Dong Duong, Broker
C21 Real Estate Alliance
5978 Silver Creek Valley
San Jose, CA 95138

Dear Dong Duong,

eScreenLogic was contracted by you on behalf of C21 Real Estate Alliance (herein referred to as "Client") to conduct a Phase I Environmental Site Assessment (herein referred to as "ESA") on a Commercial Property located at 2470 Alvin Avenue, San Jose, CA 95121 (herein referred to as "subject site" or "subject site property"). eScreenLogic received written authorization from Client on September 17, 2020 to perform the ESA Report. This ESA Report was performed in general accordance with the scope and limitations of ASTM E1527-13, the Engagement Agreement for Services Proposal eSL #20116-65446 executed by the Client. Exceptions to or deletions from this protocol are discussed in this report.

We appreciate your business. If you have any questions regarding the attached report, or if we can be of any further service to you, please do not hesitate to contact us at (916) 288-8170.

Sincerely,

Tiffany Frazier, Senior Client Success Manager
Direct Line: (916) 836-5745

1.0 EXECUTIVE SUMMARY

eScreenLogic has performed a Phase I Environmental Site Assessment (ESA) for the property at 2470 Alvin Avenue, San Jose, CA 95121 (subject site) dated September 28, 2020. This ESA was conducted at the request of C21 Real Estate Alliance using procedures and practices conforming with the ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Any exceptions to or deletions from this practice are described below.

1.1 Findings

The Client of this ESA report should not draw any conclusions and/or take any actions without reading this ESA report in its entirety.

Further, the goal of this ESA is to identify environmentally related risks to the subject property which, when performed in accordance with ASTM Practice E1527-13, constitutes an all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice as defined at 42 U.S.C. §9601(35)(B). Specifically, the goal of this assessment is to identify any of the following conditions affecting the subject site:

Recognized Environmental Condition (REC) "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

Historically Recognized Environmental Condition (HREC) "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Controlled Recognized Environmental Condition (CREC) "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

De Minimis Conditions, are by definition, not considered RECs. Rather, *De Minimis Conditions* generally do not present an immediate threat to human health and/or the environment and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This assessment has revealed the following evidence of RECs in connection with the subject site at this time:

- None

This assessment has revealed the following evidence of HRECs in connection with the subject site at this time:

- None

This assessment has revealed the following evidence of CRECs in connection with the subject site at this time:

- None

This assessment has revealed the following evidence of De Minimis Condition in connection with the subject site at this time:

- None

1.2 Recommendations

Based on the information referenced in this ESA, eScreenLogic recommends the following:

- No further assessment is recommended at this time.

1.3 Project Personnel

Per ASTM standard, this report has been prepared with oversight and final review by an Environmental Professional (EP) as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312.

I declare that, to the best of my professional knowledge and belief, I meet the definition of EPA-Certified Environmental Professional as defined in §312.10 of 40 Code of Federal Regulations (CFR) Part 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. We have developed and performed the all appropriate inquiries in general accordance with the standards and practices set forth in 40 CFR Part 312.

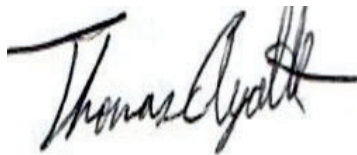

Robert Fagerness
Senior Environmental Professional

The following eScreenLogic personnel were directly responsible for the preparation of this report:

Abraham Serrato
Project Manager

Thomas Ayotte
Project Manager

The resumes of the EP and Project Managers are provided in Appendix-[Consultant Resumes](#).

San Jose, CA 95121

2.0 SUBJECT SITE INFORMATION

The following subsections provide information presented by the client, a current description of the subject site, and a current description of the adjacent properties.

2.1 Client Provided Information

At the time of the ESA initiation, eScreenLogic forwarded to the Client's attention a subject site Environmental Questionnaire to be completed by the client and returned to eScreenLogic prior to completing this ESA report. Additionally, eScreenLogic requested any additional information or previous reports that would further help to identify or alleviate possible Recognized Environmental Conditions (RECs) in connection with the subject site. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries provided to the Environmental Professional preparing the ESA for his/her consideration. At the time of preparing this report, the following information was or was not received from the client:

DOCUMENT TYPE	DOCUMENT RECEIVED	COMMENT
Environmental Questionnaire	No	Not provided at the time of this report.
Prior Environmental Site Assessment	No	Not provided at the time of this report.
Survey	No	Not provided at the time of this report.
UST/AST Compliance Documents	No	Not applicable.
Title Records, Environmental Liens, and AULs	No	Not provided at the time of this report.

- No related information was provided by the client. Based on the quality of information obtained from other sources, the EP does not consider the lack information from the client a significant data gap.

Please see [Appendix - Client Provided Information](#).

2.2 Property Description

Please refer to the table below for further description of the subject site.

Subject Site Description

IDENTIFIER	DESCRIPTION OF IDENTIFIED ITEMS
Subject Site Type	Commercial Property
Subject Site Address	2470 Alvin Avenue, San Jose, CA 95121
Subject Site Legal Description	No legal description was provided. Property boundaries were identified at the time of our site reconnaissance.
Parcel ID	670-02-021
Subject Site Zoning	Commercial General
Acres	0.89
Number of Buildings	One
Number of Stories	Single-story
Square Footage	9,000 (~10,050 per Mr. Duong)
Year of Construction	1975
Current Use	Multi-tenant medical complex
Current Owner(s) of Subject Site	Tiger II Med Ltd.
Current Occupant(s) of Subject Site	East Side Professional Center - Mar Monte Community Clinic & Planned Parenthood - Dr. Phu Q. Tran - Thinh Van Nguyen MD
Subject Site Utilities	Applicable Provider

Adjacent Property Information

	ADDRESS	CURRENT USE	CURRENT OCCUPANT(S)
North	1661 Burdette Drive	Commercial	Multi-tenant medical complex

	ADDRESS	CURRENT USE	CURRENT OCCUPANT(S)
East	2510 Alvin Avenue	Commercial	Tatafolu Christian Church
South	2475-2493 Alvin Avenue	Commercial	Multi-tenant commercial
West	2450 Alvin Avenue	Commercial	United States Postal Office Hillview Station

Please see Appendix - County Tax Office Information.

3.0 RECORDS REVIEW

The following subsections summarize information obtained through the review of available records. The following subsections include physical settings, historical use information, environmental database search results, agency file review, and vapor migration.

3.1 Physical Settings

The following section provides a brief summary of the physical settings associated with the subject site and general site vicinity. These settings include information on elevation, the topographic slope of the general site vicinity, a description of general soil type, nearest surface water body, and estimated depth and flow direction of groundwater where known.

PHYSICAL SETTING SOURCES	
TOPOGRAPHY	
Elevation	128-Feet above mean sea level (MSL)
Topographic Quad	San Jose, CA
General Slope	North-northwest
HYDROLOGY	
Nearest Surface Water Body	Thompson Creek, >5,420 feet northeast
Estimated Depth to Groundwater	Approximately 8.5 feet below ground surface (bgs), based upon groundwater monitoring report at 1610 Tully Road (northwest of site).
Estimated Groundwater Flow Direction	North-northwest.
Flood Zone	D-01: "Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted."
Wetland	The U.S. Fish and Wildlife Service did not identify any wetlands or wetland features on or adjoining the subject site.

PHYSICAL SETTING SOURCES	
GEOLOGIC INFORMATION	
Geologic Units	Q- Quaternary alluvium and marine deposits. Pliocene to Holocene epochs. Alluvium, lake, playa, and terrace deposits; unconsolidated and semiconsolidated. Mostly nonmarine, but includes marine deposits near the coast.
SOIL	
Soil Name	131- Urban land-Elpaloalto complex, 0 to 2 percent slopes.
RADON INFORMATION	
Federal EPA Radon Zone	Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L.

Please see [Appendix - Additional Information](#) to review these resources in their entirety.

3.2 Historical Use Information

To establish the history of the subject site and adjacent properties, eScreenLogic ordered, reviewed, and interpreted multiple historical resources. These historical resources include but are not limited to the following: aerial photography; Sanborn/Fire Insurance Maps; and city directories (where available). These resources are summarized below in Section [3.2.1 – Prior Uses of Subject Site](#) and Section [3.2.2 – Prior Uses of Adjacent Properties](#). These historical resources were provided by eScreenLogic's proprietary database and/or third-party sources.

eScreenLogic was not able to document the use of the subject site and adjacent properties prior to the first developed use, or prior to the earliest available resource dating back to 1925. The lack of this information represents a data gap. However, based on the other information obtained during the completion of this assessment, it is the environmental professional's (EP's) opinion that the lack of this information does not represent a significant data gap.

3.2.1 Historical Use of Subject Site

Based on the available historical resources, the prior uses of the subject site are summarized in the table below:

Subject Site

YEAR RANGE	HISTORICAL AERIALS	CITY DIRECTORY	SANBORN/FIM
2470 ALVIN AVENUE			
1925-1968	Agricultural Cropland	Street not listed	Unavailable for review.
1974	Undeveloped Land	Not identified	Unavailable for review.
1982-2018	Commercial	Multi-tenant commercial medical building with the following occupants of environmental interest: East Valley Community/Youth Clinic (1987-2008), Thinh Nguyen MD (2001-2018), Mar Monte Community Clinic (2006-2018)	Unavailable for review.

A summary of the concerns specific to the subject site is provided below:

- Based on the available historical resources, as well as regulatory information prior use of the subject site has been adequately addressed. No Sanborn/Fire Insurance Maps are available for the subject site; however, sufficient information was accumulated from aerial photographs and city directories and no significant data gaps were identified.
- Based on the available historic aerial photos, the subject site was part of a large agriculturally farmed property from as early as 1931 to at least 1968. Agricultural activities are considered of environmental interest due to the potential for pesticide use; however, the property was developed with commercial building and parking hardscape by 1982. As there is no current human exposure potential to subsurface soil, it is the environmental professional's (EP's) opinion that the historical agricultural use of the subject site is not a REC at this time.
- The medical clinic has been identified within one or more regulatory reporting programs. Please see [3.3.2 Subject Site Regulatory Database Review](#) for additional discussion.

Please see [Appendix - Historical Resources](#) to review these resources in their entirety.

3.2.2 Historical Use of Adjacent Properties

Per the ASTM guidance, adjacent properties are any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

The prior uses of the adjacent properties are summarized in the tables below:

Northern Adjacent

YEAR RANGE	HISTORICAL AERIALS	CITY DIRECTORY	SANBORN/FIM
1661 BURDETTE DRIVE			
1925-1968	Agricultural	Street not listed	Unavailable for review.
1974	Undeveloped Land	Street not listed	Unavailable for review.
1982-2018	Commercial	Multi-tenant commercial medical buildings with no occupants of environmental interest (1981-2018)	Unavailable for review.

A summary of our historic review for the adjacent northern property is provided below:

- Based on the available historical resources, as well as regulatory information prior use of the adjacent property has been adequately addressed. No Sanborn/Fire Insurance Maps are available for the adjacent property; however, sufficient information was accumulated from aerial photographs and city directories and no significant data gaps were identified.
- The historical aerial photographs indicate that the entirety of the adjacent property was developed between 1974 and 1982 for commercial development.
- No environmental concerns were identified during the historical review.

Eastern Adjacent

YEAR RANGE	HISTORICAL AERIALS	CITY DIRECTORY	SANBORN/FIM
2510 ALVIN AVENUE			
1925-1968	Agricultural Cropland	Street not listed	Unavailable for review.
1974-1982	Undeveloped Land	Not identified.	Unavailable for review.
1987-2018	Commercial	Tafatolu Christian Church (1987-2018)	Unavailable for review.

A summary of our historic review for the adjacent eastern property is provided below:

- Based on the available historical resources, as well as regulatory information prior use of the adjacent property has been adequately addressed. No Sanborn/Fire Insurance Maps are available for the adjacent property; however, sufficient information was accumulated from aerial photographs and city directories and no significant data gaps were identified.
- The historical aerial photographs indicate that the entirety of the adjacent property was developed for its present commercial use between 1982 and 1987.
- No environmental concerns were identified during the historical review.

Southern Adjacent

YEAR RANGE	HISTORICAL AERIALS	CITY DIRECTORY	SANBORN/FIM
2475-2493 ALVIN AVENUE			
1925-1968	Agricultural Cropland	Street not listed	Unavailable for review.
1974-1987	Undeveloped Land	Not identified	Unavailable for review.
1998-2018	Commercial	Multi-tenant commercial with multiple medical/dental clinics.	Unavailable for review.

A summary of our historic review for the adjacent southern property is provided below:

- Based on the available historical resources, as well as regulatory information prior use of the adjacent property has been adequately addressed. No Sanborn/Fire Insurance Maps are available for the adjacent property; however, sufficient information was accumulated from aerial photographs and city directories and no significant data gaps were identified.
- The historical aerial photographs indicate that the entirety of the adjacent property was developed for its present multi-tenant commercial use between 1987-1998.
- Please see [3.3.3 Off-Site Regulatory Database Review](#) for additional discussion of the medical/dental clinics.

Western Adjacent

YEAR RANGE	HISTORICAL AERIALS	CITY DIRECTORY	SANBORN/FIM
2450 ALVIN AVENUE			
1925-1968	Agricultural Cropland	Street not listed	Unavailable for review.
1974-2018	Commercial	US Postal Service Station (1976-2018), San Jose Heating and Air Conditioning (2018)	Unavailable for review.

A summary of our historic review for the adjacent western property is provided below:

- Based on the available historical resources, as well as regulatory information prior use of the adjacent property has been adequately addressed. No Sanborn/Fire Insurance Maps are available for the adjacent property; however, sufficient information was accumulated from aerial photographs and city directories and no significant data gaps were identified.
- The historical aerial photographs indicate that the entirety of the adjacent property was developed for its present commercial use between 1968 and 1974.
- No environmental concerns were identified during the historical review.

3.3 Environmental Records Review

At the time of writing this report, an eScreenLogic EPA-certified environmental professional (EP) reviewed regulatory database information for reported hazardous materials and hazardous waste generator sites in accordance with ASTM Standard E 1527-13. The record base search was provided by a third party who searched the required Federal and State databases with the search radii as established by the ASTM standard. The results of this search are summarized in the Regulatory Database Summary Table below (Section 3.3.1). The results specific to the subject site are presented in Section 3.3.2 while the results specific to neighboring sites are presented in Section [3.3.3 Off-Site Regulatory Database Review](#). The regulatory database search can be viewed in its entirety in Appendix - [Regulatory Database Record Report](#).

3.3.1 Regulatory Database Review

The results of the regulatory database search are summarized in the table below. These search results rely on the accuracy of the data provided by the third-party vendor, the date at which the databases are updated, and assumption the locations (latitude and longitude) of the identified databases are correct. The full regulatory database records search is provided in Appendix - [Regulatory Database Record Report](#).

Regulatory Report Summary

DATABASE	SEARCH RADIUS	TARGET PROPERTY	WITHIN 660FT	660FT TO 1320FT	1320FT TO 2640FT	2640FT TO 5280FT	TOTAL

3.3.2 Subject Site Regulatory Database Review

The results of the regulatory database search were reviewed by the an EPA-certified environmental professional (EP) specific to the subject site address as well as "orphan or non-plottable" sites which may contain findings specific to the subject site. The results specific to the subject site are summarized below. If warranted, additional review of available regulatory files, on-line information, and/or client provided information is additionally presented to provide an environmental professional opinion on the potential environmental risk associated with the identified regulatory finding.

The following records were identified on the Subject Site property.

Target Property Summary

DATABASE	SITE NAME	ADDRESS	DIST. (FT) / DIR.	ELEV. DIFF. (FT)	COMMENTS
HAZNET (2), RCRA NON GEN, FINDS/FRS	THINH V NGUYEN MD__INC, EAST VALLEY COMMUNITY CLINIC, MAR MONTE COMMUNITY CLINIC	2470 ALVIN AVE (VARIOUS SUITES), SAN JOSE, CA, 95121	0.00	0	Please see discussion below.

SITE NAME: THINH V NGUYEN MD__INC, EAST VALLEY COMMUNITY CLINIC, MAR MONTE COMMUNITY CLINIC

ADDRESS: 2470 ALVIN AVE (VARIOUS SUITES), SAN JOSE, CA, 95121

FINDINGS: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – **Regulatory Database Records Report** for further details):

- The above-listed businesses and street address are associated with the subject site.
- The MAR MONTE COMMUNITY CLINIC is registered with the EPA (FINDS/FRS) as a having "other hazardous waste activities". In September of 2017 this business was verified to be a RCRA non-generation (RCRA NON GEN) facility.
- In December of 1992, the THINH V NGUYEN MD__INC was listed as a registering a hazardous waste identification (HAZNET). The ID number was listed as inactive in June of 2012. There are no recorded manifests on record of this facility generating and disposing of waste to designated TSDs.
- In November 2010, the EAST VALLEY COMMUNITY CLINIC was listed as a registering for hazardous waste identification (HAZNET). The ID number was listed as inactive in June of 2011. There is one manifested listing of an ultra-small quantity of "laboratory waste chemicals" being disposed of off-site.
- It is the EP's experience that medical-related facilities produce biological wastes, small quantities of photographic wastes, stale pharma, and/or disinfection related wastes associated with their operation. Based on the above information, it is the EP's opinion that the above regulatory listings are not considered a REC or vapor intrusion concern to the subject site at this time.

3.3.3 Off-Site Regulatory Database Review

The EPA-certified environmental professional (EP) has reviewed the findings of the Regulatory Database Report for the surrounding properties not associated with the subject site which are residing within 500-feet of the subject site. Additionally, regulatory database findings associated with state and/or federal superfund sites (where identified within one mile of the subject site) were screened by the EP. As referenced in the "comments" column of the Off-Site Regulatory Database Summary Table presented below, sites where documented releases have occurred and it is the environmental professional's opinion that these sites pose a potential to represent a Recognized Environmental Condition (REC) and/or Controlled or Historical Recognized Environmental Conditions (CREC or HREC) to the subject site, additional discussion is provided.

Per the EP's review and interpretation of available information, other sites which were identified in the regulatory database search but are not summarized in the table below, were not deemed by the professional to pose an increased environmental risk to the subject site for the following reasons: a) Site(s) only hold an operating permit with no documented violations and/or releases to the soil, groundwater, and/or vapor media; b) Site(s) have been granted "No Further Action" by applicable regulatory agency and/or Corrective Action is on-going under the guidance of applicable regulatory agency and/or subject site was not identified as a responsible party, contributor, or off-site impact; c) Site(s) had no documentation indicating they impacted the subject site's soil, groundwater, and/or vapor media; and/or d) Site(s) distance and/or topographic position relative to the subject site reduces the level of risk associated with the Site(s).

The following records (associated with facilities of environmental significance) were identified on adjacent and/or surrounding properties:

Surrounding Properties Summary

DATABASE	SITE NAME	ADDRESS	DIST. (FT) / DIR.	ELEV. DIFF. (FT)	COMMENTS
FINDS/FRS, CERS HAZ	IMAGE DENTAL	2493 ALVIN AVE, SAN JOSE, CA, 95121	>60/SW	-1	Site identified as a hazardous waste generator. No reported registrations, violations, and/or releases of hazardous materials into the soil and/or groundwater media thus not considered a REC at this time.
SANTA CLARA CUPA, HAZNET (2), FINDS/ FRS, CERS HAZ, SANTA CLARA CUPA	TRINEW DENTAL CARE INC, ALVIN DENTAL CARE	2479 ALVIN AVE, SAN JOSE, CA, 95121	>60/SW	0.0	Site identified as a hazardous waste generator of medical related waste including: "silver waste, unspecified organic liquid mixture, and photochemicals/ photoprocessing waste"). No reported releases of hazardous materials into the soil and/or groundwater media thus not considered a REC at this time.
HAZNET, SANTA CLARA CUPA	LION CLINIC	2489 ALVIN AVENUE, SAN JOSE, CA, 951210000	>60/SW	-1.0	Site identified as a hazardous waste generator of "silver waste". No reported violations, and/or releases of hazardous materials into the soil and/or groundwater media thus not considered a REC at this time.

