EXECUTIVE SUMMARY

Geosyntec Consultants was retained by SCIND Massachusetts Point, LLC (referred to as the "Client" or "User"), to perform a Phase I Environmental Site Assessment (ESA) of the approximately 14.42-acre property located at 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, Riverside County, California 92507 (referred to herein as "Site" or "Subject Property"). This Phase I ESA was conducted in general accordance with the scope and limitations of certain guidance contained within the American Society for Testing Materials International (ASTM) Practice E1527-21 to identify, to the extent feasible, "Recognized Environmental Conditions[1]" (RECs) at the Site, as the "REC" terminology is defined by ASTM E1527-21.

The Site is currently owned by SCIND Massachusetts Point, LLC and includes three parcels (210130015, 210130016, and 210130020). At the time of Geosyntec's Phase I ESA, the north Site parcel (210130015) was occupied by New Basis, a former plastics manufacturer and current polymer concrete manufacturer, and was developed with two commercial/industrial building. The eastern Site parcel (210130020) was occupied by Student Transportation of America (STA), a bus charter/transportation company, and was developed with two commercial/industrial buildings. The south parcel (210130016) was an unpaved parking area also utilized by STA.

Portions of the Site were residential and agricultural (potentially grazing land then citrus orchard) from at least 1930 to 1959. The New Basis and STA buildings were constructed by 1948 and 1989, respectively. From at least 1949 to 1975, a rail spur extended from the railroad south of the Site onto the south-central portion of the Site.

Environmental investigations consisting of soil, soil vapor, indoor air, and groundwater sampling to characterize chlorinated volatile organic compound (VOC) impacts at the Site caused by historic operations have occurred since approximately 2013. Soil vapor extraction (SVE) remediation was also performed on the STA property from 2019 to 2021, near the bus maintenance building. Former Site features also include at least five underground storage tanks (USTs) and four aboveground storage tanks (ASTs) used for petroleum products and automotive-related fluids, and two three-stage clarifiers (one was removed and one remains but is no longer in use).

We have performed a Phase I ESA of the Site in conformance with the scope and limitations of ASTM Practice E1527-21. Geosyntec has identified the following findings:

---

[1] As defined by ASTM E1527-21, a Recognized Environmental Condition (REC) is: *"the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."* ASTM E1527-21 also defines a "Historical Recognized Environmental Condition" and a "Controlled Recognized Environmental Condition."

Recognized Environmental Conditions (RECs)

- **Chlorinated VOC Impacts**: The Site was historically occupied for trucking and transportation, plastics manufacturing, and copper and brass manufacturing since at least 1946. Environmental Site investigations related to the characterization of chlorinated VOCs at the Site were first conducted in 2013, and soil, soil vapor, and groundwater investigations are ongoing under the regulatory oversight of the Santa Ana Regional Water Quality Control Board (SARWQCB). On the northwest portion of the 2626 Kansas Avenue parcel, elevated concentrations of trichloroethene (TCE) have been detected in shallow soil vapor, which is attributed to early copper and brass manufacturing operations conducted at the facility. Similarly, tetrachloroethene (PCE) and TCE have also been detected in south-central and southeast exterior areas on the 2626 Kansas Avenue parcel at elevated concentrations in soil vapor that may also be indicative of a minor historical release in one or both areas. 1,1-Dichloroethene (1,1-DCE) has also been routinely detected in groundwater monitoring wells on the northwest portion of the 2626 Kansas Avenue parcel, which has been attributed to a hydraulically upgradient off-site source. On the south and east parcels operated by STA, PCE and TCE have historically been detected, with the highest concentrations in deep soil vapor. Concentrations of PCE and TCE in soil vapor were reduced significantly by the prior SVE remediation system. PCE and TCE have also been detected in groundwater underlying the parcels operated by STA. Based on the results of indoor air sampling conducted prior to operation of the SVE system, the VOCs present in soil vapor underlying the Site are not resulting in a soil vapor intrusion risk.

  The low level chlorinated solvent impacts on the 2626 Kansas Avenue parcel (primarily underlying the northwest portion of the commercial building) are most likely the result of historical copper and brass manufacturing operations; soil vapor and groundwater PCE and TCE impacts detected underlying the STA parcels are attributed to sources on the off-Site south-adjoining 3016 Kansas Avenue property where a significant use of chlorinated solvents is documented to have occurred associated with historical aluminum manufacturing operations conducted since the 1940s/1950s. The presence of chlorinated VOCs in subsurface media at the Site above current regulatory screening thresholds is considered a REC, though these impacts are not adversely affecting current commercial/industrial operations. For future commercial Site uses, potential historical release areas on the 2626 Kansas Avenue property are planned to be addressed during redevelopment such that their potential risk to the environment and to human health are further reduced to negligible levels. Given that the soil vapor impacts on the STA parcels are attributed to uncontrolled off-Site sources to the south, a vapor intrusion mitigation system (VIMS) is planned to be incorporated into future onsite buildings to mitigate potential vapor intrusion risk to future Site occupants.

Historical Recognized Environmental Conditions (HRECs)

- **Underground Storage Tank (UST) Closures in 1996:** In 1986, a prior tenant installed one 10,000-gallon diesel fuel UST, one 5,000-gallon gasoline UST, and one 500-gallon

"motor oil drain" (waste oil) UST at 1989 Massachusetts Avenue. In 1996, these USTs were removed and disposed offsite. Following soil sampling, the County of Riverside Department of Environmental Health (DEH) issued a letter stating that "no significant contamination exists and…no further site mitigation will be required." Due to the regulatory closure, the USTs removed in 1996 are considered an HREC.

- **UST Closures in 2001:** In 1997, one 12,000-gallon gasoline UST and one 20,000-gallon diesel UST were installed at 1989 Massachusetts Avenue, just east of the dispenser area east of the bus washing station. In 2001, these USTs along with five dispenser islands were removed and transported offsite for disposal. Soil was over-excavated to an approximate depth of 15 feet. Following confirmatory soil sampling, DEH issued a letter stating that no further assessment or remediation was required, and also stated that "HMMD should issue NFA letter." In March 2008, DEH Hazardous Materials Management Division (HMMD) issued the closure letter. Due to the regulatory closure, the USTs removed in 2001 are considered an HREC.

Additional Finding

- **Per- and Polyfluoroalkyl Substances (PFAS) Database Listing**: According to the records review, the 2626 Kansas Avenue parcel was identified on the Per- and Polyfluoroalkyl Substances (PFAS) Enforcement and Compliance History Online (ECHO) database made available by the United States Environmental Protection Agency (USEPA), which identifies industries that may handle PFAS based on an industry (e.g., manufacturing) sector classification code (e.g. Standard Industrial Classification [SIC] or North American Industry Classification System [NAICS]). Inclusion in this database does not indicate that PFAS are or were being manufactured, processed, used, or released by the facility. Listed facilities are included in this database based on their industrial profile but are unconfirmed by the USEPA as having used PFAS on-site. No obvious evidence of a use or release of PFAS compounds was identified as part of this Phase I ESA, and the Site (and surrounding properties) are not listed on the GeoTracker PFAS map. Therefore, this finding is not a REC but rather an additional finding.

1. INTRODUCTION

Geosyntec Consultants (Geosyntec) was retained by SCIND Massachusetts Point, LLC (referred to as the "Client" or "User"), to perform a Phase I Environmental Site Assessment (ESA) of an approximately 14.42-acre property located at 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, California 92507 (referred to herein as "Site" or "Subject Property"). The Site location is shown on **Figure 1**, a current Site layout provided on **Figure 2**, and the Site vicinity is shown on **Figure 3.**

1.1 Purpose

This Phase I ESA was conducted in general accordance with the scope and limitations of certain guidance contained within the ASTM Standard Practice E1527-21. The intent of Geosyntec's effort was to provide the Client with a Phase I ESA to identify, to the extent feasible, "Recognized Environmental Conditions"[2] (RECs) for the Site, as the "REC" terminology is defined by ASTM E1527-21.

1.1 Scope of Services

Geosyntec was authorized by the Client to complete a Phase I ESA of the Site. This work was conducted in accordance with authorization of Geosyntec's 21 October 2024 proposal. For the purposes of the Phase I ESA report, the Client represents the "User", defined as "the party seeking to use ASTM Practice E 1527 to complete an *environmental site assessment* of the *property*…." The Phase I ESA scope of work included: (i) review of pertinent information/documents provided to Geosyntec; (ii) review of local, state, and federal environmental databases for the Site and in the vicinity of the Site pursuant to the ASTM E1527-21 Practice; (iii) evaluation of historical land usage through obtaining/reviewing historical aerial photographs, Sanborn® fire insurance rate maps, city directories, property tax files, and/or topographic maps; (iv) a site visit to perform a visual reconnaissance of the site features and use of adjoining properties; (v) attempts to conduct interviews with one or more individuals familiar with the Site; and (vi) preparation of a Phase I ESA report. No work associated with "non-scope considerations"[3] was considered as part of completion of this Phase I ESA.

---

[2] As defined by ASTM E1527-21, a Recognized Environmental Condition (REC) is: *"the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."* ASTM E1527-21 also defines a "Historical Recognized Environmental Condition" and a "Controlled Recognized Environmental Condition."

[3] "Non-Scope Considerations" are described in ASTM E1527-21 and include, but are not limited to: asbestos-containing building materials, biological agents, cultural and historic resources, ecological resources, endangered or otherwise protected species/habitats, health and safety, indoor air quality, industrial hygiene, lead based paint, lead in drinking water, mold, radon, regulatory compliance, wetlands, wildlife, etc. Notably, Phase II ESA work (such as may be done through a sampling effort) is a Non-Scope Consideration.

The Site visit was conducted by Maya Sederholm of Geosyntec on 15 October 2024. The report was prepared by Maya Sederholm and reviewed by Brian Rockwell and Veryl Wittig. Mr. Veryl Wittig is an "Environmental Professional" (as defined under the ASTM Practice E1527-21). Professional qualifications are presented in **Section 10**.

1.2 Significant Assumptions

Except as may be noted in Geosyntec's 21 October 2024 proposal, no significant assumptions were taken into account by Geosyntec as part of this project.

1.3 Limitations, Deviations, and Exceptions

This Phase I ESA contains a property description and history, an environmental database review, a summary of visual observations made during the Site reconnaissance, and descriptions of information obtained during interview(s) of person(s) knowledgeable with the Site. The findings and conclusions presented in this Phase I ESA are the result of professional interpretation of the information collected at the time of this study. The Phase I ESA does not necessarily include an exhaustive search of all available records nor does it include detailed assessment of all Phase I ESA findings. Therefore, Geosyntec cannot "certify" or guarantee that any property is free of environmental impairment; no warranties regarding the environmental quality of the property are expressed or implied.

Geosyntec identified the following limitation during the ESA:

- During the reconnaissance, Geosyntec was not able to obtain access to the chemical storage area in the southeastern portion of the eastern New Basis building.

In performance of this Phase I ESA, Geosyntec has not identified exceptions or deviations from the ASTM E1527-21 standard of practice except as discussed in Section 7.2 (Data Gaps).

1.4 Special Terms and Conditions

Except as may be noted in Geosyntec's proposal dated 21 October 2024, no special contractual terms and conditions were taken into account as part of this project.

1.5 User Reliance

This Phase I ESA report has been prepared solely for the benefit of the Client. Geosyntec has issued the Phase I ESA Report to the Client and grants this entity the right to rely on the report contents. Except as specifically set forth in Geosyntec's proposal to perform this work, no third party shall have the right to rely on Geosyntec's opinions rendered in connection with the Services without Geosyntec's written consent, which may be conditioned on the third-party's agreement to be bound to acceptable conditions and limitations similar to those agreed to by the Client. Please

note that Geosyntec's consent to provide a right-to-rely on this Phase I ESA report is subject to Client's approval and to agreement to Geosyntec's terms and conditions associated with Geosyntec's performance of this specific Phase I ESA.

2. SITE DESCRIPTION

This section provides a description of the key characteristics of the Site. This description is derived from information gathered during the Site reconnaissance unless referenced otherwise.

2.1 Site Location and General Characteristics

The Site is an approximately 14.42-acre property consisting of three parcels (210130015, 210130016, and 210130020) owned by SCIND Massachusetts Point, LLC. The Site is located in a commercial/industrial area with warehouses, commercial buildings, railroads, and highways. Current Site addresses are 1989 Massachusetts Avenue (210130016 and 210130020) and 2626 Kansas Avenue (210130015), and potential historical Site addresses include 1985-2069 (odd) Massachusetts Avenue, according to a review of city directory listings (Section 4.2.4).

The Site location is shown on **Figure 1**, a current Site layout provided on **Figure 2**, and the Site vicinity is shown on **Figure 3.**

2.2 Current and Former Use of the Site

The north parcel (2626 Kansas Avenue) is currently occupied by New Basis, a polymer concrete fabrication company. Operations and areas include manufacturing of pads and underground enclosures for utilities, woodworking, chemical (waste/mixed oil, liquid mixtures, hydrocarbon solvents, tank bottom waste, oil/water separation sludge, oxygenated solvents, resin, and other materials) storage/handling, and offices. From approximately 2002 to 2009, New Basis was a plastic fabrication company; however plastic manufacturing ceased when that portion of the business sold. A sister company, Lattice Composites LLC (Lattice), operated work areas, an oven, and chemical storage area within the New Basis tenant space as of 2021; however, this entity appeared to no longer be present by 2024.

The north parcel (2626 Kansas Avenue) was redeveloped for commercial use beginning in 1946. The two existing commercial/industrial buildings in the northwest portion of the Site were constructed by 1953. Owners and entities operating in these buildings have included Revere Copper and Brass (at least 1951-1960), Bridgeport Brass (1964), Homepool Equipment (1981), Little Lake Industries (1981), Muskin Corp. (1981), Associated Plastics (1986-2001), and New Basis (2002-present).[4]

[4] Alcan, Inc., Hunter Douglas Aluminum, and National Distillers were identified as prior 2626 Kansas Avenue occupants during unknown years within prior Phase I ESAs prepared for the Site; however, Geosyntec was unable to corroborate former Site ownership/occupancy by these entities. A summary of a 2007 Phase I ESA included within a 2012 Phase I ESA indicates that the listing of these entities as prior occupants may have been based on a hearsay account from a real estate agent at the time. The EDR report indicates that Alcan, Inc. and Hunter Douglas historically operated on the south-adjoining property (3016 Kansas Avenue), and it is assumed that the listing of these entities as former Site occupants in prior Phase I ESAs is erroneous.

The east and south parcels (1989 Massachusetts Avenue) are currently improved with a school bus yard and maintenance shop occupied by Student Transportation of America (STA), a bus charter/transportation company. The east parcel appears to have been residential/agricultural through 1967, when it was graded and the easternmost portion was improved with a paved parking lot by 1978. The east parcel was redeveloped with the bus storage and maintenance facility in 1986, with the bus washing structure present by 2002. Occupants have included STA, Penske Truck Leasing, Laidlaw Transit (1986 to circa 2003), and Transportation Concepts. Petroleum USTs (reportedly removed) were located on the property in various years. Two clarifiers were associated with the washing station and bus maintenance building; the southern-most clarifier was removed in 2018.

The south parcel appeared to have been residential/agricultural through 1959, with a rail spur through the center by 1949. By 1967, the land was cleared of vegetation, and several small trailers or sheds were present along the southern boundary. The rail spur appeared to be removed by 2002, and the south parcel remained an unpaved lot. By 2009, the south parcel was utilized as a parking lot associated with the bus storage operations on the east parcel, and has remained relatively unchanged since.

2.3 Description of Structures, Roads, Other Improvements on the Site

The north parcel (2626 Kansas Avenue) was improved with two one-story commercial/industrial buildings (Building 1 to the west and Building 2 to the east) occupied by New Basis. At the time of the Site visit, Building 1 contained an office area and a manufacturing warehouse, and Building 2 contained a manufacturing warehouse, woodworking department, and a chemical storage area. The exterior areas included storage areas for scrap molds, scrap metals, and miscellaneous items on the eastern portions of the property and paved parking along the western exterior areas.

The east parcel (1989 Massachusetts Avenue) was developed with two small one-story commercial/industrial buildings occupied by STA. The southern building included a bus maintenance shop and office. The northern building included a former bus-washing station. This building was used for storage at the time of the Site visit. The remainder of the east parcel consisted of paved parking areas utilized by STA. The southwestern parcel (1989 Massachusetts Avenue) consisted of an unpaved parking area also utilized by STA.

Currently, 15 groundwater monitoring wells, 16 soil vapor probes, and four soil vapor extraction (SVE) wells are present across the Site. One groundwater monitoring well is also located on Roberta Street adjoining north of the 2626 Kansas Avenue parcel.

2.4 Current and Prior Use of Adjoining Properties

At the time of completion of this Phase I ESA, the vicinity surrounding the Site was primarily commercial/industrial. In summary, the area land use immediately surrounding the Site was noted to be as follows:

	Current Observed Use	Identified Prior Use[1]
North	Roberta Street followed by various commercial/industrial business on Kansas Avenue (2522) and Roberta Street (2053-2965), including Jimenez Bros Customs (auto parts manufacturer at 2065 Roberta Street) and Rolenn Manufacturing (molding supplier at 2065 Roberta Street), another portion of Kansas Avenue, and JC's Grease Buyers (industrial operations at 1999 Roberta Street). One residential property is present to the north across Roberta Street, to the east of Jimenez Bros Customs.	Residential through 1970s then commercial/industrial
South	Massachusetts Avenue followed by Edge Plastics, ODI Inc. (associated with Luxfer), and Donmar Staging (industrial operations at 3016 Kansas Avenue)	Agricultural through 1930s then commercial/industrial (including heavy metal manufacturing operations) since the 1950s
East	Office/commercial/industrial buildings along Hulen Place (2801-2881), including Getty Design (an automotive parts manufacturer at 2841 Hulen Place) and a homeless shelter (2800 Huren Place) as well as A-1 Grit Co. (roofing contractor at 1901 Massachusetts Avenue)	Residential/agricultural through 1980s then commercial/industrial
West	Kansas Avenue followed by TMP Services, Inc. (office at 2929 Kansas Avenue), The Recycler Core Company (2727 Kansas Avenue), and First Class Cycles (motorcycle repair shop at 2525 Kansas Avenue)	Agricultural through 1930s then commercial/industrial

1. Identified prior use from review of historical aerial photographs, topographic maps, and fire insurance maps. The review of these resources is presented in **Section 4.2** of this report.

2.5 Physical Setting

2.5.1 Topography and Geology

Figure 1 shows the location of the Site, as indicated on the United States Geological Survey topographic map. In conjunction with this Phase I ESA, Geosyntec obtained an environmental database report for the Site from Environmental Data Resources, Inc. (EDR). According to the EDR report (**Appendix B**), the Site has an elevation of approximately 897 feet above mean sea level with a decreasing land surface topographic gradient toward the northwest. Geosyntec notes

the area in the vicinity of the Site is relatively flat. The EDR report indicated that surficial soil in the vicinity of the Site is well-drained Arlington fine sandy loam, and geology is Mesozoic Cretaceous granitic rocks.

The Site is located in the northern part of the Peninsular Ranges Province within the central part of the Perris block, which represents a relatively stable area located between the Elsinore and San Jacinto fault zones. Sedimentary units at the Site and vicinity consist of late to middle Pleistocene alluvial fan deposits. Based on boring logs prepared for the Site associated with ongoing environmental activities, subsurface lithological units consist primarily of sands and silty sands to depths of at least 300 feet below ground surface (ft bgs). Periodic finer-grained intervals (clays, silts, clayey sands) are also present, with an interval of silt to clayey sand consistently observed at depths between approximately 40 to 50 ft bgs, and an interval of clay consistently observed at depths between approximately 110 to 120 ft bgs[5].

2.5.2 Hydrology

According to the 2012 Riverside East, California topographic map (**Appendix E**) and current aerial imagery, the nearest surface water body to the Site is an unnamed, unlined drainage feature located approximately 200 feet northeast of the Site which connects to concrete-lined Riverside Canal located approximately 550 feet west of the Site and running generally to the southwest.

A search of local/regional water agency records by EDR identified two United States Geological Survey (USGS) water wells within 1/2-mile of the Site and dozens of water wells within one mile of the Site (**Appendix F**). These well records did not provide pertinent information, such as depth to water or sample analytical data.

The Site is located in the "Riverside-E" subunit of the Middle Santa Ana River Basin, which is listed as having potential beneficial uses for municipal, agricultural, industrial, and industrial process supply [SWRCB, 2008]. Groundwater is present beneath the Site at depths starting around 120 ft bgs. A hydraulic gradient in the south-southwesterly direction has been reported since at least 2018 when groundwater monitoring was initiated at the Site. Historically, however, the direction of groundwater flow is anticipated to have been north-northwest in the 1990s (at least) based on environmental case files for the property located at 2625 Durahart Street, approximately 300 feet to the east of the Site[6]. Local groundwater flow direction may vary depending on area groundwater pumping, surface water bodies, land use and development, localized topography, and other macro and micro features.

3. USER-PROVIDED INFORMATION

This section describes certain information provided to Geosyntec by the Client (the Client is the "User" of this Phase I ESA).

3.1 Title Records

Geosyntec was not provided with and did not review title records for the Site. A title search was not included in Geosyntec's scope of services.

3.2 Environmental Liens or Activity and Use Limitations

The User did not provide information regarding environmental liens or activity and land use limitations associated with the Site.

3.3 Specialized Knowledge

The User provided several documents pertaining to the Site. Pertinent documents are summarized in Section 4.3.1 and included in **Appendix A**.

3.4 Commonly Known or Reasonably Ascertainable Information

The User did not provide information regarding commonly known or reasonably ascertainable information (as defined in AAI) regarding the Site, with the exception of information provided in previous reports summarized in Section 4.3.1 and included in **Appendix A**.

3.5 Valuation Reduction for Environmental Issues

The User did not provide information regarding a valuation reduction.

3.6 Actual Knowledge

In accordance with the requirements of ASTM E1527-21 Section 6.4, the User has not conveyed to Geosyntec any actual knowledge or specific information pertaining to the existence of environmental liens or activity and/or use restrictions (AULs) at or regarding the Site.

3.7 Degree of Obviousness

The User did not provide information regarding the degree of obviousness of the presence or likely presence of contamination at the Site,

3.8 Owner, Property Manager, and Occupant Information

Contact information for the current owner was not provided. The User, Ian Shapiro of Staley Point Capital, supplied Geosyntec with the following contact for the Site: Max Dunk, Assistant Property Manager with Unire Real Estate Group, Inc. Mr. Dunk coordinated Site access for Geosyntec. Geosyntec was accompanied by Joey Perez, Supervisor at New Basis, during the reconnaissance of that facility.

3.9 Reason for Performing This Phase I ESA

The Client retained Geosyntec to perform this Phase I ESA for the Site to identify potential environmental concerns associated with the Site.

3.10 Additional Information

The User previously provided Geosyntec with several Site documents, summarized in Section 4.3.1. Copies of these documents are included in **Appendix A**.

4. RECORDS REVIEW

Geosyntec's records review consisted of the following, to the extent Geosyntec found these to be available and reasonably ascertainable: i) review of identified federal, state, and local environmental databases; ii) review of identified historical aerial photographs; iii) review of identified historical topographic maps; iv) review of identified Sanborn fire insurance maps; v) review of local authority permits/records; vi) review of property tax information; and vii) documentation provided by regulatory agencies.

4.1 Standard Environmental Records Sources

4.1.1 Environmental Database Search Approach

Geosyntec reviewed applicable and reasonably ascertainable federal, state, and local environmental-related databases as part of this Phase I ESA. The environmental database search was performed by EDR in an attempt to ascertain whether the Site or neighboring properties were suspected of having environmental conditions that could have impacted the surface or subsurface conditions in a way which could be considered a REC for the Site. Specific records and search distances (measured from the approximate property boundary of the Site) for the environmental databases were reported by EDR to be consistent with ASTM Practice E1527-21 and were discussed in the EDR report (08 October 2024). Database descriptions are included in the EDR report. The EDR Database Report is presented as **Appendix B**.

4.1.2 Environmental Database Search Results

This section summarizes the findings from the environmental-related database review and evaluates the potential for these listed sites to have impacted the surface or subsurface conditions in a way which could be considered a REC for the Site. The locations of these listed sites are shown on the Overview Map and Detail Map in the EDR Report.

4.1.2.1 *Subject Property*

The Site was identified by EDR (**Appendix B**) in several databases, discussed by address and entity below.

1989 Massachusetts Avenue

- Penske Truck Leasing was identified in the HAZNET, National Pollutant Discharge Elimination System (NPDES), California Integrated Water Quality System (CIWQS), California Environmental Reporting System (CERS), HWTS, and UST databases.

- Laidlaw Transit Inc. was identified in the Resource Conservation and Recovery Act (RCRA) Non-Generator (NonGen) / No Longer Reporting (NLR), FINDS, Enforcement

and Compliance History Online (ECHO), HAZNET, HWTS, Statewide Environmental Evaluation and Planning System (SWEEPS) Underground Storage Tank (UST), California (CA) Facility Inventory Database (FID) UST, NPDES, and CIWQS databases.

- Transportation Concepts was identified in the HAZNET and HWTS databases.

- Student Transportation of America (STA) was identified in the Hazardous Waste Tracking System (HWTS), Hazardous Waste Information System (HAZNET), Facility Index System (FINDS), ECHO, HAULERS, RCRA NonGen / NLR, Cleanup Program Sites (CPS)-Spills, Leaks, Investigations, and Cleanups (SLIC), CERs HAZ WASTE, CIWQS, and CERS databases.

- DREP Magellan Rivers was identified in the ECHO, RCRA NonGen / NLR, and FINDS databases. Of note: In a prior Radius Map Report (issued in 2021), this entity was identified in the CERS Hazardous Waste (Haz Waste), CIWQS, and CERS databases.

According to the CPS-SLIC listing for STA, there is an open SARWQCB Cleanup Program Site case due to PCE and TCE impacts in soil, soil vapor, and groundwater. This case was identified on GeoTracker and is discussed in detail in Section 4.3.3.

According to the other listings, the entities handled waste/mixed oil, unspecified organic liquid mixture, aqueous solution with organic residues, unspecified organic liquid mixture, hydrocarbon solvents, tank bottom waste, oil/water separation sludge, unspecified oil-containing waste, organic liquids (nonsolvents) with halogens, organic solids, and oxygenated solvents under manifest from at least 1992 to 2024. Entities operated three diesel/motor vehicle fuel USTs, at least one unleaded motor vehicle fuel UST, and at least one waste oil UST from 1989 to 1992. Entities held NPDES permits for the presence of school buses near a municipal storm drain. Recent administration violations (i.e failure to report) were reported through at least 2023.

<u>2626 Kansas Avenue</u>

- Associated Plastics was identified in the EMI, CERS, Federal Insecticide, Fungicide, & Rodenticide Act/Toxic Substances Control Act Tracking System (FTTS), Historical (HIST) FTTS, HAZNET, HWTS, and CPS-SLIC databases.

- New Basis West LLC (or derivation)/Formerly Associated Plastics was identified in the CERS Haz Waste, HAZNET, CERS, HWTS, Toxic Release Inventory System (TRIS), Integrated Compliance Information System (ICIS), ECHO, RCRA-Large Quantity Generator (LQG), United States Aerometric Information Retrieval System Facility Subsystem (US AIRS), FINDS, Waste Discharge System (WDS), California Hazardous Material Incident Reporting System (CHMIRS), NPDES, CIWQS, Emissions Inventory (EMI), E Manifest, and PFAS ECHO databases.

- SCIND Massachusetts Point was identified in the CERS database.
- HK Marvin & RL Bough was identified in the HAZNET and HWTS databases.
- Unreported entities were identified in the CHMIRS and Emergency Response Notification System (ERNS) database.
- Of note: Formerly, DREP Magellan Rivers was identified in a prior Radius Map Report (from 2021) at this address under the CPS-SLIC and CERS databases.

According to the CPS-SLIC listing for DREP Magellan Rivers, there is an open SARWQCB Cleanup Program Site case due to PCE and TCE impacts in soil and soil vapor. This case was identified on GeoTracker and is discussed in detail in Section 4.3.3.

According to the CHMIRS and ERNS listings, there was a release of oil-based resin/petroleum onto the ground at New Basis in 2018. The quantity was not reported. The City of Riverside Fire Marshal oversaw the incident; however, no other details were provided. There was also a CHMIRS incident in 1990; however, no details were provided.

According to the PFAS ECHO listing for New Basis, this facility was identified as a potential PFAS-handler due to its industrial plastics and resins operations. Based on the available information reviewed for this ESA, Geosyntec identified no evidence of PFAS use or unauthorized release. The Site (and surrounding properties) is also not in the GeoTracker PFAS map[7].

According to the other listings, the entities handled asbestos-containing waste, unspecified solvent mixture, off-specification, aged, or surplus organics, oxygenated solvents, still bottom waste, organic solids, off-specification, aged, or surplus inorganics, unspecified sludge waste, waste oil and mixed oil, unspecified oil-containing waste, aqueous solution with organic residues, unspecified organic liquid mixture, polymeric resin waste, oil/water separation sludge, liquids with halogenated organic compounds, and inorganic solid waste under manifest from at least 1994 to 2021. Entities held air, waste discharge, and stormwater permits and compliance requirements. More information regarding the air permitting is provided in Section 4.3.3 (SCAQMD).

4.1.2.2 *Vicinity Properties*

EDR identified several adjoining and vicinity properties in pertinent databases, discussed below.

- Getty Design at 2841 Hulen Place (east-adjoining and hydraulically cross-gradient to upgradient of the Site) – This property was identified in the EDR Hist Auto database for operating as a gasoline service station (although likely an automotive maintenance and

[7] GeoTracker PFAS Map

repair shop instead, based on aerial photographs) from at least 1997 to 1999. No other information was provided.

- JC's Grease Buyer at 1999 Roberta Avenue (northeast-adjoining and hydraulically upgradient of the northeastern portion of the Site) – This property was identified in several databases indicative of the presence of hazardous materials and tanks; however, the databases do not indicate releases or impacts.

- Angelus Screw Products at 2005 Roberta Street (north-adjoining and hydraulically upgradient of the Site) – This property was identified in several databases indicative of the presence of hazardous materials; however, the databases do not indicate releases or impacts.

- A.M. Lewis/Recycler Core Company at 2727 Kansas Avenue (west-adjoining and hydraulically crossgradient of the Site) – This property was identified in several databases including Leaking Underground Storage Tank (LUST) and Notify 65. According to these listings, as well as LUST information provided on GeoTracker, a release of gasoline to soil was reported in 1989. Following site assessments and remediation (soil vapor extraction), the case was closed by the County of Riverside Department of Environmental Health (DEH) on 11 October 1989; the closure letter was identified on GeoTracker. Constituents in soil report a maximum concentration of 61 milligrams per kilogram (mg/kg) total petroleum hydrocarbons (TPH) as gasoline, below the California Human Health Screening Level (CHHSL) in soil for the protection of groundwater; [8] diesel was not detected above the laboratory reporting limit. Other databases are indicative of the presence of hazardous materials on the property.

- Authorized Testing at 2522 Kansas Avenue (north-adjoining and hydraulically upgradient) – This property was identified in several databases indicative of the presence of hazardous materials; however, the databases do not indicate releases or impacts.

- A-1 Grit at an unreported address by EDR (but known from other sources to be located at 1901 Massachusetts Avenue (east-adjoining and hydraulically upgradient of the southeastern portion of the Site) – This entity was identified on the US Mines database for operating a mine. Based on review aerial photographs and other sources, this address may be associated with office space or headquarters and not mining operations on this property. Several citations were reported, and the mine was reportedly permanently abandoned as of 2016; however, no other information was provided.

[8] https://www.waterboards.ca.gov/rwqcb2/water_issues/available_documents/esl.pdf

- Electro Pneumatic Co/Alcan Inc./Bridgeport Brass Company/Luxfer Gas Cylinders/Eclipse Manufacturers/Recreational Vehicles (or some derivation of these, plus other entities) at 3016 Kansas Avenue (south-adjoining and hydraulically downgradient of the Site, and also associated with 1995 Third Street, discussed below) – This property was identified on several databases including EnviroStor, CPS-SLIC, California Hazardous Material Incident Report System (CHMIRS), and Formerly Utilized Sites Remedial Action Program (FUSRAP). According to these listings as well as information provided on EnviroStor, this property was historically manufacturing and industrial machinery (including manufacturing of missiles and radioactive material) and was reported to be impacted with chlorinated solvents (namely PCE, TCE, and 1,1-Dichloroethane [DCA]) and TPH as motor oil in soil and groundwater. In 2006 and 2012, site screening assessments were conducted by DTSC, which indicated that investigation/remediation would be necessary at the property. Information provided in this assessment document is provided below, predominantly associated with an environmental case associated with 1995 Third Street. Additional information regarding a more recent GeoTracker case associated with 3016 Kansas Avenue is discussed in Section 4.3.3.2.

  A UST was removed from the northern edge of the 1995 Third Street property in approximately 1996. During subsurface work in 2002, a 2,000-gallon UST with dried sludge was discovered at the property. Soil samples collected near the tank had detections of metals (including barium, lead, and zinc), TPH as motor oil, fuel-related VOCs, and chlorinated VOCs (including PCE, TCE, and 1,1,1-Trichloroethane (TCA). The sludge contained metals (including lead), TPH as diesel and motor oil, and other constituents. Another document reports the detection of arsenic, chromium, copper, nickel, vanadium in soil. The UST as well as paints and solvents in the storage area were determined to be potential sources of the constituents, and the primary constituents were reported to be PCE and TCE, detected in soil beneath the UST at maximum concentrations of 679 mg/kg PCE 15 ft bgs and 130 mg/kg TCE 13 ft bgs.

  Quarterly groundwater monitoring was conducted through at least December 2005 (not reported), with oversight by SARWQCB under a voluntary cleanup program. In 2004, PCE and TCE were reported in groundwater at maximum concentrations of 200 µg/L PCE and 130 µg/L TCE, exceeding their MCLs; other VOCs were also detected at concentrations exceeding their MCLs. Additional groundwater characterization activities were recommended. Groundwater investigations in the vicinity were conducted through 2010, as described below (1995 Third Street).

- Luxfer Gas Cylinders at 1995 Third Street (approximately 700 feet south and hydraulically downgradient of the Site) – This property was identified on several databases including CERS HAZ WASTE, HIST UST, CERS TANKS, NPDES, WDS, CIWQS, CERS, RCRA-LQG, FINDS, EMI, NPDES, CIWQS, CPS-SLIC, HIST UST, and CERS databases. This

property was also identified in EnviroStor records under 3016 Kansas Avenue (described above). According to figures, Luxfer also operated at the building located southeast of the intersection of Kansas Avenue and Massachusetts Avenue.

According to the records, one 10,000-gallon diesel/motor vehicle fuel UST was installed in 1961, one 5,000-gallon waste oil and grease, kerosene, tin, and zinc UST was installed in 1961, one 100,000-gallon sodium hydroxide UST was installed in 1973, one 5,000-gallon zinc UST was installed in 1973, and two 5,000-gallon wastewater tanks, one 10,000-gallon sodium hydroxide tank, and one 15,000-gallon fuel oil tank were removed from the Site in 1986 and 1987. This property had a SARWQCB Cleanup Program Site case for PCE, TCE, metals (including lead), and petroleum hydrocarbon (diesel, gasoline, waste/motor/hydraulic/lubricating oil) in soil and groundwater. From 2003 to 2006, 13 groundwater monitoring wells were installed to delineate groundwater impacts. The maximum detected VOCs in groundwater were 220 µg/L PCE and 2,700 µg/L TCE. Additional investigations and remedial actions occurred. The most recent groundwater monitoring event occurred in February 2010, and reported PCE and TCE up to 180 µg/L and 2,200 µg/L, respectively, with the highest detections in MW6, located approximately 700 feet south of the Site. A No Further Action determination with requirements was issued for groundwater impacts by SARWQCB in August 2011; the closure letter is provided on GeoTracker. SARWQCB stated that groundwater impacts beneath this property were attributable to an upgradient (off-Site) source (which was not specified).

- Devoe Marine Coating Company at 2625 Durahart St (approximately 300 feet east and hydraulically crossgradient of the Site) – This property was identified on the SEMS, LUST, and EnviroStor databases, among others. According to these listings as well as information provided on GeoTracker and EnviroStor, a release of chlorinated and petroleum hydrocarbons to groundwater was reported during UST removal in 1987. Following a site assessment and remedial actions (soil vapor extraction and free product recovery from groundwater), the case was closed by SARWQCB on 17 June 1997; the closure letter was identified on GeoTracker. A figure from 1997 depicts groundwater flow across this property to the northwest. As of 2003, several groundwater monitoring and soil vapor extraction wells were still being operated and monitored with oversight from DTSC.

- All Woods Laminating & Milling Inc. at 1850 Massachusetts Avenue (approximately 450 feet southeast and hydraulically crossgradient and downgradient of the Site) – This property was identified on the SEMS-ARCHIVE database, among another. According to the listing, the property did not qualify for the NPL, and the status was reported as No Further Remedial Action Planned (NFRAP) as of 1993.

- LAUS Investment Company at 2620 Durahart Street (approximately 660 feet east-northeast and hydraulically upgradient of the Site – This property was identified on the

LUST database among others. According to the listing as well as information provided on GeoTracker, a release of gasoline was reported to soil in 1987. Following a site assessment, the case was closed by the County department on 17 September 1987; the closure letter was provided on GeoTracker. Analytical data and evidence of groundwater impacts were not identified.

- So. Cal RTD – Division 13 at 2450 Mulberry Street (approximately 0.25 miles northwest and hydraulically upgradient of the Site) – This property was identified on the LUST database, among others. According to the listing as well as information provided on GeoTracker, a release of gasoline was reported to soil in 1986. Following a site assessment, the case was reportedly closed in April 1989; however, the closure letter was not provided on GeoTracker. Analytical data and evidence of groundwater impacts were not identified.

- Several entities were reported in the vicinities of Third Street & Commerce Street (approximately 0.4 miles southwest and hydraulically downgradient of the Site). Specific street address include 2544-2622 Third Street, 2991-3069 Fourth Street, and 3491 Commerce Street. These entities were identified in the US Brownfields, EnviroStor, and SEMS-ARCHIVE databases, among others, for fertilizer and perchlorate impacts to soil and groundwater. Information was limited, and analytical data and evidence of groundwater impacts were not identified.

Additionally, Geosyntec identified Alark Hard Chrome at 2777 Main Street, approximately 0.6 miles west-northwest of the Site. This property was identified as a Superfund site (Section 4.3.3), but, due to its distance and hydraulically crossgradient direction in relation to the Site, was not further evaluated.

4.1.2.3 *Orphan Sites*

EDR did not identify "unplottable sites" in the vicinity of the Site.

4.2 Historical Use Information

4.2.1 Historical Aerial Photographs

Geosyntec conducted an aerial photograph review to help evaluate past uses of the Site as well as adjoining properties. Geosyntec requested historical aerial photographs from EDR and was provided with aerial photographs from 1931, 1938, 1949, 1953, 1959, 1967, 1975, 1978, 1985, 1989, 1990, 1994, 2002, 2006, 2009, 2012, 2016, and 2020. A copy of the aerial photographs package is included as **Appendix C** to this report. In addition, Geosyntec reviewed GoogleEarth aerial photographs from 1994, 2002, 2003, 2004, 2005, 2006, 2009, 2011, 2012, 2013, 2014, 2016, 2017, 2018,2019, 2020, 2021, 2023, and 2024. In review of these aerial photographs, Geosyntec made the following land use-related observations:

Location	Description
Site	In 1931, the Site appears to be residential and agricultural (potentially grazing land then orchard, based on the circular row pattern), with several small structures in the southwestern, southeastern, and northwestern portions. By 1949, the southern and eastern portions appear to be orchard (based on the circular row pattern), and the existing western large commercial/industrial building on the northwest parcel is present. The footprint of the eastern large commercial/industrial building on this parcel is present (indicating beginning of construction of this building). A rail spur extends from the southern boundary of the Site, through the south-central portion of the Site, and to the northwest parcel. By 1953, the existing eastern large commercial/industrial building is present in the northwestern portion of the Site, and by 1959, an additional area to the south is constructed. By 1967, the previously agricultural land in the southern and eastern portions appears to have been cleared of vegetation, graded, and redeveloped into unpaved, primarily vacant land. Several small trailers or sheds are present in the southwestern corner, in the south-central portion, in the west-central portion, and in the north-central portion. By 1978, the eastern portion of the Site is redeveloped into a small, paved parking lot that expanded through 1989. By 1989, a medium commercial/industrial building is present in the east-central portion of the Site. By 2002, a medium commercial/industrial building is present in the east-central portion of the Site and the rail spur appears to have been removed from the south-central portion of the Site. The 2006 aerial photograph shows the southern portion of the Site was an unpaved lot with staged equipment. By 2009, the northwest and eastern parcels are paved, with the southern and eastern portions utilized as parking lots with many parked trucks. The Site appears to have remained relatively consistent since 2009.
Vicinity	By 1931, the Site vicinity appears residential and agricultural. A road bounds the Site to the south, and railroads are present just south of the Site and approximately 250 feet northwest of the Site. A natural drainage feature is located near the northeast and east of the Site and runs generally southeastward. By 1949, the west- and south-adjoining properties are redeveloped with commercial/industrial buildings and the southwest-adjoining property is redeveloped with residential properties. The vicinity continues to be redeveloped with commercial/industrial and residential properties. The highway system to the west is developed in the 1950s, and the highway system to the north expands through the 1960s. The vicinity has remained relatively consistent since the 1960s.

In summary, the review of aerial photographs revealed historical agricultural, and commercial/industrial land use and railroads which could be indicative of hazardous materials/chemical storage, management/usage, or disposal practices at and/or in the vicinity of the Site that could pose a threat to the soil, soil vapor, and/or groundwater quality at the Site.

However, in this aerial photograph review, Geosyntec noted no definitive features showing chemical management (such as apparent tank storage) or chemical spills (such as stained areas) on or into the ground.

4.2.2 Fire Insurance Maps

EDR conducted a search for Sanborn® fire insurance maps for the Site and the adjacent area. EDR provided fire insurance maps from 1953, 1955, 1957, 1958, 1959, 1960, 1961, 1962, 1965, 1968, and 1969. The EDR Fire Insurance Map Research Results is presented in **Appendix D**.

Location	Description
Site	In the 1953 through 1969 maps, a rail spur is depicted extending from the south of the Site onto a small portion in the south-central portion of the Site. No other features are depicted on the Site; however, coverage is not provided for the northern portion of the Site.
Vicinity	In the 1953 map, the Site is bounded by Massachusetts Avenue and a railroad to the south, followed by multiple commercial/industrial businesses. Buildings along the street (adjoining the Site to the south) are labeled as aluminum forging, plastics, metal working, shipping, rolling mill, aluminum casting, aluminum storage, aluminum smelting furnaces, research/research shop, and warehouse. A steel tank on a concrete base is depicted along the street with a 15,000-gallon "tri-coethylene" (interpreted as TCE) label (1953 through 1969). In the 1955 map, additional buildings associated with the same metal/warehousing operations are depicted along the street, including painting, awning manufacturing, acid etching, metal waste storage, and metal working. An additional building adjoining the Site to the southeast is labeled as air conditioning manufacturing. The maps through 1960 are generally consistent with the 1955 map. In the 1961 map, the south-adjoining land appears to be slightly reconfigured, with an additional aluminum casting building and a smaller smelting furnace building. The 1962 and 1965 maps are generally consistent with the 1962 map. In the 1968 and 1969 maps, the south-adjoining property was labeled Alcan Aluminum Corp.

In summary, the review of Sanborn® fire insurance maps revealed historical heavy industrial land use (aluminum forging, painting, plastics, metal working, aluminum casting, aluminum storage, aluminum smelting furnaces), a 15,000 gallon TCE AST, and a railroad which could be indicative of hazardous materials/chemical storage, management/usage, or disposal practices in the vicinity of the Site that could pose a threat to the soil, soil vapor, and/or groundwater quality at the Site.

4.2.3 Historical Topographic Maps

EDR supplied portions of USGS topographical maps of the Site and vicinity for additional historical information regarding the Site and surrounding areas. EDR supplied topographic maps of the Site from 1901, 1942/1947, 1953/1954, 1967, 1980, 2012, 2015, 2018, and 2021/2022. A copy of the topographic photographs package is included as **Appendix E** to this report. In review of these historical topographic maps, Geosyntec made the following observations:

Location	Description
Site	In 1901, the Site is undeveloped. By 1942, approximately five small structures (likely residential) are present along the northern and southern boundaries of the Site. By 1953, the existing two large commercial/industrial buildings are present in the northwestern north of the Site, and five small structures (likely residential) are present in eastern portions of the Site. A rail spur extends from the southern-central portion of the Site to the buildings in the northwest. The 1967 and 1980 maps don't depict the rail spur and depicts only two small (residential) structures in the northeastern and south-central portions of the Site. The 2012-2022 maps do not depict structures on the Site.
Vicinity	In 1901, the Site is bounded by a road and railroad (Southern Pacific Railroad/Riverside Motor Railroad) to the south and by a road to the west. Another railroad (Southern California) is depicted nearby to the northwest. A water feature is depicted nearby to the northwest, running generally northeast to southwest. Vicinity properties are depicted with small structures (likely residential). By 1942, the western portion of the Site is bounded by a road to the north, and the vicinity has undergone additional development of small structures (likely residential) and agriculture. Approximately three oil tanks are depicted nearby to the east of the Site, along the railroad. By 1953, the west- and south-adjoining properties are developed with commercial/industrial buildings. The oil tanks nearby to the east are still depicted. The road to the south is labeled as Massachusetts Avenue and the road to the west is labeled as Kansas Avenue. By 1967, adjoining properties and the general vicinity have undergone additional commercial/industrial development, and the oil tanks formerly nearby to the east are no longer depicted. By 1980, the general vicinity has undergone additional commercial/industrial development. The 2012 map does not depict features other than roads and water features. The 2015 map depicts a railroad bordering the Site to the south and extending northeasterly nearby to the east of the Site. The south-adjoining land is labeled as "Riverside Junction." The vicinity undergoes minor (re)development in 2018-2022, including Lyman Street nearby to the south.

In summary, the review of USGS topographical maps revealed historical commercial/industrial buildings, oil tanks, railroads, and agricultural land use in the vicinity of the Site which could be

indicative of hazardous materials/chemical storage, management/usage, or disposal practices that could pose a threat to the soil, soil vapor, and/or groundwater quality at the Site. However, in this topographic map, Geosyntec noted no labeled features showing chemical management or evidence of waste disposal on or into the ground at the Site.

4.2.4 City Directories

A search of historical city directories for the area of the Site was conducted by EDR. Business directories including city, cross reference, and telephone directories reviewed, if available, at approximately five-year intervals (or less) for the years spanning 1921 through 2020. A copy of the city directory package is included as **Appendix F** to this report. In review of these listings, Geosyntec made the following observations:

Location	Description
Site	<u>1989 Massachusetts Avenue:</u> 1930-1960: The Site is listed as individuals' names, indicating residential. 1936-1939: The Site is listed as Frazer C A Poultry. 1955: The Site is listed as Brown M R Poultry. 1990: The Site is listed as Laidlaw Transit Inc. 2000-2014: The Site is listed as Penske Trucking (or some derivation). 2001: The Site is listed as Marvinh. 2002-2004: The Site is listed as Transportation Concepts. 2010-2020: The Site is listed as Student Transportation of America. <u>2626 Kansas Avenue:</u> 1951-1960: The Site is listed as Revere Copper & Brass, Brassinc, and/or Inc V. 1981: The Site is listed as Homepool Equipment, Little Lake Industries, and Muskin Corp. 1986-2001: The Site is listed as Associated Plastics, Associated Soils Engineering Inc., and Associated Sparkle Diaper (or some derivation). Of note: The prior city directory report (from 2021) listed Dalworth Construction Co. in 1994. 2001: The Site listed as Robert Boughton. 2002: The Site is listed as New Basis. Of note: The prior city directory report (from 2021) listed New Basis through 2014. The prior city directory report (from 2021) also listed Toy Lemmons in 2004.[9] <u>1985 Massachusetts Avenue</u> 1945: This potential/historical Site address is listed as Nafzgar Lee Nursery, indicating agricultural. <u>2069 Massachusetts Avenue</u>

[9] This entity was not identified in other sources and may be an error in that city directory report.

Location	Description
	1930-1945: This potential/historical Site address listed as individuals' names, indicating residential.
Vicinity	1930-1960: 1919 Massachusetts Avenue (nearby to the east) listed as dairy, indicating agricultural, and individuals' names, indicating residential. 1930-1986: 1957 Massachusetts Avenue (east-adjoining) listed as feed/poultry, indicating agricultural, and individuals' names, indicating residential. 1951: 1901 Massachusetts Avenue (east-adjoining) listed as an individual's name, indicating residential. 1990-2017: 2880 Hulen Place (east-adjoining) listed as various commercial/industrial businesses. 1994-2017: 2800 Hulen Place (east-adjoining) listed as Custom Service Systems and The Place. 2841 Hulen Place (east-adjoining) listed as Getty Design. 1996-2009: 2801 Hulen Place (east-adjoining) listed as Acousticraft Inc and Tracy Stoner. 2001: 2840 Hulen Place (nearby to the east) listed as Painting Inc. in this year (other entities reported at this address from 1994 to 2017).

In summary, the review of city directory listings revealed historical industrial land use (including metal manufacturing, plastic manufacturing, and trucking) on the Site, as well as historical agricultural/residential and commercial/industrial land use on vicinity properties.

4.3 Other Documents

4.3.1 Previous Environmental Assessment Reports

The User provided several Site documents. With the exception of a memorandum from November 2020 (**Appendix A**), these documents were also generally identified on GeoTracker and are discussed in Section 4.3.3. A prior Phase I ESA report from 2012 was included in the documents provided; while this document is available on the GeoTracker database, it is discussed within this section.

Phase I Environmental Site Assessment, Olson Properties, 1989 Massachusetts Avenue, APN 210-130-016, and 2626 Kansas Avenue, Riverside, California, LOR Geotechnical Group, Inc., 16 November 2012

The prior Phase I ESA was conducted by LOR Geotechnical Group, Inc. (LOR) for the Site in 2012. According to the report, 1989 Massachusetts Avenue (the eastern and southern parcels) was developed as a bus storage facility from 1980 to 1986. Laidlaw Transit occupied the property from 1986 until 1995 and operated one 550-gallon waste oil UST, one 5,000-gallon gasoline UST, and one 10,000-gallon diesel UST. This entity also had a hazardous waste storage area, two hydraulic lifts, a clarifier, and a washing station. Penske Trucking (Penske) operated on the property by 1997,

and the three USTs and two hydraulic lifts were removed with oversight from DEH. A closure letter (**Appendix A**) was issued. Penske operated one 12,000-gallon gasoline UST, one 20,000-gallon diesel UST, one 1,000-gallon motor oil AST, one 500-gallon waste oil AST, one 250-gallon antifreeze AST, one 250-gallon used antifreeze AST, and one 55-gallon drum of lubricating oil. This entity also had a parts washer. In 2002, the USTs were removed with oversight from DEH. A closure letter (**Appendix A**) was issued.

A portion of 2626 Kansas Avenue (the northwestern parcel) was developed with a building by Colonial Radio Corp. in 1946; the remainder of this parcel remained residential/agricultural. In 1949, Revere Copper and Brass constructed another building and operated until 1962. The Phase I ESA lists several entities as having operated/occupied the Site in unknowns years prior to 1972 including Hunter Douglas Aluminum, National Distillers, Alcan, Inc., and Luxfer Company. However, these entities were not identified in corresponding historical documentation provided as part of the Phase I ESA. Rather, prior occupancy of these entities at 2626 Kansas Avenue appears to be based on a hearsay account from a realtor that was documented in a Phase I ESA from 2007, which was then reiterated in several reports thereafter. Given that the only identified evidence that these entities may have been associated with the Site consists of an unverifiable secondhand account that is unsupported by available historical records, it is considered unlikely that these entities historically operated at the Site. The Site was occupied by Associated Plastics/New Basis from at least 1972 to 2012.

At the time of the 2012 reconnaissance, hazardous substances (including acetone, paints, and polyester resin with cobalt) and petroleum products were handled at the Site. LOR observed minor asphalt and concrete staining.

LOR did not identify RECs but identified "potential RECs" at 2626 Kansas Avenue due to the historical operations by the various entities back to the 1940s. LOR did not obtain details of their operations but acknowledged that they may have used hazardous materials that may have adversely impacted the Site.

Memorandum: Status Summary of New Basis and STA Properties, 2626 Kansas Avenue and 1989 Massachusetts Avenue, Riverside, California, Partner Engineering and Science, Inc., 3 November 2020

The 2020 memorandum, Status Summary of New Basis and STA Properties, summarizes prior investigations and findings. Reportedly, SARWQCB verbally stated that the 2626 Kansas Avenue property was close to an NFA and suggested issuing a "Conditional NFA" if no new sources were identified. As of November 2020, Partner recommended six additional soil vapor probes on this property as well as another round of groundwater monitoring.

4.3.2 Property Tax Files

Geosyntec researched publicly available online tax records through the Riverside County Map My County website.[10] The information was limited but included property boundary information. The Site is comprised of the north parcel (210130015, approximately 5.65 acres), the south parcel (210130016, approximately 4.47 acres), and the eastern parcel (210130020, approximately 4.30 acres), totaling approximately14.42 acres. The retrieved parcel map is provided in **Appendix A**.

4.3.3 Agency Regulatory Records

Geosyntec queried online databases for information and contracted Environmental Support Services (ESS) to submit public records requests to local, state, and federal agencies. Requests and responses from each agency and applicable documents identified online are provided in **Appendix A**.

4.3.3.1 *Local Agency Regulatory Records*

Geosyntec contracted ESS to submit records requests to the following local agencies:

- DEH (County; outstanding request);
- City of Riverside Fire Department – Fire Prevention (records identified);
- City of Riverside Department of Public Works – Industrial Waste Division (records identified);
- City of Riverside Building Department (online records); and
- SCAQMD (records identified).

On 26 February 2020, Geosyntec representative Maya Sederholm conducted an in-person file review at the DEH office in Riverside, California. Records for both address and multiple entities were identified, and are discussed below. Photographs of pertinent documents are included in **Appendix A**. Additionally, records requests submitted on 7 and 8 October 2024 to DEH revealed no records for 1985 and 2069 Massachusetts Avenue and 2626 Kansas Avenue. However, an extension was requested for 1989 Massachusetts Avenue; an additional response has not been received as of the date of this report.

Records for New Basis (2626 Kansas Avenue) were consistent with other information presented throughout this report, with the additional mention of methyl ethyl ketone peroxide, fiberglass, nickel-cadmium batteries, fluorescent light tubes, and alkaline batteries at the property. Some of these materials were observed to be improperly stored, and one violation noted that they were not maintaining the facility to minimize the possibility of a release.

[10] Geocortex Viewer for HTML5 (countyofriverside.us)

Records for Associated Plastics (2626 Kansas Avenue) contained additional information. This entity was directed in 1988 to install an oil recovery system or spill containment infrastructure at the waste storage area, which was in proximity to two outdoor storm drains. This entity was also reported to have an acetone recovery system and to handle or generate 1,000 gallons of solvent per month in 1986 and 1987, as well as recycle waste oil (55 gallons to 900 gallons) in 1988 and 1989.

Records for transportation-related and other entities at 1989 Massachusetts Avenue provided additional business names, including First Student Inc., Parking Concepts, and Ballinger Degassing Co. (Ballinger). Tank records associated with these were identified, as stated below in chronological order.

- In 1986, Laidlaw and/or Ballinger installed one 10,000-gallon diesel fuel UST, one 5,000-gallon gasoline UST, and one 500-gallon "motor oil drain" (also reported elsewhere as waste oil) UST.

- Circa 24 or 25 June 1996, the three USTs reported above were scrapped, crushed, and/or destroyed. Following soil sampling, DEH issued a letter stating that "no significant contamination exists and… no further site mitigation will be required."

- In 1997, one 12,000-gallon gasoline UST and one 20,000-gallon diesel UST were installed just east of the dispenser area, east of the bus washing station (**Figure 2**). Integrity tests were conducted and the USTs passed.

- From 16 to 18 November 2001, the two USTs reported above as well as five dispenser islands were removed, and soil was over-excavated. The USTs were emptied, rinsed, and removed. The UST excavation was approximately 20 feet wide by 85 feet long by 15 feet deep. Following confirmatory soil sampling, DEH issued a letter stating that no further assessment or remediation was required, and also said that "HMMD should issue NFA letter." This excavated area was not observed during the Site visit because the area was asphalt-paved shortly after excavation activities.

- Following queries in 2007 and 2008 regarding the 2001 tank closure, on 19 March 2008, the HMMD issued a letter stating that no further action was required (regarding the 2001 UST closure).

On 10 October 2024, ESS received responses from the City of Riverside City Clerk's Office stating that records were identified for 1989 & 2069 Massachusetts Avenue and 2626 Kansas Avenue, and no records were identified for 1985 Massachusetts Avenue. On 10 October 2024, ESS received a response from the City of Riverside Public Works Department – Industrial Waste Division that records were identified for "the Riverside site." On 17 October 2024, ESS received a response from the City of Riverside Fire Department – Fire Prevention stating that records were identified

for 1989 Massachusetts Avenue and 2626 Kansas Avenue. Geosyntec also queried the City of Riverside Records Portal[11], which contains various records through the Fire Department, Department of Public Works – Industrial Waste Division, and other entities. The documents are summarized below.

Records provided from the City Clerk's Office in 2024 included a summary of routine and follow-up inspections at both facilities. Some of the notes from STA inspections documented general housekeeping items, including a trench drain needing to be cleaned (presence of debris and sludge), a waste fluids storage area with spilled fluid on the ground, improper storage of chemicals and materials outside of the maintenance shop, and other areas with grease and chemicals spills. Each enforcement appeared to have been addressed by follow-up inspections. Waste oil, parts wash water, used oil filters, and brake cleaner were documented to have been picked up. Circa 2015, an application for an industrial stormwater permit was submitted. No major violations were documented.

Some of the notes from New Basis inspections documented the use of fiberglass, polyester resin, various mixtures of sand, and polymer concrete in its manufacturing operations. General housekeeping items, including excessive amounts of debris and sediment at storm drains, lack of secondary containment (and damage to a hazardous waste area berm), open trash/containment areas, and water coming off the property into the street and gutter. Some enforcement appeared to have been addressed by follow-up inspections, while other follow-up inspections documented the same general issues. Specific dates and other details were generally not provided.

The City Fire Department identified records for 2626 Kansas Avenue. These documents reflect the use and management of hazardous materials (including but not limited to "Epodil 748 Diluent," "LCWR," "Adduct #1 and #2," "MTHPA-C," "BV-179 Cycloaliphatic Resin," "LCPA300 HTX," polyester resin, propane, "Chromaflow," industrial pigments, acetone, and styrene) by New Basis; no additional pertinent information was provided from these records.

The City Industrial Waste Division identified records. The bus transportation facility at 1989 Massachusetts Avenue had inspections and maintained an Industrial General Permit to manage stormwater in at least 2015 and 2016. New Basis at 2626 Kansas Avenue also had inspections for an underground utility vault manufacture and maintained an Industrial General permit to manage stormwater and sewer connections. No additional pertinent information was provided from these records.

Geosyntec queried the City of Riverside Building & Safety Department Permits Online[12] database for Site records; pertinent ones are summarized below.

[11] https://riversideca.mycusthelp.com/WEBAPP/_rs/(S(ljnqvntklipjs3vfe2ufwoog))/supporthome.aspx
[12] https://riversideca.gov/cedd/building-safety/online-services/search-permits

Year	Address	Details
1946	2626 Kansas Avenue	Colonial Radio Corp. submitted an application for a radio manufacturing building; a map was not provided.
1948	2626 Kansas Avenue	Revere Copper & Brass submitted an application for a sewer on the property.
1949	2626 Kansas Avenue	Revere Copper & Brass submitted an application for a warehouse.
1953	2626 Kansas Avenue	Revere Copper & Brass submitted an application for a bus building.
1955	2626 Kansas Avenue	Revere Copper & Brass submitted an application for a building.
1964	2626 Kansas Avenue	Bridgeport Brass Co. submitted an application for a loading dock.
1983	2626 Kansas Avenue	An entity submitted an application for a 6,000-square-foot industrial building.
1983	2626 Kansas Avenue	Associated Plastics had an inspection record for an industrial building.
1985	2626 Kansas Avenue	An entity had an inspection record for tank footings.
1986	1989 Massachusetts Avenue	Laidlaw Transit Co. submitted a building application and had an inspection of an office/shop.
1992	1989 Massachusetts Avenue	Laidlaw Transit Co. received a permit to replace the wash pad.
1996	1989 Massachusetts Avenue	A Hazardous Materials Disclosure Statement for Penske Truck Leasing reflects the presence of hazardous materials.
1997	1989 Massachusetts Avenue	Penske Truck Leasing received a permit to install waste oil and fresh oil tanks in the existing building; a map was not provided.
1997	1989 Massachusetts Avenue	An Interdepartmental Plan Review Summary documents the approval for a new fuel island, piping, and UST.

1997	1989 Massachusetts Avenue	An Interdepartmental Plan Review Summary documents the approval to remodel a truck-washing facility.
1997	1989 Massachusetts Avenue	The owner received a permit for a truck-washing facility.
1997	1989 Massachusetts Avenue	A Hazardous Materials Disclosure Statement for Penske Truck Leasing reflects the presence of hazardous materials as well as waste oil and new oil double-wall tanks in the "shop."
1998	1989 Massachusetts Avenue	A schematic from the engineering firm shows the anchoring details of the planned 1,00-gallon AST associated with Penske Truck Leasing; the location was not provided.
1999	2626 Kansas Avenue	Documents reflect the proposed accessibility upgrades on the Associated Plastics property, which includes "import and recompact at ramp."
1999	2626 Kansas Avenue	An Interdepartmental Plan Review Summary and other records document the approval for the foundation for a storage tank.
2000	2626 Kansas Avenue	New Basis received a permit install a new press in a concrete pit[13].
2001	2626 Kansas Avenue	New Basis received a permit to install a 408-square-foot non-combustible awning over a spill containment area.
2003	2626 Kansas Avenue	The property owner received a permit to install three spray booths.
2006	2626 Kansas Avenue	New Basis received a permit to install a regenerative thermal oxidizer.
2010	2626 Kansas Avenue	The property owner received a permit to install a prefabricated permanent total enclosure (PTE) spray booth inside the existing building.

[13] Geosyntec did not observe a press and associated pit during the Site visit; however, access was restricted due to respirator requirements.

2011	2626 Kansas Avenue	A request to reactivate an expired permit (2006) reflects the delay in a SCAQMD permit for a regenerative thermal oxidizer and initiation of the subsequent project.
2011	2626 Kansas Avenue	New Basis received a permit to modify the existing PTE spray booth.

On 11 October 2024, ESS received a response from South Coast Air Quality Management District (SCAQMD) stating that records were identified for 1989 & 2069 Massachusetts Avenue. An extension was requested for 2626 Kansas Avenue; an additional response has not been received as of the date of this report. Geosyntec also queried the SCAQMD FIND[14] database for air permitting records pertaining to the Site. The documents are summarized below.

New Basis (Facility ID 40806) at 2626 Kansas Avenue submitted applications or held 115 permits (**Appendix A**) from 1983 to 2018 for the following activities or materials:

- Compliance Assurance Monitoring (CAM);
- Foams, plastics, and rubber extruder;
- Storage tanks of plastics and resins;
- Cooling Towers with hexavalent chromium (this application was cancelled, likely for being erroneous given that the potential use of hexavalent chromium is inconsistent with historical Site operations);
- Miscellaneous blending of hydrocarbons;
- Plastics and resins blending;
- Silo storage;
- Baghouse;
- Spray booth with VOC controls, paints, solvents, afterburner, catalytic oxidizer, and styrenated resins;
- Regenerative/recuperative oxidizer-ceramic/hot rock;
- Dry filter;
- Dust collector cartridge type;
- Concrete batch equipment;
- Storage tank "FX RF W/CTL Polyester;" and
- Acetone storage tank.

Several Notices of Violation and Notices to Comply were issued between 1987 and 2012. Additionally, a response was received via email from a SCAQMD representative on 10 February 2021 stating that records were identified and could be reviewed on the FIND database.

[14] https://www.aqmd.gov/nav/FIND/facility-information-detail

On 11 October 2024, ESS received a response from the County of Riverside Department of Environmental Health Hazardous Materials Management Branch stating that no records were identified for 1985 Massachusetts Avenue.

On 11 October 2024, ESS received a response from the County of Riverside Environmental Cleanup Program (ECP) stating that well permit numbers could be accessed online.[15] Geosyntec queried this resource and identified several monitoring wells across the Site. As far as Geosyntec could tell, these are the groundwater monitoring wells associated with the ongoing investigative activities, as discussed in Sections 4.1.2.1 and 4.3.3.2.

4.3.3.2 *State Agency Regulatory Records*

Geosyntec contracted ESS to submit records requests to the following state agencies:

- DTSC Cypress office (online records);
- DTSC Chatsworth office (online records);
- DTSC San Diego office (online records);
- Cal Fire – Office of the State Marshal (no records identified); and
- SARWQCB (online records).

Cal Fire identified and provided records for the Site. In 2008, a release of Pine Sol and water to the gutter occurred at 1989 Massachusetts Avenue. The source was determined to be 2840 Hulen Place (off-Site, adjoining to the east). The case was referred to the property authority. No other releases were reported.

The DTSC offices responded stating that they did not identify files/information pertaining to the Site. However, one of the responses directed the user to DTSC's Hazardous Waste Tracking System (HWTS), which is summarized in this section.

Geosyntec queried the online State Water Resources Control Board (SWRCB) GeoTracker[16] and DTSC EnviroStor[17] databases for cases pertaining to the Site or vicinity properties. The Site was identified on GeoTracker under two Cleanup Program Site listings: DREP Magellan Riverside 1/STA at 1989 Massachusetts Avenue (T10000010448) and 2626 Kansas Avenue (T10000005944). The cases had reported PCE and TCE impacts to soil, soil vapor, and groundwater. The cases were opened with SARWQCB in 2014 and 2017, respectively.

Additionally, on 8-10 October 2024, ESS received responses from SARWQCB stating that records were identified for 1989 Massachusetts Avenue and 2626 Kansas Avenue, and that no records

[15] Wells | Riverside County Department of Environmental Health (rivcoeh.org)
[16] https://geotracker.waterboards.ca.gov/
[17] https://www.envirostor.dtsc.ca.gov/public/

were identified for 1985 Massachusetts Avenue. A general summary of the Site's environmental conditions based on the documents available on the GeoTracker listings is provided below.

- Reporting related to environmental investigations conducted since 2013 are documented on the GeoTracker database listings, which have identified chlorinated VOC impacts to soil vapor and groundwater underlying both the STA and New Basis properties, primarily PCE and TCE. Between 2013 and the present day, 16 groundwater monitoring wells (15 on-Site and one off-Site) and 16 permanent multi-nested soil vapor probes have been constructed at the Site and periodically sampled, the results of which are included in the various environmental reports available on the GeoTracker database. Indoor air sampling has also been conducted within on-Site structures, with concentrations of PCE and TCE predominantly below indoor air screening levels for commercial occupancy as recommended in DTSC Human and Ecological Risk Office (HERO) Note 3[18]. While indications of one or more low-level releases of PCE and TCE (detected at historical maximum concentrations of 25,330 µg/m^3 and 60,000 µg/m^3, respectively) on the New Basis property were historically identified, the majority of residual soil vapor and groundwater VOC impacts are present on the STA property, especially near the southern property boundary where PCE and TCE have historically been detected in soil vapor at concentrations up to 16,700,000 µg/m^3 and 4,980,000 µg/m^3, respectively, in samples collected from a deep interval (90 ft bgs) within a soil vapor probe located on the southern edge of the STA parcels (SVP-3). PCE and TCE have historically been detected in groundwater at concentrations up to 930 and 1,400 micrograms per liter (µg/L), respectively, also corresponding to a groundwater monitoring well located in this same general (southernmost) area (MW-2); similarly, the maximum concentrations of PCE and TCE detected in soils underlying the Site were 1,100 µg/kg and 860 µg/kg, respectively, corresponding to soil samples collected from a very deep interval (110 ft bgs) during construction of one of the south-most soil vapor probes (SVP-9). However, an on-Site source of VOCs has not been identified that correlates to the presence and distribution of VOCs observed on the STA property, other than a clarifier system installed in the late 1980s associated with a vehicle washing depot that was previously removed by others in 2018. No significant concentrations of VOCs were reported in soil underlying the clarifier and associated piping during removal, suggesting that this feature was unlikely to have been a source of subsurface VOCs. The clarifier system's installation timeframe (late 1980s) and use associated with a bus maintenance and washing station is also inconsistent with the reasonable potential for a significant release of chlorinated VOCs. Although an on-Site source of VOCs correlating to the significant soil vapor and groundwater impacts was not identified at the STA property, SVE remediation was conducted on the STA

[18] https://dtsc.ca.gov/wp-content/uploads/sites/31/2022/02/HHRA-Note-3-June2020-Revised-May2022A.pdf

property from 2019 to 2021 by others to reduce the significantly elevated concentrations of VOCs present in soil vapor.

Environmental reports document that a review of historical documents performed by Geosyntec in support of a property transaction in 2020 and 2021 identified several inconsistencies with the CSM previously developed for the Site by others, particularly in regard to the source of VOCs in underlying groundwater and soil vapor. As a result, Geosyntec conducted an in-depth desktop investigation, as well as additional soil vapor and groundwater field investigations. The results of these investigations supported significant revisions to the CSM, most notably that the predominant source of the subsurface VOC impacts detected on-Site appeared to be related to release(s) on the south-adjoining property across Massachusetts Avenue at 3016 Kansas Avenue, which has a documented history of significant chlorinated solvent use associated with historical aluminum manufacturing operations. The results of additional soil vapor and groundwater sampling, including the installation of five additional groundwater monitoring wells in 2024, continue to corroborate the revised CSM according to the most recent reporting.

GeoTracker and EnviroStor listings were also identified for 3016 Kansas Avenue, south adjoining to the Site across Massachusetts Avenue. Site screening assessments were conducted for this property by DTSC in 2006 and 2012, which identified historical releases of TCE and PCE associated with historical operations at this facility and concluded that the facility requires further investigation and/or remediation and groundwater monitoring. In 2021, the property was enrolled into the SARWQCB's voluntary remediation program, and a Phase II ESA was conducted to assess the presence and distribution of VOCs related to historical activities conducted at the facility that were known to have utilized significant quantities of chlorinated solvents (as well as other hazardous materials). The investigation consisted of advancing seven borings to groundwater and collecting groundwater grab samples, advancing 31 soil borings to various depths for soil analysis, and completing each soil boring as temporary single- or multi-nested soil vapor probes at various depth intervals. Each media sampled (soil, soil vapor and groundwater) were tested for VOCs at an off-Site analytical laboratory. PCE and TCE were identified in soil vapor at the most elevated concentrations in the northwest and central south portions of the property, which correlate to locations of known historical solvent use. Groundwater PCE and TCE concentrations also correlated to potential sources in these areas. The report recommended additional actions, including defining the lateral and vertical extent of VOCs in soil vapor, defining the downgradient extent of groundwater VOC impacts, and developing a remedial action plan to address the VOCs identified in subsurface media. However, a work plan for follow-on investigations was not prepared as recommended in the Phase II report, and as a result, SARWQCB issued a directive to conduct a subsurface investigation under Order No. R8-2024-0055 dated 14 June 2024. The 16 August 2024 Site Characterization Work Plan was prepared for the 3016 Kansas Avenue property

to further evaluate potential areas of concern and the extent of contamination in soil, soil vapor, and groundwater. The work plan was conditionally approved by SARWQCB on 16 October 2024.

Geosyntec queried the DTSC HWTS[19] database for Site listings, and identified the following:

- HK Marvin & RL Boughton Trustee (CAC002119928) at 2626 Kansas Avenue generated asbestos-containing waste in at least 1998.
- New Basis West LLC (CAD981385420) at 2626 Kansas Avenue generated hazardous waste and petroleum products in many categories, including oxygenated solvents, hydrocarbon solvents, unspecified solvent mixture, waste oil and mixed oil, oil/water separation sludge, and polymeric resin waste, from at least 1993 to 2018.
- Associated Plastics (CAX000120337) at 2626 Kansas Avenue had records from 1984 to 1999; no other information was provided.
- Transportation Concepts (CAL000225618) at 1989 Massachusetts Avenue generated aqueous solution with organic residues from at least 2002 to 2003.
- Penske Truck Leasing Co LP (CAL000161017) at 2626 Kansas Avenue generated aqueous solution with organic residues, hydrocarbon solvents, waste oil and mixed oil, and unspecified organic liquid mixture from at least 1997 to 2001.
- STA (CAL000322562) at 2626 Kansas Avenue generated hazardous waste and petroleum products in many categories, including oxygenated solvents, hydrocarbon solvents, and oil/water separation sludge, from at least 2007 to 2015.
- Laidlaw Transit Inc. (CAD982338600) at 2626 Kansas Avenue generated hazardous waste and petroleum products in many categories, including hydrocarbon solvents, waste oil and mixed oil, oil/water separation sludge, and tank bottom waste, from at least 1993 to 2003.

This information is consistent with information presented in the EDR Radius Map (Section 4.1.2).

In summary, there are known subsurface impacts at the Site, soil vapor is being remediated through SVE, and there are ongoing groundwater investigations and remedial efforts with SARWQCB.

4.3.3.3 *Federal Agency Regulatory Records*

Geosyntec queried the online USEPA ECHO[20] and Envirofacts[21] databases and identified four listings for the Site:

- New Basis (Formerly Associated Plastics; Facility Registry Service [FRS] ID 110000479624) at 2626 Kansas Avenue – This property had CAA, Clean Water Act (CWA), and RCRA compliance requirements; no violations were reported.

[19] https://hwts.dtsc.ca.gov/report_search.cfm?id=5
[20] https://echo.epa.gov/
[21] http://www.epa.gov/enviro/.

- STA (FRS ID 110070467579) at 1989 Massachusetts Avenue had RCRA compliance requirements; no violations were reported.
- Laidlaw Transit Inc. (FRS ID 110008276392) at 1989 Massachusetts Avenue had RCRA compliance requirements; no violations were reported.
- STA (FRS ID 110070090909) at 1989 Massachusetts Avenue had CWA compliance requirements; no violations were reported.

Geosyntec queried the National Priorities List (NPL) Superfund[22] database for cases in the vicinity of the Site. Alark Hard Chrome was identified approximately 0.6 miles west-northwest of the Site. This property had a plating operation from 1971 to 1985, and the County of Riverside Health Department identified soil impacts in 1982. As of 2011 the site was closed, USEPA completed an initial remedial investigation, and data gaps were identified. USEPA planned to cleanup groundwater contamination; however, no other details were provided. Based on the hydraulically crossgradient or downgradient direction in relation to the Site, this property is not anticipated to have adversely impacted the Site. This property was also identified by EDR (Section 4.1.2).

[22] https://www.epa.gov/superfund/national-priorities-list-npl-sites-state#CA

5. SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

A reconnaissance of the Site was conducted by Geosyntec's representative Maya Sederholm on 15 October 2024 to assess the current conditions on and around the Site. Ms. Sederholm was escorted during the Site visit of the New Basis property (2626 Kansas Avenue) by Joey Perez, a Supervisor who has been associated with the Site for approximately 4.5 years. The Site visit at STA (1989 Massachusetts Avenue) was performed without an escort.

As part of the Site reconnaissance, Geosyntec looked for evidence of the presence of hazardous substances used, stored, or discarded and reviewed the Site for areas of disturbed or discolored soil, suspect equipment and/or building materials which may contain hazardous substances, areas of distressed vegetation, wastewater discharge areas, evidence of storage tanks/septic systems, waste management/disposal areas, lagoons, pits, sumps, surface water management areas, stained surfaces, etc.

Selected photographs taken during the Site reconnaissance are presented in **Appendix G**. Adjoining properties were observed from the perimeter of the Site or from access roads and entrances into these properties.

The following information is based on Geosyntec's visit to the Site and/or Geosyntec's interviewing effort.

5.2 Utility Service & Materials Management Provider Information

The utility service and materials management provider practices at the Site include the following:

STA – 1989 Massachusetts Avenue

Utility Service/Materials Management	Service Provider
Electricity	Possibly Riverside Public Utility; Site contact was unaware
Sanitary wastewater disposal	Public; Site contact was unaware
Drinking water supply	Public water supply and Arrowhead
Irrigation water supply	Unknown
Solid (non-hazardous) waste disposal	Unaware
Hazardous waste disposal	Safety-Kleen
Used oil disposal	Safety-Kleen

Utility Service/Materials Management	Service Provider
Battery delivery and disposal	Safety-Kleen

Source for the above information: Geosyntec's prior interviews and field observations.

New Basis – 2626 Kansas Avenue

Utility Service/Materials Management	Service Provider
Electricity	Unaware
Sanitary wastewater disposal	Unaware[23]
Drinking water supply	Unaware[24]
Irrigation water supply	Unaware
Solid (non-hazardous) waste disposal	Possibly Waste Management/Unaware
Hazardous waste disposal	Unaware
Used oil disposal	Unaware
Battery delivery and disposal	Unknown

Source for the above information: Geosyntec's prior interviews and field observations.

5.3 Interior and Exterior Observations

5.3.1 General Usage of Hazardous Substances

STA – 1989 Massachusetts Avenue

Geosyntec observed hazardous substance storage in ASTs, drums, buckets, and other containers at the Site during the reconnaissance. Generally, these included automotive maintenance/repair chemicals (antifreeze, 90-weight gear oil, motor oil, and diesel exhaust fluid); these are discussed in the sections below. Relatively small quantities (less than one-gallon containers) of other hazardous substances (degreasers and general household cleaners) were noted inside the Site buildings, with the exception of a dozen or so 55-gallon drums and a couple of larger tanks.

New Basis – 2626 Kansas Avenue

[23] Geosyntec did not observe a septic system or any historical evidence of a septic system on the Site. Through Geosyntec's interview efforts, there was no indication of a septic system on Site.
[24] Geosyntec did not observe evidence of a potable water well was observed. Through Geosyntec's interview efforts, there was no indication of a potable water well on the Site.

Geosyntec observed hazardous substance storage in ASTs, drums, buckets, and other containers at the Site during the reconnaissance. Generally, these included methyl propyl ketone peroxide (MPKP), acetone, lubricants, wax, epoxy resin, paint, oil, and pigment and are discussed in the sections below. Relatively small quantities (less than one-gallon containers) of other hazardous substances, such as household cleaners, were observed inside the office portion of the Site.

5.3.2 Aboveground Storage Tanks

STA – 1989 Massachusetts Avenue
Two plastic ASTs of approximately 200 gallons were observed in the northwest portion of the bus maintenance shop. One contained full synthetic motor oil and the other contained used oil.

One AST (less than 100 gallons) was identified in the former bus washing station area. This AST contained soap when the bus wash station was in use. An associated pressure tank and hand pump were located in the vicinity of the tank. No releases were observed from the tank.

New Basis – 2626 Kansas Avenue
Three large resin storage tanks were observed on elevated stands in an enclosed paved area on the exterior north side of Building 1. The largest of these tanks has a capacity of approximately 55,000 pounds, and the total capacity of the three tanks is approximately 120,000 pounds. Piping, a displacement pump, and a diaphragm pump associated with the resin tanks ran along the ground. The piping, pumps, and surrounding infrastructure were coated/stained with a black, oily material. Interviewing efforts revealed that the material splashes around when handled and also that one of the pumps had a faulty seal or filter and was leaking material, which was determined to be solidified styrene (from the resin material).

Two large resin storage tanks were observed in a concrete secondary containment feature on the exterior north side of Building 2. According to interviewing efforts, one of the tanks is older (last used approximately 5-6 years ago) and the other tank is new and still empty.

Approximately seven silos containing calcium and sand were identified outside between Building 1 and Building 2. These silos are connected to mixing tanks within the interior of Building 2. One silo containing calcium is located on the exterior southern side of Building 1. Small amounts of fine-grained materials were observed beneath the silos and at nearly drains; however, no staining was observed on the surrounding concrete.

Two concrete-batch mixers were observed next to the control room in the northwestern portion of Building 2.

According to prior interviewing efforts and operations, New Basis drums all waste that cannot be turned into a solid, which includes the lubricants, oils, and acetone. When a drum becomes full, it

is taken to the hazardous waste storage area and the contents are pumped into the ASTs. These ASTs are located on a raised concrete area with an approximately 3-inch concrete berm and are covered by a roof. This area is partitioned off Building 1 and is delineated by a chain-link fence. Geosyntec observed staining on the paved ground and wall through the chain-link fenced area.

5.3.3 Underground Storage Tanks

Geosyntec did not observe the presence of USTs at the Site during the Site reconnaissance. Mr. Perez was unaware of USTs currently or formerly at the Site.

5.3.4 Odors

STA – 1989 Massachusetts Avenue

Petroleum and other chemical odors were noted inside the bus maintenance shop and the former bus washing station.

New Basis – 2626 Kansas Avenue

Chemical odors were observed throughout and adjacent to manufacturing areas at Buildings 1 and 2.

Geosyntec is aware of a SCAQMD permit to operate an air pollution control system consisting of the regenerative thermal oxidizer along the exterior southwest corner of Building 1.

5.3.5 Pools of Liquid

STA – 1989 Massachusetts Avenue
Two pools of liquid/oily material were observed in maintenance bays of the bus maintenance shop and in the southwestern portion of the former bus washing station. No significant cracks were observed in the floor and no floor drains were observed in this general area.

A spill of an oily substance was observed in the southwestern portion of the former bus washing station; the material appeared to enter a nearby circular floor drain (see Section 5.3.11).

New Basis – 2626 Kansas Avenue
Piping, pumps, and infrastructure surrounding the ASTs north of Building 1 were coated/stained with a black, oily material. Interviewing efforts revealed that the material splashes around when handled and also that one of the pumps had a faulty seal or filter and was leaking material, which was determined to be solidified styrene (from the resin material; Section 5.3.2).

During a previous Site reconnaissance, Geosyntec identified a pool of stormwater in a bay in the loading dock area; the pool of liquid was reportedly not indicative of a chemical release.

5.3.6 Drums

Outdoor Storage

STA – 1989 Massachusetts Avenue
Geosyntec did not observe outdoor storage of drums at this facility.

New Basis – 2626 Kansas Avenue
Geosyntec observed at least 26 55-gallon drums in exterior paved areas of this facility.

Specifically, Geosyntec observed the hazardous materials storage area on the exterior northwest side of Building 1. There were approximately 12 55-gallon drums of oily water and acetone sludge (classified as hazardous waste) staged in a paved and roofed area. Additionally, Geosyntec observed approximately two 55-gallon drums (and seven 5-gallon buckets) of universal waste indicated by the Site contact as being non-hazardous. The drums appeared to be in generally good condition, albeit minor dark oily staining on the underlying pavement.

Geosyntec observed another approximately 12 55-gallon drums to the northwest of the hazardous materials storage area. This paved, exposed area staged empty drums and containers to be picked up as non-hazardous waste.

During a prior reconnaissance, Geosyntec observed drums in this area containing solid waste (paint, pigment, resin, wax, and polymer cement). Geosyntec also noted drums with empty labels in varying conditions and quantities, with rust around lids or with no lids.

Indoor Storage

STA – 1989 Massachusetts Avenue
Geosyntec observed drums and small tanks (less than 100 gallons) with secondary containment in the chemical storage area and hazardous waste storage area located in the western portion of the bus maintenance shop. Containers generally held motor oil, waste oil, antifreeze, and diesel exhaust fluid.

New Basis – 2626 Kansas Avenue
Geosyntec observed drums and containers in various conditions stored throughout Building 1 and Building 2. Due to the quantity or the proximity to active assembly line work, Geosyntec was unable to confirm all drum contents and quantities.

5.3.7 Hazardous Substances and Petroleum Products Containers (Not Tanks and Not Drums)

STA – 1989 Massachusetts Avenue

Geosyntec observed small containers (less than 50 gallons) of each of the following hazardous materials throughout the two facility buildings: motor oil; waste oil; antifreeze; diesel exhaust fluid; and cleaning materials.

New Basis – 2626 Kansas Avenue

Geosyntec observed hazardous materials including MPKP, resin, lubricant, acetone, oil, paint, wax, pigment, and propane throughout the facility. The MPKP (raw material) was stored in hundreds of small containers inside the catalyst storage room in the western portion of Building 1. Interviewing efforts revealed that the used, generally empty MPKP bottles are hung upside down over sand which catches residual drops. Additionally, waste products containing MPKP are diluted in this sand, which is placed daily in drums in the hazardous materials storage area prior to disposal. The empty bottles are placed in closed plastic bags and disposed of separately.

Geosyntec also identified propane tank storage in the covered loading area along the southern edge of Building 2 and within the interior northwestern corner of Building 1.

5.3.8 Unidentified Substance Containers

STA – 1989 Massachusetts Avenue

Geosyntec did not observe unlabeled containers at this facility.

New Basis – 2626 Kansas Avenue

Geosyntec observed a variety of drums and containers on the Site. Due to the quantity of drums and containers, Geosyntec was unable to observe all drum labels during the Site visit; however, Geosyntec consistently observed legible and appropriate labels on the drums and containers throughout the facility.

