# **EXECUTIVE SUMMARY**

The following is a summary of a Phase I Environmental Site Assessment (ESA) conducted by FREY Environmental, Inc. (FREY) for the Duarte School property located 1433 Crestfield Drive in Duarte, Los Angeles County, California (Subject Property). The Assessor's Parcel Number (APN) for the Subject Property is 8604-017-903. Additional current addresses identified with the Subject Property are 1400 Mt. Olive Drive and 2333 Central Avenue. The location of the Subject Property is depicted in Figure 1.

This Phase I ESA was prepared per the request of Crestfield Townhomes, LLC [Client and User]. It is FREY's understanding that this Phase I ESA is for the Client's purchase of the Subject Property with planned redevelopment to include residential townhomes, parking, and a public park.

## FINDINGS AND OPINIONS

# **Subject Property Description and Use**

The Subject Property consists of 12.97-acres of government owned land (Duarte Unified School District) on the northwest corner of the intersection of Crestfield Drive and Central Avenue. The Subject Property is occupied by three schools (Duarte Preschool, Andres Duarte Art Academy which teaches Pre-K to 8<sup>th</sup> Grade, and Mt. Olive High School) and the Otis Gordon Sports Park. Duarte Preschool and Mt. Olive High School was in operation at the time of the Subject Property inspection. Andres Duarte Art Academy was no longer in operation at the time of the Subject Property inspection.

Twenty-seven buildings are located on the Subject Property. Andres Duarte Art Academy is located in the southeast corner of the Subject Property and consists of 17 buildings. Duarte Preschool is located just west of Andres Duarte Arts Academy and consists of four buildings. Mt. Olive High School is located at the northwest corner of the Subject Property and consists of five buildings. The school buildings include classrooms, offices, restrooms, cafeteria, etc. One building on the west side of the Subject Property houses equipment related to a radio tower which is also located near the western boundary.

The Otis Gordon Sports Park covers the western half of the property that is not occupied by Mt. Olive High School. The park includes baseball fields and grass areas that can be used as soccer or football fields. A playground is located in the southeast corner of the park.

No environmental concerns were identified in the current use and observable conditions of the Subject Property.

Photographs of the Subject Property taken during the inspection conducted on April 23, 2024, are attached in Appendix A. The Subject Property is shown on Figures 1 and 2.

# **Historical Subject Property Use Information**

The Subject Property was undeveloped land until approximately 1952 when approximately eight (8) of the current school buildings were constructed as Andres Duarte School. Additional current school buildings were constructed at various times on the property prior to 2002. The use of the western portion of the Subject Property as a park began by 1964. The radio tower equipment building was constructed between 2003 and 2005.

No environmental concerns were identified in the historical use of the Subject Property.

# **Use of Nearby Properties**

The Subject Property is located in a mixed residential and industrial area. The area surrounding the Subject Property was mainly undeveloped with the exception of a few homes up until the early 1950s when dense development of single-family residential properties occurred to the north and west of the Subject Property. Dense development of single-family residential properties occurred to the east of the Subject Property by the mid-1960s. Development of the industrial properties to the south occurred mainly in the 1970s and 1980s.

FREY visually reviewed the exterior of the properties surrounding the Subject Property on April 23, 2024. Currently, single-family residential homes bound the Subject Property to the north along Bloomdale Street and to the east along Crestfield Drive. Industrial use properties bound the Subject property to the south and southwest along Central Avenue. To the west, the Subject Property is bound by a single lane alley/drive, followed by a concrete lined drainage channel and the 605 Freeway.

Of six (6) industrial use properties located immediately south of the Subject Property, three (3) are occupied by public storage facilities, one (1) is occupied by an apparel business, and the other two (2) properties are occupied by large buildings divided into multiple smaller business units. With the exception of a contractor business and a HVAC business, no other business names were identified on the buildings during the visual review conducted on April 23, 2024.

Facilities that have operated on the industrial properties to the immediate south were identified in various regulatory databases reviewed herein. However, based on the information reviewed and the hydrogeologic setting (depth to groundwater is greater than 300 feet below the ground surface), the facilities identified in the regulatory databases do not appear to present an environmental concern with respect to the Subject Property.