SITE NAME: EXXON #7-3704, TULLY VALERO, JC AUTO CARE INC, QUALITY TUNE UP #64, TULLY ROAD AUTO CARE

ADDRESS: 1610 TULLY RD, SAN JOSE, CA, 95122,

FINDINGS: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – **Regulatory Database Records Report** for further details):

- This site is located >280 feet NW of the subject site.
- Reviewed regulatory agency information identified this site as an auto repair & fueling facility that generates hazardous waste with four historical USTs, three active USTs, and a Leaking Underground Storage Tank (LUST) Case involving a release of gasoline to groundwater media.
- The case received closure on 7/24/2008. The Case Closure Letter dated 7/24/2008, states:
 - "Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells... The levels of residual contamination and any associated site risk are expected to reduce with time."
- Groundwater flow is identified to the northwest, away from the subject site.
- Therefore, the above conditions at the subject site, as interpreted by the EP, DO NOT represent a potential vapor migration/intrusion concern or REC to the subject site at this time.

SITE NAME: CHEVRON #9-4655

ADDRESS: 1648 TULLY RD, SAN JOSE, CA, 95122

FINDINGS: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – **Regulatory Database Records Report** for further details):

- This site is located >310 feet NNW of the subject site.
- Reviewed regulatory agency information identified this site a historical fueling station with four historical USTs, and a Leaking Underground Storage Tank (LUST) Case involving a release of gasoline to groundwater media.
- The case received closure on 12/17/2004. The Case Closure Letter dated 12/17/2004, states:
 - "Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells... The levels of residual contamination and any associated site risk are expected to reduce with time."
- Groundwater flow is identified to the west, which is generally away from the subject site.
- Therefore, the above conditions at the subject site, as interpreted by the EP, DO NOT represent a potential vapor migration/intrusion concern or REC to the subject site at this time.

SITE NAME: QUEEN CLEANERS**ADDRESS:** 2511 S KING RD, SAN JOSE, CA, 951221825

FINDINGS: The regulatory database identified this site with the following information (the following information are summarized excerpts from the regulatory data (Please see Appendix – **Regulatory Database Records Report** for further details):

- This site is located 400 feet ENE of the subject site.
- Reviewed regulatory agency information identified this site as a drycleaner with a Voluntary Cleanup Program (VCP) case involving a release of Tetrachloroethene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), and vinyl chloride that impacted soil, soil vapor media. The case was reported as “closed” with land-use restrictions on 8/3/2018.
- Reviewed regulatory agency files identified a letter from the DTSC dated 8/3/2018 that states:
 - "Soil, soil vapor, groundwater, and indoor air samples were collected in 2015... The detected concentrations of these contaminants [PCE, TCE, 1,2-DCE, vinyl chloride] in soil, groundwater, and indoor air samples were all below the applicable DTSC screening levels and the United States Environmental Protection Agency Regional Screening Levels (USEPA RSLs) for residential (unrestricted) land use... Soil vapor sampling was conducted in November 2016 to further characterize the extent of PCE in soil vapor to the southeast of the Site... DTSC entered into a LUC with King Plaza LLC, which was recorded with Santa Clara County on November 21, 2017. The LUC restricts sensitive land uses on the Site and requires that any disturbance of soil be done in accordance with a Soil Management Plan approved by DTSC. Additionally, construction of a new building or buildings at the Site without prior DTSC approval is prohibited. Based on our review of the submitted reports, DTSC concludes that the scope of work under the Voluntary Cleanup Agreement has been completed and no further action is required at the Site beyond what is required by the LUC, including the annual LUC compliance inspections and five-year review reports..."
- No off-site impacts were identified.
- Therefore, the above conditions at the subject site, as interpreted by the EP, DO NOT represent a potential vapor migration/intrusion concern or REC to the subject site at this time.

3.4 Agency Records Review

If pertinent regulatory files and/or records are identified and are associated with identified environmental concerns for the subject site and/or off-site listings, that information (as provided to eScreenLogic as of the date of this report) has been added into Sections [3.3.2 Subject Site Regulatory Database Review](#) or [3.3.3 Off-Site Regulatory Database Review](#) in general accordance with ASTM E 1527-13 practice. The purpose of the additional regulatory agency file review is to obtain sufficient information to assist eScreenLogic personnel in determining if a REC, HREC, CREC, or a De Minimis condition exists at the subject site in connection with the identified database listings. The following additional environmental records were reviewed to supplement the standard environmental record database search discussed in Sections [3.3.2 Subject Site Regulatory Database Review](#) and [3.3.3 Off-Site Regulatory Database Review](#).

State and Federal Agencies

DATE	RESOURCE	COMMENTS
09/18/20	Environmental Protection Agency (EPA)	Information was available for the subject site. See Appendix Regulatory Agency Records.
09/18/20	GeoTracker, Water Boards' Data Management System	Files were available for sites of concern near the subject site. See Appendix Regulatory Agency Records.
09/18/20	EnviroStor, Department of Toxic Substances Control's Data Management System	Files were available for sites of concern near the subject site. See Appendix Regulatory Agency Records.
09/18/20	CalEPA Regulated Site Portal	According to the online database search, no records were on files for the subject site.

Local Agencies

DATE	RESOURCE	COMMENTS
09/18/20	City of San Jose Fire Department	As of the date of this report, eSL has not received a response from this agency.
09/18/20	Santa Clara County	As of the date of this report, eSL has not received a response from this agency.

- eScreenLogic requested regulatory files for the subject site and/or off site concerns; however, as of the date of this report, limited agency response has been received. Based on the quality of information obtained from other sources, the EP does not consider the lack information from regulatory agencies a significant data gap.

Please see Appendix [Regulatory Agency Records](#).

3.5 Vapor Migration

Indoor air quality concerns are generally excluded from the scope of ASTM E1527-13 and this assessment. The migration of volatile compounds through either volatilization of dissolved groundwater plumes or vapor advection and dispersion from relatively nearby sources (on- or off-site) caused by a documented release of hazardous substances or petroleum products to the subsurface environment can represent a REC to the subject site in certain conditions.

For the purposes of this assessment, the potential for vapor migration that may represent a REC to the subject site was evaluated by the EP using a limited screening method based on the type of contaminant, location of contaminant (or release) with relation to the subject site, documented extent of chemicals in subsurface, and groundwater flow direction. In addition, screening tools created by regulatory agencies (EPA and various state agencies) may be used to evaluate the significance of a release with respect to the vapor migration and/or vapor intrusion potential concerns. This screening approach is not to be confused with a human health risk assessment, but rather a conservative approach at assessing if a possible risk exists. Please see Sections [3.3.2 Subject Site Regulatory Database Review](#) and [3.3.3 Off-Site Regulatory Database Review](#) which summarize the findings of this assessment.

4.0 INTERVIEWS

During this ESA, eScreenLogic conducted interviews in connection with the subject site. The information gained from the interviews conducted by eScreenLogic for this ESA were obtained from sources considered reliable and believed to be true and correct. However, eScreenLogic has made no independent investigation as to such matters and undertakes no responsibility for the accuracy of these items.

At the time of this report, eScreenLogic attempted to conduct interviews with the owner and past owners, operators and occupants:

- Property owner contact information was not made available at the time of writing this report. Based on the site inspection and other informational resources, the EP does not consider the lack of an owner interview a significant data gap.
- Interviews with past owners, operators, and occupants were not conducted. This is a data gap. However, based on information identified in the regulatory database report and site reconnaissance, the environmental professional does not consider this to be a significant data gap.

5.0 FIELD RECONNAISSANCE INTRODUCTION

The objective of the field reconnaissance is to visually and physically observe the property and any structure(s) located on the property in order to determine the likelihood of environmental impact to the property.

5.1 Site Contact Interview

The following is the response from the interview of the site contact made during the site reconnaissance.

QUESTION	ANSWER
Date	September 24, 2020
Site Contact Name	Dong Duong
What is your title/position?	Real Estate Broker and Listing Agent
How long have you been employed at this location?	20 years.
What was the year of construction?	Unknown.
What is the current occupant/s? Describe their operations.	Medical offices, all outpatient services.
What was the past occupant/s? Describe their operations.	Similar.
Do you have an operational permit? If so, for what purpose?	No.
Are there any previous Environmental studies or surveys associated with this address?	No, but a Phase I was completed on the adjacent property at 1661 Burdette Drive recently.
Is there a site map, fire emergence map, and/or rent roll available?	Yes; map and tenants posted onsite.
What is the plan for future use of the property?	Site use is anticipated to remain the same.

5.2 Subject Site Observations

The following lists the areas of the subject site that were or were not accessible during our site visit.

QUESTION	ANSWER
What locations on the subject site WERE observed/inspected to evaluate the environmental condition of the subject site?	The interior of three vacant units and the exterior of the property were available for observation.
What locations on the subject site WERE NOT observed/inspected to evaluate the environmental condition of the subject site? (not accessible)	Due to COVID-19, the active practices were unavailable for observation. Their corresponding storage buildings were also unavailable.
Were there any discrepancies noted in property boundary? Different from the image provide?	No.
Were adjacent properties observed from the subject property premises? Were any items of environmental concern identified?	Yes. No readily visible items of environmental concern were observed.

5.3 Observations Checklist

The following are the observations that were collected specifically to the ASTM inspection criteria for "*Interior and Exterior Observations*".

ASTM OBSERVATIONS	INSPECTOR / CONTACT OBSERVATIONS (YES/NO)	COMMENTS
Emergency Generators	No	
Elevators	No	
Air Compressors	No	
Hydraulic Equipment	No	
Evidence of Aboveground Storage Tanks	No	
Drums, Barrels and/or Containers > 5 Gallons	Yes	Buckets of paint were observed inside of Suite 2.
Cleaning and/or Similar Supplies	No	

ASTM OBSERVATIONS	INSPECTOR / CONTACT OBSERVATIONS (YES/NO)	COMMENTS
Evidence of Underground Storage Tanks	No	
Sumps, Cisterns, Catch Basins and/or Dry Wells	Yes	Stormwater catch basins were observed within the landscaping in the courtyard.
Grease Traps	No	
Septic Tanks and/or Leach Fields	No	
Oil/Water Separators	No	
Pipeline Markers	No	
Interior Floor Drains	Yes	A shower drain was observed in Suite 2.
Pad or Pole-Mounted Transformers and/or Capacitors	Yes	A pad-mounted transformer was observed in the northern corner of the parcel.
Stressed Vegetation	No	
Stained Soil	No	
Stained Pavement or Similar Surface	Yes	Minor staining was observed in the parking lot.
Leachate and/or Waste Seeps	No	
Trash, Debris and/or Waste Materials	Yes	Sample collection receptacles on the outside indicate generation of biohazardous waste.
Dumping or Disposal Areas	Yes	A typical solid waste dumpster was observed in the northern corner of the parcel.
Construction/Demolition Debris and/or Dumped Fill Dirt	Yes	A pile of fill dirt and construction debris was observed in the northern corner of the parcel.

ASTM OBSERVATIONS	INSPECTOR / CONTACT OBSERVATIONS (YES/NO)	COMMENTS
Surface Water Discoloration, Odor, Sheen and/or Free-Floating Product	No	
Strong, Pungent or Noxious Odors	No	
Exterior Pipe Discharge and/or Other Effluent Discharges	No	
Laboratory Hoods and/or Incinerators	No	
Waste Treatment System and/or Water Treatment Systems	No	
Compressor Blowdown	No	
Surface Water Bodies	No	
Quarries or Pits	No	
Additional/Other Observations	No	

Regarding the above referenced “5.3 Observations Checklist” items marked as “YES”; at the time of the on-site observations, there were no obvious signs of significant hazardous material/waste disposal and/or hazardous material/waste leakage and/or surface staining in the area of the above referenced items. If the above referenced items are not being utilized on a daily basis, eScreenLogic recommends that they should be removed and disposed of in accordance with local, state, and federal regulations. In addition, eScreenLogic recommends that the subject site property owner should take all appropriate action to ensure that the above referenced items are in compliance with local, state, and federal regulations. Therefore, based on the aforementioned information regarding the above referenced items; it is eScreenLogic environmental professional’s opinion that this information does not appear to represent a Recognized Environmental Condition (REC) in connection with the subject site at this time.

6.0 DATA GAPS

Data gaps with the information gathered for this assessment exist (if applicable) and are addressed in the appropriate sections of this Report. However, because the data gaps were not determined to be material in identifying Recognized Environmental Conditions, they are not considered by ASTM standards to be “significant” and, therefore, are not individually addressed in this section. Significant data gaps that are identified by the EP are addressed in the appropriate sections of this Report.

7.0 ABOUT THIS ENVIRONMENTAL SITE ASSESSMENT REPORT

On September 17, 2020, Dong Duong of C21 Real Estate Alliance retained eScreenLogic to conduct a Phase I Environmental Site Assessment of the property at 2470 Alvin Avenue, San Jose, CA, 95121 (herein, the “subject site” or “subject property”). This assessment was performed in general conformance with ASTM E1527-13, “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,” following all prescribed methodologies and protocols detailed in this Practice.

Any environmental Site Assessment that meets or exceeds the above-described methods is presumed valid under all applicable standards. Any exceptions to, or deletions from, this Practice are described in this report.

This report is valid for 180 days beginning September 28, 2020.

7.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Practice E1527-13) affecting the subject property that: 1) constitute or may result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in this ESA Report intended to be used by the Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property’s overall development potential, the associated market value and the impact of applicable laws restricting financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA is thus intended to assist the user in satisfying “one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections)” on CERCLA Liability as defined at 42 U.S.C. §9601 (35) (B). In order to maintain landowner liability protections, the user also has a “continuing obligation to not interfere with activity and use limitations associated with the property,” must take “reasonable steps to prevent releases,” and must “comply with legal release reporting obligations” (ASTM E1527-13).

7.2 Scope of Work

In accordance with ASTM Practice E1527-13, eScreenLogic's assessment activities included: 1) a review of available historical resources (e.g. historical aerial photographs, city directories, and fire insurance maps; 2) a review Federal, State, County, and Local regulatory agency records; 3) a review of a regulatory database report provided by a third-party vendor; 4) onsite reconnaissance of the subject property and adjacent properties; and 5) interviews, when reasonably possible, with onsite personnel and the subject site owner(s).

During the site visit, an eScreenLogic representative conducted site reconnaissance to assess the possible presence of petroleum products and/or other hazardous materials on the subject site and made every reasonable effort to interview site personnel about current and past subject site use.

7.3 Report Reliance

In accordance with the terms of eScreenLogic's Client Services Agreement, which governs the nature, scope, and purpose of this ESA, all reports, both verbal and written, are for the sole benefit of C21 Real Estate Alliance, its affiliates, successors and assigns, as well as lending institutions involved in securing financing for the subject property. Other parties may not rely on this report without written consent from eScreenLogic.

Third parties coming into possession of all or part of this report, whether verbal or written, must obtain written permission from eScreenLogic for report reliance. Specific conditions and fees may apply to third-party reliance letters. In the absence of a written agreement with eScreenLogic, no third party shall have any rights of recourse or recovery whatsoever under any course of action against eScreenLogic, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold eScreenLogic as well as C21 Real Estate Alliance and their respective officers, employees, vendors, successors, and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such report reliance. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply for unauthorized use of this report.

All facsimile transmissions, accompanying documents, and signatures shall be treated as original documents and shall bind and inure the parties involved in this agreement.

7.4 Significant Assumptions

While compiling this report, eScreenLogic has assumed the veracity of sources of information widely considered within the industry to be authoritative, true, and correct. Nevertheless, eScreenLogic has conducted no independent survey of the subject site nor made any independent investigation verifying the veracity of its sources. eScreenLogic assumes no responsibility for the accuracy of these sources. All descriptions of dimensions, capacities, quantities, distances, historical site use, and ownership history information gathered from these sources are provided to assist the Client in visualizing the property and evaluating its likely exposure to environmental risk.

Further, it is assumed that all environmental site assessments contain data gaps. Data gaps that may be filled in by reasonable inference or that are unlikely to have a material effect on the environmental health of a property are considered insignificant and have been identified as such throughout this report. Significant data gaps, such as the current disposition of an environmental cleanup action or the number of hazardous materials used, stored, and/or hazardous waste generated on the subject site, are also identified and discussed. Significant data gaps may result in a recommendation for further assessment.

7.5 Limitations

eScreenLogic warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in ASTM Practice E1527-13 at "Scope of Work." These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. However, even with the proper application of these methodologies, conditions may exist on the subject property that could not be identified within the scope of the assessment or which were not reasonably identifiable from available information. Further, the conclusions and findings set forth in this report are strictly limited in time to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. eScreenLogic makes no other warranty, either expressed or implied.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is therefore subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those interviewed.

ASTM Practice E1527-13 does not address requirements of any state or local laws or of any federal laws other than the all-appropriate inquiry provisions of the landowner liability protections. Further, this report does not intend to address all possible safety concerns, if any, associated with the subject property. While eScreenLogic may comment on such matters, this report may not be construed as or used to certify that conditions on the subject site do not pose safety or health risks to its occupants or their visitors.

7.6 Limiting Conditions

No ESA can wholly eliminate uncertainty about whether environmental concerns affect the subject property. This report, therefore, is intended to reduce rather than eliminate uncertainty.

The performance of this ESA does not, in and of itself, meet the eligibility requirements qualifying landowners for certain liability protections set forth in 40 Code of Federal Regulations (CFR), Part 312, and authorized under the CERCLA.

Conditions may exist which were not identified as a result of our site reconnaissance or review of available historical and regulatory resources which might otherwise impact our conclusions concerning the condition of the subject property. Any conditions discovered or revealed which were not identified during the completion of this assessment should be reported to eScreenLogic upon discovery and may impact the conclusions and recommendations of this Report.

eScreenLogic utilized limited information concerning regulatory compliance in the preparation of this ESA report; however, this report is not intended as a compliance audit and may not be assumed to be, relied upon, or otherwise utilized as evidence of regulatory compliance.

In addition, the findings and conclusions expressed in this report are subject to all the limitations inherent to the methodologies prescribed in ASTM Practice E1527-13. Specific limitations, such as the unavailability of owner contact information, responses to FOIA requests not made available within agreed-upon service deadlines, areas inaccessible to the eScreenLogic inspector at the time of site reconnaissance, etc. are noted and their impact discussed in the appropriate sections of this report.

7.7 Limitations of Liability

eScreenLogic's liability, if any, for any claim, costs, loss or damage resulting from eScreenLogic's negligence, if any, relating to this agreement or the work performed pursuant hereto shall not exceed the amount of the payment(s) actually received by eScreenLogic hereunder; provided, however, eScreenLogic's liability, if any, for claims involving "professional liability", "general liability" or "pollution liability" shall not exceed the amount of insurance maintained by eScreenLogic. eScreenLogic currently maintains (i) professional liability insurance, general liability insurance, and pollution liability insurance in the amount of \$1,000,000 and an umbrella liability policy in the amount of \$2,000,000.

7.8 Dispute Resolution

eScreenLogic and C21 Real Estate Alliance agree to make good-faith efforts to settle any dispute or claim that arises under this Agreement or the work performed under its conditions through discussion and negotiation. The dispute resolution process will be initiated by either party giving the other party written notice that a dispute exists ("Notice of Dispute"), setting forth the facts and circumstances surrounding the dispute. Within 15 days of the delivery of the Notice of Dispute, the Parties shall meet at a mutually acceptable date, time, and place, attempting to informally resolve the dispute. If the dispute has not been resolved through these negotiations, the Parties agree that any claim or action relating in any way to this Agreement or the work performed pursuant hereto, shall be resolved through binding arbitration pursuant to the rules of the American Arbitration Association. The site of any arbitration proceedings shall be at eScreenLogic, 11344 Coloma Road, Gold River, CA 95670 unless otherwise agreed to by the Parties.