5.3.9 Indications of Polychlorinated Biphenyls (PCBs)

STA – 1989 Massachusetts Avenue

Geosyntec observed a transformer (type not identified) mounted from the ceiling in the eastern portion of the bus maintenance shop, a floor-mounted, dry-type (Class AA) transformer in the southwestern portion of the bus maintenance shop, a floor-mounted, dry-type transformer adjacent to the AST in the western portion of the former bus washing station, and a pad-mounted, dry-type transformer at the exterior southwest corner of the maintenance building. Geosyntec did not observe notable oil staining in the immediate vicinity of the transformers, and the presence of transformers containing PCBs is considered unlikely given the age of the building (circa 1980s).

No other potential PCB-containing equipment was observed at this facility.

New Basis – 2626 Kansas Avenue
From interviewing efforts, Geosyntec was directed to two floor-mounted, dry-type transformers on the north side of Building 2. Mr. Perez stated these were the only two transformers at the facility. However, a prior reconnaissance conducted by Geosyntec documented an additional dry-type transformer along the western wall of Building 1; Geosyntec did not observe this during the 2024 reconnaissance. Since these are dry-type transformers, this finding is not environmentally relevant.

Additionally, due to the age of the construction of the buildings, Geosyntec reviewed other electrical devices and the electrical control areas for indication of PCB-containing equipment. Geosyntec did not observe labeling indicating PCB contents.

5.3.10 Heating/Cooling (Methods Used On-Site)

STA – 1989 Massachusetts Avenue
Geosyntec observed a heating, ventilation, and air condition (HVAC) system on the northern exterior of the maintenance/office building. Geosyntec also observed vents in the office portions of the building. No heating oil USTs or ASTs were observed.

New Basis – 2626 Kansas Avenue
Geosyntec observed swamp cooler infrastructure on the northern exterior of Building 2. Geosyntec did not observe an HVAC system at Building 1, but infers that the office portion of the building likely contains such a system.

5.3.11 Stains and Corrosion

STA – 1989 Massachusetts Avenue

Geosyntec observed surficial staining on paved areas throughout the facility. A small amount of standing liquid was observed in the center of a maintenance bay in the bus maintenance shop and a moderate amount of oily material was observed on the floor and in a pan beneath a bus being worked on in another maintenance bay in the bus maintenance shop. Oily stains were observed throughout the chemical and hazardous waste storage areas in the western portion of the bus maintenance shop. A large oily spill was observed in the southwestern portion of the former bus washing station, near a diesel particulate filter thermal regenerator, an air compressor, and other stored equipment; the material entered a nearby circular floor drain.

New Basis – 2626 Kansas Avenue

Geosyntec observed surficial staining in paved areas of the assembly line work areas throughout and surrounding Building 1 and Building 2. Scrap polymer concrete and equipment observed in the general vicinity of the surficial stains were also stained and appeared to be saturated with the substance staining the surface. The staining appeared to be related to poor housekeeping if not general routine manufacturing operations. No significant cracks were observed in the floor and no floor drains were observed in this area. Additionally, historical documents indicate oil staining in the northern portion Building 2.

Specifically, Geosyntec observed oily staining on the pavement and equipment beneath and surrounding the two AST to the north of Building 1 (described in Section 5.3.2). Geosyntec also observed oily staining on the pavement and walls in the hazardous waste storage area to the north of Building 1. Due to poor housekeeping, Geosyntec was unable to observe the entire paved area to inspect the integrity of the paved area; however, the staining appeared to be generally limited to the hazardous waste storage area.

5.3.12 Drains and Sumps

STA – 1989 Massachusetts Avenue
Geosyntec observed one three-stage clarifier along the western facility boundary, north of the former bus washing station; the interior of this feature was not observed. A rectangular patch in the pavement was observed north of the bus maintenance shop; this is believed to be the location of the former clarifier that was removed in 2018.

Geosyntec observed circular and ribbon floor drains in the former bus washing station building. Geosyntec observed oil staining and leaking into a drain located in the southwestern portion of the bus washing station, as discussed in Section 5.3.11.

No sumps were identified during Geosyntec's reconnaissance of the facility.

New Basis – 2626 Kansas Avenue
No active drains or sumps were identified in the interiors of Building 1 and Building 2. Geosyntec observed trenches covered with metal plates in the northern portion of Building 2; interviewing efforts revealed this feature was formerly used for "PCX" distribution, but the piping has since been removed and the trenches are no longer used.

Geosyntec identified several drains in exterior paved areas of the Site, primarily between Building 1 and Building 2. Drains were also observed within each of the bays in the loading dock area.

5.3.13 Pits, Ponds, Pools, and Lagoons

STA – 1989 Massachusetts Avenue

Geosyntec did not observe pits, ponds, pools, or lagoons at the facility.

New Basis – 2626 Kansas Avenue
Geosyntec did not observe pits, ponds, pools, or lagoons at this facility. Geosyntec's interview addressed these features; Mr. Perez indicated that these features do not exist at this facility.

5.3.14 Stressed Vegetation

Apparent drought-stressed vegetation was observed on the unpaved southwestern lot part of the STA facility; the stress was not indicative of a chemical release. No other evidence of stressed vegetation was observed.

5.3.15 Solid Waste

STA – 1989 Massachusetts Avenue
Geosyntec observed one trash dumpster southwest of the bus maintenance shop (outside) as well as a roofed, enclosed dumpster area northeast of the bus maintenance shop. The enclosed dumpster area did not contain dumpsters, but contained a couple of small trash cans and also appeared to be generally used for storage of solid materials (chairs, plastic tubs, etc.).

Although not categorized as solid waste, other features observed included a spill kit, fire extinguishers, safety supplies, a parts washer, batteries, tires, and hoses.

New Basis – 2626 Kansas Avenue
Geosyntec observed four large metal municipal trash dumpsters in the northeastern portion of the facility.

Although not categorized as solid waste, the facility's finished products were staged on wood pallets in exterior paved areas through the eastern portion of the property.

5.3.16 Wastewater (Excluding Septic Systems)

STA – 1989 Massachusetts Avenue
No wastewater management systems were observed during Geosyntec's Site reconnaissance. A stormwater monitoring program is associated with the facility.

New Basis – 2626 Kansas Avenue
No wastewater management systems were observed during Geosyntec's Site reconnaissance. A stormwater monitoring program is associated with the facility.

5.3.17 Wells

STA – 1989 Massachusetts Avenue
Geosyntec observed wells (soil vapor probes, SVE wells, and/or groundwater monitoring wells) in exterior paved areas of the facility. Geosyntec also observed a SVE manifold (not observed up-close but location inferred) and associated aboveground conveyance piping along the western portion of the facility, associated with prior SVE operations. The SVE manifold is depicted on **Figure 2**.

New Basis – 2626 Kansas Avenue
During the 2024 reconnaissance and interviewing efforts, Mr. Perez was not aware of wells (monitoring or other) at the facility, though five groundwater monitoring wells and two soil vapor probes are known to be present on this property associated with the ongoing environmental case.

5.3.18 Septic Systems

No evidence of septic systems were observed during Geosyntec's Site reconnaissance or interviewing efforts.

5.3.19 Filled Areas

No filled areas were observed during Geosyntec's Site reconnaissance. A prior interview revealed an unconfirmed statement that the southwest unpaved, dirt lot of the bus yard (Parcel 210130016) was once used as a staging area, parking area, and dump site during and after the construction of the nearby freeways beginning in the 1950s. The contact stated that materials (such as nails) were sometimes observed following rain events or other earthmoving activities in this area, though this observation is not indicative of a dump site. This individual (a prior fleet maintenance manager who was no longer working at STA at the time of this report) was also only associated with the Site since approximately 2015, and thus, was not relating a first-hand account and did not provide a source for the statement. Aerial photographs during this period do not indicate the presence of a historical dump site, and boring logs associated with environmental investigations in this area provide no evidence of anthropogenic debris or other lithological observations indicative of a historical dump site. Given the lack of substantiating evidence regarding the source of this information, this is not considered to represent a potentially significant finding.

5.4 Observations of Adjoining Properties

During the Site reconnaissance, Geosyntec observed the adjoining properties to the extent feasible from public vantage points. Adjoining properties were also observed through the fence while visiting the Site. The purpose of this observation was to attempt to identify possible sources of obvious environmental impairment emanating from the adjoining properties that could affect soil and groundwater quality or result in vapor migration into the Site as a result of surface water

runoff, groundwater transport, or similar pathways. Geosyntec noted no obvious evidence of chemical discharge to the ground at adjacent properties.

6. INTERVIEWS

6.1 Interview with Current Owner Representatives

An interview was conducted with Joey Perez by Geosyntec's representative, Maya Sederholm, on 15 October 2024 during the reconnaissance. Information obtained from the interview is provided throughout this document, particularly in Section 5.

Prior interviews were conducted by Geosyntec's representative Ms. Jennifer Luscombe on 4 February 2021, during the reconnaissance, with the following knowledgeable representatives of the Site:

- The contact for 1989 Massachusetts Avenue, Mr. Rick Baumgarte, fleet maintenance manager, had been associated with the Site for at least 5 years at the time of the 2021 interview;

- The contact for 2626 Kansas Avenue, Mr. Angel Topete, production manager, had been associated with the Site for at least 10 years at the time of the 2021 interview.

On 8 February 2021, Geosyntec's representative Maya Sederholm conducted a follow-up phone interview with Mr. Baumgarte regarding the alleged historical dumping on the southwestern Site parcel. Mr. Baumgarte stated that a former dispatcher mentioned that during nearby highway construction beginning in the 1950s, construction/demolition materials such as concrete, rebar, and nails were brought on-Site and stored on the southwest parcel. Mr. Baumgarte said that these materials (such as a nail) are sometimes observed on the Site following rain events or other earthmoving activities. No other details were provided. Geosyntec notes that this information is indicative of a period of potential storage of inert construction materials, but is not indicative of a potential dump site.

6.2 Interviews with Local Agency Officials

At the time of the Phase I ESA, Geosyntec did not conduct interviews with local agency officials. Files were requested from various agencies through ESS, as stated in Section 4.3.3.

6.3 Interviews with Others

No other interviews were conducted.

7. EVALUATION AND CONCLUSIONS

As required by ASTM's Phase I ESA Standard E1527-21, this section presents Geosyntec-identified known or suspect RECs, historical recognized environmental conditions ("historical RECs" or "HRECs"), controlled recognized environmental conditions ("controlled RECs" or "CRECs"), and/or *de minimis* conditions at the Site. These findings (discussed below) are based on Geosyntec's evaluation of the information gathered for this Phase I ESA, through the following means: environmental database review; Site visit; aerial photographs; topographic maps; environmental file review; and a review of other obtained information regarding the Site and historical land use in the vicinity of the Site.

The following sections present Geosyntec's findings, our opinions, data gaps, and conclusions regarding our identified known or suspected RECs, HRECs, CRECs, and/or *de minimis* conditions associated with the Site. Exceptions and deviations to the ASTM E-1527-21 Standard are also provided in this section.

7.1 Findings and Opinions

The findings from this Phase I ESA area listed below along with Geosyntec's assessment of whether they represent known or suspect RECs, historical RECs, controlled RECs, and/or *de minimis* conditions at the Site:

Recognized Environmental Conditions (RECs)

As defined by ASTM E1527-21, a recognized environmental condition is: *"the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The following RECs were identified in connection with the Site.

- **Chlorinated VOC Impacts**: The Site was historically occupied for trucking and transportation, plastics manufacturing, and copper and brass manufacturing since at least 1946. Environmental Site investigations related to the characterization of chlorinated VOCs at the Site were first conducted in 2013, and soil, soil vapor, and groundwater investigations are ongoing under the regulatory oversight of the Santa Ana Regional Water Quality Control Board (SARWQCB). On the northwest portion of the 2626 Kansas Avenue parcel, elevated concentrations of trichloroethene (TCE) have been detected in shallow soil vapor, which is attributed to early copper and brass manufacturing operations conducted at the facility. Similarly, tetrachloroethene (PCE) and TCE have also been detected in south-

central and southeast exterior areas on the 2626 Kansas Avenue parcel at elevated concentrations in soil vapor that may also be indicative of a minor historical release in one or both areas. 1,1-Dichloroethene (1,1-DCE) has also been routinely detected in groundwater monitoring wells on the northwest portion of the 2626 Kansas Avenue parcel, which has been attributed to a hydraulically upgradient off-site source. On the south and east parcels operated by STA, PCE and TCE have historically been detected, with the highest concentrations in deep soil vapor. Concentrations of PCE and TCE in soil vapor were reduced significantly by the prior SVE remediation system. PCE and TCE have also been detected in groundwater underlying the parcels operated by STA. Based on the results of indoor air sampling conducted prior to operation of the SVE system, the VOCs present in soil vapor underlying the Site are not resulting in a soil vapor intrusion risk.

The low level chlorinated solvent impacts on the 2626 Kansas Avenue parcel (primarily underlying the northwest portion of the commercial building) are most likely the result of historical copper and brass manufacturing operations; soil vapor and groundwater PCE and TCE impacts detected underlying the STA parcels are attributed to sources on the off-Site south-adjoining 3016 Kansas Avenue property where a significant use of chlorinated solvents is documented to have occurred associated with historical aluminum manufacturing operations conducted since the 1940s/1950s. The presence of chlorinated VOCs in subsurface media at the Site above current regulatory screening thresholds is considered a REC, though these impacts are not adversely affecting current commercial/industrial operations. For future commercial Site uses, potential historical release areas on the 2626 Kansas Avenue property are planned to be addressed during redevelopment such that their potential risk to the environment and to human health are further reduced to negligible levels. Given that the soil vapor impacts on the STA parcels are attributed to uncontrolled off-Site sources to the south, a vapor intrusion mitigation system (VIMS) is planned to be incorporated into future onsite buildings to mitigate potential vapor intrusion risk to future Site occupants.

Historical Recognized Environmental Conditions (HRECs)

An HREC is "*a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations. A historical recognized condition is not a recognized environmental condition."*

The following HRECs were identified in connection with the Site.

- **Underground Storage Tank (UST) Closures in 1996:** In 1986, a prior tenant installed one 10,000-gallon diesel fuel UST, one 5,000-gallon gasoline UST, and one 500-gallon "motor oil drain" (waste oil) UST at 1989 Massachusetts Avenue. In 1996, these USTs were removed and disposed offsite. Following soil sampling, the County of Riverside

Department of Environmental Health (DEH) issued a letter stating that "no significant contamination exists and…no further site mitigation will be required." Due to the regulatory closure, the USTs removed in 1996 are considered an HREC.

- **UST Closures in 2001:** In 1997, one 12,000-gallon gasoline UST and one 20,000-gallon diesel UST were installed at 1989 Massachusetts Avenue, just east of the dispenser area east of the bus washing station. In 2001, these USTs along with five dispenser islands were removed and transported offsite for disposal. Soil was over-excavated to an approximate depth of 15 feet. Following confirmatory soil sampling, DEH issued a letter stating that no further assessment or remediation was required, and also stated that "HMMD should issue NFA letter." In March 2008, DEH Hazardous Materials Management Division (HMMD) issued the closure letter. Due to the regulatory closure, the USTs removed in 2001 are considered an HREC.

Controlled Recognized Environmental Conditions (CRECs)

A CREC is a "*recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*"

No CRECs were identified for the Site as part of this Phase I ESA.

De Minimis Conditions

A *de minimis* condition is "*a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.*"

No *de minimis* conditions were identified for the Site as part of this Phase I ESA.

Additional Findings

Per ASTM E1527-21, *"[s]ome findings, but not necessarily all findings, may be indicative of the presence of"* RECs, CRECs, HRECs, or *de minimis* conditions. Based on the information Geosyntec obtained, Geosyntec has concluded that the following findings do not meet the definition of a REC, CREC, HREC, or *de minimis* condition and are therefore additional findings:

The following additional finding was identified during this Phase I ESA.

- **Per- and Polyfluoroalkyl Substances (PFAS) Database Listing**: According to the records review, the 2626 Kansas Avenue parcel was identified on the Per- and

Polyfluoroalkyl Substances (PFAS) Enforcement and Compliance History Online (ECHO) database made available by the United States Environmental Protection Agency (USEPA), which identifies industries that may handle PFAS based on an industry (e.g., manufacturing) sector classification code (e.g. Standard Industrial Classification [SIC] or North American Industry Classification System [NAICS]). Inclusion in this database does not indicate that PFAS are or were being manufactured, processed, used, or released by the facility. Listed facilities are included in this database based on their industrial profile but are unconfirmed by the USEPA as having used PFAS on-site. No obvious evidence of a use or release of PFAS compounds was identified as part of this Phase I ESA, and the Site (and surrounding properties) are not listed on the GeoTracker PFAS map. Therefore, this finding is not a REC but rather an additional finding.

7.2 Data Gaps

In accordance with ASTM E1527-21, this section documents data gaps in the information obtained and reviewed as part of this Phase I ESA and discusses the associated significance to reaching conclusions in this Phase I ESA. A data gap is defined as being "*a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information*". A significant data gap is defined as "*a data gap that affects the ability of the environmental professional to identify*" a REC.

Identified data gaps are presented below.

- Geosyntec was unable to interview former owners or operators of the Site.
- Geosyntec did not obtain additional information on the discontinued use of the former paint booth. Due to the known Site impacts, this data gap is not considered to be significant to additional REC identifications.
- An extension for the public records request for 1989 Massachusetts Avenue was requested by DEH. An extension for the public records request for 2626 Kansas Avenue was requested by SCAQMD. Additional responses from these agencies have not been received as of the date of this report. New records are not anticipated to be identified or change the findings of this ESA.

7.3 Conclusions

Geosyntec performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located at 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, California. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed evidence of a REC, two HRECs, and an additional finding, as identified in Section 7.1.

9. SIGNATURE BY ENVIRONMENTAL PROFESSIONAL

"I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Signed by Veryl Wittig - Geosyntec Consultants

10. QUALIFICATIONS OF STAFF

Veryl Wittig

Mr. Wittig is a Senior Principal Hydrogeologist with more than 30 years of diverse experience in planning, conducting, and managing multi-disciplinary due diligence projects involving Phase I Environmental Site Assessments (ESAs), contaminant investigations, vapor intrusion studies, human health risk assessments, engineering feasibility studies, environmental liability evaluations, mitigation of environmentally impaired properties, regulatory coordination, and litigation support for a variety of private and public sector clients. Mr. Wittig has conducted and/or managed more than 300 Phase I ESAs throughout the USA and northern Mexico between 1992 and the present in accordance with ASTM standards to evaluate the presence of Recognized Environmental Conditions (RECs) associated with the subject properties. The Phase I ESAs have involved a variety of complexities and property usages ranging from rural native land to highly impacted industrial properties with more than a century of historical activity. Mr. Wittig earned a Bachelor's degree in Geological Sciences (Hydrogeology Emphasis) from San Diego State University in 1991.

Brian G. Rockwell

Mr. Rockwell is a Senior Geologist in the Geosyntec San Diego office and is a registered Professional Geologist in California. Mr. Rockwell has more than 9 years of diverse experience and has conducted and managed numerous due diligence investigations, including Phase I and Phase II ESAs, as well as site remediation and mitigation projects including soil vapor extraction (SVE) remediation, dual-phase extraction (DPE) remediation, sub-slab depressurization (SSD) mitigation, source area excavation, and in-situ groundwater remediation. He has experience with due diligence investigations involving a wide variety of commercial/industrial property usages, primarily in California, with a range of complexities from small commercial buildings with minimal environmental significance to highly impacted industrial properties with more than a century of historical industrial activity. Mr. Rockwell holds a Master's degree in Geological Sciences from San Diego State University.

Maya Sederholm

Ms. Sederholm is an environmental scientist with over eight years of experience in site assessment and remediation consulting. She has performed Phase I ESAs on hundreds of properties throughout the United States; these ESAs have involved a variety of property types and proposed usages, and based on the findings, have led to Phase II site assessments and other due diligence services. Ms. Sederholm's responsibilities have included: preparation of budgets and proposals; coordination and scheduling of work; oversight of geophysical surveys, drilling, and excavations; sampling of soil, soil vapor, indoor air, and groundwater; operations and maintenance of

remediation systems; analysis of results; and preparation of technical reports. Ms. Sederholm holds a Master's degree in Environmental Science from The University of Arizona.

Records Search Summary

Company:	Geosyntec Consultants
Project Name:	Riverside
Attention:	Maya Sederholm
Street Address of Property:	1989 Massachusetts Avenue and 2626 Kansas Avenue Riverside, CA 92507 APN's 210130020, 210130016 & 210130015

Riverside County Environmental Health Department

E-mailed request: 1-25-21, Contact: Renida Claude

ESS submitted a request for a records search concerning the Riverside site to Ms. Claude, with the Riverside County Environmental Health Department (See Appendix B). **ESS** requested information concerning the utilization, manufacture, storage and/or discharge of hazardous materials/waste, and any information concerning previous or on-going site investigations/remediations pertaining to hazardous materials/waste. February 14, 2021, Ms. Claude had not completed **ESS'** request. Should any information concerning the site surface, **ESS** will immediately forward it to Ms. Sederholm at the Geosyntec Consultants office.

Department of Toxic Substances Control (DTSC) – Cypress Office

E-mailed request: 1-25-21, Contact: Julie Johnson/Jone Barrio

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. **ESS** requested that Ms. Johnson/Ms. Barrio, with the DTSC, check the file room records for any files/information the concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix C). Ms. Johnson informed **ESS** on January 26, 2021 that her department had no files/information concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix C).

Department of Toxic Substances Control (DTSC) – Chatsworth Office

E-mailed request: 1-25-21, Contact: Glenn Castillo/Robert Hardison

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. **ESS** requested that Mr. Castillo/Mr. Hardison, with the DTSC, check the file room records for any files/information concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix D). Mr. Castillo informed **ESS** on January 26, 2021 that his department had no files/information concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix D).

Department of Toxic Substances Control (DTSC) – San Diego Office

E-mailed request: 1-25-21, Contact: Public Records Section

Previous contacts with the DTSC have disclosed that this office only collects and stores information (such as treatment, storage and disposal of hazardous waste) concerning sites which have existing businesses, industries, etc. present. **ESS** requested that the Public Records Section, with the DTSC, check the file room records for any files/information concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside (See Appendix E). Beatriz Davila, with that department informed **ESS** on January 26, 2021 that her department had no files/information concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside (See Appendix E).

City of Riverside Fire Department – Fire Prevention

On-line request: 1-25-21, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Riverside Fire Department, check their records concerning the storage of hazardous materials/waste and underground storage tanks with regards to the following: 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix F). Carmen Soto, with the City Clerk's Office informed **ESS** on February 3, 2021 that the Fire Department only had records for 2626 Kansas Avenue, Riverside, CA (See Appendix F).

Cal Fire - Office of the State Fire Marshal

On-line request: 1-25-21, Contact: Pubic Records Section

ESS requested that the Public Records Section, with Cal Fire - Office of the State Fire Marshal, check their records concerning the storage of hazardous materials/waste, pipelines and underground storage tanks with regards to the following: 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix G). Mark Springer, with that department informed **ESS** January 25, 2021 that his department only had records for 2626 Kansas Avenue, Riverside, CA (See Appendix G).

City of Riverside Public Works – Industrial Waste Division

On-line request: 1-25-21, Contact: Public Records Section

ESS requested that the Public Records Section, with the City of Riverside Public Works – Industrial Waste Division, check their records for any information concerning industrial waste discharge permits or violations for 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix H). Carmen Soto, with the City Clerk's Office informed **ESS** on January 26, 2021 that the Public Works Department did have records for 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix H).

Riverside Building Department

Telephoned: 1-25-21, Contact: Carolina

ESS requested that Carolina, with the City of Riverside Building Department, provide the building records (all building permits and certificates of occupancy) for 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA. She informed **ESS** that those records are available online (See Appendix I for copies obtained). No further information concerning the site was obtained from the building department at the time of the investigation.

South Coast Air Quality Management District (SCAQMD)

Online request: 1-25-21, Contact: Public Records Section

ESS submitted a search request concerning active, inactive and sold files concerning 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA to the Public Records Section at the SCAQMD (See Appendix J). Stacey Walkowiak, with that department informed **ESS** January 27, 2021 that her department did have records for 1989 Massachusetts Avenue, Riverside, CA (See Appendix J). Lisa Ramos, with that department informed **ESS** February 10, 2021 that her department did have records for 2626 Kansas Avenue, Riverside, CA (See Appendix J). She also referred **ESS** to FIND on the SCAQMD's website for additional information. Per Ms. Sederholm with Geosyntec Consultants on February 10, 2021, she would review the records on FIND. No further information concerning the site was obtained from the SCAQMD at the time of the investigation.

Regional Water Quality Control Board (RWQCB) – Santa Ana Region

E-mailed request: 1-25-21, Contact: Pubic Records Section

ESS requested that the Public Records Section, with the RWQCB, provide the files for 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix K). They informed **ESS** on January 25, 2021 that their department did have records for 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA (See Appendix K). No further information concerning the site was obtained from the RWQCB at the time of the investigation.

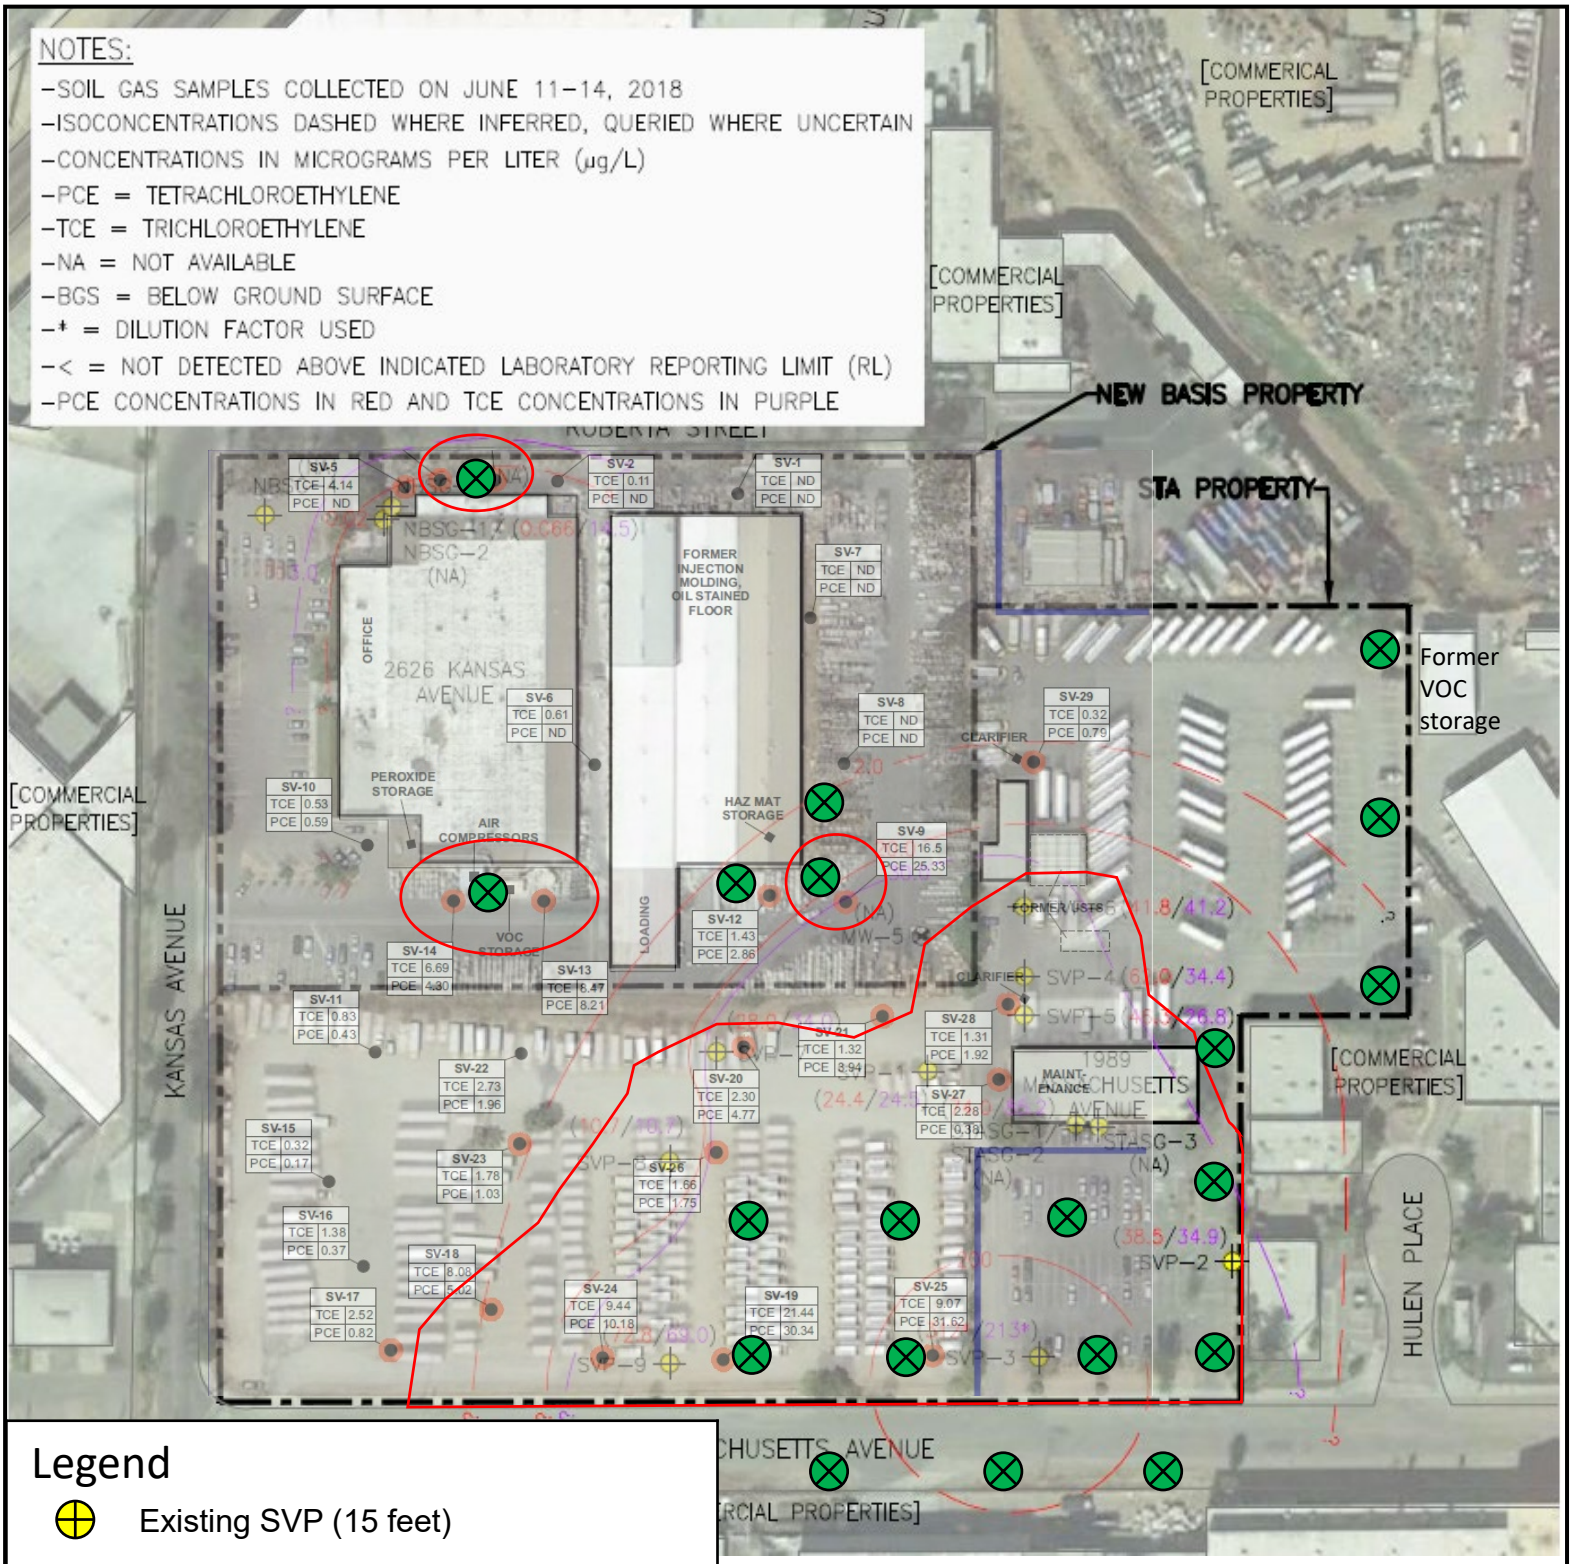
Hello Shannon,

I am beginning a Phase I ESA, and I would like to initiate a file review for 3 parcels, 14.42 acres located at 1989 Massachusetts Avenue and 2626 Kansas Avenue in Riverside, California. APNs are: 210130020; 210130016; and 210130015. See attached aerial for the property boundaries.

Please contact the following agencies:

-USEPA
-Santa Ana Regional Water Quality Control Board
-California Department of Toxic Substances Control – Chatsworth, Cypress, and San Diego offices
-County of Riverside Department of Environmental Health
-County of Riverside Fire Department
-City of Riverside Fire Department/Hazardous Materials Team
****Please let me know ASAP if there are other pertinent agencies I am missing

If you have any questions or concerns, please contact me. Please reference project no. SC1099-01-01 on your invoice.



Thank you!

Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue
Riverside, CA 92507
APNs: 210130020, 210130016 & 210130015

Dear Ms. Claude,

Environmental Support Services (ESS) is in the process of conducting a records search for a site Riverside, CA. This search includes researching the history of the site, especially as it pertains to hazardous materials/waste. With this in mind, **ESS** requests the following information concerning the subject site which your agency may have on file:

1. utilization, manufacture, storage, or discharge of hazardous materials/waste.
2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste.
3. hazardous materials disclosures concerning the site.
4. information regarding underground storage tank present or previously found at the site.

Should you have any questions concerning this request for information, please call. Your expedient processing of this request is appreciated.

Sincerely,
Environmental Support Services

DEPARTMENT OF ENVIRONMENTAL HEALTH

KEITH JONES, DIRECTOR

February 2, 2021

Riverside County Hazardous Materials has reopened to limited in-person services. We will be implementing the best practices to serve our customers in person while preventing the transmission and spread of COVID-19.

Due to the ongoing COVID-19 national state of emergency, and Orders by the Riverside County Health Officer, the Riverside County Department of Environmental Health has continued to request that our employees work remotely to support you.

Records Request services will continue to be available but please be patient with us and understand that staff is limited.

Responses will be provided **temporarily via email** and will resume to respond via US Mail once the pandemic has rectified.

During this time records will be provided in five different ways after fees are paid.

1) In office appointments for viewing of larger files only
2) Email – Only small files **no larger than ¼ inch qualify**
3) US Mail – files that are appropriately sized for mailing will qualify – **Additional Copy and Reproduction Fees will apply**
4) USPS / FedEx – larger files that are unable to be mailed via US Mail will be shipped at the requestor's expense – **Additional Copy and Reproduction Fees will apply**
5) Pick Up – By appointment only – **Additional Copy and Reproduction Fees will apply**

Dear Requestor:

We have received your Public Records Act Request for records from Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database http://hwts.dtsc.ca.gov/report_search.cfm?id=5. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS by email at hwtsreports@dtsc.ca.gov or by phone at 800-6186942 for further information. For copies of manifest, please send an email to mcr@dtsc.ca.gov.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DRSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library- anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How To Use EnviroStor" menu on the website.

If you have any questions, would like further information regarding your request, please contact me at (714) 484-5337 or via email at CypressFileRoom@dtsc.ca.gov.

Sincerely,

Julie Johnson

Public Records Request Number: PR3-012621-02
Location(s): 1989 Massachusetts Avenue, Riverside, CA 92507; 2626 Kansas Avenue, Riverside, CA 92507; APNs: 210130020, -16, -15

Dear Requestor:

On January 26, 2021 the Department of Toxic Substances Control (DTSC) received your email of January 25, 2021 requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at http://hwts.dtsc.ca.gov/report_search.cfm?id=5. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at hwtsreports@dtsc.ca.gov or by phone at (800) 618-6942 for further information. For copies of manifests, please send an email to mcr@dtsc.ca.gov.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me via email at ChatsworthFileRoom@dtsc.ca.gov.

Sincerely,

Glenn Castillo

Records Mgt. Asst. Coordinator

Subject: Riverside Public Records Request :: W005825-012521

Dear Shannon:

Thank you for your interest in public records of the City of Riverside. Your request was received by the Public Records Advocate on 1/25/2021 and given the reference number W005825-012521 for tracking purposes.

Record(s) Requested: Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue Riverside, CA 92507 APNs: 210130020, 210130016 & 210130015 ESS requests the following information concerning the subject site which the fire may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. information regarding underground storage tank present or previously found at the site.

The request will be forwarded to appropriate department(s) for processing.

Monitor request progress at the link below. The Public Records Advocate will email you when the request is complete. Thank you for using the Riverside Records Portal.

--- Please respond above this line ---

RE: PUBLIC RECORDS REQUEST of January 25, 2021, Reference # W005825-012521

Dear Shannon,

The Public Records Advocate received the below records request from you on January 25, 2021.

Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue
Riverside, CA 92507
APNs: 210130020, 210130016 & 210130015
ESS requests the following information concerning the subject site which the fire may have on file:
1. utilization, manufacture, storage, or discharge of hazardous materials/waste.
2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste.
3. hazardous materials disclosures concerning the site.
4. information regarding underground storage tank present or previously found at the site.

Responsive records are available via the Riverside Records Portal. Select the link below to view your request.

If you have any questions, or wish to discuss this further, please contact me.

Sincerely,

Carmen Soto
City Clerk's Office
(951) 826-5557

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**Yes**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month greater than 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**Yes**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Manufactures below ground enclosures	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING: (Check all that apply) A5

☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

B. INTERNAL RESPONSE

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR VIA: (Check all that apply) B1

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (i.e., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

C. EMERGENCY COMMUNICATIONS, PHONE NUMBERS AND NOTIFICATIONS

Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator (or his/her designee when the Emergency Coordinator is on call) shall:

1. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
2. Notify appropriate local authorities (i.e., call 9-1-1).
3. Notify the California Emergency Management Agency at (800) 852-7550.

Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall notify the California Department of Toxic Substances Control (DTSC), the local Unified Program Agency (UPA), and the local fire department's hazardous materials program that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR VIA: (Check all that apply) C1

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases / spills due to earthquake-related motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply)	H1	LOCATIONS (e.g., shop, outdoor shed, forensic lab)	
☒ 1. HAZARDOUS MATERIALS / WASTE STORAGE AREA		Throughout Facility	H2
☒ 2. PROCESS LINES / PIPING		Throughout Facility	H3
☐ 3. LABORATORY			H4
☐ 4. WASTE TREATMENT AREA			H5

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS (Check all that apply)	H6	LOCATIONS	
☒ 1. SHELVES, CABINETS AND RACKS		Throughout Facility	H7
☐ 2. TANKS (EMERGENCY SHUTOFF)			H8
☒ 3. PORTABLE GAS CYLINDERS		Welding Area	H9
☒ 4. EMERGENCY SHUTOFF AND/OR UTILITY VALVES		See Map	H10
☒ 5. SPRINKLER SYSTEMS		Throughout Facility	H11
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane dispensing tank)			H12

I. EMPLOYEE TRAINING

Explanation of Requirement: Employee training is required for all employees handling hazardous materials and hazardous wastes in day-to-day or clean-up operations including volunteers and/or contractors. Training must be:

- Provided within 6 months for new hires;
- Amended as necessary prior to change in process or work assignment;
- Given upon modification to the Emergency Response / Contingency Plan, and updated/refreshed annually for all employees.

Required content includes all of the following:

- Material Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Fire hazards of materials / processes;
- Conditions likely to worsen emergencies;
- Coordination of emergency response;
- Notification procedures;
- Applicable laws and regulations;
- Communication and alarm systems;
- Personal protective equipment;
- Use of emergency response equipment (e.g. Fire extinguishers, respirators, etc.);
- Decontamination procedures;
- Evacuation procedures;
- Control and containment procedures;
- UST monitoring system equipment and procedures (if applicable).

INDICATE HOW EMPLOYEE TRAINING PROGRAM IS ADMINISTERED (Check all that apply) I1

☐ 1. FORMAL CLASSROOM; ☒ 2. VIDEOS; ☒ 3. SAFETY / TAILGATE MEETINGS;

☒ 4. STUDY GUIDES / MANUALS (Specify): _____ I2

☐ 5. OTHER (Specify): _____ I3

☐ 6. NOT APPLICABLE BECAUSE FACILITY HAS NO EMPLOYEES

Large Quantity Generator (LQG) Training Records: Large quantity hazardous waste generators (i.e., who generate more than 270 gallons/1,000 kilograms of hazardous waste per month) must retain written documentation of employee hazardous waste management training sessions which includes:

- A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.).
- The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and
- A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position.
- Current employee training records must be retained until closure of the facility.
- Former employee training records must be retained at least three years after termination of employment.

BUSINESS SITE ADDRESS A5.
2626 Kansas Avenue

BUSINESS SITE CITY A6.		ZIP CODE A7.
Riverside	CA	92507

TYPE OF BUSINESS (e.g., Painting Contractor) A8.	INCIDENTAL OPERATIONS (e.g., Fleet Maintenance) A9.
Manufactures below ground enclosures	

THIS PLAN COVERS CHEMICAL SPILLS, FIRES, AND EARTHQUAKES INVOLVING (Check all that apply): A10.

☒ 1. HAZARDOUS MATERIALS; ☒ 2. HAZARDOUS WASTES

INTERNAL FACILITY EMERGENCY RESPONSE WILL OCCUR BY (Check all that apply): B1.

☒ 1. CALLING PUBLIC EMERGENCY RESPONDERS (e.g., 9-1-1)
☒ 2. CALLING HAZARDOUS WASTE CONTRACTOR
☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:

1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:

1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

EMERGENCY COORDINATOR CONTACT INFORMATION: C13.

PRIMARY EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

ALTERNATE EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

- [ ] Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

- [x] 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- [ ] 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
- [ ] 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
- [ ] 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
- [ ] 5. LINED TRENCH DRAINS AND/OR SUMPS;
- [ ] 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- [x] 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
- [x] 8. STOP PROCESSES AND/OR OPERATIONS;
- [ ] 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- [x] 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
- [x] 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
- [x] 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
- [x] 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
- [ ] 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
- [x] 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
- [x] 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- [x] 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
- [ ] 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
- [ ] 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
- [x] 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
- [ ] 21. OTHER (Specify): D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

E2.

- [x] 1. BELLS;
- [ ] 2. HORNS/SIRENS;
- [x] 3. VERBAL (i.e., Shouting);
- [ ] 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

Parking Lot

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

- [x] 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [x] 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [ ] 3. OTHER (Specify): E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

- [ ] 1. HAVE BEEN DETERMINED NOT NECESSARY;
- [ ] 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

G. EMERGENCY EQUIPMENT

Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION G2.	CAPABILITY G3.

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.	LOCATIONS (e.g., Shop, outdoor shed, lab): H2.
☑ 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS	Throughout Facility
☑ 2. PROCESS LINES AND PIPING	Throughout Facility
☐ 3. LABORATORY	
☐ 4. WASTE TREATMENT AREA	

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.	LOCATIONS: H4.
☑ 1. SHELVES, CABINETS AND/OR RACKS	Throughout Facility
☐ 2. TANKS AND SHUT-OFF VALVES	
☑ 3. PORTABLE GAS CYLINDERS	Welding Area
☑ 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES	See Site Map
☑ 5. SPRINKLER SYSTEMS	Throughout Facility
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)	

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

☐ 1. FORMAL CLASSROOM ☑ 2. VIDEOS ☑ 3. SAFETY MEETINGS ☑ 4. STUDY GUIDES / MANUALS I1.

☐ 5. OTHER (Specify): _____ I2.

☐ 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES

☐ 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.

☑ 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

☒ 3. ACTIVATING IN-HOUSE EMERGENCY RESPONSE TEAM

In the event of an emergency involving hazardous materials and/or hazardous waste, all facilities must IMMEDIATELY:

1. Notify facility personnel and evacuate if necessary in accordance with the Emergency Action Plan (Title 8 California Code of Regulations §3220);
2. Notify local emergency responders by calling 9-1-1;
3. Notify the local Unified Program Agency (UPA) at the phone number below; and
4. Notify the State Warning Center at (800) 852-7550.

Facilities that generate, treat, store or dispose of hazardous waste have additional responsibilities to notify and coordinate with other response agencies. Whenever there is an imminent or actual emergency situation such as an explosion, fire, or release, the Emergency Coordinator must follow the appropriate requirements for the category of facility and type of release involved:

1. Title 22 California Code of Regulations §66265.56. Emergency Procedures for generators of 1,000 kilograms or more of hazardous waste in any calendar month.
2. Title 22 California Code of Regulations §66265.196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.
3. Title 40 Code of Federal Regulations §302.6. Notification requirements for a release of a hazardous substance equal to or greater than the reportable quantity.
4. Title 22 California Code of Regulations §66262.34(d)(2) and Title 40 Code of Federal Regulations §262.34(d)(5)(ii) for generators of less than 1000 kilograms of hazardous waste in any calendar month.

Following notification and before facility operations are resumed in areas of the facility affected by the incident, the Emergency Coordinator shall notify the local UPA and the local fire department's hazardous materials program, if necessary, that the facility is in compliance with requirements to:

1. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from an explosion, fire, or release at the facility; and
2. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.

INTERNAL FACILITY EMERGENCY COMMUNICATIONS OR ALARM NOTIFICATION WILL OCCUR BY (Check all that apply): C11.

- [x] 1. VERBAL WARNINGS;
- [x] 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;
- [x] 3. TELEPHONE;
- [ ] 4. PAGERS;
- [ ] 5. ALARM SYSTEM;
- [x] 6. PORTABLE RADIO

NOTIFICATIONS TO NEIGHBORING FACILITIES THAT MAY BE AFFECTED BY AN OFF-SITE RELEASE WILL OCCUR BY (Check all that apply): C12.

- [x] 1. VERBAL WARNINGS;
- [ ] 2. PUBLIC ADDRESS OR INTERCOM SYSTEM;
- [x] 3. TELEPHONE;
- [ ] 4. PAGERS;
- [ ] 5. ALARM SYSTEM;
- [ ] 6. PORTABLE RADIO

EMERGENCY COORDINATOR CONTACT INFORMATION: C13.

PRIMARY EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

ALTERNATE EMERGENCY COORDINATOR NAME: PHONE NO.: PHONE NO.:

- [ ] Check if additional Emergency Coordinator contact and address information is available onsite or by calling PHONE NO.:

Note: If more than one alternate emergency coordinator is designated, attach a list in order of responsibility.

D. EMERGENCY CONTAINMENT AND CLEANUP PROCEDURES

Check the applicable boxes to indicate your facility's procedures for containing spills and preventing and mitigating releases, fires and/or explosions.

D1.

- [x] 1. MONITOR FOR LEAKS, RUPTURES, PRESSURE BUILD-UP, ETC.;
- [ ] 2. PROVIDE STRUCTURAL PHYSICAL BARRIERS (e.g., Portable spill containment walls, built-in berms);
- [ ] 3. PROVIDE ABSORBENT PHYSICAL BARRIERS (e.g., Pads, spill pigs, spill pillows);
- [ ] 4. COVER OR BLOCK FLOOR AND/OR STORM DRAINS;
- [ ] 5. LINED TRENCH DRAINS AND/OR SUMPS;
- [ ] 6. AUTOMATIC FIRE SUPPRESSION SYSTEM;
- [x] 7. ELIMINATE SOURCES OF IGNITION FOR FLAMMABLE HAZARDS;
- [x] 8. STOP PROCESSES AND/OR OPERATIONS;
- [ ] 9. AUTOMATIC / ELECTRONIC EQUIPMENT SHUT-OFF SYSTEM;
- [x] 10. SHUT OFF WATER, GAS, ELECTRICAL UTILITIES;
- [x] 11. CALL 9-1-1 FOR PUBLIC EMERGENCY RESPONDER ASSISTANCE AND/OR MEDICAL AID;
- [x] 12. NOTIFY AND EVACUATE PERSONS IN ALL THREATENED AND/OR IMPACTED AREAS;
- [x] 13. ACCOUNT FOR EVACUATED PERSONS IMMEDIATELY AFTER EVACUATION;
- [ ] 14. PROVIDE PROTECTIVE EQUIPMENT FOR ON-SITE EMERGENCY RESPONSE TEAM;
- [x] 15. REMOVE CONTAINERS AND/OR ISOLATE AREAS;
- [x] 16. HIRE LICENSED HAZARDOUS WASTE CONTRACTOR;
- [x] 17. USE ABSORBENT MATERIAL FOR SPILL CONTAINMENT;
- [ ] 18. VACUUM SUCTION USING APPROPRIATE VACUUM (e.g., Intrinsically safe) FOR SPILL CONTROL AND/OR CLEANUP;
- [ ] 19. DECONTAMINATE PERSONNEL AND EQUIPMENT WITHIN DESIGNATED AREA AND DISPOSE OF WASTEWATER AS HAZARDOUS WASTE;
- [x] 20. PROVIDE SAFE TEMPORARY STORAGE OF HAZARDOUS WASTE GENERATED DURING EMERGENCY ACTIONS;
- [ ] 21. OTHER (Specify): D2.

E. FACILITY EVACUATION

THE FOLLOWING ALARM SIGNAL(S) WILL BE USED TO BEGIN EVACUATION OF THE FACILITY (Check all that apply): E1.

E2.

- [x] 1. BELLS;
- [ ] 2. HORNS/SIRENS;
- [x] 3. VERBAL (i.e., Shouting);
- [ ] 4. OTHER (Specify):

THE FOLLOWING LOCATION(S) WILL BE USED FOR AN EMERGENCY ASSEMBLY AREA(S) (e.g., Parking lot, street corner): E3.

Parking Lot

Note: The Emergency Coordinator must account for all onsite employees and visitors after evacuation.

EVACUATION ROUTE S AND ALTERNATE EVACUATION ROUTES ARE DESCRIBED AS FOLLOWS: E4.

- [x] 1. WRITTEN PROCEDURES DESCRIBING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [x] 2. EVACUATION MAP(S) DEPICTING ROUTES, EXITS, AND ASSEMBLY AREAS;
- [ ] 3. OTHER (Specify): E5.

Note: Evacuation procedures and/or maps should be posted in visible facility locations and must be included in the Contingency Plan.

F. ARRANGEMENTS FOR EMERGENCY SERVICES

ADVANCE ARRANGEMENTS FOR LOCAL EMERGENCY SERVICES (Check one of the following): F1.

- [ ] 1. HAVE BEEN DETERMINED NOT NECESSARY;
- [ ] 2. THE FOLLOWING ARRANGEMENTS HAVE BEEN MADE (Specify): F2.

Note: Advance arrangements with local fire and police departments, hospitals, state and local emergency response teams, and/or emergency services contractors should be made for your facility, if necessary. Large Quantity Generators must describe arrangements in the Contingency Plan.

G. EMERGENCY EQUIPMENT

Check the applicable boxes to list emergency response equipment available at the facility, identify the location(s) where the equipment is kept, and indicate the equipment's capability, if applicable.

TYPE	EQUIPMENT AVAILABLE G1.	LOCATION G2.	CAPABILITY G3.
EXAMPLE	☒ *CHEMICAL PROTECTIVE GLOVES*	*SPILL RESPONSE KIT*	*SINGLE USE, OIL RESISTANT ONLY*
Safety and First Aid	1. ☒ CHEMICAL PROTECTIVE SUITS, APRONS, AND/OR VESTS	On Personnel/Supply Area	
	2. ☒ CHEMICAL PROTECTIVE GLOVES	On Personnel/Supply Area	
	3. ☒ CHEMICAL PROTECTIVE BOOTS	On Personnel/Supply Area	
	4. ☒ SAFETY GLASSES, GOGGLES, AND FACE SHIELDS	On Personnel/Supply Area	
	5. ☒ HARD HATS	On Personnel/Supply Area	
	6. ☒ AIR-PURIFYING RESPIRATORS	On Personnel/Supply Area	
	7. ☐ SELF-CONTAINED BREATHING APPARATUS (SCBA)		
	8. ☒ FIRST AID KITS	Throughout Facility	
	9. ☒ PLUMBED EYEWASH FOUNTAIN AND/OR SHOWER		
	10. ☐ PORTABLE EYEWASH KITS AND/OR STATION		
	11. ☐ OTHER		
Fire Fighting	12. ☒ PORTABLE FIRE EXTINGUISHERS	Throughout Facility	
	13. ☒ FIXED FIRE SUPPRESSION SYSTEMS AND/ OR SPRINKLERS	Throughout Facility

	23. ☐ EXHAUST HOOD		
	24. ☐ SUMP AND/OR HOLDING TANK		
	25. ☐ CHEMICAL NEUTRALIZERS		
	26. ☐ GAS CYLINDER LEAK REPAIR KIT		
	27. ☐ SPILL OVERPACK DRUMS		
	28. ☐ OTHER		
Communi-cations and Alarm Systems	29. ☒ TELEPHONES (e.g., Cellular)	Throughout Facility/On Personnel	
	30. ☐ INTERCOM AND/OR PA SYSTEM		
	31. ☒ PORTABLE RADIOS	On Personnel	
	32. ☐ AUTOMATIC ALARM CHEMICAL MONITORING EQUIPMENT		
Other	33. ☐ OTHER		
	34. ☐ OTHER		

H. EARTHQUAKE VULNERABILITY

Identify areas of the facility that are vulnerable to hazardous materials releases due to seismic motion. These areas require immediate isolation and inspection.

VULNERABLE AREAS (Check all that apply): H1.	LOCATIONS (e.g., Shop, outdoor shed, lab): H2.
☑ 1. HAZARDOUS MATERIALS AND/OR WASTE STORAGE AREAS	Throughout Facility
☑ 2. PROCESS LINES AND PIPING	Throughout Facility
☐ 3. LABORATORY	
☐ 4. WASTE TREATMENT AREA	

Identify mechanical systems vulnerable to releases / spills due to earthquake-related motion. These systems require immediate isolation and inspection.

VULNERABLE SYSTEMS AND/OR EQUIPMENT (Check all that apply): H3.	LOCATIONS: H4.
☑ 1. SHELVES, CABINETS AND/OR RACKS	Throughout Facility
☐ 2. TANKS AND SHUT-OFF VALVES	
☑ 3. PORTABLE GAS CYLINDERS	Welding Area
☑ 4. EMERGENCY SHUT-OFF AND/OR UTILITY VALVES	See Site Map
☑ 5. SPRINKLER SYSTEMS	Throughout Facility
☐ 6. STATIONARY PRESSURIZED CONTAINERS (e.g., Propane tank)	

I. EMPLOYEE TRAINING

Employee training is required for all employees and/or contractors handling hazardous materials and/or hazardous wastes during normal and/or emergency operations. Most facilities will need to submit a separate Training Plan. However, your CUPA may accept this section as the Training Plan for some small facilities.
Employee training plans may include the following content:

- Applicable laws and regulations;
- Emergency response plans and procedures;
- Safety Data Sheets;
- Hazard communication related to health and safety;
- Methods for safe handling of hazardous substances;
- Hazards of materials and processes (e.g., fire, explosion, asphyxiation);
- Hazard mitigation, prevention and abatement procedures;
- Coordination of emergency response actions;
- Notification procedures for local emergency responders, CUPA, Cal OES, and onsite personnel;
- Communication and alarm systems;
- Personal protective equipment;
- Use and maintenance of emergency response equipment and supplies (e.g. Fire extinguishers, respirators, spill control materials);
- Decontamination procedures;
- Evacuation procedures and evacuation staging locations;
- Identification of facility areas, equipment, and systems vulnerable to earthquakes and other natural disasters.
- OTHER (Specify):

Check the applicable boxes below to indicate how the employee training program is administered.

☐ 1. FORMAL CLASSROOM ☑ 2. VIDEOS ☑ 3. SAFETY MEETINGS ☑ 4. STUDY GUIDES / MANUALS I1.

☐ 5. OTHER (Specify): _____ I2.

☐ 6. NOT APPLICABLE SINCE FACILITY HAS NO EMPLOYEES

☐ 7. CHECK IF A SEPARATE EMPLOYEE TRAINING PLAN IS USED AND UPLOADED TO CERS AS A PDF DOCUMENT I3.

☑ 8. CHECK IF EMPLOYEE TRAINING IS COVERED BY THE ABOVE REFERENCED CONTENT AND OTHER DOCUMENTS ONSITE I4.

EMPLOYEE TRAINING FREQUENCY AND RECORDKEEPING TRAINING MUST BE:

- Provided initially for new employees as soon as possible following the date of hire. New employees should not work in an unsupervised position that involves hazardous materials handling and/or hazardous waste management without proper training;
- Provided within six months from the date of hire for new employees at a large quantity generator;
- Ongoing and provided at least annually;
- Amended prior to a change in process or work assignment;
- Given upon modification to the Emergency Response/Contingency Plan.

Large Quantity Generator Training: Large quantity generators (1,000 kg or more) must retain written plan and documentation of employee training which includes:

- A written description of the type and amount of both initial and ongoing training that will be given to persons filling each job position having responsibility for hazardous waste management and/or emergency response.
- The name, job title and job description for each position at the facility related to hazardous waste management.
- Current employee training records must be retained until closure of the facility and former employee training records must be retained for at least three years after termination of employment.

Small Quantity Generator Training: Small quantity generators (less than 1,000 kg) must include basic hazardous waste management and emergency response procedures but a written employee training plan and training records are not required. In order to show that the facility has met the small quantity generator employee training requirement, an employee training plan and training records may be made available.

Hazardous Materials Business Plan Training: Businesses must provide initial and annual employee training that includes the content referenced above. The training may be based on the job position and training records must be made available for a period of at least three years.

J. LIST OF ATTACHMENTS

Check one of the following: J1.

☑ 1. NO ATTACHMENTS ARE REQUIRED; or

☐ 2. THE FOLLOWING DOCUMENTS ARE ATTACHED: J2.

Employee Training Plan

Businesses that handle hazardous materials are required to have a program which provides employees with initial and refresher training. The HMBEP shall include a training program, which is reasonable and appropriate for the size of the business and the nature of the hazardous materials handled. The training program shall take into consideration the responsibilities of the employees to be trained. The training program shall, at a minimum, include:

A. Methods for safe handling of hazardous materials stored at your business, including familiarity with the characteristics and hazards of each material and measures employees can take to protect themselves from chemical hazards;
B. Procedures for coordination with local emergency response organizations;
C. Proper use of personal protective equipment;
D. The prevention, abatement and mitigation procedures you have developed for your business and explained in the HMBEP, including proper use of emergency equipment and supplies;
E. The emergency evacuation plans you have developed, the notification procedure used to alert people to evacuate, and the closest location to obtain appropriate emergency medical care;
F. Procedures to coordinate with and assist the local emergency personnel that may respond to your business;
G. Who and how to call for immediate assistance in the event of an accident involving hazardous materials;
H. Procedures for ensuring that appropriate personnel receive initial and refresher training.

All employee training shall be documented and updated annually

RE: PUBLIC RECORDS REQUEST of 1/26/2021, Reference # R000328-012621

Dear Shannon Castagno,
Thank you for your interest in public records of the CAL FIRE. Your request has been received and is being processed in accordance with the California Public Records Act, Government Code section 6250 et seq. Your request was received on January 26, 2021 and given the reference number R000328-012621 for tracking purposes.

Records Requested: Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA 92507. ESS requests the following information concerning the subject site which your agency may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. pipelines. 5. information regarding underground storage tank present or previously found at the site."

Your request will be forwarded to the relevant CAL FIRE department(s) to locate the information you seek and to determine the volume and any costs that may be associated with satisfying your request. You will be contacted about the availability and/or provided with copies of the records in question. PLEASE NOTE: The California Public Records Act does not require a governmental body to create new information, to do legal research, or to answer questions.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed.

RE: PUBLIC RECORDS REQUEST of January 26, 2021, Reference # R000328-012621.

Dear Shannon Castagno,

The CAL FIRE received a public information request from you on January 26, 2021. Your request mentioned:

"Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA 92507. ESS requests the following information concerning the subject site which your agency may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. pipelines. 5. information regarding underground storage tank present or previously found at the site.""

The CAL FIRE has reviewed its files and has located responsive records to your request. Please log in to the CALFIRE PRA Records Center at the following link to retrieve the appropriate responsive documents.

Public Records Request - R000328-012621

If you have any questions, or wish to discuss this further, please contact me.

Sincerely,
Mark Springer

NFIRS Remarks

Remarks

On 4/17/2008, E4, E1, T1, and B1 responded for a possible toxic liquid in the gutter. The liquid was traced back to 2840 Hulen and was found to be water and Pine Sol used in mop buckets to mop the facility. The occupant was advised that they are not allowed to dump their cleaning waste in the streets and that our Fire Prevention Bureau would be following up with them to correct the matter. The RFD T2 Haz Mat Captain and Prevention 37 were consulted and the matter was assigned to Prevention 35 for follow up.

Subject: Riverside Public Records Request :: W005826-012521

Dear Shannon:

Thank you for your interest in public records of the City of Riverside. Your request was received by the Public Records Advocate on 1/25/2021 and given the reference number W005826-012521 for tracking purposes.

Record(s) Requested: Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue Riverside, CA 92507 APNs: 210130020, 210130016 & 210130015 ESS requests the following information concerning the subject addresses which the public works/engineering departments may have on file: 1. copies of applications and permits for industrial waste discharge; and 2. copies of any and all violations concerning industrial waste discharge.

The request will be forwarded to appropriate department(s) for processing.

Monitor request progress at the link below. The Public Records Advocate will email you when the request is complete. Thank you for using the Riverside Records Portal.

Subject: California Public Records Request :: W005826-012521
Body:
RE: PUBLIC RECORDS REQUEST of January 25, 2021, Reference # W005826-012521

Dear Shannon,

The Public Records Advocate received the below records request from you on January 25, 2021.

Site: 1989 Massachusetts Avenue and 2626 Kansas Avenue, Riverside, CA 92507
APNs: 210130020, 210130016 & 210130015

1. copies of applications and permits for industrial waste discharge; and

2. copies of any and all violations concerning industrial waste discharge.

Responsive records are available via the Riverside Records Portal. Select the link below to view your request.

If you have any questions, or wish to discuss this further, please contact me.

Sincerely,

Carmen Soto
City Clerk's Office
(951) 826-5557

California Public Records Request #W005826-012521 (1989 Massachusetts)

AG2221 10/6/16. This is a storm water inspection for the new Industrial General Permit (IGP). This facility is school bus transportation facility. Environmental Compliance Inspector (ECI) Abigail Gomez met with Rick Baumgarte, Division Fleet Maintenance Manager (IU) and was escorted throughout the property. At time of inspection IU could not produce a copy of the Storm Water Pollution Prevention Plan (SWPPP) or a WDID# (see enf.). IU stated that he has very recently moved into this position and was still familiarizing himself with all the required documents for this location. Inspection began with a walk through of the overflow parking. IU stated that the overflow parking area is broken up into 2 areas. Area 1 is for overflow operation bus parking and Area 2 is for buses that are ready to be auctioned and or scrapped (see enf.). ECI observed approximately 15 buses is area 2, of which 2-3 had minimal oil staining. IU stated that he has spill pans and a spill kit readily available and had staff address the issues while ECI was onsite. All other outside areas were inspected and found satisfactory. ECI provided and reviewed storm water best management practices and IGP materials at time of inspection.

SS4493-06/30/15. This is a follow-up NSIU inspection to SS4455-06/08/15. Environmental Compliance Inspector (ECI) met with the Shop Manager, Travis Shaw and the interceptor pump manifest were provided as requested and access to the second chamber of one interceptor was provided. The interceptors were pumped last week by Saftey Kleen #67303545. Inspection of the second chamber found it the effluent tee intact. Previous inspection of the storm swales found sediment and debris and it has been determined that the site map for the SWPPP is incorrect. IU is in the process of revising the SWPPP for the NIGP process and it will reflect the actual condition of the site. Previous inspection of the chemicals on-site found that they are not all properly contained and ECI requested confirmation that the two large containers are double walled construction. Re-inspection found that the IU has confirmed they are double walled and they are in the process of being properly labeled. Previous inspection of the of the maintenance shop found evidence of spills surrounding the waste oil and the waste coolant containment. Re-inspection found that the area has been cleaned as required. Previous inspection of the used battery storage found no containment. Re-inspection found that the used batteries are now properly contained. IU has notified ECI that they are currently obtaining proposals to repave the bus parking lot to reduce the Total Suspended Solids (TSS) for the NIGP sampling requirements.

SS4455-06/08/15. This is a routine NSIU inspection of a bus transportation company that performs fleet maintenance and vehicle washing on site. Environmental Compliance Inspector (ECI) met with the Shop Manager, Travis Shaw, and Payroll Coordinator, Rebecca Dapper, to gain access to the site. There are two clarifiers on site and there is no pumping manifest available for review. ECI educated staff on record keeping requirements. The waste oil and parts wash water was last picked up on 05/27/15 by Safety Kleen. The used oil filters were last picked up on 05/14/15 by Safety Kleen. The brake cleaner was last picked up on 03/09/15 by Safety Kleen. ECI was able to determine that the New Industrial General Permit process has begun. ECI provided education material regarding the application process. Inspection of the clarifier at the rear of the bus wash found it to be acceptable with 6” of solids in chamber one. Inspection of the interceptor to the rear of the maintenance shop found it to be acceptable with 4” of solids in chamber one and no access to chamber two. Inspection of the outside area found a few areas of grease on the ground and ECI educated staff on proper cleaning methods. Inspection of the storm swales found sediment and debris. ECI was unable to determine the location of the sites outfall and has requested IU to research the information prior to follow-up inspection. Inspection of the trash containment area found the trash bin lids open and ECI educated staff on keeping them closed at all times. Inspection of the bus wash station found that it is no longer used. The washing now takes place by an outside company and the water is properly contained and disposed of off-site. The area has an air filter wash station that uses steam. Inspection of the chemicals on-site found that they are not all properly contained (see enforcement) and ECI has requested confirmation that the two large containers are double walled construction. Inspection of the of the maintenance shop found evidence of spills surrounding the waste oil and the waste coolant containment (see enforcement.) Inspection of the used battery storage found no containment (see enforcement.)

GM627142141. This is a follow-up inspection. Inspection of the area outside the maintenance shop found to have been cleaned. Inspection of the waste fluids area found the spill pallets, drums and floor have been cleaned. Inspection of the steam cleaning trench drains found to have been cleaned.

GM2104. This is a routine inspection. STA (Student Transportation of America) is a student bus transportation facility that does the maintenance on the buses. I have met with Tom Moore to conduct the facility inspection. Inspection of the steam cleaning area found the trench drain needs to be cleaned, there are debris and sludge. See Enforcement.

Inspection of the clarifier found to be in good condition with at most two inches of settled debris in the first chamber. Inspection of the records found to be on-site. Inspection of the waste fluids storage area found spilled fluid on ground and on top of drums as well in in the spill containment. See Enforcement. Inspection of the procedures for spills found employees use a mop or rags depending on the size of the spill. waste fluid is poured into drums of waste coolant. The shop rags are serviced on a weekly basis. Inspection of the outside area of the maintenance shop found brake drums, rotors, and A/C cooling system on a pallet, that is too small for the amount of parts on it. See Enforcement. Inspection of the shop area found to be clean. Inspection of the parking area for the buses found to be clean.

AG2264 11/2/16. This is a follow up to AG2221 10/6/16. Environmental Compliance Inspector (ECI) Abigail Gomez met with Rick Baumgarte, Division Fleet Maintenance Manager 916 995-6850 (IU) and was escorted throughout the property. IU has obtained a copy on the Storm Water Pollution Prevention Plan (SWPPP) prepared by WENCK Associates. ECI verified that the WDID# 8331022415 is still active. IU stated that storm water samples were collected on 10/24/16 and analytics have not been received. IU has removed all oil stating in the maintenance shop and all outside areas as required. IU has also trained all staff on appropriate storm water BMP's and implemented daily inspections of all outside areas. ECI observed a couple of buses waiting to be auctioned in the back parking lot with tarps over the exposed engine parts to ensure rain water does not come in contact with any oily parts. IU stated that staff is inspecting the tarps daily and always before and after a rain event. Safety Kleen services all three clarifiers on site on 10/20/16 (CAL000379706). ECI provided and reviewed storm water best management practices with IU at time of inspection. No violations.

17-1018-AG. This is a storm water inspection of activities observed at the City of Riverside Acorn Fueling Station (AFS) at 5961 Acorn. At approximately 8:40 a.m. Environmental Compliance Inspector (ECI) Abigail Gomez observed a Student Transportation of America (STA) staff discharging wash water from inside of the bus and then leave the site. Upon becoming aware of what was happening ECI attempted to photograph the bus driver and instead photographed the adjacent vehicle, bus #6506. While photographing vehicle 6506 ECI was confronted by the driver about taking pictures of "Her" bus. ECI identified herself and informed the driver that she was attempting to photograph the driver adjacent to her. ECI also informed the driver that the AFS is a public space and City or Riverside property. ECI informed the driver that she would be contacting STA management and requiring them to educate staff on appropriate storm water and vehicle washing practices. Upon leaving the site ECI observed identical staining on adjacent fueling station, see attached photographs. At approximately 09:19 a.m. ECI received a call regarding the photographs taken at the AFS from 951 840-1988. The caller made inappropriate remarks about ECI's and her actions. The caller then requested the corporation number for the City of Riverside so that she could "file a complaint". ECI informed the caller that the City was not a corporation and that she could call the 311 call center for the City of Riverside. ECI ended the call due to the callers' aggressive and harassing manner. ECI arrived at the STA Main Offices, 1989 Massachusetts at approximately 9:35 a.m. and spoke to Chris Hubbell, Operations Manager 951 283-6781 (IU) and made him aware of both situations. ECI requested the callers contact information for the storm water report and suggested calling the number with management. When the caller answered ECI requested her contact information. The caller declined to provide the information and ended the call. IU apologized for the callers' actions and comments about ECI and requested a copy of the photographs and final report. ECI informed IU that he would receive the requested documents within 24 hours.

18-03-28, CSP, This is a plan check inspection. Chris Hubbell the assistant manager and Juan Vidrio the area maintenance manager at Student Transportation of America to go over the plans to remove the clarifier. Neither gentleman knew about the plans, so they took me to meet Anthony Bottecchia of Partner Engineering and Science Inc. who was on site. He stated that they were there installing soil vapor probes and that the ground water monitoring well has already been installed. They are working directly with the Regional Water Quality Control Board on this project. The interceptor has been leaking and that is why it must be removed. An inspection of the maintenance facility building found that there were no drains inside, therefore not connected to the clarifier. It was used for washing buses before the automated system was put in. Project Manager is David Lehnus of AIS, contact Cell # 860-214-0041, Office # 714-415-5847

19-0826 Tk ECI Nicole LaFace and SrECI Tim King inspected the water meter and found it was constantly turning. Meter # 48770B reading was 1590 at 13:30 on 8/26/2019. Performed an inspection of the facility and was unable to find any water usage.

19-0912, CSP, This is routine inspection at the Student Transportation of America. Inspector SnavelyPeck met with Rick Baumgarte. ECS was conducting a dye trace of the sanitary and grease waste lines. While on site a routine inspection of the interceptor/clarifier was conducted. The clarifier was pumped approximately 8 months ago. The clarifier was found to be in Fair condition at 13%. Pumping is not required at this time.

20-0114-TR This is a routine inspection with camera of a lateral line of a Non-Significant Industrial User, Student Transportation of America by Environmental Compliance Inspector (ECI) Ridley and Senior ECI (SECI) Munoz. ECI deployed the camera down stream from the clarifier sample box. The line turned and ECI was unable to push the camera through the turn. ECI then put the camera down a clean out downstream (approx. 40' toward the fence line) of the bus wash area clarifier. ECI televised approx. 120' of the sewer line with no visible connection within the section of line. ECI dye traced the sample box of the clarifier and found that the effluent line is connected to the clean out and line that runs towards Roberta . ECI also observed domestic waste in the lateral accessed through the clean out.

20-0226 Tk SrECI Tim King has made serval attempt to have the City water leak near the water meter repaired. This is causing water to be constantly flowing down the street on Roberta. The leaking pipe shall be repaired by 3/3/2020 or further enforcement action may be require.

Public Records Request #W005826-012521 (2626 Kansas Ave.)

R# 80962 10/30/13. This is a routine inspection of an underground utility vault manufacture. This facility uses fiberglass, polyester resin, various mixtures of sand, and polymer concrete to manufacture the utility vault. Building one manufactures utility vaults from fiberglass and building two manufactures polymer concrete utility vaults. IU stated that there are no floor sinks inside of either building with the exception of sanitary toilets. The storage areas and storm drains between building one and two was found unsatisfactory (see enf.). The main storm drain new on the east side of the facility had an excessive amount of debris (see enf.). Both buildings had multiple resin storage areas without secondary containment (see enf.). EC staff observed that some of the grate covers for the secondary containment structures in both buildings were covered with plaster (see enf.). The area behind building one had several containers without secondary containment (see enf.). The hazardous waste area berm was recently damages and there were no sandbags or BMP's in place to contain any spills (see enf.). The compressor area behind building one had several containers of oil without secondary containment (see enf.). IU could not identify the water discharged into a sewer connection adjacent to the silos behind building one (see enf.). EC staff provided and reviewed storm water BMP's with IU. This report was reviewed with Miguel Ochoa.

GM204005062014. This is a routine inspection. I have met with the production manager to conduct the facility review. New Basis specializes in the manufacturing of concrete and fiberglass underground utility vaults, and lids. Inspection of the production area found there are two processes, the FRP area which is the fiberglass spray area and the concrete mold area. The fiberglass has a total of two mixer that mixes the fiberglass and the polyester resin. The concrete has a total of three mixers that mix the sand, polyester resin, and calcium carbonate. Inspection of the area between the two manufacturing buildings found storm drains that are in need of cleaning, the drains are connected and drain to the south side loading docks to the storm conveyance. Inspection of the outside ares were finished product is stored and the molds found the areas are cleaned once a week with a ride a long sweeper. The areas need to be cleaned there is evidence of spilled

calcium carbonate near the roll off. See Enforcement. Inspection of the area between New Basis and J.C.'s Grease Buyers found to be used for storage of molds. Inspection of the side area storm drain found to be protected by sand bags. Inspection found two 5-gallon tanks that will be used for a new process, the area is covered and contained with a three foot concrete wall. Inspection of the five silos found to used for building two manufacturing of larger vaults. Inspection of the three 2000-gallon tanks of resin found the area is contained and covered. Inspection of the hazardous waste storage area found to be contained the a 6" concrete berm. Inspection of the south side found one compressor that has an oil water separator that is connected to the sewer. Inspection of the area is covered. Inspection of the area found there is an evaporative system that is connected to the fiberglass area. Inspection of the calcium carbonate hoper found spilled materials on ground. See Enforcement. Inspection of the waste hauling records found WorldWide Recovery last hauled the debris with resin on 04/17/14, manifest #013103037JJK. The used acetone was last hauled on 03/24/14, manifest #008711737JJK. Inspection found IU does have WDID#8 331002605.

GM205005132014. This is a follow-up inspection to GM 204005062014. Inspection of the storm drains found to have been cleaned. Inspection of the silos found the calcium carbonate has been cleaned from the ground. Inspection of the back area near the roll off trash bins found the area has been cleaned.

AG1392 6/3/15. Environmental Compliance Inspector (ECI) Abigail Gomez met Joe Durkee, Production Manager (IU) and provided informational packet about the Industrial General Permit and notified IU that New Basis has not re-certified their WDID # as of 4/24/15.

SS4481-06/18/15. This is a routine NSIU inspection of a facility that manufactures fiberglass, concrete and resin vaults for use underground. Environmental Compliance Inspector (ECI) met with Joe Durkee to gain access to the site. Fiber glass is mixed with polyester resin and sprayed in a designated area. The concrete used in the process is a mix of sand, polyester resin and calcium carbonate. The vaults are also wrapped with a fiberglass mesh. The resin, sand and calcium carbonate is stored in silos. The components are mixed in mixers and stored in totes and 55 gallon containers prior to use in the equipment. Some of the resin and calcium carbonate mixture is batched in one building and transported outside to the next building without proper containment (see enforcement.) ECI educated staff on proper chemical containment. ECI advised IU that no chemicals shall be transported from building unless properly contained to prevent accidental spill. Inspection of the outside area found evidence of evidence of calcium carbonate and fiberglass (see enforcement.) Inspection of the storm swales found debris and sediment (see enforcement.) Inspection of the loading dock pit found excessive debris and sediment (see enforcement.) Inspection of the on-site storm drains found sand bags in place to prevent large debris from entering the catch basin. Inspection of the trash containment area found that the bins are not covered (see enforcement.) ECI advised IU to consult their stormwater professional regarding the need for coverage. Inspection of the compressors found no evidence of leaks. Inspection of the outside storage area found excessive debris and sediment (see enforcement.) Inspection of the production floor found excessive resin, sand, calcium carbonate and fiberglass that is being tracked outside (see enforcement.) Inspection of the properties perimeter found evidence of fiber glass leaving the site (see enforcement.) A written Warning is being issued for the fiberglass in the City storm swale.

SS4593-07/30/15. This is a follow-up inspection to SS4481-06/19/15. Previous inspection of the mixing area found that some of the resin and calcium carbonate mixture is batched in one building and transported outside to the next building without proper containment. Previous inspection of the outside area found evidence of evidence of calcium carbonate and fiberglass. Previous inspection of the storm swales found debris and sediment. Previous inspection of the loading dock pit found excessive debris and sediment. Previous inspection of the trash containment area found that the bins are not covered. Previous inspection of the outside storage area found excessive debris and sediment. Previous inspection of the production floor found excessive resin, sand, calcium carbonate and fiberglass that are being tracked outside. Inspection of the properties perimeter found evidence of fiber glass leaving the site. IU has cleaned the facility and the

outside are to remove the excessive resin, san, calcium carbonate and fiber glass. IU has cleaned all stormwater swales and catch basins associated with the site and in the City storm swale to remove fiberglass, debris and sediment. IU has provided containment and or secured the mixture that is being transported outside.

20-1203-NJ: This is an inspection in response to water observed coming off the property, into the street and gutter. ECI met with the Safety Manager (IU) aochoa@newbasis.com, 951-313-7624. IU indicated that Fire Safety First was onsite to flush the sprinkler system and risers. Inspection found that three risers were flushed and water was exiting the property. ECI indicated that this activity is allowed under the city ordinance as long as the water is not picking up excess pollutants on its way to the street, gutter and storm drain. ECI found that the water was picking up a lot of silica from the site's activities and ponding in the loading dock (see enforcement). IU indicated that the dock has a storm drain with a filter and the filter is capturing any pollutants. ECI asked that the filters be cleaned or replaced once the fire system flush was complete. IU also mentioned that the site has staff cleaning outdoors daily with a sweeper. ECI recommended that outdoor cleaning be conducted prior to the next scheduled fire system flushing so that no pollutants are carried to the storm drain system with the water.

20-1210-NJ: This is a follow-up to stormwater inspection. ECI previously observed water coming off the property and discharging to the street. The site had a third-party contactor onsite testing fire sprinkler and risers. ECI also observed that some water with some of the industry's product was entering an onsite storm drain that contains a filter (in a covered loading dock). Today's inspection found that the covered loading dock still has water and that the filter has not yet been changed out. IU indicated that once the water evaporates then the site will change out the storm drain filter. ECI granted the site an extension.

20-1217-NJ: This is a modified follow-up due to COVID-19. The contact has indicated to ECI that, "As of right now all the drains in the warehouse have been cleaned and changed out on the filters. The one located in the loading dock is in the process of being drained so we can clean the debris and switch out the filters that are in use. As of now we have no work on any of the standup pipes or fire hydrants so no additional water has been accumulated at the source." ECI grants the site an extension to have the loading dock storm drain filter replaced by 1/4/2021.

NOTES: _____

The Declarations below are mandated by the State of California under Section 19825 and Section 19826 of the Health and Safety Code.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C39 Lic. No 719946 Date 11/22/96

Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) licenses pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

Date ___/___/___ Owner Signature _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier National Union

Policy Number 4184428966

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 11/22/96 Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lenders' Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

The Declarations below are mandated by the State of California under Section 19825 and Section 19826 of the Health and Safety Code.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ Lic. No. _____ Date 10/5/92

Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) licenses pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

Date / / Owner Signature _____

NOTES: _____

The Declarations below are mandated by the State of California under Section 19825 and Section 19826 of the Health and Safety Code.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C45 Lic. No. 711214 Date 8/6/97

Contractor Signature G. D. Kelly

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).]:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) licenses pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

Date / / Owner Signature _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier Fauld Ins.

Policy Number PWC2011332

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 8/6/97 Applicant: G. D. Kelly

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lenders' Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Applicant's Name: NEW BASIS Date: 2-25-11

Mailing Address: 2626 KANSAS AVE., Bryan Brown

RIVERSIDE, CA. 92507 951-217-0291

Explain why work has not been completed within the previous time limits:

CHANGE IN MANAGEMENT. AWAITING S.C.A.Q.M.D. PERMIT CAUSED A LONG DELAY IN PROJECT, TO GET FINALS.

Office Use Only:

Permit Description: REGENERATNE THERMAL OXIDIZER

Last Approved Inspection Type and Date: 4-20-2006 PHIL IRVIN.

Staff Initials PS

☒ Your Request to Reactivate the Expired Permit is Approved.

The reactivation will require the payment of certain fees and processing of the reactivation permit. Please come to the Building and Safety Division at 3900 Main Street, 3rd floor, to process the reactivation of this permit. Please keep in mind that the City Approved Plans (if any) will be required to be available for the Building Inspector at the time of the inspections. If you do not have the Approved Plans, make arrangements to obtain a copy from the City. Additional fees are required if copies of the City Approved plans are needed. Reactivated permits will generally expire again if work is not completed within 180 days of payment of the reactivation fee. Permits may only be reactivated one time. Failure to complete all work within the 180 day time frame will require a new permit, payment of new fees, and new plans to reflect current code requirements.

❖ APPLICATION FOR DUPLICATE PLANS - APPLICANT ❖

I, the undersigned, do hereby request a duplicate of the official copy of the plans for the building or structure located at:

2626 Kansas **and do hereby declare under penalty of perjury under the laws of the State of California that:**

1. **The copy of the plans for which I have applied shall be used only for the maintenance, operation and use of the building located at the address set forth in this application.**

2. **I acknowledge that the drawings, plans and calculations are instruments of professional service and are incomplete without the interpretation of the certified, licensed, or registered professional of record.**

3. **I acknowledge that subdivision (a) of Section 5536.25 of the Business and Professions Code states that a licensed architect who signs plans, specifications, reports, or documents shall not be responsible for damages caused by subsequent changes to, or use of, those plans, specifications, reports or documents where the subsequent changes or uses, including changes or uses made by state or local governmental agencies, are not authorized or approved by the licensed architect who originally signed the plans, specifications, reports, or documents, provided that the architectural service rendered by the architect who signed the plans, specifications, reports, or documents was not also a proximate cause of the damages.**

4. **In consideration for the City's approval of this application, I do hereby agree to indemnify and hold harmless the City of Riverside from liability which may arise due to my receipt of the copy of the official plan and any use to which my copy of the plans may be applied.**

❖ REQUESTING COPIES OF CITY APPROVED PLANS ❖

Plans (or Blueprints) used to construct many construction projects in the City of Riverside are maintained on an electronic database by the Building and Safety Division. This database is available to be viewed during business hours at the Building and Safety Division public counter.

Copying or duplication of plans is possible only when the following guidelines are followed.

1. **Plans which were prepared by a licensed architect or engineer cannot be duplicated without the written authorization of that licensed professional. Therefore, before the plan can be duplicated, you will need to make contact with the licensed professional responsible for the drawings as well as the owner of the building and secure their written authorization to duplicate the plans. Attached is a set of 3 documents which must be completed and returned to the Building and Safety Division prior to our releasing the plans for duplication.**

   Plans which were <u>not</u> prepared by a licensed architect or engineer may be duplicated with written consent of the property owner.

2. **Duplication of plans from the electronic database is a process requiring specialized equipment. The City of Riverside has authorized the following vendor to pick-up plans from the Building and Safety Division for the purpose of duplication. You will deal directly with the vendor as to the payment for their service.**

Micro Imaging Company
529 W. Rincon Street
Corona, CA 92880
Phone (951) 898-2800

Prior to contacting the vendor to duplicate the plans you must have completed the necessary release forms and checked with the Building and Safety Division regarding the availability of the plans for the particular address.

The Declarations below are mandated by the State of California under Section 19825 and Section 19826 of the Health and Safety Code.

