Re: Phase I Environmental Site Assessment of the Proposed Sam's Club Development Located on Amargosa Road, Hesperia, California

Kimley-Horn has completed a Phase I Environmental Site Assessment (ESA) of the above referenced property. This Phase I ESA was conducted in accordance with (1) the United States Environmental Protection Agency (U.S. EPA) Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and (2) guidelines established by the American Society for Testingand Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process / Designation E1527-21* (ASTM Standard Practice E1527-21). Other than expressly stated in Section 1.4 herein, this report has been prepared in full compliance with "Walmart's Environmental Due Diligence Policy" dated September 1, 2023.

The Phase I ESA for the above referenced property represents the product of Kimley-Horn's professional expertise and judgment in the environmental consulting industry. This report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entities: Kimley-Horn; Fennemore Craig P.C.; and Sam's West, Inc., a Delaware Corporation, Walmart Inc., a Delaware Corporation, and its successors, assigns, affiliates, and subsidiaries.

If you have any questions related to this report, please do not hesitate to contact our office at 714-705-1340 or jennifer.steen@kimley-horn.com.

Sincerely,

Kimley-Horn and Associates, Inc.

Principal Engineer

EXECUTIVE SUMMARY

Table A - Critical Dates	
Report Issuance Date	July 12, 2024
Date of Interview of Past and Present Owners and Occupants Identified in Section 10 of ASTM E1527-05	N/A
Date of Records Review/Search	June 28, 2024
Date of Recorded Environmental Cleanup Lien Search	June 28, 2024
Date of Visual Inspection of Subject and Adjoining Properties	June 14, 2024
Earliest Date of Interviews, Lien Search, Record Reviews, and Inspections	June 14, 2024
Report Viability Date	December 11, 2024

Kimley-Horn was retained to conduct a Phase I Environmental Site Assessment (ESA) of the Proposed Sam's Club Development at APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07 located on Amargosa Road, Hesperia, San Bernardino County, California (hereafter referred to as the "Subject Property"). This Phase I ESA was conducted in accordance with (1) the United States Environmental Protection Agency (U.S. EPA) Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process / Designation E1527-21* (ASTM Standard Practice E1527-21). Other than expressly stated in Section 1.4 herein, this report has been prepared in full compliance with "Walmart's Environmental Due Diligence Policy" dated September 1, 2023.

The Phase I ESA for the Subject Property represents the product of Kimley-Horn's professional expertise and judgment in the environmental consulting industry. This report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entities: Kimley-Horn; Fennemore Craig P.C.; and Sam's West, Inc., a Delaware Corporation, and Walmart, Inc., a Delaware Corporation, and its successors, assigns, affiliates, and subsidiaries.

Table B - Subject Property Description	
Item	**Comments**
Number of Parcels and Acreage	The Subject Property consists of four parcels (APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07) and approximately 27.25 acres.
Number of Building(s) and	There are no buildings within the Subject Property.

Square Footage	
Current Property Use	Vacant, native desert land.

Reasonably ascertainable records reviewed as part of this Phase I ESA documented the use of the property back to 1953; however, historic information prior to 1953 was not available. This constitutes as a data failure, which is a type of data gap. However, the data gap is not considered significant because other information and/or personal experience did not raise reasonable concerns involving the data gap. Standard and other historical sources were able to document that the first developed use of the Subject Property occurred in 1994 with the development of Amargosa Road which runs through the Subject Property. The remaining portions of the Subject Property are currently and have historically been undeveloped, native desert land since at least 1953.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Proposed Sam's Club at APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07 located on Amargosa Road, Hesperia, San Bernardino County, California, near the California Aqueduct and Interstate 15, located in Hesperia, San Bernardino County, CA 92345 (APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07), the property. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of recognized environmental conditions connected with the Subject property.

Recognized Environmental Conditions

A *Recognized Environmental Condition (REC)*, as defined in the ASTM Standard Practice, is: (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. This assessment has not identified any RECs connected with the Subject Property.

Historical Recognized Environmental Conditions

An *Historical Recognized Environmental Condition* (HREC), as defined in the ASTM Standard Practice, is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed without need for or use of institutional or engineering controls, and therefore no longer represents a REC. This assessment has not identified any HRECs in association with the Subject Property.

Vapor Encroachment Conditions

A *Vapor Encroachment Condition (VEC)*, as defined in ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (E2600-22), is the presence or likely presence of COC vapors in the vadose zone of the Subject Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Subject Property. This assessment has not

identified areas of potential concern associated with vapor intrusion in connection with the Subject Property during the course of this ESA.

Controlled Recognized Environmental Conditions

A *Controlled Recognized Environmental Condition* (CREC), as defined in the ASTM Standard Practice, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk- based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). This assessment has not identified any CRECs in association with the Subject Property.

Business Environmental Risk Considerations

A *Business Environmental Risk* (BER), as defined in the ASTM Standard Practice, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate. This assessment has not identified potential BERs in connection with the Subject Property during the course of this ESA.

1.0 INTRODUCTION

This Phase I ESA was conducted in accordance with (1) the United States Environmental Protection Agency (U.S. EPA) Standards and Practices for All Appropriate Inquiries {(AAI), 40 CFR Part 312} and (2) guidelines established by the American Society for Testing and Materials (ASTM) in the *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process / Designation E1527-21* (ASTM Standard Practice E1527-21). Other than expressly stated in Section 1.4 herein, this report has been prepared in full compliance with "Walmart's Environmental Due Diligence Policy" ("EDDP") dated September 1, 2023.

The Phase I ESA for the above referenced property represents the product of Kimley-Horn's professional expertise and judgment in the environmental consulting industry. This report is certified to, can be relied upon by, and has been prepared for the exclusive use of the following entities: Kimley-Horn; Fennemore Craig P.C.; and Sam's West, Inc., a Delaware Corporation, and Walmart Inc., a Delaware Corporation, and its respective successors, assigns, affiliates, and subsidiaries.

Kimley-Horn acknowledges that these parties may rely on the contents and conclusions presented in this report. Unless stated otherwise in writing, Kimley-Horn makes no other warranty, representation, or extension of reliance upon the findings of this report to any other entity or third party.

1.1 Property Overview

Table 1.1 - Property Overview	
Subject Property Location/Address	The Subject Property is located at Amargosa Road, near the California Aqueduct and Interstate 15, Hesperia, San Bernardino County, CA 92345.
Number of Parcels and Acreage	The Subject Property consists of approximately 27.25 acres and defined by four parcels (APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07).
Number of Building(s) and Square Footage	There are no buildings in the Subject Property.
Current Property Use	The Subject Property is currently vacant, undeveloped desert land.
Current Zoning	RC – Regional Commercial

The Subject Property location is depicted on **Figure 1**, Site Location Map. A diagram of the Subject Property and adjoining properties is included as **Figure 2**, Generalized Diagram of the Subject Property and Surrounding Area. Photographs taken during the site reconnaissance are included in **Appendix A**.

1.2 Purpose and Scope of Services

The purpose of this Phase I ESA was to evaluate the current and historical conditions of the Subject Property in an effort to identify *Recognized Environmental Conditions* (RECs), *Controlled Recognized Environmental Conditions* (CRECs), and *Historical Recognized Environmental Conditions* (HRECs) in connection with the Subject Property. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, CRECs, and HRECs in connection with the Subject Property.

1.3 Significant Assumptions

Pursuant to ASTM Standard Practice E1527-21, Kimley-Horn assumes that the information provided by all sources and parties, including the User, is accurate and complete, except where obvious inconsistencies or inaccuracies were identified.

1.4 Limitations, Deviations, and Special Terms and Conditions

There are no deviations from the ASTM Standard. Non-ASTM Scope considerations are included in Section 11.0. Any physical limitations identified during the completion of this report are referenced in Section 7.0.

Due to changing environmental regulatory conditions and potential on-site or adjacent activities occurring after this assessment, the client may not presume the continuing applicability to the Subject Property of the conclusions in this assessment after the report's Viability Date, per the Walmart EDDP, dated September 1, 2023.

2.0 USER PROVIDED INFORMATION

The ASTM Standard defines a User as "the party seeking to use Practice E1527 to complete an environmental site assessment. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager." The User has specific obligations for completing a successful application of this practice as outlined in Section 6 of the ASTM Standard Practice E1527-21. Walmart is the "User" of this report.

2.1 User Questionnaire

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield Amendments") (if desired), the User must provide certain information (if available) identified in the User Questionnaire to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

The following responses were provided by the User. A copy of the completed User Questionnaire is included in **Appendix B**.

Table 2.1 - User Provided Information

Question	Response
Name of Preparer and User Entity	Kimley-Horn, Walmart Real Estate Business
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?	No
Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or locallaw?	No
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the	Yes

Table 2.1 - User Provided Information	
Question	**Response**
property?	
Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example, as user:	No
Do you know the past uses of the property?	No
Do you know of specific chemicals that are present or once were present at the property?	No
Do you know of spills or other chemical releases that have taken place at the property?	No
Do you know of any environmental cleanups that have taken place at the property?	No
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

2.2 Recorded Land Title Records

A Preliminary Title Report (PTR) for 0405-062-72 and 0405-062-73, prepared by American Land Title Association and dated September 5, 2023, was provided to Kimley-Horn. Ownership of these parcels is vested in Hesperia Housing Authority, a public entity. Easements in favor of Getty Oil, Texaco Producing Inc., and Chevron U.S.A. Inc., were identified in the PTR. The easements appear to be for underground telephone, telegraph, and communication systems and do not appear related to oil drilling, storage, or production.

A separate PTR for parcels 3064-481-06 and 3064-481-07, prepared by American Land Title Association and dated April 26, 2024, was provided to Kimley-Horn. Ownership of these parcels is vested in KJ Properties, a California General Partnership.

Kimley-Horn's review of the title documents did not reveal any prior uses of the Subject Property.

An environmental lien search was performed by EDR (**Appendix C**), and no environmental liens were identified. Additionally, Kimley-Horn did not identify any activity or use limitations related to during the review of the title documentation and no additional relevant information was included in the title search documents.

A copy of the title documentation provided to Kimley-Horn is not included with this report (except for environmental lien and/or recorded activity and use restrictions) but can be provided upon request.

2.3 Reason for Performing this Phase I ESA

According to the User, this Phase I ESA was conducted as part of environmental due diligence related to purchase and development of the Subject Property**.**

3.0 PHYSICAL SETTING

Table 3.1 - Physical Setting		
PHYSICAL SETTING INFORMATION FOR THE SUBJECT PROPERTY AND SURROUNDING AREA		**SOURCE**
Topography Refer to Figure 1 for an excerpt of the Topographic Map		
Site Elevation	Approximately 3,484 feet above mean sea level	United States Geological Survey Division (U.S.G.S.) 7.5-Minute Topographic Map Baldy Mesa and Hesperia, 2018., Accessed July 1, 2024.
Topographic Gradient	The Subject Property slopes generally to the north to northeast.	
Closest Surface Water	The closest surface water is the California Aqueduct. There are other unnamed drainages in the vicinity of the Subject Property.	
General Soil Characteristics Refer to Appendix D for a copy of the soil survey map and soil type descriptions		
Soil Type	112 – Cajon Sand, 0 to 2 percent slopes. Soils are characterized by a parent material of alluvium derived from granite sources. The typical profile features sand, gravelly sand, and stratified sand to loamy fine sand. The depth to restrictive feature and depth to water table is more than 80 inches. The soils are somewhat excessively drained and non-hydric. The frequency of flooding and ponding is none. Soils are part of Hydrologic Group A. 134 – Hesperia loamy fine sand, 2 to 5 percent slopes. Soils are characterized by a parent material of alluvium derived from granite sources. The typical profile features loamy fine sand and sandy loam. The depth to restrictive feature and depth to water table is more than 80 inches. The soils are well-drained and non-hydric. The frequency of flooding and ponding is none. Soils are part of Hydrologic Group A	United States Department of Agriculture, Soil Survey of San Bernardino County, California, accessed July 11,2024.
Description		
Area Specific Geology/Hydrogeology Characteristics:		
Geology	The Subject Property is situated in the Basin and Range physiographic province of California. Geology occurring within the site vicinity consists of alluvial surficial sediments (Qa) of the	Dibblee, T.W., 1965, Geologic map of the 15-minute Hesperia quadrangle, San Bernardino County, California, U.S.

	Quaternary System and Series during the Cenozoic Era. There are no known faults underlying the Subject Property.	Geological Survey, Open-File Report OF-65-43, 1:62
Hydrogeology	Groundwater under the Subject Property was measured by EDR. EDR conducted a 1.25-mile search radius and did not find any site-specific hydrogeological data. The FEMA Flood Plain Panel for the Subject Property is 06071C6475F.	
Oil and Gas Wells:		
Current Oil and Gas Wells on Subject Property	None	California Department of Conservation – CalGEM Well Finder, Accessed on July 1, 2024
Historical Oil and Gas Wells On Subject Property	None	

4.0 RECORDS REVIEW

Kimley-Horn reviewed reasonably ascertainable records to identify obvious uses of the Subject Property from the present, back to the property's obvious first developed use, or back to 1940, whichever is earlier. Reasonably ascertainable records reviewed as part of this Phase I ESA documented the use of the property back to 1953. This constitutes as a data failure, which is a type of data gap. However, the data gap is not considered significant because other information and/or personal experience did not raise reasonable concerns involving the data gap. Reasonably ascertainable records reviewed as part of this Phase I ESA documented the first use of the property back to 1994 with the development of Amargosa Road which runs through the Subject Property. The remaining portions of the Subject Property are currently and have historically been undeveloped, native desert land since at least 1953.

4.1 Aerial Photographs and Sanborn Maps

Kimley-Horn reviewed reasonably ascertainable aerial photographs for the Subject Property area. The sources and years reviewed are identified in the table below. Relevant aerial photographs are included in **Appendix E**.

Kimley-Horn attempted to review reasonably ascertainable Sanborn Fire Insurance Maps for the Subject Property. The Certified Sanborn Map Report dated June 28,2024, indicates Sanborn Fire Insurance Maps are not available for the Subject Property **Appendix F.**

The following table summarizes the sources reviewed and the information obtained about the Subject Property from these sources. Information obtained about the adjoining properties from these sources is summarized in Section 8.0.

Table 4.1 - Aerial Summary for the Subject Property

Year and Source	Summary of Information
1953 EDR	Subject Property north of Amargosa Road: The Subject Property and the surrounding properties are undeveloped, native desert land. Subject Property south of Amargosa Road: The Subject Property and the surrounding properties are undeveloped, native desert land. There are paved roadways to the east and south of the Subject Property. The paved roadway to the east features two lanes and appears to be Interstate I-15. There is a residential home south of the Subject Property.
1959 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property and surrounding properties were observed since the 1953 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property and surrounding properties were observed since the 1953 aerial photograph. Interstate I-15 appears to have expanded with an additional interchange.