7.9 Legal Venue

Our Client Services Agreement embodies the entire agreement and understanding between eScreenLogic and C21 Real Estate Alliance, and supersedes any prior agreements and understandings relating to its subject matter. This agreement shall be governed by and construed in accordance with the laws of Sacramento County, California (without regard to its conflict of laws provisions). The parties hereto hereby agree that the venue of any action under this agreement shall be exclusively in Sacramento County, California and that this agreement is performable in part in California.

Subject: Fuel Leak Site Case Closure Exxon #7-3704, 1610 Tully Road, San Jose; Case No. 05-016, SCVWDID No. 07S1E14Q02f

Ladies and Gentlemen:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

Please note the following conditions still remain at the site: residual contamination remains in soil of 412 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 2.81 ppm Benzene, 5.11 ppm Toluene, 1.88 ppm Ethylbenzene, 8.58 ppm Xylenes, and 0.0124 ppm Methyl tert-Butyl Ether (MtBE); and in shallow groundwater of 943 parts per billion (ppb) TPHg, 54.5 ppb Benzene, 1.5 ppb Xylenes, 676 ppb MtBE, and 83.9 ppb Tert Butyl Alcohol (TBA).

Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

Exxon #7-3704
July 24, 2008
Page 2 of 2

If you have any questions regarding the enclosed case closure form, please call Ms. Lani Lee of the Local Oversight Program at (408) 918-1977. Thank you.

Sincerely,

Nicole Pullman
Program Manager
Hazardous Materials Compliance Division
Local Oversight Program

Subject: Fuel Leak Site Case Closure Exxon #7-3704, 1610 Tully Road, San Jose; Case No. 05-016, SCVWDID No. 07S1E14Q02f

Ladies and Gentlemen:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Ben Gale, Director

County of Santa Clara

Environmental Resource Agency
Department of Environmental Health

CASE CLOSURE SUMMARY Leaking Underground Fuel Storage Tank Program

Date: September 25, 2007

I. AGENCY INFORMATION

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown		
Site characterization complete? Yes		Date Approved by Oversight Agency: 9/25/07
Monitoring wells installed? Yes	Number: 18 groundwater mw 3 vapor wells; 1 sparge well	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 4.79'	Lowest Depth: 24.58'	Flow Direction: Northwest
Most Sensitive Current Use: Potential Drinking Water		

Summary of Production Wells in Vicinity: There are no active water supply wells located within a ¼-mile radius of the site. There is one abandoned well (07S01E14Q002) located upgradient almost ¼-mile away. There are many environmental monitoring wells located near the site. It is unlikely that the contamination from this site will impact these wells.									
Are drinking water wells affected? No					Aquifer Name: Santa Clara Valley Basin				
Is surface water affected? No					Nearest SW Name: Lower Silver Creek, ~4,043' east				
Off-site Beneficial Use Impacts (Addresses/Locations): None									
Reports on file? Yes					Where are reports filed? County of Santa Clara, Dept. of Environmental Health				
TREATMENT AND DISPOSAL OF AFFECTED MATERIAL									
Material		Amount (Include Units)		Action (Treatment or Disposal w/Destination)		Date			
Tank		3 – 8,000 gal. 1 – 550-gal.		Removed; Destination Not Reported		8/87 9/87			
Piping		Not Reported		Not Reported					
Free Product		--		--		--			
Soil		500 cubic yards		Disposed; Destination Not Reported		9/87

Description of Interim Remediation Activities: soil vapor extraction and air sparge; and groundwater extraction.									

NA – Not Analyzed

Notes:

1. Soil sample collected from well MW-8 at 13 feet below the ground surface (ft bgs) in September 1990.
2. Soil sample collected from well MW-8 at 15 ft bgs in September 1990.
3. All soil samples analyzed for organic lead were not reported to have detectable concentrations above the laboratory reporting limits.
4. Soil sample collected from boring SB1 at 18-18.5 ft bgs on 11/9/99.
5. Soil sample collected from boring BH4 at 20-21 ft bgs on 2/8/07.
6. Soil sample collected from boring BH5 at 19.5-20 ft bgs on 2/8/07.
7. Soil sample collected from boring BH1 at 19.5-20 ft bgs on 2/7/07.
8. Groundwater sample collected from well MW-2 on 10/27/92.
9. Groundwater sample collected from well MW-2 on 5/6/07. Laboratory noted "unidentified hydrocarbons detected."
10. Groundwater sample collected from well MW2 on 7/1/92.
11. Grab groundwater sample collected from boring SB-1 at 14 ft bgs on 11/9/99.
12. Groundwater sample collected from well MW2 on 8/11/99.
13. Groundwater sample collected from well VW-2 during the last groundwater sampling event on 8/7/07.
14. Groundwater sample collected from well MW2 on 5/21/99, which was the last time groundwater samples were analyzed for TPHd. Laboratory noted "unidentified hydrocarbons detected."
15. All samples collected during the last groundwater sampling event on 8/7/07.
16. Groundwater sample collected from well MW13 during the last groundwater sampling event on 8/7/07.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Environmental Health Department staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: The site is an active retail gasoline station. Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.		
Should corrective action be reviewed if land use changes? Yes, See Site Management Requirements		
Number of Wells Commissioned: 22 (18 groundwater, 3 vapor, 1 sparge)	Number of Wells Decommissioned: 0	Number of Wells Retained: 22*
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

* All wells to be destroyed prior to issuance of closure letter and documents.

V. ADDITIONAL COMMENTS, DATA, ETC.

Site History:

1987 – In August, three 8,000-gallon underground storage tanks (USTs) were removed from the site. There is no documentation regarding sampling following the removal of these USTs. An Organic Vapor Analyzer (OVA) was used to screen the soils and determine that soils encountered from 3 to 14 feet below the ground surface (ft bgs) had OVA readings of greater than 100 parts per million (ppm). The contaminated soil was stockpiled onsite and aerated from 8/12 through 9/18/87. Approximately 500 cubic yards of soil were removed from this excavation and aerated.

At the time of UST removal, groundwater was encountered at approximately 14 ft bgs, so soil samples were not collected from the base of the excavation. Composite soil samples were collected from the stockpiled soil prior to aeration and were reported to have up to 2,297 ppm Total Volatile Hydrocarbons (TVH). No report was submitted on the removal of the fuel USTs.

In September, a waste oil UST was removed from the site. 1 soil sample TP170 was collected from 8 ft bgs below the center of the UST and was analyzed for Total Oil and Grease (TOG), Total Petroleum Hydrocarbons as Diesel (TPHD), and Priority Pollutants by EPA Method No. 8240. No constituents were reported to be present above the laboratory reporting limits.

Following aeration, 3 soil samples were collected per every 50 cubic yards of treated soil. The samples were then composited by the laboratory prior to chemical analysis. 15 composited samples were analyzed for TVH and were reported to have a maximum concentration of 8.56 ppm. All soils were disposed of off-site.

In December, 25 soil vapor samples were collected from 18 locations (SP-1 through SP-18) onsite at depths ranging from 5 to 25 ft bgs. The samples were analyzed for Benzene, Toluene and Xylenes and maximum concentrations reported for Benzene and Xylenes were 6 ppm and

maximum Toluene concentration was 1 ppm.

- 1988 – In June, 3 monitoring wells (MW1 through MW3) were installed onsite to a maximum depth of approximately 34.5 ft bgs. 3 soil samples (one from each well) were submitted for chemical analysis and were not reported to have detectable concentrations of Total Petroleum Hydrocarbons (TPH), Benzene, Toluene, Ethylbenzene and Xylenes above the laboratory reporting limits.

Periodic sampling of the groundwater monitoring wells also began at this time.

- 1990 – In April, 5 borings (B5 through B8) were advanced onsite and two were converted to groundwater monitoring wells (B7/MW-4 and B8/MW-5) were installed. 23 soil samples were collected from these borings. The maximum concentrations were reported for boring B5 of 570 ppm TPH as Gasoline (TPHg), 0.48 ppm Benzene, 1.2 ppm Toluene, 6.1 ppm Ethylbenzene, and 6.5 ppm Xylenes.

In September, 6 borings (B-9 through B-14) to depths of up to approximately 56 ft bgs. Two borings (B-12 and B-13) were completed as monitoring wells (MW-6 and MW-7) to approximately 26 ft bgs. A deep well was completed in boring B-14/MW-8 to a depth of approximately 52 ft bgs. During the development of deep well MW-8, drawdown was noted in the shallower wells, which could suggest communication between the water-bearing zones.

26 soil samples were collected from these borings. All were reported not to have concentrations of contaminants of concern (COCs) above the laboratory reporting limits, except for boring B-11 and B-14. The sample collected from 16.5 ft bgs in boring B-11 was reported to have low concentrations of TPHg, Ethylbenzene and Xylenes. Boring B-14/MW-8 was reported to have up to 2,300 ppm TPHg, 3.4 ppm Benzene, 10 ppm Toluene, 46 ppm Ethylbenzene, and 200 ppm Xylenes for samples collected at 13 and 15 ft bgs.

- 1991 – In February, 4 borings (B-15 through B-18) were advanced onsite and 3 were completed as vapor wells (B-16/VW-1, B-17/VW-2, B-18/VW-3). 13 soil samples were collected from these borings and were reported to have maximum concentrations of 4.7 ppm TPHg, 0.012 ppm Toluene, 0.034 ppm Ethylbenzene, and 0.069 ppm Xylenes. Benzene was not reported to be present above the laboratory reporting limit.

A 7-hour vapor extraction test was conducted. The maximum radius of influence was determined to be 32.5 feet from VW-3.

In April, a 24-hour groundwater pump and 4-hour recovery test was conducted.

In August, Boring B-19 was advanced onsite and completed as extraction well RW-1. 4 soil samples were collected and only very low concentrations of TPHg, Toluene, Ethylbenzene, and Xylenes were reported in one sample.

- 1992 – In March, 2 borings (B-20 and B-21) and completed as wells MW-9 and MW-10. 9 soil samples were collected from these borings and were not reported to have detectable concentrations of COCs above the laboratory reporting limits.

- 1993 – In July, an air sparge test was conducted by blowing air into well MW-5 with the remediation system operating. Influent concentrations were noted to increase during this test.

In May, a soil vapor (SVE) and groundwater extraction (GES) and treatment system was started-up onsite.

In September, an air sparge well (SW-1) and air sparge (AS) system were installed at the site.

- 1995 – In November, Methyl tert-Butyl Ether (MtBE) was first detected above the laboratory reporting limit

in well MW-2 at a concentration of 7.3 parts per billion (ppb). This detection was via EPA Method No. 8020. The concentration of MtBE in well MW-2 was confirmed by EPA Method No. 8260B in 1998 at a concentration of 52,000 ppb.

1997 – The SVE and AS systems were shut down due to rising groundwater levels and decreased influent vapor flow rate and concentrations. It is estimated that the SVE system removed approximately 214 pounds of volatile organic compounds.

1999 – In April, the GES system was shut down due to increased MtBE concentrations, which could not be treated by the system in order to meet the discharge requirements.

In November, 5 Geoprobe borings (SB1 through SB5) were advanced onsite to depths between 28 and 50 ft bgs. 38 soil samples were collected and reported to have maximum concentrations of 8.9 ppm MtBE. All other COCs were not reported to be present above the laboratory reporting limits.

Depth discrete grab groundwater samples were collected from each boring. A total of 18 groundwater samples were collected and reported to have maximum concentrations of 330 ppb TPHg, 8.7 ppb Benzene, 100,000 ppb MtBE, and 13 ppb Tert Amyl Methyl Ether (TAME). The highest MtBE concentration was reported for the sample collected at 14 ft bgs in boring SB1, which was located downgradient of the current underground storage tanks and near well MW-2.

2000 – Between April and May, 3 wells (MW-11, MW-12, and RW-2) were installed to depths of 50 to 55 ft bgs in the deeper water-bearing zone. 26 soil samples were collected from these borings and were reported to have maximum concentrations of 0.002 ppm Toluene, 0.0028 ppm Xylenes, and 0.77 ppm MtBE. All other COCs were not reported to be present above the laboratory reporting limits.

In June, a constant rate pumping and a step drawdown tests were conducted on well RW-2. Drawdown was not observed in the nearby shallow well MW-2.

In December, 1 groundwater well (MW-13) was installed offsite to a depth of 30 ft bgs. 4 soil samples were collected and only very low concentrations of BTEX were reported in the sample collected from 5-5.5 ft bgs. All other samples were not reported to contain COCs above the laboratory reporting limits.

2001 – In May, 2 monitoring wells (MW-14 and MW-15) were installed offsite to a depth of 30 ft bgs. 8 soil samples were collected from these 2 wells and were not reported to have concentrations of COCs above the laboratory reporting limits, except for one trace detection of Xylenes. These wells were incorporated into the quarterly groundwater monitoring program.

In March, the GES was redesigned, restarted and operated through June 2005. The GES removed and treated approximately 8,231,230 gallons of groundwater. It is estimated that 45.54 pounds of TPH (sum of TPHg and TPHd) and 131.52 pounds of MtBE were removed by the GES.

2007 – In February, 5 soil borings (BH1 through BH5) were drilled onsite to collect confirmation soil samples and also to collect grab groundwater samples in areas where the well screens were submerged. The depth of these borings ranged from 26 to 28 ft bgs. 31 soil samples were collected and were reported to have maximum concentrations of 412 ppm TPHg, 2.81 ppm Benzene, 5.11 ppm Toluene, 1.88 ppm Ethylbenzene, 8.58 ppm Xylenes, and trace concentrations of MtBE. The highest concentrations were reported for borings BH4 and BH5 located near the former UST excavation.

A grab groundwater sample was collected from each boring and were reported to have maximum concentrations of 1,900 ppb TPHg, 23.3 ppb Benzene, 26.6 ppb Toluene, 23 ppb Ethylbenzene, 175 ppb Xylenes, 40.3 ppb MtBE, and 71.8 ppb Tert Butyl Alcohol (TBA). These concentrations were similar to the concentrations from the wells.

In August, the last groundwater monitoring event was conducted. The maximum concentrations in groundwater at this time were 684 ppb TPHg, 54.5 ppb Benzene, 1.5 ppb Xylenes, 676 ppb MtBE, and 83.9 ppb TBA.

Considerations and/or Variances:

The site is an active retail gasoline station. Residual contamination remains in the soil at 412 ppm TPHg, 2.81 ppm Benzene, 5.11 ppm Toluene, 1.88 ppm Ethylbenzene, 8.58 ppm Xylenes, and 0.0124 ppm MtBE. Residual contamination remains in shallow groundwater at 943 ppb TPHg, 54.5 ppb Benzene, 1.5 ppb Xylenes, 676 ppb MtBE, and 83.9 ppb TBA. This is a significant decrease from the highest concentrations and it is likely that concentrations will continue to decrease due to natural attenuation processes.

There are no active water supply wells located within a ¼-mile radius of the site.

Site Management Requirements have been established for this site.

Conclusion:

The Department of Environmental Health believes that the residual soil and groundwater contamination at the site does not pose a continuing, significant threat to groundwater resources, human health, or the environment. Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. The Department of Environmental Health recommends that this site be closed.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Lani Lee	Title: Hazardous Materials Specialist II
Signature: 	Date: September 25, 2007
Approved by: Nicole Pullman	Title: Program Manager
Signature: 	Date: 9/25/07

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

TPH-g Total Petroleum Hydrocarbons as gasoline.

MTBE* Methyl t-butyl ether by EPA Method 8260.

MTBE Methyl t-butyl ether by EPA Method 8021.

EDB 1,2-Dibromoethane.

1,2-DCA 1,2-Dichloroethane.

BCME Bis (chloromethyl) ether.

DIPE Di-isopropyl ether.

TBA t-Butyl alcohol.

TAME tert-Butyl methyl ether.

ETBE tert-Butyl ethyl ether.

NA Not analyzed.

mg/kg Milligrams per kilogram.

TABLE 2 SOIL SAMPLE ANALYTICAL RESULTS, FORMER EXXON RS 7-3704, 1610 TULLY ROAD, SAN JOSE, CALIFORNIA

Sample ID	Depth (feet)	Date	Concentration (mg/kg)														Organic Lead
			Benzene	Toluene	Ethyl-benzene	Xylenes	TPH-g	MTBE*	MTBE	Ethanol	EDB	1,2-DCA	BCME	DIPE	TBA	TAME	
a	Secondary ion abundances were outside method requirements. Identification based on analytical judgment.																
b	Calibration Verification recovery was above the method control limit for this analyte. Analyte not detected, data not impacted.																

TABLE 1

RESULTS OF LABORATORY ANALYSES OF SOIL SAMPLES Stockpile of Backfill from the Gasoline Tank Pit, EXXON Service Station No. 7-3704, 1610 Tully Road, San Jose, California		
Sample No.	TVH	Detection Limit
0809S1 (ABC)	39.27	0.05
0809S2 (ABC)	25.10	0.05
0809S3 (ABC)	2297.00	2.00
0809S4 (ABC)	930.00	1.00
0809S5 (ABC)	1949.00	2.00
0809S7 (ABC)	109.81	0.05
0809S8 (ABC)	860.00	1.00
Note: Results in milligrams per kilogram = parts per million = ppm.		
TVH: Total volatile hydrocarbons.		

A set of composite samples of material representative of the backfill overlying the waste oil tank was also collected, labeled, transported and transferred to the laboratory in keeping with the procedures described above. The Chain of Custody Record is attached. The OVA readings of this soil were relatively low. Contaminants were expected to consist of oil with extractable rather than volatile hydrocarbons; therefore, this sample was analyzed for total extractable hydrocarbons (TEH) by using the EPA Method 3550 for extraction and modified EPA Method 8015 for analysis. Results of the analysis are presented in Table 2 and on the laboratory Record of Analysis attached.

TABLE 2

RESULTS OF LABORATORY ANALYSIS OF SOIL SAMPLE Stockpile of Backfill from the Waste Oil Tank Pit, EXXON Service Station No. 7-3704, 1610 Tully Road, San Jose, California		
Sample No.	TEH	Detection Limit
0809S6 (AB)	Nondetectable	5.0
TEH: Total extractable hydrocarbons.

Notes: TPH-g results beginning January 2002 include MTBE.

Groundwater elevations adjusted for LPH, when present, using an average specific gravity of 0.75 for gasoline.

- a The tops of casing of MW2 and RW1 were cut during installation of the remediation system.
b Depth-to-water measurement taken while remediation system was operating.
c Unidentified hydrocarbons present.
d Analysis of MTBE by EPA Method 8260.

TABLE 2 GROUNDWATER MONITORING DATA, FORMER EXXON RS 7-3704, 1610 TULLY ROAD, SAN JOSE, CALIFORNIA

Well Number	Date	Casing Elevation (feet)	Depth to Water (feet)	Groundwater Elevation (feet)	LPH Thickness (feet)	Concentration (µg/L)						
						Benzene	Toluene	Ethyl- benzene	Xylenes	TPH-g	TPH-d	MTBE
e	Analysis run past the holding time.											
f	Result out of calibration range, per laboratory narrative.											
g	The relative percent difference between the primary and confirmatory analysis exceeded 40%. Per method 8000B, the higher value was reported.											
h	Hydrocarbon result partly due to individual peak(s) in quantitation range.											
i	Secondary ion abundances were outside method requirements. Identification based on analytical judgment.											
j	Analysis by EPA Method 8260B.											
k	Laboratory Control Sample and/or Laboratory Control Sample Duplicate recovery was above the acceptance limits. Analyte not detected, data not impacted.											
l	Initial analysis within holding time. Reanalysis for the required dilution was past holding time.											
m	Concentration exceeds the calibration range and therefore result is semi-quantitative.											
µg/L	Micrograms per liter.											
LPH	Liquid-phase hydrocarbons.											
MTBE	Methyl tertiary butyl ether.											
NM	Not measured.											
TPH-d	Total Petroleum Hydrocarbons as diesel.											
TPH-g	Total Petroleum Hydrocarbons as gasoline.											
--	Not calculated, not sampled, or not analyzed.

