Facility ID: 1NSR330
Staff Initials: JLB

CPS-SLIC:
Name: GEARY, W.E. & T.H., ET AL
Address: 540 & 552 RUSSELL AVENUE
City,State,Zip: SANTA ROSA, CA
Region: STATE
Facility Status: **Completed - Case Closed**
Status Date: 06/01/2018
Global Id: T0609793422
Lead Agency: NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number: Not reported
Latitude: 38.4688659134234
Longitude: -122.725310325623
Case Type: Cleanup Program Site
Case Worker: ZZZ
Local Agency: SANTA ROSA, CITY OF
RB Case Number: 1NSR330
File Location: Regional Board
Potential Media Affected: Sediments, Soil
Potential Contaminants of Concern: Lead, Zinc, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
EPA Region: 9
Coordinate Source: Google Map Move
Cuf Case: Not reported
Quantity Released Gallons: Not reported
Begin Date: 10/28/1997
Leak Reported Date: 10/28/1997
How Discovered: Other Means
How Discovered Description: Not reported
Discharge Source: Not reported
Discharge Cause: Not reported

GEARY, W.E. & T.H., ET AL (Continued) **S105051062**

Stop Method:	Not reported
Stop Description:	Not reported
No Further Action Date:	06/01/2018
CA Water Watershed Name:	Russian River - Middle Russian River - Santa Rosa (114.22)
Dwr Groundwater Subbasin Name:	Santa Rosa Valley - Santa Rosa Plain (1-055.01)
Disadvantaged Community:	Disadvantaged Community
CA Enviroscreen 3 Score:	51-55%
CA Enviroscreen 4 Score:	45-50%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	NORTH COAST RWQCB (REGION 1)
Site History:	The County of Sonoma has prepared soil and groundwater management plans to manage residual petroleum contamination in soil and groundwater during future site development activities. The management plans have been submitted to the County of Sonoma Permit and Resource Management Department and to the City of Santa Rosa Fire Department to be implemented during future excavation activities at the site. The continuing investigation of volatile organic compounds in groundwater beneath the site will be managed under the Regional Water Board investigation case identified as the Sonoma County Administration Complex site, Case Number 1NSR357. Therefore, closure of the Geary, W.E. & T.H. et. al. site investigation is a no further action determination for petroleum discharges to soil. This case closure is not a no further action determination for the VOCs in groundwater at this site.

Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Comments: Contract to operate the SVE system at the site extended through December 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 11/07/2002
Comments: Preliminary Assessment was conducted under Water Board oversight and the results documented a release of PCE and related chemicals to soil and groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/04/2008
Comments: CPT soil probes were conducted at four off-site locations. PCE, TCE, and cis-1,2-DCE were detected in the shallow water bearing zone.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 09/17/2008
Comments: NCRWQCB requested DTSC to take lead at this site since the issues related to health exposure need to be addressed at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/27/2007
Comments: Ground water samples collected from monitoring wells in the shallow water bearing interval had detections of PCE, TCE, cis-1,2-DCE, vinyl chloride, and MTBE. PCE was reported in the surface water samples collected from Poppy Creek.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/13/2005
Comments: PCE was detected in ground water samples collected in the vicinity of the site at concentrations ranging from 89 ug/l to 13,000 ug/l. Detections of TCE ranged from 23 ug/l to 110 ug/l. Cis-1,2-DCE was reported at levels ranging from 77 ug/l to 270 ug/l. MTBE detections ranged from 25 ug/l to 100 ug/l. MTBE impacts from the vicinity of the Unocal site appear to migrate in a westerly direction beneath the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 11/30/2006
Comments: PCE, TCE, cis-1,2-DCE, trans-1,2-DCE, and MTBE werer detected in the shallow groundwater. Deeper groundwater zones do not appear to be affected by VOCs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

PETER PAN CLEANERS (Continued) **1000211154**

Completed Document Type: Remedial Investigation Report
Completed Date: 09/17/2008
Comments: Soil vapor sampling using a mobile lab conducted under North Coast Regional Water Quality Control Board (NCRWQCB) oversight. Sampling results indicated very high VOC concentrations in soil gas at the Site and downgradient of the Site. NCRWQCB requested DTSC to take lead at this site since the issues related to health exposure need to be addressed at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

PETER PAN CLEANERS (Continued) **1000211154**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 11/07/2002
Comments: Preliminary Assessment was conducted under Water Board oversight and the results documented a release of PCE and related chemicals to soil and groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/04/2008
Comments: CPT soil probes were conducted at four off-site locations. PCE, TCE, and cis-1,2-DCE were detected in the shallow water bearing zone.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received
Completed Date: 09/17/2008
Comments: NCRWQCB requested DTSC to take lead at this site since the issues related to health exposure need to be addressed at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/27/2007
Comments: Ground water samples collected from monitoring wells in the shallow water bearing interval had detections of PCE, TCE, cis-1,2-DCE, vinyl chloride, and MTBE. PCE was reported in the surface water samples collected from Poppy Creek.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 04/13/2005
Comments: PCE was detected in ground water samples collected in the vicinity of the site at concentrations ranging from 89 ug/l to 13,000 ug/l. Detections of TCE ranged from 23 ug/l to 110 ug/l. Cis-1,2-DCE was reported at levels ranging from 77 ug/l to 270 ug/l. MTBE detections ranged from 25 ug/l to 100 ug/l. MTBE impacts from the vicinity of the Unocal site appear to migrate in a westerly direction beneath the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 11/30/2006
Comments: PCE, TCE, cis-1,2-DCE, trans-1,2-DCE, and MTBE werer detected in the shallow groundwater. Deeper groundwater zones do not appear to be affected by VOCs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

RWQCB Region:	NORTH COAST RWQCB (REGION 1)
Site History:	This site was operated as a dry cleaners since 1966. PCE , a dry cleaning solvent, has been detected in soil and groundwater at the site. Groundwater is contaminated with PCE, TCE, cis-1,2-DCE and vinyl chloride. Subsurface investigations indicate that the contaminant plume extends more than 1,000 feet from the site to the west and northwest. Groundwater contaminants have also been detected in Poppy Creek adjacent to Steele Lane Elementary School. Groundwater remediation efforts have included biological treatment injections conducted by the DTSC in 2011 and 2018. DTSC took over as lead agency of the site in September 2008 due to potential human health concerns from indoor air intrusion. An indoor air investigation has been conducted at the site, in the residential and commercial neighborhood surrounding the site and at Steele Lane Elementary School. Additional information about this site can be found on the DTSC Envirostor website. The Regional Water Board took on over as lead regulatory agency in January 2021 under SCAP program funding. Additional passive soil vapor and groundwater investigations have been conducted since that time. In addition, the dry cleaner vacated the property and the site building was demolished in December 2023. A source soil removal excavation was conducted at the site in November 2024. Additional groundwater biological treatment injections have been proposed.

Description:	The site is an active dry cleaner which has operated since 1966. The current dry cleaner use petroleum based dry cleaning chemicals, but from 1966 to 2002, tetrachloroethylene (PCE) was used at the site. The presence of tetrachloroethylene, or PCE, in groundwater was discovered in 2002 when a private water supply well on Rowe Drive in Santa Rosa was tested for VOCs. Subsequent historical and physical investigative work identified Peter Pan Cleaners as the source of the PCE contamination. The North Coast Regional Water Quality Control Board (NCRWQCB) began overseeing the investigation of the site in 2002. NCRWQCB requested DTSC to take the lead at this site since the issues related to health exposure need to be addressed at the site due to high soil gas concentrations detected at the vicinity of the site. ERRG, DTSC's contractor, implemented the Removal Action at the Site in summer 2018. Lactic acid and other fatty acids (a propietary blend called 3DMe from Regenesis) was injected into 56 points at the Peter Pan Cleaners building, along the alley behind the building, and Rowe Drive. The 3DMe will promote the breakdown of the chlorinated volatile organic compounds present in the groundwater. The groundwater, soil vapor, and indoor air in the building has been sampled periodically from 2018 to 2019 to evaluate the efficiency of the selected remedy. The project has been transferred to the North Coast Water Resources Control Board as their oversight is required for them to access SCAP funding. updated 8/5/2020, NY

Site History:	The site is an active fueling station located in an area of mixed commercial and residential development. The site layout includes four underground storage tanks (USTs), six fuel dispensers, and a station building. Between March and May 1995, site remodeling included removal and replacement of the product piping and fuel dispensers and the removal of an abandoned waste oil tank, which was discovered during excavation of a utility trench. Soil samples collected in the vicinity of the former gasoline dispensers contained total petroleum hydrocarbons as gasoline (TPHg) at concentrations up to 750 milligrams per kilogram (mg/kg), total petroleum hydrocarbons as diesel (TPHd) at concentrations up to 7,800 mg/kg, and benzene concentrations up to 1.6 mg/kg. Hydrocarbons detected in the vicinity of the former diesel dispenser were over-excavated to the extent feasible based on canopy footing locations. Between April 1998 and Jine 2002, thirteen groundwater monitoring wells and three CPT borings were installed at the site. In an assessment of site conditions conducted in July 2013, Reginal Water Board staff found the site to be eligible for case closure under the State's Low Threat UST Case Closure Policy.

CA Water Watershed Name:	Russian River - Middle Russian River - Santa Rosa (114.22)

SAFEWAY FUEL CENTER #1576 (Continued) **S100179201**

Dwr Groundwater Subbasin Name: Santa Rosa Valley - Santa Rosa Plain (1-055.01)
Disadvantaged Community: Not reported
CA Enviroscreen 3 Score: 11-15%
CA Enviroscreen 4 Score: 20-25%
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: NORTH COAST RWQCB (REGION 1)
Site History: This site is an active service station. Gasoline and fuel oxygenates, MTBE and TBA, have been detected in groundwater both onsite and offsite to the west. The MTBE groundwater plume is commingled with the Peter Pan Dry Cleaner's (Case No-1NSR390) groundwater plume west of Mendocino Avenue. A domestic irrigation well on Rowe Drive is impacted by the commingled plume and contamination is reported in surface water of Poppy Creek.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The Used Oil Recycling System (UORS) is managed by the California Integrated Waste Management Board (CIWMB). The CIWMB helps communities establish and promote convenient collection opportunities for used oil and used oil filters.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

FINDS:
Registry ID: 110071740478

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
Registry ID: 110001192352

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D030
Waste Description:	2,4-Dinitrotoluene
Waste Code:	D031
Waste Description:	Heptachlor (And Its Epoxide)
Waste Code:	D032
Waste Description:	Hexachlorobenzene
Waste Code:	D033
Waste Description:	Hexachlorobutadiene
Waste Code:	D034
Waste Description:	Hexachloroethane
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D036
Waste Description:	Nitrobenzene
Waste Code:	D037
Waste Description:	Pentachlorophenol

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007
Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: F010
Waste Description: Quenching Bath Residues From Oil Baths From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F011
Waste Description: Spent Cyanide Solutions From Slat Bath Pot Cleaning From Metal Heat Treating Operations.

Waste Code: F012
Waste Description: Quenching Wastewater Treatment Sludges From Metal Heat Treating Operations In Which Cyanides Are Used In The Process.

Waste Code: F019
Waste Description: Wastewater Treatment Sludges From The Chemical Conversion Coating Of Aluminum, Except From Zirconium Phosphating In Aluminum Can Washing When Such Phosphating Is An Exclusive Conversion Coating Process.

Waste Code: F020
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- Or Tetrachlorophenol Or Of Intermediates Used To Produce Their Pesticide Derivatives. (This Listing Does Not Include Wastes From The Production Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: F021
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Pentachlorophenol, Or Of Intermediates Used To Produce Derivatives.

Waste Code: F022
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzenes Under Alkaline Conditions.

Waste Code: F023
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tri- And Tetrachlorophenols. (This Listing Does Not Include Wastes From Equipment Used Only For The Production Or Use Of Hexachlorophene From Highly Purified 2,4,5-Trichlorophenol.)

Waste Code: F024
Waste Description: Process Wastes Including, But Not Limited To, Distillation Residues, Heavy Ends, Tars, And Reactor Clean-Out Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution. (This Listing Does Not Include Wastewaters, Wastewater Treatment Sludge, Spent Catalysts, And Wastes Listed In Sections 261.31. Or 261.32)

Waste Code: F025
Waste Description: Condensed Light Ends, Spent Filters And Filter Aids, And Spent Desiccant Wastes From The Production Of Certain Chlorinated Aliphatic Hydrocarbons By Free Radical Catalyzed Processes. These Chlorinated Aliphatic Hydrocarbons Are Those Having Carbon Chain Lengths Ranging From One To, And Including Five, With Varying Amounts And Positions Of Chlorine Substitution.

Waste Code: F026
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Of Materials On Equipment Previously Used For The Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Tetra-, Penta-, Or Hexachlorobenzene Under Alkaline Conditions.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: F028
Waste Description: Residues Resulting From The Incineration Or Thermal Treatment Of Soil Contaminated With Epa Hazardous Waste Nos. F020, F021, F022, F023, F026, And F027.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: F032
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Currently Use, Or Have Previously Used, Chlorophenolic Formulations [Except Potentially Cross-Contaminated Wastes That Have Had The F032 Waste Code Deleted In Accordance With Section 261.35 (I.E., The Newly Promulgated Equipment Cleaning Or Replacement Standards), And Where The Generator Does Not Resume Or Initiate Use Of Chlorophenolic Formulations]. (This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.)

Waste Code: F034
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Creosote Formulations. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F035
Waste Description: Wastewaters, Process Residuals, Preservative Drippage, And Spent Formulations From Wood Preserving Processes Generated At Plants That Use Inorganic Preservatives Containing Arsenic Or Chromium. This Listing Does Not Include K001 Bottom Sediment Sludge From The Treatment Of Wastewater From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Waste Code: F038
Waste Description: Petroleum Refinery Secondary (Emulsified) Oil/Water/Solids Separation Sludge - Any Sludge And/Or Float Generated From The Physical And/Or Chemical Separation Of Oil/Water/Solids In Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Wastes Include, But Are Not Limited To, All Sludges And Floats Generated In Induced Air Flotation (Iaf) Units, Tanks And Impoundments, And All Sludges Generated In Daf Units. Sludges Generated In Stormwater Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And F037, K048, And K051 Wastes Are Exempted From This Listing.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: F039
Waste Description: Leachate Resulting From The Treatment, Storage, Or Disposal Of Wastes Classified By More Than One Waste Code Under Subpart D, Or From A Mixture Of Wastes Classified Under Subparts C And D Of This Part. (Leachate Resulting From The Management Of One Or More Of The Following Epa Hazardous Wastes And No Other Hazardous Wastes Retains Its Hazardous Waste Code(S): F020, F021, F022, F023, F026, F027, And/Or F028.)

Waste Code: K001
Waste Description: Bottom Sediment Sludge From The Treatment Of Wastewaters From Wood Preserving Processes That Use Creosote And/Or Pentachlorophenol.

Waste Code: K002
Waste Description: Wastewater Treatment Sludge From The Production Of Chrome Yellow And Orange Pigments.

Waste Code: K003
Waste Description: Wastewater Treatment Sludge From The Production Of Molybdate Orange Pigments.

Waste Code: K004
Waste Description: Wastewater Treatment Sludge From The Production Of Zinc Yellow Pigments.

Waste Code: K005
Waste Description: Wastewater Treatment Sludge From The Production Of Chrome Green Pigments.

Waste Code: K006
Waste Description: Wastewater Treatment Sludge From The Production Of Chrome Oxide Green Pigments (Anhydrous And Hydrated).

Waste Code: K007
Waste Description: Wastewater Treatment Sludge From The Production Of Iron Blue Pigments.

Waste Code: K008
Waste Description: Oven Residue From The Production Of Chrome Oxide Green Pigments.

Waste Code: K009
Waste Description: Distillation Bottoms From The Production Of Acetaldehyde From Ethylene.

Waste Code: K010
Waste Description: Distillation Side Cuts From The Production Of Acetaldehyde From Ethylene.

Waste Code: K011
Waste Description: Bottom Stream From The Wastewater Stripper In The Production Of Acrylonitrile.

Waste Code: K013
Waste Description: Bottom Stream From The Acetonitrile Column In The Production Of Acrylonitrile.

Waste Code: K014
Waste Description: Bottoms From The Acetonitrile Purification Column In The Production Of

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Acrylonitrile.

Waste Code: K015
Waste Description: Still Bottoms From The Distillation Of Benzyl Chloride.

Waste Code: K016
Waste Description: Heavy Ends Or Distillation Residues From The Production Of Carbon Tetrachloride.

Waste Code: K017
Waste Description: Heavy Ends (Still Bottoms) From The Purification Column In The Production Of Epichlorohydrin.

Waste Code: K018
Waste Description: Heavy Ends From The Fractionation Column In Ethyl Chloride Production.

Waste Code: K019
Waste Description: Heavy Ends From The Distillation Of Ethylene Dichloride In Ethylene Dichloride Production.

Waste Code: K020
Waste Description: Heavy Ends From The Distillation Of Vinyl Chloride In Vinyl Chloride Monomer Production.

Waste Code: K021
Waste Description: Aqueous Spent Antimony Catalyst Waste From Fluoromethane Production.

Waste Code: K022
Waste Description: Distillation Bottom Tars From The Production Of Phenol/Acetone From Cumene.

Waste Code: K023
Waste Description: Distillation Light Ends From The Production Of Phthalic Anhydride From Naphthalene.

Waste Code: K024
Waste Description: Distillation Bottoms From The Production Of Phthalic Anhydride From Naphthalene.

Waste Code: K025
Waste Description: Distillation Bottoms From The Production Of Nitrobenzene By The Nitration Of Benzene.

Waste Code: K026
Waste Description: Stripping Still Tails From The Production Of Methyl Ethyl Pyridines.

Waste Code: K027
Waste Description: Centrifuge And Distillation Residues From Toluene Diisocyanate Production.

Waste Code: K028
Waste Description: Spent Catalyst From The Hydrochlorinator Reactor In The Production Of 1,1,1-Trichloroethane.

Waste Code: K029
Waste Description: Waste From The Product Steam Stripper In The Production Of 1,1,1-Trichloroethane.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code:	K030
Waste Description:	Column Bottoms Or Heavy Ends From The Combined Production Of Trichloroethylene And Perchloroethylene.
Waste Code:	K031
Waste Description:	By-Product Salts Generated In The Production Of Msma And Cacodylic Acid.
Waste Code:	K032
Waste Description:	Wastewater Treatment Sludge From The Production Of Chlordane.
Waste Code:	K033
Waste Description:	Wastewater And Scrub Water From The Chlorination Of Cyclopentadiene In The Production Of Chlordane.
Waste Code:	K034
Waste Description:	Filter Solids From The Filtration Of Hexachlorocyclopentadiene In The Production Of Chlordane.
Waste Code:	K035
Waste Description:	Wastewater Treatment Sludges Generated In The Production Of Creosote.
Waste Code:	K036
Waste Description:	Still Bottoms From Toluene Reclamation Distillation In The Production Of Disulfoton.
Waste Code:	K037
Waste Description:	Wastewater Treatment Sludges From The Production Of Disulfoton.
Waste Code:	K038
Waste Description:	Wastewater From The Washing And Stripping Of Phorate Production.
Waste Code:	K039
Waste Description:	Filter Cake From The Filtration Of Diethylphosphorodithioic Acid In The Production Of Phorate.
Waste Code:	K040
Waste Description:	Wastewater Treatment Sludge From The Production Of Phorate.
Waste Code:	K041
Waste Description:	Wastewater Treatment Sludge From The Production Of Toxaphene.
Waste Code:	K042
Waste Description:	Heavy Ends Or Distillation Residues From The Distillation Of Tetrachlorobenzene In The Production Of 2,4,5-T.
Waste Code:	K043
Waste Description:	2,6-Dichlorophenol Waste From The Production Of 2,4-D.
Waste Code:	K044
Waste Description:	Wastewater Treatment Sludges From The Manufacturing And Processing Of Explosives.
Waste Code:	K045
Waste Description:	Spent Carbon From The Treatment Of Wastewater Containing Explosives.
Waste Code:	K046

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: Wastewater Treatment Sludges From The Manufacturing, Formulation, And Loading Of Lead-Based Initiating Compounds.

Waste Code: K047
Waste Description: Pink/Red Water From Tnt Operations.

Waste Code: K048
Waste Description: Dissolved Air Flotation (Daf) Float From The Petroleum Refining Industry.

Waste Code: K049
Waste Description: Slop Oil Emulsion Solids From The Petroleum Refining Industry.

Waste Code: K050
Waste Description: Heat Exchanger Bundle Cleaning Sludge From The Petroleum Refining Industry.

Waste Code: K051
Waste Description: Api Separator Sludge From The Petroleum Refining Industry.

Waste Code: K052
Waste Description: Tank Bottoms (Leaded) From The Petroleum Refining Industry.

Waste Code: K060
Waste Description: Ammonia Still Lime Sludge From Coking Operations.

Waste Code: K061
Waste Description: Emission Control Dust/Sludge From The Primary Production Of Steel In Electric Furnaces.

Waste Code: K062
Waste Description: Spent Pickle Liquor From Steel Finishing Operations Of Plants That Produce Iron Or Steel.

Waste Code: K069
Waste Description: Emission Control Dust/Sludge From Secondary Lead Smelting.

Waste Code: K071
Waste Description: Brine Purification Muds From The Mercury Cell Process In Chlorine Production, In Which Separately Prepurified Brine Is Not Used.

Waste Code: K073
Waste Description: Chlorinated Hydrocarbon Waste From The Purification Step Of The Diaphragm Cell Process Using Graphite Anodes In Chlorine Production.

Waste Code: K083
Waste Description: Distillation Bottoms From Aniline Production.

Waste Code: K084
Waste Description: Wastewater Treatment Sludges Generated During The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.

Waste Code: K085
Waste Description: Distillation Or Fractionation Column Bottoms From The Production Of Chlorobenzenes.

Waste Code: K086

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: Solvent Washes And Sludges, Caustic Washes And Sludges, Or Water Washes And Sludges From Cleaning Tubs And Equipment Used In The Formulation Of Ink From Pigments, Driers, Soaps, And Stabilizers Containing Chromium And Lead.

Waste Code: K087
Waste Description: Decanter Tank Tar Sludge From Coking Operations.

Waste Code: K088
Waste Description: Spent Potliners From Primary Aluminum Reduction.

Waste Code: K093
Waste Description: Distillation Light Ends From The Production Of Phthalic Anhydride From Ortho-Xylene.

Waste Code: K094
Waste Description: Distillation Bottoms From The Production Of Phthalic Anhydride From Ortho-Xylene.

Waste Code: K095
Waste Description: Distillation Bottoms From The Production Of 1,1,1-Trichloroethane.

Waste Code: K096
Waste Description: Heavy Ends From The Heavy Ends Column From The Production Of 1,1,1-Trichloroethane.

Waste Code: K097
Waste Description: Vacuum Stripper Discharge From The Chlordane Chlorinator In The Production Of Chlordane.

Waste Code: K098
Waste Description: Untreated Process Wastewater From The Production Of Toxaphene.

Waste Code: K099
Waste Description: Untreated Wastewater From The Production Of 2,4-D.

Waste Code: K100
Waste Description: Waste Leaching Solution From Acid Leaching Of Emission Control Dust/Sludge From Secondary Lead Smelting.

Waste Code: K101
Waste Description: Distillation Tar Residues From The Distillation Of Aniline-Based Compounds In The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.

Waste Code: K102
Waste Description: Residue From The Use Of Activated Carbon For Decolorization In The Production Of Veterinary Pharmaceuticals From Arsenic Or Organo-Arsenic Compounds.

Waste Code: K103
Waste Description: Process Residues From Aniline Extraction From The Production Of Aniline.

Waste Code: K104
Waste Description: Combined Wastewaters Generated From Nitrobenzene/Aniline Production.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: K105
Waste Description: Separated Aqueous Stream From The Reactor Product Washing Step In The Production Of Chlorobenzenes.

Waste Code: K106
Waste Description: Wastewater Treatment Sludge From The Mercury Cell Process In Chlorine Production.

Waste Code: K107
Waste Description: Column Bottoms From Product Separation From The Production Of 1,1-Dimethylhydrazine (Udmh) From Carboxylic Acid Hydrazides.

Waste Code: K108
Waste Description: Condensed Column Overheads From Product Separation And Condensed Reactor Vent Gases From The Production Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

Waste Code: K109
Waste Description: Spent Filter Cartridges From Product Purification From The Product Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

Waste Code: K110
Waste Description: Condensed Column Overheads From Intermediate Separation From The Production Of 1,1-Dimethylhydrazine From Carboxylic Acid Hydrazides.

Waste Code: K111
Waste Description: Product Washwaters From The Production Of Dinitrotoluene Via Nitration Of Toluene.

Waste Code: K112
Waste Description: Reaction By-Product Water From The Drying Column In The Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K113
Waste Description: Condensed Liquid Light Ends From Purification Of Toluenediamine In Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K114
Waste Description: Vicinals From The Purification Of Toluenediamine In Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K115
Waste Description: Heavy Ends From Purification Of Toluenediamine In The Production Of Toluenediamine Via Hydrogenation Of Dinitrotoluene.

Waste Code: K116
Waste Description: Organic Condensate From The Solvent Recovery Column In The Production Of Toluene Diisocyanate Via Phosgenation Of Toluenediamine.

Waste Code: K117
Waste Description: Wastewater From The Reactor Vent Gas Scrubber In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

Waste Code: K118
Waste Description: Spent Adsorbent Solids From Purification Of Ethylene Dibromide In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: K123
Waste Description: Process Wastewater (Including Supernates, Filtrates, And Washwaters) From The Production Of Ethylenebisdithiocarbamic Acid And Its Salts.

Waste Code: K124
Waste Description: Reactor Vent Scrubber Water From The Production Of Ethylenebisdithiocarbamic Acid And Its Salts.

Waste Code: K125
Waste Description: Filtration, Evaporation, And Centrifugation Solids From The Production Of Ethylenebisdithiocarbamic Acid And Its Salts.