1968 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property and surrounding properties were observed since the 1959 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property and surrounding properties were observed since the 1959 aerial photograph. Interstate I-15 continues to expand with additional connector roads and interchanges immediately south of the Subject Property. There is also additional grading to the north and west of the Subject Property, likely associated with the California Aqueduct development.
1978 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 1968 aerial photograph. South Boundary of Subject Property: No significant changes to the Subject Property were observed since the 1968 aerial photograph. Between 1968 and 1978 the California Aqueduct was complete.
1985 EDR	Subject Property north of Amargosa Road: A dirt pathway bisects the Subject Property along the northern boundary. Subject Property south of Amargosa Road: No significant changes to the Subject Property were observed since the 1978 aerial photograph. There are unpaved roads to the west and north of the Subject Property. There appears to be commercial buildings and associated pavement to the southeast of the Subject Property and residential neighborhood development to the west.
1994 EDR	Subject Property north of Amargosa Road: There is a paved roadway that runs east to west connecting to I-15, bisecting the Subject Property from north and south. Subject Property south of Amargosa Road: There is a paved roadway that runs east to west connecting to I-15, bisecting the Subject Property from north and south. Residential development continues to the west. There appears to be a water tank north of the Subject Property. There are additional commercial buildings to the south. Additionally Amargosa Road has been paved.
2002 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 1994 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property were observed since the 1994 aerial photograph. There are additional residential homes and neighborhood roads to the west. There are additional commercial buildings with associated surface parking and asphalt pavement to the west and south. There is an industrial facility to the north with associated driveways and truck yards.
2005 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 2002 aerial photograph. Subject Property south of Amargosa Road: There appears to be commercial development in

	the southern boundary of the Subject Property. A few connectors of the I-15 are removed and replaced with grading, likely to shift the roads due to recent surrounding development.
2009 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 2005 aerial photograph. Subject Property south of Amargosa Road: The commercial buildings have been demolished. There are unpaved roads to the north, west, and east of the Subject Property. Commercial development, including commercial buildings, surface parking lot, and grading, continues south of the Subject Property.
2012 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 2009 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property were observed since the 2009 aerial photograph. There are additional commercial buildings to the southwest.
2016 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 2012 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property were observed since the 2012 aerial photograph.
2020 EDR	Subject Property north of Amargosa Road: No significant changes to the Subject Property were observed since the 2012 aerial photograph. Subject Property south of Amargosa Road: No significant changes to the Subject Property were observed since the 2012 aerial photograph.

RECs were not identified as a result of the review of the available aerial photographs.

4.2 Local Street Directories

The Subject Property is currently and has historically been undeveloped, native desert land with the exception of Amargosa Road running through the Subject Property. A city directory abstract for the Subject Property was requested through EDR (**see Appendix G**). Amargosa Road was used for the city directories search. While the Subject Property does not have a specific address, target street listings for Amargosa Road were identified, starting in 1964. Listings associated with Amargosa Road included Moradi Family Trust, Really Living Home Store, Inc., Furniture Dude, Heilig Meyers Furniture Company, Statewide Mini Storage, Desert View Memorial Park, and names associated with residential addresses. Based on aerial imagery, it is unlikely that any of these addresses were located at the Subject Property. Kimley-Horn reviewed listings for adjoining properties and determined that they are not environmental concerns of the Subject Property. Information from the listings reviewed is included in Section 8.0.

4.3 Assessing Department

Reasonably ascertainable assessment information provided by the San Bernardino County Assessor-Recorder-County Clerk. Assessing records document the owner of the Subject Property to be the Hesperia Housing Authority (APN: 0405-062-72 and 0405-062-73) and KJ Properties (APN: 3064-481-06 and 3064-481-07). Copies of available assessment records for the Subject Property and the current legal description are included in **Appendix H.**

4.4 Building Department

Kimley-Horn submitted a FOIA request (#W007613-070124) to the City of Hesperia Building and Safety Department to view building records associated with the Subject Property. The City of Hesperia Building and Safety Department reviewed their records and did not find any records pertaining to the Subject Property (**Appendix I**).

Furthermore, a Building Permit Record Search was conducted by EDR. No records associated with the Subject Property were found (**Appendix J**).

4.5 Fire Department

Kimley-Horn submitted a FOIA request to the San Bernardino Fire Protection District to review Fire Department records for the Subject Property. The Fire Department responded via email indicating that no files associated with the Subject Property were found (**Appendix I**).

4.6 Health Department

Kimley-Horn submitted a FOIA request to the San Bernardino County Health Department to review records for the Subject Property. Kimley-Horn did receive a response within the time constraints of this report. The San Bernardino County Health Department reviewed their records and did not find any records pertaining to the Subject Property **(Appendix I).**

4.7 Utilities

4.7.1 Municipal Water/Water Wells

The Subject Property is undeveloped with no buildings. Kimley-Horn was unable to determine when municipal water was first available in the area of the Subject Property; however, nearby commercial development is served by municipal water and sewer services.

4.7.2 Sanitary Sewer/Septic System

The Subject Property is undeveloped with no buildings. Kimley-Horn was unable to determine when municipal sewer was first available in the area of the Subject Property. Since the Subject Property has been undeveloped, native desert land with the exception of Amargosa Road, and no structures were observed on historical aerials, there was likely no connection to municipal sewer, nor is it likely a septic tank was located on the Subject Property.

4.8 Underground Storage Tank (UST) Systems

Review of reasonably ascertainable standard and other historical sources, and site observations, have not identified the current and historical presence of USTs on the Subject Property. Specifically, no records of USTs were identified though review of reasonably ascertainable records and Kimley-Horn did not observe any evidence of USTs (i.e. fill ports, vent pipes, etc.) during the site reconnaissance.

4.8.1 Heat Source

The Subject Property is undeveloped with no buildings. No documentation of fuel oil use was identified during review of reasonably ascertainable records and no visual evidence of fuel oil use was identified during the site reconnaissance. If a fuel oil UST is discovered in the future and/or evidence of a release of historical fuel oil is identified, further evaluation may be necessary.

4.9 Previous Environmental Reports

In October 2023, Kimley-Horn conducted a Phase I Environmental Site Assessment which included the portion of the Subject Property north of Amargosa Road and portions of the Subject Property south of Amargosa Road. The October 2023 ESA found no evidence of recognized environmental conditions connected with the Subject Property. The October 2023 Phase I ESA can be made available upon request.

4.10 Environmental Liens, Activity and Use Limitations, and Government Institutional and Engineering Controls

Kimley-Horn has not identified any record of environmental liens, activity and use limitations, or institutional controls or engineering controls associated with the Subject Property through review of reasonable ascertainable records.

5.0 INTERVIEWS

The objective of completing interviews with knowledgeable site contacts is to obtain information about the uses and physical characteristics of the property. In general, interviewees supported the information reviewed from other historical sources (i.e. aerial photos, city records, etc.). Sam's Club asked Kimley-Horn to complete the Phase I ESA without interviewing the property owner. This constitutes a data gap, however, since the Subject Property has been undeveloped desert land since at least 1953, the lack of interviews is not considered significant.

Table 5.1 Summary of State and/or Local Agency Inquires

Agency Contacted/	Contact Method/Date	Response
San Bernardino County Fire Protection District	Emailed 07/01/2024	Kimley-Horn submitted an FOIA request to the San Bernardino Fire Protection District. Kimley-Horn did not receive a response within the time constraints of this report.
San Bernardino County Fire Protection District – Hazardous Section (CUPA)	Emailed 07/01/2024	Kimley-Horn submitted an FOIA request to San Bernardino County Fire Protection District – Hazardous Section. On July 8, 2024, county staff responded that the Hazardous Section has no records responsive to the request.
San Bernardino County Assessors	Online Database 07/01/2024	Kimley-Horn reviewed records on the San Bernardino County Assessor website to obtain ownership information for the Subject Properties.
City of Hesperia – Building Department	Online Portal 07/01/2024	Kimley-Horn submitted an FOIA request to review building records for the Subject Property. Kimley-Horn did not receive a response within the time constraints of this report.
Regional Water Quality Control Board (RWQCB)	Online Database review 6/13/2024	Kimley-Horn reviewed records on the RWQCB website, Geotracker to review potential for environmental cases on or surrounding the Subject Property. At the time of reporting no cases or UST records were determined for the Subject Property.
Department of Toxic Substance Control (DTSC)	Online Database review 6/13/2024	Kimley-Horn reviewed records on the DTSC website, Envirostor to review potential for environmental cases on or surrounding the Subject Property. At the time of reporting no case records were determined for the Subject Property.

6.0 SUMMARY OF HISTORICAL USE

Standard and other historical sources were able to document that the first developed use of the Subject Property occurred in 1994 with the development of Amargosa Road which runs through the Subject Property. In 2005, there appeared to be development of commercial building in the southern boundary of the Subject Property which was demolished by 2009. The remaining portions of the Subject Property are currently and have historically been undeveloped, native desert land since at least 1953.

7.0 SUBJECT PROPERTY RECONNAISSANCE

Table 7.1 - Reconnaissance Information	
EP Field Personnel:	Jennifer Steen
Site Reconnaissance Date:	June 14, 2024
Weather Conditions:	Clear skies, breezy. Temperature around 95°F
Escort:	Kimley-Horn was not escorted during the site reconnaissance
Limitations:	Observations limited by uneven terrain and vegetation. Kimley-Horn staff used available paths along the perimeter of the Subject Property to observe current conditions.

7.1 Subject Property Observations

The Subject Property consists of undeveloped land without buildings or other improvements. Native desert vegetation was observed throughout the subject property, including Joshua Trees, grasses, and shrubs. The California Aqueduct borders the northern portion of the Subject Property.

North of Amargosa Road, there is an unpaved dirt road along the western and northern boundaries, and along portions of the eastern and southern boundaries. At the terminus of the western road, there is a concrete and rock drainage structure used to divert stormwater. Trash and debris were observed within the limits of the Subject Property.

Review of reasonably ascertainable standard and other historical sources, and site observations, have not identified the potential presence of hazardous substances or petroleum that could result in air quality issues in the future building.

The following table summarizes the site observations. Affirmative responses are discussed in more detail following the table.

Table 7.2 - Subject Property Observations		
Category	**Feature**	**Observed**
Interior Equipment	Elevators	No
	Air Compressors	No
	Incinerators	No

Table 7.2 - Subject Property Observations		
Category	**Feature**	**Observed**
	Waste Treatment Systems	No
	Presses/Stamping Equipment	No
	Press Pits	No
	Hydraulic Lifts or In-Ground hoists	No
	Paint Booth	No
	Plating Tanks	No
	Lathes, Screw Machines, etc.	No
Aboveground Chemical or Other Waste Storage or Waste Streams	Aboveground Storage Tanks (ASTs)	No
	Drums, Barrels and/or Containers > 5 gallons	No
	Chip Hoppers	No
	Hazardous or Petroleum Waste Streams	No
Underground Chemical or Waste Storage, Drainage, or Collection Systems	Underground Storage Tanks (USTs)	No
	Fuel Dispensers	No
	Sumps or Cisterns	No
	Dry Wells	No
	Oil/Water Separators	No
	Floor Drains, Trench Drains, etc.	No
	Pipeline Markers	No
Exterior Observations	Stressed Vegetation	No
	Stained Soil or Pavement	No
	Pad- or Pole-Mounted Transformers and/or Capacitors	No
	Soil Piles of Unknown Origin	No

Table 7.2 - Subject Property Observations		
Category	**Feature**	**Observed**
	Exterior Dumpsters with Staining	No
	Leachate or Other Waste Seeps	No
	Trash, Debris, and/or Other Waste Materials	Yes
	Uncontrolled Dumping or Disposal Areas	No
	Surface Water Discoloration, Sheen, or Free Product	No
	Strong, Pungent, or Noxious Odors	No
	Storm Water Retention or Detention Ponds	No
	Pits, Ponds, Lagoons	No

*Refer to Section 5.0 for additional site observations made by a representative of CEC, if any.

7.1.1 Current Operations

The Subject Property is undeveloped and therefore there are no current business operations.

8.0 ADJOINING PROPERTIES

The following paragraphs provide information about the adjoining properties obtained during the site reconnaissance and through review of reasonably ascertainable information.

8.1 North Adjoining Properties

The Subject Property is bound to the north by the California Aqueduct. Kimley-Horn has not identified this property as a REC.

8.2 East Adjoining Properties

The Subject Property is bound to the east by Amargosa Road. Interstate 15 is beyond Amargosa Road. Kimley-Horn has not identified this property as a REC.

8.3 South Adjoining Property

The northern section of the Subject Property is bound to the south by Amargosa Road. The southern section of the Subject Property is bound to the south by the Interstate 15 Southbound off-ramp to Main Street. Kimley-Horn has not identified this property has a REC.

8.4 West Adjoining Property

The Subject Property is bound to the west by an unnamed dirt road. The property west of the dirt road is undeveloped, native desert. Kimley-Horn has not identified this property has a REC.

9.0 REGULATORY RECORDS REVIEW

Kimley-Horn retained EDR to provide current regulatory database information compiled by a variety of federal and state regulatory agencies. A copy of the complete database is included in **Appendix K**. The following information was obtained.

Table 9.1 - Regulatory Records Review

Type	Regulatory Agency Database	Approximate Minimum Search Distance (AMSD)	Number of Sites within AMSD
Federal	National Priority List (NPL) Sites	1 mile	0
Federal	Delisted National Priority List (DNPL) Sites	½ mile	0
Federal	Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) Sites	½ mile	0
Federal	CERCLIS No Further Remediation Action Planned (NFRAP) Sites	Subject Property and adjoining properties	0
Federal	Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) Sites	1 mile	0
Federal	RCRA non-CORRACTS Treatment, Storage, or Disposal (TSD) Sites	½ mile	0
Federal	RCRA Large Quantity Generators (LQG) Sites	Subject Property and adjoining properties	1
Federal	RCRA Small Quantity Generators (SQG) Sites	Subject Property and adjoining properties	1
Federal	RCRA Conditionally Exempt Small Quantity Generators (CESQG) Sites	Subject Property and adjoining properties	2
Federal	RCRA Non-Generators (NON-GEN) Sites	Subject Property and adjoining properties	17
Federal	US Brownfield Sites	½ mile	0
Federal	Institutional Control/Engineering Control Registries	Subject Property	0
Federal	Environmental Response and Notification System (ERNS)	Subject Property	0
State &	Hazardous Waste Sites (HWS) (equivalents to NPL and	1 mile	0

Table 9.1 - Regulatory Records Review			
Type	**Regulatory Agency Database**	**Approximate Minimum Search Distance (AMSD)**	**Number of Sites within AMSD**
Tribal	CERCLIS)		
State & Tribal	Delisted Hazardous Waste Sites (HWS)	1 mile	0
State & Tribal	Solid Waste Facilities/Landfill Sites (SWLF)	½ mile	0
State & Tribal	Leaking Underground Storage Tank (LUST) Sites	½ mile	1
State & Tribal	Registered Underground Storage Tank (UST) Sites	Subject Property and adjoining properties	10
State & Tribal	Brownfield Sites	½ mile	0
Either	Unmappable Database Listings (a.k.a. Orphan Sites)	Database-dependent	2

9.1 Subject Property and Occupant Listings

The Subject Property is not identified in the reference databases.

9.2 Adjoining and Nearby Sites

Kimley-Horn's review of the referenced databases also considered the potential or likelihood of contamination from adjoining and nearby sites. To evaluate which of the adjoining and nearby sites identified in the regulatory database report present an environmental risk to the Subject Property, Kimley-Horn considered the following criteria:

- The type of database on which the site is identified.
- The topographic position of the identified site relative to the Subject Property.
- The direction and distance of the identified site from the Subject Property.
- Local soil conditions in the Subject Property area.
- The known or inferred groundwater flow direction in the Subject Property area.
- The status of the respective regulatory agency-required investigation(s) of the identified site, if any.

- Surface and subsurface obstructions and diversions (e.g., buildings, roads, sewer systems, utility service lines, rivers, lakes, and ditches) located between the identified site and the Subject Property.