## **Data Gaps**

No significant data gaps were noted during the preparation of this Phase I ESA.

## **CONCLUSIONS**

FREY has performed a Phase I ESA in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Standard Practice E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM, 2021), and the standards and practices for All Appropriate Inquiries (AAI) under the United States Environmental Protection Agency 40 CFR Part 312 (EPA, 2005). Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

This assessment has revealed no recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), historical recognized environmental conditions (HRECs), or vapor encroachment conditions (VECs) in connection with the Subject Property.

# 1.0 INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) conducted by FREY Environmental, Inc. (FREY) for the Duarte School property located at 1433 Crestfield Drive in Duarte, Los Angeles County, California (known as "the Subject Property" throughout the rest of this document). The Subject Property consists of APN 8604-017-903. The Subject Property is depicted in Figures 1 and 2.

## 1.1 TERMINOLOGY

For the purposes of discussion, the following terms are used in this report:

- The *Subject Property* refers to the property that is the subject of the environmental site assessment as described in Sections 1.0, 4.1, and 4.2 and shown on Figures 1 and 2.
- Adjoining Properties are defined as any real property or properties with a border that is contiguous or partially contiguous with that of the Subject Property, or that would be contiguous or partially contiguous with that of the Subject Property but for a street, road, or other public thoroughfare separating them. The Adjoining Properties with respect to the Subject Property are described in Section 4.3 and are shown on Figure 2.
- Recognized Environmental Condition (REC), as defined in ASTM 1527-21, means (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a REC.
- Controlled Recognized Environmental Condition (CREC), as defined in ASTM 1527-21, is a REC affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.
- Historical Recognized Environmental Condition (HREC), as defined in ASTM 1527-21, is a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls.
- *Vapor Encroachment Condition (VEC)*, as defined in ASTM E2600-15, is the presence or likely presence of vapor phase chemical(s) of concern (COC) in the subsurface of the target property as identified during the vapor encroachment screening process.

- Chemical(s) of Concern (COC), as defined in ASTM E2600-15, is a chemical that is present in the subsurface environment, has a vapor pressure greater than 1 mm of mercury, or a Henry's Law Constant greater than 1×10<sup>-5</sup> atmosphere cubic meter per mole (atm m³/mole) at ambient temperature and pressure, and can potentially migrate as a vapor into the vadose zone of the Subject Property.
- Area of Concern (AOC), as defined in ASTM E2600-15, for potential contaminated facilities with non-petroleum hydrocarbon COCs is equal to 1,760 feet around the Subject Property and 528 feet around the Subject Property for facilities with petroleum hydrocarbon COC.
- The term "hazardous" is used in general accordance with its definition in Title 22, Division 4, Chapter 30, California Code of Regulations (CCR). The terms substance, material, and waste are used interchangeably, and no legal distinction is implied between the terms as used herein.
- Non-Scope Considerations (NSC) are additional environmental issues or conditions at the Subject Property that may warrant discussion or consideration but are outside the ASTM Standard practices of inquiry and do not qualify as RECs.

## 1.2 PURPOSE

The purpose of the scope of work described below was to assess past and present land use practices, Subject Property operations and conditions, and to identify the potential presence of hazardous substances in the soil, soil vapor, and groundwater beneath the Subject Property to the extent feasible, and determine if any RECs, HRECs, CRECs, or VECs exist on or near the Subject Property, pursuant to the processes described in the American Society for Testing and Materials (ASTM) Standard practices and guidelines (ASTM, 2015 & ASTM, 2021) and the All Appropriate Inquiries (AAI) rule promulgated by the United States Environmental Protection Agency on November 1, 2005 (EPA, 2005) except whereby noted.

#### 1.3 SCOPE OF WORK

The scope of work (SOW) designed to provide the information needed to meet the purpose of the investigation was as follows:

- Conduct a reconnaissance to collect information and make observations regarding features, activities, uses, and conditions to help identify environmental concerns. The reconnaissance included an inspection of the Subject Property interior and exterior features where safe access was available, a visual review of the Adjoining Properties from the Subject Property boundaries and taking photographs of the Subject Property and Adjoining Properties.
- Review a Client completed questionnaire to satisfy User responsibilities.
- Interview persons knowledgeable about the Subject Property history, if available.
- Review documents relative to the purpose of the Phase I ESA such as previous environmental investigations, land title records, etc.