Waste Code: K126
Waste Description: Baghouse Dust And Floor Sweepings In Milling And Packaging Operations From Production Or Formulation Of Ethylenebisdithiocarbamic Acid And Its Salts.

Waste Code: K131
Waste Description: Wastewater From The Reactor And Spent Sulfuric Acid From The Acid Dryer From The Production Of Methyl Bromide.

Waste Code: K132
Waste Description: Spent Absorbent And Wastewater Separator Solids From The Production Of Methyl Bromide.

Waste Code: K136
Waste Description: Still Bottoms From The Purification Of Ethylene Dibromide In The Production Of Ethylene Dibromide Via Bromination Of Ethene.

Waste Code: K141
Waste Description: Process Residues From The Recovery Of Coal Tar, Including, But Not Limited To, Tar Collecting Sump Residues From The Production Of Coke From Coal Or The Recovery Of Coke By-Products Produced From Coal. This Listing Does Not Include K087 (Decanter Tank Sludge From Coking Operations).

Waste Code: K142
Waste Description: Tank Storage Residues From The Production Of Coke From Coal Or From The Recovery Of Coke By-Products From Coal.

Waste Code: K143
Waste Description: Process Residues From The Recovery Of Light Oil, Including, But Not Limited To, Those Generated In Stills, Decanters, And Wash Oil Recovery Units From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K144
Waste Description: Wastewater Sump Residues From Light Oil Refining, Including, But Not Limited To, Intercepting Or Contamination Sump Sludges From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K145
Waste Description: Residues From Naphthalene Collection And Recovery Operations From The Recovery Of Coke By-Products Produced From Coal.

Waste Code: K147
Waste Description: Tar Storage Residues From Coal Tar Refining.

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: K148
Waste Description: Residues From Coal Tar Distillation, Including, But Not Limited To, Still Bottoms.

Waste Code: K149
Waste Description: Distillation Bottoms From The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Ring-Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups. [This Waste Does Not Include Still Bottoms From The Distillation Of Benzoyl Chloride]

Waste Code: K150
Waste Description: Organic Residules Excluding Spent Carbon Adsorbent, From The Spent Chlorine Gas And Hydrochloric Acid Recovery Processes Associated With The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups.

Waste Code: K151
Waste Description: Wastewater Treatment Sludges, Excluding Neutralization And Biological Sludges, Generated During The Treatment Of Wastewaters From The Production Of Alpha (Or Methyl-) Chlorinated Tolunes, Benzoyl Chlorides, And Compounds With Mixtures Of These Functional Groups.

Waste Code: K156
Waste Description: Organic Waste (Including Heavy Ends, Still Bottoms, Light Ends, Spent Solvents, Filtrates, And Decantates) From The Production Of Carbamates And Carbamoyl Oximes.

Waste Code: K157
Waste Description: Wastewaters (Including Scrubber Waters, Condenser Waters, Washwaters, And Separation Waters) From The Production Of Carbamates And Carbamoyl Oximes.

Waste Code: K158
Waste Description: Bag House Dusts And Filter/Separation Solids From The Production Of Carbamates And Carbamoyl Oximes.

Waste Code: K159
Waste Description: Organics From The Treatment Of Thiocarbamate Wastes.

Waste Code: K161
Waste Description: Purification Solids (Including Filtration, Evaporation, And Centrifugation Solids), Bag House Dust And Floor Sweepings From The Production Of Dithiocarbamate Acids And Their Salts. (This Listing Does Not Include K125 Or K126).

Waste Code: K169
Waste Description: Crude Oil Storage Tank Sediment From Petroleum Refining Operations

Waste Code: K170
Waste Description: Clarified Slurry Oil Tank Sediment And/Or In-Line Filter/Separation Solids From Petroleum Refining Operations

Waste Code: K171
Waste Description: Spent Hydrotreating Catalyst From Petroleum Refining Operations,Including Guard Beds Used To Desulfurize Feeds To Other Catalytic Reactors (This Listing Does Not Include Inert Support Media)

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code:	K172
Waste Description:	Spent Hydrorefining Catalyst From Petroleum Refining Operations, Including Guard Beds Used To Desulfurize Feeds To Other Catalytic Reactors (This Listing Does Not Include Inert Support Media)
Waste Code:	K174
Waste Description:	Wastewater Treatment Sludges From The Production Of Ethlyene Dichloride Or Vinyl Chloride
Waste Code:	K175
Waste Description:	Wastewater Treatment Sludge From The Production Of Vinyl Chloride Monomer..
Waste Code:	K176
Waste Description:	Baghouse Filters From The Production Of Antimony Oxide, Including Filters From The Production Of Intermediates (E.G.,Antimony Metal Or Crude Antimony Oxide)
Waste Code:	K177
Waste Description:	Slag From The Production Of Antimony Oxide That Is Speculatively Accumulated Or Disposed,Including Slag From The Production Of Intermediates (E.G.,Antimony Metal Or Crude Antimony Oxide)
Waste Code:	K178
Waste Description:	Residues From Manufacturing And Manufacturing-Site Storage Of Ferric Chloride From Acids Formed During The Production Of Titanium Dioxide Using The Chloride-Ilmenite Process.
Waste Code:	K181
Waste Description:	Nonwastewaters From The Production Of Dyes And/Or Pigments.
Waste Code:	LABP
Waste Description:	Lab Pack
Waste Code:	P001
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenylbutyl)-, & Salts, When Present At Concentrations Greater Than 0.3% (Or) Warfarin, & Salts, When Present At Concentrations Greater Than 0.3%
Waste Code:	P002
Waste Description:	1-Acetyl-2-Thiourea (Or) Acetamide, N-(Aminothioxomethyl)-
Waste Code:	P003
Waste Description:	2-Propenal (Or) Acrolein
Waste Code:	P004
Waste Description:	1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5alpha, 8alpha, 8abeta)- (Or) Aldrin
Waste Code:	P005
Waste Description:	2-Propen-1-Ol (Or) Allyl Alcohol
Waste Code:	P006
Waste Description:	Aluminum Phosphide (R,T)
Waste Code:	P007

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: 3(2h)-Isoxazolone, 5-(Aminomethyl)- (Or) 5-(Aminomethyl)-3-Isoxazolol

Waste Code: P008
Waste Description: 4-Aminopyridine (Or) 4-Pyridinamine

Waste Code: P009
Waste Description: Ammonium Picrate (R) (Or) Phenol, 2,4,6-Trinitro-, Ammonium Salt (R)

Waste Code: P010
Waste Description: Arsenic Acid H3aso4

Waste Code: P011
Waste Description: Arsenic Oxide As2o5 (Or) Arsenic Pentoxide

Waste Code: P012
Waste Description: Arsenic Oxide As2o3 (Or) Arsenic Trioxide

Waste Code: P013
Waste Description: Barium Cyanide

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P015
Waste Description: Beryllium

Waste Code: P016
Waste Description: Dichloromethyl Ether (Or) Methane, Oxybis[Chloro-

Waste Code: P017
Waste Description: 2-Propanone, 1-Bromo- (Or) Bromoacetone

Waste Code: P018
Waste Description: Brucine (Or) Strychnidin-10-One, 2,3-Dimethoxy-

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P021
Waste Description: Calcium Cyanide (Or) Calcium Cyanide Ca(Cn)2

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P023
Waste Description: Acetaldehyde, Chloro- (Or) Chloroacetaldehyde

Waste Code: P024
Waste Description: Benzenamine, 4-Chloro- (Or) P-Chloraniline

Waste Code: P026
Waste Description: 1-(O-Chlorophenyl)Thiourea (Or) Thiourea, (2-Chlorophenyl)-

Waste Code: P027
Waste Description: 3-Chloropropionitrile (Or) Propanenitrile, 3-Chloro-

Waste Code: P028

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P031
Waste Description: Cyanogen (Or) Ethanedinitrile

Waste Code: P033
Waste Description: Cyanogen Chloride (Or) Cyanogen Chloride (Cn)Cl

Waste Code: P034
Waste Description: 2-Cyclohexyl-4,6-Dinitrophenol (Or) Phenol, 2-Cyclohexyl-4,6-Dinitro-

Waste Code: P036
Waste Description: Arsonous Dichloride, Phenyl- (Or) Dichlorophenylarsine

Waste Code: P037
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2aalpha, 3beta, 6beta, 6aalpha, 7beta, 7aalpha)- (Or) Dieldrin

Waste Code: P038
Waste Description: Arsine, Diethyl- (Or) Diethylarsine

Waste Code: P039
Waste Description: Disulfoton (Or) Phosphorodithioic Acid, O,O-Diethyl S-[2-(Ethylthio)Ethyl] Ester

Waste Code: P040
Waste Description: O,O-Diethyl O-Pyrazinyl Phosphorothioate (Or) Phosphorothioic Acid, O,O-Diethyl O-Pyrazinyl Ester

Waste Code: P041
Waste Description: Diethyl-P-Nitrophenyl Phosphate (Or) Phosphoric Acid, Diethyl 4-Nitrophenyl Ester

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P043
Waste Description: Diisopropylfluorophosphate (Dfp) (Or) Phosphorofluoridic Acid, Bis(1-Methylethyl) Ester

Waste Code: P044
Waste Description: Dimethoate (Or) Phosphorodithioic Acid, O,O-Dimethyl S-[2-(Methylamino)-2-Oxoethyl] Ester

Waste Code: P045
Waste Description: 2-Butanone, 3,3-Dimethyl-1-(Methylthio)-, O-[Methylamino)Carbonyl] Oxime (Or) Thiofanox

Waste Code: P046

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: Alpha,Alpha-Dimethylphenethylamine (Or) Benzeneethanamine, Alpha, Alpha-Dimethyl-

Waste Code: P047
Waste Description: 4,6-Dinitro-O-Cresol, & Salts (Or) Phenol, 2-Methyl-4,6-Dinitro-, & Salts

Waste Code: P048
Waste Description: 2,4-Dinitrophenol (Or) Phenol, 2,4-Dinitro-

Waste Code: P049
Waste Description: Dithiobiuret (Or) Thioimidodicarbonic Diamide [(H2n)C(S)]2nh

Waste Code: P050
Waste Description: 6,9-Methano-2,4,3-Benzodioxathiepin,6,7,8,9,10,10-Hexachloro-1,5,5a,6, 9,9a-Hexahydro-,3-Oxide (Or) Endosulfan

Waste Code: P051
Waste Description: 2,7:3,6-Dimethanonaphth[2,3-B]Oxirene, 3,4,5,6,9,9-Hexachloro-1a,2,2a,3,6,6a,7,7a-Octahydro-, (1aalpha, 2beta, 2abeta, 3alpha, 6alpha, 6abeta, 7beta, 7aalpha)- & Metabolites (Or) Endrin (Or) Endrin, & Metabolites

Waste Code: P054
Waste Description: Aziridine (Or) Ethyleneimine

Waste Code: P056
Waste Description: Fluorine

Waste Code: P057
Waste Description: Acetamide, 2-Fluoro- (Or) Fluoroacetamide

Waste Code: P058
Waste Description: Acetic Acid, Fluoro-, Sodium Salt (Or) Fluoroacetic Acid, Sodium Salt

Waste Code: P059
Waste Description: 4,7-Methano-1h-Indene, 1,4,5,6,7,8,8-Heptachloro-3a,4,7,7a-Tetrahydro- (Or) Heptachlor

Waste Code: P060
Waste Description: 1,4,5,8-Dimethanonaphthalene, 1,2,3,4,10,10-Hexa-Chloro-1,4,4a,5,8,8a,-Hexahydro-, (1alpha, 4alpha, 4abeta, 5beta, 8beta, 8abeta)- (Or) Isodrin

Waste Code: P062
Waste Description: Hexaethyl Tetraphosphate (Or) Tetraphosphoric Acid, Hexaethyl Ester

Waste Code: P063
Waste Description: Hydrocyanic Acid (Or) Hydrogen Cyanide

Waste Code: P064
Waste Description: Methane, Isocyanato- (Or) Methyl Isocyanate

Waste Code: P065
Waste Description: Fulminic Acid, Mercury(2+) Salt (R,T) (Or) Mercury Fulminate (R,T)

Waste Code: P066

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description:	Ethanimidothioic Acid, N-[[(Methylamino)Carbonyl]Oxy]-, Methyl Ester (Or) Methomyl
Waste Code:	P067
Waste Description:	1,2-Propylenimine (Or) Aziridine, 2-Methyl-
Waste Code:	P068
Waste Description:	Hydrazine, Methyl- (Or) Methyl Hydrazine
Waste Code:	P069
Waste Description:	2-Methyllactonitrile (Or) Propanenitrile, 2-Hydroxy-2-Methyl-
Waste Code:	P070
Waste Description:	Aldicarb (Or) Propanal, 2-Methyl-2-(Methylthio)-, O-[(Methylamino)Carbonyl]Oxime
Waste Code:	P071
Waste Description:	Methyl Parathion (Or) Phosphorothioic Acid, O,O,-Dimethyl O-(4-Nitrophenyl) Ester
Waste Code:	P072
Waste Description:	Alpha-Naphthylthiourea (Or) Thiourea, 1-Naphthalenyl-
Waste Code:	P073
Waste Description:	Nickel Carbonyl (Or) Nickel Carbonyl Ni(Co)4, (T-4)-
Waste Code:	P074
Waste Description:	Nickel Cyanide (Or) Nickel Cyanide Ni(Cn)2
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	P076
Waste Description:	Nitric Oxide (Or) Nitrogen Oxide No
Waste Code:	P077
Waste Description:	Benzenamine, 4-Nitro- (Or) P-Nitroaniline
Waste Code:	P078
Waste Description:	Nitrogen Dioxide (Or) Nitrogen Oxide No2
Waste Code:	P081
Waste Description:	1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)
Waste Code:	P082
Waste Description:	Methanimine, N-Methyl-N-Nitroso- (Or) N-Nitrosodimethylamine
Waste Code:	P084
Waste Description:	N-Nitrosomethylvinylamine (Or) Vinylamine, N-Methyl-N-Nitroso-
Waste Code:	P085
Waste Description:	Diphosphoramide, Octamethyl- (Or) Octamethylpyrophosphoramide
Waste Code:	P087
Waste Description:	Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: P088
Waste Description: 7-Oxabicyclo[2.2.1]Heptane-2,3-Dicarboxylic Acid (Or) Endothall

Waste Code: P089
Waste Description: Parathion (Or) Phosphorothioic Acid, O,O-Diethyl-O-(4-Nitrophenyl) Ester

Waste Code: P092
Waste Description: Mercury, (Acetato-O)Phenyl- (Or) Phenylmercury Acetate

Waste Code: P093
Waste Description: Phenylthiourea (Or) Thiourea, Phenyl-

Waste Code: P094
Waste Description: Phorate (Or) Phosphorodithioic Acid, O,O-Diethyl S-[(Ethylthio)Methyl] Ester

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P096
Waste Description: Hydrogen Phosphide (Or) Phosphine

Waste Code: P097
Waste Description: Famphur (Or) Phosphorothioic Acid O-[4-[(Dimethylamino)Sulfonyl]Phenyl] O,O-Dimethyl Ester

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P099
Waste Description: Argentate (1-), Bis(Cyano-C)-, Potassium (Or) Potassium Silver Cyanide

Waste Code: P101
Waste Description: Ethyl Cyanide (Or) Propanenitrile

Waste Code: P102
Waste Description: 2-Propyn-1-Ol (Or) Propargyl Alcohol

Waste Code: P103
Waste Description: Selenourea

Waste Code: P104
Waste Description: Silver Cyanide (Or) Silver Cyanide Ag(Cn)

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: P108
Waste Description: Strychnidin-10-One, & Salts (Or) Strychnine, & Salts

Waste Code: P109
Waste Description: Tetraethyldithiopyrophosphate (Or) Thiodiphosphoric Acid, Tetraethyl Ester

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: P110
Waste Description: Plumbane, Tetraethyl- (Or) Tetraethyl Lead

Waste Code: P111
Waste Description: Diphosphoric Acid, Tetraethyl Ester (Or) Tetraethyl Pyrophosphate

Waste Code: P112
Waste Description: Methane, Tetranitro- (R) (Or) Tetranitromethane (R)

Waste Code: P113
Waste Description: Thallic Oxide (Or) Thallium Oxide Tl2o3

Waste Code: P114
Waste Description: Selenious Acid, Dithallium (1+) Salt (Or) Thallium(I) Selenite

Waste Code: P115
Waste Description: Sulfuric Acid, Dithallium (1+) Salt (Or) Thallium(I) Sulfate

Waste Code: P116
Waste Description: Hydrazinecarbothioamide (Or) Thiosemicarbazide

Waste Code: P118
Waste Description: Methanethiol, Trichloro- (Or) Trichloromethanethiol

Waste Code: P119
Waste Description: Ammonium Vanadate (Or) Vanadic Acid, Ammonium Salt

Waste Code: P120
Waste Description: Vanadium Oxide V2o5 (Or) Vanadium Pentoxide

Waste Code: P121
Waste Description: Zinc Cyanide (Or) Zinc Cyanide Zn(Cn)2

Waste Code: P122
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Greater Than 10% (R,T)

Waste Code: P123
Waste Description: Toxaphene

Waste Code: P127
Waste Description: P127

Waste Code: P128
Waste Description: P128

Waste Code: P185
Waste Description: 1,3-Dithiolane-2-Carboxaldehyde, 2,4-Dimethyl-, O-[(Methylamino)-Carbonyl]Oxime (Or) Tirpate

Waste Code: P188
Waste Description: Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: P189
Waste Description: Carbamic Acid, [(Dibutylamino)-Thio]Methyl-, 2,3-Dihydro-2,2-Dimethyl

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

-7-Benzofuranyl Ester (Or) Carbosulfan

Waste Code: P190
Waste Description: Carbamic Acid, Methyl-, 3-Methylphenyl Ester (Or) Metolcarb

Waste Code: P191
Waste Description: Carbamic Acid, Dimethyl-, 1-[(Dimethyl-Amino)Carbonyl]- 5-Methyl-1h-Pyrazol-3-Yl Ester (Or) Dimetilan

Waste Code: P192
Waste Description: Isolan (Or) Carbamic Acid, Dimethyl-, 3-Methy-L-(1-Methylethyl)-1h-Pyrazol-5-Yl Ester

Waste Code: P194
Waste Description: Ethanimidothioc Acid, 2-(Dimethylamino)-N-[[(Methylamino) Carbonyl]Oxy]-2-Oxo-, Methyl Ester (Or) Oxamyl

Waste Code: P196
Waste Description: Manganese Dimethyldithiocarbamate (Or) Manganese, Bis(Dimethylcarbamodithioato-S,S')-,

Waste Code: P197
Waste Description: Formparanate (Or) Methanimidamide, N,N-Dimethyl-N'-[2-Methyl-4-[[(Methylamino)Carbonyl]Oxy]Phenyl]

Waste Code: P198
Waste Description: Methanimidamide, N,N-Dimethyl-N'-[3-[[(Methylamino)-Carbonyl]Oxy]Phenyl]-, Monohydrochloride (Or) Formetanate Hydrochloride

Waste Code: P199
Waste Description: P199

Waste Code: P201
Waste Description: Phenol, 3-Methyl-5-(1-Methylethyl)-, Methyl Carbamate (Or) Promecarb

Waste Code: P202
Waste Description: M-Cumenyl Methylcarbamate (Or) 3-Isopropylphenyl N-Methylcarbamate (Or) Phenol, 3-(1-Methylethyl)-, Methyl Carbamate

Waste Code: P203
Waste Description: Aldicarb Sulfone (Or) Propanal, 2-Methyl-2-(Methyl-Sulfonyl)-, O-[(Methylamino)Carbonyl] Oxime

Waste Code: P204
Waste Description: Physostigmine (Or) Pyrrolo[2,3-B]Indol-5-Ol, 1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethyl-Methylcarbamate (Ester), (3as-Cis)-

Waste Code: P205
Waste Description: Zinc, Bis(Dimethylcarbamodithioato-S,S')-, (Or) Ziram

Waste Code: U001
Waste Description: Acetaldehyde (I) (Or) Ethanal (I)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Description: N-Nitroso-N-Methylurea (Or) Urea, N-Methyl-N-Nitroso-

Waste Code: U178
Waste Description: Carbamic Acid, Methylnitroso-, Ethyl Ester (Or) N-Nitroso-N-Methylurethane

Waste Code: U179
Waste Description: N-Nitrosopiperidine (Or) Piperidine, 1-Nitroso-

Waste Code: U180
Waste Description: N-Nitrosopyrrolidine (Or) Pyrrolidine, 1-Nitroso-

Waste Code: U181
Waste Description: 5-Nitro-O-Toluidine (Or) Benzenamine, 2-Methyl-5-Nitro

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U183
Waste Description: Benzene, Pentachloro- (Or) Pentachlorobenzene

Waste Code: U184
Waste Description: Ethane, Pentachloro- (Or) Pentachloroethane

Waste Code: U185
Waste Description: Benzene, Pentachloronitro- (Or) Pentachloronitrobenzene (Pcnb)

Waste Code: U186
Waste Description: 1,3-Pentadiene (I) (Or) 1-Methylbutadiene (I)

Waste Code: U187
Waste Description: Acetamide, N-(4-Ethoxyphenyl)- (Or) Phenacetin

Waste Code: U188
Waste Description: Phenol

Waste Code: U189
Waste Description: Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: U190
Waste Description: 1,3-Isobenzofurandione (Or) Phthalic Anhydride

Waste Code: U191
Waste Description: 2-Picoline (Or) Pyridine, 2-Methyl-

Waste Code: U192
Waste Description: Benzamide, 3,5-Dichloro-N-(1,1-Dimethyl-2-Propynyl)- (Or) Pronamide

Waste Code: U193
Waste Description: 1,2-Oxathiolane, 2,2-Dioxide (Or) 1,3-Propane Sultone

Waste Code: U194
Waste Description: 1-Propanamine (I,T) (Or) N-Propylamine (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U197
Waste Description: 2,5-Cyclohexadiene-1,4-Dione (Or) P-Benzoquinone

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U203
Waste Description: 1,3-Benzodioxole, 5-(2-Propenyl)- (Or) Safrole

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U207
Waste Description: 1,2,4,5-Tetrachlorobenzene (Or) Benzene, 1,2,4,5-Tetrachloro-

Waste Code: U208
Waste Description: 1,1,1,2-Tetrachloroethane (Or) Ethane, 1,1,1,2-Tetrachloro-

Waste Code: U209
Waste Description: 1,1,2,2-Tetrachloroethane (Or) Ethane, 1,1,2,2-Tetrachloro-

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U211
Waste Description: Carbon Tetrachloride (Or) Methane, Tetrachloro-

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U214
Waste Description: Acetic Acid, Thallium(1+) Salt (Or) Thallium(I) Acetate

Waste Code: U215
Waste Description: Carbonic Acid, Dithallium(1+) Salt (Or) Thallium(I) Carbonate

Waste Code: U216
Waste Description: Thallium Chloride Tlcl (Or) Thallium(I) Chloride

Waste Code: U217
Waste Description: Nitric Acid, Thallium(1+) Salt (Or) Thallium(I) Nitrate

Waste Code: U218
Waste Description: Ethanethioamide (Or) Thioacetamide

Waste Code: U219
Waste Description: Thiourea

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

Waste Code: U221
Waste Description: Benzenediamine, Ar-Methyl- (Or) Toluenediamine

Waste Code: U222
Waste Description: Benzenamine, 2-Methyl-, Hydrochloride (Or) O-Toluidine Hydrochloride

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U225
Waste Description: Bromoform (Or) Methane, Tribromo-

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U227
Waste Description: 1,1,2-Trichloroethane (Or) Ethane, 1,1,2-Trichloro-

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U234
Waste Description: 1,3,5-Trinitrobenzene (R,T) (Or) Benzene, 1,3,5-Trinitro-

Waste Code: U235
Waste Description: 1-Propanol, 2,3-Dibromo-, Phosphate (3:1) (Or) Tris(2,3,-Dibromopropyl) Phosphate

Waste Code: U236
Waste Description: 2,7-Naphthalenedisulfonic Acid,3,3'-[(3,3'-Dimethyl[1,1'-Biphenyl]-4,4'-Diyl)Bis(Azo)Bis[5-Amino -4-Hydroxy]-, Tetrasodium Salt (Or) Trypan Blue

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code:	U237
Waste Description:	2,4-(1h,3h)-Pyrimidinedione, 5-[Bis(2-Chloroethyl)Amino]- (Or) Uracil Mustard
Waste Code:	U238
Waste Description:	Carbamic Acid, Ethyl Ester (Or) Ethyl Carbamate (Urethane)
Waste Code:	U239
Waste Description:	Benzene, Dimethyl- (I,T) (Or) Xylene (I)
Waste Code:	U240
Waste Description:	2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D
Waste Code:	U243
Waste Description:	1-Propene, 1,1,2,3,3,3-Hexachloro- (Or) Hexachloropropene
Waste Code:	U244
Waste Description:	Thioperoxydicarbonic Diamide [(H2n)C(S)]2s2, Tetramethyl- (Or) Thiram
Waste Code:	U246
Waste Description:	Cyanogen Bromide (Cn)Br
Waste Code:	U247
Waste Description:	Benzene, 1,1'-(2,2,2-Trichloroethylidene)Bis[4-Methoxy- (Or) Methoxychlor
Waste Code:	U248
Waste Description:	2h-1-Benzopyran-2-One, 4-Hydroxy-3-(3-Oxo-1-Phenyl-Butyl)-, & Salts, When Present At Concentrations Of 0.3% Or Less (Or) Warfarin, & Salts, When Present At Concentrations Of 0.3% Or Less
Waste Code:	U249
Waste Description:	Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less
Waste Code:	U271
Waste Description:	Benomyl (Or) Carbamic Acid, [1-[(Butylamino)Carbonyl]-1h-Benzimidazol-2-Yl]-, Methyl Ester
Waste Code:	U278
Waste Description:	Bendiocarb (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-, Methyl Carbamate
Waste Code:	U279
Waste Description:	U279
Waste Code:	U280
Waste Description:	Barban (Or) Carbamic Acid, (3-Chlorophenyl)-, 4-Chloro-2-Butynyl Ester
Waste Code:	U328
Waste Description:	Benzenamine, 2-Methyl- (Or) O-Toluidine
Waste Code:	U353
Waste Description:	Benzenamine, 4-Methyl- (Or) P-Toluidine
Waste Code:	U359
Waste Description:	Ethanol, 2-Ethoxy- (Or) Ethylene Glycol Monoethyl Ether

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

Waste Code: U364
Waste Description: Bendiocarb Phenol (Or) 1,3-Benzodioxol-4-Ol, 2,2-Dimethyl-

Waste Code: U367
Waste Description: 7-Benzofuranol, 2,3-Dihydro-2,2-Dimethyl- (Or) Carbofuran Phenol

Waste Code: U372
Waste Description: Carbamic Acid, 1h-Benzimidazol-2-Yl, Methyl Ester (Or) Carbendazim

Waste Code: U373
Waste Description: Carbamic Acid, Phenyl-, 1-Methylethyl Ester (Or) Propham

Waste Code: U378
Waste Description: Carbamodithioic Acid, (Hydroxymethyl) Methyl-, Monopotassium Salt (Or) Potassium N-Hydroxymethyl- N-Methyldi-Thiocarbamate

Waste Code: U387
Waste Description: Carbamothioic Acid, Dipropyl-, S-(Phenylmethyl) Ester (Or) Prosulfocarb

Waste Code: U389
Waste Description: Carbamothioic Acid, Bis(1-Methylethyl)-, S-(2,3,3-Trichloro-2-Propenyl) Ester (Or) Triallate

Waste Code: U394
Waste Description: A2213 (Or) Ethanimidothioic Acid, 2-(Dimethylamino)-N-Hydroxy-2-Oxo-, Methyl Ester

Waste Code: U395
Waste Description: Diethylene Glycol, Dicarbamate (Or) Ethanol, 2,2'-Oxybis-, Dicarbamate

Waste Code: U404
Waste Description: U404

Waste Code: U409
Waste Description: Carbamic Acid, [1,2-Phenylenebis (Iminocarbonothioyl)]Bis-, Dimethyl Ester (Or) Thiophanate-Methyl

Waste Code: U410
Waste Description: Ethanimidothioic Acid, N,N'-[Thiobis[(Methylimino)Carbonyloxy]]Bis-, Dimethyl Ester (Or) Thiodicarb

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal

SANTA ROSA JUNIOR COLLEGE - SANTA ROSA (Continued) **1000395364**

environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Violations:
Site ID: 401448
Site Name: Santa Rosa Junior College
Violation Date: 10-12-2023
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 01/01/2024. The hazardous waste storage area located in the student auto shop did not have adequate aisle space allowing for unobstructed movement. Submit photos to the CUPA demonstrating that adequate aisle space has been provided.
Violation Division: Santa Rosa City Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 401448
Site Name: Santa Rosa Junior College
Violation Date: 10-12-2023
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 01/01/2024. Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and/or type of hazardous waste violations observed at the time of inspection. Submit documentation to the CUPA demonstrating that employees have been properly trained on hazardous waste disposal, spills and site specific emergency response procedures.