Only those sites that are judged to present a potential environmental risk to the Subject Property and/or warrant additional clarification are further evaluated. Using the referenced criteria, and based upon a review of readily available information contained within the regulatory database report, Kimley-Horn did not identify adjoining (i.e., bordering) or nearby sites (e.g., properties within a ¼-mile radius) listed in the regulatory database report that were judged to present a potential environmental risk to the Subject Property.

10.0 VAPOR INTRUSION RISK ASSESSMENT

"Vapor intrusion" is an emerging concern associated with the potential for volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor intrusion may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab.

A Vapor Intrusion Risk Assessment (VIRA) for potential COCs was completed for the Subject Property. The purpose of the VIRA was to evaluate for the potential for a Vapor Intrusion Risk, which is the presence or likely presence of COC vapors in subsurface soils at the Subject Property caused by the release of vapors from contaminated soil or groundwater on or near the Subject Property.

The VIRA utilizes information regarding the potential presence of releases on or near the Subject Property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. No additional data was collected specifically for the purpose of the VIRA. According to the reasonably ascertainable information reviewed during this screening process, Kimley-Horn has determined that a VEC can be ruled out because a VEC does not or is not likely to exist.

11.0 BUSINESS ENVIRONMENTAL RISK CONSIDERATIONS

Although not required by the ASTM E1527-21 standard, based on standard industry practices and Walmart's Phase I ESA Requirements, Kimley-Horn has evaluated the following business environmental risk considerations for the Subject Property.

11.1 Asbestos Containing Building Materials

This section is not applicable as the Subject Property is undeveloped with no buildings.

11.2 Lead Based Paint

This section is not applicable as the Subject Property is undeveloped with no buildings.

11.3 Indoor Air Quality

Review of reasonably ascertainable standard, government record, and other historical sources, and site observations, have not identified the presence of hazardous substances or petroleum that could result in air quality issues in the existing building**.**

11.4 Lead in Drinking Water

Kimley-Horn reviewed the 2023 Drinking Water Quality Report provided by the Hesperia Water District. The report indicates that none to very little amounts of lead (0.2 public health goal (phg)) may be detected in water samples collected from properties that have lead containing pipes and/or plumbing fixtures. Since the proposed subject building has not been constructed, it is highly unlikely that lead containing pipes or plumbing fixtures will be used. Based on this, Kimley-Horn has not identified a risk of lead exposure related to the proposed plumbing.

11.5 Environmental Regulatory Compliance

Kimley-Horn did not identify any documentation or make any observations related to violations of environmental regulations at the Subject Property, and Kimley-Horn does not have reason to believe that the Subject Property is out of compliance with any environmental regulations.

11.6 Cultural, Historic, and Archeological Resources

A Cultural Resources Assessment was prepared by Kimley-Horn and Associates, Inc. for the Subject Property in June 2024. Review of cultural resources records obtained from the South Central Coastal Information Center (SCCIC), which manages the California Historical Resources Information System (CHRIS) for San Bernardino County, as well as additional review of the National and California registers indicated that portions of the Subject Property had been previously surveyed but that no resources had been identified. Additionally, the review identified that seventeen (17) cultural resources studies had been conducted within 0.5 miles of the Subject Property, which resulted in the recordation of four (4) historic-era archaeological sites. It was also noted that a portion of National Trails Highway/Route 66, which is

now a segment of Interstate 15, is located just outside of the Subject Property to the southeast. A pedestrian field survey was conducted for the Subject Parcel which resulted in the identification of one (1) historic-era archaeological site that was not recommend eligible for listing in the California Register of Historical Resources (CRHR). As such, no significant cultural, historic, or archeological resources have been identified on or near the Subject Property as a result of the records search, register reviews, and pedestrian field survey conducted for the Cultural Resources Assessment (**Appendix L).**

11.7 Wetlands and Surface Waters

Kimley-Horn reviewed the U.S. Fish and Wildlife Service National Wetland Inventory (NWI) Map, which documented no regulated wetlands on the Subject Property or adjoining properties. The closest surface water is the California Aqueduct discussed in Section 2.0. There are other unnamed drainages in the vicinity of the Subject Property.

Additionally, Kimley-Horn did not observe any potential wetlands on the Subject Property. The entire Subject Property is undeveloped (**Appendix M**).

11.8 Threatened, Endangered, and Other Protected Species

Kimley-Horn reviewed the current U.S. Fish and Wildlife Service Endangered Species online viewer (http://www.fws.gov/endangered/). According to this source, there is no critical habitat for threatened and endangered species on the Subject Property.

11.9 Wildlife Sanctuaries and Other Natural Resource Preserves

Review of reasonably ascertainable standard and other historical sources, and site observations, have not identified the presence of wildlife sanctuaries or other natural resource preserves on or near the Subject Property.

11.10 Biological Agents

Review of reasonably ascertainable standard and other historical sources, and site observations have not identified the potential presence of biological agents on or near the Subject Property.

11.11 Mold

There are no buildings within the Subject Property, therefore, mold is not a risk associated with the Subject Property**.**

11.12 Potential PCB and Mercury Containing Materials

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the United States Environmental Protection Agency (U.S. EPA). PCBs in electrical equipment are controlled by U.S. EPA regulations 40 CFR, Part 761. The ASTM Standard requires identification of electrical or hydraulic equipment, not including light ballasts, that are known to contain PCBs or likely to contain PCBs.

During the site reconnaissance Kimley-Horn did not observe any potential PCB or mercury containing equipment on the Subject Property.

11.13 Potential CFC-Containing Equipment

This section is not applicable, as the Subject Property is undeveloped with no buildings or equipment.

11.14 Tritium Exit Signage

This section is not applicable, as the Subject Property is undeveloped with no buildings or equipment.

11.15 Potential Impacts/Implications of Environmental Issues for Site Development and Construction

Kimley-Horn is unaware of any environmental issues that could impact or have implications related to the proposed development of the property.

12.0 FINDINGS, OPINIONS AND CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Proposed Sam's Club Development at APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07 located on Amargosa Road, Hesperia, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

12.1 Significant Data Gaps

Kimley-Horn did not identify or encounter any instances of significant data gaps during the course of this ESA.

12.2 Recognized Environmental Conditions (RECs)

A Recognized Environmental Condition (REC), as defined in the ASTM Standard Practice, is: (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. This assessment has not identified Recognized Environmental Conditions connected with the Subject Property.

12.3 Controlled Recognized Environmental Conditions (CREC)

A *Controlled Recognized Environmental Condition* (CREC), as defined in the ASTM Standard Practice, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk- based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). This assessment has not identified Controlled Recognized Environmental Conditions connected with the Subject Property.

12.4 Historical Recognized Environmental Conditions (HRECs)

An *Historical Recognized Environmental Condition* (HREC), as defined in the ASTM Standard Practice, is an environmental condition that in the past would have been identified as a REC, but has been adequately addressed without need for or use of institutional or engineering controls, and therefore no longer represents a REC. This assessment has not identified any HRECs in association with the Subject Property.

12.5 Vapor Encroachment Conditions (VECs)

A Vapor Encroachment Condition (VEC), as defined in ASTM Standard Guide for Vapor Encroachment

Screening on Property Involved in Real Estate Transactions (E2600-22), is the presence or likely presence of COC vapors in the vadose zone of the Subject Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Subject Property. This assessment has not identified any VECs in association with the Subject Property.

12.6 Business Environmental Risk (BERs)

A *Business Environmental Risk* (BER), as defined in the ASTM Standard Practice, is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate. This assessment has not identified any BERs in association with the Subject Property.

12.7 Statement of Compliance

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the Proposed Sam's Club Development at APNs: 0405-062-72, 0405-062-73, 3064-481-06, and 3064-481-07 located on Amargosa Road, Hesperia, San Bernardino County, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report. This assessment has revealed no evidence of RECs connected with the property except as listed in Section 12.2 of this report.

13.0 SIGNATURE(S) OF ENVIRONMENTAL PROFESSIONAL(S)

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all the appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

User Questionnaire
Walmart Inc.
Phase I Environmental Site Assessment
User Questionnaire

Site Name: Sam' New Club - Hesperia, CA

Site Location: Hesperia CA

Project/Store Number: 7716

The following questions are taken from the ASTM E1527-21 Standard Practice for Phase I Environmental Site Assessments and must be answered in order to qualify for the Landowner Liability Protections ("LLPs") under the federal Comprehensive Environmental Response Compensation and Liability Act, otherwise known as "CERCLA" or the Superfund law. ***Note that the completion of this form, by itself, does not automatically qualify one for any of the three LLPs, all of which have additional eligibility criteria. Note further that state and local government agencies will often have their own, independent source of environmental liability not covered by any of the LLPs.*** *All questions regarding the source of, defenses to, and transactional, development-related, and operational strategies for managing environmental liability should be directed to Walmart legal counsel.*

Please provide an answer to each question or attach pertinent information and identify a number for each attachment.

1. Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

☒ No ☐ Yes (Describe or attach information) Attachment No. _____

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls (e.g. engineered caps, foundations, liners, treatment methods, etc. in use to prevent contamination from migrating to surrounding areas), land use restrictions or institutional controls (e.g. administrative measures restricting groundwater use, construction, or property use) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☒ No ☐ Yes (Describe or attach information) Attachment No. _____

3. As the user of the Phase I Environmental Site Assessment, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☒No ☐Yes (Describe or attach information) Attachment No. _____

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

☐No ☒Yes (Describe or attach information) Attachment No. _____

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

☒No ☐Yes (Describe or attach information) Attachment No. _____

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the Environmental Professional to identify conditions indicative of releases or threatened releases? For example, as User,

(a) Do you know the past uses of the property? ☒No ☐Yes (Describe or attach information) Attachment No. _____

(b) Do you know of specific chemicals that are present or once were present at the property?

☒No ☐Yes (Describe or attach information) Attachment No. _____

Docusign Envelope ID: F33BE75D-2092-4757-A167-20966BBFB5DC

(c) Do you know of spills or other chemical releases that have taken place at the property?

☒No ☐Yes (Describe or attach information) Attachment No. _____

(d) Do you know of any environmental cleanups that have taken place at the property?

☒No ☐Yes (Describe or attach information) Attachment No. _____

6. As the User of the Phase I Environmental Site Assessment, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☒No ☐Yes (Describe or attach information) Attachment No. _____

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations (AULs), such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel number and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and the most current publicly available date
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GRANT DEED

FOR VALUABLE CONSIDERATION, receipt of which is hereby acknowledged, **HESPERIA COMMUNITY DEVELOPMENT COMMISSION** ("**Grantor**"), as a designated entity of the Successor Agency to the former Hesperia Community Redevelopment Agency ("**Former HCRA**"), hereby grants to **HESPERIA HOUSING AUTHORITY,** a public entity ("**Grantee**") all of its respective rights, title, and interest in real property located in the City of Hesperia, County of San Bernardino, State of California as more particularly described in **Exhibit A** attached hereto and incorporated herein by reference ("**Property**").

See attached Certificate of Acceptance

RECITALS:

A. The Former HCRA, via Resolution No. 2011-09, authorized the transfer of certain real property and real property security interests and obligations, including the Property (together "**Property Interests**"), to the City of Hesperia ("**City**"). The City, via City Council Resolution No. 2011-024, accepted the Property Interests on the same date. The Property Interests was then transferred to the City by Grant Deed recorded on December 20, 2011, Instrument No. 2011-0538069 ("**HCRA Deed**") in the Official Records of the San Bernardino County ("**Official Records**").

B. Pursuant to the conditions under the HCRA Deed, the City subsequently transferred the Property Interests to Grantor by Grant Deed recorded on December 20, 2011, Instrument No. 2011-0538912 in the Official Records ("**City Deed**").

C. Prior to its dissolution under the ABx1 26, Former HCRA borrowed from its Low and Moderate Income Housing Fund to make certain public improvements ("**Public Improvement Loans**") and tender required Supplemental Education Revenue Augmentation Fund in Fiscal Years 2009-10 & 2010-11 ("**SERAF Loan**").

D. Former HCRA executed Promissory Notes ("**Notes**") documenting the Public Improvement Loans and the SERAF Loan, all of which were secured by deeds of trust ("**Deeds of Trust**") securing the obligations which were recorded against all non-housing real property owned by the HCRA. Grantee ultimately became the holder of the debt obligations and beneficiary of the Deeds of Trust vested with all rights and powers to enforce the Deeds of Trust as well as Covenants, Conditions and Restrictions and Restrictive Use Covenants (**CC&Rs**) up to and including the removal, reconveyance or rescission, as applicable, of any or all of these instruments from record title to the Property.

E. Grantee informed the Successor Agency that it is invoking its rights under the Notes and Deeds of Trust and HHA has agreed, upon the tendering of Grant Deeds of certain real property owned by the Former HCRA, including the Property, to Grantee in lieu of payment and certain other promises, to renegotiate and restructure the remaining obligations of the Former HCRA which are payable to the HHA.

F. On May 3, 2012, the Oversight Board, via Resolution No. OB 2012-12 ("**OB Resolution**"), approved tendering of Grant Deeds of certain real property, including the Property, from the Grantor to the Grantee in lieu of payment on the Notes which was included on the July 1, 2012 – December 31, 2012 Recognized Obligation Payment Schedule II ("**ROPS II**"). The Department of Finance ("**DOF**") approved the ROPS II on May 25, 2012.

G. On the DOF-approved Housing Asset Transfer form ("**HAT**"), the debt secured by the Property was also deemed an asset of the HHA. DOF approved this transfer in writing on September 18, 2012 which listed four (4) parcels or real property (APNs 0405-042-65; 0405-062-72; 0405-062-73; & 3064-601-05). Upon approval of the HAT, the Oversight Board of the Former HCRA and the DOF retain no statutory authority or governance over the housing assets transferred to the HHA pursuant to Health & Safety Code §34176.

H. The State Controller ("**SCO**") conducted its Asset Transfer Review pursuant to Health & Safety Code §34167.5 and concluded that the Property was appropriately transferred to the Grantee.

I. The purpose of this Grant Deed is to transfer of the Property in accordance with the OB Resolution and approved by the DOF and SCO.

IN WITNESS WHEREOF, Grantor has caused this instrument to be executed on its behalf by its officers or agents hereunto as of February 25, 2015.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Contact: Jennifer Steen

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Kimley Horn & Associates, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8C98-4CE2-96A2

PO # 094507756

Project SC Hesperia V2

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8C98-4CE2-96A2

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

Orange CA 92868

RE: PUBLIC RECORDS REQUEST

Dear Rebeca Duran Lopez,

The Building and Safety department does not have any records for the parcel numbers. The Planning department has no past entitlements and no existing structures. The current zoning is Regional Commercial. This site has been vacant.. For Hazardous Waste information and HAZMAT/UST please contact the San Bernardino Hazardous Waste division at (909)386-8401 and the Public Health department at (800)782-4264. For additional questions please contact the Engineering department directly at (760)947-1711.
Sincerely,

Jessica Giber
City Clerk's Office

On 7/1/2024 4:26:22 PM, City of Hesperia Public Records Request Center wrote:

Dear Rebeca:

Thank you for submitting a request for public records to the City Clerk's Office. Your request has been received and is being processed. Your request was received in this office on 7/1/2024 and given the reference number W007613-070124 for tracking purposes. Per the California Public Records Act, the City has 10 days from the date we receive your request to review and determine if records exist and can be disclosed. Please note requests received outside of normal business hours will be considered received on the next business day. You can monitor the progress of your request at the link below and you will receive an email when your request has been completed.