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class B Lic. No. 698795 Date 11/22/00

Contractor Signature [signature]

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) licenses pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

Date ___/___/___ Owner Signature _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier State Fund

Policy Number 044-00 Unit 0019566

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 11/22/00 Applicant: [signature]

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lenders' Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

FINDINGS OF DISABLED ACCESS UNREASONABLE HARDSHIP

Project Name: Associated Plastics **Permit Number:** 99-2519

Project Address: 2626 Kansas Ave., Riverside, CA **Date:** October 12, 1999

THE ABOVE NAMED PROJECT HAS BEEN GRANTED AN EXCEPTION FROM THE REQUIREMENTS OF THE STATE OF CALIFORNIA CCR-TITLE 24 (REGULATIONS FOR THE ACCOMMODATIONS OF THE DISABLED) BASED ON THE CRITERIA:

1. What type of facility is this ?: Plastics Manufacturing

2. How is this facility used by the general public ?: NO PUBLIC ACCESS - Employee use only

3. What is the total cost of construction ?
(FROM LINE [3] OF WORKSHEET): $ 97,500

4. What is the cost of providing disabled access ?
(FROM LINE [2g] OF WORKSHEET): $ 62,500

5. What disabled access features would be gained or lost in this project ?:
GAINED: 1) "VAN ACCESSIBLE" Parking 2) An Accessible Route to the Area of Remodel
3) An Accessible Entrance
LOST: Accessible Restrooms

6. How will the Title -24 accessibility improvements impact the financial feasibility of this project ?:
The estimated costs to bring the existing building into full compliance with all current disabled access regulations is more than a 175% increase over the initial construction costs.

THE FOLLOWING PERSON PROVIDED INFORMATION FOR THE ABOVE REFERENCED PROJECT:

NAME: Bryan Benso **FIRM:** GaFcon Inc.
ADDRESS: 23832 Rockfield Blvd., Lake Forest, CA 92630
TELEPHONE: (909) 768-9165

(CONTINUED ON PAGE TWO)

THE DETERMINATION OF UNREASONABLE HARDSHIP AND THIS DOCUMENTATION DO NOT ALLOW FOR BLANKET EXCEPTION FROM THE CCR-TITLE 24 ACCESS REGULATIONS. THE EXCEPTION PROVIDED FOR ON THIS FORM APPLIES ONLY TO THE FOLLOWING ITEMS OF THE IDENTIFIED PROJECT:

1) The existing restroom(s) may remain "as is" and without disabled access modifications.

CERTIFIED BY TITLE 24 (CHECK ONE):

() 1. Equivalent Facilitation will be provided as specified in Section_____.

() 2. Equivalent Facilitation will be provided as determined by this enforcing body. See Section_____.
Equivalent Facilitation will be:_____

(X) 3. No provision of Equivalent Facilitation is necessary. See Section 1134B.2.1 EX.#1
The legal constraints are: No legal constraints
The physical constraints are: Extensive demolition and reconstruction of existing plumbing, electrical, mechanical and structural components.

() 4. The approval of an Appeals Board is required to ratify the determination of Unreasonable Hardship.
See Section_____and Section 101.17.11, Item 4.
The legal constraints are:_____
The physical constraints are:_____

THIS DOCUMENTATION OF UNREASONABLE HARDSHIP WAS DEVELOPED IN CONSULTATION WITH:

DISABLED ACCESS UNREASONABLE HARDSHIP WORKSHEET

Project Name Associated Plastics TI Permit Number Plan check 99-2519.2

An **UNREASONABLE HARDSHIP** exists where the cost of providing an accessible entrance, path of travel, sanitary facilities, drinking fountains and public phones is disproportionate to the total cost of construction (exceeding 20% of the cost of the project).

LINE 1) **WHAT IS THE PERMIT VALUATION OF THIS PROJECT ?** ..... $ 35,000
(WITHOUT providing disabled access improvements listed below)

Where the cost of alterations necessary to make these features fully accessible is disproportionate, **ACCESS SHALL BE PROVIDED TO THE EXTENT THAT IT CAN BE** without incurring disproportionate cost.

LINE 2) **WHAT IS THE ESTIMATED COST OF PROVIDING EACH OF THE DISABLED ACCESS IMPROVEMENTS LISTED BELOW ?**

a) **ACCESSIBLE ENTRANCE:** ..... $ 15,000
[INCLUDING DOOR SIZE, KICKPLATE, THRESHOLD, HARDWARE, LANDINGS and STRIKE EDGE CLEARANCES]

b) **ACCESSIBLE ROUTE TO THE ALTERED AREA(S):** ..... $ 2500
[INCLUDING VAN ACCESSIBLE PARKING and PATH OF TRAVEL ELEMENTS]

c) **AT LEAST ONE ACCESSIBLE RESTROOM FOR EACH SEX:** $ 40,000
[A UNISEX RESTROOM IS PERMITTED IF THERE WILL BE NO MORE THAN FOUR (4) EMPLOYEES]

d) **ACCESSIBLE PUBLIC TELEPHONES:** ..... $ N/A - None exist
[IF PUBLIC TELEPHONES ALREADY EXIST]

e) **ACCESSIBLE DRINKING FOUNTAINS:** ..... $ N/A - None exist → Storage NIC
[IF DRINKING FOUNTAINS ALREADY EXIST] → Alarms 5000

f) **ACCESSIBLE PARKING, STORAGE and ALARMS:** ..... $ Parking inc. in 2b.

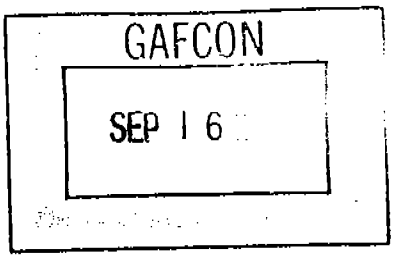
g) **TOTAL COST OF PROVIDING ACCESSIBLE FEATURES:** ..... $ 62,500
[ADD LINES (2a) THROUGH (2f)]

LINE 3) **TOTAL COST OF CONSTRUCTION INCLUDING ACCESSIBLE FEATURES:** ..... $ 97,500
[ADD LINES (1) and (2g)]

LINE 4) **COST CAP LIMITATION:**
[MULTIPLY LINE (1) BY 20% (0.20)]

THIS IS THE **MAXIMUM** AMOUNT THAT MUST BE SPENT TOWARDS COMPLIANCE → $ 7,000

LINE 5) **DISABLED ACCESS UNREASONABLE HARDSHIP QUALIFICATION TEST:**
IS THE AMOUNT ON LINE (4) **LESS THAN OR EQUAL TO** THE AMOUNT ON LINE (2g) ?:



☒ YES → IF YES, THEN GO TO LINE (6).

☐ NO → IF NO, **STOP !** THIS PROJECT **DOES NOT** QUALIFY FOR UNREASONABLE FINANCIAL HARDSHIP.

LINE 6) **SUBMIT LICENSED CONTRACTORS' WRITTEN ESTIMATE(S) FOR EACH OF THE DISABLED ACCESS IMPROVEMENTS. ALL ESTIMATES MUST BE SUBMITTED IN AN "ITEMIZED COST BREAKDOWN" FORMAT.**

Associated Plastics, Inc.
Attention: Tracey Glenn
2626 Kansas Avenue
Riverside, CA 92507

Dear Tracey:

We appreciate the opportunity to present this proposal for the handicap accessibility upgrades to your facility. Enclosed is a breakdown of work to be included with an itemized price breakdown for each item.

If you have any questions, please give me a call at (949) 830-4100.

Sincerely,
HERITAGE CONSTRUCTION

Dan Chasteen
President

ASSOCIATED PLASTICS
HANDICAP UPGRADES

SCOPE OF WORK

1. Install the new handicap access ramp per the drawings by Ware & Malcomb Architects. $15,000

2. Install (2) new handicap parking spaces and the striped path of entry. Include all new handicap signage at the new parking spaces and access ramp per the drawings by Ware & Malcomb Architects. $2,500

3. Revise the (2) existing restroom per the conceptual drawing to upgrade the restrooms to comply with current ADA requirements. $40,000

4. Install new ADA approved alarm system throughout the facility. $5,000

Total For All Improvements **$62,500.00**

LICENSED CONTRACTORS DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C8 Lic. No. 298795 Date 10/13/99

Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon and who contracts for such projects with a contractor(s) licenses pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier State Fund

Policy Number 1476134-2011

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 7/12/11 Applicant: D. Franklin

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lenders' Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Bus. and Prof. Code; any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500)):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does the work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I am exempt under Sec. for this reason

Date Owner Signature

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

X I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier Zenith

Policy Number CO4 8083701

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that, if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

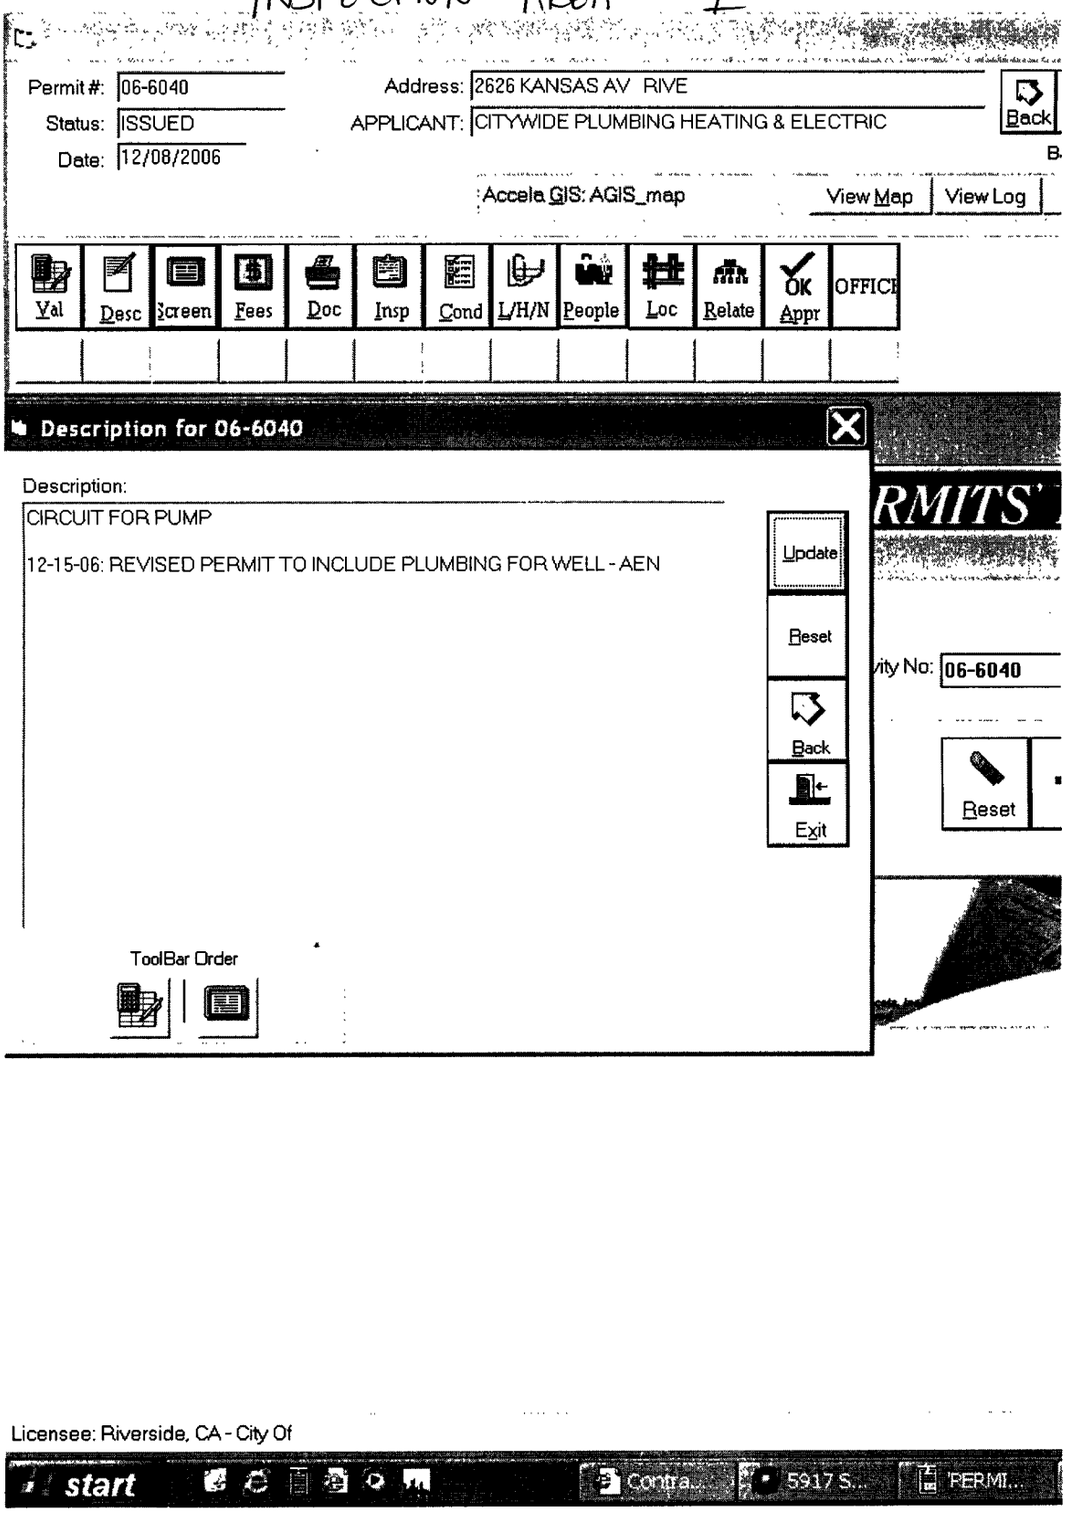
Date 12/8/06 Applicant X Mgr. agent

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work, for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name



Lenders' Address

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier Fremont Comp

Policy Number 1X98765060

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 10/19/99 Applicant: x

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES, AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,00), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lenders' Address _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

REPORT: The facility has two inactive Permits to Operate for two gasoline storage and dispensing facilities (gasoline facilities).

I arrived at the facility address on 06/02/09 at 14:05 hrs to conduct an annual facility compliance inspection.

Laidlaw Transit Inc is no longer at this address.

The facility is now occupied by Student Transportation of America Inc.

I met Alfred Godinez, Shop Supervisor of Student Transportation of America Inc, (951) 509-0838 ext. 106, who explained me that the facility, a repair station for school buses, had been at this address for at least three years.

During the inspection I confirmed that the gasoline facilities had been removed.

I departed the facility address at 14:20 hrs.

Paolo Longoni, 06/02/09

A/N 385629

This initial permit must be renewed ANNUALLY unless the equipment is moved, or changes ownership.
If the billing for annual renewal fee (Rule 301.f) is not received by the expiration date, contact the District.

Legal Owner
or Operator: PENSKE TRUCK LEASING CO., L.P.
P O BOX 7635
READING, PA 19603

ID 127979

Equipment Location: 1989 MASSACHUSETTS AVE, RIVERSIDE, CA 92507

Equipment Description:

Fuel Storage and Dispensing Facility Consisting of:

1) 1 - GASOLINE NOZZLE DISPENSING 1 PRODUCT, EQUIPPED WITH PHASE II VAPOR RECOVERY SYSTEM, BALANCE RETRACTOR (G-70-52-AM).

2) 1 - GASOLINE UNDERGROUND STORAGE TANK, 12,000-GALLON CAPACITY, EQUIPPED WITH PHASE I VAPOR RECOVERY SYSTEM (G-70-97-A), 1 METHANOL COMPATIBLE.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT WAS ISSUED, UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. EXCEPT FOR DIESEL TRANSFERS, PHASE I VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO STORAGE TANKS.

4. EXCEPT FOR DIESEL TRANSFERS, PHASE II VAPOR RECOVERY SYSTEMS SHALL BE IN FULL OPERATION WHENEVER FUEL IS BEING TRANSFERRED INTO MOTOR VEHICLES, AS DEFINED IN RULE 461.

5. ALL PHASE I AND PHASE II VAPOR RECOVERY EQUIPMENT AT THIS FACILITY SHALL BE INSTALLED, OPERATED AND MAINTAINED TO MEET ALL CALIFORNIA AIR RESOURCES BOARD CERTIFICATION REQUIREMENTS.

6. PHASE II VAPOR RECOVERY SYSTEMS SHALL BE INSTALLED, OPERATED, AND MAINTAINED SUCH THAT THE MAXIMUM ALLOWABLE PRESSURE THROUGH THE SYSTEM INCLUDING NOZZLE, VAPOR HOSE, SWIVELS, AND UNDERGROUND PIPING DOES NOT EXCEED THE DYNAMIC BACK PRESSURES DESCRIBED BY THE CALIFORNIA AIR RESOURCES BOARD EXECUTIVE ORDER BY WHICH THE SYSTEM WAS CERTIFIED:

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

NITROGEN FLOWRATES (CFH)	DYNAMIC BACK PRESSURE (INCHES OF WATER)
20	0.15
40	0.16
60	0.35
80	0.62
100	0.95

DYNAMIC BACK PRESSURE TESTS SHALL BE CONDUCTED TO DETERMINE THE PHASE II SYSTEM VAPOR RECOVERY BACK PRESSURES. THE TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.4. RESULTS SHALL BE SUBMITTED TO THE DISTRICT, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN FORTY-EIGHT (48) HOURS OF TESTS.

THE AQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR AT TELEPHONE NUMBER (909) 396-3886 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTORS; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE DYNAMIC BACK PRESSURE TEST.

7. A STATIC PRESSURE LEAK DECAY TEST SHALL BE CONDUCTED TO DEMONSTRATE THAT THE STORAGE TANKS, THE REMOTE AND/OR NOZZLE VAPOR RECOVERY CHECK VALVES, ASSOCIATED VAPOR RETURN PIPING AND FITTINGS ARE FREE FROM VAPOR LEAKS. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.3. RESULTS SHALL BE SUBMITTED TO THE AQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN FORTY-EIGHT (48) HOURS OF TEST.

THE AQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR AT TELEPHONE NUMBER (909) 396-3886 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTORS; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE STATIC PRESSURE LEAK DECAY TEST.

8. IF THE CARB EXECUTIVE ORDER REQUIRES THE INSTALLATION OF A LIQUID REMOVAL DEVICE, A LIQUID REMOVAL RATE TEST SHALL BE CONDUCTED TO DEMONSTRATE THE REMOVAL OF GASOLINE FROM THE VAPOR PASSAGE OF THE COAXIAL HOSE. THE TEST SHALL BE CONDUCTED IN ACCORDANCE WITH CARB TEST PROCEDURE METHOD TP-201.6. RESULTS SHALL BE SUBMITTED TO THE AQMD, OFFICE OF ENGINEERING AND COMPLIANCE, WITHIN FORTY-EIGHT (48) HOURS OF TEST.

THE SCAQMD SHALL BE NOTIFIED BY E-MAIL AT R461TESTING@AQMD.GOV OR AT TELEPHONE NUMBER (909) 396-3886 AT LEAST SEVENTY-TWO (72) HOURS PRIOR TO TESTING. SUCH NOTIFICATION SHALL INCLUDE THE NAME OF THE OWNER OR OPERATOR; THE NAME OF THE CONTRACTORS; THE LOCATION OF THE FACILITY; AND THE SCHEDULED START AND COMPLETION DATES OF THE LIQUID REMOVAL RATE TEST.

9. THE TESTING FREQUENCY FOR THE ABOVE MENTIONED TESTS SHALL BE CONDUCTED IN ACCORDANCE WITH THE MOST RECENT RULE 461 AMENDMENT OR CARB EXECUTIVE ORDER REQUIREMENTS, WHICHEVER IS MORE STRINGENT.

CONTINUATION OF PERMIT TO OPERATE

10. ALL RECORDS AND TEST RESULTS THAT ARE REQUIRED TO BE MAINTAINED BY RULE 461 SHALL BE KEPT ON SITE AND MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

11. THE MAXIMUM QUANTITY OF GASOLINE DISPENSED FROM THE STORAGE TANKS AT THIS FACILITY SHALL NOT EXCEED 3,000 GALLONS IN ANY ONE CALENDAR MONTH NOR 36,000 GALLONS IN ANY ONE CALENDAR YEAR.

12. RECORDS OF MONTHLY AND ANNUAL FUEL DISPENSED SHALL BE PREPARED, SHALL BE RETAINED ON SITE FOR TWO YEARS, AND SHALL BE MADE AVAILABLE TO DISTRICT REPRESENTATIVES UPON REQUEST.

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO OPERATE OR COPY SHALL BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

PERMIT to CONSTRUCT/OPERATE

9150 FLAIR DRIVE, EL MONTE, CALIFORNIA 91731

PERMIT NO. M95236
A/N 186786
PAGE 2

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO CONSTRUCT/OPERATE OR COPY MUST BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

APPROVAL OF THE DEPARTMENT OF PUBLIC WORKS, THE DEPARTMENT OF BUILDING AND SAFETY, THE LOCAL FIRE DEPARTMENT AND/OR THE LOCAL TANK LAW IMPLEMENTING AGENCY IS REQUIRED BEFORE CONSTRUCTION IS STARTED.

THIS PERMIT TO CONSTRUCT/OPERATE IS BASED ON THE PLANS, SPECIFICATIONS, AND DATA SUBMITTED AS IT PERTAINS TO THE RELEASE OF AIR CONTAMINANTS AND CONTROL MEASURES TO REDUCE AIR CONTAMINANTS. NO APPROVAL OR OPINION CONCERNING SAFETY AND OTHER FACTORS IN DESIGN, CONSTRUCTION OR OPERATION OF THE EQUIPMENT IS EXPRESSED OR IMPLIED.

REPORT: New Basis (FID 40806) is a manufacturer of boxes, foundation support systems, handholes, manholes, and vaults made from fiberglass resin and polymer concrete. The facility is located 2626 Kansas Ave., Riverside. I contacted Anthony Ochoa, Hazmat (951-826-1054),), and Marcos Padilla, Project Manager, Regulatory Compliance Services with Montrose Air Quality Services (714-282-8240 x10239; 714-561-2287; MPadilla@montrose-env.com). On 09/11/2020 at 0800 hours I arrived to the site and met with Anthony Ochoa who accompanied me on the inspection. I reviewed records before my inspection.

I reviewed SCAQMD records and obtained the following results:

500-SAM: Submitted 08/29/2019 (Due 08/31)
500-SAM: Submitted 02/28/2020 (Due 02/28)
500-ACC: Submitted 02/28/2020 (Due 03/01)

I received the following records before and observed the following equipment on site:

P/O F65485: Fiber Reinforced PBM1:
0 lbs of material
weekly observations conducted
not in operation

P/O G26468: PCBM1
Max 12/2- 51,131 lbs (Permit limit- 115,000)
Weekly observations conducted

P/O G32155: PCBM2
Not in operation
Weekly observations conducted

P/O G45970: PCBM3
Max: 10/22 95,090 lbs (PL 300,000)
Weekly observations conducted

P/O G44790: Weight Hopper 1 (WH1) and Baghouse
Max: 1/16-95,814 lbs (PL 416,000)

P/O G46026: PCBM4
Not in use: Jan & Feb. Max 4/30 40,579 lbs (230,000 lbs/day)
Weekly observations conducted

P/O G12959: Resin Storage Tank, No. 1 (VT1)
Weekly max: September: 10,053 gal (< 12,614 gal/week)
Weekly observations conducted

P/O G44796: Resin Storage Tank, No. 2 (VT2)
Max: Not in use
Weekly observations conducted

Mr. Eric Hansen
Project Engineer
New Basis
2626 Kansas Avenue
Riverside, CA 92507

SUBJECT: Title V Facility Permit Revision (Facility ID: 040806)

Dear Mr. Hansen:

Please find attached the revised Title Page, Table of Contents, and Section D of your Title V Facility Permit. The revised sections reflect the approval of the permit revision requested in your Application No. 416449. The proposed permit revision was submitted to EPA for 45-day review on November 12, 2003. This permit revision includes the addition of the following equipment:

Equipment	Application No.	Permit No.	Permit Type
Mixing Tank	416447	F65485	PO
Air Pollution Control System	416450	N/A	PC

Please review the attached sections carefully. Insert the attached sections into your Facility Permit and discard the earlier versions. Questions concerning changes to your permit should be directed to Mr. Todd Iwata at (909) 396-2574.

Sincerely,

Fred Lettice
Senior Manager
Coating, Printing & Aerospace Operations

Facility Equipment and Requirements
(Section D)

This section consists of a table listing all permitted equipment at the facility, facility wide requirements, all individual Permits to Construct and Permits to Operate issued to various equipment at the facility, and Rule 219-exempt equipment subject to source-specific requirements. Each permit and Rule 219-exempt equipment will list operating conditions including periodic monitoring requirements, and applicable emission limits and requirements that the equipment is subject to. Also included is the rule origin and authority of each emission limit and permit condition.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMITTED EQUIPMENT LIST

THE FOLLOWING IS A LIST OF ALL PERMITS TO CONSTRUCT AND PERMITS TO OPERATE AT THIS FACILITY:

Application number	Permit to Operate number	Equipment description
113604	M36580	STORAGE TANK PLASTICS & RESINS
141729	M57251	STORAGE TANK FX RF W/CTL POLYESTER
161665	M61625	PLASTICS & RESINS BLENDING
161667	D07464	BAGHOUSE, AMBIENT TEMP (> 500 SQ FT)
327365	F07034	SPRAY BOOTH STYRENATED RESINS
327367	F07035	SPRAY BOOTH STYRENATED RESINS
327368	F07036	PLASTICS & RESINS BLENDING
327370	F07037	SPRAY BOOTH STYRENATED RESINS
327371	F07038	SPRAY BOOTH STYRENATED RESINS
327372	F07039	SPRAY BOOTH STYRENATED RESINS

FACILITY WIDE CONDITION(S)

Condition(s):

1. EXCEPT FOR OPEN ABRASIVE BLASTING OPERATIONS, THE OPERATOR SHALL NOT DISCHARGE INTO THE ATMOSPHERE FROM ANY SINGLE SOURCE OF EMISSIONS WHATSOEVER ANY AIR CONTAMINANT FOR A PERIOD OR PERIODS AGGREGATING MORE THAN THREE MINUTES IN ANY ONE HOUR WHICH IS:

   A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
   B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION.
   [RULE 401]

2. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO THE AB 2588 TOXIC HOT SPOTS PROGRAM.
   [RULE 1402]

3. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5,133 POUNDS IN ANY ONE CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS).
   [RULE 1303(b)(2)-OFFSET]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
   [RULE 109, 1303(b)(2)-OFFSET]

6. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.
   [RULE 109, 1303(b)(2)-OFFSET]

7. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEEDING 5 YEARS.
   [RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAINING MATERIAL FROM THE FACILITY FOR 5 YEARS.
[RULE 109, 1303(b)(2)-OFFSET]

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 5 YEARS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M36580
A/N 113604

Equipment Description and Conditions:

STORAGE TANK, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M57251
A/N 141729

Equipment Description and Conditions:

STORAGE TANK, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M61625
A/N 161665

Equipment Description and Conditions:

RESIN BLENDING SYSTEM CONSISTING OF:

1. BLENDER, GRAYSON, MODEL GS-2000, 200 GALLON CAPACITY, WITH A 5 H.P. MOTOR.

2. BLENDER, GRAYSON, MODEL GS-1500, 200 GALLON CAPACITY, WITH AN AIR-DRIVEN MOTOR.

Periodic Monitoring:

1. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL EITHER:

   A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

   B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

   C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

   D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER. [RULE 3004 (a)(4)]

Emissions And Requirements:

FACILITY PERMIT TO OPERATE
NEW BASIS

2. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. D07464
A/N 161667

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. BAGHOUSE, FABRICMAX, ENVELOPE FILTER TYPE, MODEL NO. F-150-1.5-H55, MECHANICAL SHAKER, WITH 150 SQUARE FEET FILTER AREA.

2. EXHAUST SYSTEM WITH A 1.5 HP EXHAUST FAN VENTING A RESIN-DOUGH MIXER AND LOADING CELL.

Conditions:

1. OPERATION OF THIS EQUIPMENT MUST BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT MUST BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. A MECHANICAL GAUGE MUST BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE MUST BE DISCHARGED INTO INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

FACILITY PERMIT TO OPERATE
NEW BASIS

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

   [RULE 3004 (a)(4)]

Emissions And Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   PM RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07033
A/N 327362

Equipment Description:

SPRAY BOOTH NO. 1, BLEEKER, FLOOR FILTER TYPE, MODEL F-40-10-24, 40'-4" W. X 28'-8" L. X 12'-6" H., WITH ONE HUNDRED THIRTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 5 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT
   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.

Periodic Monitoring:

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE

FACILITY PERMIT TO OPERATE
NEW BASIS

THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL EITHER:

A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

9. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405. SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F24083
A/N 348527

Equipment Description:

MIXER, RESIN DOUGH, CUSTOM MADE, 47.5 IN. DIA. (INTERNAL) X 42 IN. H., WITH A 5 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

4. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 16,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

5. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 4. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

6. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE I WITH AN EFFECTIVE DATE OF SEPTEMBER 8, 1998 OR EARLIER.
[RULE 1401]

7. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE

PERMIT TO CONSTRUCT

A/N 416450
Granted as of
January 8, 2004

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. VOLATILE ORGANIC COMPOUND (VOC) CONTROL SYSTEM, ENVIROCURE LLC, MODEL NO. SSFRP2PG2100, CONSISTING OF:

   A. AIR MAKE-UP SYSTEM, WITH TWO 1,500,000 BTU/HR MAXON NP-LE LOW-NOX NATURAL GAS-FIRED BURNERS AND TWO 15 H.P. BLOWERS VENTING ONE SPRAY BOOTH (PERMANENT TOTAL ENCLOSURE).

   B. TWO HAPTITE ADSORPTION BEDS, EACH 6'-0" W. X 18'-0" L., WITH 5,200 POUNDS OF HAPTITE ADSORBANT MEDIA.

   C. CATALYTIC OXIDIZER, 2'-8" DIA. X 7'-0" H. COMBUSTION CHAMBER, WITH ONE 2,700,000 BTU/HR MAXON LN-3 LOW-NOX NATURAL GAS-FIRED BURNER AND ONE 15 H.P. CATALYST FAN.

2. SPRAY BOOTH, ENVIROCURE, MODEL NO. SSFRP2PG2100, FLOOR TYPE, 50'-5" W. X 55'-0" L. X 10'-0" H., WITH THREE 3'-0" W. X 36'-0" L. FIRST-STAGE EXHAUST FILTERS, FOUR 3'-0" W. X 1'-6" L. SECOND-STAGE EXHAUST FILTERS AND FOUR 3'-0" W. X 1'-6" L. THIRD-STAGE EXHAUST FILTERS AND TWO 15 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
   [RULE 1303(a)(1)-BACT]

FACILITY PERMIT TO OPERATE
NEW BASIS

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS EACH STAGE OF EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 1.0 INCH OF WATER ACROSS EACH SINGLE STAGE OF EXHAUST FILTERS.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE I, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MAY 3, 2002 OR EARLIER.
[RULE 1401]

6. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

7. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE PURSUANT TO EPA METHOD 204.
[RULE 1303(a)(1)-BACT]

8. A TEMPERATURE OF NOT LESS THAN 650 DEGREES FARENHEIT SHALL BE MAINTAINED IN THE CATALYTIC OXIDIZER AT THE INLET OF THE CATALYST BED WITHIN TEN MINUTES OF THE START-UP OF THE CURE/REGENERATION CYCLE.
[RULE 1303(a)(1)-BACT]

9. A PYROMETER WITH RECORDER SHALL BE INSTALLED AND MAINTAINED TO MEASURE AND RECORD THE TEMPERATURE AT THE INLET OF THE CATALYST BED OF THE OXIDIZER.
[RULE 1303(a)(1)-BACT]

10. THE CATALYST MEDIA IN THE CATALYTIC OXIDIZER SHALL BE TESTED FOR ACTIVITY EFFICIENCY ACCORDING TO THE ASTM METHOD ON AN ANNUAL BASIS.
[RULE 1303(a)(1)-BACT]

11. THE CONTROL EQUIPMENT SHALL BE OPERATED AT A MINIMUM REMOVAL EFFICIENCY OF 90% FOR THE CARBON ADSORBER, A MINIMUM DESTRUCTION EFFICIENCY OF 95% FOR THE CATALYTIC OXIDIZER AND A MINIMUM OVERALL CONTROL EFFICIENCY OF 90% FOR THE ENTIRE SYSTEM.
[RULE 1303(a)(1)-BACT]

12. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109 & RULE 1303(b)(2)-OFFSET]

13. IN ADDITION TO THE RECORD KEEPING REQUIREMENT OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). THESE RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

14. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FOR THIS EQUIPMENT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH THE DISTRICT RULES.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

15. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

16. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

17. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR FIVE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

18. VOC EMISSIONS FROM THE USE OF RESIN (NON-ATOMIZED APPLICATION) SHALL BE CALCULATED USING EITHER THE FOLLOWING EMISSION FACTORS OR OTHER EMISSION FACTORS APPROVED IN WRITING BY THE EXECUTIVE OFFICER:

A. FOR STYRENE CONTENTS BETWEEN 33% AND 50%, USE THE FOLLOWING EMISSION FACTORS (AT DIFFERENT STYRENE CONTENTS):

71(AT 33%), 74(AT 34%), 77(AT 35%), 80(AT 36%), 83(AT 37%), 86(AT 38%), 89(AT 39%), 93(AT 40%), 96(AT 41%), 99(AT 42%), 102(AT 43%), 105(AT 44%), 108(AT 45%), 111(AT 46%), 115(AT 47%), 118(AT 48%), 121(AT 49%), 124(AT 50%)

B. FOR STYRENE CONTENTS <33%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = 0.107 x (%STYRENE) x 2000

C. FOR STYRENE CONTENTS >50%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = [(0.157 x % STYRENE) - 0.0165] x 2000

D. THESE FACTORS SHOULD BE USED ONLY FOR MECHANICAL NON-ATOMIZED APPLICATION OF RESINS. MECHANICAL NON-ATOMIZED APPLICATION USES A MECHANICAL FLUID DELIVERY SYSTEM TO APPLY RESIN TO THE GLASS REINFORCEMENT WITHOUT ATOMIZING THE RESIN FLUID STREAM. NON-ATOMIZED APPLICATION EQUIPMENT INCLUDES FLOW COATERS, FLOW CHOPPERS, AND PRESSURE-FED ROLLERS. FLOW COATER GUNS AND FLOW CHOPPER GUNS ARE NOT CONSIDERED TO BE "SPRAY GUNS" DUE TO THE ABSENCE OF ATOMIZATION.

THE ABOVE EMISSION FACTORS ARE IN POUNDS OF VOC EMITTED PER TON OF RESIN PROCESSED. THE ABOVE STYRENE CONTENTS ARE STYRENE MONOMER CONTENTS IN RESIN AS SUPPLIED, PLUS ANY EXTRA STYRENE MONOMER ADDED BY THE MOLDER, BUT BEFORE THE ADDITION OF OTHER ADDITIVES SUCH AS POWDERS, FILLERS, GLASS, ETC.

THE VALUE FOR STYRENE CONTENT IN PERCENT BY WEIGHT (%STYRENE) IN THE FORMULAS IN (B) AND (C) ABOVE SHOULD BE INPUT AS A FRACTION. FOR EXAMPLE, USE THE INPUT VALUE 0.30 FOR A RESIN WITH 30% STYRENE CONTENT BY WEIGHT.

19. THE OPERATOR OF THIS EQUIPMENT SHALL CONDUCT A SOURCE TEST UNDER THE FOLLOWING CONDITIONS:

A. THE TEST SHALL BE CONDUCTED NO LATER THAN 180 DAYS AFTER THE INITIAL START UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

B. THE TEST SHALL DETERMINE THE COLLECTION EFFICIENCY OF THE SPRAY BOOTH, REMOVAL EFFICIENCY OF THE CARBON ADSORBER, DESTRUCTION EFFICIENCY OF THE CATALYTIC OXIDIZER AND OVERALL CONTROL EFFICIENCY OF THE AIR POLLUTION CONTROL SYSTEM FOR NON-METHANE ORGANIC GASES.

C. THE TEST SHALL DETERMINE EMISSIONS TO THE ATMOSPHERE OF NON-METHANE ORGANIC GASES, OXIDES OF NITROGEN, AND CARBON MONOXIDE IN PPM AND POUNDS PER HOUR.

D. THE TEST SHALL DETERMINE IF THE SPRAY BOOTH ENCLOSURE IS A PERMANENT TOTAL ENCLOSURE PURSUANT TO METHOD 204.

E. THE TEST PROTOCOL SHALL BE SUBMITTED TO DISTRICT PERSONNEL FOR APPROVAL NO LATER THAN 60 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE PROTOCOL SHALL INCLUDE THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304 (k), AND A DESCRIPTION OF ALL SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

F. THE DISTRICT ENGINEER IDENTIFIED ON THE PERMIT TO CONSTRUCT SHALL BE NOTIFIED OF THE DATE AND TIME OF AT LEAST 14 DAYS PRIOR TO THE TEST, OR WITHIN A TIME PERIOD AGREED UPON BY THE DISTRICT ENGINEER.

G. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT'S "GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES", PURSUANT TO RULE 217. [RULE 1303(a)(1)-BACT]

Periodic Monitoring:

20. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK. [RULE 3004 (a)(4)]

21. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
    A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
    B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
    C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
    [RULE 3004 (a)(4)]

22. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:
    A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.
    B. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING EPA METHOD 25 OR 25A MEASURED OVER A 60 MINUTE AVERAGING TIME PERIOD.
    C. THE TEST SHALL BE CONDUCTED TO DEMONSTRATE COMPLIANCE WITH THE REQUIREMENTS OF CAPTURE EFFICIENCY, REMOVAL EFFICIENCY, DESTRUCTION EFFICIENCY AND OVERALL CONTROL EFFICIENCY SPECIFIED IN THIS PERMIT.
    [RULE 3004 (a)(4)]

1. Facility Name: NEW BASIS — Facility ID (6-Digit): 40806
2. This Certification is submitted with a (Check one): a. ☐ Title V Application b. ☒ Supplement/Correction to a Title V Application
3. Is Form 500-C2 included with this Certification? a. ☐ Yes b. ☒ No

Section II - Responsible Official Certification Statement

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attached application forms and other materials are true, accurate, and complete.

Read each statement carefully and check each that applies.

1. For Initial & Permit Renewal Application Certifications:

a. ☐ The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1,

i. ☐ except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. ☐ except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. ☐ The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. ☒ The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) APPLICABILITY FORM 400 - CEQA

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 (or 2668).

FACILITY INFORMATION

Facility Name: New Basis **Facility ID** (6-Digit): 040806

Project Description: Resin mix tank

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	☐	☒	**A request for a change of permittee only (without equipment modifications)?**
B.	☒	☐	**Equipment certification or equipment registration?**
C.	☐	☒	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
D.	☐	☒	**Equipment damaged as a result of a disaster during state of emergency?**
E.	☐	☒	**A Title V permit renewal (without equipment modifications)?**
F.	☐	☒	**A Title V administrative permit revision?**
G.	☐	☒	**The conversion of an existing permit into an initial Title V permit?**
H.	☐	☒	**A functionally identical permit unit replacement with no increase in rating or emissions?**
I.	☐	☒	**A change of daily VOC permit limit to a monthly VOC permit limit?**

If **"Yes"** is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	☐	☒	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	☐	☒	**Is this project part of a larger project?**
			Section II – Air Quality
3.	☐	☒	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

4.	☐	☒	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package.

	Yes	No	
5.	☐	☒	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 - Nuisance.
6.	☐	☒	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	☐	☒	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	☐	☒	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	☐	☒	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply)**:**
	☐	☒	**a. the need for more than 350 new employees?**
	☐	☒	**b. an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	☐	☒	**c. increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	☐	☒	**Will the project include equipment with a noise specification GREATER THAN 90 decibels (dB)?**
			Section VI – Public Services
12.			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply)**:**
	☐	☒	**a. Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	☐	☒	**b. Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

REMINDER: For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc:

Section C: Permit Mailing Address

5. Permit and Correspondence Information:
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name:

Contact Title: Phone:

Fax: E-Mail:

Section D: Application Type

The facility is in ○ RECLAIM ○ Title V ○ RECLAIM & Title V Program (please check if applicable)

6. Reason for Submitting Application (Select only ONE):

- ○ New Construction (Permit to Construct)
- ○ Equipment Operating Without A Permit or Expired Permit*
- ○ Administrative Change
- ○ Equipment On-Site But Not Constructed or Operational
- ◉ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit
- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Change of Condition For Permit To Operate
- ○ Change of Condition For Permit To Construct
- ○ Change of Location---Moving to New Site

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. *Estimated Start Date of Operation/Construction* (MM/DD/YYYY): 08/01/2008

8. Description of Equipment:
Modification of Permit to Construct (AN416450) for replacement of Envirocure RTO (Model: SSFRP2PG2100) with ADWEST RTO (Model: RETOX 12.0 RTO-95)

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? ◉ No ○ Yes

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each) 0

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
◉ No ○ Yes If yes, provide NOV/NC #:

Section E: Facility Business Information

13. What type of business is being conducted at this equipment location?
Fiberglass reinforced plastic products manufacturing

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 326199

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? ◉ No ○ Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

17. Signature of Responsible Official:

18. Title:
Project Manager

19. Print Name:
Matt Stockbridge

20. Date: 7/15/08

Section II - Responsible Official Certification Statement

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attached application forms and other materials are true, accurate, and complete.

Read each statement carefully and check each that applies – ***You must check 3a or 3b.***

1. For Initial, Permit Renewal, and Administrative Application Certifications:

a. The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1,

i. except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

3. For MACT Hammer Certifications:

a. (•) The facility is subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63), also known as the MACT "hammer." The following information is submitted with a Title V application to comply with the Part 1 requirements of Section 112(j). (If Part 2 has not been submitted, you must submit 500-MACT Part 2 with this form.)

b. ( ) The facility is not subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63).

Mr. Jim McDowell
Operations Manager
New Basis
2626 Kansas Avenue
Riverside, CA 92507

SUBJECT: Title V Facility Permit Revision (Facility ID: 040806)

Dear Mr. Wolff:

Please find attached the revised Title Page, Table of Contents, and Section D of your Title V Facility Permit. The revised sections reflect the approval of the permit revision requested in your Application No. 485719. The proposed permit revision was submitted to EPA for 45-day review on October 30, 2008. This permit revision includes the modification of the following equipment:

Equipment	Application No.	Permit No.	Permit Type
Air Pollution Control System	485720	N/A	PC

Please review the attached sections carefully. Insert the attached sections into your Facility Permit and discard the earlier versions. Questions concerning changes to your permit should be directed to Mr. Todd Iwata at (909) 396-2574.

Sincerely,

Fred Lettice
Senior Manager
Coating, Printing, Aerospace
& Metal Finishing Operations

FACILITY WIDE CONDITION(S)

Condition(s):

1. EXCEPT FOR OPEN ABRASIVE BLASTING OPERATIONS, THE OPERATOR SHALL NOT DISCHARGE INTO THE ATMOSPHERE FROM ANY SINGLE SOURCE OF EMISSIONS WHATSOEVER ANY AIR CONTAMINANT FOR A PERIOD OR PERIODS AGGREGATING MORE THAN THREE MINUTES IN ANY ONE HOUR WHICH IS:

   A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
   B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION.
   [RULE 401]

2. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO THE AB 2588 TOXIC HOT SPOTS PROGRAM.
   [RULE 1402]

3. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5,133 POUNDS IN ANY ONE CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS).
   [RULE 1303(b)(2)-OFFSET]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
   [RULE 109, 1303(b)(2)-OFFSET]

6. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.
   [RULE 109, 1303(b)(2)-OFFSET]

7. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEEDING 5 YEARS.
   [RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE

1. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 109
   VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
   HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M57251
A/N 141729

Equipment Description and Conditions:

STORAGE TANK, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

Emissions And Requirements:

1. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 109
   VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
   HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81487
A/N 450806

Equipment Description:

CASTING MACHINE NO. 1, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
[RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

FACILITY PERMIT TO OPERATE
NEW BASIS

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER. [RULE 3004 (a)(4)]

Emissions And Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81488
A/N 450807

Equipment Description and Conditions:

CASTING MACHINE NO. 2, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
[RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

FACILITY PERMIT TO OPERATE
NEW BASIS

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. D07464
A/N 161667

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. BAGHOUSE, FABRICMAX, ENVELOPE FILTER TYPE, MODEL NO. F-150-1.5-H55, MECHANICAL SHAKER, WITH 150 SQUARE FEET FILTER AREA.

2. EXHAUST SYSTEM WITH A 1.5 HP EXHAUST FAN VENTING A RESIN-DOUGH MIXER AND LOADING CELL.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

FACILITY PERMIT TO OPERATE
NEW BASIS

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

   [RULE 3004 (a)(4)]

Emissions And Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07033
A/N 327362

Equipment Description:

SPRAY BOOTH NO. 1, BLEEKER, FLOOR FILTER TYPE, MODEL F-40-10-24, 40'-4" W. X 28'-8" L. X 12'-6" H., WITH ONE HUNDRED THIRTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 5 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT
[RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

    VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 109
    PM: RULE 481

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07036
A/N 327368

Equipment Description:

MIXER, RESIN DOUGH, BAKER PERKINS, 14 CU. FT. CAPACITY, WITH A 100 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORD KEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

4. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

5. THIS EQUIPMENT SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

FACILITY PERMIT TO OPERATE
NEW BASIS

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT
   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

    VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 109
    PM: RULE 481
    PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
    HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F24082
A/N 348524

Equipment Description:

MIXER, RESIN DOUGH, CUSTOM MADE, 47.5 IN. DIA. (INTERNAL) X 42 IN. H., WITH A 5 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

4. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 16,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

5. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 4. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

6. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1 WITH AN EFFECTIVE DATE OF SEPTEMBER 8, 1998 OR EARLIER.
[RULE 1401]

7. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE

FACILITY PERMIT TO OPERATE
NEW BASIS

THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

9. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F98572
A/N 484033

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. DUST COLLECTOR, DONALDSON TORIT, MODEL NO. VS-1200, PULSE JET CLEANING, WITH ONE 17" DIA. X 20" L. CARTRIDGE-TYPE FILTER, 135 SQ. FT. TOTAL FILTER AREA, AND ONE 24" X 18" X 12" HEPA FILTER.

2. EXHAUST SYTEM WITH A 3 HP EXHAUST FAN VENTING A POLYSTER RESIN MIXER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. DUST COLLECTED IN THE DUST COLLECTOR SHALL BE DISCHARGED INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

4. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON A QUARTERLY BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE

FACILITY PERMIT TO OPERATE
NEW BASIS

ENTIRE QUARTERLY PERIOD. THE ROUTINE QUARTERLY INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.
[RULE 3004 (a)(4)]

Emissions And Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

A/N 485720
Granted as of
January 1, 2010

Equipment Description:

MODIFICATION OF AN EXISTING AIR POLLUTION CONTROL SYSTEM BY REMOVING THE ENVIROCURE SYSTEM:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. VOLATILE ORGANIC COMPOUND (VOC) CONTROL SYSTEM, ENVIROCURE LLC, MODEL NO. SSFRP2PG2100, CONSISTING OF:

   A. AIR MAKE-UP SYSTEM, WITH TWO 1,500,000 BTU/HR MAXON NP-LE LOW-NOx NATURAL GAS-FIRED BURNERS AND TWO 15 H.P. BLOWERS VENTING ONE SPRAY BOOTH (PERMANENT TOTAL ENCLOSURE).

   B. TWO CATALYTIC ADSORPTION BEDS, EACH 6'-0" W. X 18'-0" L., WITH 5,200 POUNDS OF HAPTITE ADSORBANT MEDIA OR EQUIVALENT.

   C. CATALYTIC OXIDIZER, 2'-8" DIA. X 7'-0" H. COMBUSTION CHAMBER, WITH ONE 2,700,000 BTU/HR MAXON In-3 LOW-NOx NATURAL GAS-FIRED BURNER AND ONE 15 H.P. CATALYST FAN.

AND REPLACING IT WITH A REGENERATIVE THERMAL OXIZIDER:

1. REGENERATIVE THERMAL OXIDIZER, ADWEST, MODEL NO. RETOX 12.0RTO95, 9'-2" W. X 24'-0" L. X 10'-6" H., 12,000 SCFM CAPACITY, WITH ONE 3,434,000 NATURAL GAS-FIRED MAXON KINEMAX 4G BURNER, ONE 7.5 HP COMBUSTION AIR BLOWER AND TWO CERAMIC BEDS, EACH WITH 13,200 LBS OF CERAMIC MEDIA.

2. SPRAY BOOTH, ENVIROCURE, MODEL NO. SSFRP2PG2100, FLOOR TYPE, 50'-5" W. X 55'-0" L. X 10'-0" H., WITH THREE 3'-0" W. X 36'-0" L. FIRST-STAGE EXHAUST FILTERS, FOUR 3'-0" W. X 1'-6" L. SECOND-STAGE EXHAUST FILTERS AND FOUR 3'-0" W. X 1'-6" L. THIRD-STAGE EXHAUST FILTERS AND TWO 15 HP EXHAUST FANS.

3. EXHAUST SYSTEM WITH ONE PERMANENT TOTAL ENCLOSURE AND ONE 50 HP EXHAUST BLOWER VENTING ONE SPRAY BOOTH.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

FACILITY PERMIT TO OPERATE
NEW BASIS

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH A THREE STAGE EXHAUST FILTERS AS SPECIFIED IN THE EQUIPMENT DESCRIPTION.
[RULE 1303(a)(1)-BACT]

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS EACH STAGE OF EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 1.0 INCH OF WATER ACROSS EACH SINGLE STAGE OF EXHAUST FILTERS.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 7, 2008 OR EARLIER.
[RULE 1401]

6. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

7. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE. THE PERMANENT TOTAL ENCLOSURE SHALL MEET ALL THE CRITERIA SPECIFIED IN US EPA METHOD 204 DURING OPERATION OF THIS EQUIPMENT.
[RULE 1303(a)(1)-BACT]

8. THE OPERATOR SHALL OPERATE AND MAINTAIN THE REGENERATIVE THERMAL OXIDIZER ACCORDING TO THE FOLLOWING REQUIREMENTS:

THE COMBUSTION CHAMBER TEMPERATURE SHALL BE MAINTAINED AT A MINIMUM OF 1,500 DEGREES FAHRENHEIT WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

THE OPERATOR SHALL OPERATE AND MAINTAIN A TEMPERATURE MEASURING AND RECORDING SYSTEM TO CONTINUOUSLY MEASURE AND RECORD THE COMBUSTION CHAMBER TEMPERATURE PURSUANT TO THE OPERATION AND MAINTENANCE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.7. SUCH A SYSTEM SHALL HAVE AN ACCURACY OF WITHIN 1% OF THE TEMPERATURE BEING MONITORED AND SHALL BE INSPECTED, MAINTAINED, AND CALIBRATED ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS. THE TEMPERATURE INDICATING AND RECORDING SYSTEM SHALL BE IN OPERATION WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

FOR THE PURPOSE OF THIS CONDITION, A DEVIATION SHALL BE DEFINED AS WHEN A COMBUSTION CHAMBER TEMPERATURE OF LESS THAN 1,500 DEGREES FAHRENHEIT OCCURS DURING NORMAL OPERATION OF THE EQUIPMENT IT SERVES. THE OPERATOR SHALL REVIEW THE RECORDS OF THE COMBUSTION CHAMBER TEMPERATURE ON A DAILY BASIS TO DETERMINE IF A DEVIATION OCCURS OR SHALL INSTALL AN ALARM SYSTEM TO ALERT THE OPERATOR WHEN A DEVIATION OCCURS.

FACILITY PERMIT TO OPERATE
NEW BASIS

WHENEVER A DEVIATION OCCURS, THE OPERATOR SHALL INSPECT THIS EQUIPMENT TO IDENTIFY THE CAUSE OF SUCH A DEVIATION, TAKE IMMEDIATE CORRECTIVE ACTION TO MAINTAIN THE COMBUSTION CHAMBER TEMPERATURE AT OR ABOVE 1,500 DEGREES FAHRENHEIT, AND KEEP RECORDS OF THE DURATION AND CAUSE (INCLUDING UNKNOWN CAUSE, IF APPLICABLE) OF THE DEVIATION AND THE CORRECTIVE ACTION TAKEN.

ALL DEVIATIONS SHALL BE REPORTED TO THE AQMD PURSUANT TO THE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.9 AND CONDITION NOS. 22 AND 23 IN SECTION K OF THIS PERMIT. THE REPORT SHALL INCLUDE THE TOTAL OPERATING TIME OF THIS EQUIPMENT AND THE TOTAL ACCUMULATED DURATION OF ALL DEVIATIONS FOR EACH SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL SUBMIT AN APPLICATION WITH A QUALITY IMPROVEMENT PLAN (QIP) IN ACCORDANCE WITH 40 CFR PART 64.8 TO THE AQMD IF AN ACCUMULATION OF DEVIATIONS EXCEEDS 5 PERCENT DURATION OF THIS EQUIPMENT'S TOTAL OPERATING TIME FOR ANY SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT. THE REQUIRED QIP SHALL BE SUBMITTED TO THE AQMD WITHIN 90 CALENDAR DAYS AFTER THE DUE DATE FOR THE SEMI-ANNUAL MONITORING REPORT.

THE OPERATOR SHALL INSPECT AND MAINTAIN ALL COMPONENTS OF THIS EQUIPMENT ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS.

THE OPERATOR SHALL KEEP ADEQUATE RECORDS IN A FORMAT THAT IS ACCEPTABLE TO THE AQMD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE REQUIREMENTS SPECIFIED IN THIS CONDITION AND 40 CFR PART 64.9 FOR A MINIMUM OF FIVE YEARS.
[RULE 1303(a)(1)-BACT, 1303(b)(2)-OFFSET, 40CFR Part 64]

9. ALL ACCESS DOORS TO THE PERMANENT TOTAL ENCLOSURES SHALL BE KEPT CLOSED DURING NORMAL OPERATIONS.
[RULE 1303(a)(1)-BACT]

10. THIS EQUIPMENT SHALL BE MAINTAINED AND OPERATED AT A MINIMUM DESTRUCTION EFFICIENCY OF 95% AND AN OVERALL VOC CONTROL EFFICIENCY (COLLECTION AND DESTRUCTION) OF 95% WHEN THE BASIC EQUIPMENT IT SERVES IS IN OPERATION
[RULE 1303(a)(1)-BACT]

11. THE START-UP BURNER SHALL NOT USE MORE THAN 9,000 CUBIC FEET OF NATURAL GAS IN ANY ONE DAY.
[RULE 1303(a)(1)-BACT]

12. A NON-RESETTABLE TOTALIZING FUEL METER SHALL BE INSTALLED AND MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 11.
[RULE 1303(a)(1)-BACT]

13. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

14. IN ADDITION TO THE RECORD KEEPING REQUIREMENT OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). THESE RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.
[RULE 109, 1303(b)(2)-OFFSET]

15. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FOR THIS EQUIPMENT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH THE DISTRICT RULES.
[RULE 109, 1303(b)(2)-OFFSET]

16. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR FIVE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

17. VOC EMISSIONS FROM THE USE OF RESIN (NON-ATOMIZED APPLICATION) SHALL BE CALCULATED USING EITHER THE FOLLOWING EMISSION FACTORS OR OTHER EMISSION FACTORS APPROVED IN WRITING BY THE EXECUTIVE OFFICER:

A. FOR STYRENE CONTENTS BETWEEN 33% AND 50%, USE THE FOLLOWING EMISSION FACTORS (AT DIFFERENT STYRENE CONTENTS):

71(AT 33%), 74(AT 34%), 77(AT 35%), 80(AT 36%), 83(AT 37%), 86(AT 38%), 89(AT 39%), 93(AT 40%), 96(AT 41%), 99(AT 42%), 102(AT 43%), 105(AT 44%), 108(AT 45%), 111(AT 46%), 115(AT 47%), 118(AT 48%), 121(AT 49%), 124(AT 50%)

B. FOR STYRENE CONTENTS <33%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = 0.107 x (%STYRENE) x 2000

C. FOR STYRENE CONTENTS >50%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = [(0.157 x % STYRENE) - 0.0165] x 2000

D. THESE FACTORS SHOULD BE USED ONLY FOR MECHANICAL NON-ATOMIZED APPLICATION OF RESINS. MECHANICAL NON-ATOMIZED APPLICATION USES A MECHANICAL FLUID DELIVERY SYSTEM TO APPLY RESIN TO THE GLASS REINFORCEMENT WITHOUT ATOMIZING THE RESIN FLUID STREAM. NON-ATOMIZED APPLICATION EQUIPMENT INCLUDES FLOW COATERS, FLOW CHOPPERS, AND PRESSURE-FED ROLLERS. FLOW COATER GUNS AND FLOW CHOPPER GUNS ARE NOT CONSIDERED TO BE "SPRAY GUNS" DUE TO THE ABSENCE OF ATOMIZATION.

THE ABOVE EMISSION FACTORS ARE IN POUNDS OF VOC EMITTED PER TON OF RESIN PROCESSED. THE ABOVE STYRENE CONTENTS ARE STYRENE MONOMER CONTENTS IN RESIN AS SUPPLIED, PLUS ANY EXTRA STYRENE MONOMER ADDED BY THE MOLDER, BUT BEFORE THE ADDITION OF OTHER ADDITIVES SUCH AS POWDERS, FILLERS, GLASS, ETC.

THE VALUE FOR STYRENE CONTENT IN PERCENT BY WEIGHT (%STYRENE) IN THE FORMULAS IN (B) AND (C) ABOVE SHOULD BE INPUT AS A FRACTION. FOR EXAMPLE, USE THE INPUT VALUE 0.30 FOR A RESIN WITH 30% STYRENE CONTENT BY WEIGHT.

18. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL CONDUCT SOURCE TESTS UNDER THE FOLLOWING CONDITIONS TO DEMONSTRATE COMPLIANCE WITH THE PERMIT CONDITIONS:

A. THE SOURCE TESTS SHALL BE CONDUCTED NO LATER THAN 180 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

B. A SOURCE TEST PROTOCOL SHALL BE SUBMITTED TO THE DISTRICT NO LATER THAN 60 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE TEST PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE TEST PROTOCOL SHALL INCLUDE THE COMPLETED DISTRICT FORMS ST-1 AND ST-2 SPECIFYING THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304(k), AND A DESCRIPTION OF THE SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

FACILITY PERMIT TO OPERATE
NEW BASIS

C. THE SOURCE TESTS SHALL CONSIST OF, BUT MAY NOT BE LIMITED TO, TESTING AT THE INLET AND THE EXHAUST OF THE OXIDIZER FOR:

(1) NOX IN PPMV AND LBS/HR (EXAHUST ONLY)
(2) NOX PPMV AND LBS/HR FROM THE START-UP BURNER DURING START UP (EXHAUST ONLY)
(3) CO IN PPMV, AND LBS/HR (EXHAUST ONLY)
(4) VOLATILE ORGANIC COMPOUND (VOC) IN PPMV AND LBS/HR
(5) VOC DESTRUCTION EFFICIENCY
(6) VOC COLLECTION EFFICIENCY
(7) USAGE OF ALL VOC-CONTAINING MATERIALS DURING THE TEST
(8) OXYGEN CONTENT
(9) MOISTURE CONTENT
(10) FLOW RATE
(11) TEMPERATURE
(12) NATURAL GAS USAGE DURING START-UP

D. THE TEST SHALL DETERMINE IF THE SPRAY BOOTH ENCLOSURE IS A PERMANENT TOTAL ENCLOSURE PURSUANT TO METHOD 204.

E. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE MAY BE INCREASED AT THE TIME A PERMIT TO OPERATE IS ISSUED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.

F. A WRITTEN NOTICE OF THE SOURCE TESTS SHALL BE SUBMITTED TO THE AT LEAST 14 DAYS PRIOR TO THE SOURCE TESTING DATE SO THAT AN OBSERVER FROM THE DISTRICT MAY BE PRESENT.

G. TWO COMPLETE COPIES OF THE SOURCE TEST REPORTS SHALL BE SUBMITTED TO THE DISTRICT WITHIN 45 DAYS AFTER THE SOURCE TESTING DATE UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE SOURCE TEST REPORT SHALL INCLUDE, BUT MAY NOT BE LIMITED TO, ALL TESTING DATA REQUIRED BY THIS CONDITION.

H. A TESTING LABORATORY CERTIFIED BY THE CALIFORNIA AIR RESOURCES BOARD IN THE REQUIRED TEST METHODS FOR CRITERIA POLLUTANTS TO BE MEASURED, AND IN COMPLIANCE WITH DISTRICT RULE 304 (NO CONFLICT OF INTEREST) SHALL CONDUCT THE TEST.

I. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES, PURSUANT TO RULE 217. [RULE 1303(a)(1)-BACT]

FACILITY PERMIT TO OPERATE
NEW BASIS

19. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL SUBMIT THE RESULTS OF ALL PRELIMINARY TESTS THAT ARE CONDUCTED ON THIS EQUIPMENT FOR INFORMATIONAL PURPOSES TO THE WITHIN 45 DAYS AFTER THE TESTING DATE UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

20. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK.
[RULE 3004 (a)(4)]

21. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

22. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:
   A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.
   B. THE TEST SHALL BE CONDUCTED NO LATER THAN MARCH 26, 2010 UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.
   C. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING AN APPROVED DISTRICT METHOD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE PERMIT CONDITION(S), RULES AND REGULATIONS.
   D. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT MAY BE INCREASED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.
   E. THE OPERATOR SHALL COMPLY WITH ADMINISTRATIVE CONDITIONS NOs. 8, 9, AND 10 OF SECTION E OF THIS FACILITY PERMIT.
   F. THE OPERATOR SHALL SUBMIT TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SPECIFIED IN CONDITION NO. 9 OF SECTION E OF THIS FACILITY PERMIT TO THE DISTRICT ENGINEERING AND COMPLIANCE DIVISION. THE ENGINEERING COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, COATING, PRINTING AND AEROSPACE OPERATIONS, ATTN: AIR QAULITY AND COMPLIANCE SUPERVISOR, 21865 COPLEY DRIVE, DIAMOND BAR, CA 91765. THE COMPLIANCE COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, P.O. BOX 4941, DIAMOND BAR, CA 91765

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: The facility, a manufacturer of boxes, foundation support systems, handholes, manholes, and vaults made from fiberglass resin and polymer concrete, has a Title V Permit that includes the following active equipment:
Five polyester resin storage tanks (two horizontal, HT1 and HT2, and three vertical, VT1, VT2 and VT3);
A calcium carbonate / polyester resin mixing tank (FRPBM1);
Two casting machines (Autocasters 1 and 2);
Four polymer concrete batch mixers (PCBM 1, PCBM 2, PCBM 3, and PCBM 4). PCBM 1 is vented to a dust collector (P/O F98572);
A tooling spray booth;
Three calcium carbonate storage silos (S1, S3; and 3);
A sand storage silo (S2);
Three calcium carbonate / sand storage silos (1, 2, 4, and 5). Silos 1, 2, and 4 are vented to a baghouse (P/O G17311);
A regenerative thermal oxidizer;
A weigh hopper;
A spray booth (SB1).

On 05/15/19, I verified that:
The current Title V permit was issued on 03/31/17 and has an expiration date of 03/30/22 and a renewal window between 10/01/20 and 10/01/22;
All the permits for the equipment listed above are currently active.

I arrived at the facility on 05/15/19 at 09:00 hrs to conduct the annual Title V facility compliance inspection.

I met Anthony Ochoa, Hazmat (951-826-1054), Justin Hendricks, Facility & Maintenance Manager (951-288-4724; jhendricks@newbasis.com), and Marcos Padilla, Project Manager, Regulatory Compliance Services with Montrose Air Quality Services (714-282-8240 x10239; 714-561-2287; MPadilla@montrose-env.com), who all accompanied me on the facility inspection.

I inspected the facility with the following results:

Title V Compliance Reports

Class database showed that the compliance reports were submitted on time:
Form 500-SAM 1st semester (2018 calendar year): 08/31/18;
Form 500-SAM 2nd semester (2018 calendar year): 02/12/19;
Form 500-ACC (2018 calendar year): 02/12/19.

Equipment List

The following equipment was not operational:
Polyester resin storage tanks VT2 and VT3 [P/Os G44796 and G44848];
A calcium carbonate / polyester resin mixing tank (FRPBM1) [P/O F65485];
Casting machine (Autocaster 2) [P/O F81488];
Polymer concrete batch mixer (PCBM 2) [P/O G32155];
Tooling spray booth (formerly permitted for spraying gelcoat) [P/O G15919];
Calcium carbonate / sand storage silo 5 (formerly permitted for storing glass bubbles) [P/O G32155];
Spray booth (SB1) [P/O G48719], which has not been installed yet

The following equipment was operational:

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

Boxes Manufacturing Process (West Building)

Calcium carbonate and polyester resin are processed in the casting machine (Autocaster1) [P/O F81487]. Calcium carbonate is fed in the casting machine through the storage silo 3 [P/O G32156]. Polyester resin is fed in the casting machine through the polyester resin storage tanks HT1, HT2, and VT1 [P/O M36580, M57251, and G12959]. Calcium carbonate / polyester resin are transferred in the mixing tank, or "spray tank". Calcium carbonate / polyester resin are pumped in the spray gun, where the polyester resin is activated with a catalyst, and sprayed on boxes molds. The spray operations are conducted in a spray booth [P/O G45969], which is vented to the regenerative thermal oxidizer [P/O G45969]. Acetone is used for gun cleaning operations.

During the inspection, I also observed two exempt booths, a grinding and a trim, and an exempt hydro jet trim machine.

Casting Machine (Autocaster 1) [P/O F81487]
[The equipment was operating during the inspection]

Calcium Carbonate Storage Silo S3 [P/O G32156]
[The equipment was operating during the inspection]
The storage silo is vented to a bin vent (S3), with thirty six bag filters; the mechanical gauge was installed and read 0.15 inch of water column as static pressure differential across the bags;
The dust collected in the bin vent was discharged into a closed container;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Polyester Resin Storage Tanks HT1 and HT2 [P/O M36580 and M57251]
[The equipment was operating during the inspection]

Polyester Resin Storage Tank VT1 [P/O G12959]
[The equipment was operating during the inspection]
Records of the weekly total throughput of polyester resin will be requested [P/O weekly limit of 12,614 gallons].

Regenerative Thermal Oxidizer [P/O G45969]
[The equipment was operating during the inspection]
The oxidizer vents a spray booth that shall be operated as permanent total enclosure (US EPA Method 204). During the inspection, I observed four openings, approximately 3' L x 2' W; results of four "rotating molds" equipment, which were dismantled few years ago. Three of the openings were covered with cardboards; one of the openings was not covered. On 05/17/19, I discussed the openings with Supervising Air Quality Engineer Todd Iwata (909-396-2574) who explained to me that the facility had passed the last source test conducted on the spray booth for collection and removal efficiency [04/16/15 by Delta Air Quality Services, Inc. (Formerly PES): removal efficiency TNMNEHC = 97.6% (P/O limit = 85.5%)] and could seal the openings if no longer needed. On 06/07/19, I discussed and agreed with Mr. Ochoa that the openings would be sealed and verified during next year inspection;
The specifications for the exhaust filters serving PCBM 1 and PCBM2 will be requested [P/O minimum efficiency of 98%];

The oxidizer is equipped with two stages of exhaust filters; the mechanical gauge was installed and read 0.01 inch of water column as static pressure differential across the two stages of exhaust filters [P/O limit of 1.25 inch of water column];

The oxidizer is also equipped with exhaust filters inside the exhaust filter box; the mechanical gauge was installed, but not safely accessible [P/O limit of 0.5 inch of water column];
Records of the monthly total quantity of VOC emissions will be requested [P/O monthly limit of 900 pounds];

The temperature measuring system for the combustion chamber read 1,662 deg F [P/O minimum limit of 1,400 deg F]; records of the combustion chamber temperature and the annual inspection, maintenance, and calibration of temperature measuring system will be requested;
The non-resettable totalizing fuel meter for the start-up burner read 15,380 ccf; records of the daily natural gas usage will be requested [P/O daily limit of 9,000 cf];
The dust collected in the baghouse and dust collector was discharged into a closed container;
Records of the weekly pressure drop across all filters will be requested;
Results of the last source test (no later than 03/31/21) will be requested;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

]P/O G45969 list in the equipment description items 5 (a baghouse) and 6 (a dust collector). The dust collector also has its own permit, P/O F98572. On 05/17/19, Supervising Air Quality Engineer Iwata responded to my question "... is it enough (for the baghouse) to be listed on the thermal oxidizer permit to be permitted or it also need its own permit? ..." that "... Yes, since it is already listed on the RTO permit ..."]

Lids Manufacturing Process (West Building)

Calcium carbonate, gravel, pigment, polyester resin, and sand are processed in the concrete batch mixer (PCBM 1) [P/O G26468]. Polyester resin is fed in the mixer through the polyester resin storage tanks HT1, HT2, and VT1 [P/O M36580, M57251, and G12959]. Materials mixed are poured in lids molds.

Concrete Batch Mixer (PCBM 1) [P/O G26468]
[The equipment was not operating during the inspection]
The mixer and conveyor tubes connected to the mixer were covered with heavy-duty plastic wrap;
Records of the daily total quantity of materials mixed will be requested [P/O daily limit of 115,000 pounds].

Dust Collector [P/O F98572]
[The equipment was operating during the inspection]
The dust collected in the dust collector was discharged into a closed container;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Tank Farm (Between East and West Buildings)

Calcium Carbonate Storage Silo S1 [P/O G32153]
[The equipment was not operating during the inspection]
The storage silo is vented to a bin vent (S1), with eighteen bag filters; the mechanical gauge was installed;
The dust collected in the bin vent was discharged into a closed container;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Calcium Carbonate Storage Silo 3 [P/O G44791]
[The equipment was not operating during the inspection]
The storage silo is vented to a bin vent, with seven cartridge filters;
The dust collected in the bin vent was discharged into a closed container;
Records of the monthly total quantity of materials charged will be requested [P/O monthly limit of 4,900,000 pounds];
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Sand Storage Silo S2 [P/O G32157]
[The equipment was not operating during the inspection]
The storage silo is vented to a bin vent (S2), with thirty six bag filters; the mechanical gauge was installed;
The dust collected in the bin vent was discharged into a closed container;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Calcium Carbonate / Sand Storage Silo 1 [P/O G44793]
[The equipment was not operating during the inspection]
The storage silo is vented to a baghouse [P/O G17311], with four cartridge filters;
The dust collected in the bin vent was discharged into a closed container;
Records of the monthly total quantity of materials charged will be requested [P/O monthly limit of 2,860,000 pounds];
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Calcium Carbonate / Sand Storage Silo 4 [P/O G44795]
[The equipment was not operating during the inspection]
The storage silo is vented to a baghouse [P/O G17311], with four cartridge filters;
The dust collected in the bin vent was discharged into a closed container;
Records of the monthly total quantity of materials charged will be requested [P/O monthly limit of 2,860,000 pounds];
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

]P/O G17311 list in the equipment description a total filter area of 1.06 sq. On 05/17/19, Supervising Air Quality Engineer Iwata stated that "... For G17311, total filter area should've been expressed as 1,061 sq. ft., as noted on Form 400-E-1a. Our oversight ..."]

Baghouse [P/O G44795]
[The equipment was not operating during the inspection]
The mechanical gauge was installed;
The dust collected in the baghouse was discharged into a closed container;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

Lids Manufacturing Process (East Building)

Calcium carbonate, gravel, pigment, polyester resin, and sand are processed in the concrete batch mixers (PCBM 3 and 4) [P/O G45970 and G46026]. Calcium carbonate and sand are fed from multiple tanks (tank farm) initially in the weigh hopper [P/O G44790] and finally in the mixers. Polyester resin is fed in the mixers through the polyester resin storage tanks HT1, HT2, and VT1 [P/O M36580, M57251, and G12959]. Materials mixed are poured in lids molds.

Weigh Hopper [P/O G44790]
[The equipment was not operating during the inspection]
The hopper is vented to a bin vent (Con-E-Co), with fourteen bag filters;
The dust collected in the bin vent was discharged into a closed container;
Records of the daily total quantity of materials charged will be requested [P/O daily limit of 416,000 pounds];
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions will be requested.

]P/O G44790 list in the equipment description a total filter area of 23 sq. On 05/17/19, Supervising Air Quality Engineer Iwata stated that "... For G44790, total filter area is 23 sq. ft., expressed correctly on the permit ..."]

Concrete Batch Mixer (PCBM 3) [P/O G45970]
[The equipment was not operating during the inspection]
Records of the daily total quantity of materials mixed will be requested [P/O daily limit of 300,000 pounds].

Concrete Batch Mixer (PCBM 4) [P/O G46026]
[The equipment was not operating during the inspection]

Records of the daily total quantity of materials mixed will be requested [P/O daily limit of 230,000 pounds].

I departed the facility at 11:00 hrs.

On 05/16/19, I emailed to Mr. Hendricks and Padilla the following records request:
"During the inspection there was some confusion about a gauge monitoring the pressure differential across the exhaust filters of a spray booth. It appears that there are two permitted spray booths:
One vented to the thermal oxidizer (P/O G45969);
One not vented to the thermal oxidizer (P/O G48719).

The one vented to the thermal oxidizer shall have one gauge monitoring the first (42 20" x 20" x 2" exhaust filters) and second (42 20" x 20" x 12" exhaust filters) stage of the exhaust filters (which we were able to verify) and one gauge monitoring the filter box (which we were not able to verify since installed on top of the spray booth).
The one not vented to the thermal oxidizer shall have one gauge monitoring the 24 20" x 20" x 2" exhaust filters."

Please provide the following records from March 2018 through today by 05/31/19:
SDS for the catalyst and polyester resin.
Facility-wide monthly total amounts of VOC emissions

Calcium Carbonate Storage Silo S3 [P/O G32156]
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Polyester Resin Storage Tank VT1 [P/O G12959]
Records of the weekly total throughput of polyester resin.

Regenerative Thermal Oxidizer [P/O G45969]
Records of the monthly total quantity of VOC emissions;
Records of the combustion chamber temperature and the annual inspection, maintenance, and calibration of temperature measuring system;
Records of the daily natural gas usage;
Records of the weekly pressure drop across all filters;
Results of the last source test (no later than 03/31/21);
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Concrete Batch Mixer (PCBM 1) [P/O G26468]
Records of the daily total quantity of materials mixed.

Dust Collector [P/O F98572]
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Calcium Carbonate Storage Silo S1 [P/O G32153]
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Calcium Carbonate Storage Silo 3 [P/O G44791]
Records of the monthly total quantity of materials charged;
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Sand Storage Silo S2 [P/O G32157]
Records of the annual inspection of the equipment and filter media and Rule 1155 weekly visible emissions.

Paolo Longoni, 05/17/19
□On 05/31/19 and 06/01/19, I received four emails from Mr. Padilla containing the following:

SDS for the catalyst and polyester resin.
Catalyst (Cadox D-50): manufactured by Akzo Nobel Functional Chemicals B.V.; composition: Methyl ethyl ketone peroxide; Reaction mass of butane-2,2-diyl dihydroperoxide and di-sec-butylhexaoxidane (cas no. 1338-23-4) = >= 30 - < 35 by weight; Hydrogen peroxide solution (cas no. 7722-84-1) = >= 1 - < 5 by weight; Methyl ethyl ketone (cas no. 78-93-3) = >= 1 - < 5 by weight; vapor pressure = not determined;
Styrene (cas no. 100-42-5) = 42% by weight; vapor pressure = 5.0 mm Hg @ 68 deg F / 20 deg C (Styrene);
Polyester Resin Solution (A839-NPB-23): manufactured by AOC Llc; composition: Styrene (cas no. 100-42-5) = 42% by weight; vapor pressure = 5.0 mm Hg @ 68 deg F / 20 deg C (Styrene).

Facility-wide monthly total amounts of VOC emissions
Provided amounts from March 2018 through April 2019 (P/O monthly limit = 5,073 pounds): maximum amount = 1,698 pounds (August 2018).

Calcium Carbonate Storage Silo S3 [P/O G32156]
Provided records of the weekly inspection from March 2018 through April 2019 of the equipment and filter media and Rule 1155 weekly visible emissions.

Polyester Resin Storage Tank VT1 [P/O G12959]
Provided records of the weekly total throughput of polyester resin from March 2018 through April 2019 (P/O weekly limit = 12,614 gallons): maximum amount = 9,955 gallons (4th week of March 2019).

Regenerative Thermal Oxidizer [P/O G45969]
Provided records of the monthly total quantity of VOC emissions from March 2018 through April 2019 (P/O monthly limit = 900 pounds): maximum amount = 534 pounds (August 2018).
Provided continuous records of the combustion chamber temperature from March 2018 through April 2019 (P/O minimum limit = 1,400 deg F): in compliance.

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: On 03/13/18 at 855hrs Inspector Stephen Boggs and I arrived at FID 40806 New Basis to conduct the annual Title V compliance inspection. New Basis is a Title V facility that manufactures fiberglass reinforced concrete boxes that are used to protect cables and wires that are stored underground. We met with Production Manager Joe Durkee and Environmental Consultant Kervin Wang with AEC. We met in Mr. Durkees' office where we discussed some changes that were in the process of being made at the facility. The facility has two main buildings, building 1 and building 2. Both buildings house manufacturing processes but the majority of the grinding and sanding is done in Building 1. The facility is going to install water jets used for grinding and sanding in order to reduce dust emissions. They are also streamlining the majority of the process in order to make the process more efficient by installing some equipment which will aid the workers. None of the equipment they are installing or modifying is permitted or requires a permit. I discussed that any changes to permitted equipment or installation of new equipment which requires a permit needs to be applied for prior to installation or modification.

Prior to inspection I checked SCAQMD records and found the following:
-500-SAM(1) covering from 01/01/17-06/30/17: received 8/23/17
-500-SAM(2) covering from 07/01/17-12/31/17: received 2/27/18
-500-ACC covering from 01/01/17-12/31/17: received 2/27/18

Escorted by Floor Manager Miguel and Mr. Wang we then conducted our physical inspection of the facility. I observed the following equipment:

Polymer Concrete Batch Mixers (PCBM):
PCBM 1 (AN 514879, PO G26468); PCBM2 (AN 556160, PO G32155); PCBM3 (AN 554836); PCBM4 (AN 554837)
-PCBM2 and PCBM4 are non-operational and are not in use.
-PCBM1 and PCBM3 are used regularly, both operating during the inspection.
-PCBM1 mixer and conveyer tubes are covered in plastic per condition 3 on PO. PCBM1 is vented to Wam baghouse (under AN 554835)
-PCBM3 and PCBM4 are vented to Donaldson Torrit dust collector (under AN 554835)
-All PCBMs vent to the RTO (AN 554835)
-All PCBMs matched their permit descriptions

Fiber-Reinforced Plastic Batch Mixer (FRPBM):
FRPBM1 (AN 416447, PO F65485)
-this equipment is non-operational

Casting Machines:
AC1 (AN 450806, PO F81487); AC2 (AN 450807, PO F81488)
-AC1 is disconnected and non-operational
-AC2 was operating during my inspection. I did not observe any visible emissions while it was in use.
-Both AC1 and AC2 matched their permit description

Spray Booth:
SB1 (AN 526762, PO G15919) Sprayline Booth (AN 554835) New Spray Booth (AN 577112)
-SB1 is located in building 2 and is used intermittently. Has 24 filters. Not in operation during my inspection. A trash bin was inside of the booth holding cut pieces of cement boxes and other solid waste
-Spryayline Booth was operating during my inspection. Gauge installed and read 0.05in. Booth is enclosed with plastic flaps over the front and all doors closed while operating. Spray booth is vented to Adwest RTO. RTO operating at same time the booth was operating.
-New spray booth is located within the trim room as a separate area, totally enclosed, and has 10 filters. Miguel informed me that the booth has not been operated due to the logistics of getting in and out of the spray boot. Will be making a new entrance for the booth with the remodel of the building or will inactivate and remove altogether.
-Permit descriptions matched equipment for both Spray Booths

Regenerative Thermal Oxidizer (RTO):
RTO (AN 554835)
-Operating during my inspection (noise coming from RTO, heat coming off unit, in "on" position)

Inspection Date: 03/13/2018
Disposition: Notice To Comply

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

-Temperature reading for RTO Bed #1 was 1542F and Bed #2 was 1601F (Condition no. 13 A. states must be above 1400 F during operation)
-Vents Sprayline Spray Booth, PCBM1, PCBM2, PCBM3, and PCBM4.
-Wam baghouse and Donaldson Torrit dust collector are also part of the same permit
-Source test is required by March 31, 2021

Weigh Hopper:
Weigh hopper with bin vent (AN 554839)
-Not operating during my inspection.
-Only processes dry ingredients, then goes to PCBM3 (AN 554836) where it is mixed with resin
-equipment matches the permit

Storage Silos:
Silo No. 1 (AN 530319); Silo No. 2 (AN 554847); Silo No. 3 (AN 554842); Silo No. 4 (AN 554848); Silo No. 5 (AN 554843); S1 (AN 554841, PO G32153); S2 (AN 556162, PO G32157); S3 (AN 556161, PO G32156)
-All equipment matched permits
-Silo No. 1, 2, 4 vented to baghouse (AN 530322, PO G17311), all dust collected in closed containers.
-Silos No. 1, 2, 4 are all connected to weigh hopper (AN 554839) and hold either calcium carbonate or sand
-Silo No. 3 holds calcium carbonate only
-silo No. 5 is permitted to hold glass bubbles but Miguel informed me that the facility wanted to modify the permit to hold calcium carbonate or sand
-S1 contains calcium carbonate, S2 contains sand, S3 contains calcium carbonate. All dust collected in closed containers.

Resin Storage Tanks
Horizontal storage tanks: HT1 (AN 113604, PO M36580); HT2 (AN 141729, PO M57251)
Vertical storage tanks: VT1 (AN 493706, PO G12959); VT2 (AN 554849); VT3 (554850)
-Storage tanks VT2 and VT3 are non-operational and do not contain any resin
-all other tanks are operational and contain resin
-All storage tank equipment matches permit description

Following the physical inspection, I discussed the records I would need to review with Mr. Wang and informed him I would send him an email with the records I would need to review in order to make a compliance determination.

I emailed Mr. Wang a list of the records I needed to review and on 3/26/18 he emailed me the records I needed to review.

On 4/16/18 I begin my review of the records Mr. Wang had emailed me. I obtained the following information:
(Note: PCBM2 (AN 556160); PCBM4 (AN 554837); VT2 (AN 554849); VT3 (AN 554850); FRPBM1 (AN 416447); AC1 (AN 450806); and New Spray Booth (AN 577112) are all non-operational. All records maintained show zero throughput or zero usage)

RTO/Spray Booth (A/N 554835):
-daily VOC emissions were below the limit of 900 lbs, monthly average was 450 lbs with a monthly high of 661 lbs.
-Temperature charts showed RTO was maintained between 1550-1620F (must be >1400 F). Facility maintained temperature readings matched the charts.
-Gas usage logs showed the RTO consumed an average of 2,000 cubic sf of gas during start up (which was typically on Mondays), below limit of 9,000 cubic sf/day.
-Weekly pressure gauge recordings are complete and show <0.25 in; exhaust filters <0.5 in for all weeks for records reviewed.

PCBM1 (A/N 514879): limit of 115,000 lbs of material processed per day.
PCBM2 (A/N 556160): limit of 115,000 lbs of material processed per day. This equipment does not operate.
PCBM3 (A/N 554836): limit of 300,000 lbs of material processed per day.
PCBM4 (A/N 554837): limit of 230,000 lbs of material processed per day. This equipment does not operate.

Storage Silos:
No. 1 (A/N 554846): monthly limit of 2,860,000 lbs charged to equipment. Records also showed that weekly VE checks were completed and up to date.
No. 2 (A/N 554847): monthly limit 2,860,000 lbs charged to the equipment. Records also showed that weekly VE checks were completed and up to date.
No. 3 (A/N 554842): monthly limit of 4,900,000 lbs charged to equipment. Records also showed that weekly VE checks were completed and up to date.
No. 4 (A/N 554848): monthly limit of 2,860,000 lbs charged to equipment. Records showed that the equipment was not used during the months of 03/2017-07/2017; Records showed that weekly VE checks were completed and up to date.
No. 5 (A/N 554843): monthly limit of 53,000 lbs charged to equipment. Records showed that the equipment was not used during the months of 03/2017-08/2017. Beginning in 09/2017 records showed that sand was now being stored in the silo and records showed throughput of between Records showed that weekly VE checks were completed and up to date.
S1 (A/N 554841), S2 (A/N 556162), S3 (A/N 556161): Records maintained showing weekly equipment check and VE checks. All records were complete and up to date.

Resin Storage Tank No. 1 (VT1, A/N 493706): Limit of 12,614 gallons of resin throughput per week. Records showed usage above the permit limit for several weeks. During the 2017 audit of the facility, records were being maintained for lbs used instead of gallons used. Will discuss with facility before making a compliance determination.

Weigh Hopper (WH1, A/N 554839): Limit of 416,000 lbs of materials charged per day.

Facility Wide VOC Emissions:
Facility has a limit of 5,073 lbs/month for VOC emissions.

For all baghouses and bin vents (attached to silos 1-5 and S1-S3) weekly VE observations were available and complete with no VE detected.

For all other equipment subject to Rule 1155, weekly VE observations were available and complete with no VE detected.

There are a couple items I need to follow-up with the facility on prior to making a final compliance determination.

