is an area of minimal flood hazards with a 0.2 percent-annual-chance of flood (i.e., 500-year flood). In addition, the Project area as well as the city of Fresno has historically been subject to low to moderate ground shaking and has a relatively low probability of shaking. As such, seiches are unlikely to form due to the low seismic energy produced in the area. Therefore, as a low-risk area, a less than significant impact as it relates to the risk release of pollutants due to project inundations would occur as a result of the Project.

h) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

Less than Significant Impact. A groundwater sustainability plan was adopted for the Kings Groundwater Sub-basin on November 21, 2019, by the North Kings Groundwater Sustainability Agency, of which the City of Fresno is a member.[31] The proposed Project is required to comply with the adopted plan (North Kings Groundwater) to meet the 2040 sustainability deadline for the basin. As mentioned above, surface water will largely be the source of supply in wet hydrologic periods, groundwater will be used in a managed manner in normal hydrologic periods and relied upon more in very dry periods. Through 30 years of diligent water resource planning and construction of surface water treatment facilities, inclusive of the Southeast Surface water Treatment Facility (which is a project within the sustainability plan), the City has largely attained the balanced use of groundwater supplies well ahead of the legislative requirement of 2040, thus making the City compliant with the North Kings Groundwater Sustainability Plan goals. For these reasons, a less than significant impact would occur because of the Project.

4.10.3 Mitigation Measures

None required.

[31] North Kings Groundwater Sustainability Agency (2020). Groundwater Sustainability Plan. Accessed October 6, 2021, https://northkingsgsa.org/groundwater-sustainability-plan/

4.11 LAND USE PLANNING

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Physically divide an established community?				X
b)	Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			X	

4.11.1 Environmental Setting

The Project site is within the city limits of Fresno and is surrounded by existing urban development.

4.11.2 Impact Assessment

a) Physically divide an established community?

No Impact. Typically, physical division of an established community would occur if a project introduced new incompatible uses inconsistent with the planned or existing land uses or created a physical barrier that impeded access within the community. Typical examples of physical barriers include the introduction of new, intersecting roadways, roadway closures, and construction of new major utility infrastructure (e.g., transmission lines, storm channels, etc.).

Surrounding Land Uses

The Project site is along the Blackstone Avenue Corridor within an area generally characterized by a mix of existing land uses including residential (south and west), commercial (north, east, and south), and ponding basin (north). Future site improvements would be regulated by development standards and zoning regulations, including height, landscaping, setbacks, improvements, right-of-way dedications, open space, parking, and permitted uses etc. As such, the Project would be consistent and therefore compatible with the existing uses surrounding the Project site. Therefore, implementation of the Project would be generally consistent with the existing and planned land uses within the Project area.

Circulation System

East Holland Avenue, a two (2)-lane, east-west collector forms the northerly site boundary and North Blackstone Avenue, a six (6)-lane, north-south arterial forms the easterly site boundary. Existing street frontage improvements include curb, gutter, sidewalk, storm-drains, streetlights, etc. The Project would continue to be served by the existing circulation system and related infrastructure. The Project does not propose construction of new external roadways.

Utility Infrastructure

The Project site is within city limits and thus will be required to connect to city water, stormwater, and wastewater services. Natural gas, electricity, and telecommunications are provided by private companies. Utility systems are described and analyzed in Section 4.10 and Section 4.15. Based on the analysis, implementation of the Project would not result in the construction of new, major utility infrastructure.

Overall, the Project would not represent a significant change in the surrounding area. Implementation of the Project would be generally consistent with the surrounding area and would not result in the physical separation of the established community. For these reasons, a less than significant impact would occur because of the Project.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

Less than Significant Impact. Generally, policy conflicts are environmental impacts when they would result in direct physical impacts or where those conflicts relate to avoiding or mitigating environmental impacts. As such, associated physical environmental impacts are discussed in this document under specific topical sections, such as Biological Resources, Cultural Resources, and Tribal Cultural Resources. However, a discussion of certain land use plans, policies, and regulations that are applicable to the proposed Project are included in Table 4-9. Table 4-8 provides a comparison of the Project's characteristics with all applicable policies included in the General Plan as they relate to infill residential development within BRT Corridors. As discussed below, the proposed Project is generally consistent with the General Plan.

Table 4-9 Project Consistency with Applicable General Plan Policies

Objective UF-12. Locate roughly one-half of future residential development in infill areas—defined as being within the City on December 31, 2012— including the Downtown core area and surrounding neighborhoods, mixed-use centers and transit-oriented development along major BRT corridors, and other non-corridor infill areas, and vacant land.	
Implementing Policies	**Project Consistency**
UF-12-a. BRT Corridors. *Design land uses and integrate development site plans along BRT corridors, with transit-oriented development that supports transit ridership and convenient pedestrian access to bus stops and BRT station stops.*	**Consistent.** The Project site is along the Blackstone Avenue Corridor which is designated as a BRT Corridor by the Fresno General Plan. Further, the Project is within 0.25-miles from four (4) bus stops and BRT station stops. Therefore, the Project can be considered transit-oriented development that supports transit ridership and convenience pedestrian access to bus/BRT stops and is thereby consistent with UF-12-a.
UF-12-b. Activity Centers. *Mixed-use designated areas along BRT and/or transit corridors are appropriate for more intensive concentrations of urban uses. Typical uses could include commercial areas; employment centers; schools; compact residential development; religious institutions; parks; and other gathering points where residents may interact, work, and obtain goods and services in the same place.*	**Consistent.** The Project would facilitate the development of a senior center and affordable housing units for seniors on a mixed-use designated site within an urbanized area along the Blackstone Avenue Corridor. This corridor is a BRT Corridor and Activity Center as per the Fresno General Plan. Thus, the Project is consistent with UF-12-b.

UF-12-c. Local-Serving Neighborhood Centers. Design Neighborhood Centers for local services and amenities that build upon the character and identity of surrounding neighborhoods and communities	**Consistent.** The Project would facilitate the development of a centrally located, transit-accessible senior center and affordable housing units for seniors that would provide services and amenities for the local senior population residing in the city of Fresno. As of 2019 the city's population that is 65 years and over accounts for approximately 11% (58,538) of the overall population (525,010). [32] Approximately 3,707 seniors, or 6% of the total senior population live within a one (1)-mile radius of the proposed Project. [33] Thus, the Project is consistent with UF-12-c.
UF-12-d. Appropriate Mixed-Use. Facilitate the development of vertical and horizontal mixed-uses to blend residential, commercial, and public land uses on one or adjacent sites. Ensure land use compatibility between mixed-use districts in Activity Centers and the surrounding residential neighborhoods.	**Consistent.** The Project would facilitate the development of a senior center and affordable housing units for seniors, thereby blending residential and public institutional uses in the project area. Both proposed uses are permitted by the underlying mixed-use land use designation and zone district, which is situated along the Blackstone Avenue Corridor. This corridor is designated as a BRT Corridor and Activity Center by the Fresno General Plan. Therefore, the Project is consistent with UF-12-d.
Objective LU-2. *Plan for infill development that includes a range of housing types, building forms, and land uses to meet the needs of both current and future residents.*	
Implementing Policies	**Project Consistency**
LU-2-a. Infill Development and Redevelopment. Promote development of vacant, underdeveloped, and re-developable land within the City Limits where urban services are available by considering the establishment and implementation of supportive regulations and programs	**Consistent.** The Project would facilitate the development of a senior center and affordable housing units for seniors on a previously developed site. The site formerly contained a grocery store and paved parking lot, in addition to a retail strip mall, and can therefore be considered an infill site that is re-developable land. Further, because the Project site is an infill site surrounded by existing urban uses, urban services are available to serve the site. Therefore, the Project is consistent with LU-2-a.
Objective LU-5. *Plan for a diverse housing stock that will support balanced urban growth, and make efficient use of resources and public facilities.*	
Implementing Policies	**Project Consistency**
LU-5-i. Housing for Seniors. Facilitate the development of senior housing projects that are accessible to public transportation and services.	**Consistent.** The Project site is along the Blackstone Avenue Corridor which is designated as a BRT Corridor by the Fresno General Plan. Further, the Project is within

[32] U.S. Census Bureau. American Community Survey, 2019, 5-Year Estimates for S0103: Population 65 Years and Over. Accessed March 29, 2022.

[33] Surrounding neighborhoods within a one (1) mile radius include Census Tracts: 35, 46.02, 49.01, 50, and 51.

	0.25-miles from four (4) bus stops and BRT station stops. Further, the Project would be accessible to public transportation and services. Therefore, the Project is consistent with LU-5-i.

Further, through the entitlement process, the Project has been reviewed for compliance with applicable regulations inclusive of those adopted for the purpose of avoiding or mitigating environmental effects. Overall, the entitlement process would ensure that the Project complies with the General Plan, FMC, and any other applicable policies and regulations. As such, the Project would have a less than significant impact.

4.11.3 Mitigation Measures

None required.

4.12 MINERAL RESOURCES

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
b)	Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

4.12.1 Environmental Setting

The California Geological Survey (CGS) classifies and designates areas within California that contain or potentially contain significant mineral resources. Lands are classified into Aggregate and Mineral Resource Zones (MRZs), which identify known or inferred significant mineral resources. According to the California Department of Conservation, CGS's Surface Mining and Reclamation Act (SMARA) Mineral Lands Classification (MLC) data portal, the nearest mineral resource areas to the city of Fresno are in the San Joaquin and Kings River areas which are classified as Mineral Resource Zone (MRZ)-2.

4.12.2 Impact Assessment

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

No Impact. The Project site is not located in an area designated for mineral resource preservation or recovery. Therefore, the Project would not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state. Therefore, no impact would occur as a result of the Project.

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

No Impact. As described above, the Project site is not located in an area designated for mineral resource preservation or recovery and as a result, the Project would not result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state. Further, the site is not delineated on the General Plan, a Specific Plan, or other land use plan as a locally important mineral resource recovery site, thus it would not result in the loss of availability of a locally important mineral resource. Therefore, no impact would occur as a result of the Project.

4.12.3 Mitigation Measures

None required.

4.13 NOISE

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?		X		
b)	Generation of excessive groundborne vibration or groundborne noise levels?		X		
c)	For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			X	

4.13.1 Environmental Setting

In general, there are two (2) types of noise sources: 1) mobile source and 2) stationary sounds. Mobile source noises are typically associated with transportation including automobiles, trains, and aircraft. Stationary sounds are sources that do not move such as machinery or construction sites. Two (2) noise generating activities of the Project would include construction (short-term, temporary) and operational (long-term) noise.

Sensitive land uses include residential, schools, churches, nursing homes, hospitals, and open space/recreation areas. Commercial, farmland, and industrial areas are not considered noise sensitive and generally have higher tolerances for exterior and interior noise levels. The nearest sensitive receptors to the Project site are single-family residences located adjacent to the west of the Project site.

Fresno General Plan

The City of Fresno General Plan Noise Element provides noise level criteria for land use compatibility for both transportation and non-transportation noise sources. The General Plan sets noise compatibility standards for transportation noise sources in terms of the Day-Night Average Level (L_{dn}). The L_{dn} represents the time-weighted energy average noise level for a 24-hour day, with a 10 dB penalty added to noise levels occurring during the nighttime hours (10:00 p.m.-7:00 a.m.). The L_{dn} represents cumulative exposure to noise over an extended period of time and is therefore calculated based upon *annual average* conditions. Table 4-10 provides the General Plan noise level standards for transportation noise sources.

Table 4-10 City of Fresno General Plan Noise Level Standards - Transportation (Non-Aircraft) Noise Sources

Noise-Sensitive Land Use	Outdoor Activity Areas[1]	Interior Space	
	L_{dn}/CNEL, dB	L_{dn}/CNEL, dB	L_{eq} dB[2]
Residential	65	45	-
Transient Lodging	65	45	-
Hospitals, Nursing Homes	65	45	-
Theaters, Auditoriums, Music Halls	-	-	35
Churches, Meeting Halls	65	-	45
Office Buildings	-	-	45
Schools, Libraries, Museums	-	-	45

1 Where the location of the outdoor activity areas is unknown or is not applicable, the exterior noise level standard shall be applied to the property line of the receiving land use.
2 As determined for a typical worst-case hour during periods of use.
Source: City of Fresno General Plan

The General Plan also establishes implementing policies related to new noise sensitive land uses (*NS-1-a*), new developments with potential impact due to existing noise-sensitive land uses (*NS-1-i*), and of significance threshold when determining an increase in noise levels over existing ambient noise levels (*NS-1-j*).

Implementation Policy NS-1-a Desirable and Generally Acceptable Exterior Noise Environment. *Establish 65 dBA L_{dn} or CNEL as the standard for the desirable maximum average exterior noise levels for defined usable exterior areas of residential and noise-sensitive uses for noise, but designate 60 dBA L_{dn} or CNEL (measured at the property line) for noise generated by stationary sources impinging upon residential and noise- sensitive uses. Maintain 65 dBA L_{dn} or CNEL as the maximum average exterior noise levels for non-sensitive commercial land uses, and maintain 70 dBA L_{dn} or CNEL as maximum average exterior noise level for industrial land uses, both to be measured at the property line of parcels where noise is generated which may impinge on neighboring properties.*

Implementation Policy NS-1-i Mitigation by New Development. *Require an acoustical analysis where new development of industrial, commercial or other noise generating land uses (including transportation facilities such as roadways, railroads, and airports) may result in noise levels that exceed the noise level exposure criteria established by Table 4-10 and Table 4-11 to determine impacts, and require developers to mitigate these impacts in conformance with Tables 9-2 and 9-3 as a condition of permit approval through appropriate means.*

Noise mitigation measures may include:

- *The screening of noise sources such as parking and loading facilities, outdoor activities, and mechanical equipment;*
- *Providing increased setbacks for noise sources from adjacent dwellings;*
- *Installation of walls and landscaping that serve as noise buffers;*
- *Installation of soundproofing materials and double-glazed windows; and*
- *Regulating operations, such as hours of operation, including deliveries and trash pickup.*

Alternative acoustical designs that achieve the prescribed noise level reduction may be approved by the City, provided a qualified Acoustical Consultant submits information demonstrating that the alternative designs will achieve and maintain the specific targets for outdoor activity areas and interior spaces. As a last resort, developers

may propose to construct noise walls along roadways when compatible with aesthetic concerns and neighborhood character. This would be a developer responsibility, with no City funding.

Implementation Policy NS-1-j Significance Threshold. *Establish, as a threshold of significance for the City's environmental review process, that a significant increase in ambient noise levels is assumed if the project would increase noise levels in the immediate vicinity by 3 dB L_{dn} or CNEL or more above the ambient noise limits established in this General Plan Update.*

When an increase in noise would result in a "significant" impact (increase of three dBA or more) to residents or businesses, then noise mitigation would be required to reduce noise exposure. If the increase in noise is less than three dBA, then the noise impact is considered insignificant and no noise mitigation is needed. By setting a specific threshold of significance in the General Plan, this policy facilitates making a determination of environmental impact, as required by the California Environmental Quality Act. It helps the City determine whether (1) the potential impact of a development project on the noise environment warrants mitigation, or (2) a statement of overriding considerations will be required.

Fresno Municipal Code

Section 15-2506 of the City of Fresno Municipal Code (FMC) establishes hourly acoustical performance standards for non-transportation noise sources, as shown in Table 4-11. FMC states that when ambient noise levels exceed or equal the levels the standards, mitigation shall only be required to limit noise to the existing ambient noise levels, with an allowance to exceed by maximum five (5) dB. *Section 15-2506* of the Municipal Code is consistent with *Implementing Policy NS-1-i* of the Noise Element of the City of Fresno General Plan.

Table 4-11 Non-Transportation Noise Level Standards, dBA – City of Fresno Municipal Code, Section 15-2506

Daytime (7 a.m. – 10 p.m.)		Nighttime (10 p.m. – 7 a.m.)	
L_{eq}	L_{max}	L_{eq}	L_{max}
50	70	45	60

Source: City of Fresno Municipal Code

Section 10 of the FMC provides existing ambient noise levels to be applied to various districts, further divided into various hours of the day. Table 4-12 describes the assumed minimum ambient noise levels by district and time. *Section 10-102(b)* states *"For the purpose of this ordinance, ambient noise level is the level obtained when the noise level is averaged over a period of fifteen minutes, without inclusion of the offending noise, at the location and time of day at which a comparison with the offending noise is to be made. Where the ambient noise level is less than that designated in this section, however, the noise level specified herein shall be deemed to be the ambient noise level for that location"*.

Table 4-12 Assumed Minimum Ambient Noise Level, dBA - City of Fresno Municipal Code, Section 10-102(B)

District	Time	Sound Level, dB L_{eq}
Residential	10 PM to 7 AM	50
Residential	7 PM to 10 PM	55
Residential	7 AM to 7 PM	60
Commercial	10 PM to 7 AM	60
Commercial	7 PM to 10 PM	65
Industrial	Anytime	70

Source: City of Fresno Municipal Code

For noise sources that are not transportation related, which usually includes commercial or industrial activities and other stationary noise sources (such as amplified music), it is common to assume that a 3-5 dB increase in noise levels represents a substantial increase in ambient noise levels. This is based on laboratory tests that indicate that a 3 dB increase is the minimum change perceptible to most people, and a 5 dB increase is perceived as a "definitely noticeable change."

Existing Ambient Noise Environment

The Project Area is within City Limits. Most Project parcels are surrounded by urbanized development. As such, the existing noise environment is impacted by various noise sources, including vehicles, residential (i.e. talking, car doors shutting, dogs barking, etc.), commercial/retail (i.e. talking, car doors shutting, loading, etc.), industrial (i.e., machinery, loading, talking, etc.), office (i.e., car doors shutting, etc.), and noise from other uses.

4.13.2 Impact Assessment

a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or in other applicable local, state, or federal standards?

Less than Significant Impact with Mitigation Incorporated. Noise generating activities of the Project would include traffic noise and stationary source noise, such as operations and construction as described below. Overall, the Project would result in a less than significant impact regarding noise.

Mobile-Source Noise

The primary source of on-going noise from the future senior center and apartment units will be from vehicles traveling to and from the site. The Project will generate an increase in traffic on some roadways in the Project area. However, the relatively low number of new trips associated with the Project is not likely to increase the ambient noise levels by a significant amount as the area is active with vehicles and the proposed Project will not introduce a new significant source of noise that isn't already occurring in the area.

Operational

Based on anticipated operations as a senior center and affordable housing development, stationary noise sources can be expected from mechanical equipment, such as HVAC systems. Such noise sources can be expected to be intermittent and generally localized within the enclosed building. Much of this equipment would be in equipment rooms or in areas that are shielded from direct public/personnel exposure (e.g., above ceilings, in walls, behind enclosures) and associated noises would therefore be indiscernible beyond the building walls.

Further, the Project would be subject to compliance with the General Plan Noise Element and FMC requirements to ensure that the ambient noise level does not increase at receiving residential properties by more than 5 dB. Given the amount of existing commercial and residential uses in the Project area and the Project's required compliance with applicable policies and regulations, it can be expected that the Project would not introduce a new significant source of noise that is not already occurring in the Project area. Therefore, the Project would have a less-than-significant impact regarding operational noise impacts.

Construction

The City of Fresno does not have standardized criteria for assessing construction noise impacts in Fresno. Therefore, the following sources are used for comprehensive thresholds to evaluate and mitigate construction noise impacts:

- *80 dBA or higher per the Caltrans Technical Noise Supplement to the Traffic Noise Analysis Protocol (2013)*
- *86 dBA at 50 feet from the job site activities from 9 p.m. to 6 a.m. per the Caltrans Traffic Noise Analysis Protocol (2020)* [34]
- *85 dBA at 50 ft. from the sources per the Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual (2018)*
- *85 dBA or higher per the Environmental Protection Agency Noise Control Act Guidelines*
- *90 dBA for occupational noise exposure over an eight (8)-hour workday, with recommended hearing protection for levels above 85 dBA, per the Occupational Safety and Health Administration (OSHA)*

Construction activities would result in short-term noise impacts that vary depending on the nature of the phase of construction (e.g., site preparation, grading and trenching, building construction, etc.). Construction phases would include standard construction activities such as site preparation, grading/excavation, draining/utilities/trenching, foundations/concrete pour, building construction, and paving. Table 4-13 provides a list of construction equipment that would be used for construction of the Project with maximum noise levels at 50 ft., following the Federal Highway Administration (FHWA) Roadway Construction Noise Model (RCNM). As shown, several types of equipment would be expected to exceed the thresholds of 80 dBA provided above at 50 ft.

Table 4-13 Typical Construction Equipment Maximum Noise Levels, dBA at 50 ft.

Equipment Type	Maximum Noise Level (Lmax) at 50 ft.

Truck	88

The nearest sensitive land use is single-family residences adjacent to the west of the Project site. The residences are approximately 20 to 50 feet from the Project site. Between the Project site and single-family residences are approximately 5 ft. tall concrete walls with mature trees and landscaping, and setbacks of approximately 20-65 ft. Per the FHWA Noise Barrier Design Handbook, these existing measures can provide at least 5 dBA noise reductions.

An estimate of construction equipment noise impacts at 20 feet from the Project site was modeled using the FHWA RCNM Version 1.0. Results are shown in Table 4-14.

Table 4-14 Receptors and Baseline Analyzed in the RCNM

Equipment Type	Noise Level (Leq) at 20 ft. (dBA)	Noise Level (Leq) at 20 ft. with 5 dBA Noise Reduction	Noise Limit Exceedance (dBA)

Scraper	87.6	82.6	2.6
Truck	*not modeled	*not modeled	-

Based on the thresholds identified above and the noise levels expected by equipment type at 20 ft., construction-related noise impacts could be potentially significant even with the existing 5 ft. tall concrete walls. Of note, 5-ft. concrete walls typically result in a 5dBA reduction. Typical noise levels generated by individual pieces of construction equipment generally range from approximately 77 dBA to 85 dBA Leq at 20 ft., with a 5 dBA noise reduction from the concrete walls. Therefore, to mitigate construction-related noise impacts to less than significant levels for nearby sensitive receptors, the Project shall incorporate ***MM NOI-1*** to implement noise reduction measures as described below. Noise control devices, such as mufflers, lagging, and/or motor enclosures can typically reduce noise levels by 15 to 25 dBA depending on design and quality. With the incorporation of ***MM NOI-1***, construction noise impacts would have a less than significant impact.

> ***Mitigation Measure NOI-1:*** *Prior to awarding a contract for construction, the City of Fresno Capitol Projects Department shall verify that the Contractors' scopes of work and agreements for the Project include equipment noise reduction measures for the construction equipment utilized for the Project, including*

dozers, generators, graders, pneumatic tools, pumps, and scrapers that generate more than 80 Leq dBA as measured at the property line of the neighboring single-family residences to the west of the Project site. The following measures shall be implemented to reduce noise levels by 15 to 25 dBA.

- *Place stationary noise generators at least 50 ft. or more from the property line of the adjacent sensitive receptors to the west of the Project site.*
- *Ensure pneumatic impact tools and equipment used will have intake and exhaust mufflers recommended by the manufacturers thereof, to meet relevant noise limitations.*
- *Equip dozers, generators, graders, pneumatic tools, pumps, and scrapers with noise control devices such as mufflers, lagging, and/or motor enclosures.*
- *Schedule construction activities so as to avoid operating all pieces of noise-generating equipment simultaneously within 50 ft. or less from the property line of the adjacent sensitive receptors to the west of the Project site.*

Lastly, construction-related noise levels for the Project would be short-term and cease upon Project completion. These activities would be temporary and would generally take place Monday through Friday between 7:00 am and 7:00 pm. FMC *Section 10-109.- Exceptions* states that construction noise is exempted from City noise regulations provided such work takes places between 7:00 am and 10:00 pm on any day except Sunday. Construction-related noise would cease upon completion of the Project and would be conducted in accordance with the FMC. Additionally, construction noise is not considered to have a significant impact if construction is limited to daytime hours and construction equipment is adequately maintained and muffled. For these reasons, the Project would have a less than significant impact regarding construction noise impacts.

b) Generation of excessive groundborne vibration or groundborne noise levels?

Less than Significant with Mitigation Incorporated. Vibration refers to ground borne noise and perceptible motion. Typical sources of ground borne vibration are construction activities, such as blasting, pile driving, and operating heavy-duty earthmoving equipment, steel-wheeled trains, and occasional traffic on rough roads. Impacts from ground borne vibration and noise from these typical sources are usually within approximately 100 feet of the vibration source. Ground borne vibration has the potential to disturb people and damage buildings. Ground borne vibration is usually measured in terms of vibration velocity such as peak particle velocity (PPV).

The City of Fresno does not have regulations that define acceptable levels of vibration. One of the most recent references suggesting vibration guidelines is the California Department of Transportation (Caltrans) Transportation and Construction Vibration Guidance Manual. The Manual provides guidance for determining annoyance potential criteria and damage potential threshold criteria based on categories of structures, including historic buildings that may not be considered extremely fragile. These criteria are provided below in Table 4-15 and Table 4-16 and are presented in terms of peak PPV in inches per second (in/sec). The PPV levels reported represent those measured at the potential receiver location.

Table 4-15 Guideline Vibration Annoyance Potential Criteria

Human Response	Maximum PPV (in/sec) at Receiver	
	Transient Sources	Continuous/Frequent Intermittent Sources
Barely Perceptible	0.04	0.01

Distinctly Perceptible	0.25	0.04
Strongly Perceptible	0.9	0.1
Severe	2.0	0.4

***Source**: Caltrans*

Table 4-16 Guideline Vibration Damage Potential Threshold Criteria

Structure and Condition	Maximum PPV (in/sec) at Receiver	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile, historic buildings, ancient monuments	0.12	0.08
Fragile buildings	0.2	0.1
Historic and some old buildings	0.5	0.25
Older residential structures	0.5	0.3
New residential structures	1.0	0.5
Modern industrial/commercial buildings	2.0	0.5

***Source**: Caltrans*

Implementation of the Project would result in a senior center and affordable housing units for seniors, which would have noise generating activities. Operations related to the recreational and residential development are not likely to include uses or activities that typically generate ground borne vibration or ground borne noise levels in excess. However, temporary ground borne vibration may result from construction, depending on the use of equipment, distance to affected structures, and soil type. Generalized vibration levels associated with typical residential construction activities at distances of 25 feet, 50 feet, 100 feet and 300 feet are summarized by Table 4-17. These levels would not be expected to exceed any significance threshold levels for annoyance or damage, as provided above in Table 4-15 and Table 4-16, except for vibratory rollers which would exceed the thresholds for extremely fragile and fragile buildings if used within 25 ft. However, based on historic aerial imagery and estimated year-built dates, the single-family residences adjacent to the Project site to the west were built between 1950 and 1960 which would generally be considered "older residential structures." Therefore, impacts would be less than significant.

Table 4-17 Typical Vibration Levels During Construction

Equipment	PPV (in/sec)			
	At 25 ft.	At 50 ft.	At 100 ft.	At 300 ft.
Bulldozer (Large)	0.089	0.042	0.019	0.006
Bulldozer (Small)	0.003	0.001	0.0006	0.0002
Loaded Truck	0.076	0.027	0.017	0.005
Jackhammer	0.035	0.012	0.008	0.002
Vibratory Roller	0.210	0.097	0.046	0.013
Caisson Drilling	0.089	0.042	0.019	0.006

***Source**: Caltrans and Federal Transit Administration*

c) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Less than Significant Impact. The nearest public and public use airport is the Fresno Yosemite International Airport approximately ± 3.3-mile southeast of the Project site. The Project Site is within the Airport Influence Area (AIA) but is not within the airport's noise contour. Because the Project is within the AIA, City of Fresno Planning staff is required to review the Project for consistency with the ALUCP and General Plan. Review for consistency took place

during the entitlement process. Therefore, through compliance with the ALUCP and General Plan, the Project would not result in a safety hazard for people residing or working in the area and impacts would be less than significant.

4.13.3 Mitigation Measures

None required.

4.14 POPULATION AND HOUSING

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
b)	Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X

4.14.1 Environmental Setting

CEQA Guidelines Section 15126.2(d) requires that a CEQA document discuss the ways in which the proposed Project could foster economic or population growth, or the construction of additional housing, either directly or indirectly, in the surrounding environment. The CEQA Guidelines provide an example of a major expansion of a wastewater treatment plant that may allow for more construction within the service area. The CEQA Guidelines also note that the evaluation of growth inducement should consider the characteristics of a project that may encourage or facilitate other activities that could significantly affect the environment. Direct and Indirect Growth Inducement consists of activities that directly facilitate population growth, such as construction of new dwelling units.

4.14.2 Impact Assessment

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

Less than Significant Impact. A key consideration in evaluating growth inducement is whether the activity in question constitutes "planned growth." A residential project that is consistent with the underlying General Plan would generally be considered planned growth because it was previously contemplated by these long-range planning documents, and, thus, would not be deemed to have a significant growth-inducing effect. The Project proposes the development of a senior center and affordable housing units for seniors, which is consistent with the zoning and planned land use of the site. In addition, the Project does not propose new roadways or major infrastructure constructions since it is a fully developed site surrounded by existing uses and related infrastructure. As such, the Project would have a less than significant impact.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

No Impact. The Project site does not currently provide housing. Development of the Project site would not result in the physical displacement of people or housing. No impact would occur because of the Project.

4.14.3 Mitigation Measures

None required.

4.15 PUBLIC SERVICES

Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i. Fire protection?			X	
ii. Police protection?			X	
iii. Schools?			X	
iv. Parks?			X	
v. Other public facilities?			X	

4.15.1 Environmental Setting

The Project is located within Fresno city limits and thus, would be subject to fees for the construction, acquisition, and improvements for such services. These services and fees include:

Fire Protection Services

Fire Protection Services in the city are provided by the Fresno Fire Department (FFD). The FFD operates a total of 20 fire stations/companies that serve a 116-square-mile area. To facilitate adequate service ratios, response times, or other performance objectives for fire protection services, all development in the city of Fresno is required to be located within three (3) miles of an existing fire station. To address impacts to fire protection services, the City of Fresno has implemented the Fire Facilities Fee pursuant to Section 12-4.901 of the FMC, which requires developers to pay the "fair share" of construction and acquisition costs for improvements to fire department facilities. The Project would be subject to the assessment of a Fire Facilities Impact Fee based on the project size.