RWQCB Region: NORTH COAST RWQCB (REGION 1)
Site History: This site is the location of solvent releases to soil and groundwater from former printed circuit board manufacturing facilities. These facilities included one waste solvent tank, which appears to be the basis for the UST Program site investigation case. The waste solvent UST was removed under the regulatory oversight of Sonoma County Health Department. No releases from the tank were noted at the time of the tank removal. All invesatigative data, regulatory and cleanup activities for this site are being managed under the SIte Clceanup Program, with staff oversight costs funded under a Cost Recovery Program ageement with Hewlett Packard Company. All case activity and reports are tracked and uploaded to the Geotracker case # 1NSO039.

HP INC C/O STANTEC CONSULTING SERVICES, INC (Continued) **1000281844**

Site History: From 1972 to 1987, Hewlett-Packard Company (Hewlett-Packard) leased three parcels identified by the Sonoma County Assessors Parcel Numbers APN 015-670-024, APN 015-670-027 and APN 015-670-028, Hewlett-Packard operated a light industrial, ultra-high frequency test and instrument manufacturing facility at the site. The manufacturing operations included milling, machining, and coating metal parts and components for test and instrument manufacturing. The site occupied approximately 8 acres and included two buildings, designated as 1T and 2T, plus a separate cafeteria building. The site is bordered on the south by Piner Road, on the north by Center Drive, on the west by Industrial Drive, and on the east by Airway Drive. In 1987, Hewlett-Packard Company ceased operations at Building 1T, which was then converted into office space. The Building 1T was subsequently remodeled to accommodate additional occupancy by a church and a private school. Hewlett Packard continued to perform research and development activities in Building 2T until 1998. Building 1T was constructed in 1969 on the parcel APN 015-670-024. Operations within and surrounding Building 1T included 23 chemical use areas that generated chemical wastes including metals, volatile organic compounds, detergents, acids, and caustics. Building 2T was constructed on parcels APN 015-670-27 and APN 015-670-028. 6. The facilities within and surrounding Building 2T included hazardous waste management units permitted under the Federal Resource Conservation and Recovery Act of 1976 (RCRA) as amended (42 U.S.C. 6901 et seq);. These waste management units consisted of a drum storage area, and the Brite Dip Sump system, which included a dip sump, waste transfer trench, waste storage tanks, and a drum rinse shed. The RCRA permitted waste management operations were located on parcel APN 015-670-028. In February 1993, closure of the two waste management units was completed according to a closure plan approved by the U.S. Environmental Protection Agency and the California Department of Toxic Substances Control on June 22, 1992. Hewlett-Packard continued research and development operations at Building 2T until 1998, when Agilent Corporation assumed control of the premises. Agilent ceased operations at Building 2T in November 2002. In a letter dated March 3, 2008, submitted to NCRWQCB by email on Februsry 23, 2009, Geosyntec consultants stated on behalf of Hewlett Packard Company, that the soil vapor extraction system installed at Building 1T would be operated continuously through 2008. In-situ bioremediation consisting of injections of carbon substrate, microbial nutrients and Dehalicoccoides microbial culture commecnced on Sepetember 24, 2012 in four horizontal wells installed in two treatment zones beneath Building 1T.

Comments: Not reported
Description: The product was found to have been dumped by an employee of a market. The product was dumped onto asphalt which led to a storm drain that feeds to a creek. The RP on scene does not think it has reached the creek as of yet and public works is on scene to vacumn it out. The product has been diked to prevent further milk entering the storm drain.

2020 COR ACTION:

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110071740285

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY

HP INC C/O STANTEC CONSULTING SERVICES, INC (Continued) **1000281844**

INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	NORTH COAST RWQCB (REGION 1)
Site History:	The site is the location of the Golden Gate Bridge District bus depot, and includes an administration building, paved parking area, bus washing areas, and fueling facilities. In 1999, petroleum releases to soil and groundwater at the site were discovered during the removal of gasolie underground storage tanks. A SOil Vapor Extraction system removed approximately 284 pounds of petroleum hyfrocarbons, based in information presented in a report dated 2/14/1997, prepared by Woodward-Clyde Engineering.

RWQCB Region: NORTH COAST RWQCB (REGION 1)
Site History: Petroleum impacted soil was discovered at the removal of underground stroage tanks. RWQCB staff requested an investigation to determine whether groundwater has been impacted by the releases. A sample of water from the tank excavation showed the presence of TPH as Diesel at 410 ppb. Groundwater sampling conducted on July 30, 2008 did not show any petroleum related constituents above detection levels, except for methyl tertiary butyl ether (MTBE) at 4.48 parts per billion. - This case has been referred for case closure assessment

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

GOLDEN GATE BRIDGE (Continued) **1000187001**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CA Water Watershed Name:	Russian River - Middle Russian River - Santa Rosa (114.22)
Dwr Groundwater Subbasin Name:	Santa Rosa Valley - Santa Rosa Plain (1-055.01)
Disadvantaged Community:	Not reported
CA Enviroscreen 3 Score:	46-50%
CA Enviroscreen 4 Score:	50-55%
Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	NORTH COAST RWQCB (REGION 1)
Site History:	In June of 1988, a former facility operator indicated that two underground storage tanks (USTs) had been used during the course of operations. During an attempt to remove the USTs in December 1988, backfill was encountered and no USTs were found. Groundwater sampling has revealed petroleum hydrocarbons at low levels or below detection limits.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/26/2025

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 04/04/2025
Date Data Arrived at EDR: 06/02/2025
Date Made Active in Reports: 08/12/2025
Number of Days to Update: 71
Source: Drug Enforcement Administration
Telephone: 202-307-1000
Last EDR Contact: 06/02/2025
Next Scheduled EDR Contact: 09/01/2025
Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database
The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21
Source: Department of Toxic Substance Control
Telephone: 916-323-3400
Last EDR Contact: 02/23/2009
Next Scheduled EDR Contact: 05/25/2009
Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program
This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/21/2025
Date Data Arrived at EDR: 04/22/2025
Date Made Active in Reports: 07/09/2025
Number of Days to Update: 78
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 07/17/2025
Next Scheduled EDR Contact: 11/03/2025
Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs
A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2022
Date Data Arrived at EDR: 03/21/2024
Date Made Active in Reports: 06/12/2024
Number of Days to Update: 83
Source: Department of Toxic Substances Control
Telephone: 916-255-6504
Last EDR Contact: 08/05/2025
Next Scheduled EDR Contact: 11/10/2025
Data Release Frequency: Varies

TOXIC PITS: Toxic Pits Cleanup Act Sites
Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Date Data Arrived at EDR: 08/30/1995
Date Made Active in Reports: 09/26/1995
Number of Days to Update: 27
Source: State Water Resources Control Board
Telephone: 916-227-4364
Last EDR Contact: 01/26/2009
Next Scheduled EDR Contact: 04/27/2009
Data Release Frequency: No Update Planned

CERS HAZ WASTE: California Environmental Reporting System Hazardous Waste

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/14/2025
Date Data Arrived at EDR: 04/15/2025
Date Made Active in Reports: 07/07/2025
Number of Days to Update: 83

Source: CalEPA
Telephone: 916-323-2514
Last EDR Contact: 07/14/2025
Next Scheduled EDR Contact: 10/27/2025
Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 04/04/2025
Date Data Arrived at EDR: 06/02/2025

Next Scheduled EDR Contact: 10/27/2025
Data Release Frequency: Quarterly

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 05/30/2025
Date Data Arrived at EDR: 05/30/2025
Date Made Active in Reports: 08/18/2025
Number of Days to Update: 80

Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 08/19/2025
Next Scheduled EDR Contact: 12/08/2025
Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 06/26/2025
Date Data Arrived at EDR: 07/01/2025

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: No Update Planned

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

APPENDIX I

USER QUESTIONNAIRE

USER QUESTIONNAIRE

To qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the user must conduct the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

(1.) Environmental liens that are filed or recorded against the subject property (40 C.F.R. § 312.25).

Did a search of land title records or judicial records where appropriate identify any environmental liens filed or recorded against the subject property under federal, tribal, state, or local law?

ask BKF?

(2.) Activity and use limitations that are in place on the subject property or that have been filed or recorded against the subject property.

Did a search of land title records or judicial records where appropriate identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

ask BKF?

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 C.F.R. § 312.28).

Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

ask County of Sonoma?

(4.) Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 C.F.R. § 312.29).

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

Not applicable. The proposed project is a County of Sonoma building and the subject parcels are County of Sonoma owned. No market transaction occurred.

(5.) Commonly known or reasonably ascertainable information about the subject property (40 C.F.R. § 312.30).

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a.) Do you know the past uses of the subject property?

Subject parcels are currently governmental administrative (office) buildings and asphalt parking lots, built in the late 1950s to early 1960s, to be demolished for a new governmental administrative building.

(b.) Do you know of specific chemicals that are present or once were present at the subject property?

ask County of Sonoma?

(c.) Do you know of spills or other chemical releases that have taken place at the subject property?

ask County of Sonoma ?

Parcel several hundred feet to the north is known to have had some remediation / monitoring activities recently.

(d.) Do you know of any environmental cleanups that have taken place at the subject property?

ask County of Sonoma?

(6.) The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 C.F.R. § 312.31).

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

Subject parcels are currently governmental administrative (office) buildings and asphalt parking lots, built in the late 1950s to early 1960s, to be demolished for a new governmental administrative building.

Signed_____ Date_____

APPENDIX J

PROFESSIONAL QUALIFICATIONS

DAVID NOREN, REA

Vice President, Environmental Services Manager

Mr. Noren is EBA's Manager of Environmental Services with over 31 years of experience in environmental services and engineering. His expertise includes technical and management services for a wide range of environmental, hydrogeological, and solid waste landfill projects. He is well versed in permitting with local, State, and Federal agencies and in stormwater management sampling and reporting, various levels of regulatory permitting and water use studies, landfill closure, general property transfer and property development studies, and in the preparation of Categorical Exemptions, Initial Studies, Negative Declarations, and Mitigated Negative Declarations per CEQA and NEPA Environmental Assessments.

Mr. Noren is knowledgeable in the application of numerous investigative and treatment methodologies in a variety of geologic environments including the investigation and remediation of a diverse range of contaminated sites and municipal solid waste facilities.

Mr. Noren's responsibilities include management and oversight of all environmental services.

RELEVANT EXPERIENCE

- NEPA Environmental Assessments.
- CEQA Initial Studies, Categorical Exemptions, Mitigated Negative Declarations/Negative Declarations.
- Individual or nation-wide permit applications for Section 404 (US Army Corps of Engineers), Section 401 Water Quality Certification (San Francisco Bay Regional Water Quality Control Board), California Department of Fish and Wildlife Stream Bed Alteration Agreements, California Coastal Commission, BCDC Entitlements.
- Compliance monitoring including soil, groundwater, soil vapor and ambient air monitoring and sampling.
- Work plans for soil and groundwater investigations, hydrogeologic evaluations, corrective action plans, and landfill closure documentation.
- Field work, including environmental investigations requiring UST removal and over-excavations, soil and groundwater sampling and analysis, surface and storm water sampling and analysis.
- Phase I Environmental Site Assessments.
- Phase II Environmental Site Investigations.
- City of Santa Rosa Limited Phase 1 Environmental Site Assessment Services Master Agreement 2016 - Present (completed 13 projects to date)

Mr. Coker has over 25 years of experience in the field of environmental assessments and investigations, and various levels of property transfer and property development studies. Mr. Coker has performed over 200 Phase 1 Environmental Site Assessments (ESAs) in northern California, as well as CEQA- and NEPA-related environmental reviews. Mr. Coker is accomplished in CEQA/NEPA studies, work plans, summary reports, and related technical documents.

As a Senior Environmental Scientist and CEQA Practitioner, Mr. Coker is expert in soil, groundwater, and soil-vapor investigations; environmental assessments; property development and land-use permitting and associated studies; data evaluation and interpretation.

Mr. Coker's responsibilities include the oversight of project budgets, client and regulatory agency interactions, site investigation activities, and field and reporting programs.

HVAC Equipment Specifications

24ABA4
Base Series 14 Air Conditioner with Puron Refrigerant
Sizes 18 to 60 (1–1/2 to 5 Nominal Tons)

Carrier®
Turn to the Experts℠

Product Data

Puron™
the environmentally sound refrigerant

Carrier's Air Conditioners with Puron® refrigerant provide a collection of features unmatched by any other family of equipment. The 24ABA has been designed utilizing Carrier's Puron refrigerant. The environmentally sound refrigerant allows you to make a responsible decision in the protection of the earth's ozone layer. Carrier's air conditioning system with Puron refrigerant meets the Energy Star® guidelines for energy efficiency.

INDUSTRY LEADING FEATURES / BENEFITS

Efficiency

- 14 SEER/11 EER
- Microtube Technology™ refrigeration system
- Indoor air quality accessories available

Sound

- Sound level as low as 76 dBA

Comfort

- System supports Thermidistat™ or standard thermostat controls

Reliability

- Puron® refrigerant - environmentally sound, won't deplete the ozone layer and low lifetime servce cost.
- Front-seating service valves
- Scroll compressor
- Internal pressure relief valve
- Internal thermal overload
- Filter drier
- Balanced refrigeration system for maximum reliability

Durability

WeatherArmor™ protection package:

- Solid, Durable sheet metal construction
- Dense wire coil guard
- Baked-on, complete coverage, powder paint

Applications

- Long-line - up to 250 feet (76.20 m) total equivalent length, up to 200 feet (60.96 m) condenser above evaporator, or up to 80 ft. (24.38 m) evaporator above condenser (See Longline Guide for more information.)
- Low ambient (down to -20°F/-28.9°C) with accessory kit

Warranty

- 5 year limited compressor warranty
- 5 year limited parts warranty

ENERGY STAR

This product has been designed and manufactured to meet Energy Star® criteria for energy efficiency when matched with appropriate coil components. However, proper refrigerant charge and proper air flow are critical to achieve rated capacity and efficiency. Installation of this product should follow all manufacturing refrigerant charging and air flow instructions. **Failure to confirm proper charge and air flow may reduce energy efficiency and shorten equipment life.**

* For tubing sets between 80 and 200 ft. (24.38 and 60.96 m) horizontal or 20 ft. (6.09 m) vertical differential, consult the Longline Guideline.

Note: See unit Installation Instruction for proper installation.

VAPOR LINE SIZING AND COOLING CAPACITY LOSS
1-STAGE AIR CONDITIONER APPLICATIONS

LONG LINE APPLICATION: An application is considered ”Long line” when the total equivalent tubing length exceeds 80 ft. (24.38 m) or when there is more than 20 ft. (6.09 m) vertical separation between indoor and outdoor units. These applications require additional accessories and system modifications for reliable system operation. The maximum allowable total equivalent length is 250 ft. (76.2 m). The maximum vertical separation is 200 ft. (60.96 m) when outdoor unit is above indoor unit, and 80 ft. (24.38 m) when the outdoor unit is below the indoor unit. Refer to Accessory Usage Guideline below for required accessories. See Longline Application Guideline for required piping and system modifications. Also, refer to the table below for the acceptable vapor tube diameters based on the total length to minimize the cooling capacity loss.

Unit Nominal Size (Btuh)	Acceptable Vapor Line Diameters (In.) OD	Cooling Capacity Loss (%) Total Equivalent Line Length ft. (m)										
		Standard Application			Long Line Application Requires Accessories							
		25 (7.62)	50 (15.24)	80 (24.38)	80+ (24.38+)	100 (30.48)	125 (38.10)	150 (45.72)	175 (53.34)	200 (60.96)	225 (68.58)	250 (76.2)

	7/8	0	0	0	0	0	1	1	1	1	2	2
42,000 1–Stage Puron AC	3/4	0	1	2	2	2	3	4	4	5	6	6
	7/8	0	0	1	1	1	1	2	2	2	3	3
	1–1/8	0	0	0	0	0	0	0	0	0	0	1
48,000 1–Stage Puron AC	3/4	0	1	2	2	3	4	5	5	6	7	8
	7/8	0	0	1	1	1	2	2	2	3	3	4
	1–1/8	0	0	0	0	0	0	0	0	1	1	1
60,000 1–Stage Puron AC	3/4	1	2	4	4	5	6	7	9	10	11	12
	7/8	0	1	2	2	2	3	4	4	5	5	6
	1–1/8	0	0	0	0	1	1	1	1	1	1	2

Standard Length = 80 ft. (24.38 m) or less total equivalent length

Applications in this area are long line. Accessories are required as shown recommended on Long Line Application Guidelines

Applications in this area may have height restrictions that limit allowable total equivalent length, when outdoor unit is below indoor unit See Long Line Application Guidelines

ACCESSORY THERMOSTATS

THERMOSTAT / SUBBASE PKG.	DESCRIPTION
TSTATCCPRH01–B	Thermidistat Control – Programmable / Non–Programmable Thermostat with Humidity control
TSTATCCPAC01–B	Thermostat – Auto Changeover, 7–Day Programmable, °F/°C, 1–Stage Heat, 1–Stage Cool
TSTATCCNAC01–C	Thermostat – Auto Changeover, Non–Programmable, °F/°C, 1–Stage Heat, 1–Stage Cool
TSTATCCBAC01–B	Builder's Thermostat – Manual Changeover, Non–Programmable, °F/°C, 1–Stage Heat, 1–Stage Cool
TSTATCCSEN01–B	Outdoor Air Temperature Sensor

ACCESSORY USAGE GUIDELINE

ACCESSORY	REQUIRED FOR LOW–AMBIENT COOLING APPLICATIONS (Below 55°F/12.8°C)	REQUIRED FOR LONG LINE APPLICATIONS* (Over 80 ft./24.38 m)	REQUIRED FOR SEA COAST APPLICATIONS (Within 2 miles/3.22 km)
Ball Bearing Fan Motor	Yes†	No	No
Compressor Start Assist Capacitor and Relay	Yes†	Yes	No
Crankcase Heater	Yes†	Yes	No
Evaporator Freeze Thermostat	Yes†	No	No
Hard Shut–Off TXV	Yes†	Yes	Yes
Liquid Line Solenoid Valve	No	See Long Line Application Guideline	No
Motor Master® Control or Low–ambient Pressure Switch	Yes†	No	No
Support Feet	Recommended	No	Recommended

* For tubing line sets between 80 and 200 ft. (24.38 and 60.96 m) and/or 20 ft. (6.09 m) vertical differential, refer to Residential Split–System Longline Application Guideline.

† Required for Low–Ambient Controller (full modulation feature) MotorMaster® Control.

Accessory Description and Usage (Listed Alphabetically)

1. Ball-Bearing Fan Motor

A fan motor with ball bearings which permits speed reduction while maintaining bearing lubrication.

Usage Guideline:

Required on all units when MotorMaster® —

2. Compressor Start Assist - Capacitor and Relay

Start capacitor and relay gives a "hard" boost to compressor motor at each start up.

Usage Guideline:

Required for reciprocating compressors in the following applications:

- Long line
- Low ambient cooling
- Hard shut off expansion valve on indoor coil
- Liquid line solenoid on indoor coil

Required for single-phase scroll compressors in the following applications:

- Long line
- Low ambient cooling

Suggested for all compressors in areas with a history of low voltage problems.

3. Compressor Start Assist — PTC Type

Solid state electrical device which gives a "soft" boost to the compressor at each start-up.

Usage Guideline:

Suggested in installations with marginal power supply.

4. Crankcase Heater

An electric resistance heater which mounts to the base of the compressor to keep the lubricant warm during off cycles. Improves compressor lubrication on restart and minimizes the chance of liquid slugging.

Usage Guideline:

Required in low ambient cooling applications.

Required in long line applications.

Suggested in all commercial applications.

5. Cycle Protector

The cycle protector is designed to prevent compressor short cycling. This control provides an approximate 5-minute delay after power to the compressor has been interrupted for any reason, including power outage, protector control trip, thermostat jiggling, or normal cycling.

6. Evaporator Freeze Thermostat

An SPST temperature-actuated switch that stops unit operation when evaporator reaches freeze-up conditions.

Usage Guideline:

Required when low ambient kit has been added.

7. Low-Ambient Pressure Switch Kit

A long life pressure switch which is mounted to outdoor unit service valve. It is designed to cycle the outdoor fan motor in order to maintain head pressure within normal operating limits (approximately 100 psig to 225 psig). The control will maintain working head pressure at low-ambient temperatures down to 0°F/-17.78°C when properly installed.

Usage Guideline:

A Low-Ambient Pressure Switch or MotorMaster® Low-Ambient Controller must be used when cooling operation is used at outdoor temperatures below 55°F (12.8°C).

8. MotorMaster® Low-Ambient Controller

A fan-speed control device activated by a temperature sensor, designed to control condenser fan motor speed in response to the saturated, condensing temperature during operation in cooling mode only. For outdoor temperatures down to -20°F (-28.9°C), it maintains condensing temperature at 100°F ±10°F (37.8°C ± 11°C).

Usage Guideline:

A MotorMaster® Low Ambient Controller or Low-Ambient Pressure Switch must be used when cooling operation is used at outdoor temperatures below 55°F (12.8°C).

Suggested for all commercial applications.

9. Outdoor Air Temperature Sensor

Designed for use with Carrier Thermostats listed in this publication. This device enables the thermostat to display the outdoor temperature. This device also

is required to enable special thermostat features such as auxiliary heat lock out.

Usage Guideline:

Suggested for all Carrier thermostats listed in this publication.

Accessory Description and Usage (Listed Alphabetically) (Continued)

10. Sound Hood

Wraparound sound reducing cover for the compressor. Reduces the sound level by about 2 dBA.

Usage Guideline:

Suggested when unit is installed closer than 15 ft (4.57 m) to quiet areas, bedrooms, etc.

Suggested when unit is installed between two houses less than 10 ft (3.05 m) apart.

11. Support Feet

Four stick-on plastic feet that raise the unit 4 in. (101.6 mm) above the mounting pad. This allows sand, dirt, and other debris to be flushed from the unit base, minimizing corrosion.

Usage Guideline:

Suggested in the following applications:

Coastal installations.

Windy areas or where debris is normally circulating.

Rooftop installations.

For improved sound ratings.

12. Thermostatic Expansion Valve (TXV)

A modulating flow-control valve which meters refrigerant liquid flow rate into the evaporator in response to the superheat of the refrigerant gas leaving the evaporator.

Kit includes valve, adapter tubes, and external equalizer tube. Hard shut off types are available.

NOTE: When using a hard shut off TXV with single phase reciprocating compressors, a Compressor Start Assist Capacitor and Relay is required.

Usage Guideline:

Required to achieve ARI ratings in certain equipment combinations. Refer to combination ratings.

Hard shut off TXV or LLS required in air conditioner long line applications.

Required for use on all zoning systems.

13. Time-Delay Relay

An SPST delay relay which briefly continues operation of indoor blower motor to provide additional cooling after the compressor cycles off.

NOTE: Most indoor unit controls include this feature. For those that do not, use the guideline below.

Usage Guideline:

For improved efficiency ratings for certain combinations of indoor and outdoor units. Refer to ARI Unitary Directory.