Record Requested: Hi,

I am submitting a Public Records Request (please see attached) to review the below information for the

following parcels (APN: 0405-062-72-0000, 0405-062-73-0000, and 3064-481-06-0000)

This request is for a Phase I report that is part of the due diligence process. I am looking for the following information:

1. Are there any building records for the above listed parcels? Records such as well permits/records, above or underground storage tanks, etc.
2. Do you have any records of fuel or chemical storage at the site? If yes, please provide details (install, removal, size, contents, Closure Assessments, etc.).
3. Do you have any records of hazardous waste disposal at the site?
4. Are you aware of any environmental impacts at the site (chemical or petroleum spills, releases, etc.)?
5. Has an agency been called to the site for an environmental emergency? If so, which agency?
6. Do you know whether there are any groundwater use restrictions or other environmentally related activity and use restrictions at or near the site?
7. Do you know the past use of the site?
8. When were the current structures constructed? What is their approximate square-footage?
9. What is the current zoning of the site? What is the past zoning of the site?

The City does not process birth, death or marriage records. Please contact the San Bernardino County Recorder at (760) 995-8065.

The City Clerk's office is closed on Friday's. Our office hours are Monday - Thursday 7:30AM - 5:30PM.

This is to confirm that the OFM Hazardous Materials Section (HMS) has searched its records for any file(s) pertaining to the subject property, as described in your request, and finds that no records exist for the above site description(s).

Records maintained by OFM-HMS date back to mid-1980's. Records searched include:

- Facilities with hazardous waste generator permits, hazardous materials handler permits, underground storage tank permits, universal waste permits, tiered permits, EPCRA facilities, RMP facilities, Cal ARP facilities, and/or waste recycling generators, including inactive and/or out of business records, as well as non-permitted facility actions
- Logs of permits issued for the removal, installation, and/or modification of underground storage tanks
- Records and databases pertaining to illicit dumping, spill reports, release notifications, and complaints
- Incidents responded to by the hazardous materials emergency response team
- Sites undergoing remediation for contaminated soil and/or groundwater

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kimley Horn & Associates, Inc. on Jun 28, 2024.

TARGET PROPERTY

Armargosa Road
Hesperia, CA 92345

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **NO PERMITS IDENTIFIED**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

No Permits Found

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 17 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that

there is 1 UST FINDER RELEASE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

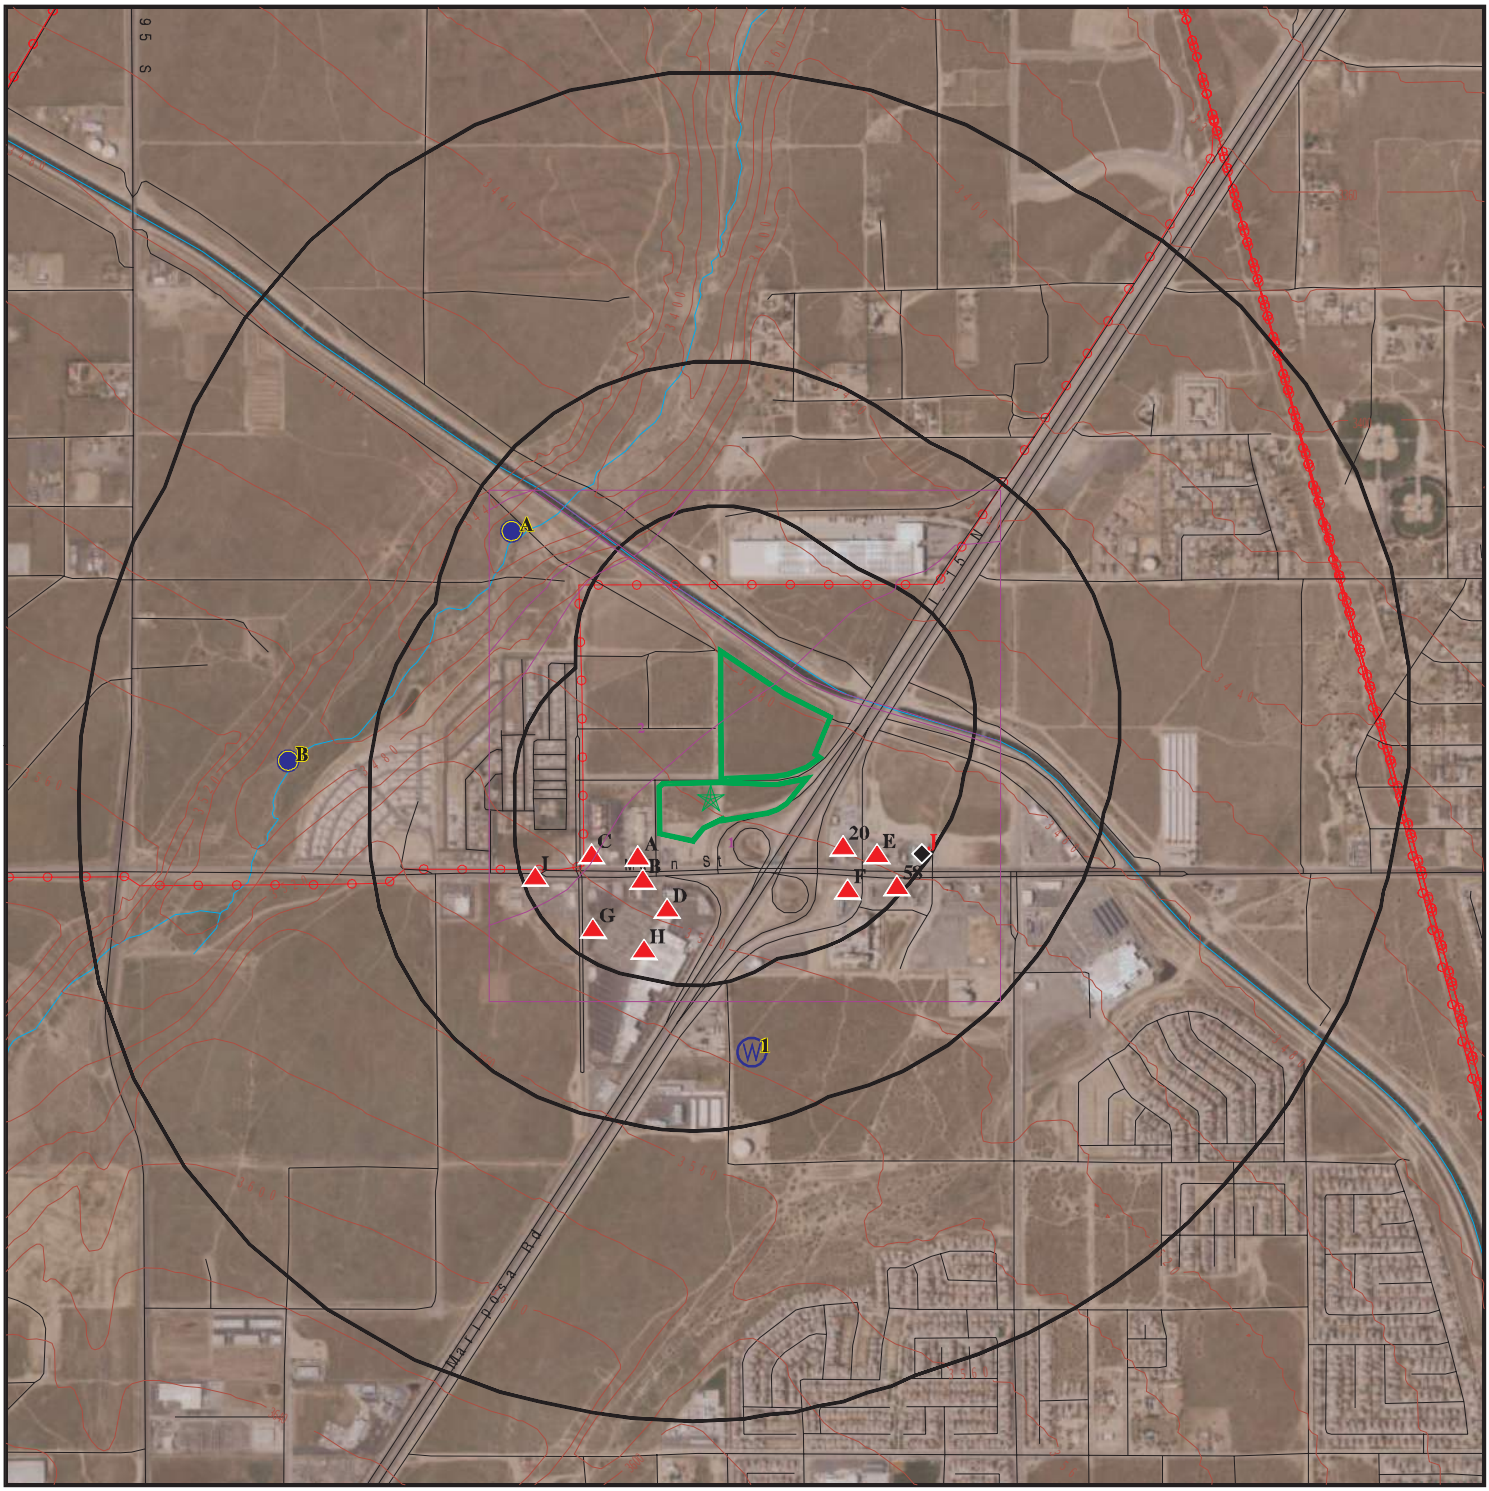

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
21ST CENTURY PROPERT	12750 MAIN ST	SW 0 - 1/8 (0.054 mi.)	A5	39
ELMS TOM ENTERPRISES	12720 MAIN ST	WSW 0 - 1/8 (0.122 mi.)	C25	227

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 2 records.

Site Name	Database(s)

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 11/30/2022. OBSERVATION: Triennial Overfill

MAIN STREET FUEL (Continued) **S106718219**

Prevention Equipment tests were due by October 31, 2021 for USTs that missed initial OPE test deadline of October 13, 2018. Triennial OPE tests were conducted on this date; however, not witnessed due to time constraint. USTs are equipped with flow restrictor and external audible visual alarms. USTs are equipped with single-wall vent line and requires 2 functional forms of Overfill Prevention Equipment. Currently when an overfill alarm is activated for one UST, additional overfill alarms for other USTs will not activate if the alarm for the first tank has not yet cleared due to Veeder Root TLS-350 panel deficiencies. This effectively eliminates overfill protection for all but one tank if multiple tanks are filled at the same time. CORRECTIVE ACTION: UST systems that only can activate external alarms when the first UST overfill condition occurs, additional actions must be taken to ensure each UST has a functional overfill prevention [Truncated]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	03-17-2015
Citation:	HSC 6.7 29291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 29291(b)
Violation Description:	Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance stored in the primary containment into the secondary containment.
Violation Notes:	Returned to compliance on 03/17/2015. SENSOR AT 91 STP FAILED WHEN TESTED. SPILL BUCKET AT 91 FILL FAILED WHEN TESTED. COMPLIANCE REQUIREMENT: SENSOR WAS RECALIBRATED AND RETESTED. SPILL BUCKET WAS REPAIRED AND RETESTED. VIOLATIONS CORRECTED.
Violation Division:	San Bernardino County Fire Department
Violation Program:	UST
Violation Source:	CERS,

Site ID:	132437
Site Name:	7-ELEVEN INC. #43084
Violation Date:	01-15-2019
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 01/15/2019. OBSERVATION: At the time of the inspection, the VR 208 sensor in the fill sump of T-1 (Regular Unleaded) did not cause the turbine to shut down when sensor dipped in water. CORRECTIVE ACTION: The technician replaced the VR 208 sensor in the fill sump of T-1 (like for like) and re-tested. Violation abated.
Violation Division:	San Bernardino County Fire Department
Violation Program:	UST
Violation Source:	CERS,

Site ID:	132437
Site Name:	7-ELEVEN INC. #43084
Violation Date:	01-15-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	Returned to compliance on 01/15/2019. OBSERVATION: At the time of the inspection, the spill buckets for T-1 (Regular Unleaded) and T-3 (Diesel) failed the hydrostatic test. CORRECTIVE ACTION: The technician replaced the drain valve in the spill bucket for T-1 (Regular Unleaded) and replaced the spill bucket (like for like) for T-3 (Diesel) and re-tested hydrostatically for 1-hour- Passed. Violation abated.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 05/16/2022. OBSERVATION: 87 drop tube was seized and couldn t be removed during test, Diesel drop tube passed with shut-off valve set at 95%, 91 drop tube failed with shut-off valve set at 96% tank capacity. CORRECTIVE ACTION: Overfill Prevention Equipment test on 87 drop tube is required. Submit test report to this Department as proof of compliance. Submit plans to replace Diesel drop tube or all failed drop tubes to this Department within 30 days.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System

SHELL SERVICE STATION (Continued) **1005415507**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U129
Waste Description:	Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)
Waste Code:	U150
Waste Description:	L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U188
Waste Description:	Phenol
Waste Code:	U200
Waste Description:	Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

TARGET CORPORATION-C/O-#T2468 (Continued) **1014465355**

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U279
Waste Description: U279

Name: 12675 MAIN STREET, INC.
Address: 12675 MAIN ST
City,State,Zip: HESPERIA, CA 92345
Site ID: 569303
CERS ID: 10851277
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 569303
Site Name: 12675 Main Street, Inc.
Violation Date: 10-28-2021
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 10/28/2021. OBSERVATION: L9 (E-85/87 annular sensor) sensor was not programmed for Sensor Out and Short alarms in PLLD shutdown. CORRECTIVE ACTION: Technician programmed L9 sensor (E-85, 87 Annual Sensor VR303) for Sensor Out and Short alarms while onsite.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

AZIZ HESPERIA GATEWAY CENTER (Continued) **S126397045**

Site ID: 569303
Site Name: 12675 Main Street, Inc.
Violation Date: 10-28-2021
Citation: HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)
Violation Description: Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.
Violation Notes: Returned to compliance on 10/28/2021. OBSERVATION: Pooled liquid observed in Diesel and 87 STP sumps. Liquid was concentrated under product and electrical penetrations in 87 STP sump, and under product and vent penetrations in Diesel STP sump. CORRECTIVE ACTION: Technicians removed liquid from Diesel and 87 STP sumps while onsite. If liquid continues to accumulate, investigate source.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 569303
Site Name: 12675 Main Street, Inc.
Violation Date: 10-25-2022
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 10/25/2022. OBSERVATION: The Veeder Root 208 sensor located in the 87 fill sump failed and the Veeder Root 304 sensor located within the secondary containment of UDC 5/6 both failed during system testing. CORRECTIVE ACTION: Both sensors were replaced, retested and certified by technician while on site.

Site ID: 18483
Site Name: CHEVRON TRAVEL CENTER
Violation Date: 05-27-2020
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 12/09/2020. OBSERVATION: Diesel fill sump brine reservoir was dry during inspection and VR304 sensor (L9) float was stuck in upright position due to debris buildup. Sensor was setup correctly to shutdown turbines in case of an alarm. Sensor was cleaned

CHEVRON TRAVEL CENTER (Continued) **S109598505**

and 3 gals of brine was added by technician while onsite. Fluid level didn t drop for about 3 hours, or before leaving the facility. L9 sensor was tested for positive shut-down. CORRECTIVE ACTION: Investigate fluid loss in Diesel Fill Sump, and submit detailed findings to this department within 30 days, or by 06/26/2020. Technician must have valid ICC service technician and manufacturer certifications and shall follow manufacturer guidelines. Submit plans to this department for approval for any modifications requiring a plan check.