Table 4-18 Fire Facilities Fee Program

Type	Fee
Single-Family Residential per unit	$1,893
Multi-Family Residential per unit	$1,429
Retail per 1,000 sf. of building	$662
Office per 1,000 sf. of building	$757

Police Protection Services

Police Protection Services in the city are provided by the Fresno Police Department (FPD). The FPD is divided into five (5) policing districts. Currently, the City has 926 authorized police officer positions with 858 filled as of June 2024, allowing up to a service level of 1.57 officer per 1,000 residents and providing 1.45 officer per 1,000 residents. To address impacts to police protection services, the City has implemented the Police Facilities Fee pursuant to Section 12-4.801 of the FMC, which requires developers to pay the "fair share" of construction and acquisition costs for improvements to police protection services and facilities. The Project would be subject to the assessment of a Police Facilities Impact Fee based on the project size.

Table 4-19 Police Facilities Fee Program

Type	Fee
Single-Family Residential per unit	$618
Multi-Family Residential per unit	$466
Retail per 1,000 sf. of building	$658
Office per 1,000 sf. of building	$626

Schools

Educational services within the Project Area are provided by Fresno Unified School District. Funding for schools and school facilities impacts is outlined in Education Code Section 17620 and Government Code Section 65995 et. seq., which governs the amount of fees that can be levied against new development. These fees are used to construct new or expanded school facilities. Payment of fees authorized by the statute is deemed "full and complete mitigation." A School Impact Fee will be assessed for the Project based on the Developer Fee rates in place at the time payment is due.

Parks and Recreation

Park and Recreation Facilities are overseen by the Fresno Parks and Recreation Department, Parks, After School, Recreation, and Community Services (PARCS). The General Plan established a service standard for park acreage of five (5) acres per 1,000 residents, with three (3) acres for community, neighborhood, and pocket parks and two (2) acres as regional parks. Similar to other public services, the City had established the Park Facilities Fee which requires developers to pay the "fair share" of construction and acquisition for improvements to park facilities. A Park and Recreation Impact Fee will be assessed for the proposed Project based on the Project size.

Courts

The city of Fresno contains two (2) State courts, Fresno County Superior Court and 5th District Court of Appeal, and one (1) federal court.

Library

The Fresno County Public Library System provides libraries in the city of Fresno. There are 39 libraries throughout the County of Fresno, 11 of which are located in the city of Fresno planning area.

Hospital

There are nine (9) hospitals located within the city of Fresno planning area with a total capacity of 1,603 beds as of 2020.

4.15.2 Impact Assessment

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services:

i. Fire protection?

Less than Significant Impact. The Project site is within the city limits and therefore would be served by FFD. There are four (4) fire stations within a three (3)-mile radius of the proposed Project, including Station 5, Station 6, Station 11, and Station 20. The Project's proximity to existing stations would support adequate service ratios, response times, and other performance objectives for fire protection services. In addition, future development would be reviewed by the FFD for requirements related to water supply, fire hydrants, and fire apparatus access. Lastly, future development would be subject to the Fire Facilities Fee for construction and acquisition costs for improvements to fire department facilities. For these reasons, it can be determined that the Project would not result in the need for new or altered facilities and as a result, a less than significant impact would occur.

ii. Police protection?

Less than Significant Impact. The Project site is within the city limits and therefore would be served by the FPD. The Project site is within the Central Policing District and the nearest police station to the proposed Project is located approximately one (1) mile south of the site. The Project's proximity to an existing station would support adequate service ratios, response times, and other performance objectives for police protection services. In addition, the development has been reviewed by the FPD for requirements related to crime protection. Lastly, the development would be subject to the Police Facilities Fee for construction and acquisition costs for improvements to police department facilities. For these reasons, it can be determined that the Project would not result in the need for new or altered facilities and as a result, a less than significant impact would occur.

iii. Schools?

Less than Significant Impact. The development and management of school sites are the responsibility of school districts and elected governing school boards. Funding for schools and school facilities impacts is outlined in Education Code Section 17620 and Government Code Section 65995 et. seq., which governs the amount of fees that can be levied against new development. These fees are used to construct new or expanded school facilities. Payment of fees authorized by the statute is deemed "full and complete mitigation." A School Impact Fee would be assessed for the proposed Project based on the Developer Fee rates in place at the time payment is due. In addition, the proposed development is affordable housing for seniors, and therefore, would not increase student population. Thus, the Project would not result in construction of new school facilities not already accounted for. For these reasons, it can be determined that a less than significant impact would occur.

iv. Parks?

Less than Significant Impact. Park and recreational facilities are typically impacted by an increase in use from proposed residential development. The proposed development includes a senior center and affordable housing units for seniors, which would not increase the demand for and use of local parks. Further, the development would be subject to the applicable FMC regulations, including the provision of on-site open space. In addition,

development would be required to pay the Park Facilities Impact Fee in order to mitigate any potential impacts to the City's park and recreation facilities generated by the incremental population increase. For these reasons, the Project would have less than significant impact.

v. Other public facilities?

Less than Significant Impact. Development of the Project will increase the demand for other public services, such as libraries. However, the City does not have a requirement or standard for the number or size of a library based on the City's population. Therefore, a significant impact or the need for new or altered facilities to provide other public services is not anticipated and thus the project will result in a less than significant impact.

4.15.3 Mitigation Measures

None required.

4.16 RECREATION

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
b)	Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?			X	

4.16.1 Environmental Setting

Park and Recreation Facilities are overseen by the Fresno Parks and Recreation Department, Parks, After School, Recreation, and Community Services (PARCS). The General Plan established a service standard for park acreage of five (5) acres per 1,000 residents, with three (3) acres for community, neighborhood, and pocket parks and two (2) acres as regional parks. Similar to other public services, the City had established the Park Facilities Fee which requires developers to pay the "fair share" of construction and acquisition for improvements to park facilities. Future projects in the Project Area would be subject to the assessment of a Park Facilities Impact Fee based on the project size.

Fresno General Plan includes applicable policies regarding park facilities in its Parks, Open Space, and Schools Element as shown below:

> ***Policy POSS-2-c Review of Development Applications.*** *Coordinate review of all development applications (i.e., site plans, conditional use permits, and subdivision maps) in order to implement the parks and open space standards of this Plan.*

Policy POSS-2-e Open Space Dedication for Residential Development. *Ensure new residential developments provide adequate land for parks, open space, landscaping, and trails through the dedication of land or otherwise providing for Pocket Parks, planned trails, and other recreational space, maintained by an HOA, CFD, or other such entity.*

4.16.2 Impact Assessment

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

Less than Significant Impact. Park and recreational facilities are typically impacted by an increase in use from proposed residential development. The proposed development would not increase the demand for and use of local

parks. Further, the development would be subject to the applicable FMC regulations, including the provision of on-site open space. In addition, the development would be required to pay the Park Facilities Impact Fee in order to mitigate any potential impacts to the City's park and recreation facilities generated by the incremental population increase. For these reasons, the Project would have less than significant impact.

b) Include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?

Less than Significant Impact. The Project includes the development of a senior center and affordable housing units for seniors. Project recreational facilities, including open space, sidewalks, and the senior center and affordable housing development, would be developed in an infill area to provide recreational uses for nearby residents and housing for seniors. In addition, the Project has been reviewed and will be conditioned by the City to ensure that the proposed open space and facilities comply with the FMC. As such, the facilities will not be in an area or be built to a scale that would degrade or cause significant impacts to the environment. As a result, there would be a less than significant impact.

4.16.3 Mitigation Measures

None required.

4.17 TRANSPORTATION

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?			X	
b)	Conflict or be inconsistent with CEQA Guidelines § 15064.3, subdivision (b)?			X	
c)	Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X	
d)	Result in inadequate emergency access?			X	

4.17.1 Environmental Setting

The following summarizes plans, policies, and regulations that apply to the City of Fresno to give an overview of the regulatory setting of the Project.

City of Fresno Active Transportation Plan

The City of Fresno Active Transportation Plan (ATP) adopted March 2017, updates and supersedes the City of Fresno 2010 Bicycle, Pedestrian, and Trails Master Plan (BMP). The ATP outlines the vision to provide human-powered travel including walking, bicycling, and wheelchair use. The plan aims to improve the accessibility and connectivity of bicycle and pedestrian network to increase the number of people to travel active transportation. The goals identified in the ATP are:

- *Equitably improve the safety and perceived safety of walking and bicycling in Fresno*
- *Increase walking and bicycling trips in Fresno by creating user-friendly facilities*
- *Improve the geographic equity of access to walking and bicycling facilities in Fresno*
- *Fill key gaps in Fresno's walking and bicycling networks*

SB 743 and VMT Analysis

Under Senate Bill 743 (SB 743), traffic impacts are related to Vehicle Miles Traveled (VMT). The VMT metric became mandatory on July 1, 2020. SB 743 requires that relevant CEQA analysis of transportation impacts be conducted using a metric known as VMT instead of Level of Service (LOS). VMT measures how much actual automobile travel (additional miles driven) a proposed Project would create on California roads. If the project adds excessive

automobile travel onto roads, then the project may cause a significant transportation impact. Therefore, LOS measures of impacts on traffic facilities are no longer a relevant CEQA criteria for transportation impacts.

4.17.2 Impact Assessment

a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

Less than Significant Impact. The Project would be required to comply with all project level requirements implemented by a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities. The Project is also required to submit improvement plans, including roadway improvements, for review and approval by the City Engineer to ensure improvements will be consistent with City standards. Therefore, through compliance with the programs, plans, ordinances, and policies addressing the circulation system (inclusive of transit, roadway, bicycle, and pedestrian facilities), a less than significant impact would occur because of the Project.

b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Less than Significant Impact. Senate Bill (SB) 743 requires that relevant CEQA analysis of transportation impacts be conducted using a metric known as vehicle miles traveled (VMT) instead of Level of Service (LOS). VMT measures how much actual auto travel (additional miles driven) a proposed project would create on California roads. If the project adds excessive car travel onto our roads, the project may cause a significant transportation impact.

The State CEQA Guidelines were amended to implement SB 743, by adding Section 15064.3. Among its provisions, Section 15064.3 confirms that, except with respect to transportation projects, a project's effect on automobile delay shall not constitute a significant environmental impact. Therefore, LOS measures of impacts on traffic facilities are no longer a relevant CEQA criteria for transportation impacts.

CEQA Guidelines Section 15064.3(b)(4) states that *"[a] lead agency has discretion to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure. A lead agency may use models to estimate a project's vehicle miles traveled and may revise those estimates to reflect professional judgment based on substantial evidence. Any assumptions used to estimate used to estimate vehicle miles traveled and any revision to model outputs should be documented and explained in the environmental document prepared for the project. The standard of adequacy in Section 15151 shall apply to the analysis described in this section."*

On June 25, 2020, the City of Fresno adopted CEQA Guidelines for Vehicle Miles Traveled Thresholds, dated June 25, 2020, pursuant to Senate Bill 743 to be effective of July 1, 2020. The thresholds described therein are referred to herein as the City of Fresno VMT Thresholds. The City of Fresno VMT Thresholds document was prepared and adopted consistent with the requirements of CEQA Guidelines Sections 15064.3 and 15064.7. The December 2018 Technical Advisory on Evaluating Transportation Impacts in CEQA (Technical Advisory) published by the Governor's Office of Planning and Research (OPR), was utilized as a reference and guidance document in the preparation of the Fresno VMT Thresholds.

The City of Fresno VMT Thresholds adopted a screening standard and criteria that can be used to screen out qualified projects that meet the adopted criteria from needing to prepare a detailed VMT analysis.

The City of Fresno VMT Thresholds Section 3.0 regarding Project Screening discusses a variety of projects that may be screened out of a VMT analysis including specific development and transportation projects. For development projects, conditions may exist that would presume that a development project has a less than significant impact. These may be size, location, proximity to transit, or trip-making potential.

The proposed Project is eligible to screen out because the Project is within 0.50-miles of a Transit Priority Area and a High-Quality Transit Area, and does not meet any of the exceptions, as defined and outlined in the City of Fresno VMT Guidelines and SB 743.According to the City of Fresno VMT Guidelines, projects within 0.5 miles of a Transit Priority Area or A High-Quality Transit Area (i.e., a corridor with fixed bus service with service intervals no longer than 15 minutes during peak commute hours) can be presumed to create a less than significant impact, unless the project is 1) inconsistent with the Regional Transportation Plan (RTP)/SCS, has a floor area ratio (FAR) of less than 0.75, provides an excessive amount of parking, or reduces the number of affordable residential units. In particular, the Project is within 0.25-miles from four (4) bus stops and BRT station stops located at the intersection of North Blackstone and Ashlan Avenue. This intersection is served by fixed Route 1/Q which is part of the BRT system. The Project is also consistent with the Fresno COG RTP/SCS as described in Section 4.8. As proposed, the Project would have a FAR of 1.42 which is greater than 0.75. The Project proposes 176 parking spaces, which does not exceed the required parking spaces per the FMC (i.e., 176 spaces). Lastly, the Project site does not currently provide affordable housing, but Project implementation would facilitate the development of approximately 100 affordable units. As a result, the Project can be presumed to have a less than significant transportation impact pursuant to the Project Screening identified in the City of Fresno Guidelines for VMT Thresholds. [35] In conclusion, the Project will result in a less than significant VMT impact.

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

Less than Significant Impact. The Project design does not contain any geometric design features that would create hazards. Design of the Project is conditioned to construct 12 ft. sidewalks and reconstruct existing driveway approaches to City Standards. These improvements have been conditioned by the City and ensures improvements are designed pursuant to applicable federal, state, and local design standards. Compliance with such standards would ensure that any traffic hazards are minimized. Further, the Project proposes the development of an infill site that is in an area generally characterized by a mix of existing land uses including commercial and residential uses. Therefore, the Project does not propose an incompatible use as it is consistent with the existing development in the area and is similar in nature to the surrounding uses. As a result, implementation of the Project would result in a less than significant impact related to hazards due to roadway design features or incompatible uses.

[35] In accordance with SB 743, "Transit Priority Areas" are defined as "an area within one-half miles of a major transit stop that is existing or planned," a "High-Quality Transit Area" is a corridor with fixed route bus service with service internals no longer than 15 minutes during peak commute hours," and a "Major Transit Stop" means "a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service of 15 minutes or less during the morning and afternoon peak commute periods."

d) Result in inadequate emergency access?

Less than Significant Impact. The Project does not involve a change to any emergency response plan. In addition, the Project has been reviewed by the City's Engineering Department and Fire Department to impose standard conditions to ensure adequate site access including emergency access. In the case that Project construction requires lane closures, access through East Holland Avenue or East Swift Avenue would be maintained through standard traffic control and therefore, potential lane closures would not affect emergency evacuation plans. Thus, a less than significant impact would occur because of the Project.

4.17.3 Mitigation Measures

None required.

4.18 TRIBAL CULTURAL RESOURCES

Would the project: Cause a substantial adverse change in the significance of a tribal cultural resource, defined in PRC section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in PRC section 5020.1(k), or,		X		
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of PRC section 5024.1. In applying the criteria set forth in subdivision (c) of PRC section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.		X		

4.18.1 Environmental Setting

Generally, the term 'cultural resources' describes property types such as prehistoric and historical archaeological sites, buildings, bridges, roadways, and tribal cultural resources. As defined by CEQA, cultural resources are considered "historical resources" that meet criteria in Section 15064.5(a) of the CEQA Guidelines. If a Lead Agency determines that a project may have a significant effect on a historical resource, then the project is determined to have a significant impact on the environment. No further environmental review is required if a cultural resource is not found to be a historical resource.

Assembly Bill 52 (AB 52) requires consultation with California Native American tribes during the CEQA process to determine potential effects of proposed projects on a tribal cultural resource. Pursuant to Public Resources Code (PRC) Section 21080.3.1, the lead agency shall begin consultation with the California Native American tribe that is traditionally and culturally affiliated with the geographical area of the proposed project. Such significant cultural resources are either sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a tribe which is either on or eligible for inclusion in the California Historic Register or local historic register, or, the lead agency, at its discretion, and support by substantial evidence, choose to treat the resources as a Tribal Cultural Resources (PRC Section 21074(a) (1-2)). According to the most recent census data, California is home to 109

currently recognized Indian tribes. Tribes in California currently have nearly 100 separate reservations or Rancherias.

Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See PRC Section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per PRC Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that PRC Section 21082.3(c) contains provisions specific to confidentiality.

Tribal Consultation

In compliance with AB 52, as part of the preparation of this Initial Study and Mitigated Negative Declaration, the City of Fresno sent tribal consultation letters by certified mail to the Table Mountain Rancheria Tribe and the Dumna Wo Wah Tribe on June 7, 2022. Tribes have up to 30 days to request consultation. No requests for consultation were requested during that time.

Record Search

The Southern San Joaquin Information Center (SSJIC) conducted a California Historical Resources Information System (CHRIS) Record Search for the Project site and surrounding area (0.5-mile radius) on June 20, 2022 (Record Search File Number 22-238). The search results do not show any formally recorded prehistoric or historic archeological resources or historic buildings within the Project area. There are no cultural resources within the Project area or 0.5-mile radius listed in the National Register of Historic Places, the California Register of Historical Resources, the California Points of Historical Interest, California Inventory of Historic Resources, or the California State Historic Landmarks. The SSJIC Correspondence is provided in Appendix B.

4.18.2 Impact Assessment

Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or

Less than Significant Impact with Mitigation Incorporated. As discussed in Section 4.5, the Project site does not contain any property or site features that are eligible for listing in the California Register of Historical Sources, or in a local register of historical resources as defined in PRC Section 5020.1(k). Nevertheless, there is some possibility that a non-visible, buried site may exist and may be uncovered during ground disturbing construction activities which would constitute a significant impact. Implementation of Mitigation Measures as described in Section 4.5 would reduce any impacts to less than significant.

b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying

the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.

Less than Significant Impact with Mitigation Incorporated. The Project site has not been determined by the City of Fresno to be a significant resource pursuant to Public Resources Code Section 5024.1 and to-date, no substantial information has been provided to the City to indicate otherwise. Further, the Project site, inclusive of site features, is not listed in the California Register of Historical Sources. However, there is some possibility that a non-visible, buried site may exist and may be uncovered during ground disturbing construction activities which would constitute a significant impact. Implementation of Mitigation Measures as described in Section 4.5 would reduce any impacts to less than significant.

4.18.3 Mitigation Measures

The proposed Project shall implement and incorporate, as applicable, the cultural resources related mitigation measures as identified in the attached Mitigation Monitoring and Reporting Program dated October 2024.

Mitigation Measure CUL-1: *If previously unknown resources are encountered before or during grading activities, construction shall stop in the immediate vicinity of the find and a qualified historical resources specialist shall be consulted to determine whether the resource requires further study. The qualified historical resources specialist shall make recommendations to the City on the measures that shall be implemented to protect the discovered resources, including but not limited to excavation of the finds and evaluation of the finds in accordance with Section 15064.5 of the CEQA Guidelines and the City's Historic Preservation Ordinance. If the resources are determined to be unique historical resources as defined under Section 15064.5 of the CEQA Guidelines, measures shall be identified by the monitor and recommended to the Lead Agency. Appropriate measures for significant resources could include avoidance or capping, incorporation of the site in green space, parks, or open space, or data recovery excavations of the finds.*

No further grading shall occur in the area of the discovery until the Lead Agency approves the measures to protect these resources. Any historical artifacts recovered as a result of mitigation shall be provided to a City-approved institution or person who is capable of providing long-term preservation to allow future scientific study.

Mitigation Measure CUL-2: *In the event that human remains are unearthed during excavation and grading activities of any future development project, all activity shall cease immediately. Pursuant to Health and Safety Code (HSC) Section 7050.5, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98(a). If the remains are determined to be of Native American descent, the coroner shall within 24 hours notify the Native American Heritage Commission (NAHC). The NAHC shall then contact the most likely descendent of the deceased Native American, who shall then serve as the consultant on how to proceed with the remains. Pursuant to PRC Section 5097.98(b), upon the discovery of Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment.*

4.19 UTILITIES AND SERVICE SYSTEMS

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effect?			X	
b)	Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X	
c)	Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			X	
d)	Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			X	
e)	Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X	

4.19.1 Environmental Setting

The Project site is within city limits and thus, will be required to connect to water, sewer, stormwater, and wastewater services. Natural gas, electricity, and telecommunications are provided by private companies. Each utility system is described below.

Water

The City of Fresno Water Division manages and operates the City of Fresno's water system. Fresno meets its demand for domestic water from a combination of groundwater, treated surface water, and reclaimed water sources. Groundwater is accessed from the Kings River Sub-basin of the San Joaquin Valley Groundwater Basin, while surface water from the Central Valley Project and Kings River are treated at the Northeast Surface Water Treatment Facility and Southeast Surface Water Treatment Facility. Surface water is used to replace lost groundwater through Fresno's recharge program at the City-owned Leaky Acres, Nielsen Recharge Facility, and smaller facilities in southeast Fresno.

Wastewater

The City of Fresno Wastewater Management Division (WMD) is responsible for the collection, conveyance, treatment, and reclamation of wastewater generated in the Fresno-Clovis metropolitan area. Wastewater treatment and disposal is handled through the City-operated Fresno-Clovis Regional Wastewater Reclamation Facility (RWRF) and North Fresno Wastewater Reclamation Facility (North Facility) via a wastewater collection system that consists of gravity sewer pipes, manholes, lift stations, junction structures, and force mains.

Solid Waste

Residential solid waste in the city's Department of Public Utilities (DPU) Solid Waste Management Division and commercial, multi-family, and industrial solid waste is collected by private contractors, Mid Valley Disposal and Allied Waste Services. The City of Fresno diverts most of its solid waste to recycling and composting programs, which conserves landfill space, increase reuse of materials, and lessen contamination from toxic materials. The City has a target of Zero Waste by 2025.

Stormwater

The Fresno Metropolitan Flood Control District (FMFCD) manages stormwater runoff in Fresno. The major elements of the FMFCD's flood control system include dams, reservoirs, and detention basins. The FMFCD is responsible for reviewing development proposals to assess drainage and flood control impacts and needs, in addition to determining applicable requirements and modifications needed in order to implement the Storm Drainage and Flood Control Master Plan.

Natural Gas and Electricity

PG&E, the natural gas and electric service provider for the area, incrementally expands and updates its service system as needed to serve its users.

Telecommunications

Accordingly, telecommunications providers in the area incrementally expand and update their service systems in response to usage and demand.

4.19.2 Impact Assessment

a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Less than Significant Impact. The Project site is within city limits and thus, will be required to connect to water, stormwater, solid waste, and wastewater services. Natural gas, electricity, and telecommunications are provided by private companies. The Project site is previously developed and located within an urban neighborhood surrounded by existing uses, thus there is existing utility infrastructure including water, sewer, stormwater, natural gas, electricity, and telecommunication services to which the Project would connect. Further, development of the Project site has been reviewed by the City and responsible agencies through the entitlement review process. The entitlement review process ensures that the future development is developed in accordance with applicable regulations including the permitted intensity and massing development standards. Consequently, the Project would be consistent with the planned land use previously accounted for in the Fresno General Plan and subsequent utility master plans including the *2020 Urban Water Management Plan* and *2015 Wastewater Collection System Master Plan*. For these reasons, it can be determined that the Project would not require or result in the relocation or construction of new or expanded facilities and thus, can be adequately served by all required utilities and service systems. As a result, a less than significant impact would occur as a result of the Project.

b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Less than Significant Impact. As discussed in detail in Section 4.10, the City's long-term water resource planning is addressed in the City's 2020 UWMP. According to the UWMP, the City's per capita water usage is projected to continue to decline through 2045 due to more water efficiency in future construction and passive conservation pursuant to requirements of the California Plumbing Code (e.g., use of higher efficiency appliances, water efficient landscaping, etc.).

In addition, the City manages its surface water and groundwater supply by maximizing water for potable use and intentional recharge during wet and normal years and relies on groundwater during dry years. To optimize water supply reliability and resiliency, the City is currently undergoing an update of its Metro Plan which will identify projects and programs. Generally, the City's approach is to maximize local supplies and improve the storage of the groundwater basin through recharge, recycled water usage, and conservation.

The UWMP projects normal water year, single dry water year, and five-year consecutive drought period supplies based on historic water allocations, sustainable yields, and utilization of recycled water. Based on these projections, the UWMP found that groundwater supplies remain reliable in all hydrologic conditions, attributing the stability to intentional recharge. The projections also show that the City will have greater than 100,000 AF available supply in normal years after meeting demands. In a single dry year, surface water supplies will be reduced but the City would still be able to meet all potable demands. Lastly, for five-year consecutive drought periods, the City is projected to meet all demands with its existing supplies with reduced groundwater recharge in year three (3) and four (4) to accommodate reduced surface water allocations. Based on these projections, it can be inferred that future

development, such as the proposed Project, will not negatively impact the City's ability to provide water assuming adherence to requirements and recommendations from the City's water resources planning efforts.

According to the UWMP, the Project site is in the Highway 41 Pressure Zone and there is an active City well located approximately 0.10 miles north of the Project site. The Project site is currently connected to existing public water mains and public fire hydrants, as shown in Figure 4-2 in Section 4.10. As previously discussed, the Project will be reviewed by the City for review required to install water service and meter boxes to connect to the existing City facilities and pay the Water Capacity Fee for installation. Collectively, these facilities will convey water to and from the Project site.

Overall, based on the information collected from the UWMP and the City of Fresno, the proposed Project would generate less water demand than the existing land use. As a result, it can be presumed that the existing and planned water distribution system should be adequate to serve the Project during normal, dry, and multiple dry years. In addition, adherence to connection requirements and recommendations pursuant to the City's water supply planning efforts (i.e., compliance with California Plumbing Code, efficient appliances, efficient landscaping, etc.) should not negatively impact the City's water provision. For these reasons, a less than significant impact would occur as a result of the Project.

c) *Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?*

Less than Significant Impact. The City's long-term wastewater planning is addressed in the City's Wastewater Collection System Master Plan (Master Plan) (2015 update). According to the Master Plan, the City manages and maintains more than 1,500 miles of gravity sewer lines up to 84-inches in diameter, 15 active lift stations, and associated force mains. Wastewater generated in the sewer service area is conveyed to the Regional Wastewater Reclamation Facility (RWRF) or the North Fresno Wastewater Reclamation Facility (North Facility). As of 2020, the RWRF has a capacity of 91.5 mgd (millions of gallons per day) and the North Facility has a capacity of 0.17 mgd (daily average flow). Expansion of these facilities is planned for 2025 or later, based on capacity levels.

Land uses are important to determine adequate sizing and capacity for pipes and facilities, and to maintain effective sanitary sewer system facilities. According to the Master Plan, residential customers in Fresno account for approximately 63 percent of the current flow (40.2 mgd) and industrial customers account for 17 percent (11.3 mgd). Land use assumptions for wastewater generation rates were based on the full build-out conditions under the General Plan.

The Project site is located adjacent to an existing sewer service area served by an existing 8-inch sewer main located on East Holland Avenue, as shown in Figure 4-2 in Section 4.10. And, as previously discussed, the Project has been reviewed by the City and will be conditioned to install a sewer house branch to connect to the existing sewer main and pay the Sewer Connection Charges for installation as needed. Collectively, these facilities will convey wastewater generated from the Project. As a result, it can be presumed that the existing and planned wastewater collection system should be of adequate capacity to serve the Project. For these reasons, a less than significant impact would occur as a result of the Project.

d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

Less than Significant Impact.

Construction

CALGreen mandates locally permitted new building construction and demolition to recycle and/or salvage for reuse a minimum 65% of the nonhazardous construction and demolition debris generated during a project. Further, the recycling of construction and demolition materials is required for any City-issued building or demolition permit that generates at least eight (8) cubic yards of material by volume. Therefore, the Project would be required to implement techniques to reduce and recycle waste during construction activities in accordance with mandatory requirements under CALGreen as implemented through the building permit process. Compliance would be ensured through the building permit process. Therefore, through compliance, solid waste generated through construction activities is not anticipated to generate solid waste in excess of state or local standards, in excess of the capacity of the local infrastructure, or otherwise impair the attainment of solid waste reduction goals. Therefore, impacts would be less than significant.

Operations

Generally, solid waste generation rate is approximately 6 lbs./1,000 square feet per day for commercial/office/public facility uses and 7 lbs/unit/day for multi-family residential uses. Using this assumption, the Project could be expected to generate approximately 910 lbs. per day. Solid waste generated through Project operations would account for less than 0.1 percent of the daily permitted throughput capacity of the landfill. The Project would be subject to AB 341, the state's mandatory commercial recycling law, and AB 827, the state's customer access to recycling law. AB 341 requires all businesses that generate four cubic yards or more of solid waste per week and multi-family properties with five or more units to arrange for recycling services. AB 827 requires recycling and organics recycling containers at the "front-of-house" to collect waste generated. These containers are required to be placed adjacent to trash containers and be visible, easily accessible, and clearly marked. Compliance would be ensured through the building permit process As such, through compliance, Project operations are not anticipated to generate solid waste in excess of state or local standards, in excess of the capacity of the local infrastructure, or otherwise impair the attainment of solid waste reduction goals. Therefore, the Project would have a less than significant impact.

e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Less than Significant Impact. As described under criterion d), Project construction and operational activities that generate solid waste would be handled, transported, and disposed of in accordance with regulations related to solid waste. The Project would also be subject to AB 341, the state's mandatory commercial recycling law, AB 827, the state's customer access to recycling law. AB 341 requires all businesses that generate four cubic yards or more of solid waste per week and multi-family properties with five or more units to arrange for recycling services. AB 827 requires recycling and organics recycling containers at the "front-of-house" to collect waste generated. These containers are required to be placed adjacent to trash containers and be visible, easily accessible, and clearly marked. Compliance would be ensured through the building permit process. Therefore, through compliance, the

Project would comply with laws and regulations that would ensure impacts related to solid waste are reduced to less than significant levels.

4.19.3 Mitigation Measures

None required.