14. Winter Start Control

This control is designed to alleviate nuisance opening of the low-pressure switch by bypassing it for the first 3 minutes of operation.

* Permissible limits of the voltage range at which the unit will operate satisfactorily

† If wire is applied at ambient greater than 30° C (86° F), consult table 310–16 of the NEC (ANSI/NFPA 70). The ampacity of non–metallic–sheathed cable is based on 60° C conditions, per the NEC (ANSI/NFPA 70) Article 336–26. If other than uncoated (no–plated), 60 or 75° C insulation, copper wire (solid wire for 10 AWG or smaller, stranded wire for larger than 10 AWG) is used, consult applicable tables of the NEC (ANSI/NFPA 70).

‡ Length shown is as measured 1 way along wire path between unit and service panel for voltage drop not to exceed 2%.

** Time–Delay fuse.

FLA – Full Load Amps

LRA – Locked Rotor Amps

MCA – Minimum Circuit Amps

RLA – Rated Load Amps

NOTE: Control circuit is 24–V on all units and requires external power source. Copper wire must be used from service disconnect to unit. All motors/compressors contain internal overload protection.

WeatherMaker® Single Package Heat Pump Rooftop

15 to 25 Nominal Tons

ecoblue™ technology

50FCQ*17, 24, 28

Single-Packaged Heat Pump with Optional Electric Heat and Puron® Refrigerant (R-410A)

© 2024 Carrier

Features/Benefits

The New Carrier WeatherMaker® packaged heat pump rooftop units (RTU) with EcoBlue™ Technology were designed by customers to provide value added benefits never seen in this type of equipment before.

New features include:

- A patented, industry first, Vane Axial Indoor Fan System, powered by an electronically commutated motor for quiet, efficient, and reliable operation. Compared to traditional belt driven forwards curved fans, this system has:
  - 75% fewer moving parts
  - No fan belts, pulleys, shaft, and shaft bearings
  - Up to 40% better efficiency than traditional belt drive forward curve fans
  - Slow ramp up capability for better sound and comfort control
  - Internal protection from phase reversal and phase loss situations
  - High external static capability
  - Slide out blower assembly design
- Reliable 2 stage cooling with tandem scroll compressors technology, fully active evaporator coil, and mixed air temperature protection on all models
- New unit control board with intuitive indoor fan adjustment that uses simple dial and switch adjustments
- An industry first 25 ton packaged heat pump
- Reliable copper tube/aluminum fin condenser coil with 5/16 in. tubing to help reduce refrigerant charge and reduce weight versus prior designs

WeatherMaker® 50FCQ units up to 25 tons are specifically designed for dedicated factory-supplied vertical air flow or horizontal air flow. No special field kits are required. All footprints were maintained to easily fit on R-410A Carrier and select competitor curbs, making replacements easier than ever.

With "no-strip" screw collars, handled access panels, and more, the unit is easy to install, easy to maintain, and easy to use.

Our 2 speed staged air volume through our Vane Axial fan allows our 15 to 25 ton 50FCQ WeatherMaker units to deliver IEER values up to 14.0 and provide optimum comfort and control.

Value-added features include:

- SystemVu™ intuitive intelligent controls option that provides:
  - Large full text, multi-line display
  - USB Flash Port for data transfer
  - Built in i-Vu®, CCN and BACnet[1]
  - Read refrigerant pressures from display — no gauges
  - Quick LED Status — Run, Alert, Fault
  - Conventional thermostat or sensor capabilities
  - Historical component runtime and starts
  - Supply air tempering
  - Navigator™ and Network Service Tool compatible
- Single point electrical connections
- All 15 to 25 ton models use TXV refrigerant metering devices
- Scroll compressors with internal line-break overload protection
- Units come with an easy access tool-less filter door. Filter track tilts out for filter removal and replacement. All filters are the same size in each unit

Installation ease

Lighter units make for easy replacement and aid in the structural approval process. Units have simple, fast plug-in connections to the standard integrated unit control board (UCB). Clearly labeled connections points to reduce installation time. Also, a large control box provides room to work and room to mount Carrier accessory controls.

Easy to maintain

With the new EcoBlue Vane Axial fan system and direct drive ECM motor, there is no longer a need to adjust or replace belts or pulleys as in past designs. This frees up maintenance, installation and commissioning time.

Features/Benefits (cont)

Easy access handles by Carrier provide quick and easy access to all normally serviced components. Our "no-strip" screw system has superior holding power and guides screws into position while preventing the screw from stripping the unit's metal.

Sloped, corrosion resistant composite drain pan sheds water and won't rust.

Easy to use

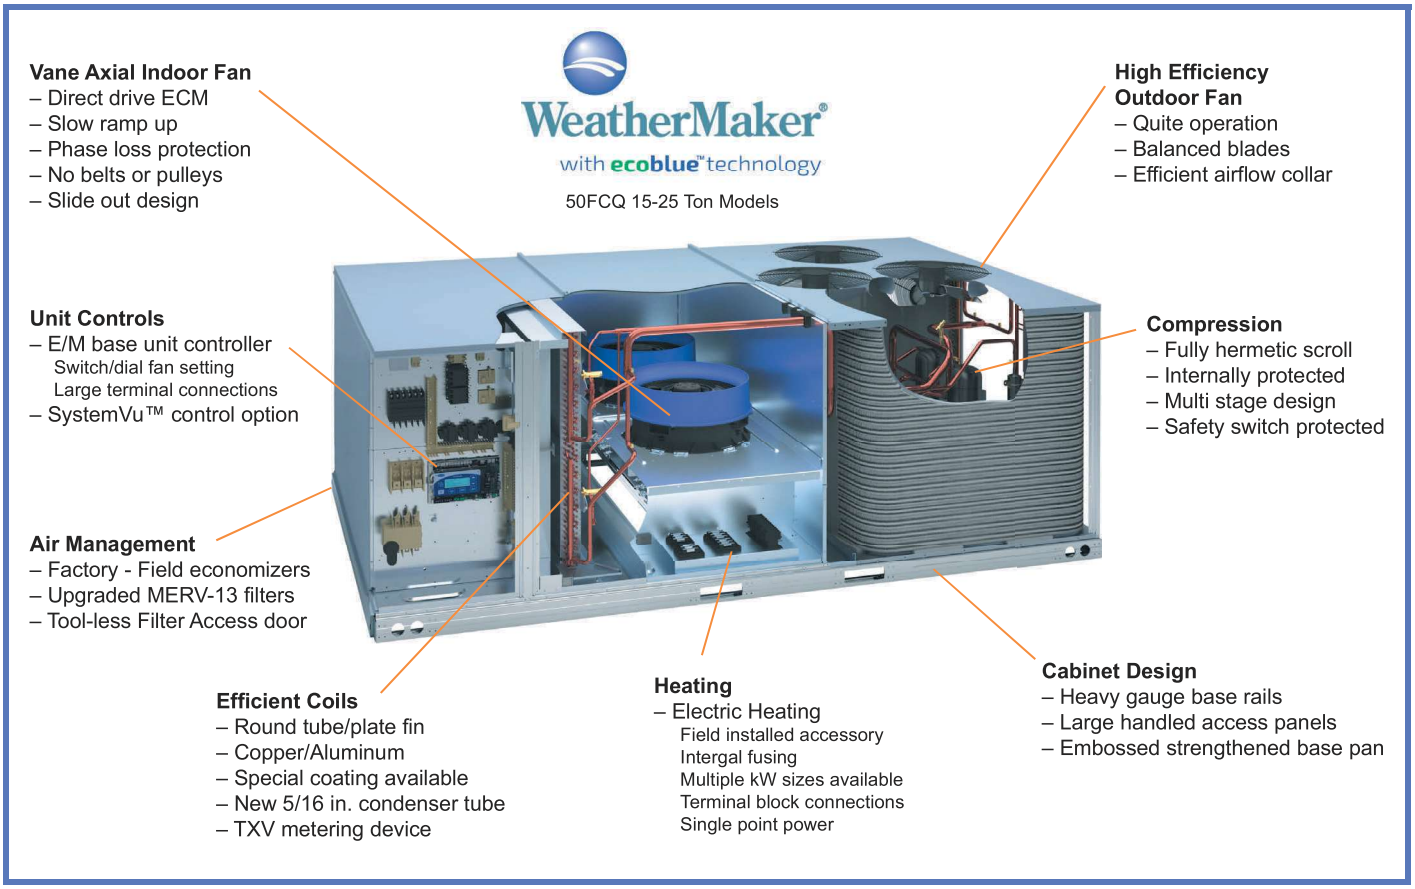
The newly re-designed Unit Control Board by Carrier puts all connections and troubleshooting points in one convenient place. Most low voltage connections are made to the same board and make it easy to access it. Setting up the fan is simple by an intuitive switch and rotary dial arrangement.

Carrier rooftops have high and low pressure switches, a new mixed air temperature switch, a filter drier, and 2 in. filters standard.

EcoBlue™ Technology

Direct drive EcoBlue Technology indoor fan system uses Vane Axial fan design and electrically commutated motors.

This new Vane Axial design has 75% fewer moving parts, uses up to 40% less energy and has no fan belts, blower bearings and shaft when compared with past belt drive systems. The full fan and motor assembly also slides out for easier maintenance and service.



Streamlined control and integration

Carrier controllers make connecting WeatherMaker® rooftop heat pump units into existing building automation systems easy. The units are compatible with conventional thermostat controls or SystemVu™ controls for greater comfort, diagnostics and building network integration.

Operating efficiency and flexibility

These 50FCQ packaged rooftops meet the Department of Energy (DOE) 2023 efficiency standard, as well as the latest ASHRAE (American Society of Heating, Refrigerating, and Air-Conditioning Engineers) 90.1 and IECC®[1] (International Energy Conservation Code) minimum IEER efficiency requirements.

Sound Rating Table[a]

UNIT	COOLING STAGES	OUTDOOR SOUND (dB) AT 60 Hz[b]								
		A-WEIGHTED[c]	63	125	250	500	1000	2000	4000	8000
50FCQM17	2	84.1	92.2	83.9	80.4	81.8	78.7	76.5	72.2	65.4
50FCQM17	2	85.9	97.1	88.3	84.4	83.3	80.7	77.4	73.4	67.3
50FCQM28	2	85.9	97.1	88.3	84.4	83.3	80.7	77.4	73.4	67.3

NOTE(S):

a. Outdoor sound data is measured in accordance with AHRI.
b. Measurements are expressed in terms of sound power. Do not compare these values to sound pressure values because sound pressure depends on specific environmental factors which normally do not match individual applications. Sound power values are independent of the environment and therefore more accurate.
c. A-weighted sound ratings filter out very high and very low frequencies, to better approximate the response of “average” human ear. A-weighted measurements for Carrier units are taken in accordance with AHRI.

ation amplitudes are usually expressed as either "peak", as in peak particle city, or "rms" (root mean square), as in rms acceleration. The relationship between two is the same as with noise. The rms value is approximately 0.71 x the peak e for a sine wave representing either displacement, velocity, or acceleration.

lly, the direction in which vibrations are measured, analyzed or reported should be ified (vertical, horizontal longitudinal, horizontal transverse, or the resultant of all e motions). For example, Caltrans most often uses a peak vertical particle velocity riptor, because vibrations along the ground surface are most often (although not ys) greatest in the vertical direction.

1 Introduction

The State of California adopted Senate Bill (SB) 610 in 2001, which amended California Water Code (CWC) Sections 10910, 10911, 10912, and 10915, and repealed Section 10913. These changes require the preparation of a Water Supply Assessment (WSA) for certain types of development projects that meet the definition of "project" under SB 610, are subject to the California Environmental Quality Act (CEQA), and would rely on groundwater to meet project-related water demands. The purpose of SB 610 is to improve the linkage between water supply availability and land use planning decisions by requiring decision-makers to consider the sufficiency of available water supply sources to meet project demands over a 20-year planning horizon and with consideration to varying climatic conditions.

This WSA has been prepared for the Sonoma County Government Center Project ("proposed project"), located in the City of Santa Rosa in Sonoma County, California. The County of Sonoma is the proponent for the proposed project, which would replace portions of the existing County Administration Center (CAC) to include one office building, a single-story structure to house the Emergency Coordination Center (ECC), covered surface-level parking with a solar microgrid, and up to 1,500 residential units; see Section 2, Project Description, for detailed discussion of project components. In addition, Section 2.4, *Water Demands*, and Section 4, *Water Supply Sources*, provide discussion of the water supply sources that would support the project.

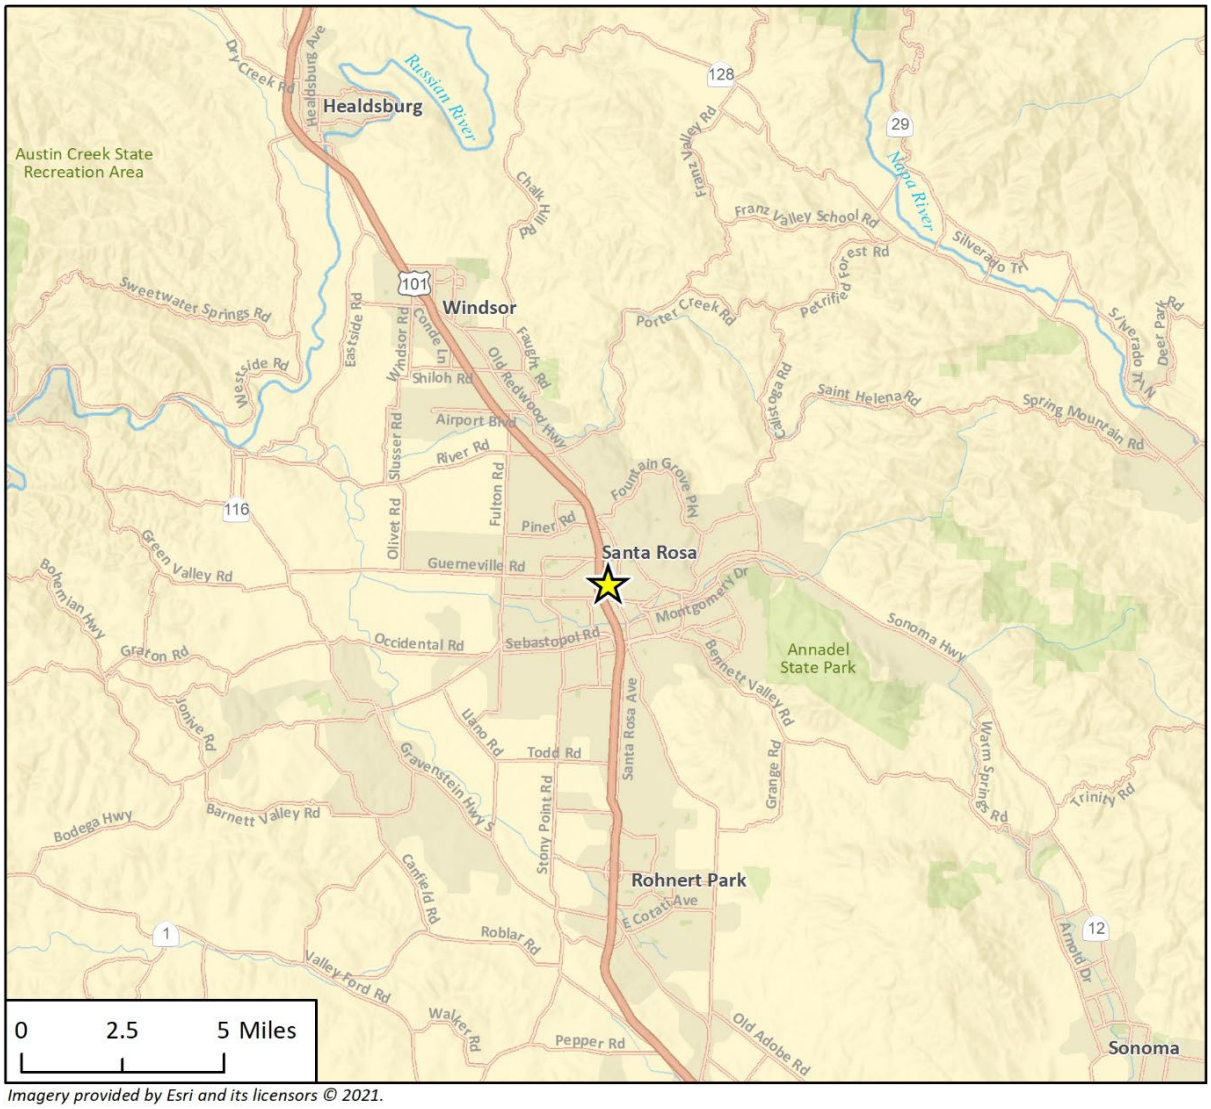
The definition of "project" under SB 610 includes but is not limited to developments that would introduce 500 or more new residential units. The proposed project would introduce more than 500 new residential units, is subject to CEQA, and would rely on groundwater to meet project-related water demands; therefore, the proposed project is subject to SB 610. This WSA has been prepared for compliance with CWC as amended by SB 610; it does not include analysis of CEQA thresholds, but it may be used to inform the impact analysis included in the project's CEQA document, and it is subject to public review as part of the CEQA process.

Resources used to inform this WSA include the City of Santa Rosa 2020 Urban Water Management Plan (UWMP) and the Sonoma County Water Agency ("Sonoma Water") 2020 UWMP, both of which are currently being updated in accordance with the five-year update cycle required by the Urban Water Management Planning Act. The 2025 UWMPs will be available for public review by July 1, 2026, when they are due to the California Department of Water Resources (DWR). This WSA includes updates to information and projections from the 2020 UWMP based on other published resources, where necessary to facilitate consideration of water supply availability and reliability for the proposed project. Other resources used to inform this WSA include but are not limited to Sonoma Water's 2025 Water Shortage Assessment Report, the 2021 Groundwater Sustainability Plan (GSP) for the Santa Rosa Plain Subbasin, and the Draft and Final Environmental Impact Reports (EIR)s for the City of Santa Rosa General Plan 2050.

2 Project Description

The current CAC was constructed in the 1950s and has remained largely unchanged since then. It consists of low-rise buildings that inhibit the effective delivery of public services, such as providing housing or generating revenue. Due to these inefficiencies, the County currently leases market-rate retail/commercial offices to offset the operating costs of existing buildings and deferred maintenance obligations, which have outpaced County resources. Meanwhile, the CAC is identified in the Sonoma County General Plan Housing Element, Program 4c, as an area that could accommodate future housing and help maintain an inventory of housing sites sufficient to meet the County's Regional Housing Needs Allocation (RHNA) (Sonoma County 2023).

Under the proposed project, the County would replace portions of the CAC to include one office building, a single-story structure to house the 7,000-13,000-square-foot ECC, covered surface parking with a solar microgrid, and up to 1,500 residential units. The project would involve the construction of an approximately 250,000-square-foot office building, which would house an approximately 3,500-square-foot Board of Supervisors chamber, and would introduce 20,00 square feet of retail/commercial space. The project would add a total of 263,000 square feet on the office site, a combination of the 250,000 square foot office building and the 7,000-13,000 square foot ECC. The proposed project components would collectively house up to 1,200 full-time employees at the office site and 32 employees associated with the retail/commercial component of the residential site, resulting in a net total of 50 additional employees compared to existing conditions. See Section 2.3, *Project Characteristics,* for further discussion of project components.



2.1 Project Location

The proposed project is located in the City of Santa Rosa, in Sonoma County, California. The project would occur on a portion of the existing CAC, located on Sonoma County Assessor's Parcel Number (APN) 180-030-012, which is bounded by Bicentennial Way to the north, Steele Lane to the south, Mendocino Avenue to the east, and State Highway 101 (U.S. 101) to the west. The project site includes the portion of the existing CAC north and east of Administration Drive and west of Ventura Avenue, referred to hereinafter as the Office site. The project site also includes the area east of Ventura Avenue, north of Administration Drive, west of Mendocino Avenue and south of Fiscal Drive, referred to hereinafter as the Residential site. See Figure 1 for the regional location.

2.2 Existing Site Characteristics

The project site is in an urban area, has been previously graded and developed, and is surrounded by roads and office buildings. The project site is currently occupied by five low-rise County-used government office buildings and surface parking. Buildings on the CAC site and other adjacent County government buildings include Permit Sonoma (2550 Ventura Avenue), Human Services (2550 Paulin Drive), Administration Building (575 Administration Drive), Fiscal Building (585 Fiscal Drive), Redwood Building (370 Administration Drive), Hall of Justice (600 Administration Drive), Main Adult Detention Facility (2777 Ventura Avenue), Sherriff's Complex (2796 Ventura Avenue), Light Fleet (709 Russell Avenue), Central Mechanical Plant (2680 Ventura Avenue), Family Justice Center (2755 Mendocino Avenue), Information Systems/Programming and Probation Administration (2615 Paulin Drive), and Agriculture Building (2604 Ventura Avenue). See Figure 2 for the project site.

Fig 2-2 Project Location

Land Use Designation and Zoning

Under California Government Code Sections 53090 and 53091, cities and counties are exempt from complying with each other's building codes and zoning ordinances. As such, even though the County-owned property is located within the City of Santa Rosa, the City's General Plan and zoning ordinances do not apply to the project site. However, the County does intend, where appropriate and feasible, to work with the City to avoid land use conflicts.

The project's Office site has a City of Santa Rosa General Plan land use designation of Public/Institutional and is zoned Public and Institutional (PI). Sites with land use designations of Public/Institutional are areas or clusters of governmental or semi-public facilities. According to the City's General Plan, new facilities may be appropriate in any land use category based on need and subject to environmental review. PI zoning permits uses such as public facilities, utilities, and hospitals. The PI zoning district is consistent with and implements the Public/Institutional General Plan land use designation. Thus, even though the County and the project are exempt from the City's General Plan and zoning ordinance, the project at the Office site would be consistent with both.

The project's Residential site also has a City of Santa Rosa General Plan land use designation of Public/Institutional and is zoned PI. The proposed project at the Residential site would not comply with the City's land use and zoning requirements; however, as discussed above, the City's General Plan and zoning ordinances do not apply to the project. Furthermore, the project site has been identified in the County's Housing Element to accommodate housing units that would be developed consistent with a governmental purpose of the County (Sonoma County 2023).

2.3 Project Characteristics

Under the proposed project, the County of Sonoma would replace portions of the existing CAC to include one office building, a single-story 7,000-13,000-square-foot structure to house the ECC, covered surface parking with a solar microgrid, approximately 20,000 square feet of retail/commercial uses, and up to 1,500 residential units. The project would involve the construction of an approximately 250,000-square-foot office building, which would house an approximately 3,500-gross-square-foot Board of Supervisors chamber. The project would add a total of 263,000 square feet, a combination of the 250,000 square foot office building and the 7,000-13,000 square foot ECC, on the office site. The proposed project components would collectively house up to 1,200 full-time employees at the office site and 32 employees associated with the retail/commercial component of the residential site, resulting in a net total of 50 additional employees compared to existing conditions.

An additional single-story structure would house the ECC, which would be approximately 7,000 to 13,000 square feet in total area, of which up to 5,000 square feet would be dedicated to emergency operations, while the remainder would function as conference rooms during non-emergencies.

The project would also include up to approximately 1,500 residential units over 14.6 acres. These units would consist of multifamily design and would include 300 units designated to accommodate Regional Housing Needs Assessment (RHNA) needs. The EIR for the proposed project assesses the project's housing component on a programmatic level. For the purposes of this WSA, assumptions have been developed to characterize the potential water demands associated with the proposed project; see Section 2.4, *Water Demands and Supply.*

Table 1, below, provides an overview of project components compared to existing conditions on the project site. Where a range of values is identified, this WSA will assess the highest values to provide a conservative analysis.

Table 1 Proposed Project Characteristics

Project Feature	Existing[1]	Proposed	Difference
Building Square Footage			
Permit Sonoma	31,400	0	-31,400
Human Services	42,000	0	-42,000
Administration Building	46,900	0	-46,900
Fiscal Building	35,600	0	-35,600
Law Library / Registrar	29,600	0	-29,600
Office Building	0	250,000	+250,000 sf
Retail/Commercial Space	0	20,000	+20,000 sf
Emergency Coordination Center	0	7,000 - 13,000	+7,000 - 13,000 sf
Total Office Buildings	6	1	-5
Total Residential Buildings	0	25	+25
Maximum Building Height (stories)	2	7	+5
Full-Time Employees Accommodated[2]	1,182	Up to 1,232	+50 employees
Residential Units	0	1,500	+1,500 units
Office Parking Stalls	1,417	1,050	-367

1. Includes only buildings slated for demolition

2. Includes 882 employees currently at CAC buildings to be demolished, 300 employees at CAC buildings that would remain, and up to 515 employees that would move from leased properties off-site. In addition, this estimate includes the anticipated 32 employees associated with the proposed retail/commercial component of the residential site.

2.4 Water Demands

Table 2, below, provides an overview of water demands associated with the proposed project.

Table 2 Water Demands Overview

Project Component	Quantity	Unit	Demand Factor	REFs[1]	Total Demand (AFY)
Residential site	1,500	units	1 REF/unit	1,500	300
Office site	263,000	sf	1 REF/500 sf	526	105
Retail/Commercial	20,000	sf	1 REF/500 sf	40	8
Total				**2,066 REFs**	**413 AFY**

AFY = acre-feet per year; REF = Residential Equivalency Factor; sf = square feet

1. For consistency with the City of Santa Rosa's 2020 UWMP and General Plan 2050, a REF was applied to each land use under the proposed project, where one REF is equivalent to the average water use of one detached residential unit per year, which is estimated to be approximately 65,345 gallons per year, or 0.20 AFY.