S. Cole

After discussing Storage Silo No. 5 (AN 554843) with Supervising AQ Inspector Shawn Bennage, it was determined I would issue a Notice to Comply (NC) for the facility to modify the equipment description.

I also received an email from Mr. Durkee providing me with the corrected throughput for Resin Storage Tank VT1 (AN 493706). The tank had a high or 9,550 gallons for 2017 with an average weekly throughput of In compliance with limits outlined in permit.

After review of all records, I concluded that the facility was in compliance with all operating limits as outlined in the facilities' permit to operate.

I will update the report once I issued the NC to the facility.

S. Cole

REPORT: On 3/14/17 at 1000 hours I arrived at FID 40806 New Basis to conduct the annual Title V compliance inspection. I met with New Basis Production Manager Joe Durkee (951.787.0600) and Floor Manager Miguel (last name not given). I also met with Environmental Consultant Project Engineer Brian Polson (949.756.3160) with Advanced Environmental Controls. We met in the conference room where we discussed the records I would need to review.

Prior to inspection I checked SCAQMD records and found the following:
-500-SAM(1) (due 8/31/16) received on: 8/17/16
-500-SAM(2) (due 2/28/17) received on: 2/28/17
-500-ACC (due 3/1/17) received on: 2/28/17
-Title V permit renewal applications: Received 6/1/16 per AN 586277

I reviewed all reports and no deviations or breakdowns were reported.

I contacted the engineer assigned to the facility and obtained the new Title V permits for any new permit conditions.

Escorted by the abovementioned people, I conducted a physical inspection of the facility. I observed the following:

Polymer Concrete Batch Mixers (PCBM):
PCBM 1 (AN 514879, PO G26468); PCBM2 (AN 556160, PO G32155); PCBM3 (AN 554836); PCBM4 (AN 554837)
-PCBM2 and PCBM4 are non-operational and are not in use.
-PCBM1 and PCBM3 are used regularly, both operating during the inspection.
-PCBM1 mixer and conveyer tubes are covered in plastic per condition 3 on PO. PCBM1 is vented to Wam baghouse (under AN 554835)
-PCBM3 and PCBM4 are vented to Donaldson Torrit dust collector (under AN 554835)
-All PCBMs vent to the RTO (AN 554835)
-All PCBMs matched their permit descriptions

Casting Machines:
AC1 (AN 450806, PO F81487); AC2 (AN 450807, PO F81488)
-AC1 is disconnected and non-operational
-AC2 was operating during my inspection. I did not observe any visible emissions while it was in use.
-Both AC1 and AC2 matched their permit description

Spray Booth:
SB1 (AN 526762, PO G15919) Sprayline Booth (AN 554835)
-SB1 is located in building 2 and is non-operational. Used as a storage area. Has 24 20"x20" filters
-Spryayline Booth was operating during my inspection. Gauge installed and read 0.05in. Booth is enclosed with plastic flaps over the front and all doors closed while operating. Spray booth is vented to Adwest RTO. RTO operating at same time the booth was operating.
-Permit descriptions matched equipment for both Spray Booths

Regenerative Thermal Oxidizer (RTO):
RTO (AN 554835)
-Operating during my inspection (noise coming from RTO, heat coming off unit, in "on" position)
-Temperature reading for RTO was at 1617 F (Condition no. 13 A. states must be above 1400 F during operation)
-Vents Sprayline Spray Booth, PCBM1, PCBM2, PCBM3, and PCBM4.
-Wam baghouse and Donaldson Torrit dust collector are also part of the same permit

Escorted by the abovementioned people, I conducted a physical inspection of the facility. I observed the following:

Polymer Concrete Batch Mixers (PCBM):
PCBM 1 (AN 514879, PO G26468); PCBM2 (AN 556160, PO G32155); PCBM3 (AN 554836); PCBM4 (AN 554837)
-PCBM2 and PCBM4 are non-operational and are not in use.
-PCBM1 and PCBM3 are used regularly, not operating during the inspection.
-PCBM1 mixer and conveyer tubes are covered in plastic per condition 3 on PO. PCBM1 is vented to Wam baghouse (under AN 554835)
-PCBM3 and PCBM4 are vented to Donaldson Torrit dust collector (under AN 554835)
-All PCBMs vent to the RTO (AN 554835)
-All PCBMs matched their permit descriptions

Casting Machines:
AC1 (AN 450806, PO F81487); AC2 (AN 450807, PO F81488)
-AC1 is disconnected and non-operational
-AC2 was operating during my inspection. I did not observe any visible emissions while it was in use.
-Both AC1 and AC2 matched their permit description

Spray Booth:
SB1 (AN 526762, PO G15919) Sprayline Booth (AN 554835)
-SB1 is located in building 2 and is non-operational. Used as a storage area. Has 24 20"x20" filters
-Spryayline Booth was operating during my inspection. Gauge installed and read 0.05in. Booth is enclosed with plastic flaps over the front and all doors closed while operating. Spray booth is vented to Adwest RTO. RTO operating at same time the booth was operating.
-Permit descriptions matched equipment for both Spray Booths

Regenerative Thermal Oxidizer (RTO):
RTO (AN 554835)
-Operating during my inspection (noise coming from RTO, heat coming off unit, in "on" position)
-Temperature reading for RTO was at 1617 F (Condition no. 13 A. states must be above 1400 F during operation)
-Vents Sprayline Spray Booth, PCBM1, PCBM2, PCBM3, and PCBM4. Also vents Wam Baghouse and Donaldson Torrit dust collector

Weigh Hopper:
Weigh hopper with bin vent (AN 554839)
-Not operating during my inspection.

Inspection Date: 06/15/2016
Instruction:
Disposition: Operating in Compliance at time of inspection

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

-Only processes dry ingredients, then goes to PCBM3 (AN 554836) where it is mixed with resin
-equipment matches the permit

Storage Silos:
Silo No. 1 (AN 530319); Silo No. 2 (AN 554847); Silo No. 3 (AN 554842); Silo No. 4 (AN 554848); Silo No. 5 (AN 554843); S1 (AN 554841, PO G32153); S2 (AN 556162, PO G32157); S3 (AN 556161, PO G32156)
-All equipment matched permits
-Silo No. 1, 2, 4 vented to baghouse (AN 530322), all dust collected in closed containers.
-Silos No. 1, 2, 4 are all connected to weigh hopper (AN 554839) and hold either calcium carbonate or sand
-Silo No. 3 holds calcium carbonate only
-Silo No. 5 holds glass bubbles. Silo No. 5 was non-operational during my inspection. Mr. Gambito informed me that the facility was planning to modify the permit in order to allow Silo No. 5 to hold something other than glass bubbles
-S1 contains calcium carbonate, S2 contains sand, S3 contains calcium carbonate. All dust collected in closed containers.

Resin Storage Tanks
Horizontal storage tanks: HT1 (AN 113604, PO M36580); HT2 (AN 141729, PO M57251)
Vertical storage tanks: VT1 (AN 493706, PO G12959); VT2 (AN 554849); VT3 (554850)
-Storage tanks VT2 and VT3 are non-operational and do not contain any resin
-all other tanks are operational and contain resin
-All storage tank equipment matches permit description

New Spray Booth (AN 577112) -non-operational
-located within the grinding room as a separate area.
-totally enclosed
-has 10 filters

After the physical inspection was completed, Mr. Gambito provided me with records for the time period of 7/2015 through 5/2016.

I did not review the records on this day.

At 930 hours I departed the facility.

S. Cole 9/6/16

On 8/16/16 I began review of the records provided to me on the day of my inspection.

-Note: PCBM2 (AN 556160); PCBM4 (AN 554837); VT2 (AN 554849); VT3 (AN 554850) Silo No. 5 (AN 554843); and SB1 (AN 526762) are all non-operational. All records maintained show zero throughput or zero usage.
-For all baghouses and bin vents (attached to silos 1-5 and S1-S3) weekly VE observations were available and complete with no VE detected.
-For all other equipment subject to Rule 1155, weekly VE observations were available and complete with no VE detected.

Records:

PCBM1 (AN 514879) -limit of 115,000 lb./day (numbers represent daily high for each month):
-July:
-August:
-September:
-October:

Assignment: 1583329
Inspector: SC11 STACY COLE
Inspection Date: 06/15/2016
Disposition: Operating in Compliance at time of inspection

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

-December:
-January:
-February:
-March:
-April: not in use
-May: not in use

RTO and Sprayline SB (AN 515594) -Temperature >1400 F; limit of 9,000 cubic feet of NG burned at start-up
-All months showed daily temp. recording of >1400 F
-Temperature reading print out was provided and measured temps corresponded to the temp. print out
-Gas meter readings showed compliance with <9,000 cubic feet NG used upon start up
-Temp graph corresponds with times RTO was shown to be off in daily temp records (most weekends and all holidays)
-Pressure gauge recordings are complete and show <0.25 in; exhaust filters <0.5 in for all weeks 7/2015-05/2016

After I completed my review of all records, I emailed Environmental Consultant Brian Polson to request additional records for VT1 which I needed in order to verify throughput records. Records showed very high usage for the months of 7/2015-11/2015 so I requested resin delivery receipts for VT1 during that time period. I also requested monthly VOC emission records since those were not included in the record packets I had received.

S. Cole 9/7/16

On 9/8/16 Mr. Polson emailed me the VOC emissions for 7/2015-5/2016 for the facility as previously requested. I did not review the records on this date.

On 9/9/16 I received an email from Mr. Polson containing the resin purchase receipts. Purchase records showed resin was delivered once every 1-3 days depending on business. When asked about the records for VT1, Mr. Polson stated that the records provided to me were in lbs. of resin (total usage) instead of gallons (for just VT1). Said he would provide me with the corrected records ASAP.

On 9/21/16 I reviewed the VOC records Mr. Polson had sent to me on 9/8/16. Facility wide limit of 5,103 lbs./month and RTO with spray booth has permit condition limit of 900 lbs./month. I obtained the following information:

July:
August:
September:
October:
November:
December:
January:
February:
March:
April:
May:

S. Cole 9.21.16

On 9/27/16 Mr. Polson provided me with the corrected VT1 resin throughput records for 7/2015-11/2015.
On 9/29/16 I reviewed the resin throughput records and determined that the facility was operating in compliance at the time of the inspection.

S. Cole 9.29.16

REPORT: On 05/13/15 at 09:00 hours Inspectors Longoni, Enriquez, and I arrived at New Basis (ID 040806) which manufactures boxes, foundations support systems, manholes, and underground vaults made from fiberglass resin and polymer concrete to conduct an annual compliance inspection.

New Basis has a Title V Permit which includes the following active equipment:
Three resin storage tanks
Two calcium carbonate storage silos
One sand storage silo
Two horizontal resin storage tanks
Two casting machines
One dust collector
Four polymer concrete mixers
RTO venting a Sprayline spray booth
One spray booth
Three calcium carbonate/sand storage silos
One storage silo for calcium carbonate
One storage silo for glass bubbles
One baghous
One weigh hopper
One mixing tank for fiberglass resin/calcium carbonate

We were escorted throughout the facility by Viji Sadasivan (949-756-3160) with Advanced Environmental Controls, Brian Polson (949-756-3160) Project Engineer with Advanced Environmental Controls

We inspected the facility and observed the following:
Title V Compliance reports
500-SAM first semester 1/12014-6/30/2014 received on 8/8/14
500-SAM second semester 7/1/2014-12/31/2014 received on 2/4/15
500-ACC (2014 calendar year) 1/1/2014-12/31/2014 received on 2/4/15

Equipment List
Three polyester resin storage tanks (VT1) P/O G12959, (VT2) A/N 554849, and (VT3) A/N 554840
-VT1 was operating during time of inspection. VT2 and VT3 were both non-operational
-All three storage tanks matched their permits

Two calcium carbonate storage silos (S1) P/O G32153 and (S3) P/O G32156
-S1 was operating during the inspection and vented to bin vent B1
-S2 was operating during the inspection and vented to bin vent B2
-both B1 and B2 collected dust in closed containers
-both silos matched their permits

One sand storage silo (S2) P/O G32157
-S2 was operating during the time of inspection
-vented to bin vent B3, which collected the dust in a closed container
-the silo matched its posted permit

Two horizontal resin storage tanks (HT1) P/O M36580 and (HT2) P/O M57251

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

-both storage tanks were operating during the inspection
-both storage tanks matched their permits

Two casting machines (AC1) P/O F81487 and (AC2) P/O F81488
-AC1 was not operating during the inspection
-AC2 was operating during the inspection
-both casting machines matched their permits

Four polymer concrete batch mixers (PCBM1) P/O G26486; (PCBM2) P/O 32155; (PCBM3) A/N 554836; and (PCBM4) A/N 554837
-PCBM1, PCBM2, and PCBM4 were all not operating during the inspection
-PCBM3 was operating during the inspection
-All four mixers vent to the RTO
-All four match their permits

Sprayline spray booth vented to a natural gas fueled Adwest Thermal Oxidizer A/N 554835 (modifying P/O G26072)
-RTO also serves the four polymer concrete mixers PCBM1, PCBM2, PCBM3, and PCBM4
-both operating during time of inspection
-pressure gauge on spray booth read 0.03 in
-current temperature reading on RTO was 1600 F

Spray Booth SB1 P/O G15919
-used as a storage area, hasn't operated in a long time
-records were unavailable since the spray booth hadn't been operated

Three Storage silos for calcium carbonate/sand vented to Bin Vent (P/O G17311)
-No 1: A/N 554846 (modification to P/O G17415) operating at time of inspection holding sand
-No. 2: A/N 554847 (modification to P/O G17416) operating at time of inspection holding sand
-No. 4: A/N 554848 (modification to P/O G17417) operating at time of inspection holding sand
-all storage silos match their permit

Storage silo for calcium carbonate (No. 3) A/N 554842
-operating at time of inspection, holding calcium carbonate
-vented to bin vent
-matches the permit

Storage silo for glass bubbles (No. 5) A/N 554843
-not operating at time of inspection
-plan to modify current permit to make dual purpose
-matches the permit

Baghouse P/O G17311
-venting storage silos 1, 2, and 4 (A/N 554846, 554847, 554848)
-collects dust into a closed container
-operating at time of inspection
-matches the permit

Weigh Hopper vented to bin vent A/N 554839

During the inspection we also observed a new electric oven in building 2. We requested the MSDS for any of the materials heated in the oven.

We departed the facility at 1135 hours.

Written by Stacy Cole, 06/04/15
Reviewed by Paolo Longoni, 06/15/15

On 05/28/15, I received an email from Brian Polson, Project Engineer with Advanced Environmental Controls (949-756-3160; brian@aecno1.com), containing the following:
"Mixing Tanks (FRPBM1 and FRPBM2) - Daily records of material usage and MSDS for the materials used in the mixtures.
The equipment FRPBM1 does not exist and the permit is proposed to be deactivated. The tank that was shown to be FRPBM1 was actually a component of Casting Machine No. 2 (AC2). FRPBM2 also does not exist, and there is no active permit for this equipment. Since both units do not exist, there are no materials used in the equipment.
PCBM1, PCBM2, PCBM3, and PCBM4 - Daily records of materials mixed and daily and monthly calculations for VOC emissions.
Attached is "VOC Log (July 2014 - May 2015)" which displays the daily material throughput and VOC emissions for each mixer. PCBM2 is no longer being used since the end of December 2014 and PCBM4 is not in operation yet. However for the RTO source test on April 16, 2015, both mixers were used briefly to comply with the permit requirements.
[On 06/23/15, I reviewed the daily and monthly resin and VOC throughput records that showed the following:
Highest daily amount for PCBM1: [redacted] P/O daily limit of 115,000 pounds;
Highest daily amount for PCBM2: [redacted] P/O daily limit of 115,000 pounds;
Highest daily amount for PCBM3: [redacted] P/O daily limit of 300,000 pounds;
Highest daily amount for PCBM4: [redacted] P/O daily limit of 230,000 pounds;
VOC monthly amounts: July 2014, [redacted] August 2014, [redacted] September 2014, [redacted] October 2014, [redacted] November 2014, [redacted] December 2014, [redacted] January 2015, [redacted] February 2015, [redacted] March 2015, [redacted] April 2015, [redacted] May 2015 (until 05/09/15), [redacted] P/O monthly limit of 5,133 pounds;
and the MSDS for the polyester resin: A839-NPC-23, manufactured by AOC, 3^% styrene]
Vertical Tank No. 1 (VT1), Vertical Tank No. 2 (VT2), and Vertical Tank No. 3 (VT3) - Throughput records for polyester resin.
Attached is "VT1 (AN 493706)" which displays the polyester resin throughput on a daily basis for VT1. For VT2, this equipment is normally not in operation, but resin from this tank was used to supply PCBM4 for the source test on April 16, 2015. The polyester resin throughput for VT2 is displayed in "VT2 (AN 554849)." VT3 is not in operation and does not have the lines connected to any mixers. Therefore, there are no usage records for this VT3.
[On 06/23/15, I reviewed the weekly resin throughput records that showed the following:
Highest weekly amount for VT1: [redacted] 3rd week of March 2015, P/O weekly limit of 12,614 gallons;
Highest weekly amount for VT1 [redacted] 3rd week of April 2015, P/O weekly limit of 54,661 gallons]
Casting Machines No. 1 and 2 (AC1 and AC2) - Location of AC1 and annual visible emissions report for each unit.
AC1 is no longer in operation, and the equipment is still on-site. Attached is "AC1 Picture" which shows the unit is still located on the property. It is located in Building No. 2 near the electric oven and tooling area.
AC1 has not been used since July 1, 2014 and is not connected to any equipment, so there are no records for this unit. The annual visible emissions report for AC2 is attached in "Casting Machine No. 2 (AN 450807).'
[On 06/23/15, I reviewed the weekly visible emission observation records that showed no visible emissions]
Air Pollution Control Device (Baghouse for PCBM3 and PCBM4), Permit No. F98572 - Annual inspection report of equipment and filter media.
Attached in "Baghouse for PCBM3 and PCBM4 (PN F98572)" are the inspection reports for the air pollution control device.
[On 06/23/15, I reviewed the weekly inspection report of equipment and filter media and visible emission observation records that showed neither discrepancies nor visible emissions]
Regenerative Thermal Oxidizer (RTO), Permit No. G26072 - Source test results, temperature records, and VOC emissions.
The official source test report has not yet been completed by the source test company. Once we have received the report, we will forward a copy to your attention. The temperature charts for the RTO are found in "RTO Temperature Charts (PN G26072)." The VOC emissions are listed in "VOC Log (July 2014 - May 2015)."
[On 06/23/15, I reviewed the monthly temperature charts, which showed temperatures consistently above the P/O limit of 1,400 degrees Fahrenheit, and the VOC monthly amounts: July 2014, [redacted] August [redacted] September 2014, [redacted] October 2014, [redacted] November 2014, [redacted] December 2014, [redacted] January 2015, [redacted] February 2015, [redacted] March 2015, [redacted] April 2015, [redacted] May 2015 (until 05/09/15), [redacted] P/O monthly limit of 900 pounds]
Spray Booth (SB1) and the Sprayline Spray Booth, Permit No. G26072 - Monthly VOC emission reports and VOC content of material used in spray booths.

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

SB1 is the spray booth in the tooling area and has not been used since July 1, 2014. Therefore, there are no records associated with this unit. The VOC emissions for the Sprayline Spray Booth which is connected to the RTO is listed in "VOC Log (July 2014 - May 2015)" under the column "FRP MIX ADWEST." The styrene content of the polyester resin used in the Sprayline booth is 36.0%. I have attached the polyester resin and calcium carbonate MSDS which are used in the spray booth.
[On 06/23/15, I reviewed the MSDS for the calcium carbonate: 100% calcium carbonate]
Storage Silos No. 1, 2, 3, 4, and 5 - Monthly reports of materials charged, visible emissions report, and annual inspection of equipment and filter media.
Attached are the monthly throughput records, visible emissions report, and inspection reports for each silo from July 2014 through April 2015.
[On 06/23/15, I reviewed the monthly throughput records that showed the following:
Highest monthly amount for silo no. 1 (calcium carbonate / sand): [redacted], March 2015, P/O monthly limit of 2,850,000 pounds;
Highest monthly amount for silo no. 2 (calcium carbonate / sand): [redacted] March 2015, P/O monthly limit of 2,850,000 pounds;
Highest monthly amount for silo no. 3 (calcium carbonate): [redacted], March 2015, P/O monthly limit of 4,900,000 pounds;
Highest monthly amount for silo no. 4 (calcium carbonate / sand): no throughput, P/O monthly limit of 2,860,000 pounds;
Highest monthly amount for silo no. 5 (glass bubbles): no throughput, P/O monthly limit of 53,000 pounds;
and the weekly inspection report of equipment and filter media and visible emission observation records that showed neither discrepancies nor visible emissions]
Baghouse, Permit No. G17311 (Connected to Storage Silos No. 1, 2, and 4) - Visible emissions report and annual inspection of equipment and filter media.
Attached in "MAC Baghouse (PN G17311, AN 530322)" are the reports for the baghouse unit.
[On 06/23/15, I reviewed the weekly inspection report of equipment and filter media and visible emission observation records that showed neither discrepancies nor visible emissions]
Weigh Hopper 1, Application No. 554839 (WH1) - Daily records of material throughput, visible emissions report, and annual inspection of equipment and filter media.
Attached in "Weigh Hopper 1 (AN 554839)" are the requested records.
[On 06/23/15, I reviewed the daily throughput records (Highest daily amount: [redacted] 03/24/15, P/O daily limit of 416,100 pounds) and the weekly inspection report of equipment and filter media and visible emission observation records that showed neither discrepancies nor visible emissions]
New Electric Oven
Attached is the Epoxy Resin MSDS.
[On 06/23/15, I reviewed the MSDS for the epoxy resin: LCBA250-TX, manufactured by Lattice Composite]

On 06/23/15, I emailed and asked Mr. Polson the following:
"What are they making in the electric oven? What is the VOC content of the epoxy resin?"

Paolo Longoni, 06/23/15

On 06/25/15, I received an email from Mr. Polson informing me of the following:
"Please see the requested information provided by Mr. Ruchir Shanbhag below:
What are they making in the electric oven?
The only product cured in the oven is the LCBA250-TX tooling resin which is a hot-melt epoxy resin.
What is the VOC content of the epoxy resin?
The epoxy resin is manufactured by New Basis, and the MSDS is attached. According to Mr. Ruchir Shanbhag, the LCBA250-TX tooling resin has zero VOC content."

Paolo Longoni, 06/30/15

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: On 05/13/15 at 09:00 hours Inspectors Longoni, Enriquez, and I arrived at New Basis (ID 040806) which manufactures boxes, foundations support systems, manholes, and underground vaults made from fiberglass resin and polymer concrete to conduct an annual compliance inspection.

New Basis has a Title V Permit which includes the following active equipment:
Three resin storage tanks
Two calcium carbonate storage silos
One sand storage silo
Two horizontal resin storage tanks
Two casting machines
One dust collector
Four polymer concrete mixers
RTO venting a Sprayline spray booth
One spray booth
Three calcium carbonate/sand storage silos
One storage silo for calcium carbonate
One storage silo for glass bubbles
One baghous
One weigh hopper
One mixing tank for fiberglass resin/calcium carbonate

We were escorted throughout the facility by Viji Sadasivan (949-756-3160) with Advanced Environmental Controls, Brian Polson (949-756-3160) Project Engineer with Advanced Environmental Controls, and Joe _____.

We inspected the facility and observed the following:
Title V Compliance reports
500-SAM first semester 1/12014-6/30/2014 received on 8/8/14
500-SAM second semester 7/1/2014-12/31/2014 received on 2/4/15
500-ACC (2014 calendar year) 1/1/2014-12/31/2014 received on 2/4/15

Equipment List
Three polyester resin storage tanks (VT1) P/O G12959, (VT2) A/N 554849, and (VT3) A/N 554840
-VT1 was operating during time of inspection. VT2 and VT3 were both non-operational
-All three storage tanks matched their permits

Two calcium carbonate storage silos (S1) P/O G32153 and (S3) P/O G32156
-S1 was operating during the inspection and vented to bin vent B1
-S2 was operating during the inspection and vented to bin vent B2
-both B1 and B2 collected dust in closed containers
-both silos matched their permits

One sand storage silo (S2) P/O G32157
-S2 was operating during the time of inspection
-vented to bin vent B3, which collected the dust in a closed container
-the silo matched its posted permit

Inspector: PL03 PAOLO LONGONI
Inspection Date: 05/13/2015
Disposition: Inspection in progress, Disposition pending

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

Two horizontal resin storage tanks (HT1) P/O M36580 and (HT2) P/O M57251
-both storage tanks were operating during the inspection
-both storage tanks matched their permits

Two casting machines (AC1) P/O F81487 and (AC2) P/O F81488
-AC1 was not operating during the inspection
-AC2 was operating during the inspection
-both casting machines matched their permits

Four polymer concrete batch mixers (PCBM1) P/O G26486; (PCBM2) P/O 32155; (PCBM3) A/N 554836; and (PCBM4) A/N 554837
-PCBM1, PCBM2, and PCBM4 were all not operating during the inspection
-PCBM3 was operating during the inspection
-All four mixers vent to the RTO
-All four match their permits

Sprayline spray booth vented to a natural gas fueled Adwest Thermal Oxidizer A/N 554835 (modifying P/O G26072)
-RTO also serves the four polymer concrete mixers PCBM1, PCBM2, PCBM3, and PCBM4
-both operating during time of inspection
-pressure gauge on spray booth read 0.03 in
-current temperature reading on RTO was 1600 F

Spray Booth SB1 P/O G15919
-used as a storage area, hasn't operated in a long time
-records were unavailable since the spray booth hadn't been operated

Three Storage silos for calcium carbonate/sand vented to Bin Vent (P/O G17311)
-No 1: A/N 554846 (modification to P/O G17415) operating at time of inspection holding sand
-No. 2: A/N 554847 (modification to P/O G17416) operating at time of inspection holding sand
-No. 4: A/N 554848 (modification to P/O G17417) operating at time of inspection holding sand
-all storage silos match their permit

Storage silo for calcium carbonate (No. 3) A/N 554842
-operating at time of inspection, holding calcium carbonate
-vented to bin vent
-matches the permit

Storage silo for glass bubbles (No. 5) A/N 554843
-not operating at time of inspection
-plan to modify current permit to make dual purpose
-matches the permit

Baghouse P/O G17311
-venting storage silos 1, 2, and 4 (A/N 554846, 554847, 554848)
-collects dust into a closed container
-operating at time of inspection
-matches the permit

Reviewed by Paolo Longoni, 06/15/15

On 05/28/15, I received an email from Brian Polson, Project Engineer with Advanced Environmental Controls (949-756-3160; brian@aecno1.com), containing the following:
"Mixing Tanks (FRPBM1 and FRPBM2) - Daily records of material usage and MSDS for the materials used in the mixtures.
The equipment FRPBM1 does not exist and the permit is proposed to be deactivated. The tank that was shown to be FRPBM1 was actually a component of Casting Machine No. 2 (AC2). FRPBM2 also does not exist, and there is no active permit for this equipment. Since both units do not exist, there are no materials used in the equipment.
PCBM1, PCBM2, PCBM3, and PCBM4 - Daily records of materials mixed and daily and monthly calculations for VOC emissions.
Attached is "VOC Log (July 2014 - May 2015)" which displays the daily material throughput and VOC emissions for each mixer. PCBM2 is no longer being used since the end of December 2014 and PCBM4 is not in operation yet. However for the RTO source test on April 16, 2015, both mixers were used briefly to comply with the permit requirements.
[On 06/23/15, I reviewed the daily and monthly resin and VOC throughput records that showed the following:
Highest daily amount for PCBM1: [redacted] 08/28/14, P/O daily limit of 115,000 pounds;
Highest daily amount for PCBM2: [redacted] 07/14/14, P/O daily limit of 115,000 pounds;
Highest daily amount for PCBM3: [redacted] 02/26/15, P/O daily limit of 300,000 pounds;
Highest daily amount for PCBM4: [redacted] 04/16/15, P/O daily limit of 230,000 pounds;
VOC monthly amounts: July 2014, [redacted] August 2014, [redacted] September 2014, [redacted] October 2014, [redacted] November 2014, [redacted] December 2014, [redacted] January 2015, [redacted] February 2015, [redacted] March 2015, [redacted] April 2015, [redacted] May 2015 (until 05/09/15), [redacted] P/O monthly limit of 5,133 pounds;
and the MSDS for the polyester resin: A839-NPC-23, manufactured by AOC, 3^% styrene]
Vertical Tank No. 1 (VT1), Vertical Tank No. 2 (VT2), and Vertical Tank No. 3 (VT3) - Throughput records for polyester resin.
Attached is "VT1 (AN 493706)" which displays the polyester resin throughput on a daily basis for VT1. For VT2, this equipment is normally not in operation, but resin from this tank was used to supply PCBM4 for the source test on April 16, 2015. The polyester resin throughput for VT2 is displayed in "VT2 (AN 554849)." VT3 is not in operation and does not have the lines connected to any mixers. Therefore, there are no usage records for this VT3.
[On 06/23/15, I reviewed the weekly resin throughput records that showed the following:
Highest weekly amount for VT1: [redacted] 3rd week of March 2015, P/O weekly limit of 12,614 gallons;
Highest weekly amount for VT1: [redacted] 3rd week of April 2015, P/O weekly limit of 54,661 gallons]
Casting Machines No. 1 and 2 (AC1 and AC2) - Location of AC1 and annual visible emissions report for each unit.
AC1 is no longer in operation, and the equipment is still on-site. Attached is "AC1 Picture" which shows the unit is still located on the property. It is located in Building No. 2 near the electric oven and tooling area.
AC1 has not been used since July 1, 2014 and is not connected to any equipment, so there are no records for this unit. The annual visible emissions report for AC2 is attached in "Casting Machine No. 2 (AN 450807).'
[On 06/23/15, I reviewed the weekly visible emission observation records that showed no visible emissions]
Air Pollution Control Device (Baghouse for PCBM3 and PCBM4), Permit No. F98572 - Annual inspection report of equipment and filter media.
Attached in "Baghouse for PCBM3 and PCBM4 (PN F98572)" are the inspection reports for the air pollution control device.
[On 06/23/15, I reviewed the weekly inspection report of equipment and filter media and visible emission observation records that showed neither discrepancies nor visible emissions]
Regenerative Thermal Oxidizer (RTO), Permit No. G26072 - Source test results, temperature records, and VOC emissions.
The official source test report has not yet been completed by the source test company. Once we have received the report, we will forward a copy to your attention. The temperature charts for the RTO are found in "RTO Temperature Charts (PN G26072)." The VOC emissions are listed in "VOC Log (July 2014 - May 2015)."
[On 06/23/15, I reviewed the monthly temperature charts, which showed temperatures consistently above the P/O limit of 1,400 degrees Fahrenheit, and the VOC monthly amounts: July 2014, [redacted] August 2014, [redacted] September 2014, [redacted] October 2014, [redacted] November 2014, [redacted] December 2014, [redacted] January 2015, [redacted] February 2015, [redacted] March 2015, [redacted] April 2015, [redacted] May 2015 (until 05/09/15), [redacted] P/O monthly limit of 900 pounds]

REPORT: The facility, a manufacturer of boxes, foundation support systems, handholes, manholes, and vaults made from fiberglass resin and polymer concrete, has a Title V Permit that includes the following active equipment:

1.Three polyester resin storage tanks;

2.Three calcium carbonate / sand storage silos;

3.A baghouse serving the three calcium carbonate / sand storage silos;

4.Two calcium carbonate storage silos;

5.A sand storage silo;

6.Two baghouses serving the two calcium carbonate storage silos;

7.A baghouse serving the sand storage silo;

8.Two polymer concrete mixers (PCBM 1 and 2);

9.A casting machine;

10.A spray booth served by a natural gas fueled Adwest thermal oxidizer.

11.A spray booth.

I arrived at the facility on 07/22/14 at 09:30 hrs to conduct an annual Title V facility compliance inspection.

I met Karl Stockbridge, President (951-787-0600), Ruchir Shanbhag, Vice President of Engineering and Technology (951-787-0600), Joseph Durkee, Production Manager (909-268-3132), and Alex Zec, Senior Operations Manager and Project Engineer with Advanced Environmental Controls Consulting and Engineering Services Inc (949-756-3160), who all accompanied me on the facility inspection.

I inspected the facility with the following results:

Spray Booth Served by a Natural Gas Fueled Adwest Thermal Oxidizer P/O Application no. 515594

[The oxidizer was operating during the inspection: 1,615 degrees Fahrenheit]

1.The last compliance source test (destruction and collection efficiency) conducted by AirKinetics Inc on 07/03/12 was available: destruction efficiency 99.4%, collection efficiency 100%, and overall control efficiency 99.4% (P/O destruction and overall efficiency limits: 95%);

2.The last compliance source test (Rule 1147) conducted by AirKinetics Inc on 06/09/13 was available: 55 ppm of NOx (Rule 1147 limit: 60 ppm);

3.The daily VOC emissions since July 2013 were not available;

4.The temperature records since July 2013 were available; the records showed multiple drops (during the evening shift) below the P/O limit of 1,400 degrees Fahrenheit during the months of April, May, and June 2014. Mr. Stockbridge explained to me that the drops had happened during the evening shift since production was slower and, therefore, the amount of styrene was insufficient to maintain the proper temperature in the chamber; a malfunctioning valve prevented the proper amount of natural gas to be injected in the chamber; the valve had been replaced at the end of June 2014 (I would request the temperature records for July 2014); Mr. Stockbridge also added that the spraying guns were interlocked to the oxidizer to prevent any production when the oxidizer was not fully operational;

5.The annual calibration record for the temperature measuring system was not available;

6.The annual maintenance record was not available;

7.The daily natural gas usage for the start-up burner since July 2013 was available and showed compliance with the P/O daily limit of 9,000 cubic feet;

8.The weekly inspections of the spray booth exhaust filters since July 2013 were available.

Spray Booth P/O G15919

[The spray booth, currently used as storage area, was not operating during the inspection]

1.The daily VOC emissions since July 2012 were not available;

2.The weekly inspections of the spray booth exhaust filters since July were available.

I departed the facility at 11:45 hrs.

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: The facility, a manufacturer of boxes, foundation support systems, handholes, manholes, and vaults made from fiberglass resin and polymer concrete, has a Title V Permit that includes the following active equipment:

1.Three polyester resin storage tanks;

2.Three calcium carbonate / sand storage silos;

3.A baghouse serving the three calcium carbonate / sand storage silos;

4.Two calcium carbonate storage silos;

5.A sand storage silo;

6.Two baghouses serving the two calcium carbonate storage silos;

7.A baghouse serving the sand storage silo;

8.Two polymer concrete mixers (PCBM 1 and 2);

9.A casting machine;

10.A spray booth served by a natural gas fueled Adwest thermal oxidizer.

11.A spray booth.

I arrived at the facility on 08/06/13at 09:30 hrs to conduct an annual Title V facility compliance inspection.

I met Karl Stockbridge, President (951-787-0600), Ruchir Shanbhag, Vice President of Engineering and Technology (951-787-0600), and Viji Sadasivan and Alex Zec, Senior Operations Manager and Project Engineer with Advanced Environmental Controls Consulting and Engineering Services Inc (949-756-3160), who all accompanied me on the facility inspection.

I inspected the facility with the following results:

Paolo Longoni, 08/29/13

K. Melville 8/29/13

On 08/29/13, I received an email from Mr. Zec containing the following statements concerning the daily VOC emission calculations:

Two Polymer Concrete Mixers (PCBM 1 and 2) P/O Application no. 514879 and G12960

"Mr. Todd Iwata [Engineer II; (909-396-2574)] has determined the new mixing emission factor for the source test performed in 2012, Please see Attachment (Mixer - PCBM2). Destruction efficiency is applied after emission factor.'

Casting Machine P/O F81487

"The resin and cal carb is sent through casting machine 2 (FRP mix) and the mixture is used in the spray booth where the VOC are captured and controlled.'

Paolo Longoni, 09/03/13

REPORT: The facility has a Title V Permit that includes the following equipment:

1.Three polyester resin storage tanks (storage tanks);

2.Five polyester resin spray booths (spray booths);

3.A fiberglass resin / calcium carbonate mixing tank (FRPBM1);

4.Two fiberglass resin / calcium carbonate mixing tanks (Casting machines no. 1 and 2);

5.Two polymer concrete batch mixers (PCBM1 and PCBM2);

6.An Adwest regenerative thermal oxidizer (RTO1);

7.An Envirocure catalytic oxidizer (Catox).

Upon request from Supervising Inspector Melissa Sanchez (909-396-2355), I arrived at the facility on 09/20/12 at 09:45 hrs to issue NC E16258 for failing to submit on time the Form 500-SAM 1st semester (2012 calendar year) and directing the facility to provide the complete Form 500-RO.

I met and served NC E16258 personally to Martin Theodosis, Manufacturing Supervisor (951-787-0600).

I departed the facility at 10:15 hrs.

Paolo Longoni, 09/20/12

On 09/13/12, Issued and served I issued NOV P60018 to New Basis for failing to operate and maintain a continuous temperature measuring and recording device (on the Adwest RTO) and served it by certified mail to Mr. Shanbhag .

2.Equipment List

Facility Wide Conditions

The monthly volatile organic compound (VOC) emissions from August 2010 through July 2011 were available and showed compliance with the P/O monthly limits of 5,133 pounds; however, the VOC emissions shall be revised to account for the 100% collection and 99.4% destruction efficiencies (The source tests conducted on the RTO1 by Aki Air Kinetics Inc on 03/07/12 is currently under review with the Source Tests Department).

During the inspection, due to a RTO1 malfunction, the facility equipment was not operating; the facility equipment resumed operating on 08/09/12 after 16:00 hrs.

3.Source Tests

The source tests conducted on the RTO1 by Aki Air Kinetics Inc on 03/07/12 is currently under review with the Source Tests Department: 100% collection and 99.4% destruction efficiencies.

I departed the facility at 10:00 hrs.

Supervising Inspector Melissa Sanchez (909-396-2355) and I returned at the facility on 08/09/12 at 13:20 hrs to conduct a follow compliance inspection.

During the inspection, due to a RTO1 malfunction, the facility equipment was still not operating; the facility equipment resumed operating later in the day after 16:00 hrs.

We departed the facility at 14:50 hrs.

I returned at the facility 08/10/12 at 08:50 hrs to issue NC E16244 and serve it to Mr. Shanbhag directing the facility to provide the Adwest temperature logs in a readable format since January 2012.

2.Form 500-ACC.

B.Equipment List

PCBM 1 and 2 had been vented to the Adwest thermal oxidizer.

1.Inconsistencies concerning between equipment described on the Title V permit and installed were requested to be addressed (NC E10256 item 1).

2.Two calcium carbonate and a sand storage silos, installed outside, may require a Permits to Operate (NC E10256 item 2).

3.Facility volatile organic (VOC) compound emissions from August 2010 through July 2011 were requested (NC E10256 item 3).

4.Forms 500-ACC and 5000-SAM were requested to be submitted (NC E10256 item 4).

C.Source Tests

Source tests would be conducted by the end of the calendar year as requested in the Permits to Construct.

After issuing NC E10256 and explaining Mr. Shanbhag how to achieve compliance, we departed the facility at 12:15 hrs.

Paolo Longoni, 08/11/11

On 09/27/11, I searched the Class database and found out that the Form 500-SAM 2011 1st semester had been submitted on time, date 08/23/11, notification no. 283815, while the Forms 500-SAM 2010 2nd semester and 500-ACC 2010 calendar year had been submitted late, date 08/23/11, notifications no. 283813 and 283816.

REPORT: See NOV P53806 report

I arrived at the facility on 01/21/10 at 13:10 hrs to conduct a targeted inspection on the equipment associated with inactive Permits to Operate (P/O).

I met Richard Scotten, Project Manager (951-787-0600 ext. 5953), who accompanied me on the facility inspection.

During the inspection:

1.I verified that the equipment associated with P/O M36109, M36581, M36578, M36579, M46389, M46390, M61625, M61626, D7464, D93229, D93271, D93272, F7033, F7034, F7035, F7036, F7037, F7038, and F24083 was no longer on site;

2.I observed that equipment associated with P/O F24082 had been operated, though inactive. I issued Notice of Violation P56359 to have the facility re-active P/O F24082.

I departed the facility at 14:10 hrs.

Paolo Longoni, 01/26/10

REPORT: 3-17-2008 I was on site to conduct an information inspection concerning chrome emissions only. I did not conduct a compliance inspection at this time.

I met with Matt Stockbridge, Proj. Mgr. and Jim Fink, Maintenance Sup. I conducted an inspection of the cooling tower which used Potassium salts and molybdenum, no chromates. I also inspection the operation which uses gravel, sand, resin and MEK-P to create underground boxes for utilities and other uses.

The facility plans on adding an incinerator at the site to conbust the resin fumes. There was a very strong styrene odor through out the facility. Mr. Stockbridge stated that they have a consultant that is suppose to submit an application for the incinerator. I will call him and inform him that it does appear that the application has been submitted.

REPORT: On 3-23-07, I entered the New Basis facility located at 2626 Kansas Avenue, Riverside to conduct an annual Title V Equipment List Inspection. I was accompanied during the inspection by the Plant Manager. This business produces reinforced plastic composite vaults of various sizes used to house underground equipment such as valves and electrical connections. This is a medium sized facility with 70 employees working 2 shifts.

Permits were posted and available for review. MSDS records were maintained. Equipment in the Title V permit included resin storage tanks, mixers, spray booths, a baghouse and a VOC control system. The storage tanks were well maintained and labeled, as was the mixing equipment. Spray booth filters were all in place and in good condition. The Envirocure VOC control system and associated resin spray booth were not in operation at the time of inspection; however, the unit appeared to be in good condition. Usage and maintenance records indicated it had been operated in compliance with permit conditions.

Source test results for the VOC control system indicated 98.5 per cent efficiency giving a factor on the resin of .015. The resin used contained 52.5 per cent styrene. Overall emissions were well below permit limits. The facility was In Compliance.

REPORT: On 9-15-06 at 13:40 hours Joyce Hill, Supervising Air Quality Inspector, and I entered New Basis located at 2626 Kansas Ave., Riverside to conduct an annual Title V equipment list inspection. We were accompanied during the inspection by Jason Gracia, Sales Engineer. This business produces reinforced plastic composite vaults of various sizes used to house underground equipment such as valves and electrical connections. This is a medium sized facility with 70 employees working 2 shifts.

Equipment included in their Title V permit includes resin storage tanks, mixers, spray booths, a baghouse and a VOC control system. The storage tanks were well maintained and labeled as was the mixing equipment. Spray booth filters were all in place and in good condition. The Envirocure VOC control system and associated resin spray booth were not in operation at the time of inspection; however, the unit appeared to be in good condition. Usage and maintenance records indicated it had been operated in compliance with permit conditions.

Source test results could not be located at the time of inspection. I issued Notice to Comply number D06476 to provide source test results for the VOC control system and VOC emission records specific to this spray booth.

Emission records were provided for the spray booth prior to our departure at 16:06 hours.

Followup: On 9-29-06 at 15:50 hours I revisited the facility. A review of documents showed that a source test with passing grade was performed on 2-23-06. Emission records showed this facility to be in compliance.

REPORT: On 4-20-06, I met with Eric, Environmental Manager at New Basis and reviewed options relating to NESHAPS requirements. The facility used styrenated resins and the concern was regarding NESHAP 40 CFR 63 for Reinforced Plastics Composites Production. This purpose of this inspection was to inform the facility of rule changes which could significantly impact their operations.

I reviewed new work practice requirements for injection molding and pultrusion operations. My contact advised me the company did not have those operations and would not be affected. DE

On 12/22/16 at 1430 hours I responded to complaint 271881 for odors at Roberta and Kansas Ave in the city of Riverside. I conducted odor surveillance of the area and could not detect any odors. I noted the weather as cloudy and cold, with no wind. I continued odor surveillance stopping at the corner of Kansas Ave and Massachusetts Ave, I could not detect any odors.

I did not observe any active drilling or construction taking place at the alleged facility of Newbasis or on any of the roadways.

I departed the area at 1445 hours.

I contacted the complainant via phone on 11/12/04. [redacted] informed me that [redacted] gets terrible headaches whenever [redacted] drives by a "pipe" manufacturer near Spruce and Chicago in Riverside. I arrived in the vicinity of the alleged odor source on 11/12/04 at 1615 hours. I first went to 2050 Spruce, which CLASS showed to be a chemical plant at one time. The facility is no longer at the location and the current occupant uses the site for shipping and receiving. I drove around the vicinity and determined the most likely odor source to be Newbasis. The company manufactures fiberglass resin products. Due to the time and out of sector detail, I did not inspect the facility. I subsequently contacted Inspector David Ellis and informed him of the odor complaint situation.

Inspector Comment

On 8-16-05 @ 10:55AM, I arrived at New Basis and conducted odor surveillance. The weather was warm, overcast, with light breezes. I did not detect odor initially at the time of this field investigation. New Basis was a large plant with permitted equipment and emission control systems. The company had 5 permits for blending plastics and resins, 6 permits for styrenated resins spray booths and permits for baghouses and storage tanks.
Before I left, resin type odors became appparent along the east side of the property.
I left the area @ 11:20AM.

On 8-18-05 @ 4:30PM, I conducted follow-up odor surveillance at New Basis. The weather was warm, sunny, with breezes from the west. I detected resin odors on the east side of the plant which occurred in an on again, off again pattern.
I left the area @ 4:55PM. DE

No further action is planned unless there are more complaints.

Inspector Comment

On 9-13-06 @ 1:45PM, I arrived in front of the New Basis plant on Kansas Avenue. The weather was hot, sunny, with light breezes. I did not detect any unusual odors in front of the plant. I proceeded to the east side of the facility, south of Kansas, on Roberta. I detected a resin type of odor which may have been styrene, a common polymer used in resin operations as done at New Basis. Styrene odors are common at facilities using resins to manufacture products. Resins were sprayed and used in mold processes at New Basis.
The facility was scheduled for a Title V inspection by the end of the month.
I telephoned the complainant [redacted] @ 2PM to report my findings, but there was no answer.
I left the area @ 2:20PM. DE
Note: There was also a used cooking oil recycle distribution company at the end of Roberta, a block or less from New Basis, which had been named in some prior odor complaints. However, the descriptions of the odors were different from this complaint. In any case, I did not detect any particular odors from the recycler facility during this investigation.

Inspector Comment

The complainant had detected "a strong smell of plastic odor" coming from an unknown source located on Kansas Avenue, Riverside (complaint source).

Before arriving at the complaint source, I called and verified with the complainant that the unknown source was actually New Basis, ID 40806, a manufacturer of boxes, foundation support systems, handholes, manholes, and vaults made from polymer concrete and fiberglass resin.

I arrived at the complaint source on 12/08/11 at 13:15 hrs to conduct an investigation.

I conducted a surveillance of the compliant source surroundings from 13:15 to 13:30 hrs, but did not detect any strong odor of resin coming from the complainant source.

I departed the complaint source at 13:30.

10/15/13

1045 hrs: I left a vm for the complainant to contact me regarding this complaint.

1315 hrs: I spoke with the complainant who alleged a toxic plastic smell coming from New Basis. The complainant alleged that [redacted] detected the odors as [redacted] drove on the 91 Fwy/60 Fwy interchange with [redacted] windows rolled down and was concerned about the toxicity of the odors. [redacted] stated that [redacted] also detected the odors and advised [redacted] that New Basis was the source of the odors. I advised [redacted] of AQMD Rule 402 and that I would investigate.

1350: I arrived at New Basis and met with VP, Ruchir Shanbhag 951-787-0600 who I notified of the complaint received. I did not detect any odors in the parking lot of the facility. However, immediately upon entering the building a distinct styrene odor was present at an intensity of 3-5 throughout my walkthrough of the facility. Mr. Shanbhag stated that the only odors in the vicinity came from a fat rendering plant located adjacent to his business. We were then joined by President and CEO Karl. Karl believed that the complaint was from a disgruntled employee or a competitor, as he did not think it was possible to see New Basis from the freeway overpass/interchange. I advised both gentlemen that AQMD investigates all complaints and that this complaint specifically alleged New Basis as the source. Mr. Shanbhag asked who had complained and I advised him that information was confidential however, he could request a copy of my complaint report.

Because the facility was recently inspected, Title V audit on 8/13/13, I conducted a walkthrough of the plant. The facility manufactures composite concrete junction vaults for utilities. Operating hours are between 0500 hrs and 1400 hrs, with spraying also being done between 1400 hrs-2200 hrs. The spray room and mixers are vented to an RTO. Molding and spraying were in operation. I observed that the RTO was on and its panel indicated a chamber average of 1579 F. The temperature fluctuated as I was recording the information. I noted that Bed #1 had a reading of 1462 F and Bed #2 had a reading of 1531. The exhaust temperature was 202 F and the inlet was 100 F. The panel also stated Gas Off. Mr. Shanbhag stated that this was because the styrene emissions were being used as a fuel source and when the temperature dropped, then natural gas would be supplemented to bring it back up. I did observe that the panel reading changed to Gas On while on site. No violations were observed and I departed the area at 1445 hrs.

Inspector Comment

I arrived at the alleged compliant source, Flame Broiler, located at Alabama Street and Redlands Boulevard, Redlands, on 02/10/16 at 16:35 hrs to conduct an investigation.

During my investigation, I did not observe any smoke coming from the complaint source.

Before departing the complaint source, I called and left a voicemail to the complainant explaining my investigation findings.

I departed the complaint source at 16:50 hrs.

Paolo Longoni, 02/11/16

I arrived at Longfellow Elementary School, located at 3610 Eucalyptus Avenue, Riverside, on 02/17/16 at 07:40 hrs to conduct an investigation and met with the complainant.

We agreed that there was a faint odor of fiberglass (or styrene).

The wind was blowing from the north - east at a speed of approximately five miles per hour.

Before tracking down the odor, I explained to the complainant the regulations for public nuisance.

I walked downwind and detected intermittently a faint odor of styrene at the following intersections: 5th Street / Franklin Avenue, 4th Street / Franklin Avenue, and Kansa Avenue / Massachusetts Avenue.

The odor was traced back to New Basis (facility ID 40806), a manufacturer of fiberglass products.

I departed at 08:30 hrs.

Mr. Karl Stockbridge
Vice President of Operations
New Basis
2626 Kansas Avenue
Riverside, CA 92507

SUBJECT: Title V Facility Permit Revision (Facility ID: 040806)

Dear Mr. Stockbridge:

Please find attached the revised Title Page, Table of Contents, and Section D of your Title V Facility Permit. The revised sections reflect the approval of the permit revision requested in your Application No. 530315. The proposed permit revision was submitted to EPA for 45-day review on February 14, 2011. This permit revision includes the addition and modification of the equipment listed in below:

Equipment	Application No.	Permit No.	Permit Type
SILO	530319	G17145	PO
SILO	530320	G17146	PO
SILO	530321	G17147	PO
BAGHOUSE	530322	G17311	PO

Please review the attached sections carefully. Insert the attached sections into your Facility Permit and discard the earlier versions. Questions concerning changes to your permit should be directed to Mr. Todd Iwata at (909) 396-2574.

Sincerely,

Brain L. Yeh
Senior Manager
Coating, Printing, Plating, Military

Facility Equipment and Requirements
(Section D)

This section consists of a table listing all permitted equipment at the facility, facility wide requirements, all individual Permits to Construct and Permits to Operate issued to various equipment at the facility, and Rule 219-exempt equipment subject to source-specific requirements. Each permit and Rule 219-exempt equipment will list operating conditions including periodic monitoring requirements, and applicable emission limits and requirements that the equipment is subject to. Also included is the rule origin and authority of each emission limit and permit condition.

FACILITY WIDE CONDITION(S)

Condition(s):

1. EXCEPT FOR OPEN ABRASIVE BLASTING OPERATIONS, THE OPERATOR SHALL NOT DISCHARGE INTO THE ATMOSPHERE FROM ANY SINGLE SOURCE OF EMISSIONS WHATSOEVER ANY AIR CONTAMINANT FOR A PERIOD OR PERIODS AGGREGATING MORE THAN THREE MINUTES IN ANY ONE HOUR WHICH IS:

   A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
   B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION.
   [RULE 401]

2. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO THE AB 2588 TOXIC HOT SPOTS PROGRAM.
   [RULE 1402]

3. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5,133 POUNDS IN ANY ONE CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS).
   [RULE 1303(b)(2)-OFFSET]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
   [RULE 109, 1303(b)(2)-OFFSET]

6. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.
   [RULE 109, 1303(b)(2)-OFFSET]

7. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEDING 5 YEARS.
   [RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAINING MATERIAL FROM THE FACILITY FOR 5 YEARS.
[RULE 109, 1303(b)(2)-OFFSET]

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

A/N 327367

Equipment Description:

SPRAY BOOTH NO. 2, BLEEKER, FLOOR FILTER TYPE, MODEL F-48-12-24, 48'-0" W. X 28'-8" L. X 12'-0" H., WITH ONE HUNDRED SIXTY- EIGHT 20" X 20" EXHAUST FILTERS AND TWO 7.5 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT

[RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions and Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

    VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 109
    PM: RULE 481
    PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
    HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F65485
A/N 416447

Equipment Description:

MIXING TANK, FRPBM1, FIBERGLASS RESIN/CALCIUM CARBONATE, 4'-0" DIA. X 4'-0" H., 4,000 POUND CAPACITY.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE TOTAL AMOUNT OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 2,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

4. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 3. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MAY 3, 2002 OR EARLIER.
[RULE 1401]

6. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

7. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

FACILITY PERMIT TO OPERATE
NEW BASIS

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

8. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81487
A/N 450806

Equipment Description:

CASTING MACHINE NO. 1, AC1, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
[RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

NEW BASIS

PERMIT TO OPERATE

Permit No. F98567
A/N 476311

Equipment Description:

MIXER, POLYESTER RESIN, SHAR SYSTEMS, MODEL NO. D-258NZ, 182 GALLON, WITH THREE HOPPERS, 4' X 4'-4" X 4'-4" EACH, AND A 25 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE TOTAL AMOUNT OF POLYESTER RESINS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED *2,520 POUNDS IN ANY ONE DAY.*
[RULE 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 18,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

5. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO'S. 3 AND 4. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

6. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS AS IDENTIFIED IN RULE 1401, TABLE 1, AS AMENDED MARCH 4, 2005 OR EARLIER WITH THE EXCEPTION OF STYRENE.
[RULE 1401]

7. THE MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

8. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

9. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

   B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

   D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F98572
A/N 484033

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. DUST COLLECTOR, DONALDSON TORIT, MODEL NO. VS-1200, PULSE JET CLEANING, WITH ONE 17" DIA. X 20" L. CARTRIDGE-TYPE FILTER, 135 SQ. FT. TOTAL FILTER AREA, AND ONE 24" X 18" X 12" HEPA FILTER.

2. EXHAUST SYTEM WITH A 3 HP EXHAUST FAN VENTING A POLYSTER RESIN MIXER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. DUST COLLECTED IN THE DUST COLLECTOR SHALL BE DISCHARGED INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

4. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON A QUARTERLY BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE QUARTERLY PERIOD. THE ROUTINE QUARTERLY INSPECTION SHALL BE CONDUCTED

FACILITY PERMIT TO OPERATE
NEW BASIS

WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

[RULE 3004 (a)(4)]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G12959
A/N 493706

Equipment Description and Conditions:

STORAGE TANK, VT1, RESIN, VERTICAL FIXED ROOF, 9'-11" DIA. X 10'-11" H., 6,307 GALLON CAPACITY.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE TOTAL THROUGHPUT OF POLYESTER RESIN IN THIS EQUIPMENT SHALL NOT EXCEED 12,614 GALLONS IN ANY WEEK.
[RULE 1303(b)(2)-OFFSET]

4. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 3. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS AS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, AS AMENDED JUNE 5, 2009 OR EARLIER.
[RULE 1401]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC: RULE 109
VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G12960
A/N 505170

Equipment Description:

MIXER, PCBM2, POLYMER CONCRETE BATCH MIXER 2, 4'-0" DIA. X 3'-4" H., 300 GALLON CAPACITY, WITH ONE 7.5 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE MIXER AND CONVEYOR TUBES CONNECTED TO THE MIXER SHALL BE COVERED WITH HEAVY-DUTY PLASTIC WRAP TO MINIMIZE FUGITIVE DUST EMISSIONS.
[RULE 1303(a)(1)-BACT]

4. THE MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 115,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

7. VOC EMISSIONS SHALL BE DETERMINED USING THE FOLLOWING EMISSION FACTORS:

   LOADING/MIXING EMISSIONS = 0.0053 LB VOC/LB RESIN X RESIN USED (LB/DAY)

   MOLDING/DEMOLDING EMISSIONS = 0.0023 LB VOC/LB RESIN X RESIN USED (LB/DAY)

FACILITY PERMIT TO OPERATE
NEW BASIS

8. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

   A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

   B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

   C. MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

   D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS.

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

10. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS AS IDENTIFIED IN RULE 1401, TABLE 1, AS AMENDED SEPTEMBER 10, 2010 OR EARLIER WITH THE EXCEPTION OF STYRENE.
    [RULE 1401]

11. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
    [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

12. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

    IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY

ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions and Requirements:

13. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G12961
A/N 507889

Equipment Description:

BAGHOUSE, B3, EIGHTEEN BAG FILTERS, 127 SQ. FT. TOTAL FILTER AREA VENTING SILO NO. 3, WITH A MECHANICAL SHAKER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE

EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

[RULE 3004 (a)(4)]

PERMIT TO OPERATE

Permit No. G15919
A/N 526762

Equipment Description:

SPRAY BOOTH, SB1, BLEEKER, FLOOR FILTER TYPE, MODEL F-12-8-7, 12'-0" W. X 8'-0" L. X 7'-0" H., WITH TWENTY FOUR 20" X 20" EXHAUST FILTERS AND ONE 3 HP EXHAUST FAN.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

6. VOC EMISSIONS FROM THE USE OF RESIN AND GELCOAT IN THIS EQUIPMENT SHALL BE CALCULATED USING UNIFIED EMISSION FACTORS (UEF) LISTED IN RULE 1132, ATTACHMENT A.
[RULE 1303(b)(2)-OFFSET]

7. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY THE CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE APPROPRIATE VOC EMISSION FACTOR OR VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM THIS EQUIPMENT. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES. [RULE 109, 1303(b)(2)-OFFSET]

9. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS. [RULE 109, 1303(b)(2)-OFFSET]

10. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS. [RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

11. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
    A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
    B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
    C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

    [RULE 3004 (a)(4)]

12. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK. [RULE 3004 (a)(4)]

Emissions and Requirements:

13. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

    VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS

Periodic Monitoring:

4. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

   B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

FACILITY PERMIT TO OPERATE
NEW BASIS

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

5. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G17311
A/N 530322

Equipment Description:

BAGHOUSE, MAC EQUIPMENT, MODEL NO. 2M2F4, FOUR 14" DIA. X 26" L. CARTRIDGE FILTERS, 1.06 SQ. FT. TOTAL FILTER AREA, WITH A MECHANICAL SHAKER, VENTING SILO NOS. 1, 2 AND 3.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
   [RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
   [RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE

EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

[RULE 3004 (a)(4)]

Emissions And Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

A/N 485720
Granted as of
January 1, 2010

Equipment Description:

MODIFICATION OF AN EXISTING AIR POLLUTION CONTROL SYSTEM BY REMOVING THE ENVIROCURE SYSTEM:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. VOLATILE ORGANIC COMPOUND (VOC) CONTROL SYSTEM, ENVIROCURE LLC, MODEL NO. SSFRP2PG2100, CONSISTING OF:

   A. AIR MAKE-UP SYSTEM, WITH TWO 1,500,000 BTU/HR MAXON NP-LE LOW-NOx NATURAL GAS-FIRED BURNERS AND TWO 15 H.P. BLOWERS VENTING ONE SPRAY BOOTH (PERMANENT TOTAL ENCLOSURE).

   B. TWO CATALYTIC ADSORPTION BEDS, EACH 6'-0" W. X 18'-0" L., WITH 5,200 POUNDS OF HAPTITE ADSORBANT MEDIA OR EQUIVALENT.

   C. CATALYTIC OXIDIZER, 2'-8" DIA. X 7'-0" H. COMBUSTION CHAMBER, WITH ONE 2,700,000 BTU/HR MAXON In-3 LOW-NOx NATURAL GAS-FIRED BURNER AND ONE 15 H.P. CATALYST FAN.

AND REPLACING IT WITH A REGENERATIVE THERMAL OXIZIDER:

1. REGENERATIVE THERMAL OXIDIZER, ADWEST, MODEL NO. RETOX 12.0RTO95, 9'-2" W. X 24'-0" L. X 10'-6" H., 12,000 SCFM CAPACITY, WITH ONE 3,434,000 NATURAL GAS-FIRED MAXON KINEMAX 4G BURNER, ONE 7.5 HP COMBUSTION AIR BLOWER AND TWO CERAMIC BEDS, EACH WITH 13,200 LBS OF CERAMIC MEDIA.

2. SPRAY BOOTH, ENVIROCURE, MODEL NO. SSFRP2PG2100, FLOOR TYPE, 50'-5" W. X 55'-0" L. X 10'-0" H., WITH THREE 3'-0" W. X 36'-0" L. FIRST-STAGE EXHAUST FILTERS, FOUR 3'-0" W. X 1'-6" L. SECOND-STAGE EXHAUST FILTERS AND FOUR 3'-0" W. X 1'-6" L. THIRD-STAGE EXHAUST FILTERS AND TWO 15 HP EXHAUST FANS.

3. EXHAUST SYSTEM WITH ONE PERMANENT TOTAL ENCLOSURE AND ONE 50 HP EXHAUST BLOWER VENTING ONE SPRAY BOOTH.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

FACILITY PERMIT TO OPERATE
NEW BASIS

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH A THREE STAGE EXHAUST FILTERS AS SPECIFIED IN THE EQUIPMENT DESCRIPTION.
[RULE 1303(a)(1)-BACT]

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS EACH STAGE OF EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 1.0 INCH OF WATER ACROSS EACH SINGLE STAGE OF EXHAUST FILTERS.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 7, 2008 OR EARLIER.
[RULE 1401]

6. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

7. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE. THE PERMANENT TOTAL ENCLOSURE SHALL MEET ALL THE CRITERIA SPECIFIED IN US EPA METHOD 204 DURING OPERATION OF THIS EQUIPMENT.
[RULE 1303(a)(1)-BACT]

8. THE OPERATOR SHALL OPERATE AND MAINTAIN THE REGENERATIVE THERMAL OXIDIZER ACCORDING TO THE FOLLOWING REQUIREMENTS:

   THE COMBUSTION CHAMBER TEMPERATURE SHALL BE MAINTAINED AT A MINIMUM OF 1,500 DEGREES FAHRENHEIT WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

   THE OPERATOR SHALL OPERATE AND MAINTAIN A TEMPERATURE MEASURING AND RECORDING SYSTEM TO CONTINUOUSLY MEASURE AND RECORD THE COMBUSTION CHAMBER TEMPERATURE PURSUANT TO THE OPERATION AND MAINTENANCE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.7. SUCH A SYSTEM SHALL HAVE AN ACCURACY OF WITHIN 1% OF THE TEMPERATURE BEING MONITORED AND SHALL BE INSPECTED, MAINTAINED, AND CALIBRATED ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS. THE TEMPERATURE INDICATING AND RECORDING SYSTEM SHALL BE IN OPERATION WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

   FOR THE PURPOSE OF THIS CONDITION, A DEVIATION SHALL BE DEFINED AS WHEN A COMBUSTION CHAMBER TEMPERATURE OF LESS THAN 1,500 DEGREES FAHRENHEIT OCCURS DURING NORMAL OPERATION OF THE EQUIPMENT IT SERVES. THE OPERATOR SHALL REVIEW THE RECORDS OF THE COMBUSTION CHAMBER TEMPERATURE ON A DAILY BASIS TO DETERMINE IF A DEVIATION OCCURS OR SHALL INSTALL AN ALARM SYSTEM TO ALERT THE OPERATOR WHEN A DEVIATION OCCURS.

WHENEVER A DEVIATION OCCURS, THE OPERATOR SHALL INSPECT THIS EQUIPMENT TO IDENTIFY THE CAUSE OF SUCH A DEVIATION, TAKE IMMEDIATE CORRECTIVE ACTION TO MAINTAIN THE COMBUSTION CHAMBER TEMPERATURE AT OR ABOVE 1,500 DEGREES FAHRENHEIT, AND KEEP RECORDS OF THE DURATION AND CAUSE (INCLUDING UNKNOWN CAUSE, IF APPLICABLE) OF THE DEVIATION AND THE CORRECTIVE ACTION TAKEN.

ALL DEVIATIONS SHALL BE REPORTED TO THE AQMD PURSUANT TO THE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.9 AND CONDITION NOS. 22 AND 23 IN SECTION K OF THIS PERMIT. THE REPORT SHALL INCLUDE THE TOTAL OPERATING TIME OF THIS EQUIPMENT AND THE TOTAL ACCUMULATED DURATION OF ALL DEVIATIONS FOR EACH SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL SUBMIT AN APPLICATION WITH A QUALITY IMPROVEMENT PLAN (QIP) IN ACCORDANCE WITH 40 CFR PART 64.8 TO THE AQMD IF AN ACCUMULATION OF DEVIATIONS EXCEEDS 5 PERCENT DURATION OF THIS EQUIPMENT'S TOTAL OPERATING TIME FOR ANY SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT. THE REQUIRED QIP SHALL BE SUBMITTED TO THE AQMD WITHIN 90 CALENDAR DAYS AFTER THE DUE DATE FOR THE SEMI-ANNUAL MONITORING REPORT.

THE OPERATOR SHALL INSPECT AND MAINTAIN ALL COMPONENTS OF THIS EQUIPMENT ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS.

THE OPERATOR SHALL KEEP ADEQUATE RECORDS IN A FORMAT THAT IS ACCEPTABLE TO THE AQMD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE REQUIREMENTS SPECIFIED IN THIS CONDITION AND 40 CFR PART 64.9 FOR A MINIMUM OF FIVE YEARS.
[RULE 1303(a)(1)-BACT, 1303(b)(2)-OFFSET, 40CFR Part 64]

9. ALL ACCESS DOORS TO THE PERMANENT TOTAL ENCLOSURES SHALL BE KEPT CLOSED DURING NORMAL OPERATIONS.
[RULE 1303(a)(1)-BACT]

10. THIS EQUIPMENT SHALL BE MAINTAINED AND OPERATED AT A MINIMUM DESTRUCTION EFFICIENCY OF 95% AND AN OVERALL VOC CONTROL EFFICIENCY (COLLECTION AND DESTRUCTION) OF 95% WHEN THE BASIC EQUIPMENT IT SERVES IS IN OPERATION
[RULE 1303(a)(1)-BACT]

11. THE START-UP BURNER SHALL NOT USE MORE THAN 9,000 CUBIC FEET OF NATURAL GAS IN ANY ONE DAY.
[RULE 1303(a)(1)-BACT]

12. A NON-RESETTABLE TOTALIZING FUEL METER SHALL BE INSTALLED AND MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 11.
[RULE 1303(a)(1)-BACT]

13. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

14. IN ADDITION TO THE RECORD KEEPING REQUIREMENT OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). THESE RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.
[RULE 109, 1303(b)(2)-OFFSET]

15. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FOR THIS EQUIPMENT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH THE DISTRICT RULES.
[RULE 109, 1303(b)(2)-OFFSET]

16. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR FIVE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

17. VOC EMISSIONS FROM THE USE OF RESIN AND GELCOAT SHALL BE CALCULATED USING UNIFIED EMISSION FACTORS LISTED IN RULE 1132, ATTACHMENT A.
[RULE 1303(b)(2)-OFFSET]

18. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL CONDUCT SOURCE TESTS UNDER THE FOLLOWING CONDITIONS TO DEMONSTRATE COMPLIANCE WITH THE PERMIT CONDITIONS:

A. THE SOURCE TESTS SHALL BE CONDUCTED NO LATER THAN 180 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

B. A SOURCE TEST PROTOCOL SHALL BE SUBMITTED TO THE DISTRICT NO LATER THAN 60 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE TEST PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE TEST PROTOCOL SHALL INCLUDE THE COMPLETED DISTRICT FORMS ST-1 AND ST-2 SPECIFYING THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304(k), AND A DESCRIPTION OF THE SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

C. THE SOURCE TESTS SHALL CONSIST OF, BUT MAY NOT BE LIMITED TO, TESTING AT THE INLET AND THE EXHAUST OF THE OXIDIZER FOR:

(1) NOX IN PPMV AND LBS/HR (EXAHUST ONLY)
(2) NOX PPMV AND LBS/HR FROM THE START-UP BURNER DURING START UP (EXHAUST ONLY)
(3) CO IN PPMV, AND LBS/HR (EXHAUST ONLY)
(4) VOLATILE ORGANIC COMPOUND (VOC) IN PPMV AND LBS/HR
(5) VOC DESTRUCTION EFFICIENCY
(6) VOC COLLECTION EFFICIENCY

(7) USAGE OF ALL VOC-CONTAINING MATERIALS DURING THE TEST
(8) OXYGEN CONTENT
(9) MOISTURE CONTENT
(10) FLOW RATE
(11) TEMPERATURE
(12) NATURAL GAS USAGE DURING START-UP

D. THE TEST SHALL DETERMINE IF THE SPRAY BOOTH ENCLOSURE IS A PERMANENT TOTAL ENCLOSURE PURSUANT TO METHOD 204.

E. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE MAY BE INCREASED AT THE TIME A PERMIT TO OPERATE IS ISSUED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.

F. A WRITTEN NOTICE OF THE SOURCE TESTS SHALL BE SUBMITTED TO THE AT LEAST 14 DAYS PRIOR TO THE SOURCE TESTING DATE SO THAT AN OBSERVER FROM THE DISTRICT MAY BE PRESENT.

G. TWO COMPLETE COPIES OF THE SOURCE TEST REPORTS SHALL BE SUBMITTED TO THE DISTRICT WITHIN 45 DAYS AFTER THE SOURCE TESTING DATE UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE SOURCE TEST REPORT SHALL INCLUDE, BUT MAY NOT BE LIMITED TO, ALL TESTING DATA REQUIRED BY THIS CONDITION.

H. A TESTING LABORATORY CERTIFIED BY THE CALIFORNIA AIR RESOURCES BOARD IN THE REQUIRED TEST METHODS FOR CRITERIA POLLUTANTS TO BE MEASURED, AND IN COMPLIANCE WITH DISTRICT RULE 304 (NO CONFLICT OF INTEREST) SHALL CONDUCT THE TEST.

I. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES, PURSUANT TO RULE 217.

[RULE 1303(a)(1)-BACT]

19. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL SUBMIT THE RESULTS OF ALL PRELIMINARY TESTS THAT ARE CONDUCTED ON THIS EQUIPMENT FOR INFORMATIONAL PURPOSES TO THE WITHIN 45 DAYS AFTER THE TESTING DATE UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

20. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK.
[RULE 3004 (a)(4)]

21. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER

MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

22. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:

A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.
B. THE TEST SHALL BE CONDUCTED NO LATER THAN MARCH 26, 2010 UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.
C. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING AN APPROVED DISTRICT METHOD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE PERMIT CONDITION(S), RULES AND REGULATIONS.
D. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT MAY BE INCREASED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.
E. THE OPERATOR SHALL COMPLY WITH ADMINISTRATIVE CONDITIONS NOs. 8, 9, AND 10 OF SECTION E OF THIS FACILITY PERMIT.
F. THE OPERATOR SHALL SUBMIT TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SPECIFIED IN CONDITION NO. 9 OF SECTION E OF THIS FACILITY PERMIT TO THE DISTRICT ENGINEERING AND COMPLIANCE DIVISION. THE ENGINEERING COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, COATING, PRINTING AND AEROSPACE OPERATIONS, ATTN: AIR QAULITY AND COMPLIANCE SUPERVISOR, 21865 COPLEY DRIVE, DIAMOND BAR, CA 91765. THE COMPLIANCE COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, P.O. BOX 4941, DIAMOND BAR, CA 91765

[RULE 3004(a)(4)]

Emissions and Requirements:

23. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC: RULE 109
VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 481
PM: 0.1 GR/SCF, RULE 409
CO: 2000 PPMV, RULE 407
NOx: RULE 1147, 30 PPMV
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

A/N 514879
Granted as of
April 22, 2011

Equipment Description:

MIXER, PCBM1, POLYMER CONCRETE BATCH MIXER 1, SHAR SYSTEMS, MODEL NO. D-258NZ, 13'-0" W. X 13'-10" L. X 15'-3" H., 182 GALLON MIXING TANK, WITH THREE HOPPERS AND ONE 25 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE MIXER AND CONVEYOR TUBES CONNECTED TO THE MIXER SHALL BE COVERED WITH HEAVY-DUTY PLASTIC WRAP TO MINIMIZE FUGITIVE DUST EMISSIONS.
[RULE 1303(a)(1)-BACT]

4. THE MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 115,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

7. VOC EMISSIONS SHALL BE DETERMINED USING THE FOLLOWING EMISSION FACTORS:

   LOADING/MIXING EMISSIONS = 0.0053 LB VOC/LB RESIN X RESIN USED (LB/DAY)

   MOLDING/DEMOLDING EMISSIONS = 0.0023 LB VOC/LB RESIN X RESIN USED (LB/DAY)

8. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

FACILITY PERMIT TO OPERATE
NEW BASIS

A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

C. MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS.

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

10. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS AS IDENTIFIED IN RULE 1401, TABLE 1, AS AMENDED SEPTEMBER 10, 2010 OR EARLIER WITH THE EXCEPTION OF STYRENE.
[RULE 1401]

11. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

12. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER

WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

13. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

A/N 515594
Granted as of
April 22, 2011

Equipment Description:

MODIFICATION OF AN EXISTING AIR POLLUTION CONTROL SYSTEM BY REMOVING THE EXISTING SPRAY BOOTH:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. REGENERATIVE THERMAL OXIDIZER, RTO1, ADWEST, MODEL NO. RETOX 12.0RTO95, 9'-2" W. X 24'-0" L. X 10'-6" H., 12,000 SCFM CAPACITY, WITH ONE 3,434,000 BTU/HR NATURAL GAS-FIRED MAXON KINEMAX 4G BURNER, ONE 7.5 HP COMBUSTION AIR BLOWER AND TWO CERAMIC BEDS, EACH WITH 13,200 LBS OF CERAMIC MEDIA.

2. SPRAY BOOTH , ENVIROCURE, MODEL NO. SSFRP2PG2100, FLOOR TYPE, 50'-5" W. X 55'-0" L. X 10'-0" H., WITH THREE 3'-0" W. X 36'-0" L. FIRST-STAGE EXHAUST FILTERS, FOUR 3'-0" W. X 1'-6" L. SECOND-STAGE EXHAUST FILTERS AND FOUR 3'-0" W. X 1'-6" L. THIRD-STAGE EXHAUST FILTERS AND TWO 15 HP EXHAUST FANS.

3. EXHAUST SYSTEM WITH ONE PERMANENT TOTAL ENCLOSURE AND ONE 50 HP EXHAUST BLOWER VENTING ONE SPRAY BOOTH.

AND REPLACING IT WITH A NEW SPRAY BOOTH AND EXHAUST FILTER:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. REGENERATIVE THERMAL OXIDIZER, RTO1, ADWEST, MODEL NO. RETOX 12.0RTO95, 9'-2" W. X 24'-0" L. X 10'-6" H., 12,000 SCFM CAPACITY, WITH ONE 3,434,000 BTU/HR NATURAL GAS-FIRED MAXON KINEMAX 4G BURNER, ONE 7.5 HP COMBUSTION AIR BLOWER AND TWO CERAMIC BEDS, EACH WITH 13,200 LBS OF CERAMIC MEDIA.

2. SPRAY BOOTH, PTE1, SPRAYLINE, MODEL NO. SPRAYLINE 35, AUTOMOTIVE TYPE, 28'-0" W. X 35'-0" L. X 10'-0" H., WITH FORTY-TWO 20" X 20" X 2" FIRST-STAGE EXHAUST FILTERS, FORTY-TWO 20" X 20" X 12" SECOND-STAGE EXHAUST FILTERS AND ONE 5 HP EXHAUST FAN.

3. EXHAUST FILTER SERVING PCBM1 AND PCBM2 WITH A ¼ HP EXHAUST FAN.

4. EXHAUST SYSTEM CONSISTING OF ONE 50 HP EXHAUST BLOWER VENTING ONE SPRAY BOOTH (PTE), AND TWO POLYMER CONCRETE BATCH MIXERS (PCBM1 AND PCBM2).

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

FACILITY PERMIT TO OPERATE
NEW BASIS

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE. THE PERMANENT TOTAL ENCLOSURE SHALL MEET ALL THE CRITERIA SPECIFIED IN US EPA METHOD 204 DURING OPERATION OF THIS EQUIPMENT.
[RULE 1303(a)(1)-BACT]

4. THE EXHAUST FILTER SERVING PCBM1 AND PCBM2 SHALL OPERATE AT A CONTROL EFFICIENCY OF AT LEAST 98%.
[RULE 1303(a)(1)-BACT]

5. ALL ACCESS DOORS TO THE PERMANENT TOTAL ENCLOSURES SHALL BE KEPT CLOSED DURING NORMAL OPERATIONS.
[RULE 1303(a)(1)-BACT]

6. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH TWO-STAGE EXHAUST FILTERS AS SPECIFIED IN THE EQUIPMENT DESCRIPTION.
[RULE 1303(a)(1)-BACT]

7. GAUGES SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE SPRAY BOOTH EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER FOR THE FIRST STAGE AND 1.0 INCH OF WATER FOR THE SECOND STAGE.
[RULE 1303(a)(1)-BACT]

8. A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTER(S) INSIDE THE EXHAUST FILTER BOX. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.5 INCH OF WATER.
[RULE 1303(a)(1)-BACT]

9. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF SEPTEMBER 10, 2010 OR EARLIER.
[RULE 1401]

10. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

11. VOC EMISSIONS FROM THE USE OF RESIN AND GELCOAT SHALL BE CALCULATED USING UNIFIED EMISSION FACTORS LISTED IN RULE 1132, ATTACHMENT A.
[RULE 1303(b)(2)-OFFSET]

12. TO ENSURE COMPLIANCE WITH THE EMISSION LIMIT OF THIS PERMIT, THE OPERATOR SHALL:

FACILITY PERMIT TO OPERATE
NEW BASIS

A. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

C. MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS.

ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

13. THE OPERATOR SHALL OPERATE AND MAINTAIN THE REGENERATIVE THERMAL OXIDIZER ACCORDING TO THE FOLLOWING REQUIREMENTS:

A. THE COMBUSTION CHAMBER TEMPERATURE SHALL BE MAINTAINED AT A MINIMUM OF 1,400 DEGREES FAHRENHEIT WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

B. THE OPERATOR SHALL OPERATE AND MAINTAIN A TEMPERATURE MEASURING AND RECORDING SYSTEM TO CONTINUOUSLY MEASURE AND RECORD THE COMBUSTION CHAMBER TEMPERATURE PURSUANT TO THE OPERATION AND MAINTENANCE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.7. SUCH A SYSTEM SHALL HAVE AN ACCURACY OF WITHIN 1% OF THE TEMPERATURE BEING MONITORED AND SHALL BE INSPECTED, MAINTAINED, AND CALIBRATED ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS. THE TEMPERATURE INDICATING AND RECORDING SYSTEM SHALL BE IN OPERATION WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

C. FOR THE PURPOSE OF THIS CONDITION, A DEVIATION SHALL BE DEFINED AS WHEN A COMBUSTION CHAMBER TEMPERATURE OF LESS THAN 1,400 DEGREES FAHRENHEIT OCCURS DURING NORMAL OPERATION OF THE EQUIPMENT IT SERVES. THE OPERATOR SHALL REVIEW THE RECORDS OF THE COMBUSTION CHAMBER TEMPERATURE ON A DAILY BASIS TO DETERMINE IF A DEVIATION OCCURS OR SHALL INSTALL AN ALARM SYSTEM TO ALERT THE OPERATOR WHEN A DEVIATION OCCURS.

FACILITY PERMIT TO OPERATE
NEW BASIS

D. WHENEVER A DEVIATION OCCURS, THE OPERATOR SHALL INSPECT THIS EQUIPMENT TO IDENTIFY THE CAUSE OF SUCH A DEVIATION, TAKE IMMEDIATE CORRECTIVE ACTION TO MAINTAIN THE COMBUSTION CHAMBER TEMPERATURE AT OR ABOVE 1,400 DEGREES FAHRENHEIT AND KEEP RECORDS OF THE DURATION AND CAUSE (INCLUDING UNKNOWN CAUSE, IF APPLICABLE) OF THE DEVIATION AND THE CORRECTIVE ACTION TAKEN.

E. ALL DEVIATIONS SHALL BE REPORTED TO THE AQMD PURSUANT TO THE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.9 AND CONDITION NOS. 22 AND 23 IN SECTION K OF THIS PERMIT. THE REPORT SHALL INCLUDE THE TOTAL OPERATING TIME OF THIS EQUIPMENT AND THE TOTAL ACCUMULATED DURATION OF ALL DEVIATIONS FOR EACH SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT.

F. THE OPERATOR SHALL SUBMIT AN APPLICATION WITH A QUALITY IMPROVEMENT PLAN (QIP) IN ACCORDANCE WITH 40 CFR PART 64.8 TO THE AQMD IF AN ACCUMULATION OF DEVIATIONS EXCEEDS 5% DURATION OF THIS EQUIPMENT'S TOTAL OPERATING TIME FOR ANY SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT. THE REQUIRED QIP SHALL BE SUBMITTED TO THE AQMD WITHIN 90 CALENDAR DAYS AFTER THE DUE DATE FOR THE SEMI-ANNUAL MONITORING REPORT.

G. THE OPERATOR SHALL INSPECT AND MAINTAIN ALL COMPONENTS OF THIS EQUIPMENT ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS.

H. THE OPERATOR SHALL KEEP ADEQUATE RECORDS IN A FORMAT WHICH IS ACCEPTABLE TO THE AQMD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE REQUIREMENTS SPECIFIED IN THIS CONDITION AND 40 CFR PART 64.9 FOR A MINIMUM OF FIVE YEARS.

[RULE 1303(a)(1)-BACT, 40CFR PART 64]

14. THE REGENERATIVE THERMAL OXIDIZER SHALL BE MAINTAINED AND OPERATED AT A MINIMUM VOC DESTRUCTION EFFICIENCY OF 95% AND AN OVERALL VOC CONTROL EFFICIENCY (DESTRUCTION AND COLLECTION) OF 95% WHEN THE EQUIPMENT IT SERVES IS IN OPERATION.
[RULE 1303(a)(1)-BACT, 1303(b)(2)-OFFSET]

15. THE START-UP BURNER SHALL NOT USE MORE THAN 9,000 CUBIC FEET OF NATURAL GAS IN ANY ONE DAY.
[RULE 1303(a)(1)-BACT]

16. A NON-RESETTABLE TOTALIZING FUEL METER SHALL BE INSTALLED AND MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 15.
[RULE 1303(a)(1)-BACT]

17. THE START-UP BURNER SHALL COMPLY WITH RULE 1147.
[RULE 1147]

18. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL CONDUCT A SOURCE TEST UNDER THE FOLLOWING CONDITIONS:

FACILITY PERMIT TO OPERATE
NEW BASIS

A. THE SOURCE TEST SHALL BE CONDUCTED NO LATER THAN 180 DAYS AFTER THE INITIAL START-UP OF THE REGENERATIVE THERMAL OXIDIZER UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

B. A SOURCE TEST PROTOCOL SHALL BE SUBMITTED TO DISTRICT ENGINEER, TODD IWATA, NO LATER THAN 60 DAYS AFTER THE INITIAL START-UP OF THE REGENERATIVE THERMAL OXIDIZER UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE TEST PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE TEST PROTOCOL SHALL INCLUDE COMPLETED DISTRICT FORMS ST-1 AND ST-2 SPECIFYING THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304(k), AND A DESCRIPTION OF THE SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

C. THE SOURCE TEST SHALL CONSIST OF, BUT MAY NOT BE LIMITED TO, A TEST OF THE INLET AND EXHAUST OF THE REGENERATIVE THERMAL OXIDIZER WHEN THE SPRAY BOOTH AND TWO MIXERS (PCBM 1 AND 2) ARE IN OPERATION SIMULTANEOUSLY FOR:

(1) VOC IN PPMV AND LBS/HR AT THE RTO'S EXHAUST.
(2) VOC IN PPMV AND LBS/HR AT EACH MIXER'S MIXING AND DISCHARGE POINTS.
(3) VOC DESTRUCTION EFFICIENCY OF RTO.
(4) VOC COLLECTION EFFICIENCY OF RTO AND MIXERS.
(5) OXIDES OF NITROGEN (NO_X) IN PPMV AND LBS/HR FROM THE START-UP BURNER DURING START UP (RTO EXHAUST).
(6) CARBON MONOXIDE (CO) IN PPMV AND LBS/HR (RTO EXHAUST).
(7) NATURAL GAS USAGE DURING START-UP.
(8) USAGE OF ALL VOC-CONTAINING MATERIALS DURING THE TEST.
(9) OXYGEN CONTENT.
(10) MOISTURE CONTENT.
(11) FLOW RATE.
(12) TEMPERATURE.