- Review reasonably ascertainable published information for geology and hydrology details in the vicinity of the Subject Property, such as depth to groundwater, direction of groundwater flow, etc.
- Review radon zone information for the vicinity of the Subject Property.
- Review historical fire insurance maps (Sanborn maps), historical aerial photographs, historical topographic maps, a reverse phone directory search, an environmental lien and activity use limitation (AUL) report, and a government agency database report (Radius Map report) specifically prepared for the Subject Property by Environmental Data Resources Inc. (EDR).
- Review the California Department of Conservation Geologic Energy Management Division (CalGEM) Well Finder for oil and gas wells, fields, and zones within a one-mile radius of the Subject Property.
- Review permits, environmental files, and/or other history of use and condition information for the Subject Property maintained by the City of Duarte (City).
- Review permits, environmental files, and/or other history of use and condition information for the Subject Property maintained by the Los Angeles County Fire Department (LACFD) and Department of Public Works (LADPW).
- Review the California State Water Resources Control Board's (SWRCB) GeoTracker and Department of Toxic Substance Control (DTSC) EnviroStor databases for properties listed within the ASTM Standard minimum search distance.
- Prepare a report summarizing the findings of the information presented above.

# 1.4 NON-SCOPE CONSIDERATIONS AND EXCLUSIONS

The SOW did not include the assessment of NSCs, as defined by the ASTM Standard. NSCs as defined by the ASTM Standard include but are not limited to: identification of suspected lead or asbestos containing materials (ACM) or of moisture conditions in existing structures; screening for lead in water; assessment of regulatory compliance; assessment of cultural, historical, and ecological resources and endangered species; a Subject Property-specific wetlands delineation or a review of flood zone maps; nor the sampling for lead-based paint, ACM, radon gas, methane, or air.

The SOW did not include screening, nor the sampling of soil, soil vapor, or groundwater, for suspected emerging contaminants.

The SOW did not include a search for deeds or other land title record information back through 1980, nor a review of chain-of-title documentation for the Subject Property.

## 1.5 SPECIAL TERMS AND CONDITIONS

There are no special terms and conditions associated with this Phase I ESA.

#### 1.6 INVOLVED PARTIES

FREY has prepared this Phase I ESA for the Subject Property per the request of the Crestfield Townhomes, LLC (Client and User).

## 1.7 USER RELIANCE

This Phase I ESA was conducted on behalf of and for the exclusive use of the User(s), as named in Section 1.6, and may be relied upon by, and is intended exclusively for, the User(s), and its members, affiliates, related entities, subsidiaries, equity partners, lenders, title insurers, or regulatory/city agencies or current property owner(s) and their agent. FREY is not liable for any unintended usage of this report by any other parties.

This Phase I ESA shall not, in whole or part, be disseminated or conveyed to or used by any other party without the prior written consent of FREY. Any unauthorized party using or relying upon this Phase I ESA shall be liable to FREY for equitable compensation and appropriate punitive damages and shall be responsible to reimburse FREY for and indemnify, defend, and hold FREY harmless from and against any and all costs, claims, liabilities, expenses, lost profits and damages arising as a direct or indirect result of such unauthorized use or reliance.

#### 1.8 ASSUMPTIONS

Findings presented in this report hinge upon the following assumptions:

- FREY assumes the Subject Property, as identified in Section 1.0, has been correctly identified by the User (or a designated representative of the User) in agreements, contracts, and/or proposals signed by the User and FREY.
- FREY assumes information regarding the Subject Property history is provided in good faith by the User, designated representative of the User, Subject Property owner, designated representative of the Subject Property owner, and/or the Subject Property operator.
- FREY assumes no responsibility for errors or omissions of information provided by the User, designated representative of the User, Subject Property owner, designated representative of the Subject Property owner, and/or Subject Property operator.
- FREY assumes the hydrogeologic conditions (depth to groundwater and groundwater flow direction) beneath the Subject Property, used in the evaluation and determination of environmental concerns for the Subject Property, are similar to those described in Section 3.3.
- FREY can neither warrant nor guarantee the accuracy or completeness of information sourced from the third-party historical information and environmental database provider (EDR) and regulatory agencies (the City of Duarte, Los Angeles County, and the State of California).