4.20 WILDFIRE

If located in or near state responsibility or lands classified as very high fire hazard severity zones, **Would the project:**	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?			X	
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?				X
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?				X
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?				X

4.20.1 Environmental Setting

In general, Fresno is categorized as having little or no threat or moderate fire hazard, which can be attributed to its impervious surface areas. The area along the San Joaquin River bluff is an exception, as it is prone to wildfires due to steep terrain and native vegetation. The Project site comprises a relatively flat property within the city limits in an area planned for and developed with urban uses, including industrial, commercial, and residential uses, and is approximately eight (8) miles southeast of the San Joaquin River. In addition, the site nor the City of Fresno are identified by the California Department of Forestry and Fire Protection (Cal Fire) as being in a "Very High Fire Hazard Severity Zone" (VHFHSZ). Rather, the city, inclusive of the Project site, is in an "area of local responsibility" that is an area of low fire risk. [36]

[36] Cal Fire, "FHSZ Viewer." Accessed on September 12, 2024, https://egis.fire.ca.gov/FHSZ/

4.20.2 Impact Assessment

If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:

a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

Less than Significant Impact. The Project would not impair access to the existing roadway network. Safe and convenient vehicular and pedestrian circulation would be provided in addition to adequate access for emergency vehicles. To determine adequate vehicular and pedestrian circulation and emergency vehicle access, development of the Project has been reviewed and conditioned by the City of Fresno Police Department and Fire Department for compliance with applicable code and regulations. Review and approval by the City ensure that the Project would not substantially impair the adopted emergency response plan or emergency evacuation plan. Therefore, the Project would not substantially impair any emergency response plan, and impacts would be less than significant.

b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

No Impact. The Project site is located on a relatively flat property with minimal slope and is not in an area that is subject to strong prevailing winds or other factors that would exacerbate wildfire risks. The site is surrounded with a mix of urban uses and is not located within a wildland, which precludes the risk of wildfire. Further, the Project site is within an "area of local responsibility" and is not identified by Cal Fire to be in a VHFHSZ. For these reasons, no impact would occur as a result of this Project.

c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

No Impact. The Project is located within city limits in an infill area with existing infrastructure. As a result of ongoing development, infrastructure such as roads and utilities will be maintained accordingly. The Project itself will not result in installation of new major infrastructure and potential improvements will be subject to review and/or conditions by the City of Fresno. Such improvements would not exacerbate fire risk or result in temporary or ongoing impacts to the environment and no impact would occur as a result of the Project. For these reasons, no impact would occur as a result of this Project.

d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

No Impact. The Project site is located on a relatively flat property with minimal slope and is not subject to downslope, downstream flooding, or landslides. Therefore, the Project would not expose people or structures to significant risks and no impact would occur as a result of the Project.

4.20.3 Mitigation Measures

None required.

4.21 MANDATORY FINDINGS OF SIGNIFICANCE

	Would the project:	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less than Significant Impact	No Impact
a)	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?		X		
b)	Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?		X		
c)	Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?		X		

4.21.1 Impact Assessment

a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, rare, or threatened species, or eliminate important examples of the major periods of California history or prehistory?

Less than Significant with Mitigation Incorporated. The analyses of environmental issues contained in this

Less than Significant Impact with Mitigation Incorporated. The analyses of environmental issues contained in this Initial Study indicate that the Project would have potentially significant impacts resulting from the proposed Project. Standard requirements that will be implemented through the entitlement process and the attached mitigation monitoring and reporting program have been incorporated in the project to reduce all potentially significant impacts to less than significant. Mitigation measures are incorporated herein to reduce all potentially significant impacts to less than significant with mitigation incorporated. Therefore, the Project would have a less than significant impact.

b) *Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)*

Less than Significant Impact with Mitigation Incorporated. CEQA Guidelines Section 15064(i) states that a Lead Agency shall consider whether the cumulative impact of a project is significant and whether the effects of the project are cumulatively considerable. The assessment of the significance of the cumulative effects of a project must, therefore, be conducted in connection with the effects of past projects, other current projects, and probable future projects. Due to the nature of the project and consistency with environmental policies, incremental contributions to impacts are considered less than cumulatively considerable. All project-related impacts were determined to be less than significant. The Project would not contribute substantially to adverse cumulative conditions, or create any substantial indirect impacts (i.e., increase in population could lead to an increased need for housing, increase in traffic, air pollutants, etc.). As such, Project impacts are not considered to be cumulatively considerable given the insignificance of project-induced impacts. The impact is therefore less than significant.

c) *Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?*

Less than Significant Impact with Mitigation Incorporated. The analyses of environmental issues contained in this Initial Study indicate that the project is not expected to have substantial impact on human beings, either directly or indirectly. Standard requirements and conditions have been incorporated in the project to reduce all potentially significant impacts to less than significant. Therefore, the Project would have a less than significant impact.

5 MITIGATION MONITORING AND REPORTING PROGRAM

Mitigation Measure Monitoring Checklist for Senior Center and Affordable Housing Project

OCTOBER 2024

This mitigation monitoring and reporting checklist was prepared pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15097 and Section 21081.6 of the Public Resources Code (PRC). The timing of implementing each mitigation measure is identified in in the checklist, as well as identifies the entity responsible for verifying that the mitigation measures applied to a project are performed. Project applicants are responsible for providing evidence that mitigation measures are implemented. As lead agency, the City of Fresno is responsible for verifying that mitigation is performed/completed.

Mitigation Measures	Timing of Verification	Compliance Verified By	Verification of Completion	
			Date	Initials
Cultural Resources				
CUL-1: If previously unknown resources are encountered before or during grading activities, construction shall stop in the immediate vicinity of the find and a qualified historical resources specialist shall be consulted to determine whether the resource requires further study. The qualified historical resources specialist shall make recommendations to the City on the measures that shall be implemented to protect the discovered resources, including but not limited to excavation of the finds and evaluation of the finds in accordance with Section 15064.5 of the CEQA Guidelines and the City's Historic Preservation Ordinance. If the resources are determined to be unique historical resources as defined under Section 15064.5 of the CEQA Guidelines, measures shall be identified by the monitor and recommended to the Lead Agency. Appropriate measures for significant resources could include avoidance or capping, incorporation of the site in green space, parks, or open space, or data recovery excavations of the finds. No further grading shall occur in the area of the discovery until the Lead Agency approves the measures to protect these resources. Any historical artifacts recovered as a result of mitigation shall be provided	Planning and Development Department to review contract specifications to ensure inclusion of provisions included in project-specific mitigation measure. Following discovery of previously unknown resource, a qualified historical resources specialist shall prepare recommendations and submit to the Planning and Development Department. Timing for recommendations shall be established by project-specific mitigation measure.	Planning and Development Department		

to a City-approved institution or person who is capable of providing long-term preservation to allow future scientific study. Verification comments:				
CUL-2: In the event that human remains are unearthed during excavation and grading activities of any future development project, all activity shall cease immediately. Pursuant to Health and Safety Code (HSC) Section 7050.5, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin and disposition pursuant to PRC Section 5097.98(a). If the remains are determined to be of Native American descent, the coroner shall within 24 hours notify the Native American Heritage Commission (NAHC). The NAHC shall then contact the most likely descendent of the deceased Native American, who shall then serve as the consultant on how to proceed with the remains. Pursuant to PRC Section 5097.98(b), upon the discovery of Native American remains, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendants regarding their recommendations, if applicable, taking into account the possibility of multiple human remains. The landowner shall discuss and confer with the descendants all reasonable options regarding the descendants' preferences for treatment. Verification comments:	Planning and Development Department to review construction specifications to ensure inclusion of provisions included in mitigation measure.	Planning and Development Department		
Geology and Soils				
GEO-1: If any paleontological resources are encountered during ground-disturbance activities, all work within 25 feet of the find shall halt until a qualified paleontologist as defined by the Society of Vertebrate Paleontology Standard Procedures for the Assessment and Mitigation of Adverse Impacts to Paleontological Resources (2010), can evaluate the find and make recommendations regarding treatment. Paleontological resource materials may include resources such as fossils, plant	During ground-disturbance activities	Planning and Development Department		

impressions, or animal tracks preserved in rock. The qualified paleontologist shall contact the Natural History Museum of Los Angeles County or another appropriate facility regarding any discoveries of paleontological resources. If the qualified paleontologist determines that the discovery represents a potentially significant paleontological resource, additional investigations, and fossil recovery may be required to mitigate adverse impacts from Project implementation. If avoidance is not feasible, the paleontological resources shall be evaluated for their significance. If the resources are not significant, avoidance is not necessary. If the resources are significant, they shall be avoided to ensure no adverse effects or such effects must be mitigated. Construction in that area shall not resume until the resource-appropriate measures are recommended or the materials are determined to be less than significant. If the resource is significant and fossil recovery is the identified form of treatment, then the fossil shall be deposited in an accredited and permanent scientific institution. Copies of all correspondence and reports shall be submitted to the City of Fresno, Planning and Development Department. Verification comments:				
Noise				
NOI-1: Prior to awarding a contract for construction, the City of Fresno Capitol Projects Department shall verify that the Contractors' scopes of work and agreements for the Project include equipment noise reduction measures for the construction equipment utilized for the Project, including dozers, generators, graders, pneumatic tools, pumps, and scrapers that generate more than 80 Leq dBA as measured at the property line of the neighboring single-family residences to the west of the Project site. The following measures shall be implemented to reduce noise levels by 15 to 25 dBA.	Prior to awarding a contract for construction, the Capitol Projects Department shall ensure that Contractor's scopes of work and agreements for the Project include the specified equipment noise reduction measures	Capitol Projects Department		

• Place stationary noise generators at least 50 ft. or more from the property line of the adjacent sensitive receptors to the west of the Project site. • Ensure pneumatic impact tools and equipment used will have intake and exhaust mufflers recommended by the manufacturers thereof, to meet relevant noise limitations. • Equip dozers, generators, graders, pneumatic tools, pumps, and scrapers with noise control devices such as mufflers, lagging, and/or motor enclosures. • Schedule construction activities so as to avoid operating all pieces of noise-generating equipment simultaneously within 50 ft. or less from the property line of the adjacent sensitive receptors to the west of the Project site. Verification comments:

Re: Propesed Acquisition for Senior Center and Housing Project

County: Fresno

Map(s): Fresno North 7.5'

CULTURAL RESOURCES RECORDS SEARCH

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.

The following are the results of a search of the cultural resource files at the Southern San Joaquin Valley Information Center. These files include known and recorded cultural resources sites, inventory and excavation reports filed with this office, and resources listed on the National Register of Historic Places, the OHP Built Environment Resources Directory, California State Historical Landmarks, California Register of Historical Resources, California Inventory of Historic Resources, and California Points of Historical Interest. Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the OHP are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area.

PRIOR CULTURAL RESOURCE STUDIES CONDUCTED WITHIN THE PROJECT AREA AND THE ONE-HALF MILE RADIUS

According to the information in our files, there have been no previous cultural resource studies conducted within the project area. There have been four additional cultural resource studies conducted within the one-half mile radius: FR-01767, 01823, 01966, & 02587.

Record Search 22-238

KNOWN/RECORDED CULTURAL RESOURCES WITHIN THE PROJECT AREA AND THE ONE-HALF MILE RADIUS

According to the information in our files, there are no recorded resources within the project area. There are no recorded resources within the one-half mile radius.

There are no recorded cultural resources within the project area or radius that are listed in the National Register of Historic Places, the California Register of Historical Resources, the California Points of Historical Interest, California Inventory of Historic Resources, or the California State Historic Landmarks.

COMMENTS AND RECOMMENDATIONS

We understand the City of Fresno proposes the acquisition of the project site in order to develop a senior center and housing project. We understand the acquisition consists of two previously developed parcels containing a 40,564-square foot grocery store, paved parking lot, and an existing strip mall. Further, we understand the acquisition would facilitate the demolition of the grocery store to develop a senior center, and 70 units of affordable housing units for seniors. Therefore, if this project will result in alternation or demolition of any existing structures more than 45 years old, then we recommend the structures first be recorded and evaluated for historical significance. If the project will result in any ground disturbance activities on any undeveloped land, we recommend a qualified, professional consultant first conduct a field survey to determine if any cultural resources are present. If ground disturbance will not take place on any vacant land and no structures more than 45 years old will be impacted, then no further cultural resource investigation is recommended at this time. However, if any cultural resources are unearthed during any ground disturbance activities, all work must halt in the area of the find and a qualified, professional consultant should be called out to assess the findings and make the appropriate mitigation recommendations. A list of qualified consultants can be found at www.chrisinfo.org.

We also recommend that you contact the Native American Heritage Commission in Sacramento. They will provide you with a current list of Native American individuals/organizations that can assist you with information regarding cultural resources that may not be included in the CHRIS Inventory and that may be of concern to the Native groups in the area. The Commission can consult their "Sacred Lands Inventory" file to determine what sacred resources, if any, exist within this project area and the way in which these resources might be managed. Finally, please consult with the lead agency on this project to determine if any other cultural resource investigation is required. If you need any additional information or have any questions or concerns, please contact our office at (661) 654-2289.

RE: Phase I Environmental Site Assessment
Fresno Senior Center and Apartments
4323, 4333, and 4343 North Blackstone Avenue
APNs 426-253-17 and -19 (5.46 acres)
Fresno, California 93726

Dear Mr. Lingo:

Krazan & Associates, Inc. (Krazan) has completed a Phase I Environmental Site Assessment (ESA) at the above-referenced site summarized in a report dated July 16, 2024. Please note that the earliest date of source review was on June 24, 2024. This report is considered viable within 180 days of that date. We appreciate the opportunity to serve your environmental due diligence needs.

During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-21; however, ASTM Non-Scope Considerations were identified.

ASTM Non-Scope Considerations

- The buildings on the subject site were constructed in the mid-1970s. It is unknown whether the buildings contain asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the on-site buildings was not included within the scope of this assessment. Prior to the disturbance of any suspect ACMs or LBP at the subject site via renovation or demolition, a comprehensive asbestos and LBP survey is recommended.

If you have any questions regarding the information presented in this report, please call me at (559) 348-2200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has conducted a Phase I Environmental Site Assessment (ESA) of the property along the west side of North Blackstone Avenue and south of the intersection with East Holland Avenue, Fresno, California 93726 identified as Fresno County Assessor's Parcel numbers (APN) 426-253-17 and -19. The subject site is currently addressed 4323 - 4333 North Blackstone Avenue and historically addressed 4343 N. Blackstone Avenue and is a total of 5.46 acres in area.

The subject site was utilized for agricultural purposes from at least the mid-1930s through the late-1950s until the construction of the Continental grocery store building and Uncle John's Pancake House in 1962. The Continental Auto Repair building, with gas pumps operated by Texaco, Inc., was located in the southwestern portion of the subject site from the early-1960s through the mid-1970s. During the mid-1970s, the auto repair building and restaurant building were demolished and existing multi-tenant buildings were constructed.

The southern portion of the subject site remains developed with the multi-tenant buildings. The northern portion is vacant and as the grocery store and associated parking lot were demolished in early 2024. The property is planned for redevelopment by the City of Fresno into the Fresno Senior Center and Apartments, a community development for senior citizens.

The subject site was not identified on any Federal, State or local regulatory database indicating that a release of hazardous materials has impacted the subject site.

Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-21; however, ASTM Non-Scope Considerations were identified.

ASTM Non-Scope Considerations

- The buildings on the subject site were constructed in the mid-1970s. It is unknown whether the buildings contain asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the on-site buildings was not included within the scope of this assessment. Prior to the disturbance of any suspect ACMs or LBP at the subject site via renovation or demolition, a comprehensive asbestos and LBP survey is recommended.

1.0 INTRODUCTION

The subject site is located along the west side of North Blackstone Avenue and south of the intersection with East Holland Avenue, Fresno, California 93726. The subject site is identified as Fresno County Assessor's Parcel numbers (APN) 426-253-17 and -19 and is a total of 5.46 acres in area. The northern portion of the subject site, formerly addressed 4343 North Blackstone Avenue, was developed with a grocery store that was demolished in early 2024. The southern portion of the subject site is developed with two adjoining multi-tenant buildings addressed 4323 through 4333 North Blackstone Avenue. The multi-tenant buildings are also planned for demolition. The property is planned for redevelopment by the City of Fresno into the Fresno Senior Center and Apartments, a community development for senior citizens.

Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* This Phase I ESA constitutes all appropriate inquiry (AAI) designed to identify recognized environmental conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E 1527-21.

ASTM E 1527-21 Section 1.1.1 *Recognized Environmental Conditions* – In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

It is incumbent upon the user to read this Phase I ESA report in its entirety. If not otherwise defined within the text of this report, please refer to the Glossary of Terms Section following the References Section for definitions of terms and acronyms utilized within this Phase I ESA report.

Previous Environmental Assessments

Krazan conducted several previous environmental assessments of the subject site on behalf of the City of Fresno. On July 11, 2024, Mr. Phillip Skei, Assistant Director with the City of Fresno Planning & Development Department gave Krazan permission to utilize information in the previous environmental reports in order to provide an historical summary of the subject site. See Section 4.6 – *Previous Environmental Assessments* for details.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

According to ASTM E 1527-21, the purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an *environmental site assessment* of a parcel of *commercial real estate* with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products.* As such, this practice is intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitation on CERCLA liability (hereinafter, the *landowner liability protections,* or *LLPs*): that is, the practice that constitutes *all appropriate inquiries* into the previous ownership and uses of the *property* consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35)(B).

2.2 Scope of Work

The scope of work for this Phase I ESA conforms to ASTM E 1527-21. The Phase I ESA includes the following scope of work: a) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, b) a review of user-provided documents and search of available current land title records compiled by AFX Corp., Inc., c) a review of historical aerial photographs, a review of pertinent building permit records, cross-reference directories, historical Sanborn Fire Insurance Maps (SFIMs), and interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site, d) a review of local regulatory agency records, and e) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR).

Krazan was provided written authorization to conduct the Phase I ESA by Mr. Jake Lingo with Integrated Community Development on August 18, 2023 in response to Krazan's August 4, 2023 Proposal No. P23-331. On August 29, 2023, Mr. Lingo requested that Krazan put the project on hold and re-initiated the project on June 18, 2024. Source review initiated in August 2023 was updated as necessary in this report.

3.0 SUBJECT SITE SETTING

The subject site is located along the west side of North Blackstone Avenue and south of the intersection with East Holland Avenue. The southern portion of the subject site is developed with two adjoining multi-tenant retail buildings addressed 4323 through 4333 North Blackstone Avenue. The northern portion of the subject site, formerly addressed 4343 North Blackstone Avenue, is vacant and was developed with a grocery store that was demolished in early 2024. Commercial and retail businesses are located to the north, east and south of the subject site, and single-family residences are located to the west of the subject site. General property information and property use are summarized in the following table. Refer to Figures No. 1 – 3 for subject site details.

Subject Site Information Summary	
Current Owner:	City of Fresno
Assessor's Parcel Number:	426-253-17 and 426-253-19
Address:	4323 - 4333 N. Blackstone Avenue
Historical Address:	4343 North Blackstone Avenue 1553 E. Swift Avenue
General Location:	West side of North Blackstone Avenue and south of East Holland Avenue
Acreage:	5.46 acres
Existing Use:	Commercial
Number of Buildings:	2 (Adjoining)
Original Construction Date:	Early 1960s
Proposed Use:	Senior Center and Affordable Senior Housing
Electricity:	Pacific Gas & Electric (PG&E)
Natural Gas:	Pacific Gas & Electric (PG&E)
Potable Water:	City of Fresno Municipal System
Sanitary Sewer:	City of Fresno Municipal System
Latitude / Longitude:	36.7970410, -119.7914860º
Topographic Map:	U.S. Geological Survey, 7.5-minute Fresno North, California topographic quadrangle map
Topographic Map Location:	Southeast quarter of Section 16, Township 13 South, Range 20 East, Mount Diablo Baseline and Meridian
Topography:	Approximately 313 feet above mean sea level
Approximate Depth to Groundwater:	130 feet below ground surface (bgs), State of California Department of Water Resources (DWR)*
Regional Groundwater Flow Direction:	North/Northwest, DWR*

Note: * State of California, Department of Water Resources, *Sustainable Groundwater Management Act (SGMA) Data Viewer, Spring 2023*

3.1 Geology and Hydrogeology

The subject site is located within the San Joaquin Valley, a broad structural trough bound by the Sierra Nevada and Coast Ranges of California. The San Joaquin Valley, which comprises the southern portion of the Great Valley of California, has been filled with several thousand feet of sedimentary deposits.

Sediments in the eastern valley, derived from the erosion of the Sierra Nevada, have been deposited by major to minor west-flowing drainages and their tributaries. Near-surface sediments are dominated by sands and silty sands with lesser silts, minor clays, and gravel. The sedimentary deposits in the region form large coalescing alluvial fans with gentle slopes. Groundwater in the subject site vicinity was reported to be first encountered at a depth of approximately 130 feet bgs in Spring 2023. The groundwater flow direction in the area of the subject site was reported to be toward the north-northwest.

4.0 SITE BACKGROUND

A review of historical Sanborn Fire Insurance Maps (SFIMs), historic USGS topographic maps, reasonably ascertainable city cross-reference directories, historical aerial photographs, local agency records and previous environmental reports, as made available to Krazan, were utilized to assess the history of the subject site.

4.1 Sanborn Fire Insurance Maps

Krazan reviews Sanborn Fire Insurance Maps (SFIMs) to evaluate prior land use of the subject site and the adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the subject site within the city limits. Krazan contracted with Environmental Data Resources, Inc. (EDR) to provide copies of available SFIMs for the subject site and the adjacent properties as far back as 1867. EDR's search of Sanborn Insurance maps for revealed no coverage for the subject site and the adjacent properties. Refer to Appendix A – *EDR - Sanborn Fire Insurance Maps* for details.

4.2 USGS Topographic Quadrangle Map

Krazan reviewed the 1921 and 1923 USGS, 7.5-minute, Bullard, California topographic quadrangle map and the 1946, 1947, 1965, 1972, 1981, 2012, 2015 and 2018 USGS, 7.5-minute, Fresno North, California topographic quadrangle maps. The subject site was undeveloped or agriculture from at least the 1920s until the 1960s. The subject site has been noted within the Blackstone Avenue commercial corridor since the 1960s. Subject site and vicinity property usage is summarized in the following table. Refer to Appendix A – *EDR - USGS Topographic Quadrangle Maps* for details.

Topographic Maps Summary		
Year	***Site Usage***	***Adjacent Property Usage***
1921, 1923	The subject site is depicted as undeveloped.	A natural depression is depicted to the north-northwest of the subject site. Adjacent properties are depicted as undeveloped to the north, south and west. Two rural residences are depicted on the eastern side of Blackstone Avenue.
1946, 1947	The subject site is depicted as agricultural. Wolters Colony Ditch, from the northeast, extends to the eastern property boundary and (based on aerial photographs) trends east-west through the southern portion of the subject site.	Adjacent properties and the vicinity are depicted as agriculture and rural residences. The natural depression to the north-northwest remains depicted.

Topographic Maps Summary (continued)		
Year	***Site Usage***	***Adjacent Property Usage***
1965, 1972	The subject site is depicted within an urban commercial and residential area; therefore, individual structures and/or developments are not depicted on all properties. Wolters Colony Ditch appears to have been re-aligned to the east and south of the subject site (along Effie Avenue and Ashlan Avenue).	Vicinity properties are depicted within an urban commercial and residential area; therefore, individual structures and/or developments are not depicted on all properties. The natural depression to the north-northwest appears to have been converted to the existing stormwater basin. A symbol depicting a sand, gravel, clay or borrow pit was noted at the basin on the 1972 map.
1981	Select structures along the Blackstone Avenue commercial corridor are depicted. Three structures are depicted on the subject site.	Adjacent and vicinity properties to the north, east, and south are depicted within an urban commercial area with residential developments to the west. The stormwater basin to the north-northwest is depicted.
2012, 2015 and 2018	The subject site is depicted within an urban commercial and residential area; therefore, specific structures or developments are not depicted.	Vicinity properties are depicted within an urban commercial and residential area; therefore, specific structures or developments are not depicted on all properties.

4.3 City Cross-Reference Directories

Krazan contracted with EDR to provide a review of available cross-reference directories for the subject site and adjoining properties. EDR provided a report of listings dated between 1922 and 2017; however, no records for the subject site addresses or adjoining properties were identified by EDR's review for the years 1922 through 1947. The earliest listing was from 1952 for an adjoining property. The earliest listing for the subject site was dated 1962. A summary of cross-reference directory information is presented in the following table. Refer to Appendix A – *EDR - City Cross-Reference Directories* report for details.

Cross-Reference Directories Summary		
Address	***Owner / Occupant***	***Years***
Subject Site		
4323 N. Blackstone Avenue	Uncle John's Pancake House	1962 - 1970
	Vaughn's at Sather Gate	1975
	Grand Auto Store (auto parts retailer)	1980 - 2000
	Kragen Auto Parts (auto parts retailer) B Global Transmission (auto repair)	2002 - 2010 2002
	O'Reilly Auto Parts (auto parts retailer)	2014 – Present
	The Camp – Transformation Center (boxing gym)	2018 - Present
4325 N. Blackstone Avenue	Central Deli	1990 - 2000
	Labor Finders	2010 - 2014

Cross-Reference Directories Summary (continued)		
Address	***Owner / Occupant***	***Years***
Subject Site		
4327 N. Blackstone Avenue	Sunset Shutters Blackstone Medical Clinic for Weight Loss	1986 1990 - 1996
	Cal Patriot Insurance	2000
	Last Minute Deetails	2005
	Classic Covers Lonnie Vigil, Hair Stylist Jo Ann Kent, Stylist Hair Styles by Roy Company Three Hair & Nails Studio	2010
	Central Sierra Insurance	2017 – 04/2024
4329 N. Blackstone Avenue	Dollar Cleaners	1986
	Vacant	1990
	Vera Rodriguez D V DS Lisa Baziuk Lanetta Roberts	1995, 1996, 2000
	Becky's Nails	2000, 2002, 2005
	D V DS Ernest at D V DS, barber	2002, 2005 2002
	Pip Squeaks	2010
4331 N. Blackstone Avenue	Heritage Products	1986
	Vacant	1990
4333 N. Blackstone Avenue	Continental Service Center (auto repair)	1970
	Vacant	1975
	San Joaquin Veterinary Clinic/Hospital	1986 - Present
4341 N. Blackstone Avenue	L L Howard	1952
4343 N. Blackstone Avenue	Continental Market (grocery store)	1962 - 1990
	Vons Market (grocery store) Wells Fargo Bank Branch office	2000 – 2010 2000
	Asia Supermarket (grocery store) RedBox	2017
	Classy Cleaners & Service (erroneous listing, building has been vacant since 2018)	2020
Adjacent/Vicinity Properties		
North of East Holland Avenue		
4411 N. Blackstone Avenue	Red Carpet Car Wash	1970 - Present
East side of N. Blackstone Avenue		
4414 N. Blackstone Avenue	Colonial Mobile Home Park (individual resident listings)	1965 - 1970

Cross-Reference Directories Summary (continued)		
Address	***Owner / Occupant***	***Years***
Adjacent/Vicinity Properties		
4414 N. Blackstone Avenue	Ace Service, Inc. (tire dealer)	1975 - 1986
	J&T Auto Service (auto repair)	1990 - 1995
	Auto Shopper America Kar Shopper	2005 – 2017 2005
	United Auto, Inc.	2014 - 2017
	Mike Saadeldin	2020
4392 N. Blackstone Avenue	White Pine Lumber (wholesaler)	1958 - Present
4376 N. Blackstone Avenue	Fresno Coin Gallery	1986 – 2002
4374 N. Blackstone Avenue	E G Babcock Co. (garden implements)	1958 - 1962
	Beautiwood Furniture	1965 - 1980
	Bob's Dive Shop	1986 - 2017
4344 N. Blackstone Avenue	E L Kanawyer	1952
	Albrecht's Welding	1962 - 1965
	Boat Repair	1970
	R B Furniture	1975 - 1992
	Lifestyle Furniture	1996 - 2002
	Fantastic Furniture	2010
	Serrano's Furniture	2014 - Present
4326 N. Blackstone Avenue	The Pop Shoppe (bottlers)	1975
	Vacant	1980
	Super Shop, Inc. (auto parts retailer) Automotive Center	1986 – 1996 1996
	4 Wheel Parts (wholesaler)	2000 - Present
	Performance Auto Parts	2002
Adjacent south of the Subject Site		
4313 N. Blackstone Avenue	Love's Family Restaurant	1975 - 1986
	Buddy's Bar and Diner	1990 - 1996
	China Garden (restaurant)	2002 - 2010
	Golden Horse (restaurant)	2014 - 2017
	Jennifer Kong	2020

Krazan's review of cross-reference directories indicated the following:

- the subject site address of 4323 North Blackstone Avenue was occupied by a restaurant in the 1960s and 1970s, has been occupied by auto parts retailers since 1980 and was partially occupied by B Global Transmission in 2002;

- the multi-tenant building addressed 4325 – 4333 North Blackstone Avenue has been occupied by various tenants including a deli, hair and nail salons, professional offices, retail spaces, Continental Service Center in 1970, San Joaquin Veterinary clinic/hospital since 1986 and Dollar Cleaners was noted in 1986; and,

- the subject site address of 4343 North Blackstone Avenue was a grocery store from 1962 until 2017.

Information obtained from review of cross-reference directories is consistent with that obtained from other sources during the course of this assessment.

4.4 Aerial Photograph Interpretation

Historical aerial photographs were obtained from Environmental Data Resources, Inc. (EDR) and Google Earth (2024) and reviewed to assess the history of the subject site. The aerial photograph summary is provided in the following table. Refer to Appendix A - *Historical Aerial Photographs* for details.

