Project Description: (please use a separate page if necessary)

The proposed project includes several key actions to improve the Meadows Cross Slough right bank levee (TMXS-R). Geotechnical exploration borings will be conducted to assess the structure and composition of the levee, while bathymetric surveys will collect underwater topographic data 100 feet waterward on either side of the levee. A temporary 10-inch drainage pipeline will be replaced with a permanent 12-inch pipeline constructed within the levee embankment, and two abandoned, corroded steel pipelines will be removed. Additionally, an existing 5 HP electric pump will be upgraded to a 5 or 7.5 HP pump, and aggregate base will be installed along the levee crown. Tree trimming will occur as necessary to facilitate access for equipment during geotechnical borings and other ground-disturbing activities.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".

☐ Air Resources Board	☒ Office of Historic Preservation
☐ Boating & Waterways, Department of	☐ Office of Public School Construction
☐ California Emergency Management Agency	☒ Parks & Recreation, Department of
☐ California Highway Patrol	☐ Pesticide Regulation, Department of