Subject: Fuel Leak Site Case Closure at Chevron Station # 9-4655, 1648 Tully Road, San Jose, CA 95122; SCVWDID # 07S1E14K02f, LOP NO. 03-021.

Dear Mr. Lafferty and Mr. Chu:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

Please note the following conditions still remain at the site: Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

Messrs. Lafferty and Chu
December 17, 2004
Page Two

Additionally, the District records show that six onsite and one offsite groundwater monitoring wells associated with this site still exists and were not located for proper destruction. This issue will be referred to the Santa Clara Valley Water District's Well Section and could result in a Well Violation Letter and/or a notice filed with the Santa Clara County Assessor's Office stating that the wells exist at the site.

If you have any questions regarding the enclosed case closure form, please call Dave Higgins of the Santa Clara Valley Water District at (408) 265-2607, extension 3757. Thank you.

Sincerely,

Ben Gale, Director

Subject: Fuel Leak Site Case Closure at Chevron Station # 9-4655, 1648 Tully Road, San Jose, CA 95122; SCVWDID # 07S1E14K02f, LOP NO. 03-021.

Dear Mr. Lafferty and Mr. Chu:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Ben Gale, Director

CASE CLOSURE SUMMARY
Leaking Underground Fuel Storage Tank Program

Date: April 14, 2004

I. AGENCY INFORMATION

Agency Name: Santa Clara Valley Water District	Address: 5750 Almaden Expressway
City/State/Zip: San Jose, CA 95118	Phone: (408) 265-2600
Responsible Staff Person: George Cook/DJ	Title: Associate Engineering Geologist

II. CASE INFORMATION

Site Facility Name: Chevron #9-4655				
Site Facility Address: 1648 Tully Rd, San Jose, CA 95122				
RB LUSTIS Case No: ---		Local Case No: 07S1E14K02f		LOP Case No.: 03-021
URF Filing Date: 1/25/84, 12/28/87		SWEEPS No.: ---		APN: 670-02-005
Responsible Parties		Address		Phone Number
Chevron USA Products Company c/o Mark Lafferty		P.O. Box 5004 San Ramon, CA 94583-0804		(925) 842-8953
Dr. Pek Chu, DDS		2139 Tully Road San Jose, CA 95122		(408) 259-5660
Tank I.D. No.	Size in Gallons	Contents	Closed In Place/Removed?	Date
1	5,000	Gasoline	Removed	October, November 1987
2,3	10,000	Gasoline	Removed	October, November 1987
4	1,000	Waste Oil	Removed	October, November 1987
Piping		Gasoline	Removed	October, November 1987

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: There was a suspected fuel leak from the 5,000 gallon gasoline tank in January of 1984 because of the presence of water in the tank.		
Site characterization complete? Yes		Date Approved by Oversight Agency: April 14, 2004
Monitoring wells installed? Yes	Number: 16	Proper screened interval? Yes
Highest GW Depth Below Ground Surface: 17.31 feet ¹	Lowest GW Depth: 7.84 feet ²	Flow Direction: West (measured on November 17, 2003)
Most Sensitive Current Use: Potential Drinking Water		

1. Measured in monitoring well C-5 on November 20, 1991.
2. Measured in monitoring well C-8 on June 10, 1998.

III. RELEASE AND SITE CHARACTERIZATION INFORMATION (CONT.)

Summary of Production Wells in Vicinity: There is one abandoned well (07S01E14Q002) located 1,250 feet south of the site. Because of the level of contamination, the distance from the site, and the location relative to groundwater flow (cross-gradient) this well is not considered a likely receptor.									
Are drinking water wells affected? No					Aquifer Name: Santa Clara Valley Groundwater Basin				
Is surface water affected? No					Nearest SW Name: Lower Silver Creek, 3,600 feet East				
Off-site Beneficial Use Impacts: None Reported									
Reports on file? Yes					Where are reports filed? Santa Clara Valley Water District				
TREATMENT AND DISPOSAL OF AFFECTED MATERIAL									
Material	Amount (Include Units)				Action (Treatment or Disposal w/Destination)			Date	
Tank	4				Assumed Disposed			November, 1987	
Piping	Not Reported				Assumed Disposed			November, 1987	
Free Product	None Reported				---			---	
Soil	~15 cubic yards				Not Reported			October 1987	
Groundwater	1,345,527 gallons				NPDES Discharge, GAC			September 1992 to January 1996	
	23,800 gallons				Disposed, Not Reported			October 2001	
Barrels	Not Reported				Not Reported			---	
MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS BEFORE AND AFTER CLEANUP									
(Please see Attachments 3 and 4 for additional information on contaminant locations and concentrations)									
	Soil (ppm)*		Water (ppb)*			Soil (ppm)*		Water (ppb)*	
Contaminant	Before	After	Before	After ⁸	Contaminant	Before	After	Before	After ⁸
TPH (Gas)	2,400 ¹	2,400 ¹	280,000 ³	4,200	Xylene	170 ¹	170 ¹	22,000 ⁵	48
TPH (Diesel)	NA	NA	NA	NA	Ethylbenzene	25 ¹	25 ¹	6,400 ⁵	96
Benzene	5.8 ²	5.8 ²	16,000 ⁴	730	Oil & Grease	NA	NA	NA	NA
Toluene	40 ¹	40 ¹	7,600 ⁵	9.4	Heavy Metals	NA	NA	NA	NA
8240	NA	NA	270 ⁶	270 ⁶	MTBE	NA	NA	2,800 ⁷	<50
8260	NA	NA	NA	TBA ⁹ ND ⁹					
Description of Interim Remediation Activities: 1) Approximately 15 cubic yards of soil was over-excavated during removal of one of the gasoline tanks. 2) Groundwater extraction from September 1992 to January 1996. 3) A truck mounted dual phase extraction (DPE) mobile treatment system (MTS) was used to extract groundwater and soil vapor from C-1 and C-2 on October 8-12, 2001. A total of 23,800 gallons of water was extracted during this event. 94.2 pounds (15.1 gal) of hydrocarbons were recovered.									

* Soil and groundwater data from the 1984 installation of monitoring wells is not on file. A maximum of 350 ppm TPHG was detected in soil samples during the 1987 tank removal.

NA= No analysis was performed for this compound.

ND= Not detected at a concentration above detection limits.

1. Soil sample C-1 collected at a depth of 4.5-5 feet below grade on November 5-7, 1990.
2. Soil sample C-1 collected at a depth of 14-15.5 feet below grade on November 5-7, 1990.
3. Groundwater sample collected from C-1 on July 9, 1998.
4. Groundwater sample collected from C-1 on November 19, 1999.
5. Groundwater sample collected from C-1 on April 27, 1994
6. Groundwater sample collected from C-3 on November 30, 1990.
7. Groundwater sample collected from C-1 on October 8, 1997. As the analysis was performed by EPA Method 8020 and there were high concentrations of Total petroleum hydrocarbons present, it is likely that this result was artificially increased due to interference.
8. Groundwater sample collected from C-1 on May 17, 2004 unless otherwise noted.
9. TBA was detected at 83 ppb in the groundwater sample from C-6 on August 8, 2001. DIPE, TAME, ETBE, and EDB, and 1,2-DCA were not detected above detection limits.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of a water well in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. The District, County of Santa Clara Environmental Health, and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.		
Should corrective action be reviewed if land use changes? No		
Number of Wells Commissioned: 16	Number of Wells Decommissioned: 7 ¹	Number of Wells Retained: 9 ²
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

1. The seven groundwater monitoring wells installed in 1984 are believed to have been destroyed during site reconstruction and UST removal in 1987. However, no records of the well destructions is available.
2. The monitoring wells will be destroyed prior to issuance of the final closure letter.

V. ADDITIONAL COMMENTS, DATA, ETC.

Site History:

1984

February: Seven monitoring wells were installed on site, five by Gettler-Ryan and two by Kleinfelder. These wells are believed to have been destroyed during the tank pull in 1987 but documentation was not provided.

1987

October and November: In October and November the Chevron Service Station was demolished and four underground storage tanks (USTs), product lines, and dispensers were removed. Soil samples collected beneath the 10,000 gallon tank at 15 feet bgs detected a maximum of 350 ppm TPHG. After over-excavation to 18 feet bgs, soil samples did not detect petroleum hydrocarbons.

1990

November: Seven exploratory borings (B-1 to B-7) were advanced to a total depth of 30 feet bgs. Four monitoring wells (C-1 to -4) were installed at depths between 25 and 30 feet bgs. Maximum concentrations of 2,400 ppm TPHG, 40 ppm Toluene, 25 ppm Ethylbenzene, and 170 ppm Xylenes were detected in soil sample C-1 at 4.5-5 feet bgs. A maximum concentration of 5.8 ppm Benzene was detected in soil sample C-1 between 14 and 15.5 feet bgs. Groundwater sample C-3 detected maximum concentrations of 64,000 ppb TPHG, 5,600 ppb Benzene, 6,100 ppb Toluene, 3,200 ppb Ethylbenzene, and 11,000 ppb Xylenes. 1, 2-DCA was detected at a maximum concentration of 270 ppb in groundwater sample C-1.

V. ADDITIONAL COMMENTS, DATA, ETC. (CONT.)

1991

April: Four monitoring wells (C-4 to C-8) were installed offsite to a depth of 30 feet bgs. Groundwater samples in collected from these new wells on May 5th detected maximum concentrations of 60 ppb TPHG, 0.6 ppb Benzene, 2.0 ppb Toluene, and 0.4 ppb Ethylbenzene in C-6. During this sampling event higher concentrations of petroleum hydrocarbon constituents were detected in C-1 to C-3. Maximum concentrations of 75,000 ppb TPHG, 4,700 ppb Benzene, 6,100 ppb Toluene, 4,000 ppb Ethylbenzene, and 15,000 ppb Xylenes were detected in C-3.

February, May, July, and November – Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG and Benzene were 75,000 ppb, 5,900 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds or MTBE.

1992

July: Extraction well C-9 was installed to a depth of 31 feet bgs. Analysis of soil samples detected a maximum of 64 ppm TPHG, 1.0 ppm Ethylbenzene, and 3.6 ppm Total Xylenes. Benzene and Toluene were not detected in soil samples.

February, May, July, and November – Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG and Benzene were 47,000 ppb and 2,100 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds or MTBE.

1993

January, April, July, October– Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG and Benzene were 44,000 ppb and 8,300 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds or MTBE.

1994

January, April, July, October– Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG and Benzene were 150,000 ppb, 9,700 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds or MTBE.

1995

January, April, July, October– Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG and Benzene were 71,000 ppb and 7,500 ppb, respectively. MTBE was not detected (< 1000 ppb). Groundwater samples were not analyzed for volatile organic oxygenated compounds.

1996

January, April, July, October– Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 74,000 ppb, 11,000 ppb, and 1400 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds.

1997

January, April, July, October– Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 94,000 ppb, 15,000 ppb, and 2,800 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds.

V. ADDITIONAL COMMENTS, DATA, ETC. (CONT.)

1998

January, June, July, October— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 280,000 ppb, 10,000 ppb, and 40 ppb, respectively. Groundwater samples were not analyzed for volatile organic oxygenated compounds.

1999

April, July, November— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 119,000 ppb, 16,000 ppb, and 22.4 ppb, respectively. Groundwater samples did not detect volatile organic oxygenated compounds above their respective detection limits.

2000

February, May, August, November— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 62,000 ppb, 15,700 ppb, and 325 ppb, respectively. Groundwater samples did not detect volatile organic oxygenated compounds above their respective detection limits.

2001:

October 8-12: A truck mounted dual phase extraction (DPE) mobile treatment system (MTS) was used to extract groundwater and soil vapor from C-1 and C-2. A total of 23,800 gallons of water was extracted during this event. 94.2 pounds (15.1 gal) of hydrocarbons were recovered. In C-1 concentrations of TPHG were reduced from 57,000 ppb to 3,300 ppb, and Benzene was reduced from 13,000 to 470 ppb. In November, concentrations of TPHG and Benzene in C-1 rebounded to 16,000 ppb and 1,800 ppb, respectively, while MTBE was detected at 18 ppb.

2001

February, May, August, November— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 57,000 ppb, 13,000 ppb, and 1,590 ppb, respectively. Groundwater samples did not detect volatile organic oxygenated compounds above their respective detection limits.

2002

February, May, August, November— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 26,000 ppb, 3,600 ppb, and 110 ppb, respectively. Groundwater samples did not detect volatile organic oxygenated compounds above their respective detection limits.

2003:

November: Quarterly groundwater monitoring samples have been collected since 1991. Maximum concentrations of TPHG, Benzene, Toluene, Ethylbenzene, Xylene, and MTBE were detected in C-1 at 9,600 ppb, 1,500 ppb, 7.0 ppb, 560 ppb, 51 ppb, and 47 ppb, respectively.

February, May, August, November— Quarterly groundwater sampling was conducted. Maximum concentrations of TPHG, Benzene, and MTBE were 9,600 ppb, 1,500 ppb, and 47 ppb, respectively. Groundwater samples did not detect volatile organic oxygenated compounds above their respective detection limits.

V. ADDITIONAL COMMENTS, DATA, ETC. (CONT.)

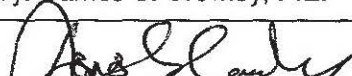

Considerations and/or Variances:

1. Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of a water well in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. The District, County of Santa Clara Environmental Health and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

Conclusion:

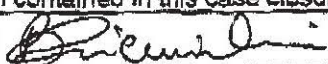

Analysis of soil and groundwater samples has indicated that residual petroleum hydrocarbon contamination at this site appears to be limited in extent. Based on the results of the site remedial activities and limited residual soil and groundwater concentrations, Santa Clara Valley Water District staff has concluded that a continuing threat to groundwater, human health and the environment from residual petroleum hydrocarbons does not exist at this site and that Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. District staff recommends closure for this case.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: George E. Cook, Jr.	Title: Associate Engineering Geologist
Signature: 	Date: 7/12/04
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature: 	Date: 7/12/04

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

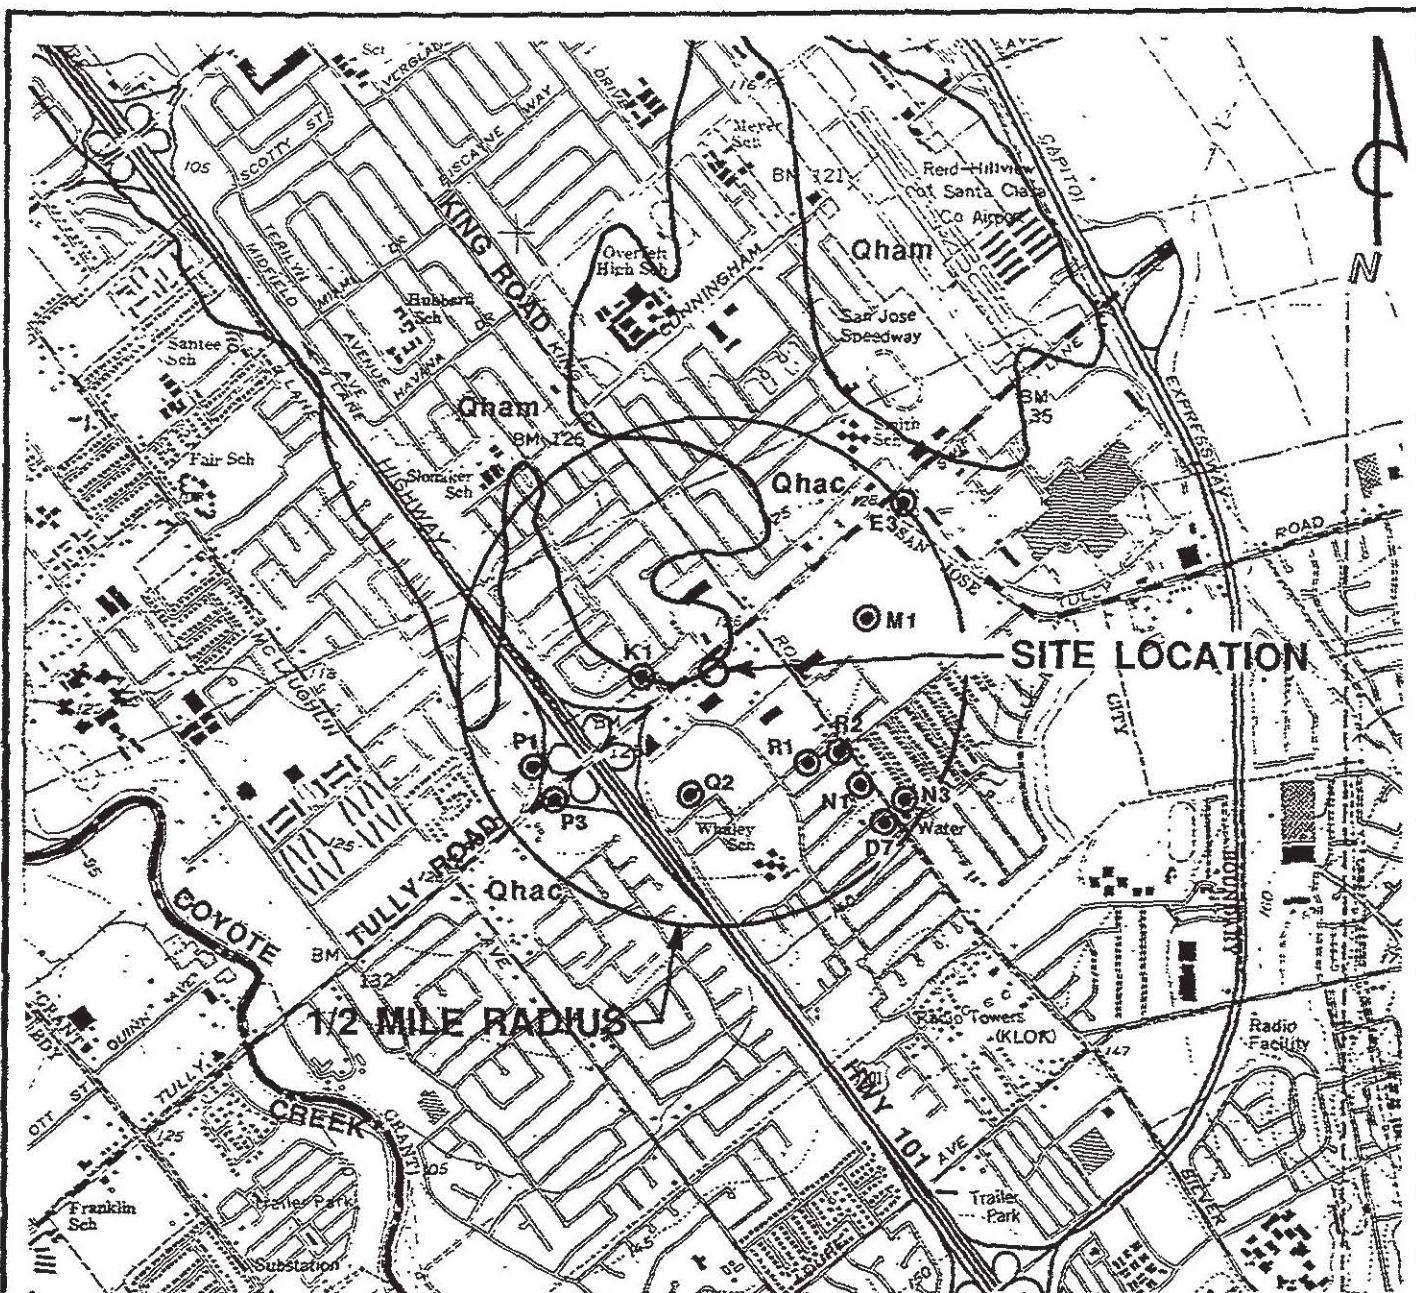

VII. REGIONAL BOARD NOTIFICATION

Regional Board Staff Name: Barbara Sieminski	Title: Engineering Geologist
RB Response: Concur based solely upon information contained in this case closure summary.	Date Submitted to RB: 07/20/04
Signature: 	Date: 08/02/04

Attachments:

1. Site Vicinity Map
2. Site Plan
3. Soil and Groundwater Analytical Results

This document and the related Case Closure Letter, shall be retained by the lead agency as part of the official site file.