D. THE SOURCE TEST SHALL BE CONDUCTED WHILE BOTH MIXERS ARE MIXING AND DISCHARGING.

E. THE TEST SHALL DETERMINE IF THE SPRAY BOOTH ENCLOSURE IS A PERMANENT TOTAL ENCLOSURE PURSUANT TO METHOD 204.

F. THE SOURCE TEST SHALL BE CONDUCTED DURING NORMAL OPERATION WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. THE OPERATING TEMPERATURE IN THE COMBUSTION CHAMBER SHALL BE RECORDED DURING THE ENTIRE TESTING PERIOD AND INCLUDED IN THE SOURCE TEST REPORT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE MAY BE INCREASED AT THE TIME A PERMIT TO OPERATE IS ISSUED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST. IN ADDITION, THE USAGE OF ALL VOC-CONTAINING MATERIALS (GEL COAT, SOLVENTS, COATINGS, ETC.) IN THE EQUIPMENT VENTED TO THIS EQUIPMENT SHALL BE RECORDED DURING THE TEST.

FACILITY PERMIT TO OPERATE
NEW BASIS

G. IN ADDITION TO THE TEST DURING NORMAL OPERATION, A SOURCE TEST FOR NOx AND CO EMISSIONS SHALL ALSO BE CONDUCTED DURING THE START-UP OF THE OXIDIZER BEFORE THE PROCESS AIR STREAM FROM THE SPRAY BOOTH AND MIXERS IS INTRODUCED INTO THE OXIDIZER.

H. A WRITTEN NOTICE OF THE SOURCE TEST SHALL BE SUBMITTED TO THE DISTRICT ENGINEER, TODD IWATA, AT LEAST 14 DAYS PRIOR TO THE SOURCE TESTING DATE SO THAT AN OBSERVER FROM THE DISTRICT MAY BE PRESENT.

I. TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SHALL BE SUBMITTED TO THE DISTRICT ENGINEER, TODD IWATA, WITHIN 45 DAYS AFTER THE SOURCE TESTING DATE. THE SOURCE TEST REPORT SHALL INCLUDE, BUT MAY NOT BE LIMITED TO, ALL TESTING DATA REQUIRED BY THIS CONDITION.

J. A TESTING LABORATORY CERTIFIED BY THE CALIFORNIA AIR RESOURCES BOARD IN THE REQUIRED TEST METHODS FOR CRITERIA POLLUTANTS TO BE MEASURED, AND IN COMPLIANCE WITH DISTRICT RULE 304 (NO CONFLICT OF INTEREST) SHALL CONDUCT THE TESTS.

K. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES, PURSUANT TO RULE 217.

L. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL SUBMIT THE RESULTS OF ALL TESTS (INCLUDING PRELIMINARY TESTS) THAT ARE CONDUCTED ON THIS EQUIPMENT FOR INFORMATIONAL PURPOSES TO THE DISTRICT ENGINEER, TODD IWATA, WITHIN 45 DAYS AFTER THE TESTING DATE.

[RULE 1303(a)(1)-BACT]

19. THE OWNER OR OPERATOR SHALL CONDUCT A SOURCE TEST TO DETERMINE AN EMISSION FACTOR(S), IN POUNDS OF VOC PER POUND OF RESIN, FOR BOTH MIXERS (PCBM1 AND PCBM2) OPERATED AT THIS FACILITY UNDER THE FOLLOWING CONDITIONS:

A. THE SOURCE TEST SHALL BE CONDUCTED TO CALCULATE MONTHLY VOC EMISSIONS USING THE EMISSION FACTOR(S) DERIVED FROM THE SOURCE TEST.

B. A SOURCE TEST PROTOCOL SHALL BE SUBMITTED TO DISTRICT ENGINEER, TODD IWATA. THE TEST PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE TEST PROTOCOL SHALL INCLUDE COMPLETED

DISTRICT FORMS ST-1 AND ST-2 SPECIFYING THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304(k), AND A DESCRIPTION OF THE SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

C. THE SOURCE TEST SHALL BE CONDUCTED DURING NORMAL OPERATION OF THE MIXERS WHICH INCLUDES AT A MINIMUM, LOADING, MIXING, CASTING, MOLDING AND DEMOLDING. THE TOTAL QUANTITY OF ALL MATERIALS USED IN THE MIXERS DURING THE TEST SHALL BE RECORDED.

D. A WRITTEN NOTICE OF THE SOURCE TEST SHALL BE SUBMITTED TO THE DISTRICT ENGINEER, TODD IWATA, AT LEAST 14 DAYS PRIOR TO THE SOURCE TESTING DATE SO THAT AN OBSERVER FROM THE DISTRICT MAY BE PRESENT.

E. TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SHALL BE SUBMITTED TO THE DISTRICT ENGINEER, TODD IWATA, WITHIN 45 DAYS AFTER THE SOURCE TESTING DATE. THE SOURCE TEST REPORT SHALL INCLUDE, BUT MAY NOT BE LIMITED TO, ALL TESTING DATA REQUIRED BY THIS CONDITION.

F. A TESTING LABORATORY CERTIFIED BY THE CALIFORNIA AIR RESOURCES BOARD IN THE REQUIRED TEST METHODS FOR CRITERIA POLLUTANTS TO BE MEASURED, AND IN COMPLIANCE WITH DISTRICT RULE 304 (NO CONFLICT OF INTEREST) SHALL CONDUCT THE TESTS.

G. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES, PURSUANT TO RULE 217.

[RULE 1303(a)(1)-BACT]

20. THE OWNER OR OPERATOR OF THIS EQUIPMENT SHALL SUBMIT THE RESULTS OF ALL TESTS (INCLUDING PRELIMINARY TESTS) THAT ARE CONDUCTED ON THIS EQUIPMENT FOR INFORMATIONAL PURPOSES TO THE DISTRICT ENGINEER, TODD IWATA, WITHIN 45 DAYS AFTER THE TESTING DATE.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

21. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK.
[RULE 3004 (a)(4)]

22. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

23. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:

A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.

B. THE TEST SHALL BE CONDUCTED NO LATER THAN MARCH 26, 2015 UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

C. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING AN APPROVED DISTRICT METHOD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE PERMIT CONDITION(S), RULES AND REGULATIONS.

D. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT MAY BE INCREASED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.

E. THE OPERATOR SHALL COMPLY WITH ADMINISTRATIVE CONDITIONS NOs. 8, 9, AND 10 OF SECTION E OF THIS FACILITY PERMIT.

F. THE OPERATOR SHALL SUBMIT TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SPECIFIED IN CONDITION NO. 9 OF SECTION E OF THIS FACILITY PERMIT TO THE DISTRICT ENGINEERING AND COMPLIANCE DIVISION. THE ENGINEERING COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, COATING, PRINTING, PLATING, MILITARY AND ENTERTAINMENT OPERATIONS, ATTN: AIR QUALITY AND COMPLIANCE SUPERVISOR, 21865 COPLEY DRIVE, DIAMOND BAR, CA 91765. THE COMPLIANCE COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, P.O. BOX 4941, DIAMOND BAR, CA 91765

[RULE 3004(a)(4)]

Emissions and Requirements:

24. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC: RULE 109
VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

RULE 219 EQUIPMENT

Equipment Description:

RULE 219 EXEMPT EQUIPMENT, COATING EQUIPMENT, PORTABLE, ARCHITECTURAL COATINGS.

Periodic Monitoring:

1. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   FOR ARCHITECTURAL APPLICATIONS WHERE NO THINNERS, REDUCERS, OR OTHER VOC CONTAINING MATERIALS ARE ADDED, MAINTAIN SEMI-ANNUAL RECORDS OF ALL COATINGS CONSISTING OF (a) COATING TYPE, (b) VOC CONTENT AS SUPPLIED IN GRAMS PER LITER (g/l) OF MATERIALS FOR LOW-SOLIDS COATINGS, AND (c) VOC CONTENT AS SUPPLIED IN g/l OF COATING, LESS WATER AND EXEMPT SOLVENT, FOR OTHER COATINGS.

   FOR OTHER ARCHITECTURAL APPLICATIONS WHERE THINNERS, REDUCERS, OR OTHER VOC CONTAINING MATERIALS ARE ADDED, MAINTAIN DAILY RECORDS FOR EACH COATING CONSISTING OF (a) COATING TYPE, (b) VOC CONTENT AS APPLIED IN GRAMS PER LITER (g/l) OF MATERIALS USED FOR LOW-SOLIDS COATINGS, AND (c) VOC CONTENT AS APPLIED IN g/l OF COATING, LESS WATER AND EXEMPT SOLVENT, FOR OTHER COATINGS.

   [RULE 3004 (a) (4)]

Emissions and Requirements:

2. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 1113, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

RULE 219 EQUIPMENT

Equipment Description:

Section D: Application Type

The facility is in ○ RECLAIM ◉ Title V ○ RECLAIM & Title V Program (please check if applicable)

6. Reason for Submitting Application (Select only ONE):

- ○ New Construction (Permit to Construct)
- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Equipment Operating Without A Permit or Expired Permit*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Administrative Change
- ○ Change of Condition For Permit To Operate
- ○ Equipment On-Site But Not Constructed or Operational
- ○ Change of Condition For Permit To Construct
- ◉ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Change of Location—Moving to New Site
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. Estimated Start Date of Operation/Construction (MM/DD/YYYY): 01/01/2009

8. Description of Equipment:
1. Mixer, Shar Systems, Model No. D-258NZ, 182 Gallons, Three Hoppers, 4' x 4'-4" x 4'-4" Each, 25 HP Motor

2. Storage Tank, Polyester Resin, Vertical Cylindrical, 10'D x 10'8"H, 4000 Gallon Capacity

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? ◉ No ○ Yes

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each) 0

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
◉ No ○ Yes If yes, provide NOV/NC #:

Section E: Facility Business Information

13. What type of business is being conducted at this equipment location? Fiberglass Reinforced Plastic Products Manufacturing

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 326199

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? ◉ No ○ Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

Mr. Eric Hansen
Project Engineer
New Basis
2626 Kansas Avenue
Riverside, CA 92507

SUBJECT: Title V Facility Permit Revision (Facility ID: 040806)

Dear Mr. Hansen:

Please find attached the revised Title Page, Table of Contents, and Section D of your Title V Facility Permit. The revised sections reflect the approval of the permit revision requested in your Application No. 451350. The proposed permit revision was submitted to EPA for 45-day review on February 15, 2006. This permit revision includes the addition of the following equipment:

Equipment	Application No.	Permit No.	Permit Type
Casting Machine No. 1	450806	F81487	PO
Casting Machine No. 2	450807	F81488	PO

Please review the attached sections carefully. Insert the attached sections into your Facility Permit and discard the earlier versions. Questions concerning changes to your permit should be directed to Mr. Todd Iwata at (909) 396-2574.

Sincerely,

Fred Lettice
Senior Manager
Coating, Printing & Aerospace Operations

Facility Equipment and Requirements
(Section D)

This section consists of a table listing all permitted equipment at the facility, facility wide requirements, all individual Permits to Construct and Permits to Operate issued to various equipment at the facility, and Rule 219-exempt equipment subject to source-specific requirements. Each permit and Rule 219-exempt equipment will list operating conditions including periodic monitoring requirements, and applicable emission limits and requirements that the equipment is subject to. Also included is the rule origin and authority of each emission limit and permit condition.

FACILITY PERMIT TO OPERATE

PERMITTED EQUIPMENT LIST

THE FOLLOWING IS A LIST OF ALL PERMITS TO CONSTRUCT AND PERMITS TO OPERATE AT THIS FACILITY:

Application number	Permit to Operate number	Equipment description
113604	M36580	STORAGE TANK PLASTICS & RESINS
141729	M57251	STORAGE TANK FX RF W/CTL POLYESTER
450806	F81487	PLASTICS & RESINS BLENDING
450807	F81488	PLASTICS & RESINS BLENDING
161667	D07464	BAGHOUSE, AMBIENT TEMP (> 500 SQ FT)
327365	F07034	SPRAY BOOTH STYRENATED RESINS
327367	F07035	SPRAY BOOTH STYRENATED RESINS
327368	F07036	PLASTICS & RESINS BLENDING
327370	F07037	SPRAY BOOTH STYRENATED RESINS
327371	F07038	SPRAY BOOTH STYRENATED RESINS
327372	F07039	SPRAY BOOTH STYRENATED RESINS
348524	F24082	PLASTICS & RESINS BLENDING
348527	F24083	PLASTICS & RESINS BLENDING
416447	F65485	MIXING TANK
416450		SPRAY BOOTH W/MULTIPLE VOC CONTROL EQUIPMENT

NOTE: EQUIPMENT LISTED ABOVE THAT HAVE NO CORRESPONDING PERMITS TO OPERATE NUMBER ARE ISSUED PERMITS TO CONSTRUCT. THE ISSUANCE OR DENIAL OF THEIR PERMITS TO OPERATE IS SUBJECT TO ENGINEERING FINAL REVIEW. ANY OTHER APPLICATIONS THAT ARE STILL BEING PROCESSED AND HAVE NOT BEEN ISSUED PERMITS TO CONSTRUCT OR PERMITS TO OPERATE WILL NOT BE FOUND IN THIS TITLE V PERMIT.

FACILITY PERMIT TO OPERATE
NEW BASIS

FACILITY WIDE CONDITION(S)

Condition(s):

1. EXCEPT FOR OPEN ABRASIVE BLASTING OPERATIONS, THE OPERATOR SHALL NOT DISCHARGE INTO THE ATMOSPHERE FROM ANY SINGLE SOURCE OF EMISSIONS WHATSOEVER ANY AIR CONTAMINANT FOR A PERIOD OR PERIODS AGGREGATING MORE THAN THREE MINUTES IN ANY ONE HOUR WHICH IS:

   A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
   B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION. [RULE 401]

2. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO THE AB 2588 TOXIC HOT SPOTS PROGRAM. [RULE 1402]

3. MATERIAL SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST. [RULE 109, 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5,133 POUNDS IN ANY ONE CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS). [RULE 1303(b)(2)-OFFSET]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS). [RULE 109, 1303(b)(2)-OFFSET]

6. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES. [RULE 109, 1303(b)(2)-OFFSET]

7. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEEDING 5 YEARS. [RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAINING MATERIAL FROM THE FACILITY FOR 5 YEARS.
[RULE 109, 1303(b)(2)-OFFSET]

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 5 YEARS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M36580
A/N 113604

Equipment Description and Conditions:

STORAGE TANK, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M57251
A/N 141729

Equipment Description and Conditions:

STORAGE TANK, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81487
A/N 450806

Equipment Description and Conditions:

CASTING MACHINE NO. 1, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
[RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL EITHER:

   A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

   B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81488
A/N 450807

Equipment Description and Conditions:

CASTING MACHINE NO. 2, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
[RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL EITHER:

   A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

   B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. D07464
A/N 161667

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. BAGHOUSE, FABRICMAX, ENVELOPE FILTER TYPE, MODEL NO. F-150-1.5-H55, MECHANICAL SHAKER, WITH 150 SQUARE FEET FILTER AREA.

2. EXHAUST SYSTEM WITH A 1.5 HP EXHAUST FAN VENTING A RESIN-DOUGH MIXER AND LOADING CELL.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE SHALL BE DISCHARGED INTO INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.
[RULE 3004 (a)(4)]

Emissions And Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07033
A/N 327362

Equipment Description:

SPRAY BOOTH NO. 1, BLEEKER, FLOOR FILTER TYPE, MODEL F-40-10-24, 40'-4" W. X 28'-8" L. X 12'-6" H., WITH ONE HUNDRED THIRTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 5 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT

[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC:	RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC:	RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
VOC	RULE 109
PM	RULE 481
PM	RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07034
A/N 327365

Equipment Description:

SPRAY BOOTH NO. 5, BLEEKER, FLOOR FILTER TYPE, MODEL F-12-8-7, 12'-4" W. X 10'-6" L. X 8'-0" H., WITH TWENTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 2 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT

   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT. FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC:	RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC:	RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
VOC	RULE 109
PM	RULE 481
PM	RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07035
A/N 327367

Equipment Description:

SPRAY BOOTH NO. 2, BLEEKER, FLOOR FILTER TYPE, MODEL F-48-12-24, 48'-0" W. X 28'-8" L. X 12'-0" H., WITH ONE HUNDRED SIXTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 7.5 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT

[RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC:	RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC:	RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS

[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT
   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC:	RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC:	RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
VOC	RULE 109
PM	RULE 481
PM	RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F07039
A/N 327372

Equipment Description:

SPRAY BOOTH NO. 4, BLEEKER, FLOOR FILTER TYPE, MODEL F-12-8-7, 12'-0" W. X 10'-6" L. X 8'-0" H., WITH TWENTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 2 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

6. THE MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

7. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

   A. POLYESTER RESIN (SPRAY), 5% BY WEIGHT

   B. POLYESTER GEL COAT (SPRAY), 10% BY WEIGHT

   C. POLYESTER RESIN (CAST), 1.6% BY WEIGHT
   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

8. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

9. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK.
   [RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC:	RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC:	RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
VOC	RULE 109
PM	RULE 481
PM	RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F24082
A/N 348524

Equipment Description:

MIXER, RESIN DOUGH, CUSTOM MADE, 47.5 IN. DIA. (INTERNAL) X 42 IN. H., WITH A 5 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109]

4. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 16,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

5. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 4. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

6. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1 WITH AN EFFECTIVE DATE OF SEPTEMBER 8, 1998 OR EARLIER.
[RULE 1401]

7. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE

THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL EITHER:

A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. ' VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

9. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM- RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

A. VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST;

B. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions And Requirements:

8. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

A/N 416450
Granted as of
January 8, 2004

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. VOLATILE ORGANIC COMPOUND (VOC) CONTROL SYSTEM, ENVIROCURE LLC, MODEL NO. SSFRP2PG2100, CONSISTING OF:

   A. AIR MAKE-UP SYSTEM, WITH TWO 1,500,000 BTU/HR MAXON NP-LE LOW-NOX NATURAL GAS-FIRED BURNERS AND TWO 15 H.P. BLOWERS VENTING ONE SPRAY BOOTH (PERMANENT TOTAL ENCLOSURE).

   B. TWO HAPTITE ADSORPTION BEDS, EACH 6'-0" W. X 18'-0" L., WITH 5,200 POUNDS OF HAPTITE ADSORBANT MEDIA.

   C. CATALYTIC OXIDIZER, 2'-8" DIA. X 7'-0" H. COMBUSTION CHAMBER, WITH ONE 2,700,000 BTU/HR MAXON LN-3 LOW-NOX NATURAL GAS-FIRED BURNER AND ONE 15 H.P. CATALYST FAN.

2. SPRAY BOOTH, ENVIROCURE, MODEL NO. SSFRP2PG2100, FLOOR TYPE, 50'-5" W. X 55'-0" L. X 10'-0" H., WITH THREE 3'-0" W. X 36'-0" L. FIRST-STAGE EXHAUST FILTERS, FOUR 3'-0" W. X 1'-6" L. SECOND-STAGE EXHAUST FILTERS AND FOUR 3'-0" W. X 1'-6" L. THIRD-STAGE EXHAUST FILTERS AND TWO 15 HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
   [RULE 1303(a)(1)-BACT]

FACILITY PERMIT TO OPERATE
NEW BASIS

4. A GAUGE SHALL BE INSTALLED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS EACH STAGE OF EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 1.0 INCH OF WATER ACROSS EACH SINGLE STAGE OF EXHAUST FILTERS.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMIANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MAY 3, 2002 OR EARLIER.
[RULE 1401]

6. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

7. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE PURSUANT TO EPA METHOD 204.
[RULE 1303(a)(1)-BACT]

8. A TEMPERATURE OF NOT LESS THAN 650 DEGREES FARENHEIT SHALL BE MAINTAINED IN THE CATALYTIC OXIDIZER AT THE INLET OF THE CATALYST BED WITHIN TEN MINUTES OF THE START-UP OF THE CURE/REGENERATION CYCLE.
[RULE 1303(a)(1)-BACT]

9. A PYROMETER WITH RECORDER SHALL BE INSTALLED AND MAINTAINED TO MEASURE AND RECORD THE TEMPERATURE AT THE INLET OF THE CATALYST BED OF THE OXIDIZER.
[RULE 1303(a)(1)-BACT]

10. THE CATALYST MEDIA IN THE CATALYTIC OXIDIZER SHALL BE TESTED FOR ACTIVITY EFFICIENCY ACCORDING TO THE ASTM METHOD ON AN ANNUAL BASIS.
[RULE 1303(a)(1)-BACT]

11. THE CONTROL EQUIPMENT SHALL BE OPERATED AT A MINIMUM REMOVAL EFFICIENCY OF 90% FOR THE CARBON ADSORBER, A MINIMUM DESTRUCTION EFFICIENCY OF 95% FOR THE CATALYTIC OXIDIZER AND A MINIMUM OVERALL CONTROL EFFICIENCY OF 90% FOR THE ENTIRE SYSTEM.
[RULE 1303(a)(1)-BACT]

12. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).
[RULE 109 & RULE 1303(b)(2)-OFFSET]

13. IN ADDITION TO THE RECORD KEEPING REQUIREMENT OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). THESE RECORDS SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT.
[RULE 109 & RULE 1303(b)(2)-OFFSET]

14. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FOR THIS EQUIPMENT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH THE DISTRICT RULES. [RULE 109 & RULE 1303(b)(2)-OFFSET]

15. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS. [RULE 109 & RULE 1303(b)(2)-OFFSET]

16. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS. [RULE 109 & RULE 1303(b)(2)-OFFSET]

17. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR FIVE YEARS AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST. [RULE 109 & RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

18. VOC EMISSIONS FROM THE USE OF RESIN (NON-ATOMIZED APPLICATION) SHALL BE CALCULATED USING EITHER THE FOLLOWING EMISSION FACTORS OR OTHER EMISSION FACTORS APPROVED IN WRITING BY THE EXECUTIVE OFFICER:

A. FOR STYRENE CONTENTS BETWEEN 33% AND 50%, USE THE FOLLOWING EMISSION FACTORS (AT DIFFERENT STYRENE CONTENTS):

71(AT 33%), 74(AT 34%), 77(AT 35%), 80(AT 36%), 83(AT 37%), 86(AT 38%), 89(AT 39%), 93(AT 40%), 96(AT 41%), 99(AT 42%), 102(AT 43%), 105(AT 44%), 108(AT 45%), 111(AT 46%), 115(AT 47%), 118(AT 48%), 121(AT 49%), 124(AT 50%)

B. FOR STYRENE CONTENTS <33%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = 0.107 x (%STYRENE) x 2000

C. FOR STYRENE CONTENTS >50%, USE THE FOLLOWING FORMULA:
EMISSION FACTOR = [(0.157 x % STYRENE) - 0.0165] x 2000

D. THESE FACTORS SHOULD BE USED ONLY FOR MECHANICAL NON-ATOMIZED APPLICATION OF RESINS. MECHANICAL NON-ATOMIZED APPLICATION USES A MECHANICAL FLUID DELIVERY SYSTEM TO APPLY RESIN TO THE GLASS REINFORCEMENT WITHOUT ATOMIZING THE RESIN FLUID STREAM. NON-ATOMIZED APPLICATION EQUIPMENT INCLUDES FLOW COATERS, FLOW CHOPPERS, AND PRESSURE-FED ROLLERS. FLOW COATER GUNS AND FLOW CHOPPER GUNS ARE NOT CONSIDERED TO BE "SPRAY GUNS" DUE TO THE ABSENCE OF ATOMIZATION.

THE ABOVE EMISSION FACTORS ARE IN POUNDS OF VOC EMITTED PER TON OF RESIN PROCESSED. THE ABOVE STYRENE CONTENTS ARE STYRENE MONOMER CONTENTS IN RESIN AS SUPPLIED, PLUS ANY EXTRA STYRENE MONOMER ADDED BY THE MOLDER, BUT BEFORE THE ADDITION OF OTHER ADDITIVES SUCH AS POWDERS, FILLERS, GLASS, ETC.

THE VALUE FOR STYRENE CONTENT IN PERCENT BY WEIGHT (%STYRENE) IN THE FORMULAS IN (B) AND (C) ABOVE SHOULD BE INPUT AS A FRACTION. FOR EXAMPLE, USE THE INPUT VALUE 0.30 FOR A RESIN WITH 30% STYRENE CONTENT BY WEIGHT.

19. THE OPERATOR OF THIS EQUIPMENT SHALL CONDUCT A SOURCE TEST UNDER THE FOLLOWING CONDITIONS:

A. THE TEST SHALL BE CONDUCTED NO LATER THAN 180 DAYS AFTER THE INITIAL START UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

B. THE TEST SHALL DETERMINE THE COLLECTION EFFICIENCY OF THE SPRAY BOOTH, REMOVAL EFFICIENCY OF THE CARBON ADSORBER, DESTRUCTION EFFICIENCY OF THE CATALYTIC OXIDIZER AND OVERALL CONTROL EFFICIENCY OF THE AIR POLLUTION CONTROL SYSTEM FOR NON-METHANE ORGANIC GASES.

C. THE TEST SHALL DETERMINE EMISSIONS TO THE ATMOSPHERE OF NON-METHANE ORGANIC GASES, OXIDES OF NITROGEN, AND CARBON MONOXIDE IN PPM AND POUNDS PER HOUR.

D. THE TEST SHALL DETERMINE IF THE SPRAY BOOTH ENCLOSURE IS A PERMANENT TOTAL ENCLOSURE PURSUANT TO METHOD 204.

E. THE TEST PROTOCOL SHALL BE SUBMITTED TO DISTRICT PERSONNEL FOR APPROVAL NO LATER THAN 60 DAYS AFTER THE INITIAL START-UP OF THIS EQUIPMENT UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT. THE PROTOCOL SHALL BE APPROVED IN WRITING BY THE DISTRICT BEFORE THE TEST COMMENCES. THE PROTOCOL SHALL INCLUDE THE PROPOSED OPERATING CONDITIONS OF THE EQUIPMENT DURING THE TEST, THE IDENTITY OF THE TESTING LABORATORY, A STATEMENT FROM THE TESTING LABORATORY CERTIFYING IT MEETS THE CRITERIA IN DISTRICT RULE 304 (k), AND A DESCRIPTION OF ALL SAMPLING AND ANALYTICAL PROCEDURES TO BE USED.

F. THE DISTRICT ENGINEER IDENTIFIED ON THE PERMIT TO CONSTRUCT SHALL BE NOTIFIED OF THE DATE AND TIME OF AT LEAST 14 DAYS PRIOR TO THE TEST. OR WITHIN A TIME PERIOD AGREED UPON BY THE DISTRICT ENGINEER.

G. SAMPLING FACILITIES SHALL COMPLY WITH THE DISTRICT'S "GUIDELINES FOR CONSTRUCTION OF SAMPLING AND TESTING FACILITIES", PURSUANT TO RULE 217.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

20. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK.
[RULE 3004 (a)(4)]

21. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
    A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
    B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
    C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
    [RULE 3004 (a)(4)]

22. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:
    A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.
    B. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING EPA METHOD 25 OR 25A MEASURED OVER A 60 MINUTE AVERAGING TIME PERIOD.
    C. THE TEST SHALL BE CONDUCTED TO DEMONSTRATE COMPLIANCE WITH THE REQUIREMENTS OF CAPTURE EFFICIENCY, REMOVAL EFFICIENCY, DESTRUCTION EFFICIENCY AND OVERALL CONTROL EFFICIENCY SPECIFIED IN THIS PERMIT.
    [RULE 3004 (a)(4)]

Emissions And Requirements:

FACILITY PERMIT TO OPERATE
NEW BASIS

23. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

Section D - Application Type

6. The Facility Is: ( ) Not In RECLAIM or Title V ( ) In RECLAIM (●) In Title V ( ) In RECLAIM & Title V Programs

7. Reason for Submitting Application (Select only ONE):

7a. New Equipment or Process Application:
- ( ) New Construction (Permit to Construct)
- ( ) Equipment On-Site But Not Constructed or Operational
- ( ) Equipment Operating Without A Permit *
- ( ) Compliance Plan
- ( ) Registration/Certification
- ( ) Streamlined Standard Permit

7b. Facility Permits: E6
- (●) Title V Application or Amendment (Refer to Title V Matrix)
- ( ) RECLAIM Facility Permit Amendment

7c. Equipment or Process with an Existing/Previous Application or Permit:
- ( ) Administrative Change
- ( ) Alteration/Modification
- ( ) Alteration/Modification without Prior Approval *
- ( ) Change of Condition
- ( ) Change of Condition without Prior Approval *
- ( ) Change of Location
- ( ) Change of Location without Prior Approval *
- ( ) Equipment Operating with an Expired/Inactive Permit *

Existing or Previous Permit/Application
If you checked any of the items in 7c., you MUST provide an existing Permit or Application Number:

* A Higher Permit Processing Fee and additional Annual Operating Fees (up to 3 full years) may apply (Rule 301(c)(1)(D)(i)).

8a. Estimated Start Date of Construction (mm/dd/yyyy):
8b. Estimated End Date of Construction (mm/dd/yyyy):
8c. Estimated Start Date of Operation (mm/dd/yyyy):

9. Description of Equipment or Reason for Compliance Plan (list applicable rule):
Title V Revision, Modification of Silo No. 5 and associated Bin Vent

10. For identical equipment, how many additional applications are being submitted with this application?
(Form 400-A required for each equipment / process)

11. Are you a Small Business as per AQMD's Rule 102 definition?
(10 employees or less and total gross receipts are $500,000 or less OR a not-for-profit training center) (●) No ( ) Yes

12. Has a Notice of Violation (NOV) or a Notice to Comply (NC) been issued for this equipment? (●) No ( ) Yes
If Yes, provide NOV/NC#:

Section E - Facility Business Information

13. What type of business is being conducted at this equipment location?
Polymer Concrete Manufacturing

14. What is your business primary NAICS Code?
(North American Industrial Classification System) 327390

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? (●) No ( ) Yes

16. Are there any schools (K-12) within 1000 feet of the facility property line? (●) No ( ) Yes

Section F - Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application are true and correct.

17. Signature of Responsible Official:

18. Title of Responsible Official:
VP of Engineering/Technology

19. I wish to review the permit prior to issuance.
(This may cause a delay in the application process.) ( ) No (●) Yes

20. Print Name:
Ruchir Shanbhag

21. Date: 9/13/2018

22. Do you claim confidentiality of data? (If Yes, see Instructions.) (●) No ( ) Yes

23. Check List: [ ] Authorized Signature/Date [ ] Form 400-CEQA [ ] Supplemental Form(s) (ie., Form 400-E-xx) [ ] Fees Enclosed

18 SEP 14 AM 8:56

South Coast Air Quality Management District

Form 400-CEQA
California Environmental Quality Act (CEQA) Applicability

Mail To:
SCAQMD
P.O. Box 4944
Diamond Bar, CA 91765-0944

Tel: (909) 396-3385
www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project [1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines § 15060(a)]. Form 400-CEQA and the instructions for guidance on completing this form are available at http://www.aqmd.gov/home/regulations/ceqa/ceqa-permit-forms or http://www.aqmd.gov/home/permits/permit-application-forms. For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one Form 400-CEQA is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385.

Section A – Facility Information

1. Facility Name (Business Name of Operator to Appear on the Permit): New Basis, LLC

2. SCAQMD Facility ID: 40806

3. Project Description: Title V Revision, modification of Storage Silo No. 5 with associated Bin Vent

Section B – Review For Exemption From Further CEQA Action

Check "Yes" or "No" as applicable. If "Yes" is checked for any question in Section B, skip Section C and proceed to page 2 and complete Section D - Signatures.

	Yes	No	Is this application for:
1.	○	⊙	**A request for a change of operator only (without equipment or process change modifications)?**
2.	○	⊙	**A functionally identical permit unit replacement with no increase in equipment unit rating or emissions?**
3.	○	⊙	**A change of daily VOC permit limit to a monthly VOC permit limit?**
4.	○	⊙	**Equipment damaged as a result of a disaster during state of emergency?**
5.	○	⊙	**A Title V (e.g., SCAQMD Regulation XXX) permit renewal without equipment or process change modifications?**
6.	○	⊙	**A Title V administrative permit revision?**
7.	○	⊙	**The conversion of an existing permit into an initial Title V permit?**

Section C – Review of Impacts Which May Trigger Further CEQA Review

Check "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	
1.	○	○	**Is this project specifically evaluated in a previously certified or adopted CEQA document?** If "Yes" is checked, attach a copy of the signed Notice of Determination to this form.
2.	○	○	**Is this project specifically exempted from CEQA by another entity (e.g., city or agency)?** If "Yes" is checked, attach a copy of the signed Notice of Exemption or other documentation from the entity to this form.
3.	○	○	**Is this project part of a larger project?** If "Yes" is checked, attach a separate sheet to briefly describe the larger project.
4.	○	○	**Will the project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound listed on Form 400-CEQA, Table 1 - Regulated Substances List and Threshold Quantities for Accidental Release Prevention** [http://www.aqmd.gov/home/regulations/ceqa/ceqa-permit-forms]**?** If "Yes" is checked, attach a separate sheet to identify each hazardous material and corresponding quantity to be transported, stored, or used.
5.	○	○	**Will the project emit any air toxic listed on Form 400-CEQA, Table 2 - Other Air Toxics and Their Screening Levels** [http://www.aqmd.gov/home/regulations/ceqa/ceqa-permit-forms] [2]**?** If "Yes" is checked, attach a separate sheet to identify each air toxic and corresponding quantity to be emitted.
6.	○	○	**Will the project require any demolition, excavation, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc

[2] Form 400-CEQA, Table 2 – Other Air Toxics and Their Screening Levels, contains a list of air toxics that either do not have a cancer potency (CP) or reference exposure level (REL) approved by the Office of Environmental Health Hazards Assessment (OEHHA) or have a combination of OEHHA-approved and non-approved CPs or RELs.

© South Coast Air Quality Management District, Form 400-CEQA (2017.12)

Section C – Review of Impacts Which May Trigger Further CEQA (concluded)

	Yes	No	
7.	○	○	**Will the project utilize a boiler, engine, or other combustion equipment that uses fuel (e.g., gasoline, diesel, natural gas, liquefied petroleum gas (LPG), or landfill gas)?** If "Yes" is checked, then the applicant will need to calculate the amount of GHGs from fuel use via on the Greenhouse Gas (GHG) online estimator [http://www.aqmd.gov/home/regulations/ceqa/ceqa-permit-forms], and attaching the printout or by conducting hand calculations and providing the documentation. Refer to the Instructions for Form 400-CEQA for guidance.
8.	○	○	**Will the project utilize other types of equipment not addressed in Question 7 that require the use of, or will generate, any chemicals listed on Form 400-CEQA, Table 3 - Greenhouse Gases** [http://www.aqmd.gov/home/regulations/ceqa/ceqa-permit-forms]**?** If "Yes" is checked, attach a separate sheet to identify each equipment unit, the chemical name(s), and the quantity of each chemical identified.
9.	○	○	**Will the project include the open outdoor storage of dry bulk solid materials that could generate dust?** If "Yes" is checked, include a plot plan with the application package.
10.	○	○	**Will the project result in or make worse noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, landfills, materials recovery/recycling facilities (MRF), and compost materials or other types of greenwaste (e.g., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to SCAQMD Rule 402 – Nuisance.
11.	○	○	**Will the project cause an increase of emissions from marine vessels, trains and/or airplanes?**
12.	○	○	**Will the project increase demand for potable water at the facility by more than 262,820 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "Yes" answer to this question: 1) a project that generates steam; 2) a project that uses water as part of operating air pollution control equipment; 3) a project that requires water as part of the production process; 4) a project that requires a new, or the expansion of an existing, sewage treatment facility, new water lines, sewage lines, sewage hook-ups etc.; 5) a project where the water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; 6) a project that requires new or the expansion of existing, water supply and conveyance facilities; and, 7) a project that requires water to hydrotest pipelines, storage tanks etc. for structural integrity.
13.	○	○	**Will the project create an increase in the mass inflow of effluents to a public wastewater treatment facility that would require a new, or revision to an existing, National Pollutant Discharge Elimination System (NPDES) or other related permit at the facility?**
14.	○	○	**Will the project result in the need for more than 350 new employees?**
15.	○	○	**Will the project result in an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
16.	○	○	**Will the project result in an increase in customer traffic by more than 700 visits per day?**
17.	○	○	**Will the project result in temporary or permanent noise or vibration in excess of what is allowed by the applicable local noise ordinance?**
18.	○	○	**Will the project create a permanent need for new or additional solid waste disposal?** Check "No" if the projected potential amount of solid waste to be generated by the project is less than five tons per day.
19.	○	○	**Will the project create a permanent need for new or additional hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes to be generated by the project is less than 42 cubic yards per day (or equivalent in pounds).
20.	○	○	**Will the project include equipment that after installation or modification will change the visual character of the site and its surroundings or block views?**
21.	○	○	**Will the project have equipment that will create a new source of external lighting that will be visible at the property line?**

Section D – SIGNATURES

I HEREBY CERTIFY THAT ALL INFORMATION CONTAINED HEREIN AND INFORMATION SUBMITTED WITH THIS APPLICATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THIS FORM IS A SCREENING TOOL AND THAT THE SCAQMD RESERVES THE RIGHT TO CONSIDER OTHER PERTINENT INFORMATION IN DETERMINING CEQA APPLICABILITY.

1. Signature of Responsible Official of Firm:		2. Title of Responsible Official of Firm: VP of Engineering and Technology

Form 500-A2

Title V Application Certification

Mail To:
SCAQMD
P.O. Box 4944
Diamond Bar, CA 91765-0944
Tel: (909) 396-3385
www.aqmd.gov

Section I - Operator Information

1. Facility Name (Business Name of Operator That Appears On Permit): New Basis, LLC

2. Valid AQMD Facility ID (Available On Permit Or Invoice Issued By AQMD): 040806

3. This Certification is submitted with a (Check one):

a. (•) Title V Application (Initial, Revision or Renewal)
b. ( ) Supplement/Correction to a Title V Application
c. ( ) MACT Part 1

4. Is Form 500-C2 included with this Certification? ( ) Yes ( ) No

Section II - Responsible Official Certification Statement

*Read each statement carefully and check each that applies – **You must check 3a or 3b.***

1. For Initial, Permit Renewal, and Administrative Application Certifications:

a. ( ) The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1,

i. [ ] except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. [ ] except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. ( ) The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. [✓] The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

3. For MACT Hammer Certifications:

a. ( ) The facility is subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63), also known as the MACT "hammer." The following information is submitted with a Title V application to comply with the Part 1 requirements of Section 112(j).

b. (•) The facility is not subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63).

Section III - Authorization/Signature

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statement and information in this document and in all attached application forms and other materials are true, accurate, and complete.

1. Signature of Responsible Official:	2. Title of Responsible Official:
	Vice President of Engineering and Technology
3. Print Name:	**4. Date:**
Ruchir Shanbhag	9/13/2016
5. Phone #:	**6. Fax #:**

Form 500-B
Title V List of Exempt Equipment

Mail To:
SCAQMD
P.O. Box 4944
Diamond Bar, CA 91765-0944
Tel: (909) 396-3385
www.aqmd.gov

Use this form for all application submittals requesting an initial Title V permit or permit renewal. If you are applying for a permit revision, you may also use this form to have your exempt equipment listing updated prior to renewing your permit.

This form is designed to summarize all of the equipment at a facility that is exempt per SCAQMD Rule 219 from SCAQMD permit requirements (e.g., I.C. Engines ≤ 50 BHP, Boilers < 2 MM BTU/hr etc.). This equipment can be listed according to category. However, if there is a specific device that is vented to control equipment, then the equipment must be listed separately. Trivial activities listed on the back of this form or the Technical Guidance Document do not have to be listed on this form. Note: If your facility is in the RECLAIM program, it is not necessary to repeat any equipment currently listed in Appendix A of the RECLAIM permit.

Section I - Operator Information

1. Facility Name (Business Name of Operator That Appears On Permit): New Basis

2. Valid AQMD Facility ID (Available On Permit Or Invoice Issued By AQMD): 040806

3. Check box if facility is in RECLAIM program: ☐

4. Provide Current Permit Issue Date: 12/20/2016

5. Permit Revision No.:

Section II - Summary of Equipment Exempt from Permit Requirements (Including Portable)

Exempt Equipment Description [e.g., Small Boilers (75,000 BTU/hr-2,000,000 BTU/hr)]	Venting to Control (Device# or Application#)	Control Device Description	Basis for Exemption [e.g., Rule 219 (b)(2), 05/19/00]	Source Specific Rule [e.g., Rule 1146.2]
Architectural Coating			Rule 219 (l)(9)	
Hand Wiping			Rule 219 (o)(4)

Application For Permit To Construct and Permit To Operate

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385
www.aqmd.gov

Section A: Operator Information

1. **Business Name of Operator To Appear On The Permit:** NewBasis, LLC

2. **Valid AQMD Facility ID (Available on Permit or Invoice issued by AQMD):** 040806

3. **Owner's Business Name (only if different from Business Name of Operator):**

Section B: Equipment Location

4. **Equipment Location Address:**
For equipment operated at various locations in AQMD's jurisdiction, provide address of initial site

2626 Kansas Avenue
Street Address

Riverside, CA, 92507
City State Zip Code

County: ○ Los Angeles ○ Orange ○ San Bernardino ◉ Riverside

Contact Name: Ruchir Shanbhag

Contact Title: Director of Engineering Phone: (951) 787-0600

Fax: (951) 787-0632 E-Mail: rshanbhag@newbasis.com

Section C: Permit Mailing Address

5. **Permit and Correspondence Information:**
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name:

Contact Title: Phone:

Fax: E-Mail:

Section D: Application Type

The facility is in ○ RECLAIM ◉ Title V ○ RECLAIM & Title V Program (please check if applicable)

6. **Reason for Submitting Application (Select only ONE):**

- ○ New Construction (Permit to Construct)
- ◉ Equipment Operating Without A Permit or Expired Permit*
- ○ Administrative Change
- ○ Equipment On-Site But Not Constructed or Operational
- ○ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit
- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Change of Condition For Permit To Operate
- ○ Change of Condition For Permit To Construct
- ○ Change of Location—Moving to New Site

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. **Estimated Start Date of Operation/Construction (MM/DD/YYYY):** 03/01/2010

8. **Description of Equipment:**
Polymer Concrete Batch Mixer 2 (PCBM2); custom made; tank size: 47.5 inches internal diameter x 40 inches height, 300 gallon capacity; 7.5 HP motor.

9. **Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction?** ◉ No ○ Yes

10. **For Identical equipment, how many additional applications are being submitted with this application?** (Form 400-A required for each) 0

11. **Are you a Small Business as per AQMD's Rule 102 definition?** (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. **Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?**
○ No ◉ Yes If yes, provide NOV/NC #: P53806

Section E: Facility Business Information

13. **What type of business is being conducted at this equipment location?** Polymer concrete and FRP products manufacturing

14. **What is your businesses primary NAICS Code** (North American Industrial Classification System)? 327390

15. **Are there other facilities in the SCAQMD jurisdiction operated by the same operator?** ◉ No ○ Yes

16. **Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location?** ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

17. **Signature of Responsible Official:** K. [signature]

18. **Title:** CEO

19. **Print Name:** Karl Stockbridge

20. **Date:** 12-21-09

Section D - Application Type

6. The Facility Is: ( ) Not In RECLAIM or Title V ( ) In RECLAIM (●) In Title V ( ) In RECLAIM & Title V Programs

7. Reason for Submitting Application (Select only ONE):

7a. New Equipment or Process Application:
- ( ) New Construction (Permit to Construct)
- ( ) Equipment On-Site But Not Constructed or Operational
- ( ) Equipment Operating Without A Permit *
- ( ) Compliance Plan
- ( ) Registration/Certification
- ( ) Streamlined Standard Permit

7b. Facility Permits:
- (●) Title V Application or Amendment (Refer to Title V Matrix) (74)
- ( ) RECLAIM Facility Permit Amendment

7c. Equipment or Process with an Existing/Previous Application or Permit:
- ( ) Administrative Change
- ( ) Alteration/Modification
- ( ) Alteration/Modification without Prior Approval *
- ( ) Change of Condition
- ( ) Change of Condition without Prior Approval *
- ( ) Change of Location
- ( ) Change of Location without Prior Approval *
- ( ) Equipment Operating with an Expired/Inactive Permit *

Existing or Previous Permit/Application
If you checked any of the items in 7c., you MUST provide an existing Permit or Application Number:

* A Higher Permit Processing Fee and additional Annual Operating Fees (up to 3 full years) may apply (Rule 301(c)(1)(D)(i)).

8a. Estimated Start Date of Construction (mm/dd/yyyy):

8b. Estimated End Date of Construction (mm/dd/yyyy):

8c. Estimated Start Date of Operation (mm/dd/yyyy):

9. Description of Equipment or Reason for Compliance Plan (list applicable rule): Title V Permit Renewal Application

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each equipment / process)

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less OR a not-for-profit training center) (●) No ( ) Yes

12. Has a Notice of Violation (NOV) or a Notice to Comply (NC) been issued for this equipment? (●) No ( ) Yes
If Yes, provide NOV/NC#:

Section E - Facility Business Information

13. What type of business is being conducted at this equipment location? Utility Box Manufacturing

14. What is your business primary NAICS Code? (North American Industrial Classification System) 327390

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? (●) No ( ) Yes

16. Are there any schools (K-12) within 1000 feet of the facility property line? (●) No ( ) Yes

Section F - Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application are true and correct

17. Signature of Responsible Official:

18. Title of Responsible Official: VP of Engineering/Technology

19. I wish to review the permit prior to issuance. (This may cause a delay in the application process.) (●) No ( ) Yes

20. Print Name: Ruchir Shanbhag

21. Date:

22. Do you claim confidentiality of data? (If Yes, see instructions.) (●) No ( ) Yes

23. Check List: [X] Authorized Signature/Date [X] Form 400-CEQA [ ] Supplemental Form(s) (ie., Form 400-E-xx) [X] Fees Enclosed

7. Estimated Start Date of Operation/Construction (MM/DD/YYYY): 12/01/2005

8. Description of Equipment:
Silo 3, 7,473 gallon capacity, steel construction, cone style, silo dimensions: cylinder radius 72 in; cylinder height 78 in; cone height 84 in.

INSTALLED 12/1/05

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? ◉ No ○ Yes

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each) 0

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
○ No ◉ Yes If yes, provide NOV/NC #: P56359

Section E: Facility/Business Information

13. What type of business is being conducted at this equipment location?
Polymer concrete and FRP products manufacturing

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 327390

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? ◉ No ○ Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

17. Signature of Responsible Official: K. Stockbridge

18. Title: CEO

19. Print Name: Karl Stockbridge

20. Date: 01/08/2010

South Coast Air Quality Management District

Form 400-CEQA

California Environmental Quality Act (CEQA) Applicability

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385

www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Lori Inga at (909) 396-3109.

FACILITY INFORMATION

Business Name of Operator to Appear on the Permit:	Facility ID (6-Digit):
NewBasis, LLC	040806

Project Description:

Silo 3, 7,473 gallon capacity, steel construction, cone style, silo dimensions: cylinder radius 72 in; cylinder height 78 in; cone height 84 in. Silo has been in operation since 12/1/2005.

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	○	●	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
B.	○	●	**A request for a change of permittee only (without equipment modifications)?**
C.	○	●	**Equipment certification or equipment registration** (qualifies for Rule 222)?
D.	○	●	**A functionally identical permit unit replacement with no increase in rating or emissions?**
E.	○	●	**A change of daily VOC permit limit to a monthly VOC permit limit?**
F.	○	●	**Equipment damaged as a result of a disaster during state of emergency?**
G.	○	●	**A Title V** (i.e., Regulation XXX) **permit renewal (without equipment modifications)?**
H.	○	●	**A Title V administrative permit revision?**
I.	○	●	**The conversion of an existing permit into an initial Title V permit?**

If **"Yes"** is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	○	●	***Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?*** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	○	●	**Is this project part of a larger project?**
			Section II – Air Quality
3.	○	●	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4.	○	●	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package.

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, *clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit.* For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

[2] To download the CEQA guidelines, visit http://ceres.ca.gov/env_law/state.html.

[3] To download this form and the instructions, visit http://www.aqmd.gov/ceqa or http://www.aqmd.gov/permit

© South Coast Air Quality Management District, Form 400-CEQA (2006.02)

	Yes	No	
5.	○	●	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance.
6.	○	●	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	○	●	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	○	●	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	○	●	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply):
	○	●	**a. the need for more than 350 new employees?**
	○	●	**b. an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	○	●	**c. increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	○	●	**Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?**
			Section VI – Public Services
12.			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply):
	○	●	**a. Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	○	●	**b. Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

REMINDER: For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc.

SIGNATURES

TITLE V APPLICATION CERTIFICATION

- TO BE COMPLETED BY TITLE V FACILITIES ONLY -

Section IV - Title V Application

1. This is an application for a(n) (Check all applicable boxes and provide the requested information as appropriate):
   a. ☐ Initial Title V Permit
   b. ☐ Permit Renewal: Provide current permit expiration date: ____/____/____
   c. ☐ Administrative Permit Revision (Check all that apply)
      ☐ Change of Ownership. (Complete and attach equipment-specific Form 400-E-xx series forms)
      ☐ Change of Facility Information
      X Other, Please specify: (2) Functionally Identical Unit Replacements for (2) existing permitted manual mixers
   d. X Other (Complete and attach equipment specific Form 400-E-XX series form(s) to this form if your application involves permit action for new construction, change of location, non-administrative permit revision, alternative operating scenario (AOS), permit shield, streamlined permit conditions, or temporary source permit.)
2. Is this facility required to prepare a Risk Management Plan (RMP) for another agency? ☐ Yes X No

Section V - Title V Submittal Checklist

1. Enter the quantity of each type form submitted in the space provided:

Title V
Form 500-A2

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
Application Certification

Section I - Facility Information

1. Facility Name: NEWBASIS — Facility ID (6-Digit): 40806
2. This Certification is submitted with a (Check one):
   a. ☒ Title V Application (Initial, Revision, Renewal)
   b. ☐ Supplement/Correction to a Title V Application
   c. ☐ MACT Part 2 Application
3. Is Form 500-C2 included with this Certification? a. ☐ Yes b. ☒ No

Section II - Responsible Official Certification Statement

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attached application forms and other materials are true, accurate, and complete. You must select item 3A or 3B.

Read each statement carefully and check each that applies.

1. For Initial, Permit Renewal, or Administrative Change Application Certifications:

a. ☐ The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1,

i. ☐ except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. ☐ except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. ☐ The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. ☒ The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

3. For MACT Hammer Certifications:

a. ☐ The facility is subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63), also known as the MACT "hammer." (If Part 1 Notification has not been submitted, complete 500-MACT and submit with this form.)

b. ☐ The facility is not subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63).

Signature of Responsible Official	11/22/05 (Date)

Acid Rain Facilities Only: Turn page over & complete Section III

Acid Rain facilities must certify their compliance status of the devices subject to applicable requirements under Title IV by an individual who meets the definition of Designated (or Alternate) Representative in 40 CFR Part 72.

Section III - Designated Representative Certification Statement

1. *For Acid Rain Facilities Only*: I am authorized to make this submission on behalf of the owners and operators of the affected source or affected units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.

Section D - Application Type

6. The Facility Is: ( ) Not In RECLAIM or Title V ( ) In RECLAIM (●) In Title V ( ) In RECLAIM & Title V Programs

7. Reason for Submitting Application (Select only ONE):

7a. New Equipment or Process Application:

- ( ) New Construction (Permit to Construct)
- ( ) Equipment On-Site But Not Constructed or Operational
- ( ) Equipment Operating Without A Permit *
- (●) Compliance Plan (25)
- ( ) Registration/Certification
- ( ) Streamlined Standard Permit

7b. Facility Permits:

- ( ) Title V Application or Amendment (Refer to Title V Matrix)
- ( ) RECLAIM Facility Permit Amendment

7c. Equipment or Process with an Existing/Previous Application or Permit:

- ( ) Administrative Change
- ( ) Alteration/Modification
- ( ) Alteration/Modification without Prior Approval *
- ( ) Change of Condition
- ( ) Change of Condition without Prior Approval *
- ( ) Change of Location
- ( ) Change of Location without Prior Approval *
- ( ) Equipment Operating with an Expired/Inactive Permit *

Existing or Previous Permit/Application
If you checked any of the items in 7c., you MUST provide an existing Permit or Application Number:

* A Higher Permit Processing Fee and additional Annual Operating Fees (up to 3 full years) may apply (Rule 301(c)(1)(D)(i)).

8a. Estimated Start Date of Construction (mm/dd/yyyy):

8b. Estimated End Date of Construction (mm/dd/yyyy):

8c. Estimated Start Date of Operation (mm/dd/yyyy):

9. Description of Equipment or Reason for Compliance Plan (list applicable rule):
Compliance Assurance Monitoring (CAM) Plan for Regenerative Thermal Oxidizer (A/N: 554835)

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each equipment / process)

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less OR a not-for-profit training center) (●) No ( ) Yes

12. Has a Notice of Violation (NOV) or a Notice to Comply (NC) been issued for this equipment? (●) No ( ) Yes
If Yes, provide NOV/NC#:

Section E - Facility Business Information

13. What type of business is being conducted at this equipment location?
Utility Box Manufacturing

14. What is your business primary NAICS Code? (North American Industrial Classification System) 327390

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? (●) No ( ) Yes

16. Are there any schools (K-12) within 1000 feet of the facility property line? (●) No ( ) Yes

Section F - Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application are true and correct.

17. Signature of Responsible Official:

18. Title of Responsible Official:
VP of Engineering/Technology

19. I wish to review the permit prior to issuance. (This may cause a delay in the application process.) (●) No ( ) Yes

20. Print Name:
Ruchir Shanbhag

21. Date:

22. Do you claim confidentiality of data? (If Yes, see instructions.) (●) No ( ) Yes

South Coast Air Quality Management District

Form 400-CEQA

California Environmental Quality Act (CEQA) Applicability

Mail To:
SCAQMD
P.O. Box 4944
Diamond Bar, CA 91765-0944

Tel: (909) 396-3385
www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 or (909) 396-2668.

Section A - Facility Information

1. **Facility Name** (Business Name of Operator To Appear On The Permit): New Basis

2. **Valid AQMD Facility ID** (Available On Permit Or Invoice Issued By AQMD): 040806

3. **Project Description:** Compliance Assurance Monitoring (CAM) Plan for Regenerative Thermal Oxidizer (A/N: 554835)

Section B - Review For Exemption From Further CEQA Action

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
1.	○	◉	A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project? If yes, attach a copy of the signed Notice of Determination to this form.
2.	○	◉	A request for a change of permittee only (without equipment modifications)?
3.	○	◉	A functionally identical permit unit replacement with no increase in rating or emissions?
4.	○	◉	A change of daily VOC permit limit to a monthly VOC permit limit?
5.	○	◉	Equipment damaged as a result of a disaster during state of emergency?
6.	○	◉	A Title V (i.e., Regulation XXX) permit renewal (without equipment modifications)?
7.	○	◉	A Title V administrative permit revision?
8.	○	◉	The conversion of an existing permit into an initial Title V permit?

If "Yes" is checked for any question in Section B, your application does not require additional evaluation for CEQA applicability. Skip to Section D - Signatures on page 2 and sign and date this form.

Section C - Review of Impacts Which May Trigger CEQA

Complete Parts I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Part I - General
1.	○	◉	Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project? Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	○	◉	Is this project part of a larger project? If yes, attach a separate sheet to briefly describe the larger project.
			Part II - Air Quality
3.	○	◉	Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?
4.	○	◉	Does this project include the open outdoor storage of dry bulk solid materials that could generate dust? If Yes, include a plot plan with the application package.

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

[2] To download the CEQA guidelines, visit http://ceres.ca.gov/env_law/state.html.

[3] To download this form and the instructions, visit http://www.aqmd.gov/ceqa or http://www.aqmd.gov/permit

© South Coast Air Quality Management District, Form 400-CEQA (2014.07)

Section C - Review of Impacts Which May Trigger CEQA (cont.)			
	Yes	No	Part II - Air Quality (cont.)
5.	○	◉	Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements? For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance.
6.	○	◉	Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?
7.	○	◉	Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]
			Part III – Water Resources
8.	○	◉	Will the project increase demand for water at the facility by more than 5,000,000 gallons per day? The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	○	◉	Will the project require construction of new water conveyance infrastructure? Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Part IV – Transportation/Circulation
10.			Will the project result in (Check all that apply):
	○	◉	a. the need for more than 350 new employees?
	○	◉	b. an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?
	○	◉	c. increase customer traffic by more than 700 visits per day?
			Part V – Noise
11.	○	◉	Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?
			Part VI – Public Services
12.			Will the project create a permanent need for new or additional public services in any of the following areas (Check all that apply):
	○	◉	a. Solid waste disposal? Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	○	◉	b. Hazardous waste disposal? Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

REMINDER: *For each "Yes" response in Section C, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc.*

Section D - Signatures

I HEREBY CERTIFY THAT ALL INFORMATION CONTAINED HEREIN AND INFORMATION SUBMITTED WITH THIS APPLICATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THIS FORM IS A SCREENING TOOL AND THAT THE SCAQMD RESERVES THE RIGHT TO CONSIDER OTHER PERTINENT INFORMATION IN DETERMINING CEQA APPLICABILITY.

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
Application Certification

Section I - Facility Information

1. Facility Name: NEW BASIS — Facility ID (6-Digit): 040806
2. This Certification is submitted with a (Check one):
   a. ☒ Title V Application (Initial, Revision, Renewal)
   b. ☐ Supplement/Correction to a Title V Application
   c. ☐ MACT Part 2 Application
3. Is Form 500-C2 included with this Certification? a. ☐ Yes b. ☒ No

Section II - Responsible Official Certification Statement

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attached application forms and other materials are true, accurate, and complete. You must select item 3A or 3B.

Read each statement carefully and check each that applies.

1. For Initial, Permit Renewal, or Administrative Change Application Certifications:

a. ☒ The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1.

i. ☐ except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. ☐ except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. ☐ The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. ☐ The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

3. For MACT Hammer Certifications:

a. ☐ The facility is subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63), also known as the MACT "hammer." (If Part 1 Notification has not been submitted, complete 500-MACT and submit with this form.)

b. ☒ The facility is not subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63).

Title V
Form 500-B

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
List of Exempt Equipment

Use this form for all application submittals requesting an initial Title V permit or permit renewal. If you are applying for a permit revision, you may also use this form to have your exempt equipment listing updated prior to renewing your permit.

This form is designed to summarize all of the equipment at a facility that is exempt from AQMD permit requirements (e.g., I.C. Engines ≤ 50 BHP, Boilers < 2 MM BTU/hr etc.). This equipment can be listed according to category. However, if there is a specific device that is vented to control equipment, then the equipment must be listed separately. Trivial activities identified on the back of this form or the Technical Guidance Document need not be listed on this form. Note: If your facility is in the RECLAIM program, it is not necessary to repeat any equipment currently listed in Appendix A of the RECLAIM permit.

Facility Name: New Basis

Check box if facility is in RECLAIM program: ☐ Facility ID (6-Digit): 040806

Provide Current Permit Issue Date (mo/day/yr): 03/28/06 Permit Revision No.: 1

Section I - Summary of Equipment Exempt from Permit Requirements (Including Portable)

Exempt Equipment Description [e.g., Small Boilers (75,000 BTU/hr-2,000,000 BTU/hr)]	Venting to Control Device Number	Control Device Description	Basis for Exemption [e.g., Rule 219 (b)(2), 05/19/00]	Source Specific Rule [e.g. Rule 1146.2]

Trivial Activities

- Combustion emissions from propulsion of mobile sources, except for vessel emissions from Outer Continental Shelf sources
- Air-conditioning units used for human comfort that do not have applicable requirements under Title VI of the Act
- Ventilating units used for human comfort that do not exhaust air pollutants into the ambient air from any manufacturing/industrial or commercial process
- Non-commercial food preparation
- Consumer use of office equipment and products, not including printers or businesses primarily involved in photographic reproduction
- Janitorial services and consumer use of janitorial products
- Internal combustion engines used for landscaping purposes
- Laundry activities, except for dry-cleaning and steam boilers
- Bathroom/toilet vent emissions
- Emergency (backup) electrical generators at residential locations
- Tobacco smoking rooms and areas
- Blacksmith forges
- Plant maintenance and upkeep activities (e.g., grounds-keeping, general repairs, cleaning, painting, welding, plumbing, re-tarring roofs, installing insulation, and paving parking lots) provided these activities are not conducted as part of a manufacturing process, are not related to the source's primary business activity, and not otherwise triggering a permit modification[1]
- Repair or maintenance shop activities not related to the source's primary business activity, not including emissions from surface coating or de-greasing (solvent metal cleaning) activities, and not otherwise triggering a permit modification
- Portable electrical generators that can be moved by hand from one location to another[2]
- Hand-held equipment for buffing, polishing, cutting, drilling, sawing, grinding, turning or machining wood, metal or plastic
- Brazing, soldering and welding equipment, and cutting torches related to manufacturing and construction activities that do not result in emission of HAP metals[3]
- Bench-scale laboratory equipment used for physical or chemical analysis, but not lab fume hoods or vents[4]
- Routine calibration and maintenance of laboratory equipment or other analytical instruments
- Equipment used for quality control/assurance or inspection purposes, including sampling equipment used to withdraw materials for analysis
- Hydraulic and hydrostatic testing equipment
- Environmental chambers not using hazardous air pollutant (HAP) gasses
- Shock chambers
- Humidity chambers
- Solar simulators
- Fugitive emission related to movement of passenger vehicles, provided any required f plan or its equivalent is submitted
- Process water filtration systems and demineralizers
- Demineralized water tanks and demineralizer vents Air compressors and pneumatical including hand tools
- Batteries and battery charging stations, except at battery manufacturing plants
- Storage tanks, vessels and containers holding or storing liquid substances that will no HAP[5]
- Storage tanks, reservoirs, and pumping and handling equipment of any size containin grease, animal fat and nonvolatile aqueous salt solutions, provided appropriate lids ar
- Equipment used to mix and package soaps, vegetable oil, grease, animal fat, and nor solutions, provided appropriate lids and covers are utilized
- Drop hammers or hydraulic presses for forging or metalworking
- Equipment used exclusively to slaughter animals, but not including other equipment a such as rendering cookers, boilers, heating plants, incinerators, and electrical power g
- Vents from continuous emissions monitors and other analyzers
- Natural gas pressure regulator vents, excluding venting at oil and gas production facil
- Hand-held applicator equipment for hot melt adhesives with no VOC in the adhesive f
- Equipment used for surface coating, painting, dipping or spraying operations, except t VOC or HAP
- CO_2 lasers, used only on metals and other materials which do not emit HAP in the prc
- Consumer use of paper trimmers/binders
- Electric or steam-heated drying ovens and autoclaves, but not the emissions from the being processed in the ovens or autoclaves or the boilers delivering the steam
- Salt baths using nonvolatile salts that do not result in emissions of any regulated air p
- Laser trimmers using dust collection to prevent fugitive emissions
- Boiler water treatment operations, not including cooling towers
- Oxygen scavenging (de-aeration) of water
- Ozone generators
- Fire suppression systems
- Emergency road flares
- Steam vents and safety relief valves
- Steam leaks
- Steam cleaning operations
- Steam sterilizers

---

[1] Cleaning and painting activities qualify as trivial if they are not subject to VOC or HAP control requirements. Asphalt batch plant owners/operators must still get a permit if otherwise required.

[2] "Moved by hand" means it can be moved without the assistance of any motorized or non-motorized vehicle, conveyance or device.

[3] Brazing, soldering and welding equipment, and cutting torches related to manufacturing and construction activities that emit HAP metals are more appropriate for treatment as unpermitted equipment. Brazing, soldering, welding and cutting torches directly related to plant maintenance and upkeep and repair or maintenance shop activities that emit HAP metals are treated as trivial and listed separately in this appendix.

[4] Many lab fume hoods or vents might qualify for treatment as unpermitted equipment.

[5] Exemptions for storage tanks containing petroleum liquids or other volatile organic liquids should be based on size limits such as storage tank capacity and vapor pressure of liquids stored and are not appropriate for this list.

Title V
Form 500-H

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
Compliance Assurance Monitoring (CAM)
Applicability Determination for Initial, Renewal, & Significant Permit Revision Title V Applications

This form is required as part of an initial, significant permit revision, or renewal Title V application. If your Title V facility has control devices in use, the CAM rule may apply. Follow the instructions on the reverse side of this form to determine whether your facility is subject to CAM requirements.

Section I – CAM Status Summary for Emission Units

1. Facility Name: NEW BASIS Facility ID (6-Digit): 040806

2. Based on the criteria in the instructions (check one and attach additional pages as necessary):

a. ☐ The emission units identified below are subject to the CAM rule[1] and a CAM plan[2] is attached for each affected emissions unit:

b. ☒ There are no emission units with control devices at this Title V facility that are subject to the CAM rule.

Emission Unit[3] Application, Permit or Device No.	Equipment Description[4]	Uncontrolled Emissions		Connected to Control Unit[3] Application, Permit or Device No.	Equipment Description	Controlled Emissions	
		Pollutant	PTE[5] (tons/year)			Pollutant	PTE[5] (tons/year)

With the exception of emission units that are municipally-owned backup utility power units as described by 40 CFR Part 64, Section 64.2(b)(2)[1], the CAM rule is applicable to

[1] For more detailed information regarding the CAM rule applicability, refer to Title 40, Chapter I, Part 64, Section 64.1 of the Code of Federal Regulations (40 CFR Part 64, Section 64.1). This also can be accessed via the internet at: http://www.access.gpo.gov/nara/cfr/waisidx_99/40cfr64_99.html.

[2] Only one CAM plan is required for a control device that is common to more than one emissions unit, or if an emissions unit is controlled by more than one control device similar in design and operation. If the control devices are not similar in design and operation, one plan is required for each control device.

[3] List all new and existing emission units and the connected control devices either by AQMD application, permit or device number. When the emission unit is new and has not yet been assigned an application number, leave this column blank.

[4] Provide a brief equipment description of the emission units and control devices by indicating equipment type, make, and model and serial numbers as appropriate.

[5] Potential to Emit

Title V
Form 500-C1

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT
Compliance Status Report

To provide the compliance status of your facility with applicable federally enforceable requirements and identify other local-only requirements, complete this form and attach it to a completed compliance certification Form 500-A2. As appropriate, all submittals of Form 500-C2 as appropriate should also be attached to this form.

Section I - General Information

1. Facility Name: NEW BASIS Facility ID (6-Digit): 040806

PROCEDURES FOR DETERMINING COMPLIANCE STATUS

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility.

   The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.

   Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. **
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXI, Regulation XXII, and Regulation XXX.

** Emission units adversely affected by the gap between current and SIP-approved versions of rules may initially be placed in a non-Title V portion of the permit

Section II - Applicable Requirements, Test Methods, & MRR Requirements

EQUIPMENT/PROCESS	APPLICABLE REQUIREMENT	TEST METHOD	MRR REQUIREMENT
☒ All Air Pollution Control Equipment Using Combustion (RECLAIM & non-RECLAIM sources)	☐ Rule 480 (10/07/77)	N/A	N/A
☒ All Coating Operations	☒ Rule 442 (12/15/00)	☒ Rule 442(f)	☒ Rule 442(g)
☐ All Combustion Equipment, ≥ 555 Mmbtu/Hr (except for NOx RECLAIM sources)	☐ Rule 474 (12/04/81)	☐ AQMD TM 7.1 or 100.1	
☒ All Combustion Equipment Except Internal Combustion Engines (RECLAIM & non-RECLAIM sources)	☐ Rule 407 (04/02/82) ☐ Rule 409 (08/07/81)	☐ AQMD TM 100.1 or 10.1, 307-91 ☐ AQMD TM 5.1, 5.2, or 5.3	
☒ All Combustion Equipment Using Gaseous Fuel (except SOx RECLAIM sources)	☒ Rule 431.1 (06/12/98)	☐ Rule 431.1(f)	☐ Rule 431.1(d) & (e)
☐ All Combustion Equipment Using Liquid Fuel (except SOx RECLAIM sources)	☐ Rule 431.2 (09/15/00)	☐ Rule 431.2(g)	☐ Rule 431.2(f)
☐ All Combustion Equipment Using Fossil Fuel (except SOx RECLAIM sources)	☐ Rule 431.3 (05/07/76)		
☒ All Equipment	☒ Rule 401 (11/09/01) ☐ Rule 405 (02/07/86) ☐ Rule 408 (05/07/76) ☐ Rule 430 (07/12/96) ☐ Rule 701 (06/13/97) ☐ New Source Review, BACT ☐ Rule 1703 (10/07/88) ☐ 40 CFR68 - Accidental Release Prevention	☒ California Air Resources Board Visible Emission Evaluation ☐ AQMD TM 5.1, 5.2, or 5.3 N/A See Applicable Subpart	☒ Rule 430(b) See Applicable Subpart
☐ All Equipment Processing Solid Materials	☐ Rule 403 (12/11/98)	☐ Rule 403(d)(4)	☐ Rule 403(f)
☒ All Equipment With Exhaust Stack (except cement kilns subject to Rule 1112.1)	☒ Rule 404 (02/07/86)	☐ AQMD TM 5.1, 5.2, or 5.3	
☒ All Facilities Using Solvents to Clean Various Items or Equipment	☒ Rule 109 (05/02/03) ☒ Rule 1171 (08/02/02) ☐ 40 CFR63 SUBPART T	☒ Rule 109(g) ☒ Rule 1171(f) See Applicable Subpart	☒ Rule 109(c) ☒ Rule 1171(c)(6) See Applicable Subpart
☐ All RECLAIM Equipment (NOx & SOx)	☐ Reg. XX - RECLAIM	☐ Rule 2011, App. A (05/11/01) ☐ Rule 2012, App. A (05/11/01)	☐ Rule 2011, App. A (05/11/01) ☐ Rule 2012, App. A (05/11/01)
☐ Abrasive Blasting	☐ Rule 1140 (08/02/85)	☐ Rule 1140(d) & (e), AQMD Visible Emission Method	
☐ Appliances Containing Ozone Depleting Substances (except Motor Vehicle Air Conditioners): Manufacturing, Repair, Maintenance, Service, & Disposal	☐ 40 CFR82 SUBPART F	See Applicable Subpart	See Applicable Subpart
☐ Asphalt	See Manufacturing, Asphalt Processing & Asphalt Roofing		
☐ Asphalt Concrete/Batch Plants	☐ 40 CFR60 SUBPART I	See Applicable Subpart	See Applicable Subpart
☐ Benzene Emissions, Maleic Anhydride Plants, Ethylbenzene/Styrene Plants, Benzene Storage	☐ Rule 1173 (12/06/02) ☐ Rule 1176 (09/13/96)	☐ Rule 1173(j) ☐ Rule 1176(h)	☐ Rule 1173(i) ☐ Rule 1176(f) & (g)

South Coast Air Quality Management District

Form 400-A

Application For Permit To Construct and Permit To Operate

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385
www.aqmd.gov

Section A: Operator Information

1. Business Name of Operator To Appear On The Permit:
New Basis

2. Valid AQMD Facility ID (Available on Permit or Invoice issued by AQMD): 40806

3. Owner's Business Name (only if different from Business Name of Operator):

Section B: Equipment Location

4. Equipment Location Address:
For equipment operated at various locations in AQMD's jurisdiction, provide address of initial site

2626 Kansas Ave.
Street Address

Riverside — CA, — 92507
City — State — Zip Code

County: Los Angeles Orange San Bernardino • Riverside

Contact Name: Jason Wolf

Contact Title: Engineering Manager Phone: (951) 787-0600

Fax: (951) 787-0632 E-Mail: jwolff@newbasis.com

Section C: Permit Mailing Address

5. Permit and Correspondence Information:
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name:

Contact Title: Phone:

Fax: E-Mail:

Section D: Application Type

The facility is in RECLAIM • Title V RECLAIM & Title V Program (please check if applicable)

6. Reason for Submitting Application (Select only ONE):

- New Construction (Permit to Construct)
- Permitted Equipment Altered/ Modified Without Permit Approval*
- Equipment Operating Without A Permit or Expired Permit*
- Proposed Alteration/Modification to Permitted Equipment
- Administrative Change
- Change of Condition For Permit To Operate
- Equipment On-Site But Not Constructed or Operational
- Change of Condition For Permit To Construct
- • Title V Application (Initial, Revisions, Modifications, etc.)
- Change of Location—Moving to New Site
- Compliance Plan
- Facility Permit Amendment
- Registration/Certification
- Streamlined Standard Permit

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. Estimated Start Date of Operation/Construction (MM/DD/YYYY):

8. Description of Equipment:
Shar Systems, Inc., D-258NZ Dispersion System/Batch Mixer

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? • No Yes

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each)

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) • No Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
• No Yes If yes, provide NOV/NC #:

Section E: Facility Business Information

13. What type of business is being conducted at this equipment location?
Fiberglass Reinforced Plastic Products

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 326199

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? • No Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? • No Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

Form 500-A2

TITLE V Application Certification

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385

www.aqmd.gov

Section I - Facility Information

1. Permit to be issued to (Business name of operator to appear on permit):

New Basis

2. Valid AQMD Facility ID (Available on Permit or Invoice Issued by AQMD):

40806

3. This Certification is submitted with a (Check one):
   - a. • Title V Application (Initial, Revision or Renewal)
   - b. Supplement/Correction to a Title V Application
   - c. MACT Part 2

4. Is Form 500-C2 included with this Certification? Yes • No

Section II - Responsible Official Certification Statement

I certify under penalty of law that I am the responsible official for this facility as defined in AQMD Regulation XXX and that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attached application forms and other materials are true, accurate, and complete.

Read each statement carefully and check each that applies – ***You must check 3a or 3b.***

1. For Initial, Permit Renewal, and Administrative Application Certifications:

a. The facility, including equipment that are exempt from written permit per Rule 219, is currently operating and will continue to operate in compliance with all applicable requirement(s) identified in Section II and Section III of Form 500-C1,

i. except for those requirements that do not specifically pertain to such devices or equipment and that have been identified as "Remove" on Section III of Form 500-C1.

ii. except for those devices or equipment that have been identified on the completed and attached Form 500-C2 that will not be operating in compliance with the specified applicable requirement(s).

b. The facility, including equipment that are exempt from written permit per Rule 219, will meet in a timely manner, all applicable requirements with future effective dates.

2. For Permit Revision Application Certifications:

a. The equipment or devices to which this permit revision applies, will in a timely manner comply with all applicable requirements identified in Section II and Section III of Form 500-C1.

3. For MACT Hammer Certifications:

a. The facility is subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63), also known as the MACT "hammer." The following information is submitted with a Title V application to comply with the Part 1 requirements of Section 112(j). (If Part 2 has not been submitted, you must submit 500-MACT Part 2 with this form.)

b. • The facility is not subject to Section 112(j) of the Clean Air Act (Subpart B of 40 CFR part 63).

Section A: Operator Information

1. Business Name of Operator To Appear On The Permit:
Newbasis, Inc.

2. Valid AQMD Facility ID (Available on Permit or Invoice issued by AQMD): 40806

3. Owner's Business Name (only if different from Business Name of Operator):

Section B: Equipment Location

4. Equipment Location Address:
For equipment operated at various locations in AQMD's jurisdiction, provide address of initial site

2626 Kansas Avenue
Street Address

Riverside
City

CA, 92507
State Zip Code

County: ○ Los Angeles ○ Orange ○ San Bernardino ● Riverside

Contact Name: Jason Wolff

Contact Title: Engineering Manager Phone: (951) 787-0600

Fax: (951) 787-0632 E-Mail: jwolff@newbasis.com

Section C: Permit Mailing Address

5. Permit and Correspondence Information:
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name:

Contact Title: Phone:

Fax: E-Mail:

Section D: Application Type

The facility is in ○ RECLAIM ● Title V ○ RECLAIM & Title V Program (please check if applicable)

6. Reason for Submitting Application (Select only ONE):

- ● New Construction (Permit to Construct)
- ○ Equipment Operating Without A Permit or Expired Permit*
- ○ Administrative Change
- ○ Equipment On-Site But Not Constructed or Operational
- ○ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit
- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Change of Condition For Permit To Operate
- ○ Change of Condition For Permit To Construct
- ○ Change of Location—Moving to New Site

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. Estimated Start Date of Operation/Construction (MM/DD/YYYY):

8. Description of Equipment:
Shar Systems, Inc., D-258NZ Dispersion System/Batch Mixer

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? ● No ○ Yes

10. For Identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each)

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ● No ○ Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
● No ○ Yes If yes, provide NOV/NC #:

Section E: Facility Business Information

13. What type of business is being conducted at this equipment location?
Plastic Products, NEC

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 326199

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? ● No ○ Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? ● No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

FORM 400-E-16
STORAGE TANK
SOLID MATERIAL

Mail Application To:
SCAQMD
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385
www.aqmd.gov

This form must be accompanied by a completed Application for a Permit to Construct/Operate -Form 400A, Form CEQA, Plot Plan and Stack Form

Permit to be issued to (Business name of operator to appear on permit):
Newbasis, Inc.

Address where the equipment will be operated (for equipment which will be moved to various location in AQMD's jurisdiction, please list the initial location site):
2626 Kansas Avenue, Riverside, CA 92507 • Fixed Location Various Locations

SECTION A: EQUIPMENT DESCRIPTION

Tank Information	Is this tank part of a tank farm? Yes • No If yes, indicate number of tanks: (If tanks are non-identical, please complete one form for each tank)	
	Tank identification number or name: Resin Batch Mix Portable Tank? • Yes No	
Tank Capacity	182.000 Gallons OR Barrels OR Cubic Yards OR Tons	
Features	• Above Ground Below Ground Heated Unheated Cooled	
Dimensions	Height: 15.50 ft. Width: 13.00 ft. Length: 10.83 ft.	
Material Stored	Type of material: Resin - A667-PCC-20 Polyester Resin Solution	Density (pounds/cubic feet): 68.671

SECTION B: PROCESS DESCRIPTION

Brief Description of Process	Please supply drawing that shows how the material is received, conveyed, transferred, and stored and include any control measures to reduce dust emissions.	
Delivery Method	Delivery pressure: psi Delivery flow rate: standard cubic feet per minute	
	Delivered by: Tanker Truck Rail Car • Other Totes	
Controls	Make: Shar Systems, Inc.	Model: D-258NZ Dispersion
	• On-site Blower: ☒ Powered by electric motor ☐ Powered by Internal Combustion Engine: HP*	Each filter dimensions: Diameter: in. Length: ft
	Filter vent (passive- uses airflow created by material transfer)	Total Filter Area: sq. ft.
	Baghouse with attached blower**	Number of filters:
	*If internal combustion engine is greater than 50 HP, a separate application is required.) **Separate Permit Application is Required	
Delivery Schedule	Delivery Rate of Material (maximum): 1800.000 pounds/hr Time Required: mins	
	Number of Deliveries/Day: 200 Number of Days of Delivery/Week: 6 Weeks/Year: 52	

SECTION C: APPLICANT CERTIFICATION STATEMENT

I hereby certify that all information contained herein and information submitted with this application is true and correct.

South Coast Air Quality Management District

Form 400-CEQA
California Environmental Quality Act (CEQA) Applicability

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385

www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Lori Inga at (909) 396-3109.

FACILITY INFORMATION

Business Name of Operator to Appear on the Permit:	Facility ID (6-Digit):
Newbasis, Inc.	040806

Project Description:

Shar Systems, Inc., D-258NZ Dispersion System/Batch Mixer

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	○	●	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
B.	○	●	**A request for a change of permittee only (without equipment modifications)?**
C.	●	○	**Equipment certification or equipment registration** (qualifies for Rule 222)?
D.	○	●	**A functionally identical permit unit replacement with no increase in rating or emissions?**
E.	○	●	**A change of daily VOC permit limit to a monthly VOC permit limit?**
F.	○	●	**Equipment damaged as a result of a disaster during state of emergency?**
G.	○	●	**A Title V** (i.e., Regulation XXX) **permit renewal (without equipment modifications)?**
H.	●	○	**A Title V administrative permit revision?**
I.	○	●	**The conversion of an existing permit into an initial Title V permit?**

If **"Yes"** is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	○	●	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	○	●	**Is this project part of a larger project?**
			Section II – Air Quality
3.	○	●	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4.	○	●	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package.

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

[2] To download the CEQA guidelines, visit http://ceres.ca.gov/env_law/state.html.

[3] To download this form and the instructions, visit http://www.aqmd.gov/ceqa or http://www.aqmd.gov/permit

© South Coast Air Quality Management District, Form 400-CEQA (2006.02)

	Yes	No	
5.	○	●	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance.
6.	○	●	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	○	●	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	○	●	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	○	●	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply):
	○	●	a. **the need for more than 350 new employees?**
	○	●	b. **an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	○	●	c. **increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	○	●	**Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?**
			Section VI – Public Services
12.			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply):
	○	●	a. **Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	○	●	b. **Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

REMINDER: For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc.

SIGNATURES

I HEREBY CERTIFY THAT ALL INFORMATION CONTAINED HEREIN AND INFORMATION SUBMITTED WITH THIS APPLICATION IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THIS FORM IS A SCREENING TOOL AND THAT THE SCAQMD RESERVES THE RIGHT TO CONSIDER OTHER PERTINENT INFORMATION IN DETERMINING CEQA APPLICABILITY.

SPRAY BOOTH NO. 1, BLEEKER, FLOOR FILTER TYPE, MODEL F-40-10-24., 40'-4" W. X 28'-8" L. X 12'-6" H., WITH ONE HUNDRED THIRTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 5-HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5133 POUNDS IN ANY CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS).

5. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEDING 12 MONTHS.

6. THIS SPRAY BOOTH SHALL COMPLY WITH RULES 1162 AND 1171.

7. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL FROM THE FACILITY, FOR 36 MONTHS.

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

8. THIS EQUIPMENT SHALL NOT USE CARCINOGENIC COMPOUNDS LISTED IN RULE 1401 AS AMENDED 12-7-1990.

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 36 MONTHS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

10. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL PERMITTED EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

11. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH A FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.

12. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.

13. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO AB 2588 TOXIC HOT SPOT PROGRAM.

14. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

    A. POLYESTER RESIN SPRAY UP - 5% BY WEIGHT
    B. POLYESTER GEL COAT SPRAY UP - 10% BY WEIGHT
    C. POLYESTER RESIN CASTED - 1.6% BY WEIGHT

PERMIT TO OPERATE

Equipment Location: 2626 KANSAS AVE, RIVERSIDE, CA 92507-2695

Equipment Description:

SPRAY BOOTH NO. 5, BLEEKER, FLOOR FILTER TYPE, MODEL F-12-8-7., 12'-0" W. X 10'-6" L. X 8'-0" H., WITH TWENTY EIGHT 20" X 20" EXHAUST FILTERS AND TWO 2-HP EXHAUST FANS.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS).

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5133 POUNDS IN ANY CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS).

5. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEDING 12 MONTHS.

6. THIS SPRAY BOOTH SHALL COMPLY WITH RULES 1162 AND 1171.

7. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC- CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL FROM THE FACILITY, FOR 36 MONTHS.

FILE COPY

CONTINUATION OF PERMIT TO OPERATE

8. THIS EQUIPMENT SHALL NOT USE CARCINOGENIC COMPOUNDS LISTED IN RULE 1401 AS AMENDED 12-7-1990.

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE RETAINED AT THE FACILITY FOR 36 MONTHS, AND SHALL BE MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.

10. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL PERMITTED EQUIPMENT COVERED BY THE MONTHLY LIMIT. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

11. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH A FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.

12. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.

13. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO AB 2588 TOXIC HOT SPOT PROGRAM.

14. POLYESTER RESIN AND GELCOAT VOC EMISSIONS SHALL BE CALCULATED ON A DAILY BASIS USING THE FOLLOWING EMISSION FACTORS:

    A. POLYESTER RESIN SPRAY UP - 5% BY WEIGHT
    B. POLYESTER GEL COAT SPRAY UP - 10% BY WEIGHT
    C. POLYESTER RESIN CASTED - 1.6% BY WEIGHT

FACILITY PERMIT TO OPERATE
NEW BASIS

Facility Equipment and Requirements
(Section D)

This section consists of a table listing all permitted equipment at the facility, facility wide requirements, all individual Permits to Construct and Permits to Operate issued to various equipment at the facility, and Rule 219-exempt equipment subject to source-specific requirements. Each permit and Rule 219-exempt equipment will list operating conditions including periodic monitoring requirements, and applicable emission limits and requirements that the equipment is subject to. Also included is the rule origin and authority of each emission limit and permit condition.