As shown above, the proposed project would introduce new water demands of up to 413 AFY. This demand reflects a conservative estimate of the total projected water demand associated with buildout of the proposed project. Water for the project would be provided by the City of Santa Rosa, which purchases approximately 95 percent of its potable supply from Sonoma Water (City of Santa Rosa 2022, pg. 16) and produces the remainder from local groundwater and recycled water. These water supply sources are detailed in Section 4, *Water Supply Sources*, and Section 5, *Water Supply Reliability.*

3 Senate Bill 610

This section addresses the applicability of SB 610 to the proposed project. The CWC, as amended by SB 610, requires a WSA to consider a series of questions, each of which is addressed under respective headings below. The primary question to be answered in a WSA is:

> *Will the total projected water supplies available during normal, single dry, and multiple dry water years during a 20-year projection meet the projected water demand of the proposed project, in addition to existing and planned future uses of the identified water supplies, including agricultural and manufacturing uses?*

3.1 Is the Proposed Project Subject to CEQA?

Yes, the proposed project is subject to CEQA. CWC Section 10910(a) states that any city or county that determines a project (as defined in CWC Section 10912) is subject to CEQA shall also comply with CWC Section 10910; this is the section that was amended by SB 610 to require the assessment of water supply availability and reliability in a WSA. The proposed project requires multiple discretionary approvals, including from the County of Sonoma, and is therefore subject to CEQA.

3.2 Is the Proposed Project a "Project" Under SB 610?

Yes, the proposed project is a "project" under SB 610. CWC Section 10912(a) defines "project" under SB 610, including the development types considered below for the proposed project.

- **Residential Development.** A proposed residential development of more than 500 dwelling units is defined as a "project" under SB 610. The proposed project would introduce more than 500 residential dwelling units and therefore classifies as a SB 610 project based on residential uses.
- **Shopping Center or Business Establishment.** A proposed shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space is defined as a "project" under SB 610. The proposed project would not introduce 500,000 square feet of non-residential retail/commercial land uses.
- **Retail/Commercial Office Building.** A proposed retail/commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space is defined as a "project" under SB 610. The proposed project would introduce 20,000 square feet of retail/commercial space; it would not meet the minimum space threshold to qualify as a SB 610 project for retail/commercial uses.
- **Hotel or Motel.** A proposed hotel or motel, or both, having more than 500 rooms is defined as a "project" under SB 610. The proposed project does not include a hotel or motel.
- **Industrial, Manufacturing or Processing Plant, or Industrial Park.** A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area is defined as a "project" under SB 610. The proposed project does not include an industrial, manufacturing, or processing plant or industrial park.
- **Mixed-Use Project.** A proposed mixed-use project that includes one or more of the projects specified earlier is defined as a "project" under SB 610. The proposed project qualifies as a SB 610 project under the residential category addressed above.

The proposed project is considered a "project" under SB 610 and a WSA is therefore required to inform environmental analysis for the project's CEQA document and regulatory permit applications.

3.3 Is There a Public Water System that Will Serve the Proposed Project?

Yes, there is a public water system that will serve the proposed project. CWC Section 10912(c) defines a "public water system" as a system with 3,000 or more urban service connections that provides piped water to the public for human consumption. The City of Santa Rosa is a retail water supplier with more than 53,000 customer accounts, serving a population of approximately 173,000 individuals within the City's service area (City of Santa Rosa 2025b).

3.4 Is There a Current UWMP that Accounts for the Proposed Project's Water Demand?

Yes, there is a current UWMP that accounts for the proposed project. In California, every urban water supplier (publicly or privately owned) that delivers more than 3,000 AFY of water annually or serves more than 3,000 urban water connections is required to prepare an UWMP to assess and manage the reliability of the supplier's water sources over a 20-year period, and also consider normal water-year, single-dry water-year (periodic drought), and multiple-dry water-year (sustained drought) scenarios. These are the same requirements of a WSA, as specified by SB 610; therefore, when a UWMP exists for the subject area, it is used to inform project-specific WSAs. UWMPs must be updated and submitted to the California Department of Water Resources (DWR) every five years for review and approval and are publicly available for review.

Changes introduced under the proposed project that affect water demands include the addition of up to 50 new full-time employees over time, and the addition of 1,500 new residential units, 200 of which would meet Sonoma County's RHNA 6th Cycle housing goals; 1,300 of the project's new residential units are not specifically allocated to RHNA targets. Water demands associated with all 1,500 new residential units are captured in the City of Santa Rosa's 2020 UWMP, as discussed below and detailed in Section 5, *Water Supply Reliability*. In addition to the City of Santa Rosa's UWMP, Sonoma Water's 2020 UWMP also demonstrates sufficient supply availability to continue providing 95 percent of the City of Santa Rosa's water supply; the remainder of the City's water supply is sourced from local groundwater and recycled water, as discussed in Section 4, *Water Supply Sources*, and Section 5.

In 2025, an Environmental Impact Report (EIR) was prepared for the City of Santa Rosa's General Plan 2050, which provided updated analysis of water supply availability based on the City's 2020 UWMP.[1] Water demands accounted for in the 2025 EIR included those associated with 4,685 new housing units for the RHNA 6th Cycle, reflected in the City's 2023 Housing Element, as well as additional future housing units that have not yet been identified but are anticipated to be required by subsequent RHNA cycles prior to 2050 (City of Santa Rosa 2025a, pg. 77). The EIR evaluated a projected growth of up to 24,090 housing units, accounting for a projected 4,455 new units under the 7th Cycle (2031-2039), 4,380 new units under the 8th Cycle (2039-2047), and up to 4,430 new

[1] The City of Santa Rosa's General Plan 2050 was adopted after the City's 2020 UWMP, and the General Plan 2050 is therefore not reflected in the 2020 UWMP.

units under the 9th Cycle (2047-2055) (City of Santa Rosa 2025a, pg. 77).

In total, the EIR accounted for 13,265 residential units that have not yet been proposed but are anticipated to be required under future RHNA cycles that will occur during the lifetime of the General Plan 2050 (City of Santa Rosa 2024b, pg. 627). The proposed project would introduce 1,500 new residential units, or approximately 11 percent of the anticipated future residential units accounted for in the General Plan 2050 EIR. The EIR determined that water demands associated with buildout of the City's General Plan 2050 would be approximately 24,316 AFY (City of Santa Rosa 2024b, pg. 627). The City's 2020 UWMP determined that total water supply available in 2024 would be approximately 25,097 AFY, or 781 AFY more than needed for full buildout of the General Plan 2050 (City of Santa Rosa 2025a, pg. 77). Because the General Plan 2050 EIR accounts for the water demands of potential future housing units, of which the proposed project would represent 11 percent, and the City's 2020 UWMP forecasts having sufficient supply available to meet all water demands associated with buildout of the General Plan 2050, sufficient water supply would be available for the proposed project.

The City of Santa Rosa's 2020 UWMP accounts for the demands of the proposed project.

3.5 Is Groundwater a Component of the Water Supply for the Proposed Project?

Yes, groundwater is a component of water supply for the proposed project.

Water supply for the project would be provided by the City of Santa Rosa, which sources the majority (approximately 93 percent) of its water supply from Sonoma Water, with the remainder sourced from the Santa Rosa Plain Subbasin of the Santa Rosa Valley Groundwater Basin. Local groundwater is characterized in Section 4.2, *Santa Rosa Plain Subbasin*.

3.6 Are There Sufficient Supplies to Serve the Project Over the Next Twenty Years?

This WSA presents data to support quantitative analysis of water supply availability and reliability for the proposed project, with informed conclusions presented in Section 6, *Conclusions*. As discussed therein, sufficient water supplies are available to serve the project over the next 20 years, and with consideration to varying climatic (drought) conditions.

4 Water Supply Sources

Water supply for the proposed project would be provided by the City of Santa Rosa. The City's supply sources include a fixed annual allocation of imported surface water from Sonoma Water of up to 29,100 AFY (see Section 4.1, *Sonoma Water*), up to 2,300 AFY of groundwater produced from the Santa Rosa Plain Subbasin (see Section 4.2, *Santa Rosa Plain Subbasin*), and up to 140 AFY of recycled water from the Laguna Treatment Plant (LTP) for non-potable uses (see Section 4.3, *Recycled Water*).

Table 3, below, provides an overview of the City's water supply portfolio, including actual use rates in 2020 and projected availability in five-year increments through 2045.

Table 3 City of Santa Rosa Water Supply Sources (AFY)

Source	2020 (actual)	2025	2030	2035	2040	2045
Sonoma Water – potable (contract)	18,024	20,100	20,100	20,100	20,100	20,100
Groundwater – potable (City)	1,253	2,300	2,300	2,300	2,300	2,300
Recycled Water – non-potable (City)	110	140	140	140	140	140

AFY = acre-feet per year

Source: City of Santa Rosa 2022, pg. 17

As shown above, the quantities of supply available from each source through 2045 are expected to remain constant; this is due to the applicable water rights permits and agreements, groundwater management and allocations, and available treatment capacity, addressed by supply source below.

4.1 Sonoma Water

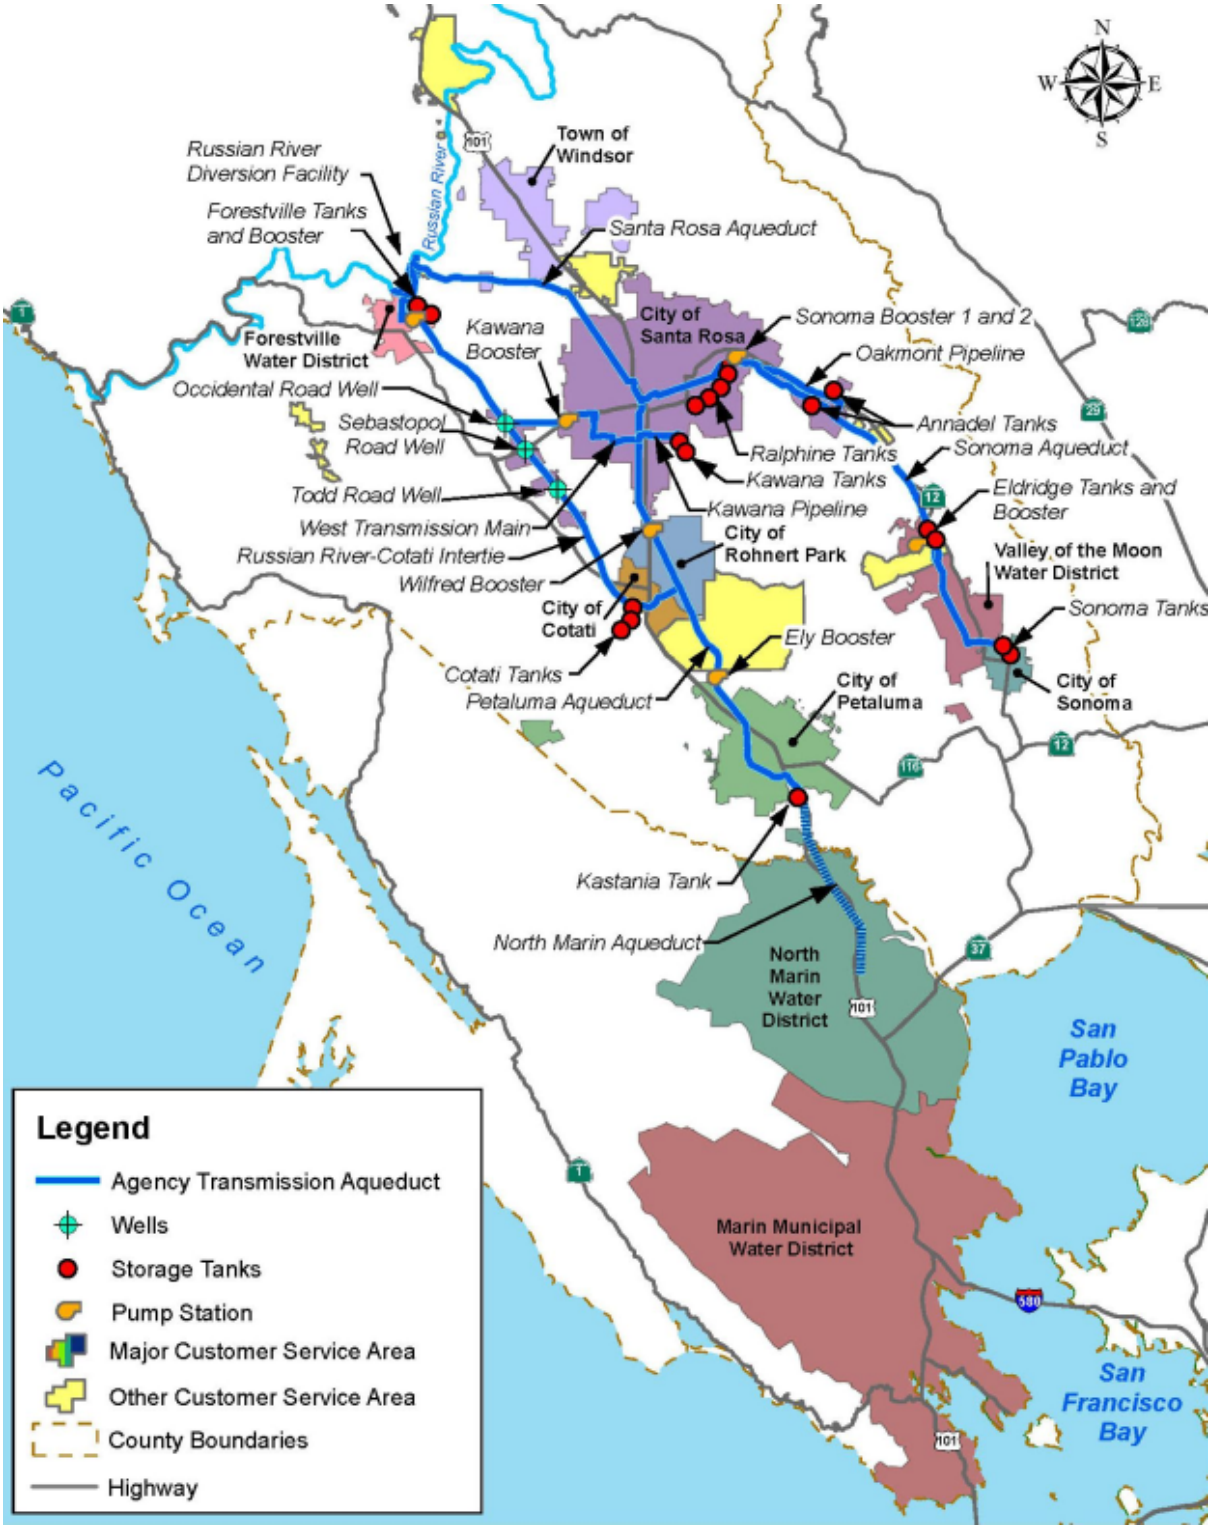

Figure 3, below, provides an overview of Sonoma Water's service area and key infrastructure. Sonoma Water's service area extends from diversion facilities on the Russian River near Forestville to the Santa Rosa, Petaluma, and Sonoma valleys. Its transmission system includes more than 85 miles of pipelines, six booster pump stations, and 18 storage tanks with a combined storage capacity of 129 million gallons (MG). Key pipelines include the Santa Rosa Aqueduct, the Sonoma Aqueduct, the Petaluma Aqueduct, and the Russian River-Cotati Intertie (Sonoma Water 2021a, pg. 43).

Sonoma Water provides wholesale water to nine contractors under a Master Water Supply Agreement (MWSA), originally executed in 1979. Parties to the MWSA include:

- City of Santa Rosa
- City of Petaluma
- Valley of the Moon Water District
- City of Rohnert Park
- City of Cotati
- Sonoma Valley County Sanitation District
- Town of Windsor
- North Marin Water District
- Marin Municipal Water District

The MWSA governs how much water each contractor can receive from Sonoma Water, including the financial obligations and operational rules associated with use of that water. In accordance with the MWSA, the City of Santa Rosa has a fixed annual allocation of 29,100 AFY from Sonoma Water and receives approximately 95 percent of its potable water supply from Sonoma Water (City of Santa Rosa 2022, pg. 16).

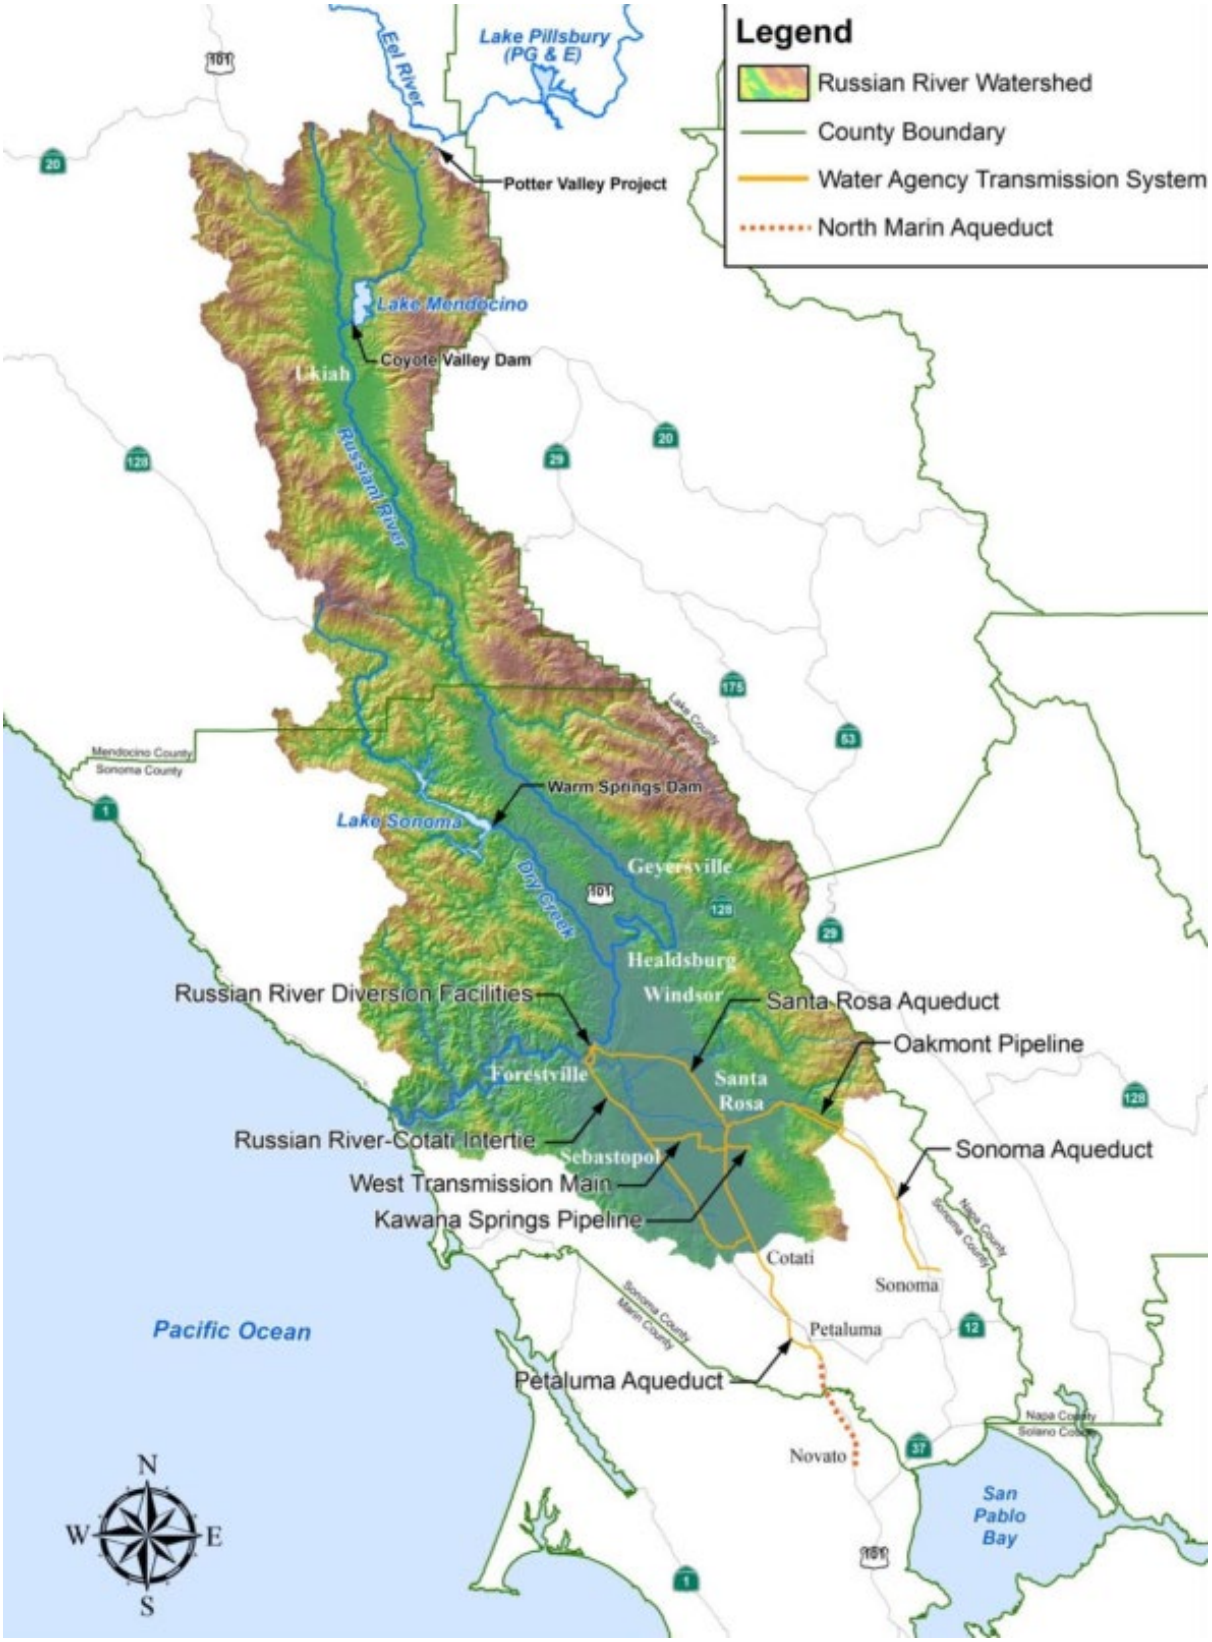
Figure 3 Sonoma Water Service Area and Key Infrastructure

Source: Sonoma Water 2021a, pg. 26

Surface Water

Sonoma Water primarily relies on surface water from the Russian River, which is diverted and conveyed to contractors in accordance with a variety of water rights permits and regulatory requirements. Specifically, the State Water Resources Control Board (SWRCB) issued water rights permit numbers 12947A, 12949, 12950, and 16596, which authorize Sonoma Water to store up to 122,500 AFY of water in Lake Mendocino and up to 245,000 AFY of water in Lake Sonoma, and to divert or redivert up to 180 cubic feet per second (cfs) of water from the Russian River up to a maximum of 75,000 AFY (Sonoma Water 2021a, pg. 40).

Figure 4 on the following page provides an overview of the Russian River watershed. This watershed drains an area of 1,485 square miles, including much of Sonoma and Mendocino counties. Two federal projects impound water in the Russian River watershed, including Coyote Valley Dam on the Russian River east of the city of Ukiah in Mendocino County (forming Lake Mendocino), and Warm Springs Dam on Dry Creek (a tributary of the Russian River) northwest of the City of Healdsburg in Sonoma County (forming Lake Sonoma). Sonoma Water was the local sponsor for these federal dams and partially financed their construction; therefore, Sonoma Water has the right to control releases from the water supply pools of both Lake Mendocino and Lake Sonoma. The "Russian River Project" refers collectively to both reservoirs and their associated facilities, including diversion, treatment, conveyance, and storage facilities. (Sonoma Water 2021a, pg. 42)



The Russian River Project is operated in accordance with Sonoma Water's water rights permits and SWRCB Decision 1610, which establishes minimum streamflow requirements for fish and wildlife protection and recreation. These flow requirements vary depending on hydrologic conditions classified as normal year, single dry year, and multiple dry year conditions, defined by Sonoma Water's water rights permits and the SWRCB's Decision 1610. Sonoma Water meets instream flow requirements by making releases within the Russian River from Coyote Valley Dam and Warm Springs Dam, as needed. (Sonoma Water 2021a, pg. 40)

In addition to the SWRCB permits and Decision 1610, there is also a Russian River Biological Opinion (BO) issued by the National Marine Fisheries Service (NMFS) that requires modification of flow requirements on the Russian River and Dry Creek to maintain the BO's Incidental Take Statement.[2] Sonoma Water's 2020 UWMP evaluation of future Russian River water supply availability assumes that proposed modifications to the minimum instream flow requirements are implemented as set forth in the BO (Sonoma Water 2021a, pg. 40). The original Russian River BO was in effect until September 2023, then was replaced by the 2025 Russian River BO issued by NMFS on April 29, 2015, with a 10-year term that governs operations through 2035 (NOAA 2025).

In 2006, the Restructured Agreement for Water Supply ("Restructured Agreement") was established to provide a contractual relationship between Sonoma Water and its contractors that includes quantities of water they require and at flow rates that are necessary to meet their peak day demands (subject to delivery limitations). The Restructured Agreement provides for the finance, construction, and operation of existing and new diversion facilities, transmission lines, storage tanks, booster pumps, conventional wells, and appurtenant facilities (Sonoma Water 2021a, pg. 44). The City of Santa Rosa receives about 95 percent of its potable water supply from Sonoma Water under the provisions of the Restructured Agreement (City of Santa Rosa 2022, pg. 17).

[2] The Russian River BO contains an Incidental Take Statement that allows Sonoma Water to "take" listed salmonid species within limits specified in the Russian River BO) while operating its water transmission system and flood control activities, without violating the federal Endangered Species Act (ESA). The California Department of Fish and Wildlife (CDFW) consistency determination gives similar protection to Sonoma Water under the California ESA. (Sonoma Water 2021a, pg. 40)

Figure 4 Russian River Watershed

Source: Sonoma Water 2021a, pg. 41

Groundwater

In addition to Russian River water, Sonoma Water also produces local groundwater from the Santa Rosa Plain Subbasin of the Santa Rosa Valley Groundwater Basin, which is described in detail below in Section 4.2, *Santa Rosa Plain Subbasin*; for the purposes of this section, an overview is provided of Sonoma Water's groundwater supply infrastructure as well as historic and projected reliance on groundwater produced from the Santa Rosa Plain Subbasin.