Aerial Photograph Review Summary		
Year	***Site Use***	***Adjacent Properties***
1937, 1942, and 1946	The subject site is depicted as agriculture. Wolters Colony Ditch (name obtained from topographic maps) is depicted along a portion of the eastern property boundary and across the southern portion of the subject site.	Primarily agriculture with rural residences adjacent to the site and in the site vicinity.
1950	The site usage is unchanged from the 1946 photograph.	Several structures are depicted on the property adjacent to the north. A mobile home property is depicted to the northeast. Commercial development is depicted along North Blackstone Avenue. Parcels to the south and west are relatively unchanged and remain agriculture and rural residential.
1957	The subject site has been cleared of agriculture and is vacant. The remnant of Wolters Colony Ditch is depicted in the photo.	Blackstone Avenue is depicted as a 6-lane divided roadway and there is virtually no agriculture remaining in the site vicinity. The structures depicted on the property to the north in the 1950 photograph have been demolished and new structures have been built along Blackstone Avenue. Parcels to the east are relatively unchanged. Properties to the south are commercial or residential. Properties to the west are single-family residences.
1962	Buildings are depicted in the northern and southern portions of the subject site. Parking areas are depicted adjacent to the buildings.	Surrounding properties are relatively unchanged from the 1957 photograph; however, residential development to the west and southwest has become more densely developed.
1967, 1973	The subject site is relatively unchanged; however, a third building located in the southwestern corner of the subject site is first depicted in the 1967 photograph.	The stormwater retention basin to the north-northwest is depicted. The property to the north has been redeveloped with the existing car wash. Increased commercial development is depicted along Blackstone Avenue. The mobile home property to the northeast is no longer depicted as of the 1973 photo. The site vicinity is densely developed with single-family residences beyond the Blackstone Avenue commercial corridor.

Aerial Photograph Review Summary (continued)		
Year	***Site Use***	***Adjacent Properties***
1979	The northern building is unchanged. The southern building has been demolished and a larger building has been constructed. In addition, a building adjoining the southern building to the west has been constructed. The building in the southwestern corner has been demolished. Parking areas remain unchanged.	The adjacent and surrounding properties are relatively unchanged from the 1973 photograph. A building adjacent to the south of the subject site has been constructed.
1984, 1987, 2006, 2009, 2012, 2016	The subject site is unchanged from the 1979 photograph.	The adjacent properties, Blackstone Avenue commercial corridor, and vicinity residential areas are relatively unchanged from the 1979 photograph.
2024	The northern portion of the subject site is vacant. The two adjoining buildings and parking lot in the southern portion of the subject remain unchanged.	Surrounding properties are unchanged from the 2016 photo.

The subject site was utilized for agricultural purposes from at least the mid-1930s through the late-1950s when it was cleared of agriculture and vacant prior to the construction of the commercial buildings in the early 1960s. The property has been used for commercial purposes since that time.

4.5 Municipal Records

City of Fresno Planning & Development Department

On August 24, 2023, a request was submitted to the City of Fresno Planning & Development Department (CFPDD) to obtain building permit records for the subject site addresses. In excess of 650 documents were provided to Krazan for review. Please note that many of these permits were not provided to Krazan during the previous assessments conducted in 2022. A summary of the pertinent documents reviewed are presented in the following table:

Permit Summary		
Address	***Permit Type***	***Year***
4323 N. Blackstone Avenue	Sewer connection	March 23, 1971
	Building relocation permit	June 13, 1977
4333 N. Blackstone Avenue	Certificate of Occupancy, Doctor's office	April 3, 1981
1553 E. Swift	Building Permit #7 2946 – Foundation	May 5, 1964
	Building Permit #7 2975– Continental Auto Center	May 8, 1964
	Various plumbing and electrical permits – Continental Auto Center	May 1964

Permit Summary (continued)		
Address	***Permit Type***	***Year***
1553 E. Swift (continued)	Plumbing permit #17984 (Note: connected to cesspools)	May 1964
	Change of Address – 1553 E. Swift Avenue to 4333 N. Blackstone Avenue	July 16, 1965
	Sewer Connection – Notice to connect to municipal sanitary sewer	March 4, 1970
	Demolition Permit #90097	January 1979
	Sign erection – Standard Texaco Banjo sign – Permit No. 7 4111	September 17, 1964

1553 E. Swift Avenue / 4333 N. Blackstone Avenue

The building formerly located in the southwest corner of the subject site was constructed in 1964 as Continental Service Center (auto repair) and addressed 1553 E. Swift Avenue. A plumbing permit in 1964 indicated the building was connected to "cesspools". One notable permit, No. 7 4111, was for the erection of a "standard Texaco banjo sign" was submitted on September 17, 1964 by Texaco, Inc. The permit application provided a map showing the proposed location of the sign's construction along Swift Avenue, near the building labeled "auto center" and adjacent to "gas pumps". No other documents pertaining to installation and/or removal of the gas pumps or fuel storage tank(s) were noted in any of the building permits provided. In 1965, the building address was changed to 4333 N. Blackstone Avenue. In 1970, the City of Fresno required the building be connected to the municipal sanitary sewer. A demolition permit for the building was issued in January 1979 which included a certificate that "debris and excavations" including septic tanks were removed from the property. A document dated January 29, 1979 title "Tank Removal Backfill" prepared by The Twining Laboratories, Inc. was also included in the City of Fresno Planning Department records. The document detailed the "spot soil density tests taken in backfill of excavation". Tests were performed by Twining Laboratories, Inc. on January 24 and 25, 1979 at the authorization of Jim Williams of Williams Excavating. Twining Laboratories, Inc. prepared the document of compaction and soil density tests for Williams Excavating. The presence of this document indicates the fuel storage tank was removed from the subject site. Due to the apparent removal of the UST and the length of time since the removal (approximately 45 years), the former presence of a fuel UST does not represent a concern in connection with this assessment.

4343 N. Blackstone Avenue

Copies of permits provided include general plumbing, electrical, and mechanical permits for Continental Market, Von's Store #189, and Asia Supermarket. The original construction permits for the buildings were not included in the records provided; however, the oldest document was an application for an alcoholic beverage license dated June 26, 1963 submitted by Continental Markets.

4.6 Previous Environmental Assessments

Krazan has conducted several previous environmental assessments of the subject site on behalf of the City of Fresno. On July 11, 2024, Mr. Phillip Skei, Assistant Director with the City of Fresno Planning & Development Department gave Krazan permission to utilize information in the previous environmental reports in order to provide an historical summary of the subject site. For brevity and since the previous reports were prepared for the City of Fresno, copies of the following reports are not included in the appendices of this report.

Phase I Environmental Site Assessment, Proposed Senior Center and Multi-tenant Buildings, 4343 N. Blackstone Avenue and 4323 – 4333 N. Blackstone Avenue, APNs 426-253-17 (4.25 acres) and 426-253-19 (1.21 acres), Fresno, California 93721 (Krazan Project No. 014-21171) dated January 27, 2022.

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Krazan on January 7, 2022. Krazan identified no evidence of CRECs or HRECs in connection with the subject site as defined by ASTM E 1527-13. However, the following RECs, PAOCs and ASTM non-scope issues were identified:

RECs

Based on Krazan's historical review, the former building located in the southwestern portion of the subject site was identified as an auto repair facility with associated gas pumps from the mid-1960s through the mid-1970s. The building was addressed 4333 North Blackstone and was identified as Continental Service Center (auto repair). No documents pertaining to installation and/or removal of the gas pumps or fuel storage tanks were noted during the review of records maintained by the Fresno County Department of Community Health, Environmental Health System (FCEHS). Records maintained by the City of Fresno Fire Department regarding hazardous materials storage in aboveground or underground storage tanks was unavailable as of the date of this report. Therefore, the potential exists for subsurface impacts to the subject site by petroleum hydrocarbon constituents in the event a release occurred. If former fuel storage tank(s) and/or piping is identified during redevelopment of the subject site, Krazan should be contacted to assess potential subject site impacts and to support compliance with regulatory requirements.

Dollar Cleaners was located in the 4329 N. Blackstone Avenue tenant space and is listed on the Historic Cleaners database for the years 1986 to 1989. Former use as of the tenant space as a dry-cleaners constitutes evidence of a REC at the subject site. If during redevelopment of the subject site, impacts to soil in the vicinity of the former dry cleaners are identified, Krazan should be contacted to assess potential subject site impacts and to support compliance with regulatory requirements.

PAOCs

A leak was observed beneath the hydraulic elevator equipment unit located in the former grocery store building. The pit area beneath the elevator car was not observed. Signage indicating whether the fluid contained within the unit is non-PCB containing was not observed; therefore, the leak beneath the equipment is considered a potential area of concern.

Based on review of city directories, B Global Transmission operated an auto repair facility at 4323 North Blackstone Avenue in approximately 2002. In addition, Mr. Miyake, owner representative stated O'Reilly's Auto Parts formerly conducted auto repairs in adjoining space as part of their operations.

The tenant space was observed to be occupied by The Camp Transformation Center during the reconnaissance. No evidence of the former operation by either B Global Transmission or O'Reilly Auto Parts in the 4323 North Blackstone Avenue tenant space were observed. No documentation was identified to indicate a release has occurred from either of these former operations; however, the past usage is a potential area of concern to this assessment. Although this tenant space is not planned for demolition or renovation as part of the redevelopment, should subsurface impacts be identified, Krazan should be contacted to assess potential subject site impacts and to support compliance with regulatory requirements.

ASTM NON-SCOPE ISSUES

The buildings on the subject site were constructed in the early 1960s and mid-1970s. It is unknown whether the buildings contain asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the on-site buildings was not included within the scope of this assessment. Prior to the disturbance of any suspect ACMs or LBP at the subject site via renovation or demolition, a comprehensive asbestos and LBP survey is recommended.

- *Phase I Environmental Site Assessment, Proposed Senior Center – Former Vons Grocery Store, 4343 N. Blackstone Avenue and 4323 – 4333 N. Blackstone Avenue, APNs 426-253-17 (4.25 acres) and 426-253-19 (1.26 acres), Fresno, California 93721* (Krazan Project No. 014-22145) dated October 20, 2022.

  Krazan identified no evidence of CRECs or HRECs in connection with the subject site as defined by ASTM E 1527-13. However, the following RECs, PAOCs and ASTM non-scope issues were identified:

  RECs

  Krazan conducted a Phase I ESA for the subject site in January 2022. Based on the historical review conducted, a former auto repair facility with associated gas pumps was identified in the southwestern portion of the subject site from the mid-1960s through the mid-1970s. The building was addressed 4333 North Blackstone and was identified as Continental Service Center. No documents pertaining to installation and/or removal of the gas pumps or fuel storage tanks were noted during the review of records maintained by the Fresno County Department of Community Health, Environmental Health System (FCEHS) or the City of Fresno Fire Department.

  Dollar Cleaners was located in the 4329 N. Blackstone Avenue tenant space and is listed on the Historic Cleaners database for the years 1986 to 1989. No files were identified with the regulatory agencies contacted during this investigation. Former use of the tenant space as a dry cleaner constitutes evidence of an REC at the subject site. If during redevelopment of the subject site, impacts to soil in the vicinity of the former dry cleaners are identified, Krazan should be contacted to assess potential subject site impacts and to support compliance with regulatory requirements.

  PAOCs

  Based on review of city directories, B Global Transmission operated an auto repair facility at 4323 North Blackstone Avenue in approximately 2002. In addition, Mr. Miyake, owner representative stated O'Reilly's Auto Parts formerly conducted auto repairs in adjoining space as part of their operations. The tenant space was observed to be occupied by The Camp Transformation Center during the reconnaissance. No evidence of the former operation by either B Global Transmission or O'Reilly Auto Parts in the 4323 North Blackstone Avenue tenant space were observed. No documentation was identified to indicate a release has occurred from either of these former operations; however, the past

usage is a potential area of concern to this assessment. Although this tenant space is not planned for demolition or renovation as part of the redevelopment, should subsurface impacts be identified, Krazan should be contacted to assess potential subject site impacts and to support compliance with regulatory requirements.

ASTM NON-SCOPE ISSUES

The buildings on the subject site were constructed in the early 1960s and mid-1970s. It is unknown whether the buildings contain ACMs or LBP. An asbestos and/or LBP survey and sampling of the on-site buildings was not included within the scope of this assessment. Prior to the disturbance of any suspect ACMs or LBP at the subject site via renovation or demolition, a comprehensive asbestos and LBP survey is recommended.

- *Phase II Limited Subsurface Survey, Proposed Senior Center and Multi-tenant Buildings, 4323 – 4333 N. Blackstone Avenue, APNs 426-253-17 (4.25 acres) and 426-253-19 (1.21 acres), Fresno, California 93721* (Krazan Project No. 014-21171) dated October 20, 2022.

  Based on the findings presented in the Phase I ESA dated January 27, 2022, Krazan was requested to complete a Limited Subsurface Survey (LSS); however, no sampling of soil/soil gas at the subject site was requested due to project approval time constraints. The LSS, using electromagnetic and ground penetrating radar, was conducted in the vicinity of the inferred location of the former Continental Service Center. According to the Report of Findings and Conclusions, the Phase II LSS did not identify subsurface anomalies characteristic of USTs or related features during the LSS field activities. However, soil sampling and analysis, including a soil vapor survey, have not been conducted in this area of the subject site.

4.7 Agricultural Chemicals

Review of historical aerial photographs indicates that the subject site was utilized for agricultural purposes from at least 1937 until the early 1960s. Although the potential exists that environmentally persistent pesticides/herbicides may have historically applied to crops grown on the subject site circa 1940s and 1950s; 1) no material evidence of the use of environmentally persistent pesticides/herbicides was obtained during the course of this assessment, and 2) it is anticipated that any environmentally persistent pesticides/herbicides potentially located on site would have been dislocated and diluted as a result of the grading and trenching operations conducted in conjunction with the commercial development of the property in the early 1960s. Therefore, the potential for elevated concentrations of environmentally persistent pesticides or herbicides to currently exist in the near-surface soils of the subject site at concentrations which would require regulatory action appears to be low.

5.0 USER-PROVIDED INFORMATION

A review of user-provided information was conducted in order to help identify pertinent information regarding potential environmental impacts associated with the subject site.

5.1 Environmental Liens/Activity and Use Limitations Report

An Environmental Lien/Activity and Use Limitations (EL/AUL) Report for each of the two subject site APNs were completed by AFX Corp. Inc. (AFX) on August 27, 2023. The AFX EL/AUL Reports provided results from a search of available land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls. The subject site EL/AUL Report was reviewed to identify potential environmental liens, institutional controls (ICs), environmental land use controls (LUCs), environmental activity and use limitations (AULs), or declaration of environmental use restrictions (DEULs) which may have been filed against the subject site or exist in connection with the subject site as indicated by the subject site EL/AUL Reports.

Krazan's review of the EL/AUL Report indicated no liens, judgments, ICs, LUCs, AULs, or DEULs were found for either of the subject site parcels, according to the scope of work and limitations. Refer to Appendix B - *EL/AUL Report* for details.

5.2 Title Report

A Title Report for subject site parcels was not provided by Krazan's client, the Phase I ESA user.

5.3 Interviews

Krazan conducts interviews with the owner of the subject site, a key site manager, subject site occupant(s), and/or the previous owner/occupant(s) of the subject site. The interview(s) is/are designed to provide pertinent information regarding potential environmental impacts associated with the subject site.

Subject Site Owner

On July 16, 2024 Ms. Corrina Nunez with the City of Fresno provided a completed environmental questionnaire on behalf of the City of Fresno, the property owner. According to questionnaire responses, Ms. Nunez has been associated with subject site parcels since January 2022. Ms. Nunez indicated that the subject site is currently used for small businesses. Ms. Nunez stated there is one structure at the subject site and was unaware of previous structures.

Ms. Nunez was unaware any USTs or ASTs; however, she stated that the auto parts store at the front of the property may store chemicals. According to Ms. Nunez, she is unaware of imported soil, buried materials, septic systems, domestic or agricultural water wells, dry wells, monitoring wells, or disposal ponds, on the subject property. Ms. Nunez indicated the subject site is connected to the municipal water and/or sewer system. Ms. Nunez stated no concerns from environmental cleanup liens or previous commercial and/or industrial tenants and is unaware of engineering controls, land use restrictions or institutional controls in place at the subject site. Ms. Nunez is unaware of current of historical vehicle operations, specific chemicals or any spills associated with the subject site. Ms. Nunez stated no concerns from adjacent properties, or specialized knowledge regarding nearby properties. Lastly, Ms. Nunez stated the purpose of the Phase I was for a loan and the that the purchase price of the subject site reasonably reflects fair market value. Refer to Appendix B – *Phase I ESA Questionnaires* for details.

Subject Site Occupants

Interviews with subject site occupants/tenants at the subject site consisted of Ms. Joanie Seta, San Joaquin Veterinary Hospital, and Doug (last name withheld) at O'Reilly Auto Parts. Please refer to Section 6.1 – Observations below for details discussed with each tenant during the site reconnaissance.

Previous Subject Site Owners/Occupants

Interviews conducted as part of the assessment in January 2022 with subject site owners at that time are summarized here as those owners are now considered previous owners. Mr. Greg Miyake, Property Manager with KGM Associates, Inc., provided a completed environmental questionnaire on behalf of the former property owner. Ms. Nunez indicated that the subject site was used for a shopping center, with two structures. Ms. Nunez was unaware of previous structures on the subject site and unaware of historical uses of the subject site; however, he stated previous auto repair activities took place at the subject site, and that O'Reilly's previous had an auto shop in the adjacent space. Please refer to Krazan's January 2022 report for additional details.

Mr. Craig Holdener, Real Estate Broker with Newmark Pearson Commercial, was interviewed during the January 2022 site reconnaissance. Mr. Holdener stated that he had been familiar with the subject site for approximately three years (prior to 2022) and that he is not aware of any historical uses of the subject site.

5.4 Phase I Environmental Site Assessment User Questionnaire

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *user* must provide the following information (if available) to the *environmental professional*. Failure to provide this

information could result in a determination that *all appropriate inquiry* is not complete. The user is asked to provide information or knowledge of the following:

1. Environmental cleanup liens that are filed or recorded against the site.
2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry.
3. Specialized knowledge or experience of the person seeking to qualify for the LLPs.
4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated.
5. Commonly known or *reasonably ascertainable* information about the *property*.
6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation.
7. The reason for preparation of this Phase I ESA.

On July 16, 2024 Ms. Corrina Nunez with the City of Fresno provided a completed environmental questionnaire on behalf of the City of Fresno, as user of the Phase I ESA. Refer to Appendix B – *Phase I ESA Questionnaires* for details.

According to the questionnaire responses, Ms. Nunez, to the best of her knowledge as the user of this Phase I ESA, was not aware of any environmental cleanup liens and/or activity or land use limitations which have been filed or recorded against the subject site. Ms. Nunez has no specialized knowledge or experience of the prior nature of the business or chemical utilization on the subject site. Ms. Nunez indicated that she did not have knowledge of the past or current presence of specific chemicals or hazardous materials, unauthorized spills or chemical releases or of any environmental cleanups in connection with the subject site. Ms. Nunez indicated that she is not aware of any obvious indications pointing to the presence or likely presence of contamination of the subject property. Ms. Nunez stated that the purchase price of the subject site reasonably reflects fair market value and that the reason for preparation of this Phase I ESA is related to a loan.

6.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Ms. Laurie Blakeman, Krazan's Environmental Assessor, on July 9, 2024. Ms. Blakeman was given permission to enter the property by Mr. J.T. Katavich, Senior Associate with Hamner Jewell & Associates. Krazan was unescorted during the site visit. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

6.1 Observations

The following table summarizes the subject site features encountered during our site reconnaissance. Observed features are noted in the table below and described in detail below the table. Refer to Figure No. 3 - *Site Map* and *Photographs* for locations and details pertaining to site-specific features discussed in this section of the report.

Site Reconnaissance Summary		
Features	***Observed***	***Not Observed***
Structures (existing)	X	
Evidence of Past Uses (foundations, debris)	X	
Hazardous Substances and/or Petroleum Products (including containers)	X	
Aboveground Storage Tanks (ASTs)		X
Underground Storage Tanks (USTs) or evidence of USTs		X
Evidence of Underground Pipelines (non-irrigation)		X
Strong, Pungent, or Noxious Odors		X
Pools of Liquid likely to be Hazardous Materials or Petroleum Products		X
Drums	X	
Unidentified Substance Containers		X
Potential Polychlorinated Biphenyl (PCB)-Containing Equipment	X	
Subsurface Hydraulic Equipment		X
Heating/Ventilation/Air Conditioning (HVAC)	X	
Stains or Corrosion on Floors, Walls or Ceilings	X	
Floor Drains, Sumps, or Oil/Water Clarifiers	X	
Storm Drains	X	
Pits, Ponds, or Lagoons		X
Stained Soil and/or Pavement		X
Soil Piles		X
Stressed Vegetation		X
Waste or Wastewater (including stormwater) Discharges to Surface/Surface Waters		X

Site Reconnaissance Summary (continued)		
Features	***Observed***	***Not Observed***
Wells (Irrigation, Domestic, Dry, Injection, Abandoned, Monitoring Wells)		X
Septic Systems		X
High-voltage, tower-mounted transmission lines		X

The subject site is known as the Grand Continental Center and is comprised of two multi-tenant commercial buildings and a vacant parcel. The multi-tenant buildings share asphalt-paved parking areas to the north and west of the buildings. The parking lots are landscaped with trees and shrubs, and post-mounted lighting was observed in the western portion. Storm drains were observed along street curbs.

O'Reilly Auto Parts and The Camp Transformation Center - 4323 N. Blackstone Avenue

The building is constructed of cinder block walls on a concrete slab-on-grade foundation with a flat roof. The O'Reilly Auto Parts interior retail salesfloor and parts warehouse was observed during the site reconnaissance. Good housekeeping practices were noted on the retail salesfloor and in the parts warehouse. A hazardous materials area including shelf area, drums and waste oil collection bin was observed in the northwestern portion of the warehouse.

- A hazardous materials area storage shelf was color-coded according to O'Reilly Auto Part's management plan and Safety-Kleen Systems, Inc. storage practices. Five-gallon buckets containing battery acid cleanup material, waste batteries, and a brake shavings bucket were observed. Containers were observed to be properly labeled and placed on shelving as depicted on the management plan.

- Two 55-gallon drums labeled as containing used oil filters and used oil, and absorbent containing used oil were also observed. The drums were stored on vinyl-floor tile covered area of the warehouse. No evidence of leaks or staining was observed beneath the drums.

- A portable used oil collection bin was observed to be properly labeled as hazardous waste and the pickup record indicated the waste oil is collected monthly and transported off-site via manifest by Safety-Kleen Systems, Inc. The most recent pickup dated was June 4, 2024. Evidence of minor spills was observed beneath the used oil bin. Absorbent material (pellets) were observed to have been placed around and beneath the used oil bin. A notice on the front door informed customers that they were no longer taking used oil as their collection bin was full. The spills may have occurred from over-filling of the used oil bin.

The Camp Transformation Center is a boxing gym and training center. Krazan was unable to gain access to the interior of the training center during the site reconnaissance.

4325 – 4329 N. Blackstone Avenue

The building is constructed of cinder block walls on a concrete slab-on-grade foundation with a flat roof. Krazan was unable to gain access to the interior of these spaces.

- 4325 N. Blackstone Avenue is occupied by the City of Fresno, Senior Center Headquarters office. The office was not staffed at the time of Krazan's site visit.
- 4327 N. Blackstone Avenue tenant space was most recently occupied by Central Sierra Insurance consisting of office operations. A notice on the door indicated the office had relocated as of April 23, 2024.
- 4329 N. Blackstone Avenue was also vacant and most recently occupied by PipSqueaks Children's Consignment Clothing.

4333 N. Blackstone Avenue

The San Joaquin Veterinary Hospital is addressed 4333 N. Blackstone Avenue and occupies the 4331 and 4333 N. Blackstone Avenue tenant spaces. Ms. Joanie Seta provided access to the animal hospital. The facility has a front-desk, lobby and waiting room, four separate animal exam rooms, a laboratory, pharmacy for medications, pet quarantine holding areas, surgery room, storage rooms, separate doctor's office, employee breakroom/lounge, medical records storage room, supplies and pet food storage room. One-gallon containers of bleach, various disinfectants including Lysol, alcohol, hand sanitizer, and glass cleaner were observed in the storage room on a shelving unit within one of the storage rooms. In addition, several one-gallon containers of chlorhexidine, a wound cleaner was observed within a gated, locked area and concrete-bermed area of the storage room. A digital x-ray machine and associated exam table were observed. Ms. Seta stated they have not had a darkroom and associated chemicals needed for x-ray development in over 10 years. The Sharps bio-hazard container (approximately a 30-gallon plastic container) is stored within a gated and fenced area within a containment berm. The container is picked up on a quarterly basis by Healthwise. Floor drains were observed in the pet run-area and adjacent to the Sharps bio-hazard container area. Ms. Seta stated there is no special permit that she is aware of for any of the floor drains located within the building. To the best of her knowledge, the floor drains discharge to the sanitary sewer.

Two trash dumpsters and two recyclables dumpsters were observed adjacent to the exterior of the veterinary hospital in the southwestern portion of the subject site. The dumpsters serve the 4323 – 4333 North Blackstone Avenue tenant building. Housekeeping conditions were observed to be in good condition and no evidence of the disposal of hazardous materials or hazardous waste was observed in association with the dumpsters.

One pad-mounted transformer was observed adjacent to the south of the multi-tenant buildings. No evidence of leaks or staining was noted on the concrete paved area beneath the transformer.

4343 N. Blackstone Avenue

The vacant parcel was most recently occupied by a grocery store building and parking lot that were demolished in early 2024.

Two pole-mounted transformers were observed along East Holland Avenue. Three subterranean transformer access panels were observed along North Blackstone Avenue. None of the transformers were labeled as to their PCB status. Based on Krazan's observations, the Pacific Gas and Electric Company (PG&E) is the owner of the transformers. Based on the visual absence of apparent unauthorized releases of insulating fluids from the transformers at the time of Krazan's site reconnaissance, the transformers are not currently anticipated to pose an adverse impact to the subject site. However, in the event of a future release/leak of insulating fluids from the transformer, or upon their removal and replacement, PG&E should be contacted regarding the testing of the transformer for PCB fluids.

6.2 Adjacent Streets and Property Usage

The following table summarizes the current adjacent streets and adjacent property uses observed during the site reconnaissance:

Adjacent Streets and Property Usage		
Direction	***Adjacent Street***	***Adjacent Property Usage***
North	East Holland Avenue	Red Carpet Car Wash City of Fresno Stormwater Retention Basin
East	North Blackstone Avenue	Auto Select (used car sales) White Pine Lumber Headliner Auto Parts (auto parts sales) Fresno Rage Room Serrano's Furniture 4 Wheel Parts (auto parts sales)
South	East Swift Avenue	Tacos y Mariscos Tijuana Mexican Food (adjacent to 4323 subject site building) Martin Auto Color Community Consignment & Resale
West	North Crystal Avenue	Single-family residences

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials currently are stored at these properties. Please see *Section 6.4 – Regulatory Agency Records Review* below for further discussion of relevant properties.

6.3 ASTM Non-Scope Considerations

According to ASTM E 1527-21, there may be environmental issues or conditions at assessed properties that are outside the scope of the Phase I ESA practice (non-scope considerations). Some substances may be present in quantities and under conditions that may lead to contamination of the subject site or of nearby properties but are not included in CERCLA's definition of hazardous substances (42 U.S.C. §9601[14]). ASTM Non-scope considerations appropriate for the subject site are discussed below.

Asbestos-Containing Materials

Asbestos is a group of naturally occurring mineral fibers that have been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos has been used for a wide range of manufactured goods, mostly in building materials, vehicle brakes, and heat-resistant fabrics, packaging, gaskets, and coatings. When asbestos-containing materials (ACMs) are damaged or disturbed by repair, remodeling, or demolition activities, microscopic asbestos fibers may become airborne and can be inhaled into the lungs, where they can cause significant health problems.

An asbestos survey and sampling of the on-site structures was not included within the scope of work for this assessment; however, based on the date of construction, ACMs may be present at the subject site. The multi-tenant buildings were constructed in the mid-1970s. Prior to the disturbance of suspect ACMs at this facility, a comprehensive asbestos survey designed to determine if the suspect ACM is a regulated material is recommended.

Lead-Based Paint

Although lead-based paint (LBP) was banned in 1978, many buildings constructed after 1978 have paint that contains lead. Lead from paint, chips, and dust can pose serious health hazards if not addressed properly.

A LBP survey and sampling of the on-site structures was not included within the scope of work for this assessment; however, based on the date of construction, LBP may be present at the subject site. The multi-tenant buildings were constructed in the mid-1970s. Prior to the disturbance of any of the suspect LBP at this facility, a comprehensive LBP survey designed to determine if the suspect LBP is a regulated material is recommended.

Mold and Moisture Intrusion

A class of fungi, molds have been found to cause a variety of health problems in humans, including allergic, toxicological, and infectious responses. Molds are decomposers of organic materials, and thrive in humid environments, and produce spores to reproduce, just as plants produce seeds. When mold spores land on a damp spot indoors, they may begin growing and digesting whatever they are growing on in order to survive. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation and carpeting often play host to such growth. Moisture control is the key to mold control. Molds need both food and water to survive; since molds can digest most things, water is the factor that limits mold growth. No obvious olfactory evidence of the presence of significant interior mold or on-going water intrusion was observed within the buildings.

Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Public Health (CDPH) maintains a statewide database of radon results in designated geographic areas. Radon detection devices are placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4.0 pico Curies per liter (pCi/L).

The US EPA has prepared a map to assist National, State and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures. Review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are between 2.0 and 4.0 pCi/L. Therefore, the available data suggests that the potential for radon to adversely impact the subject site appears to be low.

6.4 Regulatory Agency Records Review

A review of Federal and State regulatory databases was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses. The Federal and State environmental databases consulted in the course of this assessment were compiled

by Environmental Data Resources, Inc. (EDR) and identified facilities within the search distances specified in ASTM 1527-21. Krazan did not verify the locations and distances of every property listed by the EDR Radius Map Report. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site. Refer to Appendix C – *EDR Radius Map Report* dated June 25, 2024 for the Map Findings Summary and complete details of the complete report.