Site Name: CHEVRON TRAVEL CENTER
Violation Date: 05-19-2021
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 06/18/2021. OBSERVATION: Liquid hazardous waste storage drum appeared to be over 3/4 full with an unreadable label. CORRECTIVE ACTION: Contract with a licensed hazardous waste hauler to haul contents of the Hazardous Waste storage drum from premise. Operator shall properly label Hazardous Waste storage drums when hazardous waste is added. Submit waste manifest to this department within 30 days. A list of local haulers was emailed to operator with the report.

Violation Date: 05-25-2017
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes: Returned to compliance on 05/25/2017. OBSERVED MISSING CAUSE AND CORRECTIVE ACTION FOR L-17 ALARM ON 12/13/16. CORRECTIVE ACTION: SUBMIT CAUSE AND CORRECTIVE ACTION FOR THIS ALARM WITHIN 30 DAYS. ENSURE ALL ALARMS ARE LISTED IN DO REPORTS. 5/25/17 OWNER PROVIDED COPY OF WORK ORDER FOR ALARM IN QUESTION AND EXPLAINED NEW TECHNICIAN IS BEING USED FOR REPAIRS AND LOGGING ALARMS. PSAAVEDRA

Site Name: CHEVRON TRAVEL CENTER
Violation Date: 05-30-2023
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

CHEVRON TRAVEL CENTER (Continued) **S109598505**

Violation Notes: Returned to compliance on 06/29/2023. OBSERVATION: 87l spill container failed during testing. CORRECTIVE ACTION: Repair or replace 87 spill container and submit post repair test report to this Section within 30 days.

Violation Date: 05-19-2021
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of

CHEVRON TRAVEL CENTER (Continued) **S109598505**

capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 06/11/2021. OBSERVATION: USTs are equipped with external audible and visual (AV) alarms only. When an overfill alarm is activated for one UST, additional overfill alarms for other tanks will not activate if the alarm for the first tank has not yet cleared. This effectively eliminates overfill protection for all but one tank if multiple tanks are filled at the same time. CORRECTIVE ACTION: UST systems that only can activate external alarms when the first UST overfill condition occurs, additional actions must be taken to ensure each UST has a functional overfill prevention independent of the other USTs at the facility (i.e., installing a separate alarm unit or other appropriate OPE equipment for each tank). Currently additional overfill alarms for other tanks will not activate if the alarm for the first tank has not yet cleared. Submit plans to correct current overfill prevention equipment deficiencies to this department within 30 days.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 05/22/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/25/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/31/2023

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

East Map:	50005343 HESPERIA, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

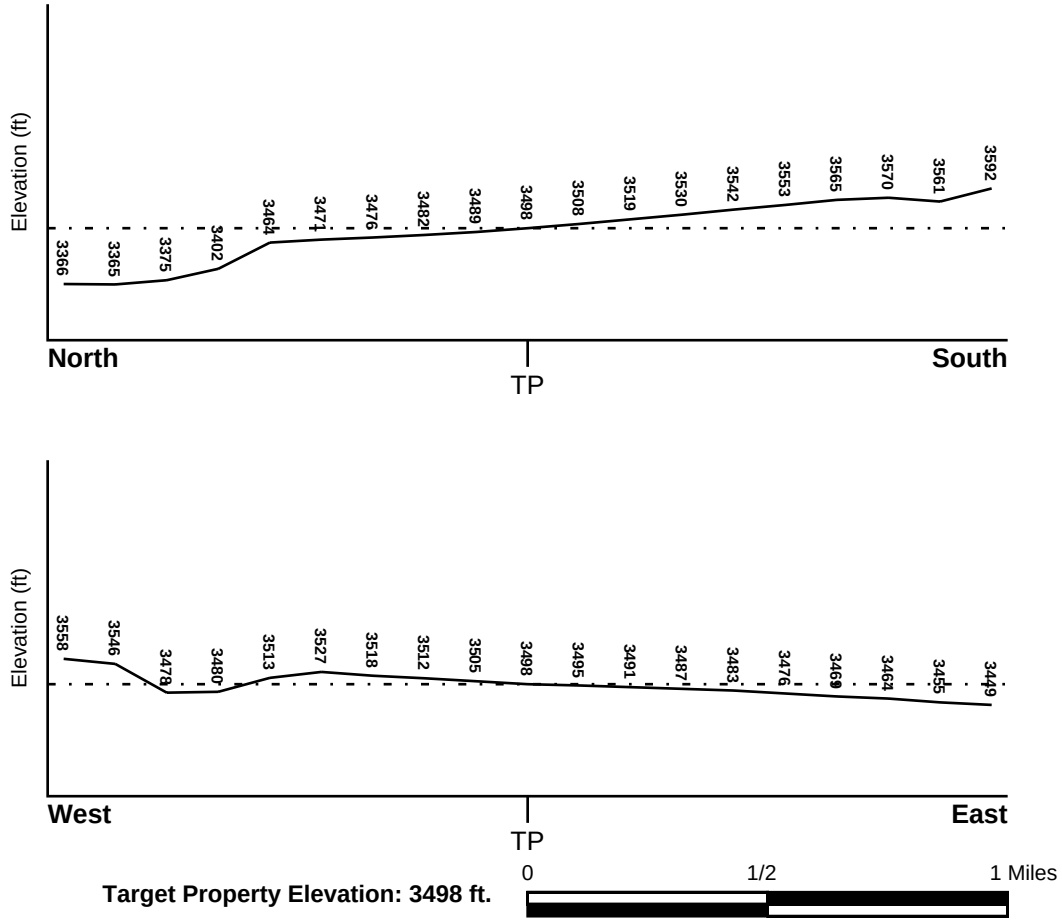

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C6475F	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HESPERIA

Soil Surface Texture:
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4
2	5 inches	59 inches		Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: CAJON

Soil Surface Texture:
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	7 inches	25 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	25 inches	44 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4
4	44 inches	59 inches		Not reported	Not reported	Max: 141 Min: 42	Max: 8.4 Min: 7.4

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Cultural Resources Assessment

Cultural Resources Assessment
for the
Sam's Club Hesperia Project,
Hesperia, San Bernardino County, California

June 4, 2024

Prepared By:

Jessica Mauck, MA, RPA

Cultural Resources Management

Kimley-Horn and Associates, Inc.

3801 University Ave, Suite 300

Riverside, CA 92501

Kimley»Horn

EXECUTIVE SUMMARY

Kimley-Horn and Associates, Inc. (KHA) is under contract to complete a Cultural Resources Assessment for the proposed Sam's Club Hesperia Project (Project) in the City of Hesperia (City), San Bernardino County, California. The proposed Project consists of the construction of a 167,664 square-foot retail building, a 12-pump fuel station, and 721 parking spaces on a 19.8-acre site along Amargosa Rd. just west of Interstate 15. The Project is subject to environmental review and consideration pursuant to the California Environmental Quality Act (CEQA) with the City of Hesperia acting as the Lead Agency. This report is intended to support the City's review and consideration of the Project and potential impacts it may have on the environment specifically as it relates to cultural resources.

A cultural resources records search was conducted through the South Central Coastal Information Center (SCCIC) for the Project area plus a half mile buffer, which noted that small portions of the Project area had been previously surveyed as a part of two (2) studies, but that no previously recorded cultural resources had been recorded within the Project area. The record search also identified an additional seventeen (17) studies that had taken place within a half mile of the Project area, which resulted in the recordation of four (4) historic-era resources. In addition to the record search, the Native American Heritage Commission (NAHC) conducted a search of the Sacred Land Files (SLF) for the Project area and its vicinity, which yielded negative results. Upon conclusion of the research effort, a pedestrian survey of the Project area was conducted by KHA archaeologists and resulted in the recordation of one cultural resource. The resource, KHA-HSC-2024-01, consists of a historic period site that contains a spare scatter of cans across the central portion of the Project area, likely associated with adjacent road development/maintenance for Route 66/Interstate 15. KHA conducted an eligibility evaluation for the resource and recommended it not eligible for listing in the California Register of Historical Resources (CRHR).

One cultural resource was identified within the Project area as a result of this study. The resource, KHA-HSC-2024-01, is recommended not eligible for listing in the CRHR and does not meet the definition of a "Historical Resource" or "Unique Archaeological Resource", as defined by CEQA. Additionally, it is unlikely that any unidentified subsurface resources are present in the Project area given the Pleistocene age of underlying geologic units and the lack of prehistoric resources recorded within the vicinity of the Project area as a result of numerous prior studies. Additionally, the most culturally significant and archaeologically rich areas of this portion of the Mojave Desert are located along the Mojave River, which is over 7.5 miles east of the Project area. However, it is recommended that mitigation measures for cultural resources be included that outline the process for treatment of any cultural resources and/or human remains inadvertently discovered during Project implementation. With these mitigation measures in place, impacts to cultural resources would be less than significant.

INTRODUCTION

Kimley-Horn and Associates, Inc. (KHA) is under contract to complete a Cultural Resources Assessment for the proposed Sam's Club Hesperia Project in the City of Hesperia (City), San Bernardino County, California. The project is subject to environmental review and consideration pursuant to the California Environmental Quality Act (CEQA) with the City of Hesperia acting as the Lead Agency. This report is intended to support the City's review and consideration of the Project and potential impacts it may have on the environment specifically as it relates to cultural resources. Efforts conducted for this study include a cultural resources records search, Sacred Lands File (SLF) search, literature review, review of cultural databases and repositories, review of historic maps and imagery, a pedestrian survey of the Project area, and evaluation of recorded cultural resources. This report presents the results of those efforts, as well as recommended mitigation measures for the Project.

PROJECT DESCRIPTION

The Project is located along Amargosa Rd. just west of Interstate 15 (I-15) and north of Main St. within the City of Hesperia, San Bernardino County, California (Figure 1). The Project area is located in a semi-urbanized area of the City and is bordered by a hotel, gas station, and fast-food restaurant to the southwest, I-15 to the east and southeast, and vacant land to the north and west (Figure 2). The proposed Project consists of the construction of a 167,664 square-foot retail building, a 12-pump fuel station, and 721 parking spaces across a 19.8-acre Project area. The Project area is within the Main Street Freeway Corridor Specific Plan (MSFC-SP) and is designated Regional Commercial (RC). The closest sensitive receptors include an RV park located approximately 1,300 feet to the west and residences located approximately 1,750 feet to the west. The Project area is currently vacant, though has evidence of grading in the southwestern-most portion of the site and contains an east/west trending paved road, a north/south trending dirt road, and several dirt two-tracks/access roads.

REGULATORY SETTING

California Environmental Quality Act

The California Environmental Quality Act (CEQA) applies to all discretionary projects undertaken or subject to approval by the state's public agencies (California Code of Regulations 14(3), § 15002(i)). Under CEQA, "A project with an effect that may cause a substantial adverse change in the significance of a historical resource is a project that may have a significant effect on the environment" (Cal. Code Regs. Tit. 14(3), § 15064.5(b)). Guidelines for Implementation of the California Environmental Quality Act (State CEQA Guidelines) section 15064.5(a) defines a "historical resource" as a resource that meets one or more of the following criteria:

- Listed in, or eligible for listing in, the California Register of Historical Resources (California Register)
- Listed in a local register of historical resources (as defined at Cal. Public Res. Code § 5020.1(k))
- Identified as significant in a historical resource survey meeting the requirements of § 5024.1(g) of the Cal. Public Res. Code