Sonoma Water has three groundwater supply wells in the Santa Rosa Plain Subbasin, located along Sonoma Water's aqueduct in the Santa Rosa Plain at Occidental Road, Sebastopol Road, and Todd Road. The wells range in depth from 794 to 1,060 feet, producing from the deep aquifer system, with pumping capacities ranging from 1,300 to 2,200 gallons per minute (gpm). The wells were constructed as emergency supply wells in 1977, in response to historic drought that occurred between 1975 and 1976. Although initially constructed for emergency use, relatively continuous operations of wells began in 1999 (Todd Road well), 2001 (Sebastopol Road well), and 2003 (Occidental Road well), and continued through 2008 (Sonoma Water 2021a, pg. 55).

In 2009, Sonoma Water shifted use of its groundwater wells to a seasonal and as-needed basis to better balance the conjunctive management of Russian River and groundwater supplies. During years when sufficient supply is available from the Russian River, groundwater production is limited. Prior to restricting its groundwater use to a seasonal and as-needed basis, Sonoma Water's groundwater use between 2006 and 2010 ranged from a high of 3,922 AF in 2008 to a low of 52 AF in 2010, with an average pumping rate of approximately 2,514 AFY. Since shifting to seasonal and as-needed use, groundwater production between 2011 and 2015 ranged from 172 to 1,271 AF for an average of 643 AFY; between 2016 and 2020, groundwater production declined substantially to an average production rate of 20 AFY. (Sonoma Water 2021a, pg. 55)

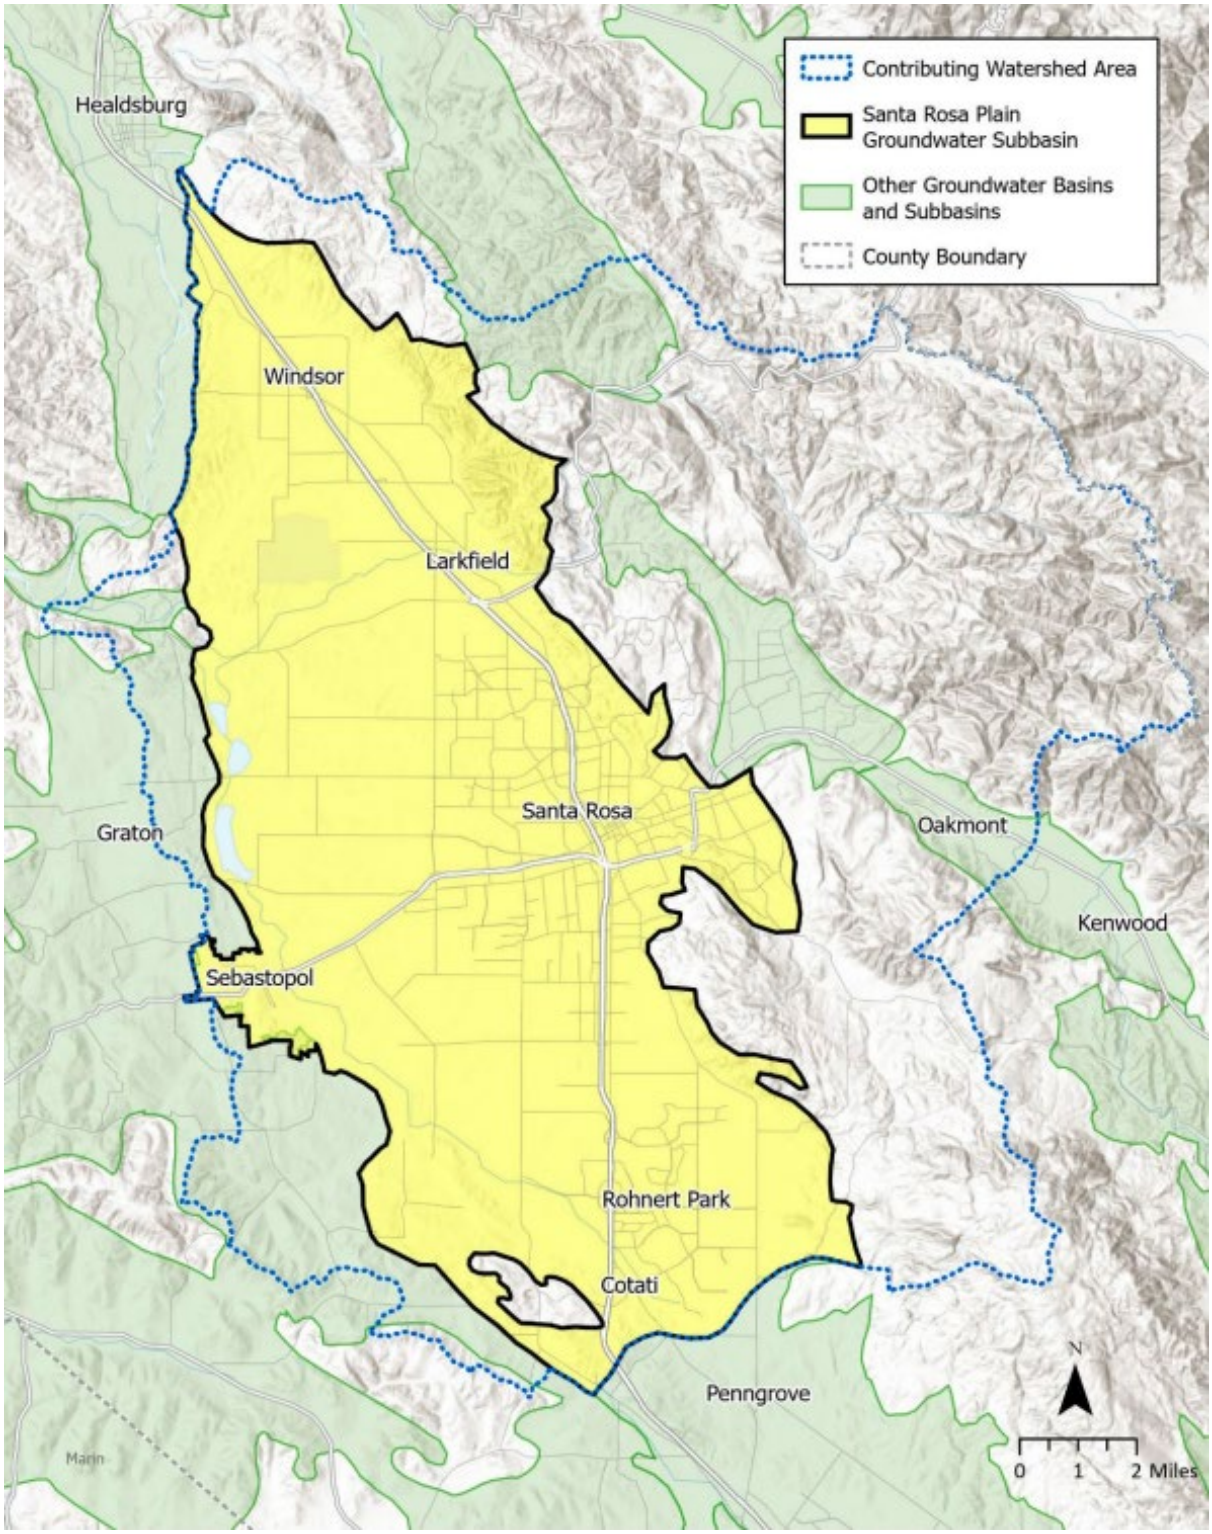
Sonoma Water conducts groundwater monitoring in seventeen dedicated monitoring wells placed near its three water supply wells. In general, the data collected through Sonoma Water's groundwater monitoring program indicate the following:

- Normal seasonal fluctuations in groundwater levels;
- Rapid drawdown and recovery in response to pumping cycles within the deeper monitoring wells perforated across the same horizon as the groundwater supply wells;
- No discernable short-term responses to pumping cycles within shallower monitoring wells;
- An overall trend of lowering of deeper zone groundwater levels between approximately 2000 and 2009 when the groundwater supply wells were operating relatively continuously followed by subsequent recovery of groundwater levels between 2009 and 2020; and
- General stability of shallow zone groundwater levels, with the exception of shallow zone monitoring wells located near the Occidental Road well which exhibited declines ranging between 15 to 30 feet between approximately 2000 and 2009 followed by subsequent recovery or stabilization of groundwater levels between 2009 and 2020 (Sonoma Water 2021a, pg. 56).

The findings above from Sonoma Water's groundwater monitoring program indicate relatively stable groundwater conditions in the Santa Rosa Plain Subbasin, with resilience to periods of heavier use at specific production wells (Sonoma Water 2021a, pg. 56).

4.2 Santa Rosa Plain Subbasin

Figure 5 on the following page provides an overview of the Santa Rosa Plain Subbasin; as shown, the City of Santa Rosa is in the central-eastern portion of the subbasin. The Santa Rosa Plain Subbasin is approximately 22 miles long from north to south, and its width varies between approximately six and nine miles. Water suppliers in the subbasin consist of the Town of Windsor and the Cities of Cotati, Rohnert Park, Santa Rosa, and Sebastopol, as well as Cal-American Water Company's Larkfield system. Residences located outside of urban water supply systems rely on groundwater; there are estimated to be between 4,000 and 5,500 private domestic wells throughout the subbasin. (Santa Rosa Plain GSA 2021, pg. 8)



The City of Santa Rosa's groundwater supply is derived exclusively from the Satna Rosa Plain Subbasin. The City has been managing groundwater through its Groundwater Master Plan (GMP) since 2013, as well as through the Santa Rosa Plain Subbasin GSP since 2022, which was development for compliance with SGMA; see "Projects and Management Actions" for further discussion. The City has six municipal wells in the Santa Rosa Plain Subbasin. The City's historical pumping rate prior to 1959 was approximately 2,870 AFY, which resulted in no overdraft conditions to the subbasin (City of Santa Rosa 2022, pg. 71). In 1959, the City began relying on Sonoma Water for the majority of its potable water supply and reduced reliance on its municipal wells. Based on groundwater conditions, historic and projected uses, and budget and sustainable yield data (see "Groundwater Budget"), the City plans on 2,300 AFY of reliable groundwater supply from the Santa Rosa Plain Subbasin (City of Santa Rosa 2022, pg. 78).

Hydrogeologic Setting

The Santa Rosa Plain Subbasin is located in a geologically complex region where faults serve as major structural boundaries for groundwater movement, causing groundwater resources to be highly variable throughout the subbasin. Clay layers serve as aquitards between shallow and deep aquifer systems, with recharge primarily occurring through direct infiltration of precipitation from storm events and surface water in streams. Recharge to the deeper aquifer zones occurs over many years and likely occurs through leakage from overlying shallow aquifers and mountain-front recharge along the margins of the valley. (Santa Rosa Plain GSA 2021, pg. 9)

There are productive freshwater aquifers at shallower depths, generally less than 200 feet where many residential wells are drilled, as well as at deeper depths, where many municipal, industrial, and agricultural wells are constructed; the deepest wells extend to approximately 1,500 feet. Although aquifer systems are grouped separately, as shallow and deep systems, there is variable connectivity between them, depending upon the presence and thickness of clay aquitards. In many areas the shallow aquifer system is locally and seasonally connected to creeks and streams and in some areas where the depth to groundwater is very shallow, the shallow aquifer system provides water for vegetation communities (also known as "groundwater dependent ecosystems"). The deep aquifer system is generally confined to semi-confined and is not spatially connected with surface water (although there is hydraulic connectivity between the shallow and deep aquifers, which do connect surface water to the deep aquifer system). (Santa Rosa Plain GSA 2021, pg. 9)

Figure 5 Santa Rosa Plain Subbasin

Source: Santa Rosa Plain GSA 2021, pg. ES-2

Groundwater Levels

Groundwater monitoring conducted in 37 shallow aquifer wells and 24 deep aquifer wells indicate stable groundwater levels in the shallow system, with increasing trends in 16 percent of the shallow wells (six of 37), and stable or increasing levels in the deep aquifer system, with increasing trends in nearly 63 percent of the deep wells (15 of 24). Historically, groundwater levels in the Rohnert Park-Cotati area declined by more than 100 feet in the 1980s and 1990s due to population growth and associated municipal pumping of the local groundwater. However, these trends have been recovering since then, through the use of imported surface water and recycled water from Sonoma Water, which reduces reliance on groundwater resources. (Santa Rosa Plain GSA 2021, pg. 175)

Groundwater Budget

The amount of groundwater in storage at any time depends upon multiple factors including the weather, overall climatic (drought) conditions, and groundwater pumping rates. Water budgets for the Santa Rosa Plain Subbasin were developed for the GSP to support the identification of appropriate sustainable management practices, accounting for all inflows and outflows to the subbasin including as connected to surface waters.

Table 4, below, provides an overview of inflows and outflows to the Santa Rosa Plain Subbasin under several projections, including the historical period represented by years 2012-2018, projected conditions over years 2021-2040, and extended projections for years 2021-2070 to account for extended drought conditions initiating in 2050 (Santa Rosa Plain GSA 2021, pgs. 232-233, 256-258).

Table 4 Average (Mean) Inflows and Outflows, Santa Rosa Plain Subbasin (AFY)

	2012-2018	2021-2040	2021-2070
Inflows			
Deep percolation (precipitation and applied water)	25,200	32,800	28,800
Streambed recharge to groundwater	14,900	16,700	16,900
Septic system return flows	1,200	1,400	1,500
Subsurface inflow from surrounding watershed	2,000	2,000	2,000
Subsurface inflow from neighboring basins	7,400	7,700	8,000
Total Inflows	**50,700**	**60,600**	**57,200**
Outflows			
Agricultural pumping	10,400	12,600	13,800
Groundwater evapotranspiration	9,500	11,700	10,600
Subsurface outflow to adjacent basins	4,700	4,300	4,000
Discharge to streams	13,700	14,500	12,800
Surface leakage	5,200	6,200	4,900
M&I and rural Domestic pumping	9,500	11,300	12,300
Total Outflows	**53,000**	**60,600**	**58,400**
Balance (Total Inflows – Total Outflows)	-2,300	0	-1,200

AFY = acre-feet per year

Source: Santa Rosa Plain GSA 2021, pgs. 232-233, 256-258

The table above shows that over the historic period (2012-2018), storage change in the Santa Rosa Plain Subbasin was approximately -2,300 AF, indicating that 2,300 AF more water flowed out of the subbasin than into it. Conditions are balanced during the current period (2021-2040), reflecting the projected wet and very wet climate change scenario. The full projection (2021-2070) included an extended drought beginning in 2050, which resulting in simulated average loss of groundwater in storage of approximately 1,200 AF. (Santa Rosa Plain GSA 2021, pg. 16)

The sustainable yield for the subbasin is defined as 23,900 AFY, where "sustainable yield" is the amount of groundwater that can be withdrawn without causing undesirable results. The calculated sustainable yield is based on non-drought conditions and does not account for projects and management actions (PMAs), which are identified in the Santa Rosa Plain Subbasin GSP and implemented to create and maintain sustainable groundwater conditions for compliance with the Sustainable Groundwater Management Act (SGMA); PMAs are discussed further under "Projects and Management Actions," below. If actual climate conditions in the future are better represented by the drought conditions modeled over years 2050-2070, then the sustainable yield would be reduced to provide balanced conditions in the subbasin and PMAs would be implemented to avoid undesirable results. (Santa Rosa Plain GSA 2021, pg. 270)

Projects and Management Actions

The DWR has classified the Santa Rosa Plain Subbasin as Medium Priority; therefore, in accordance with SGMA, it is required to be managed by a Groundwater Sustainability Agency (GSA) through implementation of a DWR-approved GSP to provide and maintain sustainable conditions. The Santa Rosa Plain GSA is a Joint Exercise of Powers Agreement (JPA) formed by the cities of Cotati, Rohnert Park, Santa Rosa, and Sebastopol, the Town of Windsor, Gold Ridge Resource Conservation District, Sonoma County, Sonoma Water, Sonoma Resource Conservation District, and an organized group of mutual water and Public Utilities Commission-regulated companies (Independent Water Systems).

The Santa Rosa Plain Subbasin GSP identifies PMAs under three groups of projects, summarized below. PMAs are implemented under an adaptive management strategy that allows the GSA to react to the progress and outcomes of PMAs as they are implemented, and adjust PMA efforts as needed to avoid undesirable results in the subbasin. (Santa Rosa Plain GSA 2021, pgs. 373-382)

- **Group 1: Water Use Efficiency and Alternate Water Source Projects.** These projects include smaller-scale dispersed land-owner projects such as turf removal, rainwater harvesting, and stormwater capture for reuse, and are initially planned as voluntary, incentive-based projects.
- **Group 2: Stormwater Capture and Recharge.** These projects include retaining and recharging runoff through low-impact development, on-farm recharge of local runoff, and recharge of unallocated storm flows and managed floodplain inundation. These actions require temporary diversions of storm flows from streams, and conveyance to recharge locations.
- **Group 3: Aquifer Storage and Recovery (ASR).** An ASR program would involve diverting surplus Russian River water during wet weather conditions (winter and spring seasons) and storing it in the deep aquifer system for later recovery and use during dry weather conditions (summer and fall seasons) or emergency situations.

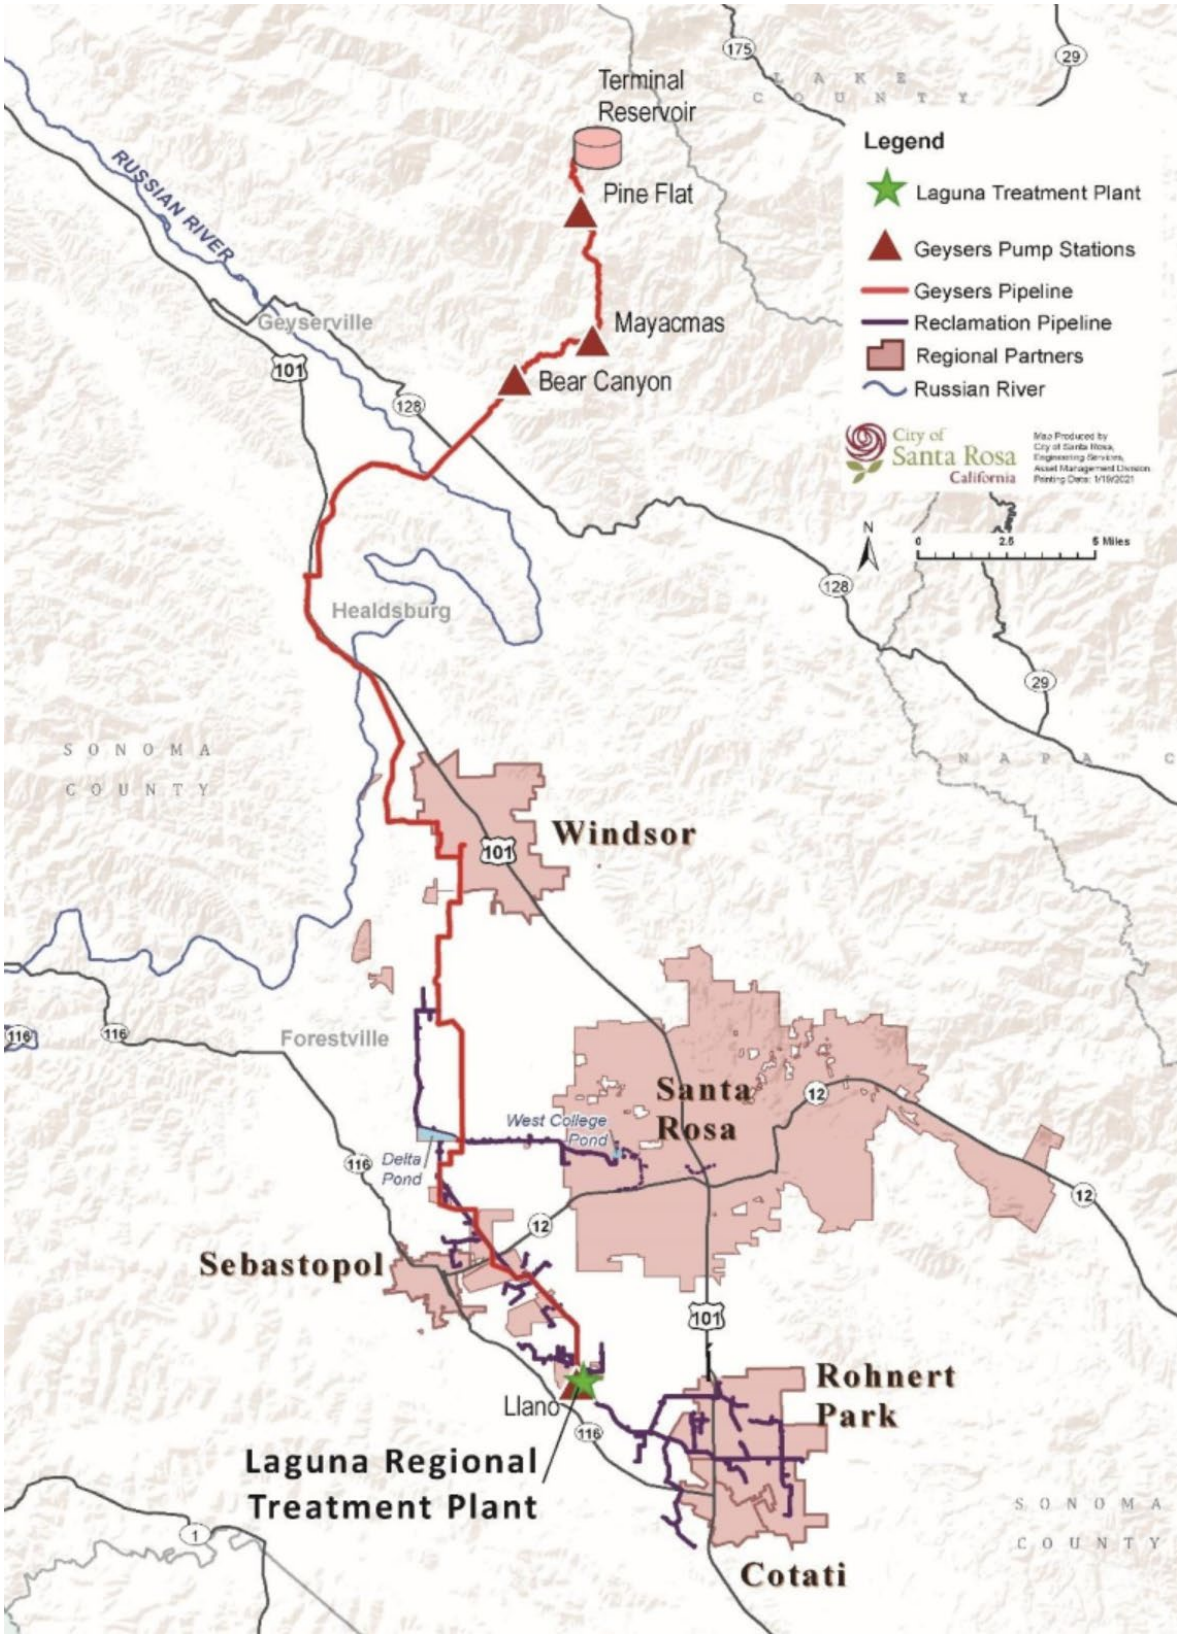
Table 5, below, provides an overview of the anticipated water supply benefits associated with implementation of PMAs for each group of projects listed above.

Table 5 Anticipated Supply Benefits of Projects and Management Actions

PMA	Description	Supply Benefit
Group 1: Water Use Efficiency and Alternate Water Source Projects	Reduce crop consumptive use (agricultural pumping); reduce rural domestic pumping	1,800 AFY
Group 2: Stormwater Capture and Recharge	Capture surface runoff and place in recharge basins for surface infiltration	240 AFY
Group 3: Aquifer Storage and Recovery	Use existing municipal wells to store surplus Russian River water in deep aquifer system	940 AFY
Total		**2,980 AFY**

Source: Santa Rosa Plain GSA 2021, pg. 382

As shown above, PMAs identified for the Santa Rosa Plain Subbasin are designed to provide a cumulative benefit to groundwater supply of up to 2,980 AFY.



4.3 Recycled Water

The City of Santa Rosa operates and maintains the LTP for the Santa Rosa Regional Water Reuse System (Regional System), which consists of a recycled water system serving more than 225,000 residents and 6,500 businesses for the Cities of Cotati, Rohnert Park, Santa Rosa, and Sebastopol, and the South Park Sanitation District and portions of unincorporated Sonoma County (City of Santa Rosa 2022, pg. 79). Figure 6 on the following page provides an overview of the Regional System; as shown, the LTP is located south-southwest of the City of Santa Rosa, and the pipelines connecting the LTP to the City include the Geysers Pipeline and the Reclamation Pipeline.

The LTP is a tertiary level treatment facility that receives wastewater from homes, businesses, and industry located within the Cities of Santa Rosa, Rohnert Park, Sebastopol, and Cotati, and the South Park Sanitation District. It has a total permitted average daily dry weather flow capacity of 21.34 million gallons per day (MGD), with an average daily flow of 15.1 MGD and average dry weather flow of 13.6 MGD in 2020 (City of Santa Rosa 2022, pg. 79). The North Coast Regional Water Quality Control Board (RWQCB) regulates wastewater discharges from the Regional System. The LTP's primary point of discharge within the Regional System is Delta Pond at the confluence of Santa Rosa Creek and the Laguna de Santa Rosa. Under the North Coast RWQCB guidelines, tertiary treated water can be discharged only between October 1 and May 14. Discharge cannot exceed five percent of the Russian River flow. (City of Santa Rosa 2022, pg. 81)

In the City of Santa Rosa, recycled water from the LTP is used for landscape irrigation at City facilities including the municipal services center, bus transfer station, Finley Park, and A Place to Stay sports complex, as well as multi-family residential complexes, institutions, and business parks (City of Santa Rosa 2022, pg. 82). The City's current and historical use of recycled water has been limited to areas within proximity to the Regional System's distribution network, with an average use rate of approximately 120 AFY (City of Santa Rosa 2022, pg. 82). In 2020, approximately 16,935 AF of treated wastewater was produced at the LTP, approximately 110 AF of which was used by the City of Santa Rosa, and the remainder of which was used outside of Santa Rosa's service area but within the Regional System (City of Santa Rosa 2022, pg. 82, 84).