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMITTED EQUIPMENT LIST

THE FOLLOWING IS A LIST OF ALL PERMITS TO CONSTRUCT AND PERMITS TO OPERATE AT THIS FACILITY:

Application number	Permit to Operate number	Equipment description
113604	M36580	STORAGE TANK HT1 RESIN
141729	M57251	STORAGE TANK HT2 RESIN
416447	F65485	MIXING TANK FRPBM1
450806	F81487	CASTING MACHINE NO. 1
450807	F81488	CASTING MACHINE NO. 2
484033	F98572	DUST COLLECTOR
493706	G12959	STORAGE TANK VT1 RESIN
514879	G26468	MIXING TANK PCBM1
526762	G15919	SPRAY BOOTH SB1
530322	G17311	BAGHOUSE
554841	G32153	SILO S1 WITH BIN VENT B1
556160	G32155	MIXING TANK PCBM2
556161	G32156	SILO S3 WITH BIN VENT B3
556162	G32157	SILO S2 WITH BIN VENT B2
554835	G45964	AIR POLLUTION CONTROL SYSTEM WITH REGENERATIVE THERMAL OXIDIZER, SPRAY BOOTH, BAGHOUSE AND DUST COLLECTOR
554836	G45970	MIXING TANK PCBM3
554837	G46026	MIXING TANK PCBM4
554839	G44790	WEIGH HOPPER WH1 WITH BIN VENT
554842	G44791	SILO 3 WITH BIN VENT
554846	G44793	SILO 1 WITH BIN VENT
554847	G44794	SILO 2 WITH BIN VENT
554848	G44795	SILO 4 WITH BIN VENT
554849	G44796	STORAGE TANK NO. 2 RESIN
554850	G44801	STORAGE TANK NO. 3 RESIN
577112	G48719	SPRAY BOOTH
607176	G56559	SILO 5 WITH BIN VENT

NOTE: EQUIPMENT LISTED ABOVE THAT HAVE NO CORRESPONDING PERMITS TO OPERATE NUMBER ARE ISSUED PERMITS TO CONSTRUCT. THE ISSUANCE OR DENIAL OF THEIR PERMITS TO OPERATE IS SUBJECT TO ENGINEERING FINAL REVIEW. ANY OTHER APPLICATIONS THAT ARE STILL BEING PROCESSED AND HAVE NOT BEEN ISSUED PERMITS TO CONSTRUCT OR PERMITS TO OPERATE WILL NOT BE FOUND IN THIS TITLE V PERMIT.

FACILITY PERMIT TO OPERATE
NEW BASIS

FACILITY WIDE CONDITION(S)

Condition(s):

1. EXCEPT FOR OPEN ABRASIVE BLASTING OPERATIONS, THE OPERATOR SHALL NOT DISCHARGE INTO THE ATMOSPHERE FROM ANY SINGLE SOURCE OF EMISSIONS WHATSOEVER ANY AIR CONTAMINANT FOR A PERIOD OR PERIODS AGGREGATING MORE THAN THREE MINUTES IN ANY ONE HOUR WHICH IS:

   A. AS DARK OR DARKER IN SHADE AS THAT DESIGNATED NO. 1 ON THE RINGELMANN CHART, AS PUBLISHED BY THE UNITED STATES BUREAU OF MINES; OR
   B. OF SUCH OPACITY AS TO OBSCURE AN OBSERVER'S VIEW TO A DEGREE EQUAL TO OR GREATER THAN DOES SMOKE DESCRIBED IN SUBPARAGRAPH (A) OF THIS CONDITION. [RULE 401]

2. NO MATERIALS CONTAINING HEXAVALENT CHROMIUM SHALL BE UTILIZED AT THIS FACILITY PURSUANT TO THE AB 2588 TOXIC HOT SPOTS PROGRAM. [RULE 1402]

3. SAFETY DATA SHEETS FOR ALL COATINGS AND SOLVENTS USED AT THIS FACILITY SHALL BE KEPT CURRENT AND MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST. [RULE 109, 1303(b)(2)-OFFSET]

4. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE AT THIS FACILITY SHALL NOT EXCEED 5,073 POUNDS IN ANY ONE CALENDAR MONTH (EXCLUDING STORAGE TANK EMISSIONS). FOR EQUIPMENT THAT IS VENTED TO AIR POLLUTION CONTROL (APC) EQUIPMENT FOR VOC, THE VOC EMISSIONS SHALL BE CALCULATED USING THE REQUIRED OVERALL CONTROL EFFICIENCY SPECIFIED IN THE PERMIT(S) FOR THE APC EQUIPMENT. [RULE 1303(b)(2)-OFFSET]

5. THE OPERATOR SHALL COMPLY WITH RULE 109 (RECORDKEEPING FOR VOLATILE ORGANIC COMPOUND EMISSIONS). [RULE 109, 1303(b)(2)-OFFSET]

6. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORD SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES. [RULE 109, 1303(b)(2)-OFFSET]

7. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THIS FACILITY DURING THE PRECEDING 5 YEARS.

FACILITY PERMIT TO OPERATE
NEW BASIS

[RULE 109, 1303(b)(2)-OFFSET]

8. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC CONTAINING MATERIAL USED OR STORED AT THE FACILITY, AND ALL WASTE MANIFESTS FOR ALL WASTE VOC CONTAINING MATERIAL FROM THE FACILITY FOR 5 YEARS.
[RULE 109, 1303(b)(2)-OFFSET]

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M36580
A/N 113604

Equipment Description:

STORAGE TANK, HT1, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

Emissions and Requirements:

1. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 109
   VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
   HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. M57251
A/N 141729

Equipment Description:

STORAGE TANK, HT2, RESIN, HORIZONTAL CYLINDRICAL, 7'-0" DIA. X 14'-0" L., 4,000 GALLON CAPACITY.

Emissions and Requirements:

1. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 109
   VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
   HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F65485
A/N 416447

Equipment Description:

MIXING TANK, FRPBM1, FIBERGLASS RESIN/CALCIUM CARBONATE, 4'-0" DIA. X 4'-0" H., 4,000 POUND CAPACITY.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THE TOTAL AMOUNT OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 2,000 POUNDS IN ANY ONE DAY.
   [RULE 1303(b)(2)-OFFSET]

4. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 3. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MAY 3, 2002 OR EARLIER.
   [RULE 1401]

6. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
   [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

7. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

FACILITY PERMIT TO OPERATE
NEW BASIS

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

8. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81487
A/N 450806

Equipment Description:

CASTING MACHINE NO. 1, AC1, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
   [RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
   [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F81488
A/N 450807

Equipment Description:

CASTING MACHINE NO. 2, AC2, FIBERGLASS RESIN/CALCIUM CARBONATE, AUTOCASTER ULTRA, MODEL NO. 150100U, 4'-6" W. X 9'-4" H. X 6'-8" D.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.

3. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF MARCH 4, 2005 OR EARLIER.
   [RULE 1401]

4. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
   [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. F98572
A/N 484033

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. DUST COLLECTOR, DONALDSON TORIT, MODEL NO. VS-1200, PULSE JET CLEANING, WITH ONE 17" DIA. X 20" L. CARTRIDGE-TYPE FILTER, 135 SQ. FT. TOTAL FILTER AREA, AND ONE 24" X 18" X 12" HEPA FILTER.

2. EXHAUST SYTEM WITH A 3 HP EXHAUST FAN VENTING A POLYSTER RESIN MIXER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. DUST COLLECTED IN THE DUST COLLECTOR SHALL BE DISCHARGED INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

4. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

5. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON A QUARTERLY BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE QUARTERLY PERIOD. THE ROUTINE QUARTERLY INSPECTION SHALL BE CONDUCTED

FACILITY PERMIT TO OPERATE
NEW BASIS

WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

[RULE 3004 (a)(4)]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G12959
A/N 493706

Equipment Description and Conditions:

STORAGE TANK, VT1, RESIN, VERTICAL FIXED ROOF, 9'-11" DIA. X 10'-11" H., 6,307 GALLON CAPACITY.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THE TOTAL THROUGHPUT OF POLYESTER RESIN IN THIS EQUIPMENT SHALL NOT EXCEED 12,614 GALLONS IN ANY WEEK.
   [RULE 1303(b)(2)-OFFSET]

4. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 3. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS AS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, AS AMENDED JUNE 5, 2009 OR EARLIER.
   [RULE 1401]

Emissions and Requirements:

6. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 109
   VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
   HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G26468
A/N 514879

Equipment Description:

MIXER, PCBM1, POLYMER CONCRETE BATCH MIXER 1, SHAR SYSTEMS, MODEL NO. D-258NZ, 13'-0" W. X 13'-10" L. X 15'-3" H., 182 GALLON MIXING TANK, WITH THREE HOPPERS AND ONE 25 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE MIXER AND CONVEYOR TUBES CONNECTED TO THE MIXER SHALL BE COVERED WITH HEAVY-DUTY PLASTIC WRAP TO MINIMIZE FUGITIVE DUST EMISSIONS.
[RULE 1303(a)(1)-BACT]

4. THE MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 115,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

7. VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS SHALL BE DETERMINED USING THE FOLLOWING EQUATIONS:

   TOTAL EMISSIONS = LOADING/MIXING EMISSIONS + MOLDING/DEMOLDING EMISSIONS
   LOADING/MIXING EMISSIONS = 0.0034 LB VOC/LB RESIN X RESIN USED X (1 – 0.855)
   MOLDING/DEMOLDING EMISSIONS = 0.0023 LB VOC/LB RESIN X RESIN USED
   [RULE 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

   A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

   B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

   C. MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

   D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS.

   [RULE 1303(b)(2)-OFFSET]

9. ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

10. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS AS IDENTIFIED IN RULE 1401, TABLE 1, AS AMENDED SEPTEMBER 10, 2010 OR EARLIER WITH THE EXCEPTION OF STYRENE.
    [RULE 1401]

11. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
    [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

12. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

    IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY

ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24
B. HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR
C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;
B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;
C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND
D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

13. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G15919
A/N 526762

Equipment Description:

SPRAY BOOTH, SB1, BLEEKER, FLOOR FILTER TYPE, MODEL F-12-8-7, 12'-0" W. X 8'-0" L. X 7'-0" H., WITH TWENTY FOUR 20" X 20" EXHAUST FILTERS AND ONE 3 HP EXHAUST FAN.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY CARCINOGENIC COMPOUNDS IDENTIFIED IN RULE 1401 WITH AN EFFECTIVE DATE OF DECEMBER 7, 1990 OR EARLIER.
[RULE 1401]

6. VOC EMISSIONS FROM THE USE OF RESIN AND GELCOAT IN THIS EQUIPMENT SHALL BE CALCULATED USING UNIFIED EMISSION FACTORS (UEF) LISTED IN RULE 1132, ATTACHMENT A.
[RULE 1303(b)(2)-OFFSET]

7. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY THE CALENDAR MONTHLY VOC EMISSIONS IN POUNDS AND THE APPROPRIATE VOC EMISSION FACTOR OR VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, THE OPERATOR SHALL TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM THIS EQUIPMENT. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES. [RULE 109, 1303(b)(2)-OFFSET]

9. THE OPERATOR SHALL MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS. [RULE 109, 1303(b)(2)-OFFSET]

10. THE OPERATOR SHALL RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS. [RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

11. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
    A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
    B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
    C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

    [RULE 3004 (a)(4)]

12. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK. [RULE 3004 (a)(4)]

Emissions and Requirements:

13. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

    VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
    VOC: RULE 109
    PM: RULE 481
    PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
    HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G17311
A/N 530322

Equipment Description:

BAGHOUSE, MAC EQUIPMENT, MODEL NO. 2M2F4, FOUR 14" DIA. X 26" L. CARTRIDGE FILTERS, 1.06 SQ. FT. TOTAL FILTER AREA, WITH A MECHANICAL SHAKER, VENTING SILO NOS. 1, 2 AND 4.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BAGHOUSE SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

5. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

6. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE

EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

C. DATE AND TIME VISIBLE EMISSION WAS ABATED.

[RULE 3004 (a)(4)]

Emissions And Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G32153
A/N 554841

Equipment Description:

STORAGE SILO, NO. S1, CALCIUM CARBONATE, 12'-0" DIA. X 13'-8" H. (OVERALL), 6,204 GALLON CAPACITY VENTED TO BIN VENT B1, DIVERSIFIED STORAGE SYSTEMS, MODEL NO. AIRMAX 150, WITH EIGHTEEN BAG FILTERS, 150 SQ. FT. TOTAL FILTER AREA, AND A MECHANICAL SHAKER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THIS SILO SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
   [RULE 1303(a)(1)-BACT]

4. A MECHANICAL GAUGE SHALL BE INSTALLED SO AS TO INDICATE, IN INCHES OF WATER COLUMN, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE BAGS.
   [RULE 1303(a)(1)-BACT]

5. DUST COLLECTED IN THE BIN VENT SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
   [RULE 1303(a)(1)-BACT]

Periodic Monitoring:

6. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):
   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;
   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND
   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.
   [RULE 3004 (a)(4)]

FACILITY PERMIT TO OPERATE
NEW BASIS

7. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

   B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO AQMD.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

   D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
   [RULE 3004 (a)(4)]

Emissions and Requirements:

7. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
   PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
   PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G32155
A/N 556160

Equipment Description:

MIXER, PCBM2, POLYMER CONCRETE BATCH MIXER 2, 4'-0" DIA. X 3'-4" H., 300 GALLON CAPACITY, WITH ONE 7.5 HP MOTOR.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
   [RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
   [RULE 204]

3. THE MIXER AND CONVEYOR TUBES CONNECTED TO THIS MIXER SHALL BE COVERED WITH HEAVY-DUTY PLASTIC WRAP TO MINIMIZE FUGITIVE DUST EMISSIONS.
   [RULE 1303(a)(1)-BACT]

4. THIS MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT FOR PARTICULATES AND VOC, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
   [RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 115,000 POUNDS IN ANY ONE DAY.
   [RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
   [RULE 109, 1303(b)(2)-OFFSET]

7. VOC EMISSIONS SHALL BE DETERMINED USING THE FOLLOWING EMISSION FACTORS:

   LOADING/MIXING EMISSIONS = 0.0034 LB VOC/LB RESIN x RESIN USED (LB/DAY) x (1 – 0.855)
   MOLDING/DEMOLDING EMISSIONS = 0.0023 LB VOC/LB RESIN x RESIN USED (LB/DAY)
   [RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

8. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

   A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE APPROPRIATE VOC EMISSION FACTOR OR VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). FOR EQUIPMENT AND OPERATIONS THAT ARE VENTED TO AIR POLLUTION CONTROL (APC) EQUIPMENT, THE VOC EMISSIONS SHALL BE CALCULATED USING THE REQUIRED OVERALL CONTROL EFFICIENCY SPECIFIED IN THE PERMIT(S) FOR THE APC EQUIPMENT.

   B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM THIS EQUIPMENT AND ASSOCIATED OPERATIONS.

9. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS AS IDENTIFIED IN RULE 1401, TABLE 1, WITH AN EFFECTIVE DATE OF SEPTEMBER 10, 2010 OR EARLIER WITH THE EXCEPTION OF STYRENE.
   [RULE 1401]

10. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
    [RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

11. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

    IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

    A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

    B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO THE DISTRICT.

    THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

    A. STACK OR EMISSION POINT IDENTIFICATION;

    B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

    C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

FACILITY PERMIT TO OPERATE

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO CONSTRUCT

Permit No. G45969
A/N 554835

Equipment Description:

AIR POLLUTION CONTROL SYSTEM CONSISTING OF:

1. REGENERATIVE THERMAL OXIDIZER, ADWEST, MODEL NO. RETOX 12.0RTO95, 9'-2" W. X 24'-0" L. X 10'-6" H., 12,000 SCFM CAPACITY, WITH ONE 3,434,000 BTU/HR NATURAL GAS-FIRED MAXON KINEMAX 4G BURNER, ONE 7.5 HP COMBUSTION AIR BLOWER AND TWO CERAMIC BEDS, EACH WITH 13,200 LBS OF CERAMIC MEDIA.

2. SPRAY BOOTH, SPRAYLINE, MODEL NO. SPRAYLINE 35, AUTOMOTIVE TYPE, 28'-0" W. X 35'-0" L. X 10'-0" H., WITH FORTY-TWO 20" X 20" X 2" FIRST-STAGE EXHAUST FILTERS, FORTY-TWO 20" X 20" X 12" SECOND-STAGE EXHAUST FILTERS AND ONE 5 HP EXHAUST FAN.

3. EXHAUST FILTER SERVING PCBM1 AND PCBM2 WITH A ¼ HP EXHAUST FAN.

4. EXHAUST SYSTEM CONSISTING OF ONE 50 HP EXHAUST BLOWER VENTING ONE SPRAY BOOTH AND FOUR POLYMER CONCRETE BATCH MIXERS (PCBM1, PCBM2, PCBM3 AND PCBM4).

5. BAGHOUSE, WAM, MODEL NO. FNS.2.J.12, EIGHT 5.25" DIA/ X 36" H. BAG FILTERS, 132 SQ. FT. TOTAL FILTER AREA, VENTING PCBM3 AND PCBM4, WITH A 3 HP FAN AND PULSE JET CLEANING.

6. DUST COLLECTOR, DONALDSON TORIT, MODEL NO. VS-1200, PULSE JET CLEANING, WITH ONE 17" DIA. X 20" L. CARTRIDGE-TYPE FILTER, 135 SQ. FT. TOTAL FILTER AREA, AND ONE 24" X 18" X 12" HEPA FILTER.

7. EXHAUST SYSTEM WITH A 3 HP EXHAUST FAN VENTING A POLYMER CONCRETE BATCH MIXER 1 (PCBM1)

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SPRAY BOOTH SHALL BE OPERATED AS A PERMANENT TOTAL ENCLOSURE. THE PERMANENT TOTAL ENCLOSURE SHALL MEET ALL THE CRITERIA SPECIFIED IN US EPA

METHOD 204 DURING OPERATION OF THIS EQUIPMENT.
[RULE 1303(a)(1)-BACT]

4. THE EXHAUST FILTERS SERVING PCBM1 AND PCBM2 SHALL OPERATE AT A CONTROL EFFICIENCY OF AT LEAST 98%.
[RULE 1303(a)(1)-BACT]

5. ALL ACCESS DOORS TO THE PERMANENT TOTAL ENCLOSURES SHALL BE KEPT CLOSED DURING NORMAL OPERATIONS.
[RULE 1303(a)(1)-BACT]

6. THE SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH TWO-STAGE EXHAUST FILTERS AS SPECIFIED IN THE EQUIPMENT DESCRIPTION AND THE REGENERATIVE THERMAL OXIDIZER.
[RULE 1303(a)(1)-BACT]

7. A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE TWO STAGES OF SPRAY BOOTH EXHAUST FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 1.25 INCH OF WATER ACROSS THE FIRST AND SECOND STAGES COMBINED.
[RULE 1303(a)(1)-BACT]

8. A GAUGE SHALL BE INSTALLED AND MAINTAINED TO INDICATE, IN INCHES OF WATER, THE STATIC PRESSURE DIFFERENTIAL ACROSS THE EXHAUST FILTER(S) INSIDE THE EXHAUST FILTER BOX. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.5 INCH OF WATER.
[RULE 1303(a)(1)-BACT]

9. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF SEPTEMBER 10, 2010 OR EARLIER.
[RULE 1401]

10. THE TOTAL QUANTITY OF VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 900 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

11. VOC EMISSIONS FROM THE USE OF RESIN AND GELCOAT SHALL BE CALCULATED USING UNIFIED EMISSION FACTORS LISTED IN RULE 1132, ATTACHMENT A.
[RULE 1303(b)(2)-OFFSET]

12. TO ENSURE COMPLIANCE WITH THE EMISSION LIMIT OF THIS PERMIT, THE OPERATOR SHALL:

A. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

[RULE 109, 1303(b)(2)-OFFSET]

13. THE OPERATOR SHALL OPERATE AND MAINTAIN THE REGENERATIVE THERMAL OXIDIZER ACCORDING TO THE FOLLOWING REQUIREMENTS:

A. THE COMBUSTION CHAMBER TEMPERATURE SHALL BE MAINTAINED AT A MINIMUM OF 1,400 DEGREES FAHRENHEIT WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

B. THE OPERATOR SHALL OPERATE AND MAINTAIN A TEMPERATURE MEASURING AND RECORDING SYSTEM TO CONTINUOUSLY MEASURE AND RECORD THE COMBUSTION CHAMBER TEMPERATURE PURSUANT TO THE OPERATION AND MAINTENANCE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.7. SUCH A SYSTEM SHALL HAVE AN ACCURACY OF WITHIN 1% OF THE TEMPERATURE BEING MONITORED AND SHALL BE INSPECTED, MAINTAINED, AND CALIBRATED ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS. THE TEMPERATURE INDICATING AND RECORDING SYSTEM SHALL BE IN OPERATION WHENEVER THE EQUIPMENT IT SERVES IS IN OPERATION.

C. FOR THE PURPOSE OF THIS CONDITION, A DEVIATION SHALL BE DEFINED AS WHEN A COMBUSTION CHAMBER TEMPERATURE OF LESS THAN 1,400 DEGREES FAHRENHEIT OCCURS DURING NORMAL OPERATION OF THE EQUIPMENT IT SERVES. THE OPERATOR SHALL REVIEW THE RECORDS OF THE COMBUSTION CHAMBER TEMPERATURE ON A DAILY BASIS TO DETERMINE IF A DEVIATION OCCURS OR SHALL INSTALL AN ALARM SYSTEM TO ALERT THE OPERATOR WHEN A DEVIATION OCCURS.

D. WHENEVER A DEVIATION OCCURS, THE OPERATOR SHALL INSPECT THIS EQUIPMENT TO IDENTIFY THE CAUSE OF SUCH A DEVIATION, TAKE IMMEDIATE CORRECTIVE ACTION TO MAINTAIN THE COMBUSTION CHAMBER TEMPERATURE AT OR ABOVE 1,400 DEGREES FAHRENHEIT AND KEEP RECORDS OF THE DURATION AND CAUSE (INCLUDING UNKNOWN CAUSE, IF APPLICABLE) OF THE DEVIATION AND THE CORRECTIVE ACTION TAKEN.

E. ALL DEVIATIONS SHALL BE REPORTED TO THE SCAQMD PURSUANT TO THE REQUIREMENTS SPECIFIED IN 40 CFR PART 64.9 AND CONDITION NOS. 22 AND 23 IN SECTION K OF THIS PERMIT. THE REPORT SHALL INCLUDE THE TOTAL OPERATING TIME OF THIS EQUIPMENT AND THE TOTAL ACCUMULATED DURATION OF ALL DEVIATIONS FOR EACH SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT.

FACILITY PERMIT TO OPERATE
NEW BASIS

F. THE OPERATOR SHALL SUBMIT AN APPLICATION WITH A QUALITY IMPROVEMENT PLAN (QIP) IN ACCORDANCE WITH 40 CFR PART 64.8 TO THE SCAQMD IF AN ACCUMULATION OF DEVIATIONS EXCEEDS 5% DURATION OF THIS EQUIPMENT'S TOTAL OPERATING TIME FOR ANY SEMI-ANNUAL REPORTING PERIOD SPECIFIED IN CONDITION NO. 23 IN SECTION K OF THIS PERMIT. THE REQUIRED QIP SHALL BE SUBMITTED TO THE SCAQMD WITHIN 90 CALENDAR DAYS AFTER THE DUE DATE FOR THE SEMI-ANNUAL MONITORING REPORT.

G. THE OPERATOR SHALL INSPECT AND MAINTAIN ALL COMPONENTS OF THIS EQUIPMENT ON AN ANNUAL BASIS IN ACCORDANCE WITH THE MANUFACTURER'S SPECIFICATIONS.

H. THE OPERATOR SHALL KEEP ADEQUATE RECORDS IN A FORMAT WHICH IS ACCEPTABLE TO THE SCAQMD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE REQUIREMENTS SPECIFIED IN THIS CONDITION AND 40 CFR PART 64.9 FOR A MINIMUM OF FIVE YEARS.

[RULE 1303(a)(1)-BACT, 40CFR PART 64]

14. THE REGENERATIVE THERMAL OXIDIZER SHALL BE MAINTAINED AND OPERATED AT AN OVERALL VOC CONTROL EFFICIENCY (DESTRUCTION AND COLLECTION) OF 85.5% WHEN THE EQUIPMENT IT SERVES IS IN OPERATION
[RULE 1303(a)(1)-BACT, 1303(b)(2)-OFFSET]

15. THE START-UP BURNER SHALL NOT USE MORE THAN 9,000 CUBIC FEET OF NATURAL GAS IN ANY ONE DAY.
[RULE 1303(a)(1)-BACT]

16. A NON-RESETTABLE TOTALIZING FUEL METER SHALL BE INSTALLED AND MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 15.
[RULE 1303(a)(1)-BACT]

17. THE START-UP BURNER SHALL COMPLY WITH RULE 1147.
[RULE 1147]

18. DUST COLLECTED IN THE BAGHOUSE AND DUST COLLECTOR SHALL BE DISCHARGED INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

Periodic Monitoring:

19. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS ALL FILTER MEDIA ONCE EVERY WEEK.
[RULE 3004 (a)(4)]

20. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

21. THE OPERATOR SHALL CONDUCT SOURCE TEST(S) IN ACCORDANCE WITH THE FOLLOWING SPECIFICATIONS:

A. THE TEST SHALL BE CONDUCTED AT LEAST ONCE DURING THE LIFE OF THE PERMIT.

B. THE TEST SHALL BE CONDUCTED NO LATER THAN MARCH 31, 2021 UNLESS OTHERWISE APPROVED IN WRITING BY THE DISTRICT.

C. THE TEST SHALL BE CONDUCTED TO DETERMINE THE VOC EMISSIONS USING AN APPROVED DISTRICT METHOD TO DEMONSTRATE COMPLIANCE WITH ALL APPLICABLE PERMIT CONDITION(S), RULES AND REGULATIONS.

D. THE SOURCE TEST SHALL BE CONDUCTED WHILE THE OXIDIZER IS OPERATING AT A TEMPERATURE OF NOT LESS THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT. IF THE OPERATING TEMPERATURE DURING THE SOURCE TEST IS GREATER THAN THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT, THE MINIMUM OPERATING TEMPERATURE SPECIFIED IN THIS PERMIT MAY BE INCREASED TO REFLECT THE OPERATING TEMPERATURE DURING THE SOURCE TEST.

E. THE OPERATOR SHALL COMPLY WITH ADMINISTRATIVE CONDITIONS NOs. 8, 9, AND 10 OF SECTION E OF THIS FACILITY PERMIT.

F. THE OPERATOR SHALL SUBMIT TWO COMPLETE COPIES OF THE SOURCE TEST REPORT SPECIFIED IN CONDITION NO. 9 OF SECTION E OF THIS FACILITY PERMIT TO THE DISTRICT ENGINEERING AND COMPLIANCE DIVISION. THE ENGINEERING COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, COATING, PRINTING, PLATING, MILITARY AND ENTERTAINMENT OPERATIONS, ATTN: AIR QUALITY AND COMPLIANCE SUPERVISOR, 21865 COPLEY DRIVE, DIAMOND BAR, CA 91765. THE COMPLIANCE COPY OF THE REPORT SHALL BE SENT TO: SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT, P.O. BOX 4941, DIAMOND BAR, CA 91765

[RULE 3004(a)(4)]

22. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

23. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE

FACILITY PERMIT TO OPERATE
NEW BASIS

THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS. IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED, THE OPERATOR SHALL TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS; AND

A. DATE AND TIME VISIBLE EMISSION WAS ABATED.
[RULE 3004 (a)(4)]

Emissions and Requirements:

24. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC: RULE 109
VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 481
PM: RULE 1155, 0% OPACITY
PM: 0.1 GR/SCF, RULE 409
CO: 2000 PPMV, RULE 407
NOx: 60 PPM, RULE 1147
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G45970
A/N 554836

Equipment Description:

MIXER, PCBM3, POLYMER CONCRETE BATCH MIXER, 6'-0" DIA. X 8'-0" H., 1,700 GALLON CAPACITY.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS MIXER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT FOR PARTICULATES AND VOC, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

4. THE TOTAL QUANTITY OF MATERIALS MIXED IN THIS EQUIPMENT SHALL NOT EXCEED 300,000 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

5. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 4. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

6. DAILY VOLATILE ORGANIC COMPOUND (VOC) EMISSIONS SHALL BE DETERMINED USING THE FOLLOWING EQUATIONS:

   TOTAL DAILY EMISSIONS = LOADING/MIXING EMISSIONS + MOLDING/DEMOLDING EMISSIONS

   LOADING/MIXING EMISSIONS = 0.64 LB VOC/HR-TON RESIN x RESIN USED (TON/DAY) x HR/DAY x (1 – 0.855)

   MOLDING/DEMOLDING EMISSIONS = 0.0023 LB VOC/LB RESIN x RESIN USED (LB/DAY)
   [RULE 1303(b)(2)-OFFSET]

7. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

FACILITY PERMIT TO OPERATE
NEW BASIS

A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE APPROPRIATE VOC EMISSION FACTOR OR VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS). FOR EQUIPMENT AND OPERATIONS THAT ARE VENTED TO AIR POLLUTION CONTROL (APC) EQUIPMENT, THE VOC EMISSIONS SHALL BE CALCULATED USING THE REQUIRED OVERALL CONTROL EFFICIENCY SPECIFIED IN THE PERMIT(S) FOR THE APC EQUIPMENT.

B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM THIS EQUIPMENT AND ASSOCIATED OPERATIONS.

[RULE 1303(b)(2)-OFFSET]

8. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS IDENTIFIED IN RULE 1401, TABLE 1, EXCEPT STYRENE, WITH AN EFFECTIVE DATE OF SEPTEMBER 10, 2010 OR EARLIER.
[RULE 1401]

9. NO VOC CONTAINING MATERIALS, EXCEPT POLYESTER RESINS, SHALL BE USED IN THIS EQUIPMENT.
[RULE 1303(b)(2)-OFFSET]

Periodic Monitoring:

10. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24
B. HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR
C. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO THE DISTRICT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.
[RULE 3004 (a)(4)]

Emissions and Requirements:

11. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS
HAP: 40 CFR63 SUBPART WWWW, SEE SECTION J FOR REQUIREMENTS

FACILITY PERMIT TO OPERATE

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G44790
A/N 554839

Equipment Description:

WEIGH HOPPER, WH1, 5'-8" W. X 5'-8" L. X 8'-6" H., 165 CU. FT. CAPACITY, VENTED TO BIN VENT, CON-E-CO, MODEL NO. 14-23, WITH FOURTEEN 4.5" DIA. X 16" H. BAG FILTERS, 23 SQ. FT. TOTAL FILTER AREA, AND REVERSE AIR CLEANING.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIE WEIGH HOPPER SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BIN VENT SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS CHARGED TO THIS EQUIPMENT SHALL NOT EXCEED 416,100 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

7. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. Equipment Description:

STORAGE SILO SYSTEM, NO. 2 CONSISTING OF:

1. STORAGE SILO, NO. 2, CALCIUM CARBONATE/SAND, 12'-0" DIA. X 13'-8" H. (OVERALL), 6,204 GALLON CAPACITY.

2. BIN VENT, MAC EQUIPMENT, MODEL NO. 2M2F4, WITH FOUR 14" DIA. X 26" L. CARTRIDGE FILTERS, 1.06 SQ. FT. TOTAL FILTER AREA, AND A MECHANICAL SHAKER, VENTING SILOS 1, 2 AND 4.

3. ENCLOSED SCREW CONVEYOR TO WEIGH HOPPER WH1.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SILO SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BIN VENT SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS CHARGED TO THIS EQUIPMENT SHALL NOT EXCEED 2,860,000 POUNDS IN ANY CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

7. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER

MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO THE DISTRICT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

9. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

PERMIT TO OPERATE

Permit No. G44795
A/N 554848

Equipment Description:

STORAGE SILO SYSTEM, NO. 4 CONSISTING OF:

1. STORAGE SILO, NO. 4, CALCIUM CARBONATE/SAND, 12'-0" DIA. X 13'-8" H. (OVERALL), 6,204 GALLON CAPACITY

2. BIN VENT, MAC EQUIPMENT, MODEL NO. 2M2F4, WITH FOUR 14" DIA. X 26" L. CARTRIDGE FILTERS, 1.06 SQ. FT. TOTAL FILTER AREA, AND A MECHANICAL SHAKER, VENTING SILOS 1, 2 AND 4.

3. ENCLOSED SCREW CONVEYOR TO WEIGH HOPPER WH1

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SILO SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AN AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BIN VENT SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS CHARGED TO THIS EQUIPMENT SHALL NOT EXCEED 2,860,000 POUNDS IN ANY CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

FACILITY PERMIT TO OPERATE
NEW BASIS

Periodic Monitoring:

7. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

   B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

   C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

   [RULE 3004 (a)(4)]

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

   IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

   A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

   B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO THE DISTRICT.

   THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

   A. STACK OR EMISSION POINT IDENTIFICATION;

   B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

   C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

   D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

PERMIT TO OPERATE

Permit No. G48719
A/N 577112

Equipment Description:

SPRAY BOOTH, FLOOR TYPE FIBER GLASS SPRAY REINFORCED PLASTIC SPRAY BOOTH, 10'-0" W. X 50'-0" L. X 10'-0" H., WITH TEN 20" X 20" EXHAUST FILTERS, ONE 5 HP. EXHAUST BLOWER AND ONE 5 HP. BLOWER.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THIS SPRAY BOOTH SHALL NOT BE OPERATED UNLESS ALL EXHAUST AIR PASSES THROUGH FILTER MEDIA WHICH IS AT LEAST 2 INCHES THICK.
[RULE 1303(a)(1)-BACT]

4. A DIFFERENTIAL PRESSURE GAUGE SHALL BE INSTALLED TO INDICATE IN INCHES OF WATER, THE STATIC PRESSURE ACROSS THE FILTERS. IN OPERATION, THE PRESSURE DIFFERENTIAL SHALL NOT EXCEED 0.25 INCH OF WATER COLUMN.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 850 POUNDS IN ANY ONE CALENDAR MONTH.
[RULE 1303(a)(1)-BACT)

6. THE TOTAL AMOUNT OF VOC EMISSIONS DISCHARGED TO THE ATMOSPHERE FROM THIS EQUIPMENT SHALL NOT EXCEED 39 POUNDS IN ANY ONE DAY.
[RULE 1303(b)(2)-OFFSET]

7. MATERIALS USED IN THIS EQUIPMENT SHALL NOT CONTAIN ANY TOXIC AIR CONTAMINANTS AS IDENTIFIED IN RULE 1401, TABLE 1, AS AMENDED JUNE 5, 2015 OR EARLIER WITH THE EXCEPTION OF METHYL ETHYL KETONE (CAS# 79-93-3) AND STYRENE (CAS# 100-42-5).
[RULE 1401]

8. IN ADDITION TO THE RECORDKEEPING REQUIREMENTS OF RULE 109, THE OPERATOR SHALL:

   A. KEEP ADEQUATE RECORDS FOR THIS EQUIPMENT AND THIS FACILITY TO VERIFY DAILY AND MONTHLY VOC EMISSIONS IN POUNDS AND THE VOC CONTENT OF EACH MATERIAL AS APPLIED (INCLUDING WATER AND EXEMPT COMPOUNDS).

FACILITY PERMIT TO OPERATE
NEW BASIS

B. WITHIN 14 CALENDAR DAYS AFTER THE END OF EACH MONTH, TOTAL AND RECORD VOC EMISSIONS FOR THE MONTH FROM ALL EQUIPMENT AND OPERATIONS THAT ARE REQUIRED TO HAVE WRITTEN PERMITS OR ARE EXEMPT FROM WRITTEN PERMITS PURSUANT TO RULE 219. THE RECORDS SHALL INCLUDE ANY PROCEDURES USED TO ACCOUNT FOR CONTROL DEVICE EFFICIENCIES AND/OR WASTE DISPOSAL. IT SHALL BE SIGNED AND CERTIFIED FOR ACCURACY BY THE HIGHEST RANKING INDIVIDUAL RESPONSIBLE FOR COMPLIANCE WITH DISTRICT RULES.

C. MAINTAIN A SINGLE LIST WHICH INCLUDES ONLY THE NAME AND ADDRESS OF EACH PERSON FROM WHOM THE FACILITY ACQUIRED VOC-CONTAINING MATERIAL REGULATED BY THE DISTRICT THAT WAS USED OR STORED AT THE FACILITY DURING THE PRECEDING 12 MONTHS.

D. RETAIN ALL PURCHASE INVOICES FOR ALL VOC-CONTAINING MATERIAL USED OR STORED AT THE FACILITY AND ALL WASTE MANIFESTS FOR ALL WASTE VOC-CONTAINING MATERIAL REMOVED FROM THE FACILITY FOR FIVE YEARS

ALL RECORDS REQUIRED BY THIS PERMIT SHALL BE PREPARED IN A FORMAT WHICH IS ACCEPTABLE TO THE DISTRICT, RETAINED AT THE FACILITY FOR FIVE YEARS AND MADE AVAILABLE TO ANY DISTRICT REPRESENTATIVE UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

9. THE OPERATOR SHALL PERFORM A WEEKLY INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

D. THE OPERATOR SHALL DETERMINE AND RECORD THE PRESSURE DROP ACROSS THE FILTER MEDIA ONCE EVERY WEEK
[RULE 3004 (a)(4)]

Emissions And Requirements:

10. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

VOC: RULE 1162, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS
VOC: RULE 109
PM: RULE 481
PM: RULE 404, SEE APPENDIX B FOR EMISSION LIMITS

PERMIT TO OPERATE

Permit No. G56559
A/N 607176

Equipment Description:

STORAGE SILO, NO. 5, SAND/CALCIUM CARBONATE, 8'-6" DIA. X 37'-10" H. (OVERALL), 10,472 GALLON CAPACITY VENTED TO A BIN VENT, WAM SILOTOP RO1 SERIES, WITH SEVEN 16" W. X 36" H. CARTRIDGE FILTERS, 264 SQ. FT. TOTAL FILTER AREA, AND REVERSE AIR CLEANING.

Conditions:

1. OPERATION OF THIS EQUIPMENT SHALL BE CONDUCTED IN ACCORDANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
[RULE 204]

2. THIS EQUIPMENT SHALL BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
[RULE 204]

3. THE SILO SHALL NOT BE OPERATED UNLESS IT IS ONLY VENTED TO AIR POLLUTION CONTROL EQUIPMENT, WHICH IS IN FULL USE, AND WHICH HAS BEEN ISSUED AN OPERATING PERMIT BY THE EXECUTIVE OFFICER.
[RULE 1303(a)(1)-BACT]

4. DUST COLLECTED IN THE BIN VENT SHALL BE DISCHARGED ONLY INTO CLOSED CONTAINERS.
[RULE 1303(a)(1)-BACT]

5. THE TOTAL QUANTITY OF MATERIALS CHARGED TO THIS EQUIPMENT SHALL NOT EXCEED 450,000 POUNDS IN ANY CALENDAR MONTH.
[RULE 1303(b)(2)-OFFSET]

6. RECORDS SHALL BE MAINTAINED TO VERIFY COMPLIANCE WITH CONDITION NO. 5. THESE RECORDS SHALL BE RETAINED ON FILE FOR AT LEAST FIVE YEARS AND SHALL BE MADE AVAILABLE TO DISTRICT PERSONNEL UPON REQUEST.
[RULE 109, 1303(b)(2)-OFFSET]

Periodic Monitoring:

7. THE OPERATOR SHALL PERFORM AN ANNUAL INSPECTION OF THE EQUIPMENT AND FILTER MEDIA FOR LEAKS, BROKEN OR TORN FILTER MEDIA AND IMPROPERLY INSTALLED FILTER MEDIA. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

A. THE NAME OF THE PERSON PERFORMING THE INSPECTION AND/OR MAINTENANCE OF THE FILTER MEDIA;

B. THE DATE, TIME AND RESULTS OF THE INSPECTION; AND

C. THE DATE, TIME AND DESCRIPTION OF ANY MAINTENANCE OR REPAIRS RESULTING FROM THE INSPECTION.

[RULE 3004 (a)(4)]

8. THE OPERATOR SHALL CONDUCT AN INSPECTION FOR VISIBLE EMISSIONS FROM ALL STACKS AND OTHER EMISSION POINTS OF THIS EQUIPMENT WHENEVER THERE IS A PUBLIC COMPLAINT OF VISIBLE EMISSIONS, WHENEVER VISIBLE EMISSIONS ARE OBSERVED, AND ON AN ANNUAL BASIS, AT LEAST, UNLESS THE EQUIPMENT DID NOT OPERATE DURING THE ENTIRE ANNUAL PERIOD. THE ROUTINE ANNUAL INSPECTION SHALL BE CONDUCTED WHILE THE EQUIPMENT IS IN OPERATION AND DURING DAYLIGHT HOURS.

IF ANY VISIBLE EMISSIONS (NOT INCLUDING CONDENSED WATER VAPOR) ARE DETECTED THAT LAST MORE THAN THREE MINUTES IN ANY ONE-HOUR, THE OPERATOR SHALL VERIFY AND CERTIFY WITHIN 24 HOURS THAT THE EQUIPMENT CAUSING THE EMISSION AND ANY ASSOCIATED AIR POLLUTION CONTROL EQUIPMENT ARE OPERATING NORMALLY ACCORDING TO THEIR DESIGN AND STANDARD PROCEDURES AND UNDER THE SAME CONDITIONS UNDER WHICH COMPLIANCE WAS ACHIEVED IN THE PAST, AND EITHER:

A. TAKE CORRECTIVE ACTION(S) THAT ELIMINATES THE VISIBLE EMISSIONS WITHIN 24 HOURS AND REPORT THE VISIBLE EMISSIONS AS A POTENTIAL DEVIATION IN ACCORDANCE WITH THE REPORTING REQUIREMENTS IN SECTION K OF THIS PERMIT; OR

B. HAVE A CARB-CERTIFIED SMOKE READER DETERMINE COMPLIANCE WITH THE OPACITY STANDARD, USING EPA METHOD 9 OR THE PROCEDURES IN THE CARB MANUAL "VISIBLE EMISSION EVALUATION", WITHIN THREE BUSINESS DAYS AND REPORT ANY DEVIATIONS TO THE DISTRICT.

THE OPERATOR SHALL KEEP THE RECORDS IN ACCORDANCE WITH THE RECORDKEEPING REQUIREMENTS IN SECTION K OF THIS PERMIT AND THE FOLLOWING RECORDS:

A. STACK OR EMISSION POINT IDENTIFICATION;

B. DESCRIPTION OF ANY CORRECTIVE ACTIONS TAKEN TO ABATE VISIBLE EMISSIONS;

C. DATE AND TIME VISIBLE EMISSION WAS ABATED; AND

D. VISIBLE EMISSION OBSERVATION RECORDED BY A CERTIFIED SMOKE READER.

[RULE 3004 (a)(4)]

Emissions and Requirements:

9. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

PM: RULE 405, SEE APPENDIX B FOR EMISSION LIMITS
PM: RULE 1155, 0% OPACITY

FACILITY PERMIT TO OPERATE
NEW BASIS

RULE 219 EQUIPMENT

Equipment Description:

RULE 219 EXEMPT EQUIPMENT, COATING EQUIPMENT, PORTABLE, ARCHITECTURAL COATINGS.

Periodic Monitoring:

1. THE OPERATOR SHALL KEEP RECORDS, IN A MANNER APPROVED BY THE DISTRICT, FOR THE FOLLOWING PARAMETER(S) OR ITEM(S):

   FOR ARCHITECTURAL APPLICATIONS WHERE NO THINNERS, REDUCERS, OR OTHER VOC CONTAINING MATERIALS ARE ADDED, MAINTAIN SEMI-ANNUAL RECORDS OF ALL COATINGS CONSISTING OF (a) COATING TYPE, (b) VOC CONTENT AS SUPPLIED IN GRAMS PER LITER (g/l) OF MATERIALS FOR LOW-SOLIDS COATINGS, AND (c) VOC CONTENT AS SUPPLIED IN g/l OF COATING, LESS WATER AND EXEMPT SOLVENT, FOR OTHER COATINGS.

   FOR OTHER ARCHITECTURAL APPLICATIONS WHERE THINNERS, REDUCERS, OR OTHER VOC CONTAINING MATERIALS ARE ADDED, MAINTAIN DAILY RECORDS FOR EACH COATING CONSISTING OF (a) COATING TYPE, (b) VOC CONTENT AS APPLIED IN GRAMS PER LITER (g/l) OF MATERIALS USED FOR LOW-SOLIDS COATINGS, AND (c) VOC CONTENT AS APPLIED IN g/l OF COATING, LESS WATER AND EXEMPT SOLVENT, FOR OTHER COATINGS.

   [RULE 3004 (a) (4)]

Emissions and Requirements:

2. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 1113, SEE APPENDIX B FOR EMISSION LIMITS
   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

RULE 219 EQUIPMENT

Equipment Description:

RULE 219 EXEMPT EQUIPMENT, HAND WIPING OPERATIONS.

Emissions and Requirements:

1. THIS EQUIPMENT IS SUBJECT TO THE APPLICABLE REQUIREMENTS OF THE FOLLOWING RULES AND REGULATIONS:

   VOC: RULE 1171, SEE APPENDIX B FOR EMISSION LIMITS

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION E: ADMINISTRATIVE CONDITIONS

The operating conditions in this section shall apply to all permitted equipment at this facility unless superseded by condition(s) listed elsewhere in this permit.

1. The permit shall remain effective unless this permit is suspended, revoked, modified, reissued, denied, or it is expired for nonpayment of permit processing or annual operating fees. [201, 203, 209, 301]
   a. The permit must be renewed annually by paying annual operating fees, and the permit shall expire if annual operating fees are not paid pursuant to requirements of Rule 301(d). [301(d)]
   b. The Permit to Construct listed in Section H shall expire one year from the Permit to Construct issuance date, unless a Permit to Construct extension has been granted by the Executive Officer or unless the equipment has been constructed and the operator has notified the Executive Officer prior to the operation of the equipment, in which case the Permit to Construct serves as a temporary Permit to Operate. [202, 205]
   c. The Title V permit shall expire as specified under Section K of the Title V permit. The permit expiration date of the Title V facility permit does not supercede the requirements of Rule 205. [205, 3004]
2. The operator shall maintain all equipment in such a manner that ensures proper operation of the equipment. [204]
3. This permit does not authorize the emissions of air contaminants in excess of those allowed by Division 26 of the Health and Safety Code of the State of California or the Rules and Regulations of the SCAQMD. This permit cannot be considered as permission to violate existing laws, ordinances, regulations, or statutes of other governmental agencies. [204]
4. The operator shall not use equipment identified in this facility permit as being connected to air pollution control equipment unless they are so vented to the identified air pollution control equipment which is in full use and which has been included in this permit. [204]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION E: ADMINISTRATIVE CONDITIONS

5. The operator shall not use any equipment having air pollution control device(s) incorporated within the equipment unless the air pollution control device is in full operation. [204]

6. The operator shall maintain records to demonstrate compliance with rules or permit conditions that limit equipment operating parameters, or the type or quantity of material processed. These records shall be made available to SCAQMD personnel upon request and be maintained for at least five years. [204]

7. The operator shall maintain and operate all equipment to ensure compliance with all emission limits as specified in this facility permit. Compliance with emission limits shall be determined according to the following specifications, unless otherwise specified by SCAQMD rules or permit conditions: [204]

   a. For internal combustion engines and gas turbines, measured concentrations shall be corrected to 15 percent stack-gas oxygen content on a dry basis and be averaged over a period of 15 consecutive minutes; [1110.2, 1134]

   b. For other combustion devices, measured concentrations shall be corrected to 3 percent stack-gas oxygen content on a dry basis and be averaged over a period of 15 consecutive minutes; [1146, 1146.1, 204]

   c. For non-combustion sources, compliance with emission limits shall be determined and averaged over a period of 60 minutes; [204]

   d. For the purpose of determining compliance with Rule 407, carbon monoxide (CO) shall be measured on a dry basis and be averaged over 15 consecutive minutes, and sulfur compounds which would exist as liquid or gas at standard conditions shall be calculated as sulfur dioxide (SO2) and be averaged over 15 consecutive minutes; [407]

   e. For the purpose of determining compliance with Rule 409, combustion contaminant emission measurements shall be corrected to 12 percent of carbon dioxide (CO2) at standard conditions and averaged over a minimum of 15 consecutive minutes. [409]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION E: ADMINISTRATIVE CONDITIONS

f. For the purpose of determining compliance with Rule 475, combustion contaminant emission measurements shall be corrected to 3 percent of oxygen (O2) at standard conditions and averaged over 15 consecutive minutes or any other averaging time specified by the Executive Officer. [475]

8. The operator shall, when a source test is required by SCAQMD, provide a source test protocol to SCAQMD no later than 60 days before the proposed test date. The test shall not commence until the protocol is approved by SCAQMD. The test protocol shall contain the following information: [204, 304]

a. Brief description of the equipment tested.

b. Brief process description, including maximum and normal operating temperatures, pressures, throughput, etc.

c. Operating conditions under which the test will be performed.

d. Method of measuring operating parameters, such as fuel rate and process weight. Process schematic diagram showing the ports and sampling locations, including the dimensions of the ducts and stacks at the sampling locations, and distances of flow disturbances, (e.g. elbows, tees, fans, dampers) from the sampling locations (upstream and downstream).

e. Brief description of sampling and analytical methods used to measure each pollutant, temperature, flow rates, and moisture.

f. Description of calibration and quality assurance procedures.

g. Determination that the testing laboratory qualifies as an "independent testing laboratory" under Rule 304 (conflict of interest).

9. The operator shall submit a report no later than 60 days after conducting a source test, unless otherwise required by SCAQMD rules or equipment-specific conditions. The report shall contain the following information: [204]

a. The results of the source test.

b. Brief description of the equipment tested.

c. Operating conditions under which the test was performed.

d. Method of measuring operating parameters, such as fuel rate and process weight. Process schematic diagram showing the ports and sampling locations, including the dimensions of the ducts and stacks at the sampling locations, and distances of flow disturbances, (e.g. elbows, tees, fans, dampers) from the sampling locations (upstream and downstream).

e. Field and laboratory data forms, strip charts and analyses.

f. Calculations for volumetric flow rates, emission rates, control efficiency, and overall control efficiency.

10. The operator shall, when a source test is required, provide and maintain facilities for sampling and testing. These facilities shall comply with the requirements of SCAQMD Source Test Method 1.1 and 1.2. [217]

11. Whenever required to submit a written report, notification or other submittal to the Executive Officer, SCAQMD, or the District, the operator shall mail or deliver the material to: Deputy Executive Officer, Engineering and Compliance, SCAQMD, 21865 Copley Drive, Diamond Bar, CA 91765-4178. [204]

SECTION J: AIR TOXICS
[40CFR 63 Subpart WWWW 04-20-2006]

NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR REINFORCED PLASTIC COMPOSITES PRODUCTION.

1. The operator shall comply with all applicable requirements of 40 CFR 63, Subpart WWWW – National Emission Standards for Reinforced Plastic Composites Production and 40 CFR 63, Subpart A - General Provisions by the compliance dates that are specified in these subparts.

2. The operator shall determine the appropriate organic HAP emission factors and calculate the facility's organic HAP emissions from all reinforced plastic composites production operations pursuant to Section 63.5796, 63.5797, 63.5798, and 63.5799.

3. The operator shall comply with all applicable requirements of this subpart by the compliance dates that are specified in Section 63.5800.

4. The operator shall comply with all applicable standards specified in Section 63.5805 by using one of the options identified in Section 63.5810, 63.5820, or 63.5830 for each reinforced plastic composites production operation.

5. The operator shall comply with all applicable work practice standards and startup, shutdown, and malfunction requirements pursuant to Section 63.5835.

6. The operator shall conduct all performance tests, performance evaluations, design evaluations, capture efficiency testing, and other compliance demonstrations that are required by this subpart pursuant to Section 63.5840, 63.5845, 63.5850, 63.5855, and 63.5860.

7. For continuous lamination/casting operations, the operator shall comply with all applicable requirements of emission factor, percent reduction, and capture efficiency calculations procedures pursuant to Section 63.5865, 63.5870, 63.5875, 63.5880, 63.5885, and 63.5890.

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION J: AIR TOXICS
[40CFR 63 Subpart WWWW 04-20-2006]

8. The operator shall monitor and collect all required data pursuant to Section 63.5895 and demonstrate continuous compliance with all standards specified in Section 63.5805 pursuant to Section 63.5900.

9. The operator shall comply with all applicable notification requirements that are specified in Section 63.5905 of this subpart and 40 CFR 63, Subpart A.

10. The operator shall comply with all applicable reporting requirements that are specified in Section 63.5910.

11. The operator shall keep all required records pursuant to Section 63.5915 and 63.5920 of this subpart and 40 CFR 63, Subpart A to demonstrate compliance with all applicable requirements. In addition, all records including data, calculations, and any supporting documentation shall be prepared in a format which is acceptable to the AQMD.

12. Alternative plans, compliance plans, and the construction and operation of new or modified air pollution control equipment that are required by this subpart shall be approved through the AQMD permit system.

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

GENERAL PROVISIONS

1. This permit may be revised, revoked, reopened and reissued, or terminated for cause, or for failure to comply with regulatory requirements, permit terms, or conditions. [3004(a)(7)(C)]

2. This permit does not convey any property rights of any sort or any exclusive privilege. [3004(a)(7)(E)]

Permit Renewal and Expiration

3. (A) Except for solid waste incineration facilities subject to standards under section 129(e) of the Clean Air Act, this permit shall expire five years from the date that this Title V permit is issued. The operator's right to operate under this permit terminates at midnight on this date, unless the facility is protected by an application shield in accordance with Rule 3002(b), due to the filing of a timely and complete application for a Title V permit renewal, consistent with Rule 3003. [3004(a)(2), 3004(f)]

   (B) A Title V permit for a solid waste incineration facility combusting municipal waste subject to standards under Section 129(e) of the Clean Air Act shall expire 12 years from the date of issuance unless such permit has been renewed pursuant to this regulation. These permits shall be reviewed by the Executive Officer at least every five years from the date of issuance. [3004(f)(2)]

4. To renew this permit, the operator shall submit to the Executive Officer an application for renewal at least 180 days, but not more than 545 days, prior to the expiration date of this permit. [3003(a)(6)]

Duty to Provide Information

5. The applicant for, or holder of, a Title V permit shall furnish, pursuant to Rule 3002(d) and (e), timely information and records to the Executive Officer or designee within a reasonable time as specified in writing by the Executive Officer or designee. [3004(a)(7)(F)]

Payment of Fees

6. The operator shall pay all required fees specified in Regulation III - Fees. [3004(a)(7)(G)]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

Reopening for Cause

7. The Executive Officer will reopen and revise this permit if any of the following circumstances occur:

   (A) Additional regulatory requirements become applicable with a remaining permit term of three or more years. Reopening is not required if the effective date of the requirement is later than the expiration date of this permit, unless the permit or any of its terms and conditions has been extended pursuant to paragraph (f)(4) of Rule 3004.

   (B) The Executive Officer or EPA Administrator determines that this permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of this permit.

   (C) The Executive Officer or EPA Administrator determines that the permit must be revised or revoked to assure compliance with the applicable requirements. [3005(g)(1)]

COMPLIANCE PROVISIONS

8. The operator shall comply with all regulatory requirements, and all permit terms and conditions, except:

   (A) As provided for by the emergency provisions of condition no. 17 or condition no. 18, or

   (B) As provided by an alternative operating condition granted pursuant to a federally approved (SIP-approved) Rule 518.2.

   Any non-compliance with any federally enforceable permit condition constitutes a violation of the Federal Clean Air Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or revision; or denial of a permit renewal application. Non-compliance may also be grounds for civil or criminal penalties under the California State Health and Safety Code. [3004(a)(7)(A)]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

9. The operator shall allow the Executive Officer or authorized representative, upon presentation of appropriate credentials to:

   (A) Enter the operator's premises where emission-related activities are conducted, or records are kept under the conditions of this permit;

   (B) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;

   (C) Inspect at reasonable times, any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and

   (D) Sample or monitor at reasonable times, substances or parameters for the purpose of assuring compliance with the facility permit or regulatory requirements. [3004(a)(10)(B)]

10. All terms and conditions in this permit, including any provisions designed to limit a facility's potential to emit, are enforceable by the EPA Administrator and citizens under the federal Clean Air Act, unless the term or condition is designated as not federally enforceable. Each day during any portion of which a violation occurs is a separate offense. [3004(g)]

11. A challenge to any permit condition or requirement raised by EPA, the operator, or any other person, shall not invalidate or otherwise affect the remaining portions of this permit. [3007(b)]

12. The filing of any application for a permit revision, revocation, or termination, or a notification of planned changes or anticipated non-compliance does not stay any permit condition. [3004(a)(7)(D)]

13. It shall not be a defense for a person in an enforcement action, including those listed in Rule 3002(c)(2), that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit, except as provided for in "Emergency Provisions" of this section. [3004(a)(7)(H)]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

14. The operator shall not build, erect, install, or use any equipment, the use of which, without resulting in a reduction in the total release of air contaminants to atmosphere, reduces or conceals an emission which would otherwise constitute a violation of Chapter 3 (commencing with Section 41700) of Part 4, of Division 26 of the California Health and Safety Code or of AQMD rules. This rule shall not apply to cases in which the only violation involved is of Section 41700 of the California Health and Safety Code, or Rule 402 of AQMD Rules. [408]

15. Nothing in this permit or in any permit shield can alter or affect:

    (A) Under Section 303 of the federal Clean Air Act, the provisions for emergency orders;

    (B) The liability of the operator for any violation of applicable requirements prior to or at the time of permit issuance;

    (C) The applicable requirements of the Acid Rain Program, Regulation XXXI;

    (D) The ability of EPA to obtain information from the operator pursuant to Section 114 of the federal Clean Air Act;

    (E) The applicability of state or local requirements that are not "applicable requirements", as defined in Rule 3000, at the time of permit issuance but which do apply to the facility, such as toxics requirements unique to the State; and

    (F) The applicability of regulatory requirements with compliance dates after the permit issuance date. [3004(c)(3)]

16. For any portable equipment that requires an AQMD or state permit or registration, excluding a) portable engines, b) military tactical support equipment and c) AQMD-permitted portable equipment that are not a major source, are not located at the facility for more than 12 consecutive months after commencing operation, and whose operation does not conflict with the terms or conditions of this Title V permit: 1) the facility operator shall keep a copy of the AQMD or state permit or registration; 2) the equipment operator shall comply with the conditions on the permit or registration and all other regulatory requirements; and 3) the facility operator shall treat the permit or registration as a part of its Title V permit, subject to recordkeeping, reporting and certification requirements. [3004(a)(1)]

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

EMERGENCY PROVISIONS

17. An emergency[1] constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limit only if:

    (A) Properly signed, contemporaneous operating records or other credible evidence demonstrate that:

        (1) An emergency occurred and the operator can identify the cause(s) of the emergency;

        (2) The facility was operated properly (i.e. operated and maintained in accordance with the manufacturer's specifications, and in compliance with all regulatory requirements or a compliance plan), before the emergency occurred;

        (3) The operator took all reasonable steps to minimize levels of emissions that exceeded emissions standard, or other requirements in the permit; and,

        (4) The operator submitted a written notice of the emergency to the AQMD within two working days of the time when the emissions limitations were exceeded due to the emergency. The notice shall contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken; and

    (B) The operator complies with the breakdown provisions of Rule 430 – Breakdown Provisions, or subdivision (i) of Rule 2004 – Requirements, whichever is applicable. [3002(g), 430, 2004(i)]

18. The operator is excused from complying with any regulatory requirement that is suspended by the Executive Officer during a state of emergency or state of war emergency, in accordance with Rule 118 - Emergencies. [118]

---

1 "Emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the operator, including acts of God, which: (A) requires immediate corrective action to restore normal operation; and (B) causes the facility to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency; and (C) is not caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

RECORDKEEPING PROVISIONS

19. In addition to any other recordkeeping requirements specified elsewhere in this permit, the operator shall keep records of required monitoring information, where applicable, that include:

    (A) The date, place as defined in the Title V permit, and time of sampling or measurements;

    (B) The date(s) analyses were performed;

    (C) The company or entity that performed the analyses;

    (D) The analytical techniques or methods used;

    (E) The results of such analyses; and

    (F) The operating conditions as existing at the time of sampling or measurement. [3004(a)(4)(B)]

20. The operator shall maintain records pursuant to Rule 109 and any applicable material safety data sheet (MSDS) for any equipment claimed to be exempt from a written permit by Rule 219 based on the information in those records. [219(t)]

21. The operator shall keep all records of monitoring data required by this permit or by regulatory requirements for a period of at least five years from the date of the monitoring sample, measurement, report, or application. [3004(a)(4)(E)]

REPORTING PROVISIONS

22. The operator shall comply with the following requirements for prompt reporting of deviations:

    (A) Breakdowns shall be reported as required by Rule 430 – Breakdown Provisions or subdivision (i) of Rule 2004 - Requirements, whichever is applicable.

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

(B) Other deviations from permit or applicable rule emission limitations, equipment operating conditions, or work practice standards, determined by observation or by any monitoring or testing required by the permit or applicable rules that result in emissions greater than those allowed by the permit or applicable rules shall be reported within 72 hours (unless a shorter reporting period is specified in an applicable State or Federal Regulation) of discovery of the deviation by contacting AQMD enforcement personnel assigned to this facility or otherwise calling (800) CUT-SMOG.

(C) A written report of such deviations reported pursuant to (B), and any corrective actions or preventative measures taken, shall be submitted to AQMD, in an AQMD approved format, within 14 days of discovery of the deviation.

(D) All other deviations shall be reported with the monitoring report required by condition no. 23. [3004(a)(5)]

23. Unless more frequent reporting of monitoring results are specified in other permit conditions or in regulatory requirements, the operator shall submit reports of any required monitoring to the AQMD at least twice per year. The report shall include a) a statement whether all monitoring required by the permit was conducted; and b) identification of all instances of deviations from permit or regulatory requirements. A report for the first six calendar months of the year is due by August 31 and a report for the last six calendar months of the year is due by February 28. [3004(a)(4)(F)]

24. The operator shall submit to the Executive Officer and to the Environmental Protection Agency (EPA), an annual compliance certification. For RECLAIM facilities, the certification is due when the Annual Permit Emissions Program (APEP) report is due and shall cover the same reporting period. For other facilities, the certification is due on March 1 for the previous calendar year. The certification need not include the period preceding the date the initial Title V permit was issued. Each compliance certification shall include:

(A) Identification of each permit term or condition that is the basis of the certification;

FACILITY PERMIT TO OPERATE
NEW BASIS

SECTION K: TITLE V Administration

(B) The compliance status during the reporting period;

(C) Whether compliance was continuous or intermittent;

(D) The method(s) used to determine compliance over the reporting period and currently, and

(E) Any other facts specifically required by the Executive Officer to determine compliance.

The EPA copy of the certification shall be sent to: Director of the Air Division Attn: Air-3 USEPA, Region IX 75 Hawthorne St. San Francisco, CA 94105 [3004(a)(10)(E)]

25. All records, reports, and documents required to be submitted by a Title V operator to AQMD or EPA shall contain a certification of accuracy consistent with Rule 3003(c)(7) by a responsible official (as defined in Rule 3000). [3004(a)(12)]

PERIODIC MONITORING

26. All periodic monitoring required by this permit pursuant to Rule 3004(a)(4)(c) is based on the requirements and justifications in the AQMD document "Periodic Monitoring Guidelines for Title V Facilities" or in case-by-case determinations documented in the TitleV application file. [3004(a)(4)]

FACILITY RULES

This facility is subject to the following rules and regulations

With the exception of Rule 402, 473, 477, 1118 and Rules 1401 through 1420, the following rules that are designated as non-federally enforceable are pending EPA approval as part of the state implementation plan. Upon the effective date of that approval, the approved rule(s) will become federally enforceable, and any earlier versions of those rules will no longer be federally enforceable.

RULE SOURCE	Adopted/Amended Date	FEDERAL Enforceability
RULE 109	5-2-2003	Federally enforceable
RULE 1113	2-5-2016	Non federally enforceable
RULE 1113	6-3-2011	Federally enforceable
RULE 1147	9-9-2011	Non federally enforceable

APPENDIX B: RULE EMISSION LIMITS
[RULE 1113 06-03-2011]

COATING CATEGORY	Ceiling Limit[1]	Current Limit[2]	Effective Date		
			7/1/08	1/1/12	1/1/14
Stains, Interior	250	250			
Swimming Pool Coatings					
Repair		340			
Other		340			
Traffic Coatings		100			
Waterproofing Sealers	250	100			
Waterproofing Concrete/Masonry Sealers	400	100			
Wood Preservatives		350			

1. The specified ceiling limits are applicable to products sold under the Averaging Compliance Option.
2. The specified limits remain in effect unless revised limits are listed in subsequent columns in the Table of Standards.
3. Does not include compounds used for curbs and gutters, sidewalks, islands, driveways and other miscellaneous concrete areas.

TABLE OF STANDARDS 1 (cont.)
VOC LIMITS

Grams of VOC Per Liter of Material

COATING	Limit
Low-Solids Coating	120

TABLE OF STANDARDS 2
VOC LIMITS FOR COLORANTS

Grams of VOC Per Liter of Colorant
Less Water and Less Exempt Compounds

COLORANT	Limit[4]
Architectural Coatings, excluding IM Coatings	50
Solvent-Based IM	600
Waterborne IM	50

4. Effective January 1, 2014.

APPENDIX B: RULE EMISSION LIMITS
[RULE 1162 11-17-2000]

The operator shall not use a polyester resin material in a polyester resin operation which has a monomer content in excess of the limits specified in the Table below.

Polyester Resin Materials	Monomer Content in Polyester Resin Materials as Applied (By Weight Percent)
General Purpose Polyester Resin	35
Corrosion-Resistant	48
Fire Retardant	42
High Strength	48
Clear Gel Coat	50
Pigmented Gel Coat	45

FACILITY PERMIT TO OPERATE
NEW BASIS

APPENDIX B: RULE EMISSION LIMITS
[RULE 1162 07-08-2005]

The operator shall not use polyester resin material in an open molding system, which has a monomer content in excess of the limits specified in the following Table.

Polyester Resin Materials	Monomer Percentage by Weight as Applied	
	Prior to 11-09-2001	Current Limits
Clear Gel Coat	50	-
For Marble Resins	-	40
For Other Resins	-	44
Pigmented Gel Coat	45	-
White and Off White	-	30
Non-White	-	37
Primer	-	28
Specialty Gel Coats	-	48
General Purpose Resin	35	-
Marble Resins	-	10 or (32 % as supplied, no fillers)
Solid Surface Resins	-	17
Tub/Shower Resins	-	24 or (35 % as supplied, no fillers)
Lamination Resins	-	31 or (35 % as supplied, no fillers)
Others	-	35
Fire Retardant Resin	42	38
Corrosion Resistant Resin	48	48
High Strength Resin	48	40

APPENDIX B: RULE EMISSION LIMITS
[RULE 404 02-07-1986]

The operator shall not discharge into the atmosphere from this equipment, particulate matter in excess of the concentration at standard conditions, shown in Table 404(a). Where the volume discharged is between figures listed in the Table, the exact concentration permitted to be discharged shall be determined by linear interpolation.

For the purposes of this rule, emissions shall be averaged over one complete cycle of operation or one hour, whichever is the lesser time period.

TABLE 404(a)

Subject: RE: New Public Records Request

Good morning,

After careful review of our records, we show we have Storm Water information for the following site:
1989 Massachusetts Avenue and 2626 Kansas Avenue Riverside, CA 92507

The requested record can be accessed online by:
• Clicking this link
https://smarts.waterboards.ca.gov/smarts/PublicDataAccess/PublicNoiSearch.xhtml
• Enter street number into" Facility/Site Street:" Field
• Enter the site city (e.g. "Irvine") into "Facility/ Site City:" Field
• Click on black underlined links to view attachments

If we can be of further assistance, please do not hesitate to contact us again.

Thank you,
File Review Desk

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

Attn: Annie Vanscyoc or Facility Manager
Student Transporation of America
1989 Massachusetts Ave
Riverside, CA 92507

Notice of Noncompliance: Failure to Comply With the General Permit for Storm Water Discharges Associated With Industrial Activities, Order No. 97-03-DWQ, NPDES NO. CAS000001 (General Permit), Waste Discharge Identification (WDID) Number 8 33I022415

Dear Annie Vanscyoc or Facility Manager:

Your facility located at 1989 Massachusetts Ave, in the city of Riverside, is regulated under the General Permit and is identified by WDID number 8 33I022415. Section B.14 of the General Permit requires you to submit an annual report by July 1 of each year. Our records show that your annual report for the July 1, 2013 to June 30, 2014 reporting period has not been received.

You are in violation of the General Permit, the California Water Code and the federal Clean Water Act for failure to submit a complete 2013-2014 Annual Report. We request that you submit a complete 2013-2014 Annual Report to this office no later than 30 days from the date of this letter. A blank copy of the report form can be downloaded from the Storm Water section of the State Water Resources Control Board web site at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/annualreport.shtml

Our office is implementing a Paperless Office (ECM - Electronic Content Management) system to reduce our paper use, increase efficiency, and provide a more effective way for our staff, the public and interested parties to view water quality documents in an electronic form. **Documents less than 25 MB should be e-mailed to santaana@waterboards.ca.gov.** Documents that are 25 MB or larger should be transferred to a CD/DVD and mailed to the Santa Ana Regional Board at 3737 Main St., Ste. 500, Riverside, CA 92501. Please visit the following link http://www.waterboards.ca.gov/rwqcb8/resources/docs/ecm/DischargerECMLetter.pdf for more information.

If your facility has some challenges with electronic submittal, you may submit a paper copy of your Annual Report.

Along with the Annual Report, you must also provide a statement explaining why the Annual Report was not submitted by the July 1 deadline and the measures you have taken to ensure timely submittals in the future. Failure to submit the requested information may result in enforcement action, including civil monetary penalties of up to $10,000 for each day of violation. Please note that Section 13399.33 of the California Water Code stipulates a minimum penalty of $1,000 to those permittees that do not submit their annual reports after notification.

Please be aware that starting with the 2015-2016 Annual Report for the reporting period from July 1, 2015 to June 30, 2016, Annual Reports must be certified and submitted electronically through the online SMARTS database (https://smarts.waterboards.ca.gov) **as required under the recently adopted General Industrial Permit, Order 2014-0057-DWQ** (http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2014/wqo2014_0057_dwq.pdf). The new permit becomes effective on July 1, 2015. It is advisable to obtain the online SMARTS account early to prevent account processing delays, since the eAuthorization form must be signed and mailed to the Sacramento address for verification.

If you wish to be notified electronically of future annual report submittals prior to the due date, please update the first page of the Annual Report contact information with the appropriate e-mail address. If you wish to add additional contact person(s) to the notification list, please indicate on a separate page.

Should you need assistance in completing the Annual Report or have any questions, please contact Nam Nguyen at 951-321-4582 (e-mail: nnguyen@waterboards.ca.gov), or Michael Roth at 951-320-2027 (e-mail: mroth@waterboards.ca.gov).

Sincerely,

Hope A Smythe

Notice of Noncompliance: Failure to Comply With the General Permit for Storm Water Discharges Associated With Industrial Activities, Order No. 97-03-DWQ, NPDES NO. CAS000001 (General Permit), Waste Discharge Identification (WDID) Number 8 33I022415

Dear Annie Vanscyoc or Facility Owner:

Your facility located at 1989 Massachusetts Ave, in the city of Riverside, is regulated under the General Permit and is identified by WDID number 8 33I022415. Section B.14 of the General Permit requires you to submit an annual report by July 1 of each year. Our records show that your annual report for the July 1, 2013 to June 30, 2014 reporting period has not been received.

You are in violation of the General Permit, the California Water Code and the federal Clean Water Act for failure to submit a complete 2013-2014 Annual Report. We request that you submit a complete 2013-2014 Annual Report to this office no later than 30 days from the date of this letter. A blank copy of the report form can be downloaded from the Storm Water section of the State Water Resources Control Board web site at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/annualreport.shtml

Our office is implementing a Paperless Office (ECM - Electronic Content Management) system to reduce our paper use, increase efficiency, and provide a more effective way for our staff, the public and interested parties to view water quality documents in an electronic form. **Documents less than 25 MB should be e-mailed to santaana@waterboards.ca.gov.** Documents that are 25 MB or larger should be transferred to a CD/DVD and mailed to the Santa Ana Regional Board at 3737 Main St., Ste. 500, Riverside, CA 92501. Please visit the following link http://www.waterboards.ca.gov/rwqcb8/resources/docs/ecm/DischargerECMLetter.pdf for more information.

If your facility has some challenges with electronic submittal, you may submit a paper copy of your Annual Report.

Along with the Annual Report, you must also provide a statement explaining why the Annual Report was not submitted by the July 1 deadline and the measures you have taken to ensure timely submittals in the future. Failure to submit the requested information may result in enforcement action, including civil monetary penalties of up to $10,000 for each day of violation. Please note that Section 13399.33 of the California Water Code stipulates a minimum penalty of $1,000 to those permittees that do not submit their annual reports after notification.

Please be aware that starting with the 2015-2016 Annual Report for the reporting period from July 1, 2015 to June 30, 2016, Annual Reports must be certified and submitted electronically through the online SMARTS database (https://smarts.waterboards.ca.gov) **as required under the recently adopted General Industrial Permit, Order 2014-0057-DWQ** (http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2014/wqo2014_0057_dwq.pdf). The new permit becomes effective on July 1, 2015. It is advisable to obtain the online SMARTS account early to prevent account processing delays, since the eAuthorization form must be signed and mailed to the Sacramento address for verification.

If you wish to be notified electronically of future annual report submittals prior to the due date, please update the first page of the Annual Report contact information with the appropriate e-mail address. If you wish to add additional contact person(s) to the notification list, please indicate on a separate page.

Should you need assistance in completing the Annual Report or have any questions, please contact Nam Nguyen at 951-321-4582 (e-mail: nnguyen@waterboards.ca.gov), or Michael Roth at 951-320-2027 (e-mail: mroth@waterboards.ca.gov).

Sincerely,

Hope A. Smythe

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
2011-2012 ANNUAL REPORT
FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2011 through June 30, 2012

An Annual Report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers, and e-mail addresses of the Regional Board contacts, as well as the Regional Board Offices addresses are indicated below.

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☐ **YES** Go to Item D.2 ☒ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☐ Participating in an Approved Group Monitoring Plan **Group Name:** _____

   _____

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: _____

   v. ☐ Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? ____ If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☒ **YES** ☐ **NO, attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? 1

4. For each storm event sampled, did you collect and analyze a sample from each of the facilitys' storm water discharge locations? ☒ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☐ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated _____

6. Were all samples collected during the first hour of discharge? ☒ YES ☐ NO, **attach explanation**

7. Was all storm water sampling preceded by three (3) working days without a storm water discharge? ☒ YES ☐ NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) ☐ YES ☒ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☒ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☐ **YES** ☒ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September ☒ **YES** ☐ **NO** ☐ **N/A** October-December ☐ **YES** ☐ **NO** ☒ **N/A**

January-March ☐ **YES** ☐ **NO** ☒ **N/A** April-June ☐ **YES** ☐ **NO** ☒ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers**.

July -September ☒ **YES** ☐ **NO** October-December ☒ **YES** ☐ **NO**

January-March ☒ **YES** ☐ **NO** April-June ☒ **YES** ☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☒	☐	March	☐	☒
December	☐	☒	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? [X] YES [ ] NO

The following records should be reviewed:

- quarterly authorized non-storm water discharge visual observations
- monthly storm water discharge visual observation
- records of spills/leaks and associated clean-up/response activities
- quarterly unauthorized non-storm water discharge visual observations
- Sampling and Analysis records
- preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? [X] YES [ ] NO

The following SWPPP items should be reviewed:

- pollution prevention team
- list of significant materials
- description of potential pollutant sources
- assessment of potential pollutant sources
- identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? [X] YES [ ] NO

The following BMP categories should be reviewed:

- good housekeeping practices
- spill response
- employee training
- erosion control
- quality assurance
- preventative maintenance
- material handling and storage practices
- waste handling/storage
- structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? [X] YES [ ] NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? [X] YES [ ] NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1. Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2. If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☒ YES	☐ NO	☐ NA
3. If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☐ NA
4. Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☐ YES	☐ NO	☒ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

FORM 1-SAMPLING & ANALYSIS RESULTS

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box
- Make additional copies of this form as necessary.

FORM 4-MONTHLY VISUAL OBSERVATIONS OF

SIDE A

STORM WATER DISCHARGES

- Storm water discharge visual observations are required for at least one storm event per month between October 1 and May 31.
- Visual observations must be conducted during the first hour of discharge at all discharge locations.
- Discharges of temporarily stored or contained storm water must be observed at the time of discharge.
- Indicate "None" in the first column of this form if you did not conduct a monthly visual observation.
- Make additional copies of this form as necessary.
- Until a monthly visual observation is made, record any eligible storm events that do not result in a storm water discharge and note the date, time, name, and title of who observed there was no storm water discharge.

SIDE A

- Storm water discharge visual observations are required for at least one storm event per month between October 1 and May 31.
- Visual observations must be conducted during the first hour of discharge at all discharge locations.
- Discharges of temporarily stored or contained storm water must be observed at the time of discharge.
- Indicate "None" in the first column of this form if you did not conduct a monthly visual observation.
- Make additional copies of this form as necessary.
- Until a monthly visual observation is made, record any eligible storm events that do not result in a storm water discharge and note the date, time, name, and title of who observed there was no storm water discharge.

To Interested Parties:

2011-2012 ANNUAL REPORT ANNUAL REPORT FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Storm Water Multi-Application Reporting and Tracking System (SMARTS) allows an individual discharger to file and submit their Annual Report electronically to the Regional Water Board. Currently SMARTS is not a mandatory reporting method, but we encourage all dischargers to register and use SMARTS.

To register to use SMARTS please visit: https://smarts.waterboards.ca.gov and download the SMARTS LRP registration form and instructions. Please fill out the form and mail it back to: SMARTS Registration, P.O. Box 1977, Sacramento, CA 95812. Once a complete registration form is received, a login name and password will be emailed to you.

For SMARTS registration questions or information please contact the SMARTS help center at 1-866-563-3107 or by email at stormwater@waterboards.ca.gov.

To receive email updates on Storm Water Industrial permitting issues, please sign up at http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml The Storm Water program currently maintains five email lists:

- Storm Water Database Issues
- Storm Water Construction Permitting Issues
- Storm Water Industrial Permitting Issues
- Storm Water Municipal Permitting Issues
- Sustainable Development

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
2012-2013 ANNUAL REPORT
FOR STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2012 through June 30, 2013

An Annual Report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers, and e-mail addresses of the Regional Board contacts, as well as the Regional Board Offices addresses are indicated below.

REGIONAL BOARD INFORMATION:

2012-2013

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☐ **YES** Go to Item D.2 ☑ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☐ Participating in an Approved Group Monitoring Plan **Group Name:** _____

   _____

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: _____

   v. ☐ Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? Ø If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☐ **YES** ☑ **NO, attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? 1

4. For each storm event sampled, did you collect and analyze a sample from each of the facilitys' storm water discharge locations? ☐ YES, go to Item E.6 ☐ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☑ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated 5/31/13

6. Were <u>all</u> samples collected during the first hour of discharge? ☐ YES ☑ NO, **attach explanation**

7. Was <u>all</u> storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☑ NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) ☐ YES ☑ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☑ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☑ **YES** ☐ **NO**. Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September	☑ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☑ **N/A**
January-March	☐ **YES**	☐ **NO**	☑ **N/A**	April-June	☑ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers**.

July -September	☑ **YES**	☐ **NO**	October-December	☑ **YES**	☐ **NO**
January-March	☑ **YES**	☐ **NO**	April-June	☑ **YES**	☐ **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☑ **NO** Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☑	February	☐	☑
November	☐	☑	March	☐	☑
December	☐	☑	April	☐	☑
January	☐	☑	May	☐	☑

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☑ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☑ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: ☑ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☑ YES ☐ NO

The following records should be reviewed:

- quarterly authorized non-storm water discharge visual observations
- monthly storm water discharge visual observation
- records of spills/leaks and associated clean-up/response activities
- quarterly unauthorized non-storm water discharge visual observations
- Sampling and Analysis records
- preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☑ YES ☐ NO

The following SWPPP items should be reviewed:

- pollution prevention team
- list of significant materials
- description of potential pollutant sources
- assessment of potential pollutant sources
- identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☑ YES ☐ NO

The following BMP categories should be reviewed:

- good housekeeping practices
- spill response
- employee training
- erosion control
- quality assurance
- preventative maintenance
- material handling and storage practices
- waste handling/storage
- structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☑ YES ☐ NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☑ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1. Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☑ YES (Mandatory)		
2. If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☐ YES	☐ NO	☑ NA
3. If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☑ NA
4. Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☑ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Title: Manager

DESCRIPTION OF BASIC ANALYTICAL PARAMETERS

The Industrial Activities Storm Water General Permit (General Permit) requires you to analyze storm water samples for at least four parameters. These are pH, Total Suspended Solids (TSS), Specific Conductance (SC),and Total Organic Carbon (TOC). Oil and Grease (O&G) may be substituted for TOC. In addition, you must monitor for any other pollutants which you believe to be present in your storm water discharge as a result of industrial activity and analytical parameters listed in Table D of the General Permit. There are no numeric limitations for the parameters you test for.

The four parameters which the General Permit requires to be tested are considered *indicator* parameters. In other words, regardless of what type of facility you operate, these parameters are nonspecific and general enough to usually provide some indication whether pollutants are present in your storm water discharge. The following briefly explains what each of these parameters mean:

pH is a numeric measure of the hydrogen-ion concentration. The neutral, or acceptable, range is within 6.5 to 8.5. At values less than 6.5, the water is considered acidic; above 8.5 it is considered alkaline or basic. An example of an acidic substance is vinegar, and a alkaline or basic substance is liquid antacid. Pure rainfall tends to have a pH of a little less than 7. There may be sources of materials or industrial activities which could increase or decrease the pH of your storm water discharge. If the pH levels of your storm water discharge are high or low, you should conduct a thorough evaluation of all potential pollutant sources at your site.

Total Suspended Solids (TSS) is a measure of the undissolved solids that are present in your storm water discharge. Sources of TSS include sediment from erosion of exposed land, and dirt from impervious (i.e. paved) areas. Sediment by itself can be very toxic to aquatic life because it covers feeding and breeding grounds, and can smother organisms living on the bottom of a water body. Toxic chemicals and other pollutants also adhere to sediment particles. This provides a medium by which toxic or other pollutants end up in our water ways and ultimately in human and aquatic life. TSS levels vary in runoff from undisturbed land. It has been shown that TSS levels increase significantly due to land development.

Specific Conductance (SC) is a numerical expression of the ability of the water to carry an electric current. SC can be used to assess the degree of mineralization, salinity, or estimate the total dissolved solids concentration of a water sample. Because of air pollution, most rain water has a SC a little above zero. A high SC could affect the usability of waters for drinking, irrigation, and other commercial or industrial use.

Total Organic Carbon (TOC) is a measure of the total organic matter present in water. (All organic matter contains carbon) This test is sensitive and able to detect small concentrations of organic matter. Organic matter is naturally occurring in animals, plants, and man. Organic matter may also be man made (so called synthetic organics). Synthetic organics include pesticides, fuels, solvents, and paints. Natural organic matter utilizes the oxygen in a receiving water to biodegrade. Too much organic matter could place a significant oxygen demand on the water, and possibly impact its quality. Synthetic organics either do not biodegrade or biodegrade very slowly. Synthetic organics are a source of toxic chemicals that can have adverse affects at very low concentrations. Some of these chemicals bioaccumulate in aquatic life. If your levels of TOC are high, you should evaluate all sources of natural or synthetic organics you may use at your site.

Oil and Grease (O&G) is a measure of the amount of oil and grease present in your storm water discharge. At very low concentrations, O&G can cause a sheen (that floating "rainbow") on the surface of water (1 qt. of oil can pollute 250,000 gallons of water). O&G can adversely affect aquatic life and create unsightly floating material and film on water, thus making it undrinkable. Sources of O&G include maintenance shops, vehicles, machines and roadways.

If you have any questions regarding whether or not your constituent concentrations are too high, please contact your local Regional Board office. The United States Environmental Protection Agency (USEPA) has published stormwater discharge benchmarks for a number of parameters. These benchmarks may be helpful when evaluating whether additional BMPs are appropriate. These benchmarks can be accessed at our website at http://www.swrcb.ca.gov. It is contained in the Sampling and Analysis Reduction Certification.

ANNUAL REPORT

SIDE A

FORM 1-SAMPLING & ANALYSIS RESULTS

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

SECOND STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

To Interested Parties:

2012-2013 ANNUAL REPORT ANNUAL REPORT FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Attached is the 2012-21013 annual report that must be mailed to your Regional Board office by July 1, 2013. Dischargers within the Los Angeles Regional Board are required to electronically submit their annual reports via the Storm Water Multi-Application Reporting and Tracking System (SMARTS), email with a PDF attachment(s) to losangeles@waterboards.ca.gov, or mail a disk. Although electronic submittals are not mandatory for dischargers in other regions, we encourage all dischargers to register and use SMARTS. We anticipate that a new Industrial General Permit (IGP) will be adopted sometime next year that will mandate electronic reporting for future reporting years.

To register to use SMARTS please visit: https://smarts.waterboards.ca.gov and download the SMARTS LRP registration form and instructions. Please fill out the form and mail it back to: SMARTS Registration, P.O. Box 1977, Sacramento, CA 95812. Once a complete registration form is received, a login name and password will be emailed to you.

For SMARTS registration questions or information please contact the SMARTS help center at 1-866-563-3107 or by email at stormwater@waterboards.ca.gov.