# 2.0 USER RESPONSIBILITIES

FREY provided a copy of a User transaction screen questionnaire to the Client to obtain information related to the User responsibilities as outlined in the ASTM Standard (ASTM, 2021). A copy of the questionnaire, completed by the Client representative, Mr. Matt Waken and dated April 25, 2024, is provided in Appendix B. Information provided by the Client in the questionnaire and during the Subject Property inspection is provided below.

# Reason for Performing Phase I ESA

The purpose of this Phase I ESA is for the purchase of the Subject Property.

## Environmental Liens or AULs

According to the Client, a search of land title records back through 1980 did not identified any environmental liens or AULs filed or recorded against the Subject Property under federal, tribal, state, or local law.

# Specialized Knowledge

The Client responded that they have no specialized knowledge related to the Subject Property or any nearby properties.

# Relationship of the Purchase Price to the Fair Market Value

According to the Client, the purchase price being paid for the Subject Property reasonably reflects the fair market value as the land was sold through an open bid process.

# Commonly Known or Reasonably Ascertainable Information

The Client is unaware of any commonly known or reasonably ascertainable information about the Subject Property that would help identify environmental conditions indicative of releases or threatened releases.

# Degree of Obviousness of the Presence or Likely Presence of Contamination

The Client does not have any knowledge or experience relative to the Subject Property that there are any obvious indicators that point to the presence or likely presence of hazardous material(s) releases at the Subject Property.

#### **Documents**

The Client provided a copy of the following documents for the Subject Property which are included in Appendix B:

- A "Site Plan" showing the Subject Property and the layout of proposed redevelopment on the Subject Property with 173 townhomes and 390 parking garages/spaces on the eastern half of the Subject Property and a public park on the western half.
- A Preliminary Title Report for the Subject Property from Ticor Title, dated January 5, 2023. No environmental liens or AULs are identified in the report.

# 3.0 PHYSICAL SETTING

Information regarding topography, geology and hydrology are used to evaluate the likelihood of hazardous substances/petroleum hydrocarbons to migrate through soil and/or groundwater onto, within, or from the Subject Property.

## 3.1 TOPOGRAPHIC SETTING

The Subject Property is located on an alluvial plain on the southern side of the San Gabriel Mountains. Topography in the vicinity of the Subject Property slopes steeply to the south from the mountains located ½-mile to the north and then becomes a gentle grade sloping to the southwest. The ground surface beneath the Subject Property slopes gently to the west-southwest with elevations ranging from approximately 530 feet above mean sea level (msl) to 555 feet msl.

Topography in the vicinity of the Subject Property is shown on topographic maps in the EDR Historical Topo Map Report included in Appendix C. The Subject Property location, depicted on a topographic map, is included as Figure 1.

#### 3.2 GEOLOGY

The Site is situated within the San Gabriel Valley. The San Gabriel Valley is a structural basin that is filled with undifferentiated alluvial sediments overlying low permeability bedrock. The surface of the valley is a broad piedmont plain that generally slopes from the base of the San Gabriel Mountains in the north to the Whittier Narrows in the south. Alluvial sediments consist of silty sand, sand, cobble and boulders. These sediments are largely considered to be homogeneous on a regional scale throughout the valley (AMEC, 2010).

# 3.3 HYDROGEOLOGY

The Subject Property is located within the San Gabriel Valley Groundwater Basin (DWR, 2004). The water-bearing materials of this basin are dominated by unconsolidated to semi-consolidated alluvium deposited by streams flowing out of the San Gabriel Mountains. These deposits include Pleistocene and Holocene alluvium and the lower Pleistocene San Pedro Formation.