Regulatory records are reviewed based on the following criteria: 1) properties with known soils and/or groundwater releases considered to represent the potential for impact to the subject site that are located within 1,760 feet of the subject site for constituents of concern impacts or 528 feet of the subject site for petroleum hydrocarbon impacts; 2) properties that are adjacent or in proximity to the subject site included within the EDR regulatory database report or noted during the site reconnaissance to possibly handle, store, or generate hazardous materials. Applicable property records are discussed below.

No Federal Superfund – National Priorities List (NPL) sites were determined to be located within a one-mile radius of the subject site according to Krazan's July 8, 2024 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control Envirostor database and the Environmental Data Resources, Inc. (EDR) database report.

U.S. Environmental Protection Agency – UST Finder

The U. S. Environmental Protection Agency (USEPA) developed UST Finder, a web map application containing a comprehensive national map of USTs. UST Finder contains information about the proximity of UST facilities and UST releases to surface and groundwater public drinking water protection areas. Krazan's July 8, 2024 review of the UST Finder database found that no USTs were reported on the subject site; however, USTs were noted at the Red Carpet Car Wash located adjacent to the north of the subject site beyond Holland Avenue. Refer below to the State of California Regional Water Quality Control Board Geotracker database section for details pertaining to the car wash.

USEPA – California State Institutional Controls/Engineering Controls Registry

Krazan's July 8, 2024 review of the USEPA *California State Institutional Controls/Engineering Controls Registry* indicated that no recorded institutional or engineering controls are located on the subject site or the adjacent properties.

U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration

Krazan's July 8, 2024 review of the U.S. Department of Transportation – Pipeline & Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System database available via the U.S. Department of Transportation website indicated that no gas transmission pipelines or hazardous liquid pipelines are located on the subject site and no spill/release incidents are located on the subject site or the adjacent properties.

State of California Environmental Protection Agency

Krazan's July 8, 2024 review of the State of California Environmental Protection Agency (CalEPA) – Department of Toxic Substances Control (DTSC) Envirostor database available via the DTSC's Internet Website indicated that no records of cleanup sites including State response sites, voluntary cleanup sites, school cleanup sites, or military or school evaluation sites are listed for the subject site, the adjacent properties, or properties located within 500 feet of the subject site. Based on the records review, DTSC sites are not considered a concern to this assessment.

State of California Regional Water Quality Control Board - Geotracker

Krazan's July 8, 2024 review of the State of California Regional Water Quality Control Board (RWQCB) Geotracker database available via the RWQCB Internet Website did not identify any cleanup sites including LUST sites, cleanup program sites, land disposal sites, or military sites at subject site; however, the following adjacent property was listed as a LUST site.

Red Carpet Car Wash & Quick Lube
4411 North Blackstone
Adjacent to the north of the subject site

The facility is listed on the Geotracker database as a LUST cleanup, and on the EDR report as a UST, HIST UST, CERZ HAZ WASTE, SWEEPS UST, CA FID UST, RCRA NonGen/NLR (No Longer Regulated), Manifest, EDR Hist Auto and EMI databases.

According to RWQCB Geotracker records, a gasoline release was discovered during UST system modification activities, including removal and replacement of gasoline dispensers, at the facility in March 2004. The dispensers were identified to have been the source of the release to soil and were removed on March 19, 2004. A subsequent site assessment was conducted in April 2004, and the RWQCB granted closure to the release on August 10, 2004.

In December 2019, the RWQCB provided review of a work plan submitted to remove three (3) 10,000-gallon single-walled USTs from the facility. The USTs were noted to most recently store gasoline; however, one UST stored diesel from 1965 to 1969. In January 2020, the USTs, dispensers, and associated piping were removed under the supervision of the FCDEH. Soil samples were collected beneath the dispensers and former USTs. Soil samples were collected at 10 feet below ground surface (bgs) beneath the dispensers and 20 feet beneath the USTs. Analytical results indicated soil impacts at 14 feet bgs; therefore, the RWQCB requested an additional investigation to determine the vertical extent of contamination. The review stated that the facility no longer

operates as a gasoline station, only a car wash and vehicle service station. In February 2020, a subsequent work plan for additional soil sampling was reviewed. No additional soil investigation reports were included in the Geotracker database.

Based on the closure granted to the release in 2004, and since the current soil investigation indicates the need to assess the vertical extent of soil contamination at the facility, it appears impacts are to the facility and have not migrated off-site. No groundwater samples were collected during the investigations. The adjacent facility is not considered an environmental concern to the subject site. Refer to Appendix C – *Regulatory Agency Records Documentation* for details.

State of California Office of Emergency Services – Spills Database

Krazan's July 8, 2024 review of the State of California Office of Emergency Services (Cal OES) Spill Reports database, available via the Cal OES website indicated that no hazardous materials spill reports are included in the Cal OES Spill Reports database for any of the subject site addresses.

California Department of Conservation, California Geologic Energy Management Division

Krazan's July 8, 2024 review of the State of California Department of Conservation, California Geologic Energy Management Division (CalGEM) GIS Online Mapping System indicated that no plugged and abandoned or producing oil wells are located on or adjacent to the subject site.

Fresno County Department of Community Health, Environmental Health System

The Fresno County Department of Community Health, Environmental Health System (FCEHS) is the lead regulatory agency or Certified Unified Program Agency (CUPA) for hazardous materials handling facilities in Fresno County. Krazan's review of the FCEHS CUPA and Solid Waste Programs Resource List (CUPA List) indicated the following records are on file with the FCEHS for the subject site. The two subject site facilities are also listed on the EDR Database report as a CUPA listing.

Asia Supermarket and Vons #189
4343 N. Blackstone Avenue
Subject site

The subject site address is listed on the CUPA, NPDES, CIWQS, CERS and CUPA listings in association with the demolition activities of the Vons grocery store building.

The former grocery stores are listed on the HAZNET, HWTS, and FINDS databases as a hazardous waste generator; however, review of individual documents (107) does not specify the type of waste generated. Documents reviewed consisted of permits, food facility inspections, complaints, and invoices. Permits and inspections for Vons#189 were identified between 1993 and 2015 and for Asia Supermarket between 2015 and 2017. One inspection report, dated April 14, 2016, indicated the Asia Supermarket facility "does not carry hazardous materials usage for their use above reporting thresholds. Facility can be considered below-reportable for hazardous materials." The EDR report indicates the Asia Supermarket is a closed site in relation to the Hazardous Waste Generator (CESQG) (Conditionally Exempt) database listing. Based on the facility's operation as

a grocery store, the CUPA and hazardous waste listings are not considered a concern to this assessment.

O'Reilly Auto Parts #3505 and former Kragen Auto Parts #4082/Grand Auto
4323 N. Blackstone Avenue
Subject site

The subject site address is listed on the HAZNET, HWTS, CUPA, CERZ HAZ WASTE, CERS, EDR Hist Auto, RCRA NonGen/NLR (No Longer Regulated), Manifest, FINDS and ECHO databases.

Review of individual documents (41) on file with the FCEHS CUPA consisted of Hazardous Materials Business Plans, Chemical Inventory Forms, permits, and issued to Grand Auto (1987 to 2000), Kragen Auto Parts #4082 (2000 to 2011) and O'Reilly Auto Parts (2011 to present). The facility is listed on the CUPA database as a used oil collection center [Hazardous Waste Generator (CESQG) (Conditionally Exempt)]. The most recent inspection was conducted in October 2021 and no violations were noted. Paccar Automotive, Inc. 4323 N. Blackstone Avenue is listed on the EDR report on the HAZNET and HWTS databases between 1990 and 1999 as a transporter of hazardous waste at the time the tenant space was occupied by Grand Auto. Global Automotive was noted on the HWTS as an automotive transmission repair operation between 2002 and 2003 and A&J Auto Repair was noted on the HWTS as a general automotive repair operation between 2005 and 2007. The former operations and current O'Reilly Auto Parts retail store are not considered a concern to this assessment.

In addition, hazardous material records are on file with the FCEHS for several proximate properties, which are discussed below.

Bob's Dive Shop
4374 N. Blackstone Avenue
Adjacent to the east

Inspection reports were listed in association with the special use pool located at the facility. Annual inspections of the pool appear to have been conducted as recently as October 2021. The facility is listed on the CUPA in association with two USTs that were removed from the facility. In May 2016, one 500-gallon gasoline UST and one 200-gallon gasoline UST were abandoned in place and associated piping was removed. Angle borings were advanced beneath each UST and one soil sample was collected beneath each UST and analyzed for benzene, di-isopropyl ether, ethyl tert-butyl ether, ethylbenzene, methyl tert-butyl ether (MTBE), tert-amyl methyl ether, tert-butyl alcohol, toluene, and xylenes via Method 8260B. Both samples were non-detect above laboratory detection limits. On August 1, 2016, the FCEHS issued closure to the two USTs that were abandoned in place. The former USTs are not considered a concern to this assessment. Refer to Appendix C – *Regulatory Agency Records Documentation* for details.

Auto Shopper Service and Keith's Foreign Auto
4380 N. Blackstone Avenue
Adjacent to the east

The facility is listed on the CUPA database as a Hazardous Waste Generator (CESQG) (Conditionally Exempt). The facility is a listed as a general auto service and repair facility. Permits issued in 1991 indicated there were no USTs located at the facility in association with the operation. The facility is no longer located adjacent to the east of the subject site and was transferred to an inactive status in 1999. The former facility is not considered a concern to this assessment.

4 Wheel Parts
4326 N. Blackstone Avenue
Adjacent to the east

The facility is listed on the CERS HAZ WASTE, CUPA database as a Hazardous Waste Generator (CESQG) (Conditionally Exempt), HAZNET, CERS and HWTS databases as a hazardous waste generator. Inspection reports from 2015 indicate the facility generates used oil. According to the inspection, less than 27 gallons per month were picked up by Safety Kleen and transported off-site for disposal under hazardous waste manifest. The facility is not listed on a database indicating a release has occurred; therefore, the facility is not considered a concern to this assessment.

City of Fresno Fire Department

The City of Fresno Fire Department (CFFD) has jurisdiction for fire protection for the subject site and the immediate vicinity. On January 14, 2022, the City of Fresno Fire Department CFFD was contacted regarding potential records of hazardous materials storage in aboveground or underground storage tanks or hazardous materials spill incidents for all addresses at the subject site. A response was received for the former 4343 North Blackstone Avenue building indicating an inspection from February 2011 that identified electrical, fire sprinkler, exit signs, plumbing issues and storage blocking corridors. No indication of environmental or hazardous materials issues were listed in the inspection. No environmental data was received for the 4323 – 4333 North Blackstone Avenue addresses.

Regulatory Database Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified the location and distances of the properties Krazan deemed as having the potential to adversely impact the subject site. The actual location of the listed properties may differ from the EDR listing. The actual location of the listed properties may differ from the EDR listing. No EDR-listed unmapped (non-geocoded) sites identified were determined to be located on or adjacent to the subject site. Krazan did not verify the

locations and distances of every property listed by EDR. Current and former tenants at the subject site were identified on the EDR Database report and are discussed below:

San Joaquin Veterinary Hospital
4333 N. Blackstone Avenue
Subject site

The on-site tenant is listed on the HWTS database as a historic generator of hazardous waste. During the site reconnaissance, Mr. Joanie Seta, office manager, stated that the facility formerly stored and used photo-developing chemicals in association with x-ray equipment need during animal examinations. The facility has not had a darkroom for developing the x-rays in more than 12 years. The current x-ray machine observed in the veterinary hospital is digital. Ms. Seta stated one Sharps bio-hazard container for needles and syringes is picked up and transferred off-site on a quarterly basis by Healthwise. The tenant's former listing as a historic generator of hazardous waste does not represent a concern to this assessment.

Continental Service Center
4333 N. Blackstone Avenue
Subject site

The former on-site facility is listed on the EDR HIST Auto database as an auto repair shop that operated at the subject site in 1970. There is no additional listing in the EDR report for the facility and no listing on the FCEHS database. The former automobile repair operation was considered a recognized environmental condition during Krazan's January 2022 assessment. Upon completion of the Limited Subsurface Survey (LSS) prepared by Krazan in October 2022, no subsurface anomalies characteristic of USTs or related features were identified during the field activities. Soil sampling and analysis, including a soil vapor survey, were not conducted as part of the LSS due to project approval time constraints. The subject site's listing as a an historic automobile repair operation does not represent a concern to this assessment.

Dollar Cleaners
4329 N. Blackstone Avenue
Subject site

The former on-site facility is listed on the Historic Cleaners database for the years 1986 to 1989. The facility was noted to be a garment pressing and cleaners' agent facility. The former tenant was considered a recognized environmental condition during Krazan's January 2022 assessment. Subsequently, Krazan was requested to complete an LSS to address potential USTs in the southwestern portion of the subject site; however, no investigation regarding the former dry-cleaners was requested and the collection of soil, soil gas and/or groundwater samples was not authorized due to project approval time constraints.

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located approximately hydraulically upgradient within subject site

vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Soils and/or Groundwater

The remaining properties within the specified search radius of the subject site which appeared on local, state, or federally published lists of sites that use or have had releases of hazardous materials or petroleum products are of sufficient distance and/or situated hydraulically cross- or downgradient from the subject site such that impact to the subject site via groundwater migration is unlikely. In general, potentially hazardous materials released from facilities located approximately hydraulically upgradient within subject site vicinity, or in a hydraulically cross-gradient direction in proximity to the site, may have a reasonable potential of migrating to the subject site via groundwater flow. This opinion is based on the assumption that non-vaporous hazardous materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. However, the potential for migration of volatile hazardous materials may include movement within soils, groundwater flow or potentially omni-directionally if present in a vaporous state.

Hazardous Materials Migration in Vapor

Hazardous materials or petroleum product vapors which may have the potential to migrate into the subsurface of the subject site may be caused by the release of vapors from contaminated soil or groundwater either on or in the vicinity of the subject site from current or historical uses of the subject site and/or adjacent or vicinity properties. Current or past land uses such as gasoline stations (using petroleum hydrocarbons), dry cleaning establishments (using chlorinated volatile organic compounds), former manufactured gas plant sites (using volatile and semi-volatile organic compounds), and former industrial sites such as those that had vapor degreasing or other parts-cleaning operations (using chlorinated volatile organic compounds) are of particular concern. Constituent of concern vapors are capable of migrating great distances omni-directionally along subsurface conduits such as pipelines, utility lines, sewer and stormwater lines, and building foundations.

Based on Krazan's observations and review of State and local regulatory agency records and the EDR regulatory database report, no listings of concern related to potential vapor migration were determined to be associated with the subject site, adjacent properties, or properties located within the subject site vicinity. The rationale supporting this opinion includes the following:

- Relevant sites had undergone investigation and remediation sufficient to receive regulatory agency closure.
- Sites with reported releases of minor quantities of constituents of concern (COCs), or COCs of limited volatility impacting soil only were considered of minimal concern.
- Sites with reported releases of COCs including volatile organic compounds (VOCs) were either of sufficient distance or hydraulically down- or cross-gradient from the subject site such that they do not appear to represent a significant potential for vapor migration on the subject site.

No engineering control sites, sites with institutional controls, or sites with deed restrictions were listed for the subject site, adjacent sites or vicinity properties in the EDR Report.

7.0 DISCUSSION OF FINDINGS

Summary of Conclusions		
Apparent Evidence of RECs/CRECs or PAOCs From	***Not Noted***	***Noted***
Historical Uses	X	
Current Uses	X	
Adjacent of Vicinity Property Uses	X	

Historical Uses

Based on Krazan's review of historical aerial photographs, historical topographic maps, and historical cross-reference directories, a site reconnaissance, contacts with the local regulatory agencies, and an interview with a representative of the owner of the subject site, there is no material evidence that RECs exist in connection with the historical uses of the subject site.

While no documents pertaining to the removal of the gas pumps or fuel storage tank was identified, a document dated January 29, 1979 title "Tank Removal Backfill" prepared by The Twining Laboratories, Inc. was included in the City of Fresno Planning Department records. The document detailed the "spot soil density tests taken in backfill of excavation". Tests were performed by Twining Laboratories, Inc. on January 24 and 25, 1979 at the authorization of Jim Williams of Williams Excavating. Twining Laboratories, Inc. prepared the document of compaction and soil density tests for Williams Excavating. The presence of this document indicates the fuel storage tank was removed from the subject site. Due to the apparent removal of the UST and the length of time since the removal (approximately 45 years), the former presence of a fuel UST does not represent a concern in connection with this assessment.

Current Uses

Based on Krazan's site reconnaissance, contacts with local regulatory agencies, and an interview with a representative of the owner of the subject site, there is no material evidence that RECs exist in connection with the current uses of the subject site.

Adjacent or Vicinity Property Uses

Based on Krazan's field observations, review of the EDR government database report, and consultation with local regulatory agencies, there is no material evidence that RECs exist in connection with the subject site from adjacent or vicinity property uses.

7.1 Evaluation of Data Gaps/Data Failure

In accordance with ASTM E 1527-21 guidance, data gaps represent a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice. Data failure represents the failure to achieve the historical research objectives of this practice even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

No data gaps were encountered in the process of preparing this report.

8.0 CONCLUSIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* guidance documents. Any deviations from this practice were previously described in this report.

During the course of this assessment, Krazan identified no evidence of recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) in connection with the subject site as defined by ASTM E 1527-21; however, ASTM Non-Scope Considerations were identified.

ASTM Non-Scope Considerations

- The buildings on the subject site were constructed in the mid-1970s. It is unknown whether the buildings contain asbestos-containing materials (ACMs) or lead-based paint (LBP). An asbestos and/or LBP survey and sampling of the on-site buildings was not included within the scope of this assessment. Prior to the disturbance of any suspect ACMs or LBP at the subject site via renovation or demolition, a comprehensive asbestos and LBP survey is recommended.

9.0 RELIANCE

This report was prepared solely for use by Client and should not be provided to any other person or entity without Krazan & Associates' prior written consent. No party other than Client may rely on this report without Krazan & Associates' express prior written consent. Reliance rights for third parties will only be in effect once requested by Client and authorized by Krazan & Associates with authorization granted by way of a Reliance Letter. The Reliance Letter will require that the relying party(ies) agree to be bound to the terms and conditions of the agreement between Client and Krazan & Associates as if originally issued to the relying party(ies), or as so stipulated in the Reliance Letter.

10.0 LIMITATIONS

The site reconnaissance and research of the subject site has been limited in scope. This type of assessment is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historical uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third-party use of this report, including use by Client's lender, shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in this report without the express written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments. Consequently, given the possibility for unanticipated hazardous conditions to exist on a subject site which may not have been discovered, this Phase I ESA is not intended as the basis for a buyer or developer of real property to waive their rights of recovery based upon environmental unknowns. Parties that choose to waive rights of recovery prior to site development do so at their own risk.

Parties who seek to rely upon Phase I Environmental Site Assessment reports dated more than 180 days prior to the date of reliance do so at their own risk. This limitation in reliance is based on the potential for physical changes at the site, changes in circumstances, technological and professional advances, and guidance related to the continued viability of Environmental Site Assessment reports, user's responsibilities, and requirements for updating of components of the inquiry as stated in the ASTM Standard E 1527-21.

11.0 QUALIFICATIONS

This Phase I ESA was conducted under the supervision or responsible charge of Krazan's undersigned environmental assessor with oversight from the undersigned environmental professional. The work was conducted in accordance with ASTM E 1527-21 guidance, generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report, and Krazan's quality-control policies.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

Laurie K. Blakeman
Sr. Environmental Project Manager

Remington R. Alexander, PE
Environmental Regional Manager

GLOSSARY OF TERMS

Subject Site: The real property being investigated under this Phase I ESA.

Adjacent Properties: Properties which are contiguous with the subject site, or would be contiguous except for a street, road, or other public thoroughfare.

Subject Site Vicinity: Properties located within a 500-foot radius of the subject site.

Environmental Professional: A person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The EP may be an independent contractor or an employee of the user.

User: The party seeking to use Practice E 1527 to complete an environmental site assessment of the subject site. A user may include, without limitation, a potential purchaser of the subject site, a potential tenant of the subject site, an owner of the subject site, a lender, or a property manager.

Recognized Environmental Condition (REC): In defining a standard of good commercial and customary practice for conducting an environmental site assessment of a parcel of property, the goal of the processes established by this practice is to identify recognized environmental conditions. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. *De minimis* conditions are not recognized environmental conditions.

Controlled Recognized Environmental Condition (CREC): A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). For example, if a leaking underground storage tank has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria, this would be considered a CREC. The "control" is represented by the restriction that the property use remain commercial. A condition considered by the environmental professional to be a CREC shall be listed in the findings section of the Phase I ESA report and as an REC in the conclusions section. A condition identified as a CREC does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented.

Historical Recognized Environmental Condition (HREC): A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional must determine whether the past release is an REC at the time the Phase I ESA is conducted (for example, if there has been change in the regulatory criteria). If the EP considers the past release to be an REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as an REC.

GLOSSARY OF TERMS (continued)

Potential Area of Concern (PAOC): A term adopted to provide an alternative designation to the REC and HREC for a range of environmental issues related to current subject site uses, historical subject site uses, or from adjacent and/or vicinity property uses. The PAOC is utilized to emphasize full disclosure and provide the User with conclusions and recommendations related to potential environmental issues in connection with the subject site based on Krazan's professional experience in cases where official documentation or other evidence may be absent in order to identify an REC or HREC, thereby aiding the User's considerations of environmental due diligence risk tolerance.

Migrate/migration: For the purposes of this practice, "migrate" and "migration" refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM E 2600-10 guidance; however, nothing in the E 1527-21 practice should be construed to require application of the E 2600-10 standard to achieve compliance with AAI.

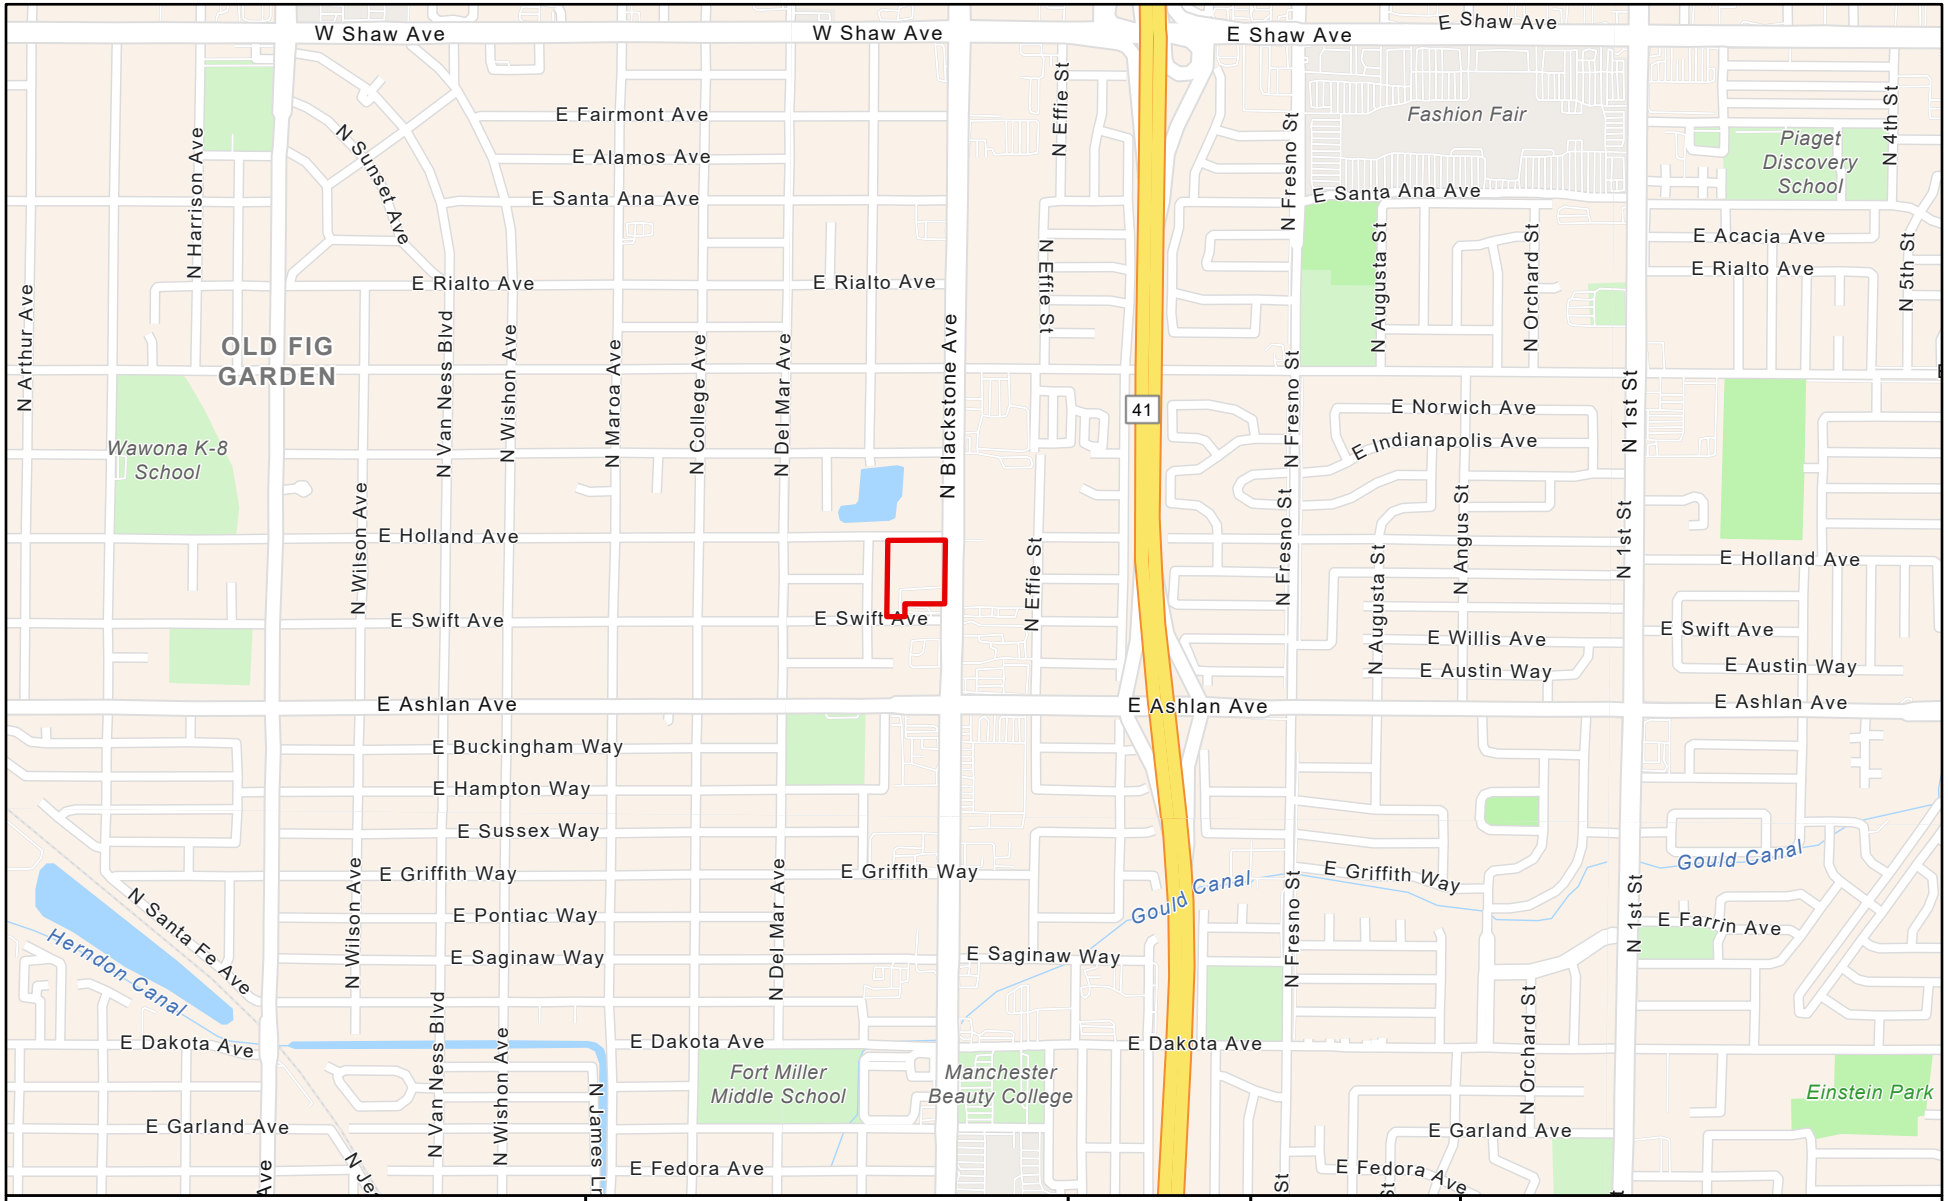

De minimis condition: A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Condition determined to be *de minimis conditions* are not RECS or CRECs.

Data Gap: A lack of or inability to obtain information required by this practice despite good faith efforts by the Environmental Professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to the site reconnaissance and interviews.

Data Failure: A failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. Data failure is one type of data gap.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Krazan & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Clovis, CA 93612
Contact: Laurie K Blakeman

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Our Environmental Lien and AUL report provides a summary of recorded information on a specific property from the time the current owner purchased the property, to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from the time the current owner purchased the property, forward. This report complies with ASTM 1527-21 standards when used in conjunction with a review of the owner's most recent insurance title policy. Environmental Liens and Activity Use Limitations may exist in the insurance title policy that do not appear within this report.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include City, County, State, Federal and Tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. No warranty, expressed or implied, is made whatsoever in connection with this report. AFX Research, LLC specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular use or purpose. The information contained in this report is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

PHASE I ESA
PROPERTY OWNER QUESTIONNAIRE

Property Name: Former Von's Strip Mall
Address/APN: 426-253-19
City/State/Zip: Fresno, CA 93726

Name: City of Fresno Company: City of Fresno
Date: 7/15/24 Phone: 559-621-8506

Knowledge of Previous Owner(s) and Phone Number? 559-621-8506

How are you associated with the subject site? City of Fresno Project Manager

How long have you been associated with the subject site? 1/4/22

What is the subject site currently used for? Small Businesses

Are there structures on the subject site? (Yes) No How many? 1 Long structure

Do you know of any previous structures on the subject site? Yes (No)
If so, describe uses. _____

Do you have knowledge of the presence of underground storage tanks (UST) or aboveground storage tanks (AST) being located on the subject property (current or historical)? Yes (No)
(If so, please provide info including number, size, contents, and locations.)