To receive email updates on Storm Water Industrial permitting issues including updates on the IGP reissuance process (hearings, workshops, schedules, etc.), please sign up at http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml The Storm Water program currently maintains five email lists:

- Storm Water Database Issues
- Storm Water Construction Permitting Issues
- Storm Water Industrial Permitting Issues
- Storm Water Municipal Permitting Issues
- Sustainable Development

Sincerely,

Storm Water Section

STORM WATER SAMPLING REQUIREMENT FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES, ORDER NO. 2014-0057-DWQ, NPDES NO. CAS000001 (GENERAL PERMIT), WDID NO. 8 33I022415

Dear Maria Jenkins:

Your facility, Student Transporation of America, locates at 1989 Massachusetts Ave, Riverside, CA 92507, is authorized to discharge under the permit WDID No. **8 33I022415**, under the General Permit for Storm Water Discharges Associated with Industrial Activities (General Permit), Order 2014-0057-DW. The General Permit, under Section XI.B, requires your facility to sample two (2) Qualify Storm Events (QSEs) within the first half of the reporting year (July 1 to December 31), and two (2) QSEs within the second half of same reporting year (January 1 to June 30). Information about the General Permit can be found here:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/industrial.shtml

According to our records, your facility has not sampled for the past two reporting years (2014 to 2015, and 2015 to 2016). Our records also suggested that there were qualifying storm events in your area.

As specified in the General Permit, your facility is required, during scheduled business operating hours, to collect and analyze the storm water samples to include, at minimum, pH, Total Suspended Solids (TSS), and Oil & Grease (O&G). The General Permit requires that additional parameters be analyzed based on the Standard Industrial Classification (SIC) Code(s) listed in Table 1. If your facility engages in the activities described by the SIC Code(s) listed in Table 1, you must sample for the additional parameters shown.

Failure to sample per the General Permit's requirements, under Section XI.B, can result in result in enforcement action, including civil monetary penalties of up to $10,000 for each day of violation pursuant to California Water Code Section 13385.

Sincerely,

Adam Fischer, Chief
Inland Storm Water Unit

CALIFORNIA Water Boards

State Water Resources Control Board

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2013 through June 30, 2014

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.swrcb.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☐ **YES** Go to Item D.2 ☒ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☐ Participating in an Approved Group Monitoring Plan **Group Name:** _____

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: _____

   v. ☐ Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? 0 If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☐ **YES** ☒ **NO, attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? 1

4. For each storm event sampled, did you collect and analyze a sample from each of the facilitys' storm water discharge locations? ☐ YES, go to Item E.6 ☒ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☒ NO ☐ YES, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated _____

6. Were all samples collected during the first hour of discharge? ☐ YES ☒ NO, **attach explanation**

7. Was all storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☒ NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) ☐ YES ☒ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☒ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☒ **YES** ☐ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September	☒ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☐ **NO**	☒ **N/A**
January-March	☐ **YES**	☐ **NO**	☒ **N/A**	April-June	☒ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers**.

July -September	☒ **YES**	☐ **NO**	☐ **N/A**	October-December	☒ **YES**	☐ **NO**	☐ **N/A**
January-March	☒ **YES**	☐ **NO**	☐ **N/A**	April-June	☒ **YES**	☐ **NO**	☐ **N/A**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☐	☒	March	☐	☒
December	☐	☒	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? [x] YES [ ] NO

   The following records should be reviewed:

   - quarterly authorized non-storm water discharge visual observations
   - monthly storm water discharge visual observation
   - records of spills/leaks and associated clean-up/response activities
   - quarterly unauthorized non-storm water discharge visual observations
   - Sampling and Analysis records
   - preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? [x] YES [ ] NO

   The following SWPPP items should be reviewed:

   - pollution prevention team
   - list of significant materials
   - description of potential pollutant sources
   - assessment of potential pollutant sources
   - identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? [x] YES [ ] NO

   The following BMP categories should be reviewed:

   - good housekeeping practices
   - spill response
   - employee training
   - erosion control
   - quality assurance
   - preventative maintenance
   - material handling and storage practices
   - waste handling/storage
   - structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? [x] YES [ ] NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? [x] YES [ ] NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

ANNUAL REPORT

DESCRIPTION OF BASIC ANALYTICAL PARAMETERS

The Industrial Activities Storm Water General Permit (General Permit) requires you to analyze storm water samples for at least four parameters. These are pH, Total Suspended Solids (TSS), Specific Conductance (SC),and Total Organic Carbon (TOC). Oil and Grease (O&G) may be substituted for TOC. In addition, you must monitor for any other pollutants which you believe to be present in your storm water discharge as a result of industrial activity and analytical parameters listed in Table D of the General Permit. There are no numeric limitations for the parameters you test for.

The four parameters which the General Permit requires to be tested are considered *indicator* parameters. In other words, regardless of what type of facility you operate, these parameters are nonspecific and general enough to usually provide some indication whether pollutants are present in your storm water discharge. The following briefly explains what each of these parameters mean:

pH is a numeric measure of the hydrogen-ion concentration. The neutral, or acceptable, range is within 6.5 to 8.5. At values less than 6.5, the water is considered acidic; above 8.5 it is considered alkaline or basic. An example of an acidic substance is vinegar, and a alkaline or basic substance is liquid antacid. Pure rainfall tends to have a pH of a little less than 7. There may be sources of materials or industrial activities which could increase or decrease the pH of your storm water discharge. If the pH levels of your storm water discharge are high or low, you should conduct a thorough evaluation of all potential pollutant sources at your site.

Total Suspended Solids (TSS) is a measure of the undissolved solids that are present in your storm water discharge. Sources of TSS include sediment from erosion of exposed land, and dirt from impervious (i.e. paved) areas. Sediment by itself can be very toxic to aquatic life because it covers feeding and breeding grounds, and can smother organisms living on the bottom of a water body. Toxic chemicals and other pollutants also adhere to sediment particles. This provides a medium by which toxic or other pollutants end up in our water ways and ultimately in human and aquatic life. TSS levels vary in runoff from undisturbed land. It has been shown that TSS levels increase significantly due to land development.

Specific Conductance (SC) is a numerical expression of the ability of the water to carry an electric current. SC can be used to assess the degree of mineralization, salinity, or estimate the total dissolved solids concentration of a water sample. Because of air pollution, most rain water has a SC a little above zero. A high SC could affect the usability of waters for drinking, irrigation, and other commercial or industrial use.

Total Organic Carbon (TOC) is a measure of the total organic matter present in water. (All organic matter contains carbon) This test is sensitive and able to detect small concentrations of organic matter. Organic matter is naturally occurring in animals, plants, and man. Organic matter may also be man made (so called synthetic organics). Synthetic organics include pesticides, fuels, solvents, and paints. Natural organic matter utilizes the oxygen in a receiving water to biodegrade. Too much organic matter could place a significant oxygen demand on the water, and possibly impact its quality. Synthetic organics either do not biodegrade or biodegrade very slowly. Synthetic organics are a source of toxic chemicals that can have adverse affects at very low concentrations. Some of these chemicals bioaccumulate in aquatic life. If your levels of TOC are high, you should evaluate all sources of natural or synthetic organics you may use at your site.

Oil and Grease (O&G) is a measure of the amount of oil and grease present in your storm water discharge. At very low concentrations, O&G can cause a sheen (that floating "rainbow") on the surface of water (1 qt. of oil can pollute 250,000 gallons of water). O&G can adversely affect aquatic life and create unsightly floating material and film on water, thus making it undrinkable. Sources of O&G include maintenance shops, vehicles, machines and roadways.

If you have any questions regarding whether or not your constituent concentrations are too high, please contact your local Regional Board office. The United States Environmental Protection Agency (USEPA) has published stormwater discharge benchmarks for a number of parameters. These benchmarks may be helpful when evaluating whether additional BMPs are appropriate. These benchmarks can be accessed at our website at http://www.swrcb.ca.gov. It is contained in the Sampling and Analysis Reduction Certification.

State of California
STATE WATER RESOURCES CONTROL BOARD

2014 2015

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2014 through June 30, 2015

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.swrcb.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

A. Facility Information:

Facility WDID No: 8 33I022415

Facility Business Name: Student Transporation of America
Contact Person: Annie Vanscyoc
Physical Address: 1989 Massachusetts Ave

2014 2015

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

☐ **YES** Go to Item D.2 ☒ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

i. ☐ Participating in an Approved Group Monitoring Plan **Group Name:** _____

_____

ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: _____

Re-evaluation Date: _____

Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

Re-evaluation Date: _____

Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

iv. ☐ Received Regional Board Certification Certification Date: _____

v. ☐ Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

☐ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? 1 If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

☐ **YES** ☒ **NO, attach explanation** **(Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)**

3. How many storm water discharge locations are at your facility? 1

4. For each storm event sampled, did you collect and analyze a sample from each of the facilitys' storm water discharge locations? [X] YES, go to Item E.6 [ ] NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? [ ] NO [ ] YES, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated _____

6. Were <u>all</u> samples collected during the first hour of discharge? [X] YES [ ] NO, **attach explanation**

7. Was <u>all</u> storm water sampling preceded by three (3) working days without a storm water discharge? [X] YES [ ] NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) [ ] YES [X] NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) [ ] YES [ ] NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? [ ] YES [X] NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? [ ] YES [ ] NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

☒ **YES** ☐ **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers**. Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September	☒ **YES**	☐ **NO**	☐ **N/A**	October-December	☐ **YES**	☒ **NO**	☐ **N/A**
January-March	☐ **YES**	☒ **NO**	☐ **N/A**	April-June	☒ **YES**	☐ **NO**	☐ **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers**.

July -September	☒ **YES**	☐ **NO**	☐ **N/A**	October-December	☒ **YES**	☐ **NO**	☐ **N/A**
January-March	☒ **YES**	☐ **NO**	☐ **N/A**	April-June	☒ **YES**	☐ **NO**	☐ **N/A**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

☐ **YES** ☒ **NO** Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

☐ **YES** ☐ **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers**. Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☐	February	☐	☐
November	☐	☐	March	☐	☐
December	☐	☐	April	☐	☐
January	☐	☐	May	☐	☐

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☐ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☐ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: ☐ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? ☐ YES ☐ NO

   The following records should be reviewed:

   - quarterly authorized non-storm water discharge visual observations
   - monthly storm water discharge visual observation
   - records of spills/leaks and associated clean-up/response activities
   - quarterly unauthorized non-storm water discharge visual observations
   - Sampling and Analysis records
   - preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? ☐ YES ☐ NO

   The following SWPPP items should be reviewed:

   - pollution prevention team
   - list of significant materials
   - description of potential pollutant sources
   - assessment of potential pollutant sources
   - identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? ☐ YES ☐ NO

   The following BMP categories should be reviewed:

   - good housekeeping practices
   - spill response
   - employee training
   - erosion control
   - quality assurance
   - preventative maintenance
   - material handling and storage practices
   - waste handling/storage
   - structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? ☐ YES ☐ NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? ☐ YES ☐ NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

ANNUAL REPORT

DESCRIPTION OF BASIC ANALYTICAL PARAMETERS

The Industrial Activities Storm Water General Permit (General Permit) requires you to analyze storm water samples for at least four parameters. These are pH, Total Suspended Solids (TSS), Specific Conductance (SC),and Total Organic Carbon (TOC). Oil and Grease (O&G) may be substituted for TOC. In addition, you must monitor for any other pollutants which you believe to be present in your storm water discharge as a result of industrial activity and analytical parameters listed in Table D of the General Permit. There are no numeric limitations for the parameters you test for.

The four parameters which the General Permit requires to be tested are considered *indicator* parameters. In other words, regardless of what type of facility you operate, these parameters are nonspecific and general enough to usually provide some indication whether pollutants are present in your storm water discharge. The following briefly explains what each of these parameters mean:

pH is a numeric measure of the hydrogen-ion concentration. The neutral, or acceptable, range is within 6.5 to 8.5. At values less than 6.5, the water is considered acidic; above 8.5 it is considered alkaline or basic. An example of an acidic substance is vinegar, and a alkaline or basic substance is liquid antacid. Pure rainfall tends to have a pH of a little less than 7. There may be sources of materials or industrial activities which could increase or decrease the pH of your storm water discharge. If the pH levels of your storm water discharge are high or low, you should conduct a thorough evaluation of all potential pollutant sources at your site.

Total Suspended Solids (TSS) is a measure of the undissolved solids that are present in your storm water discharge. Sources of TSS include sediment from erosion of exposed land, and dirt from impervious (i.e. paved) areas. Sediment by itself can be very toxic to aquatic life because it covers feeding and breeding grounds, and can smother organisms living on the bottom of a water body. Toxic chemicals and other pollutants also adhere to sediment particles. This provides a medium by which toxic or other pollutants end up in our water ways and ultimately in human and aquatic life. TSS levels vary in runoff from undisturbed land. It has been shown that TSS levels increase significantly due to land development.

Specific Conductance (SC) is a numerical expression of the ability of the water to carry an electric current. SC can be used to assess the degree of mineralization, salinity, or estimate the total dissolved solids concentration of a water sample. Because of air pollution, most rain water has a SC a little above zero. A high SC could affect the usability of waters for drinking, irrigation, and other commercial or industrial use.

Total Organic Carbon (TOC) is a measure of the total organic matter present in water. (All organic matter contains carbon) This test is sensitive and able to detect small concentrations of organic matter. Organic matter is naturally occurring in animals, plants, and man. Organic matter may also be man made (so called synthetic organics). Synthetic organics include pesticides, fuels, solvents, and paints. Natural organic matter utilizes the oxygen in a receiving water to biodegrade. Too much organic matter could place a significant oxygen demand on the water, and possibly impact its quality. Synthetic organics either do not biodegrade or biodegrade very slowly. Synthetic organics are a source of toxic chemicals that can have adverse affects at very low concentrations. Some of these chemicals bioaccumulate in aquatic life. If your levels of TOC are high, you should evaluate all sources of natural or synthetic organics you may use at your site.

Oil and Grease (O&G) is a measure of the amount of oil and grease present in your storm water discharge. At very low concentrations, O&G can cause a sheen (that floating "rainbow") on the surface of water (1 qt. of oil can pollute 250,000 gallons of water). O&G can adversely affect aquatic life and create unsightly floating material and film on water, thus making it undrinkable. Sources of O&G include maintenance shops, vehicles, machines and roadways.

If you have any questions regarding whether or not your constituent concentrations are too high, please contact your local Regional Board office. The United States Environmental Protection Agency (USEPA) has published stormwater discharge benchmarks for a number of parameters. These benchmarks may be helpful when evaluating whether additional BMPs are appropriate. These benchmarks can be accessed at our website at http://www.swrcb.ca.gov. It is contained in the Sampling and Analysis Reduction Certification.

To Interested Parties:

2013-2014 ANNUAL REPORT ANNUAL REPORT FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Attached is the 2013-21014 annual report that must be mailed to your Regional Board office by July 1, 2014. Dischargers within the Los Angeles Regional Board are required to electronically submit their annual reports via the Storm Water Multi-Application Reporting and Tracking System (SMARTS), email with a PDF attachment(s) to losangeles@waterboards.ca.gov, or mail a disk. Although electronic submittals are not mandatory for dischargers in other regions, we encourage all dischargers to register and use SMARTS. We anticipate that a new Industrial General Permit (IGP) will be adopted sometime next year that will mandate electronic reporting for future reporting years.

To register to use SMARTS please fill out the LRP Registration Form and mail it back to: SMARTS Registration, P.O. Box 1977, Sacramento, CA 95812. Once a complete registration form is received, instructions and a Secret Code Number will be emailed. The Secret Code Number is used to link your SMARTS ID to the WDID Number.

For SMARTS registration questions or information please contact the SMARTS help center at 1-866-563-3107 or by email at stormwater@waterboards.ca.gov.

To receive email updates on Storm Water Industrial permitting issues including updates on the IGP reissuance process (hearings, workshops, schedules, etc.), please sign up at http://www.waterboards.ca.gov/resources/email_subscriptions/swrcb_subscribe.shtml The Storm Water program currently maintains five email lists:

- Storm Water Database Issues
- Storm Water Construction Permitting Issues
- Storm Water Industrial Permitting Issues
- Storm Water Municipal Permitting Issues
- Sustainable Development

Sincerely,

Storm Water Section

Industrial General Permit
Legally Responsible Person
SMARTS Registration

The Storm Water Multi–Application & Report Tracking System (SMARTS) is now available for dischargers to create a user account online and submit Annual Report(s) electronically. These instructions are for **registration of SMARTS Legally Responsible Person.**

You must be the **Legally Responsible Person (LRP)** to submit and certify a SMARTS report on the behalf of a facility. In the simplest terms, the LRP is the individual that certifies the Notice of Intent (NOI) and is responsible for reviewing, validating and certifying the annual report for accuracy and correctness before it is submitted.

The LRP may assign rights to submit and certify the annual report to an **Approved Signatory**. An approved signatory maybe other employees designated authority to certify documents on behalf of the LRP. An Approved Signatory cannot be a contractor or consultant.

A **Data Entry Person** is any individual authorized by the LRP to enter data into SMARTS on behalf of the LRP. A data submitter may be other employees, contractors, labs, etc. A data submitter cannot certify the Annual Report.

To register as an LRP and identify Approved Signatory(ies) or Data Entry Person(s), you must have a user account. Upon receipt of this Authorization Form, Water Board staff will email instructions on how to register for SMARTS, a Secret Code Number (SCN), how to link WDID number(s), Approved Signatories or Data Submitters to your account.

One authorization form per WDID number is required. Mail the authorization form to:

SMARTS Registration
P.O. Box 1977
Sacramento, CA 95812

If you have any questions please contact us at 1-866-563-3107 or email stormwater@waterboards.ca.gov.

2013-2014

ANNUAL REPORT

FOR
STORM WATER DISCHARGES ASSOCIATED
WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2013 through June 30, 2014

An annual report is required to be submitted to your local Regional Water Quality Control Board (Regional Board) by July 1 of each year. This document must be certified and signed, under penalty of perjury, by the appropriate official of your company. Many of the Annual Report questions require an explanation. Please provide explanations on a separate sheet as an attachment. **Retain a copy of the completed Annual Report for your records.**

Please circle or highlight any information contained in Items A, B, and C below that is new or revised so we can update our records. Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers and e-mail addresses of the Regional Board contacts, as well as the Regional Board office addresses can be found at http://www.swrcb.ca.gov/stormwtr/contact.html. To find your Regional Board information, match the first digit of your WDID number with the corresponding number that appears in parenthesis on the first line of each Regional Board office.

GENERAL INFORMATION:

2013-2014

ANNUAL REPORT

SPECIFIC INFORMATION

MONITORING AND REPORTING PROGRAM

D. SAMPLING AND ANALYSIS EXEMPTIONS AND REDUCTIONS

1. For the reporting period, was your facility exempt from collecting and analyzing samples from **two** storm events in accordance with sections B.12 or 15 of the General Permit?

   ☐ **YES** Go to Item D.2 ☒ **NO** Go to Section E

2. Indicate the reason your facility is exempt from collecting and analyzing samples from **two** storm events. Attach a copy of the first page of the appropriate certification if you check boxes ii, iii, iv, or v.

   i. ☐ Participating in an Approved Group Monitoring Plan **Group Name:** _____

   ii. ☐ Submitted **No Exposure Certification (NEC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy NEC conditions? ☐ YES ☐ NO

   iii. ☐ Submitted **Sampling Reduction Certification (SRC)** Date Submitted: _____

   Re-evaluation Date: _____

   Does facility continue to satisfy SRC conditions? ☐ YES ☐ NO

   iv. ☐ Received Regional Board Certification Certification Date: _____

   v. ☐ Received Local Agency Certification Cetification Date: _____

3. If you checked boxes i or iii above, were you scheduled to sample **one** storm event during the reporting year?

   ☐ **YES** Go to Section E ☐ **NO** Go to Section F

4. If you checked boxes ii, iv, or v, go to Section F.

E. SAMPLING AND ANALYSIS RESULTS

1. How many storm events did you sample? 0 If less than 2, **attach explanation** (if you checked item D.2.i or iii. above, only attach explanation if you answer "0").

2. Did you collect storm water samples from the first storm of the wet season that produced a discharge during scheduled facility operating hours? (Section B.5 of the General Permit)

   ☐ **YES** ☐ **NO, attach explanation** (Please note that if you do not sample the first storm event, you are still required to sample 2 storm events)

3. How many storm water discharge locations are at your facility? 1

4. For each storm event sampled, did you collect and analyze a sample from each of the facility's storm water discharge locations? ☐ YES, go to Item E.6 ☒ NO

5. Was sample collection or analysis reduced in accordance with Section B.7.d of the General Permit? ☐ YES ☒ NO, **attach explanation**

   If "YES", **attach documentation** supporting your determination that two or more drainage areas are substantially identical.

   Date facility's drainage areas were last evaluated 5/31/14

6. Were all samples collected during the first hour of discharge? ☐ YES ☒ NO, **attach explanation**

7. Was all storm water sampling preceded by three (3) working days without a storm water discharge? ☐ YES ☒ NO, **attach explanation**

8. Were there any discharges of stormwater that had been temporarily stored or contained? (such as from a pond) ☐ YES ☒ NO, go to Item E.10

9. Did you collect and analyze samples of temporarily stored or contained storm water discharges from two storm events? (or one storm event if you checked item D.2.i or iii. above) ☐ YES ☐ NO, **attach explanation**

10. Section B.5. of the General Permit requires you to analyze storm water samples for pH, Total Suspended Solids (TSS), Specific Conductance (SC), Total Organic Carbon (TOC) or Oil and Grease (O&G), other pollutants likely to be present in storm water discharges in significant quantities, and analytical parameters listed in Table D of the General Permit.

    a. Does Table D contain any additional parameters related to your facility's SIC code(s)? ☐ YES ☒ NO, Go to Item E.11

    b. Did you analyze all storm water samples for the applicable parameters listed in Table D? ☐ YES ☐ NO

    c. If you did not analyze all storm water samples for the applicable Table D parameters, check one of the following reasons:

    _____ In prior sampling years, the parameter(s) have not been detected in significant quantities from two consecutive sampling events. **Attach explanation**

    _____ The parameter(s) is not likely to be present in storm water discharges and authorized non-storm water discharges in significant quantities based upon the facility operator's evaluation. **Attach explanation**

    _____ Other. **Attach explanation**

11. For each storm event sampled, attach a copy of the laboratory analytical reports and report the sampling and analysis results using **Form 1** or its equivalent. The following must be provided for each sample collected:

- Date and time of sample collection
- Name and title of sampler.
- Parameters tested.
- Name of analytical testing laboratory.
- Discharge location identification.
- Testing results.
- Test methods used.
- Test detection limits.
- Date of testing.
- Copies of the laboratory analytical results.

F. QUARTERLY VISUAL OBSERVATIONS

1. **Authorized Non-Storm Water Discharges**
Section B.3.b of the General Permit requires quarterly visual observations of all authorized non-storm water discharges and their sources.

a. Do authorized non-storm water discharges occur at your facility?

[X] **YES** [ ] **NO** Go to Item F.2

b. Indicate whether you visually observed all authorized non-storm water discharges and their sources during the quarters when they were discharged. **Attach an explanation for any "NO" answers.** Indicate "N/A" for quarters without any authorized non-storm water discharges.

July -September	[X] **YES**	[ ] **NO**	[ ] **N/A**	October-December	[ ] **YES**	[ ] **NO**	[X] **N/A**
January-March	[ ] **YES**	[ ] **NO**	[X] **N/A**	April-June	[X] **YES**	[ ] **NO**	[ ] **N/A**

c. Use **Form 2** to report quarterly visual observations of authorized non-storm water discharges or provide the following information.

i. name of each authorized non-storm water discharge
ii. date and time of observation
iii. source and location of each authorized non-storm water discharge
iv. characteristics of the discharge at its source and impacted drainage area/discharge location
v. name, title, and signature of observer
vi. **any** new or revised BMPs necessary to reduce or prevent pollutants in authorized non-storm water discharges. Provide new or revised BMP implementation date.

2. **Unauthorized Non-Storm Water Discharges**
Section B.3.a of the General Permit requires quarterly visual observations of all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources.

a. Indicate whether you visually observed all drainage areas to detect the presence of unauthorized non-storm water discharges and their sources. **Attach an explanation for any "NO" answers.**

July -September	[X] **YES**	[ ] **NO**	October-December	[X] **YES**	[ ] **NO**
January-March	[X] **YES**	[ ] **NO**	April-June	[X] **YES**	[ ] **NO**

b. Based upon the quarterly visual observations, were any unauthorized non-storm water discharges detected?

[ ] **YES** [X] **NO** Go to item F.2.d

c. Have each of the unauthorized non-storm water discharges been eliminated or permitted?

[ ] **YES** [ ] **NO** **Attach explanation**

d. Use **Form 3** to report quarterly unauthorized non-storm water discharge visual observations or provide the following information.

i. name of each unauthorized non-storm water discharge.
ii. date and time of observation.
iii. source and location of each unauthorized non-storm water discharge.
iv. characteristics of the discharge at its source and impacted drainage area/discharge location.
v. name, title, and signature of observer.
vi. **any** corrective actions necessary to eliminate the source of each unauthorized non-storm water discharge and to clean impacted drainage areas. Provide date unauthorized non-storm water discharge(s) was eliminated or scheduled to be eliminated.

G. MONTHLY WET SEASON VISUAL OBSERVATIONS

Section B.4.a of the General Permit requires you to conduct monthly visual observations of storm water discharges at all storm water discharge locations during the wet season. These observations shall occur during the first hour of discharge or, in the case of temporarily stored or contained storm water, at the time of discharge.

1. Indicate below whether monthly visual observations of storm water discharges occurred at all discharge locations. **Attach an explanation for any "NO" answers.** Include in this explanation whether any eligible storm events occurred during scheduled facility operating hours that did not result in a storm water discharge, and provide the date, time, name and title of the person who observed that there was no storm water discharge.

	YES	NO		YES	NO
October	☐	☒	February	☐	☒
November	☐	☒	March	☐	☒
December	☐	☒	April	☐	☒
January	☐	☒	May	☐	☒

2. Report monthly wet season visual observations using **Form 4** or provide the following information.

   a. date, time, and location of observation
   b. name and title of observer
   c. characteristics of the discharge (i.e., odor, color, etc.) and source of any pollutants observed.
   d. **any** new or revised BMPs necessary to reduce or prevent pollutants in storm water discharges. Provide new or revised BMP implementation date.

ANNUAL COMPREHENSIVE SITE COMPLIANCE EVALUATION (ACSCE)

H. ACSCE CHECKLIST

Section A.9 of the General Permit requires the facility operator to conduct one ACSCE in each reporting period (July 1-June 30). Evaluations must be conducted within 8-16 months of each other. The SWPPP and monitoring program shall be revised and implemented, as necessary, within 90 days of the evaluation. The checklist below includes the minimum steps necessary to complete a ACSCE. Indicate whether you have performed each step below. **Attach an explanation for any "NO" answers.**

1. Have you inspected all potential pollutant sources and industrial activities areas? ☒ YES ☐ NO
   The following areas should be inspected:

   - areas where spills and leaks have occured during the last year.
   - outdoor wash and rinse areas.
   - process/manufacturing areas.
   - loading, unloading, and transfer areas.
   - waste storage/disposal areas.
   - dust/particulate generating areas.
   - erosion areas.
   - building repair, remodeling, and construction
   - material storage areas
   - vehicle/equipment storage areas
   - truck parking and access areas
   - rooftop equipment areas
   - vehicle fueling/maintenance areas
   - non-storm water discharge generating areas

2. Have you reviewed your SWPPP to assure that its BMPs address existing potential pollutant sources and industrial activities areas? ☒ YES ☐ NO

3. Have you inspected the entire facility to verify that the SWPPP's site map, is up-to-date? The following site map items should be verified: ☒ YES ☐ NO

   - facility boundaries
   - outline of all storm water drainage areas
   - areas impacted by run-on
   - storm water discharges locations
   - storm water collection and conveyance system
   - structural control measures such as catch basins, berms, containment areas, oil/water separators, etc.

4. Have you reviewed all General Permit compliance records generated since the last annual evaluation? [X] YES [ ] NO

The following records should be reviewed:

- quarterly authorized non-storm water discharge visual observations
- monthly storm water discharge visual observation
- records of spills/leaks and associated clean-up/response activities
- quarterly unauthorized non-storm water discharge visual observations
- Sampling and Analysis records
- preventative maintenance inspection and maintenance records

5. Have you reviewed the major elements of the SWPPP to assure compliance with the General Permit? [X] YES [ ] NO

The following SWPPP items should be reviewed:

- pollution prevention team
- list of significant materials
- description of potential pollutant sources
- assessment of potential pollutant sources
- identification and description of the BMPs to be implemented for each potential pollutant source

6. Have you reviewed your SWPPP to assure that a) the BMPs are adequate in reducing or preventing pollutants in storm water discharges and authorized non-storm water discharges, and b) the BMPs are being implemented? [X] YES [ ] NO

The following BMP categories should be reviewed:

- good housekeeping practices
- spill response
- employee training
- erosion control
- quality assurance
- preventative maintenance
- material handling and storage practices
- waste handling/storage
- structural BMPs

7. Has all material handling equipment and equipment needed to implement the SWPPP been inspected? [X] YES [ ] NO

I. ACSCE EVALUATION REPORT

The facility operator is required to provide an evaluation report that includes:

- identification of personnel performing the evaluation
- the date(s) of the evaluation
- necessary SWPPP revisions
- schedule for implementing SWPPP revisions
- any incidents of non-compliance and the corrective actions taken.

Use **Form 5** to report the results of your evaluation or develop an equivalent form.

J. ACSCE CERTIFICATION

The facility operator is required to certify compliance with the Industrial Activities Storm Water General Permit. To certify compliance, both the SWPPP and Monitoring Program must be up to date and be fully implemented.

Based upon your ACSCE, do you certify compliance with the Industrial Activities Storm Water General Permit? [X] YES [ ] NO

If you answered "NO" **attach an explanation** to the ACSCE Evaluation Report why you are not in compliance with the Industrial Activities Storm Water General Permit.

ATTACHMENT SUMMARY

Answer the questions below to help you determine what should be attached to this annual report. Answer NA (Not Applicable) to questions 2-4 if you are not required to provide those attachments.

1. Have you attached Forms 1,2,3,4, and 5 or their equivalent?	☒ YES (Mandatory)		
2. If you conducted sampling and analysis, have you attached the laboratory analytical reports?	☐ YES	☐ NO	☒ NA
3. If you checked box II, III, IV, or V in item D.2 of this Annual Report, have you attached the first page of the appropriate certifications?	☐ YES	☐ NO	☒ NA
4. Have you attached an explanation for each "NO" answer in items E.1, E.2, E.5-E.7, E.9, E.10.c, F.1.b, F.2.a, F.2.c, G.1, H.1-H.7, or J?	☒ YES	☐ NO	☐ NA

ANNUAL REPORT CERTIFICATION

I am duly authorized to sign reports required by the INDUSTRIAL ACTIVITIES STORM WATER GENERAL PERMIT (see Standard Provision C.9) and I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those person directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Title: Manager

DESCRIPTION OF BASIC ANALYTICAL PARAMETERS

The Industrial Activities Storm Water General Permit (General Permit) requires you to analyze storm water samples for at least four parameters. These are pH, Total Suspended Solids (TSS), Specific Conductance (SC),and Total Organic Carbon (TOC). Oil and Grease (O&G) may be substituted for TOC. In addition, you must monitor for any other pollutants which you believe to be present in your storm water discharge as a result of industrial activity and analytical parameters listed in Table D of the General Permit. There are no numeric limitations for the parameters you test for.

The four parameters which the General Permit requires to be tested are considered *indicator* parameters. In other words, regardless of what type of facility you operate, these parameters are nonspecific and general enough to usually provide some indication whether pollutants are present in your storm water discharge. The following briefly explains what each of these parameters mean:

pH is a numeric measure of the hydrogen-ion concentration. The neutral, or acceptable, range is within 6.5 to 8.5. At values less than 6.5, the water is considered acidic; above 8.5 it is considered alkaline or basic. An example of an acidic substance is vinegar, and a alkaline or basic substance is liquid antacid. Pure rainfall tends to have a pH of a little less than 7. There may be sources of materials or industrial activities which could increase or decrease the pH of your storm water discharge. If the pH levels of your storm water discharge are high or low, you should conduct a thorough evaluation of all potential pollutant sources at your site.

Total Suspended Solids (TSS) is a measure of the undissolved solids that are present in your storm water discharge. Sources of TSS include sediment from erosion of exposed land, and dirt from impervious (i.e. paved) areas. Sediment by itself can be very toxic to aquatic life because it covers feeding and breeding grounds, and can smother organisms living on the bottom of a water body. Toxic chemicals and other pollutants also adhere to sediment particles. This provides a medium by which toxic or other pollutants end up in our water ways and ultimately in human and aquatic life. TSS levels vary in runoff from undisturbed land. It has been shown that TSS levels increase significantly due to land development.

Specific Conductance (SC) is a numerical expression of the ability of the water to carry an electric current. SC can be used to assess the degree of mineralization, salinity, or estimate the total dissolved solids concentration of a water sample. Because of air pollution, most rain water has a SC a little above zero. A high SC could affect the usability of waters for drinking, irrigation, and other commercial or industrial use.

Total Organic Carbon (TOC) is a measure of the total organic matter present in water. (All organic matter contains carbon) This test is sensitive and able to detect small concentrations of organic matter. Organic matter is naturally occurring in animals, plants, and man. Organic matter may also be man made (so called synthetic organics). Synthetic organics include pesticides, fuels, solvents, and paints. Natural organic matter utilizes the oxygen in a receiving water to biodegrade. Too much organic matter could place a significant oxygen demand on the water, and possibly impact its quality. Synthetic organics either do not biodegrade or biodegrade very slowly. Synthetic organics are a source of toxic chemicals that can have adverse affects at very low concentrations. Some of these chemicals bioaccumulate in aquatic life. If your levels of TOC are high, you should evaluate all sources of natural or synthetic organics you may use at your site.

Oil and Grease (O&G) is a measure of the amount of oil and grease present in your storm water discharge. At very low concentrations, O&G can cause a sheen (that floating "rainbow") on the surface of water (1 qt. of oil can pollute 250,000 gallons of water). O&G can adversely affect aquatic life and create unsightly floating material and film on water, thus making it undrinkable. Sources of O&G include maintenance shops, vehicles, machines and roadways.

If you have any questions regarding whether or not your constituent concentrations are too high, please contact your local Regional Board office. The United States Environmental Protection Agency (USEPA) has published stormwater discharge benchmarks for a number of parameters. These benchmarks may be helpful when evaluating whether additional BMPs are appropriate. These benchmarks can be accessed at our website at http://www.swrcb.ca.gov. It is contained in the Sampling and Analysis Reduction Certification.

FORM 1-SAMPLING & ANALYSIS RESULTS

FIRST STORM EVENT

- If analytical results are less than the detection limit (or non detectable), show the value as less than the numerical value of the detection limit (example: <.05)
- If you did not analyze for a required parameter, do not report "0". Instead, leave the appropriate box blank
- When analysis is done using portable analysis (such as portable pH meters, SC meters, etc.), indicate "PA" in the appropriate test method used box.
- Make additional copies of this form as necessary.

FORM 3-QUARTERLY VISUAL OBSERVATIONS OF UNAUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

- Unauthorized NSWDs are discharges (such as wash or rinse waters) that do not meet the conditions provided in Section D (pages 5-6) of the General Permit.
- Quarterly visual observations are required to observe current and detect prior unauthorized NSWDs.
- Quarterly visual observations are required during dry weather and at all facility drainage areas.
- Each unauthorized NSWD source, impacted drainage area, and discharge location must be identified and observed.
- Unauthorized NSWDs that can not be eliminated within 90 days of observation must be reported to the Regional Board in accordance with Section A.10.e of the General Permit.
- Make additional copies of this form as necessary.

Ms. Annie Vanscyoc
Student Transporation of America
1989 Massachusetts Avenue
Riverside, California 92507

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

NOTICE OF NONCOMPLIANCE: FAILURE TO COMPLY WITH THE GENERAL PERMIT FOR STORM WATER DISCHARGES ASSOCIATED WITH INDUSTRIAL ACTIVITIES, ORDER NO. 2014-0057-DWQ, NPDES NO. CAS000001 (GENERAL PERMIT), WASTE DISCHARGE IDENTIFICATION (WDID) 8 33I022415

Dear Ms. Vanscyoc:

Your facility located at 1989 Massachusetts Avenue in the City of Riverside, is regulated under the General Permit and is identified by WDID **8 33I022415**. Section XVI of the General Permit requires that an Annual Report be submitted by July 15 of each year via the online SMARTS database. Our records show that your annual report for the July 1, 2017 to June 30, 2018 reporting period has not been submitted.

Student Transporation of America is consequently in violation of provisions of Section XVI of the General Permit for failure to submit a complete 2017-2018 Annual Report. We request that you submit a complete 2017-2018 Annual Report via the online SMARTS database no later than **September 10, 2018**.

The online SMARTS database is available at: https://smarts.waterboards.ca.gov

The following links are to assist you with the online SMARTS database system:

Main page for the SMARTS guides:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/smarts/industrial/indst_help_guides.shtml

How to submit an Annual Report guide:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/docs/annual_report_060216.pdf

How to submit an Ad Hoc (storm water sample) Report guide:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/docs/dischargers_guide_adhocreport.pdf

You must also provide a statement along with the Annual Report as an Attachment. The statement must explain why the Annual Report was not submitted by the July 15 deadline and the measures you have taken to ensure timely submittals in the future.

Failure to submit the 2017-2018 Annual Report via the online SMARTS database may result in enforcement action, including civil monetary penalties of up to $10,000 for each day of violation. Please note that Section 13399.33 of the California Water Code stipulates a minimum penalty of $1,000 to those permittees that do not submit their annual reports after notification.

Should you need assistance in completing the Annual Report or have any questions relating to SMARTS, please contact the SMARTS Helpdesk at stormwater@waterboards.ca.gov; or Keith Elliott at keith.elliott@waterboards.ca.gov or 951-782-4925.

Sincerely,

Jayne Joy
Assistant Executive

Question Information

1. Has the Discharger conducted monthly visual observations (including authorized and unauthorized Non-Storm Water Discharges and Best Management Practices) in accordance with Section XI.A.1?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

2. Has the Discharger conducted sampling event visual observations at each discharge location where a sample was obtained in accordance with Section XI.A.2?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

3. Did you sample the required number of Qualifying Storm Events during the reporting year for all discharge locations, in accordance with Section XI.B?

☐ Yes ☒ No

If No, see Attachment 1, Summary of Explanation.

4. How many storm water discharge locations are at your facility?

1

5. Has the Discharger chosen to select Alternative Discharge Locations in accordance with Section XI.C.3?

☐ Yes ☒ No

6. Has the Discharger reduced the number of sampling locations within a drainage area in accordance with the Representative Sampling Reduction in Section XI.C.4?

☐ Yes ☒ No

7. Permitted facilities located within an impaired watershed must assess for potential pollutants that may be present in the facility's industrial storm water discharge. Using the table below, populated based on the facility's location, indicate the presence of the potential pollutant at the facility.
See Attachment 2 for the List of Identified Pollutants within the Impaired Watershed.

8. Has the Discharger included the above pollutants in the SWPPP pollutant source assessment and assessed the need for analytical monitoring for the pollutants?

☒ Yes ☐ No

If No, what date will the parameter(s) will be added to the SWPPP and Monitoring Implementation Plan?

9. Were all samples collected in accordance with Section XI.B.5?

☐ Yes ☒ No

If No, see Attachment 1, Summary of Explanation.

10. Has any contained storm water been discharged from the facility this reporting year?

☐ Yes ☒ No

If Yes, see Attachment 1, Summary of Explanation.

11. Has the Discharger conducted one (1) annual evaluation during the reporting year as required in Section XV?

☒ Yes ☐ No

If Yes, what date was the annual evaluation conducted? 09/15/2015

If No, see Attachment 1, Summary of Explanation.

12. Has the Discharger maintained records on-site for the reporting year in accordance with XXI.J.3?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

If your facility is subject to Effluent Limitation Guidelines in Attachment F of the Industrial General Permit, include your specific requirements as an attachment to the Annual Report (attach as file type: Supporting Documentation).

ANNUAL REPORT CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under the direction or supervision in accordance with a system designed to assure that qualified personnel propoerly gether and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

List of Identified Pollutants within the Impaired Watershed

Parameter	Pollutant	Present at Facility?
E.Coli and Enterococcus	Indicator Bacteria	No
E.Coli and Enterococcus	Pathogens	No
Metals Screen	Copper	No
Metals Screen	Lead	No
Nitrate, Nitrite, total Nitrogen. Dissolved oxygen, temperature, and total phosphorus.	Nutrients	No
pH	pH	No

2018-2019

ANNUAL REPORT

FOR STORM WATER DISCHARGES
ASSOCIATED WITH INDUSTRIAL ACTIVITIES

Reporting Period July 1, 2018 through June 30, 2019

Retain a copy of the completed Annual Report for your records.

Please remember that a Notice of Termination and new Notice of Intent are required whenever a facility operation is relocated or changes ownership.

If you have any questions, please contact your Regional Board Industrial Storm Water Permit Contact. The names, telephone numbers, and e-mail addresses of the Regional Board contacts, as well was the Regional Board office addresses, can be found at:
http://www.waterboards.ca.gov/water_issues/programs/stormwater/contact.shtml

General Information

A. Facility Information

WDID: 8 33I022415

Business Name: Student Transporation of America

Physical Address: 1989 Massachusetts Ave

City: Riverside
State: CA
Zip: 92507

Contact Person: Maria Jenkins
Phone: 951-509-0838
Email: mienkins@ridesta.com

Standard Industrial Classification (SIC) Codes: 4151-School Buses,4173-Terminal and Service

B. Facility Owner Information

Business Name: Student Transporation of America

Mailing Address: 1989 Massachusetts Ave

City: Riverside
State: CA
Zip: 92507

Contact Person: Chris Hubbell
Phone: 951-509-0838
Email: chubbell@ridesta.com

C. Facility Billing Information

Business Name: Student Transporation of America

Mailing Address: 6414 Hollister Avenue

City: Goleta
State: CA
Zip: 93117

Contact Person: Maria Jenkins
Phone: 951-509-0838
Email: evanscyoc@ridesta.com

Question Information

1. Has the Discharger conducted monthly visual observations (including authorized and unauthorized Non-Storm Water Discharges and Best Management Practices) in accordance with Section XI.A.1?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

2. Has the Discharger conducted sampling event visual observations at each discharge location where a sample was obtained in accordance with Section XI.A.2?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

3. Did you sample the required number of Qualifying Storm Events during the reporting year for all discharge locations, in accordance with Section XI.B?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

4. How many storm water discharge locations are at your facility?

1

5. Has the Discharger chosen to select Alternative Discharge Locations in accordance with Section XI.C.3?

☐ Yes ☒ No

6. Has the Discharger reduced the number of sampling locations within a drainage area in accordance with the Representative Sampling Reduction in Section XI.C.4?

☐ Yes ☒ No

6.1. Has the Discharger reduced the frequency of sampling at the facility area in accordance with the Sample Frequency Reduction in Section XI.C.7?

☐ Yes ☒ No

7. Permitted facilities located within an impaired watershed must assess for potential pollutants that may be present in the facility's industrial storm water discharge. Using the table below, populated based on the facility's location, indicate the presence of the potential pollutant at the facility.

See Attachment 2 for the List of Identified Pollutants within the Impaired Watershed.

8. Has the Discharger included the above pollutants in the SWPPP pollutant source assessment and assessed the need for analytical monitoring for the pollutants?

☒ Yes ☐ No

If No, what date will the parameter(s) will be added to the SWPPP and Monitoring Implementation Plan?

9. Were all samples collected in accordance with Section XI.B.5?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

10. Has any contained storm water been discharged from the facility this reporting year?

☐ Yes ☒ No

If Yes, see Attachment 1, Summary of Explanation.

11. Has the Discharger conducted one (1) annual evaluation during the reporting year as required in Section XV?

☒ Yes ☐ No

If Yes, what date was the annual evaluation conducted? 06/21/2019

If No, see Attachment 1, Summary of Explanation.

12. Has the Discharger maintained records on-site for the reporting year in accordance with XXI.J.3?

☒ Yes ☐ No

If No, see Attachment 1, Summary of Explanation.

If your facility is subject to Effluent Limitation Guidelines in Attachment F of the Industrial General Permit, include your specific requirements as an attachment to the Annual Report (attach as file type: Supporting Documentation).

ANNUAL REPORT CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under the direction or supervision in accordance with a system designed to assure that qualified personnel propoerly gether and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Explanation Sheet

Page 2 E

#1- When it rained it did not meet the regulation set for gather samples

#2- Raining already when arrived to work, not 3 days between rainfall while at work, and insufficient rainfall.

Page 5 G

#1- no qualifying rain events

Reason for late submittal of annual report:

I sent an email on 8/14/15:

"Elizabeth VanScyoc my manager is having problems logging into SMARTS to download our annual report and plan, which I have attached here."

We have also tried several time to call and get confirmation of submittal- but no phone calls were returned.

Was finally able to get a good log on and with help from Nam able to submit report online.

December 2016

Level 1 ERA Report

Facility: Student Transportation of America - Riverside Facility
1989 Massachusetts Avenue
Riverside, California

Level 1 ERA Report Prepared by:

QISP: Suzanne M. Johnson, CHMM
QISP Certificate Number 00533

The facility had a level 1 exceedance of the NAL for total suspended solids (TSS) during the reporting year from July 1, 2015 through June 30, 2016.

A Level 1 Evaluation of the facility was conducted, including a review of the facility's SWPPP for compliance with the California General Permit for Storm Water Associated with Industrial Activities Order NPDES No. CAS000001 and a visual observation of the facility; and the facility began conducting periodic sweeping of the exterior paved parking areas during the reporting year beginning July 1, 2016 to reduce TSS in the facility's stormwater run-off.

1.0 Coverage Under California General Industrial Stormwater Permit

This Stormwater Pollution Prevention Plan (SWPPP) has been prepared for Student Transportation of America- Riverside Facility located at 1989 Massachusetts Avenue, Riverside, California 92507. The Riverside Facility has a designated Standard Industrial Code (SIC) of 4151 (School Bus Transportation Facility) and is required to obtain and operate in accordance with the State of California General Permit for Storm Water Discharges Associated with Industrial Activity (Permit) effective July 1, 2015. Copies of applicable Permit documents are included in Appendix A.

Because Student Transport of America- Riverside Facility engages in industrial activity, and meets the terms and conditions of the Permit, they are permitted to discharge stormwater to waters of the state, a municipal separate stormwater sewer system (MS4) or a combined sewer system within the State of California, on behalf of its citizens through the California State Water Resources Control Board (SWRCB). The goal of the Industrial Stormwater Program is to protect water quality in accordance with state and federal statutes and rules by eliminating or minimizing contact of stormwater with significant materials. If contact cannot be eliminated or reduced, stormwater that has contacted significant materials should be managed and treated if necessary before it is discharged.

The purpose of the Permit is to protect surface water quality by reducing the amount of pollutants in stormwater runoff. The SIC 4151 indicates that Student Transport of America operates as a school bus transportation facility. The Riverside Facility operates as a bus terminal and maintenance facility. All stored materials and waste products associated with bus maintenance operations are stored under cover and away from contact with stormwater. Buses are fueled off-site and washed on-site with wastewater captured and discharge to the municipal wastewater system.

This SWPPP is kept at the Riverside Facility Maintenance Manager office and maintained by the facility's Maintenance Manager. Stormwater records are maintained on-site for a minimum of five years.

2.0 Stormwater Pollution Prevention Team

The stormwater pollution prevention team consists of employees who are responsible for managing, implementing, maintaining, modifying, and ensuring compliance with the facility's SWPPP. Pertinent employees at the Riverside Facility should be **appropriately trained on an annual basis** to perform the tasks required of the SWPPP. It is essential that all employees understand the SWPPP as well as the goal of the Permit.

Team Leader:	Elizabeth Van Scyoc	**Phone:**	(951) 509-838 X109, Cell - 951-903-6945
Title:	Facility Manager		

Responsibilities:

- Coordinate and update the facility Spill Response Actions and Emergency Contacts information,
- Develop and implement the SWPPP,
- Submit and retain all pertinent storm water documents,
- Ensure record keeping requirements are met,
- Ensure Monitoring Implementation Plan is executed,
- Make revisions to this SWPPP, as needed, and
- Coordinate all training requirements associated with the SWPPP.

Team Member:	Travis Shaw	**Phone:**	(951) 509-0838 X106
Title:	Facility Transportation Manager		
Team Member:	Chad Van Scyoc	**Phone:**	(951) 509-0838
Title:	Mechanic		
Team Member:	Rebecca Dapper	**Phone:**	(951) 509-0838 X111
Title:	Payroll Coordinator		

Responsibilities:

- Assist Team Leader in developing and implementing of the conditions of the SWPPP,
- Implement preventive and BMP maintenance activities,
- Assist Team Leader in coordinating and implementing employee training programs, and
- Conduct inspections, sampling and documentation per the Monitoring Implementation Plan, and
- Assist Team Leader in submittal and retention of all pertinent SWPPP documents.

NOTE: Stormwater Pollution Prevention Team to notify each other if one is temporarily unavailable to perform responsibilities.

3.0 Facility Description

3.1 GENERAL SITE CONDITIONS

Student Transport of America- Riverside Facility is located at 1989 Massachusetts Ave, Riverside, California 92507.

Latitude: 33.987436 Longitude: -117.354702

The Site location is shown in Figure 1.

The property is accessed from the south along Massachusetts Avenue. The site consists of 40% impervious surface on the eastern portion of the property and a gravel parking lot on the western portion of the property. The site is approximately 5 acres. There are 204 buses at the facility. The 10,000 square-foot main structure on-site contains the bus service facility that consists of an employee office area and a maintenance shop. There are no floor drains in the maintenance shop. Buses and other service vehicles are parked in designated parking stalls located north and west of the service facility. A 3,000 square foot washbay building is located north of the main building. A Property Detail Map is included as Figure 2.

Stormwater from the facility enters stormwater drains that convey water to the Santa Ana River, which flows to the Huntington Beach area south of Las Angeles. Student Transport of America- Riverside Facility operates 13 hours a day, 5 days per week.

3.2 GENERAL STORMWATER CONDITIONS

On-site storm water is directed to catch basins in the paved exterior portions of the facility. The facility is fenced-in and does not receive storm water run-on from adjacent sites. Stormwater from the unpaved lot flows toward storm drains located on the New Basis Property to the north via a conveyance ditch. Stormwater from the employee parking lot flows to storm drains located along Massachusetts Avenue.

Runoff from the building roof is conveyed through downspouts and directed to the on-site stormwater drainage system.

The property is relatively flat with a slight slope from south to north.

No treatment or segregation of stormwater is performed on the Property. There are no drains inside the maintenance shop at the facility. Buses are fueled off-site. Bus washing occurs onsite by Fleet Wash in a designated area. Washwater is captured during the bus washing and hauled offsite by Fleet Wash and discharged to a wastewater treatment system.

The following summary identifies the drainage areas of the Riverside Facility that discharge stormwater, the associated location receiving the discharge, and the corresponding outfall number.

(DRAINAGE AREA) SIGNIFICANT SOURCE	Control Device	Discharge to
Employee Parking Lot (south)	None	City Storm Drains along Massachusetts Avenue
Unpaved Parking Lot (west)	Vegetation surrounding lot	Sormwater ditch on the north side of the lot
Bus Parking Lot	The majority of storm water run-off is to the northwest corner of the lot and drains off-site to the north. In addition, there is a storm drain catch basin on the north side of the northwest corner of the maintenance shop	City stormwater system and to Santa Ana River System

Conceptual stormwater flow is shown in Figure 2.

3.3 NON-STORMWATER DISCHARGES

All conveyances were observed to determine whether unauthorized non-stormwater discharges exist at the Riverside Bus Terminal and Service Facility. No unauthorized discharges were observed.

3.4 IMPAIRED WATERS / WETLANDS AND SURFACE WATER BODIES

According to GIS data obtained from the California State Water Resources Control Board, the Riverside Facility is located within two miles of a 303(d) list impaired water body: The Santa Ana River (Reach 3). This section of the Santa Ana River is impaired by Copper, Lead and Pathogens from Dairies. None of these pollutants is found available for contact with stormwater at the site.

The Riverside Bus Terminal and Service Facility is not located within one mile of any wetlands or surface water bodies.

A map showing 303(d) impaired waters, wetlands and surface water bodies is included as Figure 3.

3.5 EXISTING SPILL CONTROL MEASURES

The stormwater team onsite is responsible for responding to spills of materials onsite. The facility maintains a spill prevention control and countermeasures (SPCC) plan to manage oil products onsite and to responds to spills of oil or petroleum. There are no chemicals onsite that are stored in quantities exceeding threshold planning quantities.

3.6 SIGNIFICANT RELEASES

There have been no significant surface spill releases of petroleum or hazardous substances from the Facility to the environmental or storm sewer system.

4.0 Assessment of Industrial Activities and Significant Materials

4.1 SIGNIFICANT MATERIALS AND INDUSTRIAL ACTIVITIES

Chemicals located at the facility include motor oil, used oil, coolant, hydraulic fluid, transmission fluid, brake cleaner, gear lube, and spray lubricants, oils, and paints. The approximate quantities of these chemicals are noted in the table below in Section 4.3. Material handling and storage areas are within the maintenance shop as shown on Figure 2.

Industrial activities that take place at the facility consist of vehicle maintenance inside the maintenance shop and employee vehicle and bus parking in the parking lot areas.

The washbay building onsite has a triple-basin clarifier system, however the washbay system is not functional and, therefore, not used. There is no anticipated use of the washbay, other than for storage of engine cores by the facility.

4.2 PROCESS WASTE GENERATION

Used oil, used oil filters, used coolant, and solid waste are generated on-site inside the building. These wastes are hauled off-site by licensed contractors.

4.3 POTENTIAL POLLUTANT SOURCES

Industrial activities which require use of significant materials are summarized below. Only outdoor industrial activities are potentially exposed to stormwater at the facility.

Industrial Activity	Significant Material (Potential Pollutant)	Amount/Storage/Containment Method	Location/Area
Vehicle & equipment parking	Spills from vehicles (petroleum products)	Asphalt pavement	Employee and bus parking areas
Solid waste accumulation	General Refuse (suspended solids, oil & grease)	Covered dumpster(s)	Eastern exterior of service facility
Bus & service vehicle maintenance	Motor oil	55-gallon drums and 380-gallon aboveground storage tank inside building	Maintenance shop (indoor)
Bus & service vehicle maintenance	Used motor oil	380-gallon aboveground storage tank inside building	Maintenance shop (indoor)
Bus & service vehicle maintenance	Coolant, used coolant, transmission	55-gallon drums inside building: 2 drums coolant,	Maintenance shop (indoor)

Industrial Activity	Significant Material (Potential Pollutant)	Amount/Storage/Containment Method	Location/Area
	fluid, used oil filters	1 drum used coolant, 4 drums transmission fluid, 2 drums used oil filters	
Bus & service vehicle maintenance	Small containers (<55-gal) brake cleaner and gear lube	Covered containers inside building	Maintenance shop (indoor)
Bus & service vehicle maintenance	Spray cans of spray lubricant, penetrating oil, and paint	Inside metal flammable storage locker inside building	Maintenance shop (indoor)
Bus & service vehicle maintenance	Spills from mechanicals and fuel tanks (petroleum products)	Drip pans, spill supplies inside building	Maintenance shop (indoor)

The likelihood of exposure of the potential pollutants listed above is low, as there are effective Best Management Practices implemented at the facility, which are discussed in Section 5.0.

5.0 Stormwater Control Measures Implementation

5.1 BEST MANAGEMENT PRACTICES

Best Management Practices (BMPs) are preventive actions used at the Riverside Facility to minimize or eliminate potential pollutants from contacting stormwater. BMPs apply to potential pollutant sources identified in Section 4.0 and are designed to minimize pollution of stormwater at the facility. A Best Management Practice Summary Table is included in Appendix B. The table identifies each identified area of industrial activity, the associated industrial pollutant sources, the industrial pollutants, and the BMPs being implemented. The table should be referenced to assure BMPs are implemented and maintained.

Specific BMPs are listed on the Best Management Practice Summary Table for the following general BMP categories:

5.1.1 Good Housekeeping

This includes proper handling of raw materials and finished products from receipt through final use. Prompt clean-up of spilled materials throughout the facility will be accomplished to prevent the entrance of these materials or leached contaminants from them entering the storm water system.

5.1.2 Preventative Maintenance

Preventative Maintenance involves regular inspection and cleaning of equipment, including lubrications, testing, measuring, and replacing worn or broken parts. The benefits of preventative maintenance are increased efficiency and longevity of equipment and less downtime due to equipment failure. Preventative maintenance also directly affects and reduces the likelihood of spills, leaks, and fires.

5.1.3 Spill and Leak Prevention and Response

Prevention of spills and leaks can significantly reduce the potential for storm water pollution. Spills can occur in handling of in-bound materials and in the course of other facility operations. The Spill Response Actions and Emergency Contacts information is included in Appendix C. There is an SPCC Plan in place at the site that also details spill containment plans and procedures and identifies the designated emergency response contact information. Key employees are trained and familiar with the implementation/response associated with these plans.

<u>General Spill Response Procedures</u>

- Once a spill or leak has been identified, the leak/spill shall be stopped or plugged if possible without risking personal injury.
- For a spill or leak, absorbent materials shall be used to contain or isolate the material. This includes preventing the material from leaving the site.
- A spill kit is available in the maintenance shop and is to be used in mitigating any spills or leaks.
- Recaptured material will be containerized for proper management utilizing the spill kit.

- The Spill Response Actions and Emergency Contacts information included as Appendix C of this SWPPP is to be posted in a readily available location at the facility.

All releases will be recorded on the Spill Reporting Form, the template of which is included as Appendix D. Observations and actions taken in response to a release will be recorded by site personnel on the Spill Reporting Form.

A written Monitoring Implementation Plan is detailed in Section 6.0.

5.1.4 Material Handling and Waste Management

Proper material handling at the facility includes transferring materials within the building and exercising proper container management. Proper container management includes facility personnel managing empty drums to minimize contact with precipitation. Drums containing used oil, used oil filter, and used coolant are stored inside the maintenance shop prior to being hauled off-site by a licensed contractor. Solid waste is stored inside a covered dumpster.

5.1.5 Erosion and Sediment Controls

Soils are eroded as a result of water-flow velocity and inadequate structural controls. The unpaved area on the western portion of the site is reviewed periodically for evidence of erosion. The relatively uniform neutral grade of the site helps minimize flow velocity to minimize the need for erosion controls.

5.1.6 Employee Training Program

Facility employees and contractor personnel using the facility are trained in and informed of BMPs in place at the facility. Employee training is conducted once a year to inform employees of the Permit and the necessity of the SWPPP. The Record of Annual SWPPP/SPCC Plan Employee Briefing and Training Form, included in Appendix E, need to be filled out during the annual training session and filed with the SWPPP on-site. In addition, contractor or temporary personnel are informed of facility operations and BMPs in order to prevent releases from occurring. If the facility enters Level 1 status per the Permit (see Section 6.2.1), appropriate team members will be trained appropriately.

5.1.7 Quality Assurance and Record Keeping

The SWPPP, including the written Monitoring Implementation Plan and the Annual Report, shall be reviewed once a year during the Annual SWPPP Employee Briefing and Training to ensure that all elements of the SWPPP are adequately conducted.

The Annual Report will be submitted to the SWRCB via the Storm Water Multi-Application Reporting and Tracking System (SMARTS) using the standardized format and checklist in SMARTS. This Annual Report is discussed in the written Monitoring Implementation Plan presented in Section 6.0.

The SWPPP must be retained for the duration of the Permit, must remain on-site, and must be available upon request. Completed SWPPP documents including monthly and quarterly inspection forms, stormwater laboratory analytical results, spill logs, and annual reports are to be kept on-site for a period of five years. Correspondence and other documents pertinent

to implementation of the SWPPP and ongoing developments in related management practices will also be filed on-site.

5.1.8 Advanced BMPs

Advanced BMPs are not necessary at the facility.

6.0 Monitoring Implementation Plan

6.1 MONTHLY VISUAL OBSERVATIONS

Riverside Facility drainage source areas are evaluated by a member of the Storm Water Pollution Prevention Team for non-stormwater contributions to the storm drainage system on a monthly basis during facility operating daylight hours and on days without precipitation. Any unauthorized non-stormwater discharges must be eliminated.

The following is a list of non-stormwater discharges or flows allowed by the Permit (unless identified as a significant source of contamination), none of which occur at the facility: firefighting activities; potable water and water line flushing; uncontaminated air conditioning, cooler, and compressor condensation; landscape irrigation; irrigation water; lawn watering; external building washdown not using detergents; uncontaminated groundwater infiltration; uncontaminated pumped groundwater; and uncontaminated foundation drains. Pavement washwater is collected and hauled offsite for discharge to the city water treatment plant.

During the visual observations, the Monthly Visual Observations Form, included in Appendix F, is completed. Evaluations include a visual assessment of the stormwater discharge outfall at the point of exit from the Riverside Facility as well as drainage swales, storm drains, parking lot areas, and dumpsters/bins. Instances of flow, stains, sludge, color, odor, or other indications of a non-stormwater discharge will be recorded.

6.2 STORMWATER SAMPLING, ANALYSIS AND SMARTS REPORTING

A member of the Riverside Facility Storm Water Pollution Prevention Team collects and analyzes storm water samples from two qualifying storm events within the first half of each reporting year (July 1 to December 31, and two qualifying storm events within the second half of each reporting year (January 1 to June 30). A qualifying storm event is a precipitation event that produces a discharge for at least one drainage area, and that is preceded by 48 hours with no discharge from any drainage area.

The Riverside Facility is required to collect one representative stormwater sample within four hours of the start of discharge or the start of facility operations if the qualifying storm event occurs within the previous 12-hour period. Sample collection is required to be during scheduled facility operating hours and when sampling conditions are safe. The sample must be representative of storm water associated with industrial activities and any commingled authorized non-stormwater discharges or associated with the discharge of contained storm water.

These samples are collected at the same time sampling event visual observations of the stormwater are recorded (see Section 6.2.2). Samples are collected in accordance with Attachment H of the Permit (Storm Water Sample Collection and Handling Instructions) at the following location (shown on Figure 2):

Benchmark Monitoring Location 01 – Sheet Flow at NW corner of Paved Bus Parking Lot

The stormwater samples are submitted for laboratory analysis of the following parameters:

- Total suspended solids (TSS) Method SM 2540-D
- Total oil and grease (O&G) Method EPA 1664A

The stormwater sample is screened for the following no later than 15 minutes after the sample is collected for the following:

- pH

Documentation of the sample collection activities and analytical results is submitted via SMARTS within 30 days of obtaining all results for each sampling event.

6.2.1 Numeric Action Levels and Exceedance Response Actions

The following are the Numeric Action Levels for the parameters sampled at the facility:

TSS	100 mg/L (annual) and 400 mg/L (instantaneous maximum)
O&G	15 mg/L (annual) and 25 mg/L (instantaneous maximum)
pH	<6.0 and >9.0 (instantaneous)

For annual NALs, an exceedance occurs when the average of all analytical results from all samples taken at the facility during a reporting year (July 1 through June 30) for a given parameter exceeds an annual NAL value. For the instantaneous maximum NALs, an exceedance occurs when two or more analytical results from samples taken for any parameter within a reporting year exceed the instantaneous maximum NAL value (for TSS and O&G) or are outside of the instantaneous range (for pH).

When an exceedance occurs, the facility will comply with the Level 1 status and/or Level 2 status exceedance response action requirements as described in the Permit, including an evaluation of the effectiveness of BMPs to ensure they are adequate to achieve compliance with the Permit and involving assistance of a Qualified Industrial Storm Water Practitioner (QISP).

6.2.2 Sampling Event Visual Observations

Sampling event visual observations are conducted by a member of the Storm Water Pollution Prevention Team at the same time sampling occurs at a discharge location. When the samples are obtained, the discharge of storm water is observed and recorded for the following: the presence or absence of floating and suspended material, oil & grease, discoloration, turbidity, odors, and trash/debris. During the visual observations, a Sampling Event Visual Observations Form, included in Appendix G, is completed.

BMPs will be revised as necessary if the visual observations indicate pollutant sources have not been adequately addressed in the SWPPP.

6.3 ANNUAL COMPREHENSIVE FACILITY COMPLIANCE EVALUATION

A member of the Riverside Facility Stormwater Pollution Prevention Team completes an annual comprehensive facility evaluation once per reporting year to evaluate the effectiveness and adequacy of the requirements contained within the SWPPP. Inspections must be adequate to verify that the site drainage conditions and potential pollution sources identified in the SWPPP remain accurate, and that the BMPs prescribed in the SWPPP are being implemented, properly operated, and adequately maintained. If the evaluation identifies potential areas of concern, the SWPPP will be modified to correct the deficiencies.

The following items listed below are completed during the annual comprehensive compliance evaluation:

- A review of all sampling, visual observation, and inspection records conducted during the previous reporting year;
- An inspection of all areas of industrial activity and associated potential pollutant sources for evidence of, or the potential for, pollutants entering the storm water conveyance system;
- An inspection of all drainage areas previously identified as having no exposure to industrial activities and materials in accordance with the Permit;
- An inspection of equipment needed to implement the BMPs; an inspection of any BMPs;
- A review and effectiveness assessment of all BMPs for each area of industrial activity and associated potential pollutant sources to determine if the BMPs are properly designed, implemented, and are effective in reducing and preventing pollutants in industrial storm water discharges and authorized non-stormwater discharges; and,
- An assessment of any other factors needed to comply with the no exposure requirements in the Permit.

Subsequent to the annual evaluation, the SWPPP will be revised as appropriate and/or necessary to incorporate additional or revised BMPs, and/or other appropriate or necessary changes to the SWPPP. The revisions will provide for the implementation of any changes within ***90 days*** of the evaluation.

6.4 ANNUAL REPORT

A member of the Riverside Facility Stormwater Pollution Prevention Team certifies and submits via SMARTS an Annual Report no later than July 15 following each reporting year using the standardized format and checklists in SMARTS. The following is included in the Annual Report:

1. A Compliance Checklist that indicates whether the facility is complying with and addressing all applicable requirements of the Permit;
2. An explanation for any non-compliance of requirements within the reporting year, as indicated in the Compliance Checklist;
3. An identification, including page numbers and/or sections, of all revisions made to the SWPPP within the reporting year; and,
4. The date(s) of the Annual Evaluation.

6.5 SUMMARY OF SMARTS SUBMITTALS AND RECORDS RETAINED ON-SITE

The following are submitted electronically via the SMARTS website available at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.jsp:

a. Annual Reports and SWPPPs (original SWPPP and revised SWPPPs within 30 days of significant revisions and up to every three months in the reporting year for other revisions);
b. Notice of Termination;
c. Sampling Frequency Reduction Certification;
d. Level 1 and Level 2 Reports and Action Plans prepared by QISP.

All forms, data and records related to this SWPPP, as required by the Permit, shall be retained on-site for a period of at least five years, including the following:

a. All records electronically submitted via SMARTS;
b. The monthly Visual Observation Forms; and
c. The Sampling and Analysis Visual Observation Records.

7.0 SWPPP Review Log

The SWPPP is a "living" document and must be reviewed at least annually and updated when necessary. Any modification is to be recorded in this SWPPP Review Log. Modifications could include but are not limited to change in employees, design, operation, and maintenance, but could also include newly listed TMDLs and BMP deficiencies identified through inspections or benchmark monitoring. The update SWPPP must be certified and submitted via SMARTS within 30 days whenever the SWPPP contains significant revisions. Other revisions are required to be submitted at least once every three months.

California General Industrial Stormwater Permit

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES)

GENERAL PERMIT FOR
STORM WATER DISCHARGES
ASSOCIATED WITH INDUSTRIAL ACTIVITIES

ORDER
NPDES NO. CAS000001

This Order was adopted by the State Water Resources Control Board on:	**April 1, 2014**
This Order shall become effective on:	**July 1, 2015**
This Order shall expire on:	**June 30, 2020**

IT IS HEREBY ORDERED that as of July 1, 2015 this Order supersedes Order 97-03-DWQ except for Order 97-03-DWQ's requirement to submit annual reports by July 1, 2015 and except for enforcement purposes. As of July 1, 2015, a Discharger shall comply with the requirements in this Order to meet the provisions contained in Division 7 of the California Water Code (commencing with section 13000) and regulations adopted thereunder, and the provisions of the federal Clean Water Act and regulations and guidelines adopted thereunder.

CERTIFICATION

I, Jeanine Townsend, Clerk to the Board, do hereby certify that this Order, including its fact sheet, attachments, and appendices is a full, true, and correct copy of an Order adopted by the State Water Resources Control Board, on April 1, 2014.

I. FINDINGS

A. General Findings

The State Water Resources Control Board (State Water Board) finds that:

1. The Federal Clean Water Act (Clean Water Act) prohibits certain discharges of storm water containing pollutants except in compliance with a National Pollutant Discharge Elimination System (NPDES) permit. (33 U.S.C. §§ 1311, 1342 (also referred to as Clean Water Act §§ 301, 402).) The United States Environmental Protection Agency (U.S. EPA) promulgates federal regulations to implement the Clean Water Act's mandate to control pollutants in storm water discharges. (40 C.F.R. § 122, et seq.) The NPDES permit must require implementation of Best Available Technology Economically Achievable (BAT) and Best Conventional Pollutant Control Technology (BCT) to reduce or prevent pollutants in storm water discharges and authorized non-storm water discharges (NSWDs). The NPDES permit must also include additional requirements necessary to implement applicable water quality objectives or water quality standards (water quality standards, collectively).

2. On November 16, 1990, U.S. EPA promulgated Phase I storm water regulations in compliance with section 402(p) of the Clean Water Act. (55 Fed. Reg. 47990, codified at 40 C.F.R. § 122.26.) These regulations require operators of facilities subject to storm water permitting (Dischargers), that discharge storm water associated with industrial activity (industrial storm water discharges), to obtain an NPDES permit. Section 402(p)(3)(A) of the Clean Water Act also requires that permits for discharges associated with industrial activity include requirements necessary to meet water quality standards.

3. Phase II storm water regulations[1] require permitting for storm water discharges from facilities owned and operated by a municipality with a population of less than 100,000. The previous exemption from the Phase I permitting requirements under section 1068 of the Intermodal Surface Transportation Efficiency Act of 1991 was eliminated.

4. This Order (General Permit) is an NPDES General Permit issued in compliance with section 402 of the Clean Water Act and shall take effect on July 1, 2015, provided that the Regional Administrator of U.S. EPA has no objection. If the U.S. EPA Regional Administrator has an objection, this General Permit will not become effective until the objection is withdrawn.

5. This action to adopt an NPDES General Permit is exempt from the provisions of the California Environmental Quality Act (Pub. Resources Code, § 21000, et seq.) in accordance with section 13389 of the Water Code. (See *County of*

[1] U.S. EPA. Final NPDES Phase II Rule. <http://cfpub.epa.gov/npdes/stormwater/swfinal.cfm>. [as of February 4, 2014]

Los Angeles v. California State Water Resources Control Bd. (2006) 143 Cal.App.4th 985.)

6. State Water Board Order 97-03-DWQ is rescinded as of the effective date of this General Permit (July 1, 2015) except for Order 97-03-DWQ's requirement that annual reports be submitted by July1, 2015 and except for enforcement purposes.

7. Effective July 1, 2015, the State Water Board and the Regional Water Quality Control Boards (Regional Water Boards) (Water Boards, collectively) will enforce the provisions herein.

8. This General Permit authorizes discharges of industrial storm water to waters of the United States, so long as those discharges comply with all requirements, provisions, limitations, and prohibitions in this General Permit.

9. Industrial activities covered under this General Permit are described in Attachment A.

10. The Fact Sheet for this Order is incorporated as findings of this General Permit.

11. Acronyms are defined in Attachment B and terms used in this General Permit are defined in Attachment C.

12. This General Permit regulates industrial storm water discharges and authorized NSWDs from specific categories of industrial facilities identified in Attachment A hereto, and industrial storm water discharges and authorized NSWDs from facilities designated by the Regional Water Boards to obtain coverage under this General Permit. This General Permit does not apply to industrial storm water discharges and NSWDs that are regulated by other individual or general NPDES permits

13. This General Permit does not preempt or supersede the authority of municipal agencies to prohibit, restrict, or control industrial storm water discharges and authorized NSWDs that may discharge to storm water conveyance systems or other watercourses within their jurisdictions as allowed by state and federal law.

14. All terms defined in the Clean Water Act, U.S. EPA regulations, and the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000, et seq.) will have the same definition in this General Permit unless otherwise stated.

15. Pursuant to 40 Code of Federal Regulations section 131.12 and State Water Board Resolution 68-16, which incorporates the requirements of 40 Code of Federal Regulations section 131.12 where applicable, the State Water Board finds that discharges in compliance with this General Permit will not result in the lowering of water quality to a level that does not achieve water quality objectives and protect beneficial uses. Any degradation of water quality from existing high quality water to a level that achieves water quality objectives and

protects beneficial uses is appropriate to support economic development. This General Permit's requirements constitute best practicable treatment or control for discharges of industrial storm water and authorized non-storm water discharges, and are therefore consistent with those provisions.

16. Compliance with any specific limits or requirements contained in this General Permit does not constitute compliance with any other applicable permits.

17. This General Permit requires that the Discharger certify and submit all Permit Registration Documents (PRDs) for Notice of Intent (NOI) and No Exposure Certification (NEC) coverage via the State Water Board's Storm Water Multiple Application and Report Tracking System (SMARTS) website. (See Attachment D for an example of the information required to be submitted in the PRDs via SMARTS.) All other documents required by this General Permit to be electronically certified and submitted via SMARTS can be submitted by the Discharger or by a designated Duly Authorized Representative on behalf of the Discharger. Electronic reporting is required to reduce the state's reliance on paper, to improve efficiency, and to make such General Permit documents more easily accessible to the public and the Water Boards.

18. All information provided to the Water Boards shall comply with the Homeland Security Act and all other federal law that concerns security in the United States, as applicable.

B. Industrial Activities Not Covered Under this General Permit

19. Discharges of storm water from areas on tribal lands are not covered under this General Permit. Storm water discharges from industrial facilities on tribal lands are regulated by a separate NPDES permit issued by U.S. EPA.

20. Discharges of storm water regulated under another individual or general NPDES permit adopted by the State Water Board or Regional Water Board are not covered under this General Permit, including the State Water Board NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities.

21. Storm water discharges to combined sewer systems are not covered under this General Permit. These discharges must be covered by an individual permit. (40 C.F.R. § 122.26(a)(7).)

22. Conveyances that discharge storm water runoff combined with municipal sewage are not covered under this General Permit.

23. Discharges of storm water identified in Clean Water Act section 402(l) (33 U.S.C. § 1342(l)) are not covered under this General Permit.

24. Facilities otherwise subject to this General Permit but for which a valid Notice of Non-Applicability (NONA) has been certified and submitted via SMARTS, by the Entity are not covered under this General Permit. Entities (See Section XX.C.1 of this General Permit) who are claiming "No Discharge"

through the NONA shall meet the eligibility requirements and provide a No Discharge Technical Report in accordance with Section XX.C.

25. This General Permit does not authorize discharges of dredged or fill material regulated by the US Army Corps of Engineers under section 404 of the Clean Water Act and does not constitute a water quality certification under section 401 of the Clean Water Act.

C. Discharge Prohibitions

26. Pursuant to section 13243 of the Water Code, the State Water Board may specify certain conditions or areas where the discharge of waste, or certain types of waste, is prohibited.

27. With the exception of certain authorized NSWDs as defined in Section IV, this General Permit prohibits NSWDs. The State Water Board recognizes that certain NSWDs should be authorized because they are not generated by industrial activity, are not significant sources of pollutants when managed appropriately, and are generally unavoidable because they are related to safety or would occur regardless of industrial activity. Prohibited NSWDs may be authorized under other individual or general NPDES permits, or waste discharge requirements issued by the Water Boards.

28. Prohibited NSWDs are referred to as unauthorized NSWDs in this General Permit. Unauthorized NSWDs shall be either eliminated or permitted by a separate NPDES permit. Unauthorized NSWDs may contribute significant pollutant loads to receiving waters. Measures to control sources of unauthorized NSWDs such as spills, leakage, and dumping, must be addressed through the implementation of Best Management Practices (BMPs).

29. This General Permit incorporates discharge prohibitions contained in water quality control plans, as implemented by the Water Boards.

30. Direct discharges of waste, including industrial storm water discharges, to Areas of Special Biological Significance (ASBS) are prohibited unless the Discharger has applied for and the State Water Board has granted an exception to the State Water Board's 2009 Water Quality Control Plan for Ocean Waters of California as amended by State Water Board Resolution 2012-0056 (California Ocean Plan)[2] allowing the discharge.

State Water Resources Control Board. Resolution 2012-0056. <http://www.swrcb.ca.gov/board_decisions/adopted_orders/resolutions/2012/rs2012_0056.pdf>. [as of February 4, 2014].

D. Effluent Limitations

31. Section 301(b) of the Clean Water Act and 40 Code of Federal Regulations section require NPDES permits to include technology-based requirements at a minimum, and any more stringent effluent limitations necessary for receiving waters to meet applicable water quality standards. Clean Water Act section 402(p)(3)(A) requires that discharges of storm water runoff from industrial facilities comply with Clean Water Act section 301.

32. This General Permit requires control of pollutant discharges using BAT and BCT to reduce and prevent discharges of pollutants, and any more stringent effluent limitations necessary for receiving waters to meet applicable water quality standards.

33. It is not feasible for the State Water Board to establish numeric technology based effluent limitations for discharges authorized by this General Permit at this time. The rationale for this determination is discussed in detail in the Fact Sheet of this General Permit. Therefore, this General Permit requires Dischargers to implement minimum BMPs and applicable advanced BMPs as defined in Section X.H (collectively, BMPs) to comply with the requirements of this General Permit. This approach is consistent with U.S. EPA's 2008 Multi-Sector General Permit for Stormwater Discharges Associated with Industrial Activity (2008 MSGP).

34. 40 Code of Federal Regulations section 122.44(d) requires that NPDES permits include Water Quality Based Effluent Limitations (WQBELs) to attain and maintain applicable numeric and narrative water quality standards for receiving waters.

35. Where numeric water quality criteria have not been established, 40 Code of Federal Regulations section 122.44(d)(1)(vi) provides that WQBELs may be established using U.S. EPA criteria guidance under section 304(a) of the Clean Water Act, a proposed state criteria or policy interpreting narrative criteria supplemented with other relevant information, and/or an indicator parameter.

36. This General Permit requires Dischargers to implement BMPs when necessary, in order to support attainment of water quality standards. The use of BMPs to control or abate the discharge of pollutants is authorized by 40 Code of Federal Regulations section 122.44(k)(3) because numeric effluent limitations are infeasible and implementation of BMPs is reasonably necessary to achieve effluent limitations and water quality standards, and to carry out the purposes and intent of the Clean Water Act. (40 C.F.R. § 122.44(k)(4).)

E. Receiving Water Limitations

37. This General Permit requires compliance with receiving water limitations based on water quality standards. The primary receiving water limitation requires that industrial storm water discharges and authorized NSWDs not

cause or contribute to an exceedance of applicable water quality standards. Water quality standards apply to the quality of the receiving water, not the quality of the industrial storm water discharge. Therefore, compliance with the receiving water limitations generally cannot be determined solely by the effluent water quality characteristics. If any Discharger's storm water discharge causes or contributes to an exceedance of a water quality standard, that Discharger must implement additional BMPs or other control measures in order to attain compliance with the receiving water limitation. Compliance with water quality standards may, in some cases, require Dischargers to implement controls that are more protective than controls implemented solely to comply with the technology-based requirements in this General Permit.

F. Total Maximum Daily Loads (TMDLs)

38. TMDLs relate to the maximum amount of a pollutant that a water body can receive and still attain water quality standards. A TMDL is defined as the sum of the allowable loads of a single pollutant from all contributing point sources (the waste load allocations) and non-point sources (load allocations), plus the contribution from background sources. (40 C.F.R. § 130.2(i).) Discharges addressed by this General Permit are considered to be point source discharges, and therefore must comply with effluent limitations that are "consistent with the assumptions and requirements of any available waste load allocation for the discharge prepared by the state and approved by U.S. EPA pursuant to 40 Code of Federal Regulations section 130.7. (40 C.F.R. § 122.44 (d)(1)(vii).) In addition, Water Code section 13263, subdivision (a), requires that waste discharge requirements implement any relevant water quality control plans. Many TMDLs contained in water quality control plans include implementation requirements in addition to waste load allocations. Attachment E of this General Permit lists the watersheds with U.S. EPA-approved and U.S. EPA-established TMDLs that include requirements, including waste load allocations, for Dischargers covered by this General Permit.

39. The State Water Board recognizes that it is appropriate to develop TMDL-specific permit requirements derived from each TMDL's waste load allocation and implementation requirements, in order to provide clarity to Dischargers regarding their responsibilities for compliance with applicable TMDLs. The development of TMDL-specific permit requirements is subject to public noticing requirements and a corresponding public comment period. Due to the number and variety of Dischargers subject to a wide range of TMDLs, development of TMDL-specific permit requirements for each TMDL listed in Attachment E will severely delay the reissuance of this General Permit. Because most of the TMDLs were established by the Regional Water Boards, and because some of the waste load allocations and/or implementation requirements may be shared by multiple Dischargers, the development of TMDL-specific permit requirements is best coordinated at the Regional Water Board level.

40. State and Regional Water Board staff will develop proposed TMDL-specific permit requirements (including monitoring and reporting requirements) for each of the TMDLs listed in Attachment E. After conducting a 30-day public comment period, the Regional Water Boards will submit to the State Water Board proposed TMDL-specific permit requirements for adoption by the State Water Board into this General Permit by July 1, 2016. The Regional Water Boards may also include proposed TMDL-specific monitoring requirements for inclusion in this General Permit, or may issue Regional Water Board orders pursuant to Water Code section 13383 requiring TMDL-specific monitoring. The proposed TMDL-specific permit requirements shall have no force or effect until adopted, with or without modification, by the State Water Board. Consistent with the 2008 MSGP, Dischargers are not required to take any additional actions to comply with the TMDLs listed in Attachment E until the State Water Board reopens this General Permit and includes TMDL-specific permit requirements, unless notified otherwise by a Regional Water Board.

41. The Regional Water Boards shall submit to the State Water Board the following information for each of the TMDLs listed in Attachment E:

    a. Proposed TMDL-specific permit, monitoring and reporting requirements applicable to industrial storm water discharges and NSWDs authorized under this General Permit, including compliance schedules and deliverables consistent with the TMDLs. TMDL-specific permit requirements are not limited by the BAT/BCT technology-based standards;

    b. An explanation of how the proposed TMDL-specific permit requirements, compliance schedules, and deliverables are consistent with the assumptions and requirements of any applicable waste load allocation and implement each TMDL; and,

    c. Where a BMP-based approach is proposed, an explanation of how the proposed BMPs will be sufficient to implement applicable waste load allocations.

42. Upon receipt of the information described in Finding 40, and no later than July 1, 2016, the State Water Board will issue a public notice and conduct a public comment period for the reopening of this General Permit to amend Attachment E, the Fact Sheet, and other provisions as necessary for incorporation of TMDL-specific permit requirements into this General Permit. Attachment E may also be subsequently reopened during the term of this General Permit to incorporate additional TMDL-specific permit requirements.

G. Discharges Subject to the California Ocean Plan

43. On October 16, 2012 the State Water Board amended the California Ocean Plan. The amended California Ocean Plan requires industrial storm water dischargers with outfalls discharging to ocean waters to comply with the

California Ocean Plan's model monitoring provisions. These provisions require Dischargers to: (a) monitor runoff for specific parameters at all outfalls from two storm events per year, and collect at least one representative receiving water sample per year, (b) conduct specified toxicity monitoring at certain types of outfalls at a minimum of once per year, and (c) conduct marine sediment monitoring for toxicity under specific circumstances. The California Ocean Plan provides conditions under which some of the above monitoring provisions may be waived by the Water Boards.

44. This General Permit requires Dischargers with outfalls discharging to ocean waters that are subject to the model monitoring provisions of the California Ocean Plan to develop and implement a monitoring plan in compliance with those provisions and any additional monitoring requirements established pursuant to Water Code section 13383. Dischargers that have not developed and implemented a monitoring program in compliance with the California Ocean Plan's model monitoring provisions by July 1, 2015 (the effective date of this General Permit), or seven (7) days prior to commencing operations, whichever is later, are ineligible to obtain coverage under this General Permit.

45. The California Ocean Plan prohibits the direct discharge of waste to ASBS. ASBS are defined in California Ocean Plan as "those areas designated by the State Water Board as ocean areas requiring protection of species or biological communities to the extent that alteration of natural water quality is undesirable."

46. The California Ocean Plan authorizes the State Water Board to grant an exception to Ocean Plan provisions where the board determines that the exception will not compromise protection of ocean waters for beneficial uses and the public interest will be served.

47. On March 20, 2012, the State Water Board adopted Resolution 2012-0012 which contains exceptions to the California Ocean Plan for specific discharges of storm water and non-point sources. This resolution also contains the special protections that are to be implemented for those discharges to ASBS.