The LACDPW maintains a network of groundwater monitoring and groundwater supply wells throughout Los Angeles County. Groundwater monitoring well 4256 is located approximately 1,150 feet northeast of the Subject Property. The depth to groundwater in well 4256 (last measured on April 26, 2018) was 377 feet below the ground surface (ft bgs) (LACDPW, 2024a).

The Rio Hondo and San Gabriel drainages have their headwaters in the San Gabriel Mountains, then surface water flows southwest across the San Gabriel Valley and exit through the Whittier Narrows, a gap between the Merced and Puente Hills (DWR. 2004). The San Gabriel River is located ¼-mile southeast of the Subject Property and is the closest surface body of water, with exception of the manmade drainage channel located to the immediate west of the Subject Property (Figure 1).

## 3.4 OIL AND GAS

FREY reviewed the EDR Radius Map Report – Physical Settings Map (included in Appendix D) and the CalGEM Well Finder website for oil and gas wells in the Subject Property vicinity (CalGEM, 2024). No oil/gas wells are located within a 1-mile radius of the Subject Property.

## 3.5 RADON

The EDR Radius Map Report (Appendix D) indicates that the Subject Property is located in an average radon exposure zone according to a generalized assessment of radon potential in Los Angeles County. The US EPA lists Los Angeles County as Radon Zone Level 2, for areas where the indoor average radon level is greater than 2 picocuries per liter (pCi/L) but less than 4 pCi/L. Based on the California State Database for radon, of thirteen (13) tests conducted in the 91010 zip code area, none had detections of radon greater than 4 pCi/L. The US EPA has an action level of 4 pCi/L (EPA, 2002).

## 4.0 SUBJECT PROPERTY DESCRIPTION AND RECONNAISSANCE

## 4.1 SUBJECT PROPERTY LEGAL DESCRIPTION

Details from the Los Angeles County Assessor (LACA) Portal for the Subject Property are listed below website (LACA, 2024). A parcel map showing the Subject Property parcel from the LACA Portal is included in Appendix E. The Subject Property boundaries are shown on Figure 2.

## 4.2 SUBJECT PROPERTY INSPECTION

Ms. Mollie Banh of FREY obtained access to the Subject Property from the Duarte School District for a Subject Property inspection conducted on April 23, 2024. The inspection consisted of visual observations of the Subject Property from ground and/or floor levels. During the inspection FREY looked for evidence of past or present use, storage, handling, and disposal of potentially hazardous substances, and possible past and future releases of such substances. Ms. Banh had access to all areas of the Subject Property during the inspection except whereby noted below.

Photographs of the Subject Property collected during the inspection on April 23, 2024 are attached in Appendix A. Features of the Subject Property are shown on Figure 2.

The Subject Property is located on the northwest corner of the intersection of Crestfield Drive and Central Avenue in Duarte, California. Vehicular access to the property is available along Crestfield Drive at the northeast corner of the property, from Mt. Olive Drive at the northwest corner of the property, and along Central Avenue at two locations on the southern property line.

The Subject Property is occupied by three schools (Duarte Preschool, Andres Duarte Art Academy which teaches Pre-K to 8<sup>th</sup> Grade, and Mt. Olive High School) and the Otis Gordon Sports Park. - Electrical transformers are located just south of Building F at Andres Duarte Arts Academy and just west of the playground at Otis Gordon Sports Park. Signs indicating the presence of PCBs in the transformers were not observed. No indications of leaks or spills of oily substances were observed around the transformers. The electrical transformers do not appear to present an environmental concern.
- HVAC systems were present in all buildings at the Subject Property and do not represent an environmental concern.
- Two storm drains were located west of Building D at Duarte Preschool (one beneath the awning and one north of the awning) and one storm drain was located north of Building T at Andres Duarte Arts Academy. No indications of illegal dumping of hazardous materials into the drains were observed.

# 4.3 ADJOINING PROPERTY INSPECTION

Ms. Mollie Banh of FREY visually reviewed the exterior of the properties surrounding the Subject Property on April 23, 2024. Visual observations of Adjoining Property improvements were completed from the Subject Property boundaries or from adjacent public thoroughfares. #### 6.3.2 REGULATORY DATABASE FINDINGS

FREY reviewed the regulatory agency database listings in the EDR Radius Map Report (Appendix D) to identify facilities involved in the storage, use, generation, disposal, and/or release of hazardous substances and evaluated the potential for releases at the Subject Property or the migration of contaminants onto the Subject Property from off-Subject Property sources via soil, groundwater, or soil vapor.