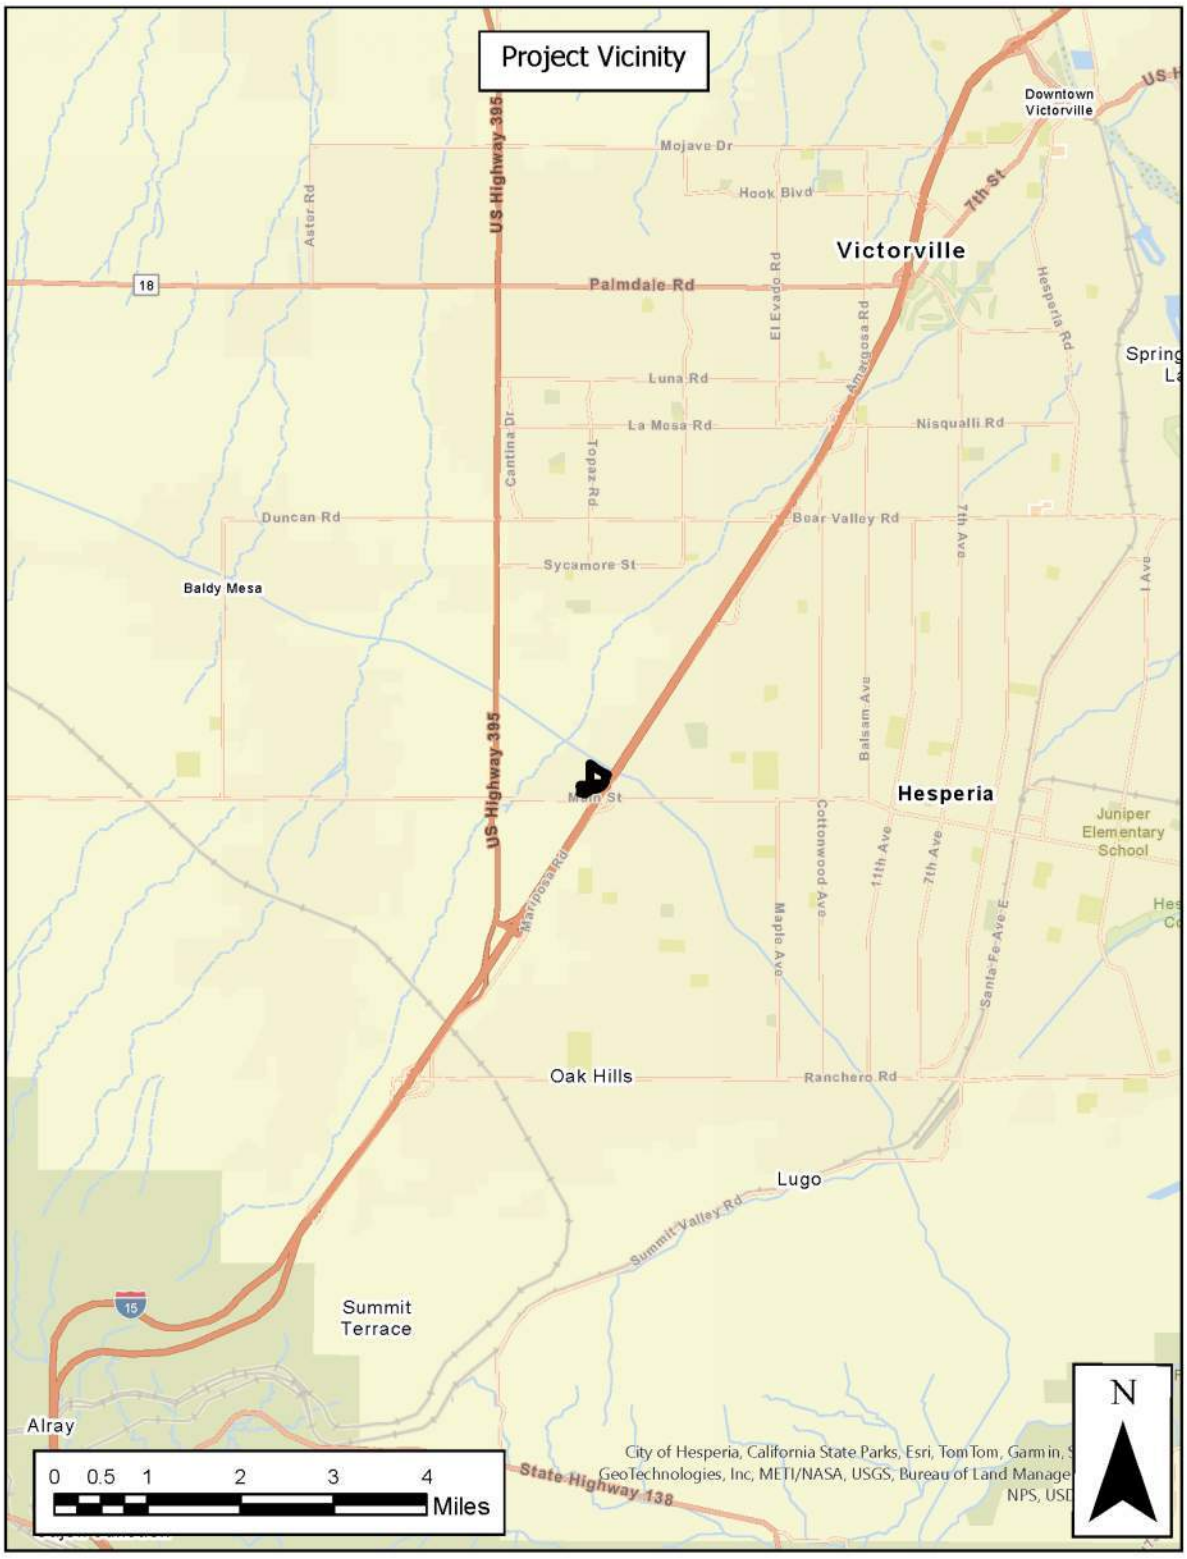

Figure 1: Project Vicinity Map

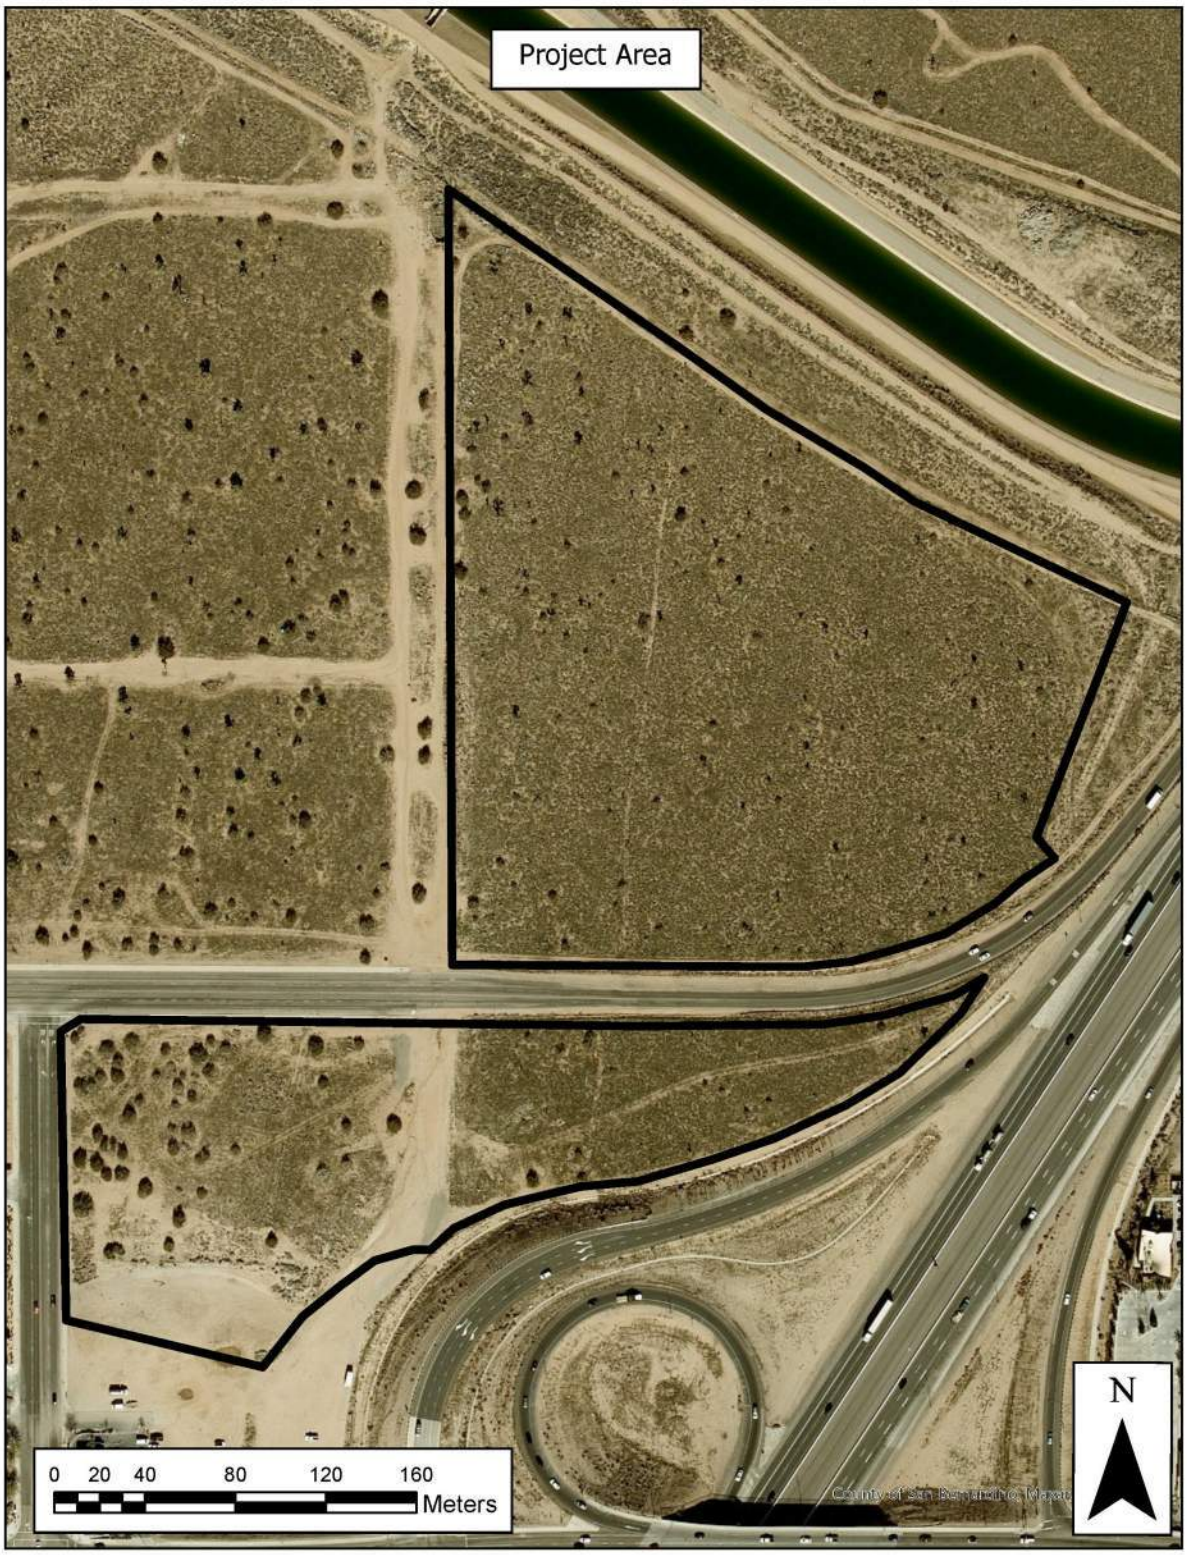

Figure 2: Project Area Map

- Determined to be a historical resource by a project's lead agency (Cal. Code Regs. Tit. 14(3), § 15064.5(a))

A historical resource consists of "Any object, building, structure, site, area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California…Generally, a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing in the California Register of Historical Resources" (Cal. Code Regs. Tit. 14(3), § 15064.5(a)(3)). The significance of a historical resource is impaired when a project demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for the California Register. If an impact on a historical or archaeological resource is significant, CEQA requires feasible measures to minimize the impact (State CEQA Guidelines § 15126.4 (a)(1)). Mitigation of significant impacts must lessen or eliminate the physical impact that the project will have on the resource. Section 5024.1 of the Cal. Public Res. Code established the California Register. Generally, a resource is considered by the lead agency to be "historically significant" if the resource meets the criteria for listing in the California Register (Cal. Code Regs. tit. 14(3), § 15064.5(a)(3)).

Finally, CEQA requires that significant effects on unique archaeological resources be considered and addressed. CEQA defines a unique archaeological resource as any archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information.
- Has a special and particular quality such as being the oldest of its type or the best available example of its type.
- Is directly associated with a scientifically recognized important prehistoric or historic event or person.

CEQA Guidelines Section 15064.5 Appendix G includes significance criteria relative to archaeological and historical resources. These have been utilized as thresholds of significance here, and a project would have a significant environmental impact if it would:

- Cause a substantial adverse change in the significance of a historical resource as defined in section 10564.5;
- Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 10564.5;
- Disturb any human remains, include those interred outside of formal cemeteries.

California Public Resources Code

California Public Resources Code (PRC) § 5024.1 establishes the California Register of Historical Resources (CRHR). The register lists all California properties considered to be significant historical resources. The

CRHR also includes all properties listed or determined eligible for listing in the NRHP, including properties evaluated and determined eligible under § 106.

California Public Resources Code (PRC) § 5020 to 5029.5 continued the former Historical Landmarks Advisory Committee as the State Historical Resources Commission. The commission oversees the administration of the California Register of Historical Resources and is responsible for designating State Historical Landmarks and Historical Points of Interest.

California Public Resources Code (PRC) § 5079 to 5079.65 define the functions and duties of the Office of Historic Preservation, which administers federal- and state-mandated historic preservation programs in California as well as the California Heritage Fund.

California Public Resources Code (PRC) § 5097.9 to 5097.991 provide protection to Native American historical and cultural resources and sacred sites; identify the powers and duties of the Native American Heritage Commission (NAHC); require that descendants be notified when Native American human remains are discovered; and provide for treatment and disposition of human remains and associated grave goods.

California Health and Safety Code

California Health and Safety Code § 7050.5-7055 govern the process for reporting inadvertent discoveries of human remains to the County Coroner; the process for the County Coroner to report human remains of Native American descent to the Native American Heritage Commission (NAHC); and the protections offered against removal or desecration of human remains.

California Code of Regulations

The California Code of Regulations govern the nomination of resources to the California Register of Historical Resources (CRHR) (14 California Code of Regulations [CCR] § 4850). The regulations set forth the criteria for eligibility as well as guidelines for assessing historical integrity and resources that have special considerations.

California Register of Historical Resources (CRHR)

The State Historical Resources Commission has designed this program for use by state and local agencies, private groups, and citizens to identify, evaluate, register, and protect California's historical resources. The California Register of Historic Resources (CRHR) is the authoritative guide to the state's significant historical and archeological resources.

The California Register of Historic Resources (CRHR) program encourages public recognition and protection of resources of architectural, historical, archeological, and cultural significance; identifies historical resources for state and local planning purposes; determines eligibility for state historic preservation grant funding; and affords certain protections under the California Environmental Quality Act (CEQA). To be eligible for listing in the CRHR, a resource must meet at least one of the following criteria:

- Is associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.
- Is associated with the lives of persons important to local, California, or national history.
- Embodies the distinctive characteristics of a type, period, region, or method of construction; represents the work of a master; or possesses high artistic values.
- Has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California or the nation.

In addition to having significance, resources must have integrity for the period of significance. The period of significance is the date or span of time within which significant events transpired or significant individuals made their important contributions. Integrity is the authenticity of a historical resource's physical identity as evidenced by the survival of characteristics or historic fabric that existed during the resource's period of significance. Alterations to a resource or changes in its use over time may change its historical, cultural, or architectural significance. Simply, resources must retain enough of their historic character or appearance to be recognizable as historical resources and to convey the reasons for their significance. A resource that has lost its historic character or appearance may still have sufficient integrity for the CRHR if, under Criterion 4, it maintains the potential to yield significant scientific or historical information or specific data.

Isolated finds, such as a single artifact with no other associated cultural materials, are generally considered to be ineligible for listing in the CRHR. However, the nature of the isolated resource and any available ethnographic data regarding affiliated Native American populations should be carefully considered during the evaluation process, particularly as it relates to potential eligibility under Criterion 4.

California Historical Landmarks

California Historical Landmarks are buildings, structures, sites, or places that have been determined to have statewide historical significance. The resource must be approved for designation by the County Board of Supervisors or the City/Town Council in whose jurisdiction it is located; be recommended by the State Historical Resources Commission; and be officially designated by the Director of California State Parks. A resource must meet at least one of these following criteria:

- Be the first, last, only, or most significant of its type in the state or within a large geographic region (Northern, Central, or Southern California).
- Be associated with an individual or group having a profound influence on the history of California.
- Be a prototype of, or an outstanding example of, a period, style, architectural movement or construction or is one of the more notable works or the best surviving work in a region of a pioneer architect, designer, or master builder.

California Points of Historical Interest

California Points of Historical Interest are sites, buildings, features, or events that are of local (city or county) significance and have anthropological, cultural, military, political, architectural, economic,

scientific or technical, religious, experimental, or other value. Points of Historical Interest designated after December 1997 and recommended by the State Historical Resources Commission are also listed in the CRHR. No historical resource may be designated as both a landmark and a point. If a point is subsequently granted status as a landmark, the point designation is retired. To be eligible for designation as a Point of Historical Interest, a resource must meet at least one of the following criteria:

- Be the first, last, only, or most significant of its type within the local geographic region (city or county).
- Be associated with an individual or group having a profound influence on the history of the local area.
- Be a prototype of, or an outstanding example of, a period, style, architectural movement or construction or be one of the more notable works or the best surviving work in the local region of a pioneer architect, designer or master builder.

California Historic Building Code

The California Historic Building Code—California Code of Regulations, Title 24, Part 8—provides regulations for the preservation, restoration, rehabilitation, relocation, or reconstruction of buildings or properties designated as qualified historical buildings or properties. The California Historic Building Code is intended to provide solutions for the preservation of qualified historical buildings or properties, to promote sustainability, to provide access for persons with disabilities, to provide a cost-effective approach to preservation, and to provide for the reasonable safety of the occupants or users.

ENVIRONMENTAL SETTING

The Project area is situated in the southwestern Mojave Desert, which is characterized as an arid environment. The nearest water source is the Oro Grande Wash approximately 0.22 miles northwest and the Mojave River located over 7.5 miles east of the Project area. The Mojave River served as a major resource during prehistoric occupation, though is now an ephemeral watershed that primarily flows underground with seasonal surficial flow during and after heavy rainfall. It flows northeast across the desert, originating from the base of the San Bernardino Mountains in the Summit Valley area to the Mojave Sink near Afton Canyon, and was home to numerous prehistoric villages (U.S. Geological Survey 2021; Harrington 1918).