Currently: _____ Historically: _____

Do you know of any chemicals, hazardous materials and/or persistent pesticides/herbicides (such as DDT) being used, stored or discharged on the subject site? (Yes) No
If so, please list any chemicals / hazardous materials and their location(s). The auto parts store at the front of the property may store chemicals.

Do you have any knowledge of imported soil on the subject property? Yes (No)
If so, please indicate the origin and location of the imported soil? _____

Do you know of any buried materials such as garbage dumps, burn pits or underground pipelines located on the subject site? **Yes** **No**
If so, please specify and indicate the location(s). _____

_____

_____

Do you know of any septic systems located on the subject property (current or historical)? **Yes** **No**
If so, how many currently? _____ If so, how many historically? _____

Do you know of any domestic or agricultural water wells located on the subject property (current or historical)? **Yes** **No**
If so, how many currently? _____ If so, how many historically? _____

Do you know of any dry wells located on the subject property (current or historical)? **Yes** **No**

Do you know of any environmental monitoring wells located on the subject property (current or historical)? **Yes** **No**

Do you know of any drainage or disposal ponds located on the subject property? **Yes** **No**

Is the subject property connected to municipal water and/or sewer systems? **Yes** **No**

Do you know of obvious indications pointing to the presence or likely presence of contamination of the subject property? **Yes** **No**
If so, please specify and indicate location. _____

_____

Do you have any concerns about adjacent property usage such as gasoline stations, industrial uses, or USTs/ASTs on adjacent properties? **Yes** **No**

Are you aware of any environmental cleanup liens against the subject property that are filled or recorded under federal, tribal, state, or local law? **Yes** **No**

Have there been any previous commercial and/or industrial (non-residential) tenants/occupants on the subject property or in on-site buildings? **Yes** **No**
If so, please list: _____
The strip mall is occupied

Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law? **Yes** **No**
If so, please specify. _____

_____

_____

Do you have specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business? **Yes** **No**
If so, please specify and briefly explain. _____

_____

_____

Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property? **Yes** **No**

Do you know the past uses of the subject property? **Yes** **No**
If so, briefly explain. _____

_____

Do you have knowledge of the current or historical presence of vehicle repair-related features (i.e. sumps, oil/water clarifiers, subsurface hydraulic vehicle hoists, etc.)? **Yes** **No**
If so, briefly explain. _____

_____

Do you know of specific chemicals that are present or once were present at the subject property?
Yes **No**
If so, briefly explain. _____

_____

Do you know of any spills or other chemical releases that have taken place at the subject property?
Yes **No**
If so, briefly explain. _____

_____

Are you aware of, or have you been notified of, any contamination issues to soil or groundwater either at the subject property or in the vicinity of the subject site? **Yes** **No**
If so, briefly explain. _____

_____

What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development, etc.) Loan

_____

If purchase price has been established, does it reasonably reflect fair market value? yes

Are there any proposed changes in the uses of the subject site? **Yes** **No**
If so, please specify. _____

PHASE I ESA
PROPERTY USER QUESTIONNAIRE

Property Name: Former Von's Strip Mall
Address/APN: 426-253-19
City/State/Zip: Fresno, CA 93726

Respondent Information:

Name: City of Fresno
Company: City of Fresno
Date: 7/15/24
Phone: 559-621-8506

Introduction

"In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the 'Brownfields Amendments'), the *user* must provide the following inquiries required by 40 CFR §§ 312.25, 312.28, 312.29, 312.30 and 312.31. The *user* should provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that '*all appropriate inquiry*' is not complete." - American Society for Testing and Materials (ASTM) E1527-21 Appendix X3. User Questionnaire

1. Are you aware of any environmental cleanup liens against the subject site that are filed or recorded under federal, tribal, state, or local law? No

2. Are you aware of any activity use limitations (AULs) such as engineering controls, land use restrictions, or institutional controls that are in place at the subject site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? No

3. As the user of the Phase I Environmental Site Assessment (ESA), do you have any specialized knowledge or experience related to the subject site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject site or an adjacent property so that you would have specialized knowledge of the chemicals and processes used by this type of business? No

4. Does the purchase price being paid for the subject site reasonably reflect the fair market value of the subject site? **Yes** **No**

   A. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject site?

5. Are you aware of commonly known or reasonably ascertainable information about the subject site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

   A. Do you know the past uses of the subject site? If so, briefly explain. No.

   B. Do you know of specific chemicals that are present or once were present at the subject site? If so, briefly explain. No

   C. Do you know of spills or other chemical releases that have taken place at the subject site? If so, briefly explain. No

   D. Do you know of any environmental cleanups that have taken place at the subject site? If so, briefly explain. No

6. As the user of the Phase I ESA, based on your knowledge and experience related to the subject site, are there any obvious indicators that point to the presence or likely presence of contamination at the subject site? No

7. What is the reason for preparation of this Phase I ESA? (Property purchase/sale; bank loan; proposed development; etc.) Loan

I, the user of this Phase I ESA (or authorized representative of the User), do hereby attest that I have carefully considered the questions herein and have presented answers to the best of my knowledge and ability based upon the Responsibilities of the User as required within ASTM E1527-21 guidance.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 16 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 28 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 40 CUPA Listings sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 11 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 14 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

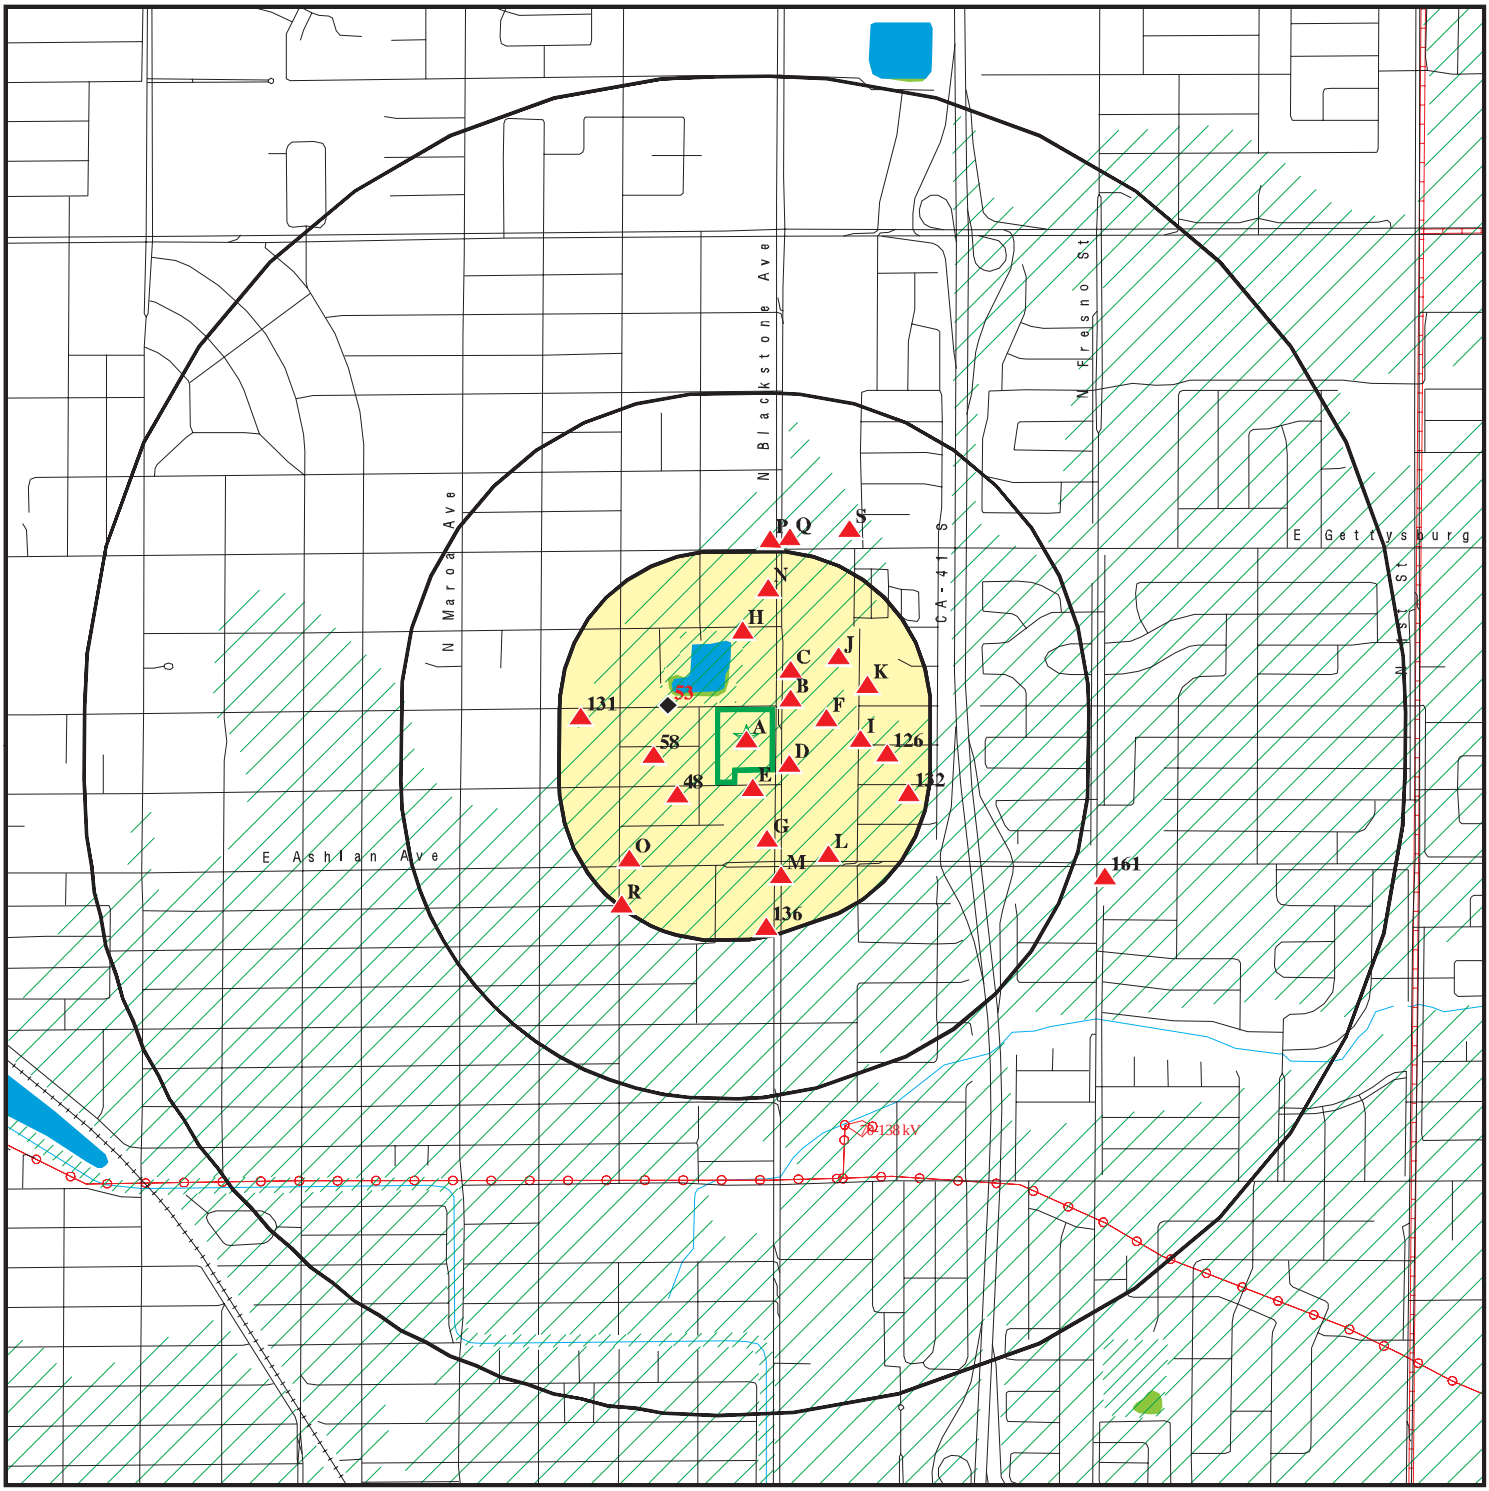

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse

SHERWIN WILLIAMS #8044 (Continued) **1000371842**

combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Source: CERS,

Site ID: 378579
Site Name: GET GO FOOD & LIQUOR*
Violation Date: 08-01-2023
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: 52. VIOLATION: Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed,

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/29/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Next Scheduled EDR Contact: 09/30/2024
Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/31/2023

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 01/16/2024
Date Data Arrived at EDR: 01/17/2024

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TRIS: List of PFAS Added to the TRI

Section 7321 of the National Defense Authorization Act for Fiscal Year 2020 (NDAA) immediately added certain per- and polyfluoroalkyl substances (PFAS) to the list of chemicals covered by the Toxics Release Inventory (TRI) under Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) and provided a framework for additional PFAS to be added to TRI on an annual basis.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

REVIEW - OVER-EXCAVATION WORK PLAN – RED CARPET CARWASH, 4411 N. BLACKSTONE AVENUE, FRESNO, FRESNO COUNTY

On 9 December 2019, your consultant, Technicon Engineering Services, Inc. (Technicon), submitted a work plan (Work Plan) for the subject address (Site) to over-excavate soils during removal of an underground storage tank (UST) system. Central Valley Regional Water Quality Control Board (Central Valley Water Board) staff reviewed the submittal pursuant to the California Water Code, the Health and Safety Code and the State Water Resources Control Board's *Low-Threat Underground Storage Tank Case Closure Policy* (Policy). This letter summarizes the Work Plan and provides staff comments.

Site History

The Site is currently utilized as a carwash and service station. The Site previous sold gasoline and has three 10,000-gallon, lined single-walled USTs, that were most recently used to store gasoline. One was previously used to store diesel fuel from 1965 to 1969. In 2004, as part of a dispenser upgrade, an unauthorized release was discovered under the dispensers. The Fresno County Division of Environmental Health (FCDEH) was the lead agency. The release did not appear to affect groundwater and a No Further Action letter was transmitted 10 August 2004.

Work Plan Summary

As part of regular tank removal activities, the USTs, associated product piping, and dispensers will be uncovered, cleaned, made inert, and removed in accordance with FCDEH requirements.

The excavation area will be contained by security fencing. Soil samples will be collected beneath the USTs, and product lines, and analyzed in accordance with FCDEH requirements.

The excavation will be observed for petroleum discoloration, and odor using an organic vapor meter (OVM) for the presence of petroleum hydrocarbons. If hydrocarbon impacts are observed during removal activities, soil excavation will commence immediately following tank removal, by means of a backhoe, excavator, or other appropriate equipment. Excavation will continue until field conditions suggest impacted soils have been adequately removed. It is not anticipated that excavation will extend deeper than 25 feet.

When field indications suggest that impacted soils have been removed, soil samples will be collected from the side walls of the excavation every 20 linear feet from depths of 0 to 5 feet and 5 to 10 feet below ground surface, and from the floor of the excavation at a minimum of one sample every 200 square feet.

Confirmation samples will be analyzed for total petroleum hydrocarbons diesel range constituents (TPHd), total petroleum hydrocarbons gasoline range constituents (TPHg); benzene, toluene, ethyl benzene, and xylenes (BTEX); and methyl tertiary butyl ether (MTBE) by EPA Method 8015M/8020. Samples from the upper 10 feet will also be analyzed for naphthalene by EPA Method 8260.

Excavation activities will be considered complete when analytical results of the confirmation samples meet the following conditions:

- TPHg concentrations are less than 4,000 milligrams per kilogram (mg/kg),
- Benzene, ethyl benzene, and naphthalene concentrations in the upper 5 feet do not exceed 8.2 mg/kg, 89 mg/kg, and 45 mg/kg, respectively,
- Benzene, ethyl benzene, and naphthalene concentrations between 5 and 10 feet do not exceed 12 mg/kg, 134 mg/kg, and 45 mg/kg, respectively.

The excavation will be backfilled with clean soil to within two feet of the surface and compacted to a minimum of 90 percent relative compaction. The upper two feet will be compacted to at least 95 percent relative compaction.

The excavated soils will be stockpiled onsite, covered with plastic sheeting, until confirmation sample analyses demonstrate excavation is complete. The stockpiled soil will be characterized for disposal, appropriate waste manifests completed, and the soil will be transported to an appropriate disposal facility.

A report will be signed by a California Registered Civil Engineer or Geologist, and will include field methodologies, tabulated results, supporting documentation, and findings.

Field work is scheduled to begin the week of 6 January 2020, and the report submitted within three weeks after the excavation has been backfilled.

Comments

Central Valley Water Board staff concur with the Work Plan with the following modifications:

Confirmation soil samples should also be collected from the excavation sidewalls at a depth of between 10 and 25 feet every 20 linear feet.

All confirmation soil samples should be analyzed for BTEX, MTBE, and naphthene by EPA Method 8260, TPHg and TPHd should be analyzed by EPA Method 8015.

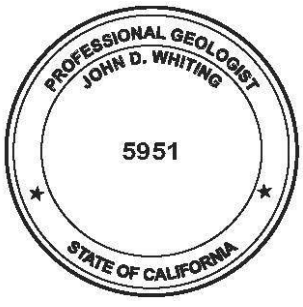

Please note that Site work conducted prior to the issuance of an unauthorized release report issued by FCDEH, and a directive from the Central Valley Water Board opening a case naming you as the responsible party, may not be eligible for reimbursement by the State Water Resources Control Board Cleanup Fund.

Please submit the report by email to Micheale.Easley@waterboards.ca.gov. The report needs to contain a Site map with detailed sample locations and any retests, original laboratory results, recommendations and conclusion, and an excavation log.

If you have any questions regarding this letter, please contact Micheale Easley by email or at (559) 488-4391.

REVIEW – WORK PLAN FOR SOIL INVESTIGATION – RED CARPET CARWASH, 4411 N. BLACKSTONE AVENUE, FRESNO, FRESNO COUNTY

On 27 January 2020, your consultant, Technicon Engineering Services, Inc. (Technicon), submitted a Letter Plan for Soil Investigation (Work Plan) for the subject address (Site) to further investigate petroleum contamination in soil. Central Valley Regional Water Quality Control Board (Central Valley Water Board) staff reviewed the submittal pursuant to the California Water Code, the Health and Safety Code and the State Water Resources Control Board's *Low-Threat Underground Storage Tank Case Closure Policy* (Policy). This letter summarizes the submittal and provides staff comments.

Site History

The Site is currently utilized as a carwash and vehicle service station, and no longer sells fuel. The Site previously sold gasoline and three 10,000-gallon, lined, single walled USTs used to store gasoline were removed from the Site in January 2020. One UST was previously used to store diesel fuel from 1965 to 1969. In 2004, as part of a dispenser upgrade, an unauthorized release was discovered under the dispensers. The Fresno County Division of Environmental Health (FCDEH) was the lead agency. The release did not appear to affect groundwater and a No Further Action Letter was transmitted 10 August 2004.

In January 2020, the USTs, dispensers and associated product piping were removed from the Site under the supervision of FCDEH. Analytical results from soil samples collected from beneath the dispensers, and from beneath the former diesel tank indicated the presence of total petroleum hydrocarbon diesel range constituents (TPHd) and total petroleum hydrocarbons gasoline range constituents (TPHg) to a depth of at least 14 feet bgs. Soil samples were collected to a depth of 20 feet bgs beneath the USTs and 10 feet bgs beneath the dispensers. Central Valley Water Board staff requested further investigation to confirm the vertical extent of contamination. The Work Plan was submitted in response to the Central Valley Water Board request.

Work Plan Summary

Two soil borings will be advanced at the Site to depths sufficient to verify the vertical extent of contamination. One boring will be beneath the north-western dispenser in the area of previous soil sample D4, and one beneath the northwestern end of the northern most UST in the area of previous soil sample T1.

The boring beneath the dispenser will be advanced by hand auger, due to the presence of a canopy, to a minimum depth of 20 feet below ground surface (bgs). Undisturbed soil samples will be collected every 5 feet beginning at 15 feet bgs.

The boring beneath the former UST will be advanced using a truck-mounted hollow-stem auger to a minimum depth of 35 feet bgs. Undisturbed soil samples will be collected every 5 feet beginning at 25 feet bgs.

Soil samples will be sent to a state certified laboratory for analysis of TPHg; TPHd; benzene, toluene, ethyl benzene, and xylenes (BTEX); and methyl tertiary butyl ether (MTBE) by EPA Method 8015M/8020.

Borings will be backfilled with neat cement slurry. Auger cuttings will be disposed of by thin- spreading on the soil surface over the former UST location and paved with asphaltic concrete.

A report will be prepared which will include field methodologies, tabulated analytical results, supporting documentation, and findings.

Comments

Central Valley Water Board staff **concur** with the Work Plan.

Please submit the report by email to Micheale.Easley@waterboards.ca.gov. The Report needs to contain a Site map and detailed sample locations and any retests, original laboratory results, recommendations, and conclusions.

If you have any questions regarding this letter, please contact Micheale Easley by email or at (559) 488-4391.

Bob Tostensen
Bob's Dive Shop
4374 North Blackstone Ave
Fresno, California 93726

Dear Mr. Tostensen:

Subject: Underground Storage Tank Closure Completion
Facility: Bob's Dive Shop
Location: 4374 North Blackstone Avenue, Fresno, California 93726
APN **428-151-02**

On May 31, 2016, a Sampling and Analysis Report (SAR) for the subject location was submitted to this agency by Salem Engineering Group. The SAR indicated that soil around the former underground storage tanks were not significantly impacted to warrant further investigation.

This letter confirms the permanent closure of underground storage tanks and the site investigation at the above location as required by California Health and Safety Code, Section 25298; and the California Code of Regulations, Title 23, Division 3, Chapter 16, Article 7 Underground Storage Tank Closure Requirements. The closure occurred on June 1, 2016 with the closure-in-place of two (520 gallon and 2,500 gallon) underground storage tanks.

With the provision that the information provided to this office is accurate and representative of existing conditions, no further action is required at this time. The site should now be properly closed, including backfilling as necessary.

This letter does not relieve you of any liability under the California Health and Safety code or Water Code for the past, present, or future operations at this site. Nor, does it relieve you of the responsibility to clean up existing, additional, or previously unidentified conditions at the site, which cause or threaten to cause pollution, or nuisance, or otherwise pose a threat to water quality or public health.

Please call me at (559) 600-3271 if you have any questions.

Sincerely,

Mike Bains

SUBJECT: Pre-Demolition Asbestos Survey Report
Former Vons
4343 N. Blackstone Avenue
Fresno, California

Dear Mr. Sanchez:

In accordance with your request and authorization, **T. Brooks & Associates, A Division of Provost & Pritchard Consulting Group**, has conducted an Asbestos Survey and Lead-Based Paint Inspection involving the above referenced commercial building located in Fresno, California. The survey was requested due to planned demolition operations involving the subject structure.

The Client wishes to be notified as to the presence and location of asbestos-containing materials, lead-based paint, or lead-containing paint which may be impacted as part of planned demolition operations involving the referenced commercial building.

We appreciate the opportunity to assist you. If you should have questions or require additional information, please contact us at (559) 449-2700.

Respectfully,
T. BROOKS & ASSOCIATES, A Division of Provost & Pritchard Consulting Group

Troy F. Brooks, RRC, CAC, CIEC

FORMER VON'S SUPERMARKET
4343 N. BLACKSTONE AVENUE
FRESNO, CALIFORNIA

INTRODUCTION

In accordance with your request and authorization, **T. Brooks & Associates, A Division of Provost & Pritchard Consulting Group,** has conducted a limited Asbestos & Lead Paint Survey involving the above referenced commercial building, located in Fresno, California. The enclosed survey was requested due to proposed renovation/demolition operations impacting those portions of the referenced structure considered as part of our investigation. The following sections present a description of the structures, current site use, pertinent regulatory information, description of sampled materials, and analysis of findings and our recommendations specific to compliance with demolition operations.

ASBESTOS INVESTIGATION

OBJECTIVE AND SCOPE OF SERVICES – ASBESTOS

The objective of this investigation was to evaluate suspect building materials at specified portions of the referenced commercial property as to asbestos content. Our investigation consisted of limited, representative bulk sampling, and subsequent laboratory analysis of suspect construction materials at specified interior and exterior areas of the subject structure. The scope of sampling was conducted in accordance with the NESHAP regulation of the U.S.E.P.A., the San Joaquin Valley Air Pollution Control District, and Cal/OSHA requirements. Specific sampling locations were selected by the inspector based on referenced regulatory requirements. Sampling was conducted utilizing destructive techniques. Suspect asbestos-containing materials were characterized by size, color, and texture in order to quantify materials and to draw conclusions based on bulk sample results. Separate findings and recommendations are enclosed for each referenced area.

Bulk sample analysis was provided by Environmental Management Consultants, an independent, NVLAP accredited laboratory (NVLAP No. 101926-0) located in Phoenix, Arizona

and specializing in asbestos analysis. Bulk samples were individually bagged and numbered for identification and to maintain a chain-of-custody as part of this report.

APPLICABLE REGULATIONS

Environmental Protection Agency

The National Emission Standard for Hazardous Air Pollutants (NESHAP), which was promulgated by the Federal Environmental Protection Agency (EPA), identifies "facilities" subject to asbestos regulation and requires completion of prescribed procedures including "asbestos surveys" prior to commencement of demolition or renovation activities involving all commercial and certain residential structures.

In addition to the Federal NESHAP standard, other regulations pertaining to asbestos also exist on federal, state, county, and local levels. The San Joaquin Valley Air Pollution Control District (SJVAPCD) has been charged with the administration and oversight of these programs in the area of the subject site. The SJVAPCD requires filing of a notification by the Contractor and payment of applicable fees to their agency on all demolition, and renovation projects involving in excess of 160 square feet, 260 linear feet, or 35 cubic feet of “Regulated Asbestos Containing Material” (RACM) which includes all friable materials or non-friable materials in friable condition.

Based on the Subject Site location, the appropriate SJVAPCD region office is the Central Region located at:

1990 E. Gettysburg
Fresno, California
(559) 230-5950

A copy of SJVAPCD documents and standardized forms are included in **Appendix F** for use in complying with their requirements. Due to the voluminous nature of applicable regulations governing work involving disturbance of asbestos-containing materials, copies of applicable regulations have not been included as part of this report. Refer to **Appendix G** (Regulatory Resource List) for a list of resources may be utilized by the Client for their use in complying with applicable requirements.

The SJVAPCD requires that all friable, asbestos-containing materials (RACM) be removed prior to engaging in “any” demolition or regulated renovation activities which would disturb materials referenced in the enclosed report. In addition, they recommend that all non-friable materials be removed due to the fact that forces associated with normal renovation and

demolition operations may render such materials friable. Arrangements for a site visit and determination by a representative of the SJVAPCD may be possible if the condition or disposition of a specific material is in question.

Occupational Safety and Health Administration

The Occupational Safety and Health Administration (OSHA), regulates construction activities including those which involve disturbance of asbestos-containing materials, or suspect ACM. OSHA regulations for asbestos materials exist at both state (Cal-OSHA) and federal (Fed-OSHA) levels and are intended to protect workers from occupational exposures to these materials.

Federal asbestos regulations, including the Federal Construction Industry Asbestos Standard (29 CFR 1926.1101) and State of California Standard (Title 8 CCR 1529) mandate that all construction materials classified as “Thermal System Insulation” (TSI) or “Surfacing Material” (sprayed or troweled in place of an acoustical nature) installed in buildings prior to January 1, 1981, be classified as “Presumed Asbestos Containing Materials” (PACM). This designation may only be refuted by extensive testing procedures of each homogeneous material in compliance with 40 CFR 763 Subpart E, the “AHERA” regulations of the EPA).

Appropriate controls including air sampling are required during the disturbance of any asbestos containing material (ACM) in order to document any potential airborne fiber release which may expose workers or others to regulated levels of airborne asbestos.

Certified Asbestos Consultant and Site Surveillance Technician

The California Business and Professions Code specifies that only a State of California, Certified Asbestos Consultant may provide design, environmental air sampling and other consulting services on behalf of building owners relating to abatement projects. Certified Site Surveillance Technicians (SST’s) typically perform bulk sampling, air monitoring, and other functions under the surveillance of a Certified Asbestos Consultant.

Definition of Asbestos-Containing Material

Cal-OSHA	>0.1% by weight *
State of California, Health & Safety Code	>0.1%
Fed-OSHA	>1.0% by weight
Cal-EPA	friable and >1% asbestos
EPA	friable and >1% asbestos

* Under Cal-OSHA regulations, materials containing between 0.01% - 1.0% are classified as “Asbestos Construction Containing Material”. The materials would not be regulated by the EPA and the waste may be disposed of as non-hazardous.

Work Categories - Fed OSHA, 29 CFR 1926.1101
Cal-OSHA, Title 8, CCR 1529

Classify abatement operations under four distinct activities which trigger different provisions within the standard. Those activities presenting the greatest risk are designated Class I work, with decreasing risk potential for each successive class.

The work categories and brief descriptions are as follows:

Class I - Abatement involving thermal system insulation (TSI) and sprayed-on or troweled-on or otherwise applied surfacing ACM.

Class II - Abatement of ACM or PACM other than TSI or Surfacing Materials. (Typically includes roofing and flooring materials)

Class III- Repair and maintenance operations which are likely to disturb ACM, or

Class IV- Custodial and housekeeping operations where minimal contact with ACM and/or PACM may occur.

Unclassified - Operations involving abatement of materials which contain detectable levels of asbestos up to and including, but not in excess of 1%.