In evaluating if a listed facility is a potential environmental concern to the Subject Property, FREY generally applies the following criteria to determine if a facility is of lower potential environmental concern:

- 1) The facility information does not indicate the handling of hazardous substances,
- 2) The facility information does not imply the handling of hazardous substances in quantities to be of concern,
- 3) The facility information does not imply a release of hazardous substances,
- 4) The facility was recently granted "No Further Action" by the appropriate regulatory agency for a cleanup case, and/or
- 5) The facility distance from the Subject Property and the hydrogeologic position relative to the Subject Property present a situation in which the likelihood is low that a potential release of hazardous substances from the facility would migrate onto the Subject Property.

When evaluating a facility listing based on hydrogeologic criteria, the depth to groundwater and groundwater flow direction (whether the facility is located up-, cross- or down-gradient of the Subject Property) provides an indication of the potential for contaminants to migrate from the facility and onto the Subject Property. Specifically for the Subject Property, first groundwater is estimated to occur at a depth of approximately 377 feet bgs. Thus, potential contaminant migration through groundwater from an off-site source to the Subject Property is not anticipated.

Evaluation of regulatory agency database listings identified within the approximate minimum search distance, shown on the above table, is provided below.

# Resource Conservation and Recovery Act (RCRA) Generators

The RCRA generator database includes selective information on facilities which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. Four (4) listings were identified in the minimum search distance which consists of the Subject Property and Adjoining Properties in the RCRA-Small Quantity Generator (SQG) database.

• The facilities are all located immediately south of the Subject Property. The facilities include Air Brakes Plus located at 2320 Central Avenue – Unit 6, Quality Power Inc located at 2320 Central Avenue – Unit 14, Designers Marble Products located at 2310 Central Avenue, and Sunny Sky Products, located at 2310 Central Avenue and immediately south of the Subject Property. Minimal pertinent information is provided in the listings. There are no environmental cleanup cases or reports of violations for these facilities in the database listings reviewed.

Based on the information reviewed and the hydrogeologic setting, these four facilities do not appear to present an environmental concern with respect to the Subject Property.

# State or Tribal Hazardous Waste Equivalent

Two (2) state hazardous waste equivalent facilities (EnviroStor) are identified within the ½-mile ASTM Standard search distance from the Subject Property. FREY reviewed information presented in the EDR Radius Map and the information available on the DTSC EnviroStor website (DTSC, 2024) for the facility identified.

• TDH Gold Cleaning, located at 2300 Central Avenue – Unit #1 and immediately south of the Subject Property, is a Tiered Permit site with a status of "Refer: Other". No other pertinent information is provided in this database listing. This facility is also identified as TDH Precious Metal Refinery in the LA County Site Mitigation database. FREY reviewed the reviewed the LACFD active facility, inactive facility, site mitigation, and CALARP lists for HHMD CUPA related records for TDH Gold Cleaning using the LACFD Public Records Request website (LACFD, 2024). The facility is identified is identified in the LACFD Site Mitigation List as an inactive site. FREY submitted a records request to the LACFD to acquire more information related to this database listing. According to the LACFD the address did not match their database.

Based on the information reviewed and case status, lack of any additional database listings identified for the facility, and the hydrogeologic setting, this facility listing does not appear to represent an environmental concern with respect to the Subject Property.

• Former Learner's Gas Station, located at 2107 Huntington Drive and 1,500 feet northwest of the Subject Property, is an Evaluation site with a status of "Refer: Local Agency as of 8/2/2012". The case was handled by the LACDPW and was regarding soil impacted with PCBs and petroleum hydrocarbons from in-ground hydraulic hoists and USTs that were removed. The case received a No Further Action (NFA) required status.

Based on the distance from the Subject Property, the hydrogeologic setting, and the status of the case, this facility listing is not an environmental concern with respect to the Subject Property.