Notes:

- (1) All results are reported in parts per billion (ppb).
- (2) < denotes analyte not detected at our below specified laboratory detection limit.
- (3) Results before 9-Oct-01 are included in Gettler-Ryan Groundwater Monitoring and Sampling Reports.

Abbreviations:

ft bgs = feet below ground surface
 NA = not analyzed
 DIPE = Di-isopropyl ether
 EtBE = Ethyl tertiary butyl ether
 MtBE = Methyl tertiary butyl ether
 TAME = Tertiary amyl methyl ether
 TBA = Tertiary butyl alcohol
 TPHg = Total petroleum hydrocarbons as gasoline

 San Jose, California

EXPLANATIONS:

Groundwater monitoring data and laboratory analytical results prior to May 10, 2000, were compiled from reports prepared by Blaine Tech Services, Inc.

TOC = Top of Casing

(ft.) = Feet

GWE = Groundwater Elevation

(msl) = Mean sea level

DTW = Depth to Water

SPHT = Separate Phase Hydrocarbon Thickness

TPH-G = Total Petroleum Hydrocarbons as Gasoline

B = Benzene

T = Toluene

E = Ethylbenzene

X = Xylenes

MTBE = Methyl tertiary butyl ether

(ppb) = Parts per billion

-- = Not Measured/Not Analyzed

QA = Quality Assurance/Trip Blank

NP = No Purge

¹ Chromatogram pattern indicates an unidentified hydrocarbon.

² Anomalous.

³ Resample.

⁴ Chromatogram pattern indicates a non-gas mix.

⁵ New well - extraction.

⁶ Extraction system not running, no sample taken.

⁷ Laboratory report indicates gasoline C6-C12.

⁸ MTBE by EPA Method 8260.

Mr. Albert Wang
King Plaza, LLC
4546 El Camino Real, Suite 222
Los Altos, California 94022

Dear Mr. Wang:

The Department of Toxic Substances Control (DTSC) entered into a Voluntary Cleanup Agreement with King Plaza, LLC on August 26, 2014 for Queen Cleaners (Site), located at 2511 South King Road in San Jose, California. The scope of work for the Voluntary Cleanup Agreement primarily consists of conducting a Preliminary Endangerment Assessment in order to determine whether a release of hazardous substances exists at the Site that could pose a potential risk to human health or the environment. The Voluntary Cleanup Agreement was amended on March 30, 2017 to include a Preliminary Endangerment Assessment Addendum and a Land Use Covenant in the scope of work. The following reports were submitted to, reviewed, and approved by DTSC:

- Preliminary Endangerment Assessment Workplan, 2511 South King Road, AEI Consultants, February 24, 2015
- Preliminary Endangerment Assessment Revision 1 (PEA), Queen Cleaners, AEI Consultants, August 10, 2015
- Soil Vapor and Indoor Air Sampling Work Plan, Queen Cleaners, AEI Consultants, October 21, 2015
- Work Plan for Additional Soil Gas Sampling, Queen Cleaners, AEI Consultants, October 2, 2016
- Report on Additional Soil Vapor Sampling, Queen Cleaners, AEI Consultants, December 21, 2016
- Preliminary Endangerment Assessment Addendum (PEA Addendum), Queen Cleaners, AEI Consultants, May 4, 2017
- Soil Management Plan, Queen Cleaners, AEI Consultants, July 21, 2017
- Report on Semi-Annual Indoor Air Sampling, Queen Cleaners, AEI Consultants March 6, 2018
- Report on Semi-Annual Indoor Air Sampling, Queen Cleaners, AEI Consultants June 28, 2018

Soil, soil vapor, groundwater, and indoor air samples were collected in 2015 and the results of the sampling were presented in the PEA report. The potential contaminants of concern that were detected in the samples that were collected included tetrachloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethylene (cis-1,2-DCE), and vinyl chloride. The detected concentrations of these contaminants in soil, groundwater, and indoor air samples were all below the applicable DTSC screening levels and the United States Environmental Protection Agency Regional Screening Levels (USEPA RSLs) for residential (unrestricted) land use. PCE was detected at a maximum concentration of 7,900 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) in soil vapor, exceeding the residential soil vapor screening level of $410 \mu\text{g}/\text{m}^3$ (derived from the DTSC residential air screening level of $0.41 \mu\text{g}/\text{m}^3$ and an attenuation factor of 0.001). TCE was detected at a maximum concentration of $1,200 \mu\text{g}/\text{m}^3$, exceeding the residential soil vapor screening level of $480 \mu\text{g}/\text{m}^3$ (derived from the USEPA residential air RSL of $0.48 \mu\text{g}/\text{m}^3$ and an attenuation factor of 0.001). Cis-1,2-DCE and vinyl chloride were also detected in soil vapor but the detected concentrations were below applicable DTSC screening levels and USEPA RSLs for residential (unrestricted) land use. AEI Consultants proposed further soil vapor investigation to assess potential soil vapor impacts along the property line, one round of indoor air sampling during the winter months to assess seasonal variations, the preparation of a Soil Management Plan to protect the safety of potential future construction workers at the Site, and a land use covenant (LUC) to restrict the land use to commercial activities.

Soil vapor sampling was conducted in November 2016 to further characterize the extent of PCE in soil vapor to the southeast of the Site. The detected soil vapor concentrations were lower than the applicable commercial/industrial DTSC screening levels and USEPA RSLs. The Soil Management Plan, which describes the appropriate measures to protect the safety of potential future construction workers in the area of the Site with volatile organic compound-affected soil vapor, recommended that indoor air sampling monitoring continue on a semi-annual basis for one year. The indoor air samples from the cold season and warm season sampling events were all below the applicable DTSC screening levels and the RSLs for commercial/industrial land use.

DTSC entered into a LUC with King Plaza, LLC, which was recorded with Santa Clara County on November 21, 2017. The LUC restricts sensitive land uses on the Site and requires that any disturbance of soil be done in accordance with a Soil Management Plan approved by DTSC. Additionally, construction of a new building or buildings at the Site without prior DTSC approval is prohibited.

Based on our review of the submitted reports, DTSC concludes that the scope of work under the Voluntary Cleanup Agreement has been completed and no further action is required at the Site beyond what is required by the LUC, including the annual LUC compliance inspections and five-year review reports as required by paragraphs 4.6 and 4.7 of the LUC, respectively. As with any real property, if previously unidentified contamination is discovered, additional assessment, investigation, and/or cleanup may be required.

Mr. Albert Wang

Hello,

I would like to request any environmental records related to the address listed below. We are in the process of conducting a Phase I Site Assessment at this location.

2470 Alvin Ave, San Jose, CA 95121

Examples of the environmental records I am looking to obtain are Aboveground Storage Tanks Records, Underground Storage Tanks Records, Spills and Emergency Response Records, Hazardous Waste/Chemical Storage Records, Environmental Permit Records, Groundwater Monitoring Reports, Site Assessment Reports, etc.

Please let me know if you are able to assist. Have a great day!

Misti Hamrick

11344 Coloma Road, #850

Gold River, CA | 95670

Land Type:
Receive Date: 20170905

Violation/Evaluation Summary

Note: NO RECORDS: As of May 2020, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Regulated Programs

EI ID:	10350352	EI Description:	Hazardous Waste Generator
---------------	----------	------------------------	---------------------------

Violations

Violation Date:	01/04/2017	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11		
Violation Notes:			

Surfaces are disinfected with Bitrol Birex spray. Per facility, a small amount is applied to a paper towel and the surface is wiped down. The towel is then thrown in the trash. Review of the SDS for this product show the concentrate having a pH of 1 and the dilution factor of 1:256 having a pH of 2.6. Review of the SDS also show this product contains phosphoric acid, IPA, O-phenylphenol, and P-tertiary amylphenol. Make a hazardous waste determination for the paper towels containing Bitrol Birex solution and if determined to be hazardous, manage accordingly.

Violation Description:

Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Evaluations

Eval Date:	01/04/2017
Violations Found:	Yes
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Eval Source:	CERS
Eval Notes:	

On site to conduct a routine hazardous waste inspection. Observed the following wastes on site: 1 x 5 gallon container of spent fixer 1 x 5 gallon container of spent developer Facility uses traditional xrays. Lead foil is collected and managed as scrap metal. An amalgam recycling unit is used on site. Amalgam is collected in a container and recycled. Instruments are cleaned using a steam autoclave and an ultrasonic machine that uses enzyme tablets. Tartar control is not performed at this facility. Whitening is not performed at this facility. Surfaces are disinfected with Bitrol Birex spray. Disposal records were reviewed. No pharmaceuticals are used on site. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Regulated Programs

EI ID:	10657999	EI Description:	Chemical Storage Facilities
---------------	----------	------------------------	-----------------------------

Violations

Violation Date:	12/28/2016	Violation Source:	CERS
Violation Program:	HMRRP	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		
Violation Notes:			

Returned to compliance on 03/02/2017. Actual locations of fire extinguishers, first aid kit, and emergency assembly areas are not specified on the map (but icons are still present in the map legend). Add required information and upload new map to CERS.

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date:	12/28/2016	Violation Source:	CERS
Violation Program:	HMRRP	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)		
Violation Notes:			

Returned to compliance on 03/02/2017. No emergency training logs could be located at the time of inspection. Mr. Lacross stated that these logs are not kept digitally and that each store is responsible for maintaining paper logs for this annual training.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date:	12/28/2016	Violation Source:	CERS
Violation Program:	HMRRP	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1		
Violation Notes:			

Returned to compliance on 03/02/2017. Facility has not notified the property owner in writing of their compliance with the Hazardous Materials Business Plan. A template letter was provided during the inspection.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	----------------------	-----------	---------------------	-------------------	------	----

Violation Description:

Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.

Evaluations

Eval Date: 12/28/2016
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Facility last submitted their Hazardous Materials Business Plan in CERS on 3/22/16 using CERS ID 10657999. Inspection was conducted on-site with Mirella Guerrero and additional information was provided over the phone by Safety Manager Brad Lacross. Facility has 32 gallons of liquid carbon dioxide on-site.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violation Notes:						

Returned to compliance on 10/02/2014. --- SUBMIT A REVISED HMBP ON THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WEBSITE AT <http://cers.calepa.ca.gov> WITHIN 30 DAYS. SEE BELOW FOR DETAILS REGARDING ELECTRONIC REPORTING REQUIREMENTS. DISREGARD LINED OUT CORRECTIVE ACTION TEXT BELOW, REGARDING SUBMITTAL OF HARD COPY FORMS. ---

Violation Description:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Failure to review, revise, and recertify the business plan at least once every three years.

Violations

Violation Date: 09/26/2019
Violation Program: UST
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

The 89 spill bucket failed the hydrostatic test. Have a qualified UST Service Technician repair and retest the spill containment. Submit a copy of the "Underground Storage Tank Spill Container Testing Report Form" within 30 days of testing. No permit is required to repair or replace drain valves or other internal components. If repair is not possible and replacement is necessary, obtain a UST minor repair/retrofit permit from HMCD as soon as possible.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Violation Division: Santa Clara County Environmental Health

The DUSTO monthly inspection reports have the following errors: - Section X, Testing and Maintenance: the dates testing was last performed for any tests were missing; "Yes" was marked to the overfill equipment inspection being completed in the last 36 months from December 2018 to July 2019 when it was not; "Yes" was marked to the secondary containment testing being completed in the last 36 months from March 2019 to August 2019 when it was not. - The alarm history report attached to the reports for April, May and June 2019 had the date printed missing. - The inspections were not completed every 30 days as required for five of the past twelve months.

Violation Description:

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO.
Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.
Inspect for the presence of liquid/debris in spill containers.
Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.
Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.
Check that all testing and maintenance has been completed and documented.
Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).
For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violation Notes:

UST secondary containment testing is overdue. Testing is required every 36 months: the last secondary containment test was completed on 3/25/16.

Violation Description:

"Failure to conduct secondary containment testing, or one or more of the following requirements:

Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter.

Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring.

Use a procedure that demonstrates the system works as well as at installation.

Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval.

Performed by a certified service technician.

Maintain records of secondary containment testing for 36 months."

Violation Notes:

Training to facility employees by the DUSTO has not been completed within the last 12 months as required. The last training was completed on 8/30/18. Provide DUSTO training to facility employees as soon as possible and document the training on a "Underground Storage Tank Facility Employee Training Certificate" form.

Violation Description:

Failure to have at least one facility employee present during operating hours that has been trained in the proper operation and maintenance of the UST system by a designated operator (DO).

Violations

Violation Date: 09/26/2019
Violation Program: UST
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Notes:

The overfill prevention equipment inspection was completed late on 7/30/19. The overfill prevention equipment inspection was due by 10/13/18. Ensure the next inspection is completed by October 2021 to get back on the every 36 months cycle from the original due date.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Witnessed the annual monitoring system certification and spill bucket test performed by Mr. Ed Stearns (certifications current) of Afforda-Test. The annular, sump and under dispenser containment (UDC) sensors were tested in water and provided audible and visible alarms. The sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI and shut down the turbine. Overfill protection is provided in all tanks by a flapper valve in the fill riser. NOTE: Recent Federal and State regulation updates require inspections of overfill prevention equipment by October 13, 2018 and at least every 36 months from the initial inspection. The spill buckets are direct buried and were hydrostatically tested for one hour with no loss. Reviewed DUSTO Monthly Reports, DUSTO Training [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

On site for testing of 89 grade secondary line and under dispenser containment (UDC) on dispenser 3/4 performed by Rudy Chavez (certifications current) of Triton Construction. After investigation, it was determined that the leak was at the penetration underneath dispenser 3/4 at the 89 grade line. The penetration fitting was replaced and resealed. The UDC passed a 15 minute Incon accelerated test. The 89 grade line held 5 psi pressure for one hour with no loss. Completing the remaining secondary containment tests (annular spaces, sumps) within a reasonable time would qualify as a full SB989 secondary containment test, resulting in re-setting your testing month. Contact me to schedule the remaining tests if you wish to do so. Otherwise, the SB989 test will be due in September. This report constitutes final clearance of this project from HMCD only.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Onsite to witness UST monitoring equipment testing performed by UST service technician Edward Stearns of Afforda Test. Mr. Stearns has a current California State Tank Tester license (Exp. 9/30/20), ICC UST Service Technician certification (EXP. 11/9/20), Veeder-Root ATG certification (EXP. 7/31/21) and VMI LDT-890 Tester certification (EXP. 6/18/21). This site has three tanks: 87, 89 and 91. The following UST monitoring system equipment was functionally tested and passed: -Three STP sump sensors -Four UDC sensors -Three tank annular space sensors Sensor out and power out provided positive pump shutdown of all three turbines. The three electronic line leak detectors were tested with a simulated 3 gph leak rate and passed. The 87 and 91 spill buckets were hydrostatically tested for one hour and passed. See violation cited for the 89 spill bucket. Observed flapper valves in all three drop tubes. Submit a copy of the completed monitoring system [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

On site to witness secondary containment testing performed by Benjamin Duncan of R&D Compliance Testing. Mr Duncan has current ICC UST Service Technician (exp 03/21/21) and Caldwell (exp 07/06/2020) certifications. Secondary containment testing was witnessed for the following components and

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

passed except as noted above: Annular space for 87, 89, and 91 grade USTs were tested by pulling vacuum to 10 inches of Hg for 60 minutes. Submersible Turbine Pump (STP) sumps were tested with water using Caldwell testing apparatus for 30 minutes. Under dispenser containment (UDC) sumps were tested with water using Caldwell testing apparatus for 30 minutes. Secondary piping runs were pressurized at 5psi and tested for 60 minutes. Ensure test results are submitted to this department within 30 days. Email: oq.enterprises@yahoo.com ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Source: CERS
Eval Notes:

On site to witness testing of the remaining underground storage tank (UST) system secondary containment components to complete a full SB989 test. The under dispenser containment (UDC) and piping were tested after repairs under permit on 3/16/2016 and 3/22/2016 and passed. See reports related to SR0850002. Testing performed by Rudy Chavez (certifications current) of Triton Construction. The piping sumps were tested with the Incon accelerated test and all showed two passing resultss. The tank annulars were vacuum tested for one hour with no loss. With these passing tests, a full system secondary containment test has been completed. This sets your next secondary containment test due date to March of 2019. Submit a copy of the Secondary Containment Testing report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Source: CERS
Eval Notes:

On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Douglas Nunn (certifications current) of Petroleum Technical Services Inc. The annular, sump and under dispenser containment (UDC) sensors were tested in water and provided audible and visible alarms. The sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI and held slow flow. Overfill protection is provided in all tanks by a flapper valve in the fill riser. The spill buckets are direct buried and were hydrostatically tested for one hour with no loss. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation. Also observed new CFR and CFO letter onsite. Tank and monitoring system information submitted to the California [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

This work is being done in office. No site visit. Oscar to sign and receive this report and these violations at a scheduled meeting to be held at this office by end of day 3/3/2016. I am reviewing the status of the work towards compliance. The requested Secondary Containment Test Report has not been submitted to this office as requested. See Violation related to this matter. Today I called John Sutfin, the Contractor for SR0845069, to inquire about the report and delinquent submittal. Payment for services provided by SUT's Superior Underground has not been made. The system has been re-tested this week by Anthony Spielman, Triton Construction. Specific failures are unknown to me at this point. See e-mail to Oscar Quiambao and Anthony Spielman dated today in e-docs, "RE 1610 Tully - RE UDC and dispenser replacements". Matt Burge is expecting a permit submittal for the work to be done by Triton Construction this week. He is in contact with Anthony Spielman [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

On site to witness post repair testing of penetration fittings in under dispenser containment (UDC) in dispensers 1/2 (91 grade), 3/4 (electrical), 5/6 (all grades), and 7/8 (all grades). Repairs and testing performed by Rudy Chavez (certifications current) of Triton Construction. Repairs done in response to failed piping secondary containment tests. UDCs were hydrostatically tested using the Incon accelerated testing method. All UDCs passed. The connected secondary piping was tested at 5 psi. The 87 and 91 grade lines held for one hour with no loss. The 89 grade line lost pressure. Triton will investigate and troubleshoot. Contact me to schedule an inspection for the 89 line. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations

Violation Date:	12/22/2016	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
Violation Notes:			

Returned to compliance on 01/26/2017. EPA ID number CAL000093042 is currently inactive. Ms. Martinez was given DTSC form 1358 at the time of inspection to reactivate this number.

Violation Description:

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Evaluations

Eval Date:	12/22/2016
Violations Found:	Yes
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval Notes:	

Facility generates gluteraldehyde that is neutralized with glycine before disposal to the sanitary sewer system. Ultrasonic cleaner uses enzymatic tablets. Facility uses all whitener and lidocaine. Amalgam is collected and mailed back annually for recycling. Facility uses non-saturated wipes to clean tools and to disinfect surfaces (using orange solvent with lanolin and birex, respectively). First aid kits are exchanged before expiration. Fixer and developer from x-ray is taken by ATI (documents reviewed). Facility does not use tray cleaners of tartar and stain removers. Fire extinguishers are annually serviced and emergency posting is adequate.; Note: data in [EVAL Notes] field for some records is truncated from the source.