Figure 6 Santa Rosa Regional System

Source: City of Santa Rosa 2022, pg. 80

5 Water Supply Reliability

This section presents water supply reliability projections for the City of Santa Rosa's supply sources, including during normal year, single dry year, and multiple dry year conditions, as presented in the City's 2020 UWMP and Sonoma Water's 2020 UWMP.

5.1 Normal Water Year

The normal water year condition represents the water supplies anticipated to be available during normal conditions. Table 6, below, presents normal year projections of supply and demand for the City of Santa Rosa.

Table 6 City of Santa Rosa - Normal Year Supply and Demand (AFY)

	2025	2030	2035	2040	2045
Supply totals	31,540	31,540	31,540	31,540	31,540
Demand totals	21,660	23,083	23,652	24,329	25,097
Difference	9,880	8,457	7,888	7,211	6,443
Shortage	0%	0%	0%	0%	0%

AFY = acre-feet per year

1. When excess supply is available, the projected supply is shown as equal to demand.

Source: City of Santa Rosa 2022, pg. 105

As shown above, under normal year conditions, the City of Santa Rosa forecasts surplus water supply available through 2045.

5.2 Single Dry Year

The single dry year is the year that represents the lowest water supply available. Table 7, below, presents single dry year projections of supply and demand for the City of Santa Rosa.

Table 7 City of Santa Rosa – Single Dry Year Supply and Demand (AFY)

	2025	2030	2035	2040	2045
Supply totals	22,660	20,639	20,937	20,978	21,689
Demand totals	21,660	20,639	20,937	20,978	21,689
Difference	1,000	0	0	0	0
Shortage	0%	0%	0%	0%	0%

AFY = acre-feet per year

1. When excess supply is available, the projected supply is shown as equal to demand.

Source: City of Santa Rosa 2022, pg. 105

As shown above, under single dry year conditions, the City of Santa Rosa forecasts sufficient water supply available to meet demands, with a slight surplus in 2025 of 1,000 AF. Following 2025, the City anticipates that during single dry year conditions, there would be a shortfall of imported surface water supply available from Sonoma Water, for the single-dry year that is hydrologically equivalent to the driest water year on record (1977) (City of Santa Rosa 2022, pg. 103). Starting in 2030, Sonoma Water's demands are anticipated to exceed available supplies due to Lake Sonoma declining below 100,000 AF before July 15th and the subsequent requirement by Sonoma Water's water rights to decrease diversions by 30 percent (Sonoma Water 2021a, pg. 76). During these single dry years, Sonoma Water works with its customers, including the City of Santa Rosa, to reduce water demands and utilize local supplies. The City of Santa Rosa has local water supply sources through groundwater resources and recycled water, neither of which would be reduced in availability during the single dry year condition. To mitigate the shortfall in contract water supply, the City would implement its Shortage Plan to ensure demand does not exceed supply should such a shortage occur during a single-dry year (City of Santa Rosa 2022, pg. 103).

5.3 Multiple Dry Years

The five-year consecutive drought period (multiple dry years) period represents the driest five-year historical sequence on record for the water supplier. Table 8, below, presents multiple dry year projections of supply and demand for the City of Santa Rosa.

Table 8 City of Santa Rosa – Multiple Dry Year Supply and Demand (AFY)

		2025	2030	2035	2040	2045
First Year	Supply totals	22,660	24,083	24,652	25,329	26,097
	Demand totals	21,660	23,083	23,652	24,329	25,097
	Difference	1,000	1,000	1,000	1,000	1,000
Second Year	Supply totals	22,660	24,083	24,652	25,329	26,097
	Demand totals	21,660	23,083	23,652	24,329	25,097
	Difference	1,000	1,000	1,000	1,000	1,000
Third Year	Supply totals	22,660	24,083	24,652	25,329	26,097
	Demand totals	21,660	23,083	23,652	24,329	25,097
	Difference	1,000	1,000	1,000	1,000	1,000
Fourth Year	Supply totals	22,660	24,083	24,652	25,329	26,097
	Demand totals	21,660	23,083	23,652	24,329	25,097
	Difference	1,000	1,000	1,000	1,000	1,000
Fifth Year	Supply totals	22,660	24,083	24,652	25,329	26,097
	Demand totals	21,660	23,083	23,652	24,329	25,097
	Difference	1,000	1,000	1,000	1,000	1,000

AFY = acre-feet per year

1. When excess supply is available, the projected supply is shown as equal to demand.

Source: City of Santa Rosa 2022, pg. 108

As shown above, under multiple dry year conditions for five-year periods that are hydrologically equivalent to the five driest consecutive years on record (1987-1991), the City would have adequate water supplies available to meet demands through 2045 (City of Santa Rosa 2022, pg. 104).

6 Conclusions

The information and analysis presented in this WSA demonstrate that sufficient water supply would be available to meet the needs of the proposed project, including up to 50 new full-time employees and 1,500 new residential units, over a future projection of 20 years and with consideration to normal year climate conditions, single dry year conditions, and multiple dry year conditions.

As discussed in Section 3.4, *Is There a Current UWMP that Accounts for the Proposed Project Water Demand*, the City of Santa Rosa's General Plan 2050 EIR evaluated a projected growth of up to 24,090 housing units, accounting for a potential 4,455 new units under the RHNA 7th Cycle (2031-2039), 4,380 new units under the RHNA 8th Cycle (2039-2047), and up to 4,430 new units under the RHNA 9th Cycle (2047-2055) (City of Santa Rosa 2025a, pg. 77). In total, the EIR accounted for 13,265 residential units that have not yet been proposed but are anticipated to be required under future RHNA cycles during the lifetime of the General Plan 2050 (City of Santa Rosa 2024b, pg. 627). The proposed project would introduce 1,500 new residential units, or approximately 11 percent of the additional 13,265 residential units accounted for in the General Plan 2050 EIR.

The City's General Plan 2050 EIR determined that water demands associated with buildout of the General Plan 2050 and 13,265 additional residential units would be approximately 24,316 AFY (City of Santa Rosa 2024b, pg. 627). As shown in Table 6, the City's 2020 UWMP determined that total water supply available in 2045 would be approximately 25,097 AFY. As such, the City would have a surplus supply of approximately 781 AFY in 2045, after accounting for full buildout of the General Plan 2050 and 13,265 additional residential units (City of Santa Rosa 2025a, pg. 77). As shown in Table 2, the proposed project would introduce a new water demand of up to 413 AFY. Development associated with the proposed project is considered accounted for by the additional residential units analyzed in the City's General Plan 2050 EIR. However, even if the proposed project were in addition to that development, the City's anticipated supply surplus of 781 AFY in 2045 is greater than the proposed project's demand of 413 AFY.

The tables presented in Section 5, *Water Supply Reliability*, demonstrate that the City would have sufficient water supply available to meet all projected demands under normal year, single dry year, and multiple dry year conditions through 2045. While Sonoma Water forecasts potential shortages during single dry year conditions, as discussed in Section 5.2, *Single Dry Year*, the City of Santa Rosa would maintain sufficient supplies to meet all projected demands due to the availability of local supply sources and compliance with shortage response actions defined in the UWMPs. Sufficient water supply would be available for the proposed project over a 20-year planning horizon, and during normal year, single dry year, and multiple dry year conditions.

Subject: New Sonoma County Government Center – Evacuation Travel Time Assessment

---

This memorandum documents the evacuation travel time assessment for the proposed New Sonoma County Government Center (the project) in Santa Rosa, California. This analysis provides the technical justification for the evacuation-related CEQA impact conclusions in the project's EIR by evaluating the project's effect on evacuation times for the surrounding area during potential wildfire events.

Executive Summary

The purpose of this evaluation is to document the effect of the New Sonoma County Government Center[1] on evacuation times for the study area during potential wildfire events, as displayed in **Figure 1** and **Figure 2**. This quantitative analysis was performed to address wildfire-related considerations under Appendix G of the CEQA Guidelines. As is typical, updates to Appendix G and related case law have resulted in an increased focus on evaluating a project's effect on evacuation conditions. Quantitative evacuation travel time assessments may satisfy the need to study a project's effect on evacuation times for the surrounding area. As this is a newer area of study under CEQA, few studies of this type have been completed for CEQA purposes, and wildfire behavior is inherently unpredictable. Therefore, this analysis is not an exhaustive review of all potential wildfire and evacuation scenarios in the study area. Rather, the analysis is based on evacuation scenarios developed through coordination with the project team's local experts in wildfire behavior and evacuation events and represents a good faith effort at disclosure of the project's potential effects on evacuation times for CEQA purposes.

Sonoma County has undergone multiple wildfire evacuation events since 2017, including (but not limited to) the 2017 Tubbs Fire in Santa Rosa (amongst the larger 2017 Sonoma County Fire Complex), and the 2020 Glass Fire in Kenwood. In the case of the Tubbs Fire, evacuations occurred with little warning as the Tubbs Fire was driven by high winds. In the case of the Glass Fire,

---

[1] The New Sonoma County Government Center proposes to replace five existing County office buildings with a consolidated office building of up to 250,000 square feet, a 7,000- to 13,000-square-foot Emergency Coordination Center (ECC), up to approximately 20,000 square feet of commercial uses, and up to 1,500 residential units.

evacuations occurred with some warning time as the Glass Fire had started in Napa County the day prior and eventually crossed into the SR 12 corridor, east of Santa Rosa.

Table 1 summarizes evacuation travel time estimates for both fire scenarios. As seen below, the project would contribute to an increase in travel time to exit the evacuation area of less than 15 minutes, which is the minimum resolution of the evacuation model. The 15-minute resolution of the model balances transportation engineering simulation capabilities with the unknowns inherent in wildfire evacuation modeling and analysis. These results are reasonable given the large geographic area of the evacuation event and the numerous evacuation routes across the roadway grid network to the south, southwest, and west of the project site.

Table 1. Summary of Fire Evacuation Travel Time Estimates

Scenario	Total Elapsed Time to Exit Evacuation Area[1]		
	No Project	Plus Project	Delta
Northeast Fire Scenario			
Base Year 2025	4 hours, 15 minutes	4 hours, 15 minutes	<15 minutes
Cumulative Year 2040	6 hours, 30 minutes	6 hours, 30 minutes	<15 minutes
Southeast Fire Scenario			
Base Year 2025	3 hours, 30 minutes	3 hours, 30 minutes	<15 minutes
Cumulative Year 2040	5 hours, 30 minutes	5 hours, 30 minutes	<15 minutes

Source: Fehr & Peers, 2026.
Notes:
1. Times are provided to the nearest 15 minutes.

To supplement the evacuation travel time results, which are reported in 15-minute increments, Fehr & Peers evaluated changes in traffic operations at key locations within the roadway network. This review focused on the most constrained or "critical" segment that operates below the model's evacuation completion threshold (15-minute step volume-to-capacity [V/C] ratio of < 0.75), identified as westbound Fountaingrove Parkway between Round Barn Boulevard (west) and Mendocino Avenue for both wildfire scenarios. This critical segment ultimately controls the evacuation time estimate calculation.

Under Plus Project conditions for both scenarios, the increase in congestion on this critical segment is minimal (less than 0.05 V/C in the last 15-minute step), which falls within the model's margin of error and would not be perceptible to evacuees. This finding is further reinforced by the segment's location north of the project site, outside of the project's primary evacuation directionality to US 101 via Bicentennial Way and Steele Lane. Accordingly, the project does not result in a meaningful change in evacuation conditions under either fire scenario and its contribution to evacuation travel time is considered negligible.

Analysis Methodology

Project Description

The project proposes to redevelop a portion of the existing County Administration Center (CAC), located along Administration Drive and bounded by Bicentennial Way, Steele Lane, Mendocino Avenue, and US 101 in Santa Rosa, California. The project proposes to replace five existing County office buildings with a new, consolidated office building of up to 250,000 square feet, representing a net increase of up to 64,500 square feet compared to existing conditions. The project also proposes construction of a 7,000- to 13,000-square-foot Emergency Coordination Center (ECC), up to approximately 20,000 square feet of commercial uses, and up to 1,500 residential units across approximately 25 buildings. The office building would accommodate up to approximately 1,200 employees. This represents an increase of 18 employees compared to the existing office uses. The project would also include approximately 1,050 office parking spaces. This represents a decrease of 367 office parking spaces compared to existing conditions

Technical Approach

This study conservatively considers existing and likely future developments throughout the greater Santa Rosa area and includes a list of 30 proposed and approved developments that was confirmed with County staff.

Based on the wildfire history in the project area, the project team defined two study scenarios for the analysis of the project's effect on evacuation times: a fire from the northeast and a fire from the southeast. Each scenario is analyzed for near-term (2025) and far-term (2040) buildout conditions, both with and without the project. While each scenario involves a different area being evacuated, the overall evacuation analysis assumes a common study area, which encompasses the evacuation areas of both scenarios and other adjacent areas. The study area and evacuation areas for each scenario are shown in **Figure 1** and **Figure 2**. The boundaries of these areas were proposed by Fehr & Peers and confirmed by County staff and fire officials.

The evacuation scenarios are modeled using the EVAC+ methodology developed by Fehr & Peers. The EVAC+ methodology uses data from the Sonoma County Transportation and Climate Authority (SCTCA) travel demand model, as well as US Census data, big data resources, and expert opinions, to model evacuation travel patterns. The evacuation modeling uses a dynamic traffic assignment (DTA) model to evaluate evacuation conditions (in lieu of the static assignment in the SCTCA model), which routes evacuating trips between origin points (residences, offices, wineries, etc.) to evacuation gateways at the boundary of the evacuation area. The model includes "background" traffic unaffected by the evacuation for the whole study area to produce realistic congested conditions. The evacuation analysis for this project was conducted in the PTV Visum software.

The ultimate output of the EVAC+ analysis is the time required to fully evacuate the evacuation area for each alternative as shown in **Figure 1** and **Figure 2**, respectively. This is assumed to occur when the network within the evacuation area returns to an uncongested state (all links with 15-minute simulation step volume to capacity ratio of 0.75 or less, indicating exhaustion of evacuation demand on the link). A comparison of the No Project and Plus Project evacuation time estimates indicates the project's effect on evacuation times for the evacuation area.

Traffic Demand

Each evacuation scenario models traffic for both evacuation purposes and general background traffic that would occur regardless of whether an evacuation was called. The analysis assumes a mass evacuation of the applicable evacuation area concurrent with a theoretical peak in background traffic associated with the Friday before Labor Day, combining holiday travel and typical weekday PM peak commute conditions. Expert opinion considers this set of conditions to represent a reasonably conservative combination of travel demand for a wildfire evacuation scenario. Similarly, the analysis assumes that the project site is at full occupancy for all residential, office, and commercial uses, which would represent a reasonably conservative scenario for the additional evacuation demand that would be added to the roadway system under Plus Project conditions.

Evacuation Traffic Demand

Evacuation demand was determined by model zone using socioeconomic data from the US Census, land use data from the SCTCA travel demand model, and other sources. Data from the SCTCA model included the quantity and type of land uses within each model zone, such as residential, commercial, office, and other uses. Evacuation vehicle demand was then estimated by applying land use-specific vehicle generation factors to these uses. For non-residential land uses, vehicle generation factors were developed based on a combination of Institute of Transportation Engineers data[2], local municipal code parking requirements, and other regional and national data sources, and reflect both employee and visitor evacuation demand, as appropriate. For residential uses, evacuation demand was estimated using vehicle ownership data from the American Community Survey[3], applied at the Census tract level within the study area to estimate the number of vehicles per household. These assumptions were applied to all model zones to estimate total evacuation vehicle demand within each evacuation area for the two scenarios analyzed.

Background Traffic Demand

The background traffic represents all travel in the network before the evacuation begins and all travel unaffected by the evacuation for the duration of the evacuation period. Background traffic was derived from the SCTCA model for 2019 and 2040 conditions; the near-term 2025 demand was then developed by interpolating between these years. Based on a review of metrics from StreetLight Data[4] looking at the Friday before Labor Day 2024 and 2025 against typical weekday conditions in September 2025, the Friday before Labor Day does not see appreciably higher traffic volumes on local streets than the average weekday, which is the scenario represented by the SCTCA model. However, based on a similar review of PeMS data from Caltrans, freeway volumes on the Friday before Labor Day are moderately higher than on a typical weekday, approximately 15% higher in the northbound direction and 4% higher in the southbound direction; these scaling factors are applied to freeway through trips for all scenarios. In order to convert the one-hour vehicle volumes from the SCTCA model to the eight hours of demand required for EVAC+, the demand is scaled up by a factor of 5.3 based on metrics from StreetLight Data. This scaled up demand is distributed over the full

[2] Institute of Transportation Engineers Trip Generation Manual, 11th Edition was used to develop vehicle generation factors for office and retail uses.

[3] US Census Bureau. "Household Size by Vehicles Available." American Community Survey, ACS 5-Year Estimates Detailed Tables, Table B08201.

[4] StreetLight Data is a big data provider which produces vehicle metrics such as volume and vehicle routing patterns based on connected vehicle data. StreetLight metrics are available both for specific days and for aggregates of broad periods.

analysis period based on demand distributions extracted from StreetLight Data, for travel on local streets, and PeMS, for travel on freeways.

For the first 90 minutes of the mandatory evacuation order, background traffic is assumed to still access the evacuation area. Although it is unlawful to enter an area under evacuation orders, expert opinion cannot guarantee that background traffic would cease to enter the evacuation area as soon as the evacuation order is given. Therefore, this is a reasonably conservative assumption to capture the effect of potentially unlawful travel during an evacuation. Following 90 minutes after the mandatory evacuation order (at 6:00 PM), background traffic is assumed to no longer access the evacuation area.

Model Roadway Network

The roadway network for the DTA model was derived from the SCTCA travel demand model for the full study area using a subarea extraction and was revised to more accurately reflect local road conditions. Additional roadway network detail was added, particularly in central Santa Rosa, to more accurately reflect the grid network surround the project and numerous evacuation routes. Speed, capacity, and lane geometry assumptions from the SCTCA model were calibrated to local conditions. The following capacity assumptions were applied:

- **All minor roadways**: 700 vehicles per hour per lane
- **All major roadways in flat areas**: 900 vehicles per hour per lane, except for Old Redwood Highway, which was assumed as 1,600 vehicles per hour per lane since it operates similarly to a rural arterial with limited signal interruptions
- **All major roadways in hilly areas**: 800 vehicles per hour per lane, except for (1) Fountaingrove Parkway east of Bicentennial Way, which was assumed as 1,200 vehicles per hour per lane and (2) Mark West Springs Road, which was assumed as 1,300 vehicles per hour per lane, since both roadways operate with limited signal interruptions
- **Freeway general purpose lanes**: 1,500 vehicles per hour per lane
- **Freeway HOV lanes**: 2,000 vehicles per hour per lane
- **Freeway ramps**: 1,350 vehicles per hour per lane
- **Left turns from College Avenue and Steele Lane onto US 101**: 400 vehicles per hour per lane

Additional capacity adjustments were applied to reflect changing conditions over the course of the model analysis period. Capacities for all roadways within the evacuation areas were reduced by 15% to capture the effect of wildfire conditions that deteriorate driving conditions, such as smoke, debris, and driver confusion. Additionally, certain model roadways entering the evacuation area were closed after the start of evacuation (as described under each scenario below) to reflect roadway closures that are assumed to be in effect to prevent drivers from travelling into the evacuation area. Finally, freeway lane capacities were adjusted to reflect congested conditions caused by bottlenecks outside of the study area during the evening peak period; freeway operations were compared against Google Maps typical traffic observations to ensure reasonableness before an evacuation is called.

Methodology Limitations

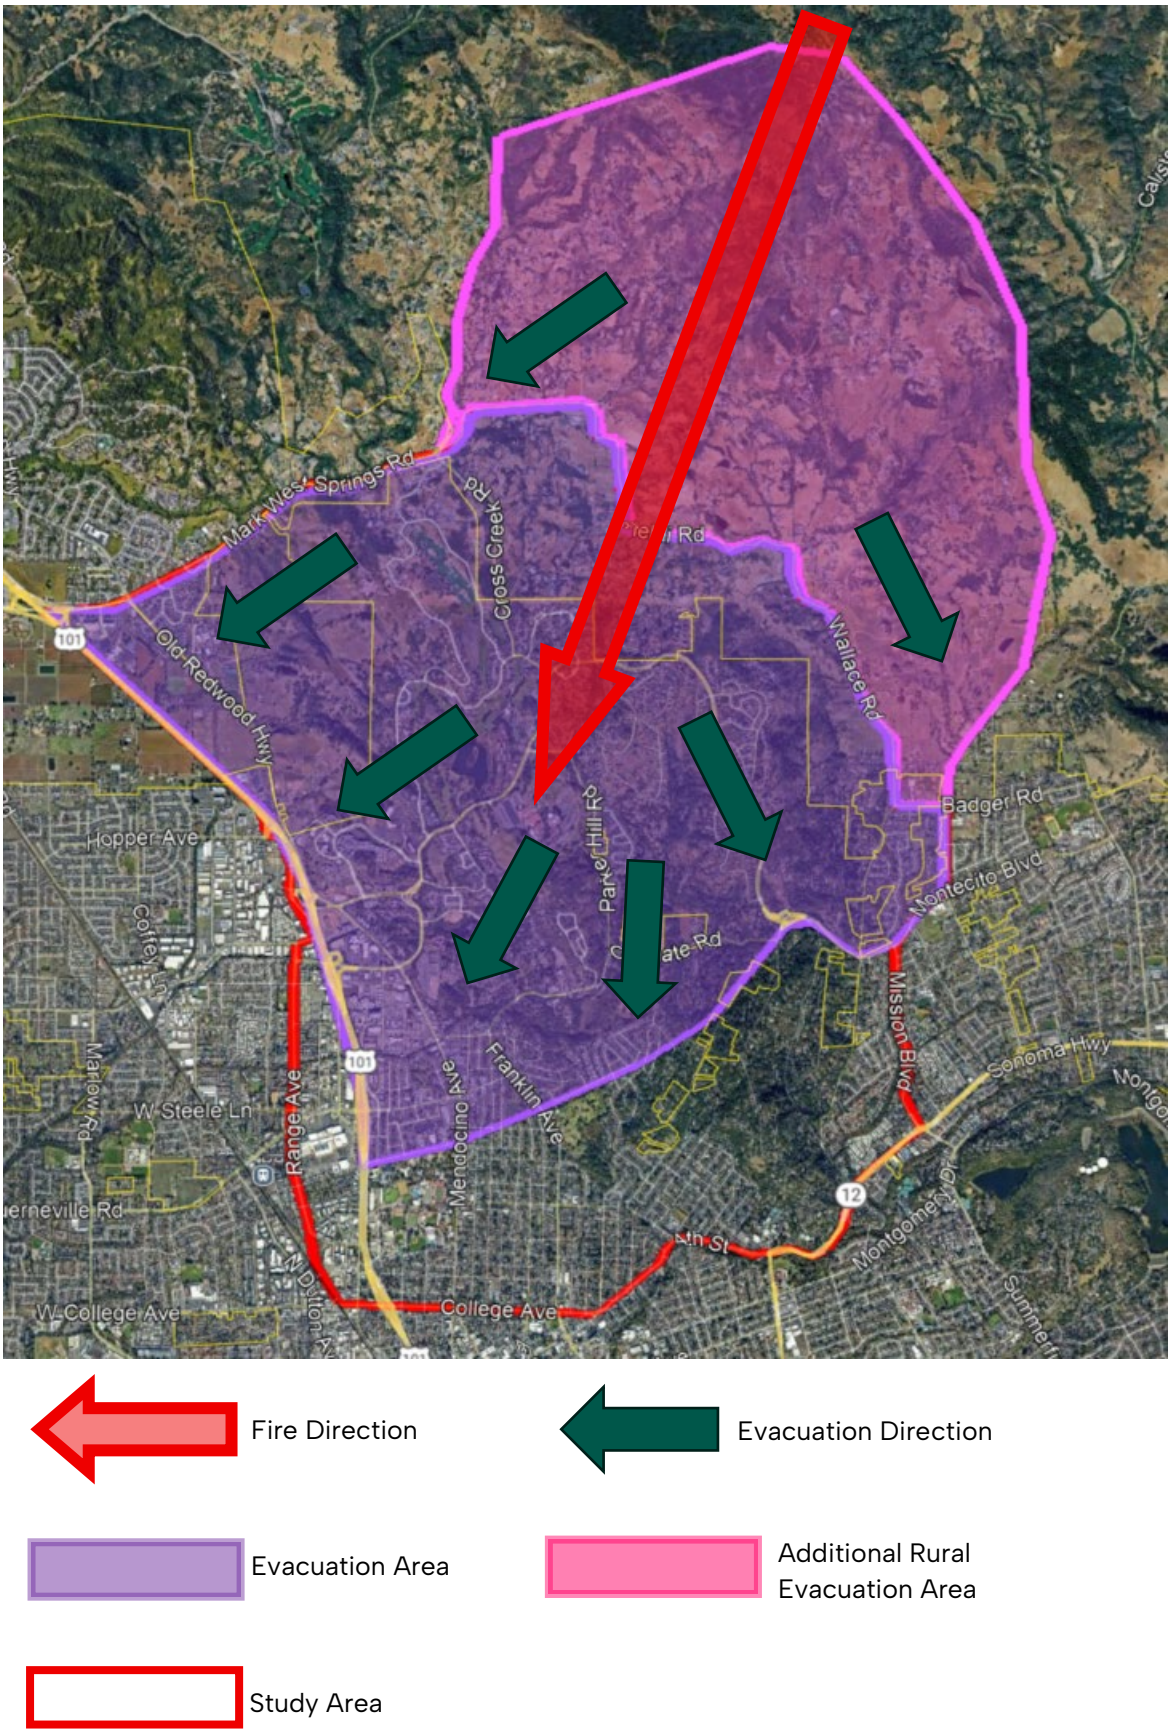
The evacuation analysis is subject to inherent limitations associated with travel demand forecasting and dynamic traffic assignment modeling of evacuations. The EVAC+ methodology simulates traffic conditions using a series of assumptions related to evacuation demand, traveler behavior, roadway capacities, and wildfire conditions, all of which introduce uncertainty into the results. Traffic conditions are modeled at a 15-minute temporal resolution; therefore, changes in total evacuation

travel time of less than 15 minutes fall below the resolution of the model and cannot be distinguished from no measurable change in travel time, as such differences occur within a single reporting interval rather than between intervals. In practical terms, small variations in total evacuation duration may reflect the aggregation of results to 15-minute increments rather than a meaningful shift in system performance. To supplement this limitation, comparison of link-level volume-to-capacity (V/C) ratios within each 15-minute time slice can be used to assess whether traffic conditions materially differ between scenarios. If incremental increases in demand do not appreciably change V/C ratios by more than 0.05 during the final 15 minutes of evacuation, the resulting differences in traffic volumes and travel times are considered operationally negligible and would not be perceptible to evacuees.[5] Given the scale of the evacuation scenarios and the variability in real-world conditions such as incident occurrence, driver response, and fire progression, minor fluctuations in modeled volumes or travel times should therefore be interpreted as within normal model variance rather than indicative of a material impact.