Geologic units underlying the Project area consist of older alluvial fan gravel deposits from the Pleistocene (Qof). This is generally true of adjacent areas as well, with the exception of the Oro Grande Wash to the northwest, which is underlain by Holocene-aged alluvium (Dibblee and Minch 2008). Common native animals that inhabit the Mojave Desert include coyotes, cottontail and jackrabbits, rats, mice, desert tortoises, roadrunners, raptors, turkey vultures, and other bird species. Native plants in this region include creosote, cacti, rabbit bush, interior golden bush, cheesebush, species of sage, and various grasses (Sutton and Earle 2017; Bean and Smith 1978; Strong 1929). The Project area is currently undeveloped with evidence dumping, squatting, etc., and retains native vegetation such as creosote bushes, Joshua Tree, and native grasses. Adjacent areas have undergone development, including the development of historic Route 66, which was later transformed into Interstate 15, to the east/southeast of the Project area.

CULTURAL AND HISTORICAL SETTING

Ethnography

The project area was traditionally occupied by the *Maara'yam*, oftentimes referred to as "Serrano", which was the Spanish term for the clans that occupied the desert and mountain regions around the project area. Like many neighboring culture groups, the *Maara'yam* are Takic (Uto-Aztecan language family) speakers (Lightfoot and Parrish 2009). The *Maara'yam* occupied a vast territory of over 7.4 million acres, though the region was sparsely populated and utilized in a seasonal manner with clans occupying valley floors in cool seasons and higher elevations in the warm seasons (San Manuel Band of Mission Indians 2024). Research shows that other villages were located along the length of the Mojave River and that the *Maara'yam* utilized the river as a trail between villages (Sutton and Earle 2017). The *Maara'yam* also interacted with other cultural groups, such as the Cahuilla, Luiseno, Mojave, and Gabrieleno, for the purpose of trade and cultural practice (Benedict 1924; Harrington 1918). Across the region, *Maara'yam* were organized into clans affiliated with one of two exogamous moieties, Coyote or Wildcat. Villages were typically clan-based and the *Maara'yam* typically engaged in specific practices between clans/villages, such as marriage outside their clan (Sutton and Earle 2017; Bean and Smith 1978; Strong 1929; Benedict 1924; Harrington 1918).

Subsistence strategies focused on hunting and gathering which were supplemented by fishing. Food preparation varied, ranging from baking in earth ovens to parching. Food processing tools included scrapers, bowls, baskets, mortars, and metates (Byrd and McGuire 2009; Byers and Broughton 2004; Bean and Smith 1978). Dwellings were usually circular domes that utilized willow and reeds. They also used ramadas, which consisted of a thatched roof supported by vertical poles in the ground that provided shade (Lightfoot and Parrish 2009; Harrington 1918). Other structures in villages were used for community and ceremonial reason. A lineage leader, or *kika'*, administered laws and ceremonies from a large ceremonial house centrally located in most villages (Sutton and Earle 2017; Bean and Smith 1978; Strong 1929; Benedict 1924; Harrington 1918). Additional historical information pertaining to the *Maara'yam* is embedded in the below.

Pre-Contact Era

The prehistoric cultural setting of the Mojave Desert has been organized into many chronological frameworks within the scientific community (see Warren and Crabtree 1986; Bettinger and Taylor 1974; Lanning 1963; Hunt 1960; Wallace 1958, 1962, 1977; Wallace and Taylor 1978; Campbell and Campbell 1935). However, there is no standard sequence for the region, in part due to the enormity of the land base and lack of cohesive study of prior archaeological research across the area. Further, due to the dry climate and unpredictable geological processes, *in situ* preservation of cultural middens have proven to be difficult to find and, therefore, chronologies often rely on less precise temporal indicators, such as groundstone. While helpful, it can lead to imprecise results as the prehistoric population often concurrently used different artifact styles or re-used artifacts. It is further important to note that little attempt has been made to revisit the chronologies of the region since the 1990s and, therefore, prior attempts further lack data related to more recent research, as well as oral histories from descendent communities that have become more available in recent decades. However, while recognizing the various

potential issues with the chronological framework, efforts made by Warren and Crabree in 1986 are most often utilized in archaeological study and is detailed below.

Paleoindian (12,000 to 10,000 BP) and Lake Mojave (10,000 to 7,000 BP) Periods

The transition from the Paleoindian Period to the Lake Mojave Period is characterized by climatic warming and further marks the end of Pleistocene and beginning of the Holocene. The Paleoindian Period has been generally defined by isolated fluted projectile points dated by their association with similar artifacts or fossils discovered *in situ,* such as the fossil remains of Rancholabrean mammals dated approximately to ca. 13,300-10,800 BP near Ridgecrest in the Mojave Desert. The Lake Mojave Period has been associated with cultural adaptations to moist conditions and resource allocation pointing to more lake-dominant environments (Bedwell 1973; Hester 1973). Artifacts that characterize this period include stemmed points, flake and core scrapers, choppers, hammerstones, and crescent tools (Warren and Crabtree 1986). Projectile points associated with the period include the Silver Lake and Lake Mojave styles (Basgall 2000; Basgall and Hall 1994).

Pinto Period (7,000 to 4,000 BP)

The Pinto Period has been largely characterized by drying of the Mojave. As formerly rich, wet environments began to disappear, the artifact record reveals more sporadic occupation of the Mojave, indicating occupants' recession into the cooler and more moist fringes, along waterways, and near springs. Artifacts from this era include Pinto projectile points and a flake industry similar to the Lake Mojave tool complex, and milling stones have also occasionally been associated with sites of this period (Warren 1984).

Gypsum Period. (4,000 to 1,500 BP)

It is thought that the Gypsum Period offered a brief return to a moist environment and encouraged more diverse technologies due to the abundance of resources (Warren 1984; Warren and Crabtree 1986). The new artifacts include milling stones, mortars, pestles, and a proliferation of Humboldt Concave Base, Gypsum Cave, Elko Eared, and Elko Corner-notched dart points (Warren 1984; Warren and Crabtree 1986). Other artifacts include leaf-shaped projectile points, rectangular-based knives, drills, large scraper planes, choppers, hammer stones, shaft straighteners, stone pendants, and drilled slate tubes. The bow and arrow appear around 2,000 BP, as evidenced by the Rose Spring point, which is much smaller than other points (Rogers 1939; Schroeder 1953, 1961; Shutler 1961; Yohe 1992).

Saratoga Springs Period (1,500 to 800 BP)

During the Saratoga Springs Period, regional technological diversification from the Gypsum Period is apparent and widespread across the Mojave. Basketmaker III (Anasazi) pottery appears during this period and has been associated with turquoise mining in the eastern Mojave Desert (Warren and Crabtree 1986). Influences from Patayan/Yuman assemblages are apparent in the southern Mojave and include buff and brown wares often associated with Cottonwood and Desert Side-notched projectile points (Warren 1984). Obsidian becomes more commonly used throughout the Mojave and characteristic artifacts of the period include milling stones, mortars, pestles, ceramics, and ornamental and ceremonial objects. More structured settlement patterns are evidenced by the presence of large villages, and three types of

identifiable archaeological sites (major habitation, temporary camps, and processing stations) emerge (McGuire and Hall 1988).

Shoshonean Period (800 BP to Contact)

The Shoshonean period is the first to contain ethnographies from indigenous people. Interviews of living informants allowed anthropologists to match artifact assemblages and particular traditions with linguistic groups and plot them geographically (see Kroeber 1925; Gifford 1918; Strong 1929). Diversification of site assemblages continued in this period and shows a reduction of Anasazi influence. This coincides with the expansion of Numic (Uto-Aztecan language family) speakers across the Great Basin, Takic (Uto-Aztecan language family) speakers into southern California, and the Hopi across the Southwest (Sutton 1996). Hunting and gathering continued to diversify, as evidence by the presence of desert side-notch and cottonwood triangular diagnostic projectile points. Ceramics continue to proliferate, though are more common in the southern Mojave during this period (Warren and Crabtree 1986). Trade routes have become well established across the Mojave, particularly the Mojave Trail, which transported goods and news across the desert.

Contact (Historic) Era

The Contact/Historic-era California is generally divided into three periods: the Spanish or Mission Period (1769-1821), the Mexican or Rancho Period (1821-1848), and the American Period (1848 to present).

The first recorded European to pass through the region was Father Francisco Garces, a Spaniard who later became a guide to Juan Bautista de Anza, who had been commissioned to set up quarters at the Mission San Gabriel in 1771 (Beck and Haase 1974). At this time, an estimated thousands of Native Americans, including the *Maara'yam* desert clans of the Antelope Valley and potentially the Mojave River region, were either taken to the Mission, removed to work as forced agricultural labor at the *estancia* in Redlands that served as outpost for the Mission, fled the region, or were killed (Beattie 1923). In 1821, Mexico overthrew Spanish rule and the Missions began to decline. By 1833, the Mexican government passed the Secularization Act and the Missions, reorganized as parish churches, lost their vast land holdings, and released the indigenous people that remained. However, the remaining *Maara'yam* continued to face issues under Mexican rule and were eventually forced to provide labor for various industries, such as agriculture, lumber, etc. (San Manuel Band of Mission Indians 2024; Madley 2016).

In 1848, the Treaty of Guadalupe Hidalgo was introduced, triggering the start of the American Period. In 1849, the Anglo population greatly increased in California as a result of the Gold Rush and, in 1850, California was accepted into the Union (Del Castillo 1992). As a result of land grants previously established under Mexican leadership that created large pastoral estates in California, as well as a high demand for beef during the Gold Rush, the state saw a cattle boom from 1849–1855 (Vredenburgh 1999). The increased Anglo population and pursuit of land and gold led to drastic conditions for the remaining indigenous communities, who were once again forced to provide labor or simply killed to make way for new residents (Madley 2016). Eventually the beef market collapsed as a result of imported sheep and cattle from New Mexico and the mid-west, and many California ranchers lost their ranchos through foreclosure, once again releasing many *Maara'yam* from servitude (Bacich 2017; Beck and Haase 1974; Kroeber 1925).

At the same time, both the Federal and State governments promoted military campaigns to eliminate remaining indigenous populations or remove them to Reservations. This included the establishment of Reservations for two (2) Federally-recognized Tribes of *Maara'yam* affiliation: Morongo Band of Mission Indians in 1865 and Yuhaaviatam of San Manuel Nation (formerly San Manuel Band of Mission Indians) in 1891. Though the population of the broader *Maara'yam* was greatly diminished in the historic era and many important resources and significant places were destroyed or impacted, the remaining communities have successfully retained their cultural identify and have worked diligently to revitalize cultural practices and remain stewards of their ancestral lands (San Manuel Band of Mission Indians 2024; Beck and Haase 1974; Kroeber 1925; Lighfoot and Parrish 2009).

METHODS

All efforts made for the completion of this report were completed pursuant to requirements set forth in the California Environmental Quality Act (CEQA). This study is intended to identify whether cultural resources are located within the Project area, whether any cultural resources are potentially significant pursuant to the above-referenced regulations and standards, and to develop specific recommendations that will address potential impacts to existing or potential resources. Tasks completed include:

- A cultural resources records search through the South Central Coastal Information Center (SCCIC) to identify any studies conducted and/or cultural resources recorded within or adjacent to the Project area,
- A Sacred Lands File (SLF) search through the Native American Heritage Commission (NAHC),
- A review of cultural resource databases, historical imagery, and various maps,
- A pedestrian survey of the of the Project area and recordation of identified cultural resources,
- Development of recommendations and/or mitigation measures for cultural resources identified or potentially unrecorded within the Project area.

RESULTS

KHA cultural resources management staff reviewed local, State, and National Registers, though no resources were identified within the Project area as a result of this research. Staff also conducted a cultural resources record search at the South Central Coastal Information Center (SCCIC) for the Project area and half-mile buffer on May 1, 2024 (Figure 3). The results of the record search noted that only portions of the Project area, particularly within/along Amargosa Rd. and the dirt roads around the perimeter of the Project area, have been previously surveyed, and that no resources have been previously recorded within the Project area. An additional seventeen (17) cultural resources assessments have been conducted within a half-mile of the Project area, which resulted in the recordation of four (4) historic-era archaeological resources (Table 1; Appendix A).

The Native American Heritage Commission (NAHC) conducted a search of the Sacred Lands Files (SLF) for the Project area and vicinity at the request of KHA. The NAHC responded on May 13, 2024 and indicated that the results are negative for documented sacred lands in or near the Project area (Appendix B). The City of Hesperia will perform Assembly Bill (AB) 52 Consultation with the Native American Tribes. The results of tribal consultation are not included in this report.