El Description: Hazardous Waste Generator

Violations

Violation Date: 09/28/2018
Violation Program: UST
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Notes:

Facility did not have a copy of the chief financial officer (CFO) letter available for review.

Violation Description:

Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.

Violations

Violation Date: 09/18/2019
Violation Program: UST
Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Notes:

DUSTO inspections fail to document/address compliance issues such as past due overfill prevention equipment inspection and secondary containment testing. Additionally, secondary containment and overfill prevention equipment inspection dates listed in section X "Testing and Maintenance" are inconsistent with records stored on site.

Violation Description:

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:
 Be performed by an ICC certified DO.
 Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.
 Inspect for the presence of liquid/debris in spill containers.
 Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.
 Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.
 Check that all testing and maintenance has been completed and documented.
 Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).
 For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violations

Violation Date: 09/18/2019
Violation Program: UST
Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)
Violation Notes:

Records indicate that last secondary containment (SB989) testing was performed 07/21/2016 and is currently past due.

Violation Description:

"Failure to conduct secondary containment testing, or one or more of the following requirements:

Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter.

Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring.

Use a procedure that demonstrates the system works as well as at installation.

Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval.

Performed by a certified service technician.

Maintain records of secondary containment testing for 36 months."

Violations

Violation Date: 09/21/2016
Violation Program: UST
Citation: 23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637
Violation Notes:

Violation Source: CERS
Violation Division: Santa Clara County Environmental Health

Returned to compliance on 09/21/2016. Secondary containment testing was performed a month late (July 2016 instead of June 2016). Ensure required secondary containment testing is performed every 36 months. The next testing will be due in June 2019. No further corrective actions required.

Violation Description:

Failure to conduct secondary containment testing, or one or more of the following requirements:
 Perform the test within six months of installation and every 36 months thereafter. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician or a licensed tank tester.

Violations

Violation Date: 09/17/2014
Violation Program: HW
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Notes:

Violation Source: CERS
Violation Division: Santa Clara County Environmental Health

Returned to compliance on 10/01/2014. Facility did not submit the completed Notice Of Inspection (NOI) in response to the 9/12/2013 inspection. Copy of the 2013 NOI provided during the inspection. Complete the form and submit it with the response to this inspection.

Violation Description:

Haz Waste Generator Program - Administration/Documentation - General

Violations

Violation Date: 09/17/2014
Violation Program: UST
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Notes:

Violation Source: CERS
Violation Division: Santa Clara County Environmental Health

Returned to compliance on 10/01/2014. The test boot on the diesel line was not fully opened to allow for immediate communication. The test boot was fully pulled back allowing for the earliest possible detection of a leak in the line during the inspection. No further corrective actions required.

Violation Description:

Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).

Violations

Violation Date: 10/15/2019
Violation Program: UST
Citation: HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 2529.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 2529.1(e)
Violation Notes:

Violation Source: CERS
Violation Division: Santa Clara County Environmental Health

Returned to compliance on 10/24/2019. The following components failed hydrostatic testing as confirmed by Caldwell testing apparatus: - 87 grade STP sump - 91 grade STP sump Within 30 days, have a qualified contractor troubleshoot the cause of failure and retest. Please note any repairs to penetration fittings or sump wall may require a plan check approval from this department.

Violation Description:

Failure to maintain secondary containment (e.g., failure of secondary containment testing).

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Violations

Violation Date: 09/17/2014
Violation Program: UST
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284
Violation Notes:

Returned to compliance on 10/01/2014. Facility does not have a current UST permit to operate. Clear any open UST violations and submit all the required information to the online reporting system CERS. A permit will be issued when there are no open UST violations and the required information is submitted to CERS. Data entry assistance was provided to the facility by HMCD in March of 2014.

Violation Description:

Failure to obtain and maintain a valid operation permit from the CUPA.

Violations

Violation Date: 09/28/2018
Violation Program: UST
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

The diesel UST is not equipped with an overfill prevention system that meets the requirements of UST regulations [23 CCR 2635(c)(1)]. The diesel UST has a ball float installed below the vent riser but does not have a monitored fill sump or double-walled underground vent piping as required. Within 30 days submit a permit application to HMCD to equip the tank with an approved overfill prevention system.

Violation Description:

Failure of the overfill prevention system to meet one of the following requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violations

Violation Date: 09/18/2019
Violation Program: UST
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Notes:

Veeder Root 847990-001 sensor failed to cut power to dispenser 1/2 when tested with water.

Violation Description:

Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.

Violations

Violation Date: 09/17/2015
Violation Program: UST
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Notes:

Returned to compliance on 09/17/2015. The 87 sump sensor did not function on the initial test. The float was freed and the sensor re-tested and functioned as required. The 91 sump did not function and was replaced with a Veeder-Root -205 sensor. The replacement sensor was tested and functioned properly. Ensure all sensors are in good functioning condition and replace when non-operational. Update CERS to reflect the change in model for the 91 sensor. No further corrective actions required.

Violation Description:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Failure of the double wall pressurized piping in the turbine sump to be continuously monitored with a system that activates an audible and visual alarm or restricts or stops flow at dispenser when a leak is detected.

Violations

Violation Date: 10/17/2017
Violation Program: UST
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Source: CERS
Violation Division: Santa Clara County Environmental Health
Violation Notes:

Returned to compliance on 10/17/2017. The 87 tank sump sensor did not function when tested. The sensor was replaced like-for-like during the inspection. The new sensor functioned as required when tested. Ensure the monitoring system is maintained properly. No further corrective actions required.

Violation Description:

Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.

Violations

Violation Date: 09/28/2018
Violation Program: UST
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Source: CERS
Violation Division: Santa Clara County Environmental Health
Violation Notes:

The monthly inspection reports for the last twelve months are missing the date of the last secondary containment test date. Ensure the Designated Operator is recording the last secondary containment test date in the report each month.

Violation Description:

Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements:

Be performed by an ICC certified DO.

Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers.

Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented.

Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).

Violations

Violation Date: 10/17/2017
Violation Program: UST
Citation: 23 CCR 16 2715(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(i)
Violation Source: CERS
Violation Division: Santa Clara County Environmental Health
Violation Notes:

Returned to compliance on 10/17/2017. The annual monitoring certification was due in September. Ensure the monitoring system is tested every 12 months. Your anniversary date will remain in September. Ensure the monitoring system certification happens by the end of September 2018. No further corrective actions required.

Violation Description:

Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).

Violations

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Violation Date: 09/18/2019
Violation Program: UST
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Notes:

91 grade MLLD failed to restrict flow of product when a 3gph leak at 10 psi was simulated. Service technician readjusted the leak detector at the STP which resulted in a pass upon retesting. NO FURTHER ACTION IS REQUIRED.

Violation Description:

Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.

Violations

Violation Date: 09/21/2016
Violation Program: UST
Citation: 23 CCR 16 2637(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637(e)
Violation Notes:

Returned to compliance on 09/21/2016. Facility did not submit the secondary containment test results within 30 days. Ensure all testing results are submitted to our office within 30 days of the test. No further corrective actions required.

Violation Description:

Failure to submit a copy of the secondary containment test results to the CUPA within 30 days after the test.

Violations

Violation Date: 09/21/2016
Violation Program: UST
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

Returned to compliance on 10/21/2016. The 91 grade spill bucket failed at the drain valve. Have the valve repaired or replaced and retest the bucket. Contact our office if the repair goes beyond the drain valve to determine if a permit is necessary.

Violation Description:

Failure to comply with one or more of the following:

Failure to install or maintain a liquid-tight spill bucket.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container.

Be resistant to galvanic corrosion.

Violations

Violation Division: Santa Clara County Environmental Health
Violation Notes:

Returned to compliance on 10/01/2014. HMBP annual certification was due 10/2013 and was not done. All HMBP information must be submitted to the online reporting system CERS. Data entry assistance was provided to the facility by HMCD in March of 2014. Submit the required information in CERS and ensure the HMBP is re-certified annually.

Violation Description:

Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

Violation Notes:			

Returned to compliance on 10/17/2017. The diesel mechanical line leak detector (MLLD) did not function when tested. The MLLD was adjusted and passed the re-test. Ensure the monitoring system is maintained properly. No further corrective actions required.

Violation Description:

Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitor at least hourly. Be capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g. Restrict or shut off the flow of product through the piping when a leak is detected.

Violations

Violation Notes:			

Facility has failed to performed overfill prevention equipment inspection for mechanical drop tubes installed on 87 and 91 grade fill risers.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes:

On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Randy Johnson (ICC #5246120-UT exp. 9/29/2013; VR #A25856 -including MLLD, exp. 1/19/2015; VMI #1920, exp. 1/19/2014; FE Petro MLLD #8356293701 exp. 2/15/2014) of Johnson Tank Testing. Site consists of 3 tanks, 87, 91 and diesel. 91 and diesel share an annular space. There are 4 dispenser pairs. The tanks and sumps are monitored by a Veeder-Root TLS 350. The panel showed "All Functions Normal" on arrival. The UDCs are monitored by stand-alone sensors. The annular (VR -420) and sump (VR -208) were tested in water and provided audible and visible alarms. The sump sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbine pumps. The UDC sensors (VR -001) were tested in water and shut down the dispenser. Overfill protection is provided in the gas tanks by a flapper valve in the fill riser. [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Randy Johnson (certifications current) of Johnson Tank Testing. The annular and sump sensors were tested in water and provided audible and visible alarms. The sump sensors and fail safe (sensor out and power out) provided positive shutdown of the turbines as required, except as noted above. The under dispenser containment (UDC) stand-alone sensors were tested in water and shut down the dispenser. The mechanical line leak detectors were tested at dispenser 3&4 and detected a 3 gph leak at 10 PSI and held slow flow. Overfill protection is provided in the gas tanks by a flapper valve in the fill riser. The diesel tank has a ball float valve that was verified at a previous inspection. The spill buckets are direct-buried and were hydrostatically tested for one hour with no loss of liquid. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

On site to witness annual secondary containment testing performed by UST service technician Randy Johnson of Johnson Tank Testing. Mr. Johnson has current ICC Service tech (exp 08/26/2021) and Caldwell (exp. 07/2021) certifications. Vacuum on UST annular space was pulled to 16 inches of Hg and tested for 60 minutes. 91/Dsl compartmented and 87 grade USTs held for 60 minutes with no vacuum loss and passed. STP sumps were tested hydrostatically (4" above highest penetration) for 30 minutes using Caldwell testing apparatus. The following components were not witnessed at the time of this inspection: - Hydrostatic testing of 4 UDC sumps and Diesel STP sump - Pressure testing of 87, 91, and Diesel secondary piping Ensure test results are submitted to this department within 30 days. ; Note: data in [EVAL Notes] field for some records is truncated from the source.

Regulated Programs

EI ID:	10350313	EI Description:	Hazardous Waste Generator
---------------	----------	------------------------	---------------------------

Violations

Violation Date:	09/17/2019	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)		
Violation Notes:			

Returned to compliance on 10/10/2019. Approximately six 1-gallon bottles of fixer did not have any hazardous waste markings aside from the contents of the bottles.

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date:	09/17/2019	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11		
Violation Notes:			

Returned to compliance on 10/10/2019. Tartar and stain removal is done with EPR Industries Tartar, Stain & Permanent Cement Remover, diluted 1:1 with water. A diluted sample was shown to have a pH of around 1. Any solution with a pH of 2 or below is identified as hazardous waste. Collect tartar and stain remover, and dispose of it as hazardous waste. Surface cleaning is done with Birex One-Step Germicidal Detergent, with active ingredients o-phenylphenol and p-tertiary amylphenol. A review of the safety data sheet for this material shows it is likely hazardous waste. Collect any contaminated materials (i.e., paper towels) and dispose as hazardous waste. Lead foil from the x-ray developer likely meets hazardous waste criteria, and should be collect and disposed appropriately.

Violation Description:

Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violations

Violation Date:	09/17/2019	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
Violation Notes:			

Returned to compliance on 10/10/2019. This site previously generated only silver-containing waste, and was exempt from a hazardous waste ID. However, based on today's inspection, this facility generates various other types of hazardous waste, and therefore requires a hazardous waste ID.

Violation Description:

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Evaluations

Eval Date:	10/31/2014
Violations Found:	No
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval Notes:	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Facility develops and fixes images and disposes of the waste via safety Kleen. No cold sterilization is performed. Ultrasonic cleaner and autoclave is used for cleaning and sterilization. Surface disinfection is performed using a BIREX solution (hydrogen Peroxide + Phosphoric Acid) and solution is used until spray bottle is empty. No solution goes down drain. Trays are disposable. Amalgam waste is being recycled. Facility permit will be adjusted from 2202 (\$239/yr) (<100kg/yr) to 2271 (\$149/yr) (silver only waste).; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 09/17/2019
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS
Eval Notes:

Onsite for a routine hazardous waste inspection with Hazardous Materials Specialist Mickey Pierce from this office. Completed a walkthrough with Office Manager, Wendy Wong. This is a dental office which uses fixer/developer for their x-rays, steam autoclaves, and small amounts of tartar and stain remover. An ultrasonic cleaner uses enzymatic tablets. An amalgam trap is present onsite, and is on a mail-back program. Steam autoclaves are cleaned with soap and water. Whitening is not performed onsite. Consolidated manifest receipts were reviewed for fixer/developer. Emergency information is posted.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Evaluations

Eval Date:	10/09/2014
Violations Found:	Yes
Eval General Type:	Compliance Evaluation Inspection
Eval Type:	Routine done by local agency
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval Notes:	

Facility uses traditional x-ray and manages and disposes of the fixer waste appropriately. Sporox II (Phosphoric Acid and Hydrogen Peroxide) is used for cold sterilization. Cold sterile waste is neutralized with sodium bicarbonate prior to disposal via the drain. This is not allowed. SEE VIOLATION. No denture cleaning is performed. Surface cleaning and tray disinfection is performed via wipes (quaternary ammonium compounds). Universal Waste is managed appropriately. Lead foil is also disposed of properly as scrap metal.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Cleanup Oversight Agencies:		DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY				
Site Type:		VOLUNTARY CLEANUP				
Office:		CLEANUP BERKELEY				
Past Use that Caused Contam:		DRY CLEANING				
Potential Media Affected:		SOIL, SOIL VAPOR				
Potential Contamin of Concern:						
1,2-DICHLOROETHYLENE (CIS), TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE), VINYL CHLORIDE						
Site History:						
Information contained in a Phase I Environmental Assessment (ESA) indicates that Queen Cleaners has conducted dry cleaning operations on the Site since 1989. The original dry cleaning machine was replaced. The current dry cleaning machine was installed in October 2013 and uses hydrocarbon-						

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

based solvents and no longer uses perchloroethene (PCE).

The contaminants of concern at the Site are PCE, trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), and vinyl chloride. The detected concentrations of these contaminants in soil, groundwater, and indoor air samples were all below the applicable DTSC screening levels and the US EPA Regional Screening Levels for residential land use. PCE and TCE were detected at concentrations exceeding the residential soil vapor screening level.

DTSC entered into a Land Use Covenant with the Owner on November 21, 2017. The Land Use Covenant restricts sensitive land uses on the Site and requires that any disturbance of soil be done in accordance with a Soil Management Plan approved by DTSC. DTSC issued a No Further Action letter on August 3, 2018. No further action is required at the Site beyond the annual land use covenant inspection and five-year review required by the Land Use Covenant.

updated November 27, 2018, NY

Status:	CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS

Sub Area:						
Sub Area Link:						
Document Type:					Site Characterization Workplan	
Date Completed:					10/31/2016	
Comments:					The activities outlined in the Work Plan for Additional Soil Gas Sampling includes installation and sampling of three temporary soil vapor probes near two previous sampling locations along the southeastern property line of the site to further characterize the lateral extent of tetrachloroethene (PCE) in soil gas. Sampling is to be conducted some time in November 2016.

Sub Area:						
Sub Area Link:						
Document Type:					Land Use Restriction	
Date Completed:					11/21/2017	
Comments:					Because hazardous substances in soil gas, including tetrachloroethylene, trichloroethylene, cis-1,2-dichloroethylene, and vinyl chloride, remain at the Site above concentrations that would allow for unrestricted land use, a land use covenant between King Plaza LLC, the Site owner, and DTSC was executed and recorded. The land use covenant prohibits residences, hospitals, schools for persons under 18 years of age, and day care centers for children, requires prior DTSC approval of a Soil Management Plan for soil disturbing activities, as well as DTSC approval prior to construction of a new building.

Date Completed:					8/1/2017	

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Comments:		The soil management plan describes the appropriate measures to protect the safety of potential future construction workers at the volatile organic compound-affected area of the Site and the indoor air sampling monitoring that will continue on a semi-annual basis for one year. The first round of indoor air sampling will be performed by December 2017.

Cleanup Oversight Agencies:	DTSC - SITE CLEANUP PROGRAM - LEAD AGENCY		
School District:			
Past Use that Caused Contam:	DRY CLEANING		
Potential Media Affected:	SOIL, SOIL VAPOR		
Site History:			

Information contained in a Phase I Environmental Assessment (ESA) indicates that Queen Cleaners has conducted dry cleaning operations on the Site since 1989. The original dry cleaning machine was replaced. The current dry cleaning machine was installed in October 2013 and uses hydrocarbon-based solvents and no longer uses perchloroethene (PCE).

The contaminants of concern at the Site are PCE, trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE), and vinyl chloride. The detected concentrations of these contaminants in soil, groundwater, and indoor air samples were all below the applicable DTSC screening levels and the US EPA Regional Screening Levels for residential land use. PCE and TCE were detected at concentrations exceeding the residential soil vapor screening level.

DTSC entered into a Land Use Covenant with the Owner on November 21, 2017. The Land Use Covenant restricts sensitive land uses on the Site and requires that any disturbance of soil be done in accordance with a Soil Management Plan approved by DTSC. DTSC issued a No Further Action letter on August 3, 2018. No further action is required at the Site beyond the annual land use covenant inspection and five-year review required by the Land Use Covenant.

Document Type:		Land Use Restriction				
Date Completed:		11/21/2017				
Comments:		Because hazardous substances in soil gas, including tetrachloroethylene, trichloroethylene, cis-1,2-dichloroethylene, and vinyl chloride, remain at the Site above concentrations that would allow for unrestricted land use, a land use covenant between King Plaza LLC, the Site owner, and DTSC was executed and recorded. The land use covenant prohibits residences, hospitals, schools for persons under 18 years of age, and day care centers for children, requires prior DTSC approval of a Soil Management Plan for soil disturbing activities, as well as DTSC approval prior to construction of a new building.

Area Name:						
Area Link:						
Sub Area:						
Sub Area Link:						
Document Type:					Site Characterization Report	
Date Completed:					1/26/2017	
Comments:					This soil gas sampling report documents the soil vapor sampling event that occurred on November 15, 2016. Three temporary soil vapor probes were constructed at a depth of approximately 5 feet below ground surface. The intent of the soil vapor sampling was to further characterize the lateral extent of PCE in soil vapor to the southeast near the property line as well as to resample location B-12.

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 14-529
Local Case No: 07S1E14J02f
Begin Date: 11/19/1998
Lead Agency: SANTA CLARA COUNTY LOP
Local Agency: SANTA CLARA COUNTY LOP
CUF Case: NO
Potential COC: Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Waste Oil / Motor / Hydraulic / Lubricating, Xylene
How Discovered: UST System Modification
Stop Method: Repair Product Piping
Stop Description:
Case Worker: AC
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media of Concern: Other Groundwater (uses other than drinking water), Soil
How Discovered Description:
Calwater Watershed Name: Santa Clara - Coyote Creek (205.30)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community: Severely Disadvantaged Community
Site History:

In 1998, product line piping was replaced as part of a site upgrade. Soil samples were collected from beneath the product piping indicated contamination and a fuel leak case was opened in 1999. Contaminants detected in soil and groundwater include TPHg, Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), Methyl tert Butyl Ether (MtBE), and ter-butyl alcohol (TBA). Several rounds of site investigation have adequately defined the nature and extent of contamination. Groundwater extraction and oxygen sparging were used to remediate subsurface contamination. Seven monitoring wells have been installed to monitor groundwater contamination. Routine groundwater monitoring occurred from 2000 through 2015. The depth to groundwater beneath the site has varied between approximately 10 to 15 feet below grade. All monitoring wells were destroyed on August 12, 2016.