48. This General Permit requires Dischargers who have been granted an exception to the Ocean Plan authorizing the discharges to ASBS by the State Water Board to comply with the requirements contained in Section VIII.B of this General Permit.

H. Training

49. To improve compliance and maintain consistent implementation of this General Permit, Dischargers are required to designate a Qualified Industrial Storm Water Practitioner (QISP) for each facility the Discharger operates that has entered Level 1 status in the Exceedance Response Action (ERA) process as described in Section XII of this General Permit. A QISP may be assigned to more than one facility. In order to qualify as a QISP, a State

Water Board-sponsored or approved training course must be completed. A competency exam may be required by the State Water Board to demonstrate sufficient knowledge of the QISP course material.

50. A QISP must assist the Discharger in completing the Level 1 status and Level 2 status ERA requirements as specified in Section XII of this General Permit. A QISP is also responsible for assisting New Dischargers that will be discharging to an impaired water body with a 303(d) listed impairment, demonstrate eligibility for coverage through preparing the data and/or information required in Section VII.B.

51. A Compliance Group Leader, as defined in Section XIV of this General Order must complete a State Water Board sponsored or approved training program for Compliance Group Leaders.

52. All engineering work subject to the Professional Engineers Act (Bus. & Prof. Code § 6700, et seq.) and required by this General Permit shall be performed by a California licensed professional engineer.

53. California licensed professional civil, industrial, chemical, and mechanical engineers and geologists have licenses that have professional overlap with the topics of this General Permit. The California Department of Consumer Affairs, Board for Professional Engineers, Land Surveyors and Geologists (CBPELSG) provides the licensure and regulation of professional civil, industrial, chemical, and mechanical engineers and professional geologists in California. The State Water Board is developing a specialized self-guided State Water Board-sponsored registration and training program specifically for these CPBELSG licensed engineers and geologists in good standing with CBPELSG.

I. Storm Water Pollution Prevention Plan (SWPPP) Requirements

54. This General Permit requires the development of a site-specific SWPPP in accordance with Section X of this General Permit. The SWPPP must include the information needed to demonstrate compliance with the requirements of this General Permit. The SWPPP must be submitted electronically via SMARTS, and a copy be kept at the facility. SWPPP revisions shall be completed in accordance with Section X.B of this General Permit

J. Sampling, Visual Observations, Reporting and Record Keeping

55. This General Permit complies with 40 Code of Federal Regulations section 122.44(i), which establishes monitoring requirements that must be included in storm water permits. Under this General Permit, Dischargers are required to: (a) conduct an Annual Comprehensive Facility Compliance Evaluation (Annual Evaluation) to identify areas of the facility contributing pollutants to industrial storm water discharges, (b) evaluate whether measures to reduce or prevent industrial pollutant loads identified in the Discharger's SWPPP are adequate and properly implemented in accordance with the terms of this

General Permit, and (c) determine whether additional control measures are needed.

56. This General Permit contains monitoring requirements that are necessary to determine whether pollutants are being discharged, and whether response actions are necessary. Data and information resulting from the monitoring will assist in Dischargers' evaluations of BMP effectiveness and compliance with this General Permit. Visual observations are one form of monitoring. This General Permit requires Dischargers to perform a variety of visual observations designed to identify pollutants in industrial storm water discharges and their sources. To comply with this General Permit Dischargers shall: (1) electronically self-report any violations via SMARTS, (2) comply with the Level 1 status and Level 2 status ERA requirements, when applicable, and (3) adequately address and respond to any Regional Water Board comments on the Discharger's compliance reports.

57. Dischargers that meet the requirements of the No Exposure Certification (NEC) Conditional Exclusion set forth in Section XVII of this General Permit are exempt from the SWPPP requirements, sampling requirements, and visual observation requirements in this General Permit.

K. Facilities Subject to Federal Storm Water Effluent Limitation Guidelines (ELGs)

58. U.S. EPA regulations at 40 Code of Federal Regulations Chapter I Subchapter N (Subchapter N) establish technology-based Effluent Limitation Guidelines and New Source Performance Standards (ELGs) for industrial storm water discharges from facilities in specific industrial categories. For these facilities, compliance with the BAT/BCT and ELG requirements constitutes compliance with technology-based requirements of this General Permit.

59. 40 Code of Federal Regulations section 122.44(i)(3) and (4) require storm water permits to require at least one Annual Evaluation and any monitoring requirements for applicable ELGs in Subchapter N. This General Permit requires Dischargers to comply with all applicable ELG requirements found in Subchapter N.

L. Sampling and Analysis Reduction

60. This General Permit reduces the number of qualifying sampling events required to be sampled each year when the Discharger demonstrates: (1) consistent compliance with this General Permit,(2) consistent effluent water quality sampling, and (3) analysis results that do not exceed numerical action levels.

M. Role of Numeric Action Levels (NALs) and Exceedance Response Actions (ERAs)

61. This General Permit incorporates a multiple objective performance measurement system that includes NALs, new comprehensive training requirements, Level 1 ERA Reports, Level 2 ERA Technical Reports, and Level 2 ERA Action Plans. Two objectives of the performance measurement system are to inform Dischargers, the public and the Water Boards on: (1) the overall pollutant control performance at any given facility, and (2) the overall performance of the industrial statewide storm water program. Additionally, the State Water Board expects that this information and assessment process will provide information necessary to determine the feasibility of numeric effluent limitations for industrial dischargers in the next reissuance of this General Permit, consistent with the State Water Board Storm Water Panel of Experts' June 2006 Recommendations.[3]

62. This General Permit contains annual and instantaneous maximum NALs. The annual NALs are established as the 2008 MSGP benchmark values, and are applicable for all parameters listed in Table 2. The instantaneous maximum NALs are calculated from a Water Board dataset, and are only applicable for Total Suspended Solids (TSS), Oil and Grease (O&G), and pH. An NAL exceedance is determined as follows:

    a. For annual NALs, an exceedance occurs when the average of all analytical results from all samples taken at a facility during a reporting year for a given parameter exceeds an annual NAL value listed in Table 2 of this General Permit; or,

    b. For the instantaneous maximum NALs, an exceedance occurs when two or more analytical results from samples taken for any parameter within a reporting year exceed the instantaneous maximum NAL value (for Total Suspended Solids, and Oil and Grease), or are outside of the instantaneous maximum NAL range (for pH) listed in Table 2 of this General Permit. For the purposes of this General Permit, the reporting year is July 1 through June 30.

63. The NALs are not intended to serve as technology-based or water quality-based numeric effluent limitations. The NALs are not derived directly from either BAT/BCT requirements or receiving water objectives. NAL exceedances defined in this General Permit are not, in and of themselves, violations of this General Permit. A Discharger that does not fully comply with the Level 1 status and/or Level 2 status ERA requirements, when required by the terms of this General Permit, is in violation of this General Permit.

64. ERAs are designed to assist Dischargers in complying with this General Permit. Dischargers subject to ERAs must evaluate the effectiveness of their

[3] State Water Board Storm Water Panel of Experts, The Feasibility of Numeric Effluent Limits Applicable to Discharges of Storm Water Associated with Municipal, Industrial and Construction Activities (June 19, 2006) <http://www.swrcb.ca.gov/water_issues/programs/stormwater/docs/numeric/swpanel_final_report.pdf> [as of February 4, 2014].

BMPs being implemented to ensure they are adequate to achieve compliance with this General Permit.

65. U.S. EPA regulations at Subchapter N establish ELGs for storm water discharges from facilities in 11 industrial categories. Dischargers subject to these ELGs are required to comply with the applicable requirements.

66. Exceedances of the NALs that are attributable solely to pollutants originating from non-industrial pollutant sources (such as run-on from adjacent facilities, non-industrial portions of the Discharger's property, or aerial deposition) are not a violation of this General Permit because the NALs are designed to provide feedback on industrial sources of pollutants. Dischargers may submit a Non-Industrial Source Pollutant Demonstration as part of their Level 2 ERA Technical Report to demonstrate that the presence of a pollutant causing an NAL exceedance is attributable solely to pollutants originating from non-industrial pollutant sources.

67. A Discharger who has designed, installed, and implemented BMPs to reduce or prevent pollutants in industrial storm water discharges in compliance with this General Permit may submit an Industrial Activity BMPs Demonstration, as part of their Level 2 ERA Technical Report.

68. This General Permit establishes design storm standards for all treatment control BMPs. These design standards are directly based on the standards in State Water Board Order 2000-0011 regarding Standard Urban Storm Water Mitigation Plans (SUSMPs). These design standards are generally expected to be consistent with BAT/BCT, to be protective of water quality, and to be effective for most pollutants. The standards are intended to eliminate the need for most Dischargers to further treat/control industrial storm water discharges that are unlikely to contain pollutant loadings that exceed the NALs set forth in this General Permit.

N. Compliance Groups

69. Compliance Groups are groups of Dischargers (Compliance Group Participants) that share common types of pollutant sources and industrial activity characteristics. Compliance Groups provide an opportunity for the Compliance Group Participants to combine resources and develop consolidated Level 1 ERA Reports for Level 1 NAL exceedances and appropriate BMPs for implementation in response to Level 2 status ERA requirements that are representative of the entire Compliance Group. Compliance Groups also provide the Water Boards and the public with valuable information as to how industrial storm water discharges are affected by non-industrial background pollutant sources (including natural background) and geographic locations. When developing the next reissuance of this General Permit, the State Water Board expects to have a better understanding of the feasibility and benefits of sector-specific and watershed-based permitting alternatives, which may include technology- or water quality-based numeric effluent limitations. The effluent data, BMP performance data

and other information provided from Compliance Groups' consolidated reporting will further assist the State Water Board in addressing sector-specific and watershed-based permitting alternatives.

O. Conditional Exclusion – No Exposure Certification (NEC)

70. Pursuant to U.S. EPA Phase II regulations, all Dischargers subject to this General Permit may qualify for a conditional exclusion from specific requirements if they submit a NEC demonstrating that their facilities have no exposure of industrial activities and materials to storm water discharges.

71. This General Permit requires Dischargers who seek the NEC conditional exclusion to obtain coverage in accordance with Section XVII of this General Permit. Dischargers that meet the requirements of the NEC are exempt from the SWPPP, sampling requirements, and monitoring requirements in this General Permit.

72. Dischargers seeking NEC coverage are required to certify and submit the applicable permit registration documents. Annual inspections, re-certifications, and fees are required in subsequent years. Light industry facility Dischargers excluded from coverage under the previous permit (Order 97-03-DWQ) must obtain the appropriate coverage under this General Permit. Failure to comply with the Conditional Exclusion conditions listed in this General Permit may lead to enforcement for discharging without a permit pursuant to sections 13385 or 13399.25, et seq., of the Water Code. A Discharger with NEC coverage that anticipates a change (or changes) in circumstances that would lead to exposure should register for permit coverage prior to the anticipated changes.

P. Special Requirements for Facilities Handling Plastic Materials

73. Section 13367 of the Water Code requires facilities handling preproduction plastic to implement specific BMPs aimed at minimizing discharges of such materials. The definition of Plastic Materials for the purposes of this General Permit includes the following types of sources of Plastic Materials: virgin and recycled plastic resin pellets, powders, flakes, powdered additives, regrind, dust, and other types of preproduction plastics with the potential to discharge or migrate off-site.

Q. Regional Water Board Authorities

74. Regional Water Boards are primarily responsible for enforcement of this General Permit. This General Permit recognizes that Regional Water Boards have the authority to protect the beneficial uses of receiving waters and prevent degradation of water quality in their region. As such, Regional Water Boards may modify monitoring requirements and review, comment, approve or disapprove certain Discharger submittals required under this General Permit.

IT IS HEREBY ORDERED that all Dischargers subject to this General Permit shall comply with the following conditions and requirements.

II. RECEIVING GENERAL PERMIT COVERAGE

A. Certification

1. For Storm Water Multiple Application and Report Tracking System (SMARTS) electronic account management and security reasons, as well as enforceability of this General Permit, the Discharger's Legally Responsible Person (LRP) of an industrial facility seeking coverage under this General Permit shall certify and submit all Permit Registration Documents (PRDs) for Notice of Intent (NOI) or No Exposure Certification (NEC) coverage. All other documents shall be certified and submitted via SMARTS by the Discharger's (LRP) or by their Duly Authorized Representative in accordance with the Electronic Signature and Certification Requirements in Section XXI.K. All documents required by this General Permit that are certified and submitted via SMARTS shall be in accordance with Section XXI.K.

2. Hereinafter references to certifications and submittals by the Discharger refer to the Discharger's LRP and their Duly Authorized Representative.

B. Coverages

This General Permit includes requirements for two (2) types of permit coverage, NOI coverage and NEC coverage. State Water Board Order 97-03-DWQ (previous permit) remains in effect until July 1, 2015. When PRDs are certified and submitted and the annual fee is received, the State Water Board will assign the Discharger a Waste Discharger Identification (WDID) number.

1. General Permit Coverage (NOI Coverage)

   a. Dischargers that discharge storm water associated with industrial activity to waters of the United States are required to meet all applicable requirements of this General Permit.

   b. The Discharger shall register for coverage under this General Permit by certifying and submitting PRDs via SMARTS (http://smarts.waterboards.ca.gov), which consist of:

      i. A completed NOI and signed certification statement;

      ii. A copy of a current Site Map from the Storm Water Pollution Prevention Plan (SWPPP) in Section X.E;

      iii. A SWPPP (see Section X); and,

c. The Discharger shall pay the appropriate Annual Fee in accordance with California Code of Regulations, title 23, section 2200 et seq.[4]

2. General Permit Coverage (NEC Coverage)

a. Dischargers that certify their facility has no exposure of industrial activities or materials to storm water in accordance with Section XVII qualify for NEC coverage and are not required to comply with the SWPPP or monitoring requirements of this General Permit.

b. Dischargers who qualify for NEC coverage shall conduct one Annual Facility Comprehensive Compliance Evaluation (Annual Evaluation) as described in Section XV, pay an annual fee, and certify annually that their facilities continue to meet the NEC requirements.

c. The Discharger shall submit the following PRDs on or before October 1, 2015 for NEC coverage via SMARTS:

i. A completed NEC Form (Section XVII.F.1) and signed certification statement (Section XVII.H);

ii. A completed NEC Checklist (Section XVII.F.2); and

iii. A current Site Map consistent with requirements in Section X.E.;

d. The Discharger shall pay the appropriate annual fee in accordance with California Code of Regulations, title 23, section 2200 et seq.[5]

3. General PRD Requirements

a. Site Maps

Dischargers registering for NOI or NEC coverage shall prepare a site map(s) as part of their PRDs in accordance with Section X.E. A separate copy of the site map(s) is required to be in the SWPPP. If there is a significant change in the facility layout (e.g., new building, change in storage locations, boundary change, etc.) a revision to the site map is required and shall be certified and submitted via SMARTS.

b. A Discharger shall submit a single set of PRDs for coverage under this General Permit for multiple industrial activities occurring at the same facility.

c. Any information provided to the Water Boards by the Discharger shall comply with the Homeland Security Act and other federal law that

[4] Annual fees must be mailed or sent electronically using the State Water Boards' Electronic Funds Transfer (EFT) system in SMARTS.
[5] See footnote 4.

addresses security in the United States; any information that does not comply should not be submitted in the PRDs. The Discharger must provide justification to the Regional Water Board regarding redacted information within any submittal.

d. Dischargers may redact trade secrets from information that is submitted via SMARTS. Dischargers who certify and submit redacted information via SMARTS must include a general description of the redacted information and the basis for the redaction in the version that is submitted via SMARTS. Dischargers must submit complete and un-redacted versions of the information that are clearly labeled "CONFIDENTIAL" to the Regional Water Board within 30 days of the submittal of the redacted information. All information labeled "CONFIDENTIAL" will be maintained by the Water Boards in a separate, confidential file.

4. Schedule for Submitting PRDs - Existing Dischargers Under the Previous Permit.

a. Existing Dischargers[6] with coverage under the previous permit shall continue coverage under the previous permit until July 1, 2015. All waste discharge requirements and conditions of the previous permit are in effect until July 1, 2015.

b. Existing Dischargers with coverage under the previous permit shall register for NOI coverage by July 1, 2015 or for NEC coverage by October 1, 2015. Existing Dischargers previously listed in Category 10 (Light Industry) of the previous permit, and continue to have no exposure to industrial activities and materials, have until October 1, 2015 to register for NEC coverage.

c. Existing Dischargers with coverage under the previous permit, that do not register for NOI coverage by July 1, 2015, may have their permit coverage administratively terminated as soon as July 1, 2015.

d. Existing Dischargers with coverage under the previous permit that are eligible for NEC coverage but do not register for NEC coverage by October 1, 2015 may have their permit coverage administratively terminated as soon as October 1, 2015.

e. Existing Dischargers shall continue to comply with the SWPPP requirements in State Water Board Order 97-03-DWQ up to, but no later than, June 30, 2015.

[6] Existing Dischargers are Dischargers with an active Notice of Intent (permit coverage) under the previous permit (97-03-DWQ) prior to the effective date of this General Permit.

f. Existing Dischargers shall implement an updated SWPPP in accordance with Section X by July 1, 2015.

g. Existing Dischargers that submit a Notice of Termination (NOT) under the previous permit prior to July 1, 2015 and that receive NOT approval from the Regional Water Board are not subject to this General Permit unless they subsequently submitted new PRDs.

5. Schedule for Submitting PRDs - New Dischargers Obtaining Coverage On or After July 1, 2015

   New Dischargers registering for NOI coverage on or after July 1, 2015 shall certify and submit PRDs via SMARTS at least seven (7) days prior to commencement of industrial activities or on July 1, 2015, whichever comes later.

   a. New Dischargers registering for NEC coverage shall electronically certify and submit PRDs via SMARTS by October 1, 2015, or at least seven (7) days prior to commencement of industrial activities, whichever is later.

C. Termination and Changes to General Permit Coverage

1. Dischargers with NOI or NEC coverage shall request termination of coverage under this General Permit when either (a) operation of the facility has been transferred to another entity, (b) the facility has ceased operations, completed closure activities, and removed all industrial related pollutants, or (c) the facility's operations have changed and are no longer subject to the General Permit. Dischargers shall certify and submit a Notice of Termination via SMARTS. Until a valid NOT is received, the Discharger remains responsible for compliance with this General Permit and payment of accrued annual fees.

2. Whenever there is a change to the facility location, the Discharger shall certify and submit new PRDs via SMARTS. When ownership changes, the prior Discharger (seller) must inform the new Discharger (buyer) of the General Permit applications and regulatory coverage requirements. The new Discharger must certify and submit new PRDs via SMARTS to obtain coverage under this General Permit.

3. Dischargers with NOI coverage where the facility qualifies for NEC coverage in accordance with Section XVII of this General Permit, may register for NEC coverage via SMARTS. Such Dischargers are not required to submit an NOT to cancel NOI coverage.

4. Dischargers with NEC coverage, where changes in the facility and/or facility operations occur, which result in NOI coverage instead of NEC coverage, shall register for NOI coverage via SMARTS. Such Dischargers are not required to submit an NOT to cancel NEC coverage.

5. Dischargers shall provide additional information supporting an NOT, or revise their PRDs via SMARTS, upon request by the Regional Water Board.

6. Dischargers that are denied approval of a submitted NOT or registration for NEC coverage by the Regional Water Board, shall continue compliance with this General Permit under their existing NOI coverage.

7. New Dischargers (Dischargers with no previous NOI or NEC coverage) shall register for NOI coverage if the Regional Water Board denies NEC coverage.

D. Preparation Requirements

1. The following documents shall be certified and submitted by the Discharger via SMARTS:

   a. Annual Reports (Section XVI) and SWPPPs (Section X);

   b. NOTs;

   c. Sampling Frequency Reduction Certification (Section XI.C.7);

   d. Level 1 ERA Reports (Section XII.C) prepared by a QISP;

   e. Level 2 ERA Technical Reports and Level 2 ERA Action Plans (Sections XII.D.1-2) prepared by a QISP; and,

   f. SWPPPs for inactive mining operations as described in Section XIII, signed (wet signature and license number) by a California licensed professional engineer.

2. The following documents shall be signed (wet signature and license number) by a California licensed professional engineer:

   a. Calculations for Dischargers subject to Subchapter N in accordance with Section XI.D;

   b. Notice of Non-Applicability (NONA) Technical Reports described in Section XX.C for facilities that are engineered and constructed to have contained the maximum historic precipitation event (or series of events) using the precipitation data collected from the National Oceanic and Atmospheric Agency's website;

   c. NONA Technical Reports described in Section XX.C for facilities located in basins or other physical locations that are not tributaries or hydrologically connected to waters of the United States; and,

   d. SWPPPs for inactive mines described in Section XIII.

III. DISCHARGE PROHIBITIONS

A. All discharges of storm water to waters of the United States are prohibited except as specifically authorized by this General Permit or another NPDES permit.

B. Except for non-storm water discharges (NSWDs) authorized in Section IV, discharges of liquids or materials other than storm water, either directly or indirectly to waters of the United States, are prohibited unless authorized by another NPDES permit. Unauthorized NSWDs must be either eliminated or authorized by a separate NPDES permit.

C. Industrial storm water discharges and authorized NSWDs that contain pollutants that cause or threaten to cause pollution, contamination, or nuisance as defined in section 13050 of the Water Code, are prohibited.

D. Discharges that violate any discharge prohibitions contained in applicable Regional Water Board Water Quality Control Plans (Basin Plans), or statewide water quality control plans and policies are prohibited.

E. Discharges to ASBS are prohibited in accordance with the California Ocean Plan, unless granted an exception by the State Water Board and in compliance with the Special Protections contained in Resolution 2012-0012.

F. Industrial storm water discharges and NSWDs authorized by this General Permit that contain hazardous substances equal to or in excess of a reportable quantity listed in 40 Code of Federal Regulations sections 110.6, 117.21, or 302.6 are prohibited.

IV. AUTHORIZED NON-STORM WATER DISCHARGES (NSWDs)

A. The following NSWDs are authorized provided they meet the conditions of Section IV.B:

1. Fire-hydrant and fire prevention or response system flushing;

2. Potable water sources including potable water related to the operation, maintenance, or testing of potable water systems;

3. Drinking fountain water and atmospheric condensate including refrigeration, air conditioning, and compressor condensate;

4. Irrigation drainage and landscape watering provided all pesticides, herbicides and fertilizers have been applied in accordance with the manufacturer's label;

5. Uncontaminated natural springs, groundwater, foundation drainage, footing drainage;

6. Seawater infiltration where the seawater is discharged back into the source: and,

7. Incidental windblown mist from cooling towers that collects on rooftops or adjacent portions of your facility, but not intentional discharges from the cooling tower (e.g., “piped” cooling tower blowdown or drains).

B. The NSWDs identified in Section IV.A are authorized by this General Permit if the following conditions are met:

1. The authorized NSWDs are not in violation of any Regional Water Board Water Quality Control Plans (Basin Plans) or other requirements, or statewide water quality control plans or policies requirement;

2. The authorized NSWDs are not in violation of any municipal agency ordinance or requirements;

3. BMPs are included in the SWPPP and implemented to:

   a. Reduce or prevent the contact of authorized NSWDs with materials or equipment that are potential sources of pollutants;

   b. Reduce, to the extent practicable, the flow or volume of authorized NSWDs;

   c. Ensure that authorized NSWDs do not contain quantities of pollutants that cause or contribute to an exceedance of a water quality standards; and,

   d. Reduce or prevent discharges of pollutants in authorized NSWDs in a manner that reflects best industry practice considering technological availability and economic practicability and achievability.

4. The Discharger conducts monthly visual observations (Section XI.A.1) of NSWDs and sources to ensure adequate BMP implementation and effectiveness; and,

5. The Discharger reports and describes all authorized NSWDs in the Annual Report.

C. Firefighting related discharges are not subject to this General Permit and are not subject to the conditions of Section IV.B. These discharges, however, may be subject to Regional Water Board enforcement actions under other sections of the Water Code. Firefighting related discharges that are contained and are later discharged may be subject to municipal agency ordinances and/or Regional Water Board requirements.

V. EFFLUENT LIMITATIONS

A. Dischargers shall implement BMPs that comply with the BAT/BCT requirements of this General Permit to reduce or prevent discharges of pollutants in their storm water discharge in a manner that reflects best industry practice considering technological availability and economic practicability and achievability.

B. Industrial storm water discharges from facilities subject to storm water ELGs in Subchapter N shall not exceed those storm water ELGs. The ELGs for industrial storm water discharges subject to Subchapter N are in Attachment F of this General Permit.

C. Dischargers located within a watershed for which a Total Maximum Daily Load (TMDL) has been approved by U.S. EPA, shall comply with any applicable TMDL-specific permit requirements that have been incorporated into this General Permit in accordance with Section VII.A. Attachment E contains a reference list of potential TMDLs that may apply to Dischargers subject to this General Permit.

VI. RECEIVING WATER LIMITATIONS

A. Dischargers shall ensure that industrial storm water discharges and authorized NSWDs do not cause or contribute to an exceedance of any applicable water quality standards in any affected receiving water.

B. Dischargers shall ensure that industrial storm water discharges and authorized NSWDs do not adversely affect human health or the environment.

C. Dischargers shall ensure that industrial storm water discharges and authorized NSWDs do not contain pollutants in quantities that threaten to cause pollution or a public nuisance.

VII. TOTAL MAXIMUM DAILY LOADS (TMDLs)

A. Implementation

1. The State Water Board shall reopen and amend this General Permit, including Attachment E, the Fact Sheet and other applicable Permit provisions as necessary, in order to incorporate TMDL-specific permit requirements, as described in Findings 38 through 42. Once this General Permit is amended, Dischargers shall comply with the incorporated TMDL-specific permit requirements in accordance with any specified compliance schedule(s). TMDL-specific compliance dates that exceed the term of this General Permit may be included for reference, and are enforceable in the event that this General Permit is administratively extended or reissued.

2. The State Water Board may, at its discretion, reopen this General Permit to add TMDL-specific permit requirements to Attachment E, or to incorporate new TMDLs adopted during the term of this General Permit that include requirements applicable to Dischargers covered by this General Permit.

B. New Dischargers applying for NOI coverage under this General Permit that will be discharging to a water body with a 303(d) listed impairment are ineligible for coverage unless the Discharger submits data and/or information, prepared by a QISP, demonstrating that:

1. The Discharger has eliminated all exposure to storm water of the pollutant(s) for which the water body is impaired, has documented the procedures taken to prevent exposure onsite, and has retained such documentation with the SWPPP at the facility;

2. The pollutant for which the water body is impaired is not present at the Discharger's facility, and the Discharger has retained documentation of this finding with the SWPPP at the facility; or,

3. The discharge of any listed pollutant will not cause or contribute to an exceedance of a water quality standard. This is demonstrated if: (1) the discharge complies with water quality standard at the point of discharge, or (2) if there are sufficient remaining waste load allocations in an approved TMDL and the discharge is controlled at least as stringently as similar discharges subject to that TMDL.

VIII. DISCHARGES SUBJECT TO THE CALIFORNIA OCEAN PLAN

A. Discharges to Ocean Waters

1. Dischargers with outfalls discharging to ocean waters that are subject to the model monitoring provisions of the California Ocean Plan shall develop and implement a monitoring plan in compliance with those provisions and any additional monitoring requirements established pursuant to Water Code section 13383. Dischargers who have not developed and implemented a monitoring program in compliance with the California Ocean Plan's model monitoring provisions by July 1, 2015, or seven (7) days prior to commencing of operations, whichever is later, are ineligible to obtain coverage under this General Permit.

2. Dischargers are ineligible for the methods and exceptions provided in Section XI.C of this General permit for any of the outfalls discharging to ocean waters subject to the model monitoring provisions of the California Ocean Plan.

B. Discharge Granted an Exceptions for Areas of Special Biological Significance (ASBS)

Dischargers who were granted an exception to the California Ocean Plan prohibition against direct discharges of waste to an ASBS pursuant to Resolution 2012-0012[7] amended by Resolution 2012-0031[8] shall comply with the conditions and requirements set forth in Attachment G of this General Permit. Any Discharger that applies for and is granted an exception to the California Ocean Plan prohibition after July 1, 2013 shall comply with the conditions and requirements set forth in the granted exception.

IX. TRAINING QUALIFICATIONS

A. General

1. A Qualified Industrial Storm Water Practitioner (QISP) is a person (either the Discharger or a person designated by the Discharger) who has completed a State Water Board-sponsored or approved QISP training course[9], and has registered as a QISP via SMARTS. Upon completed registration the State Water Board will issue a QISP identification number.

2. The Executive Director of the State Water Board or an Executive Officer of a Regional Water Board may rescind any QISP's registration if it is found that the QISP has repeatedly demonstrated an inadequate level of performance in completing the QISP requirements in this General Permit. An individual whose QISP registration has been rescinded may request that the State Water Board review the rescission. Any request for review must be received by the State Water Board no later than 30 days of the date that the individual received written notice of the rescission.

3. Dischargers with Level 1 status shall:

   a. Designate a person to be the facility's QISP and ensure that this person has attended and satisfactorily completed the State Water Board-sponsored or approved QISP training course.

   b. Ensure that the facility's designated QISP provides sufficient training to the appropriate team members assigned to perform activities required by this General Permit.

[7] State Water Resources Control Board. Resolution 2012-0012. <http://www.waterboards.ca.gov/board_decisions/adopted_orders/resolutions/2012/rs2012_0012.pdf>. [as of February 4, 2014].
[8] State Water Resources Control Board. Resolution 2012-0031. <http://www.swrcb.ca.gov/board_decisions/adopted_orders/resolutions/2012/rs2012_0031.pdf>. [as of February 4, 2014].
[9] A specialized self-guided State Water Board-sponsored registration and training program will be available as an option for CPBELSG licensed professional civil, mechanical, industrial, and chemical engineers and professional geologists by the effective date of this General Permit.

X. Storm Water Pollution Prevention Plan (SWPPP)

A. SWPPP Elements

Dischargers shall develop and implement a site-specific SWPPP for each industrial facility covered by this General Permit that shall contain the following elements, as described further in this Section[10]:

1. Facility Name and Contact Information;
2. Site Map;
3. List of Industrial Materials;
4. Description of Potential Pollution Sources;
5. Assessment of Potential Pollutant Sources;
6. Minimum BMPs;
7. Advanced BMPs, if applicable;
8. Monitoring Implementation Plan;
9. Annual Comprehensive Facility Compliance Evaluation (Annual Evaluation); and,
10. Date that SWPPP was Initially Prepared and the Date of Each SWPPP Amendment, if Applicable.

B. SWPPP Implementation and Revisions

All Dischargers are required to implement their SWPPP by July 1, 2015 or upon commencement of industrial activity. The Discharger shall:

1. Revise their on-site SWPPP whenever necessary;
2. Certify and submit via SMARTS their SWPPP within 30 days whenever the SWPPP contains significant revision(s); and,
3. With the exception of significant revisions, the Discharger is not required to certify and submit via SMARTS their SWPPP revisions more than once every three (3) months in the reporting year.

[10] Appendix 1 (SWPPP Checklist) of this General Permit is provided to assist the Discharger in including information required in the SWPPP. This checklist is not required to be used.

C. SWPPP Performance Standards

1. The Discharger shall ensure a SWPPP is prepared to:

   a. Identify and evaluate all sources of pollutants that may affect the quality of industrial storm water discharges and authorized NSWDs;

   b. Identify and describe the minimum BMPs (Section X.H.1) and any advanced BMPs (Section X.H.2) implemented to reduce or prevent pollutants in industrial storm water discharges and authorized NSWDs. BMPs shall be selected to achieve compliance with this General Permit; and,

   c. Identify and describe conditions or circumstances which may require future revisions to be made to the SWPPP.

2. The Discharger shall prepare a SWPPP in accordance with all applicable SWPPP requirements of this Section. A copy of the SWPPP shall be maintained at the facility.

D. Planning and Organization

1. Pollution Prevention Team

   Each facility must have a Pollution Prevention Team established and responsible for assisting with the implementation of the requirements in this General Permit. The Discharger shall include in the SWPPP detailed information about its Pollution Prevention Team including:

   a. The positions within the facility organization (collectively, team members) who assist in implementing the SWPPP and conducting all monitoring requirements in this General Permit;

   b. The responsibilities, duties, and activities of each of the team members; and,

   c. The procedures to identify alternate team members to implement the SWPPP and conduct required monitoring when the regularly assigned team members are temporarily unavailable (due to vacation, illness, out of town business, or other absences).

2. Other Requirements and Existing Facility Plans

   a. The Discharger shall ensure its SWPPP is developed, implemented, and revised as necessary to be consistent with any applicable municipal, state, and federal requirements that pertain to the requirements in this General Permit.

   b. The Discharger may include in their SWPPP the specific elements of existing plans, procedures, or regulatory compliance documents that

contain storm water-related BMPs or otherwise relate to the requirements of this General Permit.

c. The Discharger shall properly reference the original sources for any elements of existing plans, procedures, or regulatory compliance documents included as part of their SWPPP and shall maintain a copy of the documents at the facility as part of the SWPPP.

d. The Discharger shall document in their SWPPP the facility's scheduled operating hours as defined in Attachment C. Scheduled facility operating hours that would be considered irregular (temporary, intermittent, seasonal, weather dependent, etc.) shall also be documented in the SWPPP.

E. Site Map

1. The Discharger shall prepare a site map that includes notes, legends, a north arrow, and other data as appropriate to ensure the map is clear, legible and understandable.

2. The Discharger may provide the required information on multiple site maps.

3. The Discharger shall include the following information on the site map:

   a. The facility boundary, storm water drainage areas within the facility boundary, and portions of any drainage area impacted by discharges from surrounding areas. Include the flow direction of each drainage area, on-facility surface water bodies, areas of soil erosion, and location(s) of nearby water bodies (such as rivers, lakes, wetlands, etc.) or municipal storm drain inlets that may receive the facility's industrial storm water discharges and authorized NSWDs;

   b. Locations of storm water collection and conveyance systems, associated discharge locations, and direction of flow. Include any sample locations if different than the identified discharge locations;

   c. Locations and descriptions of structural control measures[11] that affect industrial storm water discharges, authorized NSWDs, and/or run-on;

   d. Identification of all impervious areas of the facility, including paved areas, buildings, covered storage areas, or other roofed structures;

[11] Examples of structural control measures are catch basins, berms, detention ponds, secondary containment, oil/water separators, diversion barriers, etc.

e. Locations where materials are directly exposed to precipitation and the locations where identified significant spills or leaks (Section X.G.1.d) have occurred; and

f. Areas of industrial activity subject to this General Permit. Identify all industrial storage areas and storage tanks, shipping and receiving areas, fueling areas, vehicle and equipment storage/maintenance areas, material handling and processing areas, waste treatment and disposal areas, dust or particulate generating areas, cleaning and material reuse areas, and other areas of industrial activity that may have potential pollutant sources.

F. List of Industrial Materials

The Discharger shall ensure the SWPPP includes a list of industrial materials handled at the facility, and the locations where each material is stored, received, shipped, and handled, as well as the typical quantities and handling frequency.

G. Potential Pollutant Sources

1. Description of Potential Pollutant Sources

   a. Industrial Processes

      The Discharger shall ensure the SWPPP describes each industrial process including: manufacturing, cleaning, maintenance, recycling, disposal, and any other activities related to the process. The type, characteristics, and approximate quantity of industrial materials used in or resulting from the process shall be included. Areas protected by containment structures and the corresponding containment capacity shall be identified and described.

   b. Material Handling and Storage Areas

      The Discharger shall ensure the SWPPP describes each material handling and storage area, including: the type, characteristics, and quantity of industrial materials handled or stored; the shipping, receiving, and loading procedures; the spill or leak prevention and response procedures; and the areas protected by containment structures and the corresponding containment capacity.

   c. Dust and Particulate Generating Activities

      The Discharger shall ensure the SWPPP describes all industrial activities that generate a significant amount of dust or particulate that may be deposited within the facility boundaries. The SWPPP shall describe such industrial activities, including the discharge locations, the source type, and the characteristics of the dust or particulate pollutant.

d. Significant Spills and Leaks

The Discharger shall:

i. Evaluate the facility for areas where spills and leaks can likely occur;

ii. Ensure the SWPPP includes:

a) A list of any industrial materials that have spilled or leaked in significant quantities and have discharged from the facility's storm water conveyance system within the previous five-year period;

b) A list of any toxic chemicals identified in 40 Code of Federal Regulations section 302 that have been discharged from the facilities' storm water conveyance system as reported on U.S. EPA Form R, as well as oil and hazardous substances in excess of reportable quantities (40 C.F.R. §§ 110, 117, and 302) that have discharged from the facility's storm water conveyance system within the previous five-year period;

c) A list of any industrial materials that have spilled or leaked in significant quantities and had the potential to be discharged from the facility's storm water conveyance system within the previous five-year period; and,

iii. Ensure that for each discharge or potential discharge listed above the SWPPP includes the location, characteristics, and approximate quantity of the materials spilled or leaked; approximate quantity of the materials discharged from the facility's storm water conveyance system; the cleanup or remedial actions that have occurred or are planned; the approximate remaining quantity of materials that have the potential to be discharged; and the preventive measures taken to ensure spills or leaks of the material do not reoccur.

e. NSWDs

The Discharger shall:

i. Ensure the SWPPP includes an evaluation of the facility that identifies all NSWDs, sources, and drainage areas;

ii. Ensure the SWPPP includes an evaluation of all drains (inlets and outlets) that identifies connections to the storm water conveyance system;

iii. Ensure the SWPPP includes a description of how all unauthorized NSWDs have been eliminated; and,

iv. Ensure all NSWDs are described in the SWPPP. This description shall include the source, quantity, frequency, and characteristics of the NSWDs, associated drainage area, and whether it is an authorized or unauthorized NSWD in accordance with Section IV.

f. Erodible Surfaces

The Discharger shall ensure the SWPPP includes a description of the facility locations where soil erosion may be caused by industrial activity, contact with storm water, authorized and unauthorized NSWDs, or run-on from areas surrounding the facility.

2. Assessment of Potential Pollutant Sources

a. The Discharger shall ensure that the SWPPP includes a narrative assessment of all areas of industrial activity with potential industrial pollutant sources. At a minimum, the assessment shall include:

i. The areas of the facility with likely sources of pollutants in industrial storm water discharges and authorized NSWDs;

ii. The pollutants likely to be present in industrial storm water discharges and authorized NSWDs;

iii. The approximate quantity, physical characteristics (e.g., liquid, powder, solid, etc.), and locations of each industrial material handled, produced, stored, recycled, or disposed;

iv. The degree to which the pollutants associated with those materials may be exposed to, and mobilized by contact with, storm water;

v. The direct and indirect pathways by which pollutants may be exposed to storm water or authorized NSWDs;

vi. All sampling, visual observation, and inspection records;

vii. The effectiveness of existing BMPs to reduce or prevent pollutants in industrial storm water discharges and authorized NSWDs;

viii. The estimated effectiveness of implementing, to the extent feasible, minimum BMPs to reduce or prevent pollutants in industrial storm water discharges and authorized NSWDs; and,

ix. The identification of the industrial pollutants related to the receiving waters with 303(d) listed impairments identified in Appendix 3 or approved TMDLs that may be causing or contributing to an exceedance of a water quality standard in the receiving waters.

b. Based upon the assessment above, Dischargers shall identify in the SWPPP any areas of the facility where the minimum BMPs described in

subsection H.1 below will not adequately reduce or prevent pollutants in storm water discharges in compliance with Section V.A. Dischargers shall identify any advanced BMPs, as described in subsection H.2 below, for those areas.

c. Based upon the assessment above, Dischargers shall identify any drainage areas with no exposure to industrial activities and materials in accordance with the definitions in Section XVII.

d. Based upon the assessment above, Dischargers shall identify any additional parameters, beyond the required parameters in Section XI.B.6 that indicate the presence of pollutants in industrial storm water discharges.

H. Best Management Practices (BMPs)

1. Minimum BMPs

The Discharger shall, to the extent feasible, implement and maintain all of the following minimum BMPs to reduce or prevent pollutants in industrial storm water discharges.[12]

a. Good Housekeeping

The Discharger shall:

i. Observe all outdoor areas associated with industrial activity; including storm water discharge locations, drainage areas, conveyance systems, waste handling/disposal areas, and perimeter areas impacted by off-facility materials or storm water run-on to determine housekeeping needs. Any identified debris, waste, spills, tracked materials, or leaked materials shall be cleaned and disposed of properly;

ii. Minimize or prevent material tracking;

iii. Minimize dust generated from industrial materials or activities;

iv. Ensure that all facility areas impacted by rinse/wash waters are cleaned as soon as possible;

v. Cover all stored industrial materials that can be readily mobilized by contact with storm water;

[12] For the purposes of this General Permit, the requirement to implement BMPs "to the extent feasible" requires Dischargers to select, design, install and implement BMPs that reduce or prevent discharges of pollutants in their storm water discharge in a manner that reflects best industry practice considering technological availability and economic practicability and achievability.

vi. Contain all stored non-solid industrial materials or wastes (e.g., particulates, powders, shredded paper, etc.) that can be transported or dispersed by the wind or contact with storm water;

vii. Prevent disposal of any rinse/wash waters or industrial materials into the storm water conveyance system;

viii. Minimize storm water discharges from non-industrial areas (e.g., storm water flows from employee parking area) that contact industrial areas of the facility; and,

ix. Minimize authorized NSWDs from non-industrial areas (e.g., potable water, fire hydrant testing, etc.) that contact industrial areas of the facility.

b. Preventive Maintenance

The Discharger shall:

i. Identify all equipment and systems used outdoors that may spill or leak pollutants;

ii. Observe the identified equipment and systems to detect leaks, or identify conditions that may result in the development of leaks;

iii. Establish an appropriate schedule for maintenance of identified equipment and systems; and,

iv. Establish procedures for prompt maintenance and repair of equipment, and maintenance of systems when conditions exist that may result in the development of spills or leaks.

c. Spill and Leak Prevention and Response

The Discharger shall:

i. Establish procedures and/or controls to minimize spills and leaks;

ii. Develop and implement spill and leak response procedures to prevent industrial materials from discharging through the storm water conveyance system. Spilled or leaked industrial materials shall be cleaned promptly and disposed of properly;

iii. Identify and describe all necessary and appropriate spill and leak response equipment, location(s) of spill and leak response equipment, and spill or leak response equipment maintenance procedures; and,

iv. Identify and train appropriate spill and leak response personnel.

d. Material Handling and Waste Management

The Discharger shall:

i. Prevent or minimize handling of industrial materials or wastes that can be readily mobilized by contact with storm water during a storm event;

ii. Contain all stored non-solid industrial materials or wastes (e.g., particulates, powders, shredded paper, etc.) that can be transported or dispersed by the wind or contact with storm water;

iii. Cover industrial waste disposal containers and industrial material storage containers that contain industrial materials when not in use;

iv. Divert run-on and storm water generated from within the facility away from all stockpiled materials;

v. Clean all spills of industrial materials or wastes that occur during handling in accordance with the spill response procedures (Section X.H.1.c); and,

vi. Observe and clean as appropriate, any outdoor material or waste handling equipment or containers that can be contaminated by contact with industrial materials or wastes.

e. Erosion and Sediment Controls

For each erodible surface facility location identified in the SWPPP (Section X.G.1.f), the Discharger shall:

i. Implement effective wind erosion controls;

ii. Provide effective stabilization for inactive areas, finished slopes, and other erodible areas prior to a forecasted storm event;

iii. Maintain effective perimeter controls and stabilize all site entrances and exits to sufficiently control discharges of erodible materials from discharging or being tracked off the site;

iv. Divert run-on and storm water generated from within the facility away from all erodible materials; and,

v. If sediment basins are implemented, ensure compliance with the design storm standards in Section X.H.6.

f. Employee Training Program

The Discharger shall:

i. Ensure that all team members implementing the various compliance activities of this General Permit are properly trained to implement the requirements of this General Permit, including but not limited to: BMP implementation, BMP effectiveness evaluations, visual observations,

and monitoring activities. If a Discharger enters Level 1 status, appropriate team members shall be trained by a QISP;

ii. Prepare or acquire appropriate training manuals or training materials;

iii. Identify which personnel need to be trained, their responsibilities, and the type of training they shall receive;

iv. Provide a training schedule; and,

v. Maintain documentation of all completed training classes and the personnel that received training in the SWPPP.

g. Quality Assurance and Record Keeping

The Discharger shall:

i. Develop and implement management procedures to ensure that appropriate staff implements all elements of the SWPPP, including the Monitoring Implementation Plan;

ii. Develop a method of tracking and recording the implementation of BMPs identified in the SWPPP; and

iii. Maintain the BMP implementation records, training records, and records related to any spills and clean-up related response activities for a minimum of five (5) years (Section XXI.J.4).

2. Advanced BMPs

a. In addition to the minimum BMPs described in Section X.H.1, the Discharger shall, to the extent feasible, implement and maintain any advanced BMPs identified in Section X.G.2.b, necessary to reduce or prevent discharges of pollutants in its storm water discharge in a manner that reflects best industry practice considering technological availability and economic practicability and achievability.

b. Advanced BMPs may include one or more of the following BMPs:

i. Exposure Minimization BMPs

These include storm resistant shelters (either permanent or temporary) that prevent the contact of storm water with the identified industrial materials or area(s) of industrial activity.

ii. Storm Water Containment and Discharge Reduction BMPs

These include BMPs that divert, infiltrate, reuse, contain, retain, or reduce the volume of storm water runoff. Dischargers are

encouraged to utilize BMPs that infiltrate or reuse storm water where feasible.

iii. Treatment Control BMPs

This is the implementation of one or more mechanical, chemical, biologic, or any other treatment technology that will meet the treatment design standard.

iv. Other Advanced BMPs

Any additional BMPs not described in subsections b.i through iii above that are necessary to meet the effluent limitations of this General Permit.

3. Temporary Suspension of Industrial Activities

For facilities that plan to temporarily suspend industrial activities for ten (10) or more consecutive calendar days during a reporting year, the Discharger may also suspend monitoring if it is infeasible to conduct monitoring while industrial activities are suspended (e.g., the facility is not staffed, or the facility is remote or inaccessible) and the facility has been stabilized. The Discharger shall include in the SWPPP the BMPs necessary to achieve compliance with this General Permit during the temporary suspension of the industrial activity. Once all necessary BMPs have been implemented to stabilize the facility, the Discharger is not required to:

a. Perform monthly visual observations (Section XI.A.1.a.); or,

b. Perform sampling and analysis (Section XI.B.) if it is infeasible to do so (e.g. facility is remotely located).

The Discharger shall upload via SMARTS (7) seven calendar days prior to the planned temporary suspension of industrial activities:

a. SWPPP revisions specifically addressing the facility stabilization BMPs;

b. The justification for why monitoring is infeasible at the facility during the period of temporary suspension of industrial activities;

c. The date the facility is fully stabilized for temporary suspension of industrial activities; and,

d. The projected date that industrial activities will resume at the facility.

Upon resumption of industrial activities at the facility, the Discharger shall, via SMARTS, confirm and/or update the date the facility's industrial activities have resumed. At this time, the Discharger is required to resume all compliance activities under this General Permit.

The Regional Water Boards may review the submitted information pertaining to the temporary suspension of industrial activities. Upon review, the Regional Water Board may request revisions or reject the Discharger's request to temporarily suspend monitoring.

4. BMP Descriptions

   a. The Discharger shall ensure that the SWPPP identifies each BMP being implemented at the facility, including:

      i. The pollutant(s) that the BMP is designed to reduce or prevent in industrial storm water discharges;

      ii. The frequency, time(s) of day, or conditions when the BMP is scheduled for implementation;

      iii. The locations within each area of industrial activity or industrial pollutant source where the BMP shall be implemented;

      iv. The individual and/or position responsible for implementing the BMP;

      v. The procedures, including maintenance procedures, and/or instructions to implement the BMP effectively;

      vi. The equipment and tools necessary to implement the BMP effectively; and,

      vii. The BMPs that may require more frequent visual observations beyond the monthly visual observations as described in Section XI.A.1.

   b. The Discharger shall ensure that the SWPPP identifies and justifies each minimum BMP or applicable advanced BMP not being implemented at the facility because they do not reflect best industry practice considering technological availability and economic practicability and achievability.

   c. The Discharger shall identify any BMPs described in subsection a above that are implemented in lieu of any of the minimum or applicable advanced BMPs.

5. BMP Summary Table

   The Discharger shall prepare a table summarizing each identified area of industrial activity, the associated industrial pollutant sources, the industrial pollutants, and the BMPs being implemented.

6. Design Storm Standards for Treatment Control BMPs

All new treatment control BMPs employed by the Discharger to comply with Section X.H.2 Advanced BMPs and new sediment basins installed after the effective date of this order shall be designed to comply with design storm standards in this Section, except as provided in an Industrial Activity BMP Demonstration (Section XII.D.2.a). A Factor of Safety shall be incorporated into the design of all treatment control BMPs to ensure that storm water is sufficiently treated throughout the life of the treatment control BMPs. The design storm standards for treatment control BMPs are as follows:

a. Volume-based BMPs: The Discharger, at a minimum, shall calculate[13] the volume to be treated using one of the following methods:

   i. The volume of runoff produced from an 85th percentile 24-hour storm event, as determined from local, historical rainfall records;

   ii. The volume of runoff produced by the 85th percentile 24-hour storm event, determined as the maximized capture runoff volume for the facility, from the formula recommended in the Water Environment Federation's Manual of Practice;[14] or,

   iii. The volume of annual runoff required to achieve 80% or more treatment, determined in accordance with the methodology set forth in the latest edition of California Stormwater Best Management Practices Handbook[15], using local, historical rainfall records.

b. Flow-based BMPs: The Discharger shall calculate the flow needed to be treated using one of the following methods:

   i. The maximum flow rate of runoff produced from a rainfall intensity of at least 0.2 inches per hour for each hour of a storm event;

   ii. The maximum flow rate of runoff produced by the 85th percentile hourly rainfall intensity, as determined from local historical rainfall records, multiplied by a factor of two; or,

   iii. The maximum flow rate of runoff, as determined using local historical rainfall records, that achieves approximately the same reduction in total pollutant loads as would be achieved by treatment of the 85th percentile hourly rainfall intensity multiplied by a factor of two.

[13] All hydrologic calculations shall be certified by a California licensed professional engineer in accordance with the Professional Engineers Act (Bus. & Prof. Code § 6700, et seq).

[15] California Stormwater Quality Association. Stormwater Best Management Practice New Development and Redevelopment Handbook. < http://www.casqa.org/ >. [as of July 3, 2013].

I. MONITORING IMPLEMENTATION PLAN

The Discharger shall prepare a Monitoring Implementation Plan in accordance with the requirements of this General Permit. The Monitoring Implementation Plan shall be included in the SWPPP and shall include the following items:

1. An identification of team members assigned to conduct the monitoring requirements;

2. A description of the following in accordance with Attachment H:

   a. Discharge locations;

   b. Visual observation procedures; and,

   c. Visual observation response procedures related to monthly visual observations and sampling event visual observations.

3. Justifications for any of the following that are applicable to the facility:

   a. Alternative discharge locations in accordance with Section XI.C.3;

   b. Representative Sampling Reduction in accordance with Section XI.C.4; or,

   c. Qualified Combined Samples in accordance with Section XI.C.5.

4. Procedures for field instrument calibration instructions, including calibration intervals specified by the manufacturer; and,

5. An example Chain of Custody form used when handling and shipping water quality samples to the lab.

XI. MONITORING

A. Visual Observations

1. Monthly Visual Observations

   a. At least once per calendar month, the Discharger shall visually observe each drainage area for the following:

      i. The presence or indications of prior, current, or potential unauthorized NSWDs and their sources;

      ii. Authorized NSWDs, sources, and associated BMPs to ensure compliance with Section IV.B.3; and,

iii. Outdoor industrial equipment and storage areas, outdoor industrial activities areas, BMPs, and all other potential source of industrial pollutants.

b. The monthly visual observations shall be conducted during daylight hours of scheduled facility operating hours and on days without precipitation.

c. The Discharger shall provide an explanation in the Annual Report for uncompleted monthly visual observations.

2. Sampling Event Visual Observations

Sampling event visual observations shall be conducted at the same time sampling occurs at a discharge location. At each discharge location where a sample is obtained, the Discharger shall observe the discharge of storm water associated with industrial activity.

a. The Discharger shall ensure that visual observations of storm water discharged from containment sources (e.g. secondary containment or storage ponds) are conducted at the time that the discharge is sampled.

b. Any Discharger employing volume-based or flow-based treatment BMPs shall sample any bypass that occurs while the visual observations and sampling of storm water discharges are conducted.

c. The Discharger shall visually observe and record the presence or absence of floating and suspended materials, oil and grease, discolorations, turbidity, odors, trash/debris, and source(s) of any discharged pollutants.

d. In the event that a discharge location is not visually observed during the sampling event, the Discharger shall record which discharge locations were not observed during sampling or that there was no discharge from the discharge location.

e. The Discharger shall provide an explanation in the Annual Report for uncompleted sampling event visual observations.

3. Visual Observation Records

The Discharger shall maintain records of all visual observations. Records shall include the date, approximate time, locations observed, presence and probable source of any observed pollutants, name of person(s) that conducted the observations, and any response actions and/or additional SWPPP revisions necessary in response to the visual observations.

4. The Discharger shall revise BMPs as necessary when the visual observations indicate pollutant sources have not been adequately addressed in the SWPPP.

B. Sampling and Analysis

1. A Qualifying Storm Event (QSE) is a precipitation event that:

   a. Produces a discharge for at least one drainage area; and,

   b. Is preceded by 48 hours with no discharge from any drainage area.

2. The Discharger shall collect and analyze storm water samples from two (2) QSEs within the first half of each reporting year (July 1 to December 31), and two (2) QSEs within the second half of each reporting year (January 1 to June 30).

3. Compliance Group Participants are only required to collect and analyze storm water samples from one (1) QSE within the first half of each reporting year (July 1 to December 31) and one (1) QSE within the second half of the reporting year (January 1 to June 30).

4. Except as provided in Section XI.C.4 (Representative Sampling Reduction), samples shall be collected from each drainage area at all discharge locations. The samples must be:

   a. Representative of storm water associated with industrial activities and any commingled authorized NSWDs; or,

   b. Associated with the discharge of contained storm water.

5. Samples from each discharge location shall be collected within four (4) hours of:

   a. The start of the discharge; or,

   b. The start of facility operations if the QSE occurs within the previous 12-hour period (e.g., for storms with discharges that begin during the night for facilities with day-time operating hours). Sample collection is required during scheduled facility operating hours and when sampling conditions are safe in accordance with Section XI.C.6.a.ii.

6. The Discharger shall analyze all collected samples for the following parameters:

   a. Total suspended solids (TSS) and oil and grease (O&G);

   b. pH (see Section XI.C.2);

c. Additional parameters identified by the Discharger on a facility-specific basis that serve as indicators of the presence of all industrial pollutants identified in the pollutant source assessment (Section X.G.2). These additional parameters may be modified (added or removed) in accordance with any updated SWPPP pollutant source assessment;

d. Additional applicable parameters listed in Table 1 below. These parameters are dependent on the facility Standard Industrial Classification (SIC) code(s);

e. Additional applicable industrial parameters related to receiving waters with 303(d) listed impairments or approved TMDLs based on the assessment in Section X.G.2.a.ix. Test methods with lower detection limits may be necessary when discharging to receiving waters with 303(d) listed impairments or TMDLs;

f. Additional parameters required by the Regional Water Board. The Discharger shall contact its Regional Water Board to determine appropriate analytical test methods for parameters not listed in Table 2 below. These analytical test methods will be added to SMARTS; and

g. For discharges subject to Subchapter N, additional parameters specifically required by Subchapter N. If the discharge is subject to ELGs, the Dischargers shall contact the Regional Water Board to determine appropriate analytical methods for parameters not listed in Table 2 below.

7. The Discharger shall select corresponding NALs, analytical test methods,, and reporting units from the list provided in Table 2 below. SMARTS will be updated over time to add additional acceptable analytical test methods. Dischargers may propose an analytical test method for any parameter or pollutant that does not have an analytical test method specified in Table 2 or in SMARTS. Dischargers may also propose analytical test methods with substantially similar or more stringent method detection limits than existing approved analytical test methods. Upon approval, the analytical test method will be added to SMARTS.

8. The Discharger shall ensure that the collection, preservation and handling of all storm water samples are in accordance with Attachment H, Storm Water Sample Collection and Handling Instructions.

9. Samples from different discharge locations shall not be combined or composited except as allowed in Section XI.C.5 (Qualified Combined Samples).

10. The Discharger shall ensure that all laboratory analyses are conducted according to test procedures under 40 Code of Federal Regulations part 136, including the observation of holding times, unless other test procedures have been specified in this General Permit or by the Regional Water Board.

11. Sampling Analysis Reporting

a. The Discharger shall submit all sampling and analytical results for all individual or Qualified Combined Samples via SMARTS within 30 days of obtaining all results for each sampling event.

b. The Discharger shall provide the method detection limit when an analytical result from samples taken is reported by the laboratory as a "non-detect" or less than the method detection limit. A value of zero shall not be reported.

c. The Discharger shall provide the analytical result from samples taken that is reported by the laboratory as below the minimum level (often referred to as the reporting limit) but above the method detection limit.

Reported analytical results will be averaged automatically by SMARTS. For any calculations required by this General Permit, SMARTS will assign a value of zero (0) for all results less than the minimum level as reported by the laboratory.

TABLE 1: Additional Analytical Parameters

SIC code	SIC code Description	Parameters*
102X	Copper Ores	COD; N+N
12XX	Coal Mines	Al; Fe
144X	Sand and Gravel	N+N
207X	Fats and Oils	BOD; COD; N+N

Biochemical Oxygen Demand (BOD)	SM 5210B	mg/L	30	

SM – Standard Methods for the Examination of Water and Wastewater, 18th edition
EPA – U.S. EPA test methods
(H) – Hardness dependent
* Minimum parameters required by this General Permit
**The NAL is the highest value used by U.S. EPA based on their hardness table in the 2008 MSGP.

C. Methods and Exceptions

1. The Discharger shall comply with the monitoring methods in this General Permit and Attachment H.

2. pH Methods

   a. Dischargers that are not subject to Subchapter N ELGs mandating pH analysis related to acidic or alkaline sources and have never entered Level 1 status for pH, are eligible to screen for pH using wide range litmus pH paper or other equivalent pH test kits. The pH screen shall be performed as soon as practicable, but no later than 15 minutes after the sample is collected.

   b. Dischargers subject to Subchapter N ELGs shall either analyze samples for pH using methods in accordance with 40 Code of Federal Regulations 136 for testing storm water or use a calibrated portable instrument for pH.

   c. Dischargers that enter Level 1 status (see Section XII.C) for pH shall, in the subsequent reporting years, analyze for pH using methods in accordance with 40 Code of Federal Regulations 136 or use a calibrated portable instrument for pH.

   d. Dischargers using a calibrated portable instrument for pH shall ensure that all field measurements are conducted in accordance with the accompanying manufacturer's instructions.

3. Alternative Discharge Locations

   a. The Discharger is required to identify, when practicable, alternative discharge locations for any discharge locations identified in accordance with Section XI.B.4 if the facility's discharge locations are:

      i. Affected by storm water run-on from surrounding areas that cannot be controlled; and/or,

      ii. Difficult to observe or sample (e.g. submerged discharge outlets, dangerous discharge location accessibility).

   b. The Discharger shall submit and certify via SMARTS any alternative discharge location or revisions to the alternative discharge locations in the Monitoring Implementation Plan.

4. Representative Sampling Reduction

   a. The Discharger may reduce the number of locations to be sampled in each drainage area (e.g., roofs with multiple downspouts, loading/unloading areas with multiple storm drains) if the industrial

activities, BMPs, and physical characteristics (grade, surface materials, etc.) of the drainage area for each location to be sampled are substantially similar to one another. To qualify for the Representative Sampling Reduction, the Discharger shall provide a Representative Sampling Reduction justification in the Monitoring Implementation Plan section of the SWPPP.

b. The Representative Sampling Reduction justification shall include:

   i. Identification and description of each drainage area and corresponding discharge location(s);

   ii. A description of the industrial activities that occur throughout the drainage area;

   iii. A description of the BMPs implemented in the drainage area;

   iv. A description of the physical characteristics of the drainage area;

   v. A rationale that demonstrates that the industrial activities and physical characteristics of the drainage area(s) are substantially similar; and,

   vi. An identification of the discharge location(s) selected for representative sampling, and rationale demonstrating that the selected location(s) to be sampled are representative of the discharge from the entire drainage area.

c. A Discharger that satisfies the conditions of subsection 4.b.i through v above shall submit and certify via SMARTS the revisions to the Monitoring Implementation Plan that includes the Representative Sampling Reduction justification.

d. Upon submittal of the Representative Sampling Reduction justification, the Discharger may reduce the number of locations to be sampled in accordance with the Representative Sampling Reduction justification. The Regional Water Board may reject the Representative Sampling Reduction justification and/or request additional supporting documentation. In such instances, the Discharger is ineligible for the Representative Sampling Reduction until the Regional Water Board approves the Representative Sampling Reduction justification.

5. Qualified Combined Samples

   a. The Discharger may authorize an analytical laboratory to combine samples of equal volume from as many as four (4) discharge locations if the industrial activities, BMPs, and physical characteristics (grade, surface materials, etc.) within each of the drainage areas are substantially similar to one another.

b. The Qualified Combined Samples justification shall include:

i. Identification and description of each drainage area and corresponding discharge locations;

ii. A description of the BMPs implemented in the drainage area;

iii. A description of the industrial activities that occur throughout the drainage area;

iv. A description of the physical characteristics of the drainage area; and,

v. A rationale that demonstrates that the industrial activities and physical characteristics of the drainage area(s) are substantially similar.

c. A Discharger that satisfies the conditions of subsection 5.b.i through iv above shall submit and certify via SMARTS the revisions to the Monitoring Implementation Plan that includes the Qualified Combined Samples justification.

d. Upon submittal of the Qualified Combined Samples justification revisions in the Monitoring Implementation Plan, the Discharger may authorize the lab to combine samples of equal volume from as many as four (4) drainage areas. The Regional Water Board may reject the Qualified Combined Samples justification and/or request additional supporting documentation. In such instances, the Discharger is ineligible for the Qualified Combined Samples justification until the Regional Water Board approves the Qualified Combined Samples justification.

e. Regional Water Board approval is necessary to combine samples from more than four (4) discharge locations.

6. Sample Collection and Visual Observation Exceptions

a. Sample collection and visual observations are not required under the following conditions:

i. During dangerous weather conditions such as flooding or electrical storms; or,

ii. Outside of scheduled facility operating hours. The Discharger is not precluded from collecting samples or conducting visual observations outside of scheduled facility operating hours.

b. In the event that samples are not collected, or visual observations are not conducted in accordance with Section XI.B.5 due to these exceptions, an explanation shall be included in the Annual Report.

c. Sample collection is not required for drainage areas with no exposure to industrial activities and materials in accordance with the definitions in Section XVII.

7. Sampling Frequency Reduction Certification
   a. Dischargers are eligible to reduce the number of QSEs sampled each reporting year in accordance with the following requirements:

      i. Results from four (4) consecutive QSEs that were sampled (QSEs may be from different reporting years) did not exceed any NALs as defined in Section XII.A; and

      ii. The Discharger is in full compliance with the requirements of this General Permit and has updated, certified and submitted via SMARTS all documents, data, and reports required by this General Permit during the time period in which samples were collected.

   b. The Regional Water Board may notify a Discharger that it may not reduce the number of QSEs sampled each reporting year if the Discharger is subject to an enforcement action.

   c. An eligible Discharger shall certify via SMARTS that it meets the conditions in subsection 7.a above.

   d. Upon Sampling Frequency Reduction certification, the Discharger shall collect and analyze samples from one (1) QSE within the first half of each reporting year (July 1 to December 31), and one (1) QSE within the second half of each reporting year (January 1 to June 30). All other monitoring, sampling, and reporting requirements remain in effect.

   e. Dischargers who participate in a Compliance Group and certify a Sampling Frequency Reduction are only required to collect and analyze storm water samples from one (1) QSE within each reporting year.

   f. A Discharger may reduce sampling per the Sampling Frequency Reduction certification unless notified by the Regional Water Board that: (1) the Sampling Frequency Reduction certification has been rejected or (2) additional supporting documentation must be submitted. In such instances, a Discharger is ineligible for the Sampling Frequency Reduction until the Regional Water Board provides Sampling Frequency Reduction certification approval. Revised Sampling Frequency Reduction certifications shall be certified and submitted via SMARTS by the Discharger.

   g. A Discharger loses its Sampling Frequency Reduction certification if an NAL exceedance occurs (Section XII.A).

D. Facilities Subject to Federal Storm Water Effluent Limitation Guidelines (ELGs)

1. In addition to the other requirements in this General Permit, Dischargers with facilities subject to storm water ELGs in Subchapter N shall:

   a. Collect and analyze samples from QSEs for each regulated pollutant specified in the appropriate category in Subchapter N as specified in Section XI.B;

   b. For Dischargers with facilities subject to 40 Code of Federal Regulations parts 419[17] and 443[18], estimate or calculate the volume of industrial storm water discharges from each drainage area subject to the ELGs and the mass of each regulated pollutant as defined in parts 419 and 443; and,

   c. Ensure that the volume/mass estimates or calculations required in subsection b are completed by a California licensed professional engineer.

2. Dischargers subject to Subchapter N shall submit the information in Section XI.D.1.a through c in their Annual Report.

3. Dischargers with facilities subject to storm water ELGs in Subchapter N are ineligible for the Representative Sampling Reduction in Section XI.C.4.

XII. EXCEEDANCE RESPONSE ACTIONS (ERAs)

A. NALs and NAL Exceedances

The Discharger shall perform sampling, analysis and reporting in accordance with the requirements of this General Permit and shall compare the results to the two types of NAL values in Table 2 to determine whether either type of NAL has been exceeded for each applicable parameter. The two types of potential NAL exceedances are as follows:

1. Annual NAL exceedance: The Discharger shall determine the average concentration for each parameter using the results of all the sampling and analytical results for the entire facility for the reporting year (i.e., all "effluent" data). The Discharger shall compare the average concentration for each parameter to the corresponding annual NAL values in Table 2. For Dischargers using composite sampling or flow-weighted measurements in accordance with standard practices, the average concentrations shall be calculated in accordance with the U.S. EPA's NPDES Storm Water

[17] Part 419 - Petroleum refining point source category
[18] Part 443 - Effluent limitations guidelines for existing sources and standards of performance and pretreatment standards for new sources for the paving and roofing materials (tars and asphalt) point source category

Sampling Guidance Document.[19] An annual NAL exceedance occurs when the average of all the analytical results for a parameter from samples taken within a reporting year exceeds the annual NAL value for that parameter listed in Table 2; and,

2. Instantaneous maximum NAL exceedance: The Discharger shall compare all sampling and analytical results from each distinct sample (individual or combined as authorized by XI.C.5) to the corresponding instantaneous maximum NAL values in Table 2. An instantaneous maximum NAL exceedance occurs when two (2) or more analytical results from samples taken for any single parameter within a reporting year exceed the instantaneous maximum NAL value (for TSS and O&G) or are outside of the instantaneous maximum NAL range for pH.

B. Baseline Status

At the beginning of a Discharger's NOI Coverage, all Dischargers have Baseline status for all parameters.

C. Level 1 Status

A Discharger's Baseline status for any given parameter shall change to Level 1 status if sampling results indicate an NAL exceedance for that same parameter. Level 1 status will commence on July 1 following the reporting year during which the exceedance(s) occurred.[20]

1. Level 1 ERA Evaluation

    a. By October 1 following commencement of Level 1 status for any parameter with sampling results indicating an NAL exceedance, the Discharger shall:

    b. Complete an evaluation, with the assistance of a QISP, of the industrial pollutant sources at the facility that are or may be related to the NAL exceedance(s); and,

    c. Identify in the evaluation the corresponding BMPs in the SWPPP and any additional BMPs and SWPPP revisions necessary to prevent future NAL exceedances and to comply with the requirements of this General Permit. Although the evaluation may focus on the drainage areas where the NAL exceedance(s) occurred, all drainage areas shall be evaluated.

2. Level 1 ERA Report

[19] U.S. EPA. NPDES Storm Water Sampling Guidance Document. <http://www.epa.gov/npdes/pubs/owm0093.pdf >. [as of February 4, 2014]

[20] For all sampling results reported before June 30th of the preceding reporting year. If sample results indicating an NAL exceedance are submitted after June 30th, the Discharger will change status once those results have been reported.

a. Based upon the above evaluation, the Discharger shall, as soon as practicable but no later than January 1 following commencement of Level 1 status :

i. Revise the SWPPP as necessary and implement any additional BMPs identified in the evaluation;

ii. Certify and submit via SMARTS a Level 1 ERA Report prepared by a QISP that includes the following:

1) A summary of the Level 1 ERA Evaluation required in subsection C.1 above; and,

2) A detailed description of the SWPPP revisions and any additional BMPs for each parameter that exceeded an NAL.

iii. Certify and submit via SMARTS the QISP's identification number, name, and contact information (telephone number, e-mail address).

b. A Discharger's Level 1 status for a parameter will return to Baseline status once a Level 1 ERA report has been completed, all identified additional BMPs have been implemented, and results from four (4) consecutive QSEs that were sampled subsequent to BMP implementation indicate no additional NAL exceedances for that parameter.

3. NAL Exceedances Prior to Implementation of Level 1 Status BMPs.

Prior to the implementation of an additional BMP identified in the Level 1 ERA Evaluation or October 1, whichever comes first, sampling results for any parameter(s) being addressed by that additional BMP will not be included in the calculations of annual average or instantaneous NAL exceedances in SMARTS.

D. Level 2 Status

A Discharger's Level 1 status for any given parameter shall change to Level 2 status if sampling results indicate an NAL exceedance for that same parameter while the Discharger is in Level 1. Level 2 status will commence on July 1 following the reporting year during which the NAL exceedance(s) occurred.[21]

1. Level 2 ERA Action Plan

[21] For all sampling results reported before June 30th of the preceding reporting year. If sample results indicating an NAL exceedance are submitted after June 30th, the Discharger will change status upon the date those results have been reported into SMARTS.

a. Dischargers with Level 2 status shall certify and submit via SMARTS a Level 2 ERA Action Plan prepared by a QISP that addresses each new Level 2 NAL exceedance by January 1 following the reporting year during which the NAL exceedance(s) occurred. For each new Level 2 NAL exceedance, the Level 2 Action Plan will identify which of the demonstrations in subsection D.2.a through c the Discharger has selected to perform. A new Level 2 NAL exceedance is any Level 2 NAL exceedance for 1) a new parameter in any drainage area, or 2) the same parameter that is being addressed in an existing Level 2 ERA Action Plan in a different drainage area.

b. The Discharger shall certify and submit via SMARTS the QISP's identification number, name, and contact information (telephone number, e-mail address) if this information has changed since previous certifications.

c. The Level 2 ERA Action Plan shall at a minimum address the drainage areas with corresponding Level 2 NAL exceedances.

d. All elements of the Level 2 ERA Action Plan shall be implemented as soon as practicable and completed no later than 1 year after submitting the Level 2 ERA Action Plan.

e. The Level 2 ERA Action Plan shall include a schedule and a detailed description of the tasks required to complete the Discharger's selected demonstration(s) as described below in Section D.2.a through c.

2. Level 2 ERA Technical Report

On January 1 of the reporting year following the submittal of the Level 2 ERA Action Plan, a Discharger with Level 2 status shall certify and submit a Level 2 ERA Technical Report prepared by a QISP that includes one or more of the following demonstrations:

a. Industrial Activity BMPs Demonstration

This shall include the following requirements, as applicable:

i. Shall include a description of the industrial pollutant sources and corresponding industrial pollutants that are or may be related to the NAL exceedance(s);

ii. Shall include an evaluation of all pollutant sources associated with industrial activity that are or may be related to the NAL exceedance(s);

iii. Where all of the Discharger's implemented BMPs, including additional BMPs identified in the Level 2 ERA Action Plan, achieve

compliance with the effluent limitations of this General Permit and are expected to eliminate future NAL exceedance(s), the Discharger shall provide a description and analysis of all implemented BMPs;

iv. In cases where all of the Discharger's implemented BMPs, including additional BMPs identified in the Level 2 ERA Action Plan, achieve compliance with the effluent limitations of this General Permit but are not expected to eliminate future NAL exceedance(s), the Discharger shall provide, in addition to a description and analysis of all implemented BMPs:

1) An evaluation of any additional BMPs that would reduce or prevent NAL exceedances;

2) Estimated costs of the additional BMPs evaluated; and,

3) An analysis describing the basis for the selection of BMPs implemented in lieu of the additional BMPs evaluated but not implemented.

v. The description and analysis of BMPs required in subsection a.iii above shall specifically address the drainage areas where the NAL exceedance(s) responsible for the Discharger's Level 2 status occurred, although any additional Level 2 ERA Action Plan BMPs may be implemented for all drainage areas; and,

vi. If an alternative design storm standard for treatment control BMPs (in lieu of the design storm standard for treatment control BMPs in Section X.H.6 in this General Permit) will achieve compliance with the effluent limitations of this General Permit, the Discharger shall provide an analysis describing the basis for the selection of the alternative design storm standard.

b. Non-Industrial Pollutant Source Demonstration

This shall include:

i. A statement that the Discharger has determined that the exceedance of the NAL is attributable solely to the presence of non-industrial pollutant sources. (The pollutant may also be present due to industrial activities, in which case the Discharger must demonstrate that the pollutant contribution from the industrial activities by itself does not result in an NAL exceedance.) The sources shall be identified as either run-on from adjacent properties, aerial deposition from man-made sources, or as generated by on-site non-industrial sources;

ii. A statement that the Discharger has identified and evaluated all potential pollutant sources that may have commingled with storm water associated with the Discharger's industrial activity and may be contributing to the NAL exceedance;

iii. A description of any on-site industrial pollutant sources and corresponding industrial pollutants that are contributing to the NAL exceedance;

iv. An assessment of the relative contributions of the pollutant from (1) storm water run-on to the facility from adjacent properties or non-industrial portions of the Discharger's property or from aerial deposition and (2) the storm water associated with the Discharger's industrial activity;

v. A summary of all existing BMPs for that parameter; and,

vi. An evaluation of all on-site/off-site analytical monitoring data demonstrating that the NAL exceedances are caused by pollutants in storm water run-on to the facility from adjacent properties or non-industrial portions of the Discharger's property or from aerial deposition.

c. Natural Background Pollutant Source Demonstration

This shall include:

i. A statement that the Discharger has determined that the NAL exceedance is attributable solely to the presence of the pollutant in the natural background that has not been disturbed by industrial activities. (The pollutant may also be present due to industrial activities, in which case the Discharger must demonstrate that the pollutant contribution from the industrial activities by itself does not result in an NAL exceedance);

ii. A summary of all data previously collected by the Discharger, or other identified data collectors, that describes the levels of natural background pollutants in the storm water discharge;

iii. A summary of any research and published literature that relates the pollutants evaluated at the facility as part of the Natural Background Source Demonstration;

iv. Map showing the reference site location in relation to facility along with available land cover information;

v. Reference site and test site elevation;

vi. Available geology and soil information for reference and test sites;

vii. Photographs showing site vegetation;

viii. Site reconnaissance survey data regarding presence of roads, outfalls, or other human-made structures; and,

ix. Records from relevant state or federal agencies indicating no known mining, forestry, or other human activities upstream of the proposed reference site.

3. Level 2 ERA Technical Report Submittal

a. The Discharger shall certify and submit via SMARTS the Level 2 ERA Technical Report described in Section D.2 above.

b. The State Water Board and Regional Boards (Water Boards) may review the submitted Level 2 ERA Technical Reports. Upon review of a Level 2 ERA Technical Report, the Water Boards may reject the Level 2 ERA Technical Report and direct the Discharger to take further action(s) to comply with this General Permit.

c. Dischargers with Level 2 status who have submitted the Level 2 ERA Technical Report are only required to annually update the Level 2 ERA Technical Report based upon additional NAL exceedances of the same parameter and same drainage area (if the original Level 2 ERA Technical Report contained an Industrial Activity BMP Demonstration and the implemented BMPs were expected to eliminate future NAL exceedances in accordance with Section XII.D.2.a.ii), facility operational changes, pollutant source(s) changes, and/or information that becomes available via compliance activities (monthly visual observations, sampling results, annual evaluation, etc.). The Level 2 ERA Technical Report shall be prepared by a QISP and be certified and submitted via SMARTS by the Discharger with each Annual Report. If there are no changes prompting an update of the Level 2 ERA Technical Report, as specified above, the Discharger will provide this certification in the Annual Report that there have been no changes warranting re-submittal of the Level 2 ERA Technical Report.

d. Dischargers are not precluded from submitting a Level 2 ERA Action Plan or ERA Technical Report prior to entering Level 2 status if information is available to adequately prepare the report and perform the demonstrations described above. A Discharger who chooses to submit a Level 2 ERA Action Plan or ERA Technical Report prior to entering Level 2 status will automatically be placed in Level 2 in accordance to the Level 2 ERA schedule.

4. Eligibility for Returning to Baseline Status

a. Dischargers with Level 2 status who submit an Industrial Activity BMPs Demonstration in accordance with subsection 2.a.i through iii above and have implemented BMPs to prevent future NAL exceedance(s) for the Level 2 parameter(s) shall return to baseline status for that parameter, if results from four (4) subsequent consecutive QSEs sampled indicate no additional NAL exceedance(s) for that parameter(s). If future NAL exceedances occur for the same parameter(s), the Discharger's Baseline status will return to Level 2 status on July 1 in the subsequent reporting year during which the NAL exceedance(s) occurred. These Dischargers shall update the Level 2 ERA Technical Report as required above in Section D.3.c.

b. Dischargers are ineligible to return to baseline status if they submit any of the following:

   i. A industrial activity BMP demonstration in accordance with subsection 2.a.iv above;

   ii. An non-industrial pollutant source demonstration; or,

   iii. A natural background pollutant source demonstration.

5. Level 2 ERA Implementation Extension

   a. Dischargers that need additional time to submit the Level 2 ERA Technical Report shall be automatically granted a single time extension for up to six (6) months upon submitting the following items into SMARTS, as applicable:

      i. Reasons for the time extension;

      ii. A revised Level 2 ERA Action Plan including a schedule and a detailed description of the necessary tasks still to be performed to complete the Level 2 ERA Technical Report; and

      iii. A description of any additional temporary BMPs that will be implemented while permanent BMPs are being constructed.

   b. The Regional Water Boards will review Level 2 ERA Implementation Extensions for completeness and adequacy. Requests for extensions that total more than six (6) months are not granted unless approved in writing by the Water Boards. The Water Boards may (1) reject or revise the time allowed to complete Level 2 ERA Implementation Extensions, (2) identify additional tasks necessary to complete the Level 2 ERA Technical Report, and/or (3) require the Discharger to implement additional temporary BMPs.

XIII. INACTIVE MINING OPERATION CERTIFICATION

A. Inactive mining operations are defined in Part 3 of Attachment A of this General Permit. The Discharger may, in lieu of complying with the General Permit requirements described in subsection B below, certify and submit via SMARTS that their inactive mining operation meets the following conditions:

1. The Discharger has determined and justified in the SWPPP that it is impracticable to implement the monitoring requirements in this General Permit for the inactive mining operation;

2. A SWPPP has been signed (wet signature and license number) by a California licensed professional engineer and is being implemented in accordance with the requirements of this General Permit; and,

3. The facility is in compliance with this General Permit, except as provided in subsection B below.

B. The Discharger who has certified and submitted that they meet the conditions in subsection A above, are not subject to the following General Permit requirements:

1. Monitoring Implementation Plan in Section X.I;

2. Monitoring Requirements in Section XI;

3. Exceedance Response Actions (ERAs) in Section XII; and,

4. Annual Report Requirements in Section XVI.

C. Inactive Mining Operation Certification Submittal Schedule

1. The Discharger shall certify and submit via SMARTS NOI coverage PRDs listed in Section II.B.1 and meet the conditions in subsection A above.

2. The Discharger shall annually inspect the inactive mining site and certify via SMARTS no later than July 15th of each reporting year, that their inactive mining operation continues to meet the conditions in subsection A above.

3. The Discharger shall have a California licensed professional engineer review and update the SWPPP if there are changes to their inactive mining operation or additional BMPs are needed to comply with this General Permit. Any significant updates to the SWPPP shall be signed (wet signature and license number) by a California license professional engineer.

4. The Discharger shall certify and submit via SMARTS any significantly revised SWPPP within 30 days of the revision(s).

XIV. COMPLIANCE GROUPS AND COMPLIANCE GROUP LEADERS

A. Compliance Group Qualification Requirements

1. Any group of Dischargers of the same industry type or any QISP representing Dischargers of the same industry type may form a Compliance Group. A Compliance Group shall consist of Dischargers that operate facilities with similar types of industrial activities, pollutant sources, and pollutant characteristics (e.g., scrap metals recyclers would join a different group than paper recyclers, truck vehicle maintenance facilities would join a different group than airplane vehicle maintenance facilities, etc.). A Discharger participating in a Compliance Group is termed a Compliance Group Participant. Participation in a Compliance Group is not required. Compliance Groups may be formed at any time.

2. Each Compliance Group shall have a Compliance Group Leader.

3. To establish a Compliance Group, the Compliance Group Leader shall register as a Compliance Group Leader via SMARTS. The registration shall include documentation demonstrating compliance with the Compliance Group qualification requirements above and a list of the Compliance Group Participants.

4. Each Compliance Group Participant shall register as a member of an established Compliance Group via SMARTS.

5. The Executive Director of the State Water Board may review Compliance Group registrations and/or activities for compliance with the requirements of this General Permit. The Executive Director may reject the Compliance Group, the Compliance Group Leader, or individual Compliance Group Participants within the Compliance Group.

B. Compliance Group Leader Responsibilities

1. A Compliance Group Leader must complete a State Water Board sponsored or approved training program for Compliance Group Leaders.

2. The Compliance Group Leader shall assist Compliance Group Participants with all compliance activities required by this General Permit.

3. A Compliance Group Leader shall prepare a Consolidated Level 1 ERA Report for all Compliance Group Participants with Level 1 status for the same parameter. Compliance Group Participants who certify and submit these Consolidated Level 1 ERA Reports are subject to the same provisions as individual Dischargers with Level 1 status, as described in Section XII.C. A Consolidated Level 1 ERA Report is equivalent to a Level 1 ERA Report.

4. The Compliance Group Leader shall update the Consolidated Level 1 ERA Report as needed to address additional Compliance Group Participants with ERA Level 1 status.

5. A Compliance Group Leader shall prepare a Level 2 ERA Action Plan specific to each Compliance Group Participant with Level 2 status. Compliance Group Participants who certify and submit these Level 2 ERA Action Plans are subject to the same provisions as individual Dischargers with Level 2 status, as described in Section XII.D.

6. A Compliance Group Leader shall prepare a Level 2 ERA Technical Report specific to each Compliance Group Participant with Level 2 status. Compliance Group Participants who certify and submit these Level 2 ERA Technical Reports are subject to the same provisions as individual Dischargers with Level 2 status, as described in Section XII.D.

7. The Compliance Group Leader shall inspect all the facilities of the Compliance Group Participants that have entered Level 2 status prior to preparing the individual Level 2 ERA Technical Report.

8. The Compliance Group Leader shall revise the Consolidated Level 1 ERA Report, individual Level 2 ERA Action Plans, or individual Level 2 Technical Reports in accordance with any comments received from the Water Boards.

9. The Compliance Group Leader shall inspect all the facilities of the Compliance Group Participants at a minimum of once per reporting year (July 1 to June 30).

C. Compliance Group Participant Responsibilities

1. Each Compliance Group Participant is responsible for permit compliance for the Compliance Group Participant's facility and for ensuring that the Compliance Group Leader's activities related to the Compliance Group Participant's facility comply with this General Permit.

2. Compliance Group Participants with Level 1 status shall certify and submit via SMARTS the Consolidated Level 1 ERA Report. The Compliance Group Participants shall certify that they have reviewed the Consolidated Level 1 ERA Report and have implemented any required additional BMPs. Alternatively, the Compliance Group Participant may submit an individual Level 1 ERA Report in accordance with the provisions in Section XII.C.2.

3. Compliance Group Participants with Level 2 status shall certify and submit via SMARTS their individual Level 2 ERA Action Plan and Technical Report prepared by their Compliance Group Leader. Each Compliance Group Participant shall certify that they have reviewed the Level 2 ERA Action Plan and Technical Report and will implement any required additional BMPs.

4. Compliance Group Participants can at any time discontinue their participation in their associated Compliance Group via SMARTS. Upon discontinuation, the former Compliance Group Participant is immediately subject to the sampling and analysis requirements described in Section XI.B.2.

XV. ANNUAL COMPREHENSIVE FACILITY COMPLIANCE EVALUATION (ANNUAL EVALUATION)

The Discharger shall conduct one Annual Evaluation for each reporting year (July 1 to June 30). If the Discharger conducts an Annual Evaluation fewer than eight (8) months, or more than sixteen (16) months, after it conducts the previous Annual Evaluation, it shall document the justification for doing so. The Discharger shall revise the SWPPP, as appropriate, and implement the revisions within 90 days of the Annual Evaluation. At a minimum, Annual Evaluations shall consist of:

A. A review of all sampling, visual observation, and inspection records conducted during the previous reporting year;