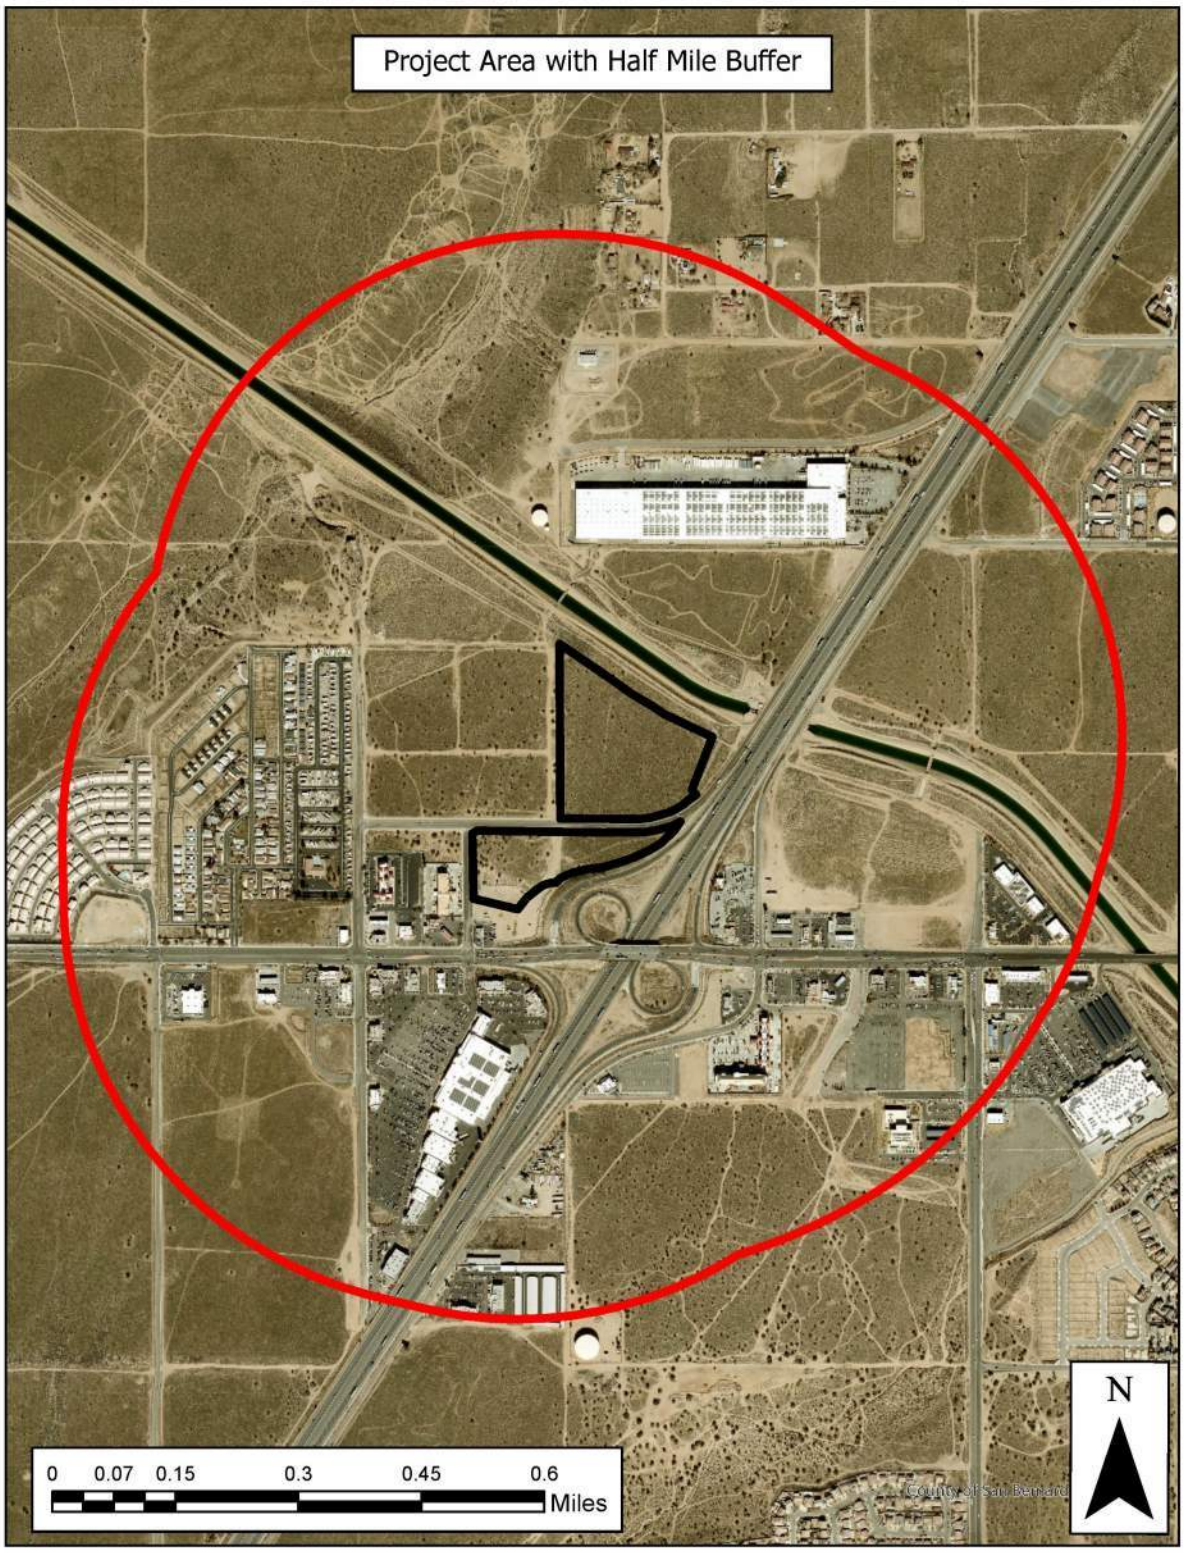

Figure 3: Project Area with Half Mile Buffer

Table 1: Previously Recorded Cultural Resources in the Half-Mile Buffer*		
Site Number	**Age**	**Description**
P-36-012056/CA-SBR-12056H	Historic	Remains of a historic period structure and associated artifacts
P-36-020473	Historic	Isolated bottle fragment with inverted base (1939-1957)
P-36-021366/CA-SBR-013725H	Historic	Trash and refuse scatter
P-36-026213/CA-SBR-16622H	Historic	Dense historic trash dump (700+ cans, 1,000+ crown caps, broken bottles, and household items)

**The resource table in Appendix A provided by the SCCIC incorrectly includes two resources: P-36-004251/CA-SBR-004251H, which is mis-plotted and actually located several miles away near the Cajon Pass, and P-36-002613/CA-SBR-002613, which was intended to be P-36-026213/CA-SBR-16622H.*

KHA staff conducted additional research of the historic aerial imagery of the Project area, which concluded that it has never been developed or undergone any extensive grading. As such, research concluded that the majority of the Project area has retained its native soil.

Upon conclusion of the research efforts, KHA archaeologists conducted an intensive-level pedestrian survey of the Project area on May 16, 2024. Transects were spaced approximately 15 meters apart and all surface exposures were carefully inspected. Digital photographs were taken at various points in the Project area. Ground visibility ranged from poor to moderate (0-40%) due to dense vegetation across the Project areas, though visibility in graded areas was excellent (100%) (Figures 4-5). It was confirmed during survey that the graded areas are limited to those that were noted in the historical imagery, which includes the southwestern-most portion of the Project area and several two-tracks/dirt roads within the Project area that appeared to regularly used. There was also evidence of recent dumping and squatting, primarily south of Amargosa Rd., and the adjacent parcels to the west contained active squatting camps (Figure 6).

As a result of the field survey, KHA identified and recorded one cultural resource, KHA-HSC-2024-01, within the Project area (Figure 7). This site consists of a very sparse historic-age trash dump with a mixture of church key and pull tab cans likely associated with adjacent road development/maintenance for Route 66/Interstate 15 (Appendix C). No other resources were identified within the Project area as a result of the survey.

EVALUATION

One cultural resource, KHA-HSC-2024-01, was identified within the Project area as a result of this study. The below includes an analysis of the resource's potential eligibility for listing in the California Register of Historical Resources:

> *Criterion 1:* The resource is interpreted as a sparse trash/can scatter from the mid-20th century. It not associated with events that have made significant contributions to local, state, or national history. Therefore, it is not recommended eligible under criterion 1.

Figure 4: Overview of Project Area with Dense Vegetation

Figure 5: Overview of Grading in the Southwestern Portion of the Project Area

Figure 6: Evidence of Trash Dumping in the Project Area South of Amargosa Rd.

Figure 7: Close View of Two Cans/Can Fragments Located Within KHA-HSC-2024-01

Criterion 2: The site is not associated with the lives of any persons significant to the past. Therefore, it is not recommended eligible under criterion 2.

Criterion 3: The site does not embody the distinctive characteristics of a type, period, region, or method of construction, represent the work of a master, or possesses high artistic values. The site consists of common historic refuse and debris that lack in distinctive characteristics or artistic value. It is recommended not eligible under criterion 3.

Criterion 4: This archaeological resource is a common, well-understood resource type and it is highly unlikely that any data retrieved from the site would contribute to our historic knowledge of the region, state, or nation. Therefore, it is not likely to yield important information about the prehistory or history of the region, state, or nation and is not recommended eligible under criterion 4.

In summary, KHA-HSC-2024-01 is not recommended eligible for listing in the CRHR. Additionally, it does not meet the definition of a "Historical Resource" or "Unique Archaeological Resource" under the CEQA.

RECOMMENDATIONS

One cultural resource was identified in the Project area during the research and field efforts undertaken for this study. This resource, KHA-HSC-2024-01, was newly recorded during the field survey as a historic-age refuse site likely associated with adjacent road development/maintenance for Route 66/Interstate 15. The site is recommended not eligible for listing in the California Register of Historical Resources (CRHR) as it does not meet any of the required eligibility criteria. Additionally, it does not meet the definition of a "Historical Resource" or "Unique Archaeological Resource" under CEQA. Refuse identified at the site includes common cans sparsely scatted across the site, which has also been impacted by modern dumping, squatting, and overland driving.

No other resources were identified within the Project area as part of this study. Furthermore, the Project area has a low potential for unidentified buried archaeological resources. Though the majority of the Project area retains native soils, the geologic deposits underlying the Project area are from the Pleistocene, which pre-dates human occupation. Additionally, no prehistoric archaeological resources have been recorded within a half mile of the Project area as a result of numerous prior studies, and the historic resources identified within the vicinity have all been surficial in nature. Furthermore, the most culturally significant and archaeologically rich areas of this portion of the Mojave Desert are located along the Mojave River, which is over 7.5 miles east of the Project area. However, it is recommended that mitigation measures for cultural resources be included that outline the process for treatment of any cultural resources and/or human remains inadvertently discovered during Project implementation. With these mitigation measures in place, impacts to cultural resources would be less than significant. An example of such mitigation is included below:

- **Inadvertent Discoveries of Cultural Resources:** In the event that cultural resources are discovered during Project implementation, all earthwork and ground-disturbing activities will halt within 50 feet of the discovery. An archaeologist that meets Secretary of Interior Professional Qualifications

in Archaeology (Project Archaeologist) will be contacted to review the find and will coordinate with the City of Hesperia to identify whether the resource is potentially significant and if it requires further evaluation. If the cultural resources are Native American in origin, the Consulting Tribe(s) must be immediately contacted and consulted regarding potential significance and treatment of the resource. For any potential significant cultural resources, the Project Archaeologist will make recommendations to the City to avoid or mitigate impacts to the resource.

Preservation in place (i.e. avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery to excavate the resource along with subsequent laboratory processing and analysis. Disposition of significant Native American archaeological materials, such as reburial or curation by a qualified repository within San Bernardino County, will be agreed upon by the City and Consulting Tribe(s). Any significant non-Native American archaeological material shall be curated at a public, non-profit institution with a research interest in the materials within San Bernardino County, if such an institution agrees to accept the material. If no institution accepts the archaeological material, it shall be offered to a local school or historical society in the area for educational purposes.

All identified cultural resources will be recorded on appropriate CA DPR 523 series forms and evaluated for significance. All findings will be included within a Monitoring Report drafted by the Project Archaeologist and submitted to the City and Consulting Tribe(s) for review. Final copies of the Monitoring Report will be submitted to the City of Hesperia, Consulting Tribe(s), and South Central Coastal Information Center (SCCIC).

- **Inadvertent Discoveries of Human Remains:** If human remains are encountered during the undertaking, California State Health and Safety Code Section 7050.5 states that excavation shall stop and no further disturbance shall occur within 100 feet of the discovery until the County Coroner has made a determination of origin and disposition of the remains pursuant to Public Resources Code Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be prehistoric, the Coroner will notify the Native American Heritage Commission (NAHC), which will determine and notify a Most Likely Descendant (MLD). With the permission of the landowner or his/her authorized representative, the MLD may inspect the site of the discovery within 48 hours of notification. If the NAHC is unable to identify an MLD, the MLD fails to make a recommendation, or the landowner or his/her authorized representative rejects the recommendation, the human remains and associated items will be interred on the property with appropriate dignity in a location that will not be subject to future disturbance.

It is important to note that this report does not include discussion related to the presence of Tribal Cultural Resources (TCR), as defined by CEQA, as this is determined via government-to-government consultation between the City of Hesperia and Native American Tribes. As such, recommendations made within this report as it relates to cultural resources of Native American origin should be considered alongside the results of Tribal consultation.

Re: Hesperia Sam's Club Project, San Bernardino County

To Whom It May Concern:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not indicate the absence of cultural resources in any project area. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Murphy.Donahue@NAHC.ca.gov

Sincerely,

Murphy Donahue

*P2. **Location:** ☐ **Not for Publication** ✠ **Unrestricted**
***a. County** San Bernardino **and** (P2c, P2e, and P2b or P2d. Attach a Location Map as necessary.)
***b. USGS 7.5' Quad** Baldy Mesa **Date** 2021 **T** 4N; **R** 5W; SW ☐ **of** SW ☐ **of Sec** 14; San Bernardino **B.M.**
c. Address Vacant lot, Amargosa Rd, City Hesperia Zip 92345
d. UTM: (Give more than one for large and/or linear resources) Zone 11S , 468006 mE/ 3820889 mN
e. Other Locational Data: (e.g., parcel #, directions to resource, elevation, decimal degrees, etc., as appropriate)
The site is located south of the California Aqueduct, west of Interstate 15, and east of Cataba Rd. The site is bisected by east/west trending paved Amargosa Rd. and primarily on the east side of north/south trending unpaved Amargosa Rd.

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)
The site is a sparse historic can scatter likely associated with adjacent roadway development/ maintenance for Route 66/Interstate 15. The scatter contains approximately 20 cans within a 250mx150m area. Cans include pull tab and church key cans, many of which are deteriorating.

***P3b. Resource Attributes:** (List attributes and codes) AH4

ARCHAEOLOGICAL SITE RECORD

***A1. Dimensions: a. Length:** 250 m. (N/S) × **b. Width:** 150 m. (E/W)
Method of Measurement: ☐ Paced ☐ Taped ☐ Visual estimate X Other: GIS measurement
Method of Determination (Check any that apply.): X Artifacts ☐ Features ☐ Soil ☐ Vegetation ☐ Topography
☐ Cut bank ☐ Animal burrow ☐ Excavation ☐ Property boundary ☐ Other (Explain):
Reliability of Determination: X High ☐ Medium ☐ Low Explain:
Limitations (Check any that apply): ☐ Restricted access ☐ Paved/built over ☐ Site limits incompletely defined
☐ Disturbances X Vegetation ☐ Other (Explain):

A2. Depth: X None ☐ Unknown Method of Determination: Very sparse surface scatter

***A3. Human Remains:** ☐ Present X Absent ☐ Possible ☐ Unknown (Explain):

***A4. Features** (Number, briefly describe, indicate size, list associated cultural constituents, and show location of each feature on sketch map.):

Cans are spread thinly across the site and are in poor and deteriorating condition. No features or loci were observed within the site.

***A5. Cultural Constituents (**Describe and quantify artifacts, ecofacts, cultural residues, etc., not associated with features.):

Cans are spread thinly across the site and amount to approximately 20 cans.

***A6. Were Specimens Collected?** X No ☐ Yes (If yes, attach Artifact Record or catalog and identify where specimens are curated.)

***A7. Site Condition:** ☐ Good ☐ Fair X Poor (Describe disturbances.): Roads cut through site, grading, modern dumping within site, squatting, etc., artifacts deteriorating

***A8. Nearest Water** (Type, distance, and direction.)**:** Oro Grande Wash ~0.22 miles northwest

***A9. Elevation:** 3,600 ft

A10. Environmental Setting (Describe culturally relevant variables such as vegetation, fauna, soils, geology, landform, slope, aspect, exposure, etc.)**:**

Generally flat, partially graded and impacted by modern dumping, squatting, roads, etc.; heavy native grasses and creosote were observed during survey, as well as invasive weeds/grasses often found in disturbed soil and Joshua Trees

A11. Historical Information: The site has never been developed, but is adjacent to Route 66, which later became Interstate 15.

***A12. Age:** ☐ Prehistoric ☐ Protohistoric ☐ 1542-1769 ☐ 1769-1848 ☐ 1848-1880 ☐ 1880-1914 ☐ 1914-1945
X Post 1945 ☐ Undetermined **Describe position in regional prehistoric chronology or factual historic dates if known:**

Few diagnostic artifacts are location withinthe site, though they mainly date between the 1940s to 1980s.

A13. Interpretations (Discuss data potential, function[s], ethnic affiliation, and other interpretations):

The site is a sparse can/trash dump likely associated with development/maintenance of Route 66/Interstate 15. Cans are in poor and deteriorating condition and no loci were observed within the site. There is no information available to indicate that the site is eligible for listing in the CRHR/NRHP under Criteria 1/A, 2/B, 3/C, or 4/D.

A14. Remarks:

A15. References (Documents, informants, maps, and other references):

A16. Photographs (List subjects, direction of view, and accession numbers or attach a Photograph Record.):

Original Media/Negatives Kept at: Kimley-Horn (address below)

***A17. Form Prepared by:** Jessica Mauck, MA, RPA **Date:** 6/03/2024