Violations

Violation Date:	08/02/2016	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)		
Violation Notes:			

Fuel alarms for sensor "L10: 87 FILL BRINE" occurred on 9/15/2015 and 9/16/2015. No work orders or service records were observed in facility records in response to these alarms. The Designated Operator documented these alarms as well as no work order observed for them in the October 2015 monthly DO inspection report.

Violation Description:

Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the UST.

Violations

Violation Date:	08/05/2015	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections		

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Violation Notes:

Multiple drums (at least one 55 gallon drum and two 5 gallon drums) are observed stored behind the dumpster in the dumpster enclosure. Access to these drums is blocked by the dumpster and other items stored in this enclosure. There is a door to the back of the dumpster enclosure, but it is reportedly broken or cannot be opened. These drums were not able to be fully viewed for this inspection. Weekly inspections of these drums cannot be properly performed in the manner they are currently stored. Provide access to these drums for proper weekly inspections.

Violation Description:

Haz Waste Generator Program - Operations/Maintenance - General

Violations

Violation Date:	08/06/2018	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)		

Violation Notes:

Returned to compliance on 08/06/2018. UDC 1/2 hydrostatic sensor failed to produce an audible/visual alarm when lifted out of the interstitial fluid reservoir. A like-for-like sensor was replaced, retested and functioned as required. The interstitial reservoir was empty of fluid in UDC 7/8 and the hydrostatic sensor failed to produce an audible/visual alarm. The float in the sensor was stuck in the closed position which masked what should have been an alarm condition. Hydrostatic fluid was added to the reservoir and sensor functionality as well as hydrostatic communication was confirmed. A photo of this condition was obtained during today's inspection. Both violation conditions were corrected during today's inspection, no further action is required.

Violation Description:

Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.

Violations

Violation Date:	08/07/2019	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)		

Violation Notes:

The DUSTO has not addressed in his inspection reports the required inspection of overfill prevention equipment (that item in Section X on the Designated Underground Storage Tank Operator Visual Inspection Report forms has been left blank).

Violation Description:

For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements:
 Be performed by an ICC certified DO.
 Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy.
 Inspect for the presence of liquid/debris in spill containers.
 Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly.
 Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit.
 Check that all testing and maintenance has been completed and documented.
 Verify that all facility employees have been trained in accordance with 23 CCR 2715(c).
 For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Violations

Violation Date:	08/07/2019	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)		

Violation Notes:

Sensor L24 (hydrostatic sensor monitoring Dispenser 7/8 under dispenser containment sump annular space) failed initial testing today. Sensor was cleaned and retested and functioned properly. No further corrective action is required. Liquid sensor portion of Sensor S11 failed. Sensor was replaced like-for-like during the inspection. New sensor functioned properly. No further corrective action is required.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

Violation Description:

Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.

Violations

Violation Date:	08/07/2017	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	HSC 6.7 25290.1(c)(3), 25290.2(c)(3) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c)(3), 25290.2(c)(3)		

Violation Notes:

Returned to compliance on 08/07/2018. Liquid was observed in all fill sumps (87, 91 & diesel). Approximately, 5 gallons of liquid was removed from the 87-fill sump, 2.5 gallons from the diesel fill sump and 0.5 gallon from the 91-fill sump by the service technician.

Violation Description:

Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003 and before July 1, 2004, or on or after July 1, 2004.

Violations

Violation Notes:

Returned to compliance on 08/08/2018. The facility has not responded to previous UST inspections conducted on 8/2/16 and 8/7/17. The facility is subject to enforcement by this office including the placement of RED TAGS being placed on all fuel fill ports. A written response including a compliance plan must be submitted to this office by a corporate manager by Monday, August 13, 2018. Failure to respond as required will result in the issuance of a 7-day significant violation.

Violation Description:

Failure to implement the corrections specified in the inspection report within 30 calendar days of receiving an inspection report from either the UPA or special inspector.

1.) Sensors L9 (87 Fill Sump), L11 (91 Fill Sump), and L22 (Disp. 5-6 Brine) failed to trigger an alarm when initially tested with water. After these sensors were shaken and inverted, an alarm response was received. Sensor L20 (Disp. 3-4 Brine) also failed to trigger an alarm when initially tested. This sensor would not respond when shaken and inverted, and was therefore replaced. Following replacement, sensor L20 was retested and passed, triggering a "Fuel Alarm". (No further response required.) 2.) Proper communication/continuity was not observed for hydrostatic monitoring in the 87 Fill Sump and Diesel Fill Sump. Approximately, 2 cups of brine was released from the base of the 87 Fill Sump without any response in the liquid level within the reservoir at the top of the sump. Similarly, brine was released from the base of the Diesel Fill Sump without a corresponding drop in brine level observed in the [Truncated]

Violation Description:

Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.

Inspection of overfill prevention valves was due by 10/13/2018 and has not yet been done. Schedule an inspection to occur as soon as possible. Be sure to have tank calibration charts available on-site. [Note: After this round of testing, the next round of testing is due no later than October of 2021 to reestablish the require inspection frequency.]

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes:

Hazardous Materials Business Plan (HMBP) was electronically submitted via the California Environmental Reporting System (CERS) website on 1/28/2019. The information has been reviewed and is Accepted. At the time of this inspection, the facility had the following hazardous materials on-site in HMBP-reportable quantities: Regular Unleaded Gasoline, Premium Unleaded Gasoline, Diesel, and Propane. Propane is handled in a 500 gallon tank; plus small cylinders that qualify for exemption pursuant to the HSC §25507(b)(5). Quantity of compressed Carbon Dioxide quantity is less than 1,000 cubic feet. In the car wash, Clean Touch Clear Coat is handled in 55 gallon drums. Other car wash chemicals are handled in 15 gallon drums. Review of the Safety Data Sheets indicate that car wash chemicals other than Clean Cut 360 Presoak are hazardous solely as irritants. The quantity for each type observed on-site is well below the 550 gallon reporting threshold specified in HSC [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violation Notes:			

Based on this inspection the overfill prevention equipment has not been tested as required. Within 30 days test this equipment and provide a copy of the testing form to our office.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
 Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
 Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violations

Violation Date:	06/19/2014	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health
Citation:	23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)		
Violation Notes:			

Returned to compliance on 06/19/2014. The 91 mechanical LLD did not function when tested. The LLD was replaced with a newer model VMI LD 2000 and re-tested. The LLD detected the leak and held slow flow. No further corrective actions required.

Violation Description:

Failure of the pressurized piping to meet one or more of the following requirements: monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour, and will restrict the flow of product through the piping or trigger an alarm when a release occurs.

Citation:	23 CCR 16 2638(d) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638(d)		
Violation Notes:			

Facility has failed to submit 05/30/2019 monitoring certification testing results to this department within 30 days as required.

Violation Description:

Failure to submit the "Monitoring System Certification Form" to the UPA within 30 days of completion of the test.

Violations

Violation Date:	05/29/2018	Violation Source:	CERS
Violation Program:	HW	Violation Division:	Santa Clara County Environmental Health
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12		
Violation Notes:			

Returned to compliance on 05/29/2018. EPA ID# CAL000394023 is inactive. Keep number active by responding to the annual questionnaire. Completed and submitted a DTSC 1358 during the inspection. No further corrective actions required.

Violation Description:

Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violations

Violation Date:	05/21/2020	Violation Source:	CERS
Violation Program:	UST	Violation Division:	Santa Clara County Environmental Health

On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Aneil Chand (certifications current) of Pinnacle Fuel Compliance. The annular space and sump sensors were tested in water and provided audible and visible alarms except for those noted above. The STP sensors also caused positive shutdown. Sensor out and power out (fail safe) triggered positive shutdown of both turbine pumps. The mechanical line leak detectors were tested at dispenser 9/10 and detected a 3.0 gph leak at 10 psi and held slow flow. The Bravo float and chains were tested with water and functioned properly except for those noted above. Overfill protection is provided in all gasoline tanks by a flapper valve in the fill riser. The spill buckets are direct buried and were hydrostatically tested for one hour with no loss. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation. Tank and monitoring [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

On-site to conduct an annual monitoring system certification. Testing was conducted by; Jeff Conger with Pinnacle Fuels. Mr. Conger has the following certifications; ICC#1081782 exp., 01/24/21; VR#A22219 exp., 01/22/21; FFS #1020003708 exp., 01/17/21 and VMI#3199 07/27/20. Prior to and after completion of testing there were no active alarms at the veeder root panel. The following components were tested and passed during this inspection; - 2 STP sump sensors provided a positive shut-down condition at the turbine. - 2 annular sensors provided an audible/visual alarm at the panel. - 2 spill buckets were hydrostatically tested for 60 minutes and passed. - 4 UDC's float and chain mechanism were tested and passed. - Fail safe and sensor out were verified during this inspection. - Flapper valves is installed in both tanks and were visually verified. The following documents were reviewed during this inspection; - DO Monthly records - A list of employees trained. [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Potential Contaminant of Concern:			

ARSENIC, NATURALLY OCCURRING ASBESTOS (NOA), ORGANOCHLORINE PESTICIDES (8081 OCPS)

Site History:

The Site is just less than one acre and is located in the southwest corner of the Leyva Middle School in the Evergreen Valley. The site has been developed as a school since 1973. Prior to 1973 the site was used for agriculture including row crops and potentially dry-land farming. Prior to construction of the school, there were no structures on the site.

This project came to DTSC as a PEA with a Phase I report submitted as background data. A PEA will be conducted based on the potential for site soils to be impacted by naturally occurring asbestos (NOA) and agricultural pesticides (arsenic and organochlorine pesticides) and lead from lead-based paint from the existing structure onsite.

DTSC reviewed and approved a PEA workplan on April 24, 2008 and oversaw field work on May 1, 2008. Based on results of the risk assessment as part of the PEA, additional investigations and/or remediation was not recommended for all assessed chemicals of potential concern except for chlordane associated with termiticide use and asbestos. Step-out and step-down samples were collected from around the one elevated sample for chlordane (4.720 mg/Kg in SB-7 at 0 to 0.5 feet bgs) located along the south wall of one of the buildings. The step-down sample contained no detectable concentrations of chlordane (<0.020 mg/Kg), while only one of the three step-out samples (SB-7C, the step-out sample east of the original sample location) was above action levels (2.460 mg/kg). Results for the asbestos analyses reported concentrations of asbestos (chrysotile) ranging from 0.023 to 0.13% by weight by transmission electron microscopy (TEM) in the shallow samples, and 0.0006 to 0.014% by weight by TEM in the deeper samples. Asbestos was not detected in any sample by use of polarized light microscopy methods (detection level of 0.25%).

A removal action workplan (RAW) proposes the removal of soils with chlordane above action levels along the south wall of one of the buildings and for NOA in the approximate 1.5 foot of fill covering the entire site. The public review period for the draft RAW was September 15 to October 15, 2008. No public comments were received.

DTSC approved the RAW as final on October 20, 2008. 2,500 cubic yards of fill material impacted by naturally occurring asbestos and seven cubic yards of chlordane impacted soil will be excavated and properly disposed of. Air monitoring will be performed during excavation work to insure proper dust controls are applied.

October 21, 2008 informed three additional trenches will be required for new utilities (fire line, irrigation main line, and an electrical conduit) that will equal about 102 cubic yards of soil.

The Removal Action started in December 26, 2008. On January 2, 2009 DTSC approved site for occupancy of the existing campus. However, two of the three additional utility trenches were not excavated.

On March 26, 2009 the final amount of approved import, from Freeman Quarry, was placed.

The utility trenching for the electrical conduit and irrigation main line was postponed to April 2009 (April 10 through 19, 2009 - spring break). In addition, these were trenched instead of bored as originally planned. All NOA soil was removed from the irrigation and electrical trenches. The irrigation trench was backfilled with native soil and is complete. However, during the trenching to remove the NOA soil for the electrical conduit a water line was discovered postponing the placement of the electrical conduit until summer break in June 2009. The fill material used for backfilling this trench had not yet been certified as clean. In high-traffic areas the trench was covered with asphalt and the remaining portion covered with visqueen and enclosed within a temporary fence. The backfill was pending analytical results from the laboratory and certification and approval by DTSC. On April 17, 2009 DTSC approved re-occupancy of the existing campus.

On May 4, 2009 DTSC approved the import used in the electrical trench - completing the RAW.

The removal action completion report (RACR) documents removal of approximately 1,700 to 2,000 cubic yards (approximately 167 truck loads) of NOA impacted soil and approximately 7 cubic yards (one bin) of chlordane impacted soil. The NOA-impacted soil was hauled off as non-hazardous waste to Crazy Horse Canyon Landfill in Salinas. The chlordane-impacted soil was hauled off as Class I hazardous waste to the Chemical Waste Management landfill facility (Class I) in Kettleman City. The site was backfilled with import from Verne D. Freeman, Sr. Quarry and San Juan Bautista Quarry totaling approximately 1061 cubic yards. The removal activities were performed from December 12, 2008 through January 19, 2009 for the expansion area and fire line trench, while the irrigation and electrical conduit trenches were performed from April 13, 2009 through April 15, 2009. The import quantity differs from the removed quantity because the subgrade elevations for the new facilities were lower than the original grade to accommodate building slab and subslab sections, as well as baserock and hardscape requirements outside of the building area. Confirmation soil samples verified that the removal action objectives and cleanup goals were achieved and the site does not pose a significant threat to human health or the environment.

On November 15, 2010, DTSC approved the RACR as final and certified the removal action is complete and no further removal actions are required for the site.

Cleanup Program Sites from GeoTracker Search

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Mar 26, 2020

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Jun 26, 2020

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Jun 26, 2020

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Jun 26, 2020

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: May 22, 2020

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: May 22, 2020

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jul 27, 2020

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jul 27, 2020

RCRA Generator List:[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jul 27, 2020

RCRA Small Quantity Generators List:

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jul 27, 2020

RCRA Conditionally Exempt and Very Small Quantity Generators List:

RCRA CESQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jul 27, 2020

RCRA Non-Generators:

RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jul 27, 2020

Federal Engineering Controls-ECs:

FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 26, 2020

Federal Institutional Controls- ICs:

FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 26, 2020

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 25, 2019

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Sep 3, 2019

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Petroleum Refineries:

[REFN](#)

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

[BULK TERMINAL](#)

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

[SEMS LIEN](#)

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: May 22, 2020

Superfund Decision Documents:

[SUPERFUND ROD](#)

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Jun 26, 2020

State

State Response Sites:

[RESPONSE](#)

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jul 14, 2020

EnviroStor Database:

[ENVIROSTOR](#)

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jul 14, 2020

Delisted State Response Sites:

[DELISTED ENVS](#)

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jul 14, 2020

Solid Waste Information System (SWIS):

[SWF/LF](#)

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 1, 2020

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jul 14, 2020

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 15, 2020

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 15, 2020

Delisted Leaking Storage Tanks:

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jul 15, 2020

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 12, 2020

Proposed Closure of Underground Storage Tank Cases:

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Jul 7, 2020

Historical Hazardous Substance Storage Information Database:

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks:

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Oil and Gas Facility Tanks:

TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Jul 21, 2020

Delisted Storage Tanks:

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 15, 2020

California Environmental Reporting System (CERS) Tanks:

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Aug 7, 2020

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jul 14, 2020

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Apr 8, 2020

Deed Restrictions and Land Use Restrictions:

DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 15, 2020

Voluntary Cleanup Program:

VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jul 14, 2020

GeoTracker Cleanup Program Sites:

CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 15, 2020

Delisted County Records:

DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Sep 16, 2020

Delisted California Environmental Reporting System (CERS) Tanks:

DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Aug 7, 2020

Historical Hazardous Substance Storage Container Information - Facility Summary:

HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal**Leaking Underground Storage Tanks (LUSTs) on Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks:

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

County**Santa Clara County - Historic Solvent Case Listing:**

SANTA CLARA HSOL

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing:

SANTA CLARA LO

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks:

UST SANTA CLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Aug 19, 2020

Santa Clara County - CUPA Facilities List:

SANTA CLARA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental Health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: May 5, 2020

Santa Clara County - City of San Jose Hazardous Material Facilities:

SANJOSE HM

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Jul 6, 2020

Santa Clara County - Gilroy City CUPA Facilities List:

GILROY CUPA

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jun 15, 2020

Santa Clara County - Sunnyvale City CUPA List:

SUNNYVALE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jul 16, 2019

Additional Environmental Record Sources**Federal****PFOA/PFOS Contaminated Sites:**

PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Jul 7, 2020

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 25, 2020

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Jan 8, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Mar 19, 2020

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Jul 29, 2020

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jan 20, 2020

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

PHMSA Pipeline Safety Flagged Incidents:

[PIPELINE INCIDENT](#)

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Oct 31, 2019

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: May 1, 2020

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jun 22, 2020

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Oct 9, 2019

State

Dry Cleaning Facilities:

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Aug 12, 2020

Delisted Drycleaners:

DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Aug 12, 2020

Non-Toxic Dry Cleaning Incentive Program:

DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 15, 2020

PFOA/PFOS Groundwater:

PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

Government Publication Date: Jul 28, 2020

Hazardous Waste and Substances Site List - Site Cleanup:

HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Aug 19, 2020

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Jul 20, 2020

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jul 14, 2020

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jul 22, 2020

Hazardous Waste Manifest Data:

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List:

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Aug 7, 2020

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 15, 2020

Waste Discharge Requirements:

WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 15, 2020

Toxic Pollutant Emissions Facilities:

EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jun 30, 2018

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

RE: CITY DIRECTORY RESEARCH
20116-65446 ESA
2470 Alvin Ave San Jose, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

2400-2580 of Alvin Avenue

Additional Information

Property Information

Order Number: 20291700183p
Date Completed: September 18, 2020
Project Number:
Project Property: 20I16-65446 ESA
2470 Alvin Ave San Jose CA 95121
Coordinates:
Latitude: 37.31973244
Longitude: -121.82666621
UTM Northing: 4130987.70156 Meters
UTM Easting: 603961.812157 Meters
UTM Zone: UTM Zone 10S
Elevation: 127.67 ft
Slope Direction: NNE

Topographic Information.....	2
Hydrologic Information.....	4
Geologic Information.....	7
Soil Information.....	9
Wells and Additional Sources.....	12
Summary.....	13
Detail Report.....	26
Radon Information.....	259
Appendix.....	260
Liability Notice.....	262