NESHAP regulations are mandated for renovation or demolition activities exceeding the following construction material quantities at each project location:

> 160 square feet (sf)
> 260 linear feet (lf)
> 35 cubic feet (cf)

Refer to referenced EPA and OSHA regulations for additional information regarding specific procedures for demolition or renovation activities. See **Appendix F** for a list of resources related to regulatory compliance.

INVESTIGATION

The inspection and sampling event of the subject structure was conducted by Timothy Thomas, Certified Asbestos Consultant, No. 09-4487 on September 16, 2022. Professional Certifications and Laboratory Certifications are presented in **Appendix G**.

Building Construction and Use

The structure is of concrete block and wood-frame construction. Interior wall finishes consist of gypsum wallboard and block & mortar. Current ceiling finishes include suspended ceiling tiles. The structure includes an exposed concrete slab floor. The age of the structure was

not provided for our use. A floor plan was prepared for our use in documenting sampling locations and quantifying those materials testing positive for asbestos content (if any).

Materials Sampled

Materials to be sampled were at the discretion of the sampler and were selected based upon a description of proposed demolition operations by as described by the Client. The sampled materials are not intended to represent materials at locations other than those specifically sampled. Should it be determined that additional suspect materials will be impacted by the proposed renovation operations, additional materials must be sampled by a certified asbestos professional and submitted for analysis or assumed to be asbestos-containing.

Materials selected for sampling and subsequent laboratory analysis included the following:

LOCATION: Former Vons – 4343 N. Blackstone Ave., Fresno, CA

Sampled Materials	EPA Classification	NESHAP CAT.*
Ceiling Materials		
- 2'x4' Ceiling Tile	Miscellaneous Material	RACM
- 2'x4' Ceiling Tile/Drywall w/ Texture/Paint	Miscellaneous Material	RACM

Miscellaneous Materials

- Built-Up Roofing	Miscellaneous Material	Cat. I, N.F.**
- Roof Penetration Mastic	Miscellaneous Material	Cat. I, N.F.**

* These classifications are based on classifications by the AHERA regulations of the Environmental Protection Agency. All asbestos containing materials may be rendered friable by the forces acting upon them.

** Removal of vinyl flooring products and/or mastics by mechanical means would change their EPA classification to RACM (friable) and would require compliance with state and local regulations.

Bulk Sample Results

Of those samples submitted for analysis, none (0) tested positive for asbestos.

Refer to **Table No. 1** for additional information concerning material descriptions and locations.

Those materials testing negative for asbestos content may be treated as non-asbestos containing for the purposes of proposed renovation/demolition operations involving those portions of the referenced structure considered as part of our investigation.

ANALYSIS OF FINDINGS

All materials herein referenced as testing negative for asbestos content may be treated as non-asbestos containing in terms of proposed renovation/demolition operations involving those portions of the subject facility considered as part of our investigation.

Any additional suspect materials which may be discovered during the course of construction related activities, and for which representative sampling has not been submitted must be sampled by an accredited asbestos individual and analyzed prior to being disturbed or “assumed’ to be asbestos-containing and treated accordingly.

ADDITIONAL CONSIDERATIONS

Should the work operations involve removal of any load-bearing member, the operation would be defined as a “demolition” under the NESHAP. A ten-working day waiting period, and payment of a fee would be required prior to proceeding with any demolition operation.

Refer to **Appendix G** (Regulatory Resource List) for additional information concerning applicable regulations and contact information.

REGULATORY AGENCIES AND REQUIREMENTS

Following is a brief description of regulatory agencies and regulatory requirements:

Federal EPA

Environmental Protection Agency (EPA) - NESHAP Notification - 40 CFR 61 - Subpart M Requires notification in all demolition operations whether the building contains asbestos or not. Requires notification when renovation/demolition involves greater than 160 square feet or 260 linear feet of friable ACM.

San Joaquin Valley Air Pollution Control District

San Joaquin Valley Air Pollution Control District (SJVAPCD) - Enforcement of NESHAP regulations.

Enforces notification in all demolition operations whether the building contains asbestos or not, and all renovation project involving in excess of 160 square feet, 260 linear feet, or 35 cubic feet of RACM.

Requires the removal of all regulated ACM before demolition/renovation process. Non-friable (Category I and II) ACM may be required to be removed at the discretion of the local air pollution control district. Typically, the SJVAPCD, while not requiring abatement of non-friable materials in “intact” condition prior to demolition operations, recommends that all ACM (including non-friable) be abated as forces associated with normal renovation/demolition operations may render such materials friable.

Cal-OSHA

State of California, Department of Industrial Relations, Division of Occupational Safety and Health enforces regulations pertaining to worker protection. New Cal-OSHA standard (Title 8, CCR 1529) took effect on July 1, 1996, and was adopted from the Federal OSHA standard. The standard mandates procedures and engineering controls necessary to protect employees of the contractor, building occupants and others.

Requires filing of a “Temporary Jobsite Notification” with local compliance office prior to commencing with abatement activities involving any quantity of material.

Cal EPA – Department of Toxic Substance Control

Regulates disposal of asbestos-containing waste which includes asbestos in amounts exceeding 1.0% which is in friable condition and therefore “Regulated Asbestos-Containing Material”.

RECOMMENDATIONS

Prior to proceeding with any regulated renovation/demolition operations involving those portions of the subject structure considered as part of our investigation, the Owner or Contractor

must file a completed notification with the SJVAPCD. Should the work be classified as a "demolition" under the NESHAP, a fee would be required and a ten (10) working days waiting period prior to proceeding with any regulated renovation or "demolition".

Conduct additional bulk sampling and analysis of any additional suspect materials to be impacted by the proposed work operations which were not considered as part of our investigation as required under state, local and federal regulations.

Retain the Services of a State of California, Certified Asbestos Consultant. The consultant may provide project design, management, air monitoring and other services, which will ensure compliance with applicable regulations and minimize potential liability to the Building Owner, which may arise as a result of work associated with the project.

LEAD-BASED PAINT INSPECTION REPORT

OBJECTIVE AND SCOPE OF SERVICES – LEAD

The inspection and lead sampling event of the structure was conducted on September 16, 2022, by Greg Feaver, Lead Sampling Technician for Lead, No. 9609. Greg conducted the inspection in the presence of Tim Thomas, Inspector/Assessor for Lead, No. 8088. Professional Certifications and Laboratory Certifications are presented in **Appendix H.**

SAMPLE METHODOLOGY

Enclosed results are based on total lead content regardless of the number of paint layers present at each specific test location. Each referenced area includes data generated by the testing instrument. Lead content at a level equivalent to 5,000 ppm >1.0 mg/cm² would be classified as "Lead-Based Paint" by the State of California, and the EPA. Each result must also be compared to the applicable OSHA level ("any detectable amount", or 600 ppm).

Sampling was conducted using a *Viken Detection* Spectrum Analyzer Lead Detector, Model Pb200I Alpha (Serial No. 1029). The instrument was utilized within the operating parameters established by *Heuresis Corporation* as indicated in the Performance Characteristic Sheet provided by the manufacturer.

Definition of Lead Based Paint

Title X	>1.0 mg/cm² or >0.5% by weight
HUD	1.0 mg/cm² or 0.5% by weight
DHS	1.0 mg/cm² or > 0.5 % by weight

CPSC	600 ppm or .06% by weight
OSHA	600 ppm or .06% by weight or any detectable amount

(Note subtle differences dependent upon preceding mathematical symbols)

APPLICABLE REGULATIONS FOR LEAD

The following includes the primary agencies which govern lead related work and a brief list of their components and responsibilities.

Occupational Safety and Health Administration

Federal Standards	General Industry Standard	29 CFR 1910.1025
	Construction Industry Standard	29 CFR Part 1926.62
State Standards	General Industry Standards	8 CCR 5216
	Construction Industry Standards	8 CCR 1532.1

The Occupational Safety and Health Administration (OSHA), is focused on protecting the health and safety of workers, including construction activities which disturb lead containing paints, surface coatings, and other materials. OSHA regulations for lead materials exist at both state (Cal-OSHA) and federal (Fed-OSHA) levels and are intended to protect workers from occupational exposures to these materials.

Federal and State lead regulations, including the Lead in Construction Standard 29 CFR 1926.62 (Federal Standard) and Title 8 CCR 1532.1, (California standard) regulate disturbance of lead containing materials during construction, demolition, and maintenance related activities. The Federal standard was adopted in May of 1993. The State of California adopted this standard in November 1993.

Appropriate engineering controls, personal protective equipment, training, specific work practices, and representative air sampling are required by both Cal/OSHA and OSHA whenever workers will disturb lead in any concentration (including less than 600 ppm) as this disturbance may result in airborne exposures over the Action Limit (AL) or Permissible Exposure Limit (PEL). Initial blood lead testing is required above the AL (30 ug/m;), and a written site specific “Compliance Plan” is required for all projects where a Negative Exposure Assessment has not been generated. Medical removal is required for any worker whose blood lead level > 50 ug/dl.

U.S. Environmental Protection Agency

Title X was promulgated by the U.S. Congress in 1992 and required the U.S. Environmental Protection Agency (USEPA), to define lead hazards and to develop certification programs.

Major components of EPA pertaining to Lead Containing Materials

- Established a lab accreditation program
- Defined hazards in dust and soil (revised June 1998)
- Evaluates inspection & removal products (ongoing)
- Requires disclosure & information prior to sale/rental of pre-1978 housing (in effect)
- Mandate information for renovation /remodel work (in effect 6/99)
- Developed an accreditation and training program effective in states that do not have their own program California Environmental Protection Agency

Cal-EPA determines when lead paint waste is a hazardous waste in California, and how it must be disposed. The California Department of Toxic Substance Control (DTSC), as part of Cal-EPA oversees regulated disposal issues related to hazardous waste in California.

Procedures for the identification, management, transport, record keeping, and disposal of all types of hazardous waste are set forth in Title 22, CCR, Sections 66260.1-66263.12 and 66268.1-66268.124, and the Health and Safety Code, section 25163, subdivision (c).

Department of Housing and Urban Development (HUD)

Developed regulations and guidance documents for use on HUD properties. Its Guidelines are generally considered state-of-the-art in the lead abatement industry. HUD guidelines establish strategies for completion of lead survey and risk assessments, clearance strategies, work practices, engineering controls and worker safety procedures.

While HUD guidance documents were developed specifically for HUD properties, the State of California Department of Public Health mandates that all work involving disturbance of regulated of “Lead-Based Paint” be conducted in accordance with HUD Guidelines.

HUD developed the following guidance documents which are industry standards
:

- 1989 - published A Lead-based Paint: Interim Guidelines for Hazard Identification and Abatement in Public and Indian Housing, referred to as the “Old HUD Guidelines”.

- 1995 - published “Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing”.

- HUD is developing work practice regulations applicable to HUD housing which are to take effect sometime in 1999.

California Department of Public Health (CDPH)

Developed and enforces a comprehensive regulation that provides an accreditation process for lead training providers, a certification program for individuals, and specified required work practices for lead hazard evaluations and lead hazard control work.

- Promulgated the California CDPH Lead Training, Accreditation, Certification and Work Practices - Title 17, CCR, Division 1, Chapter 8, (Sections 35000-361000). Specifies work practices involved in lead inspections, risk assessments and hazard reduction work in all residential and public buildings in California. Also requires training, passage of exams, and certification of individuals that conduct lead hazard assessments or work to reduce or eliminate lead hazards. Revised standard took effect on January 8, 1999.

Key Provisions: Defines “lead hazards” in dust, paint, and soil
Defines almost all paint as “presumed” LBP
Excludes post 1978 housing, and schools built after 1992
Requires notifications to CDPH prior to disturbance of LBP
Requires specific work practices (containment, clearance testing, etc.)
Requires individuals to be “certified” for some work

CDPH Certification is required in the following cases:

- Exceed PEL in California (50 ug/m^3) (Cal-OSHA)
- Conduct lead hazard evaluation or “abatement” (CDPH)
- Residential Inspections for EPA Disclosure Rule compliance
- Title X funded projects (U.S. Congress)
- California public elementary and preschools (Ed. Code Section 32243 b)
- When prescribed by project specifications.

CDPH Certification Classifications	Brief Description
Lead Related Inspector/Assessor	Conduct inspections or assessments for LBP
Lead Related Supervisor	Supervise lead project as Contractor
Lead Related Project Monitor	Monitor lead project on behalf of Client
Lead Related Project Designer	Design a lead abatement project
Lead Related Worker	Engage is lead related work as a worker

OSHA Trigger Activities (Tasks):

Fed OSHA, **29 CFR 1926.62**
Cal-OSHA, Title 8, CCR 1532.1

Classify trigger tasks under three distinct activity groups which assume that you may reach specified airborne exposure levels. Those tasks presenting the least risk are designated Activity 1 tasks, with increasing risk potential for each successive class.

The three (3) trigger task categories and assumed airborne levels are as follows:

Trigger Activity I - (50 - 500 ug/m³)	manual demolition, scraping and sanding, using heat guns, using HEPA equipment, debris cleanup
Trigger Activity II - (500 - 2500 ug/m³)	lead mortar, burning, rivet busting, use of non-HEPA equipment, dry abrasive blast cleanup
Trigger Activity III - (>2500 ug/m³)	welding, abrasive blasting, torch cutting, and burning

Prior to obtaining exposure assessment for each specific trigger task or if no historic data is available, the following apply:

- assume exposure over PEL
- wear respirators and protective clothing
- be properly trained (atleast Action Level training (per OSHA standard)
- have initial blood tests on affected workers, supervisors

Refer to **Appendix F** – “Regulatory Resource List” for specific information regarding trigger task activities and specific requirements.

SCOPE OF INVESTIGATION

The Lead-Based Paint Inspection was conducted in accordance with Title 17 - California Code of Regulations, Division 1, and Chapter 8, 8 CCR 1532.1 (Cal/OSHA. The sampling event was conducted in a manner which provides limited, representative evaluation of painted surfaces at referenced locations at the subject site in accordance with the HUD schedule in Chapter 7 (Lead-Based Paint Inspection) of the “Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing”. Testing locations provide an overall representation of painted finishes present at the site. The referenced inspection is representative in nature and is limited in based on the limitations of the referenced regulatory standard.

The XRF instrument was calibrated prior to and following the prescribed sampling period in accordance with the Performance Characteristic Sheet provided by the manufacturer. Calibration readings are included in the XRF sampling results as the initial and concluding readings and are designated as a “calibrate” reading. The calibration readings were compared to a known concentration of lead using a standard SRM sheet provided by the XRF manufacturer to verify accurate performance of the instrument at the beginning and the conclusion of the sampling episode.

Sampling of painted surfaces for suspect lead-based paint at specified interior and exterior portions of the referenced commercial space included testing of forty-one (41) separate testing combinations. Of these, none, (0) were found to include lead at levels classified as “Lead-Based Paint”. Based on this finding, none of the painted finishes considered as part of our investigation at the specified location would be classified as “Lead-Based Paint” (LBP) under state and federal regulations.

Refer to the **Appendix B & C** for additional information concerning locations of testing combinations at the subject site.

ANALYSIS OF FINDINGS – LEAD

In summary, certain testing combinations considered as part of our limited investigation were found to contain lead in some amount. Under current Cal/OSHA regulations, paint containing in excess of 0.06% lead (600 parts per million) are considered lead-containing paint for non-trigger tasks under Cal/OSHA. For trigger tasks, any detectable amount of lead invokes Cal/OSHA regulations and assumes that airborne levels may exceed the “Action Level” (AL) of 30 ug/m³, and the “Permissible Exposure Limit” (PEL) of 50 ug/m³. Refer to **Appendix G** for additional information regulatory requirements.

Current OSHA regulations require that workers involved in work disturbing lead containing surfaces be protected from exposure to lead above stipulated levels.

PAINT CONDITION

As part of the Lead-Based Paint Inspection, painted surfaces were visually examined for general condition. While this report does not constitute a lead “Risk Assessment”, painted surfaces were generally categorized as being in intact, fair, poor, or peeling condition.

Painted finishes at each testing combination considered as part of our investigation were observed to be in “Intact” condition at the time of the field investigation.

Refer to the **Appendix B & C** for additional information concerning locations of testing combinations at the subject site.

ADDITIONAL CONSIDERATIONS

Hazards associated with lead exposure are typically due to ingestion and inhalation of lead in the form of dust. Lead can be determined within the bloodstream, bones, and other organs by various detection methods.

Potential exposure to lead is associated with damaged painted surfaces. Painted surfaces should be inspected regularly and maintained in intact, undamaged condition to minimize the potential for the creation of lead dust hazards. Any evidence of peeling, loose or detached paint should be rectified by stabilizing the painted surface or replacing the painted element.

RECOMMENDATIONS

Planned work operations, including renovation and/or demolition operations which involve the disturbance of “Lead-Containing Paint” must be conducted in compliance with applicable state and federal requirements. Prior to engaging in work which will disturb lead-containing finishes referenced herein, or other untested paints or surface coatings, the contractor engaged in the work must conduct an “Initial Exposure Assessment” for each planned “trigger task” in accordance with Cal/OSHA to determine potential lead exposures to workers. Prior to commencing such operations, the Contractor must assume workers will be exposed to airborne levels above the PEL and must provide workers with Hazard Communication Training, and personal protective equipment, including HEPA-equipped respirators. A hand-washing facility must be present at the worksite.

To reduce potential liability, the Owner may elect to have a certified lead professional conduct perimeter air monitoring on their behalf to provide documentation of airborne lead levels at locations around the site. The lead professional may also provide baseline and/or lead clearance monitoring.

Prior to Disposal of lead-containing paint or elements which include lead-containing paint, the State of California requires that representative sample(s) of the waste stream waste

(along with the substrate where bonded) be submitted to an accredited laboratory and that a Total Threshold Limit Concentration (TTLC) test be performed to determine the total lead content. Dependent upon the result, an SW846 (STLC) may be required to determine the amount of leachable lead. These tests will determine transportation and disposal requirements and may greatly impact the ultimate cost of the work. Due to potential delays associated with conducting the analysis of the waste, it is recommended that the waste characterization be initiated prior to soliciting for bids for the work.

LIMITATIONS

The enclosed asbestos and lead survey and review was limited to those portions of the subject structure considered as part of our investigation. This investigation is undertaken with the calculated risk that the presence, full nature, and extent of asbestos and lead-containing materials would not be revealed by visual observation and random sampling alone. T. Brooks & Associates, A Division of Provost & Pritchard Consulting Group, makes no representations as to the asbestos or lead content of materials which were not specifically tested or which were not readily accessible to the inspector.

At the request of the Client, the scope of sampling and testing was limited to those areas and painted finishes which may be impacted based on the proposed renovation/demolition operations. The enclosed findings and recommendations are not intended to represent materials at locations other than those specifically referenced.

T. Brooks & Associates, A Division of Provost & Pritchard Consulting Group, is not responsible for failure of the Client and/or other design professionals or contractors working under their direction to completely review the enclosed report, as well as other referenced survey reports which include information which may impact operations involving those portions of the subject residential triplex site to be impacted by their work.

Certain opinions and recommendations expressed in this report are based on our knowledge and experience with applicable state, federal and local law, and do not reflect other possible adverse conditions not immediately visible or which may be discovered by a more extensive examination including a review of relevant documents which were not available during this investigation.

Our inspection did not include sampling of materials which may contain materials known to be hazardous including polychlorinated biphenyls (PCB’s), mercury, radon or other materials.

Consideration should be given to testing for these and other hazardous materials which may be present.

Findings presented in this report were based on field observations, random sampling and analysis, review of available data and discussion with local regulatory and advisory agencies. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods involved.

The information presented herewith was based on professional interpretation using presently accepted methods with a degree of conservation deemed proper as of the report date. It is not warranted that such data and/or methods cannot be superseded by future technical developments.

Respectfully Submitted,
T. Brooks & Associates, A division of
Provost & Pritchard Consulting Group

Analyst - Johann Hofer

Signatory - Lab Director - Kurt Kettler

Distinctly stratified, easily separable layers of samples are analyzed as subsamples of the whole and are reported separately for each discernible layer. All analyses are derived from calibrated visual estimate and measured in area percent unless otherwise noted. The report applies to the standards or procedures identified and to the sample(s) tested. The test results are not necessarily indicative or representative of the qualities of the lot from which the sample was taken or of apparently identical or similar products, nor do they represent an ongoing quality assurance program unless so noted. These reports are for the exclusive use of the addressed client and that they will not be reproduced wholly or in part for advertising or other purposes over our signature or in connection with our name without special written permission. The report shall not be reproduced except in full, without written approval by our laboratory. The samples not destroyed in testing are retained a maximum of thirty days. The laboratory measurement of uncertainty for the test method is approximately less than 1 by area percent. Accredited by the National Institute of Standards and Technology, Voluntary Laboratory Accreditation Program for selected test method for asbestos. The accreditation or any reports generated by this laboratory in no way constitutes or implies product certification, approval, or endorsement by the National Institute of Standards and Technology. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the Federal Government. Polarized Light Microscopy may not be consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials.

San Joaquin Valley
Air Pollution Control District
Standard Forms & Fee Schedule

San Joaquin Valley Unified Air Pollution Control District

COMPLIANCE ASSISTANCE BULLETIN

July 2006 - Revised July 2015

ASBESTOS REQUIREMENTS for DEMOLITION and RENOVATIONS

The San Joaquin Valley Air Pollution Control District (District) Rule 4002 requires compliance with the *National Emission Standards for Hazardous Air Pollutants* (NESHAP) regulation, 40 CFR, Part 61, Subpart M developed by the Unified States Environmental Protection Agency (EPA). The purpose of this bulletin is to provide an overview of the NESHAP notification, inspection and emission control requirements as they relate to asbestos.

SUMMARY

For any renovation or demolition of a regulated facility, you must do the following:

- **INSPECT:** Conduct a thorough asbestos inspection of the facility before:

  Any renovation in which more than 160 square feet or more of building materials, or 260 linear feet or more of pipe insulation, will be disturbed at a regulated facility, or

  Any demolition at a regulated facility. (See page 2 for the definition of demolition)

  Regulated facilities (Facilities subject to the NESHAP) include all commercial building, residential buildings with more than four dwelling units, other structures and non-portable equipment. A single family dwelling or residential buildings with four or fewer units may be exempt, depending on its past use and future use of the property. The EPA has extensive policy on the NESHAP applicability to these structures. Contact the District to determine if your project is regulated.

- **ASBESTOS ABATEMENT:** If asbestos-containing material (ACM) is discovered, which will be disturbed during a renovation or demolition, they must be removed prior to those projects under most circumstances. Also, Cal-OSHA and Cal-EPA hazardous waste regulations apply in most cases.

- **NOTIFY:** Submit a complete asbestos notification form to the District for any regulated asbestos abatement project or demolition, 10 working days before the activity begins.

  A ***regulated asbestos abatement project*** is one in which at least 160 Square feet of regulated asbestos-containing building materials (RACM) or 260 linear feet of asbestos-containing pipe insulation is disturbed.

  Regulated demolitions are demolitions of "facilities" described above. Notification is required for any regulated demolition, whether or not asbestos is present.

- **FEES:** Pursuant to District Rule 3050, fees must be submitted to the District with all regulated renovations and demolitions notifications. Notifications received without the appropriate fee will be considered incomplete.

DEMOLITION PERMIT RELEASE FORM: Any demolition (regulated or not), for which a building department demolition permit is applicable, requires a completed Demolition Permit Release form. Building officials will require an approved copy of this form, signed by the District, prior to the issuance of a building department demolition permit.

SOME DEFINITIONS: 61.141

1. **FACILITIES -** Facilities subject to the rule include "all structures, installations, buildings and equipment, except for a single family dwelling (SFD) or a residential building with more than four dwelling units. However SFD or building with four or fewer units is also subject to the regulation if:

   a. It has been used for, or is being removed to be replaced by a non-residential use, or

   b. It is to be used as a training burn exercise.

   c. Sites with more than one such building remodeled or demolished are always regulated.

2. **DEMOLITION** - In addition to the total destruction of a structure, demolitions include "the removal of any structural load-bearing member from a facility together with any related handling operations or the intentional burning of a building" (training burns conducted by a fire fighting agency only). Also, the separation of a structure from its foundation prior to relocation is a demolition.

3. **RENOVATION** - means "altering a facility or one or more facility components in any way, including the stripping or removal RACM from a facility component." Renovations include all activities in which asbestos could be disturbed at a regulated facility, including the clean up and removal of debris from buildings which have burned.

4. **NON-FRIABLE ACM**

   a. **Category I non-friable** is "asbestos-containing packing, gaskets, resilient floor covering and asphalt roofing products containing more then 1 percent asbestos as determined by PLM testing that, when dry, *cannot* be crumbled, pulverized, or reduced to powder by hand pressure."

   b. **Category II non-friable ACM** is "any ACM, excluding Category 1 ACM, containing more then 1 percent asbestos as determined by PLM testing, that when dry, *cannot* be crumbled, pulverized, or reduced to powder by hand pressure."

5. **RACM - include:**

   a. **Friable ACM**, which is any material containing more than 1 percent asbestos, as determined by Polarized Light Microscopy (PLM) testing, which, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure.

   b. **Category I nonfriable ACM** that is in poor condition and "has become friable" or "that has or will be subjected to sanding, grinding, cutting, or abrading."

   c. **Category II nonfriable ACM** that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material in the course of demolition or renovation.

INSPECTION: 61.145 (a)

An asbestos inspection must be performed by the owner or operator prior to:

a. Any regulated demolition.

b. Any renovation activity in which more than 160 square feet of building material or 260 linear feet of pipe insulation will be disturbed. An inspection is not necessary, however, if the material to be disturbed is stipulated to be asbestos containing and will be removed in accordance with the NESHAP.

Cal-OSHA regulations in the California Labor Code, 9021.5 through 9021.8, require that asbestos-consulting services (inspections) shall be performed by a person who is certified by Cal-OSHA, and who has taken and passed an EPA-approved Building Inspector course and performs the inspection according to the procedures outlined in the course.

The District requires that inspection reports (surveys) must include:

a. A schematic showing the location of all tested materials.

b. The following data for all asbestos-containing materials:

1. The amount and description of each material.

2. Percent asbestos content (10% and below must be point counted).

3. Whether or not the material is friable.

A report of the asbestos inspection (survey) must be received with each demolition notification.

NOTIFICATION 61.145 (b)

A hard copy of the asbestos notification must be submitted to the District, at least 10 working days prior to:

a. Any regulated demolition (see definitions of *demolition* and *facility* above).

b. Any renovation in which more than 160 Square feet or 260 Linear feet of RACM will be disturbed.

The District notification form and instructions for filling it out are with the bulletin.

Notifications will not be complete, nor will the 10 working day notice period begin, until all of the required information and fees have been submitted to the District.

Notifications may be submitted by hand delivery, U.S mail or commercial courier. Facsimile ~~is~~ and e-mails are not acceptable methods of delivery.

ASBESTOS ABATEMENT: 61.145 (c)

Asbestos-containing materials discovered during the inspection process, which will be disturbed during renovation or demolition, must be removed properly prior to the demolition or renovation. Employees engaged in asbestos abatement work must be properly trained and equipped for the work in accordance with Cal-OSHA regulations. The Cal-OSHA and NESHAP regulations have specific work practice requirements to be followed during the removal of these materials. Also, the NESHAP regulation and Cal-EPA have waste handling, transportation and disposal requirements applicable that must be adhered to.

SJVUAPCD Rule 3050 (Fees)

A nonrefundable fee must be paid with each demolition and renovation notification, in accordance with SJVUAPCD Rule 3050, Asbestos Removal Fees, which is attached. Fees for asbestos abatement projects are based on the amount of RACM removed. If a project involves at least 160 square feet, 260 linear feet and/or 35 cubic feet or more of RACM, fees for each quantity of material are determined and added together to arrive at the total fee for the project.

DEMOLITION PERMIT RELEASE FORM

CH &S Section 19827.5 requires city or county building officials to have proof of compliance with, or exemption from, the asbestos NESHAP notification requirements before they issues demolition permits. In order to facilitate this, the District has developed a Demolition Permit Release form (attached). For facilities subject to the NESHAP, the District will issue a Demolition Permit Release form once it has been properly noticed of the work that is to occur. *The Signed release form does not guarantee that asbestos abatement or demolition work is being done properly.* For all demolitions, including facilities exempt from the NESHAP, the applicant must fill out the Demolition Permit Release form and have it signed by the District before obtaining a building department demolition permit. The District allows facsimile transmittal of release forms.

RECYCLING/WASTE DISPOSAL

In addition to waste disposal information about RACM, the asbestos notification must identify any building materials, which will be recycled after removal from a project. The name of the recycling contractor and location of such activity must be identified.

No asbestos containing or asbestos contaminated material may be recycled.

If you have any questions, we encourage you to contact one of our three regional offices.

ASBESTOS DEMOLITION/RENOVATION NOTIFICATION FORM
GENERAL INFORMATION

The Asbestos NESHAP, 40 CFR Part 61, Subpart M, requires written notification of demolition or renovation operations under Section 61.145. The form below form may be used to fulfill this requirement. Only complete notification forms are acceptable. Incomplete notification may result in enforcement action.

The notification must be postmarked or delivered no later than ten working days prior to the beginning of the asbestos removal activity (dates specified in section 7) or demolition (dates specified in Section 8). Please submit this form and corresponding fees to the appropriate office:

For Fresno, Madera and Kings Counties:
SJVUAPCD
Attention: Asbestos Program
1990 E. Gettysburg Avenue
Fresno, California 93726

For San Joaquin, Stanislaus and Merced Counties:
SJVUAPCD
Attention: Asbestos Program
4800 Enterprise Way
Modesto, CA 95356

For Tulare and Kern Counties:
SJVUAPCD
Attention: Asbestos Program

Bakersfield, CA 93308

INSTRUCTIONS

1. Type of Notification: Check Original if the notification is a first time or original notification; Revised (Dates) if the notification is a revision dates only; Revised (Others) if the notification is a revision of other data (highlight changes); Canceled if the project has been canceled; or "Courtesy" if the activity is not regulated. When submitting a revised notification add a number (starting with the number 1) after "revised" to differentiated between revisions.

2. Type of Operation: Check for facility demolition, ordered demolition, facility renovation, or Emergency renovations.

3. Facility Description: Provide detailed information on the areas being renovated or demolished. If applicable, provide the floor numbers and room numbers where renovations are to be conducted.