# **State or Tribal Leaking Storage Tanks**

Nine (9) leaking storage tank listings [six (6) Leaking Underground Storage Tank (LUST) cases and three (3) Cleanup Program Sites-Spills, Leaks, Investigations, and Cleanups (CPS-SLIC) cases] are located within the ½-mile ASTM Standard search distance from the Subject Property. FREY reviewed information presented in the EDR Radius Map and the information available on the SWRCB GeoTracker website (SWRCB, 2024).

- All 6 of the LUST cases are located on Huntington Drive to the north and east and 900 feet or greater from the Subject Property. The cases are all petroleum hydrocarbon related and have received a NFA required status.
  - Based on the distances from the Subject Property, the hydrogeologic setting, and the status of these 6 cases, these facility listings are not considered an environmental concern with respect to the Subject Property.
- The three (3) CPS-SLIC cases are for Discopy Lab at 1540 Flower Avenue, M E Enterprises at 1570 Flower Avenue, and Hoffman Educational System at 1863 Business Center Drive, which are all located approximately 2,100 feet southwest of the Subject Property. Two of the cases received NFA required status and the other has an inactive status as of 1985.

Based on the distances from the Subject Property, the hydrogeologic setting, and the status of these 3 cases, these facility listings are not considered an environmental concern with respect to the Subject Property.

# Additional Environmental Database Listings

FREY reviewed the database listings for properties identified within the corresponding ASTM Standard minimum search distance of the Subject Property in the federal and state environmental records databases.

The Subject Property was identified in the Hazardous Waste Tracking System (HWTS) and HAZNET databases as the Duarte School between 2004 and 2018 for inorganic and asbestos containing wastes likely related to building upgrades. The information provided in these database listings are not considered an environmental concern.

Based on the hazardous materials information reviewed for the additional listings identified in additional environmental databases, not already discussed herein, the facility distances relative to the Subject Property, and the hydrogeologic conditions in the area, no additional environmental concerns were noted.

# **Orphan Facilities**

One (1) orphaned (unplottable facility) was listed in the EDR Radius Map Report. Based on the interpreted location, which is greater than one mile from the Subject Property, and the information presented in the database for the facility, it is not considered an environmental concern with respect to the Subject Property.

# 7.0 VAPOR ENCROACHMENT

The ASTM Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions E2600-15 (ASTM, 2015) provides guidelines for conducting a vapor encroachment screen (VES) on a property with respect to COCs that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property with the goal of identifying a VEC.

Review of the information presented above in this report included a cursory evaluation of the potential for vapor migration in general conformance with the ASTM E2600-15 which involved approximating groundwater gradient, reviewing the distances and positions of reported and/or potential releases to soil and/or groundwater relative to the Subject Property, and identifying possible vapor migration and VECs (Tier 1 vapor encroachment screening). No VECs were identified.

#### Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- ALWAYS VERIFY wire instructions, specifically the ABA routing number and account number, by calling the party
  who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions,
  use phone numbers you have called before or can otherwise verify. Obtain the phone number of relevant
  parties to the transaction as soon as an escrow account is opened. DO NOT send an email to verify as the
  email address may be incorrect or the email may be intercepted by the fraudster.
- USE COMPLEX EMAIL PASSWORDS that employ a combination of mixed case, numbers, and symbols. Make
  your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same
  password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/04/2023 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk

characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/23/2023 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

#### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

### STANDARD ENVIRONMENTAL RECORDS

#### Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

### ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

#### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

### PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

### PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

### PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

#### **RECORD SOURCES**

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

A network of professional, trained researchers, following established procedures, uses client supplied address and/or parcel information to:

- search for parcel information and/or legal description
- search for ownership information
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc
- search for publicly available environmental encumbering instrument(s) filed on or after the recording of the current deed; between the recording of the current deed and present
- provide a copy of any environmental encumbrance(s)
- provide a copy of the current deed when available

2333 Central Ave. - Building Permit (1).pdf;

Good afternoon,

In response to your request, we are in possession of the attached cell tower permit. The City does not hold any permits, letter, or reports for the properties that were inquired about as the school district does not pull permits from the City. Those records would likely be held by the State.

Any violation of Section 70315 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500)