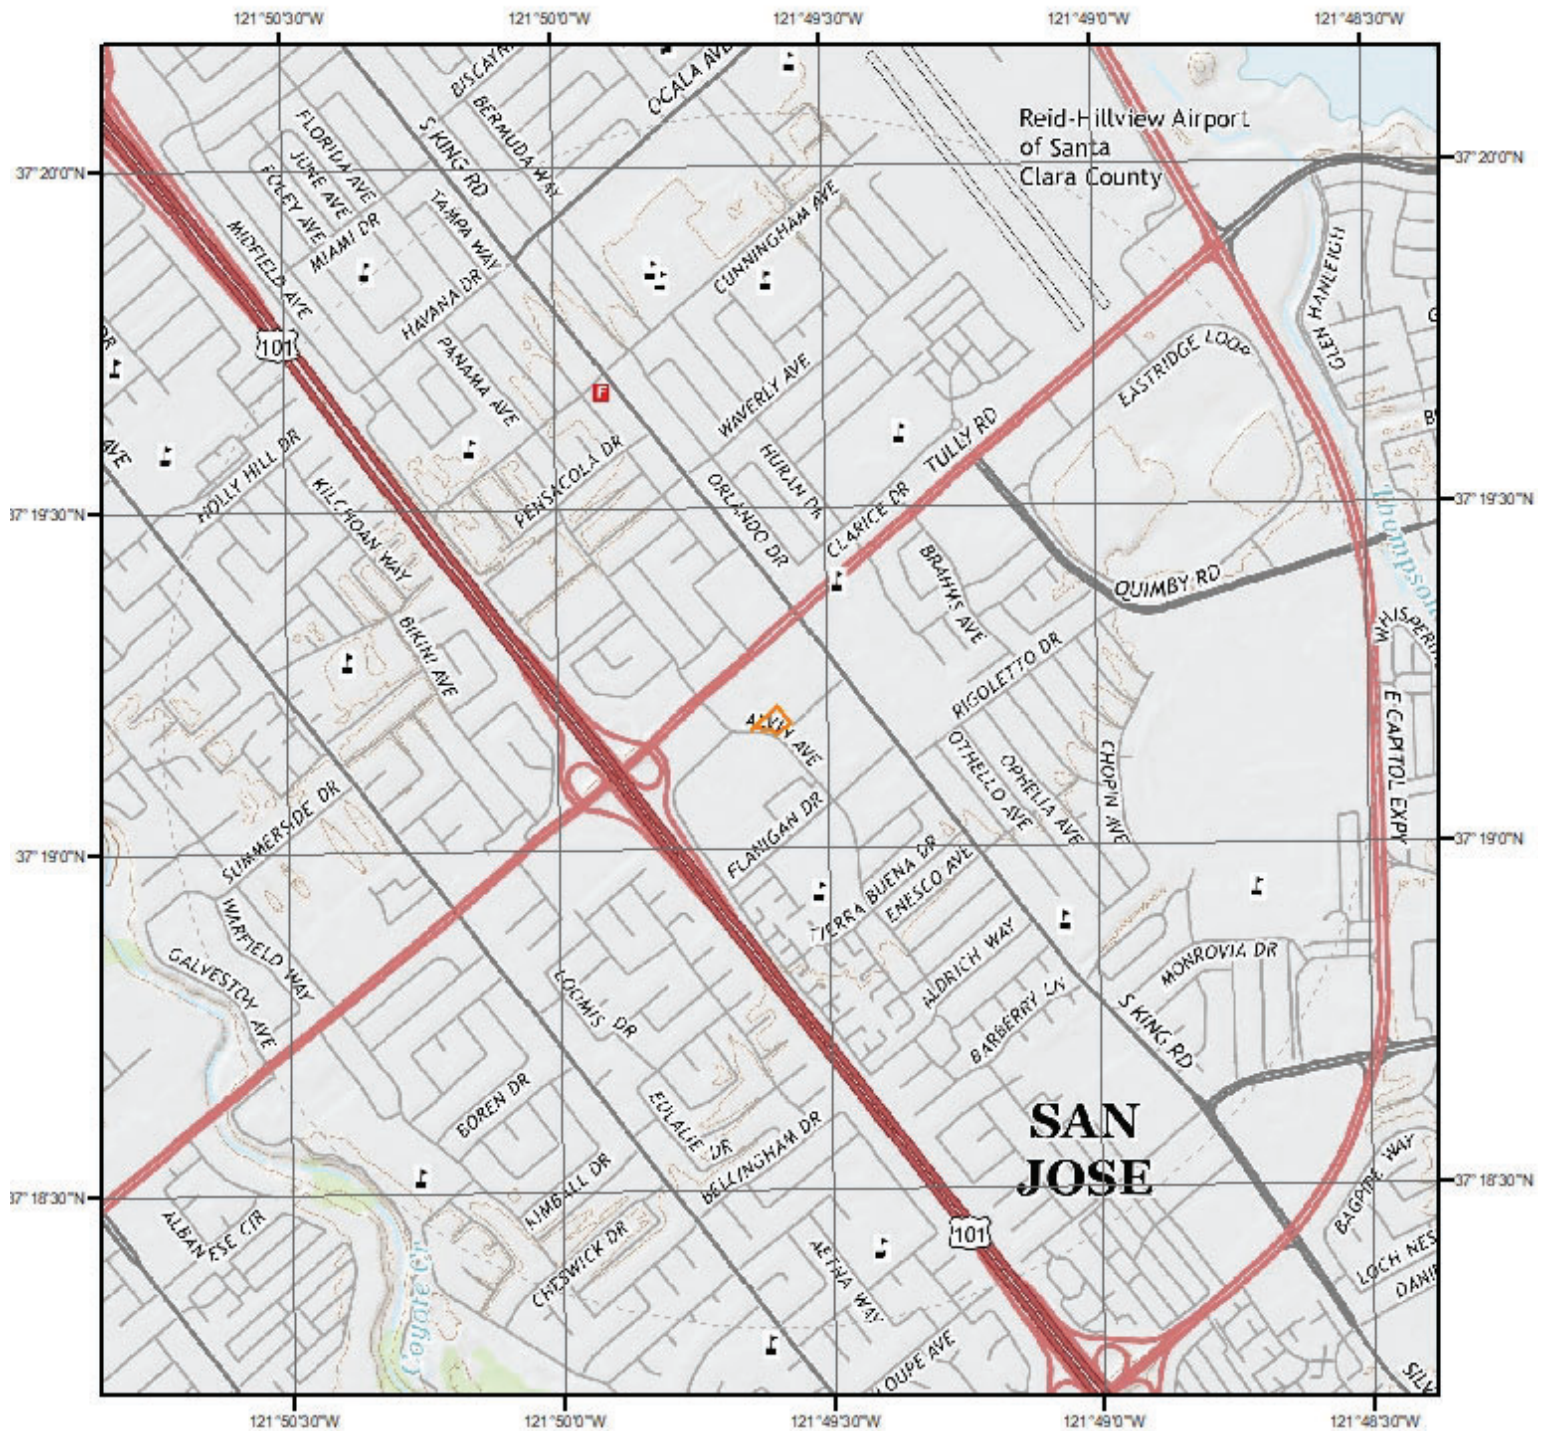

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo (2015)

Quadrangle(s): San Jose East, CA

Source: USGS 75 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 127.67 ft
Slope Direction: NNE

Hydrologic Information

Source: Esri, Maxar, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community

Wetland

This map shows wetland existence using data from US Fish & Wildlife. Data coverage is shown to the right. Gray indicates no data available in the area.

 Estuarine and Marine Deepwater	 Freshwater Pond
 Estuarine and Marine Wetland	 Lake
 Freshwater Emergent Wetland	 Other
 Freshwater Forested/Shrub Wetland	 Riverine

Hydrologic Information

Flood Hazard Zones

This map shows FEMA flood hazard zones. FIRM panels are shown to the right, and blank indicates no data is available.

Hydrologic Information

The Wetland Type map shows wetland existence overlaid on an aerial imagery. The Flood Hazard Zones map shows FEMA flood hazard zones overlaid on an aerial imagery. Relevant FIRM panels and detailed zone information is provided below.

Available FIRM Panels in area:	06085C0262H(effective:2009-05-18) 06085C0253H(effective:2009-05-18) 06085C0258H(effective:2009-05-18) 06085C0266H(effective:2009-05-18) 06085C0254H(effective:2009-05-18)
--------------------------------	---

Flood Zone A-01

Zone:	A
Zone subtype:	

Flood Zone D-01

Zone:	D
Zone subtype:	

Flood Zone X-01

Zone:	X
Zone subtype:	0.2 PCT ANNUAL CHANCE FLOOD HAZARD

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 130 (5.27%)

Map Unit Name: Urban land-Still complex, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Still(25%)

horizon A1(0cm to 4cm)	Sandy loam
horizon A2(4cm to 30cm)	Very fine sandy loam
horizon Bw1(30cm to 50cm)	Silt loam
horizon Bw2(50cm to 83cm)	Silt loam
horizon 2Ab1(83cm to 95cm)	Loam
horizon 2Ab2(95cm to 130cm)	Loam
horizon 2Bwb1(130cm to 158cm)	Loam
horizon 2Bwb2(158cm to 182cm)	Loam

Map Unit 131 (57.12%)

Map Unit Name: Urban land-Elpaloalto complex, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Elpaloalto(23%)

horizon Oi(0cm to 21cm)	Slightly decomposed plant material
horizon A(21cm to 42cm)	Clay loam
horizon Bw1(42cm to 65cm)	Silty clay loam
horizon Bw2(65cm to 90cm)	Silty clay loam
horizon Bw3(90cm to 120cm)	Silty clay loam
horizon Bw4(120cm to 181cm)	Silty clay loam
horizon C(181cm to 240cm)	Silty clay loam

Map Unit 160 (4.04%)

Map Unit Name: Urbanland-Clear Lake complex, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Soil Information

Clear Lake(25%)

horizon Ap1(0cm to 23cm)	Silty clay
horizon Ap2(23cm to 36cm)	Silty clay
horizon Bw(36cm to 82cm)	Silty clay
horizon Bss(82cm to 127cm)	Silty clay
horizon C(127cm to 167cm)	Silty clay

Map Unit 180 (33.56%)

Map Unit Name: Urbanland-Newpark complex, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Newpark(20%)

horizon Ap(0cm to 20cm)	Silty clay loam
horizon A1(20cm to 45cm)	Silty clay loam
horizon A2(45cm to 68cm)	Silty clay loam
horizon Ck1(68cm to 91cm)	Silty clay loam
horizon Ck2(91cm to 132cm)	Silty clay loam
horizon C1(132cm to 160cm)	Fine sandy loam
horizon C2(160cm to 200cm)	Fine sandy loam

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for SANTA CLARA County: **2**

- Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
- Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
- Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for SANTA CLARA County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SDWIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

MONITOR WELLS

Well Completion Reports

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

WATER WELLS

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Terms and Acronyms

Acronyms	Description
AST	Aboveground Storage Tank
AUL	Activity and Use Limitation
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System
CERCLIS LIENS	Federal Superfund lien
CERCLIS NFRAP	CERCLIS - No Further Remedial Action Planned
COC	Contaminant of Concern
CREC	Controlled Recognized Environmental Conditions - “A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”
DELISTED NPL	Deleted NPL
DeMinimis	DeMinimis - “A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be De Minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.”
ERNS	Emergency Response Notification System
FED BROWNFIELDS	Federal Brownfields
Federal Engineering Controls	Federal Engineering Controls - ECs
Federal Institutional Controls	Federal Institutional Controls - ICs
FEMA UST	FEMA Underground Storage Tank Listing
HREC	Historical Recognized Environmental Conditions – “A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”
IODI	EPA Report on the Status of Open Dumps on Indian Lands
LPST	Leaking Petroleum Storage Tank
LST/LUST	Leaking Underground Storage Tank
NFA	No Further Action
NOV	Notice of Violation
NPL	National Priority List (NPL) (AKA – Federal Superfund)
ODI	Inventory of Open Dumps, June 1985
PCB	Polychlorinated Biphenyl
PCE, PERC	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
PROPOSED NPL	National Priority List - Proposed

Acronyms	Description
PST	Petroleum Storage Tank
RCRA CESQG	RCRA Conditionally Exempt Small Quantity Generators List
RCRA CORRACTS	RCRA Corrective Action
RCRA LQG	RCRA Generator List
RCRA NON GEN	RCRA Non-Generators
RCRA SQG	RCRA Small Quantity Generators List
RCRA TSD	RCRA non-CORRACTS TSD Facilities
REC	Recognized Environmental Conditions - "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De Minimis conditions are not recognized environmental conditions."
SEMS	Superfund Enterprise Management System
SEMS ARCHIVE	SEMS List 8R Archive Sites
SEMS LIENS	Superfund Enterprise Management System (SEMS) Lien
SUPERFUND ROD	Superfund Decision Documents
SWF/LF	Solid Waste Landfill
TCE	Trichloroethylene
UST	Underground Storage Tank
VCP	Voluntary Cleanup Program
VOC/HVOC	Volatile Organic Compound/Halogenated Volatile Organic Compound
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
mg/Kg	Milligrams/Kilogram or Parts Per Million (soil/solids unit measure)
mg/L	Milligrams/Liter or Parts Per Million (liquid unit measure)
µg/Kg	Micrograms/Kilogram or Parts Per Billion (soil/solids unit measure)
µg/L	Micrograms/Liter or Parts Per Billion (liquid unit measure)
µg/m ³	Micrograms/meter cubed (an air or soil vapor unit measure)

Consultant Resumes

Robert S. Fagerness, PE

Education

M.S., Civil Engineering, California State University Sacramento, Sacramento, CA, 1995
B.S., Environmental Resources Engineering, California State University Humboldt, Arcata, CA, 1989

Project Experience

Due Diligence Environmental Site Assessments CA - Working with investors, and lending institutions, Mr. Fagerness has completed thousands of Phase I ESAs for property transactions as part of the due diligence process across the nation. This work was performed as part of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. Property types assessed include commercial, industrial, multi-family residential, self-storage facilities, gas stations, automotive service, dry cleaners, day cares and hotels.

Construction Manager, Groundwater Extraction Wells, Conveyance Pipeline, and Remediation Treatment Systems, Aerojet-General Western Groundwater Operable Unit, Rancho Cordova, CA 2010-2014. Mr. Fagerness assisted Aerojet-General with construction management services needed for the installation of large-scale groundwater extraction wells, conveyance pipelines, and groundwater treatment facilities. Challenging project requiring installation of remediation system within built-out residential neighborhoods. This work required assistance and cooperation from local, state, and federal agencies. This work also required special use permitting for the installation of a groundwater treatment facility at a site which was zoned residential. Mr. Fagerness was responsible for all permitting, public participation, and field documentation associated with this project. The project was successfully implemented within portions of Rancho Cordova, Gold River, and Eastern Sacramento County.

Multiple LUST Case Closures City of Vallejo Public Works Department, Vallejo CA 2003-2006 - While with his previous firm, Mr. Fagerness was the project manager responsible for the investigation and closure of LUST Case files associated with multiple City of Vallejo properties under the management of the Public Works Department including:

- Vallejo Police Department Main Yard
- Vallejo Fire Station 25
- Vallejo Fire Station 23

REGIONAL LOCATION

Sacramento and Bay Area, CA

LUST Case Closure, Vallejo Sanitation and Flood Control District, Vallejo, CA - Mr. Fagerness was the project manager responsible for the investigation and closure of leaking underground storage tank (LUST) case file of the Vallejo Sanitation and Flood Control District (VSFCD). Mr. Fagerness successfully conducted additional subsurface investigations allowing a site conceptual model that sufficiently demonstrated there was minimal to no risk leaving residual contamination in place. Based on the model, Mr. Fagerness successfully negotiated LUST case closure with Solano County Local Oversight Program and the Regional Water Quality Control Board (Region 2). The closure saved the VSFCD tens of thousands of dollars with minimal disruption to its active wastewater treatment facility.

Investigation, Remediation, and Closure of Lead and Dioxin/Furan Contaminated Soil, Aerojet-General Site, Rancho Cordova, CA - Mr. Fagerness managed the site characterization, remediation, and confirmation sampling project associated with Aerojet-General Superfund Site in Rancho Cordova California. This work was required by the US EPA with additional oversight by the Regional Water Quality Control Board (Region 5) and Department of Toxic Substances Control (collectively, the Agencies). The work was necessary to allow this portion of the Aerojet Superfund (NPL) Site to be carved out of the contaminated land and cleaned to a level sufficient for future residential development. The remediation involved the removal of contaminated surface soils with disposal to designated TSD facility in southern California. Confirmation Sampling utilized an innovative Incremental Sample Methodology (IMS) which allowed for fewer analytical tests to be needed over the relatively large area remediated. Mr. Fagerness prepared the closure documentation required by the Agencies and was successful at helping Aerojet to carve out this site from the other Superfund properties.

Local Oversight Program, Project Engineer, Solano County, CA - Mr. Fagerness was the Project Engineer overseeing the Solano County Leaking Underground Storage Tank (LUST) Program. This work included the review of consultant's calculations and proposed work plan for the installation and operation of soil and groundwater remediation systems used to remove petroleum and other contaminants from the subsurface environment. Used engineering experience and calculations to verify the accuracy and thoroughness of consultant's groundwater monitoring reports. I provided approval or recommendations for revision based on my engineering review. Worked directly with Department Management, County Supervisors, State Regulatory program officials, and general public (RPs) to ensure prompt response and accuracy within the LOP.

Local Oversight Program, Project Engineer, Environmental Site Assessment and Remediation, Abandoned Agricultural Sites, Central and San Joaquin Valleys, CA - Mr. Fagerness was responsible for the project management, site investigation and remediation of fourteen (14) separate abandoned farm sites located in the Central and San Joaquin Valleys. This work was completed for the Rural Economic and Community Development Division through the US Department of Agriculture (USDA) and the US Army Corp of Engineers (Sacramento Division). This work included the removal of underground and aboveground storage tanks (USTs/ASTs). The work additionally involved regulatory permitting for UST/AAT removals. Involved coordinating subcontractors, analytical laboratories and site contact to ensure project goals and objectives were met successfully and within budget. Responsible for coordinating staff to write the results of the field investigations including (data review and qualification, interpretation and summation of the analytical data, field documentation, and project narrative.

NPDES Program, Water Resources Control Engineer, Discharge projects in the San Joaquin Valley, CA - Mr. Fagerness was responsible for managing National Pollutant Discharge Elimination System (NPDES) sites in San Joaquin County, California. Used engineering skills and experience to assist with review of appropriateness of NPDES treatment systems. Verified calculations submitted by engineering firms on behalf of NPDES dischargers. Performed annual compliance inspections of NPDES facilities. Performed joint inspections with local and EPA officials specific to Industrial Discharge Users of municipal sewer systems. Responsible for review and interpretation of dischargers including the cities of Stockton, Lodi, Lathrop as wells as the Manteca Landfill, and CalAmco ammonia discharges.

Thomas Ayotte

Education

BA, Government, California State University Sacramento, 2017

Project Experience

Due Diligence Environmental Site Assessments - Working with developers, investors, and lending institutions, Mr. Ayotte assists in completing of Phase I environmental site assessments for property transactions as part of the due diligence process required by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. Property types assessed include commercial, industrial, multi-family residential, self-storage facilities, gas stations/automotive service, dry cleaners and hotels.

Field Technician – The gathering of information about possible contamination from current and historical land uses of commercial, industrial, multi-family residential, self-storage facilities, gas stations/automotive service, dry cleaners and hotels, Mr. Ayotte has conducted more than 50 field reconnaissance visits.

Abraham Serrato

Education

BS, Chemistry, University of California Davis, 2016

Project Experience

Due Diligence Environmental Site Assessments - Working with developers, investors, and lending institutions, Mr. Serrato assists in completing more than 1,000 Phase I environmental site assessments for property transactions as part of the due diligence process required by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. Property types assessed include commercial, industrial, multi-family residential, self-storage facilities, gas stations/automotive service, dry cleaners and hotels.

Property Condition Assessments (PCA) - Working with senior PCA project managers, Mr. Serrato reviews the condition of building structures and mechanical systems to assist with the completion of PCA projects. Property types assessed include commercial, industrial, multi-family residential, and assisted living. He has additionally performed numerous PCA inspections.

Field Technician – Working under the guidance and direction of a senior environmental engineer, Mr. Serrato has performed numerous Phase II data collection investigations throughout California. He is proficient in the Unified Soil Classification System (USCS) and has completed numerous subsurface investigations requiring the collection of soil, groundwater, soil vapor, and air samples. He is proficient in the selection of appropriate analytical test methods required to accurately assess chemicals of concern specific to the identified due diligence risks. He has cultivated numerous vendor and subcontractor relationship necessary to quickly meet client's tight timelines.