   Site Location: Provide information needed to locate the site in the event that the address alone is inadequate.

   Present Use/Prior Use/Future Use: Describe the primary use of the facility or enter the following: Hospital; School; Public Building; Office; Industrial; University or College; Ship; Commercial; Residence; or Subdivision.

4. Is Asbestos Present? Answer "Yes" or "No" regardless of the amount or type of asbestos.

5. Include a complete asbestos report (survey) that accurately depicts amounts, percent, analytical method used

6. Approximate Amount of Asbestos including: (1) Regulated ACM to be removed (including non-friable ACM to be sanded, ground or abraded); (2) Category I\II ACM not removed; and for "courtesy notices" (3) Non-friable ACM to be removed. Enter amounts in square feet or linear feet. Describe volume in cubic feet only if the amount cannot be approximated in square feet or linear feet.

7. Removal Dates (MM/DD/YY): Enter scheduled dates for asbestos removal work. Asbestos removal work includes any activity, including site preparation, which will break up, dislodge or disturb asbestos material.

8. Demo/Renovation Dates (MM/DD/YY): Enter scheduled dates for beginning and ending the planned demolition or renovation.

9. FACILITY OWNER INFORMATION: Enter the name of the site supervisor and contact person for the notification. If additional parties share responsibility for the site, demolition activity, renovations or ACM removal, include complete information (including name, address. contact person and telephone number) below.

10. Removal Contractor: Contractor hired to remove asbestos.

11. Other Contractor: Demolition contractor, general contractor, or any other person, who leases, operates, controls or supervises the site.

12. Description of Planned Demolition or Renovation Work and Method(s) to be Used: Include in this area a description of the demolition and renovation techniques to be used and the types of facility components and materials which will be affected by this work.

13. Description of Engineering Controls and Work Practices to be Used to Prevent Emissions at the Site: Describe the work practices and engineering controls selected to ensure compliance with the requirements of the regulations, including both asbestos removal and waste-handling emission control procedures.

14. ACWM Transporter(s): Enter the names, addresses, contact persons and telephone numbers of the persons or companies responsible for transporting ACM from the removal site to the waste disposal site. If the removal contractor or owner is the waste transporter, state "same as owner" or "same as removal contractor." If additional parties are responsible include complete information on an additional sheet submitted with the form.

15. ACWM Disposal Site: Identify the waste disposal site, including the complete name, location and telephone number of the facility. If ACM is to be disposed of at more than one site, provide complete information on an additional sheet submitted with the form.

16. Recycling of Waste Material (No ACM may be recycled): Identify the site, including the complete name, location and telephone number of the facility, where any material is to be taken for recycling.

17. If Demolition Ordered by a Government Agency, Please Identity the Agency: Provide the name of the responsible official, title and agency, authority under which the order was issued, the dates of the order and the dates of the ordered demolition. A copy of the order shall be attached to the notification.

18. For Emergency Renovation: Provide the date and time of the emergency, a description of the event and a description of unsafe conditions, equipment damage or financial burden resulting from the event. The information should be detailed enough to evaluate whether a renovation falls within the emergency exception.

19. Description of Procedures to be Followed in the Event that Unexpected Asbestos is Found or Previously Nonfriable Asbestos Material Becomes Crumbled, Pulverized, or Reduced to Powder: provide adequate information to demonstrate that appropriate actions have been considered and can be implemented to control asbestos emissions adequately, including at a minimum, conformance with applicable work practice standards.

20. Certification of Presence of Trained Supervisor: The notifier must certify that a person trained in asbestos-removal procedures will supervise the demolition or renovation. The supervisor is responsible for the activity on-site. Evidence that the supervisor has completed the training must be available for inspection during normal business hours.

21. Verification: Please certify the accuracy and completeness of the information provided by signing and dating the notification form.

RULE 3050 ASBESTOS REMOVAL FEES (Adopted May 21, 1992; Amended December 17, 1992; Amended February 18, 1993; Amended August 21, 1997; Amended January 17, 2008; Amended April 16, 2015; Amended April 19, 2018, effective July 1, 2019)

Note: This rule is effective on and after July 1, 2019.

1.0 Applicability

The National Emission Standards for Hazardous Air Pollutants (NESHAP), adopted by reference as District Rule 4002, and therefore these fees are applicable to:

1.1 all demolitions whether or not asbestos is present; and

1.2 renovations in which 260 linear feet, 160 square feet, or 35 cubic feet or more of regulated asbestos containing materials are disturbed.

2.0 Fees

Every person filing notification of an asbestos removal project, subject to the provisions of Rule 4002 (National Emissions Standards for Hazardous Air Pollutants), shall pay upon filing, the nonrefundable fee prescribed herein. The total fee for any project shall be the sum of the applicable fee components below.

Demolition or Renovation:

Linear Feet	Square Feet	Cubic Feet	Fee Component ($)
0 - 259*	0 - 159*	0 - 34*	188
260 - 499	160 - 499	35 - 109	188
500 - 999	500 - 999	110 - 218	317
1,000 - 2,499	1,000 - 2,499	219 - 547	634
2,500 - 4,999	2,500 - 4,999	548 - 1,094	1,054
5,000 - 9,999	5,000 - 9,999	1,095 - 2,188	1,580
10,000 or more	10,000 or more	2,189 or more	2,107

* Demolition only. Does not apply to renovations.

Category I non-friable asbestos-containing material (ACM) means asbestos-containing packings, gaskets, resilient floor covering, and asphalt roofing products containing more than 1 percent asbestos.

Category II non-friable ACM means any material, excluding Category I non-friable ACM, containing more than 1 percent asbestos.

Regulated asbestos-containing material (RACM) means (a) Friable asbestos material, (b) Category I nonfriable ACM that has become friable, (c) Category I nonfriable ACM that will be or has been subjected to sanding, grinding, cutting, or abrading, or (d) Category II nonfriable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material in the course of demolition or renovation operations regulated by this subpart.

Appendix G

Regulatory Resource List

Asbestos & Lead

REGULATORY RESOURCE LIST – ASBESTOS

California Occupational Safety & Health Administration (Cal/OSHA):

8 CCR 1529 Asbestos in Construction Standard

Websites: http://www.dir.ca.gov/title8/1529.html\ (Regulation)

http://www.dir.ca.gov/dosh/ACRU/ACRUhome.html (Report of Use)

Summary of Regulation:

1. Regulates Friable and Non-Friable ACBMs which contain asbestos in excess of 0.1% by weight.
2. Applicable to workers engaged in disturbance of ACBM (>1.0%) and ACCM (0.1 - 1.0%) and workers in close proximity to the work area.
3. Contractors who disturb in excess of 100 sq. ft. must be a "Certified Abatement Contractor" with the State of California Contractors State License Board and have an ASB attachment on their license with the exception of flooring, roofing, and asbestos-cement products.
4. Contractors that disturb less than 100 sq. ft. must also file a "Report of Use" with the State of California.
5. Contractors who disturb any amount of ACBM must ensure worker protection by providing accredited training, medical surveillance, PPE and a negative exposure assessment.
6. All work must be conducted in accordance with the regulation.

NESHAP Regulation – United States Environmental Protection Agency:

40 CFR Part 6, Subpart M- National Emission Standard for Asbestos

Website: http:www.epa.gov/asbestos/pubs/asbreg.html

Summary of Regulation:

1. Regulates renovation projects on all commercial structures, certain residential properties, and multi-family properties with four (4) or more units.
2. Has jurisdiction over projects involving disturbance of greater than 160 sq. ft. or 260 lin. ft. of ACBM (>1.0%) or "Presumed Asbestos-Containing Material.
3. Regulates all demolition, regardless of whether asbestos is present on targeted structures.
4. Enforced by local air quality management district or EPA region office in non-delegated districts.

San Joaquin Valley Air Pollution Control District

Website: http://www.valleyair.org/busind/comply/asbestosbultn.htm

Summary of Regulation:

1. Enforces NESHAP regulation.
2. Requires filing of completed notification, payment of fees, and ten (10) day waiting-period prior to commencing abatement related work in excess of threshold levels of RACM, non-friable ACBM which may become friable, and for all demolition activities.
3. Requires that an asbestos survey be conducted and prepared by a Certified Asbestos Consultant and that a copy be submitted to the air district along with the completed notification.

REGULATORY RESOURCE LIST – LEAD

California Occupational Safety & Health Administration (Cal/OSHA): 8 CCR 1532.1 (Lead in Construction Standard)

Website: http://www.dir.ca.gov/title8/1532_1.html

Summary of Regulation:

1. Regulates all work-related activities in which workers may be exposed to lead and any workers in close proximity to the work area.
2. Regulated levels of lead are based on level of training and experience of contractor and maintenance of historical data based on initial exposure assessments for individual "trigger tasks".
3. Contractors that disturb in excess of 100 sq. ft. must file a "Temporary Jobsite Notification" with the local Cal/OSHA Compliance Office at least 24 hours prior to start of work.
4. Contractor shall be licensed with the State of California, Contractors State License Board and have provided all employees who will engage in the work or enter a lead "regulated area" with level of training commensurate with anticipated exposure level.
5. Employees are required under certain circumstances to be certified by the State of California Department of Public Health (CDPH) to conduct lead work.
6. The employer or contractor must send notification prior to the start of the job unless:
    - the lead content of the material disturbed is less than 0.5 percent, (5,000 parts per million) or 1.0 mg./cm^2;
    - the amount of lead-containing material is less than 100 square feet or 100 linear feet;
    - the only task is torch cutting or welding for no longer than one hour per shift.
7. Contractors who disturb any amount of lead must ensure worker protection by providing accredited training, medical surveillance, PPE and conduct an initial exposure assessment per "trigger task".
8. Employers are required to conduct biological monitoring on employees based on the schedule mandated by OSHA.

State of California – Department of Public Health – Title 17, Division 1, Chapter 8

Website: http:www.cdph.ca.gov/programs/CLPPB/Documents/Title17.pdf

Summary of Regulation:

1. Regulates projects involving disturbance of "Lead-Based Paint" on public and residential structures.
2. If conducting "Abatement", defined as work designed to reduce or eliminate lead hazards, only CDPH accredited workers and supervisor may conduct the work, and a completed 8551 form shall be filed with CDPH a minimum of five (5) days prior to commencing abatement operations.
3. For work classified as "Abatement", a Lead Clearance is required. Standard includes a minimum standard for performance of work and states that all lead related work shall be conducted in accordance with the HUD Guidelines.

HUD Guidelines

Website:

http://portal.hud.gov/hudportal/HUD?src=/program_offices/healthy_homes/lbp/hudguidelines

A standard developed by the Department of Housing and Urban Development which has generally been adopted as "state of the art" in the lead industry. This standard has been adopted by the State of California as a regulatory requirement.

U.S. Environmental Protection Agency

Repair, Renovation & Painting Rule

Website: www.epa.gov/lead/pubs/renovation.htm

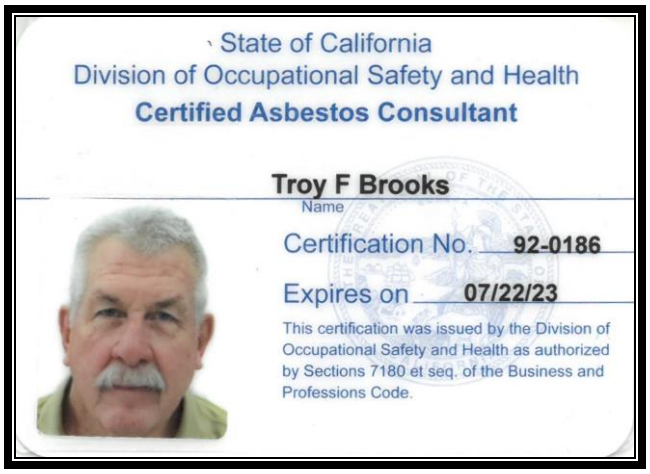

Summary of Regulation:

1. Regulates all contractors that engage in work involving disturbance of lead in pre-1978 residential housing and child-occupied facilities.
2. Requires that painted finishes to be impacted by proposed scope of work must be tested to determine if they are classified as "Lead-Based Paint" or presumed as such.
3. Requires that contractors utilize lead safe work practices.
4. In California, only a CDPH certified Inspector/Assessor may test for the presence of Lead-Based Paint.
5. Contractors must provide a copy of the "Renovate Right" pamphlet to owners or occupants of properties prior to commencing work which falls under the regulation.
6. Each job regulated under the RRP requires at least one RRP Certified Renovator be present on any job which falls under the regulation. In addition, each firm must also be RRP certified.
7. Regulation allows contractors to conduct their own clearance test known as a "Cleaning Verification".
8. The homeowner may elect to hire a 'third-party" consultant to conduct clearance testing on their behalf.

ASBESTOS SURVEY
FRESNO SENIOR CENTER & APARTMENTS
4323 – 4333 NORTH BLACKSTONE AVENUE
FRESNO, CALIFORNIA

1.0 INTRODUCTION

This report presents the results of our asbestos survey for the structures located at 4323 thru 4333 N. Blackstone Ave. in Fresno, California. The asbestos survey was conducted under the conditions of Krazan & Associates, Inc.'s (Krazan's) Change Order No. 2, dated September 11, 2024. Jake Lingo gave written authorization on September 17, 2024, for Krazan to proceed with the asbestos survey.

2.0 PURPOSE AND SCOPE OF WORK

The purpose of the asbestos survey was to identify and quantify the presence of potential asbestos-containing materials (ACMs) at the on-site structures. The scope of work for the asbestos survey included conducting a visual survey of the structures and conducting bulk sampling and analysis of materials suspected to contain asbestos. This survey was performed in accordance with applicable local, state, and federal regulations.

3.0 BUILDING DESCRIPTION

4323 North Blackstone Avenue

The site is located on the west side of Blackstone, north of Ashlan in Fresno, California. The structure was a single-story concrete block structure with concrete slab-on-grade foundation, concrete block exterior walls, with mineral surface rolled roofing. Interior construction included gypsum board, open-framed, and suspended ceilings with two-foot by four-foot ceiling panels; gypsum board, wood, and concrete block walls; and concrete floors overlain (in areas) by sheet flooring, wall-to-wall carpeting, and floor tiles.

4325 - 4333 North Blackstone Avenue

The structure was a single-story concrete block structure with concrete slab-on-grade foundation, concrete block and cement panel exterior walls, with mineral surface rolled roofing. Interior construction included gypsum board and suspended ceilings with two-foot by four-foot ceiling panels; gypsum board and concrete block walls; and concrete floors overlain (in areas) by sheet flooring and vinyl plank flooring.

4.0 INVESTIGATIVE METHODS

4.1 Sampling Protocols

Seventy-four (74) samples of suspected ACMs were collected from throughout the on-site structures. Sample locations for this survey were chosen in a semi-random fashion with emphasis placed on minimizing damage to the sampled materials. The samples were collected by carefully removing a small amount of the suspect material in a non-abrasive manner. If possible, samples were collected from existing damaged areas or loose pieces of materials. Each sample was placed in a separate sealed plastic bag, and labeled with the project number and sample number. Refer to the Floor Plan following the text for the bulk sample locations.

4.2 Laboratory Analytical Methods

The bulk samples collected were analyzed by E.H.S. Laboratories of Richmond, Virginia, to detect the presence, type, and percentage of asbestos by polarized light microscopy/dispersion staining, following the procedure described in 40 CFR 763, Subpart E, Appendix A (AHERA). Copies of the Analytical Results and Chain-of-Custody Record are included in Appendix A.

5.0 RESULTS OF INVESTIGATION

As stated previously, 74 samples of suspected ACMs were collected from throughout the structures. Analytical laboratory results and field observations of the materials sampled have been summarized on Table I, following the text of this report. Information presented within the table includes the sample number, the sample description, the location where the sample was obtained, the asbestos content, the volume of ACMs identified (typically expressed in square feet), the condition of the material sampled, and a listing of locations where similar (homogenous) ACMs were also noted (although not necessarily sampled in these areas). In addition, footnotes have been provided to convey pertinent information regarding the specific sample or homogenous material.

The following materials were identified as containing at least one percent asbestos:

Cement panel – 4325 – 4333 exteriors (Sample No. 37). This material would be considered a Category II non-friable ACM under the NESHAP Regulations.

12-in by 12-in Floor tile and mastic – throughout 4323, former O'Reilly Auto Parts (Sample Nos. 59 and 60). This material would be considered a Category I non-friable ACM under the NESHAP Regulations.

6.0 CONCLUSIONS

The National Emissions Standards for Hazardous Air Pollutants (NESHAP) defines regulated asbestos-containing materials (RACM) as the following: friable materials containing more than one percent asbestos as determined by polarized light microscopy; Category I non-friable materials (i.e., floor tiles, asphalt roofing products) containing more than one percent asbestos that have become friable, have been subjected to or will be subjected to sanding, grinding, cutting, or abrading; and Category II non-friable materials (i.e., non-friable asbestos-containing materials that are not Category I materials) containing more than one percent asbestos that have a high probability of becoming or have already been reduced to a friable condition by demolition or renovation activities. The above-noted samples that contain greater than one percent asbestos may meet the definition of a RACM under the NESHAP depending on the abatement method employed. In addition, the California Division of Occupational Safety and Health (Cal-OSHA) defines asbestos-containing construction material (ACCM) as greater than 0.1 percent asbestos. The above-noted samples that contain greater than 0.1 percent asbestos would meet the definition of an ACCM.

If these asbestos-containing materials are left in place, the occupants of the structure should avoid buffing, sanding, grinding, or abrading these materials in any way. These activities could potentially release asbestos fibers. An Operations and Maintenance Program (O&M Program) could be developed for the management of asbestos-containing materials if left in place. The development and implementation of such a program would require the designation and training of an asbestos program manager. The asbestos program manager would be responsible for conducting periodic inspections of the asbestos-containing materials, record keeping requirements, and providing awareness training necessary for any maintenance or custodial personnel required to clean or repair these materials. Furthermore, it is recommended that the asbestos program manager notify all potentially affected individuals.

When building maintenance, repair, renovation, or other activities disturb or damage ACMs, asbestos fibers may be released creating a potential hazard. Therefore, removal of friable and non-friable ACMs that have the potential to become friable during demolition and/or renovation is federally regulated under the NESHAP. The San Joaquin Valley Air Pollution Control District (APCD) is the responsible agency on the local level to enforce the NESHAP. The APCD Regional Office requires that asbestos-containing materials (ACM) be removed prior to renovation or demolition activities. Additionally, the APCD must be notified prior to any demolition and/or renovation activities.

7.0 LIMITATIONS

This survey and review of the subject property has been limited in scope. This investigation is undertaken with the risk that visual observations and random sampling alone would not reveal the presence, full nature, and extent of asbestos-containing materials. Krazan makes no representation as to the asbestos content of materials not sampled or that were inaccessible to our inspector (i.e., between walls, beneath floors, in pipe chases, etc.). The asbestos sample locations and building dimensions were measured/located in the field by tape measurement from existing features. Therefore, the sample locations, building dimensions, and approximate square footage of asbestos-containing materials should be considered accurate only to the degree implied by the methods used.

The findings presented in this report were based on field observations, random sampling and analysis, review of available data, and discussions with local regulatory and advisory agencies. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used. The information presented herewith was based on professional interpretation using presently accepted methods with a degree of conservatism deemed proper as of the report date. We do not warrant that future technical developments cannot supersede such data.

This asbestos survey is not intended to be the sole basis for asbestos removal bids. Confirmation of the condition and volume of the ACMs should be conducted by prospective removal contractors prior to accepting removal bids. This report is provided for the exclusive use of the client noted on the cover page and is subject to the terms and conditions in the applicable contract between the Client and Krazan. The client is the only party to whom Krazan has explained the risks involved and has been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from the client's point of view. Any third party use of this report, including use by the Client's lender, prospective purchaser, or lessee will be subject to the terms and conditions governing the contractual work between the Client and

Krazan. The unauthorized use of, reliance on, or release of the information contained in this report, without the expressed written consent of Krazan, is strictly prohibited and will be without risk or liability to Krazan.

Asbestos analysis was conducted by a laboratory accredited under the National Voluntary Laboratory Accreditation Program (NVLAP) administered by the National Institute of Standards and Technology (NIST). The results of the asbestos analyses are accurate only to the degree and care of ensuring the testing accuracy and the representative nature of the samples obtained.

If you have any questions or if we may be of further assistance, please do not hesitate to contact our office at (559) 348-2200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

Dear Certified Asbestos Consultant or Technician:

Enclosed is your certification card. **To maintain your certification, you must abide by the rules printed on the back of the certification card.**

Your certification is valid for a period of one year. If you wish to renew your certification, you must apply for renewal at least 60 days before the expiration date shown on your card. [8 CCR 341.15(h)(1)].

Please hold and do not send copies of your required AHERA refresher renewal certificates to our office until you apply for renewal of your certification.

Certificates must be kept current if you are actively working as a CAC or CSST. The grace period is only for those who are not actively working as an asbestos consultant or site surveillance technician.

Please contact our office at the above address or email w any changes in your contact/mailing information within 15 days of the change.

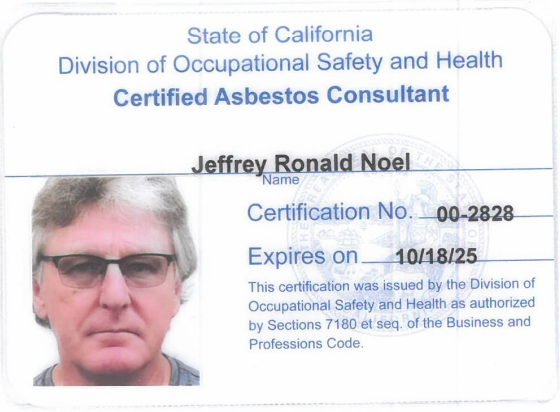

Sincerely,

Dean Mochrie, CAC
Senior Safety Engineer

LEAD-BASED PAINT SURVEY
FRESNO SENIOR CENTER & APARTMENTS
4323 – 4333 NORTH BLACKSTONE AVENUE
FRESNO, CALIFORNIA

1.0 INTRODUCTION

This report presents the results of our lead-based paint survey for the structures located at 4323 thru 4333 N. Blackstone Ave. in Fresno, California. The lead-based paint survey was conducted under the conditions of Krazan & Associates, Inc.'s (Krazan's) Change Order No. 2, dated September 11, 2024. Jake Lingo gave written authorization on September 17, 2024, for Krazan to proceed with the lead-based paint survey.

2.0 PURPOSE AND SCOPE OF WORK

The purpose of the lead-based paint survey was to identify and quantify the presence of potential lead-based paints (LBPs) at the on-site structures. The scope of work for the limited LBP survey included conducting a visual survey of the structures, conducting bulk sampling and analysis of materials suspected to contain lead.

3.0 BUILDING DESCRIPTION

4323 North Blackstone Avenue

The site is located on the west side of Blackstone, north of Ashlan in Fresno, California. The structure was a single-story concrete block structure with concrete slab-on-grade foundation, concrete block exterior walls, with mineral surface rolled roofing. Interior construction included gypsum board, open-framed, and suspended ceilings with two-foot by four-foot ceiling panels; gypsum board, wood, and concrete block walls; and concrete floors overlain (in areas) by sheet flooring, wall-to-wall carpeting, and floor tiles.

4325 - 4333 North Blackstone Avenue

The structure was a single-story concrete block structure with concrete slab-on-grade foundation, concrete block and cement panel exterior walls, with mineral surface rolled roofing. Interior construction included gypsum board and suspended ceilings with two-foot by four-foot ceiling panels; gypsum board and concrete block walls; and concrete floors overlain (in areas) by sheet flooring and vinyl plank flooring.

4.0 INVESTIGATIVE METHODS

4.1 Sampling Protocols

Thirty-one (31) samples of suspected LBPs were collected from the on-site structures. Representative samples were collected from painted surfaces that visually appeared to contain various types of paint. Every attempt was made to identify unique paint and/or surface types. However, a chance exists that: 1) different paints are not visually distinct, 2) hidden surfaces exist, or 3) areas that were painted with different and distinct paint types are now covered by a single overlay. Sample locations for this survey were determined by the inspector and were selected in a random fashion after homogeneous areas were identified.

Sample locations for this survey were chosen in a semi-random fashion with emphasis placed on minimizing damage to the sampled materials. The samples were collected by carefully removing a small amount of the suspect material, with every attempt to separate the paint from the substrate. If possible, samples were collected from existing damaged areas or loose pieces of materials. Each sample was placed in a separate sealed plastic bag, and labeled with the project number and sample number.

4.2 Laboratory Analytical Methods

Paint chip samples were analyzed by E.H.S. of Richmond, Virginia, to detect the presence of total lead in accordance with EPA Method 7420. Copies of the analytical results and Chain-of-Custody Record are included in the Appendixes.

5.0 RESULTS OF INVESTIGATION

As stated previously, 31 samples of suspected LBPs were collected from throughout the structures. Analytical laboratory results and field observations of the materials sampled have been summarized on Tables, in the Appendixes of this report. Information presented within the tables includes the sample

number, the room equivalent, building component, substrate, testing location, lead content, the volume of LBP identified (typically expressed in square feet), and the condition of the material sampled. In addition, footnotes have been provided to convey pertinent information regarding the specific sample.

The following paints contained 0.5% or greater total lead by weight and are defined as lead-based paint:
No paints associated with these structures contained 0.5% or greater total lead by weight.

The following paints contained greater than 0.009% total lead by weight and are defined as lead-containing paint:
Gray concrete block wall – 4323 exterior (Sample No. 27)
Tan concrete block wall – 4323 exterior (Sample No. 29)

The paints on the exterior and interior of the structure surveyed were generally in good condition.

6.0 CONCLUSIONS

Occupational exposure to lead is regulated by both the Federal Occupational Safety and Health Administration (OSHA) (29 CFR 1926.62) and California OSHA (Title 8, GISO 5198 and CSO 1532.1). Based on Federal and California OSHA, when disturbing paints which contain lead (any amount of detectable lead), the above-noted OSHA and California OSHA regulations should be followed. Furthermore, the United States Department of Housing and Urban Development (HUD) publication entitled "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing," dated 1995, outlines specific guidelines for disrupting paint with lead in excess of 5,000 mg/kg (lead-based paint). These guidelines have been developed primarily to address conditions within buildings utilized for residential purposes. In addition, industry accepted standards also suggest that building owners notify occupants regarding the presence, location, and extent of lead-based paints. Records of all notifications and reports must be maintained for the duration of ownership and must be transferred to successive owners.

All construction work where an employee may be occupationally exposed to lead containing paint, including building renovation and demolition, must comply with OSHA Regulation 29 CFR 1926.62 and California OSHA Title 8, CSO 1532.1. This regulation requires initial employee exposure monitoring to evaluate worker exposure during work that disturbs lead containing paint. Krazan suggests that

engineering controls and air monitoring for airborne lead be conducted at the start of projects in which worker exposure to lead containing paint is likely.

Demolition of buildings containing lead-based paint is not specifically regulated by the San Joaquin Valley Air Pollution Control District (APCD). General requirements for building demolition, however, such as dust control, must be strictly followed. Also, building components which have been identified as being coated with loose and flaking LBPs must be handled (typically done by scraping of loose/flaking LBPs and then stabilized with an over coating of fresh paint) and LBP chips disposed of as a Hazardous Waste and not be discarded as general construction debris.

7.0 LIMITATIONS

This survey and review of the subject property has been limited in scope. This investigation is undertaken with the calculated risk that the presence, full nature, and extent of lead-containing paints would not be revealed by visual observation and sampling alone. Krazan & Associates, Inc. makes no representation as to the lead content of paints not sampled or that were inaccessible to our inspector.

The findings of this report were based upon the results of our site inspection, paint chip sampling, along with the interpretation of paint chip analysis results. Lead-paint testing was done by a laboratory certified by the State of California Department of Public Health (DPH) and accredited as an AIHA Environmental Lead Laboratory Accreditation Program (ELLAP) laboratory. Therefore, the data are accurate only to the degree implied by review of the data obtained and by professional interpretation, and the degree of care of ensuring the testing accuracy and the representative nature of the samples obtained. The findings presented herewith are based on professional interpretation using state of the art methods and equipment and a degree of conservatism deemed proper as of this report date. It is not warranted that such data cannot be superseded by future environmental or technical developments.

This lead-based paint survey is not intended to be the sole basis of lead paint removal bids. Confirmation of specific lead-based paint and volumes should be conducted by prospective removal contractors prior to accepting removal bids. This report is provided for the exclusive use of the client noted on the cover page and is subject to the terms and conditions in the applicable contract between the client and Krazan. The client is the only party to whom Krazan has explained the risks involved and has been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from the client's point of view. Any third-party use of this report, including use by Client's lender, prospective purchaser, or

lessee will be subject to the terms and conditions governing the contractual work in the contract between the client and Krazan. The unauthorized use of, release of, or reliance on the information contained in this report, without the expressed written consent of Krazan & Associates, Inc., is strictly prohibited and will be without risk or liability to Krazan.

If you have any questions or if we may be of further assistance, please do not hesitate to contact our office at (559) 348-2200.

Respectfully submitted,
KRAZAN & ASSOCIATES, INC.

NOTE: Lead-based paint is defined as paint containing 0.5% or greater lead by weight. NC = Not calculated

Lead containing paint is defined as paint containing greater than 0.009% lead by weight.

Bold text items are considered Lead-based paint Italic text items are considered Lead-containing paint

The Reporting Limit (RL) for samples prepared by ASTM E-1979-17 is 10.0 ug Total Pb. The RL for samples prepared by EPA SW846 3050B is 25.0 ug Total Pb. Paint chip area and results are calculated based on area measurements determined by the client. All internal quality control requirements associated with this batch were met, unless otherwise noted.

The condition of the samples analyzed was acceptable upon receipt per laboratory protocol unless otherwise noted on this report. Results represent the analysis of samples submitted by the client. Sample location, description, area, etc., was provided by the client. Results reported above in mg/cm3 are calculated based on area supplied by client. This report shall not be reproduced except in full, without the written consent of Environmental Hazards Services, L.L.C.