Scenario Analysis

Northeast Fire Scenario

The Northeast Fire Scenario is reflective of the 2017 Tubbs Fire and represents a wildfire originating northeast of the project site (e.g., Porter Creek Road/Calistoga Road area). In this scenario, the fire spreads from northeast to southwest toward the project site and surrounding communities. This scenario assumes evacuation of the northern two-thirds of the study area east of US 101. **Figure 1** includes a map of the Northeast Fire Scenario evacuation area.



The following roadways are assumed to be restricted to background traffic after the start of the evacuation:

- **Hidden Valley Road**: Northbound, north of Terrace Way
- **Chanate Road:** Eastbound, west of Terra Linda Drive, and Westbound, west of Montecito Avenue
- **Fountaingrove Parkway:** Eastbound, south of Thomas Lake Harris Drive, and Westbound, west of Chanate Road
- **Cross Creek Road**: Southbound, south of Mark West Springs Road
- **Wallace Road**: Northbound, north of Badger Road

These closures are intended to prevent non-evacuating traffic from traveling inward toward the evacuation zone.

[5] The use of 0.05 V/C as a measure of perceptible change in traffic conditions is supported by Circular 212 method for traffic impact studies at signalized intersections (*Interim Materials on Highway Capacity, Transportation Research Circular 212* (Transportation Research Board, January 1980).

Figure 1. Northeast Fire Scenario

Evacuation Travel Demand

Under an evacuation order, residents and workers in the evacuation area are required to vacate the area. **Table 2** displays the total number of households, employees, and estimated total number of vehicles that would need to evacuate in the Northeast Fire Scenario evacuation area**.** The proposed project would add 2,375 evacuation trips within this area.

Table 2. Northeast Fire Evacuation Vehicle Trips

Scenario	Total Number of Households	Total Number of Employees	Total Number of Visitors	Estimated Evacuation Demand[1]
2025 No Project	8,264	13,157	3,510	27,935
2025 Plus Project	9,764	13,197	3,590	30,310
Difference	**1,500**	**40**	**80**	**2,375**
2040 No Project	9,976	19,785	4,064	37,546
2040 Plus Project	11,476	19,825	4,144	39,921
Difference	**1,500**	**40**	**80**	**2,375**

Source: Fehr & Peers, 2026.
Notes:
1. Estimated evacuation demand is reported as the total number of evacuating vehicles.

Evacuation Distribution Assumptions

The evacuating trips in the Northeast Fire Scenario are assumed to proceed largely along direct and efficient routes to exit the evacuation area. Consequently, the general distribution of evacuating trips to evacuation gateways varies by trip origin:

- **Eastern part of the evacuation area**: 60% east along Montecito Boulevard and Badger Road, 25% east along Highway 12 toward Sonoma, 10% south along Highway 12/Farmers Lane, 5% to additional gateways to the south and west
- **Central part of the evacuation area**: 27% south into downtown Santa Rosa, 19% east along Highway 12 towards Sonoma, 16% south along Highway 12/Farmers Lane, 15% west across US 101 within Santa Rosa, 11% east along Montecito Boulevard and Badger Road, 11% south on US 101, 1% to additional gateways to the north
- **Western part of the evacuation area, including the project**: 60% west across US 101 within Santa Rosa, 15% south on US 101, 13% south into downtown Santa Rosa, 6% west along River Road, 4% north on US 101, 2% to additional gateways to the south and north
- **Northern part of the evacuation area**: 35% north on US 101, 20% west along River Road, 18% west across US 101 within Santa Rosa, 12% north along Old Redwood Highway, 10% south on US 101, 4% north on Mark West Springs Road, 1% to additional gateways to the south and east

Northeast Fire Scenario Results

Table 3 presents the modeled amount of time to exit the evacuation area of evacuation demand for the Northeast Fire scenario. These estimates are based on a set of assumptions described above and, given the unpredictable nature of fire behavior and evacuation patterns, should not be taken as an evacuation time standard for the evacuation area. **Attachment A** includes the DTA plots showing the

congestion during the evacuation in 15-minute increments, which is the minimum resolution of the model.

Table 3. Northeast Fire Evacuation Travel Time Estimates

Scenario	Total Elapsed Time to Exit Evacuation Area[1]		
	No Project	Plus Project	Delta
Base Year 2025	4 hours, 15 minutes	4 hours, 15 minutes	<15 minutes
Cumulative Year 2040	6 hours, 30 minutes	6 hours, 30 minutes	<15 minutes

Source: Fehr & Peers, 2026.
Notes:
1. Times are provided to the nearest 15 minutes.

The results of the Northeast Fire Scenario analysis indicate the project would contribute to an increase in travel time to exit the evacuation area of less than 15 minutes, which is the minimum resolution of the model. These results are reasonable given the large geographic area of the evacuation event and the numerous evacuation routes across the grid network south, southwest, and west of the project site.

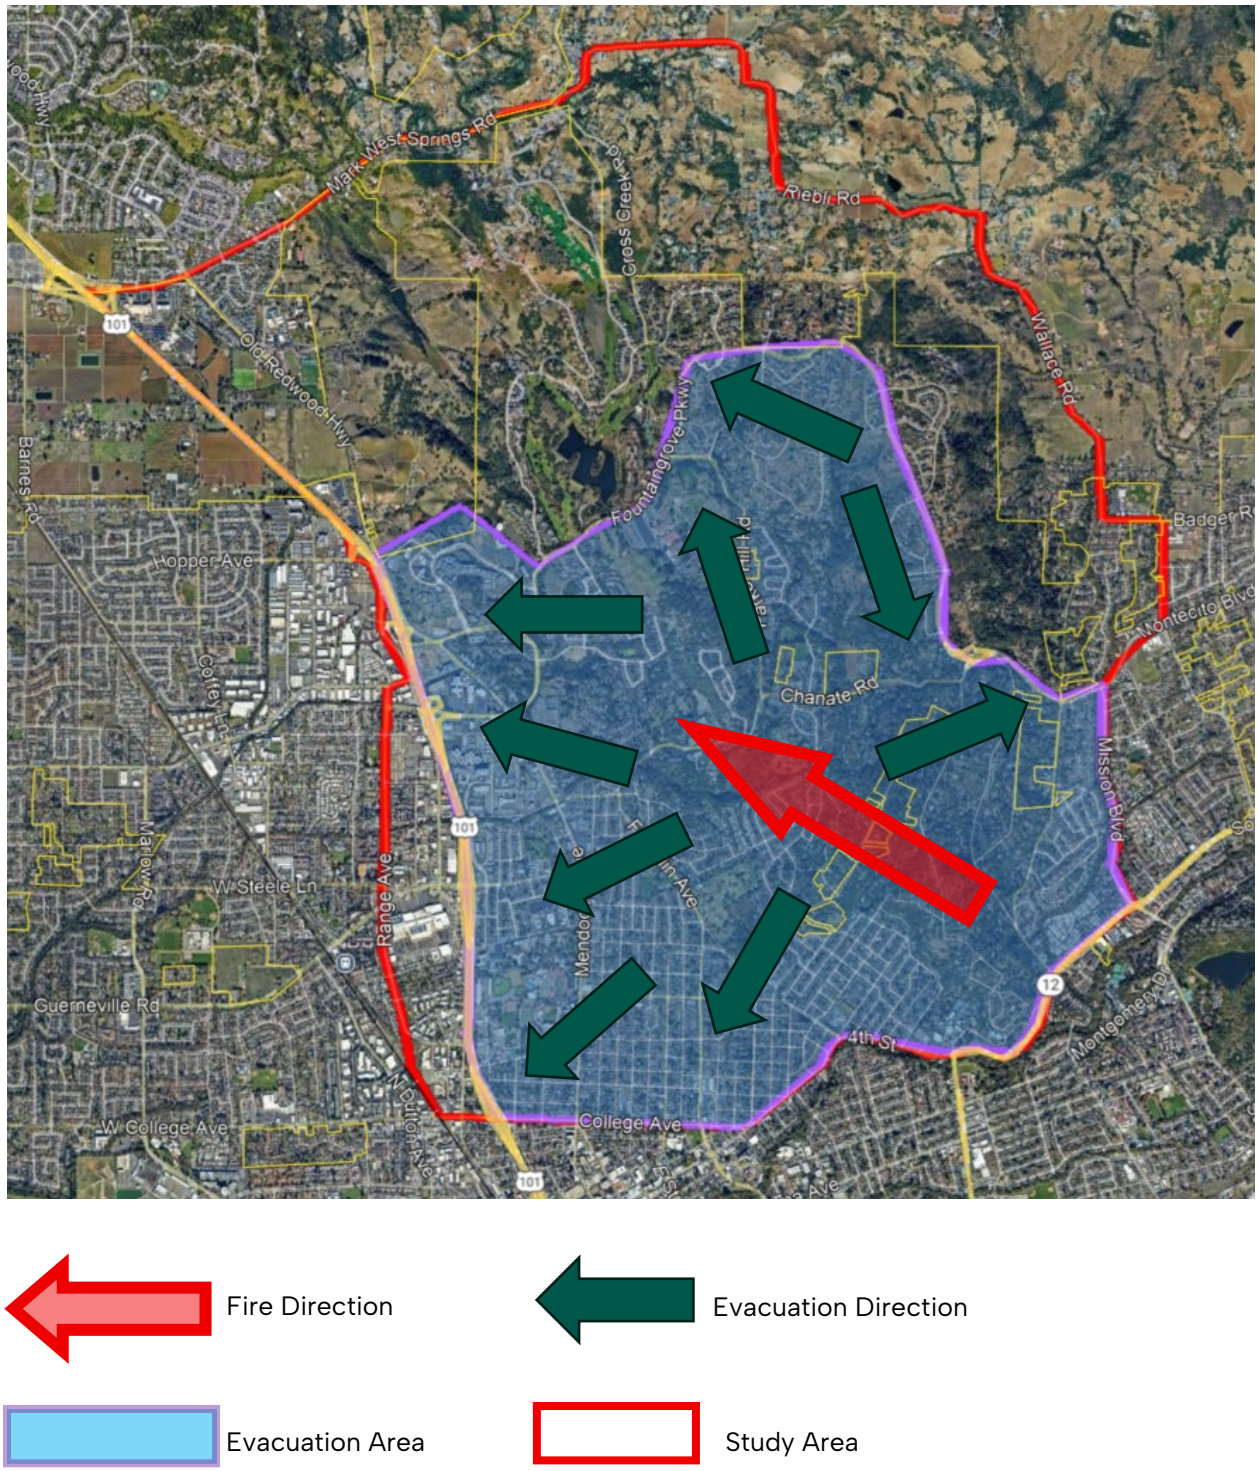
Given that the modeled increase in total evacuation travel time is smaller than the 15-minute reporting resolution of the EVAC+ model, Fehr & Peers conducted a supplemental review of link-level operations to confirm whether any meaningful degradation in traffic conditions would occur. Specifically, this review focused on the critical network location defined as the last roadway segment to operate below a volume-to-capacity (V/C) ratio of 0.75, which represents the threshold at which evacuation demand is considered fully discharged in the model. For the Northeast Fire Scenario, this critical segment is identified as Fountaingrove Parkway between Mendocino Avenue and Round Barn Boulevard.

Comparison of No Project and Plus Project conditions indicates that the project would result in an increase in V/C on this segment of less than 0.05 during the final 15 minutes of evacuation. Consistent with the model's documented sensitivity and limitations, changes of this magnitude fall within the inherent variability of the modeling framework and are not indicative of a material change in traffic operations. In practical terms, such a marginal increase in V/C would not result in observable differences in congestion levels, queue lengths, or travel speeds for evacuating vehicles.

Accordingly, even under a conservative assessment that examines localized conditions at the most constrained point in the network, the project does not produce a meaningful change in evacuation performance. This conclusion is further supported by the fact that the identified critical segment is located north of the project site and is not along the project's primary evacuation directionality, which are oriented toward US 101 via Bicentennial Way and Steele Lane. Therefore, the project's incremental contribution to evacuation travel time is effectively negligible and can reasonably be characterized as zero for CEQA impact assessment purposes.

Southeast Fire Scenario

The Southeast Fire Scenario represents an alternative fire scenario originating southeast of the project site (e.g., near Brush Creek Road/SR 12). In this scenario, the fire spreads from southeast to northwest toward the project site and surrounding communities. This scenario assumes evacuation of



the southern two-thirds of the study area east of US 101. **Figure 2** includes a map of the Southeast Fire Scenario evacuation area.

The following roadways are assumed to be restricted to background traffic after the start of the evacuation:

- **Chanate Road:** Southbound, south of Fountaingrove Parkway, and Eastbound, west of Terra Linda Drive
- **Brush Creek Road:** Southbound, south of Fountaingrove Parkway, and Northbound, north of Highway 12
- **Farmers Lane**: Northbound, north of Highway 12
- **Rogers Way**: Northbound, north of 4th Street
- **Montecito Avenue**: Northbound, north of Pacific Avenue
- **Hidden Valley Road**: Northbound, north of Terrace Way
- **Bicentennial Way:** Eastbound, east of Mendocino Avenue
- **Bicentennial Way ramp**: Southbound, at Fountaingrove Parkway
- **Stagecoach Road:** Eastbound, east of Fountaingrove Parkway

These closures are intended to prevent traffic non-evacuating traffic from traveling inward toward the evacuation zone.

Figure 2. Southeast Fire Scenario

Evacuation Travel Demand

Under an evacuation order, residents and workers in the evacuation area are required to vacate the area. The total number of households, employees, and the estimated total number of vehicles that would need to evacuate in the Southeast Fire Scenario evacuation area are shown in **Table 4.** The proposed project would add 2,375 evacuation trips within this area.

Table 4. Southeast Fire Evacuation Vehicle Trips

Scenario	Total Number of Households	Total Number of Employees	Total Number of Visitors	Estimated Evacuation Demand[1]

Source: Fehr & Peers, 2026.
Notes:
1. Estimated evacuation demand is reported as the total number of evacuating vehicles.

Evacuation Distribution Assumptions

The evacuating trips in the Southeast Fire Scenario are assumed to proceed largely along direct and efficient routes to exit the evacuation area. Consequently, the distribution of evacuating trips to evacuation gateways varies by trip origin:

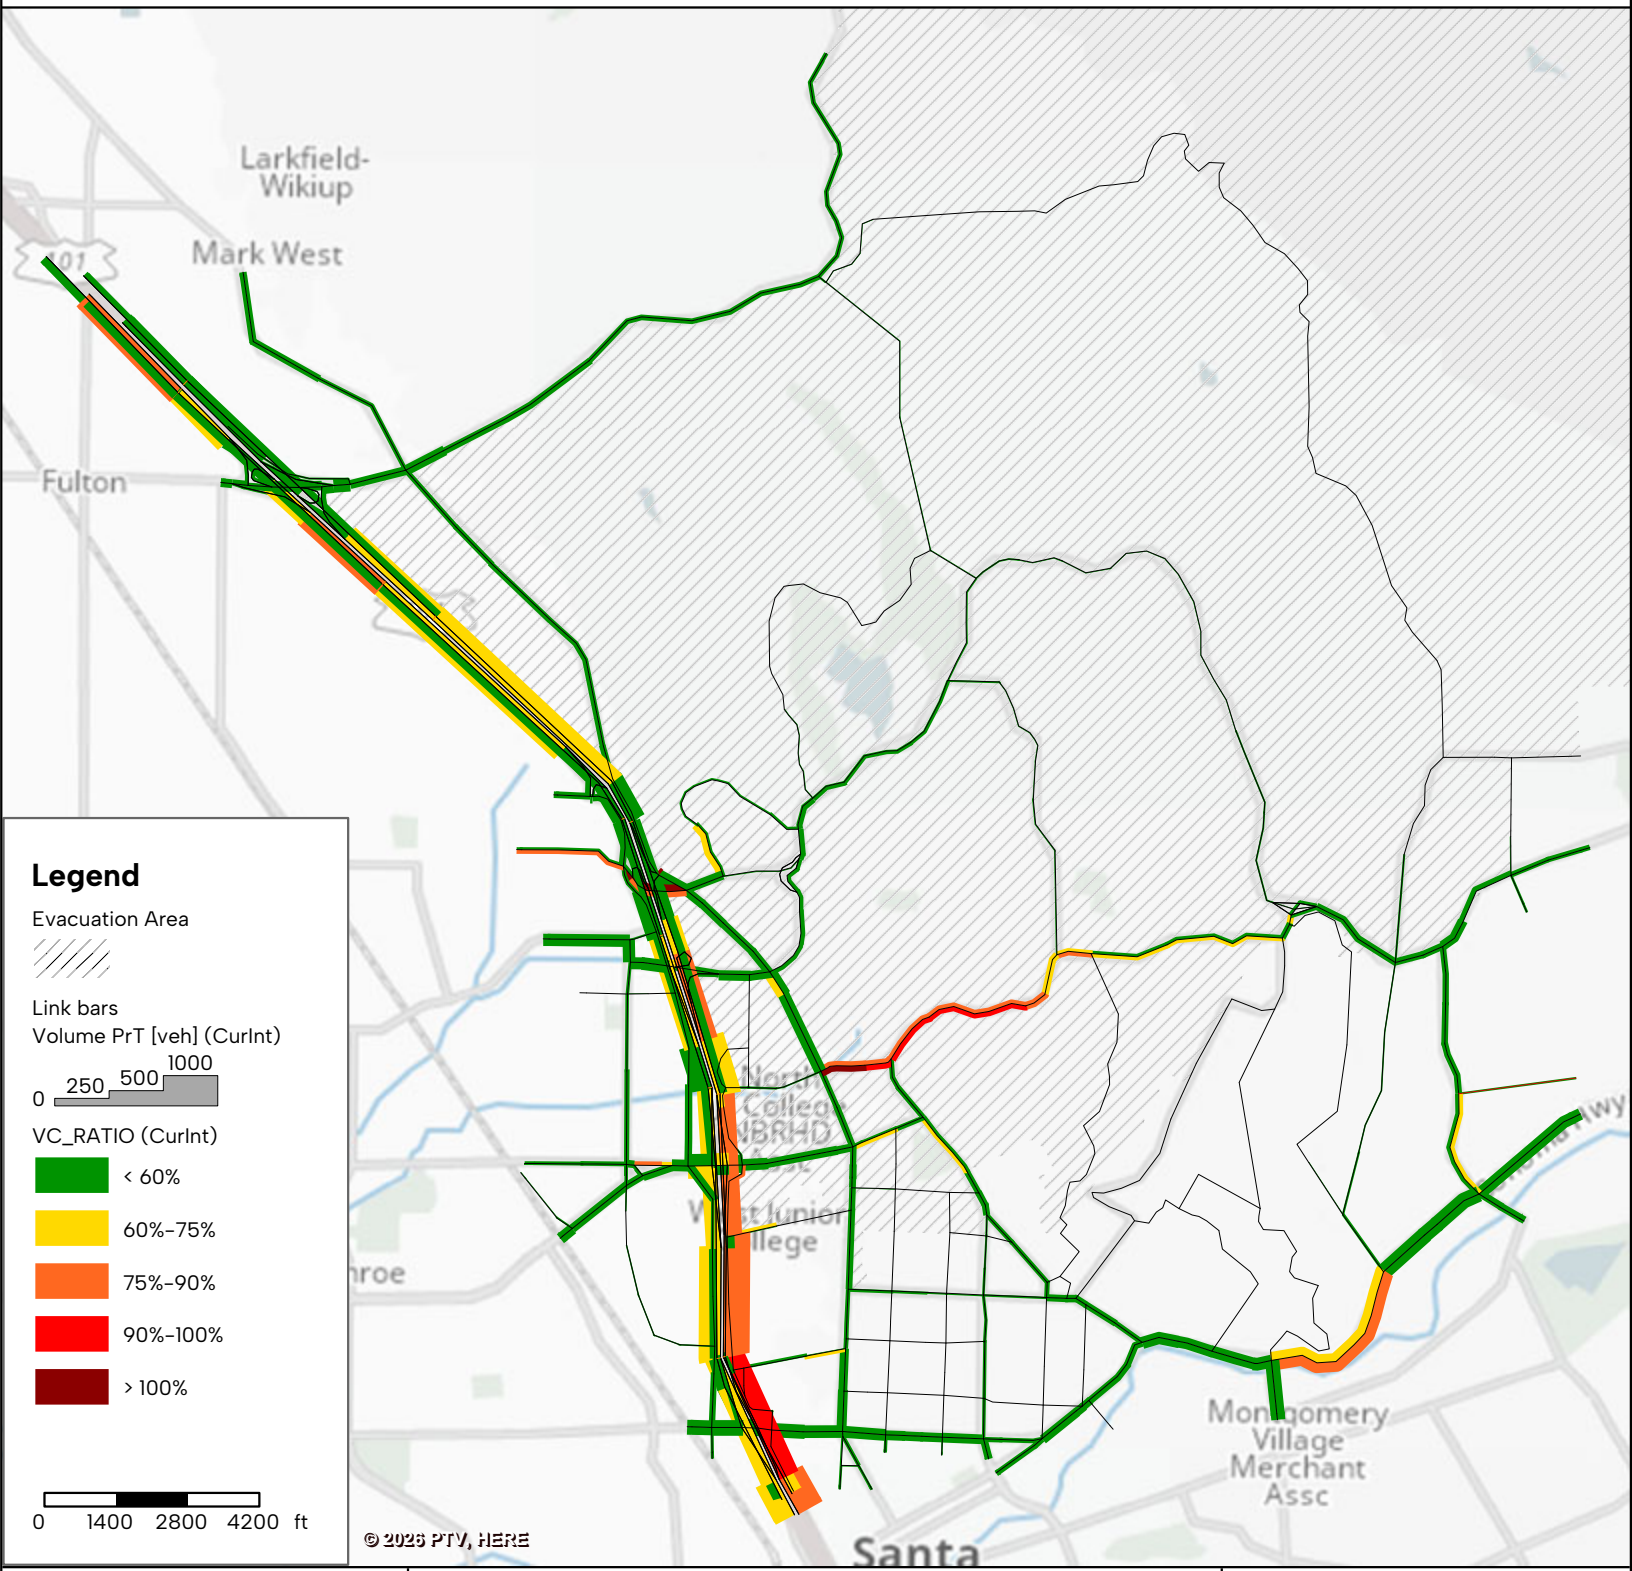
- **Eastern part of the evacuation area**: 50% east along Highway 12 toward Sonoma, 40% east along Montecito Boulevard and Badger Road, 5% south on US 101, 5% to additional gateways to the west and north
- **Southern part of the evacuation area, near central Santa Rosa**: 46% west across US 101 in Santa Rosa, 35% south into downtown Santa Rosa, 15% south on US 101, 4% to additional gateways to the north
- **Western part of the evacuation area, including the project**: 76% west across US 101 in Santa Rosa, 13% south on US 101, 5% north on US 101, 6% to other gateways to the south and north
- **Northern part of the evacuation area**: 42% west across US 101 in Santa Rosa, 18% north on US 101, 16% north on Mark West Springs Road, 12% north on Old Redwood Highway, 12% west on River Road

Southeast Fire Scenario Results

Table 5 presents the modeled amount of time to exit the evacuation area of evacuation demand for the Southeast Fire Scenario. These estimates are based on a set of assumptions described above and, given the unpredictable nature of fire behavior and evacuation patterns, should not be taken as an evacuation time standard for the evacuation area. **Attachment A** includes the DTA plots showing the congestion during the evacuation in 15-minute increments, which is the minimum resolution of the model.

Table 5. Southeast Fire Evacuation Travel Time Estimates

Scenario	Total Elapsed Time to Exit Evacuation Area (min)[1]		
	No Project	Plus Project	Delta
Base Year 2025	3 hours, 30 minutes	3 hours, 30 minutes	<15 minutes
Cumulative Year 2040	5 hours, 30 minutes	5 hours, 30 minutes	<15 minutes



Notes:
1. Times are provided to the nearest 15 minutes.

Source: Fehr & Peers, 2026.

Similar to the Northeast Fire Scenario, the Southeast Fire Scenario results indicate that the project would increase evacuation travel time by less than 15 minutes, which is below the model's reporting resolution. A supplemental review of link-level operations confirms that the associated change in V/C at the critical segment—Fountaingrove Parkway between Mendocino Avenue and Round Barn Boulevard—is less than 0.05 during the final 15 minutes of evacuation, reflecting a negligible operational effect. This segment is also located north of the project site and outside the project's primary evacuation directionality to US 101 via Bicentennial Way and Steele Lane. Accordingly, the project does not result in a meaningful change in evacuation performance, and its contribution to evacuation travel time is effectively negligible.
